Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Drawing Islamic

Under an import LC, the beneficiary of the LC after exporting the goods under LC submits the documents under the LC to the nominated bank. The nominated bank scrutinizes/negotiates and forwards the document to the Issuing bank. Issuing bank will lodge the same under import LC Drawing of Islamic process in OBTFPM.

The various stages involved for Islamic Import LC Drawing are:

- Receive and verify documents
- Input Import Drawing details
- Upload of related mandatory and non-mandatory documents.
- Verif/capture details and check documents for Discrepancies-Scrutiny Stage
- Input/Modify details of Import Drawing - Data Enrichment stage
- Check for limit availability if applicable.
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Import LC Drawing process flow is similar to that of conventional Import LC Drawing process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Scrutiny	Data Enrichment
Exceptions	Multi Level Approval
Reject Approval	

Common Initiation Stage

The user can initiate the new import LC drawing request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
LC Reference Number	Select the LC Reference Number.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

User can register a request for an Islamic Import LC Drawing at the front desk. During registration the user captures the basic details of the drawing and upload related documents. On submit of the request, the request should be available for an LC Drawing expert to handle in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

Provide the Basic Details based on the description in the following table:

Field	Description	Sample Values
Documentary Credit Number	<p>Provide the documentary credit number. Alternatively, user can search the documentary credit number using LOV.</p> <p>In the LOV, user can input Customer ID, Beneficiary, Currency, Amount and User Reference to fetch the LC details. Based on the search result, select the applicable LC for drawing.</p>	

Field	Description	Sample Values
Received From - Customer ID	Read only field. Customer ID will be auto-populated based on the selected LC from the LOV.	001344
Received From - Customer Name	Read only field. Customer Name will be auto-populated based on the selected LC from the LOV.	EMR & CO
Branch	Read only field. Branch details will be auto-populated based on the selected LC from the LOV.	203-Bank Futura -Branch FZ1
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit.	High
Submission Mode	Select the submission mode of Import LC Drawing request. By default the submission mode will have the value as 'Desk'. Desk- Request received through Desk Courier- Request received through Courier	Desk
Drawing Date	By default, the application will display branch's current date and does not enables the user to change the date to any back date.	04/13/2018

Field	Description	Sample Values
Presenting Bank	<p>Select the Presenting Bank.</p> <p>Click the look up icon to search the presenting bank based on Party ID/Party Name. You can also input the party ID and on tab out system will validate and populate the 'Presenting Bank' name.</p> <p> Note</p> <p>In case the selected Bank is not RMA Compliant, the system displays error message “RMA arrangement not available, Only MT999 messages can be sent to the bank”.</p> <p> Note</p> <p>If the Presenting Bank and the Presenting Bank Reference is already available for another Drawing under the same LC, system displays an error message, “Drawing (Drawing Ref) already Exists with same Presenting Bank Reference Ref no. Please use Update Process and Mark the Documents as Duplicate”.</p>	
Presenting Bank Reference Number	User can enter the reference number provided by the presenting bank.	
Document Received Date	<p>By default, the application will display branch's current date and enables the user to change the date to any back date.</p> <p> Note</p> <p>Future date selection is not allowed.</p>	

LC Drawing Details

Registration user can provide drawing details in this section. Alternately, drawing details can be provided by Scrutiny user.

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the LC.	
Remarks	Provide any additional information regarding the drawing. This information can be viewed by other users processing the request.	
View LC	Enables the user to view the latest LC values displayed in the respective fields. All fields displayed in LC details section are read only fields.	
Events	On click, system will display the details of LC issuance, amendments (if any), drawings (if any) and liquidations if any under the LC in chronological sequence from LC Issuance.	

Action Buttons

Field	Description	Sample Values
Submit	On submit, task will get moved to next logical stage of Import LC Drawing. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancels the Import LC Drawing Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Scrutiny

On successful completion of Registration of an Import LC Drawing request, the request moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized for Islamic Import LC Drawing.

