License Restrictions Warranty/Consequential Damages Disclaimer

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure, and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or de-compilation of this software, unless required by law for interoperability, is prohibited.

Warranty Disclaimer

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

Restricted Rights Notice

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS

Oracle programs, including any operating system, integrated software, any programs installed on the hardware, documentation, and/or technical data delivered to U.S. Government end users are “commercial computer software” or “commercial technical data” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, documentation, and/or technical data shall be subject to license terms and restrictions as mentioned in Oracle License Agreement, and to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). No other rights are granted to the U.S. Government.

Hazardous Applications Notice

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Third Party Content, Products, and Services Disclaimer

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third party content, products, or services.

Predefined Parameter Values for Price Item.....	862
Divisions.....	863
Division-Specific SQIs for Price Item.....	863
Division-Specific Characteristics for Price Item.....	864
Division-Specific Accrual Type Criteria for Price Item.....	864
Division-Specific Hierarchy for Price Item.....	865
Division-Specific Cost for Price Item.....	866
Division-Specific Average Price Floor and Ceil Values for Price Item.....	867
Price Item Relationship.....	868

Editing a Price Item or Price Item Bundle.....	869
Price List.....	877
Price List (Used for Searching).....	877
Search Price List.....	878
Price List Price Items.....	881
Searching for a Price List.....	883
Viewing Price Items Assigned to a Price List.....	883
Defining a Price List.....	884
Defining the Price List Hierarchy.....	886
Defining a Characteristic for a Price List.....	888
Associating a Price List with a Division.....	889
Defining Eligibility Criteria for a Price List.....	890
Copying a Price List.....	891
Viewing the Price List Details.....	893
Price List (Used for Viewing).....	894
Price List.....	894
Eligibility Criteria.....	896
Editing a Price List.....	897
Price List Price Item Pricing.....	899
Price List Price Items.....	900
Search Price Item or Price Item Pricing.....	902
Viewing Price Items Assigned to a Price List.....	907
Removing a Price Item from a Price List.....	908
Viewing a Price Item Pricing.....	908
Editing a Price Item Pricing of a Price List.....	910
Assigning a Price Item to a Price List.....	916
Defining a Characteristic for a Price Item Pricing.....	922
Defining a Parameter for a Price Item Pricing.....	923
Defining TFM Information in a Price Item Pricing.....	924
Price List Assignment.....	926
Price List Assignments.....	926
Price List Price Items.....	928
Search Price List for Assignment.....	930
Viewing Price Lists Assigned to an Account.....	932
Viewing Price Lists Assigned to a Person.....	933
Viewing Price Items Assigned to a Price List.....	934
Assigning a Price List to an Account.....	935
Assigning a Price List to a Person.....	938
Defining a Characteristic for a Price List Assignment.....	941
Editing the Price List Assignment Details of an Account.....	942
Editing the Price List Assignment Details of a Person.....	945
Price List Assignments.....	948
Accounts where Price List is Assigned.....	948
Persons to whom Price List is Assigned.....	949
Viewing Accounts and Persons where Price List is Assigned.....	950
Entities Eligible for Price List Assignment.....	950
Eligible Accounts.....	950
Eligible Persons.....	952
Assigning a Price List to One or More Eligible Accounts.....	954
Assigning a Price List to One or More Eligible Persons.....	956
Defining a Characteristic for a Price List Assignment.....	957
Rate Definition.....	959
Rate Schedule Components.....	959
Create/Edit Rate Definition.....	960
Defining Tiering Setup of a Rate Component.....	961
Editing Tiering Setup of a Rate Component.....	962

Deleting Tiering Setup of a Rate Component.....	963
Tiering Criterion.....	964
Tiering Criterion List.....	964
Edit Tiering Criterion.....	964
Create Tiering Criterion.....	965
Creating a Tiering Criterion.....	965
Editing a Tiering Criterion.....	966

Chapter 11: Division..... 969

Division.....	970
Division - Main.....	972
Division - Access Groups.....	973
Division - Price Items.....	974
Division - Price Lists.....	974
Division - Languages.....	975
Division - Invoice Currencies.....	975
Division - Person Identifier Types.....	976
Division - Algorithms.....	976
Division - Characteristics.....	976
Division - Bill Messages.....	977
Division - Party Char Types.....	977
Division - Bill Cycles.....	978
Division - Account Identifier Types.....	978
Division - Price Item Characteristics.....	979
Searching for a Division.....	979
Defining a Division.....	980
Associating an Access Group with a Division.....	984
Associating a Price Item or Price Item Bundle with a Division.....	985
Associating a Price List with a Division.....	987
Associating a Language with a Division.....	988
Associating an Invoice Currency with a Division.....	989
Associating a Person Identifier Type with a Division.....	990
Associating an Algorithm with a Division.....	991
Defining a Characteristic for a Division.....	997
Associating a Bill Message with a Division.....	998
Associating a Party Characteristic Type with a Division.....	1000
Associating a Bill Cycle with a Division.....	1001
Associating an Account Identifier Type with a Division.....	1002
Defining a Division-Specific Characteristic for a Price Item.....	1003
Associating a To Do Type and To Do Role with a Division.....	1004

Chapter 12: Approval Workflow..... 1007

Most Commonly Used Terms.....	1009
Approval Workflow Process.....	1009
Prerequisites.....	1011
Approval Transaction.....	1013
Search Approval Transaction.....	1013
Approval Transaction Log.....	1017
Searching for an Approval Transaction.....	1018
Viewing the Log of an Approval Transaction.....	1018
Comparison: New versus Existing.....	1019
Approving an Approval Transaction.....	1019
Rejecting an Approval Transaction.....	1020
Canceling an Approval Transaction.....	1021

Modifying an Approval Transaction.....	1022
Withdrawing an Approval Transaction.....	1023
Resolving an Approval Transaction.....	1023
Approve Price Assignment.....	1024
Search.....	1024
List of Price Assignments.....	1027
Approve Price Assignment - Comparison: New versus Existing.....	1028
Approval Transaction Log.....	1030
Approving a Price Assignment for an Account.....	1031
Approving a Price Assignment for a Person.....	1032
Approving a Price Assignment for a Price List.....	1033
Rejecting a Price Assignment for an Account.....	1034
Rejecting a Price Assignment for a Person.....	1035
Rejecting a Price Assignment for a Price List.....	1037
Canceling a Price Assignment for an Account.....	1038
Canceling a Price Assignment for a Person.....	1039
Canceling a Price Assignment for a Price List.....	1041
Modify Price Assignment.....	1042
Search.....	1042
List of Price Assignments.....	1046
Modifying a Price Assignment for an Account.....	1047
Modifying a Price Assignment for a Person.....	1048
Modifying a Price Assignment for a Price List.....	1049
Withdrawing a Price Assignment for an Account.....	1049
Withdrawing a Price Assignment for a Person.....	1050
Withdrawing a Price Assignment for a Price List.....	1051
Viewing the Log of an Approval Transaction.....	1052
Resolve Price Assignment.....	1053
Search.....	1053
List of Price Assignments.....	1057
Resolving a Price Assignment for an Account.....	1058
Resolving a Price Assignment for a Person.....	1059
Resolving a Price Assignment for a Price List.....	1060
Withdrawing a Price Assignment for an Account.....	1060
Withdrawing a Price Assignment for a Person.....	1061
Withdrawing a Price Assignment for a Price List.....	1062
Viewing the Log of an Approval Transaction.....	1063
Approval Workflow Group (Used for Searching).....	1064
Search Approval Workflow Group.....	1064
Searching for an Approval Workflow Group.....	1065
Viewing the Approval Workflow Group Details.....	1066
Defining an Approval Workflow Group.....	1066
Adding a Business Object.....	1070
Defining a Group BO Relation.....	1072
Approval Workflow Group (Used for Viewing).....	1073
Approval Workflow Group.....	1074
Editing an Approval Workflow Group.....	1076
Deleting an Approval Workflow Group.....	1076
Editing a Business Object.....	1077
Deleting a Business Object.....	1079
Editing a Group BO Relation.....	1079
Deleting a Group BO Relation.....	1081
Approval Workflow Chain (Used for Searching).....	1081
Search Approval Workflow Chain.....	1081
Searching for an Approval Workflow Chain.....	1082
Viewing the Approval Workflow Chain Details.....	1083

Defining an Approval Workflow Chain.....	1083
Defining Approval Levels for an Approval Workflow Chain.....	1084
Approval Workflow Chain (Used for Viewing).....	1085
Approval Workflow Chain.....	1085
Editing an Approval Workflow Chain.....	1086
Deleting an Approval Workflow Chain.....	1087
Approval Workflow Criterion Type (Used for Searching).....	1088
Search Approval Workflow Criterion Type.....	1088
Searching for an Approval Workflow Criterion Type.....	1088
Viewing the Approval Workflow Criterion Type Details.....	1089
Defining an Approval Workflow Criterion Type.....	1089
Approval Workflow Criterion Type (Used for Viewing).....	1091
Approval Workflow Criterion Type.....	1091
Editing an Approval Workflow Criterion Type.....	1092
Deleting an Approval Workflow Criterion Type.....	1094
Approval Workflow Group Chain Linkage (Used for Searching).....	1094
Search Approval Workflow Group Chain Linkage.....	1094
Searching for an Approval Workflow Group Chain Linkage.....	1095
Viewing the Approval Workflow Group Chain Linkage Details.....	1096
Defining an Approval Workflow Group Chain Linkage.....	1096
Defining Group Chain Linkage Criteria for an Approval Workflow.....	1098
Defining a Field Approval Rule.....	1098
Approval Workflow Group Chain Linkage (Used for Viewing).....	1100
Approval Workflow Group Chain Linkage.....	1101
Editing an Approval Workflow Group Chain Linkage.....	1103
Deleting an Approval Workflow Group Chain Linkage.....	1104
Approval Workflow Setting (Used for Searching).....	1104
Search Approval Workflow Group.....	1104
Searching for an Approval Workflow Group.....	1105
Viewing the Approval Workflow Setting Details.....	1106
Defining Approval Workflow Group Settings.....	1106
Approval Workflow Setting (Used for Viewing).....	1108
Approval Workflow Group Settings.....	1108
Editing Approval Workflow Group Settings.....	1110
Deleting Approval Workflow Group Settings.....	1110
Regenerating Input and Display UI Maps.....	1111
Approval Workflow Reason (Used for Searching).....	1111
Approval Workflow Reason List.....	1111
Filtering the Approval Workflow Reasons.....	1112
Viewing the Approval Workflow Reason Details.....	1113
Defining an Approval Workflow Reason.....	1113
Approval Workflow Reason (Used for Viewing).....	1114
Approval Workflow Reason.....	1114
Editing an Approval Workflow Reason.....	1115
Deleting an Approval Workflow Reason.....	1116

Chapter 13: Rules Engine..... 1117

Rule Type (Used for Searching).....	1119
Search Rule Type.....	1119
Searching for a Rule Type.....	1120
Defining a Rule Type.....	1121
Defining Input and Output Parameters for a Rule Type.....	1123
Associating a Characteristic Entity with a Rule Type.....	1125
Associating an Algorithm with a Rule Type.....	1126
Editing a Rule Type.....	1127

Deleting a Rule Type.....	1130
Copying a Rule Type.....	1130
Rule Type (Used for Viewing).....	1132
Rule Type.....	1133
Viewing the Rule Type Details.....	1134
Editing a Rule Type.....	1135
Rule.....	1137
Search Rule.....	1137
Searching for a Rule.....	1138
Viewing the Rule Details.....	1139
Defining a Rule.....	1139
Editing a Rule.....	1145
Deleting a Rule.....	1151
Copying a Rule.....	1152
Rule.....	1158
Rule Information.....	1158
Viewing the Rule Details.....	1160
Rule Check.....	1160
Rule Check.....	1162

Chapter 14: Alternate Sequential Bill Numbers.....1165

Alternate Sequential Bill Number Generation Algorithms.....	1166
C1_ALTBLLSYS.....	1166
C1_ALTBLSYS1.....	1166
C1_ALTBLDV.....	1169
C1_ALTBLDIV1.....	1169
Enabling the Alternate Sequential Bill Numbers Feature.....	1172

Chapter 15: Transaction Feed Management..... 1175

Prerequisites.....	1176
Transaction Rating Before Billing.....	1176
Transaction Aggregation.....	1185
Header Validation.....	1186
Transaction Validation and Initial Price Item Determination.....	1188
Price Item Pricing Verification.....	1199
Aggregation.....	1204
Clean Up.....	1208
Transaction Aggregation Batch Processing.....	1210
Transaction Disaggregation.....	1213
Transaction Disaggregation Batch Processing.....	1220
Reseeding.....	1221
Transaction Cancellation.....	1224
Transaction Cancellation Batch Processing.....	1227
Transaction Rollback.....	1228
Feed Status Transition.....	1230
Transaction Status Transition.....	1231
Transaction Leg Status Transition.....	1232
Transaction Data File.....	1240
Error List.....	1243
Alert Notification for Transaction Feed Management.....	1279
Feed Management Dashboard.....	1279
Search.....	1280
Division Level Information.....	1286
Transaction Level Information.....	1287

Transaction Leg Information.....	1288
Transaction Leg Service Quantity.....	1290
Transaction Leg Calculation Lines.....	1290
Transaction Leg Calc Line Characteristics.....	1291
Searching for a Transaction Feed.....	1292
Viewing Division Level Details of a Transaction Feed.....	1293
Viewing Transactions that Belong to a Division.....	1293
Viewing Legs of a Transaction.....	1294
Viewing the SQIs Calculated for a Transaction Leg.....	1294
Viewing the Calculation Lines of a Transaction Leg.....	1295
Viewing Characteristics of a Calculation Line.....	1295
Transaction Details.....	1296
Search.....	1296
Transaction Legs.....	1300
Transaction Error Messages.....	1303
Searching for a Transaction.....	1304
Viewing the Transaction Legs.....	1304
Viewing Error Messages.....	1305
Viewing the Transaction Details.....	1305
Adding a Transaction.....	1306
Copying a Transaction.....	1308
Transaction Source.....	1311
Search Transaction Source.....	1311
Searching for a Transaction Source.....	1312
Defining a Transaction Source.....	1312
Editing a Transaction Source.....	1313
Deleting a Transaction Source.....	1314
Copying a Transaction Source.....	1314
Transaction Record Type.....	1315
Search Transaction Record Type.....	1316
Searching for a Transaction Record Type.....	1317
Defining a Transaction Record Type.....	1317
Editing a Transaction Record Type.....	1323
Deleting a Transaction Record Type.....	1329
Copying a Transaction Record Type.....	1330
Transaction Aggregation Rule.....	1335
Transaction Aggregation Rules.....	1335
Defining Transaction Aggregation Rule for an SQL.....	1336
Editing Transaction Aggregation Rule of an SQL.....	1337
Deleting Transaction Aggregation Rule of an SQL.....	1338
Schedule.....	1339
Search Schedule.....	1339
Searching for a Schedule.....	1340
Viewing the Schedule Details.....	1340
Defining a Schedule.....	1341
Editing a Schedule.....	1342
Deleting a Schedule.....	1343
Disaggregation Request.....	1344
Search Disaggregation Request.....	1344
Searching for a Disaggregation Request.....	1349
Creating a Disaggregation Request for a Person.....	1350
Creating a Disaggregation Request for an Account.....	1356
Creating a Disaggregation Request for a Price item.....	1362
Creating a Disaggregation Request for a Price Assignment.....	1368
Creating a Disaggregation Request for a Billable Charge.....	1372
Creating a Reseeding Request for a Parent Accumulation Group.....	1376

Deleting a Disaggregation Request.....	1379
--	------

Chapter 16: Upload Validated Payment Data..... 1381

Payment Upload Process.....	1382
Upload Payment Records in the Pre-Staging Area.....	1382
Move Payment Records to the Staging Area.....	1383
Create Payment Events and Payments.....	1383
Prerequisites.....	1384
CSV File Format.....	1385
Sample CSV.....	1387
Payment Data File Status Transition.....	1387
Payment Record Status Transition.....	1388
Error Messages.....	1390
Payment Upload.....	1394
Search Payment Data File.....	1394
Payment Data Records.....	1397
Payment Staging Records.....	1399
Payment Data File Log.....	1399
Searching for a Payment Data File.....	1400
Uploading a Payment Data File.....	1400
Replacing an Existing File.....	1402
Cancelling a Payment Data File.....	1403
Moving the Payment Records to the Staging Area.....	1404
Editing a Payment Staging Record.....	1404
Viewing the Records of a Payment Data File.....	1405
Viewing the Staging Records of a Payment Data Record.....	1406
Viewing the Log of a Payment Data File.....	1406
Viewing the Errors of a Payment Data Record.....	1406

Chapter 17: Freeze Payments on Notification..... 1409

Freeze Payments on Notification Process.....	1411
Creating Automatic Payments and Refunds.....	1411
Generating a Flat File.....	1411
Uploading Response from Auto Clearing House (ACH).....	1411
Retry Automatic Payment.....	1412
Freezing or Canceling Automatic Payments.....	1413
Voiding Refund Requests and Canceling Refund Adjustments.....	1413
Generating To Do Entries.....	1414
Creating Tender Controls.....	1414
Prerequisites.....	1414
Automatic Payment or Refund Clearing Staging Record Status Transition.....	1415
EDI 824 File Format.....	1416
Sample EDI 824 File Format.....	1417
Automatic Payment and Refund Upload Reason.....	1417
Upload Reasons.....	1418
Defining an Upload Reason.....	1418
Editing an Upload Reason.....	1420
Deleting an Upload Reason.....	1422
Automatic Payment and Refund Clearing Staging.....	1423
Search Clearing Record.....	1423
Associated Clearing Staging Records.....	1425
Clearing Staging Upload Reasons.....	1426
Clearing Staging Characteristics.....	1427
Searching for a Clearing Record.....	1427

Viewing the Clearing Staging Records Associated to a Clearing Record.....	1428
Viewing the Upload Reason Specified in the Clearing Staging Record.....	1428
Viewing the Characteristics of the Clearing Staging Record.....	1429
Editing a Clearing Staging Record.....	1429
Defining a Characteristic for a Clearing Staging Record.....	1431
Deleting a Clearing Staging Record.....	1432

Chapter 18: Trial Billing.....1435

Prerequisites.....	1437
Trial Bill (Used for Searching).....	1437
Search Trial Bill	1437
Searching for a Trial Bill.....	1439
Viewing the Trial Bill Details.....	1439
Trial Bill (Used for Viewing).....	1440
Trial Bill.....	1440
Trial Bill Segments.....	1442
Trial Bill Segment Calc Lines.....	1443
Trial Bill Segment SQ Details.....	1444
Trial Bill Segment Financial Details.....	1445
Policy Details.....	1445
Printing a Trial Bill in the PDF Format.....	1446
Viewing the Segments of a Trial Bill.....	1446
Filtering the Trial Bill Segments.....	1447
Viewing the Calc Lines of a Trial Bill Segment.....	1447
Viewing the SQ Details of a Trial Bill Segment.....	1448
Viewing the Financial Details of a Trial Bill Segment.....	1448
Viewing the Policy Details of a Trial Bill Segment.....	1449

Chapter 19: GL Account Validation..... 1451

Static GL Account Validation.....	1452
Dynamic GL Account Validation.....	1452

Chapter 20: Upload Validated Adjustment Data..... 1453

Prerequisites.....	1455
CSV File Format.....	1455
Adjustment Upload Request (Without Approval) Status Transition.....	1457
Adjustment Upload Request (With Approval) Status Transition.....	1458
Algorithms Used in C1-ADJUPLD.....	1459
Upload Request Type.....	1462
Upload Request Type List.....	1463
Upload Request Type.....	1464
Defining an Upload Request Type.....	1467
Defining a Characteristic for an Upload Request Type.....	1472
Editing an Upload Request Type.....	1473
Copying an Upload Request Type.....	1477
Mapping an Upload Request Type.....	1481
Deleting an Upload Request Type.....	1482
Viewing the Upload Request Type Details.....	1483
Adjustment Upload Request (Used for Searching).....	1484
Search Adjustment Upload Request.....	1484
Searching for an Adjustment Upload Request.....	1486
Uploading an Adjustment Data File.....	1486
Replacing an Adjustment Data File.....	1489

Viewing the Adjustment Upload Request Details.....	1491
Viewing All Records of an Adjustment Data File.....	1492
Adjustment Upload Request (Used for Viewing).....	1492
Adjustment Upload Request - Main.....	1493
Adjustment Upload Request.....	1493
Adjustment Data Records.....	1495
Adjustment Upload Request - Log.....	1496
Adjustment Upload Request Log.....	1496
Cancelling an Adjustment Data File.....	1497
Creating Adjustments for an Adjustment Data File.....	1498
Submitting an Adjustment Data File for Approval.....	1499
Approving an Adjustment Data File.....	1500
Rejecting an Adjustment Data File.....	1501
Viewing the Log of an Adjustment Upload Request.....	1502
Adding a Log Entry for an Adjustment Upload Request.....	1503

Chapter 21: Payment Request..... 1505

Prerequisites.....	1507
Payment Creation Request (Without Approval) Status Transition.....	1508
Payment Creation Request (With Approval) Status Transition.....	1509
Payment Transfer Request (Without Approval) Status Transition.....	1510
Payment Transfer Request (With Approval) Status Transition.....	1513
Algorithms Used in C1-PaymentRequest.....	1515
C1-PAYRQ-INF.....	1516
C1-PAYREQPOS.....	1517
C1-PAYREQVAL.....	1517
C1-PAY-DFT.....	1517

Viewing the Debit and Credit Bills Added to an Offset Request.....	1667
Viewing the Adjustments Created Through an Offset Request.....	1667
Adding a Debit or Credit Bill to an Offset Request.....	1668
Editing an Offset Request.....	1669
Defining a Characteristic for an Offset Request.....	1671
Editing the Offset Amount of a Debit or Credit Bill.....	1672
Removing a Debit or Credit Bill from an Offset Request.....	1674
Deleting an Offset Request.....	1674
Submitting an Offset Request.....	1675
Approving an Offset Request.....	1677
Rejecting an Offset Request.....	1679
Unapplying an Offset Request.....	1681
Viewing the Log of an Offset Request.....	1682
Adding a Log Entry for an Offset Request.....	1682

Chapter 24: Funding Request..... 1685

Prerequisites.....	1688
Funding Request (Without Approval) Status Transition.....	1688
Funding Request (With Approval) Status Transition.....	1689
Algorithms Used in C1-FundingReq.....	1690
C1-FUNDINFO.....	1691
C1-FUNDSUBMT.....	1691
C1-FUNDAPP.....	1692
C1-FUNDAPRVD.....	1692
F1-TODOCOMPL.....	1692
F1-AT-RQJ.....	1692
C1-FNDRESUBM.....	1693
C1-FUNDVAL.....	1693
C1-FUNDAPAY.....	1693
C1-FUNDADJCR.....	1693
C1-FUNDCANCL.....	1694
Funding Request Type.....	1694
Funding Request Type List.....	1694
Funding Request Type.....	1695
Defining a Funding Request Type.....	1698
Defining a Characteristic for a Funding Request Type.....	1705
Editing a Funding Request Type.....	1706
Deleting a Funding Request Type.....	1713
Copying a Funding Request Type.....	1714
Viewing the Funding Request Type Details.....	1721
Funding Request (Used for Searching).....	1722

Search Funding Request.....	1722
Searching for a Funding Request.....	1725
Creating a Funding Request.....	1726
Viewing the Funding Request Details.....	1726
Funding Request (Used for Viewing).....	1727
Funding Request - Main.....	1727
Funding Request.....	1728
Search Bill.....	1731
Funding Request - Bills.....	1735
Currency Statistics.....	1735
Selected Bills.....	1735
Funding Payment Details.....	1738
Funding Adjustments.....	1739
Funding Request - Log.....	1739
Funding Request Log.....	1739
Adding a Debit or Credit Bill to a Funding Request.....	1740
Deleting a Debit or Credit Bill from a Funding Request.....	1741
Excluding a Bill from a Funding Request.....	1741
Editing a Funding Request.....	1743
Defining a Characteristic for a Funding Request.....	1745
Deleting a Funding Request.....	1746
Cancelling a Funding Request.....	1747
Submitting a Funding Request.....	1748
Approving a Funding Request.....	1750
Rejecting a Funding Request.....	1752
Requesting to Resubmit a Funding Request.....	1754
Withdrawing a Funding Request.....	1755
Transferring the Funding Amount of a Credit Bill to a Garnishment Contract.....	1756
Viewing the Garnishment Details of a Credit Bill.....	1757
Viewing the Payments Created Through a Funding Request.....	1758
Viewing the Adjustments Created Through a Funding Request.....	1759
Viewing the Log of a Funding Request.....	1759
Adding a Log Entry for a Funding Request.....	1760

Chapter 25: Refund/Write Off Request..... 1761

Refund Request (Without Approval) Status Transition.....	1763
Refund Request (With Approval) Status Transition.....	1763
Write Off Request (Without Approval) Status Transition.....	1764
Write Off Request (With Approval) Status Transition.....	1765
Algorithms Used in C1-RefundReq.....	1766
Algorithms Used in C1-WORequest.....	1771
Prerequisites.....	1775
Refund/Write Off Request Type.....	1775
Refund/Write Off Request Type List.....	1779
Refund/Write Off Request Type.....	1780
Defining a Refund or Write Off Request Type.....	1782
Defining a Characteristic for a Refund or Write Off Request Type.....	1785
Editing a Refund or Write Off Request Type.....	1786
Copying a Refund or Write Off Request Type.....	1790
Deleting a Refund or Write Off Request Type.....	1793
Viewing the Refund or Write Off Request Type Details.....	1794
Refund/Write Off Request.....	1795
Search Refund/Write Off Request.....	1795
Searching for a Refund or Write Off Request.....	1799
Creating a Refund Request.....	1800

Creating a Write Off Request.....	1803
Viewing the Refund Request Details.....	1805
Viewing the Write Off Request Details.....	1806
Refund Request.....	1806
Refund Request - Main.....	1807
Refund Request.....	1807
Refund Details.....	1810
Bill Line Items.....	1811
Refund Request - Bills.....	1811
Search Bills.....	1812
Bill Line Items.....	1813
Refund Request - Payments.....	1814
Search Payment Event.....	1814
Payments.....	1815
Refund Request - Log.....	1816
Refund Request Log.....	1816
Creating a Refund Request.....	1816
Defining a Characteristic for a Refund Request.....	1819
Adding a Payment Event to the Refund Request.....	1820
Adding a Payment to the Refund Request.....	1821
Adding a Credit Bill to the Refund Request.....	1822
Adding a Credit Bill Line Item to the Refund Request.....	1823
Editing a Refund Request.....	1825
Editing the Refund Details.....	1827
Deleting a Refund Request.....	1829
Deleting a Bill from the Refund Request.....	1830
Deleting a Bill Line Item from the Refund Request.....	1830
Submitting a Refund Request.....	1831
Approving a Refund Request.....	1833
Rejecting a Refund Request.....	1836
Viewing the Log of a Refund Request.....	1837
Adding a Log Entry for a Refund Request.....	1838
Voiding a Refund Request.....	1839
Write Off Request.....	1840
Write Off Request - Main.....	1841
Write Off Request.....	1841
Write Off Details.....	1843
Bill Line Items.....	1844
Write Off Request - Bills.....	1845
Search Bills.....	1845
Bill Line Items.....	1846
Write Off Request - Log.....	1847
Write Off Request Log.....	1847
Creating a Write Off Request.....	1848
Defining a Characteristic for a Write Off Request.....	1850
Adding a Debit Bill to the Write Off Request.....	1851
Adding a Debit Bill Line Item to the Write Off Request.....	1853
Editing a Write Off Request.....	1854
Editing the Write Off Details.....	1856
Deleting a Write Off Request.....	1858
Deleting a Bill from the Write Off Request.....	1858
Deleting a Bill Line Item from the Write Off Request.....	1859
Submitting a Write Off Request.....	1859
Approving a Write Off Request.....	1861
Rejecting a Write Off Request.....	1863
Viewing the Log of a Write Off Request.....	1864

Adding a Log Entry for a Write Off Request.....	1865
Cancelling a Write Off Request.....	1866

Chapter 26: Hold Request..... 1869

Hold Request (Without Approval) Status Transition.....	1871
Hold Request (With Approval) Status Transition.....	1871
Algorithms Used in C1-HoldRequest.....	1872
Prerequisites.....	1878
Approval Process for Hold Request Release.....	1878
Hold Refund.....	1879
Hold Mass Accounts Using Selection Criteria.....	1880
Hold Request Type.....	1880
Hold Request Type List.....	1881
Hold Request Type.....	1881
Defining a Hold Request Type.....	1883
Defining a Characteristic for a Hold Request Type.....	1886
Editing a Hold Request Type.....	1887
Deleting a Hold Request Type.....	1889
Copying a Hold Request Type.....	1890
Viewing the Hold Request Type Details.....	1893
Hold Request (Used for Searching).....	1894
Search Hold Request.....	1894
Searching for a Hold Request.....	1897
Creating a Hold Request.....	1898
Viewing the Hold Request Details.....	1901
Hold Request (Used for Viewing).....	1901
Hold Request - Main.....	1902
Hold Request.....	1903
Hold Entities.....	1904
Search Account.....	1906
Search Bill.....	1910
Search Person.....	1912
Hold Request - Log.....	1914
Hold Request Log.....	1914
Searching Persons.....	1914
Searching Accounts.....	1915
Searching Bills.....	1916
Adding Persons in a Hold Request.....	1916
Adding Accounts in a Hold Request.....	1917
Adding Bills in a Hold Request.....	1917
Defining an Entity for a Hold Request.....	1918
Defining a Process for a Hold Request.....	1919
Defining a Characteristic for a Hold Request.....	1920
Editing a Hold Request.....	1921
Editing Hold Request Entities.....	1924
Deleting Hold Request Entities.....	1925
Deleting a Hold Request.....	1926
Submitting a Hold Request.....	1926
Approving a Hold Request.....	1927
Releasing a Hold Request.....	1929
Rejecting a Hold Request.....	1929
Resubmitting a Hold Request.....	1931
Viewing the Log of a Hold Request.....	1932
Adding a Log Entry for a Hold Request.....	1933

Chapter 27: Delinquency Central..... 1935

Prerequisites.....	1936
Delinquency Central (Used for Viewing).....	1936
Search Overdue Process.....	1936
Overdue Events.....	1941
Searching for an Overdue Process.....	1942
Viewing Events of an Overdue Process.....	1942
Viewing the Overdue Process Details.....	1943
Overdue Process Information for Account: {Account ID}.....	1943
Person Information.....	1944
Account Information.....	1944
Customer Contact Details.....	1944
Promise To Pay.....	1944
Hold Details.....	1945
Overdue Bills.....	1945
Payment Arrangement.....	1946
Search Bill.....	1946
Searching for a Bill.....	1947
Adding the Customer Contact Details.....	1948
Creating a Hold Request for an Overdue Process.....	1948
Creating a Payment Arrangement for an Overdue Process.....	1949
Defining a Promise To Pay for an Overdue Process.....	1949

Chapter 28: Upload Request..... 1951

Upload Request (Without Approval) Status Transition.....	1954
Upload Request (With Approval) Status Transition.....	1955
Prerequisites.....	1956
Algorithms Used in C1-BillCycleUpdateUplReq.....	1957
C1-BCU-DERIV.....	1958
C1-BCU-VALID.....	1958
F1-AT-RQJ.....	1958

Adding a Log Entry for an Upload Request.....	2041

Chapter 29: General Ledger (GL) Accounting Template..... 2043

GL Accounting Template (Without Approval) Status Transition.....	2048
GL Accounting Template (With Approval) Status Transition.....	2048
Algorithms Used in C1- GLAT.....	2049
Prerequisites.....	2051
GL Accounting Template (Used for Searching).....	2051
Search GL Accounting Template.....	2052
GL Accounting Template Lines.....	2053
Searching for a GL Accounting Template.....	2054
Creating a GL Accounting Template.....	2054
Viewing the GL Accounting Template Details.....	2056
Viewing the GL Accounting Template Lines Details.....	2057
GL Accounting Template (Used for Viewing).....	2057
GL Accounting Template - Main.....	2057
GL Accounting Template.....	2057
GL Accounting Template - Log.....	2059
GL Accounting Template Log.....	2059
Editing a GL Accounting Template.....	2060
Deleting a GL Accounting Template.....	2061
Submitting a GL Accounting Template.....	2062
Approving a GL Accounting Template.....	2063
Rejecting a GL Accounting Template.....	2064
Deactivating a GL Accounting Template.....	2066
Viewing the Log of a GL Accounting Template.....	2067
Adding a Log Entry for a GL Accounting Template.....	2067

Chapter 30: Payment Agreement Request.....2069

Payment Agreement Request (Without Approval) Status Transition.....	2072
Payment Agreement Request (With Approval) Status Transition.....	2072
Prerequisites.....	2073
Algorithms Used in C1-PaymentAgreementRequest.....	2074
C1-PA-INFO.....	2074
C1-PA-PRE.....	2075
C1-PA-SUBMIT.....	2075
C1-PA-APPENT.....	2075
C1-PA-APPEXT.....	2075

Payment Agreement Request Type.....	2075
Payment Agreement Request Type List.....	2075
Payment Agreement Request Type.....	2076
Defining a Payment Agreement Request Type.....	2079
Defining a Characteristic for a Payment Agreement Request Type.....	2081
Editing a Payment Agreement Request Type.....	2082
Copying a Payment Agreement Request Type.....	2085
Deleting a Payment Agreement Request Type.....	2087
Viewing the Payment Agreement Request Type Details.....	2088
Payment Agreement Request (Used for Searching).....	2088
Search Payment Agreement Request.....	2089
Bill Details.....	2092
Searching for a Payment Agreement Request.....	2092
Creating a Payment Agreement Request.....	2093
Defining a Characteristic for a Payment Agreement Request.....	2094
Defining Payment Schedule for a Payment Agreement Request.....	2095
Viewing the Bills Added in the Payment Agreement Request.....	2096

Viewing the Payment Agreement Request Details.....	2097
Payment Agreement Request (Used for Viewing).....	2097
Payment Agreement Request - Main.....	2098
Payment Agreement Request.....	2098
Bill Details.....	2100
Payment Schedule.....	2101
Payment Agreement Request - Bills.....	2101
Search Bills.....	2101
Payment Agreement Request - Log.....	2102
Payment Agreement Request Log.....	2103
Editing a Payment Agreement Request.....	2103
Deleting a Payment Agreement Request.....	2106
Submitting a Payment Agreement Request.....	2106
Removing an Overdue Bill from a Payment Agreement Request.....	2107
Approving a Payment Agreement Request.....	2108
Rejecting a Payment Agreement Request.....	2109
Resubmitting a Payment Agreement Request.....	2111
Filtering Overdue Bills of an Account.....	2112
Adding an Overdue Bill in a Payment Agreement Request.....	2113
Viewing the Log of a Payment Agreement Request.....	2113
Adding a Log Entry for a Payment Agreement Request.....	2114

Chapter 31: Inbound Message.....2117

Health Care Inbound Message.....	2118
Prerequisites.....	2123
Health Care Inbound Message Status Transition through User Interface.....	2125
Health Care Inbound Message Status Transition through a Batch Process.....	2126
Algorithms Used in C1-HCInboundMessage.....	2127
C1-AT-RQJ.....	2128
F1-AT-RQJ.....	2128
C1-HCINVAL.....	2128
C1-HCINPROC.....	2129
C1-TODORETRY.....	2129

Inbound Message Content.....	2329
Inbound Message - Log.....	2329
Inbound Message Log.....	2330
Editing an Inbound Message.....	2330
Defining a Characteristic for an Inbound Message.....	2331
Deleting an Inbound Message.....	2332
Processing an Inbound Message.....	2333
Using the Retry Option for an Inbound Message.....	2335
Voiding an Inbound Message.....	2335
Viewing the Content of an Inbound Message.....	2336
Viewing the Log of an Inbound Message.....	2336
Adding a Log Entry for an Inbound Message.....	2337
Statement Construct Preference.....	2337
Searching for a Statement Construct Preference.....	2338
Viewing the Statement Construct Preference Details.....	2339
Defining a Statement Construct Preference.....	2339
Editing a Statement Construct Preference.....	2344
Copying a Statement Construct Preference.....	2348
Deleting a Statement Construct Preference.....	2352

Chapter 32: Upload Lockbox Payment and Remittance Advices..... 2353

Prerequisites.....	2355
EDI 820 Flat File Description.....	2355
Sample EDI 820 Flat File.....	2357
Upload EDI 820 Files in ORMB.....	2358

Chapter 33: Deferred Revenue Recognition..... 2361

Prerequisites.....	2363
Deferred Revenue Recognition Status Transition.....	2363
Algorithms Used in Deferred Revenue Recognition.....	2365
Deferred Revenue Recognition Template (Used for Searching).....	2370
Search Deferred Revenue Recognition Template.....	2370

Searching for a Deferred Revenue Recognition Template.....	2371
Defining a Deferred Revenue Recognition Template.....	2372
Associating Algorithms with a Deferred Revenue Recognition Template.....	2374
Associating Deferred Revenue Recognition Template With A Division.....	2375
Defining a Characteristic for a Deferred Revenue Recognition Template.....	2376
Viewing the Deferred Revenue Recognition Template Details.....	2377
Deferred Revenue Recognition Template (Used for Viewing).....	2378
Deferred Revenue Recognition Template.....	2378
Editing a Deferred Revenue Recognition Template.....	2380
Deleting a Deferred Revenue Recognition Template.....	2381
Viewing the Deferred Revenue Recognition Template Details.....	2381
Deferred Revenue Recognition (Used for Searching).....	2382
Search Deferred Revenue Recognition.....	2382
Searching for a Deferred Revenue Recognition.....	2386
Viewing the Deferred Revenue Recognition Details.....	2387
Deferred Revenue Recognition (Used for Viewing).....	2388
Deferred Revenue Recognition - Main.....	2388
Deferred Revenue Recognition.....	2388
Associated Deferred Revenue Recognitions.....	2390
Recognition Schedule.....	2390
Revenue Recognition Items.....	2391
Deferred Revenue Recognition - Log.....	2391
Deferred Revenue Recognition Log.....	2391
Editing a Deferred Revenue Recognition.....	2392
Creating the Deferred Revenue Recognition Schedule.....	2392
Defining a Characteristic for a Deferred Revenue Recognition.....	2393
Adding Related Deferred Revenue Recognitions.....	2394
Editing the Deferred Revenue Recognition Schedule Details.....	2395
Viewing the Log of a Deferred Revenue Recognition.....	2396
Adding a Log Entry for a Deferred Revenue Recognition.....	2397

Chapter 34: Reconciliation.....2399

Pre-requisites.....	2402
Reconciliation Status Transition.....	2402
Pay Instruction Status Transition.....	2403
Discrepancy Report Status Transition.....	2405
EDI 820 File Format For Reconciliation.....	2405
Sample EDI 820 File Format.....	2406
Algorithms Used in C1-MemberReconType.....	2407
C1-REOCNPEP.....	2407
Algorithms Used in C1-MemberReconciliation.....	2408
C1-RECONINFO.....	2409
C1-MRECONVAL.....	2409
F1-AT-RQJ.....	2409
F1-TDCREATE.....	2410

Chapter 40: Off-Process Request..... 3269

Prerequisites.....	3272
Off-Process Request (Without Approval) Status Transition.....	3272
Off-Process Request (With Approval) Status Transition.....	3272
Algorithms Used in C1-OffProcessRequest.....	3273
Off-Process Request Type.....	3273
Off-Process Request Type List.....	3274
Off-Process Request Type.....	3274
Defining an Off-Process Request Type.....	3277
Adding the Accumulation Amendment Details in an Off-Process Request Type.....	3279
Defining a Characteristic for an Off-Process Request Type.....	3281
Editing an Off-Process Request Type.....	3282
Deleting an Off-Process Request Type.....	3284
Copying an Off-Process Request Type.....	3285
Viewing the Off-Process Request Type Details.....	3288
Off-Process Request (Used for Searching).....	3288
Search Off-Process Request.....	3288
Searching for an Off-Process Request.....	3291
Defining an Off-Process Request.....	3291
Viewing the Off-Process Request Details of an Off-Process Request.....	3293
Off-Process Request (Used for Viewing).....	3294
Off-Process Request - Main.....	3294
Off-Process Request.....	3294
Off-Process Request Details.....	3296

Off-Process Request Error Message.....	3298
Off-Process Request - Log.....	3298
Off-Process Request Log.....	3298
Viewing the Error Message of an Off-Process Request.....	3299
Adding the Off-Process Request Details in an Off-Process Request.....	3300
Defining a Characteristic for an Off-Process Request.....	3303
Editing an Off-Process Request.....	3303
Deleting an Off-Process Request.....	3304
Submitting an Off-Process Request.....	3305
Approving an Off-Process Request.....	3306
Rejecting an Off-Process Request.....	3307
Viewing the Log of an Off-Process Request.....	3309
Adding a Log Entry for an Off-Process Request.....	3309

Chapter 41: Individual Health Insurance Pricing.....3311

Business Rules.....	3313
Business Rule Type.....	3313
Search Business Rule Type.....	3313
Business Rule Type.....	3317
Business Rule Criteria.....	3318
Searching for a Business Rule Type.....	3318
Viewing the Business Rule Type Details.....	3319
Defining a Business Rule Type.....	3319
Associating a Parameter with a Business Rule Type.....	3321
Defining a Characteristic for a Business Rule Type.....	3321
Editing a Business Rule Type.....	3322
Deleting a Business Rule Type.....	3323
Defining a Business Rule Criteria for a Business Rule Type.....	3324
Editing the Business Rule Criteria of a Business Rule Type.....	3325
Deleting the Business Rule Criteria of a Business Rule Type.....	3326

Search Audit Event.....	3374
Searching for an Audit Event.....	3377
Viewing the Audit Event Details.....	3378
Audit Event (Used for Viewing).....	3378
Audit Event - Main.....	3379
Audit Event.....	3379
Audit Event - Log.....	3380
Audit Event Log.....	3380
Canceling an Audit Event.....	3381
Viewing the Log of an Audit Event.....	3382

Chapter 44: Invoice Request..... 3383

Prerequisites.....	3386
Types of Invoice Request.....	3386
Manual Regular Bill Generation Invoice Request.....	3386
Manual Trial Bill Generation Invoice Request.....	3388
Automatic Regular Bill Generation Invoice Request.....	3388
Invoice Request Manual Trial Bill Generation (Without Approval) Status Transition.....	3389
Invoice Request Manual Regular Bill Generation (Without Approval) Status Transition.....	3393
Invoice Request Manual Regular Bill Generation (With Approval) Status Transition.....	3399
Invoice Request Automatic Regular Bill Generation (Without Approval) Status Transition.....	3404
Invoice Request Type.....	3407
Invoice Request Type List.....	3407
Invoice Request Type.....	3408
Defining an Invoice Request Type.....	3411
Defining a Characteristic for an Invoice Request Type.....	3416
Editing an Invoice Request Type.....	3417
Deleting an Invoice Request Type.....	3421
Copying an Invoice Request Type.....	3422
Viewing the Invoice Request Type Details.....	3426
Invoice Request (Used for Searching).....	3427
Search Invoice Request.....	3427
Searching for an Invoice Request.....	3431
Manually Creating an Invoice Request.....	3432
Viewing the Invoice Request Details.....	3434
Invoice Request (Used for Viewing).....	3434
Invoice Request - Main.....	3434
Invoice Request.....	3435
Invoice Request Details/Account List.....	3438

Excluded Accounts.....	3439
Invoice Request - Log.....	3439
Invoice Request Log.....	3439
Editing an Invoice Request.....	3440
Defining a Characteristic for an Invoice Request.....	3442
Deleting an Invoice Request.....	3443
Canceling an Invoice Request.....	3444
Submitting an Invoice Request.....	3445
Approving an Invoice Request.....	3446
Rejecting an Invoice Request.....	3447
Requesting to Resubmit an Invoice Request.....	3448
Viewing the Log of an Invoice Request.....	3450
Adding a Log Entry for an Invoice Request.....	3450

Chapter 45: Hold Request Creation, Modification, Release, and View Through Inbound Web Service..... 3453

Prerequisites.....	3454
C1-CreateHoldRequest Business Service.....	3455
Hold Request Creation Request in the XML Format.....	3456
Hold Request Creation Response in the XML Format.....	3457
Hold Request Creation Request and Response - Tags in XML Format.....	3458
Hold Request Creation Request in the JSON Format.....	3461
Hold Request Creation Response in the JSON Format.....	3462
Hold Request Creation Request and Response - Attribute/Value Pairs in JSON Format.....	3463
Sample Hold Request Creation Request and Response in the XML Format.....	3467
Sample Hold Request Creation Request and Response in the JSON Format.....	3469
C1-GetHoldRequestHistory Business Service.....	3471
Hold Request View Request in the XML Format.....	3472
Hold Request View Response in the XML Format.....	3473
Hold Request View Request and Response - Tags in XML Format.....	3473
Hold Request View Request in the JSON Format.....	3476
Hold Request View Response in the JSON Format.....	3476
Hold Request View Request and Response - Attribute/Value Pairs in JSON Format.....	3477
Sample Hold Request View Request and Response in the XML Format.....	3480
Sample Hold Request View Request and Response in the JSON Format.....	3481
C1-ReleaseHoldRequest Business Service.....	3483
Hold Request Release Request in the XML Format.....	3484
Hold Request Release Response in the XML Format.....	3485
Hold Request Release Request and Response - Tags in XML Format.....	3485
Hold Request Release Request in the JSON Format.....	3487
Hold Request Release Response in the JSON Format.....	3488
Hold Request Release Request and Response - Tags in JSON Format.....	3488
Sample Hold Request Release Request and Response in the XML Format.....	3490
Sample Hold Request Release Request and Response in the JSON Format.....	3491
C1-UpdateHoldRequest Business Service.....	3492
Hold Request Update Request in the XML Format.....	3493
Hold Request Update Response in the XML Format.....	3493
Hold Request Update Request and Response - Tags in XML Format.....	3494
Hold Request Update Request in the JSON Format.....	3498
Hold Request Update Response in the JSON Format.....	3498
Hold Request Update Request and Response - Tags in JSON Format.....	3499
Sample Hold Request Update Request and Response in the XML Format.....	3503
Sample Hold Request Update Request and Response in the JSON Format.....	3504

Chapter 46: Hold Direct Debit Instruction.....	3507
Prerequisites.....	3509
Algorithms Used in C1-AutoPayRequest.....	3509
C1-APAYRQINF.....	3509
F1-TODOCOMPL.....	3510
C1-APAYSUB.....	3510
C1-APAYAPP.....	3510
C1-UPDAPAY.....	3510
C1-APAYAPRVD.....	3510

Rejecting an Auto Pay Request.....	3541
Resubmitting an Auto Pay Request for Approval.....	3541
Searching for a Bill.....	3542
Adding an Auto Pay Line Item in an Auto Pay Request.....	3543
Deleting an Auto Pay Line Item from an Auto Pay Request.....	3543
Editing the Auto Pay Line Item Details in an Auto Pay Request.....	3544
Viewing the Log of an Auto Pay Request.....	3545
Adding a Log Entry for an Auto Pay Request.....	3546

Chapter 47: Garbling Customer Information.....	3547
---	-------------

Chapter 48: Deleting Inactive Customer or Closed Account Information.....	3549
Chapter 49: Automatic Refund Process.....	3551
Chapter 50: Payment Distribution.....	3553
Account Level Payment Distribution.....	3554
Statement Level Payment Distribution.....	3555
Chapter 51: Mass Payment Transfer.....	3557
Full Payment Transfer.....	3558
Partial Payment Transfer.....	3560
Mass Payment Transfer Process.....	3565
Defining a File Request Type for Payment Transfer.....	3565
Uploading a Payment Transfer File.....	3566
Transferring Payments.....	3567
CSV File Format for Mass Payment Transfer.....	3567
Sample CSV File for Mass Payment Transfer.....	3568
Chapter 52: Reporting.....	3571
Report Creation Using Apache FOP Framework.....	3572
Prerequisites.....	3572
Setting Properties in Configuration Files.....	3572
Updating an SPL Template File.....	3572
Deploying the spl-reporting.ear File.....	3573
Activating the Reporting Changes in WebLogic.....	3574
PDF Generation Using Apache FOP.....	3574
Excel (XLS) Generation Using XSL Transformation.....	3574
Sample XML Format for FOP Reporting.....	3575
Sample XSL Format for FOP Reporting.....	3575
Create XSL Template for an FOP Report.....	3576
XSL Templates shipped with ORMB.....	3576
Create an Algorithm for an FOP Report.....	3579
Creating a Message for an FOP Report.....	3582
Calling the ORMB FOP Reporting API.....	3583
Setting Master Configuration for Email Notification.....	3583
Creating a Custom Algorithm for FOP Reports.....	3585
Configuring the Custom Algorithm from the User Interface.....	3586
Report Creation.....	3588
Report Search.....	3588
Searching for an FOP Report.....	3589
Defining an FOP Report.....	3589
Editing an FOP Report.....	3593
Deleting an FOP Report.....	3597
Viewing the FOP Report Details.....	3597
Report Audit.....	3597
Report Generation List.....	3598
Downloading an FOP Report.....	3598
Report Generation.....	3599

Generating an FOP Report.....	3599
FOP Reports.....	3600
Adjustment Detail Report.....	3600
Aggregate Stop-Loss Report.....	3601
Entity Hold Detail Report.....	3601
Invoice Aging Report.....	3601
Payment Detail Report for Fully-Insured Individual Business.....	3602
Payment Detail Report for Self-funded and Fully-Insured Group Business.....	3602
Payment Summary Report for Fully-Insured Individual Business.....	3603
Payment Summary Report for Self-funded and Fully-Insured Group Business.....	3603
Specific Stop-Loss Report.....	3604
To Do Report.....	3604
User Access Report.....	3604
Quick Response Code Generation.....	3605

Appendix A: Most Commonly Used Tasks..... 3607

Changing the Layout.....	3608
Adding a Column to the Zone.....	3608
Rearranging Columns in the Zone.....	3608
Removing a Column from the Zone.....	3608

Appendix B: Administration..... 3611

UI Maps.....	3612
Creating Display UI Map for an Approval Workflow Group.....	3612
Creating Input UI Map for an Approval Workflow Group.....	3613

About this Document

This document lists and describes various features in Oracle Revenue Management and Billing which can be used in the health insurance domain. It describes all screens related to these features and explains how to perform various tasks through these screens.

