Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of Trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Advise Cancellation

As a part of Guarantee Advise Cancellation, the user requests for cancellation of a Guarantee/SBLC advised. On the issuing bank request, the Guarantee Advise Cancellation is initiated. The cancellation request is indicated in the incoming MT 767 message, field 23S Cancellation Request.

If the field 23S has value 'CANCEL', then Guarantee/SBLC should be initiated.

This section contains the following topics:

Common Initiation Stage

Common Initiation Stage

Document Linkage

Multi Level Authorization

Common Initiation Stage

The user can initiate the Guarantee Advise Cancellation request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.

Field	Description
Clear	The user can clear the contents update and can input values again.

Registration

The first stage of Guarantee Advise Cancellation process starts from the Registration Stage. During Registration stage, the user can register Guarantee/SBLC Cancellation request received from the Applicant. If the Guarantee Advise cancellation request is given through email or physical application form (courier), the user can update the request.

The user has the option to submit, hold, save and hold and cancel the application

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
3. Click **Trade Finance > Bank Guarantee Advise > Guarantee Advise Cancellation**.

The Registration stage has two sections Application Details and Guarantee Details. Let's look at the details of Registration screens below:

Enables the user to upload required documents. Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. System displays the mandatory and optional documents that are maintained in Document Maintenance. If mandatory documents are not uploaded, system should display an error on submit.	

Field	Description	Sample Values
Remarks	Provide any additional information regarding the Guarantee Advice. This information can be viewed by other users processing the request.	
Customer Instructions	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
View Guarantee/SBLC	Clicking on View Guarantee/SBLC button enables user to view the details of the Guarantee/SBLC.	
Guarantee/SBLC Events	Clicking on Events button enables the user to view the snapshot of various events under the Guarantee/SBLC details.	
Action Buttons		
Submit	On Submit, system trigger advice to the customer and will give confirmation message for successful submission. Task will get moved to next logical stage of Guarantee Advice Cancellation. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	The task gets canceled and system should clear the Guarantee Advice Cancellation Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	
Verify Signature	System will display the details of Authorized signatories. The pop up box will display the signature id, signature title and image of the signature for verification.	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	
Document Title	Specify the document title.	
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

- Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
Search Result		
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	
Document Code	This field displays the document code from meta data.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

The screenshot shows a 'Documents' interface. At the top, there's a 'Document Status' dropdown menu set to 'All'. Below this, there are three main sections. The first two are 'Letter of Credit' and 'Pro-forma Invoice', each with an 'Application Form' and an upload icon. The third section shows a file named 'wqwq.png' with a close button, creation date '2022-06-28', and user 'PERI01'. Below these are icons for search, edit, and download. A 'Close' button is at the bottom right.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Document screen appears.

The screenshot shows the 'Edit Document' screen. It has two columns of input fields. The left column contains 'Document Id' (2400), 'Application Reference Number' (PK2ILCI000019041), 'Document Type Id' (TFPM_DOCTYPE001), and 'Remarks'. The right column contains 'Document Title' (wqwq), 'Entity Reference Number' (PK2ILCI000019041), 'Document Description', 'Document Expiry Date' (Jun 29, 2022), and a calendar icon. Below the input fields is a dashed box with the text 'Drop files here or click to select' and 'Current selected files: []'. At the bottom right are 'Update' and 'Cancel' buttons.

Data Enrichment

As part of Data Enrichment, user can register and update the Guarantee Cancellation request received from the Issuing Bank. If the request is received by mail/Courier, the user should be able to update the request. In case the message is received by SWIFT, then the cancellation task needs to be auto created and available for the user to handle.

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

The image shows the login screen for FuTura Bank. It has a dark blue background with the bank's logo at the top. Below the logo, it says "Sign In". There are two input fields: "User Name *" with the text "SRIDHAR" and "Password *" with masked characters. Below these fields are two buttons: a green "Sign In" button and a white "Cancel" button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance> Tasks> Free Tasks**.

The screenshot shows the Oracle OBTFPM application interface. On the left is a navigation menu with "Free Tasks" highlighted. The main area displays a table of tasks. The table has columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Customer Number. The first row is selected, showing a task in the "DataEnrichment" stage. At the bottom, there is a pagination bar showing "Page 1 of 84 (1 - 20 of 1666 items)".

Additional Details

In the Additional details section, the user can verify/input/update the additional details data segment of the Guarantee/SBLC Cancellation request.

Guarantee cancellation may have impact on the Charges & Commission section.

Limit and Collateral

The limits and collateral details are displayed as tile. The tiles displays a list of important fields with values.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Note

For Guarantee Advising MT 760, user can input the values, applicable if Advising bank confirms undertaking.
