1. About this Manual

1.1 Introduction

This manual is designed to help acquaint you with Receivables and Payables within Oracle Banking Supply Chain Finance (Oracle Banking Supply Chain Finance).

It provides an overview of the system and guides you, through the various steps involved in setting up and providing the receivables and payables services for the customers of your bank.

1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office executive	Input functions for transactions
Back office managers/officers	Authorization functions
Product Managers	Product definition and authorization

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/us/corporate/accessibility/index.html.

1.4 Document Structure

This manual is organized into the following chapters:

Chapter	Description
Chapter 1	About this manual: This chapter gives information on the intended audience, abbreviations, icons, and summary of chapters covered in this user manual.
Chapter 2	Receivables and Payables - an overview: This chapter lists the benefits and functionalities provided by the receivables and payables module.
Chapter 3	Setting up reference data for the system.
Chapter 4	Creating Receivables and Payables
Chapter 5	Receivables and Payables Management
Chapter 6	Dynamic Discount Management
Chapter 7	Payment Management
Chapter 8	Manual Allocation
Chapter 9	Manual Reconciliation
Chapter 10	Performing inquiries
Chapter 11	File Management
Chapter 12	Machine Learning
Chapter 13	List of Batch Jobs

Chapter	Description	
Chapter 13	List of Process Codes	

1.5 Abbreviations

Abbreviation	Detailed Description
OBCM	Oracle Banking Cash Management
OBSCF	Oracle Banking Supply Chain Finance
VAM	Virtual Account Management
FIFO	First In First Out
LIFO	Last In First Out
CIF	Customer Information File
CMS	Cash Management System
PDC	Post Dated Cheque
CDC	Current Dated Cheque
PUA	Payment Under Approval

1.6 Glossary of Icons

This User Manual may refer to all or some of the following icons:

G	View

2. Receivables and Payables

2.1 Overview

In Oracle Banking Supply Chain Finance, the Receivables and Payables module enables a financial institution to create and manage account receivables and payables of corporate customers. Data from disparate accounts and locations can be managed. Receivables and payables refer to instruments such as invoices, or purchase orders, based on which finances can be availed and settled. An instrument is referred to as a 'receivable' if a corporate customer is expecting to receive a payment for it. For example, invoices are receivables for customers who are suppliers. Similarly, if a corporate customer is expected to make a payment, towards an instrument, then it is referred to as 'payable'. In the above example, invoices are payables for corporate customers who are buyers.

2.2 Benefits

- Cost Reduction The increased visibility of transactions and easy reconciliation helps corporates manage and control their cash flow and reduce costs.
- Smart processing of Receivables and Payables The platform facilitates efficient receivable and payable management through enhanced automation and straight-through processing of key processes.
- Regulatory Environment The platform leverages flexible configuration to launch quickly, respond to regulatory changes and expand into new geographies.

2.3 Functionality

- E-Invoices and Purchase Orders
- Debit Notes and Credit Notes
- Reconciliation
- Allocation of Payments
- Pricing

2.4 Home: Dashboard

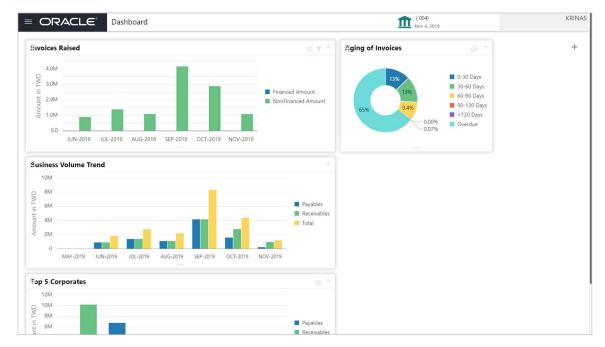

Successfully signing into the application displays the Dashboard as your home screen. The Dashboard displays a gist/summary that is internal to the financial institution. It is a collection of various portlets that are displayed based on your role and access rights. The Dashboard enables you to perform various analytical functions. You can drag and move different portlets, resize/auto adjust the size, and expand/collapse the portlets.

Post landing on the Oracle Banking Supply Chain Finance application, the below login screen is displayed:

ORACLE
Sign In
User Name *
Password *
Sign In
Cancel

- 1. Enter your User Name and Password to access the application.
- 2. Click Sign In to log into the application. The Dashboard screen appears.

The Oracle Banking Supply Chain Finance Dashboard currently consists of the below mentioned portlets for receivable management.

• **Facility Utilization:** The Facility Utilization widget classifies all facilities into three categories i.e., nearing breach, breached, and under-utilized. The drilldown allows the user

to view these details at an entity level. There is an option to search and filter the details for a specific entity also.

- Nearing Breach: When utilized amount is more than 85% of the sanctioned amount.
- Breached: When utilized amount equals the sanctioned amount.
- Under Utilized: When utilized amount is less than 20% of the sanctioned amount.
- **Facilities Expiring:** The Facility Expiring widget lists all facilities nearing expiry or expired and offers a drilldown at each entity level.
- **Top 5 Corporates**: This portlet displays information of the top five customers; w.r.t. their total Receivables and Payables. On clicking the table icon at the top-right, the graph populates the business volume data of the same top 5 customers in tabular format.
- Aging of Invoices: Aging graph displays invoice aging information in form of doughnut. There are two views of the graph, 2nd view can be navigated to by flipping the portlet, click the graph on the top-right corner to change the view from doughnut (default) to bar chart. Front view of the graph display the invoice amount volume split as per aging buckets which are configurable at the time of implementation i.e., 0-30 days; 30-60 days, etc. Range criteria can be defined with a maximum of 6 ranges. On clicking any of the range bucket, graph displays the list of corporates whose invoices are due for that ageing bucket. Clicking on the '+' (expand) icon against each corporate; launches invoice details pertaining to information of that specific corporate such as supplier name, 'Invoice Due Date From', 'Invoice Due Date To'. The 2nd view of the portlet displays the ageing of overdue invoices.
- **Finance Maturing:** The Finances Maturing widget plots a trend line of all finances which are maturing in the coming weeks. While the default view is for the upcoming month, this timeframe to can be changed to view further details. On flipping the widget, a detailed list of finances maturing is shown.
- **Top Borrowers:** The Top Borrowers widget is a bar graph that shows the business volume of the top 5 borrowers of the previous year and current year. Clicking the bar-chart for any borrower offers a drilldown list of finances for the borrower.
- **Top Defaulters:** Top defaulters widget shows list of top defaulters for the previous and current months.
- **Transaction Status Details:** Transactions are grouped product-wise into groups disbursed, partially settled, or fully settled for a specific date range, which is editable. The user can select on any product to view further details of transaction for that product.
- Invoices Raised: This portlet displays the data for financed and non-financed Invoices on monthly basis as a bar graph. On clicking the table icon on the top-right corner, same data is displayed in tabular format with financed/non-financed invoices grouped into monthly buckets. On clicking the bar graph, the screen will pop-up with corporate name and aggregated invoice amount and further clicking on the '+' (expand) icon beside corporate name launches the Invoice Inquiry screen with data of invoices specific to the corporate along with other relevant details; 'From Month' and 'To Month' as per the selected date.
- **Business Volume Trends**: This chart displays the business trends (total receivable and payables) of previous six months including current month based on historic data. The trend line is plotted based on the highs/peak.

