1. About this Manual

Introduction 1.1

This manual is designed to help you to quickly get familiar with the Dashboard module of Oracle Banking Payments. It takes you through the various stages in processing a Payments transaction.

Audience 1.2

This manual is intended for the following User/User Roles:

Role	Function
Payment Department Operators	Payments Transaction Input functions except Authorization
Back Office Payment Department Operators	Payments related maintenances/Payment Transaction Input functions except Authorization
Payment Department Officers	Payments Maintenance/ Transaction Authorization
Bank's Financial Controller/ Payment Department Manager	Host level processing related setup for PM module and PM Dashboard/Query functions

1.3 **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

1.4 **Organization**

This manual is organized into the following chapters:

Chapter	Description
Chapter 1	About this Manual gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Maintenance Screens</i> - This chapter helps you to get familiar with various Dashboard maintenances.
Chapter 3	<i>Transactions Dashboards</i> - This chapter helps you provide the details of Transaction Dashboards.
Chapter 4	<i>Exception & Investigation Queues Dashboards</i> - This chapter helps you to provide the details of Exception & Investigation Queues Dashboards.
Chapter 5	SEPA Dashboards - This chapter helps you to provide the details of SEPA Payments Dashboards.
Chapter 6	<i>SWIFT Dashboards</i> - This chapter helps you to provide the details of Cross-border / RTGS Payments Dashboards.

1.5 <u>Glossary of Icons</u>

This User Manual may refer to all or some of the following icons:

lcons	Function	
×	Exit	
+	Add row	
-	Delete row	
Q	Option List	

2. Maintenances

2.1 Network Cutoff Priority Maintenance

You can maintain the priority time limit for a Network based on the Network Cutoff. Payments Queues Dashboard Summary list the count of the transactions pending in queues for which Network cutoff is due within the priority window maintained below.

You can invoke the 'Network Cutoff Priority Maintenance' screen by typing 'PMDNCTPR' in the field at the top right corner of the application tool bar and clicking the adjoining arrow button. Click New button on the Application tool bar.

Network	k Cutoff Priority Main	teinan	ce					- ×
Save								
		Host	Code *			Desc	iption	
K < 1	Of 1 🕨 🕅							+ - =
	Network Code *		Network Description	Payment Type	Network Cutoff Time	Priority Window (In Minutes)		
		Q				•		
	Maker Checker		Date Ti Date Ti		Mo	d No	Record Status Authorization	Cancel
	CHECKEI		Date II	inie.			Status	

Following fields gets defaulted with values:

- Host Code
- Description

Specify the following fields:

Network Code

Select the Network Code from the LOV.

Network Description

Displays the description of the selected network.

Payment Type

Select the payment type from the drop-down values. The options are:

- ACH
- Book Transfer
- Faster Payments
- US NACHA
- Cross Border
- RTGS
- IMPS

Network Cutoff Time

Displays the Cutoff Time maintained for the selected network.

Priority Window (In Minutes)

Select the cutoff time limit from the drop-down values. The drop-down contains time limit values from 30 to 120 minutes with an interval of 15 minutes. Default value is null.

2.2 Dashboard Priority Maintenance

You can maintain the priority limit monitor in the inbound Recall received ACH transaction which is not yet responded with Recall Acceptance or Reject. Transactions whose recall response due date gets breached within the window period maintained here are considered for the count in Dashboard priority maintenance.

The same maintenance can be used for maintaining the tracking days for Inbound Inquiry messages, which are not responded to yet.

You can invoke the 'Dashboard Priority Maintenances' screen by typing 'PMDRLTPR' in the field at the top right corner of the application toolbar and clicking the adjoining arrow button. Click New button on the Application toolbar.

Dashb	Dashboard Priority Maintenance – X

\sim				0 ~		0 🗸			
с	Maker Checker		Date Time: Date Time:	Mod No	Record Status Authorization Status		Exi	it	

Following fields gets defaulted with values:

- Host Code
- Description

Specify the following fields:

Network Code

Select the Network Code from the LOV.

Recall Response Days

Displays the recall response days of the selected network.

Priority Window (In Days)

Select the priority days from the drop-down values. The drop-down contains values from 0 to 10 days. Default value is null.

