Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTfPM) User Guide. This guide provides an overview on the OBTfPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTfPM:

- To create and handle trade finance transaction.

Overview

OBTfPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTfPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTfPM helps banks to manage trade finance operations across the globe in different currencies. OBTfPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export LC Cancellation

Export LC Cancellation process enables the user to cancel the LC which had been already advised.

The cancellation require consent from the beneficiary of the LC. In such scenarios, after the processing of cancellation, the cancelled LC is parked awaiting beneficiary consent.

In the following sections, let's look at the details for export LC cancellation process.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

Common Initiation Stage

The user can initiate the new export LC cancellation request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Advising Bank Reference	Select the advising bank reference.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

If the Letter Of Credit cancellation request is submitted through branch, the Export LC Cancellation process starts from the Registration Stage.

During registration stage, user can capture the basic details of the application and upload the related documents of the applicant. On submit of the request, the request will be available for an LC cancellation expert to handle the request in the next stage.

3. Using the entitled login credentials for registration stage, login to the OBTFPM application.

A screenshot of the FuTura Bank Sign In interface. The background is dark teal. At the top left is the FuTura Bank logo, which consists of a stylized 'F' icon followed by the text 'FuTura Bank'. Below the logo, the text 'Sign In' is displayed. There are two input fields: 'User Name *' with the text 'SRIDHAR' entered, and 'Password *' with masked characters '.....'. Below the input fields are two buttons: a green 'Sign In' button and a white 'Cancel' button.

4. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

5. Click Trade Finance> Export - Documentary Credit> Export LC Cancellation.

The registration stage has two sections Application Details and LC Details. Let's look at the details of registration screens below:

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
Remarks	Provide any additional information regarding the cancellation request. This information can be viewed by other users processing the request.	
Customer Instructions	Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View LC	Enables the user to view the latest LC values displayed in the respective fields. All fields displayed in LC details section are read only fields.	
Action Buttons		
Submit	On submit, task will get moved to next logical stage of Export LC Cancellation. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

Field	Description	Sample Values
Save & Close	Save the information provided and displays the task in you queue for working later. This option will not submit the request.	
Cancel	Cancels the Export LC Cancellation Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

Document Code	This field displays the document code from meta data.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

The screenshot shows a 'Documents' window with a 'Document Status' dropdown set to 'All'. There are three document cards: 'Letter of Credit' (with a red border), 'Pro-forma Invoice' (with a red border), and 'Application Form' (with a red border). Each card has an upload icon at the bottom. To the right, there is a card for 'wqwq.png' with a close button, creation details ('Created - 2022-06-28', 'By - PERI01'), and icons for search, edit, and download. A 'Close' button is at the bottom right.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Documents

The 'Edit Document' form contains the following fields:

Field	Value
Document Id	2400
Application Reference Number	PK2ILCI000019041
Document Type Id	TFCM_DOCTYPE001
Remarks	
Document Title	wqwq
Entity Reference Number	PK2ILCI000019041
Document Description	
Document Expiry Date	Jun 29, 2022

Below the fields is a dashed box with the text 'Drop files here or click to select' and a 'Current selected files: []' label. At the bottom right are 'Update' and 'Cancel' buttons.

Data Enrichment

As part of data enrichment, user can enter/update basic details of the incoming request.

Note

If the incoming message is MT 707, requests that are received via online channels like trade portal, external system and SWIFT should be available directly for further processing in OBTFPM from Scrutiny stage.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task at Data enrichment stage:

Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

FuTura Bank

If SWIFT code is not available then the bank's name and address to be defaulted.	

Field	Description	Sample Values
Advise Through Bank	Online Channel – User can update the details received. Non Online Channel - Search through LOV. Party type with banks must be displayed in LOV. • SWIFT code (if available) • Name and address of the bank On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.  Note In case the selected Bank is not RMA Compliant, the system displays error message “RMA arrangement not available”. In case of SWIFT MT707 message, this field is empty.	
Instructions to P/A/N Bank	Online Channel- User can update details received. Non online channel – Provide the details in this field.	
Sender to Receiver Information	Online Channel – User can update details received. Non Online Channel – Provide details (FFT).	
Charges	Online Channel – User can update details received. Non Online Channel – Provide details (FFT).	
Amendment charges payable by	Read only field.	

Information to Issuing Bank

Provide MT730 - Information to Issuing Bank details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver Information	Select a FFT to provide the additional information to receiver.	
Narrative	Select a FFT to provide the additional information from the advising bank to the issuing bank.	
Issuing Bank Account No	Select the issuing bank account number from the LOV.	

Field	Description	Sample Values
Charges to be Claimed	Select the FFT from the LOV for the charges to be claimed.	
Charges	Provide the charge details for advising.	
Issuing Bank Date	Select the issuing bank date.	
Account with Bank	Select the account to which the charges needs to be paid.	

Information to Advise Through Bank

Provide Information to Advise Through Bank details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver Information	Select a FFT to provide the additional information to receiver.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Overrides	Click to view the overrides accepted by the user.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

Limits & Collateral

Limit availability needs to be checked if involves increase in amount or tolerance or both. This is applicable for confirmation of the unconfirmed LC or increasing the amount or tolerance if already LC is already confirmed.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office

Provide the Limit Details based on the description in the following table:

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	

Field	Description	Sample Values
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Waive	Select the check box to waive charges/ commission. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Beneficiary' by Default. You can change the value to Applicant	

Field	Description	Sample Values
Settlement Account	Details of the Settlement Account.	

Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Tag amount that is maintained under the product code.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	If charges have to be waived, this check box has to be selected. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be beneficiary by default. You can change the value to applicant.	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

Field	Description	Sample Values
Component	Tax Component type	
Type	This field displays the type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.

- Preview - User can view the preview messages.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated in back office.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. Application displays mandatory documents to be uploaded for cancellation. Place holders are also available to upload additional documents submitted by the applicant.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	

Exceptions

The Export LC Cancellation request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account