Intended Audience

This document is intended for the following audience:

- End-users
- System Administrators
- Consulting Team
- Implementation Team
- Development Team

Organization of the Document

Each insurance feature is described in a separate chapter in this document. All screens related to the feature and tasks related to the screen are explained in each chapter. This document contains the following chapters:

Chapter Number	Chapter Name	Chapter Description
Chapter 1	Fully-Insured Group Customer Management	Explains how to create customers and accounts for billing the fully-insured group health plans.
Chapter 2	Self-Funded Customer Management	Explains how to create customers and accounts for billing the self-funded plans.
Chapter 3	Health Insurance Business Management	Describes how to setup the pricing and billing engines for the following three lines of health insurance business — Fully-Insured Group Health Insurance, Self-Funded Group Health Insurance, and Individual Health Insurance.
Chapter 4	Fully-Insured Group Health Insurance	Explains how to design the pricing and billing models for the fully-insured group health insurance business in ORMB. It also explains how to create policies, plans, and memberships for the fully-insured group health insurance.
Chapter 5	Self-Funded Group Health Insurance	Explains how to design the pricing and billing models for the self-funded group health insurance business in ORMB. It also explains how to create policies for the self-funded group health insurance.
Chapter 6	Individual Health Insurance	Explains how to design the pricing and billing models for the individual health insurance business in ORMB. It also explains how to create health products, plans, and memberships for the individual health insurance.
Chapter 7	Customer Registration	Describes how to create a person, account, policy, and policy plan through a customer registration object.

Chapter Number	Chapter Name	Chapter Description
Chapter 8	Customer 360° View	Explains how to view in-depth information about the person, account, or policy in the Customer 360° View screen. It explains how to create sort records for bill groups and derivation and pricing parameters for bill groups. It explains how to view the pricing rules of a parent customer and the pricing rules defined for a policy of a bill group. It also explains how to define, edit, and delete the different types of pricing rules of a parent customer and bill group. In addition, it explains how to view the detailed information about the bill.
Chapter 9	Health Product 360° View	Explains how to view in-depth information about the health product or health plan in the Health Product 360° View screen.
Chapter 10	Pricing Management (Health Insurance Business)	Explains the different concepts of the pricing model supported in the application. It explains how to define a parameter, price item, price list, and tiering criterion. It also explains how to define pricing for a price item, how to assign a price item to a price list, and how to assign a price list to a person or account.
Chapter 11	Division	Describes the different types of division. It also explains how to define a division.
Chapter 12	Approval Workflow	Describes the approval workflow process and explains how to perform various tasks involved in the process. It explains how to implement the approval workflow process for an entity, such as account, person, and so on. It explains how to define an approval workflow group, approval workflow chain, approval workflow criterion type, approval workflow group chain linkage, approval workflow reasons, and approval workflow settings.
Chapter 13	Rules Engine	Describes how the rules engine function. It explains how to define, execute, and maintain business rules separately from the application code.
Chapter 14	Alternate Sequential Bill Numbers	Explains how to generate alternate sequential bill numbers which are either unique throughout the system or within the division.
Chapter 15	Transaction Feed Management	Describes the transaction feed management process and its sub-processes. It explains how to execute each sub-process. It also explains how to view the details of various transactions uploaded in the system. In addition, it explains how to create a transaction source, transaction record type, transaction aggregation rule, aggregation schedule, and disaggregation request.
Chapter 16	Upload Validated Payment Data	Explains how to upload and validate the payment records before you move them to the staging area. It also explains how to create payment events and payments using the validated payment records.
Chapter 17	Freeze Payments on Notification	Explains how the system freezes or cancels the automatic payments, voids the refund requests and cancels the refund adjustments when the review comments are received from the auto clearing house.
Chapter 18	Trial Billing	Explains how to generate trial bills before the actual bill is generated for an account. It also explains how to view the trial bills in the system.
Chapter 19	GL Account Validation	Explains how to enable the static or dynamic GL account validation feature.

Chapter Number	Chapter Name	Chapter Description
Chapter 20	Upload Validated Adjustment Data	Explains how to validate and upload an adjustment data file and create adjustments through an adjustment upload request.
Chapter 21	Payment Request	Explains how to create or transfer payments through a payment request.
Chapter 22	Account Receivable Central	Explains how to use the Account Receivable Central screen to search for a bill which you need to offset against another bill. It explains how to perform single, mass, and cross currency offset against one or more bills. It also enables you to create a hold request, refund request, write off request, and dispute request through this screen.
Chapter 23	Offset Request	Explains how to offset the bill's outstanding amount against one or more bills through an offset request. It explains how to create the offset request types and offset requests in the system.
Chapter 24	Funding Request	Describes how to change the automatic payment amount through the funding process. It explains how to create the funding request types and funding requests in the system.
Chapter 25	Refund/Write Off Request	Describes how to refund a payment or credit bill or bill line item and write off a debit bill or bill line item through a refund or write off request, respectively. It explains how to create the refund or write off request types and refund or write off requests in the system.
Chapter 26	Hold Request	Describes how to hold some processes and/or bills at the account or person level for a time period through a hold request. It explains how to create the hold request types and hold requests in the system.
Chapter 27	Delinquency Central	Explains how to track the overdue processes of a delinquent account through the Delinquency Central screen. It also explains how to create a hold request, payment arrangement, and promise to pay for a delinquent account from this screen.
Chapter 28	Upload Request	Explains how to do the following through an upload request: <ul style="list-style-type: none"> • Update bill cycle of accounts • Update contract riders in contracts • Create hold requests, refund requests, write off requests, or billable charges • Reinstate the policies • Create sort records for bill groups • Create derivation and pricing parameters for bill groups
Chapter 29	General Ledger (GL) Accounting Template	Describes how to override the distribution code used for creating FT GL entries using the GL Accounting Template feature. It explains how to create the GL accounting templates for each process and sub processes combination.
Chapter 30	Payment Agreement Request	Describes how to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. It explains how to create the payment agreement request types and payment agreement requests in the system.

Chapter Number	Chapter Name	Chapter Description
Chapter 31	Inbound Message	Explains how to create the customer and membership inbound messages through the web services. It explains the XML format in which the customer and membership data should be available while calling the respective web service. It also explains how to create the inbound message types and how to process the inbound messages in the system.
Chapter 32	Upload Lockbox Payment and Remittance Advices	Explains how to upload lockbox payment and remittance advices received in the Electronic Data Exchange (EDI) 820 format. It also explains the format in which EDI 820 flat file should be uploaded in the system.
Chapter 33	Deferred Revenue Recognition	Describes how to recognize the deferred revenue in the system. It explains how to create a deferred revenue recognition template for each distribution code and contract type combination. It also explains how to generate the schedule for a deferred revenue recognition. In addition, it explains how to edit the deferred revenue recognition schedule.
Chapter 34	Reconciliation	Describes how to reconcile pay instructions received from the external system against the bill segments based on the account identifier, policy number, plan number, member identifier, and coverage period combination. It explains the CSV and EDI 820 file formats in which you can upload the pay instructions. It also explains how to create reconciliation types, reconciliations, discrepancy report types, and discrepancy reports in the system.
Chapter 35	Self-Funded Pricing	Explains how to create the following in the system: <ul style="list-style-type: none"> • Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, One-Time Flat Fees, Bill Period Based Recurring Flat Fees, Frequency Based Recurring Flat Fees, Ancillary, Discount, and Level-Funded pricing rule types • Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, Ancillary, and Level-Funded pricing rules for the parent customers and the policies of the bill groups • One-Time Flat Fees, Bill Period Based Recurring Flat Fees, and Frequency Based Recurring Flat Fees pricing rules for the policies of the bill groups • Discount pricing rules for the parent customers
Chapter 36	Stop-Loss	Explains how to accumulate the specific stop-loss and aggregate stop-loss and create billable charges for them.
Chapter 37	Self-Funded Billing	Explains the billing process for the self-funded plans.
Chapter 38	Fully-Insured Pricing	Explains how to create the following in the system: <ul style="list-style-type: none"> • Age Based, Tier Based, and Pass-Through Billable Charge pricing rule types • Age Based and Tier Based pricing rules for the fully-insured group policy plans

Chapter Number	Chapter Name	Chapter Description
Chapter 39	Fully-Insured Group Billing	Explains how the system creates the fully-insured pass-through billable charges.
Chapter 40	Off-Process Request	Describes how to amend the agreed limits, funds, or calculated amounts of the accumulation products within the policy period through an off-process request. It explains how to create the off-process request types and off-process requests in the system.
Chapter 41	Individual Health Insurance Pricing	Explains how to define the pricing for different services offered in a health plan.
Chapter 42	Individual Health Insurance Billing	Explains how the system calculates premium for an individual using the fully-insured pricing and new born business rules.
Chapter 43	Entity Audit	Explains how to use the entity audit framework to track various actions, such as add, update, and delete for an entity.
Chapter 44	Invoice Request	Describes how to create adhoc regular and trial bills for an account through an invoice request. It explains how to create the invoice request types and invoice requests in the system.
Chapter 45	Hold Request Creation, Modification, Release, and View Through Inbound Web Service	Lists various business services using which you can create, edit, and release a hold request and view the details of a hold request.
Chapter 46	Hold Direct Debit Instruction	Describes how to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer. It explains how to create the auto pay request types and auto pay requests in the system.
Chapter 47	Garbling Customer Information	Explains how to garble the personal information of a customer, such as the customer name, address, email ID, social security number or any other identifier, birth date, gender, and so on, on receiving the data erasure request from the customer.
Chapter 48	Deleting Inactive Customer or Closed Account Information	Explains how to delete all records of a person or account from the system.
Chapter 49	Automatic Refund Process	Explains how the automatic refunds are created in the system.
Chapter 50	Payment Distribution	Explains how the system distributes payments against the unpaid bills of the account or statement.
Chapter 51	Mass Payment Transfer	Explains how the system facilitates mass payment transfer using the File Upload Interface utility.
Chapter 52	FOP Reports	Lists various FOP reports using which you can extract data from the system in the PDF format.
Appendix A	Most Commonly Used Tasks	Lists and describes some of the common tasks that you may perform while using the application.
Appendix B	Administration	Describes how to create UI maps and set various feature configurations in the system.

Conventions

The following conventions are used across this document:

Convention	Meaning
boldface	Boldface indicates graphical user interface elements associated with an action, or terms defined in the text.
<i>italic</i>	Italic indicates a document or book title.
Monospace	Monospace indicates information that an end-user needs to enter in the application.

Document Name	Description
<i>Oracle Revenue Management and Billing Version 4.0.0.0.0 Release Notes</i>	Provides a brief description about the new features, enhancements, and UI level changes introduced in the current release. The new features and enhancements are classified under three distinct heads – Generic (which is intended for both domains), Financial Services, and Health Insurance. It also contains high-level information about the supported platforms, framework upgrade, supported upgrades, and documentation updates. In addition, it contains a list of discontinued features, planned deprecation notices, customer bugs fixed or forward ported and known issues in the current release.
<i>Oracle Utilities Application Framework Business Process Guide</i>	Explains how to get acquainted with the user interface. It explains the different types of pages or portals that you may come across in the application. It explains how to set the user preferences and how to create, manage, assign, and complete a To Do in the application. It also explains how to submit reports and view historic reports in the application.
<i>Oracle Utilities Application Framework Administrative Guide</i>	Explains the general, security, user, designing, developing, and scripting options available in Oracle Utilities Application Framework (OUAF). It describes the user interface, database, configuration, and reporting tools available in OUAF. In addition, it provides information about the application viewer, how to configure incoming and outgoing messages, and how to integrate Lightweight Directory Access Protocol (LDAP), Oracle Identity Manager (OIM), and Batch Scheduler with Oracle Revenue Management and Billing (ORMB).

Document Name	Description
<i>Oracle Revenue Management and Billing Business Process Guide</i>	<p>Explains how to maintain the demographic, geographic, and financial objects (i.e. accounts) of a customer. It explains how to manage a customer's bills, payments, adjustments, credits, collections processing, statements and deposits in Oracle Revenue Management and Billing (ORMB). It also describes the financial transactions, case management, sales and marketing functions, rates engine, quotations, loans, how to monitor and execute job streams, and how to manage workflows, notifications and overdue processing. In addition, it explains how to extract the data from the system using an extract template.</p> <p>The features listed and described in this document can be used in both financial services and health insurance domains.</p>
<i>Oracle Revenue Management and Billing Administrative Guide</i>	<p>Explains how to configure various features and functionalities in Oracle Revenue Management and Billing (ORMB). For example, billing, payments, adjustments, financial transactions, credits, collections processing, loans, service credits, background processes, quotations, case management, security, overdue processing, batch scheduler, workflow and notifications, etc.</p> <p>The information available in this document can be used in both financial services and health insurance domains.</p>
<i>Oracle Revenue Management and Billing TFM - Batch Execution Guide</i>	<p>Explains the sequence in which the batches should be executed while performing various tasks in the Transaction Feed Management (TFM) module.</p> <p>It provides detailed information about each TFM batch and its parameters. It also indicates the restart and multi-threading ability of each batch. In addition, it recommends values for various parameters which can be used for tuning batch performance as per the available hardware.</p>
<i>Oracle Revenue Management and Billing Batch Guide</i>	<p>Provides detailed information about various batches which are used in different modules, such as billing, payments, financial transaction, pricing management, funding request, offset request, hold request, upload request, inbound message, payment agreement request, accruals, earnings credit rate, ILM, deferred revenue recognition, reconciliation, garbling, repricing, entity audit, statements, etc. It also contains information about the batch parameters and the batch restart and multi-threading abilities.</p>

Chapter 1

Fully-Insured Group Customer Management

Topics:

- [Fully-Insured Entities](#)

A fully-insured group health plan is the traditional way to structure an employer-sponsored health plan. In the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. The employer pays a premium to the insurance carrier. The premium rates are fixed for a year, based on the number of employees enrolled in the plan each month. The monthly premium changes during the year when the number of enrolled employees in the plan changes. The insurance carrier collects the premiums and pays the health insurance claims based on the coverage benefits outlined in the policy. The covered persons (i.e. employees and dependents) are responsible to pay any deductible amounts or co-payments required for covered services under the policy.

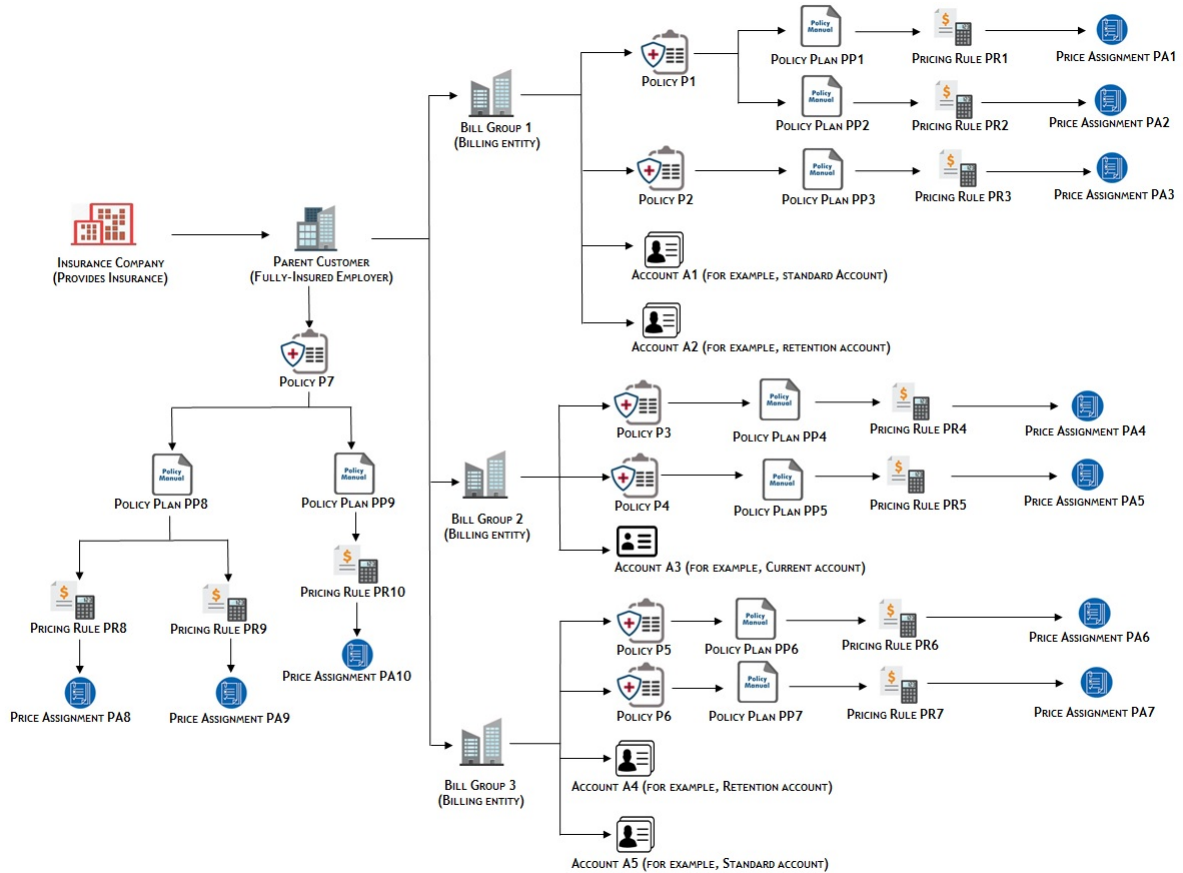

The system enables you to create customers and accounts for the fully-insured group health insurance business. This chapter explains how to create different entities involved in the fully-insured group health insurance business.

Pricing Rules	Pricing Rules on page 69
Price Assignments	Price Assignments on page 69

Parent Customer

The fully-insured employers must be defined as parent customers in the system. You can define a person as the parent customer by setting its person type to **Parent Customer**. You can create a parent customer through a customer registration object or a health care inbound message.

Bill Groups

The system allows you to define one or more bill groups for a parent customer. The membership premium of the employees are billed to a bill group. Each bill group will handle the membership premium of employees based on the employee attributes, such as location, employment status, employment department, and so on. The system allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for a bill group. These parameters are used to derive the bill group against which the membership premium should be billed in the system. You can define a person as the bill group by setting its person type to **Bill Group**. The bill groups should be defined as the child persons of the parent customer (i.e. fully-insured employer) using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. You can create a bill group through a customer registration object or a health care inbound message.

Related Topics

For more information on...	See...
Bill Group Derivation and Pricing Parameters	Bill Group Derivation and Pricing Parameters on page 2996
How to setup the C1-ASOBLNG feature configuration	Setting the C1-ASOBLNG Feature Configuration on page 3616

Bill Group's Account

The membership premium of employees are billed to the bill group's account. Therefore, every bill group should have at least one account in the system. You can create multiple accounts for a bill group. You can create an account for a bill group through a customer registration object or a health care inbound message.

Depending on the employer's preference, the charges for one or more membership and price item combinations can be billed on the same or different accounts of the bill group. The system enables you to create different types of accounts (such as, MEDCARE1 and MEDCARE2) for a bill group. You can specify the type of account by defining the **Invoice Type (C1INVTYP)** characteristic for the account.

Note: At present, we have not shipped any predefined values for the **Invoice Type (C1INVTYP)** characteristic type. You must define the predefined characteristic values as per the business requirements.

You can also set the priority for an account based on the invoice type while specifying the billing account information for a price item in a pricing rule type. For example,

Price Item	Priority	Invoice Type	Account
P1	10	MEDCARE1	A1
	20	MEDCARE2	A2
P2	10	MEDCARE2	A2
	20	MEDCARE1	A1

Now, when the effective pricing rule is derived for P1 on the policy plan, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE1** exists for the bill group. If so, it considers the account (A1) of the bill group for billing. However, if an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE1** does not exist for the bill group, the system checks whether an account where the **Invoice**

Type (C1INVTYP) characteristic type is set to **MEDCARE2** exists for the bill group. If so, it considers the account (A2) of the bill group for billing. If an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE2** does not exist for the bill group, the status of the record in the **CI_REPRC_ENTITY_DTL** table is set to **Error (E)**.

Similarly, when the effective pricing rule is derived for P2 on the policy plan, the system considers the account of the bill group which is available based on the priority. The system derives the billing account for only those price items for which the effective pricing rule is derived.

The system searches the account of the bill group based on the priority when the **Invoice Type Characteristic Type** option type of the **C1-ASOBLNG** feature configuration is set to **C1INVTYP**.

Related Topics

For more information on...	See...
How to setup the C1-ASOBLNG feature configuration	Setting the C1-ASOBLNG Feature Configuration on page 3616

Fully-Insured Group Policy

You can create a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group**. You can create a fully-insured group policy through a customer registration object or a health care inbound message. If the fully-insured group policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

However, if the fully-insured group policy information is given for a parent customer in a health care inbound message, the system does the following:

- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

Note: At present, the **Fully-Insured Individual** policy category is not yet supported in the system.

Policy Plans

A fully-insured group policy may cover various plans for medical, dental, or disability benefits. You can subscribe a person for one or more policy plans within or across policies. The system creates one membership for each person who is subscribed to the policy plan. You can then add dependent members in each membership whenever required.

While creating a policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received in an inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can only associate a pricing rule type where the pricing rule type category is set to **Age Based**, **Tier Based**, or **Pass-Through Billable Charge**. If you associate an age based pricing rule type with the policy plan, the system creates the SQI based billable charge whenever the membership premium is calculated for eligible members. If you associate a tier based pricing rule type with the policy plan, the system creates the SQI based billable charge whenever the premium is calculated for membership. However, if you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer the pass-through billable charge pricing rule type which is associated with the policy plan.

Price Items

Each service offered in the fully-insured group health plan should be defined as a price item in the system. You can define a price item from the user interface. You must add the price item in a pricing rule type. The system then enables you to create a pricing rule for a price item using the respective pricing rule type.

Pricing Rule Types

You can create a pricing rule using the respective pricing rule type. The system enables you to create pricing rule types of the following categories for the fully-insured group health plan through a health care inbound message:

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Age Based	Age Based	AGE_BASED
Tier Based	Tier Based	TIER_BASED
Pass-Through Billable Charge	Pass-Through Billable Charge	FI_PASSTBC

Note: You cannot define a pricing rule using a pricing rule type where the pricing rule type category is set to **Pass-Through Billable Charge**.

Pricing Rules

The fully-insured group health plan may offer various services to the employer, such as medical insurance, dental insurance, vision care, life insurance, short-term and long-term disability benefits, and so on. Oracle Revenue Management and Billing enables you to define pricing rules for various services offered in the fully-insured group health plan. The below table lists the pricing rules which you can define for the following services offered in the fully-insured group health plan:

Service	Pricing Rule	Created for....
Medical Insurance, Dental Insurance, Vision Care, Life Insurance, Short-Term and Long-Term Disability Benefits, etc.	Age Based	Fully-Insured Group Policy Plan
	Tier Based	Fully-Insured Group Policy Plan

You can create the above mentioned pricing rules for the fully-insured group policy plans through a health care inbound message and not from the user interface. The system creates a price assignment for each pricing rule. In the age based pricing rules, you can define different premium fee for employees who belong different age band. You can also offer different premium fee for the employees with the same age band, but with the different set of attributes. The system also enables you to charge additional fee for the eligible member based on certain modifiers. For example, you can charge additional fee when the eligible member is alcoholic and/or consumes tobacco. However, in the tier based pricing rules, you can define different premium fee for employees who belong to different membership tier, such as Employee (E), Employee + Spouse (ES), Employee + Spouse + Children (F), and so on.

The system searches for the pricing rule of a price item (i.e. service) on the policy plan to which the membership belongs. If the effective pricing rule for a price item is not available on the policy plan, the system does not consider the respective price item for billing.

Price Assignments

The system creates a price assignment for each fully-insured pricing rule. If different premium fee is defined for employees with different set of employee attributes, then the system creates a separate price component for each set of employee attributes. If the modifiers are used in the age based pricing rule, the system creates a price component for each modifier. In the price component, the age band or tier band parameter, the employee attributes, and modifiers are used to define the pricing eligibility criteria. Once the age based or tier based pricing rule is defined for a policy plan, the system creates a price item pricing and price list, and then assigns the price item pricing to the price list.

Chapter 2

Self-Funded Customer Management

Topics:

- [Self-Funded Entities](#)

Self-funded health insurance, also known as Administrative Services Only (ASO), is a self insurance arrangement whereby an employer provides health or disability benefits to employees using the company's own funds. In self-funded health plan, employers operate their own health plan. However, in the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. Employers choose to self-insure because it allows them to save the profit margin that an insurance company adds to its premium for a fully-insured group health plan. However, self-insuring exposes the company to much larger risk in the event that more claims than expected must be paid.

Oracle Revenue Management and Billing (ORMB) supports the following types of self-funding approach:

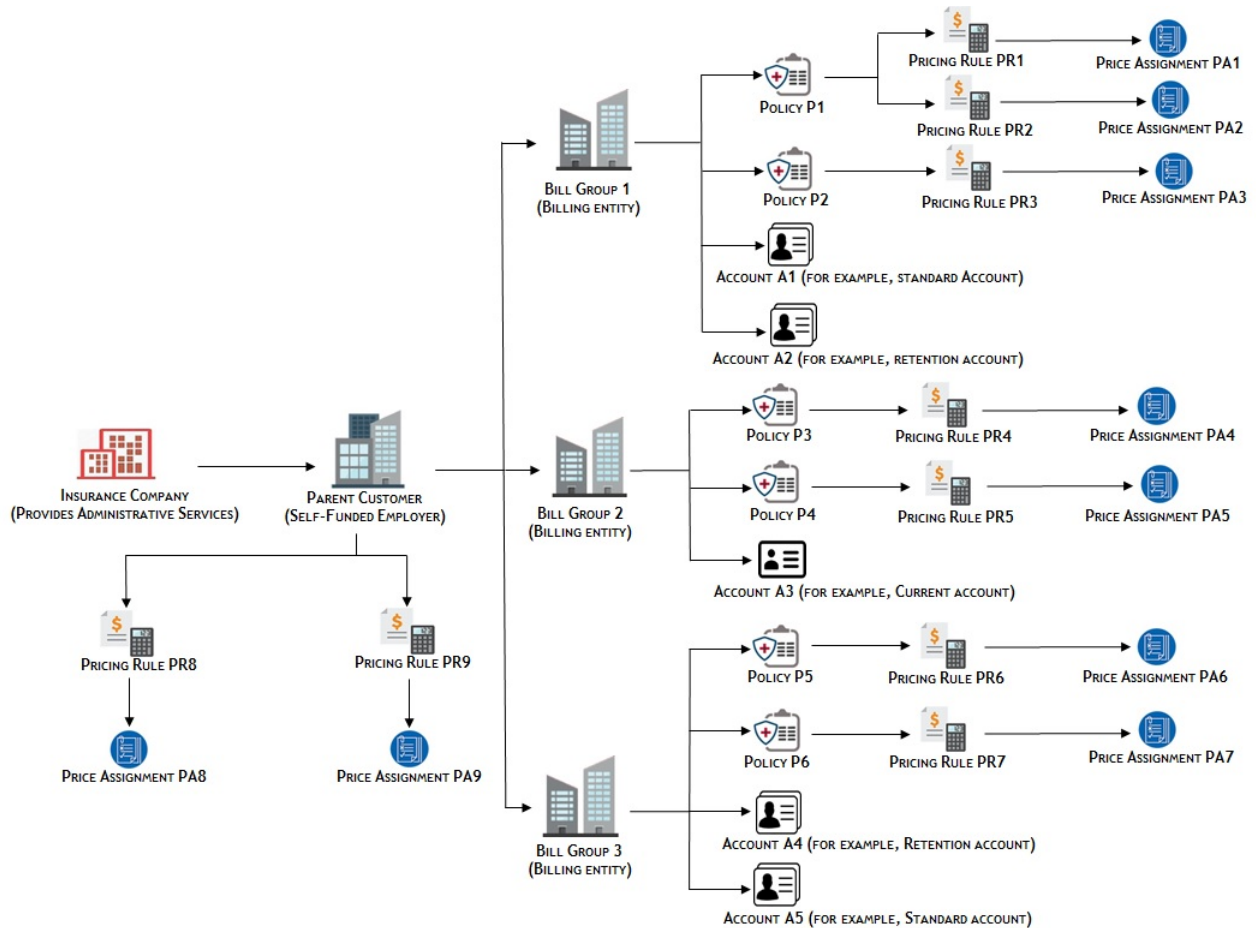

- **Fully Self-Funded** - In the fully self-funded approach, the employer retains all the risk and bears the claim costs irrespective of any limit.
- **Partially Self-Funded** - In the partially self-funded approach, the employer purchases reinsurance or stop loss coverage to pass the risk to insurance company.

The system enables you to create customers and accounts for the self-funded health insurance business. This chapter explains how to create different entities involved in the self-funded health insurance business.

For more information on...	See...
Self-Funded Entities	Self-Funded Entities on page 72

Self-Funded Entities

The following figure graphically represents the different entities involved in the self-funded health insurance business:

For more information on...	See...
Parent Customer	Parent Customer on page 73

Bill Group's Account	Bill Group's Account on page 73
Self-Funded Policy	Self-Funded Policy on page 74
Price Items	Price Items on page 74
Pricing Rule Types	Pricing Rule Types on page 74
Pricing Rules	Pricing Rules on page 75
Price Assignments	Price Assignments on page 76

Parent Customer

The self-funded employers must be defined as parent customers in the system. You can define a person as the parent customer by setting its person type to **Parent Customer**. You can create a parent customer through a customer registration object or a health care inbound message.

Bill Groups

The system allows you to define one or more bill groups for a parent customer. The claim, enrollment, and ancillary transactions of the employees are billed to a bill group. Each bill group will handle the claim, enrollment, and ancillary transactions of employees based on the employee attributes, such as location, employment status, employment department, and so on. The system allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for a bill group. These parameters are used to derive the bill group against which the claim, enrollment, and ancillary charges should be billed in the system. The derived bill group is also used for billing the claim based fees, specific stop-loss credits, aggregate stop-loss credits, discount, and level funding charges.

You can define a person as the bill group by setting its person type to **Bill Group**. The bill groups should be defined as the child persons of the parent customer (i.e. self-funded employer) using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. You can create a bill group through a customer registration object or a health care inbound message.

Related Topics

For more information on...	See...
Bill Group Derivation and Pricing Parameters	Bill Group Derivation and Pricing Parameters on page 2996
How to setup the C1-ASOBLNG feature configuration	Setting the C1-ASOBLNG Feature Configuration on page 3616

Bill Group's Account

The claim charges, specific stop-loss credits, aggregate stop-loss credits, claim based fees, enrollment based fees, ancillary charges, discount, and level funding charges are billed to the bill group's account. Therefore, every bill group should have at least one account in the system. You can create multiple accounts for a bill group. You can create an account for a bill group through a customer registration object or a health care inbound message.

Depending on the employer's preference, the claim charges, specific stop-loss credits, aggregate stop-loss credits, claim based fees, enrollment based fees, ancillary charges, discount, and level funding charges can be billed on the same or different accounts of the bill group. The system enables you to create different types of accounts (such as, standard and retention) for a bill group. You can specify the type of account by defining the **Invoice Type (C1INVTYP)** characteristic for the account.

Note: At present, we have not shipped any predefined values for the **Invoice Type (C1INVTYP)** characteristic type. You must define the predefined characteristic values as per the business requirements.

You can also set the priority for an account based on the invoice type while specifying the billing account information for a price item in a pricing rule type. For example,

Price Item	Priority	Invoice Type	Account
P1	10	Standard	A1
	20	Retention	A2
P2	10	Retention	A2

Price Item	Priority	Invoice Type	Account
	20	Standard	A1

Now, when a claim transaction is mapped to P1, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Standard** exists for the bill group. If so, it considers the standard account (A1) of the bill group for billing. However, if an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Standard** does not exist for the bill group, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Retention** exists for the bill group. If so, it considers the retention account (A2) of the bill group for billing. If an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Retention** does not exist for the bill group, the status of the transaction is changed to **Error**.

Similarly, when a claim transaction is mapped to P2, the system considers the account of the bill group which is available based on the priority. The system derives the billing account for only those price items for which the effective pricing rule is derived.

The system searches the account of the bill group based on the priority when the **Invoice Type Characteristic Type** option type of the **C1-ASOBLNG** feature configuration is set to **C1INVTYP**.

Related Topics

For more information on...	See...
How to setup the C1-ASOBLNG feature configuration	Setting the C1-ASOBLNG Feature Configuration on page 3616

Self-Funded Policy

You can create a self-funded policy using a policy type where the policy category is set to **Self-Funded**. You can create a self-funded policy through a customer registration object or a health care inbound message. If the self-funded policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

Price Items

Each service offered in the self-funded plan should be defined as a price item in the system. You must add the price item in a pricing rule type. The system then enables you to create a pricing rule for a price item using the respective pricing rule type.

You can define a price item and associate the required parameters with the price item from the user interface. You can use the price item parameters for defining multi parameter based pricing or for aggregating the transactions.

Pricing Rule Types

You can create a pricing rule using the respective pricing rule type. The system enables you to create pricing rule types of the following categories for the self-funded plan from the user interface:

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Claim	Claim	CLAIM
Retention Type Claim Based	Retention Type Claim Based	RETCLMBSD
Discount Share	Discount Arrangement	DISSHARE
Discount Guarantee	Discount Arrangement	DISGUAR

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
One-Time Flat Fees	Flat Fees	ONETIMEFLATFEES
Bill Period Based Recurring Flat Fees	Flat Fees	RECFLATFEES_BP
Frequency Based Recurring Flat Fees	Flat Fees	RECFLATFEES_FREQ
Retention Type Enrollment Based	Retention Type Enrollment Based	RETENRLBSD
Ancillary	Ancillary	ANCILLARY
Specific Stop-Loss	Specific Stop-Loss	SSL
Aggregate Stop-Loss	Aggregate Stop-Loss	ASL
Enrollment Based Premium	Level Funded	LVLLENRLPRE
Flat Rate Based Premium	Level Funded	LVLFLATPRE

Pricing Rules

The self-funded plan may offer various services to the employer, such as claim administration, reinsurance or stop-loss, discount or level funding arrangement, and so on. Oracle Revenue Management and Billing enables you to define pricing rules for various services offered in the self-funded plan. The below table lists the pricing rules which you can define for the following services offered in the self-funded plan:

Service	Pricing Rule	Created for....
Claim Administration	Claim	Parent Customer
Claim Administration	Claim	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Retention Type Claim Based	Parent Customer
Claim Administration	Retention Type Claim Based	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Discount Share	Parent Customer
Claim Administration	Discount Guarantee	Parent Customer
Claim Administration	One-Time Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Bill Period Based Recurring Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Frequency Based Recurring Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Enrollment	Retention Type Enrollment Based	Parent Customer
Enrollment	Retention Type Enrollment Based	Bill Group's Policy where the Parent Customer is the Policy Holder
Ancillary, such as Laboratory, Radiology, Pharmacy, Physical Therapy, or Preventive Care	Ancillary	Parent Customer

Service	Pricing Rule	Created for....
Ancillary, such as Laboratory, Radiology, Pharmacy, Physical Therapy, or Preventive Care	Ancillary	Bill Group's Policy where the Parent Customer is the Policy Holder
Stop-Loss	Specific Stop-Loss	Parent Customer
Stop-Loss	Specific Stop-Loss	Bill Group's Policy where the Parent Customer is the Policy Holder
Stop-Loss	Aggregate Stop-Loss	Parent Customer
Stop-Loss	Aggregate Stop-Loss	Bill Group's Policy where the Parent Customer is the Policy Holder
Level Funding Arrangement	Enrollment Based Premium	Parent Customer
Level Funding Arrangement	Enrollment Based Premium	Bill Group's Policy where the Parent Customer is the Policy Holder
Level Funding Arrangement	Flat Rate Based Premium	Parent Customer
Level Funding Arrangement	Flat Rate Based Premium	Bill Group's Policy where the Parent Customer is the Policy Holder

You can create the above mentioned self-funded pricing rules for a parent customer or for the policy of the bill group from the user interface and not through a health care inbound message.

The system creates a price assignment for each pricing rule. In case of the retention type claim and enrollment based pricing rules, the system creates multiple price assignments when different claim based or enrollment based fee is offered for employees with different set of employee attributes.

The system first searches for the pricing rule of a price item (i.e. service) at the bill group level. If the effective pricing rule for a price item is available at the bill group level, the system uses it for deriving the price assignment. However, if the effective pricing rule for a price item is not available at the bill group level, the system searches for the pricing rule of a price item at the parent customer level. If the effective pricing rule for a price item is available at the parent customer level, the system uses it for deriving the price assignment. However, if the effective pricing rule for a price item is not available at the bill group or parent customer level, the system does not consider the respective price item for billing.

Price Assignments

The system creates a price assignment for each self-funded pricing rule. In case of the retention type claim and enrollment based pricing rules, the system creates multiple price assignments when different claim based or enrollment based fee is offered for employees with different set of employee attributes.

The system automatically creates a price assignment whenever you create a self-funded pricing rule. The system creates the price assignment in a price list and assigns the price list to the parent customer or bill group. The system creates multiple price assignments when you define a pricing rule for a policy of a bill group using a pricing group.

Pricing Group	Pricing Group on page 2560

Chapter 3

Health Insurance Business Management

Topics:

- [Policy Type](#)
- [Policy Person Role](#)
- [Contract Relationship Type](#)
- [Source System Extendable Lookup](#)
- [Extendable Lookup \(Source System\)](#)
- [Membership Identifier Type](#)
- [Pricing Parameters](#)
- [Geographic Rating Area](#)
- [Member Relationship Pricing Parameter](#)
- [Subscription Tier Pricing Parameter](#)
- [Medicare Benefits](#)
- [Geographic Rating Area Preference](#)
- [Member Relationship and Subscription Tier Preference](#)

Health insurance is a type of insurance coverage that typically pays for medical, surgical, prescription drug and sometimes dental expenses incurred by the insured. Health insurance can reimburse the insured for expenses incurred from illness or injury, or pay the care provider directly. It is often included in employer benefit packages as a means of enticing quality employees, with premiums partially covered by the employer but often also deducted from employee paychecks.

Oracle Revenue Management and Billing has extended its pricing and billing engines to meet the requirements of the following three lines of health insurance business:

- [Fully-Insured Group Health Insurance](#) on page 253
- [Self-Funded Group Health Insurance](#) on page 403
- [Individual Health Insurance](#) on page 451

To use the pricing and billing engines for the above three lines of health insurance business, you need to set the respective prerequisites:

Line of Business	Prerequisites
Fully-Insured Group Health Insurance	Refer to the Pre-requisites on page 255 section.
Self-Funded Group Health Insurance	Refer to the Pre-requisites on page 405 section.
Individual Health Insurance	Refer to the Pre-requisites section.

Policy Type

Oracle Revenue Management and Billing enables you to define a policy type using which you can create a policy. The policy type helps the system to determine:

- **Policy Category** - The category implies the line of business in the health insurance domain for which the policy should be created using the policy type. The valid values are:
 - Fully-Insured Group
 - Fully-Insured Individual
 - Self-Funded

Note: At present, the **Fully-Insured Individual** policy category is not supported in the system.

- **Policy Business Object** - The business object using which the policy should be created in the system. You can specify the **C1-POLICY** or **C1-ASOPolicy** business object depending on whether you want to create the policy type for the fully-insured group or self-funded health insurance business.

The **Policy Type** screen allows you to define, edit, copy, and delete a policy type. It contains the following zones:

- [Policy Type List](#) on page 78
- [Policy Type](#) on page 79

Policy Type List

The **Policy Type List** zone lists the policy types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Policy Type	Displays the policy type.
Description	Displays the description of the policy type.
Policy Category	Indicates the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> • Self-Funded • Fully-Insured Group • Fully-Insured Individual
Edit	On clicking the Edit () icon, the Policy Type screen appears where you can edit the details of the policy type.
Duplicate	On clicking the Duplicate () icon, the Policy Type screen appears where you can define a new policy type using an existing policy type.
Delete	On clicking the Delete () icon, you can delete the policy type. <p>Note: You can delete a policy type when a policy is not created using the policy type.</p>

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to a policy type, the **Policy Type** zone appears with the details of the respective policy type.

You can filter the list using the **Policy Category** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

How to view the details of a policy type	Viewing the Policy Type Details on page 86

Policy Type

The **Policy Type** zone displays the details of the policy type. It contains the following sections:

- **Main** - Displays basic information about the policy type. It contains the following fields:

Field Name	Field Description
Policy Type	Displays the policy type.
Policy Business Object	Indicates the business object using which the policy should be created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.
Description	Displays the description of the policy type.
Status	Indicates the status of the policy type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive
Policy Category	Indicates the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> • Self-Funded • Fully-Insured Group • Fully-Insured Individual
Detailed Description	Displays additional information about the policy type.

- **Characteristics** - Lists the characteristics defined for the policy type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the policy type.

Button Name	Button Description
Delete	Used to delete the policy type.
	Note: You can delete a policy type when a policy is not created using the policy type.
Duplicate	Used to create a new policy type using an existing policy type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the policy type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.

By default, the **Policy Type** zone does not appear in the **Policy Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the policy type in the **Policy Type List** zone.

Defining a Policy Type

Prerequisites

To define a policy type, you should have:

- Required policy business object defined in the application

Note: The **C1-POLICY** and **C1-ASOPolicy** business objects are shipped with the product. You can use the **C1-POLICY** business object to create a fully-insured group policy and the **C1-ASOPolicy** business object to create a self-funded policy.

Procedure

To define a policy type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.
A sub-menu appears.
3. Click the **Add** option from the **Policy Type** sub-menu.

The **Policy Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the policy type.

- **Characteristics** - Used to define the characteristics for the policy type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to specify the policy type.	Yes
Business Object	Indicates the business object using which you are defining the policy type.	Not applicable
Policy Business Object	Used to indicate the business object using which you want to create a policy.	Yes
Description	Used to specify the description for the policy type.	Yes
Status	Used to indicate the status of the policy type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Policy Category	Used to indicate the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> • Fully-Insured Group • Fully-Insured Individual • Self-Funded 	Yes
	Note: At present, the Fully-Insured Individual policy category is not supported in the system.	
Detailed Description	Used to specify additional information about the policy type.	No

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy Type** screen.

4. Enter the required details in the **Main** section.

Note: If you want to create a policy type for the fully-insured group health insurance business, select the **C1-POLICY** business object from the **Policy Business Object** list and the **Fully-Insured Group** option from the **Policy Category** list. However, if you want to create a policy type for the self-funded health insurance business, select the **C1-ASOPolicy** business object from the **Policy Business Object** list and the **Self-Funded** option from the **Policy Category** list.

5. Define the characteristics for the policy type, if required.
6. Click **Save**.

The policy type is defined.

Defining a Characteristic for a Policy Type

Prerequisites

To define a characteristic for a policy type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy Type**).

Procedure

To define a characteristic for a policy type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a policy type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to the Policy Type .	Note: This field is required when you are defining a characteristic for the policy type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Note: This field is required when you are defining a characteristic for the policy type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the policy type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the policy type, click the **Delete** (🗑️) icon corresponding to the characteristic.

Editing a Policy Type

Prerequisites

To edit a policy type, you should have:

- Required policy business object defined in the application

Note: The **C1-POLICY** and **C1-ASOPolicy** business objects are shipped with the product. You can use the **C1-POLICY** business object to create a fully-insured group policy and the **C1-ASOPolicy** business object to create a self-funded policy.

Procedure

To edit a policy type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.
A sub-menu appears.
3. Click the **Search** option from the **Policy Type** sub-menu.
The **Policy Type** screen appears.
4. In the **Policy Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the policy type whose details you want to edit.

The **Policy Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the policy type.
- **Characteristics** - Used to define the characteristics for the policy type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Displays the policy type.	Not applicable
Business Object	Indicates the business object using which you are defining the policy type.	Not applicable
Policy Business Object	Used to indicate the business object using which you want to create a policy.	Yes
Description	Used to specify the description for the policy type.	Yes
Status	Used to indicate the status of the policy type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Policy Category	Used to indicate the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> • Fully-Insured Group • Fully-Insured Individual • Self-Funded 	Yes
	Note: At present, the Fully-Insured Individual policy category is not supported in the system.	

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the policy type.	No

Tip: Alternatively, you can edit the details of a policy type by clicking the **Edit** button in the **Policy Type** zone.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the policy type, if required.
7. Click **Save**.

The changes made to the policy type are saved.

Copying a Policy Type

Instead of creating a policy type from scratch, you can create a new policy type using an existing policy type. This is possible through copying a policy type. On copying a policy type, the details including the characteristics are copied to the new policy type. You can then edit the details, if required.

Prerequisites

To copy a policy type, you should have:

- Policy type (whose copy you want to create) defined in the application
- Required policy business object defined in the application

Note: The **C1-POLICY** and **C1-ASOPolicy** business objects are shipped with the product. You can use the **C1-POLICY** business object to create a fully-insured group policy and the **C1-ASOPolicy** business object to create a self-funded policy.

Procedure

To copy a policy type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.
A sub-menu appears.
3. Click the **Search** option from the **Policy Type** sub-menu.
The **Policy Type** screen appears.
4. In the **Policy Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the policy type whose copy you want to create.

The **Policy Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the policy type.
- **Characteristics** - Used to define the characteristics for the policy type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to specify the policy type.	Yes
Business Object	Indicates the business object using which you are defining the policy type.	Not applicable
Policy Business Object	Used to indicate the business object using which you want to create a policy.	Yes
Description	Used to specify the description for the policy type.	Yes
Status	Used to indicate the status of the policy type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Policy Category	Used to indicate the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> • Fully-Insured Group • Fully-Insured Individual • Self-Funded 	Yes
	Note: At present, the Fully-Insured Individual policy category is not supported in the system.	
Detailed Description	Used to specify additional information about the policy type.	No

Tip: Alternatively, you can copy a policy type by clicking the **Duplicate** button in the **Policy Type** zone.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove characteristics of the policy type, if required.
7. Click **Save**.

The new policy type is defined.

Deleting a Policy Type

Procedure

To delete a policy type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.
A sub-menu appears.
3. Click the **Search** option from the **Policy Type** sub-menu.
The **Policy Type** screen appears.
4. In the **Policy Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the policy type that you want to delete.
A message appears confirming whether you want to delete the policy type.

Note: You can delete a policy type when a policy is not created using the policy type.

Tip: Alternatively, you can delete a policy type by clicking the **Delete** button in the **Policy Type** zone.

5. Click **OK**.
The policy type is deleted.

Policy Person Role

Oracle Revenue Management and Billing enables you to specify the role of a person while associating the person to a policy. This helps to indicate whether the person is a policy holder, broker, underwriter, and so on in a policy. The **Policy Person Role** screen allows you to define, edit, and delete a policy person role. It contains the following zone:

- [Policy Person Role List](#) on page 87

Policy Person Role List

The **Policy Person Role List** zone lists the roles which you can assign to a person in a policy. It contains the following columns:

Column Name	Column Description
Policy Person Role	Displays the policy person role.
Description	Displays the description of the policy person role.
Edit	On clicking the Edit () icon, the Policy Person Role screen appears where you can edit the details of the policy person role.
Delete	On clicking the Delete () icon, you can delete the policy person role.
	Note: You can delete a policy person role when it is not used while associating a person with a policy.

You can define a new policy person role by clicking the **Add** link in the upper-right corner of this zone.

You can filter the list using various search criteria (such as **Policy Person Role** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper-right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Contract Relationship Type

Oracle Revenue Management and Billing enables you to define various relationship types using which you can relate main subscriber and other dependent persons in a membership. The **Contract Relationship Type** screen allows you to define, edit, and delete such relationship types. It also allows you to filter the contract relationship types using various search criteria.

Filtering the Contract Relationship Types

Prerequisites

To filter the contract relationship types, you should have:

- Contract relationship types defined in the application

Procedure

To filter the contract relationship types:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **C** and then click **Contract Relationship Type**.

The **Contract Relationship Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Used to search a particular contract relationship type.	Yes

- Enter the search criteria in the **Relationship Type** field.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

The search results are filtered based on the specified criteria.

Defining a Contract Relationship Type

Procedure

To define a contract relationship type:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **C** and then click **Contract Relationship Type**.

The **Contract Relationship Type** screen appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Used to specify the contract relationship type.	Yes
Description	Used to specify the description for the contract relationship type.	Yes

- Enter the required details in the **Contract Relationship Type** screen.
- If you want to define more than one contract relationship type, click the **Add (+)** icon and then repeat step 3.

Note: However, if you want to remove a contract relationship type, click the **Delete (🗑)** icon corresponding to the contract relationship type.

- Click **Save**.

The contract relationship type is defined.