Note

On save, system validates that the priority days is less than or equal to Recall response days maintained for Inbound payments in Network Preferences.

Inquiry Response Days

Displays the inquiry response days of the selected network.

Inquiry Response Priority

Select the inquiry response priority days from the drop-down values. The drop-down contains values from 0 to 10 days. Default value is null.

2.2.1 Dashboard Priority Maintenance Summary

You can view the summary of dashboard priority using 'Dashboard Priority Maintenance Summary' screen. To invoke this screen, type 'PMSRLTPR' in the field at the top right corner of the application toolbar and click the adjoining arrow button.

Dashboard Priority Maintenance Summary – X						
Search Advanced Search Reset Clear All

Host Code	Q					
Records per page 15 V 🛛 🚽 1 Of 1 🕨 🕅	Go Lock Columns 0 V					
Authorization Status Record Status Host Code						
	Exit					

You can search for the dashboard priority using one or more of the following parameters:

- Authorization status
- Record status
- Host Code

Once you have specified the search parameters, click 'Search' button. The system displays the records that match the search criteria. Double click a record to view the detailed dashboard priority maintenance screen.

3. Transactions Dashboards

3.1 Payments Dashboard Summary

The Payments Dashboard screen provides the matrix of completed or under processing transactions that are in various statuses for the logged in host.

In this dashboard screen, you can view the total transaction count for each payment type across all branch codes under the logged in host code with their corresponding transaction statuses.

Payments Dashboard Summary									
Payment	Liquidated	Pending	Rejected	Cancelled	Returned	Reversed	Future Valued	Recall Requested	F

On the click on the **Refresh** button, the system refreshes the total count of transactions for the logged in host.

You can select and click any payment type to get a count for every network code and transaction type combination with the corresponding transaction status.

The following statuses are displayed in the dashboard:

- Liquidated
- Pending
- Rejected
- Returned
- Cancelled
- Reversed
- Future Valued
- Recall Requested
- Reversal Initiated
- Seized
- Return Initiated
- Return Seized
- Return Cancelled
- Reject Initiated
- Reject Seized
- Reject Cancelled

The transaction count is displayed for the following payment types:

• XBORDER (Cross Border)

3-1 ORACLE

- BOOK
- RTGS (RTGS FIN)
- ACH (SEPA Credit)
- DD (SEPA Direct Debits)
- FASTERPAY (SEPA Instant)
- FEDWIRE
- USACH Credit (US NACHA Credit)
- USACH Debit (US NACHA Debit)
- USRTP
- NEFT (India NEFT)
- India RTGS
- IMPS (India IMPS)

From dashboard screen, it is possible to drill down to a particular transaction.

On clicking the link for a Payment type, system displays the Outgoing and Incoming transactions per Network code of the selected payment type in different statuses, in a separate window.

Payments Status Detail - X

						LXIL

Note

- Auto-refresh feature is not available. You must click on the Refresh button to refresh the screen.
- The count will be displayed as 'zero' if there are no transactions for a specific transaction type and status combination.

The following statuses indicates the corresponding details:

Action	Description
Liquidated	Displays the total count of transactions for a specific network code and transaction type combination, which are completed successfully and dispatched to Network for the specified branch code.
Pending	Displays the count of transactions for a specific network code and trans- action type combination which are authorized and pending in progress, but are not currently present in any of the Exception Queues.
Rejected	Displays the count of transactions that are marked with transaction sta- tus as 'Rejected' or "Network Rejected".
Returned	Displays the count of transactions that are marked with transaction sta- tus as 'Returned'.
Recall Requested	Displays the count of transactions for which Recall is requested but not yet approved or rejected.
Reversed	Displays the count of transactions for a specific network code and trans- action type combination with Transaction status as 'Reversed'.
R Initiated	Displays the count of transactions whose reversal transaction are pend- ing in Exception Queues.
Future Val- ued	Displays the count of future valued transactions that are booked in the system and marked for future dated processing.

3.2 Manual Payments Dashboard

The Manual Payments Dashboard screen displays the transaction count of transactions booked manually by various Authorization Statuses and Payment types.

In this dashboard screen, you can view the total transaction count for each payment type across all branch codes under the logged in host code with their corresponding transaction statuses.