As part of scrutiny, the User will enter/update basic details of the Islamic LC Drawing request, check documents for discrepancies and can verify if the request can be progressed further.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The screenshot shows the Futura Bank Dashboard. The left sidebar contains navigation links: Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main area displays several widgets:

- Draft Confirmation Pending:** A table with columns: Customer Name, Application Date, and a status column. Data rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns: Branch, Process Name, and Stage Name. Data rows include Bank Futura, NA, and Retry HandOff.
- Priority Details:** A table with columns: Branch, Process Name, and Stage Name. Data rows include Bank Futura, NA, and Amount Blo.
- High Value Transactions:** A bubble chart showing transactions over time (x-axis: -2 to 12, y-axis: -20K to 140K). A legend indicates GBP.
- SLA Breach Details:** A table with columns: Customer Name, SLA Breached(mins), and Priority. Data rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns: Branch, Process Name, and Stage Name. Data rows include 203, Cucumber Testing, and test descrip.
- Hold Transactions:** A table with columns: Branch, Process Name, and Stage Name.
- SLA Status:** A dropdown menu currently showing 'Cucumber Testing'.
- Tasks Detailed:** A dropdown menu currently showing 'Cucumber Testing'.

3. Click Trade Finance> Tasks> Free Tasks.

The screenshot shows the Oracle Free Tasks page. The left sidebar contains navigation links: Core Maintenance, Dashboard, Machine Learning, Security Management, Task Management, Tasks, Awaiting Customer Clarification, Business Process Maintenance, Completed Tasks, Free Tasks, and Hold Tasks. The main area displays a table of tasks:

Component	This field displays the commission component.	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	

Field	Description	Sample Values
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	If check box is selected, charges/commissions has to be deferred and collected at any future step.	
Waive	<p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

Assignment of Proceeds

In this tile, assignment details for the applicable processes is displayed. Proceeds can be assigned only if the parties have been assigned during drawing or update drawing process.

Assignment of Proceeds ✕

Field	Description	Sample Values
Assignment Paid By Importer	Slide the toggle if assignment is paid by importer.	

Field	Description	Sample Values
Sequence	User can update the sequence number.	
Assignee ID & Assignee Details	<p>User can select the assignee id. Assignee details appear based on selected assignee ID.</p> <p>User can add multiple assignees to a single Bill under LC with the assignment amount or assignment percentage of parent LC.</p>  <p>Note WALKIN customers is allowed as assignee.</p>	
Assignment %	User can input the percentage of LC amount that has be assigned to the assignee. Once the user updates the rate, the system has to calculate the amount as per assigned rate and default in the assigned amount field. If the user directly captures the assigned amount then the assigned percentage has to calculate the percentage and the same to be populated in the screen. If contribution is more than 100%, system to display an alert message. Once contribution % is input system will default the amount. System to validate that Limit Contribution percentage plus Collateral percentage is equal to 100. Otherwise system to provide override.The assignment percentage should be rounded to two decimal places	
Currency	User can select the account currency of the settlement account of the assignee. Only the currencies for which the settlement account is available, only those currency will be displayed.	
Assigned Amount	User can input the amount that has to be assigned to the assignee. If the user has already inputted the assignment percentage, system to calculate the amount and populate the value	
Assignee Bank Details	User can select the assignee bank.	
Account with Institution	User can select the account number of the Account with Institution.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV.</p> <p>On select and save and close, system defaults the available amount, bot currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>	

Field	Description	Sample Values
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available ContractAmount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Summary

User can review the summary of details captured under Islamic Import LC Drawing stage.

The tiles must display a list of important fields with values. User can drill down the tile and view the details provided in the various data segments.