Source System Extendable Lookup

Oracle Revenue Management and Billing enables you to track the external system from where the fully-insured group or self-funded policies are received for billing. Each external system must be defined in the system using the **Source System (C1-SourceSystemLookup)** extendable lookup.

The **Extendable Lookup Query** screen allows you to search for an extendable lookup. It contains the following zone:

- [Extendable Lookup Search](#) on page 92

Extendable Lookup Search

The **Extendable Lookup Search** zone allows you to search for an extendable lookup. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Used to search a particular extendable lookup business object.	No
Description	Used to search extendable lookups with a particular description.	No

Note: You must specify at least one search criterion while searching for an extendable lookup.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Business Object	Displays the extendable lookup business object.
Description	Displays the description of the extendable lookup business object.
	Note: It has a link. On clicking the link, the Extendable Lookup screen appears where you can view the details of the respective extendable lookup.

Searching for the Source System Extendable Lookup

Procedure

To search for the **Source System** extendable lookup:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **E** and then click **Extendable Lookup**.
The **Extendable Lookup Query** screen appears.
3. In the **Extendable Lookup Search** zone, enter **C1-SourceSystemLookup** in the **Business Object** field.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

The **Source System** extendable lookup business object appears in the **Search Results** section.

Extendable Lookup (Source System)

The **Extendable Lookup** screen allows you to view the values of the **Source System (C1-SourceSystemLookup)** extendable lookup. It also allows you to define, edit, copy, and delete a source system. It contains the following zones:

- [Extendable Lookup Value List](#) on page 94
- [Extendable Lookup Value](#) on page 95

Extendable Lookup Value List

The **Extendable Lookup Value List** zone lists the values which are already defined for the **Source System** extendable lookup. It contains the following columns:

Column Name	Column Description
Value	Displays the source system.
Description	Displays the description of the source system.
Owner	Indicates who has created the source system. The valid values are: <ul style="list-style-type: none"> • Framework • Base • Customer Modification
Edit	On clicking the Edit () icon, the Extendable Lookup screen appears where you can edit the details of the source system.
Duplicate	On clicking the Duplicate () icon, the Extendable Lookup screen appears where you can define a new source system using an existing source system.
Delete	On clicking the Delete () icon, you can delete the source system.
	Note: You can delete a source system when it is not yet used in the system.
Detailed Description	Displays additional information about the source system.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation buttons, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to a source system, the **Extendable Lookup Value** zone appears with the details of the respective source system.

You can filter the list using various search criteria (such as, **Value** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Defining a Source System

Procedure

To define a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. Click the **Add** button in the **Page Title** area of the **Extendable Lookup** screen.

The **Extendable Lookup** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to specify the external system from where the policies are received for billing.	Yes
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
	Note: By default, the value is set to Active .	

4. Enter the required details in the **Main** section.
5. Click **Save**.

The source system is added in the **C1-SourceSystemLookup** extendable lookup.

Editing a Source System

Procedure

To edit a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.
The **Extendable Lookup** screen appears.
3. In the **Extendable Lookup Value List** zone, click the **Edit**  icon in the **Edit** column corresponding to the source system whose details you want to edit.

The **Extendable Lookup** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Displays the source system.	Not applicable
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes

Tip: Alternatively, you can edit the details of a source system by clicking the **Edit** button in the **Extendable Lookup Value** zone.

4. Modify the required details in the **Main** section.
5. Click **Save**.

The changes made to the source system are saved.

Copying a Source System

Instead of creating a source system from scratch, you can create a new source system using an existing source system. This is possible through copying a source system. On copying a source system, the details of the source system are copied to the new source system. You can then edit the details, if required.

Prerequisites

To copy a source system, you should have:

- Source system (whose copy you want to create) defined in the application

Procedure

To copy a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. In the **Extendable Lookup Value List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the source system whose copy you want to create.

The **Extendable Lookup** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to specify the external system from where the policies are received for billing.	Yes
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes

Tip: Alternatively, you can copy a source system by clicking the **Duplicate** button in the **Extendable Lookup Value** zone.

4. Enter the required details in the **Main** section.
5. Click **Save**.

The new source system is added in the **C1-SourceSystemLookup** extendable lookup.

Deleting a Source System**Procedure**

To delete a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. In the **Extendable Lookup Value List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the source system that you want to delete.

A message appears confirming whether you want to delete the source system.

Note: You can delete a source system when it is not yet used in the system.

Tip: Alternatively, you can delete a source system by clicking the **Delete** button in the **Extendable Lookup Value** zone.

4. Click **OK**.

The source system is deleted from the **C1-SourceSystemLookup** extendable lookup.

Viewing the Source System Details**Procedure**

To view the details of a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. In the **Extendable Lookup Value List** zone, click the **Broadcast** () icon corresponding to the source system whose details you want to view.

The **Extendable Lookup Value** zone appears.

4. View the details of the source system in the **Extendable Lookup Value** zone.

Membership Identifier Type

Oracle Revenue Management and Billing enables you to define an identifier for the group and individual memberships using a membership identifier type. The **Membership Identifier Type** screen allows you to create, edit, delete, and copy a membership identifier type. It contains the following zones:

- [Membership Identifier Type List](#) on page 100
- [Membership Identifier Type](#) on page 101

When you create or edit a group or individual membership through a health care inbound message or through the membership repricing inbound web service, you can define various identifiers (for example, beneficiary ID, exchange subscriber ID, and so on) associated with the membership using the membership identifier type.

Membership Identifier Type List

The **Membership Identifier Type List** zone lists the membership identifier types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Membership Identifier Type	Displays the membership identifier type.

Column Name	Column Description
Description	Displays the description of the membership identifier type.
Edit	On clicking the Edit (✎) icon, the Membership Identifier Type screen appears where you can edit the details of the membership identifier type.
Duplicate	On clicking the Duplicate (📄) icon, the Membership Identifier Type screen appears where you can define a new membership identifier type using an existing membership identifier type.
Delete	On clicking the Delete (🗑) icon, you can delete the membership identifier type.
	Note: You can delete a membership identifier type when it is not yet used in the system.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to a membership identifier type, the **Membership Identifier Type** zone appears with the details of the respective membership identifier type.

Membership Identifier Type

The **Membership Identifier Type** zone displays the details of the membership identifier type. It contains the following sections:

- **Main** - Displays the basic details of the membership identifier type. It contains the following fields:

Field Name	Field Description
Membership Identifier Type	Displays the membership identifier type.
Description	Displays the description of the membership identifier type.
Validation Algorithm	Indicates the algorithm which is used to validate the value of the membership identifier type.
	Note: It has a link. On clicking the link, the Algorithm screen appears where you can view the details of the respective algorithm.
Detailed Description	Displays additional information about the membership identifier type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the membership identifier type.
Delete	Used to delete the membership identifier type. Note: You can delete a membership identifier type when it is not yet used in the system.
Duplicate	Used to create a new membership identifier type using an existing membership identifier type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the membership identifier type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.

By default, the **Membership Identifier Type** zone does not appear in the **Membership Identifier Type** screen. It appears only when you click the **Broadcast** () icon corresponding to a membership identifier type in the **Membership Identifier Type List** zone.

Defining a Membership Identifier Type

Prerequisites

To define a membership identifier type, you should have:

- Validation algorithm defined in the application (in case you want to use it)

Note: No validation algorithm type for membership identifier type is shipped with the product. However, the **Membership Identifier Type - Validation** algorithm entity is available in the application. You can create the required custom validation algorithms for the **Membership Identifier Type - Validation** algorithm entity.

Procedure

To define a membership identifier type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **M** and then click **Membership Identifier Type**.
A sub-menu appears.
3. Click the **Add** option from the **Membership Identifier Type** sub-menu.

The **Membership Identifier Type** screen appears. It contains the following section:

- **Main** - Used to specify the basic details of the membership identifier type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Identifier Type	Used to specify the membership identifier type.	Yes
Description	Used to specify the description for the membership identifier type.	Yes
Validation Algorithm	Used to indicate the algorithm using which you want to validate the value of the membership identifier type. It is triggered when you define an identifier for a membership using the membership identifier type. Note: The Search (🔍) icon appears corresponding to the Validation Algorithm field. On clicking the Search icon, the Algorithm Search window appears.	No
Detailed Description	Used to specify additional information about the membership identifier type.	No

Tip: Alternatively, you can access the **Membership Identifier Type** screen by clicking the **Add** button in the **Page Title** area of the **Membership Identifier Type** screen.

4. Enter the required details in the **Main** section.
5. Click **Save**.

The membership identifier type is defined.

Editing a Membership Identifier Type**Prerequisites**

To edit a membership identifier type, you should have:

- Validation algorithm defined in the application (in case you want to use it)

Note: No validation algorithm type for membership identifier type is shipped with the product. However, the **Membership Identifier Type - Validation** algorithm entity is available in the application. You can create the required custom validation algorithms for the **Membership Identifier Type - Validation** algorithm entity.

Procedure

To edit a membership identifier type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **M** and then click **Membership Identifier Type**.
A sub-menu appears.
3. Click the **Search** option from the **Membership Identifier Type** sub-menu.
The **Membership Identifier Type** screen appears.
4. In the **Membership Identifier Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the membership identifier type whose details you want to edit.

The **Membership Identifier Type** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details of the membership identifier type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Identifier Type	Displays the membership identifier type.	Not applicable
Description	Used to specify the description for the membership identifier type.	Yes
Validation Algorithm	Used to indicate the algorithm using which you want to validate the value of the membership identifier type. It is triggered when you define an identifier for a membership using the membership identifier type. Note: The Search (🔍) icon appears corresponding to the Validation Algorithm field. On clicking the Search icon, the Algorithm Search window appears.	No
Detailed Description	Used to specify additional information about the membership identifier type.	No

Tip: Alternatively, you can edit the details of a membership identifier type by clicking the **Edit** button in the **Membership Identifier Type** zone.

5. Modify the required details in the **Main** section.
6. Click **Save**.
The changes made to the membership identifier type are saved.

Pricing Parameters

Oracle Revenue Management and Billing enables you to create new set of pricing parameters, such as, Geographic Rating Area, Member Relationship, and Subscription Tier for a fully-insured group customer.

To create a geographic rating area pricing parameter the ORMB system uses the policy plan and geographical details (of a member person) to retrieve the appropriate rating area. This rating area is further used to obtain the rate information defined on the pricing rule that is eventually based on a particular geographical rating area. To create a member relationship pricing parameter, the ORMB system retrieves the appropriate member relationship through the post processing algorithm and stamps the retrieved member relationship on the member person belonging to a particular membership. However, to create a subscription tier pricing parameter, the ORMB system retrieves the subscription tier information through the post processing algorithm and stamps the tier information on the desired membership.

For more information on how to setup the **Pricing Parameters** feature, see [Prerequisites](#) on page 108

Related Topics

Geographic Rating Area	Geographic Rating Area on page 110
Member Relationship Pricing Parameter	Member Relationship Pricing Parameter on page 125

For more information on...	See...
Subscription Tier Pricing Parameter	Subscription Tier Pricing Parameter on page 140

Prerequisites

The following table lists the prerequisites for the pricing parameters feature:

If you want to...	Then...
Create a geographic rating area parameter	<p>You need to do the following:</p> <ul style="list-style-type: none"> • Ensure that the upstream system contains the geographic rating area details in CSV file. • Ensure that the CSV file is available at the desired path on the server, before the file upload batch is triggered. • Set the C1-GeoRatingArea business object validation soft parameter (Include Plan Value Details) to either include or exclude plan details (Y/N) before the file is uploaded. • Include the C1GEORATINGARCSVUPLD file request type for file upload purposes. • Ensure that C1_GEO_RATING_AREA and C1_GEO_RATING_AREA_REL_OBJ tables are populated before any memberships are created in the system for derivation purposes. • Configure the pricing parameter with the geographic rating area on the pricing rule. • Define the required Address Source (C1-ADSRC) and Address Type (C1-ADTYP) characteristic types in the system. Values for these characteristics can be defined either on the policy or plan characteristics level. The address source and address type can also be defined on the state of issue of the policy or plan. • Define the parent policy role in the C1-ASOBLNG feature configuration. • Define the following billing preferences in the Field Mapping screen: <ul style="list-style-type: none"> • Default Address Source • Default Address Type • Use Plan Details • Address Source Value for Policy Holder • Address Source Value for Main Subscriber • Geographic Rating Area Characteristic Type • Address Source Characteristic Type • Address Type Characteristic Type • Define the default value for Geographic Rating Area Characteristic Type in the Premium Billing Preference screen.

If you want to...	Then...
Create a member role parameter	<p>You need to do the following:</p> <ul style="list-style-type: none"> • Define the pricing parameter with the member role. • The Admin user must define different types of member role structures for step or party, where all the member roles must be defined in the Member Relationship/Subscription Tier Structure screen. These member roles must also exist in the C1-ASOBLNG feature configuration. • Define the required characteristic types, such as, Member Role Structure (C1-MRLST), Member Role - Derivation Date Basis (C1-MRddb), and Age Calculation Date Basis (C1-AGCAL) on the policy plan. • Define the following set of characteristics while adding the characteristics for the policy plan and also when the premium billing preferences are defined: <ul style="list-style-type: none"> • Max Age of Dependent • Max Number of Dependents • Order Priority • Young Adult Max Age Limit • Young Adult Inclusion Applicability • The above characteristic types along with the Member Role (C1-MEMRL) characteristic type would be stamped on member person, must be specified in the Premium Billing Preferences screen.
Create a subscription tier parameter	<p>You need to do the following:</p> <ul style="list-style-type: none"> • Define the pricing parameter with the subscription tier. • The Admin user must define different types of subscription tiers, where all the tiers must be defined in the Member Relationship/Subscription Tier Structure screen. These subscription tiers must also exist in the C1-ASOBLNG feature configuration. • Define the required characteristic types, such as, Subscription Tier Structure (C1-STRST) and Age Calculation Date Basis (C1-AGCAL) on the policy plan. • Define the following set of characteristics while adding the characteristics for the policy plan and also when the premium billing preferences are defined: <ul style="list-style-type: none"> • Max Age of Dependent • Max Number of Dependents • Order Priority • Young Adult Max Age Limit • Young Adult Inclusion Applicability • The above characteristic types along with the Subscription (C1-SUBST) characteristic type would be stamped on member person, must be specified in the Field Mapping screen.

Geographic Rating Area

Oracle Revenue Management and Billing enables you to use the geographic rating area as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different geographic rating area.

The system enables you to add and edit a geographic rating area from the user interface. You can also add or edit a set of geographic rating areas at once using the **File Upload Interface** utility. However, note that while editing a geographic rating area, you can only change the end date to a far future date and the status from **Active** to **Inactive**.

While maintaining a geographic rating area in the system, you can also list the policy plans available in the geographic rating area. You can add the policy plan information for a geographic rating area from the user interface or through the **File Upload Interface** utility. But, you cannot edit the policy plan information of a geographic rating area through the **File Upload Interface** utility.

You can upload the geographic rating areas from the CSV file using the **C1GEORATINGARCSVUPLD** file request type through the **File Transformation and Upload (C1-FTRAN)** batch.

Note: You need to set the **Include Plan Or Product Details** parameter in the **C1-GEORAVALD** algorithm to Y or N. If the value for this parameter is set to Y, the system identifies the record using the State, Zip From, Zip Plus4 From, Zip To, Zip Plus4 To, Start Date, Policy Number, Plan Number, and Source System combination. However, if the value for this parameter is set to N, the system identifies the record using the State, Zip From, Zip Plus4 From, Zip To, Zip Plus4 To, and Start Date combination.

Once you define a geographic rating area, the system can derive the geographic rating area for a membership using the **Address Source** and **Address Type** characteristic types. The system supports two address sources named **Policy Holder** and **Main Subscriber** and three address types named **Person Mailing**, **Person Seasonal**, and **Account Override**.

On adding a membership to a policy plan, the system first derives the characteristic types from the **Address Source Characteristic Type** and **Address Type Characteristic Type** attributes of a geographic rating area preference. The system considers the geographic rating area preference which is specified in the **Rating Area Field Mapping for Group** option type of the **C1-ASOBLNG** feature configuration. Then, the system searches for these characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy
4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, the system derives the default address source and address type from the geographic rating area preference.

Note: By default, the **Address Source (C1-ADSRC)** and **Address Type (C1-ADTYP)** characteristic types are shipped with the product. You need to set these characteristic types in the respective attribute of the geographic rating area preference.

If the address source is set to **Policy Holder**, the system fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration. The system then derives the person who is associated

with the policy using the parent customer policy person role. Once the address source and address type are derived, the system fetches the state and zip code from the address type of the address source. For example, if the address source is set to **Policy Holder** and address type is set to **Person Mailing**, the system fetches the state and zip code from the policy holder's mailing address. Once the state and zip code are fetched from the address, the system checks whether the zip code is a 9-digit code. If not, the system appends zeros to make it a 9-digit zip code. The system then derives the value of the **Use Plan Details** attribute from the geographic rating area preference. If the attribute is set to **Y**, the system then derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination. However, if the attribute is set to **N**, the system then derives a geographic rating area for the state and zip code combination. If the system could not derive the geographic rating area, the system derives the default geographic rating area from the geographic rating area preference. Once the geographic rating area is derived, the system stores the geographic rating area for the membership. The characteristic type specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference is used to store geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

The geographic rating area of the membership must be changed when the address of the policy holder or main subscriber is updated. Therefore, when an address of a person is change, the system identifies the following:

- Memberships of policies where the person is the policy holder
- Memberships where the person is the main customer

For each membership, the system searches for the **Address Source** and **Address Type** characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy
4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, the system derives the default address source and address type from the geographic rating area preference. If the address source is set to **Policy Holder**, the system fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration. The system then derives the person who is associated with the policy using the parent customer policy person role.

Once the address source and address type are derived, the system fetches the state and zip code from the address type of the address source. The system then derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination or for the state and zip code combination depending on the value defined for the **Use Plan Details** attribute. If the system could not derive the geographic rating area, the system derives the default geographic rating area from the geographic rating area preference. If the geographic rating area is different, the system creates a new characteristic to store the geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

To use the geographic rating area as a pricing parameter, you need to define the Geographic Rating Area parameter where:

- **Value Type** is to **Adhoc**
- **Source Entity** is set to **Membership**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference
- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Geographic Rating Area parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on geographic rating area to which the membership belongs.

A new screen named **Geographic Rating Area** is introduced in this release. It enables you to add, edit, and inactivate a geographic rating area.

Prerequisites

To create a geographic rating area pricing parameter, you need to do the following:

- Ensure that the upstream system contains the geographic rating area details in **CSV** file.
- Ensure that the **CSV** file is available at the desired path on the server, before the file upload batch is triggered.
- Set the **C1-GeoRatingArea** business object validation soft parameter (**Include Plan Value Details**) to either include or exclude plan details (**Y/N**) before the file is uploaded.
- Include the **C1GEORATINGARCSVUPLD** file request type for file upload purposes.
- Ensure that **C1_GEO_RATING_AREA** and **C1_GEO_RATING_AREA_REL_OBJ** tables are populated before any memberships are created in the system for derivation purposes.
- Configure the pricing parameter with the geographic rating area on the pricing rule.
- Define the required **Address Source (C1-ADSRC)** and **Address Type (C1-ADTYP)** characteristic types in the system. Values for these characteristics can be defined either on the policy or plan characteristics level. The address source and address type can also be defined on the state of issue of the policy or plan.
- Define the parent policy role in the **C1-ASOBLNG** feature configuration.
- Define the following billing preferences in the **Field Mapping** screen:
 - Default Address Source
 - Default Address Type
 - Use Plan Details
 - Address Source Value for Policy Holder
 - Address Source Value for Main Subscriber
 - Geographic Rating Area Characteristic Type
 - Address Source Characteristic Type
 - Address Type Characteristic Type
- Define the default value for **Geographic Rating Area Characteristic Type** in the **Field Mapping** screen.
- Define the required health plan in the system.

Uploading a Geographic Rating Area File in the CSV Format

To upload a geographic rating area file in the CSV format using the **File Upload Interface** utility, you need to do the following:

- Define a file request type for uploading geographic rating area in the CSV format. To define a file request type:
 1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **File Request Type**.

A sub-menu appears.

- Click the **Add** option from the **File Request Type** sub-menu.

The **File Request Type** screen appears.

- Enter the file request type and description in the respective fields.

- Select the **Data Transformation Required** option.

The **File Format** field is enabled.

- Select the **Comma Separated Values** option from the **File Format** list.

- Select the Upload and Process File Simultaneously option.

- Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.

- In the **Services** section, enter the required sequence number.

- Select the **Business Object** option from the **Service Type** list.

- Enter the **C1-GeoRatingArea** business object or custom price item business object in the **Service Name** field.

- Select the **Add** or **Update** option from the **Operation** list depending on whether you want to create new geographic rating area details or edit the existing geographic rating area details using the file request type.

- In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes
Default Value	Used to specify the default value for the field.	No

- Click **Save**.

The file request type is defined for uploading the geographic rating area in the CSV format.

CSV File Format for Uploading Geographic Rating Areas

Before uploading a geographic rating area file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following data:

Data	Description	Mandatory (Yes or No)
GEO_RATING_AREA	Used to specify the geographic rating area.	Yes
STATE	Used to specify the state code which belongs to the geographical rating area.	Yes
ZIP_FROM	Used to specify the zip code from where the geographic rating area begins.	Yes
ZIP_PLUS4_FROM	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes
ZIP_TO	Used to specify the zip code till where the geographic rating area ends.	Yes
ZIP_PLUS4_TO	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes
START_DT	Used to specify the date from when the geographic rating area is effective.	Yes
END_DT	Used to specify the date till when the geographic rating area is effective.	Yes
PLAN_NBR	Used to specify the plan number belonging to a particular geographical rating area.	No
HEALTH_PLAN_CD	Used to specify the health plan belonging to a particular geographical rating area.	No
POLICY_NBR	Used to specify the policy number belonging to a particular geographical rating area.	No
SOURCE_SYSTEM	Used to specify the source system from where the policy is originated.	No
STATUS	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes

Geographic Rating Area (Used for Searching)

The **Geographic Rating Area** screen allows you to search for a geographic rating area using various search criteria. It also allows you to create a geographic rating area. This screen consists of the following zone:

- [Search Geographic Rating Area](#) on page 116

Search Geographic Rating Area

The **Search Geographic Rating Area** zone allows you to search for geographic rating area using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a geographic rating area detail record using the geographic rating area details or through policy or plan details. The valid values are: <ul style="list-style-type: none"> • Geographic Rating Area Details • Policy or Plan Details • Health Plan Details 	No
	Note: By default, the Geographic Rating Area Details option is selected.	
State Code	Used to search the geographic rating area details belonging to a particular state code.	No
	Note: You must specify a state code which is already defined in the system.	
Geographic Rating Area	Used to search the geographic rating area details based on a geographic rating area.	No
Zip Code From	Used to search the geographic rating area details which are effective from a particular zip code.	No
Zip Code To	Used to search the geographic rating area details which are effective till a particular zip code.	No
Start Date	Used to search the geographic rating area details which are effective from a particular date.	No
	Note: The geographic rating area start date cannot be later than the geographic rating area end date.	
End Date	Used to search the geographic rating area details which are effective till a particular date.	No
	Note: The geographic rating area end date cannot be earlier than the geographic rating area start date	

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to search the geographic rating area details based on a particular status. The valid values are: <ul style="list-style-type: none"> Active Inactive 	No
Policy Number	Used to search the geographic rating area details with a particular policy number.	No
Plan Number	Used to search the geographic rating area details with a particular plan number.	No
Health Plan	Used to search the geographic rating area details which are associated with a health plan.	No
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Health Plan Search window appears.</p> <p>This field appears when the Health Plan Details option is selected from the Search By list.</p>	

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Geographic Rating Area	Displays the geographic rating area.
State Code	Displays the state code to which the geographic rating area belongs.
Zip Code From	Displays the zip code from where the geographic rating area is effective.
Zip Code Plus 4 From	Displays the zip code plus four additional digits which identify from where the geographic rating area is effective.
Zip Code To	Displays the zip code till where the geographic rating area is effective.
Zip Code Plus 4 To	Displays the zip code plus four additional digits which identify till where the geographic rating area is effective.
Start Date	Displays the date from when the geographic rating area is effective.
End Date	Displays the date till when the geographic rating area is effective.
Status	Indicates the status of the geographic rating area. The valid values are: <ul style="list-style-type: none"> Active Inactive

Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **State Code**, **Geographic Rating Area**, **Zip Code From**, **Zip Code To**, **Start Date**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters (🔍) icon in the upper right corner of this zone.

Geographic Rating Area

The **Geographic Rating Area** zone displays the details of the geographic rating area. It contains the following sections:

- **Main** - Displays basic information about the geographic rating area. It contains the following fields:

Field Name	Field Description
Geographic Rating Area	Displays information about the geographic rating area.
State Code	Displays the state code to which the geographic rating area belongs.
Zip Code From	Displays the zip code from where the geographic rating area is effective.
Zip Code Plus 4 From	Displays the zip code plus four additional digits which identify from where the geographic rating area is effective.
Zip Code To	Displays the zip code till where the geographic rating area is effective.
Zip Code Plus 4 To	Displays the zip code plus four additional digits which identify till where the geographic rating area is effective.
Start Date	Displays the date from when the geographic rating area is effective.
End Date	Displays the date till when the geographic rating area is effective.
Status	Displays the status of the geographic rating area. The valid values are: <ul style="list-style-type: none"> • Active • Inactive

- **Plan Details** - Lists the plan information of the geographic rating area. It contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number which is associated with the geographic rating area.
Plan Number	Displays the plan number of the policy.

Column Name	Column Description
Health Plan	Indicates the health plan to which the geographic rating area is associated.
	Note: The data in this column appears only when the geographic rating area is specified for fully-insured individual.
Source System	Displays the name of the external system from where the policy is originated.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the geographic rating area.
	Note: The Edit button appears when the geographic rating area is in the Active status.
Inactive	Used to change the status of the geographic rating area.
	Note: The Inactive button appears when the geographic rating area is in the Active status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the geographic rating area is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the geographic rating area status is updated.
Creation Date/Time	Displays the date and time when the geographic rating area is created.

Searching for a Geographic Rating Area

Prerequisites

To search for a geographic rating area, you should have:

- Geographic rating area defined in the application.
- Policy and plan defined in the application.

Procedure

To search for a geographic rating area:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **G** and then click **Geographic Rating Area**.
The **Geographic Rating Area** screen appears.
3. Enter the search criteria in the **Search Geographic Rating Area** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
A list of geographic rating area that meet the search criteria appears in the **Search Results** section.

Defining a Geographic Rating Area

Procedure

To define a geographic rating area

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **G** and then click **Geographic Rating Area**.
The **Geographic Rating Area** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Geographic Rating Area** screen.
The **Geographic Rating Area** screen appears. It contains the following sections:
 - **Main** - Used to specify basic details about the geographic rating area.
 - **Plan Details** - Used to specify the plan details for the geographic rating area.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Geographic Rating Area	Used to specify the geographic rating area.	Yes
State Code	Used to specify the state code which belongs to the geographical rating area. Note: You must specify a state code which is already defined in the system.	Yes
Zip Code From	Used to specify the zip code from where the geographic rating area begins.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Zip Code Plus 4 From	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes
Zip Code To	Used to specify the zip code till where the geographic rating area ends.	Yes
Zip Code Plus 4 To	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes
Start Date	Used to specify the date from when the geographic rating area is effective.	Yes
	Note: The geographic rating area start date cannot be later than the geographic rating area end date.	
End Date	Used to specify the date till when the geographic rating area is effective.	No
	Note: The geographic rating area end date cannot be earlier than the geographic rating area start date	
Status	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
	Note: You cannot assign an Inactive status to the geographic rating area record while you are defining a geographic rating area.	

4. Enter the required details in the **Main** section.
5. Add the plan details for the geographic rating area, if required.
6. Click **Save**.

The geographic rating area is defined in the **Active** status.

Adding the Plan Details for a Geographic Rating Area

Prerequisites

To add plan details for a geographic rating area, you should have:

- Policy and plan defined in the application.
- Source system defined in the application.
- Health plan defined in the application.

Procedure

To add plan details for a geographic rating area:

1. Ensure that the **Plan Details** section is expanded when you are defining or editing the geographic rating area information.

Note: If you want to use the geographic rating area for a fully-insured group, you need to specify policy number, plan number, and source system fields. You can specify the health plan only when you want to use the geographic rating area for a fully-insured individual membership.

The **Plan Details** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Policy Number	Used to specify the policy number which is associated with the geographic rating area.	No
Plan Number	Used to specify the plan number of the policy.	No
Health Plan	Used to specify the health plan which is associated with the geographic rating area.	No
	Note: You need to specify the health plan, if you want to use the geographic rating area for a fully-insured individual membership.	
Source System	Used to specify the name of the external system from where the policy is originated.	No

2. Enter the required details in the **Plan Details** section.
3. If you want to define more than one plan information for the geographic rating area, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a plan information from the geographic rating area, click the **Delete (🗑)** icon corresponding to the policy number column.

Editing a Geographic Rating Area**Procedure**

To edit a geographic rating area

1. Search for the geographic rating area in the **Geographic Rating Area** screen.
2. In the **Search Results** section, click the **Broadcast (📡)** icon corresponding to the geographic rating area column whose details you want to view.

The **Geographic Rating Area** zone appears.

3. Click the **Edit** button in the **Geographic Rating Area** screen.

The **Geographic Rating Area** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the geographic rating area.

- **Plan Details** - Used to specify the plan details for the geographic rating area.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Geographic Rating Area	Used to specify the geographic rating area.	Yes
State Code	Used to specify the state code which belongs to the geographical rating area.	Yes
	Note: You must specify a state code which is already defined in the system.	
Zip Code From	Used to specify the zip code from where the geographic rating area begins.	Yes
Zip Code Plus 4 From	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes
Zip Code To	Used to specify the zip code till where the geographic rating area ends.	Yes
Zip Code Plus 4 To	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes
Start Date	Used to specify the date from when the geographic rating area is effective.	Yes
	Note: The geographic rating area start date cannot be later than the geographic rating area end date.	
End Date	Used to specify the date till when the geographic rating area is effective.	No
	Note: The geographic rating area end date cannot be earlier than the geographic rating area start date	
Status	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
	Note: You cannot assign an Inactive status to the geographic rating area record while you are defining a geographic rating area.	

4. Modify the geographic rating area details, if required.
5. Define, edit, or remove plan details for the geographic rating area, if required.
6. Click **Save**.

The changes made to the geographic rating area are saved.

Member Relationship Pricing Parameter

Oracle Revenue Management and Billing enables you to use the member relationship (i.e. how a member is related to the main subscriber of the membership) as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different member relationship.

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, the system automatically derives member relationship for each member person of the membership from a member relationship structure. You can define a member relationship structure through a characteristic on the policy plan. While defining a member relationship structure for a policy plan, you must use the characteristic type specified in the **Member Relationship Structure Characteristic Type** attribute of a member relationship and subscription tier preference. The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLNG** feature configuration.

The system enables you to define two types of member relationship structure:

- **Step Member Relationship Structure** - A step member relationship structure helps the system to determine how each member person is related to the main subscriber of the membership. You can specify a list of member relationships in a step member relationship structure. A member relationship is derived for a member person depending on the following:
 - Whether the member person is a self, spouse, or dependent
 - Number of spouses, dependents, and young adults in the membership

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self, spouse, or dependent while deriving the member relationship. In a step member relationship structure, a spouse is never considered as a dependent. Only children are considered as dependents.

For example, you can create a step member relationship structure named STEPEX1 as shown below:

Member Relationship	Self	Number of Spouses	Number of Dependents	Number of Young Adults
Self	1	0	0	0
Spouse 1	1	1	0	0
Spouse 2	1	2	0	0
Child 1	1	1	1	0
Young Adult 1	1	1	0	1
CD1 and YA1	1	1	1	1
Child 2	1	1	2	0
Young Adult 2	1	1	0	2
CD2 and YA2	1	1	2	2
Additional Dependent	1	3	3	3

Note: You can only define one member relationship in a step member relationship structure where the sum of self, number of spouses, number of dependents, and number of young adults exceeds the maximum member count specified in the step member relationship structure.

In addition, you can create a relationship matrix in the STEPEX1 member relationship structure as shown below:

Relation	Relationship Type	Relationship
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Spouse
Spouse	Spouse	Spouse

- **Party Member Relationship Structure** - A party member relationship structure helps the system to determine how each member person is related to the main subscriber of the membership. You can specify a list of member relationships in a party member relationship structure. A member relationship is derived for a member person depending on the following:
 - Whether the member person is a self or dependent
 - Number of dependents in the membership

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self or dependent while deriving the member relationship. In a party member relationship structure, a spouse is always considered as a dependent. Also, children are not categorized as young adults.

For example, you can create a party member relationship structure named PARTYEX1 as shown below:

Member Relationship	Self	Number of Spouses	Number of Dependents	Number of Young Adults
Self	1	0	0	0
Dependent 1	1	0	1	0
Dependent 2	1	0	2	0
Dependent 3	1	0	3	0
Additional Dependents	1	0	9	0

Note: You can only define one member relationship in a party member relationship structure where the sum of self and number of dependents exceeds the maximum member count specified in the party member relationship structure.

In addition, you can create a relationship matrix in the PARTYEX1 member relationship structure as shown below:

Relation	Relationship Type	Relationship
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Dependent
Spouse	Spouse	Dependent

Once the member relationship structure is derived from the policy plan, the system determines the member relationship for each member person in the membership. While determining the member relationship for a member person, the system derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- Member Relationship Derivation Date
- New Born Gift Days
- New Born Gift Days Applicability
- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

The system then derives these characteristics from the policy plan. If the **Member Relationship Derivation Date** characteristic type is set to **Enrollment Date**, the system derives the member relationship for each member person of the membership in order of the member start date. However, if the Member Relationship Derivation Date characteristic type is set to Date of Birth, the system derives the member relationship for each member person of the membership in order of the date of birth. For example, if a membership with the following member persons is added to a policy plan:

Member Start Date	Member End Date	Person Name	Main Subscriber	Relationship Type	Member	Date of Birth
1-Jan-18	31-Dec-20	Mark	Yes	Self	Yes	15-Jan-68
1-Jan-18	31-Dec-20	Nancy	No	Wife	Yes	20-Apr-72
1-Jan-18	31-Dec-20	Roger	No	Child	Yes	15-May-01
1-Jan-18	31-Dec-20	Tom	No	Child	Yes	16-May-04

Now, if the following characteristics are defined on the policy plan:

- Member Relationship Structure - STEPEX1
- Member Relationship Derivation Date – Date of Birth
- Age Calculation Date Basis – Enrollment Date
- Maximum Number of Dependents – 3
- Max Number of Dependents Order Priority - YOUNGEST

The system will consider the STEPEX1 member relationship structure and derives the member relationship for each member person as shown below:

Member Person	Effective Date	Characteristic Type	Characteristic Value
Mark	1-Jan-18	Member Relationship	Self
Nancy	1-Jan-18	Member Relationship	Spouse 1
Tom	1-Jan-18	Member Relationship	Child 1
Roger	1-Jan-18	Member Relationship	Child 2

Note that the member relationship of Tom is derived before Roger because he is youngest of all dependents. Now, assume if one more member person named Harry with the date of birth as 05-11-08 and relationship type as Child is added to the membership on 05-Jan-18, then the system derives the member relationship for each member person of the membership as shown below:

Effective Date	Member	Member Characteristics	Person	Value
1-Jan-18	Mark	Member Relationship		Self
1-Jan-18	Nancy	Member Relationship		Spouse 1
5-Jan-18	Harry	Member Relationship		Child 1
5-Jan-18	Tom	Member Relationship		Child 2
5-Jan-18	Roger	Member Relationship		Additional Dependent

The member relationship for Harry, Tom, and Roger is derived in the order of their age which is calculated from the enrollment date. Because the member relationship derived for Tom and Roger is different, the system creates a new characteristic to store the member relationship for Tom and Roger. Here, the effective date of the characteristics is set to the new member person's start date.

If a new born is added to the membership, the effective date of the new born's member relationship characteristic is calculated considering the gift days if applicable. If a member person is end dated, the system derives the member relationship of all other member persons once again. If the member relationship for a member person is different, the system creates a new characteristic to store the member relationship for the member person. The effective date of the new characteristic is set to member person's end date + 1. However, if a member person is inactivated, the system derives the member relationship of all other member persons once again. If the member relationship for a member person is different, the system updates the existing member relationship characteristic of the member person.

To use the member relationship as a pricing parameter, you need to define the Member Relationship parameter where:

- **Value Type** is to **Adhoc**
- **Source Entity** is set to **Membership Person**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Member Relationship Characteristic Type** attribute of the member relationship and subscription tier preference
- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Member Relationship parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on the member relationship.

A new screen named **Member Relationship/Subscription Tier Structure** is introduced in this release. It enables you to add, edit, copy, and delete the member relationship and subscription tier structures.

Prerequisites

To create a member relationship pricing parameter, you need to do the following:

- Define the pricing parameter with the member relationship.
- The **Admin** user must define different types of member relationship structures for step or party, where all the member relationships must be defined in the **Member Relationship/Subscription Tier Structure** screen. These member relationships must also exist in the **C1-ASOBLLNG** feature configuration.
- Define the required characteristic types, such as, **Member Relationship Structure (C1-MRLST)**, **Member Relationship - Derivation Date Basis (C1-MRDDDB)**, and **Age Calculation Date Basis (C1-AGCAL)** on the policy plan.
- Define the following set of characteristics while adding the characteristics for the policy plan and also when the premium billing preferences are defined:

- Max Age of Dependent
 - Max Number of Dependents
 - Order Priority
 - Young Adult Max Age Limit
 - Young Adult Inclusion Applicability
- The above characteristic types along with the **Member Relationship (C1-MEMRL)** characteristic type would be stamped on the member person, must be specified in the **Field Mapping** screen.

Member Relationship/Subscription Tier Structure (Used for Searching)

The **Member Relationship/Subscription Tier Structure** screen allows you to search for a member relationship/subscription tier using various search criteria. It also allows you to create a member relationship/subscription tier. Through this screen, you can navigate to the following screen. It contains the following zone:

This screen consists of the following zone:

- [Member Relationship/Subscription Tier Structure List](#) on page 129
- [Member Relationship/Subscription Tier Structure](#) on page 130

Member Relationship/Subscription Tier Structure List

The **Member Relationship/Subscription Tier Structure List** zone displays the member relationship or subscription tier structure information. It contains the following columns:

Column Name	Column Description
Structure	Used to specify the structure code for the structure.
Description	Used to specify the description for the structure.
Edit	On clicking the Edit () icon, the Member Relationship/Subscription Tier Structure screen appears where you can edit the structural details of the member relationship or subscription tier.
Duplicate	On clicking the Duplicate () icon, the Member Relationship/Subscription Tier Structure screen appears where you can define a new member relationship or subscription tier using an existing member relationship or subscription tier.
Delete	On clicking the Delete () icon, you can delete the member relationship or subscription tier structure.

Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Structure** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters (🔍) icon in the upper right corner of this zone.

Member Relationship/Subscription Tier Structure

The **Member Relationship/Subscription Tier Structure** zone displays the details of the member relationship or subscription tier structure. It contains the following sections:

- **Main** - Displays basic information about the member relationship or subscription tier structure. It contains the following fields:

Field Name	Field Description
Structure	Displays the type of structure.
Description	Displays the description of the structure.
Detailed Description	Displays additional information about the structure.
Maximum Member Count	Displays the maximum count of the members allowed in the structure.

- **Member Relationship/Subscription Tier Criteria** - Lists the criteria details of the member relationship or subscription tier. It contains the following columns:

Column Name	Column Description
Member Relationship/Subscription Tier	Displays the criteria code for the member relationship or subscription tier.
Self	Displays the main subscriber who meets the member relationship or subscription tier criteria. Note: The total count in the Self column cannot exceed more than one.
Number of Spouses	Displays the total number of spouses in the membership who meet the member person relationship criteria.
Number of Dependents	Displays the total number of dependents in the membership who meet the member person relationship criteria.
Number of Young Adults	Displays the total number of young adults in the membership who meet the member person relationship criteria.

- **Relationship Matrix** - Lists the relationship matrix details defined for the member relationship or subscription tier structure. It contains the following columns:

Column Name	Column Description
Relation	Indicates an entity defined in the relationship matrix.
Relationship Type	Indicates how a member person is associated with the main subscriber using a relationship type.
Relationship	Indicates how a member person is associated with the relationship type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the structural details of the member relationship or subscription tier.
Delete	Used to delete the member relationship or subscription tier structure.
Duplicate	Used to create a new member relationship or subscription tier structure using an existing structure.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the member relationship or subscription tier structure is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.

Defining a Member Relationship Structure

Procedure

To define a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.
A sub-menu appears.
3. Click the **Add** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Yes
	Note: You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	Note: If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	Note: You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the member relationship.	No
	Note: The value for this field must be a positive integer.	
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	

Field Name	Field Description	Mandatory (Yes or No)
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	

Note: You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

Relationship Matrix - Used to specify the relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

Note: You must specify at least one relationship matrix.

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Member Relationship/Subscription Tier Structure** screen.

4. Enter the required details in the **Main** section.
5. Define a criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

Note: However, if you want to remove a criteria from the member relationship structure, click the **Delete (🗑)** icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

Note: However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete (🗑)** icon corresponding to the **Relation** field.

9. Click **Save**.

The member relationship structure is defined.

Editing a Member Relationship Structure

Procedure

To edit a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.
The **Member Relationship/Subscription Tier Structure** screen appears.
3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Edit**  icon in the **Edit** column corresponding to the member relationship structure whose details you want to edit.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Displays the member relationship structure name.	Not applicable
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	Note: If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to define a criteria for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	Note: You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the member relationship.	No
	Note: The value for this field must be a positive integer.	

Field Name	Field Description	Mandatory (Yes or No)
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	

Note:

You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

Relationship Matrix - Used to define a relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

Note: You must specify at least one relationship matrix.

Tip: Alternatively, you can edit the details of a member relationship structure by clicking the **Edit** button in the **Member Relationship/Subscription Tier Structure** zone.

4. Modify the details in the **Main** section.
5. Define, edit, or remove the criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

Note: However, if you want to remove a criteria from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define, edit, or remove the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

Note: However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete (🗑)** icon corresponding to the **Relation** field.

9. Click **Save**.

The changes made to the member relationship structure are saved.

Copying a Member Relationship Structure

Procedure

To copy a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.
The **Member Relationship/Subscription Tier Structure** screen appears.
3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Duplicate (📄)** icon in the **Duplicate** column corresponding to the member relationship structure whose copy you want to create.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Not applicable
	Note: You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No

Field Name	Field Description	Mandatory (Yes or No)
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	Note: If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	Note: You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the member relationship.	No
	Note: The value for this field must be a positive integer.	
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the member relationship criteria.	No
	Note: The value for this field must be a positive integer.	

Note:

You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

Relationship Matrix - Used to specify the relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

Note: You must specify at least one relationship matrix.

Tip: Alternatively, you can copy a member relationship structure by clicking the **Duplicate** button in the **Member Relationship/Subscription Tier Structure** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove a criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
- If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

Note: However, if you want to remove a criteria from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

- Define, edit, or remove the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
- If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

Note: However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

- Click **Save**.

The new member relationship structure is created.

Deleting a Member Relationship Structure

Procedure

To delete a member relationship structure:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.

A sub-menu appears.

- Click the **Search** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears.

- In the **Member Relationship/Subscription Tier Structure List** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the member relationship structure that you want to delete.

A message appears confirming whether you want to delete the member relationship structure.

Tip: Alternatively, you can click the **Delete** button in the **Member Relationship/Subscription Tier Structure** zone to delete the member relationship structure.

- Click **OK**.

The member relationship structure is deleted.

Subscription Tier Pricing Parameter

Oracle Revenue Management and Billing enables you to use the subscription tier as a pricing parameter while defining the tier based pricing rules. This feature facilitates you to offer different rates for a price item based on different subscription tier.

On creating the bill period timelines, the system executes the **Derive Subscription Tier for Membership (C1-DERSUBTR)** algorithm attached to the **Account and Price Item Derivation Post-Processing** system event in the respective tier based pricing rule type. This algorithm determines the subscription tier of the membership for each bill period timeline. While determining the subscription tier for a membership, the system derives subscription tier for the membership from a subscription tier structure. Note that while deriving the subscription tier of a membership for a bill period timeline, the system refers the proration rules defined on the respective policy plan and accordingly derives the subscription tier for the membership. The system invokes the **C1-DERSUBTR** algorithm in the **C1-REPC1** batch.

You can define a subscription tier structure through a characteristic on the policy plan. While defining a subscription tier structure for a policy plan, you must use the characteristic type specified in the **Subscription Tier Structure Characteristic Type** attribute of a member relationship and subscription tier preference. The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLLNG** feature configuration.

A subscription tier structure helps the system to determine the subscription tier to which the membership belongs. You can specify a list of subscription tiers in a subscription tier structure. A subscription tier is derived for a membership depending on the following:

- Whether the member person is a self, spouse, or dependent
- Number of spouses, dependents, and young adults in the membership in the respective bill period timeline

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self, spouse, or dependent while deriving the subscription tier. In a subscription tier structure, a spouse is never considered as a dependent. Only children are considered as dependents.

For example, you can create a subscription tier structure named **STEX1** as shown below:

Subscription Tier	Self	Number of Spouses	Number of Dependents	Number of Young Adults
E	1	0	0	0
ES	1	1	0	0
ESC1	1	1	1	0
ESC2	1	1	2	0
EC1	1	0	1	0
EC2	1	0	2	0
EC3	1	0	3	0

Subscription Tier	Self	Number of Spouses	Number of Dependents	Number of Young Adults
F	1	9	9	9

Note: You can only define one subscription tier in a subscription tier structure where the sum of self, number of spouses, number of dependents, and number of young adults exceeds the maximum member count specified in the subscription tier structure.

In addition, you can create a relationship matrix in the STEX1 subscription tier structure as shown below:

Relation	Relationship Type	Relationship
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Spouse
Spouse	Spouse	Spouse

Once the subscription tier structure is derived from the policy plan, the system determines the subscription tier of the membership for the bill period timeline. While determining the subscription tier of a membership for the bill period timeline, the system derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- New Born Gift Days
- New Born Gift Days Applicability
- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

The system then derives these characteristics from the policy plan. For example, if a membership with the following member persons is added to a policy plan:

Member Start Date	Member End Date	Person Name	Main Subscriber	Relationship Type	Member	Date of Birth
1-Jan-20	31-Dec-20	Mark	Yes	Self	Yes	15-Jan-68
1-Jan-20	31-Dec-20	Nancy	No	Wife	Yes	20-Apr-72
1-Jan-20	31-Dec-20	Roger	No	Child	Yes	15-May-01
1-Jan-20	31-Dec-20	Tom	No	Child	Yes	16-May-04

Now, if the following characteristics are defined on the policy plan:

- Subscription Tier Structure - STEX1

- Age Calculation Date Basis – Enrollment Date
- Maximum Number of Dependents – 3
- Max Number of Dependents Order Priority - ELDEST
- Max Age Limit for Max Dependent Count – 21
- New Born Gift Days - 30
- New Born Gift Days Applicability - Y
- Young Adult Max Age Limit - 25
- Young Adult Max Age Limit Applicability - Y

The system considers the STEX1 subscription tier structure and derives the subscription tier of the membership for each bill period timeline as shown below:

Bill Period Timeline	Characteristic Type	Characteristic Value
1-Jan-20 to 31-Jan-20	Subscription Tier	ESC2
1-Feb-20 to 29-Feb-20	Subscription Tier	ESC2
1-Mar-20 to 31-Mar-20	Subscription Tier	ESC2
1-Apr-20 to 30-Apr-20	Subscription Tier	ESC2
1-May-20 to 31-May-20	Subscription Tier	ESC2
1-Jun-20 to 30-Jun-20	Subscription Tier	ESC2
1-Jul-20 to 31-Jul-20	Subscription Tier	ESC2
1-Aug-20 to 31-Aug-20	Subscription Tier	ESC2
1-Sep-20 to 30-Sep-20	Subscription Tier	ESC2
1-Oct-20 to 31-Oct-20	Subscription Tier	ESC2
1-Nov-20 to 30-Nov-20	Subscription Tier	ESC2
1-Dec-20 to 31-Dec-20	Subscription Tier	ESC2

Because the characteristic value is same across all bill period timelines, the system will create one subscription tier characteristic with the effective date as 01-Jan-2020. Now, assume if one more member person named Harry with the date of birth as 05-11-08 and relationship type as Child is added to the membership on 05-Mar-20, then the system derives the subscription tier of the membership for each bill period timeline as shown below:

Bill Period Timeline	Characteristic Type	Characteristic Value
5-Mar-20 to 31-Mar-20	Subscription Tier	F
1-Apr-20 to 30-Apr-20	Subscription Tier	F
1-May-20 to 31-May-20	Subscription Tier	F
1-Jun-20 to 30-Jun-20	Subscription Tier	F
1-Jul-20 to 31-Jul-20	Subscription Tier	F
1-Aug-20 to 31-Aug-20	Subscription Tier	F

Bill Period Timeline	Characteristic Type	Characteristic Value
1-Sep-20 to 30-Sep-20	Subscription Tier	F
1-Oct-20 to 31-Oct-20	Subscription Tier	F
1-Nov-20 to 30-Nov-20	Subscription Tier	F
1-Dec-20 to 31-Dec-20	Subscription Tier	F

In this case, the system will have two subscription tier characteristics for the membership – one with the effective date as 01-Jan-2020 where the characteristic value is set to **ESC2** and another with the effective date as 05-Mar-2020 where the characteristic value is set to **F**.