- Reconciliation Details: Reconciliation Details widget provides a snapshot of reconciliation details of payments against the entity selected, i.e., invoice, cashflow, finance or allocation. There is an option to view these details as a donut or in a line-graph. The filter option allows the user to select a specific customer and/or modify the date range.
- **Customer wise utilization trend:** This widget gives a bird's eye view of the limit utilization for each program plotted for each month. The limit type and date range can be selected from the filter option.
- **Facility Wise Sanctioned Limit trend:** A facility-wise sanctioned limit trend-line is plotted over the preceding the six months. The filter option allows the user to select a specific entity and limit type along with timeframe to plot this line.
- 3. You can perform the following actions on the dashboard screen:
 - To add more portlets, click the Add (+) icon located at the top-right corner of the Dashboard.
 - To remove a portlet, click the Remove (x) icon located at the portlet's top-right corner.
 - To configure the portlet, click the Configure Tile (?) located at the portlet's top-left corner.
 - To flip the portlet view, click the Flip Forward (<) or Flip Back (>) icon.
 - To change the portlet's position, click and hold the 'Drag to reorder' (....) icon at the portlet's bottom-center and then move portlet to the desired position.
 - To apply filter on the portlet's data, click the Filter (\mathbb{T}) icon to view the pop-up select filter values.

3. Setup Reference Data

3.1 Introduction

To enable the functioning of Receivables and Payables within the Supply Chain Finance module, certain reference data needs to be set up on day zero. You need to set up reference data like relationship master, reconciliation rules, charges, accounting, tolerance, payment terms, and so on. You may also need to identify administrators to perform admin related tasks (creating users, assigning tasks and functions to the users as per their profile etc.).

Once the initial set-up is complete, the operation users can manage receivables and payables for their corporate customers.

3.2 Maintaining Core Reference Data

Certain core reference data is required to be set up for execution of Supply Chain Finance system transactions such as country list, currency, customer category, holiday list, list of financial institutions/banks, branch, FX rates etc.

Refer the 'Oracle Banking Common Core User Guide' for setting up core reference data.

3.3 Accounting Maintenance

One of the important reference data for executing receivables and payables transactions is accounting which can be set up through various sub-modules of accounting such as account mapping, entry codes, roles, and accounting entries.

3.3.1 Accounting Roles

3.3.1.1 Create Accounting Role

This screen is used to create Account Roles. This is required to identify the Dr or Cr leg in an accounting entry. Dr or Cr legs with other parameters like amount type etc. are created through the 'Accounting Entry Codes' submenu.

Navigation Path: Receivables & Payables > Maintenance > Accounting > Role > Create

reate		i Errors & Overrides
Accounting Role Code *	Accounting Role Description *	
ARC898	Accounting Role 898	
		Save

1. Refer the following table for specifying details in the above screen:

Note: Fields marked with '*' are mandatory.

Field Name	Description
Accounting Role Code *	Enter a unique code for the accounting role being created.

Field Name	Description
Accounting Role Description *	Enter a description to associate with the role.

2. Click **Save** to save the data and send for authorization (if applicable).

3.3.1.2 View Accounting Role

Through this screen, user can view, modify, delete, or authorize the accounting role.

Navigation Path: Receivables & Payables > Maintenance > Accounting > Role > View

View				r ^{if}	×

b. Click Search.

OR

Click **Reset** to reset the filter criteria.

- Click the refresh (^{CC}) icon to refresh the records.
- Click the Options (:) icon and then click any of the below options:
 - Unlock To modify the record details. Refer the Create Accounting Role section for field level details.
 - Authorize To authorize the record. Authorizing requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record to authorize and then click **Approve**.

- **Delete/Close** To remove the record.
 - Optional: On the confirmation pop-up window, enter the remark for deletion.
 - Click **Confirm** to delete the record.
- **Copy** To create a new accounting role by using similar details.
- View To view accounting role details.
- **Reopen** To reopen a closed record.

3.3.2 Entry Codes

3.3.2.1 Create Entry Codes

This screen is used to create entry codes or Dr and Cr legs for an accounting entry

Navigation Path: Receivables & Payables > Maintenance > Accounting > Entry Codes > Create

- **View** To view inter account mapping details.
- **Reopen** To reopen a closed record.

3.4 Maintaining Charges

Financial Institutions can levy charges on services extended to corporates with respect to managing and financing receivables and payables, like documentation charges, handling charges and so on. These charges can be configured at default/global level for specific products or parties. The charges to be levied can be linked to specific events such as auto-debit, EOD, etc. Once configured, the charges would get levied for manual as well as auto processing mode for transactions.

Charge pricing is determined by configuring various pricing methods such as fixed amount, fixed percentage, slab-based pricing, count based pricing and so on. The frequency of calculation and collection, such as, daily/weekly/monthly/yearly, can also be defined for a charge.

Financial Institutions are also empowered to configure flexible and preferential pricing as per corporate profile and assessment.