Manual Payments Dashboard Summary 🔍 🕨 💍 🚥								
Payment	Authorized	Rejected	Unauthorized					
BOOK	2	0	0					

On the click on the **Refresh** button, the system refreshes the total count of transactions for the logged in host.

You can select and click any payment type to get a count for every network code and transaction type combination with the corresponding transaction status.

The following statuses are displayed in the dashboard:

- Authorized
- Rejected
- Unauthorized

The transaction count is displayed for the following payment types:

- ACH (SEPA CT)
- BOOK
- RTGS
- Cross Border
- DD (SEPA DD)
- ACHCT
- ACHDD
- US Fedwire
- US NACHA CT
- US NACHA DD

From dashboard screen, it is possible to drill down to a particular transaction.

On clicking the link for a Payment type, the system displays all the networks for the selected payment and the transaction count by transaction type Outgoing and Incoming, and Authorization statuses Authorized, Unauthorized, and Rejected in a separate window.

Note

- Auto-refresh feature is not available. You must click on the Refresh button to refresh the screen.
- The count will be displayed as 'zero' if there are no transactions for a specific transaction type and status combination.

The following statuses indicates the corresponding details:

Action	Description
Authorized	Displays the count of authorized transactions for a specific network code and transaction type combination.
Unauthor- ized	Displays the count of unauthorized transactions for a specific network code and transaction type combination.

Action	Description
Rejected	Displays the count of transactions that are marked with contract status as 'Rejected' or "Network Rejected".

3.3 Maker Dashboard for Payments

This Dashboard lists the payments booked on Current Date where the Maker of the payments is the logged-in user:

Maker Dashboard for Paym	ents		∢ ⊳ ¢ …
Network	Unauthorized	Authorized	Rejected

The following transaction types are considered:

- Outgoing
- Incoming
- Reversals

Number pf Payments are listed based on the Network and Authorization status. The following Authorization statuses are considered:

- Unauthorized
- Authorized
- Rejected

3.4 Authorizer Dashboard for Unauthorized Payments

This Dashboard lists the payments in 'Unauthorized' status which are booked on current date:

Authorizer Dashboard for Unauthorized Payments		•	۲	C	••••
Network	Unauthorized				

The transaction is counted only if

- It is in unauthorized status
- The logged-in user has access to Authorize operation for that function ID
- Transaction Amount is less than or equal to the User Authorization Limit allowed for the transaction (based on PMDUSRLT if record is available, else based on PMDROLLT)

3.5 Message Status Dashboard

The Message Status Dashboard screen provides the details of the SWIFT/RTGS transactions and message statuses count only for the logged in host.

On the click on the **Refresh** button, the system refreshes the total count of transactions and message statuses for the logged in host.

Dashboard lists the number of messages based on the:

- ACK/NAK received
- Delivery Notification Received
- RTGS Funding Notification

The following statuses are displayed Network-Wise:

- Pending ACK Acknowledgement not yet received from SWIFT
- ACK Received
- NAK received
- Delivered On receiving MT 011 delivery notification
- Non-delivered MT 010 Non –delivery warning is received
- MT 012 Received Funding notification received from SWIFT for RTGS messages sent
- MT 019 Received Abort Notification received for RTGS message sent
- Notification Pending -Yet to receive MT 012 / MT 019 notification for RTGS message sent

							-
	Network TARGET2						
< 1 Of 1 <	Go						+ - =
Network	Pending ACK	ACK Received	NAK Received	Delivered	Non Delivered	MT012 Received	MT019 Rec
TARGET2	335	30		3	0	1	7
Me	ssage Status Pending ACK	¥					

On selecting a row, a detailed screen gets opened and the user can select the status for which the list of messages to be viewed.

Based on the status selected, Outbound Message Browser screen gets opened with related messages displayed.

4. Exception & Investigation Queues Dashboards

4.1 Payments Queues Dashboard Summary

The Payments Dashboard screen provides the count of Total or Unauthorized transactions held in various exceptional queues of the logged in host code.

The Payments Queues Dashboard Summary lists:

- Payment Type Total Count of transactions pending in different Exception Queues.
- Payment Type Unauthorized Count of transactions held in Exception Queues for authorization for any queue action initiated.

transaction type combination with the corresponding exception status.