If a new born is added to the membership, the effective date of the new subscription tier characteristic is calculated considering the gift days if applicable. If a member person is end dated, the system derives the subscription tier of the membership once again. If the subscription tier for the membership is different, the system creates a new characteristic to store the subscription tier for the membership. The effective date of the new characteristic is set according to the proration rule defined for the termination event. If a member person is inactivated, the system derives the subscription tier of the membership once again. In this case, if the subscription tier for the membership is different, the system updates the existing subscription tier characteristic of the membership.

To use the subscription tier as a pricing parameter, you need to define the Subscription Tier parameter where:

- **Value Type** is to **Adhoc**
- **Source Entity** is set to **Membership**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Subscription Tier Characteristic Type** attribute of the member relationship and subscription tier preference
- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Subscription Tier parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on the subscription tier.

A new screen named **Member Relationship/Subscription Tier Structure** is introduced in this release. It enables you to add, edit, copy, and delete the member relationship and subscription tier structures.

Prerequisites

To create a subscription tier pricing parameter, you need to do the following:

- Define the pricing parameter with the subscription tier.
- The **Admin** user must define different types of subscription tiers, where all the tiers must be defined in the **Member Relationship/Subscription Tier Structure** screen. These subscription tiers must also exist in the **C1-ASOBLNG** feature configuration.
- Define the required characteristic types, such as, **Subscription Tier Structure (C1-STRST)** and **Age Calculation Date Basis (C1-AGCAL)** on the policy plan.
- Define the following set of characteristics while adding the characteristics for the policy plan and also when the premium billing preferences are defined:
 - Max Age of Dependent
 - Max Number of Dependents
 - Order Priority
 - Young Adult Max Age Limit

- Young Adult Inclusion Applicability
- The above characteristic types along with the **Subscription (C1-SUBST)** characteristic type would be stamped on member person, must be specified in the **Field Mapping** screen.

Member Relationship/Subscription Tier Structure (Used for Searching)

The **Member Relationship/Subscription Tier Structure** screen allows you to search for a member relationship/subscription tier using various search criteria. It also allows you to create a member relationship/subscription tier. Through this screen, you can navigate to the following screen. It contains the following zone:

This screen consists of the following zone:

- [Member Relationship/Subscription Tier Structure List](#) on page 129
- [Member Relationship/Subscription Tier Structure](#) on page 130

Member Relationship/Subscription Tier Structure List

The **Member Relationship/Subscription Tier Structure List** zone displays the member relationship or subscription tier structure information. It contains the following columns:

Column Name	Column Description
Structure	Used to specify the structure code for the structure.
Description	Used to specify the description for the structure.
Edit	On clicking the Edit () icon, the Member Relationship/Subscription Tier Structure screen appears where you can edit the structural details of the member relationship or subscription tier.
Duplicate	On clicking the Duplicate () icon, the Member Relationship/Subscription Tier Structure screen appears where you can define a new member relationship or subscription tier using an existing member relationship or subscription tier.
Delete	On clicking the Delete () icon, you can delete the member relationship or subscription tier structure.

Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Structure** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters () icon in the upper right corner of this zone.

Member Relationship/Subscription Tier Structure

The **Member Relationship/Subscription Tier Structure** zone displays the details of the member relationship or subscription tier structure. It contains the following sections:

- **Main** - Displays basic information about the member relationship or subscription tier structure. It contains the following fields:

Field Name	Field Description
Structure	Displays the type of structure.
Description	Displays the description of the structure.
Detailed Description	Displays additional information about the structure.
Maximum Member Count	Displays the maximum count of the members allowed in the structure.

- **Member Relationship/Subscription Tier Criteria** - Lists the criteria details of the member relationship or subscription tier. It contains the following columns:

Column Name	Column Description
Member Relationship/Subscription Tier	Displays the criteria code for the member relationship or subscription tier.
Self	Displays the main subscriber who meets the member relationship or subscription tier criteria. Note: The total count in the Self column cannot exceed more than one.
Number of Spouses	Displays the total number of spouses in the membership who meet the member person relationship criteria.
Number of Dependents	Displays the total number of dependents in the membership who meet the member person relationship criteria.
Number of Young Adults	Displays the total number of young adults in the membership who meet the member person relationship criteria.

- **Relationship Matrix** - Lists the relationship matrix details defined for the member relationship or subscription tier structure. It contains the following columns:

Column Name	Column Description
Relation	Indicates an entity defined in the relationship matrix.
Relationship Type	Indicates how a member person is associated with the main subscriber using a relationship type.
Relationship	Indicates how a member person is associated with the relationship type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the structural details of the member relationship or subscription tier.
Delete	Used to delete the member relationship or subscription tier structure.
Duplicate	Used to create a new member relationship or subscription tier structure using an existing structure.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the member relationship or subscription tier structure is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.

Defining a Subscription Tier Structure

Procedure

To define a subscription tier structure:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.
A sub-menu appears.
3. Click the **Add** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Yes
	Note: You must specify a unique code name for the structure.	

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure. Note: If you do not specify the value, by default, it is set to zero (0).	No

- **Member Relationship/Subscription Tier Criteria** - Used to specify a criteria for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria. Note: You must specify a unique code name for the subscription tier criteria.	No
Self	Used to specify the main subscriber for the subscription tier. Note: The value for this field must be a positive integer.	No
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria. Note: The value for this field must be a positive integer.	No
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria. Note: The value for this field must be a positive integer.	No
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria. Note: The value for this field must be a positive integer.	No

Note: You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

Relationship Matrix - Used to specify the relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

Note: You must specify at least one relationship matrix.

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Member Relationship/Subscription Tier Structure** screen.

- Enter the required details in the **Main** section.
- Define a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.
- If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

Note: However, if you want to remove a criteria from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

- Define a relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.
- If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

Note: However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

- Click **Save**.

The subscription tier structure is defined.

Editing a Subscription Tier Structure

Procedure

To edit a subscription tier structure:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.
The **Member Relationship/Subscription Tier Structure** screen appears.
- In the **Member Relationship/Subscription Tier Structure List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the subscription tier structure whose details you want to edit.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Displays the subscription tier structure name.	Not applicable
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure. Note: If you do not specify the value, by default, it is set to zero (0).	No

- **Member Relationship/Subscription Tier Criteria** - Used to specify a criteria for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria. Note: You must specify a unique code name for the criteria.	No
Self	Used to specify the main subscriber for the subscription tier. Note: The value for this field must be a positive integer.	No
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria. Note: The value for this field must be a positive integer.	No
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria. Note: The value for this field must be a positive integer.	No
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria. Note: The value for this field must be a positive integer.	No

Note:

You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

Relationship Matrix - Used to specify a relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix.	No

Note: You must specify at least one relationship matrix.

Tip: Alternatively, you can edit the details of a member relationship structure by clicking the **Edit** button in the **Member Relationship/Subscription Tier Structure** zone.

4. Modify the details in the **Main** section.
5. Define, edit, or remove a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

Note: However, if you want to remove a criteria from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define, edit, or remove a relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

Note: However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

9. Click **Save**.

The changes made to the subscription tier structure are saved.

Copying a Subscription Tier Structure

Procedure

To copy a subscription tier structure:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.

The **Member Relationship/Subscription Tier Structure** screen appears.

3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the subscription tier structure whose copy you want to create.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Not applicable
	Note: You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	Note: If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	Note: You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the subscription tier.	No
	Note: The value for this field must be a positive integer.	

Field Name	Field Description	Mandatory (Yes or No)
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria.	No
	Note: The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria.	No
	Note: The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria.	No
	Note: The value for this field must be a positive integer.	

Note:

You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

Relationship Matrix - Used to specify the relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

Note: You must specify at least one relationship matrix.

Tip: Alternatively, you can copy a member relationship structure by clicking the **Duplicate** button in the **Member Relationship/Subscription Tier Structure** zone.

4. Enter the required details in the **Main** section.
5. Define, edit, or remove a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

Note: However, if you want to remove a criteria from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define, edit, or remove the relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

Note: However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete** (🗑) icon corresponding to the **Relation** field.

9. Click **Save**.

The new subscription tier structure is created.

Deleting a Subscription Tier Structure

Procedure

To delete a subscription tier structure:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.
A sub-menu appears.
3. Click the **Search** option from the **Member Relationship/Subscription Tier Structure** sub-menu.
The **Member Relationship/Subscription Tier Structure** screen appears.
4. In the **Member Relationship/Subscription Tier Structure List** section, click the **Delete** (🗑) icon in the **Delete** column corresponding to the subscription tier structure that you want to delete.

A message appears confirming whether you want to delete the subscription tier structure.

Tip: Alternatively, you can click the **Delete** button in the **Member Relationship/Subscription Tier Structure** zone to delete the subscription tier structure.

5. Click **OK**.

The subscription tier structure is deleted.

Medicare Benefits

Oracle Revenue Management and Billing enables you to maintain the Medicare benefits (such as, Part A, Part B, Part D, Part D LIS, and Part D LEP) of a member person. The system enables you to define and edit the Medicare benefits from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While defining a Medicare benefit of a member person for Part A, Part B, and Part D, you need to specify a Medicare plan benefit package (i.e. 800 series plan) which is applicable for the Medicare benefit. The system enables you to define and edit a Medicare plan benefit package through the **Field Mapping** screen. You can use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. While defining a Medicare benefit of a member person for Part D LIS and Part D LEP, you need to specify the benefit amount (i.e. subsidy or penalty amount).

While editing a Medicare benefit of a member person from the user interface, you can only edit the characteristics of the Medicare benefit. However, while editing a Medicare benefit of a member person through a health care inbound message or through the membership repricing inbound web service, you can edit the end date, benefit amount, and characteristics of the Medicare benefit. On editing a Medicare benefit, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

The system enables you to discard an active or inactive Medicare benefit from the user interface by clicking the **Discard** button.

Benefit Status Transition

The following figure graphically indicates how a Medicare benefit moves from one status to another in its lifecycle:

Algorithms Used in C1-Benefits

The following table lists the algorithms which are attached to the **C1-Benefits** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-FIAUDEV	C1-FIAUDEV	Refer to C1-FIAUDEV on page 155.
Validation	C1-BENVAL	C1-BENVAL	C1-BENVAL on page 156

C1-FIAUDEV

If this algorithm is attached to the **Audit** system event of the **C1-Membership**, **C1-Benefits**, and **C1_PERSON_BO** business objects, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event whenever a membership is added to a policy plan, member person is added to a membership, and a Medicare benefit is defined for a member person. It also creates the audit event whenever the membership, member person, and Medicare benefit details are updated. However, note that the audit events are created in the update scenario when the element listed for auditing in the age based, tier based, or

benefit pricing rule type is updated. The system considers only those pricing rule types whose pricing rules are effective during the respective entity (i.e. membership, member person, or Medicare benefit whichever is updated) date range.

It creates one or more audit events in the **Pending** status. The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1_AUDIT_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the **C1_AUDIT_EVENT** table.

Note:

The system creates an audit event whenever the membership start and end dates and member person's start and end dates are changed in the system irrespective of whether these fields are listed for auditing or not in the age based or tier based pricing rule types.

Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event.

For each audit event, this algorithm derives the memberships on the policy plans which are impacted and the pricing rule types whose pricing rules are defined on the respective policy plans. A repricing entity detail record is then created for each membership, pricing rule type, and effective date combination in the **CI_REPRC_ENTITY_DTL** table. The status of the repricing entity detail record is set to **P**. Once the repricing entity detail records are created successfully, the status of the audit event is changed to **Complete**.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

C1-BENVAL

This algorithm validates a benefit. It checks the following:

- Whether the benefit end date is not earlier than the benefit start date.
- Whether the membership and member person are specified while defining a Medicare benefit.
- Whether the benefit amount is specified while defining a Medicare benefit of a member person for Part D LIS and Part D LEP.

- Whether the Medicare plan benefit package is specified while defining a Medicare benefit of a member person for Part A, Part B, and Part D.

While editing a Medicare benefit, this algorithm only allows you to edit the following information:

- Benefit Amount
- Benefit End Date
- Benefit Status
- Benefit Characteristics

Benefit Sub Type

Oracle Revenue Management and Billing allows you to define a benefit at the membership level for an individual membership where the system assumes the following:

- There will be only one member person in the Medicare membership who will avail the Medicare benefit.
- The other benefits would be availed by all the member persons of an individual membership.

The **Benefit Sub Type** screen enables you to create, edit, delete, and copy a benefit sub type. It contains the following zones:

- [Benefit Sub Type List](#) on page 157
- [Benefit Sub Type](#) on page 158

For more information on...	See...

Benefit Sub Type List

The **Benefit Sub Type List** zone lists the benefit sub types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Benefit Sub Type	Displays the benefit sub type.
Description	Displays the description of the benefit sub type.
Status	Indicates the status of the benefit sub type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive

Column Name	Column Description
Value Type	Indicates the type of value that you want to store in the benefit sub type. The valid values are: <ul style="list-style-type: none"> • Flat • NA
Edit	On clicking the Edit (✎) icon, the Benefit Sub Type screen appears where you can edit the details of the benefit sub type. <p>Note: The Edit icon appears only when the benefit sub type is not yet used.</p>
Duplicate	On clicking the Duplicate (📄) icon, the Benefit Sub Type screen appears where you can define a benefit sub type using an existing benefit sub type.
Delete	On clicking the Delete (🗑) icon, you can delete a benefit sub type.

You can filter the list using various search criteria (such as **Benefit Sub Type**, **Status**, **Description**, **Value Type**, **Reconciliation Required**, **Price**, and **Validate**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filter** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the benefit sub type, the **Benefit Sub Type** zone appears with the details of the respective benefit sub type.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Benefit Sub Type

The **Benefit Sub Type** zone displays the details of the benefit sub type. It contains the following sections:

- **Main** - Displays the basic information about the benefit sub type. It contains the following fields:

Field Name	Field Description
Benefit Sub Type	Displays the benefit sub type.
Description	Displays the description of the benefit sub type.

Field Name	Field Description
Status	<p>Indicates the status of the benefit sub type. The valid values are:</p> <ul style="list-style-type: none"> • Active • Inactive <p>Note: By default the Status option is selected.</p>
Value Type	<p>Indicates whether the benefit amount should be a flat or calculated amount. The valid values are:</p> <ul style="list-style-type: none"> • Flat • Not applicable
Externally Priced	<p>Indicates whether the benefit amount is calculated in the enrollment system.</p> <p>Note: This field appears when Flat option is selected from the Value Type list.</p>
Charge Negatively	<p>Indicates whether you want to create a negative charge for the benefit amount.</p> <p>Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is not selected.</p>
Benefit SQI	<p>Indicates the SQI using which you want to create an SQI based billable charge for the benefit.</p> <p>Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is not selected.</p>
Charge Benefit Sponsor	<p>Indicates whether you want to create a reverse charge for the benefit sponsor. The reverse charge can then be used by the health insurance payer for reconciliation.</p> <p>Note: This field appears when Flat option is selected from the Value Type list and</p>
Validate External Price	<p>Indicates that you want to validate whether the externally calculated benefit amount is within the threshold range.</p> <p>Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is selected.</p>
Validate Price Item	<p>Indicates the price item that you have chosen to validate for the externally calculated benefit amount.</p> <p>Note:</p> <p>It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item.</p> <p>This field appears when the Validate External Price check box is selected.</p>

Field Name	Field Description
Benefit Sponsor Account	Indicates the account of the sponsor on which you want to create the reverse charge.
	Note: This field appears when the Charge Benefit Sponsor check box is selected.
Benefit Sponsor Price Item	Indicates the price item using which you want to create the reverse charge.
	Note: This field appears when the Charge Benefit Sponsor check box is selected.
Benefit Sponsor SQI	Indicates the SQI using which you want to create the SQI based billable charge for the reverse charge.
	Note: If you do not specify the value, the system will derive the SQI from the Proration SQI option type of the C1-ASOBLNG feature configuration. This field appears when the Charge Benefit Sponsor check box is selected.

- **Characteristics** - Lists the characteristics defined for the benefit sub type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the benefit sub type.
	Note: The Edit button appears only when the benefit sub type is not yet used.
Delete	Used to delete the benefit sub type.
Duplicate	Used to create a new benefit sub type using an existing benefit sub type.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the benefit sub type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.

By default, the **Benefit Sub Type** zone does not appear in the **Benefit Sub Type** screen. It appears only when you click the **Broadcast** () icon corresponding to a benefit sub type in the **Benefit Sub Type List** zone.

Defining a Benefit Sub Type

Prerequisites

To define a benefit sub type, you should have:

- Values defined in the **BENEFIT_SUB_TYPE_FLG**, **FIELD_STATUS_FLG**, and **VALUE_TYPE_FLG** lookup type.
- Values defined for the **Proration SQI** option type in the **C1-ASOBLLNG** feature configuration.
- Benefit sub type business object defined in the application.

Procedure

To define a benefit sub type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **B** and then click **Benefit Sub Type**.
A sub-menu appears.
3. Click the **Add** option from the **Benefit Sub Type** sub-menu.

The **Benefit Sub Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the benefit sub type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sub Type	Used to specify the benefit sub type.	Yes
Description	Used to specify the description for the benefit sub type.	Yes
Status	Used to indicate the status of the benefit sub type. <ul style="list-style-type: none"> • Active • Inactive <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> Note: You cannot change the status of a benefit sub type to Inactive when the corresponding benefit is in Active status. </div>	Yes
Value Type	Used to indicate whether the benefit amount should be a flat or calculated amount. The valid values are: <ul style="list-style-type: none"> • Flat • Not Applicable 	Yes

Field Name	Field Description	Mandatory (Yes or No)
Externally Priced	Used to indicate whether the benefit amount is calculated in the enrollment system.	No
	Note: This field appears when Flat option is selected from the Value Type list.	
Charge Negatively	Used to indicate whether you want to create a negative charge for the benefit amount.	No
	Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is not selected.	
Benefit SQI	Used to indicate the SQI using which you want to create an SQI based billable charge for the benefit.	No
	Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is not selected.	
Charge Benefit Sponsor	Used to indicate whether you want to create a reverse charge for the benefit sponsor. The reverse charge can then be used by the health insurance payer for reconciliation.	No
	Note: This field appears when Flat option is selected from the Value Type list and	
Validate External Price	Used to indicate that you want to validate whether the externally calculated benefit amount is within the threshold range.	No
	Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is selected.	
Validate Price Item	Used to indicate the price item that you want to validate for the externally calculated benefit amount.	Yes (Conditional)
	Note: The Search (🔍) icon appears corresponding to the Validate Price Item field. On clicking the Search icon, the Search window appears.	
	This field appears when the Validate External Price check box is selected.	

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sponsor Account	Used to indicate the account of the sponsor on which you want to create the reverse charge.	Yes (Conditional) Note: This field is required when the Charge Benefit Sponsor check box is selected.
	Note: The Search (🔍) icon appears corresponding to the Benefit Sponsor Account field. On clicking the Search icon, the Search window appears. This field appears when the Charge Benefit Sponsor check box is selected.	
Benefit Sponsor Price Item	Used to indicate the price item using which you want to create the reverse charge.	No
	Note: The Search (🔍) icon appears corresponding to the Benefit Sponsor Price Item field. On clicking the Search icon, the Search window appears. This field appears when the Charge Benefit Sponsor check box is selected.	
Benefit Sponsor SQI	Used to indicate the SQI using which you want to create the SQI based billable charge for the reverse charge.	No
	Note: If you do not specify the value, the system will derive the SQI from the Proration SQI option type of the C1-ASOBLNG feature configuration. This field appears when the Charge Benefit Sponsor check box is selected.	

Tip: Alternatively, you can access the **Benefit Sub Type** screen by clicking the **Add** button in the **Page Title** area of the **Benefit Sub Type** screen.

4. Enter the required details in the **Main** section.
5. Click **Save**.

The benefit sub type is defined.

Defining a Characteristic for a Benefit Sub Type

To define a characteristic for an benefit sub type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Benefit Sub Type**)

Procedure

To define a characteristic for a benefit sub type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a benefit sub type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to Benefit Sub Type .	Note: This field is required when you are defining the characteristics for a benefit sub type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		Note: This field is required when you are defining the characteristics for a benefit sub type.

2. Enter the required characteristic in the **Characteristics** section.
3. If you want to define more than one characteristic for the benefit sub type, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the benefit sub type, click the **Delete (🗑)** icon corresponding to the characteristic

4. Click **Save**.

The characteristic is defined for the benefit sub type.

Editing a Benefit Sub Type

Prerequisites

To edit a benefit sub type, you should have:

- Values defined in the **BENEFIT_SUB_TYPE_FLG**, **FIELD_STATUS_FLG**, and **VALUE_TYPE_FLG** lookup type.
- Values defined for the **Proration SQI** option type in the **C1-ASOBLNG** feature configuration.

- Benefit sub type business object defined in the application.

Procedure

To edit a benefit sub type:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **B** and then click **Benefit Sub Type**.
A sub-menu appears.
- Click the **Search** option from the **Benefit Sub Type** sub-menu.
The **Benefit Sub Type** screen appears.
- In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the benefit sub type whose details you want to edit.

Note: The Edit icon appears only when a benefit is not defined using the benefit sub type.

The **Benefit Sub Type** screen appears. It contains the following sections:

- Main** - Used to specify the basic details about the benefit sub type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sub Type	Displays the benefit sub type.	Not applicable
Description	Used to specify the description for the benefit sub type.	Yes
Status	Used to indicate the status of the benefit sub type. <ul style="list-style-type: none"> Active Inactive <p>Note: You can not change the status to a benefit sub type to Inactive when the corresponding benefit is in Active status.</p>	Yes
Value Type	Used to indicate whether the benefit amount should be a flat or calculated amount. The valid values are: <ul style="list-style-type: none"> Flat Not Applicable 	Yes
Externally Priced	Used to indicate whether the benefit amount is calculated in the enrollment system. <p>Note: This field appears when Flat option is selected from the Value Type list.</p>	No
Charge Negatively	Used to indicate whether you want to create a negative charge for the benefit amount. <p>Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is not selected.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Benefit SQI	Used to indicate the SQI using which you want to create an SQI based billable charge for the benefit.	No
	Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is not selected.	
Charge Benefit Sponsor	Used to indicate whether you want to create a reverse charge for the benefit sponsor. The reverse charge can then be used by the health insurance payer for reconciliation.	No
	Note: This field appears when Flat option is selected from the Value Type list and	
Validate External Price	Used to indicate that you want to validate whether the externally calculated benefit amount is within the threshold range.	No
	Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is selected.	
Validate Price Item	Used to indicate the price item that you want to validate for the externally calculated benefit amount.	Yes (Conditional)
	Note: The Search (🔍) icon appears corresponding to the Validate Price Item field. On clicking the Search icon, the Search window appears. This field appears when the Validate External Price check box is selected.	
	Note: This field is required when the Validate External Price check box is selected.	
Benefit Sponsor Account	Used to indicate the account of the sponsor on which you want to create the reverse charge.	Yes (Conditional)
	Note: The Search (🔍) icon appears corresponding to the Benefit Sponsor Account field. On clicking the Search icon, the Search window appears. This field appears when the Charge Benefit Sponsor check box is selected.	
	Note: This field is required when the Charge Benefit Sponsor check box is selected.	

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sponsor Price Item	Used to indicate the price item using which you want to create the reverse charge.	No
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Benefit Sponsor Price Item field. On clicking the Search icon, the Search window appears.</p> <p>This field appears when the Charge Benefit Sponsor check box is selected.</p>	
Benefit Sponsor SQI	Used to indicate the SQI using which you want to create the SQI based billable charge for the reverse charge.	No
	<p>Note:</p> <p>If you do not specify the value, the system will derive the SQI from the Proration SQI option type of the C1-ASOBLLNG feature configuration.</p> <p>This field appears when the Charge Benefit Sponsor check box is selected.</p>	

Tip: Alternatively, you can edit the details of a benefit sub type by clicking the **Edit** button in the **Benefit Sub Type** zone.

5. Modify the required details in the **Main** section, if required.
6. Define, edit, or remove characteristics of the benefit sub type, if required
7. Click **Save**.

The changes made to the benefit sub type are saved.

Copying a Benefit Sub Type

Instead of creating a benefit sub type from scratch, you can create a new benefit sub type using an existing benefit sub type. This is possible through copying a benefit sub type. On copying a benefit sub type, the details are copied to the new benefit sub type. You can then edit the details, if required.

Prerequisites

To define a benefit sub type, you should have:

- Values defined in the **BENEFIT_SUB_TYPE_FLG**, **FIELD_STATUS_FLG**, and **VALUE_TYPE_FLG** lookup type.
- Values defined for the **Proration SQI** option type in the **C1-ASOBLLNG** feature configuration.
- Benefit sub type business object defined in the application.

Procedure

To copy a benefit sub type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **B** and then click **Benefit Sub Type**.
A sub-menu appears.
3. Click the **Search** option from the **Benefit Sub Type** sub-menu.
The **Benefit Sub Type** screen appears.
4. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the benefit sub type whose details you want to edit.

The **Benefit Sub Type** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the benefit sub type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sub Type	Used to specify the benefit sub type.	Yes
Description	Used to specify the description for the benefit sub type.	Yes
Status	Used to indicate the status of the benefit sub type. <ul style="list-style-type: none"> • Active • Inactive <p>Note: You cannot change the status of a benefit sub type to Inactive when the corresponding benefit is in Active status.</p>	Yes
Value Type	Used to indicate whether the benefit amount should be a flat or calculated amount. The valid values are: <ul style="list-style-type: none"> • Flat • Not Applicable 	Yes
Externally Priced	Used to indicate whether the benefit amount is calculated in the enrollment system. <p>Note: This field appears when Flat option is selected from the Value Type list.</p>	No
Charge Negatively	Used to indicate whether you want to create a negative charge for the benefit amount. <p>Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is not selected.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Benefit SQI	Used to indicate the SQI using which you want to create an SQI based billable charge for the benefit.	No
	Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is not selected.	
Charge Benefit Sponsor	Used to indicate whether you want to create a reverse charge for the benefit sponsor. The reverse charge can then be used by the health insurance payer for reconciliation.	No
	Note: This field appears when Flat option is selected from the Value Type list and	
Validate External Price	Used to indicate that you want to validate whether the externally calculated benefit amount is within the threshold range.	No
	Note: This field appears when the Flat option is selected from the Value Type list and the Externally Priced check box is selected.	
Validate Price Item	Used to indicate the price item that you want to validate for the externally calculated benefit amount.	Yes (Conditional)
	Note: The Search (🔍) icon appears corresponding to the Validate Price Item field. On clicking the Search icon, the Search window appears. This field appears when the Validate External Price check box is selected.	
Benefit Sponsor Account	Used to indicate the account of the sponsor on which you want to create the reverse charge.	Yes (Conditional)
	Note: The Search (🔍) icon appears corresponding to the Benefit Sponsor Account field. On clicking the Search icon, the Search window appears. This field appears when the Charge Benefit Sponsor check box is selected.	

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sponsor Price Item	Used to indicate the price item using which you want to create the reverse charge.	No
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Benefit Sponsor Price Item field. On clicking the Search icon, the Search window appears.</p> <p>This field appears when the Charge Benefit Sponsor check box is selected.</p>	
Benefit Sponsor SQI	Used to indicate the SQI using which you want to create the SQI based billable charge for the reverse charge.	No

Searching for a Medicare Benefit

Prerequisites

To search for a Medicare benefit, you should have:

- Values defined for the **BENEFIT_TYPE_FLG**, **BENEFIT_SUB_TYPE_FLG**, and **BENEFIT_SRC_FLG** lookup fields in the application.

Procedure

To search for a Medicare benefit:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Benefit**.
The **Benefit** screen appears.
3. Enter the search criteria in the **Search Benefit** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
A list of Medicare benefits that meet the search criteria appears in the **Search Results** section.

Defining a Medicare Benefit

Prerequisites

To define a Medicare benefit, you should have:

- Required membership defined in the application
- Required member person added to the membership in the application

- Values defined for the **BENEFIT_TYPE_FLG**, **BENEFIT_SUB_TYPE_FLG**, and **BENEFIT_SRC_FLG** lookup fields in the application
- Required Medicare plan benefit packages defined in the application

Procedure

To define a Medicare benefit:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Benefit**.
A sub-menu appears.
3. Click the **Add** option from the **Benefit** sub-menu.

The **Benefit** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the Medicare benefit.
- **Characteristics** - Used to define the characteristics for the Medicare benefit.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership ID	Used to indicate the membership whose member person has availed the Medicare benefit. Note: The Search  icon appears corresponding to the Membership ID field. On clicking the Search icon, the Membership Search window appears. On specifying the membership ID, the information about the membership appears corresponding to the Membership ID field.	Yes
Benefit Source	Used to indicate the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> • Centers for Medicare and Medicaid Services • State Note: The list includes only those benefit sources which are defined in the BENEFIT_SRC_FLG lookup field.	Yes
Benefit Type	Used to indicate the type of benefit. The valid value is: <ul style="list-style-type: none"> • Medicare Affiliated Note: The list includes only those benefit types which are defined in the BENEFIT_TYPE_FLG lookup field.	Yes
Benefit Sub Type	Used to indicate the type of Medicare benefit. Note: The list includes only those benefit types which are defined through the Benefit Sub Type screen.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Used to indicate the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit.	Yes (Conditional) Note: This field is required when the benefit sub type is set to Part A-Inpatient Hospital Coverage, Part B-Outpatient Medical Coverage, or Part D-Medicare Prescription Drug Coverage.
	Note: This field appears when the benefit sub type is set to Part A-Inpatient Hospital Coverage, Part B-Outpatient Medical Coverage, or Part D-Medicare Prescription Drug Coverage.	
Start Date	Used to specify the date from when the member person has availed the Medicare benefit.	Yes
	Note: The start date of the Medicare benefit cannot be earlier than the member person start date or later than the member person end date. The Medicare benefit start date cannot be later than the Medicare benefit end date.	
End Date	Used to specify the date till when the member person has availed the Medicare benefit.	No
	Note: The end date of the Medicare benefit cannot be earlier than the member person start date or later than the member person end date. The Medicare benefit end date cannot be earlier than the Medicare benefit start date.	
Benefit Amount	Used to specify the low income subsidy or late enrollment penalty amount for Medicare Part D.	No
	Note: This field appears when the benefit sub type is set to Late Enrollment Penalty or Low Income Subsidy.	

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Benefit** screen.

4. Enter the required details in the **Main** section.
5. Define characteristics for the Medicare benefit, if required.
6. Click **Save**.

The Medicare benefit is defined for the member person in the **Active** status.

Note: You cannot define more than one Medicare benefit for the same membership, member person, benefit source, benefit type, and benefit sub type combination.

Defining a Characteristic for a Medicare Benefit**Prerequisites**

To define a characteristic for a Medicare benefit, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Benefits**)

Procedure

To define a characteristic for a Medicare benefit:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a Medicare benefit.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the Medicare benefit.	Yes (Conditional)
		Note: This field is required while defining a characteristic for the Medicare benefit.
Characteristic Type	Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Benefits .	Yes (Conditional)
		Note: This field is required while defining a characteristic for the Medicare benefit.
Characteristic Value	Used to specify the value for the characteristic type. Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, you can search for a predefined characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Yes (Conditional)
		Note: This field is required while defining a characteristic for the Medicare benefit.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the Medicare benefit, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic of the Medicare benefit, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the Medicare benefit.

Benefit (Used for Viewing)

Once you create a Medicare benefit, the **Benefit** screen allows you to:

- View the details of the Medicare benefit
- Edit the details of the Medicare benefit
- Discard the Medicare benefit
- View the log of the Medicare benefit
- Add a log entry for the Medicare benefit

It consists of the following tabs:

- [Benefit - Main](#) on page 181
- [Benefit - Log](#) on page 182

Benefit - Main

The **Main** tab displays information about the Medicare benefit. It contains the following zones:

- [Benefit](#) on page 181
- [Benefit Characteristics](#) on page 182

Benefit

The **Benefit** zone displays the details of the Medicare benefit. It contains the following sections:

- **Main** - Displays basic information about the Medicare benefit. It contains the following fields:

Field Name	Field Description
Benefit Information	Displays information about the Medicare benefit.
Membership Information	Indicates the membership whose member person has availed the Medicare benefit. Note: It has a link. On clicking the link, the Membership screen appears where you can view the details of the respective membership.
Benefit Source	Indicates the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> • Centers for Medicare and Medicaid Services • State
Benefit Type	Indicates the type of benefit. The valid value is: <ul style="list-style-type: none"> • Medicare Affiliated
Benefit Sub Type	Indicates the type of Medicare benefit.
Medicare Plan Benefit Package	Indicates the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit. Note: This field appears when the benefit sub type is set to Part A-Inpatient Hospital Coverage, Part B-Outpatient Medical Coverage, or Part D-Medicare Prescription Drug Coverage.
Start Date	Displays the date from when the member person has availed the Medicare benefit.
End Date	Displays the date till when the member person has availed the Medicare benefit.
Status	Indicates the status of the Medicare benefit. The valid values are: <ul style="list-style-type: none"> • Active • Discarded • Inactive
Benefit Amount	Displays the low income subsidy or late enrollment penalty amount for Medicare Part D. Note: This field appears when the benefit sub type is set to Late Enrollment Penalty or Low Income Subsidy.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the Medicare benefit.
	Note: The Edit button appears when the Medicare benefit is in the Active status.
Discard	Used to discard a Medicare benefit.
	Note: The Discard button appears when the benefit is in the Active or Inactive status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the Medicare benefit is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the Medicare benefit status is updated.
Create Date/Time	Displays the date and time when the Medicare benefit is created.

Benefit Characteristics

The **Benefit Characteristics** zone lists the characteristics of the Medicare benefit. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the Medicare benefit.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	Note: The data appears in this column when the type of characteristic value is set to Predefined Value .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Benefit - Log

The **Log** tab contains the following zone:

- [Benefit Log](#) on page 183

Benefit Log

The **Benefit Log** zone lists the complete trail of actions performed on the Medicare benefit. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the Medicare benefit.
Details	Displays the details about the action performed on the Medicare benefit.
User	Indicates the user who has performed the action on the Medicare benefit.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the Medicare benefit.
	Note: At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the Medicare benefit is changed.
	Note: At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

Note: You can manually add a log entry for the Medicare benefit by clicking the **Add Log Entry** link in the upper right corner of the **Benefit Log** zone.

Editing a Medicare Benefit

You can only edit the characteristics of a Medicare benefit from the user interface. On editing a Medicare benefit of a member person, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

Procedure

To edit a Medicare benefit:

1. Search for the Medicare benefit in the **Benefit** screen.
2. In the **Search Results** section, click the link in the **Benefit Information** column corresponding to the Medicare benefit whose details you want to edit.

The **Benefit** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Benefit** zone.

The **Benefit** screen appears. It contains the following sections:

- **Main** - Displays basic details of the Medicare benefit.
- **Characteristics** - Used to define the characteristics for the Medicare benefit.

The **Main** section contains the following fields:

Field Name	Field Description
Benefit Information	Displays information about the Medicare benefit.
Membership Information	Indicates the membership whose member person has availed the Medicare benefit.
Benefit Source	Indicates the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> • Centers for Medicare and Medicaid Services • State
Benefit Type	Indicates the type of benefit. The valid values are: <ul style="list-style-type: none"> • Commercial • Medicare Affiliated
Benefit Sub Type	Indicates the type of Medicare benefit. Note: The list includes only those benefit types which are defined through the Benefit Sub Type screen.
Medicare Plan Benefit Package	Indicates the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit. Note: This field appears when the benefit sub type is set to Part A-Inpatient Hospital Coverage , Part B-Outpatient Medical Coverage , or Part D-Medicare Prescription Drug Coverage .
Start Date	Displays the date from when the member person has availed the Medicare benefit.
End Date	Displays the date till when the member person has availed the Medicare benefit. Note: The system enables you to edit the end date of a Medicare benefit through a health care inbound message or through the membership repricing inbound web service.
Benefit Amount	Displays the low income subsidy or late enrollment penalty amount for Medicare Part D. Note: This field appears when the benefit sub type is set to Late Enrollment Penalty or Low Income Subsidy . The system enables you to edit the amount of a Medicare benefit through a health care inbound message or through the membership repricing inbound web service.

Note: The **Edit** button appears when the Medicare benefit is in the **Active** status.

5. Define, edit, or remove characteristics of the Medicare benefit, if required.

6. Click **Save**.

The changes made to the Medicare benefit are saved.

Medicare Preference

The Medicare preference enables you to set the attributes which are used while creating charges for Medicare Part D Low Income Subsidy (LIS) and Late Enrollment Penalty (LEP). While deriving the LIS and LEP details, the system uses the following attributes from the medicare preference:

- Late Enrollment Penalty
- Low Income Subsidy

- Medicare Prescription Drug Coverage

For more information about these attributes, see [Defining a Medicare Preference](#) on page 188.

The system considers the medicare preference which is specified in the **Medicare** option type of the **C1-ASOBLLNG** feature configuration. You can define, edit, delete, and copy a medicare preference through the **Field Mapping** screen.

Searching for a Medicare Preference

Prerequisites

To search for a medicare preference, you should have:

- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To search for a medicare preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.
The **Field Mapping** screen appears.
4. Select the **Medicare** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of medicare preferences that meet the search criteria appears in the **Search Results** section.

Viewing the Medicare Preference Details

Procedure

To view the details of a medicare preference:

1. Search for the medicare preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the medicare preference whose details you want to view.
The **Field Mapping** zone appears.
3. View the details of the medicare preference in the **Field Mapping** zone.

Defining a Medicare Preference

Prerequisites

To define a medicare preference, you should have:

- Values defined in the **MAP_ENTITY_FLG** lookup field
- Value defined for the **Medicare** option type in the **C1-ASOBLLNG** feature configuration.

Procedure

To define a medicare preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the billing preference. The valid values are: <ul style="list-style-type: none"> • Field Mapping • Medicare Plan Benefit Package • Membership Status Reason Mapping 	Yes

Note: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

4. Select the **Field Mapping** option from the **Field Mapping Business Object** list.
5. Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the billing preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the billing preference.	Yes
Description	Used to specify the description for the billing preference.	Yes
Detailed Description	Used to specify additional information about the billing preference.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the billing preference. The valid values are: <ul style="list-style-type: none"> Active Inactive 	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> Billing Binder Payment Geographic Rating Area Individual Membership Medicare Medicare Plan Benefit Member Reconciliation Member Relationship and Subscription Tier Membership Status Reason Statement Construct 	Yes

- **Preference Settings** - Used to set the attributes in the billing preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the medicare preference. The valid values are: <ul style="list-style-type: none"> Late Enrollment Penalty - Used when you want to indicate the benefit sub type for LEP in the medicare preference. Low Income Subsidy - Used when you want to indicate the benefit sub type for LIS in the medicare preference. Medicare Prescription Drug Coverage - Used when you want to indicate the benefit sub type for Medicare Part D in the medicare preference. 	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p>Note: This field is required while setting an attribute in the medicare preference.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)								
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the billing preference:	Yes (Conditional)								
	<table border="1"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then, this field is...</th> </tr> </thead> <tbody> <tr> <td>Late Enrollment Penalty</td> <td>Used to specify the benefit sub type for which the member person incurs the late enrollment penalty.</td> </tr> <tr> <td>Low Income Subsidy</td> <td>Used to specify the benefit sub type for which the member person is qualified.</td> </tr> <tr> <td>Medicare Prescription Drug Coverage</td> <td>Used to specify the benefit sub type availed by the member person.</td> </tr> </tbody> </table>	If the attribute is set to...	Then, this field is...	Late Enrollment Penalty	Used to specify the benefit sub type for which the member person incurs the late enrollment penalty. Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> • Account • Billable Charge 	No								
	Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.									

Note: While defining a medicare preference, you must set at least one attribute in the billing preference.

6. Select the **Medicare** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the medicare preference, click the **Add (+)** icon and then repeat step 8.

Note: However, if you want to remove an attribute from the medicare preference, click the **Delete** (🗑️) icon corresponding to the attribute.

10. Click **Save**.

The medicare preference is defined.

Editing a Medicare Preference

Prerequisites

To edit a medicare preference, you should have:

- Values defined in the **MAP_ENTITY_FLG** lookup field
- Value defined for the **Medicare** option type in the **C1-ASOBLLNG** feature configuration.

Procedure

To edit a medicare preference:

1. Search for the medicare preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the medicare preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the medicare preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the medicare preference.	Not applicable
Description	Used to specify the description for the medicare preference.	Yes
Detailed Description	Used to specify additional information about the medicare preference.	No
Status	Used to indicate the status of the medicare preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> • Medicare 	Not applicable

- **Preference Settings** - Used to set the attributes in the medicare preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the medicare preference. The valid values are: <ul style="list-style-type: none"> • Late Enrollment Penalty - Used when you want to indicate the benefit sub type for LEP in the medicare preference. • Low Income Subsidy - Used when you want to indicate the benefit sub type for LIS in the medicare preference. • Medicare Prescription Drug Coverage - Used when you want to indicate the benefit sub type for Medicare Part D in the medicare preference. 	Yes (Conditional) Note: This field is required while setting an attribute in the medicare preference.

Field Name	Field Description	Mandatory (Yes or No)

Copying a Medicare Preference

Instead of creating a medicare preference from scratch, you can create a new medicare preference using an existing medicare preference. This is possible through copying a medicare preference. On copying a medicare preference, the details including the attributes are copied to the new medicare preference. You can then edit the details, if required.

Prerequisites

To copy a medicare preference, you should have:

- Medicare preference (whose copy you want to create) defined in the application
- Values defined in the **MAP_ENTITY_FLG** lookup field
- Value defined for the **Medicare** option type in the **C1-ASOBLNG** feature configuration.

Procedure

To copy a medicare preference:

1. Search for the medicare preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the medicare preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the medicare preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the medicare preference.	Yes
Description	Used to specify the description for the medicare preference.	Yes
Detailed Description	Used to specify additional information about the medicare preference.	No
Status	Used to indicate the status of the medicare preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> • Medicare 	Not applicable

- **Preference Settings** - Used to set the attributes in the medicare preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)								
Attribute	<p>Used to indicate the attribute which you want to set in the medicare preference. The valid values are:</p> <ul style="list-style-type: none"> • Late Enrollment Penalty - Used when you want to indicate the benefit sub type for LEP in the medicare preference. • Low Income Subsidy - Used when you want to indicate the benefit sub type for LIS in the medicare preference. • Medicare Prescription Drug Coverage - Used when you want to indicate the benefit sub type for Medicare Part D in the medicare preference. 	<p>Yes (Conditional)</p> <p>Note: This field is required while setting an attribute in the medicare preference.</p>								
Value	<p>Used to specify the attribute value. Medicare Plan Benefit Package

You can define an Employer Group Waiver Plan (EGWP) (i.e. 800 series plan) as a Medicare plan benefit package in the system. While defining a Medicare benefit of a member person for Medicare Part A, Part B, and Part D, you need to indicate the Medicare plan benefit package which is applicable for the Medicare benefit. You can then use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. In this way, the system enables you to offer different pricing for different EGWPs (i.e. 800 series plans).

The system enables you to define, edit, delete, and copy a Medicare plan benefit package through the **Field Mapping** screen.

Searching for a Medicare Plan Benefit Package

Prerequisites

To search for a Medicare plan benefit package, you should have:

- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To search for a Medicare plan benefit package:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Field Mapping**.

A sub-menu appears.

- Click the **Search** option from the **Field Mapping** sub-menu.

The **Field Mapping** screen appears.

- Select the **Medicare Plan Benefit** option from the **Preference Category** list.
- Enter the additional search criteria in the **Search Field Mapping** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of Medicare plan benefit packages that meet the search criteria appears in the **Search Results** section.

Viewing the Medicare Plan Benefit Package Details

Procedure

To view the details of a Medicare plan benefit package:

- Search for the Medicare plan benefit package in the **Field Mapping** screen.
- In the **Search Results** section, click the **Broadcast** () icon corresponding to the Medicare plan benefit package whose details you want to view.
The **Field Mapping** zone appears.
- View the details of the Medicare plan benefit package in the **Field Mapping** zone.

Defining a Medicare Plan Benefit Package

Procedure

To define a Medicare plan benefit package:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
- Click the **Add** option from the **Field Mapping** sub-menu.
The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the Medicare plan benefit package. The valid values are: <ul style="list-style-type: none"> Field Mapping Medicare Plan Benefit Package Membership Status Reason Mapping 	Yes

Note: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Medicare Plan Benefit Package** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Medicare Plan Benefit Package** screen appears. It contains the following section:

- Main** - Used to specify basic details of the Medicare plan benefit package. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Used to specify the Medicare plan benefit package (i.e. 800 series plan).	Yes
Description	Used to specify the description for the Medicare plan benefit package.	Yes

- Enter the required details in the **Main** section.
- Click **Save**.

The Medicare plan benefit package is defined.

Editing a Medicare Plan Benefit Package

Procedure

To edit a Medicare plan benefit package:

- Search for the Medicare plan benefit package in the **Field Mapping** screen.
- In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the Medicare plan benefit package whose details you want to edit.

The **Medicare Plan Benefit Package** screen appears. It contains the following section:

- Main** - Used to specify basic details of the Medicare plan benefit package. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Displays the Medicare plan benefit package (i.e. 800 series plan).	Not applicable
Description	Used to specify the description for the Medicare plan benefit package.	Yes

Tip: Alternatively, you can edit the details of a Medicare plan benefit package by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Click **Save**.

The changes made to the Medicare plan benefit package are saved.

Copying a Medicare Plan Benefit Package

Instead of creating a Medicare plan benefit package from scratch, you can create a new Medicare plan benefit package using an existing Medicare plan benefit package. This is possible through copying a Medicare plan benefit package. On copying a Medicare plan benefit package, the details are copied to the new Medicare plan benefit package. You can then edit the details, if required.

Prerequisites

To copy a Medicare plan benefit package, you should have:

- Medicare plan benefit package (whose copy you want to create) defined in the application

Procedure

To copy a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the Medicare plan benefit package whose copy you want to create.

The **Medicare Plan Benefit Package** screen appears. It contains the following section:

- **Main** - Used to specify basic details of the Medicare plan benefit package. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Used to specify the Medicare plan benefit package (i.e. 800 series plan).	Yes
Description	Used to specify the description for the Medicare plan benefit package.	Yes

Tip: Alternatively, you can copy a Medicare plan benefit package by clicking the **Duplicate** button in the **Field Mapping** zone.

3. Enter the required details in the **Main** section.
4. Click **Save**.

The new Medicare plan benefit package is defined.

Deleting a Medicare Plan Benefit Package

Procedure

To delete a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the Medicare plan benefit package that you want to delete.

A message appears confirming whether you want to delete the Medicare plan benefit package.

Tip: Alternatively, you can delete a Medicare plan benefit package by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The Medicare plan benefit package is deleted.

Geographic Rating Area Preference

Oracle Revenue Management and Billing enables you to use the geographic rating area as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different geographic rating area.

Once you define a geographic rating area, the system can derive the geographic rating area for a membership. While deriving the geographic rating area for a membership, the system uses the following attributes from the geographic rating area preference:

- Address Source Characteristic Type
- Address Type Characteristic Type
- Default Address Source
- Default Address Type
- Default Geographic Rating Area
- Geographic Rating Area Characteristic Type
- Use Plan Details

For more information about these attributes, see [Defining a Geographic Rating Area Preference](#) on page 201.

The system considers the geographic rating area preference which is specified in the **Rating Area Field Mapping for Group** option type of the **C1-ASOBLNG** feature configuration. You can define, edit, delete, and copy a geographic rating area preference through the **Field Mapping** screen.

Searching for a Geographic Rating Area Preference

Prerequisites

To search for a geographic rating area preference, you should have:

- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To search for a geographic rating area preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.
The **Field Mapping** screen appears.
4. Select the **Geographic Rating Area** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of geographic rating area preferences that meet the search criteria appears in the **Search Results** section.

Viewing the Geographic Rating Area Preference Details

Procedure

To view the details of a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the geographic rating area preference whose details you want to view.
The **Field Mapping** zone appears.
3. View the details of the geographic rating area preference in the **Field Mapping** zone.

Defining a Geographic Rating Area Preference

Prerequisites

To define a geographic rating area preference, you should have:

- Values defined in the **ADDRESS_SRC_FLG**, **ADDRESS_TYPE_FLG**, and **MAP_ENTITY_FLG** lookup fields
- Geographic rating areas defined in the application

Procedure

To define a geographic rating area preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> • Field Mapping • Medicare Plan Benefit Package • Membership Status Reason Mapping 	Yes

Note: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

4. Select the **Field Mapping** option from the **Field Mapping Business Object** list.
5. Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the geographic rating area preference.	Yes
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> Active Inactive 	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> Billing Binder Payment Geographic Rating Area Individual Membership Medicare Medicare Plan Benefit Member Reconciliation Member Relationship and Subscription Tier Membership Status Reason Statement Construct 	Yes

- **Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> Account Billable Charge 	No
	Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.	

Note: While defining a geographic rating area preference, you must set at least one attribute in the geographic rating area preference.

6. Select the **Geographic Rating Area** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the geographic rating area preference, click the **Add (+)** icon and then repeat step 8.

Note: However, if you want to remove an attribute from the geographic rating area preference, click the **Delete** (🗑️) icon corresponding to the attribute.

10. Click **Save**.

The geographic rating area preference is defined.