3.4.1 Charge Code

3.4.1.1 Create Charge Code

1. Refer the following table for specifying details in the above screen:

Note: Fields marked with	are mandatory and are conditionally mandatory.
Field Name	Description
Filter Criteria *	Select the appropriate filter criteria for specific application of charges.
	Based on the selected criteria, the Party ID, Instrument Type, and Instrument Status fields are displayed.
Party *	Click the search icon to select the party ID.
Instrument Type *	Select the type of instrument.
	Instrument statuses are available bases on selected instrument type.
	This field is displayed only if 'Instrument Type' is included in the filter criteria.
Instrument Status *	Select the status of the instrument.
	This field is displayed only if 'Instrument Type' is included in the filter criteria.
Charge Code *	Click the search icon to select charge code for pricing configuration.
Charge Criteria *	Select the criteria to be considered based on which charge should be calculated.
Charge Pricing Rule *	Click the search icon to select the pricing rule.
Parent Charge Code *	Select the parent charge code.
	This field is displayed only when you select parent charge code in Charge Criteria field.

Note: Fields marked with '*' are mandatory and '**' are conditionally mandatory.

Field Name	Description
Reference Tenor Start Date *	Specify which date should be considered to calculate the start of tenor duration.
Reference Tenor End Date *	Specify which date should be considered to calculate the end of tenor duration.
Effective Date *	Click the Calendar icon to select the start date of the preferential pricing validity.
Expiry Date *	Click the Calendar icon to select the end date of the preferential pricing validity.
Charge Application	Switch the toggle ON to enable the charge application.
Allow Waive	Switch the toggle ON to enable the charge waiving.
Allow Override	Switch the toggle ON to enable the overriding of charges.
Allow Pricing Modification	Switch the toggle ON to allow pricing modification.
	Collection Parameters
Collection Type *	Specify how the pricing should be collected.
Frequency **	Specify the frequency for charge collection. This field is displayed only when collection type is batch.
Reference Period **	Specify when the collection should take place for the selected frequency. This field is displayed only when the collection type is batch.
Unit **	Specify whether the charge collection should take place as per units of specified frequency. This field is displayed only when the collection type is batch.
	Calculation Parameters
Calculation Type *	Specify how the pricing should be calculated.
Frequency **	Specify the frequency for charge calculation. This field is displayed only when the calculation type is batch.
Reference Period **	Specify when the calculation should take place for the selected frequency. This field is displayed only when the calculation type is batch.
Unit **	Specify whether the charge calculation should take place as per units of specified frequency. This field is displayed only when the calculation type is batch.
Charges grid	The details of any preferential pricing added in this screen appear as an entry in this grid.

- 2. If required, click **Reset** to clear the selected values.
- 3. Click **Add** to add details in the grid.

harge Code	Charge Pricing Rule	Charge Criteria	Effective Date	Expiry Date	Action

3.7 Maintaining Reconciliation Rules

Reconciliation is one of the core modules of the Oracle Banking Supply Chain Finance application that can be performed for invoices/debit notes with payments/credit notes.

Any outstanding invoices/debit notes due from buyer can be reconciled against payments/credit notes as per the reconciliation rules configured in the application.

3.7.1 Reconciliation Rule Definition

Back-office user can configure recon rules for reconciliation category through this module. Two types of rules can be configured: 'Exact' and 'Generic'.

For the 'Exact' type of rule, attributes of one entity are mapped with attributes of another entity, e.g.: for 'Expected Debit/Credit to Payment' recon category attributes of expected debit/credit entity are mapped to attributes of payment entity and similarly for 'Invoice to Payment' recon category, attributes of invoice are mapped to attributed of payment for matching purpose. Also, multiple recon rules can be defined at global/default level or mapped to the corporate with priority assignment.

For the 'Generic' type of rule, user can configure generic reconciliation methods such as FIFO, LIFO, HAFO, and LAFO. As per selected method, one can choose 'Based on' attribute. For example, in 'FIFO' for Invoice Payment recon category, one can choose 'Invoice Date' or 'Invoice Due Date'.

3.7.1.1 Create Exact Reconciliation Rule Definition

Note: Fields marked with '*' are mandatory.

This screen is used for setting up recon rule for 'Exact' reconciliation category.

Navigation Path: Receivables & Payables > Maintenance > Reconciliation > Reconciliation Rule Definition > Create

Create			👔 Errors & Overrides 🖌 🖌 🗙
Rule Description *	Recon Category *	Recon Type *	Allocation Details
RULE101	Invoice/Debit Notes to Payment 🔻	Exact Generic	Account Based 💌

1. Refer the following table for specifying details in the above screen:

Field Name	Description
Rule Description *	Description of recon rule.
Recon Category *	 Select any one of the below categories of recon for which rule is defined. Invoice to Credit Notes Recon Invoice to Payment Recon Finance Payment Recon Allocation of Payment to Virtual Accounts
Recon Type *	Select Exact as the category of the Recon definition.
Allocation Details	If allocation required, then select the appropriate value to specify whether the allocation should be done based on the account or attribute of entity like payment/invoice.

OR								Add	Condition Add
Invoice Attribute *	O	erator	* Payment Attribute *						
Invoice Due Date	•	Ŧ	Payment Date	~					
			Invoice Attribute *		Operato	or * Fixed Value *			
Text between I a	and 8	of	Invoice No	Ŧ	=	▼ 785			

- 2. In the 'Exact Recon' section, perform the following steps to create conditions or group of conditions:
 - a. Click **Add Condition** to add a single line of condition. OR

Click **Add Group** to add a group of conditions.

- b. Click inside the added container to view buttons for adding condition details.
- c. Click **Text between** to define the range of text to be validated.
- d. Click **Invoice/Finance Attributes** to define condition for invoice/fi details. OR

Click **Payment Attributes** to define condition for payment details.

Below are all the attributes available for Invoice, Credit Note, Finance, and Payment:

Invoice:

Base Invoice Amount	Buyer Name	Net Invoice Amt.	Supplier Division Code
Bank	Invoice CCY	Payment Due Date	Supplier ID
Branch	Filler (4 attributes)	PO No.	Supplier Name
Buyer Code	Invoice Date	Repayment Account No.	Program Code
Buyer Division Code	Invoice Due Date	BIC/Routing Code	Program Name
Buyer ID	Invoice No.	Supplier Code	

Credit Note:

Credit Note Number	Buyer Id	Buyer Division Code	Remarks
Credit Note Date	Supplier Id	Supplier Division Code	Program ID
Credit Note Expiry Date	Currency	Buyer Name	
Buyer Code	Credit Note Base Amount	Supplier Name	
Supplier Code	Net Credit Note Amount	Filler (10 Attributes)	

Finance:

Finance Amount	Buyer ID	Supplier Name	Finance Status
Program Code	Buyer Name	Finance Start Date	Borrower
Product Code	Supplier ID	Finance Maturity Date	Finance Reference No

Payment:

Payment Date	Credit Account no.	Bank	Relationship Code
Virtual Account Owner	Entity Ref No.	Branch	Filler (10 Attributes)
Payment Mode	Payment Party Id	Instrument Date	Virtual Account Flag
Payment Party Code	Counterparty Id	Remarks	Payment Reference No
Counterparty Code	Beneficiary Id	Payment Currency	Program Code
Debit-Credit Indicator	Remitter Account No	Payment Amount	

- e. Click **Operator** to specify how to compare defined values.
- f. Click **Fixed Value**, **Text between**, **Invoice/Payment Attributes**, **Payment Attributes**, or **Finance/Payment Attributes** (depending on the selected recon category) to specify values with which previously defined values should be compared.
- g. If required, repeat the steps "a" to "f" to add more conditions and or group of conditions. OR

To remove condition, click the Delete icon (**a**) located at the right-bottom of the condition container.