Select a particular row for which further drill down is required and provide the queue name and click the View button. The particular Queue opens with the list of transactions applicable for the row selected.

The following queues are available in the dashboard:

Queue Code	Name of Queue	Description
TR	Repair Queue	Displays the total count of transactions for a specific net- work code and transaction type combination that are in Repair Queue for the logged in host code.
BO	Business Override Queue	Displays the total count of transactions for a specific net- work code and transaction type combination, which are in Business Override Queue for the logged in host code.
PE	Process Exception Queue	Displays the count of transactions for a specific network code and transaction type combination which are in Process Exception Queue for the logged in host.

PC	Processing Cut-off Queue	Displays the count of transactions for a specific network code and transaction type combination which are in Processing Cut Off Queue for the
NC	Network Post cut off Queue	Displays the count of transactions for a specific network code and transaction type combination which are in Net- work Cut Off Queue for the logged in host.
AL	Auth Limit 1 and 2 Queue	Displays the count of transactions for a specific network code and transaction type combination which are in Auth 1 and Auth 2 limit for the logged in
EC	ECA	Displays the count of transactions for a specific network code and transaction type combination which are in ECA Queue for the logged in host.
EA	EAC	Displays the count of transactions for a specific network code and transaction type combination which are in EAC Queue for the logged in host.
EE	Exchange Rate Queue	Displays the count of transactions for a specific network code and transaction type combination which are in Exchange Rate Queue for the logged in host.
SC	Sanction Check Queue	Displays the count of transactions for a specific network code and transaction type combination which are in Sanc- tions Queue for the logged in host.
FC	FX Unwind Queue	Displays the number of pending transactions in the FX Unwind Queue for the logged in Host.
FV	Warehouse Queue	Displays the number of pending transactions in the Ware- house Queue for the logged in host.
SI	Standing Instruction Queue	Displays the number of pending transactions in the Stand- ing Instruction Queue for the logged in host.
EQ	EU Payer Queue	Display the number of pending transactions in the EU Payer Queue for the logged in host.
NS	Non STP	Display the number of pending transactions in the Non STP Queue for the logged in host.
IR	Inbound Cancella- tion Request Queue	Display the number of pending transactions in the Inbound Cancellation Request Queue for the logged in host.

Note

- Auto-refresh feature is not available. You must click on the Refresh button to refresh the screen.
- The count will be displayed as 'zero' if there are no transactions for a specific transaction type and status combination.

4.2 Pending Queue Items Dashboard Summary

The Pending Queue Items Dashboard Summary screen provides the list of transactions pending in message processing Queues across all branch codes under the logged in host code

The following queues are available in the dashboard:

- Network Resolution Queue
- SEPA R-Processing Queue
- Accounting Queue
- SEPA Dispatch Browser
- ACH Dispatch File Browser
- STP Queue
- ACH R Processing Queue
- Incoming Unmatched Queue

Pending	Queue Items Dashboard S	ummary							< > 0 ····
Status	Network Resolution Queue	SEPA R-Processing	Accounting Queu	9	SEPA Dispatch Browser	ACH Dispatch File Browser	STP Queue	ACH R Processing Queue	Incoming Unmatched Queue
PENDING	155		0	0	26	0	(0	42

On the click on the Refresh button, the system refreshes the total count of pending transactions.

Select a particular row for which further drill down is required and provide the queue name and click the View button. The particular Queue opens with the list of transactions applicable for the row selected.

4.3 Maker Queue Dashboard for Pending Transactions

This Dashboard is available for transactions pending in Exception Queues for which no queue action is initiated yet. The transaction is counted only if the user has access for any of the queue actions other than Authorize /Verify/Reject

Maker Queu	ue Das	hboard	for P	ending	Tran	sactior	ıs								• •	C	
Network	TR	PC	NC	A1	A2	EC	EE	SC	BO	PE	EA	FV	SI	FC	EQ	NS	IR
-																	
-																	
-																	
2																	
-																	

The transaction is counted if:

- No queue action is initiated yet for the transaction
- The logged-in user has access to Queue and any of the Queue actions except Authorize/Verify/Reject (based on PMDUSRQA, if available; else based on PMDROLQA)
- No Queue user restriction is applicable for the User (Based on PMDUSRQR if available; else PMDDROLQR)
- Transaction Amount is less than or equal to the User Input Limit allowed for the transaction (PMDUSERLT if maintained; else PMDROLLT)