Editing a Geographic Rating Area Preference

Prerequisites

To edit a geographic rating area preference, you should have:

- Values defined in the **ADDRESS_SRC_FLG**, **ADDRESS_TYPE_FLG**, and **MAP_ENTITY_FLG** lookup fields
- Geographic rating areas defined in the application

Procedure

To edit a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the geographical rating area preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the geographic rating area preference.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> Active Inactive 	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> Geographic Rating Area 	Not applicable

- **Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)

Copying a Geographic Rating Area Preference

Instead of creating a geographic rating area preference from scratch, you can create a new geographic rating area preference using an existing geographic rating area preference. This is possible through copying a geographic rating area preference. On copying a geographic rating area preference, the details including the attributes are copied to the new geographic rating area preference. You can then edit the details, if required.

Prerequisites

To copy a geographic rating area preference, you should have:

- Geographic rating area preference (whose copy you want to create) defined in the application
- Values defined in the **ADDRESS_SRC_FLG**, **ADDRESS_TYPE_FLG**, and **MAP_ENTITY_FLG** lookup fields
- Geographic rating areas defined in the application

Procedure

To copy a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the geographical rating area preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the geographic rating area preference.	Yes
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> • Geographic Rating Area 	Not applicable

- **Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the geographic rating area preference. The valid values are:</p> <ul style="list-style-type: none"> • Address Source Characteristic Type - Used when the system derives the geographic rating area for a membership. 	<p>Yes (Conditional)</p> <p>Note: This field is required while setting an attribute in the geographic rating area preference.</p>
	<ul style="list-style-type: none"> • Address Type Characteristic Type - Used when the system derives the geographic rating area for a membership. • Default Address Source - Used when the address source characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> • Policy Plan • State where the Policy Plan is Issued • Policy • State where the Policy is Issued • Default Address Type - Used when the address type characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> • Policy Plan • State where the Policy Plan is Issued • Policy • State where the Policy is Issued • Default Geographic Rating Area - Used when the system is unable to derive the geographic rating area for the following combination: <ul style="list-style-type: none"> • State and zip code (this combination is considered when the Use Plan Details attribute is set to No) • State, zip code, policy number, plan number, and source system (this combination is considered when the Use Plan Details attribute is set to Yes) • Geographic Rating Area Characteristic Type - Used when the system stores the geographic rating area for a membership. • Use Plan Details - Used to indicate whether the policy number, plan number, and source system should be considered while deriving the geographic rating area for a membership. 	

Field Name	Field Description	Mandatory (Yes or No)						
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the geographic rating area preference:	Yes (Conditional)						
	<table border="1" data-bbox="639 390 1179 1440"> <thead> <tr> <th data-bbox="639 390 873 474">If the attribute is set to...</th> <th data-bbox="873 390 1179 474">Then, this field is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="639 474 873 1440">Address Source Characteristic Type</td> <td data-bbox="873 474 1179 1440"> <p>Used to specify the characteristic type that indicates the address source. Field Name	Field Description		Mandatory (Yes or No)
	Geographic Rating Area Characteristic Type	<p>Used to specify the characteristic type where you can store the geographic rating area. This type of characteristic is defined for the membership. Here, you must specify a characteristic type where the characteristic entity is set to Membership.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Note: The C1-GEORT characteristic type is shipped with the product.</p> </div>	
	Use Plan Details	<p>Used to indicate whether the policy plan details should be considered while deriving the geographic rating area for a membership. The valid values are:</p> <ul style="list-style-type: none"> • Yes - Used when you want to derive the geographic rating area using the state, zip code, policy number, plan number, and source system combination. • No - Used when you want to derive the geographic rating area using the state and zip code combination. 	

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> Account Billable Charge 	No
	Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.	

Note: While defining a geographic rating area preference, you must set at least one attribute in the geographic rating area preference.

Tip: Alternatively, you can copy a geographic rating area preference by clicking the **Duplicate** button in the **Field Mapping** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove the attribute from the geographic rating area preference, if required.
- Click **Save**.

The new geographic rating area preference is defined.

How to search for a geographic rating area preference	Searching for a Geographic Rating Area Preference on page 200

Deleting a Geographic Rating Area Preference

Procedure

To delete a geographic rating area preference:

- Search for the geographic rating area preference in the **Field Mapping** screen.
- In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the geographic rating area preference that you want to delete.

A message appears confirming whether you want to delete the geographic rating area preference.

Tip: Alternatively, you can delete a geographic rating area preference by clicking the **Delete** button in the **Field Mapping** zone.

- Click **OK**.

The geographic rating area preference is deleted.

Member Relationship and Subscription Tier Preference

Oracle Revenue Management and Billing enables you to use the member relationship (i.e. how a member is related to the main subscriber of the membership) as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different member relationship.

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, the system automatically derives the member relationship for each member person of the membership from a member relationship structure. While deriving the member relationship for a member person, the system uses the following attributes from the member relationship and subscription tier preference:

- Age Calculation Date Basis Characteristic Type
- Max Age Limit for Max Dependent Count Characteristic Type
- Max Number of Dependents Order Priority Characteristic Type
- Member Relationship Characteristic Type
- Maximum Number of Dependents Characteristic Type
- Member Relationship Derivation Date Characteristic Type
- Member Relationship Structure Characteristic Type
- New Born Gift Days Characteristic Type
- New Born Gift Days Applicability Characteristic Type
- Young Adult Max Age Limit Characteristic Type
- Young Adult Max Age Limit Applicability Characteristic Type

For more information about these attributes, see [Defining a Member Relationship and Subscription Tier Preference](#) on page 221.

Similarly, the system enables you to use the membership subscription tier as a pricing parameter while defining the tier based pricing rules. This feature facilitates you to offer different rates for a price item based on different membership subscription tier.

While determining the subscription tier for a membership, the system derives the subscription tier for the membership from a subscription tier structure. While deriving the subscription tier for a membership, the system uses the following attributes from the member relationship and subscription tier preference:

- Age Calculation Date Basis Characteristic Type
- Max Age Limit for Max Dependent Count Characteristic Type
- Max Number of Dependents Order Priority Characteristic Type
- Maximum Number of Dependents Characteristic Type
- New Born Gift Days Characteristic Type
- New Born Gift Days Applicability Characteristic Type
- Subscription Tier Structure Characteristic Type
- Subscription Tier Characteristic Type
- Young Adult Max Age Limit Characteristic Type

- Young Adult Max Age Limit Applicability Characteristic Type

For more information about these attributes, see [Defining a Member Relationship and Subscription Tier Preference](#) on page 221.

The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLLNG** feature configuration. You can define, edit, delete, and copy a member relationship and subscription tier preference through the **Field Mapping** screen.

Searching for a Member Relationship and Subscription Tier Preference

Prerequisites

To search for a member relationship and subscription tier preference, you should have:

- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To search for a member relationship and subscription tier preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.
The **Field Mapping** screen appears.
4. Select the **Member Relationship and Subscription Tier Preferences** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of member relationship and subscription tier preferences that meet the search criteria appears in the **Search Results** section.

Viewing the Member Relationship and Subscription Tier Preference Details

Procedure

To view the details of a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.

- In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the member relationship and subscription tier preference whose details you want to view. The **Field Mapping** zone appears.
- View the details of the member relationship and subscription tier preference in the **Field Mapping** zone.

Defining a Member Relationship and Subscription Tier Preference

Prerequisites

To define a member relationship and subscription tier preference, you should have:

- Required characteristic types defined in the application
- Values defined in the **MAP_ENTITY_FLG** lookup field

Procedure

To define a member relationship and subscription tier preference:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
- Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> Field Mapping Medicare Plan Benefit Package Membership Status Reason Mapping 	Yes

Note: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Field Mapping** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the member relationship and subscription tier preference.	Yes
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> • Billing • Binder Payment • Geographic Rating Area • Individual Membership • Medicare • Medicare Plan Benefit • Member Reconciliation • Member Relationship and Subscription Tier • Membership Status Reason • Statement Construct 	Yes

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are:</p> <ul style="list-style-type: none"> • Age Calculation Date Basis Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Max Age Limit for Max Dependent Count Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Max Number of Dependents Order Priority Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. 	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: This field is required while setting an attribute in the member relationship and subscription tier preference.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> • Member Relationship Characteristic Type - Used when the system stores the member relationship for a member person. • Maximum Number of Dependents Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Member Relationship Derivation Date Characteristic Type - Used when the system derives the member relationship for a member person. • Member Relationship Structure Characteristic Type - Used when the system derives the member relationship for a member person. • New Born Gift Days Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • New Born Gift Days Applicability Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Subscription Tier Structure Characteristic Type - Used when the system derives the subscription tier for a membership. • Subscription Tier Characteristic Type - Used when the system stores the subscription tier for a membership. • Young Adult Max Age Limit Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Young Adult Max Age Limit Applicability Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership.

Field Name	Field Description		Mandatory (Yes or No)
	Subscription Tier Characteristic Type	<p>Used to specify the characteristic type where you can store the subscription tier for a membership. This type of characteristic is defined for the membership. Here, you must specify a characteristic type where the characteristic entity is set to Membership.</p> <p>Note: The C1-SUBST characteristic type is shipped with the product.</p>	
	Young Adult Max Age Limit Characteristic Type	<p>Used to specify the characteristic type that indicates the maximum age limit for young adults which are eligible for premium calculation. This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> • Policy Plan • Policy <p>Here, you must specify a characteristic type where the characteristic entity is set to Policy Plan and Policy.</p> <p>Note: The YADULTAG characteristic type is shipped with the product. Here, you must define the required predefined characteristic values.</p>	
	Young Adult Max Age Limit Applicability Characteristic Type	<p>Used to specify the characteristic type that indicates whether you want to consider the young adults during the premium calculation. The system supports the following two characteristic values — Y and N.</p>	

Field Name	Field Description	Mandatory (Yes or No)
	<div style="border: 1px solid black; padding: 5px;"> <p>This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> • Policy Plan • Policy <p>Here, you must specify a characteristic type where the characteristic entity is set to Policy Plan and Policy.</p> </div>	
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> • Account • Billable Charge <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p>Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.</p> </div>	No

Note: While defining a member relationship and subscription tier preference, you must set at least one attribute in the member relationship and subscription tier preference.

6. Select the **Member Relationship and Subscription Tier Preferences** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the member relationship and subscription tier preference, click the **Add (+)** icon and then repeat step 8.

Note: However, if you want to remove an attribute from the member relationship and subscription tier preference, click the **Delete (🗑)** icon corresponding to the attribute.

10. Click **Save**.

The member relationship and subscription tier preference is defined.

Editing a Member Relationship and Subscription Tier Preference

Prerequisites

To edit a member relationship and subscription tier preference, you should have:

- Required characteristic types defined in the application
- Values defined in the **MAP_ENTITY_FLG** lookup field

Procedure

To edit a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the member relationship and subscription tier preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the member relationship and subscription tier preference.	Not applicable
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> • Member Relationship and Subscription Tier 	Not applicable

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are:</p> <ul style="list-style-type: none"> • Age Calculation Date Basis Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Max Age Limit for Max Dependent Count Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Max Number of Dependents Order Priority Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. 	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: This field is required while setting an attribute in the member relationship and subscription tier preference.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> • Member Relationship Characteristic Type - Used when the system stores the member relationship for a member person. • Maximum Number of Dependents Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Member Relationship Derivation Date Characteristic Type - Used when the system derives the member relationship for a member person. • Member Relationship Structure Characteristic Type - Used when the system derives the member relationship for a member person. • New Born Gift Days Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • New Born Gift Days Applicability Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Subscription Tier Structure Characteristic Type - Used when the system derives the subscription tier for a membership. • Subscription Tier Characteristic Type - Used when the system stores the subscription tier for a membership. • Young Adult Max Age Limit Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Young Adult Max Age Limit Applicability Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership.

Copying a Member Relationship and Subscription Tier Preference

Instead of creating a member relationship and subscription tier preference from scratch, you can create a new member relationship and subscription tier preference using an existing member relationship and subscription tier preference. This is possible through copying a member relationship and subscription tier preference. On copying a member relationship and subscription tier preference, the details including the attributes are copied to the new member relationship and subscription tier preference. You can then edit the details, if required.

Prerequisites

To copy a member relationship and subscription tier preference, you should have:

- Member relationship and subscription tier preference (whose copy you want to create) defined in the application
- Required characteristic types defined in the application
- Values defined in the **MAP_ENTITY_FLG** lookup field

Procedure

To copy a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the member relationship and subscription tier preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the member relationship and subscription tier preference.	Yes
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> • Member Relationship and Subscription Tier 	Not applicable

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are:</p> <ul style="list-style-type: none"> • Age Calculation Date Basis Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Max Age Limit for Max Dependent Count Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Max Number of Dependents Order Priority Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Member Relationship Characteristic Type - Used when the system stores the member relationship for a member person. • Maximum Number of Dependents Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • Member Relationship Derivation Date Characteristic Type - Used when the system derives the member relationship for a member person. • Member Relationship Structure Characteristic Type - Used when the system derives the member relationship for a member person. • New Born Gift Days Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. • New Born Gift Days Applicability Characteristic Type - Used when the system derives the member relationship for a member person and the subscription tier for a membership. 	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: This field is required while setting an attribute in the member relationship and subscription tier preference.</p> </div>

	Here, you must specify a characteristic type where the characteristic entity is set to Policy Plan and Policy .			
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> Account Billable Charge <p>Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.</p>	No		

Note: While defining a member relationship and subscription tier preference, you must set at least one attribute in the member relationship and subscription tier preference.

Tip: Alternatively, you can copy a member relationship and subscription tier preference by clicking the **Duplicate** button in the **Field Mapping** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove the attribute from the member relationship and subscription tier preference, if required.
- Click **Save**.

The new member relationship and subscription tier preference is defined.

Deleting a Member Relationship and Subscription Tier Preference

Procedure

To delete a member relationship and subscription tier preference:

- Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
- In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the member relationship and subscription tier preference that you want to delete.

A message appears confirming whether you want to delete the member relationship and subscription tier preference.

Tip: Alternatively, you can delete a member relationship and subscription tier preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click OK.

The member relationship and subscription tier preference is deleted.

Group insurance health plans provide coverage to a group of members, usually comprised of company employees or members of an organization. Among all types of group insurance health plans, the fully-insured plan is one of the traditional ways to structure an employer-sponsored health plan. It is also commonly known as fully-insured employee health insurance.

In the fully-insured group health plan, the employer contracts an insurance company to cover the employees and their dependents. The employer pays a premium to the insurance carrier. The premium rates are fixed for a year based on the number of employees which are enrolled in the plan. The monthly premium changes during the year when the number of enrolled employees change in the plan. The insurance carrier collects the premium from the employer and pays the health insurance claims to the employees based on the coverage benefits outlined in the policy. The covered persons (i.e. employees and dependents) are responsible to pay any deductible amounts or co-payments required for covered services under the policy.

Oracle Revenue Management and Billing (ORMB) provides specialized methodologies for calculating premium for the employees and their dependents and then bill the total premium to the employer (known as the parent customer in ORMB) or to its logical designed billing entities (known as the bill groups in ORMB). The system enables you to offer different rates for a covered service depending on the following:

- Age of the employee or dependent
- How dependent person is related to the main subscriber
- Membership subscription tier
- Geographic rating area
- Membership or member person attributes

Oracle Revenue Management and Billing (ORMB) enables you to use the pricing methodologies and the billing engine for the fully-insured group health insurance business. To design the pricing and billing models for the fully-insured group health insurance business, you need to create the following entities in ORMB:

- Parent Customer
- Bill Groups
- Bill Group's Account
- Fully-Insured Group Policy
- Policy Plans
- Price Items (for each covered service in the policy)

- Pricing Rule Types
- Pricing Rules

Pre-requisites

To set the billing system for a fully-insured group customer, you need to do the following:

- Define the required policy types in the system.
- Define the required policy person roles in the system.
- Define the values for the **C1-SourceSystemLookup** extendable lookup.
- Define the required characteristic types where the characteristic entity is set to **Policy Type**.
- Define the required characteristic types where the characteristic entity is set to **Policy**.
- Define the status reasons for the **Terminated** status of the **C1-POLICY** business object in the **Status Reason** screen.
- Define the status reasons for the **Reinstated** status of the **C1-POLICY** business object in the **Status Reason** screen.
- Define the required price items in the system.
- Define the required age based, tier based, pass-through billable charge, additional charge, and/or benefit pricing rule types.
- Define the required characteristic types where the characteristic entity is set to **Policy Plan**.
- Define the required contract relationship types in the system.
- Define the required characteristic types where the characteristic entity is set to **Membership**.
- Define the required characteristic types where the characteristic entity is set to **Membership Person**.
- Define the required characteristic types where the characteristic entity is set to **Benefits**.
- Define the required contracts (which you want to associate with a membership) in the system.
- Define the values for the **BILL_TO_TYPE_FLG**, **BENEFIT_TYPE_FLG**, **BENEFIT_SUB_TYPE_FLG**, and **BENEFIT_SRC_FLG** lookup fields
- Define the required parameter values in the following algorithm which is attached to the **C1-POLICY** business object:
 - C1-POLBOVAL
- Define the required parameter values in the following algorithms which are used in the lifecycle of the **C1-POLICY** business object:
 - C1-EVCSTSTAT
 - C1-PLCYTRMRQ
 - C1-POLCYTERM
 - C1-DELTRMLTR
 - C1-PLCYREIRQ
 - C1-POLCYREIN
 - C1-CCPOLRE1
- Define a predefined characteristic type named **Active Employee Coverage Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing

You must set the characteristic entity of the **Active Employee Coverage Billing Arrangement** characteristic type to **Person**.

- Define a predefined characteristic type named **Benefit Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing

You must set the characteristic entity of the **Benefit Billing Arrangement** characteristic type to **Person, Policy, and Policy Plan**.

- Define a predefined characteristic type named **COBRA Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing
TPA	TPA Billing

You must set the characteristic entity of the **COBRA Billing Arrangement** characteristic type to **Person, Policy, and Policy Plan**.

- Define the required person relationship types and account relationship types in the system.
- Define the required geographic rating areas in the system.
- Define the required member relationship/subscription tier structures in the system.
- Define the required geographic rating area preference and member relationship and subscription tier preference through the **Field Mapping** screen.
- Define the required Medicare plan benefit packages in the system.
- Set the values for the following option types in the **C1-PERSTYPE** feature configuration:
 - Bill Group Person Type
 - Parent Person Type
 - TPA Person Type
- Set the values for the following option types in the **C1-ASOBLNG** feature configuration:
 - Membership ID Characteristic for Billable Charge
 - Parent Customer Policy Person Role
 - Bill Group Policy Person Role
 - Membership Inactive Status
 - Membership Person Inactive Status
 - Rating Area Field Mapping for Group

- Relation Structure Code Field Mapping
- Billing Arrangement
- Benefit Billing Arrangement
- Cobra Billing Arrangement
- TPA Person Relationship Type
- TPA Account Relationship Type
- TPA Policy Person Role

Fully-Insured Group Policy

You can create a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. The policy type indicates the business object using which the fully-insured group policy should be created in the system.

Note: At present, the **Fully-Insured Individual** policy category is not yet supported in the system.

As per the fully-insured group health insurance business, the system enables you to create a fully-insured group policy for the following:

- A parent customer (where a bill group is not associated)
- A bill group (where the parent customer is the policy holder)

You can create or edit a fully-insured group policy from the **Policy** screen. In addition, you can create or edit a fully-insured group policy through a customer registration object or a health care inbound message. If the fully-insured group policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

However, if the fully-insured group policy information is given for a parent customer in a health care inbound message, the system does the following:

- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration

A fully-insured group policy encapsulates the following information:

- **Policy Persons** – While creating a fully-insured group policy, you need to associate the person who is the main customer of the policy. While associating a person with a fully-insured group policy, you need to specify the policy person role which indicates the role of the person in the policy. For example, whether the person associated with the policy is the policy holder, broker, or underwriter. You can associate multiple persons with a fully-insured group policy using the same or different policy person role. However, at a time, only one person can be the main customer of the policy.
- **Policy Plans** – You can define different types of plans in a fully-insured group policy. For more information, refer to [Types of Policy Plan](#) on page 293.
- **Memberships** – You can define different types of memberships for a fully-insured group policy plan. For more information, refer to [Types of Membership](#) on page 294.
- **Member Persons** – While adding a person to a membership, you need to specify whether the person is the main subscriber of the membership, whether the person is financially responsible for the membership, and how the person is related to the main subscriber. At a time, only one person can be the main subscriber of the membership. You cannot remove a member person, who is the main subscriber, from the membership. You can inactivate a member person whenever required. If you inactivate a member person who is the main subscriber, the system automatically inactivates the membership and all other member persons which are included in the membership.
- **Membership Contracts** – You can associate one or more contracts with a membership. At present, the system uses the contract created for a policy plan on the accounts of the parent customer or bill group for billing the respective membership premium. The system does not use the membership contracts for billing the membership premium.
- **Policy Plan Contracts** – The system creates or updates contracts of a policy plan when you do either of the following:
 - Create or Edit a Policy Plan from the User Interface or through an Inbound Message
 - Create or Edit an Account from the User Interface or through an Inbound Message

The system uses the contract created for a policy plan on the accounts of the parent customer or bill group for billing the respective membership premium. For more information, refer to [Single Contract Creation Across Fully-Insured Group Policies and Plans](#) on page 260 and [Policy Plan Specific Contract Creation](#) on page 279.

On defining a fully-insured group policy, the status of the policy is set to **Pending**. You can then edit, delete or activate a policy. Once a fully-insured group policy is activated, you can terminate, reinstate, or renew the policy whenever required.

Fully-Insured Group Policy Activation

You can activate a fully-insured group policy by clicking the **Activate** button in the **Policy** screen. On activating a fully-insured group policy, the status of the policy is set to **In Force/Active**.

Note: If a fully-insured group policy is created through a customer registration object or a health care inbound message, the status of the policy is directly set to **In Force/Active**

Once a fully-insured group policy is activated, you can terminate, reinstate, or renew the policy whenever required.

Fully-Insured Group Policy Termination

The system enables you to terminate a fully-insured group policy whenever required. There are two ways in which you can terminate a fully-insured group policy:

- **Initiate Policy Termination Process** – In this method, you can initiate the policy termination process from the user interface. To initiate the termination process, you need to specify the termination date and termination reason. On initiating the termination process, the status of the policy is changed to **Pending Termination**. In addition, the

system creates an outbound message which request for confirmation whether the policy should be terminated. This outbound message can be sent to the policy processing system via custom mechanism. On receiving confirmation from the policy processing system through a health care inbound message, the system changes the status of the policy to **Terminated**.

- **Terminate Policy** – In this method, you can directly terminate a fully-insured group policy. To terminate a fully-insured group policy, you need to specify the termination reason. You can directly terminate the policy from the user interface or through a health care inbound message. On clicking the **Terminate** button, the system will terminate the fully-insured group policy on the system date. However, when you terminate a fully-insured group policy through a health care inbound message, the policy is terminated when the health care inbound message is processed in the system. On terminating a fully-insured group policy, the status of the policy is changed to **Terminated**.

Once the status of the policy is changed to **Terminated**, the system sets the end date of the following entities to the termination date when the respective condition is met:

- Policy (when the termination date is not earlier than the policy start date or later than the policy end date)
- Policy Person (when the termination date falls within the date range in which the person is associated with the policy)

Note: The system does not consider those persons associated with policy whose start date is later than the termination date or whose end date is earlier than the termination date.

- Policy Plan (when the termination date falls within the date range of the policy plan)

Note: The system does not consider those policy plans whose start date is later than the termination date or whose end date is earlier than the termination date.

- Membership (when the termination date falls within the date range of the membership)

Note: The system does not consider those memberships whose start date is later than the termination date or whose end date is earlier than the termination date.

- Member Person (when the termination date falls within the date range in which the person is associated with the membership)

Note: The system does not consider those member persons whose start date is later than the termination date or whose end date is earlier than the termination date.

- Contracts Associated with the Membership (when the termination date falls within the date range of the contract)

Note: The system does not consider those contracts whose start date is later than the termination date or whose end date is earlier than the termination date.

The system also changes the status of all memberships to **Terminated** irrespective of whether it is effective on the termination date or not. On terminating a membership, the system creates an audit event for the membership. For each audit event, the system identifies the policy plan to which the membership belongs and the active pricing rules defined on the policy plan. It then identifies the pricing rule types using which these active pricing rules are created in the system. An entry for each membership, pricing rule type, and effective date combination is created in the **Pending (P)** status in the **CI_REPRC_ENTITY_DTL** table. For more information, see [Audit Framework for Fully-Insured Group Health Insurance Billing](#) on page 3165.

Fully-Insured Group Policy Reinstatement

The system enables you to reinstate the terminated policy whenever required. There are two ways in which you can reinstate a fully-insured group policy:

- **Initiate Policy Reinstatement Process** – In this method, you can initiate the policy reinstatement process from the user interface. To initiate the reinstatement process, you need to specify the reinstatement reason. On initiating

the reinstatement process, the status of the policy is changed to **Pending Reinstatement**. In addition, the system creates an outbound message which request for confirmation whether the policy should be reinstated. This outbound message can be sent to the policy processing system via custom mechanism. On receiving confirmation from the policy processing system through a health care inbound message, the system changes the status of the policy to **Reinstated**.

- **Reinstate Policy** – In this method, you can directly reinstate a fully-insured group policy. To reinstate a fully-insured group policy, you need to specify the reinstatement reason. You can directly reinstate the policy from the user interface or through a health care inbound message. On clicking the **Reinstate** button, the system will reinstate the fully-insured group policy on the system date. However, when you reinstate a fully-insured group policy through a health care inbound message, the policy is reinstated when the health care inbound message is processed in the system. On reinstating a fully-insured group policy, the status of the policy is changed to **Reinstated**.

Once the status of the policy is changed to **Reinstated**, the system updates the end date of the following entities to the respective original end date:

- Policy
- Policy Person
- Policy Plan
- Membership
- Member Person
- Contracts Associated with the Membership

Note:

The system stores the original end date of the above listed entities when you define or edit a policy, policy plan, or membership.

Here, the assumption is that the pass-through billable charges information for the membership will be sent again through an inbound message along with the reinstatement reason. And, therefore the exiting billable charges will not be extended.

Finally, the system automatically transitions the fully-insured group policy from **Reinstated** to **In Force/Active**.

Fully-Insured Group Policy Renewal

You can renew a fully-insured group policy only through a health care inbound message and not from the user interface. If you want to renew a fully-insured group policy, you must sent the renewal date along with the new policy end date through a health care inbound message. On processing the health care inbound message, the fully-insured group policy is renewed. The renewal date is stamped on the fully-insured group policy. The policy end date is extended as mentioned in the health care inbound message. The policy plan and membership information for the renewed period must be sent in the subsequent health care inbound messages.

Note: You can renew a fully-insured group policy when it is in the **In Force/Active** status.

Single Contract Creation Across Fully-Insured Group Policies and Plans

The system automatically creates a contract for a fully-insured group policy plan on the parent customer and/or bill group accounts. The system creates or updates contracts of a policy plan when you do either of the following:

- **Create or Edit a Policy Plan from the User Interface or through an Inbound Message** – The system creates a contract in either of the following ways:
 - If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.

- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create five contracts - C1 using CT1, C2 using CT2, C3 using CT3, C4 using CT4, and C5 using CT5. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with different price items, and if these price items are added on different pricing rule types, and if these pricing rule types are associated with different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

Example 1 — Contract Creation for a Parent Customer

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one contract using each contract type on each account of the parent customer and bill groups. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with two plans – PP1 and PP2 - is created for PC1 (where none of the bill groups are associated)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

Now, in such case, the system will create the following contracts on the A1, A2, A3, and A4 accounts:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

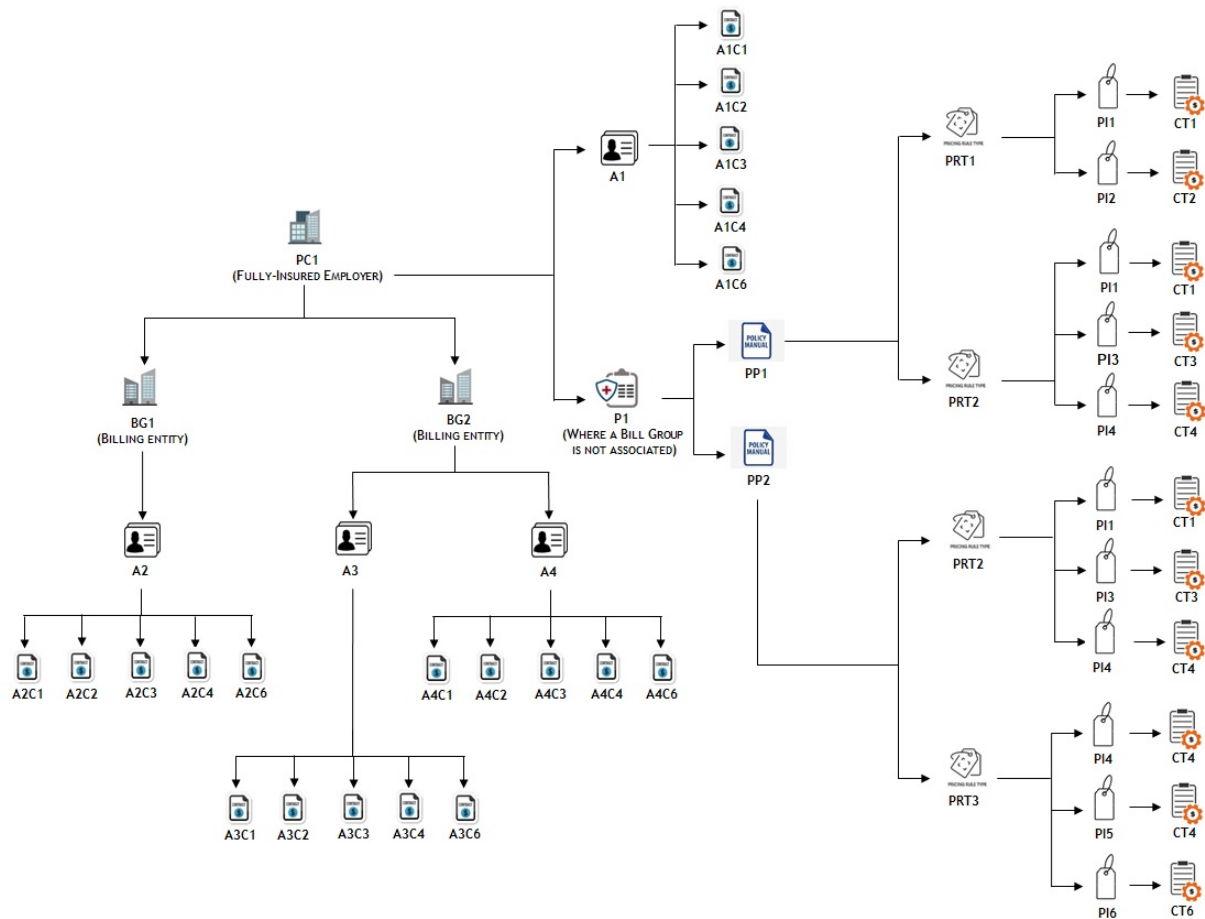

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI5	CT4	A1C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A1C6	PP2 (03-01-2019)	03-01-2019
A2	PP1	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A2C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
		PRT3	PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A2C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A2C6	PP2 (03-01-2019)	03-01-2019
A3	PP1	PRTI	PI1	CT1	A3C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A3C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A3C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A3C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A3C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A3C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A3C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI4	CT4	A3C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A3C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A3C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A3C6	PP2 (03-01-2019)	03-01-2019
A4	PP1	PRTI	PI1	CT1	A4C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A4C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A4C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A4C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A4C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A4C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI3	CT3	A4C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A4C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A4C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A4C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A4C6	PP2 (03-01-2019)	03-01-2019

The following figure graphically illustrates the example 1:

Example 2 — Contract Creation for a Bill Group

If a policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one contract using each contract type on each account of the parent customer and the bill group. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with three plans – PP1, PP2, and PP3 – is created for BG1 (where PC1 is the policy holder)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PP3 (with the start date as 06-01-2019) is associated with PRT1
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

Now, in such case, the system will create the following contracts on the A1 and A2 accounts:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019
		PRT2	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
	PP2	PRT2	PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
		PRT3	PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A1C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A1C6	PP2 (03-01-2019)	03-01-2019
	PP3	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019
	A2	PP1	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)
PI2				CT2	A2C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019
PRT2			PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A2C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A2C6	PP2 (03-01-2019)	03-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
	PP3	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A2C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019

The following figure graphically illustrates the example 2:

**Note:**

The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

- **Create or Edit an Account from the User Interface or through an Inbound Message** – The system creates a contract when either of the following condition is met:
 - The main customer of the account is a parent customer and holds a policy (where a bill group is not associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
 - The main customer of the account is a parent customer and holds a policy (where a bill group is associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
 - The main customer of the account is a bill group and holds a policy (where the parent customer is the policy holder) which is created using the policy type where the policy category is set to **Fully-Insured Group**.

The system creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create five contracts - C1 using CT1, C2 using CT2, C3 using CT3, C4 using CT4, and C5 using CT5. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with different price items, and if these price items are added on different pricing rule types, and if these pricing rule types are associated with different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

Example 3 — Contract Creation for an Account of a Parent Customer

If you create an account for a parent customer who holds policies (where a bill group may or may not be associated), the system will create one contract using each contract type for all parent customer's policies on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P1 (where a bill group is not associated) and a policy named P2 (where BG1 is associated)
- BG1 has one policy named P2 where PC1 is the policy holder
- An account named A1 is added for PC1
- P1 has two plans – PP1 and PP2
- P2 has two plans – PP11 and PP12
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 06-01-2019) is associated with PRT2, PRT3, and PRT4
- PP11 (with the start date as 05-01-2019) is associated with PRT111 and PRT112
- PP12 (with the start date as 09-01-2019) is associated with PRT113 and PRT114
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI4
- PRT3 contains two price items – PI1 and PI5
- PRT4 contains two price items – PI6 and PI7

- PRT111 contains two price items – PI11 and PI12
- PRT112 contains two price items – PI1 and PI5
- PRT113 contains two price items – PI13 and PI14
- PRT114 contains two price items – PI7 and PI15
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI7 is associated with the CT7 contract type, PI11 is associated with the CT11 contract type, PI12 is associated with the CT12 contract type, PI13 is associated with the CT13 contract type, PI14 is associated with the CT14 contract type, and PI15 is associated with the CT15 contract type

Now, in such case, the system will create the following contracts on the A1 account:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	P1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019
				PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
			PRT2	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
				PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
		PP2	PRT2	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
				PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)	
			PRT3	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019	
				PI5	CT5	A1C5	PP2 (06-01-2019) and PP11 (05-01-2019)	05-01-2019

				PI7	CT7	A1C7	PP2 (06-01-2019) and PP12 (09-01-2019)	06-01-2019	
	P2	PP11	PRT111	PI11	CT11	A1C11	PP11 (05-01-2019)	05-01-2019	
						PI12	CT12	A1C12	PP11 (05-01-2019)
				PRT112	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019
					PI5	CT5	A1C5	PP2 (06-01-2019) and PP11 (05-01-2019)	05-01-2019
			PP12	PRT113	PI13	CT13	A1C13	PP12 (09-01-2019)	09-01-2019
					PI14	CT14	A1C14	PP12 (09-01-2019)	09-01-2019
				PRT114	PI7	CT7	A1C7	PP2 (06-01-2019) and PP12 (09-01-2019)	06-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
				PI15	CT15	A1C15	PP12 (09-01-2019)	09-01-2019

The following figure graphically illustrates the example 3:

Example 4 — Contract Creation for an Account of a Bill Group

If you create an account for a bill group who holds policies and its parent customer holds policies (where a bill group may or may not be associated), the system will create one contract using each contract type for the bill group’s polices and parent customer’s polices (where a bill group is not associated) on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P2 (where a bill group is not associated) and a policy named P1 (where BG2 is associated)
- BG2 has one policy named P1 where PC1 is the policy holder
- An account named A1 is added for BG2
- P1 has two plans – PP11 and PP12

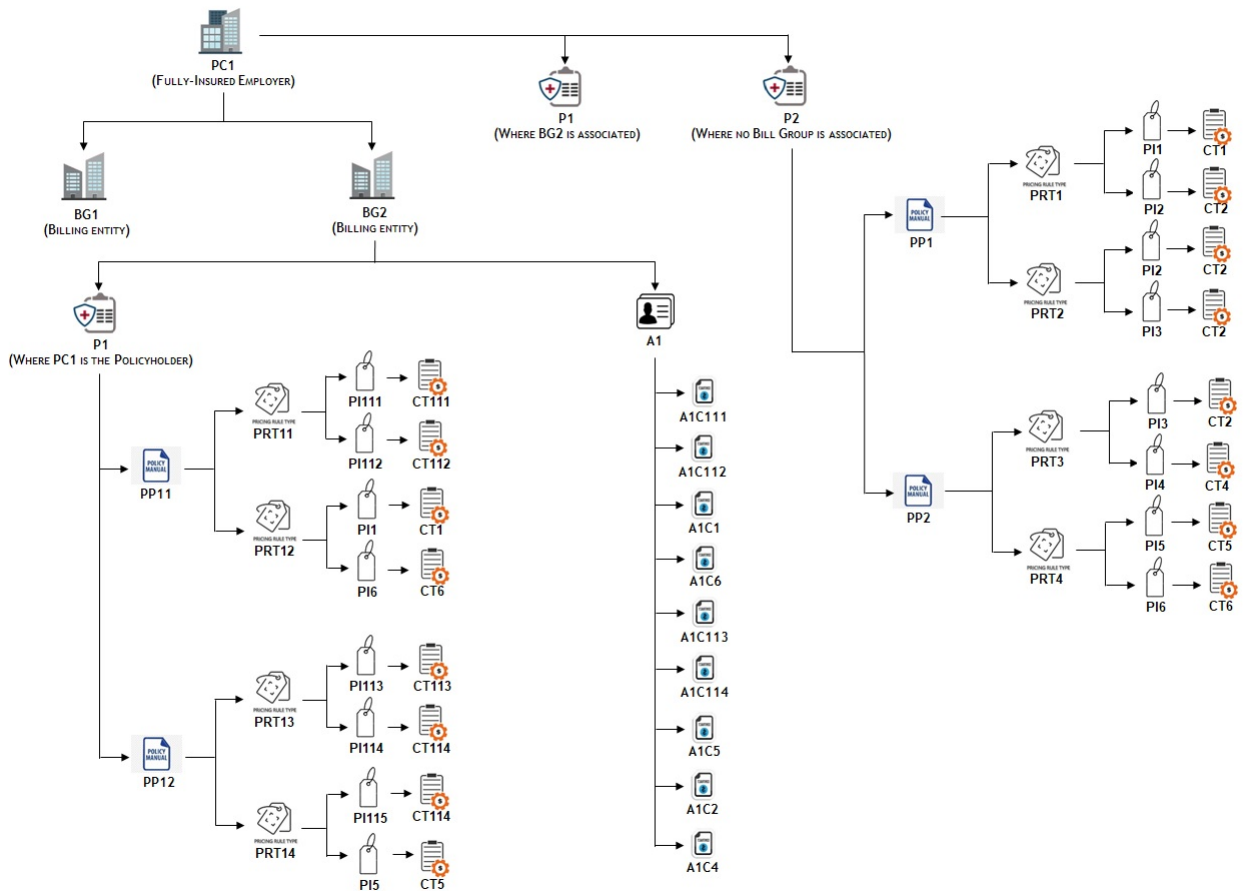

- P2 has two plans – PP1 and PP2
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 04-01-2019) is associated with PRT3 and PRT4
- PP11 (with the start date as 07-01-2019) is associated with PRT11 and PRT12
- PP12 (with the start date as 11-01-2019) is associated with PRT13 and PRT14
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI2
- PRT3 contains two price items – PI3 and PI4
- PRT4 contains two price items – PI5 and PI6
- PRT11 contains two price items – PI111 and PI112
- PRT12 contains two price items – PI1 and PI6
- PRT13 contains two price items – PI113 and PI114
- PRT14 contains two price items – PI115 and PI5
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI111 is associated with the CT111 contract type, PI112 is associated with the CT112 contract type, PI113 is associated with the CT113 contract type, and PI114 and PI115 is associated with the CT114 contract type

Now, in such case, the system will create the following contracts on the A1 account:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	P1	PP11	PRT11	PI111	CT111	A1C111	PP11 (07-01-2019)	07-01-2019
				PI112	CT112	A1C112	PP11 (07-01-2019)	07-01-2019
			PRT12	PI1	CT1	A1C1	PP1 (01-01-2019) and PP11 (07-01-2019)	01-01-2019
				PI6	CT6	A1C6	PP2 (04-01-2019) and PP11 (07-01-2019)	04-01-2019
		PP12	PRT13	PI113	CT113	A1C113	PP12 (11-01-2019)	11-01-2019
				PI114	CT114	A1C114	PP12 (11-01-2019)	11-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PRT14	PI115	CT114	A1C114	PP12 (11-01-2019)	11-01-2019
				PI5	CT5	A1C5	PP2 (04-01-2019) and PP12 (11-01-2019)	04-01-2019
	P2	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019) and PP11 (07-01-2019)	01-01-2019
				PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
			PRT2	PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
				PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (04-01-2019)	01-01-2019
		PP2	PRT3	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (04-01-2019)	01-01-2019
				PI4	CT4	A1C4	PP2 (04-01-2019)	04-01-2019
			PRT4	PI5	CT5	A1C5	PP2 (04-01-2019) and PP12 (11-01-2019)	04-01-2019
				PI6	CT6	A1C6	PP2 (04-01-2019) and PP11 (07-01-2019)	04-01-2019

The following figure graphically illustrates the example 4:

**Note:**

The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

Policy Plan Specific Contract Creation

In the [Single Contract Creation Across Fully-Insured Group Policies and Plans](#) on page 260 section, we have seen how the system creates one contract across fully-insured group policies and plans on the parent customer and/or bill group accounts. Alternatively, the system enables you to create a plan-specific contract (i.e. a contract using a contract type for each plan) on the parent customer and/or bill group accounts. You can opt for the plan-specific contract creation feature when you want to implement plan-specific business rules. For example, different payment priorities for your medical and dental plans. Under such conditions, you can create different contract types for different plans, say Medical and Dental and enable creation of different contracts using these contract types for billing different plans.

You can configure the plan-specific contract creation feature for the fully-insured group health insurance business by setting the following option types in the **C1-ASOBLNG** feature configuration:

- **Plan ID Characteristic Type** – Used to specify the characteristic type where you want to store the plan for which the contract is created. During the plan-specific contract creation, this characteristic is defined on the contract. Here, you must specify a characteristic type where the characteristic entity is set to **Contract**.
- **Plan Based Contract Creation Eligibility** – Used to indicate whether the system should create plan-specific contract on the account. The valid value is **Yes**.

Alternatively, you can also configure the plan-specific contract creation feature for specific persons (i.e. main customers of the policy) based on the business requirement. This is possible by setting the following option types in the **C1-ASOBLLNG** feature configuration:

- **Plan Based Contract Characteristic Type** – Used to specify the characteristic type which helps the system to determine whether plan-specific contracts should be created on the account. This characteristic must be defined on the person for whom you want to create plan-specific contracts on the accounts. Here, you must specify a characteristic type where the characteristic entity is set to **Person**.
- **Plan Based Contract Characteristic Value** – Used to specify the characteristic value which indicates that the system should create plan-specific contracts on the accounts.
- **Plan ID Characteristic Type** – Used to specify the characteristic type where you want to store the plan for which the contract is created. During the plan-specific contract creation, this characteristic is defined on the contract. Here, you must specify a characteristic type where the characteristic entity is set to **Contract**.

Here, the system creates or updates contracts of a policy plan when you do either of the following:

- **Create or Edit a Policy Plan from the User Interface or through an Inbound Message** – The system creates a contract in either of the following ways:
 - If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
 - If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create six contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, C3PP1 using CT3 for PP1, C4PP2 using CT4 for PP2, and C5PP2 using CT5 for PP2. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create four contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, and C2PP2 using CT2 for PP2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date. The characteristic type, which is specified in the **Plan ID Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration, is defined for each contract. It stores the plan ID which indicates the plan for which the contract is created.

Example 1 — Plan-Specific Contract Creation for a Parent Customer

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one plan-specific contract using each contract type on each account of the parent customer and bill groups. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts

- A policy named P1 with two plans – PP1 and PP2 - is created for PC1 (where none of the bill groups are associated)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

Now, in such case, the system will create the following contracts on the A1, A2, A3, and A4 accounts:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
			PI2	CT2	A1C2PP1	01-01-2019
		PRT2	PI1	CT1	A1C1PP1	01-01-2019
			PI3	CT3	A1C3PP1	01-01-2019
			PI4	CT4	A1C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A1C1PP2
	PI3			CT3	A1C3PP2	03-01-2019
	PI4			CT4	A1C4PP2	03-01-2019
	PRT3		PI4	CT4	A1C4PP2	03-01-2019
			PI5	CT4	A1C4PP2	03-01-2019
			PI6	CT6	A1C6PP2	03-01-2019
	A2	PP1	PRT1	PI1	CT1	A2C1PP1
PI2				CT2	A2C2PP1	01-01-2019
PRT2			PI1	CT1	A2C1PP1	01-01-2019
			PI3	CT3	A2C3PP1	01-01-2019
			PI4	CT4	A2C4PP1	01-01-2019
PP2			PRT2	PI1	CT1	A2C1PP2
		PI3		CT3	A2C3PP2	03-01-2019
		PI4		CT4	A2C4PP2	03-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
		PRT3	PI4	CT4	A2C4PP2	03-01-2019
			PI5	CT4	A2C4PP2	03-01-2019
			PI6	CT6	A2C6PP2	03-01-2019

			PI2	CT2	A3C2PP1	01-01-2019
		PRT2	PI1	CT1	A3C1PP1	01-01-2019
			PI3	CT3	A3C3PP1	01-01-2019
			PI4	CT4	A3C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A3C1PP2
	PI3			CT3	A3C3PP2	03-01-2019
	PI4			CT4	A3C4PP2	03-01-2019
	PRT3		PI4	CT4	A3C4PP2	03-01-2019
			PI5	CT4	A3C4PP2	03-01-2019
			PI6	CT6	A3C6PP2	03-01-2019
	A4	PP1	PRT1	PI1	CT1	A4C1PP1
PI2				CT2	A4C2PP1	01-01-2019
PRT2			PI1	CT1	A4C1PP1	01-01-2019
			PI3	CT3	A4C3PP1	01-01-2019
			PI4	CT4	A4C4PP1	01-01-2019
PP2			PRT2	PI1	CT1	A4C1PP2
		PI3		CT3	A4C3PP2	03-01-2019
		PI4		CT4	A4C4PP2	03-01-2019
		PRT3	PI4	CT4	A4C4PP2	03-01-2019
			PI5	CT4	A4C4PP2	03-01-2019
			PI6	CT6	A4C6PP2	03-01-2019

The following figure graphically illustrates the example 1:

Example 2 — Plan-Specific Contract Creation for a Bill Group

If the policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one plan-specific contract using each contract type on each account of the parent customer and the bill group. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with three plans – PP1, PP2, and PP3 – is created for BG1 (where PC1 is the policy holder)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PP3 (with the start date as 06-01-2019) is associated with PRT1
- PRT1 contains two price items – PI1 and PI2

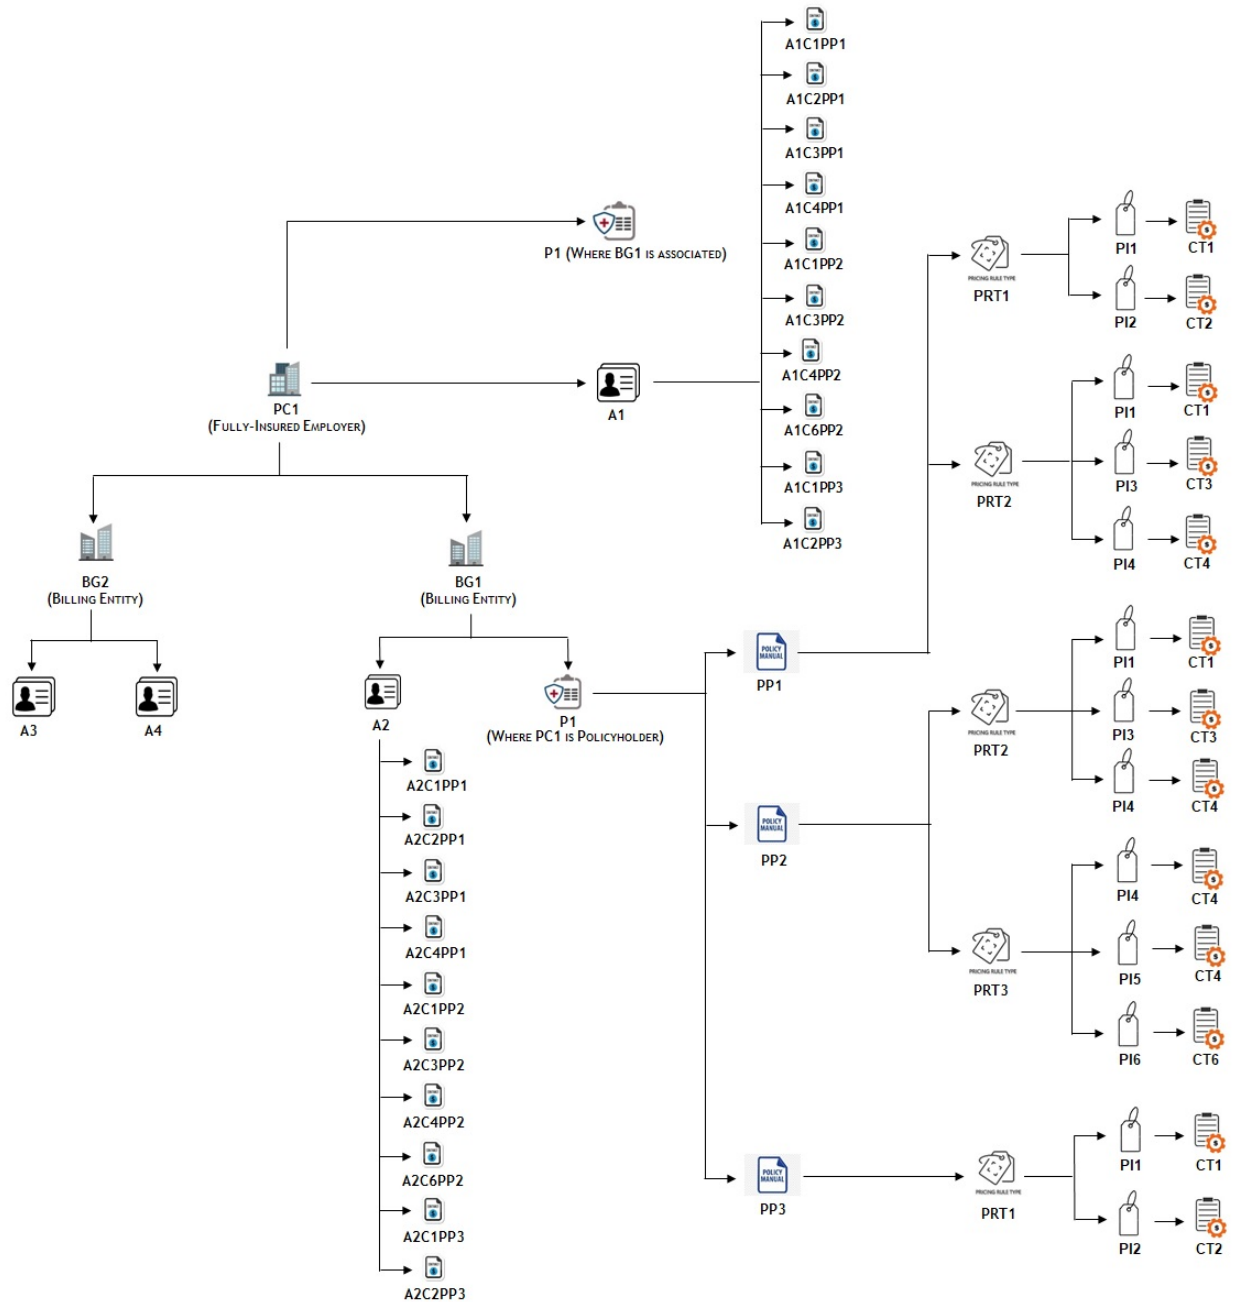

- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

Now, in such case, the system will create the following contracts on the A1 and A2 accounts:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
			PI2	CT2	A1C2PP1	01-01-2019
		PRT2	PI1	CT1	A1C1PP1	01-01-2019
			PI3	CT3	A1C3PP1	01-01-2019
			PI4	CT4	A1C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A1C1PP2
	PI3			CT3	A1C3PP2	03-01-2019
	PI4			CT4	A1C4PP2	03-01-2019
	PRT3		PI4	CT4	A1C4PP2	03-01-2019
			PI5	CT4	A1C4PP2	03-01-2019
			PI6	CT6	A1C6PP2	03-01-2019
	PP3	PRT1	PI1	CT1	A1C1PP3	06-01-2019
PI2			CT2	A1C2PP3	06-01-2019	
A2	PP1	PRT1	PI1	CT1	A2C1PP1	01-01-2019
			PI2	CT2	A2C2PP1	01-01-2019
		PRT2	PI1	CT1	A2C1PP1	01-01-2019
			PI3	CT3	A2C3PP1	01-01-2019
			PI4	CT4	A2C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A2C1PP2
	PI3			CT3	A2C3PP2	03-01-2019
	PI4			CT4	A2C4PP2	03-01-2019
	PRT3		PI4	CT4	A2C4PP2	03-01-2019
				PI5	CT4	A2C4PP2

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
			PI6	CT6	A2C6PP2	03-01-2019
	PP3	PRT1	PI1	CT1	A2C1PP3	06-01-2019
			PI2	CT2	A2C2PP3	06-01-2019

The following figure graphically illustrates the example 2:

Note: The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

- **Create or Edit an Account from the User Interface or through an Inbound Message** – The system creates a contract when either of the following condition is met:
 - The main customer of the account is a parent customer and holds a policy (where a bill group is not associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
 - The main customer of the account is a parent customer and holds a policy (where a bill group is associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
 - The main customer of the account is a bill group and holds a policy (where the parent customer is the policy holder) which is created using the policy type where the policy category is set to **Fully-Insured Group**.