- h. Click **AND** / **OR** to define how many conditions or combination of conditions should be matched to execute the recon rule.
- i. Click Validate and Preview to check if the added conditions are valid or not.

Allocation Basis Grid		
Allocation Account	Percentage	Action
1000054	100	-
Page 1 (1 of 1 items) K	< 1 > ×	

- 3. In the 'Allocation Basis Grid' section, perform the following steps to define percentage of account/attribute allocation:
 - a. Click **Add** to add a new row.
 - b. Double click the row to add/edit attribute and percentage.
 - c. Repeat the step "a" and "b" to add more attributes. OR

If required, click the Delete icon () under 'Action' column to remove the allocation row.

4. Click **Save** to save the data and send for authorization.

3.7.1.2 Create Generic Reconciliation Rule Definition

This screen is used for setting up 'Generic' recon rule.

Navigation Path: Receivables & Payables > Maintenance > Reconciliation > Reconciliation Rule Definition > Create

Program *	Click the search icon and select the program to setup the recon rule for. This field is displayed only if 'Filter Criteria' includes program. This field is applicable only to the Oracle Banking Supply Chain Finance system.
Counterparty Id *	Click the search icon and select the counterparty to setup the recon rule for. This field is displayed only if 'Filter Criteria' includes counterparty.
Corporate *	Click the search icon and select the corporate to setup the recon rule for. This field is displayed only if 'Filter Criteria' includes corporate.
Relationship Code *	Click the search icon and select the relationship to setup the recon rule for. This field is displayed only if 'Filter Criteria' includes relationship.
Priority *	The rules would get applied based on the ascending order of priority maintained here.
Recon Category *	Category of recon rule being mapped. For example: 'Expected Debit/Credit to Payment Recon', or 'Invoice Payment Recon'.
Recon Type *	User can select either 'Generic' or 'Exact' rule.
Rule Id *	Once the recon category and type is selected, then user can search for all the existing rules available for recon category and type.
Rule Id Description	This is automatically populated based on the rule id selected.
Execute Generic Recon	User can select this if generic recon is to be executed if there are more than one matching record post exact reconciliation and if generic recon rule is to be executed for matching outstanding payment to invoice. This is enabled only if 'Recon Type' is 'Exact'.

OR

- 2. If required, click **Reset** to clear the selected values.
- 3. Click Add/ Edit to add details in the grid.
 - Perform the following steps to take action on the records in the grid:
 - a. Select the record in the grid and then click Options ([‡]) icon under 'Action' column.
 - b. To modify the details, click Edit and repeat the step 1, 2, and 3. OR To remove the record, click Delete.
- 4. Click **Save** to save the data and send for authorization.

3.7.2.2 View Reconciliation Rule Decision

By using this screen, user can view, modify, delete, or authorize *reconciliation* rule decision.

Click Reset to reset the filter criteria.

- Click the refresh (C) icon to refresh the records.
- Click the Options (:) icon and then click any of the below options:

- **Unlock** To modify the record details. Refer the **Create Reconciliation Rule Decision** section for field level details.
- Authorize To authorize the record. Authorizing requires necessary access rights.
 - Optional: Click **View** to view the record details.
 - Select the record to authorize and then click **Approve**.
- **Delete/Close** To remove the record.
 - Optional: On the confirmation pop-up window, enter the remark for deletion.
 - Click **Confirm** to delete the record.
- **Copy** To copy the reconciliation rule definition details for creating a new record.
- **View** To view the reconciliation rule definition details.
- **Reopen** To reopen a closed record.

3.8 Maintaining Tolerance

Reconciliation of repayments with invoices are executed basis configured exact and generic reconciliation rules such as FIFO, LIFO etc. Through this functionality, user can configure an acceptable discrepancy between invoice outstanding amount and payment amount to enable automatic matching of invoices with the respective payment records. Tolerances allow outstanding payments and invoice records to match even if the respective amount differ. Similarly, tolerance can be configured for other categories as well. Without the tolerance configuration, user intervention would be required for matching invoices/cash-flows and payment records that does not have equated amounts.

3.8.1 Create Tolerance

This screen is used to create a tolerance. Newly created tolerance takes effect once authorized and cannot be modified thereafter.

 - **View** To view the payment terms details.
 - **Reopen** To reopen a closed record.

3.10 Maintaining Relationships

With this functionality, corporates/back office user can create linkage between corporates and counterparty. Corporate/Back office users can link their customers or non-customers as counterparties through this module. In case, if record of non-customer to be linked is not established in the application, then the same can be created through this UI.

3.10.1 Create Relationship

Using this UI, create relationship between corporates and buyers, or suppliers/counterparties. Newly created relationships take effect once authorized and cannot be modified post authorization. However, the counterparty can be added/modified.

5. Receivables and Payables Management

The 'Receivables and Payables Management' screen helps you to process and take various actions on instruments (Invoices/Purchase Order/Debit Note/Invoice & Dr Note). You can search for the instruments based on various parameters such as file name, reference number, supplier, date range, amount range, and so on.

