Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import Documentary Collection Update Booking - Islamic

Details of Import Documentary Collection can be updated before liquidation, changes can be for Collection amount, Maturity Date, etc. The update can be requested through Online/Offline channels.

The various stages involved for Import Doc Collection update are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input application details
- Upload of related mandatory and non-mandatory documents received from the presenting bank
- Verify documents and capture details (Online/Non Online Channels)- Data Enrichment stage
- Input/Modify details of update Collection - Data Enrichment stage
- Check for limit availability if applicable
- Check balance availability for amount block if applicable
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Import Doc Collection Update process flow is similar to that of conventional Import Doc Collection Update process flow.

This section contains the following topics:

Common Initiation Stage	Reject Approval
Registration	Data Enrichment
Exceptions	Multi Level Approval

Common Initiation Stage

The user can initiate the new Islamic import collection update request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

The screenshot shows the Oracle Trade Finance 'Initiate Task' registration form. The left sidebar contains a menu with options: Security Management, Task Management, Tasks, Trade Finance, Administration, Bank Guarantee Advise, Bank Guarantee Issuance, Common Group Message, Enquiry, Export - Documentary Collection, Export - Documentary Credit, Import - Documentary Collection, Import - Documentary Credit, Initiate Task (highlighted), Maintenance, and Process Initiation. The main form area is titled 'Registration' and contains two dropdown menus: 'Process Name' with the value 'Islamic Export Documentary Coll...' and 'Branch *' with the value 'PK2-Oracle Banking Trade Finan...'. At the bottom right of the form are two buttons: 'Proceed' and 'Clear'. The top header bar shows the Oracle logo, the title 'Initiate Task', and user information including '(DEFAULTTENTITY)', 'Oracle Banking Trade Finan...', 'May 3, 2021', a notification bell, and the user 'ZARTAB02' with email 'subham@gmail.com'.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

User can register request for an Islamic Import Doc Collection Booking Update at the front desk (as an application received physically/Courier). During Registration stage, user can capture the basic details of the transaction, check the signature of the applicant and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Documentary Collection Number	Provide the documentary collection Number. Alternatively, user can search the documentary collection reference using LOV. In the LOV, user can search giving any combination details of Documentary Collection Number, Drawer, Currency, Amount, Product Code and Booking Date to fetch the collection details. Based on the search result, select the applicable documentary collection to update the details.	
Drawee	Read only field. Drawee ID and name will be auto-populated based on the selected Documentary Collection Number. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.  Note If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message.	
Branch	Read only field. Branch details will be auto-populated based on the selected Documentary Collection Number.	203-Bank Futura -Branch FZ1

Field	Description	Sample Values
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit of task in Registration stage.	High
Submission Mode	Select the submission mode of Import Collection Update Booking request. By default the submission mode will have the value as 'Desk'. Desk- Request received through Desk Courier- Request received through Courier	Desk
Update Date	By default, the application will display branch's current date.	04/13/2018
Remitting Bank/Remitter	Read only field. Remitting Bank/Remitter will be auto-populated based on the selected Documentary Collection Number. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.  Note In case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".	
Remitting Bank/Remitting Bank Reference	Read only field. Remitting Bank/Remitting Bank Reference will be auto-populated based on the selected Documentary Collection Number.	
Process Reference Number	Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.	
Remitting Bank Date/ Remitting Date	Read only field. Remitting Bank Date/Remitting Date will be auto-populated based on the selected Documentary Collection Number.	
Version Number	Version Number will be auto-generated.	

Collection Details

Registration user can provide collection details in this section. Alternately, details can be provided by Data Enrichment user.

Provide the Collection Details based on the description in the following table:

Field	Description	Sample Values
Documents Received	Read only field. Documents Received will be auto-populated based on the selected Documentary Collection Number.	
Duplicate	If a Duplicate (second set) of Import document is received, the user has to initiate Import Collection update process. User has to select the option as ' Second ' in " Document Received " and has to set the "Duplicate" toggle to Yes. This toggle when enabled, does not allow the user to update any other field within the task except for capturing the remarks.	
Tenor Type	Read only field. Tenor will be auto-populated based on the selected Documentary Collection Number. If Tenor type is Mixed, system should disable user input in Liquidation and Unlinked FX rate field. On Submit user will get an error message.	
Product Code	Read only field. Product Code will be auto-populated from the collection booking.	
Product Description	Read only field. This field displays the description of the product as per the product code.	

Field	Description	Sample Values
Operation Type	Operation type will be auto-populated from the collection booking. User can update the operation code, if required. The options are: • DIS • COL • FOP - Free of Payment for bills booked with operation Collection or Acceptance.  Note Change of Operation from Collection or Acceptance to Free of Payment should be enabled only for Documentary Bills not under LC.  Note User cannot change the operation type, If the operation code is set as ADV or COL or DIS in collection Booking.  Note User can change the operation type to ADV or DIS, if the operation code is set as ACC in collection booking.	
Stage	System displays the stage of the transaction. User can change the value from initial to final.  Note User cannot change the stage value from Final to initial.  Note For Operation Type, FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.	
Co-Acceptance Required	Co-Acceptance toggle will be preset from the collection booking. User can update if required. Toggle 'Yes': Set the toggle to 'Yes', if the co-acceptance has been requested. Toggle 'No': By default the toggle will be set to 'No' which implies the co-acceptance has not been is not required.	

