Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Guarantee Advise Amendment - Beneficiary Consent transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Advise Amendment - Beneficiary Consent - Islamic

As part of Guarantee Advice Amendment, the amendments may need consent from the beneficiary of the amendment and the amended Guarantee is parked awaiting beneficiary consent. Once the Beneficiary has accepted the amendment, the Guarantee amendment Confirmation will be triggered.

The various stages involved for Islamic Guarantee Advice Amendment Beneficiary Consent are:

- Input data and Upload of related mandatory and non-mandatory documents in Registration stage
- Input/Modify details of amendment of Guarantee - Data Enrichment stage
- Capture remarks for other users to check and act
- Notify customer on any negative statuses in any of the stages to the applicant
- Hand off request to back office for amendment confirmation

The design, development and functionality of the Islamic Guarantee Advice Amendment Beneficiary Consent process flow is similar to that of conventional Guarantee Advice Amendment Beneficiary Consent process flow.

This section contains the following topics:

Common Initiation Stage

Data Enrichment

Registration

Multi Level Approval

Common Initiation Stage

The user can initiate the new Islamic guarantee advise amendment beneficiary consent request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

The screenshot displays the Oracle OBTFPM application interface. On the left, a dark sidebar menu lists various tasks, with 'Initiate Task' selected and highlighted. The main content area is titled 'Initiate Task' and shows a 'Registration' form. The form includes two dropdown menus: 'Process Name' (set to 'Guarantee Advise Amendment B...') and 'Branch' (set to 'PK2-Oracle Banking Trade Finan...'). At the bottom right of the form, there are two buttons: 'Proceed' and 'Clear'. The top of the application shows the Oracle logo, user information '(DEFAULTTIVITY)', and a notification bell icon.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

During Registration stage, user can register the beneficiary consent response received for the amendment to Guarantee advised. User can enter the basic details of the amendment confirmation.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

A screenshot of the FuTura Bank Sign In interface. The background is dark teal. At the top left is the FuTura Bank logo, which consists of a stylized 'F' icon followed by the text 'FuTura Bank'. Below the logo, the text 'Sign In' is displayed. There are two input fields: 'User Name *' with the text 'SRIDHAR' entered, and 'Password *' with masked characters '.....'. Below the password field is a green 'Sign In' button. At the bottom center is a 'Cancel' link.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance - Islamic > Bank Guarantee Advice > Guarantee Advise Amendment - Beneficiary Consent - Islamic.**

The Registration stage has two sections Application Details and Beneficiary Response Capture. Let's look at the details of Registration screens below:

Limit and Collateral

In this section user can to attach more than one line. On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Limit Currency	Limit Currency will be defaulted in this field.	
Limit Available Amount	This field will display the value of available limit, i.e., limit available without any earmark.	
Limit Check Response	Response can be 'Success' or 'Limit not Available'.	
Response Message	Detailed Response message.	
Expiry Date	This field displays the date up to which the Line is valid	

Collateral Details

The screenshot shows a 'Collateral Details' pop-up window. It has two columns of fields. The left column includes 'Collateral Type' (dropdown menu showing 'Cash Collateral'), 'Currency' (text field showing 'GBP'), 'Settlement Account' (text field with a search icon showing '2030013460000000017'), 'Settlement Account Currency' (text field showing 'GBP'), 'Response' (text field showing 'Available'), and a 'Verify' button. The right column includes 'Collateral %' (text field with up/down arrows showing '20'), 'Contribution Amount' (text field showing '£4,000.00'), 'Settlement Account Branch' (text field showing '203'), 'Account Available Amount' (text field showing '£998,926,760.53'), 'Response Message' (text field showing 'The amount block can be performed as:'), and 'Save & Close' and 'Cancel' buttons at the bottom right.

Provide the collateral details based on the description provided in the following table:

Cash Collateral Details

Collateral Percentage	Specify the percentage of collateral to be linked to this transaction.	
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.	
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.	

Click + plus icon to add new collateral details.

Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.

Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.	
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.	
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.	
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.	

Collateral Contribution Amount	Collateral contribution amount will get defaulted in this field. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Settlement Account	Select the settlement account for the collateral.	
Settlement Account Currency	Settlement Account Currency will be auto-populated based on the Settlement Account selection.	
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.	
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.	
Account Available Amount	Read only field. Account available amount will be auto-populated based on the Settlement Account selection.	
Response	Response can be 'Success' or 'Amount not Available'. System populates the response on clicking the Verify button.	
Response Message	Detailed Response message. System populates the response on clicking the Verify button.	
Verify	Click to verify the account balance of the Settlement Account.	
Save & Close	Click to save and close the record.	
Cancel	Click to cancel the entry.	

Below fields appear in the **Cash Collateral Details** grid along with the above fields.

Collateral %	User must enter the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. System defaults the collateral % maintained for the customer into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display an override message "Defaulted Collateral Percentage modified".	
Contribution Amount	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Account Balance Check Response	This field displays the account balance check response.	
Delete Icon 	Click minus icon to remove any existing Collateral Details.	
Edit Link	Click edit link to edit any existing Collateral Details.	

Commission, Charges and Taxes Details

Click on **Default Charges** button to the default commission, charges and tax if any will get populated.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Commission Details

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	

Field	Description	Sample Values
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Waive	Select the check box to waive charges/ commission. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	If charges have to be waived, this check box has to be selected. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	

Field	Description	Sample Values
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Provide the Tax Details based on the information in the following table:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.