After creating/searching for an existing instrument, you can take the following actions on the instrument, based on their type and status:

- Accept
- Assign (Only for Oracle Banking Supply Chain Finance)
- Cancel
- Edit
- Initiate Finance (Only for Oracle Banking Supply Chain Finance)
- Link Program (Only for Oracle Banking Supply Chain Finance)
- Raise Dispute
- Re-assign (Only for Oracle Banking Supply Chain Finance)
- Resolve Dispute
- Write off Dispute
- Mark PUA (Only for Oracle Banking Supply Chain Finance)
- Mark Indirect Payment (Only for Oracle Banking Supply Chain Finance)
- Accept Early Payment Offer (Only for Oracle Banking Supply Chain Finance)

Perform the following steps to manage payments:

- 1. From the **Branch** list, select the branch at which the payment needs to be managed.
- 2. From the **Action** list, select any one of the following:
 - Not to be Recon: To stop payment from being manually reconciled.
 - Not to be Auto-Recon: To stop payment from being automatically reconciled.
- 3. Click **Proceed** to view the search parameters.
- 4. Refer the following table for specifying the search criteria:

Note: At least one criterion should be populated to fetch the search results.

Field Name	Description
Payment Reference Number	Enter the payment reference number to be searched.
Payment Mode	Select the mode of payment to search the payment by.
Debit-Credit Indicator	Select the value to specify whether the payment is of type credit or debit.
Payment Party	Click the search icon and select the party making the payment.
Counter Party	Click the search icon and select the counterparty for the payment.
Beneficiary	Click the search icon and select the beneficiary of the payment.
Remitter Account Number	Click the search icon and select the remitter's account number used for the payment.
Credit Account Number	Click the search icon and select the account of the beneficiary.

Field Name	Description
Payment Towards	Select the entity towards which the payment has been initiated i.e., Invoice (I).
Recon Status	Select the current reconciliation status of the payment.
Allocation Status	Select the allocation status of the payment.
Amount Reference	Select the reference for an amount range search.
Currency	Select the currency of the payment.
Amount From	Enter the lower value for the amount-range search.
Amount To	Enter the upper value for the amount-range search.
Date Reference Basis	Select the reference for a date range search.
Date From	Click the Calendar icon and select the start date for the date range search.
Date To	Click the Calendar icon and select the end date for the date range search.

5. Click **Search** to view the relevant payment records in the 'List of Payments' section.

Payment Ref No	D-C Indicator	Payment Party	Counter Party	Value Date	Payment Amount

REDIT_ACC_NO	NO 1000160 USD15,000.00 50						
REMITTER_ACC_NO	1000014		USD15,00	0.00	50		

- f. If required, click **Expand All** to view allocation details or **Collapse All** to hide the same.
- g. Click **Submit** to send the record(s) for authorization.
- For **De-Allocate**:

Payment Ref No	Debit-Credit Indicator	Payment Party	Counter Party	Value Date	Payment Amount	Allocated Payment Amount	Date Of Allocation
AUTOPAYMENT1JUN2021V01	Debit	RELIANCE	cust215	2020-01-09	USD 60,000.00	USD 500.00	2020-01-15
sonalpmt20033	Debit	RELIANCE	ABZ Solutions	2019-12-31	GBP 5,200.00	GBP 120.00	2020-01-16

- a. Select the payment to be de-allocated.
- b. Click **Proceed**. A message for confirming the de-allocation appears.
- c. Click **Confirm**. A message displaying the status of the transaction appears.

9. Manual Recon

The 'Manual Recon' screen helps to manually 'Reconcile' or 'De Reconcile' payments or credit notes against invoices or debit notes.

In manual reconciliation, the back-office user can search and reconcile records based on invoice/debit note related attributes, or payment/credit note related attributes. From the search results, the user can choose how to reconcile one invoice/debit note to multiple payments/credit notes or multiple invoices/debit notes to one payment/credit note.

Similarly, the user can de-reconcile any record that has been reconciled manually or automatically. This is useful to rectify the reconciliation that has been incorrectly done manually or by automatic rule engine.

Navigation Path: Receivables & Payables > Manual Recon

9.1 Search

The parameters to search the transactions for performing the manual reconciliation differs as per the recon category i.e., 'Invoice/Debit Notes to Payment/Credit Notes'.

9.1.1 Invoice/Debit Notes to Payment/Credit Notes recon

Perform the following steps to search for invoices/debit notes and payments/credit notes to reconcile or de-reconcile.

							2

- 1. In the Action field, select the action to be performed, whether 'Reconcile' or 'De Reconcile'.
- 2. From the **Recon Category** list, select the category 'Invoice/Debit Notes to Payment/Credit Notes'.
- 3. From the **Branch** list, select the branch where the reconciliation needs to be done. By default, the branch of the logged-in user is selected.
- 4. Click **Proceed**. The **Invoice Payments/Credit Notes Search** section appears, where you can enter relevant criteria to search for invoices/debit notes and payments/credit notes.

Refer the following table for specifying details in the above search screen:

Field Name	Description					
	Invoices					
Buyer	Click the search icon to search for the buyer mentioned in the invoice/debit note.					
Supplier	Click the search icon to search for the supplier who generated the invoice/debit note.					
Invoice Number	Enter the specific internal invoice/debit note reference number to search for.					
Invoice Currency	Enter the currency of the invoice/debit note.					
Date Reference Basis	Select the reference for a date range search.					
Date From	Click the Calendar icon to specify the start date of the date range.					
Date To	Click the Calendar icon to specify the end date of the date range.					
Relationship	Click the search icon to select the relationship code associated with the buyer and supplier.					
Program	Click the search icon to select the program linked with the invoice/debit note. This field is applicable only to the Oracle Banking Supply Chain Finance system.					
Amount Reference Basis	Select the reference for an amount range search.					
Amount From	Enter the lower limit of the amount range.					
Amount To	Enter the upper limit of the amount range.					
Account Number	Click the search icon to select the account number associated with the invoice/debit note payment.					
	This field is enabled only after selecting a supplier.					
	Payments					
Payment Number	Enter the unique reference number generated while making the payment.					
Date Reference Basis	Select the reference for date range search.					
Date From	Click the Calendar icon and select the start date of the date-range.					
Date To	Click the Calendar icon and select the end date of the date-range.					