Data Enrichment

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task at Data Enrichment stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The screenshot shows the Futura Bank Dashboard. The left sidebar contains navigation links: Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main area displays several widgets:

- Draft Confirmation Pending:** A table with columns: Customer Name, Application Date, and Status. Data rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns: Branch, Process Name, and Stage Name. Data rows include Bank Futura (NA, Retry HandOff).
- Priority Details:** A table with columns: Branch, Process Name, and Stage Name. Data rows include Bank Futura (NA, Amount Blo), Bank Futura (NA, Amount Blo), and 004 (NA, Loan Applic).
- High Value Transactions:** A chart showing transaction values over time. The Y-axis ranges from -20K to 140K. The X-axis ranges from -2 to 12. Data points are shown for GBP.
- SLA Breach Details:** A table with columns: Customer Name, SLA Breached(mins), and Priority. Data rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns: Branch, Process Name, and Stage Name. Data rows include 203 (Cucumber Testing, test descrip).
- Hold Transactions:** A table with columns: Branch, Process Name, and Stage Name.
- SLA Status:** A table with columns: Branch, Process Name, and Stage Name. Data rows include Cucumber Testing.
- Tasks Detailed:** A table with columns: Branch, Process Name, and Stage Name. Data rows include Cucumber Testing.

3. Click Trade Finance> Tasks> Free Tasks.

The screenshot shows the Oracle Free Tasks page. The left sidebar contains navigation links: Core Maintenance, Dashboard, Machine Learning, Security Management, Task Management, Tasks, Awaiting Customer Clarification, Business Process Maintenance, Completed Tasks, Free Tasks, and Hold Tasks. The main area displays a table of tasks:

Tracer Receiver Party	Read only field. 'Applicant' will be defaulted as tracer receiver party.	
Tracer Start Date	Capture the tracer start date. If the date is earlier than system date, system to display an error message.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the drawing. User can link one or more FX deals to a drawing/bill. The linked value of an FX deal(s) must not exceed the value of the drawing/bill.

FX contract linkage with the Drawing/Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the drawing/bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.

- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate

Provide the FX linkage detail based on the description in the following table:

FX Linkage									
FX Linkage

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Submit	Task will get moved to next logical stage of Import LC Drawing. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Exceptions

As per regulatory requirement, all tasks are scrutinized for KYC, Compliance and Sanctions. The checks to external system/internal system is initiated after the Data Enrichment stage.

The amount Block Earmark and Limit Earmarks, if applicable are also initiated after the Data Enrichment stage.

If a negative response is received for any of the checks, the task lands in respective exceptional queue which require further manual handling/approval.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Application

Refer to [Application Details](#).

Amount Block Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance- Limits• R5 - Others	
Cancel	<p>Cancel the Import LC Drawing Amount Block Exception check.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the customer. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can select a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Application

Refer to [Goods Details](#).

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Import LC Drawing KYC exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Application

Refer to [Application Details](#).

Limit/Credit Check

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Import LC Amendment Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

User can view the summary of details updated in multilevel approval stage of Islamic Import LC Drawing.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawing Currency
- Drawing Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

The screenshot shows the 'Free Tasks' section of the Futura Bank interface. A modal window titled 'Approval Rekey' is displayed over a table of tasks. The modal has three tabs: 'Incoming Message', 'Documents', and 'Remarks'. The 'Incoming Message' tab is active, showing 'Drawing Currency' as 'GBP' and 'Drawing Amount' as '£100,000.00'. The background table lists tasks with columns: Action, Priority, Application Number, Process Name, Stage, and Back Office Ref No. The table shows several rows of tasks, including 'Export LC Advising' and 'Import LC Amendment'.

Application

Refer to [Application Details](#).

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Incoming Message	Displays the incoming message, if any.	

Action Buttons

Proceed	On proceed, the screen navigates to approval summary screen.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R5 - Others 	
Cancel	Cancel the Import LC Drawing Approval Rekey.

Cancel	Cancel the approval.	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import LC Drawing in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Application Details

The application details data segment have values for requests received from both non-online and online channels.

Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Beneficiary Response - User can view beneficiary response details.
- Discrepancy Details - User can view the discrepancy details of the drawing.