The system creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create six contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, C3PP1 using CT3 for PP1, C4PP2 using CT4 for PP2, and C5PP2 using CT5 for PP2. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create four contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, and C2PP2 using CT2 for PP2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date. The characteristic type, which is specified in the **Plan ID Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration, is defined for each contract. It stores the plan ID which indicates the plan for which the contract is created.

Example 3 — Plan-Specific Contract Creation for an Account of a Parent Customer

If you create an account for a parent customer who holds policies (where a bill group may or may not be associated), the system will create one plan-specific contract using each contract type for all parent customer's policies on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P1 (where a bill group is not associated) and a policy named P2 (where BG1 is associated)
- BG1 has one policy named P2 where PC1 is the policy holder
- An account named A1 is added for PC1

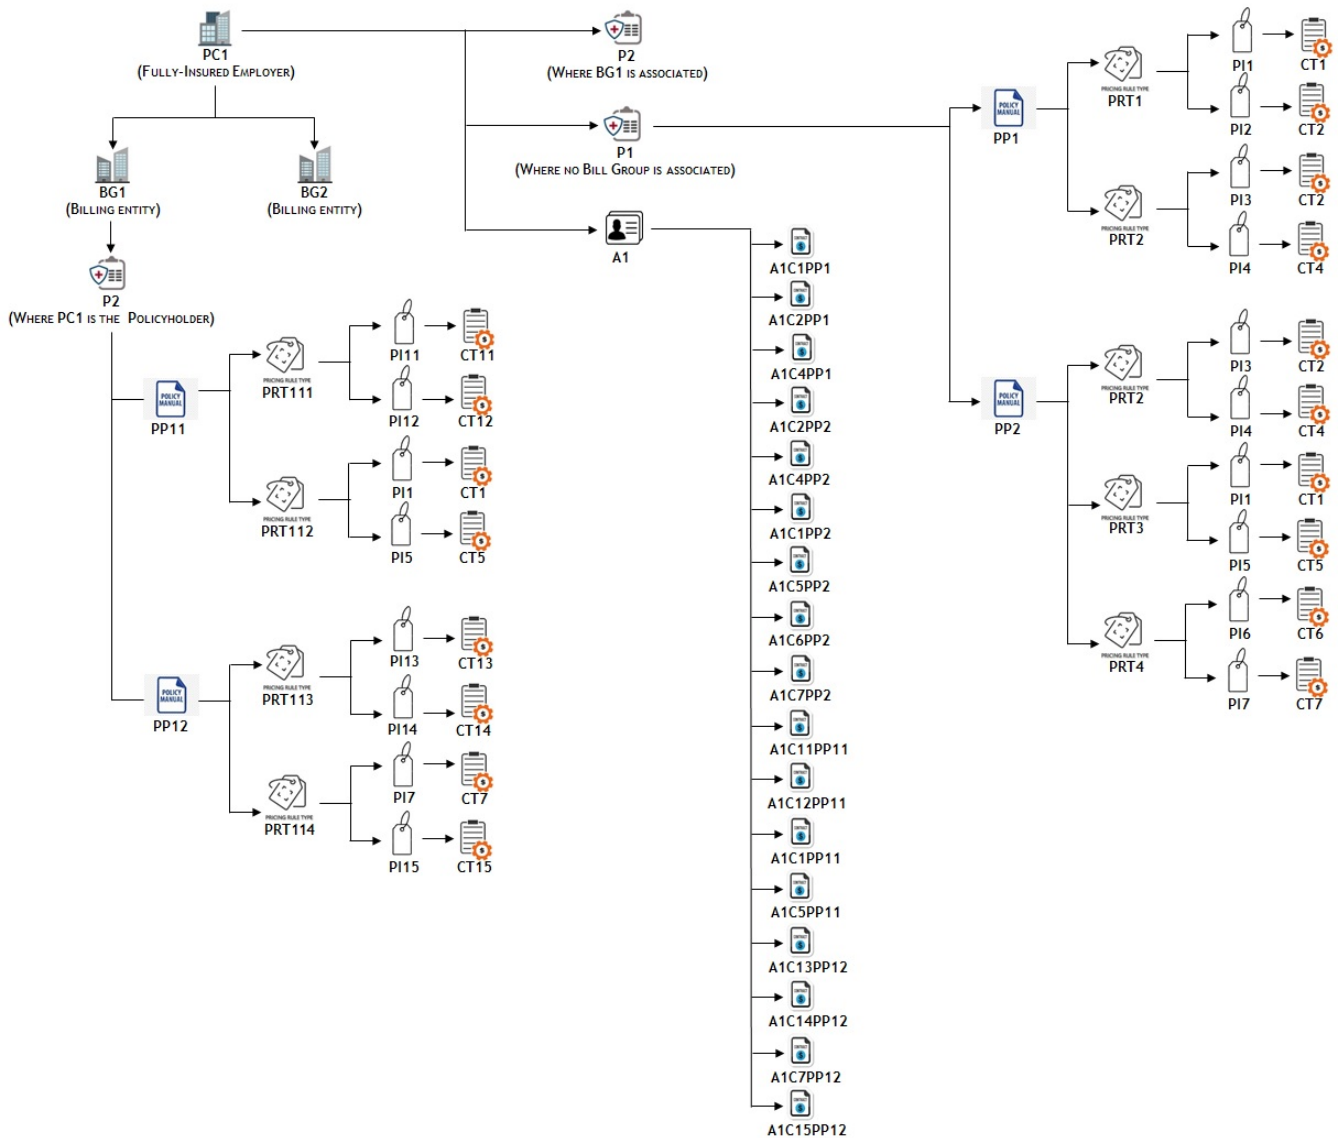

- P1 has two plans – PP1 and PP2
- P2 has two plans – PP11 and PP12
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 06-01-2019) is associated with PRT2, PRT3, and PRT4
- PP11 (with the start date as 05-01-2019) is associated with PRT111 and PRT112
- PP12 (with the start date as 09-01-2019) is associated with PRT113 and PRT114
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI4
- PRT3 contains two price items – PI1 and PI5
- PRT4 contains two price items – PI6 and PI7
- PRT111 contains two price items – PI11 and PI12
- PRT112 contains two price items – PI1 and PI5
- PRT113 contains two price items – PI13 and PI14
- PRT114 contains two price items – PI7 and PI15
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI7 is associated with the CT7 contract type, PI11 is associated with the CT11 contract type, PI12 is associated with the CT12 contract type, PI13 is associated with the CT13 contract type, PI14 is associated with the CT14 contract type, and PI15 is associated with the CT15 contract type

Now, in such case, the system will create the following contracts on the A1 account:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date	
A1	P1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019	
				PI2	CT2	A1C2PP1	01-01-2019	
			PRT2	PI3	CT2	A1C2PP1	01-01-2019	
				PI4	CT4	A1C4PP1	01-01-2019	
		PP2	PRT2	PI3	CT2	A1C2PP2	06-01-2019	
				PI4	CT4	A1C4PP2	06-01-2019	
			PRT3	PI1	CT1	A1C1PP2	06-01-2019	
				PI5	CT5	A1C5PP2	06-01-2019	
			PRT4	PI6	CT6	A1C6PP2	06-01-2019	
				PI7	CT7	A1C7PP2	06-01-2019	
		P2	PP11	PRT111	PI11	CT11	A1C11PP11	05-01-2019
					PI12	CT12	A1C12PP11	05-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
			PRT112	PI1	CT1	A1C1PP11	05-01-2019
				PI5	CT5	A1C5PP11	05-01-2019
		PP12	PRT113	PI13	CT13	A1C13PP12	09-01-2019
				PI14	CT14	A1C14PP12	09-01-2019
			PRT114	PI7	CT7	A1C7PP12	09-01-2019
				PI15	CT15	A1C15PP12	09-01-2019

The following figure graphically illustrates the example 3:

Example 4 — Plan-Specific Contract Creation for an Account of a Bill Group

If you create an account for a bill group who holds policies and its parent customer holds policies (where a bill group may or may not be associated), the system will create one plan-specific contract using each contract type for the bill group's polices and parent customer's polices (where a bill group is not associated) on the account. Let us assume...

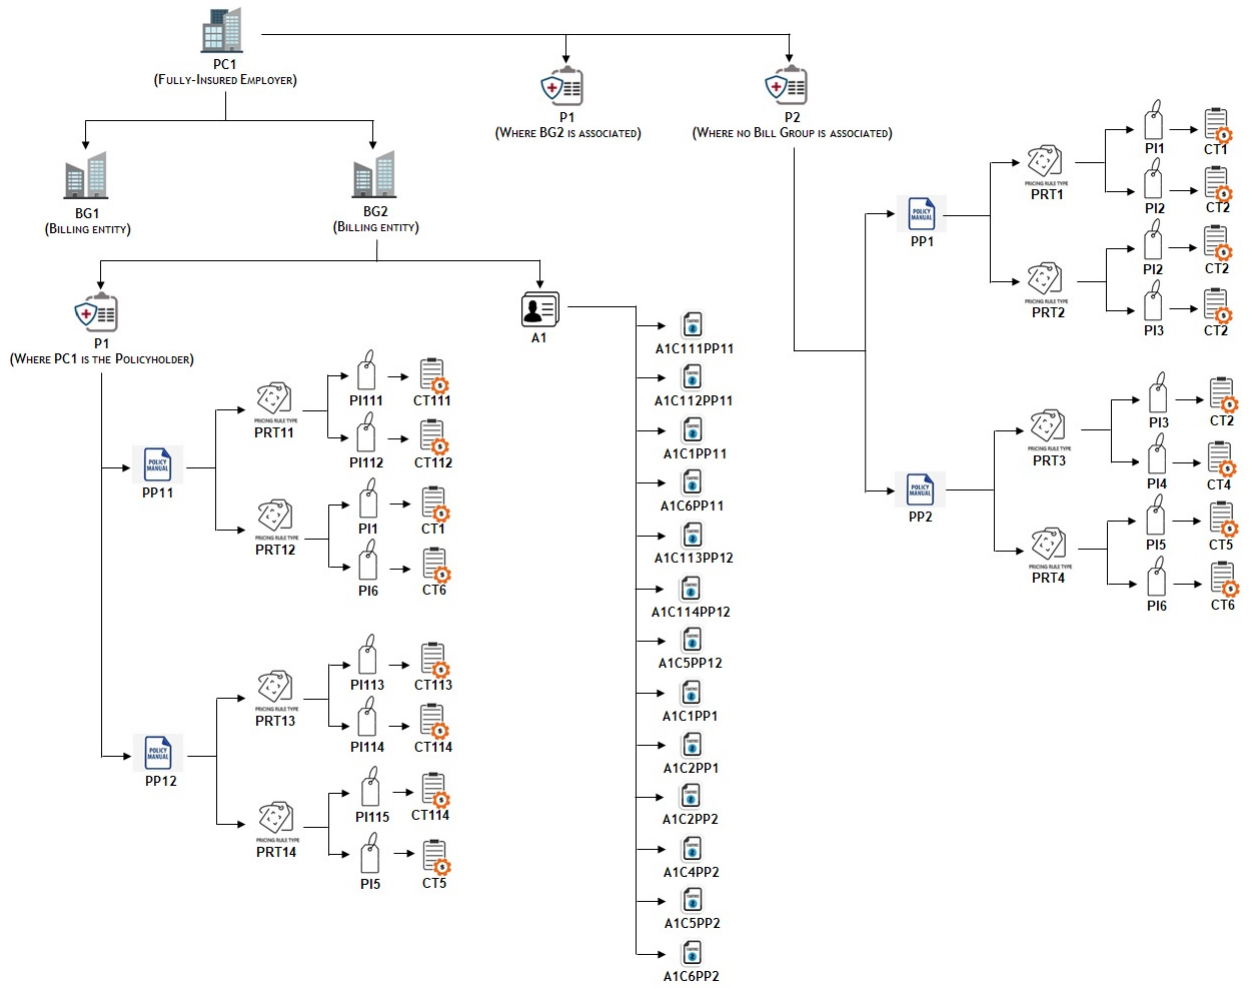

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P2 (where a bill group is not associated) and a policy named P1 (where BG2 is associated)
- BG2 has one policy named P1 where PC1 is the policy holder
- An account named A1 is added for BG2
- P1 has two plans – PP11 and PP12
- P2 has two plans – PP1 and PP2
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 04-01-2019) is associated with PRT3 and PRT4
- PP11 (with the start date as 07-01-2019) is associated with PRT11 and PRT12
- PP12 (with the start date as 11-01-2019) is associated with PRT13 and PRT14
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI2
- PRT3 contains two price items – PI3 and PI4
- PRT4 contains two price items – PI5 and PI6
- PRT11 contains two price items – PI111 and PI112
- PRT12 contains two price items – PI1 and PI6
- PRT13 contains two price items – PI113 and PI114
- PRT14 contains two price items – PI115 and PI5
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI111 is associated with the CT111 contract type, PI112 is associated with the CT112 contract type, PI113 is associated with the CT113 contract type, and PI114 and PI115 is associated with the CT114 contract type

Now, in such case, the system will create the following contracts on the A1 account:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	P1	PP11	PRT11	PI111	CT111	A1C111PP11	07-01-2019
				PI112	CT112	A1C112PP11	07-01-2019
			PRT12	PI1	CT1	A1C1PP11	07-01-2019
				PI6	CT6	A1C6PP11	07-01-2019
		PP12	PRT13	PI113	CT113	A1C113PP12	11-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
				PI114	CT114	A1C114PP12	11-01-2019
			PRT14	PI115	CT114	A1C114PP12	11-01-2019
				PI5	CT5	A1C5PP12	11-01-2019
	P2	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
				PI2	CT2	A1C2PP1	01-01-2019
			PRT2	PI2	CT2	A1C2PP1	01-01-2019
				PI3	CT2	A1C2PP1	01-01-2019
		PP2	PRT3	PI3	CT2	A1C2PP2	04-01-2019
				PI4	CT4	A1C4PP2	04-01-2019
			PRT4	PI5	CT5	A1C5PP2	04-01-2019
				PI6	CT6	A1C6PP2	04-01-2019

The following figure graphically illustrates the example 4:

Note: The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

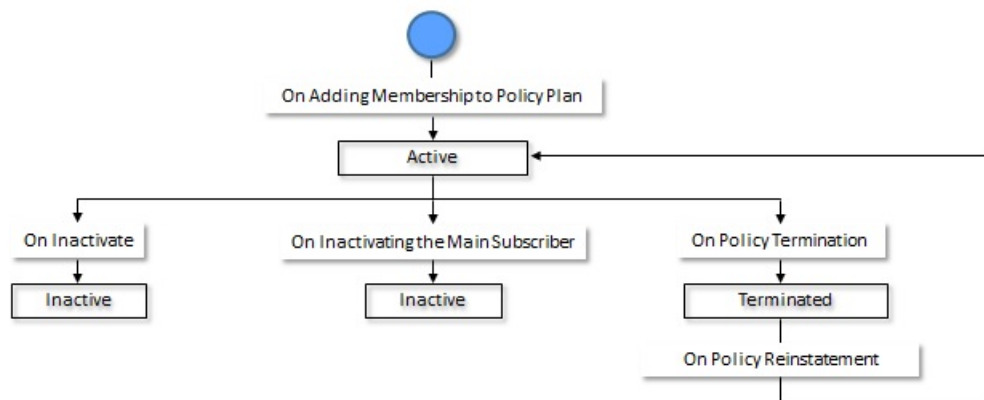

Fully-Insured Group Policy Status Transition

The following figure graphically indicates how a fully-insured group policy moves from one status to another in its lifecycle:

Membership Status Transition

The following figure graphically indicates how a membership moves from one status to another in its lifecycle:

Types of Policy Plan

Oracle Revenue Management and Billing enables you to create different types of plan for a fully-insured group policy:

- [Commercial Plans](#) on page 293
- [Medicare Affiliated Plans](#) on page 294

Commercial Plans

A commercial plan is a health insurance plan which is offered and administered by non-governmental entities (i.e. insurance companies). It can cover medical or dental expenses and disability income for the insured. Two of the most popular types of commercial health insurance plans are:

- **Preferred Provider Organization (PPO)** - A Preferred Provider Organization (PPO) is a medical care arrangement in which medical professionals and facilities provide services to subscribed clients at reduced rates.
- **Health Maintenance Organization (HMO)** - A Health Maintenance Organization (HMO) is an insurance structure that provides coverage through a network of physicians at a fixed annual fee.

A commercial health insurance plan can be offered to the individual or group customers. Usually, the insurance companies design special commercial health plans for fully-insured group customers and provide cost-effective health coverage for the employees and their family members (at an additional cost).

The system enables you to create and edit a policy plan from the user interface or through a health care inbound message. While creating a Commercial policy plan, you must set the benefit type to **Commercial**. While defining a Commercial policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received through a health care inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can associate the age based, tier based, pass-through billable charge, and/or additional charge pricing rule types with a Commercial policy plan. If you associate an age based pricing rule type with the policy plan, the system calculates the active employee coverage or COBRA membership premium for eligible members using the age based pricing rule type. If you associate a tier based pricing rule type with the policy plan, the system calculates the active employee coverage or COBRA membership premium using the tier based pricing rule type. The active employee coverage and COBRA membership premium are then charged through the SQI based billable charges. In case of an active employee coverage membership, the charge is billed to the bill group of the fully-insured group customer. However, in case of a COBRA membership, the charge is billed to either of the following depending on the billing arrangement which is defined for the COBRA membership:

- Bill Group of the Fully-Insured Group Customer
- TPA Person
- Financially Responsible Member Person

If you associate an additional charge pricing rule type (which is a related pricing rule type) with the policy plan, the system derives the flat or percentage based administration fee for the COBRA membership using the additional charge pricing rule type. This administration fee is charged along with the COBRA membership premium through an SQI based billable charge

If you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information of a health care inbound message, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer to the pass-through billable charge pricing rule type which is associated with the policy plan.

The system enables you to prorate the membership premium using the proration rules defined for the fully-insured group policy plan. A proration rule indicates how you want to prorate the membership premium on various events, such as enrollment, termination, etc. For more information, refer to [Premium Proration Rules](#) on page 3178.

Medicare Affiliated Plans

A Group Medicare Advantage plan, also known as Employer Group Waiver Plan (EGWP), is a type of Medicare Advantage plan offered by some employers to their retired or retiring employees. It may offer more benefits than traditional Medicare Advantage plans. EGWP are provided by private insurance companies who manage fully-insured large group customer's retiree Medicare benefits. The different parts of Medicare that EGWPs cover are:

- **Part A** - Medicare Part A insurance is the portion that pays for hospital costs, such as inpatient hospital care or rehabilitation facility care related to illness or injury.
- **Part B** - Medicare Part B is the Medicare portion that pays for doctor visits and related medical costs, including emergency care when you are not admitted.
- **Part D** - Medicare Part D is the prescription drug coverage portion of Medicare. Most prescription drug coverage plans involve different "tiers" of medications where you may pay little to no costs for generic medications and a greater portion of costs for name-brand medicines.

The system enables you to create and edit a policy plan from the user interface or through a health care inbound message. While creating a Medicare Affiliated policy plan, you must set the benefit type to **Medicare Affiliated**. While defining a Medicare Affiliated policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received through a health care inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can associate the age based, tier based, pass-through billable charge, and/or benefit pricing rule types with a Medicare Affiliated policy plan. If you associate an age based pricing rule type with the policy plan, the system calculates the Medicare premium for Part A, Part B, and/or Part D for eligible members using the age based pricing rule type. If you associate a tier based pricing rule type with the policy plan, the system calculates the Medicare membership premium for Part A, Part B, and Part D using the tier based pricing rule type. This membership premium is then charged through the SQI based billable charge. The charge is billed to either of the following depending on the billing arrangement which is defined for the Medicare membership:

- Bill Group of the Fully-Insured Group Customer
- Financially Responsible Member Person

The system considers the low income subsidy (LIS) and late enrollment penalty (LEP) while calculating the Medicare Part D premium. If you associate a benefit pricing rule type with the policy plan, the system determines the price items through which LIS and LEP should be charged.

If you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information of a health care inbound message, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer to the pass-through billable charge pricing rule type which is associated with the policy plan.

The system enables you to prorate the Medicare premium using the proration rules defined for the fully-insured group policy plan. A proration rule indicates how you want to prorate the membership premium on various events, such as enrollment, termination, etc. For more information, refer to [Premium Proration Rules](#) on page 3178.

Types of Membership

Oracle Revenue Management and Billing enables you to create different types of membership for a fully-insured group policy plan:

- [Active Employee Coverage Membership](#) on page 295

- [Medicare Membership](#) on page 296
- [COBRA Membership](#) on page 298
- [Retiree Membership](#) on page 300

Active Employee Coverage Membership

Oracle Revenue Management and Billing enables you to maintain an active employee coverage membership for the group insurance health plans and charge age based or tier based premium for the active employee coverage membership. An active employee coverage membership includes the employee or member of the organization who is covered under the group health insurance plan. Here, the covered employee or member is known as the main subscriber of the membership.

If the health insurance coverage is extended to the immediate family and/or other dependents of group members for an extra cost, the active employee coverage membership may include dependents who are related to the main subscriber. The system enables you to define various relationship types using which you can relate main subscriber and other dependent persons in a membership. You can define and edit relationship types through the **Contract Relationship Type** screen. The dependents can be members or non-members in an active employee coverage membership. The system calculates age based premium for both eligible members and non-members in an active employee coverage membership. If you select the **Skip Non-Members** option in the age based pricing rule type, the system will only consider the eligible members and not non-members of the active employee coverage membership during age based premium calculation.

The system enables you to create and edit an active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating an active employee coverage membership, you must not set the membership type of the membership (i.e. leave the **Membership Type** field blank). Ideally, you must define an active employee coverage membership on a Commercial policy plan. However, at present, the system does not validate whether an active employee coverage membership is defined only on a Commercial policy plan and not on a Medicare Affiliated policy plan.

You can create an active employee coverage membership when you specify the main subscriber of the membership. Ideally, the main subscriber and dependent persons should exist as persons in the system before creating the active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. The system enables you to create the main subscriber, dependent persons, and active employee coverage membership through the same health care inbound message or through the same membership repricing request. In such case, the system will first create the person records for the main subscriber and dependent persons and then create the active employee coverage membership.

On creating an active employee coverage membership, the status of the membership and main subscriber is set to **Active**. On adding a dependent person to a membership, the status of the dependent person is set to **Active**. You can inactivate an active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating the main subscriber of an active employee coverage membership, the system automatically inactivates the membership and all other member persons which are included in the membership. The status of the active employee coverage membership, main subscriber, and other member persons (if any) is set to **Inactive**. In addition, the system does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO_STATUS_CD** column corresponding to the record in the **C1_AUDIT_EVENT**, **C1_AUDIT_EVENT_LOG**, and **CI_PRCE_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_ENTITY_DTL** table is set

to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_REQ_DTL** table is set to **COMPLETE**.

You can also inactivate a member person, who is not the main subscriber of an active employee coverage membership, from the user interface, through a health care inbound message, or through the membership repricing inbound web service. On inactivating the member person, the status of the member person is set to **Inactive**.

On terminating a fully-insured group policy, the status of all active employee coverage memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all active employee coverage memberships on the respective policy plans is set to **Active**.

The system requires the following information to create charges for an active employee coverage membership:

- Whom to bill the active employee coverage membership charges
- Age based or tier based pricing rules using which the premium should be calculated for the active employee coverage membership
- Respective age based or tier based pricing rule type associated with the respective policy plan

The system supports the following billing arrangements for an active employee coverage membership:

- **Group Billing** – Here, an active employee coverage membership is billed to a bill group which is derived for the active employee coverage membership.
- **Direct Billing** – Here, an active employee coverage membership is billed to the member who is financially responsible for the active employee coverage membership.

You can indicate the billing arrangement for the active employee coverage memberships by defining a characteristic on the bill group or parent customer. The system searches for the characteristic which is specified in the **Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Bill Group
2. Parent Customer

Note: If the billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the active employee coverage membership premium to the bill group.

The system requires the bill group and its account to bill the active employee coverage memberships when the billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the active employee coverage membership when the billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the active employee coverage membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

Medicare Membership

Oracle Revenue Management and Billing enables you to maintain an employer sponsored group medicare membership (800 series plans) for a fully-insured large group customer and create age based or tier based premium charges for the Medicare Part A, Part B, and Part D. A Medicare beneficiary may qualify for a low income subsidy (LIS) for Medicare Part D or may incur late enrollment penalty (LEP) for Medicare Part D. In such case, the system enables you to consider the low income subsidy (LIS) and late enrollment penalty (LEP) while calculating the Medicare Part D premium.

The system enables you to create and edit a Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating a Medicare membership, you must set the membership type to **Medicare**. Ideally, you must define a Medicare membership on a Medicare Affiliated policy

plan. However, at present, the system does not validate whether a Medicare membership is defined only on a Medicare Affiliated policy plan and not on a Commercial policy plan.

You can create a Medicare membership when you specify the main subscriber of the membership. A Medicare membership should have only one member person who is covered for Medicare and who is financially responsible for the membership. Ideally, the main subscriber should exist as a person in the system before creating the Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. The system enables you to create the main subscriber and Medicare membership through the same health care inbound message or through the same membership repricing request. In such case, the system will first create the person record for the main subscriber and then create the Medicare membership.

On creating a Medicare membership, the status of the membership and main subscriber is set to **Active**. You can inactivate a Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating a Medicare membership, the system does the following:

- Set the status of the membership and main subscriber to **Inactive**
- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO_STATUS_CD** column corresponding to the record in the **C1_AUDIT_EVENT**, **C1_AUDIT_EVENT_LOG**, and **CI_PRCE_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_ENTITY_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_REQ_DTL** table is set to **COMPLETE**.

On terminating a fully-insured group policy, the status of all Medicare memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all Medicare memberships on the respective policy plans is set to **Active**.

The system enables you to maintain the Medicare benefits (such as, Part A, Part B, Part D, Part D LIS, and Part D LEP) of a member person through the **Benefit** screen. The system enables you to define and edit the Medicare benefits from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While defining a Medicare benefit of a member person for Part A, Part B, and Part D, you need to specify a Medicare plan benefit package (i.e. 800 series plan) which is applicable for the Medicare benefit. The system enables you to define and edit a Medicare plan benefit package through the **Field Mapping** screen. You can use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. While defining a Medicare benefit of a member person for Part D LIS and Part D LEP, you need to specify the benefit amount (i.e. subsidy or penalty amount).

While editing a Medicare benefit of a member person from the user interface, you can only edit the characteristics of the Medicare benefit. However, while editing a Medicare benefit of a member person through a health care inbound message or through the membership repricing inbound web service, you can edit the end date, benefit amount, and characteristics of the Medicare benefit. On editing a Medicare benefit, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

The system enables you to discard an active or inactive Medicare benefit from the user interface by clicking the **Discard** button. You can also discard an active or inactive Medicare benefit through a health care inbound message or through the membership repricing inbound web service by changing its status to **Discarded**.

The system requires the following information to create charges for a Medicare membership:

- Whom to bill the Medicare membership (i.e. billing arrangement details)

- Age based or tier based pricing rules using which the premium should be calculated for the Medicare Part A, Part B, and Part D.
- Respective age based, tier based, and benefit pricing rule types associated with the respective policy plan

The system supports the following billing arrangements for a Medicare membership:

- **Group Billing** – Here, a Medicare benefit is billed to a bill group which is derived for the Medicare membership.
- **Direct Billing** – Here, a Medicare benefit is billed to a member person who is financially responsible for the Medicare membership.

You can indicate the billing arrangement for the Medicare memberships by defining a characteristic on the policy plan, policy, or parent customer. The system searches for the characteristic which is specified in the **Benefit Billing Arrangement** option type of the **C1-ASOBLLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

Note: If the benefit billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the Medicare membership premium to the bill group.

The system requires the bill group and its account to bill the Medicare memberships when the benefit billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the Medicare membership when the benefit billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the Medicare membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

COBRA Membership

Oracle Revenue Management and Billing enables you to maintain a COBRA membership and charge age based or tier based premium and administration fee for the COBRA membership. In COBRA membership, an employer provides temporary continuation of group health coverage in certain situations where it would otherwise be terminated. This may include situations, such as:

- Death of the covered employee
- Reduction in the hours or termination of the covered employee's employment
- Covered employee becoming entitled for Medicare
- Divorce or legal separation from the covered employee
- A dependent child ceasing to be a dependent in an active employee coverage membership

The system enables you to create and edit a COBRA membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating a COBRA membership, you must set the membership type to **COBRA**. Ideally, you must define a COBRA membership on a Commercial policy plan. However, at present, the system does not validate whether a COBRA membership is defined only on a Commercial policy plan and not on a Medicare Affiliated policy plan.

Through a health care inbound message, the system must receive the end date of the active employee coverage membership along with the details of the COBRA membership. You can create a COBRA membership when you specify the main subscriber of the membership. Here, the main subscriber can be an employee or member of the organization or a family member who is covered through the COBRA membership. In a COBRA membership, you need to specify

the member person who is financially responsible for the COBRA membership. Note that, at a time, only one member person can be financially responsible for the COBRA membership.

On creating a COBRA membership, the status of the membership and main subscriber is set to **Active**. On adding a dependent person to a membership, the status of the dependent person is set to **Active**. You can inactivate a COBRA membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating the main subscriber of a COBRA membership, the system automatically inactivates the membership and all other member persons which are included in the membership. The status of the COBRA membership, main subscriber, and other member persons (if any) is set to **Inactive**. In addition, the system does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO_STATUS_CD** column corresponding to the record in the **C1_AUDIT_EVENT**, **C1_AUDIT_EVENT_LOG**, and **CI_PRCE_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_ENTITY_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_REQ_DTL** table is set to **COMPLETE**.

You can also inactivate a member person, who is not the main subscriber of a COBRA membership, from the user interface, through a health care inbound message, or through the membership repricing inbound web service. On inactivating a member person, the status of the member person is set to **Inactive**.

On terminating a fully-insured group policy, the status of all COBRA memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all COBRA memberships on the respective policy plans is set to **Active**.

The system requires the following information to create charges for a COBRA membership:

- Whom to bill the COBRA membership (i.e. billing arrangement details)
- Age based or tier based pricing rules using which the premium should be calculated for the COBRA membership
- Respective age based or tier based pricing rule type associated with the respective policy plan
- Additional charge pricing rule using which the administration fee should be calculated for the COBRA membership
- Respective additional charge pricing rule type associated with the respective policy plan

The system supports the following billing arrangements for a COBRA membership:

- **Group Billing** – Here, a COBRA membership is billed to a bill group which is derived for the COBRA membership.
- **TPA Billing** – Here, a COBRA membership is billed to the third party administrator (i.e. TPA person).
- **Direct Billing** – Here, a COBRA membership is billed to the member who is financially responsible for the COBRA membership.

You can indicate the billing arrangement for the COBRA memberships by defining a characteristic on the policy plan, policy, or parent customer. The system searches for the characteristic which is specified in the **Cobra Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy

3. Parent Customer

Note: If the Cobra billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the COBRA membership premium to the bill group.

The system requires the bill group and its account to bill the COBRA memberships when the COBRA billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the third party administrator (i.e. TPA person) and its account to bill the COBRA memberships when the COBRA billing arrangement is set to **TPA Billing**. You can create a third party administrator (i.e. TPA person) and its accounts through a health care inbound message. While sending the details of a TPA person through an inbound message, you must specify the parent of the TPA person and its account details. The system associates the parent customer with the TPA person using the relationship type which is specified in the **TPA Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. If the person type specified in the health care inbound message matches the person type specified in the **TPA Person Type** option type of the **C1-PERSTYPE** feature configuration, the system creates or updates the TPA person and its account through a customer registration object. However, if the person type specified in the health care inbound message does not match the person type specified in the **TPA Person Type** option type of the **C1-PERSTYPE** feature configuration, the system creates or updates the TPA person and its accounts directly and not through a customer registration object.

The system associates the TPA person with the TPA account using the relationship type which is specified in the **TPA Account Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. On creating an account for a TPA person, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the COBRA membership when the COBRA billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the COBRA membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

Retiree Membership

An employer may offer a retirement health plan coverage to its retired employees through a fully-insured group policy or an individual can independently opt for a government sponsored retirement health plan coverage. Oracle Revenue Management and Billing enables you to maintain a retiree membership for both the fully-insured group and individual business. The system enables you to maintain a flat or percentage based contribution of employer or sponsor for a retiree membership.

The system enables you to create and edit a retiree membership through a health care inbound message or through membership repricing inbound web service. While creating a retiree membership, the membership type must be set to **Retiree**. The system requires the following information to create charges for a retiree membership:

- Whom to bill the premium for the retiree membership (i.e. retiree billing arrangement details)
- Whom to bill the employer or sponsor contribution (i.e. sponsor billing arrangement details)
- Age based or tier based pricing rule using which the premium should be calculated for the retiree membership
- Discount charge pricing rule using which the employer or sponsor contribution should be calculated for the retiree membership

In case of the fully-insured individual business, the premium for a retiree membership is billed to the member who is financially responsible for the retiree membership. However, in case of the fully-insured group business, the system supports the following billing arrangements for the retiree membership:

- **Group Billing** – Here, the premium is billed to a bill group which is derived for the retiree membership.
- **TPA Billing** – Here, the premium is billed to the third party administrator (i.e. TPA person).
- **Direct Billing** – Here, the premium is billed to the member who is financially responsible for the retiree membership.

You can indicate the billing arrangement for a retiree membership in the fully-insured group business by defining a characteristic on the policy plan, policy, or parent customer. The system searches for the characteristic which is specified in the **Retiree Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

The system enables you to maintain a flat or percentage based contribution of employer or sponsor through a discount charge pricing rule. A field named **Sponsored** is available in the **Price Items** section while defining or editing a discount charge pricing rule type. If the **Sponsored** option is selected for a price item, the system creates and bills the charge for the price item as per the sponsor billing arrangement. The system searches for the characteristic which is specified in the **Sponsors Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

In the fully-insured group and individual business, the system supports the following sponsor billing arrangements for the retiree membership:

- **Group Billing** – Here, the system creates a negative charge for the employer or sponsor contribution against the beneficiary account and a positive charge for the employer or sponsor contribution against the sponsor account.
- **TPA Billing** – Here, the system creates a negative charge for the employer or sponsor contribution against the beneficiary account and a positive charge for the employer or sponsor contribution against the sponsor account.
- **Direct Billing** – Here, the system creates a memo only charge for the employer or sponsor contribution against the beneficiary account. A bill message code is derived from the **Retiree Bill Message Code** option type of the **C1-ASOBLNG** feature configuration and stamped against the beneficiary account.

In case of the group and TPA billing, the system derives the characteristic types which are specified in the **Sponsor Account Identifier Type Char Type** and **Sponsor Account Identifier Value Char Type** option types of the **C1-ASOBLNG** feature configuration. The system then checks whether these characteristics are defined on any of the following entity in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

If these characteristics are defined on any of the above entity, the system derives the sponsor account for the bill group. The system then bills the employer or sponsor contribution charges to the sponsor account.

However, if the **Sponsored** option is not selected for a price item in a discount charge pricing rule type, the system creates and bills the charge for the price item as per the retiree billing arrangement.

Algorithms Used in C1-POLICY

The following table lists the algorithms which are attached to the **C1-POLICY** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1- REAUDEVNT	C1-REAUDEVNT	Refer to C1-REAUDEVNT on page 302.
Validation	C1- POLBOVAL	C1-POLBOVAL	Refer to C1-POLBOVAL on page 303.

The following table lists the algorithms which are used in the lifecycle of the **C1-POLICY** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Pending	Monitor	C1-TRNDFLSYS	C1-TRNDFLSYS	Refer to C1-TRNDFLSYS on page 304.
Activate	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1626.
In Force/ Active	Enter	C1-EVCSTSTAT	C1-EVCSTSTAT	Refer to C1-EVCSTSTAT on page 304.
Pending Termination	Enter	C1-PLCYTRMRQ	C1-PLCYTRMRQ	Refer to C1-PLCYTRMRQ on page 304.
Terminated	Enter	C1-POLCYTERM	C1-POLCYTERM	Refer to C1-POLCYTERM on page 305.
	Enter	C1-DELTRMLTR	C1-CRTCUSCNT	Refer to C1-DELTRMLTR on page 305.
	Enter	C1-EVCSTSTAT	C1-EVCSTSTAT	Refer to C1-EVCSTSTAT on page 304.
Pending Reinstatement	Enter	C1-PLCYREIRQ	C1-PLCYREIRQ	Refer to C1-PLCYREIRQ on page 306.
Reinstated	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1626.
	Enter	C1-POLCYREIN	C1-POLCYREIN	Refer to C1-POLCYREIN on page 306.
	Enter	C1-CCPOLREI	C1-CRTCUSCNT	Refer to C1-CCPOLREI on page 307.
Renewed	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1626.
Pending Cancellation	-	-	-	-
Canceled	-	-	-	-

C1-READEVNT

If this algorithm is attached to the **Audit** system event of a business object, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event while:

- Defining an entity when the **Add Action** option is selected in the audit event type.
- Editing an entity when the **Update All** option is selected in the audit event type or when the updated element is listed in the **Audit Elements for Entity Update** section.

- Deleting an entity when the **Delete Action** option is selected in the audit event type.

The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1_AUDIT_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the **C1_AUDIT_EVENT** table. Note that if the entity has a start date, then the effective date is set to the entity's start date. But, if the entity does not have a start date, then the effective date is set to the system date.

Note: Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event

At present, this algorithm is designed to work with the business objects of the following maintenance objects:

- C1-POLICY
- C1-ASOPolicy
- C1-Membership
- C1-PolicyPlan
- C1_PERSON_BO
- C1-PricingRuleTierBased
- C1-PricingRuleAgeBased

In case, you want to create audit event for any other maintenance objects, you need to create a custom algorithm type.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

C1-POLBOVAL

This algorithm validates a fully-insured group policy throughout its lifecycle. It checks the following:

- Whether the policy end date is not earlier than the policy start date.
- Whether the policy person end date is not earlier than the policy person start date.
- Whether the policy person start date is not earlier than the policy start date or later than policy end date.
- Whether the policy person end date is not earlier than the policy start date or later than policy end date.

Note: The above validation is done when the policy is transition to the status which is not specified in the **Skip Status for Policy Person End Date Validation** parameter. For example, if you set the **Skip Status for Policy Person End Date Validation** parameter to **TERMINATED**, the system will not perform the above validation when the status of the policy is changed to **Terminated**.

- Whether the person who is the main customer is associated with the policy.
- Whether the policy person role is specified while associating a person with the policy.

It contains the following parameter:

- **Skip Status for Policy Person End Date Validation** – Used to specify the policy status in which you do not want to validate the policy person end date. You can specify comma-separated values for this parameter.

C1-TRNDFLSYS

This algorithm checks whether the fully-insured group policy is created from the user interface or through an inbound message. If a fully-insured group policy is created through an inbound message, the system will automatically transition the fully-insured group policy to the default next status specified in its lifecycle.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

Note: At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-EVCSTSTAT

This algorithm updates the **Customer Status** characteristic of the main customer of the policy. This characteristic indicates whether the customer is active or inactive. If the customer owns at least one active policy, the customer status is set to **Active**. However, if the customer does not own any active policy, the customer status is set to **Inactive**.

It is invoked while activating or terminating a fully-insured group policy. It contains the following parameters:

- **Customer Status Characteristic Type** – Used to specify the characteristic type whose value should be updated whenever the policy is activated or terminated. You must specify a characteristic type where the characteristic entity is set to **Person**.
- **Active Customer Status Characteristic Value** – Used to specify the characteristic value which should be used when the main customer owns at least one active policy.
- **Inactive Customer Status Characteristic Value** – Used to specify the characteristic value which should be used when the main customer does not own any active policy (in other words, when all policies of the main customer are terminated).
- **Policy Active Status** – Used to specify the status in which at least one policy should exist to indicate that the main customer is active.

All the above parameters are mandatory.

C1-PLCYTRMRQ

This algorithm creates an outbound message using the outbound message type whenever you initiate the policy termination process from the user interface. While creating the outbound message, the system identifies the account using the characteristic type specified in the **Main Customer Characteristic Type** parameter. The system checks whether this characteristic type is set to the main customer's ID on any account. If so, the system considers the account and then fetches the value of the account identifier type specified in the **Account Identifier Type** parameter.

In addition, it stores the details of the outbound message (which is created) in the log of the policy. It contains the following parameters:

- **Outbound Message Type** – Used to specify the outbound message type using which you want to create the outbound message. You must specify an outbound message type which is already defined in the system.
- **Source System** – Used to specify the source system that you want to use in the outbound message. You must specify a source system which is already defined in the **C1-SourceSystemLookup** extendable lookup.

- **Account Identifier Type** – Used to specify the account identifier type whose value you want to use in the outbound message. You must specify an account identifier type which is already defined in the system.
- **Main Customer Characteristic Type** – Used to specify the characteristic type using which you want to identify the account of the main customer. You must specify a characteristic type where the characteristic entity is set to **Person**.

All the above parameters are mandatory.

C1-POLCYTERM

This algorithm sets the end date of the following entities to the termination date when the respective condition is met:

- Policy (when the termination date is not earlier than the policy start date or later than the policy end date)
- Policy Person (when the termination date falls within the date range in which the person is associated with the policy)
- Policy Plan (when the termination date falls within the date range of the policy plan)
- Membership (when the termination date falls within the date range of the membership)
- Member Person (when the termination date falls within the date range in which the person is added to the membership)
- Contracts Associated with the Membership (when the termination date falls within the date range of the contract)

It contains the following parameters:

- **Membership Old Status** – Used to specify the status from which you want to transition the membership when the policy is terminated.
- **Membership New Status** – Used to specify the status to which you want to transition the membership when the policy is terminated.

C1-DELTRMLTR

This algorithm creates a customer contact whenever the policy is transition to the status where it is attached. For example, if this algorithm is attached to the **TERMINATED** status, it creates a customer contact whenever the policy is terminated. You can create a customer contact while terminating a policy. Optionally, you can configure the algorithm such that a customer contact is created when a particular status reason is specified while terminating a policy.

Once a customer contact is created, the policy for which the customer contact is created is stored as a characteristic on the customer contact. In addition, the customer contact which is created for the policy is stored as a characteristic in the log of the policy.

It contains the following parameters:

- **Check Policy Status Reason** – Used when you want to create a customer contact when the policy is terminated for a particular reason. The valid values are:
 - **Y** – Used to indicate that the system should create a customer contact when a particular status reason is specified while terminating a policy.
 - **N** – Used to indicate that the system should create a customer contact while terminating a policy irrespective of the status reason.
- **Policy Status Reason Codes** – Used to specify the status reason defined for the **TERMINATED** status. You can specify comma-separated values for this parameter.
- **Customer Contact Class** – Used to specify the customer contact class using which you want to create the customer contact. This field is mandatory.
- **Customer Contact Type** – Used to specify the customer contact type using which you want to create the customer contact. This field is mandatory.

- **Consolidate Customer Contact** – Used to indicate whether the system should update the existing customer contact or create a new customer contact for the main customer of the policy. The valid values are:
 - **Y** – If this parameter is set to **Y**, the system checks whether a customer contact is already created for the main customer of the policy on the system date. If so, the system does not create a new customer contact. Instead, it updates the existing customer contact of the main customer of the policy. However, if the customer contact is not already created on the system date, the system creates a new customer contact for the main customer of the policy.
 - **N** – If this parameter is set to **N**, the system creates a new customer contact for the main customer of the policy and does not update the existing customer contact, if any.

Note: If you do not specify the value for this parameter, by default, it is set to **N**.

- **Policy ID Characteristic Type** – Used to specify the characteristic type which you want to define for the customer contact. This characteristic indicates the policy for which the customer contact is created. You must specify a characteristic type where the characteristic entity is set to **Customer Contact**. This field is mandatory.
- **Customer Contact Characteristic Type** – Used to specify the characteristic type which you want to use in the log of the policy. This characteristic indicates the customer contact which is created for the policy. You must specify a characteristic type where the characteristic entity is set to **Policy**. This field is mandatory.
- **Status To Skip Process** – Used when you do not want to create the customer contact when the policy is transition to a particular status. You can specify comma-separated values for this parameter.

C1-PLCYREIRQ

This algorithm creates an outbound message using the outbound message type whenever you initiate the policy reinstatement process from the user interface. In addition, it stores the details of the outbound message (which is created) in the log of the policy.

It contains the following parameters:

- **Outbound Message Type** – Used to specify the outbound message type using which you want to create the outbound message. You must specify an outbound message type which is already defined in the system.
- **Source System** – Used to specify the source system that you want to use in the outbound message. You must specify a source system which is already defined in the **C1-SourceSystemLookup** extendable lookup.