Field Name	Description
Payment Party	Click the search icon to select the party who made the payment.
Beneficiary Id	Click the search icon to select the beneficiary ID or recipient of the payment. In case you have selected a supplier in the 'Invoice' search section, then the same gets auto-populated here.
Payment Towards	Select what the payment has been made towards.
Remarks	Enter the remarks added in the transaction.
Counter Party	Click the search icon to select the counterparty.
Payment Mode	Select the mode of payment that has been employed. For example: Account Transfer, NEFT etc.
Debit-Credit Indicator	Select the value to specify whether the transaction is of debit or credit type.
Remitter Account Number	Click the search icon and select the remitter account of the transaction.
Credit Account Number	Click the search icon and select the account credited with the amount.
Payment Currency	Select the currency in which payment is done.
Amount From	Select the minimum amount of the payment range.
Amount To	Select the maximum amount of the payment range.
Account Owner	Click the search icon and select the owner of the account.
Relationship	Click the search icon to select the relationship code used in the transaction.
Program	Click the search icon to select the linked program. This field is applicable only to the Oracle Banking Supply Chain Finance system.
	Credit Notes
Credit Note Number	Enter the unique reference number generated for the credit note.
Buyer	Click the search icon to search for the buyer mentioned in the credit note.
Supplier	Click the search icon to search for the supplier who generated the credit note.
Remarks	Enter the remarks added in the transaction.
Currency	Enter the currency selected for the credit note.
Amount From	Select the minimum amount of the credit note amount range.
Amount To	Select the maximum amount of the credit note amount range.
Relationship	Click the search icon to select the relationship code associated with the buyer and supplier.
Date Reference Basis	Select the reference for a date range search.
Date From	Click the Calendar icon and select the start date of the date-range.
	Select the reference for a date range search.

Field Name	Description
Date To	Click the Calendar icon and select the end date of the date-range.
Program	Click the search icon to select the linked program. This field is applicable only to the Oracle Banking Supply Chain Finance system.

- 5. Optional: Click **Reset** to clear the selected values.
- 6. Click **Search** to view the results.

9.2 Reconcile

On clicking **Search** for the selected criteria, the resulting unreconciled or partially reconciled invoices/debit notes and payments/credit notes are populated in the grid below.

			1				(2)

Perform the following steps on the search results displayed in the grid:

- 1. In the **Reconcile By** field, select one of the following:
 - **One Invoice to Many Payments/Credit Notes** To reconcile a single invoice with multiple payments/credit notes.
 - Many Invoices to One Payment/Credit Note To reconcile multiple invoices with a single payment/credit note.
- 2. If you select the 'One Invoice to Many Payments/Credit Notes' option:
 - a. In the 'Invoices' section, select the invoice / debit note to reconcile.
 - b. In the 'Payments' section, do the following:

Copyright @ 2022 All Rights Reserved

- i. Select the payment(s) to reconcile.
- ii. In the **Amt to be Reconciled (Pay Ccy)** column, enter the amount to reconcile in payment currency.
- c. Similarly, in the 'Credit Notes' section, do the following:
 - i. Select the credit notes to reconcile.
 - ii. In the **Amt to be Reconciled (Cr Note Ccy)** column, enter the amount to reconcile in credit note currency.
- 3. If you select the 'Many Invoices to One Payment/Credit Note' option:
 - a. In the 'Payments' section, select the payment to reconcile, or, in the 'Credit Notes' section select the credit note to reconcile.
 - b. In the 'Invoices' section, do the following:
 - i. Select the invoices / debit notes to reconcile.
 - ii. In the **Amt to be Reconciled (Inv Ccy)** field, enter the amount to reconcile in invoice/debit note currency.

11. Managing Files

The File Management functionality helps you to upload files in a pre-defined format. These files are auto-processed by the system based on its type and set rules. The process is mainly divided into two screens, i.e., 'File Upload' to feed the data into the system and 'View File Upload Status' to manage the uploaded files.

11.1 Upload Files

This screen is used to upload files for auto-processing the data into system. The uploaded files are not processed until it is approved. The file can contain data records of invoices, purchase orders, payments, counterparties etc. The file format accepted by the system at present is ".csv".

11.1.1 Supported files and fields:

Payment File

Naming convention - OBSCF-PAYMENT_suffix.csv

The file name should begin with 'OBSCF-PAYMENT'. The suffix can be a string that makes the file name unique.

File template:

To search for specific files and to take required actions on them:

- 1. Use one or more of the following criteria to filter the listed file jobs:
 - o In the **Filter by File Name** field, type the partial or complete name of the file.
 - In the **Filter by Maker ID** field, type the partial or complete Maker ID used to create the file record.
 - In the **Filter by Checker ID** field, type the partial or complete Checker ID used to authorize the file.
 - From the **Filter by Status** list, select a status option. The available options are: Approved, Failed, Processed, and Unprocessed.
 - o In the Filter by Upload Date: Start Date field, enter the date when the upload was started.
 - In the **Filter by Upload Date: End Date** field, enter the date when the upload was completed.
- 2. Once the filter criteria is set, click **Filter** to view the filtered list. OR

Click Clear Filters to clear the entered criteria.

- 3. If required, click **Refresh** to refresh the listed files.
- 4. If required, click the download icon (📥) to download the file.
- 5. Click the options icon (1) and do one of the following as per requirement:
 - a. Select **View Details** to view further details of the uploaded file.
 - b. Select **View Remarks** to view any comments added during file upload.
 - c. Select **Approve** to approve the file. This option appears only for files which are in the 'Unprocessed' state.
 - d. Select **Reject** to reject the file. This option appears only for files which are in the 'Unprocessed' state.
- 6. To view rejected files and their details:
 - a. In the View File Upload Status screen, click **Rejected Files**. The **Rejected File Data** pop-up window appears, with a list of rejected files.
 - b. In this window, you can do the following:
 - Filter the records based one file name, maker ID, checker ID, upload start date, and upload end date (as detailed above). Once you enter the filter criteria, click Filter to view the filtered records, or click Clear Filters to clear the entered criteria.
 - Click the Download icon (\checkmark) to download the file.
 - Click the Remarks icon ($\overline{\mathbf{n}}$) to view any comments added.

12. Machine Learning

The **Machine Learning** module helps you to train the system for feeding the invoice/PO details. By using NLP toolkit under Machine Learning, user can train the system to fetch data from images (pdf or jpg format) of invoice/PO. Invoice engine reads the data extracted from images and creates invoices from the same.

12.1 Create Use Case

This screen is used to create, modify, authorize, and view the use cases to be utilized for machine learning.