Field	Description	Sample Values
Contract Reference Number	System to populate contract reference number from the back end system once the Documentary Collection Number is selected.	
Bill Amount	Read only field. Bill amount will be auto-populated based on the selected Documentary Collection Reference.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Bill Outstanding Amount	Read only field. Bill Outstanding Amount will be auto-populated from the collection booking.	
Finance Amount	Read only field. Finance Amount will be auto-populated based on the selected Documentary Collection Number.	
Acceptance Date	Provide the acceptance date.	
Drawer	Read only field. Drawer Name will be auto-populated from the collection booking. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.  Note If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message.	
Limit verification required	Toggle On- Enables for limit verification. If the toggle is disabled and Finance amount has been provided, the system prompts an override message on Submit.	
Rebate Amount	Provide rebate to the bill outstanding amount.	
Transferee Bank	Select the Transferee Bank from the LOV. The name of the transferee bank appears in the adjacent field. This field is enabled, if Operation Type is TRF .

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the collection booking update.	
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.	

Action Buttons

Submit	On submit, task will move to next logical stage of Import Documentary Update Collection Booking. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Import Documentary Collection Booking Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

Data Enrichment

On successful completion of registration of an Import Collection Update Booking, the request moves to Data Enrichment stage. A DE user can input Islamic Import Doc Collection update. As part of data enrichment, user can enter/update basic details of the incoming request.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It has a dark blue header with the bank's logo and name. Below the header, the text "Sign In" is displayed. There are two input fields: "User Name *" with the text "SRIDHAR" and "Password *" with masked characters. A green "Sign In" button is at the bottom.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image shows the dashboard of the FuTura Bank application. The left sidebar contains navigation links: Core Maintenance, Dashboard (selected), Maintenance, Tasks, and Trade Finance. The main area displays several widgets:

- Draft Confirmation Pending:** A table with columns Customer Name, Application Date, and a status column. Data rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns Branch, Process Name, and Stage Name. Data row: Bank Futura, NA, Retry HandOf.
- Priority Details:** A table with columns Branch, Process Name, and Stage Name. Data rows include Bank Futura (NA, Amount Blo), Bank Futura (NA, Amount Blo), and 004 (NA, Loan Applic).
- High Value Transactions:** A bubble chart showing transaction values for GBP. The x-axis ranges from -2 to 12, and the y-axis ranges from -20K to 140K. Bubbles are clustered around x=0 and x=4.
- SLA Breach Details:** A table with columns Customer Name, SLA Breached(mins), and Priority. Data rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns Branch, Process Name, and Stage Name. Data row: 203, Cucumber Testing, test descrip.
- Hold Transactions:** A table with columns Branch, Process Name, and Stage Name.
- SLA Status:** A table with columns Branch, Process Name, and Stage Name. Data row: Cucumber Testing.
- Tasks Detailed:** A table with columns Branch, Process Name, and Stage Name. Data row: Cucumber Testing.

The Data Enrichment stage has sections as follows:

- Main Details
- Document Details
- Other Details
- Maturity Details

- Additional Fields
- Advices
- Settlement Details
- Updated Details
- Additional Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields in Application Details that are already having value from registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

**Note**

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same.(Display only field if Submission mode is Online.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Document Details

This section enables the user to enter/ update Documents and conditions details for Islamic Import Collection Update.

As part of document details screen in DE stage the user can capture the Transport Document reference and document date. On click of 'Next' system should validate the value in Document Reference field against the transport document/Bill of Lading (MARDOC) against any Outstanding Shipping Guarantees issued for the drawee and is not linked to any Documentary Collection or Import Letter of Credit. System should default the Shipping Guarantee Reference in the next screen.

System to display an override if the Bill Of Lading reference mentioned in the document details screen matches with that of the Bill of Lading reference in any of the unlinked Shipping Guarantees issued for the customer.

FX Linkage

This section enables the user to link the existing FX contract(s) to the bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following table:

FX Linkage

FX Linkage

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message " Value Date is different from Transaction Date for one or more Accounting entries.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Submit	Task will move to next logical stage of Import Documentary Collection Update Booking. If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	

Exceptions

The Import Collection Update Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify details provided for charges, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the Import Collection Update Booking Amount Block Exception check.	

Field	Description	Sample Values
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.

- Message Preview - User can view the preview of the simulating message to the remitting bank.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the Import Collection Booking KYC exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

**Note**

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the amount block exception details.

- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the Import Collection Update Booking Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

A User can view the summary of details updated in multilevel approval stage of Import Collection update request. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving. User sees the summary tiles. The tiles should display a list of important fields with values. User can also drill down from summary Tiles into respective data segments where user can verify the details of all fields under the data segment.

On successful Handoff, system triggers TRFB event in the Back office.

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTfM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the 'My Tasks' interface in the FuTura Bank system. On the left is a navigation menu with options like Dashboard, Maintenance, Tasks, Completed Tasks, My Tasks (selected), Free Tasks, Hold Tasks, Supervisor Tasks, and Trade Finance. The main area shows a table of tasks with columns for Edit, Priority, and Application Number. Two tasks are listed with application numbers 203ILCISS000000888 and 203ILCISS000000817. A modal window is open for the first task, allowing re-keying of fields: Applicant Party (001345), Currency (GBP), Amount (£15,000.00), Beneficiary Party (001344), and Expiry Date (08/17/18). Each field has a green checkmark indicating it matches the existing data. The modal includes 'Proceed' and 'Cancel' buttons. In the background, a table shows transaction details with columns for Amount, Process Name, and Stage.

Amount	Process Name	Stage
£15,000.00	Import LC	Approval1
£99,999.00	Import LC	Scrutiny

- Message Preview - User can view the preview of the simulated messages to remitting bank.
- Other Preferences - User can view the details of the preferences selected.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