All the above parameters are mandatory.

C1-POLCYREIN

This algorithm updates the end date of the following entities to the respective original end date:

- Policy
- Policy Person
- Policy Plan
- Membership
- Member Person
- Contracts Associated with the Membership

Note: The system stores the original end date of the above listed entities when you define or edit a policy, policy plan, or membership.

Here, the assumption is that the pass-through billable charges information for the membership will be sent again through an inbound message along with the reinstatement reason. And, therefore the exiting billable charges will not be extended.

It contains the following parameters:

- **Membership Old Status** – Used to specify the status from which you want to transition the membership when the policy is reinstated.
- **Membership New Status** – Used to specify the status to which you want to transition the membership when the policy is reinstated. This field is mandatory.

C1-CCPOLRE1

This algorithm creates a customer contact whenever the policy is transition to the status where it is attached. For example, if this algorithm is attached to the **REINSTATE** status, it creates a customer contact whenever the policy is reinstated. You can create a customer contact while reinstating a policy. Optionally, you can configure the algorithm such that a customer contact is created when a particular status reason is specified while reinstating a policy.

Once a customer contact is created, the policy for which the customer contact is created is stored as a characteristic on the customer contact. In addition, the customer contact which is created for the policy is stored as a characteristic in the log of the policy.

It contains the following parameters:

- **Check Policy Status Reason** – Used when you want to create a customer contact when the policy is reinstated for a particular reason. The valid values are:
 - **Y** – Used to indicate that the system should create a customer contact when a particular status reason is specified while reinstating a policy.
 - **N** – Used to indicate that the system should create a customer contact while reinstating a policy irrespective of the status reason.
- **Policy Status Reason Codes** – Used to specify the status reason defined for the **REINSTATE** status. You can specify comma-separated values for this parameter.
- **Customer Contact Class** – Used to specify the customer contact class using which you want to create the customer contact. This field is mandatory.
- **Customer Contact Type** – Used to specify the customer contact type using which you want to create the customer contact. This field is mandatory.
- **Consolidate Customer Contact** – Used to indicate whether the system should update the existing customer contact or create a new customer contact for the main customer of the policy. The valid values are:
 - **Y** – If this parameter is set to **Y**, the system checks whether a customer contact is already created for the main customer of the policy on the system date. If so, the system does not create a new customer contact. Instead, it updates the existing customer contact of the main customer of the policy. However, if the customer contact is not already created on the system date, the system creates a new customer contact for the main customer of the policy.
 - **N** – If this parameter is set to **N**, the system creates a new customer contact for the main customer of the policy and does not update the existing customer contact, if any.

Note: If you do not specify the value for this parameter, by default, it is set to **N**.

- **Policy ID Characteristic Type** – Used to specify the characteristic type which you want to define for the customer contact. This characteristic indicates the policy for which the customer contact is created. You must specify a characteristic type where the characteristic entity is set to **Customer Contact**. This field is mandatory.
- **Customer Contact Characteristic Type** – Used to specify the characteristic type which you want to use in the log of the policy. This characteristic indicates the customer contact which is created for the policy. You must specify a characteristic type where the characteristic entity is set to **Policy**. This field is mandatory.
- **Status To Skip Process** – Used when you do not want to create the customer contact when the policy is transition to a particular status. You can specify comma-separated values for this parameter.

Algorithms Used in C1-PolicyPlan

The following table lists the algorithms which are attached to the **C1-PolicyPlan** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-PPCONCRE	C1-PPCONCRE	Refer to C1-PPCONCRE on page 308.
Validation	C1-VALPPBO	C1-VALPPBO	Refer to C1-VALPPBO on page 308.

C1-PPCONCRE

This algorithm is invoked when you create or edit a policy plan from the user interface or through an inbound message. It creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates a contract using a distinct contract type which is associated with each price item.

Let us assume that PRT1 is associated with the policy plan and it contains three price items – P1, P2, and P3. Now, if the P1 is associated with the CT1 contract type, P2 is associated with the CT2 contract type, and P3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the P1 and P3 are associated with the CT1 contract type and P2 is associated with the CT2 contract type, the system will create two distinct contracts - C1 using CT1 and C2 using CT2.

If multiple pricing rule types are associated with the policy plan and each pricing rule type contains multiple price items, it creates a contract using a distinct contract type which is associated with each price item on each pricing rule type.

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one contract using each contract type on each account of the parent customer and bill groups. If a policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one contract using each contract type on each account of the parent customer and the bill group.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with the same or different price items on the same or different pricing rule types of different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

Note:

The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

If the same contract type is associated with the same or different price items on the same or different pricing rule types of different plans on different policies, the contract start date is set to the start date of the earliest plan across policies.

C1-VALPPBO

This algorithm validates a policy plan. It checks the following:

- Whether the policy plan end date is not earlier than the policy plan start date.
- Whether the policy plan start date is not earlier than the policy start date or later than policy end date.

- Whether the policy plan end date is not earlier than the policy start date or later than policy end date.
- Whether the price item or at least one pricing rule type is associated with the policy plan.

Algorithms Used in C1-Membership

The following table lists the algorithms which are attached to the **C1-Membership** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-FIAUDEV	C1-FIAUDEV	Refer to C1-FIAUDEV on page 155.
Post-Processing	C1-RTAREAMEM	C1-RTAREAMEM	Refer to C1-RTAREAMEM on page 310
Post-Processing	C1-MEMRLSUBT	C1-MEMRLSUBT	Refer to C1-MEMRLSUBT on page 311
Post-Processing	C1-MPCONCREA	C1-MPCONCREA	Refer to C1-MPCONCREA on page 312
Pre-Processing	C1-MEMSTPRE	C1-MEMSTPRE	Refer to C1-MEMSTPRE on page 312.
Validation	C1-VALMEMBO	C1-VALMEMBO	Refer to C1-VALMEMBO on page 312.

The following table lists the algorithms which are used in the lifecycle of the **C1-Membership** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Active	-	-	-	-
Inactive	Enter	C1-MEMINACT	C1-MEMINACT	Refer to C1-MEMINACT on page 313.
Terminated	-	-	-	-

C1-FIAUDEV

If this algorithm is attached to the **Audit** system event of the **C1-Membership**, **C1-Benefits**, and **C1_PERSON_BO** business objects, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event whenever a membership is added to a policy plan, member person is added to a membership, and a Medicare benefit is defined for a member person. It also creates the audit event whenever the membership, member person, and Medicare benefit details are updated. However, note that the audit events are created in the update scenario when the element listed for auditing in the age based, tier based, or benefit pricing rule type is updated. The system considers only those pricing rule types whose pricing rules are effective during the respective entity (i.e. membership, member person, or Medicare benefit whichever is updated) date range.

It creates one or more audit events in the **Pending** status. The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1_AUDIT_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the **C1_AUDIT_EVENT** table.

Note:

The system creates an audit event whenever the membership start and end dates and member person's start and end dates are changed in the system irrespective of whether these fields are listed for auditing or not in the age based or tier based pricing rule types.

Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event.

For each audit event, this algorithm derives the memberships on the policy plans which are impacted and the pricing rule types whose pricing rules are defined on the respective policy plans. A repricing entity detail record is then created

for each membership, pricing rule type, and effective date combination in the **CI_REPRC_ENTITY_DTL** table. The status of the repricing entity detail record is set to **P**. Once the repricing entity detail records are created successfully, the status of the audit event is changed to **Complete**.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

C1-RTAREAMEM

This algorithm derives the geographic rating area for a membership using the **Address Source** and **Address Type** characteristic types. It supports two address sources named **Policy Holder** and **Main Subscriber** and three address types named **Person Mailing**, **Person Seasonal**, and **Account Override**.

On adding a membership to a policy plan, this algorithm derives the characteristic types from the **Address Source Characteristic Type** and **Address Type Characteristic Type** attributes of a geographic rating area preference. This algorithm considers the geographic rating area preference which is specified in the **Rating Area Field Mapping for Group** option type of the **C1-ASOBLNG** feature configuration. Then, it searches for these characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy
4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, this algorithm derives the default address source and address type from the geographic rating area preference. If the address source is set to **Policy Holder**, this algorithm fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration. It then derives the person who is associated with the policy using the parent customer policy person role. Once the address source and address type are derived, this algorithm fetches the state and zip code from the address type of the address source. For example, if the address source is set to **Policy Holder** and address type is set to **Person Mailing**, this algorithm fetches the state and zip code from the policy holder's mailing address. Once the state and zip code are fetched from the address, this algorithm checks whether the zip code is a 9-digit code. If not, it appends zeros to make it a 9-digit zip code. It then derives the value of the **Use Plan Details** attribute from the geographic rating area preference. If the attribute is set to **Y**, this algorithm derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination. However, if the attribute is set to **N**, this algorithm derives a geographic rating area for the state and zip code combination. If the geographic rating area is not

derived for the specified combination, this algorithm derives the default geographic rating area from the geographic rating area preference. Once the geographic rating area is derived, this algorithm stores the geographic rating area for the membership. The characteristic type specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference is used to store geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

C1-MEMRLSUBT

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, this algorithm derives the member relationship for each member person of the membership from a member relationship structure. It considers the member relationship structure which is defined as a characteristic for the policy plan. While deriving the member relationship structure of the policy plan, it considers the characteristic which is defined using a characteristic type specified in the **Member Relationship Structure Characteristic Type** attribute of a member relationship and subscription tier preference. It considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLNG** feature configuration.

The member relationship structure helps to determine how each member person is related to the main subscriber of the membership. A member relationship is derived for a member person depending on the following:

- Whether the member person is a self, spouse, or dependent
- Number of spouses, dependents, and young adults in the membership

While determining the member relationship for a member person, this algorithm derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- Member Relationship Derivation Date
- New Born Gift Days
- New Born Gift Days Applicability
- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

It then derives these characteristics from the policy plan. Based on these characteristics defined for the policy plan, it derives the member relationship for each member person from the member relationship structure. If the **Member Relationship Derivation Date** characteristic type is set to **Enrollment Date**, this algorithm derives the member relationship for each member person of the membership in order of the member start date. However, if the **Member Relationship Derivation Date** characteristic type is set to **Date of Birth**, this algorithm derives the member relationship for each member person of the membership in order of the date of birth.

Once the member relationship is derived for a member person, this algorithm stores the member relationship for the member person. The characteristic type specified in the **Member Relationship Characteristic Type** attribute of the member relationship and subscription tier preference is used to store member relationship for the member person. On adding a membership to a policy plan or on adding a member person to a membership, the effective date of the member relationship characteristic is set to the member person's start date. If a new born is added to the membership, the effective date of the new born's member relationship characteristic is calculated considering the gift days if applicable.

If a member person is end dated, this algorithm derives the member relationship of all other member persons once again. If the member relationship for a member person is different, it creates a new characteristic to store the member relationship for the member person. The effective date of the new characteristic is set to the member person's end date + 1. For example, if the end date of a member person is set to 06-30-2021, then the effective date of the new characteristic for the remaining member persons is set to 07-01-2021. Similarly, if a member person is inactivated, this algorithm derives the member relationship of all other member persons once again. In this case, if the member relationship for a

member person is different, it updates the existing member relationship characteristic of the member person and does not create a new member relationship characteristic for the member person.

C1-MPCONCREA

This algorithm is invoked when the following conditions are met:

- A member person who is financially responsible for the membership is added to the membership
- One or more accounts already exist for the member person in the system

If the above conditions are met, this algorithm derives the membership in which the member person is added. It then derives the policy plan to which the membership belongs. It creates contracts for each account of the member person in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates a contract using a distinct contract type which is associated with each price item.

Let us assume that PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, this algorithm will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, this algorithm will create two distinct contracts - C1 using CT1 and C2 using CT2.

If multiple pricing rule types are associated with the policy plan and each pricing rule type contains multiple price items, it creates a contract using a distinct contract type which is associated with each price item on each pricing rule type.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

Note:

The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

C1-MEMSTPRE

Once the status of the main subscriber is changed to **Inactive**, this algorithm changes the status of the membership to the value specified in the **Membership Inactive Status** option type of the **C1-ASOBLNG** feature configuration. In addition, it does not allow you to add a member person in the **Inactive** status to a membership.

C1-VALMEMBO

This algorithm validates a membership. It checks the following:

- Whether the membership end date is not earlier than the membership start date.
- Whether the membership start date is not earlier than the policy plan start date or later than policy plan end date.
- Whether the membership end date is not earlier than the policy plan start date or later than policy plan end date.
- Whether the policy plan for which you want to define the membership is specified.
- Whether the person who is the main subscriber is added to the membership.
- Whether the relationship type is specified while adding a person to the membership.

C1-MEMINACT

This algorithm changes the status of the member person to the value specified in the **Membership Person Inactive Status** option type of the **C1-ASOBLLNG** feature configuration. It also does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO_STATUS_CD** column corresponding to the record in the **C1_AUDIT_EVENT**, **C1_AUDIT_EVENT_LOG**, and **CI_PRCE_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_ENTITY_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_REQ_DTL** table is set to **COMPLETE**.

Late Setup Notification

Oracle Revenue Management and Billing enables you to create a To Do notification when the details to include a member person in a group or individual membership is received in ORMB beyond the late setup threshold days from the member person start date. This notification can help the billing analyst to take appropriate actions, such as giving premium waiver to the member person if required.

To enable this feature, you need to set the following option types in the **C1-ASOBLLNG** feature configuration:

- **Monitor Late Setup** – Used to indicate whether you want to enable the late setup notification feature. The valid values are – **Y** and **N**. By default, the value is set to **N**.
- **Late Setup Threshold in Days** – Used to indicate the number of threshold days for late setup notification. This option type is required when the **Monitor Late Setup** option type is set to **Y**. The value must be greater than zero.

For example, if the system receives the information to add a member person with the start date as **01-15-2021** to an individual membership on **02-15-2021** and the late setup threshold days in the **C1-ASOBLLNG** feature configuration is set to **15**. In this case, the number of days between the member person start date and member person creation date is greater than late setup threshold days, and therefore a To Do is created using the To Do type which is specified in the **C1-LATESET** algorithm attached to the group or individual membership business object, respectively.

To implement this business requirement, the system stores the member person creation date (which was not done in the previous releases) while adding a member person to a group or individual membership. A new batch named **C1-LSUB** is introduced in this release. It derives the creation date for all member persons in the existing group and individual memberships and stamps it against the corresponding record in the **CRE_DTTM** column of the **CI_MEMBERSHIP_PER** table. This batch must be executed only once after upgrading to Oracle Revenue Management and Billing Version 3.1.0.0.0. For more information, refer to *Oracle Revenue Management and Billing Version 3.1.0.0.0 Upgrade Guide*.

Policy (Used for Searching)

The **Policy** screen allows you to search for a policy using various search criteria. It also allows you to define a policy. It contains the following zone:

- [Search Policy](#) on page 314

Through this screen, you can navigate to the following screen:

- [Policy \(Used for Viewing\)](#) on page 325

Search Policy

The **Search Policy** zone allows you to search for a policy using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a policy using the policy or person details. The valid values are: <ul style="list-style-type: none"> • Policy Date/Policy Type/Status • Source System/Policy Number/Description • Person Name/Person Identifier • Policy Characteristics 	Yes
	Note: By default, the Policy Date/Policy Type/Status option is selected.	
Policy Type	Used to search policies which are created using a particular policy type.	No
	Note: This field appears when the Policy Date/Policy Type/Status option is selected from the Search By list.	
Start Date	Used to search policies which are effective from a particular date.	No
	Note: This field appears when the Policy Date/Policy Type/Status option is selected from the Search By list.	
Status	Used to search policies with a particular status. The valid values are: <ul style="list-style-type: none"> • In Force/Active • Canceled • Pending Cancellation • Pending • Pending Reinstatement • Pending Termination • Post Runout • Reinstated • Runout • Terminated 	No
	Note: This field appears when the Policy Date/Policy Type/Status option is selected from the Search By list.	

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search policies which are effective till a particular date.	No
	Note: This field appears when the Policy Date/Policy Type/Status option is selected from the Search By list.	
Source System	Used to search policies which originated from a particular external system.	No
	Note: This field appears when the Source System/Policy Number/Description option is selected from the Search By list.	
Policy Number	Used to search a policy with a particular policy number.	No
	Note: This field appears when the Source System/Policy Number/Description option is selected from the Search By list.	
Description	Used to search policies with a particular description.	No
	Note: This field appears when the Source System/Policy Number/Description option is selected from the Search By list.	
Person Name	Used to search policies to which a particular person is associated.	No
	Note: This field appears when the Person Name/Person Identifier option is selected from the Search By list.	
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)
	Note: This field appears when the Person Name/Person Identifier option is selected from the Search By list.	Note: If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search policies to which a person is associated.	Yes (Conditional)
	Note: This field appears when the Person Name/Person Identifier option is selected from the Search By list.	Note: If you specify the person identifier type as a search criteria, you have to specify the person identifier.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search policies for which a particular characteristic type is defined.	Yes (Conditional)
	<p>Note:</p> <p>This field appears when the Policy Characteristics option is selected from the Search By list.</p> <p>The list includes only those characteristic types where the characteristic entity is set to Policy.</p>	<p>Note: This field is required when you are searching for a policy using a characteristic.</p>
Characteristic Value	Used to search policies with a particular characteristic value.	Yes (Conditional)
	<p>Note:</p> <p>This field appears when the characteristic type is selected.</p> <p>If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.</p>	<p>Note: This field is required when you are searching for a policy using a characteristic.</p>

Note: You must specify at least one search criterion while searching for a policy.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	Displays additional information about the policy.
	Note: It has a link. On clicking the link, the Policy screen appears where you can view the details of the respective policy.
Source System	Indicates the external system from where the policy is originated.
Description	Displays the description of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

Column Name	Column Description						
Status	<p>Indicates the status of the policy. If the policy is created using the C1-POLICY business object, the valid values are:</p> <ul style="list-style-type: none"> • Pending • In Force/Active • Pending Cancellation • Canceled • Pending Reinstatement • Reinstated • Pending Termination • Terminated <p>However, if the policy is created using the C1-ASOPolicy business object, the valid values are:</p> <ul style="list-style-type: none"> • Pending • In Force/Active • Runout • Post Runout 						
Main Customer	<p>This column displays different data depending on whether you search for a policy using the policy or person details. The following table describes this column:</p> <table border="1" data-bbox="574 1037 1455 1717"> <thead> <tr> <th data-bbox="574 1037 1019 1089">If you search for a policy using...</th> <th data-bbox="1019 1037 1455 1089">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="574 1089 1019 1467">The Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics option</td> <td data-bbox="1019 1089 1455 1467"> <p>The Main Customer column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.</p> </div> </td> </tr> <tr> <td data-bbox="574 1467 1019 1717">The Person Name/Person Identifier option</td> <td data-bbox="1019 1467 1455 1717"> <p>The Main Customer column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No </td> </tr> </tbody> </table>	If you search for a policy using...	Then...	The Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics option	<p>The Main Customer column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.</p> </div>	The Person Name/Person Identifier option	<p>The Main Customer column indicates whether the person is the main customer of the policy. Searching for a Policy

Prerequisites

To search for a policy, you should have:

- Policy types and person identifier types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Policy**.
A sub-menu appears.
3. Click the **Search** option from the **Policy** sub-menu.
The **Policy** screen appears.
4. Enter the search criteria in the **Search Policy** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

Viewing the Policy Details

Procedure

To view the details of a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to view.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the details of the policy in the **Policy** zone.

Defining a Policy

Oracle Revenue Management and Billing enables you to define a policy for the fully-insured and self-funded health insurance business. You can define a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. However, you can define a self-funded policy using a policy type where the policy category is set to **Self-Funded**.

Note: At present, the **Fully-Insured Individual** policy category is not supported in the system.

Prerequisites

To define a policy, you should have:

- Policy types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup

Note: This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT_ADM_OPT_FLG** lookup field

Note: This prerequisite is applicable when you want to define a self-funded policy.

Procedure

To define a policy:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Policy**.
A sub-menu appears.
3. Click the **Add** option from the **Policy** sub-menu.

The **Select Policy Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to indicate the policy type using which you want to create a policy. Note: If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to Self-Funded .	Yes

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy** screen.

4. Select the required policy type from the respective field.
5. Click **OK**.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the external system from where the policy is originated.	Yes
	Note: This field appears when you are defining a policy using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual .	
Start Date	Used to specify the date from when the policy is effective.	Yes
	Note: The policy start date cannot be later than the policy end date.	
End Date	Used to specify the date till when the policy is effective.	Yes
	Note: The policy end date cannot be earlier than the policy start date.	
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No
	Note: The runout end date cannot be earlier than or equal to the policy end date. This field appears when you are defining a policy using a policy type where the policy category is set to Self-Funded .	
Runout Administration Fees	Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> • None • Percentage of Claim 	No
	Note: At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy. This field appears when you are defining a policy using a policy type where the policy category is set to Self-Funded .	

Field Name	Field Description	Mandatory (Yes or No)
Advance Level Funding Eligibility	Indicates whether the self-funded policy is eligible for advance billing feature of level funding.	Not applicable
	<p>Note:</p> <p>This is a read-only field. By default, the value is set to No. You can edit the advance level funding eligibility only through a health care inbound message.</p> <p>This field appears when you are defining a policy using a policy type where the policy category is set to Self-Funded.</p>	

6. Enter the required details in the **Main** section.
7. Associate the required persons with the policy.

Note: While defining a policy, you must associate a person who is the main customer of the policy.

8. Define the characteristics for the policy, if required.
9. Click **Save**.

The policy is defined and its status is set to **Pending**.

How to associate a person with a policy	Associating a Person with a Policy on page 322
How to define a characteristic for a policy	Defining a Characteristic for a Policy on page 324

Associating a Person with a Policy

Prerequisites

To associate a person with a policy, you should have:

- Required persons defined in the application
- Required policy person roles defined in the application

Procedure

To associate a person with a policy:

1. Ensure that the **Persons** section is expanded when you are defining or editing a policy.

The **Persons** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Person	Used to indicate the person that you want to associate with the policy.	Yes
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Person Search window appears.</p> <p>On specifying the person ID, the person name appears corresponding to the Person field.</p>	
Sequence	Used to specify the sequence number for the associated person.	Yes
Policy Person Role	Used to indicate the role of a person in the policy.	Yes
Main Customer	Used to indicate whether the person is the main customer of the policy.	Yes (Conditional)
	<p>Note: At a time, only one person can be the main customer of the policy.</p>	
Start Date	Used to specify the date from when the person is associated with the policy.	Yes
	<p>Note:</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than the policy start date and later than the policy end date.</p>	
End Date	Used to specify the date till when the person is associated with the policy.	No
	<p>Note:</p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the policy start date and later than the policy end date. This validation is done when the policy is transition to the status which is not specified in the Skip Status for Policy Person End Date Validation parameter of the C1-POLBOVAL algorithm. For example, if you set the Skip Status for Policy Person End Date Validation parameter of the C1-POLBOVAL algorithm to TERMINATED, the system will not perform this validation when the status of the policy is changed to Terminated.</p>	

- Enter the required details in the **Persons** section.

Note: While associating the persons with a policy, you must always ensure that one person is the main customer of the policy.

- If you want to associate more than one person with the policy, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to dissociate a person from the policy, click the **Delete (🗑)** icon corresponding to the person.

- Click **Save**.

The persons are associated with the policy.

Defining a Characteristic for a Policy

Prerequisites

To define a characteristic for a policy, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To define a characteristic for a policy:

- Ensure that the **Characteristics** section is expanded when you are defining or editing a policy.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the policy.	Yes (Conditional)
	Note: The effective date cannot be earlier than the policy start date and later than the policy end date.	Note: This field is required when you are defining a characteristic for the policy.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to Policy .	Note: This field is required when you are defining a characteristic for the policy.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p>Note:</p> <p>If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.</p>	<p>Note: This field is required when you are defining a characteristic for the policy.</p>

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the policy, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the policy, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the policy.

Policy (Used for Viewing)

The **Policy** screen allows you to:

- View the details of a fully-insured group or self-funded policy
- Edit the details of a fully-insured group or self-funded policy
- Activate a fully-insured group or self-funded policy
- Add or edit plans in a fully-insured group policy
- Add memberships to a fully-insured group policy plan
- Initiate the termination process for a fully-insured group policy
- Terminate a fully-insured group policy
- Initiate the cancellation process for a fully-insured group policy
- Cancel a fully-insured group policy
- Initiate the reinstatement process for a fully-insured group policy
- Reinstate a fully-insured group policy
- View the log of a fully-insured group or self-funded policy

- Add a log entry for a fully-insured group or self-funded policy

It consists of the following tabs:

- [Policy - Main](#) on page 326
- [Policy - Plan](#) on page 333
- [Policy - Log](#) on page 335

Policy - Main

The **Main** tab displays information about the policy. It contains the following zones:

- [Policy](#) on page 326
- [Policy Characteristics](#) on page 332

Policy

The **Policy** zone displays the details of the fully-insured group or self-funded policy. It contains the following sections:

- **Main** - Displays basic information about the policy. It contains the following fields:

Field Name	Field Description
Base Policy Information	Displays information about the base policy.
	Note: This field appears when you are viewing the details of a renewed policy which is created using a policy type where the policy category is set to Self-Funded .
Policy Information	Displays information about the policy.
Policy Type	Indicates the policy type using which the policy is created.
	Note: It has a link. On clicking the link, the Policy Type screen appears where you can view the details of the respective policy type.
Status	<p>Indicates the status of the policy. If the policy is created using the C1-POLICY business object, the valid values are:</p> <ul style="list-style-type: none"> • Pending • In Force/Active • Pending Cancellation • Canceled • Pending Reinstatement • Reinstated • Pending Termination • Terminated <p>However, if the policy is created using the C1-ASOPolicy business object, the valid values are:</p> <ul style="list-style-type: none"> • Pending • In Force/Active • Runout • Post Runout

Field Name	Field Description
Status Reason	Indicates the reason why the policy is terminated.
	<p>Note:</p> <p>It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the respective termination reason.</p> <p>This field appears when you are viewing the details of a terminated or reinstated policy which is created using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual.</p>
Policy Number	Displays the policy number.
Description	Displays the description of the policy.
Source System	Indicates the external system from where the policy is originated.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Renewal Date	Displays the date when the policy is renewed.
	Note: This field appears when you are viewing the details of a policy which is renewed.

Field Name	Field Description																														
Paid Through Date	Indicates the term end date of the last fully or partially paid term. The system considers the term to be fully paid when the threshold limit is met.																														
	<p>Note:</p> <p>This field appears when the following conditions are met:</p> <ul style="list-style-type: none"> When you are viewing the details of a policy which is created using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual. When the paid through date is calculated at the policy level. 																														
	The paid through date is calculated while freezing or canceling a payment or adjustment depending on whether the required algorithm is attached to the respective system event:																														
	<table border="1"> <thead> <tr> <th>Entity</th> <th>System Event</th> <th>Algorithm</th> </tr> </thead> <tbody> <tr> <td>Customer Class</td> <td>Payment Freeze</td> <td>C1-PSPTDCAL</td> </tr> <tr> <td>Customer Class</td> <td>Payment Cancellation</td> <td>C1-PXPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Freeze</td> <td>C1-ADPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Cancellation</td> <td>C1-AXPTDCAL</td> </tr> </tbody> </table>	Entity	System Event	Algorithm	Customer Class	Payment Freeze	C1-PSPTDCAL	Customer Class	Payment Cancellation	C1-PXPTDCAL	Adjustment Type	Adjustment Freeze	C1-ADPTDCAL	Adjustment Type	Adjustment Cancellation	C1-AXPTDCAL

Field Name	Field Description
Runout End Date	Displays the date when the runout period of the self-funded policy ends.
	Note: This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to Self-Funded .
Runout Administration Fees	Indicates whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> • None • Percentage of Claim
	Note: This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to Self-Funded .
Advance Level Funding Eligibility	Indicates whether the self-funded policy is eligible for advance billing feature of level funding.
	Note: This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to Self-Funded .

- **Persons** - Lists the persons which are associated with the policy. It contains the following columns:

Column Name	Column Description
Person Information	Indicates the person who is associated with the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.
Sequence	Displays the sequence number of the associated person.
Policy Person Role	Indicates the role of the person in the policy.
Main Customer	Indicates whether the person is the main customer of the policy.
Start Date	Displays the date from when the person is associated with the policy.
End Date	Displays the date till when the person is associated with the policy.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description						
Edit	Used to edit the details of the fully-insured group or self-funded policy.						
	<p>Note:</p> <p>The Edit button appears only when a policy of the respective category is in either of the following status:</p>						
	<table border="1"> <thead> <tr> <th data-bbox="521 401 907 453">Policy Category</th> <th data-bbox="907 401 1464 453">Status</th> </tr> </thead> <tbody> <tr> <td data-bbox="521 453 907 804">Fully-Insured Group or Fully-Insured Individual</td> <td data-bbox="907 453 1464 804"> <ul style="list-style-type: none"> • In Force/Active • Canceled • Pending Cancellation • Pending • Pending Reinstatement • Pending Termination • Terminated </td> </tr> <tr> <td data-bbox="521 804 907 968">Self-Funded</td> <td data-bbox="907 804 1464 968"> <ul style="list-style-type: none"> • In Force/Active • Pending • Runout </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> • In Force/Active • Canceled • Pending Cancellation • Pending • Pending Reinstatement • Pending Termination • Terminated 	Self-Funded	<ul style="list-style-type: none"> • In Force/Active • Pending • Runout

Self-Funded	<ul style="list-style-type: none"> • In Force/Active • Pending • Runout 						
Activate	Used to activate the fully-insured group or self-funded policy.						
	<p>Note:</p> <p>The Activate button appears when a policy of the respective category is in either of the following status:</p>						
	<table border="1"> <thead> <tr> <th data-bbox="521 1213 954 1266">Policy Category</th> <th data-bbox="954 1213 1464 1266">Status</th> </tr> </thead> <tbody> <tr> <td data-bbox="521 1266 954 1381">Fully-Insured Group or Fully-Insured Individual</td> <td data-bbox="954 1266 1464 1381"> <ul style="list-style-type: none"> • Pending • Pending Termination </td> </tr> <tr> <td data-bbox="521 1381 954 1451">Self-Funded</td> <td data-bbox="954 1381 1464 1451"> <ul style="list-style-type: none"> • Pending </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> • Pending • Pending Termination 	Self-Funded	<ul style="list-style-type: none"> • Pending
	Policy Category	Status					
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> • Pending • Pending Termination 						
Self-Funded	<ul style="list-style-type: none"> • Pending 						
Initiate Cancellation	<p>Used to initiate the cancellation process for the fully-insured group policy.</p> <p>Note: The Initiate Cancellation button appears when the fully-insured group policy is in the In Force/Active status.</p>						
Cancel	<p>Used to cancel the fully-insured group policy.</p> <p>Note: The Cancel button appears when the fully-insured group policy is in the Pending Cancellation status.</p>						

Button Name	Button Description
Initiate Termination	Used to initiate the termination process for the fully-insured group policy.
	Note: The Initiate Termination button appears when the fully-insured group policy is in the In Force/Active status.
Terminate	Used to terminate the fully-insured group policy.
	Note: The Terminate button appears when the fully-insured group policy is in the In Force/Active, Pending Reinstatement, or Pending Termination status.
Initiate Reinstatement	Used to initiate the reinstatement process for the terminated policy.
	Note: The Initiate Reinstatement button appears when the fully-insured group policy is in the Terminated status.
Reinstate	Used to reinstate the terminated policy.
	Note: The Reinstate button appears when the fully-insured group policy is in the Pending Reinstatement or Terminated status.
Runout	Used to transition the self-funded policy to the Runout status.
	<p>Note:</p> <p>The Runout button appears when the self-funded policy is in the In Force/Active status. You cannot transition a self-funded policy to the Runout status when:</p> <ul style="list-style-type: none"> • The self-funded policy is renewed. • The runout end date is not specified. • The policy end date is earlier than the system date.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the policy is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the policy status is updated.
Create Date/Time	Displays the date and time when the policy is created.

- **Termination Information** - Displays the termination details of the fully-insured group policy. It appears when the policy is in the **Pending Termination** status. It contains the following fields:

Field Name	Field Description
Terminate Date	Displays the date when you want to terminate the policy.

Field Name	Field Description
Terminate Reason	Indicates the reason why the termination process is initiated for the policy. Note: It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the respective termination reason.

- **Reinstate Information** - Displays the reinstatement details of the terminated policy. It appears when the policy is in the **Pending Reinstatement** status. It contains the following fields:

Field Name	Field Description
Reinstate Reason	Indicates the reason why you want to reinstate the fully-insured group policy. Note: It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the respective reinstatement reason.

Policy Characteristics

The **Policy Characteristics** zone lists the characteristics of the fully-insured group or self-funded policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Column Name	Column Description
Description	Displays the description of the characteristic value.
	Note: The data appears in this column when the type of characteristic value is set to Predefined Value .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Policy - Plan

The **Plan** tab lists the plans defined for the policy and memberships defined for each policy plan. It contains the following zones:

- [Plans](#) on page 333
- [Memberships](#) on page 334

Plans

The **Plans** zone lists the plans which are defined in the policy. It contains the following columns:

Column Name	Column Description
Plan Information	Displays information about the policy plan. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Policy Plan screen appears where you can view the details of the respective policy plan.
Price Item Information	Indicates the price item to which the policy plan is directly associated.
	Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> • Commercial • Medicare Affiliated
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Edit	On clicking the Edit () icon, the Plan screen appears where you can edit the details of the policy plan.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new policy plan by clicking the **Add** link in the upper-right corner of this zone. On clicking the **Broadcast** () icon corresponding to a policy plan, the **Memberships** zone appears.

Note: Ideally, you define plans in a policy which is created using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**.

You can filter the list using various search criteria (such as, **Price Item**, **Plan Number**, and **Effective From**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper-right corner of this zone.

Memberships

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership. Note: It has a link. On clicking the link, the Membership screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> • Active • Inactive • Terminated
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> • COBRA • Medicare • Retiree

Column Name	Column Description
Benefits	On clicking the Benefits () icon, the Benefit screen appears where you can view the Medicare benefits of the member persons who belong to the membership. Note: The Benefits icon appears when a Medicare benefit is defined for a member person who belongs to the membership.
Membership ID	Displays the membership ID.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** () icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608

Activating a Policy

Procedure

To activate a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to activate.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Activate** button in the **Policy** zone.

The status of the policy is changed to **In Force/Active**.

Note:

The **Activate** button appears only when a policy of the respective category is in either of the following status:

Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> • Pending • Pending Termination
Self-Funded	<ul style="list-style-type: none"> • Pending

Editing a Policy

Prerequisites

To edit a policy, you should have:

- Values defined for the **C1-SourceSystemLookup** extendable lookup

Note: This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT_ADM_OPT_FLG** lookup field

Note: This prerequisite is applicable when you want to define a self-funded policy.

Procedure

To edit a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Policy** zone.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Displays information about the policy.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined.	Not applicable
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> • Pending • In Force/Active • Runout • Post Runout 	Not applicable
	Note: This field appears when you are editing a policy which is created using a policy type where the policy category is set to Self-Funded .	
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	Note: This field appears when you are editing a policy which is created using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual .	

Field Name	Field Description	Mandatory (Yes or No)
Start Date	<p>Used to specify the date from when the policy is effective.</p> <p>Note: The policy start date cannot be later than the policy end date. You cannot change the start date of a self-funded policy when it is in the In Force/Active, Runout, or Post Runout status.</p>	Yes
End Date	<p>Used to specify the date till when the policy is effective.</p> <p>Note: The policy end date cannot be earlier than the policy start date. You cannot change the end date when the self-funded policy is in the Runout status. You cannot set the end date of a self-funded policy to a date which is later than or equal to the start date of a pricing rule which is defined for the Runout status. You cannot change the end date when the policy is renewed.</p>	Yes
Runout End Date	<p>Used to specify the date when the runout period of the self-funded policy ends.</p> <p>Note: This field appears when you are editing a policy which is created using a policy type where the policy category is set to Self-Funded. The runout end date cannot be earlier than or equal to the policy end date. The runout end date cannot be earlier than or equal to the system date when the policy is in the Runout status. You cannot remove the runout end date when the policy is in the Runout or Post Runout status. You cannot set the runout end date to a date which is later than or equal to the start date of a pricing rule which is defined for the Post Runout status. You cannot set the runout end date to a date which is earlier than the end date of a pricing rule which is defined for the Runout status.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> • None • Percentage of Claim 	No
	<p>Note:</p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to Self-Funded.</p>	

Note:	
The Edit button appears when a policy of the respective category is in either of the following status:	
Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> • In Force/Active • Canceled • Pending Cancellation • Pending • Pending Reinstatement • Pending Termination • Terminated
Self-Funded	<ul style="list-style-type: none"> • In Force/Active • Pending • Runout

5. Modify the required details in the **Main** section.
6. Associate the persons with the policy, if required.

Note: While editing a policy, you must ensure that one person is associated as the main customer of the policy.

7. Define, edit, or remove characteristics of the policy, if required.
8. Click **Save**.

The changes made to the policy are saved.

Initiating the Termination Process for a Fully-Insured Group Policy

Prerequisites

To initiate the termination process for a fully-insured group policy, you should have:

- Reasons defined for the **Terminated** status of the **C1-POLICY** business object in the **Status Reason** screen

Procedure

To initiate the termination process for a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to initiate the termination process.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Initiate Termination** button in the **Policy** zone.

The **Termination Information** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Terminate Reason	Used to indicate the reason why you want to initiate the termination process for the fully-insured group policy.	Yes
Terminate Date	Used to specify the date when you want to terminate the policy.	Yes
	Note: The terminate date cannot be earlier than the policy start date or later than the policy end date.	

Note: The **Initiate Termination** button appears when the fully-insured group policy is in the **In Force/Active** status.

5. Enter the required details in the **Termination Information** window.
6. Click **Save**.

The status of the fully-insured group policy is changed to **Pending Termination**.

Terminating a Fully-Insured Group Policy

Prerequisites

To terminate a fully-insured group policy, you should have:

- Reasons defined for the **Terminated** status of the **C1-POLICY** business object in the **Status Reason** screen

Procedure

To terminate a fully-insured group policy:

- Search for the fully-insured group policy in the **Policy** screen.
- In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to terminate.

The **Policy** screen appears.

- Ensure that the **Main** tab is selected.
- Click the **Terminate** button in the **Policy** zone.

The **Status Reason** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to terminate the fully-insured group policy.	Yes

Note: The **Terminate** button appears when the fully-insured group policy is in the **In Force/Active**, **Pending Reinstatement**, or **Pending Termination** status.

- Select the terminate reason from the respective field.
- Click **Save**.

The status of the policy is changed to **Terminated**.

Note: You cannot terminate a fully-insured group policy which is in the **Pending Termination** status when the terminate date is earlier than the system date.

Defining a Plan for a Fully-Insured Group Policy

Prerequisites

To define a plan for a fully-insured group policy, you should have:

- Policy plan business objects defined in the application
- Price items defined in the application

Procedure

To define a plan for a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to define a plan.

The **Policy** screen appears.

3. Click the **Plan** tab.

The **Plan** tab appears.

4. Click the **Add** link in the upper right corner of the **Plans** zone.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Plan Business Object	Used to indicate the business object using which you want to create a plan for a fully-insured group policy.	Yes

Tip: Alternatively, you can access this screen by clicking the **Add** link in the upper right corner of the **Policy Plan** zone in the **Policy Plan** screen.

Note: The **Select Business Object** screen appears when there are multiple policy plan business objects defined in the application. If there is only one policy plan business object defined in the application, the **Plan** screen appears.

5. Select the required policy plan business object from the respective field.
6. Click **OK**.

The **Policy Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the policy plan.
- **Proration Rules** - Used to define the proration rules for the policy plan.
- **Characteristics** - Used to define the characteristics for the policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Indicates the fully-insured group policy for which you want to create the policy plan.	Not applicable
Price Item	Used to indicate the price item which you want to directly associate with the policy plan.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Price Item Search window appears.</p> <p>On specifying the price item, the description of the price item appears corresponding to the Price Item field.</p>	<p>Note: You must either specify the price item or associate at least one pricing rule type with the policy plan.</p>
Plan Number	Used to specify the plan number.	Yes
Plan Name	Used to specify the description for the policy plan.	No
Benefit Type	Used to indicate the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> • Commercial • Medicare Affiliated 	No
Start Date	Used to specify the date from when the policy plan is effective.	Yes
	<p>Note:</p> <p>The policy plan start date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan start date cannot be later than the policy plan end date.</p>	
End Date	Used to specify the date till when the policy plan is effective.	No
	<p>Note:</p> <p>The policy plan end date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan end date cannot be earlier than the policy plan start date.</p>	

7. Enter the required details in the **Main** section.
8. Associate the pricing rule types with the fully-insured group policy plan, if required.

Note: You must associate at least one pricing rule type with the policy plan when the price item is not specified in the fully-insured group policy plan.

9. Define the proration rules for the fully-insured group policy plan, if required.
10. Define the characteristics for the fully-insured group policy plan, if required.

11. Click Save.

The plan is defined for the fully-insured group policy.

Defining a Proration Rule for a Fully-Insured Group Policy Plan**Procedure**

To define a proration rule for a fully-insured group policy plan:

1. Ensure that the **Proration Rules** section is expanded when you are defining or editing a fully-insured group policy plan.

The **Proration Rules** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the proration rule is effective for the policy plan.	Yes (Conditional)
	<p>Note:</p> <p>The system considers the latest proration rule and not the effective proration rule while prorating the membership premium.</p> <p>The effective date cannot be earlier than the plan start date and later than the plan end date.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Proration Event Type	<p>Used to indicate the event when you want to prorate the membership premium. The valid values are:</p> <ul style="list-style-type: none"> • Enrollment – Used when you want to prorate the membership premium on enrolling a member person. • Termination - Used when you want to prorate the membership premium on terminating a member person. • New Born - Used when you want to prorate the membership premium on enrolling a new born. • Same Month Enrollment and Termination - Used when you want to prorate the membership premium on enrolling and terminating a member person in the same month. 	<p>Yes (Conditional)</p> <p>Note: This field is required when you are defining a proration rule for the policy plan.</p>
Proration Type	<p>Used to indicate how you want to prorate the membership premium. The valid values are:</p> <ul style="list-style-type: none"> • Daily – Used when you want to prorate the membership premium from the day the proration event has occurred. • Mid-Month – Used when you want to prorate the membership premium based on the proration date. The system calculates the proration date using the following formula: $\text{Bill Period Start Date} + \text{Specified Number of Days}$ <p>For example, if the bill period start date is 1st of every month and number of days is 15, then the proration date would be 15th of every month. If a member person is enrolled to the membership on or before the proration date, the system will charge the premium for the member person. However, if a member person is enrolled to the membership after the proration date, the system will not charge the premium for the member person. And, if a member person is terminated from the membership on or after the proration date, the system will charge the premium for the member person. However, if a member person is terminated from the membership before the proration date, the system will not charge the premium for the member person.</p> • Full Month – Used when the premium for a member person should be charged when the member person is enrolled or terminated on the coverage start date or coverage end date, respectively. If a member person is enrolled or terminated within the coverage period, the system will not charge the premium for the member person. 	<p>Yes (Conditional)</p> <p>Note: This field is required when you are defining a proration rule for the policy plan.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> • Waiver – Used when the premium for a member person should be waived off completely for the month when the member person is enrolled or terminated from the membership. • Coverage Days – Used when you want to prorate the premium for a member person based on the coverage days. If a member person is covered in the membership for a period less than the specified number of days, the system will not charge the premium for the member person. However, if a member person is covered in the membership for a period equal to or more than the specified number of days, the system will charge the premium for the member person. <p>Note: You can use this proration type when the proration event is set to Same Month Enrollment and Termination.</p>	
	<ul style="list-style-type: none"> • Enrollment – Used when you want to prorate the premium for a member person using the proration type of the enrollment event. <p>Note: You can use this proration type when the proration event is set to Same Month Enrollment and Termination.</p> <ul style="list-style-type: none"> • Termination – Used when you want to prorate the premium for a member person using the proration type of the termination event. <p>Note: You can use this proration type only when the proration event is set to Same Month Enrollment and Termination.</p>	
Number of Days	Used to specify the number of days to determine the cutoff date.	Yes (Conditional) Note: This field is required when the proration type is set to Mid-Month or Coverage Days .

2. Enter the required details in the **Proration Rules** section.
3. If you want to define more than one proration rule for the fully-insured group policy plan, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a proration rule of the fully-insured group policy plan, click the **Delete** (🗑️) icon corresponding to the proration rule.

4. Click **Save**.

The proration rules are defined for the fully-insured group policy plan.

Associating a Pricing Rule Type with a Fully-Insured Group Policy Plan

You can define a pricing rule using a pricing rule type for a fully-insured group policy plan when the pricing rule type is associated with the fully-insured group policy plan. You can associate a pricing rule type with a fully-insured group policy plan either from the user interface or through a health care inbound message.

Prerequisites

To associate a pricing rule type with a fully-insured group policy plan, you should have:

- Pricing rule types defined in the application (where the pricing rule type category is set to **Age Based**, **Tier Based**, or **Pass-Through Billable Charge**)

Procedure

To associate a pricing rule type with a fully-insured group policy plan:

1. Ensure that the **Pricing Rule Types** section is expanded when you are defining or editing a fully-insured group policy plan.

The **Pricing Rule Types** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Pricing Rule Type	Used to indicate the pricing rule type that you want to associate with the fully-insured group policy plan.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Pricing Rule Type Search window appears.</p> <p>On specifying the pricing rule type, the description of the pricing rule type appears corresponding to the Pricing Rule Type field.</p> <p>Here, you can only specify a pricing rule type where the pricing rule type category is set to Age Based, Tier Based, or Pass-Through Billable Charge.</p>	<p>Note: You must either specify the price item or associate at least one pricing rule type with the policy plan.</p>

2. Enter the required details in the **Pricing Rule Types** section.
3. If you want to associate more than one pricing rule type with the fully-insured group policy plan, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to dissociate a pricing rule type from the fully-insured group policy plan, click the **Delete** (🗑️) icon corresponding to the pricing rule type.

4. Click **Save**.

The pricing rule types are associated with the fully-insured group policy plan.

Defining a Characteristic for a Fully-Insured Group Policy Plan**Prerequisites**

To define a characteristic for a fully-insured group policy plan, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**).

Procedure

To define a characteristic for a fully-insured group policy plan:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a fully-insured group policy plan.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the fully-insured group policy plan.	Yes (Conditional)
	Note: The effective date cannot be earlier than the policy plan start date and later than the policy plan end date.	Note: This field is required when you are defining a characteristic for the fully-insured group policy plan.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to Policy Plan .	Note: This field is required when you are defining a characteristic for the fully-insured group policy plan.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Note: This field is required when you are defining a characteristic for the fully-insured group policy plan.

2. Enter the required details in the **Characteristics** section.

- If you want to define more than one characteristic for the fully-insured group policy plan, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the fully-insured group policy plan, click the **Delete (🗑)** icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the fully-insured group policy plan.

Editing a Plan of a Fully-Insured Group Policy

Prerequisites

To edit a plan of a fully-insured group policy, you should have:

- Price items defined in the application

Procedure

To edit a plan of a fully-insured group policy:

- Search for the fully-insured group policy in the **Policy** screen.
- In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

- Click the **Plan** tab.

The **Plan** tab appears.

- In the **Plans** zone, click the **Edit (✎)** icon in the **Edit** column corresponding to the policy plan whose details you want to edit.

The **Policy Plan** screen appears. It contains the following sections:

- Main** - Used to specify the basic details about the fully-insured group policy plan.
- Pricing Rule Types** - Used to associate the pricing rule types with the fully-insured group policy plan.
- Proration Rules** - Used to define the proration rules for the fully-insured group policy plan.
- Characteristics** - Used to define the characteristics for the fully-insured group policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Plan Information	Displays information about the fully-insured group policy plan.	Not applicable
Policy Information	Indicates the fully-insured group policy for which the policy plan is created.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item which you want to directly associate with the fully-insured group policy plan.	Yes (Conditional) Note: You must either specify the price item or associate at least one pricing rule type with the policy plan.
	Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Price Item Search window appears. On specifying the price item, the description of the price item appears corresponding to the Price Item field.	
Plan Number	Used to specify the plan number.	Yes
Plan Name	Used to specify the description for the fully-insured group policy plan.	No
Benefit Type	Used to indicate the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> • Commercial • Medicare Affiliated 	No
Start Date	Used to specify the date from when the fully-insured group policy plan is effective.	Yes
	Note: The fully-insured group policy plan start date cannot be earlier than the policy start date and later than the policy end date. The fully-insured group policy plan start date cannot be later than the policy plan end date.	
End Date	Used to specify the date till when the fully-insured group policy plan is effective.	No
	Note: The fully-insured group policy plan end date cannot be earlier than the policy start date and later than the policy end date. The fully-insured group policy plan end date cannot be earlier than the policy plan start date.	

Tip: Alternatively, you can edit the details of a fully-insured group policy plan by clicking the **Edit** button in the **Policy Plan** zone of the **Policy Plan** screen.

5. Modify the required details in the **Main** section.
6. Associate the pricing rule types with the fully-insured group policy plan, if required.

Note: You must associate at least one pricing rule type with the policy plan when the price item is not specified in the fully-insured group policy plan.

7. Define, edit, or remove the proration rules of the fully-insured group policy plan, if required.

8. Define, edit, or remove characteristics of the fully-insured group policy plan, if required.
9. Click **Save**.

The changes made to the fully-insured group policy plan are saved.