Use Case Definition . × × Authorized 🔒 Op С Оре Authorized 🔒 Open Authorized **a** 0 🗟 Ur a Authorized **२** ० a Autho Authori Page 1 of 1 (1-9 of 9 items) K < 1 > > >

Navigation Path: Machine Learning > NLP Tool Kit > Use Case Definition

Click the Add icon (+)	to create a use case.
----------------------	----	-----------------------

Invoice		Description Tags of Invoice from File Upload.	Mod No		ight Through Processing Yes No
	Tag Display Sequence	Tag Screen Display	Tag Name	Annotation Tag	+ Default Value
	1	Invoice Number	InvNum	Y	
	2	Invoice Amount	InvAmt	Y	
age 1	of 1 (1 of 2 items) K \langle 1 \rangle	К			

Perform the following steps to add information about the tags:

- 1. In the Use Case Name field, enter name of the use case to be defined.
- 2. In the **Description** field, enter the description of the use case.
- 3. In the **Straight Through Processing** option, select **Yes** in case the use case should be auto processed without user intervention. Else, select **No**.

Copyright @ 2022 All Rights Reserved

- 4. Click the Add icon () to add a row for tag information.
- 5. Double click on the row in the table to edit the tag details.
- 6. To remove a row, select the row and then click the Remove (
- 7. Click Save to create the use case and send for authorization.

12.2 Create Annotated File

This screen is used to create an annotated file where, a user can insert an invoice/PO image file and tag the labels to extract the values from images. By using this sub-menu, the user can create the annotated file.

Navigation Path: Machine Learning > NLP Tool Kit > Annotator

Annotator						,, ¹² ×
Action Type	Source File Definiti	on		Document Type		
Create New Annotated File	Source File:	Source File Name	Select File	Select	Ŧ	Get Labels

9801	corpinvOBDX-Corporate Invoice OBD	X nOKdqvL6Xj	10/01/2021	PROCESSED		N	

Perform the following steps to filter the processing dashboard table:

- 1. In the **Document Type** list, select Corporate Invoice/Purchase Order.
- 2. In the **Status** list, select the current status of the document to filter the data.
- 3. Click refresh icon (\bigcirc) to reload the tabular data.

13. Batch Jobs

There are several activities required to be performed daily in the system. These activities are run by the system as a batch job at the beginning and/or end of the day. This chapter includes the events that are part of Beginning of Day (BOD) and End of Day (EOD) batch jobs run by the system on daily basis.

13.1 EOD Batch

Refer to the section 3.5 of the Oracle Banking Common Core User Guide to Configure, Invoke, and View the EOD batch jobs.

Note: Events marked with * are always executed. Below batch job events are only available if the Receivables and Payables module is integrated with OBSCF system.

Sr. No.	Event Name	Description	
1	Stale Invoice *	This event marks the Invoices as stale based on the configured settings for each product.	
2	Stale PO *	This event marks the POs as stale based on the configured settings for each product.	
3	Invoice Acceptance *	This event changes invoice status as accepted based on the configurations set in the system.	
4	Overdue Invoices *	Updating the invoices as overdue.	
5	Invoice Charges *	This event calculates the charges for invoices. Invoices are grouped into different bunches and all the applicable charges are applied for the bunch. Once the charges are applied, those are calculated immediately if they are online charges. In case of periodic charges, charges are calculated if the charge calculation date matches with the business date on which EOD is run. Accounting entries are posted once charges are calculated.	
6	PO Charges *	This event calculates charges for the purchase orders. Purchase orders are grouped into different bunches and all the applicable charges are applied for a particular bunch. Once the charges are applied, those are calculated immediately if they are online charges. In case of periodic charges, charges are calculated if the charge calculation date matches with the business date on which EOD is run. Accounting entries posted once charges are calculated.	
7	Charges Batch Processing *	This event calculates & collect periodic charges. All the charges for all the transactions present in the system are calculated and account entries are posted if the charge calculation date matches with the business date on which EOD is run.	

13.2 Independent Batch

Refer to the section 2 of the Tasks User Guide to Create, View, Configure, Trigger, and View status of the tasks.

Sr. No.	Event Name	Description
1	Auto-Reconciliation	This event reconciles transactions for invoice, debit note, and finance, with payment/credit note based on configured auto-recon rules.
2	Future Dated Disbursement Processing	This event processes transactions with future dated disbursements.
3	Auto Debit Finance	This event processes auto debits for finance transactions as per configurations set in the system.
4	Auto Debit Invoice	This event processes auto debits for invoice transactions as per configurations set in the system.

14. Process Codes

14.1 Finance

Following table represents the manual stages in Finance workflow along with the functional activity codes which can be used for mapping in role activity screen under SMS menu.

Stage	Functional Activity Code	Description
LimitProcessingExcept ion	LimitProcessingExcept ion	This is a stage before authorization and transaction falls in this stage when maintenance of limits is not done properly.
CreditApprovalExcepti on	CreditApprovalExcepti on	This is a stage before authorization and transaction falls in this stage when exception handling behavior has been maintained as STOP in the Product Parameters screen for limit amount and limit expiry breach.
CreateAdhocLimitsTra nsactionException	CreateAdhocLimitsTra nsactionException	This is a stage before authorization and transaction falls in this stage if there is a technical error while identifying Adhoc limits applicability in transaction.
InitiateWorkflowForAd hocLimitTxnException	InitiateWorkflowForAd hocLimitTxnException	This is a stage before authorization and transaction falls in this stage if there is a technical error due to which a transaction for Adhoc limits is not initiated in the system.
AutoFinanceException	AUTOFIN_EXCEPTIO N	This is a stage before authorization and after limit is blocked. Transaction falls in this stage when auto processing is enabled, and it fails due to financing validations being done as per finance parameters maintained in Product/Program/Interest/Accounting/Charg es.
Processing	PROCESSING	This is a stage before authorization and after limit is blocked. Transaction falls in this stage when auto-processing is disabled in Program/Product parameters.
Authorization	AUTHORIZATION	This is authorization step wherein user can either Approve/Reject the record. Transaction falls in this stage when auto- authorization is disabled in Product/Program parameters.
Loan Integration Exception	OBCL_EXCEPTION	This stage is after authorization and transaction falls in this stage when integration with lending product (OBCL) to create contracts or make payment fails.

