Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Issuance Closure

The Guarantee Issuance Closure process enables the closure of a Guarantee/SBLC after the expiry date but before the auto closure date. Guarantees/SBLC have a pre-scheduled auto closure date, which is a few days after the expiry of undertaking.

In the subsequent sections, let's look at the details for Guarantee Issuance Closure process:

This section contains the following topics:

Common Initiation Stage	Registration
Document Linkage	Multi Level Approval
Customer - Acknowledgement letter Format	Customer - Reject Letter Format

Common Initiation Stage

The user can initiate the new guarantee issuance request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

The screenshot shows the Oracle OBTFPM application interface. On the left, a dark sidebar contains a navigation menu with items like 'Core Maintenance', 'Dashboard', 'Machine Learning', 'Maintenance', 'Security Management', 'Tasks', 'Trade Finance', 'Administration', 'Bank Guarantee Advice', 'Bank Guarantee Issuan...', 'Enquiry', 'Event Logs', 'Export - Documentary ...', 'Import - Documentary ...', 'Initiate Task' (highlighted with a red box), 'Shipping Guarantee', and 'Swift Processing'. The main content area is titled 'Initiate Task' and features a 'Registration' section. This section has three input fields: 'Process Name' with a dropdown menu showing 'Guarantee Issuance', 'Customer Id' with a text input containing '000823' and a search icon, and 'Branch' with a dropdown menu showing '000-FLEXCUBE UNIVERSAL BANK'. To the right of these fields are two buttons: 'Proceed' and 'Clear'. The top right corner of the interface shows the user's login information: 'JEEVA02' and 'subham@gmail.com'.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Customer ID	Select the customer id of the applicant or applicant's bank.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The user can register a request for the Closure of Guarantee/SBLC Issued received at the front desk (as an application received physically/received by mail/fax).

During registration stage, user can capture the basic details of the application, check the signature of the applicant and upload the related documents of the applicant. It also enables the user to capture some additional product related details as an option. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for a Guarantee Issuance expert to handle the request in the next stage

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

The image shows a login interface for FuTura Bank. At the top left is the FuTura Bank logo, which consists of a stylized 'F' icon followed by the text 'FuTura Bank'. Below the logo is the heading 'Sign In'. There are two input fields: 'User Name *' with the text 'SRIDHAR' entered, and 'Password *' with masked characters '.....'. Below these fields are two buttons: a green 'Sign In' button and a white 'Cancel' button with a grey border.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Bank Guarantee Issuance> Guarantee Issuance Closure.

The registration stage has two sections Application Details and SBLC/Guarantee Details. Let's look at the registration screens below:

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Provide any additional information regarding the Guarantee Issuance. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	

Field	Description	Sample Values
Customer Instructions	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Undertaking	On click of this button, all SBLC/Guarantee details is displayed.	
Undertaking Events	On click of this button, User can view all the Undertaking events under the Guarantee/ SBLC Issued till date.	
Action Buttons	After providing required data, user can perform one of the below actions.	
Submit	On Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Guarantee Issuance Closure. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	On click of Cancel, the task gets cancelled and system should clear the details captured in the screen. The task will get deleted.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Document Code	This field displays the document code from meta data.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

The screenshot shows a 'Documents' window with a 'Document Status' dropdown set to 'All'. There are three main document cards. The first card, titled 'Letter of Credit', contains a 'Pro-forma Invoice' and an upload icon. The second card, also titled 'Letter of Credit', contains an 'Application Form' and an upload icon. The third card shows a file named 'wqwq.png' with a close button, creation details ('Created - 2022-06-28', 'By - PERI01'), a thumbnail, and icons for search, edit, and download. A 'Close' button is at the bottom right.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Document screen appears.

The 'Edit Document' screen contains two columns of input fields. The left column includes 'Document Id' (2400), 'Application Reference Number' (PK2ILCI000019041), 'Document Type Id' (TFPM_DOCTYPE001), and 'Remarks'. The right column includes 'Document Title' (wqwq), 'Entity Reference Number' (PK2ILCI000019041), 'Document Description', 'Document Expiry Date' (Jun 29, 2022), and a file upload area with the text 'Drop files here or click to select' and 'Current selected files: []'. 'Update' and 'Cancel' buttons are at the bottom right.

Data Enrichment

On successful completion of registration of a Guarantee issuance request, the request moves to the Data Enrichment stage. At this stage the gathered information during registration are scrutinized. The transaction will have the details entered during the registration stage.

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

The image shows the login screen for FuTura Bank. It has a dark blue header with the FuTura Bank logo. Below the header, the text "Sign In" is displayed. There are two input fields: "User Name *" with the value "SRIDHAR" and "Password *" with masked characters. A green "Sign In" button is at the bottom.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance> Tasks> Free Tasks**.

Cancel	On click of Cancel, the task gets cancelled and system should clear the details captured in the screen. The task will get deleted.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	

Field	Description	Sample Values
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Back	Click Back to move the task to the previous segment.	

Multi Level Approval

Approval user can review and approve the Closure of Guarantee/SBLC Issued. The user can view the summary of details updated in multilevel approval stage for Closure of Guarantee/SBLC Issued request.

The user log i to the application to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Undertaking Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