4.4 <u>Authorizer Dashboard for Unauthorized Queue Ac-</u> tions

The Queue record is counted for this Dashboard only if:

- A queue action is in unauthorized status
- The logged-in user has access to Authorize action for that Queue (based on PMDUSRQA, if available; else based on PMDROLQA)
- No Queue user restriction is applicable for the Authorizer (Based on PMDUSRQR if available; else PMDDROLQR)
- Transaction Amount is less than or equal to the User Authorization Limit allowed for the transaction (PMDUSERLT if maintained; else PMDROLLT)

4.5 Missed SLA Queue Dashboard

'Missed SLA Queue Dashboard' is provided to list the transactions which are pending in Non STP Queue, Repair queue & ECA Queue for which the time limit stipulated in Customer Preferences is breached. For this, the system considers the difference between the Payment request received time and current time.

Number of Payments are listed based on the Network for each queue:

Missed SLA Queue Dashb	ooard		∢ ⊳ C …
Network	Non STP Queue	Repair Queue	ECA Queue

On the click on the Refresh button, the system refreshes the total count of pending Inbound ACH transactions.

4-6 ORACLE®

5. SEPA Dashboards

5.1 Recall Priority Dashboard

The Recall Priority Dashboard screen provides the list of pending Inbound ACH transactions, yet to be responded with acceptance or rejection of recall received.

This dashboard displays the count of all Inbound ACH transactions which are in recall requested status whose recall response due date gets breached within in the priority days maintained in Dashboard Priority Maintenance (PMDRLTPR) screen.

Recall Priority Dashboard		< > C ···
Network	Recall response pending	
STEP2SCT	12	

On the click on the Refresh button, the system refreshes the total count of pending Inbound ACH transactions.

6. SWIFT Dashboards

6.1 <u>Outbound Payments Dashboard - Confirmations Re-</u> ceived Status

This dashboard displays the count of Outbound originated gCCT/gCOV payments by various confirmation statuses. The criteria for considering the gCCT/gCOV payments are as below.

- Outbound Cross Border/RTGS Customer Transfer/Cover Transfer type payments
- Payment level 'gpi Agent' flag is 'Yes'
- Originated payments SWIFT / Fedwire pass-through flag is No

This dashboard displays the transaction data for last 2 calendar days.

6.1.1 Outbound Payment Dashboards Confirmation Received Status

Outbound Paymen	t Dashboards Confirmation	on Received Status		c
gpi Payment Type	Total Messages	Confirmed Messages	Rejected Messages	Awaiting
				^
				*
<				>

gpi Payment Type

Values listed are gCCT & gCOV.

Total Messages

Count of gCCT/gCOV payments (Transaction Status is processed / reversed).

Confirmed Messages

For gCCT payments - Count of payments with latest gCCT confirmation status as Credit Confirmed (ACCC or ACSC).

For gCOV payments - Count of payments with confirmation status as Credit Confirmed (Status code received in the last gCOV confirmation is ACCC or ACSC).

Rejected Messages

For gCCT payments - Count of payments with latest gCCT confirmation status as Reject Confirmed (RJCT).

For gCOV payments - Count of payments with confirmation status as Reject Confirmed (RJCT).

Awaiting any Confirmation

For gCCT payments - Count of payments no confirmation message received so far.

For gCOV payments - Count of payments for which no confirmation message received so far.

Interim Confirmations

For gCCT payments - Count of payments with latest confirmation status as Pending (ACSP).

For gCOV payments - Count of payments with latest confirmation status as Pending (ACSP).

Once user clicks on the payment type, Outbound Payments Dashboard Detailed - Confirmations Received Status screen is displayed.

6.1.1.1 <u>Outbound Payments Dashboard Detailed - Confirmations Received Status</u>

You can change the number of days and click on Populate button to view gCCT/gCOV transactions count for more than 2 calendar days. (e.g. If number of days is provided as 5 then dashboard displays the count of last 5 days after clicking Populate button)

Confirmation Status field displays the status as Confirmed Messages, Rejected Messages, Awaiting any Confirmation and Interim Confirmations.