Stage	Functional Activity Code	Description
AccountingEntriesPost Exception	ACC_ENTRIES_EXC EPTION	This stage is after authorization and transaction falls in this stage when accounting entries posting integration is configured as 'Yes' in system parameters with another product and posting fails.
AccountPostingRespo nseAwaited	ACCPOSTING_RESP ONSE_AWAITED (Not be mapped on screen)	This stage is after authorization and transaction falls in this stage if accounting entries posting integration is configured as 'Yes' in system parameters with another product and the mode of integration is asynchronous and transaction is waiting for response.
ExternalPaymentExce ption	EXTERNAL_PAYMEN T_EXCEPTION	This stage is after authorization and transaction falls in this stage when external payment integration is required as per payment mode in transaction and external payment system integration fails.
OutgoingPaymentRes ponseAwaited	OUTPAY_RESPONS E_AWAITED (Not be mapped on screen)	This stage is after authorization and transaction falls in this stage when external payment integration is required as per payment mode in transaction and integration is asynchronous and transaction is waiting for response.
LimitsUpdateExceptio n	LIMITS_UPDATE_EX CEPTION	This stage is after authorization and transaction falls in this stage when limits utilization/release fails due to technical error. The user can retry the transaction after the technical error is resolved.
FinanceMasterUpdate	POSTAUTH_UPDATE _EXCEPTION	This stage is after authorization and transaction falls in this stage when work table to main table approval update fails due to technical errors. The user can retry the transaction after the technical error is resolved.
InstrumentUpdateExce ption	INSTRUMENT_UPDA TE_EXCEPTION	This stage is after authorization and transaction falls in this stage when update of linked invoice/PO as financed/paid fails due to technical errors. The user can retry the transaction after the technical error is resolved.
AlertsException	ALERTS_EXCEPTIO N	This stage is after authorization and transaction falls in this stage when alerts generation for transaction fails due to technical errors. The user can retry the transaction after the technical error is resolved.
ReconCompletionExce ption	RECON_COMPLETIO N_EXCEPTION	This stage is after authorization and transaction falls in this stage for settlement

Stage	Functional Activity Code	Description
		transactions when payment is initiated through Finance Payment Recon (FPR) and FIFO (First In First Out) is not completed and status of the same cannot be found due to technical errors. The user can retry the transaction after the technical error is resolved.
ReconAuthorizationEx ception	RECON_AUTHORIZA TION_EXCEPTION	This stage is after authorization and transaction falls in this stage for settlement transactions when payment is initiated through Finance Payment Recon (FPR) and FIFO (First In First Out) is not completed and status of recon of current finance settlement is not updated due to technical errors. The user can retry the transaction after the technical error is resolved.
ReconStepAuthorizati onException	RECON_STEP_AUTH ORIZATION_EXCEPT ION	This stage is after authorization and transaction falls in this stage for settlement transactions when payment is initiated through Finance Payment Recon (FPR) and FIFO (First In First Out) is not completed and status of payment corresponding to current finance settlement is not updated due to technical errors. The user can retry the transaction after the technical error is resolved.

14.2 Recon

Following table represents the manual stages in Recon workflow along with the functional activity codes which can be used for mapping in role activity screen under SMS menu.

Stage	Functional Activity Code	Description
Processing	SCFCM_FA_PROCES SING_AUTH_REJECT	This is a stage before authorization in which transaction is under processing before rejection.
CL Exception	SCFCM_FA_CL_EXC EPTION	This stage is after authorization and transaction falls in this stage when integration for corporate lending is configured as 'Yes' in system parameters with another product and it fails.
Accounting Regeneration Exception	SCFCM_FA_AC_REG EN_EXCEPTION	This stage is after authorization and transaction falls in this stage when integration for accounting entries re-

Stage	Functional Activity Code	Description
		generation is configured as 'Yes' in system parameters with another product and regenerating the same fails.
Authorization	SCFCM_FA_PROCES SING_AUTH	This is authorization step wherein user can either Approve/Reject the record. Transaction falls in this stage when auto- authorization is disabled in Product/Program parameters.
Accounting Post Exception	SCFCM_FA_ACC_PO ST_EX	This stage is after authorization and transaction falls in this stage when accounting entries posting integration is configured as 'Yes' in system parameters with another product and posting fails.
Limits Update Exception	SCFCM_FA_LIMITS_ UPD_EX	This stage is after authorization and transaction falls in this stage when limits utilization/release fails due to technical error. The user can retry the transaction after the technical error is resolved.
VAM Integration Exception	SCFCM_VAM_INTG_ AUTH	This stage is after authorization and transaction falls in this stage when integration with virtual account management system fails.
Master Update Retry	SCFCM_FA_MASTER _UPDATE_ERROR	This stage is after authorization and transaction falls in this stage when work table to main table approval update fails due to technical errors. The user can retry the transaction after the technical error is resolved.

14.3 Discounting

Following table represents the manual stages in Discounting workflow along with the functional activity codes which can be used for mapping in role activity screen under SMS menu.

Stage	Functional Activity Code	Description
Authorization	AUTHORIZATION	This is authorization step wherein user can either Approve/Reject the record. Transaction falls in this stage when auto- authorization is disabled in Product/Program parameters.
masterUpdateExceptio n	MASTER_UPDATE_E XCEPTION	This stage is after authorization and transaction falls in this stage when work table to main table update fails due to technical

Stage	Functional Activity Code	Description
		errors. The user can retry the transaction after the technical error is resolved.

14.4 Instrument

Following table represents the manual stages in Instrument workflow along with the functional activity codes which can be used for mapping in role activity screen under SMS menu.

Stage	Functional Activity Code	Description
MITagCorrection	SCFCM_FA_TXN_CR EATE_EXCEPTION	The transaction falls in this stage when transaction is not automatically created through file upload due to missing of tags.
Create Instrument Exception	SCFCM_FA_TXN_CR EATE_EXCEPTION	This is a stage before authorization and transaction falls in this stage if there is a technical error while creating a transaction for instrument.
Processing	SCFCM_FA_TXN_PR OC	This is a stage before authorization and transaction falls in this stage when auto- processing is disabled in Program/Product parameters.
Transaction Rejection Approval	SCFCM_FA_TXN_RE JECTION	This is a stage after authorization and transaction falls in this stage when it is rejected.
CL Exception	SCFCM_FA_CL_EXC EPTION	This stage is after authorization and transaction falls in this stage when integration for corporate lending is configured as 'Yes' in system parameters with another product and it fails.
Accounting Regeneration Exception	SCFCM_FA_AC_REG EN_EXCEPTION	This stage is after authorization and transaction falls in this stage when integration for accounting entries re- generation is configured as 'Yes' in system parameters with another product and regenerating the same fails.