Policy Plan (Used for Viewing)

The **Policy Plan** screen allows you to:

- View the details of a fully-insured group policy plan
- View the characteristics of a fully-insured group policy plan
- Add and edit a fully-insured group policy plan
- Add a membership to a fully-insured group policy plan

It contains the following zones:

- [Policy Plan](#) on page 357
- [Plan Characteristics](#) on page 359
- [Memberships](#) on page 334

Policy Plan

The **Policy Plan** zone displays the details of the policy plan. It contains the following sections:

- **Main** - Displays the basic information about the policy plan. It contains the following fields:

Field Name	Field Description
Plan Information	Displays information about the policy plan.
Policy Information	Displays information about the policy. Note: It has a link. On clicking the link, the Policy screen appears where you can view the details of the respective policy.
Price Item Information	Indicates the price item to which the policy plan is directly associated. Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> • Commercial • Medicare Affiliated Note: This field appears when the benefit type is set to COBRA or Medicare Affiliated .
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.

- **Pricing Rule Types** - Lists the pricing rule types which are associated with the policy plan. It contains the following column:

Column Name	Column Description
Pricing Rule Type	Indicates the pricing rule type which is associated with the policy plan. Note: It has a link. On clicking the link, the Pricing Rule Type screen appears where you can view the details of the respective pricing rule type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the policy plan.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the policy plan is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.

- **Proration Rules** - Lists the proration rules defined for the policy plan. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the proration rule is effective for the policy plan.
Proration Event Type	Indicates the event when the membership premium should be prorated. The valid values are: <ul style="list-style-type: none"> • Enrollment • Termination • New Born • Same Month Enrollment and Termination
Proration Type	Indicates how the membership premium should be prorated. The valid values are: <ul style="list-style-type: none"> • Daily • Mid-Month • Full Month • Waiver • Coverage Days • Enrollment • Termination
Number of Days	Displays the number of days using which the cutoff date is calculated. Note: The data appears in this column when the proration type is set to Mid-Month or Coverage Days .
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> • COBRA • Medicare • Retiree

You can define a new policy plan by clicking the **Add** link in the upper right corner of this zone.

Plan Characteristics

The **Plan Characteristics** zone lists the characteristics of the fully-insured group policy plan. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy plan.

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	Note: The data appears in this column when the type of characteristic value is set to Predefined Value .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Memberships

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership.
	Note: It has a link. On clicking the link, the Membership screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> • Active • Inactive • Terminated
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> • COBRA • Medicare • Retiree
Benefits	On clicking the Benefits () icon, the Benefit screen appears where you can view the Medicare benefits of the member persons who belong to the membership.
	Note: The Benefits icon appears when a Medicare benefit is defined for a member person who belongs to the membership.
Membership ID	Displays the membership ID.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608

Searching for a Membership

Prerequisites

To search for a membership, you should have:

- Membership types, membership identifier, and membership identifier types defined in the application
- Health plan defined in the application

Note: You must define a health plan only when you want to search individual memberships.

- Benefit types and benefit sub types defined in the application
- Person, person identifier, and person identifier types defined in the application
- Price item, policy, and policy plan defined in the application
- Contract relationship types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Membership**)

Procedure

To search for a membership:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Membership**.
A sub-menu appears.
3. Click the **Search** option from the **Membership** sub-menu
The **Membership** screen appears.
4. Enter the search criteria in the **Search Membership** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of memberships that meet the search criteria appears in the **Search Results** section.

Defining a Characteristic for a Membership

Prerequisites

To define a characteristic for a membership, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Membership**)

Procedure

To define a characteristic for a membership:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a membership.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the membership.	Yes (Conditional)
	Note: The effective date cannot be earlier than the membership start date and later than the membership end date.	Note: This field is required when you are defining a characteristic for the membership.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to Membership	Note: This field is required when you are defining a characteristic for the membership.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Note: This field is required when you are defining a characteristic for the membership.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the membership, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the membership, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the membership.

Membership Characteristics

The **Membership Characteristics** zone lists the characteristics of the membership. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the membership.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value. Note: The data appears in this column when the type of characteristic value is set to Predefined Value .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

Member Persons

The **Member Persons** zone lists the persons who are added to the membership. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the person is added to the membership.
End Date	Displays the date till when the person is added to the membership.

Column Name	Column Description
Person Information	Indicates the person who is added to the membership. In addition, it has the context menu which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.
Relationship Type	Indicates how the person is related to the main subscriber.
Main Subscriber	Indicates whether the person is the main subscriber of the membership. The valid values are: <ul style="list-style-type: none"> • Yes • No
Financially Responsible	Indicates whether the person is financially responsible for the membership. The valid values are: <ul style="list-style-type: none"> • Yes • No
Status	Indicates the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> • Active • Inactive
Member	Indicates whether the person is a member or a non-member in the membership. The valid values are: <ul style="list-style-type: none"> • Yes • No
External Medicare Beneficiary ID	Displays the Medicare beneficiary identifier of the person who has availed the Medicare benefit.
Date of Birth	Displays the date when the person was born.
Edit	On clicking the Edit (✎) icon, the Member Person screen appears where you can edit the membership details of the person.

Note:

By default, the member persons which are in the **Active** status are listed in the **Member Persons** zone.

You can add a person to the membership by clicking the **Add Person** link in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to a member person, the **Member Person Characteristics** zone appears where you can view the characteristics of the respective member person.

You can filter the list using the **Status** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Membership - Contracts and Charges

The **Contracts and Charges** tab lists the following:

- Contracts associated with the membership
- Billable charges created for the membership
- Bill segments generated for each billable charge
- Timeline generated for each billable charge
- Premium calculated for each eligible member person when an age based pricing is used during the membership premium calculation
- Premium calculated for the membership when a tier based pricing is used during the membership premium calculation

It contains the following zones:

- [Membership Contracts](#) on page 379
- [Billable Charges](#) on page 380
- [Bill Segment Details](#) on page 382
- [Billable Charge Timeline Details](#) on page 383
- [Pricing Calculation Details](#) on page 383

Membership Contracts

The **Membership Contracts** zone lists the contracts which are associated with the membership. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the contract is associated with the membership.
End Date	Displays the date till when the contract is associated with the membership.

Column Name	Column Description
Bill To	Indicates the entity against whom the corresponding charges are billed. The valid values are: <ul style="list-style-type: none"> Federal State Group Individual
Contract ID	Displays the contract ID. Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract.
Account Information	Indicates the account for which the contract is created. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account.
Delete	On clicking the Delete (🗑️) icon, you can disassociate the contract from the membership.
Edit	On clicking the Edit (🔧) icon, the Associate Contract with Membership screen appears where you can edit the contract association details of the membership.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can associate a contract with the membership by clicking the **Add Contract** link in the upper-right corner of this zone.

You can filter the list using the **Bill To** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper-right corner of this zone.

Pricing Calculation Details

The **Pricing Calculation Details** zone indicates how the amount is calculated for the timeline. If the age based pricing is used during the membership premium calculation, this zone lists the premium calculated for each eligible member of

the membership. It also displays the base fee and modifier fee which are applicable for each eligible member. However, if the tier based pricing is used during the membership premium calculation, this zone lists the premium calculated at the membership level. It contains the following columns:

Column Name	Column Description
Entity Information	If the age based pricing is used during the membership premium calculation, this column indicates the eligible member for whom the premium amount is calculated. However, if the tier based pricing is used during the membership premium calculation, this column indicates the main subscriber of the membership.
Description on Bill	Displays the description of the rate component for which the price component is created in the age based or tier based pricing.
Pricing Parameter	Indicates the pricing eligibility criteria which is satisfied while deriving the base fee.
Amount	Displays the base fee or applicable modifier fee.
Proration Factor	Indicates the proration factor which is derived using the proration rules defined for the fully-insured group policy plan. Note: The data appears in this column when the proration rule for the respective event is defined for the fully-insured group policy plan.
Distributed Amount	Displays the premium amount which is calculated for the non-skip billing periods. Note: The data appears in this column when the 9/10 Billing (Skip Months) feature is enabled for the account. If the age based pricing is used during the membership premium calculation, this column displays the distributed amount for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the distributed amount for the membership.
No. of Billing Periods	Indicates the number of the non-skip billing periods of the account. Note: The data appears in this column when the 9/10 Billing (Skip Months) feature is enabled for the account.
Total Contract Period Amount	Displays the premium which should be paid for the entire contract period (in other words, total premium for the skip and non-skip billing periods). Note: The data appears in this column when the 9/10 Billing (Skip Months) feature is enabled for the account. If the age based pricing is used during the membership premium calculation, this column displays the total contract period amount for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the total contract period amount for the membership.
Total Amount	If the age based pricing is used during the membership premium calculation, this column displays the sum total of the base fee and modifier fee (if any) for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the base fee applicable for the membership.

By default, the **Pricing Calculation Details** zone does not appear in the **Contracts and Charges** tab of the **Membership** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a timeline in the **Billable Charge Timeline Details** zone.

Membership - Log

The **Log** tab contains the following zone:

- [Membership Log](#) on page 385

Membership Log

The **Membership Log** zone lists the complete trail of actions performed on the membership. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the membership.
Details	Displays the details about the action performed on the membership.
User	Indicates the user who has performed the action on the membership.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the membership.
	Note: It contains a link. On clicking the link, the screen appears where you can view the details of the respective related object.
Status Reason	Indicates the reason why the status of the membership is changed.
	Note: At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

Note: You can manually add a log entry for the membership by clicking the **Add Log Entry** link in the upper right corner of the **Membership Log** zone.

Editing a Membership of a Fully-Insured Group Policy Plan

Procedure

To edit a membership of a fully-insured group policy plan:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to edit.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Membership** zone.

The **Membership** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the membership.
- **Characteristics** - Used to define the characteristics for the membership.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Displays information about the membership.	Not applicable
Plan Information	Indicates the policy plan for which the membership is defined.	Not applicable
Start Date	Used to specify the date from when the membership is effective for a fully-insured group policy plan. Note: The membership start date cannot be later than the membership end date. The membership start date cannot be earlier than the policy plan start date or later than policy plan end date.	Yes
End Date	Used to specify the date till when the membership is effective for a fully-insured group policy plan. Note: The membership end date cannot be earlier than the membership start date. The membership end date cannot be earlier than the policy plan start date or later than policy plan end date.	Yes
Membership Type	Used to indicate the type of membership. The valid values are: <ul style="list-style-type: none"> • COBRA • Medicare 	No

Field Name	Field Description	Mandatory (Yes or No)
External Membership ID	Used to specify the external membership ID.	No
	Note: Here, you need to specify a membership ID which is maintained in the external source system.	

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the membership, if required.
7. Click **Save**.

The changes made to the membership are saved.

How to define a characteristic for a membership	Defining a Characteristic for a Membership on page 371

Adding a Person to a Membership

The system enables you to add a member person to a membership when the membership is in the **Active** status. However, you can only add a member person in the **Active** status and not in the **Inactive** status.

Prerequisites

To add a person to a membership, you should have:

- Required persons defined in the application
- Contract relationship types defined in the application

Procedure

To add a person to a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership to which you want to add a person.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Add Person** link in the upper right corner of the **Member Persons** zone.

The **Member Person** screen appears. It contains the following sections:

- **Main** - Used to specify the basic membership details of the person.
- **Characteristics** - Used to define the characteristics for the member person.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Indicates the membership to which you want to add a person.	Not applicable
Person ID	Used to indicate the person whom you want to add to the membership. Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Person Search window appears.	Yes
Relationship Type	Used to indicate how the person is related to the main subscriber. Note: The list includes only those contract relationship types which are already defined in the system.	Yes
Financially Responsible	Used to indicate whether the person is financially responsible for the membership.	No
Main Subscriber	Used to indicate whether the person is the main subscriber of the membership.	No
Member	Used to indicate whether the person is a member or a non-member in the membership.	No
Start Date	Used to specify the date from when you want to add the person to the membership. Note: The member person start date cannot be later than the member person end date. The member person start date cannot be earlier than the membership start date or later than the membership end date.	Yes
End Date	Used to specify the date till when you want to add the person to the membership. Note: The member person end date cannot be earlier than the member person start date. The member person end date cannot be earlier than the membership start date or later than the membership end date.	No
External Medicare Beneficiary ID	Used to specify the Medicare beneficiary identifier of the person who has availed the Medicare benefit.	No

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status	Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> Active Inactive 	Yes
	Note: By default, the Active option is selected.	

- Enter the required details in the **Main** section.
- Define the characteristics for the member person, if required.
- Click **Save**.

The person is added to the membership.

Defining a Characteristic for a Member Person

Prerequisites

To define a characteristic for a member person, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Membership Person**)

Procedure

To define a characteristic for a member person:

- Ensure that the **Characteristics** section is expanded when you are adding a person to a membership or editing the membership details of a person.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to indicate the date from when the characteristic is effective for the member person.	Yes (Conditional)
		Note: This field is required when you are defining a characteristic for the member person.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to Membership Person .	Note: This field is required when you are defining a characteristic for the member person.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Note: This field is required when you are defining a characteristic for the member person.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the member person, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the member person, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the member person.

Inactivating a Membership

There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

Procedure

To inactivate a membership:

- Search for the membership in the **Membership** screen.
- In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership that you want to inactivate.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Inactivate** button in the **Membership** zone.

The status of the membership is changed to **Inactive**.

Related Topics

Inactivating a Member Person

The system enables you to inactivate a member person of a membership. If the member person is the main subscriber, the system automatically inactivates the membership and all other member persons which are included in the membership. It also does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO_STATUS_CD** column corresponding to the record in the **C1_AUDIT_EVENT**, **C1_AUDIT_EVENT_LOG**, and **CI_PRCE_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_ENTITY_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO_STATUS_CD** column corresponding to the record in the **CI_REPRC_REQ_DTL** table is set to **COMPLETE**.

Procedure

To inactivate a member person of a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to edit.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. In the **Member Persons** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the member person whom you want to inactivate.

The **Add/Edit Member Person** screen appears.

5. Select the **Inactive** option from the **Membership Person Status** list.

The status of the member person is changed to **Inactive**.

Editing the Membership Details of a Person

Prerequisites

To edit the membership details of a person, you should have:

- Contract relationship types defined in the application

Procedure

To edit the membership details of a person:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to edit.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. In the **Member Persons** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the member person whose details you want to edit.

The **Member Person** screen appears. It contains the following sections:

- **Main** - Used to specify the basic membership details of the person.
- **Characteristics** - Used to define the characteristics for the member person.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Indicates the membership to which the person is added.	Not applicable
Person ID	Indicates the person who is added to the membership.	Not applicable
Relationship Type	Used to indicate how the person is related to the main subscriber.	Yes
	Note: The list includes only those contract relationship types which are already defined in the system.	
Financially Responsible	Used to indicate whether the person is financially responsible for the membership.	No
Main Subscriber	Used to indicate whether the person is the main subscriber of the membership.	No
Member	Used to indicate whether the person is a member or a non-member in the membership.	No

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when you want to add the person to the membership.	Yes
	<p>Note:</p> <p>The member person start date cannot be later than the member person end date.</p> <p>The member person start date cannot be earlier than the membership start date or later than the membership end date.</p>	
End Date	Used to specify the date till when you want to add the person to the membership.	No
	<p>Note:</p> <p>The member person end date cannot be earlier than the member person start date.</p> <p>The member person end date cannot be earlier than the membership start date or later than the membership end date.</p>	
External Medicare Beneficiary ID	Used to specify the Medicare beneficiary identifier of the person who has availed the Medicare benefit.	No
Member Person Status	Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
	<p>Note:</p> <p>If you inactivate a member person who is the main subscriber, the system automatically inactivates the membership and all other member persons which are included in the membership.</p> <p>You cannot change the status of the member person to Active when the membership is in the Inactive status.</p>	

5. Modify the required details in the **Main** section.
6. Define, edit, or remove the characteristics from the member person, if required.
7. Click **Save**.

The changes made to the membership details of the person are saved.

Associating a Contract with a Membership

Prerequisites

To associate a contract with a membership, you should have:

- Contracts defined in the application
- Values defined for the **BILL_TO_TYPE_FLG** lookup field

Procedure

To associate a contract with a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership to which you want to associate a contract.
The **Membership** screen appears.
3. Click the **Contracts and Charges** tab.

The **Contracts and Charges** tab appears.

- Click the **Add Contract** link in the upper right corner of the **Membership Contracts** zone.

The **Associate Contract with Membership** screen appears. It contains the following section:

- Main** - Used to associate a contract with the membership. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Indicates the membership to which you want to associate a contract.	Not applicable
Contract ID	Used to indicate the contract that you want to associate with the membership. Note: The Search (🔍) icon appears corresponding to the Contract ID field. On clicking the Search icon, the Contract Search window appears.	Yes
Bill To	Used to indicate the entity against whom the corresponding charges should be billed. The valid values are: <ul style="list-style-type: none"> Federal State Group Individual Note: You cannot associate multiple contracts with the membership using the same bill to option. For example, you cannot associate C1 and C2 with M1 by selecting the Group option from the Bill To field.	Yes
Start Date	Used to specify the date from when you want to associate the contract with the membership. Note: The start date cannot be later than end date. The start date cannot be earlier than the membership start date or later than the membership end date.	Yes
End Date	Used to specify the date till when you want to associate the contract with the membership. Note: The end date cannot be earlier than the start date. The end date cannot be earlier than the membership start date or later than the membership end date.	No

- Enter the required details in the **Main** section.
- Click **Save**.

The contract is associated with the membership.

Self-Funded Group Health Insurance

Topics:

- [Pre-requisites](#)
- [Self-Funded Policy](#)
- [Self-Funded Policy Status Transition](#)
- [Algorithms Used in C1-ASOPolicy](#)
- [Policy \(Used for Searching\)](#)
- [Policy \(Used for Viewing\)](#)

Self-funded group health insurance, also known as Administrative Services Only (ASO), is a self insurance arrangement whereby an employer provides health or disability benefits to employees using the company's own funds. A self-insured employer will set up a special trust fund to earmark money (corporate and employee contributions) to pay incurred claims. It is also commonly known as self-funded employee health insurance.

In the self-funded group health plan, employers operate their own health plan. However, in the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. Employers choose to self-insure because it allows them to save the profit margin that an insurance company adds to its premium for a fully-insured group health plan. However, self-insuring exposes the company to much larger risk when more claims than expected must be paid.

Oracle Revenue Management and Billing (ORMB) supports the following types of self-funding approach:

- **Fully Self-Funded** - In the fully self-funded approach, the employer retains all the risk and bears the claim costs irrespective of any limit.
- **Partially Self-Funded** - In the partially self-funded approach, the employer purchases reinsurance or stop loss coverage to pass the risk to insurance company.

Oracle Revenue Management and Billing (ORMB) provides specialized methodologies for calculating claim amount with or without markups, enrollment fees, claim fees, specific stop-loss credits, aggregate stop-loss credits, non-recurring or recurring flat fees for covered services, network discounts, and fixed or enrollment based premium funds. Once the charges are calculated, the system bills the amount to the employer (known as the parent customer in ORMB) or to its logical designed billing entities (known as the bill groups in ORMB).

Oracle Revenue Management and Billing (ORMB) enables you to use the pricing methodologies and the billing engine for the self-funded group health insurance business. To design the pricing and billing models for the self-funded group health insurance business, you need to create the following entities in ORMB:

- Parent Customer
- Bill Groups
- Bill Group's Account
- Self-Funded Policy
- Price Items (for each covered service in the policy)

- Pricing Rule Types
- Pricing Rules

Pre-requisites

To set the billing system for a self-funded group customer, you need to do the following:

- Define the required policy types in the system.
- Define the required policy person roles in the system.
- Define the values for the **RUNOUT_ADM_OPT_FLG** lookup field.
- Define the required characteristic types where the characteristic entity is set to **Policy Type**.
- Define the required characteristic types where the characteristic entity is set to **Policy**.
- Define the required parameter values in the following algorithm which is attached to the **C1-ASOPolicy** business object:
 - C1-ASOBOPOSP
- Define the required parameter values in the following algorithm which is used in the lifecycle of the **C1-ASOPolicy** business object:
 - C1-ASOPOLMOA
- Set the values for the following option types in the **C1-ASOBLLNG** feature configuration:
 - Parent Customer Policy Person Role
 - Bill Group Policy Person Role
- Set the values for the following option types in the **C1-PERSTYPE** feature configuration:
 - Bill Group Person Type
 - Parent Person Type
- Set the batch control type of the **Policy Periodic Monitor (C1-POLPR)** batch to **Timed** and define the following attributes:
 - Time Interval
 - Timer Active
 - User ID
 - Batch Language
 - Email Address

Related Topics

For more information on...	See...
How to setup the C1-ASOBLLNG feature configuration	Setting the C1-ASOBLLNG Feature Configuration on page 3616

Self-Funded Policy

You can create a self-funded policy using a policy type where the policy category is set to **Self-Funded**. The policy type indicates the business object using which the self-funded policy should be created in the system.

As per the self-funded health insurance business, the system enables you to create a self-funded policy for a bill group where the parent customer is the policy holder. You can create or edit a self-funded policy from the **Policy** screen. In addition, you can create or edit a self-funded policy through a customer registration object or a health care inbound

message. If the self-funded policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

A self-funded policy encapsulates the following information:

- **Policy Persons** – While creating a self-funded policy, you need to associate the person who is the main customer of the policy. While associating a person with a self-funded policy, you need to specify the policy person role which indicates the role of the person in the policy. For example, whether the person associated with the policy is the policy holder, broker, or underwriter. You can associate multiple persons with a self-funded policy using the same or different policy person role. However, at a time, only one person can be the main customer of the policy.
- **Policy Contracts** – The system creates a contract for a self-funded policy when the policy is created either from the user interface or through an inbound message. For more information, refer to [Self-Funded Policy Contract Creation](#) on page 409.

On defining a self-funded policy, the status of the policy is set to **Pending**. You can then edit, delete or activate a policy. Once a self-funded policy is activated, you can renew the policy whenever required.

Note: If a self-funded policy is created through a customer registration object or a health care inbound message, the status of the policy is set to **Pending**.

In a self-funded policy, you can specify the policy period as well as the runout period. Here, the policy period means the period between the policy start and end dates when the policy is active. And, the runout period means the period between the runout start and end dates when the policy is no more active. Note that the system sets the runout start date to the policy end date + 1 Day when you specify the runout end date.

The system enables you to create a self-funded policy for the following contract types which are used in the self-funded health insurance business:

Contract Type	Policy (Example)	Policy Period (i.e. Period when Policy will be in the Active Status)	Runout Period (i.e. Period when Policy will be in the Runout Status)	Comments
12/12 (Claims Incurred and Paid During the Policy Period)	P1	01-01-2019 to 12-31-2019	-	Here, you will not specify the runout end date for the self-funded policy (i.e. P1).
12/15 (Claims Incurred During the Policy Period and Paid During the Policy and Runout Periods)	P2	01-01-2019 to 12-31-2019	01-01-2020 to 03-31-2020	Here, the runout period is derived when you set the runout end date of the self-funded policy (i.e. P2) to 03-31-2020.

Contract Type	Policy (Example)	Policy Period (i.e. Period when Policy will be in the Active Status)	Runout Period (i.e. Period when Policy will be in the Runout Status)	Comments
12/18 (Claims Incurred During the Policy Period and Paid During the Policy and Runout Periods)	P3	01-01-2019 to 12-31-2019	01-01-2020 to 06-30-2020	Here, the runout period is derived when you set the runout end date of the self-funded policy (i.e. P3) to 06-30-2020.
15/12 (Claims Incurred Three Months Prior to the Policy Start Date and During the Policy Period and Paid During the Policy Period)	P4	01-01-2019 to 12-31-2019	-	Here, you will not specify the runout end date for the self-funded policy (i.e. P4).

The system enables you to offer different pricing for different policy periods, such as active, runout, and post runout.

Self-Funded Policy Activation

A self-funded policy can be activated manually from the user interface or through the **Policy Periodic Monitor (C1-POLPR)** batch. You can activate a self-funded policy by clicking the **Activate** button in the **Policy** screen. On clicking the **Activate** button, the system checks whether the To Do created for the **Pending** status is completed. If the To Do created for the **Pending** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **Pending** to **In Force/Active**.

Note: The status of the policy is not changed from **Pending** to **In Force/Active** until the system date is later than or equal to the policy start date.

On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **Pending** status and the policy start date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Pending Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the start date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Pending Status** parameter is completed, it changes the status of the self-funded policy from **Pending** to **In Force/Active**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Active** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss
- Retention Type Claim Based
- Retention Type Enrollment Based
- Ancillary
- Flat Fees
- Level Funded

Transition of Self-Funded Policy to Runout Status

A self-funded policy can be transitioned to the **Runout** status from the user interface or through the **Policy Periodic Monitor (C1-POLPR)** batch. You can transition a self-funded policy to the **Runout** status by clicking the **Runout** button in the **Policy** screen. On clicking the **Runout** button, the system checks whether the To Do created for the **In Force/Active** status is completed. If the To Do created for the **In Force/Active** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **In Force/Active** to **Runout**.

Note: The status of the policy is not changed from **In Force/Active** to **Runout** when either of the following condition is met:

- The runout end date is not specified.
- The system date is earlier than or equal to the policy end date.
- The policy is renewed.

On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **In Force/Active** status and the policy end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Active Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Active Status** parameter is completed, it changes the status of the self-funded policy from **In Force/Active** to **Runout**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Runout** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss
- Retention Type Claim Based
- Ancillary
- Flat Fees
- Level Funded

Transition of Self-Funded Policy to Post Runout Status

A self-funded policy can be transitioned to the **Post Runout** status only through the **Policy Periodic Monitor (C1-POLPR)** batch. On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **Runout** status and the runout end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Runout Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the runout end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Runout Status** parameter is completed, it changes the status of the self-funded policy from **Runout** to **Post Runout**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Post Runout** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss

- Retention Type Claim Based
- Ancillary

Self-Funded Policy Renewal

You can renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy only when it is in the **In Force/Active** status and which is not yet renewed. You can renew a self-funded policy only from the user interface and not through a health care inbound message.

On renewing a self-funded policy, a new policy is created in the **Pending** status. The renewal date is stamped in the base policy. The information from the base policy is copied to the renewed policy. The start date of the renewed policy is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.

While renewing a self-funded policy, you cannot disassociate persons (from the renewed policy) who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration.

While renewing a self-funded policy, the system enables you to copy the following pricing rules of the base policy and thereby create new pricing rules for the renewed policy:

- Claim
- Retention Type Claim Based
- Retention Type Enrollment Based
- Recurring Flat Fees
- Ancillary

While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively. If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.

Once a policy is renewed, you cannot edit the base policy's end date or manually change the status of the base policy to **Runout**. The system automatically changes the status of the base policy to **Runout** when the status of the latest renewed policy is changed to **Runout**.

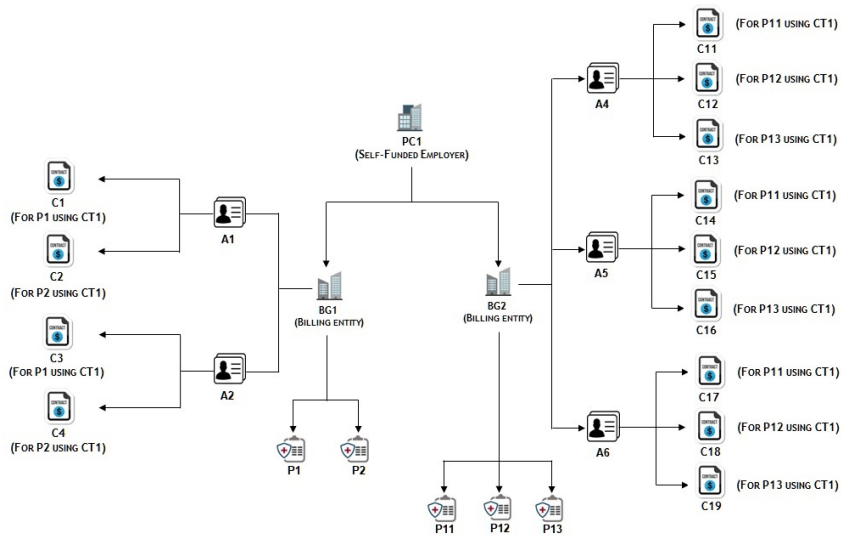

Self-Funded Policy Contract Creation

The system automatically creates contracts when a self-funded policy is created either from the user interface or through a health care inbound message. It creates a contract for a self-funded policy on each account of the bill group. It creates a contract using the contract type which is specified in the **Contract Type** parameter of an algorithm which is created using the **C1-ASOBOPOSP** algorithm type. Let us assume that the **Contract Type** parameter in the **C1-ASOBOPOSP** algorithm is set to CT1. Now, when you create the self-funded policies named P1 and P2 for BG1 and P11, P12, and P13 for BG2 through a health care inbound message, the system will create the following contracts on the respective accounts:

Bill Group	Account	Contract
BG1	A1	C1 (for P1 using the CT1 contract type)
		C2 (for P2 using the CT1 contract type)
	A2	C3 (for P1 using the CT1 contract type)
		C4 (for P2 using the CT1 contract type)
BG2	A4	C11 (for P11 using the CT1 contract type)

Bill Group	Account	Contract
		C12 (for P12 using the CT1 contract type)
		C13 (for P13 using the CT1 contract type)
		A5
	A5	C14 (for P11 using the CT1 contract type)
		C15 (for P12 using the CT1 contract type)
		C16 (for P13 using the CT1 contract type)
	A6	C17 (for P11 using the CT1 contract type)
		C18 (for P12 using the CT1 contract type)
		C19 (for P13 using the CT1 contract type)

The following figure graphically represents the above example:

You can also specify comma-separated values for the **Contract Type** parameter. The system will then create a contract using each contract type for each self-funded policy on each account of the bill group. Let us assume that the **Contract Type** parameter in the **C1-ASOBOPOSP** algorithm is set to CT1 , CT2. Now, when you create the self-funded policies named P1 and P2 for BG1 and P11 and P12 for BG2 through a health care inbound message, the system will create the following contracts on the respective accounts:

Bill Group	Account	Contract
BG1	A1	C1 (for P1 using the CT1 contract type)
		C2 (for P1 using the CT2 contract type)
		C3 (for P2 using the CT1 contract type)
		C4 (for P2 using the CT2 contract type)
	A2	C5 (for P1 using the CT1 contract type)

Bill Group	Account	Contract
		C6 (for P1 using the CT2 contract type)
		C7 (for P2 using the CT1 contract type)
		C8 (for P2 using the CT2 contract type)
BG2	A11	C11 (for P11 using the CT1 contract type)
		C12 (for P11 using the CT2 contract type)
		C13 (for P12 using the CT1 contract type)
		C14 (for P12 using the CT2 contract type)
	A12	C15 (for P11 using the CT1 contract type)
		C16 (for P11 using the CT2 contract type)
		C18 (for P12 using the CT1 contract type)
		C19 (for P12 using the CT2 contract type)

The following figure graphically represents the above example:

Self-Funded Policy Status Transition

The following figure graphically indicates how a self-funded policy moves from one status to another in its lifecycle:

Algorithms Used in C1-ASOPolicy

The following table lists the algorithms which are attached to the **C1-ASOPolicy** business object:

System Event	Algorithm	Algorithm Type	Description
Validation	C1-ASOPOLVAL	C1-ASOPOLVAL	Refer to C1-ASOPOLVAL on page 415.
Post-Processing	C1-ASOBOPOSP	C1-ASOPOLPOS	Refer to C1-ASOBOPOSP on page 416.

System Event	Algorithm	Algorithm Type	Description
	C1-ASOPRUCPY	C1-ASOPRUCPY	Refer to C1-ASOPRUCPY on page 416.

The following table lists the algorithms which are used in the lifecycle of the **C1-ASOPolicy** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Pending	Monitor	C1-ASOPOLMOA	C1-ASOPOLMOA	Refer to C1-ASOPOLMOA on page 416.
	Enter	C1-ASOPOLREN	C1-ASOPOLREN	Refer to C1-ASOPOLREN on page 417.
	Exit	C1-ASOPCKTD	C1-ASOPCKTD	Refer to C1-ASOPCKTD on page 417.
In Force/ Active	Monitor	C1-ASOPOLMOA	C1-ASOPOLMOA	Refer to C1-ASOPOLMOA on page 416.
	Exit	C1-ASOPCKTD	C1-ASOPCKTD	Refer to C1-ASOPCKTD on page 417.
Runout	Monitor	C1-ASOPOLMOA	C1-ASOPOLMOA	Refer to C1-ASOPOLMOA on page 416.
	Exit	C1-ASOPCKTD	C1-ASOPCKTD	Refer to C1-ASOPCKTD on page 417.
Post Runout	-	-	-	-

C1-ASOPOLVAL

This algorithm validates a self-funded policy throughout its lifecycle. It checks the following:

- The policy end date is not earlier than the policy start date.
- The runout end date is later than the policy end date.
- The runout end date is later than the system date while editing the policy which is in the **Runout** status.
- The runout end date is not removed when the policy is in the **Runout** or **Post Runout** status.
- The policy end date is not modified when the policy is in the **Runout** status.
- The policy end date is not set to a date which is later than or equal to the start date of a pricing rule which is defined for the **Runout** status.
- The runout end date is not set to a date which is later than or equal to the start date of a pricing rule which is defined for the **Post Runout** status.
- The runout end date is not set to a date which is earlier than the end date of a pricing rule which is defined for the **Runout** status.
- The policy is not edited when it is in the **Post Runout** status.
- The policy start date is not modified when the policy is in the **In Force/Active**, **Runout**, or **Post Runout** status.
- The policy person end date is not earlier than the policy person start date.

- The policy person role is specified while associating a person with the policy.
- One of the policy persons is set as the main customer of the policy.
- The policy end date is not changed when the policy is renewed.

C1-ASOBOPOSP

This algorithm is invoked when you create a self-funded policy either from the user interface or through an inbound message. It creates a contract of the specified contract type for the self-funded policy on each account of the bill group. For example, if you create a self-funded policy named P1 for a bill group who has two accounts - A1 and A2, the system will create two contracts for P1 - one on the A1 account and another on the A2 account.

It contains the following parameter:

- **Contract Type** - Used to indicate the contract type whose contract you want to create for the self-funded policy on each account of the bill group. You can also specify comma-separated values for this parameter. It will then create a contract of each contract type for the self-funded policy on each account of the bill group.

C1-ASOPRUCPY

This algorithm is invoked when the **Copy Pricing Rules** option is selected while renewing a self-funded policy. It copies the following pricing rules of the base policy and creates new pricing rules for the renewed policy:

- Claim
- Retention Type Claim Based
- Retention Type Enrollment Based
- Recurring Flat Fees
- Ancillary

While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively. If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.

C1-ASOPOLMOA

This algorithm is invoked when the **Policy Periodic Monitor (C1-POLPR)** batch is executed. It does the following:

- If the self-funded policy is in the **Pending** status and the policy start date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Pending Status** parameter.
- If the start date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Pending Status** parameter is completed, it changes the status of the self-funded policy from **Pending** to **In Force/Active**.
- If the self-funded policy is in the **In Force/Active** status and the policy end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Active Status** parameter.
- If the end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Active Status** parameter is completed, it changes the status of the self-funded policy from **In Force/Active** to **Runout**.
- If the self-funded policy is in the **Runout** status and the runout end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Runout Status** parameter.

- If the runout end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Runout Status** parameter is completed, it changes the status of the self-funded policy from **Runout** to **Post Runout**.

It contains the following parameters:

- **To Do Type for Pending Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the policy start date.
- **To Do Type for Active Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the policy end date.
- **To Do Type for Runout Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the runout end date.
- **X Days** - Used to specify the number of days prior to which you want to create a To Do for the self-funded policy.

All these parameters are mandatory.

C1-ASOPOLREN

This algorithm is invoked when you renew a self-funded policy. Once the new policy is created in the **Pending** status, it stamps the renewal date on the base policy.

C1-ASOPCKTD

This algorithm is invoked when you click the **Activate** and **Runout** buttons in the **Policy** screen. On clicking the **Activate** button, it checks whether the To Do created for the **Pending** status is completed. If the To Do created for the **Pending** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **Pending** to **In Force/Active**.

Similarly, on clicking the **Runout** button, it checks whether the To Do created for the **In Force/Active** status is completed. If the To Do created for the **In Force/Active** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **In Force/Active** to **Runout**.

It also validates the following:

- The status of the policy is not changed from **Pending** to **In Force/Active** until the system date is later than or equal to the policy start date.
- The status of the policy is not changed from **In Force/Active** to **Runout** when the runout end date is not specified.
- The status of the policy is not changed from **In Force/Active** to **Runout** until the system date is later than the policy end date.
- The status of the policy is not changed to **Runout** if it is renewed.

In addition, it also changes the status of the base policies to **Runout** when the status of the latest renewed policy is changed to **Runout**.

Policy (Used for Searching)

The **Policy** screen allows you to search for a policy using various search criteria. It also allows you to define a policy. It contains the following zone:

- [Search Policy](#) on page 314

Through this screen, you can navigate to the following screen:

- [Policy \(Used for Viewing\)](#) on page 325

Search Policy

The **Search Policy** zone allows you to search for a policy using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a policy using the policy or person details. The valid values are: <ul style="list-style-type: none"> • Policy Date/Policy Type/Status • Source System/Policy Number/Description • Person Name/Person Identifier • Policy Characteristics 	Yes
	Note: By default, the Policy Date/Policy Type/Status option is selected.	
Policy Type	Used to search policies which are created using a particular policy type.	No
	Note: This field appears when the Policy Date/Policy Type/Status option is selected from the Search By list.	
Start Date	Used to search policies which are effective from a particular date.	No
	Note: This field appears when the Policy Date/Policy Type/Status option is selected from the Search By list.	
Status	Used to search policies with a particular status. The valid values are: <ul style="list-style-type: none"> • In Force/Active • Canceled • Pending Cancellation • Pending • Pending Reinstatement • Pending Termination • Post Runout • Reinstated • Runout • Terminated 	No
	Note: This field appears when the Policy Date/Policy Type/Status option is selected from the Search By list.	

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search policies which are effective till a particular date.	No
	Note: This field appears when the Policy Date/Policy Type/Status option is selected from the Search By list.	
Source System	Used to search policies which originated from a particular external system.	No
	Note: This field appears when the Source System/Policy Number/Description option is selected from the Search By list.	
Policy Number	Used to search a policy with a particular policy number.	No
	Note: This field appears when the Source System/Policy Number/Description option is selected from the Search By list.	
Description	Used to search policies with a particular description.	No
	Note: This field appears when the Source System/Policy Number/Description option is selected from the Search By list.	
Person Name	Used to search policies to which a particular person is associated.	No
	Note: This field appears when the Person Name/Person Identifier option is selected from the Search By list.	
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)
	Note: This field appears when the Person Name/Person Identifier option is selected from the Search By list.	Note: If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search policies to which a person is associated.	Yes (Conditional)
	Note: This field appears when the Person Name/Person Identifier option is selected from the Search By list.	Note: If you specify the person identifier type as a search criteria, you have to specify the person identifier.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search policies for which a particular characteristic type is defined.	Yes (Conditional)
	<p>Note:</p> <p>This field appears when the Policy Characteristics option is selected from the Search By list.</p> <p>The list includes only those characteristic types where the characteristic entity is set to Policy.</p>	<p>Note: This field is required when you are searching for a policy using a characteristic.</p>
Characteristic Value	Used to search policies with a particular characteristic value.	Yes (Conditional)
	<p>Note:</p> <p>This field appears when the characteristic type is selected.</p> <p>If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.</p>	<p>Note: This field is required when you are searching for a policy using a characteristic.</p>

Note: You must specify at least one search criterion while searching for a policy.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	Displays additional information about the policy.
	Note: It has a link. On clicking the link, the Policy screen appears where you can view the details of the respective policy.
Source System	Indicates the external system from where the policy is originated.
Description	Displays the description of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

Column Name	Column Description						
Status	<p>Indicates the status of the policy. If the policy is created using the C1-POLICY business object, the valid values are:</p> <ul style="list-style-type: none"> • Pending • In Force/Active • Pending Cancellation • Canceled • Pending Reinstatement • Reinstated • Pending Termination • Terminated <p>However, if the policy is created using the C1-ASOPolicy business object, the valid values are:</p> <ul style="list-style-type: none"> • Pending • In Force/Active • Runout • Post Runout 						
Main Customer	<p>This column displays different data depending on whether you search for a policy using the policy or person details. The following table describes this column:</p> <table border="1" data-bbox="574 1037 1455 1717"> <thead> <tr> <th data-bbox="574 1037 1019 1085">If you search for a policy using...</th> <th data-bbox="1019 1037 1455 1085">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="574 1085 1019 1465"> <p>The Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics option</p> </td> <td data-bbox="1019 1085 1455 1465"> <p>The Main Customer column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="1024 1304 1450 1451" style="border: 1px solid black; padding: 5px;"> <p>Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.</p> </div> </td> </tr> <tr> <td data-bbox="574 1465 1019 1717"> <p>The Person Name/Person Identifier option</p> </td> <td data-bbox="1019 1465 1455 1717"> <p>The Main Customer column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No </td> </tr> </tbody> </table>	If you search for a policy using...	Then...	<p>The Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics option</p>	<p>The Main Customer column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="1024 1304 1450 1451" style="border: 1px solid black; padding: 5px;"> <p>Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.</p> </div>	<p>The Person Name/Person Identifier option</p>	<p>The Main Customer column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No
If you search for a policy using...	Then...						
<p>The Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics option</p>	<p>The Main Customer column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="1024 1304 1450 1451" style="border: 1px solid black; padding: 5px;"> <p>Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.</p> </div>						
<p>The Person Name/Person Identifier option</p>	<p>The Main Customer column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No 						

Column Name	Column Description
Person Information	Indicates the person who is associated with the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<p>Note:</p> <p>It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.</p> <p>This column appears when the Person Name/Person Identifier option is selected from the Search By list.</p>
Policy Person Role	Indicates the role using which the person is associated with the policy.
	<p>Note: This column appears when the Person Name/Person Identifier option is selected from the Search By list.</p>

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Policy

Prerequisites

To search for a policy, you should have:

- Policy types and person identifier types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Policy**.
A sub-menu appears.
3. Click the **Search** option from the **Policy** sub-menu.
The **Policy** screen appears.
4. Enter the search criteria in the **Search Policy** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

Viewing the Policy Details

Procedure

To view the details of a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to view.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the details of the policy in the **Policy** zone.

Defining a Policy

Oracle Revenue Management and Billing enables you to define a policy for the fully-insured and self-funded health insurance business. You can define a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. However, you can define a self-funded policy using a policy type where the policy category is set to **Self-Funded**.

Note: At present, the **Fully-Insured Individual** policy category is not supported in the system.

Prerequisites

To define a policy, you should have:

- Policy types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup

Note: This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT_ADM_OPT_FLG** lookup field

Note: This prerequisite is applicable when you want to define a self-funded policy.

Procedure

To define a policy:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Policy**.
A sub-menu appears.
3. Click the **Add** option from the **Policy** sub-menu.

The **Select Policy Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to indicate the policy type using which you want to create a policy. Note: If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to Self-Funded .	Yes

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy** screen.

4. Select the required policy type from the respective field.
5. Click **OK**.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the external system from where the policy is originated.	Yes
	Note: This field appears when you are defining a policy using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual .	
Start Date	Used to specify the date from when the policy is effective.	Yes
	Note: The policy start date cannot be later than the policy end date.	
End Date	Used to specify the date till when the policy is effective.	Yes
	Note: The policy end date cannot be earlier than the policy start date.	
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No
	Note: The runout end date cannot be earlier than or equal to the policy end date. This field appears when you are defining a policy using a policy type where the policy category is set to Self-Funded .	
Runout Administration Fees	Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> • None • Percentage of Claim 	No
	Note: At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy. This field appears when you are defining a policy using a policy type where the policy category is set to Self-Funded .	

Field Name	Field Description	Mandatory (Yes or No)
Advance Level Funding Eligibility	Indicates whether the self-funded policy is eligible for advance billing feature of level funding.	Not applicable
	<p>Note:</p> <p>This is a read-only field. By default, the value is set to No. You can edit the advance level funding eligibility only through a health care inbound message.</p> <p>This field appears when you are defining a policy using a policy type where the policy category is set to Self-Funded.</p>	

- Enter the required details in the **Main** section.
- Associate the required persons with the policy.

Note: While defining a policy, you must associate a person who is the main customer of the policy.

- Define the characteristics for the policy, if required.
- Click **Save**.

The policy is defined and its status is set to **Pending**.

Associating a Person with a Policy

Prerequisites

To associate a person with a policy, you should have:

- Required persons defined in the application
- Required policy person roles defined in the application

Procedure

To associate a person with a policy:

- Ensure that the **Persons** section is expanded when you are defining or editing a policy.

The **Persons** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Person	Used to indicate the person that you want to associate with the policy.	Yes
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Person Search window appears.</p> <p>On specifying the person ID, the person name appears corresponding to the Person field.</p>	
Sequence	Used to specify the sequence number for the associated person.	Yes
Policy Person Role	Used to indicate the role of a person in the policy.	Yes
Main Customer	Used to indicate whether the person is the main customer of the policy.	Yes (Conditional)
	<p>Note: At a time, only one person can be the main customer of the policy.</p>	
Start Date	Used to specify the date from when the person is associated with the policy.	Yes
	<p>Note:</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than the policy start date and later than the policy end date.</p>	
End Date	Used to specify the date till when the person is associated with the policy.	No
	<p>Note:</p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the policy start date and later than the policy end date. This validation is done when the policy is transition to the status which is not specified in the Skip Status for Policy Person End Date Validation parameter of the C1-POLBOVAL algorithm. For example, if you set the Skip Status for Policy Person End Date Validation parameter of the C1-POLBOVAL algorithm to TERMINATED, the system will not perform this validation when the status of the policy is changed to Terminated.</p>	

2. Enter the required details in the **Persons** section.

Note: While associating the persons with a policy, you must always ensure that one person is the main customer of the policy.

- If you want to associate more than one person with the policy, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to dissociate a person from the policy, click the **Delete (🗑)** icon corresponding to the person.

- Click **Save**.

The persons are associated with the policy.

Defining a Characteristic for a Policy

Prerequisites

To define a characteristic for a policy, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To define a characteristic for a policy:

- Ensure that the **Characteristics** section is expanded when you are defining or editing a policy.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the policy.	Yes (Conditional)
	Note: The effective date cannot be earlier than the policy start date and later than the policy end date.	Note: This field is required when you are defining a characteristic for the policy.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to Policy .	Note: This field is required when you are defining a characteristic for the policy.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p>Note:</p> <p>If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.</p>	<p>Note: This field is required when you are defining a characteristic for the policy.</p>

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the policy, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the policy, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the policy.

Policy (Used for Viewing)

The **Policy** screen allows you to:

- View the details of a fully-insured group or self-funded policy
- Edit the details of a fully-insured group or self-funded policy
- Activate a fully-insured group or self-funded policy
- Add or edit plans in a fully-insured group policy
- Add memberships to a fully-insured group policy plan
- Initiate the termination process for a fully-insured group policy
- Terminate a fully-insured group policy
- Initiate the cancellation process for a fully-insured group policy
- Cancel a fully-insured group policy
- Initiate the reinstatement process for a fully-insured group policy
- Reinstate a fully-insured group policy
- View the log of a fully-insured group or self-funded policy

- Add a log entry for a fully-insured group or self-funded policy

It consists of the following tabs:

- [Policy - Main](#) on page 326
- [Policy - Plan](#) on page 333
- [Policy - Log](#) on page 335

Policy - Main

The **Main** tab displays information about the policy. It contains the following zones:

- [Policy](#) on page 326
- [Policy Characteristics](#) on page 332

Policy

The **Policy** zone displays the details of the fully-insured group or self-funded policy. It contains the following sections:

- **Main** - Displays basic information about the policy. It contains the following fields:

Field Name	Field Description
Base Policy Information	Displays information about the base policy.
	Note: This field appears when you are viewing the details of a renewed policy which is created using a policy type where the policy category is set to Self-Funded .
Policy Information	Displays information about the policy.
Policy Type	Indicates the policy type using which the policy is created.
	Note: It has a link. On clicking the link, the Policy Type screen appears where you can view the details of the respective policy type.
Status	<p>Indicates the status of the policy. If the policy is created using the C1-POLICY business object, the valid values are:</p> <ul style="list-style-type: none"> • Pending • In Force/Active • Pending Cancellation • Canceled • Pending Reinstatement • Reinstated • Pending Termination • Terminated <p>However, if the policy is created using the C1-ASOPolicy business object, the valid values are:</p> <ul style="list-style-type: none"> • Pending • In Force/Active • Runout • Post Runout

Field Name	Field Description
Status Reason	Indicates the reason why the policy is terminated.
	<p>Note:</p> <p>It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the respective termination reason.</p> <p>This field appears when you are viewing the details of a terminated or reinstated policy which is created using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual.</p>
Policy Number	Displays the policy number.
Description	Displays the description of the policy.
Source System	Indicates the external system from where the policy is originated.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Renewal Date	Displays the date when the policy is renewed.
	Note: This field appears when you are viewing the details of a policy which is renewed.

Field Name	Field Description																													
Paid Through Date	Indicates the term end date of the last fully or partially paid term. The system considers the term to be fully paid when the threshold limit is met.																													
	<p>Note:</p> <p>This field appears when the following conditions are met:</p> <ul style="list-style-type: none"> When you are viewing the details of a policy which is created using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual. When the paid through date is calculated at the policy level. 																													
	The paid through date is calculated while freezing or canceling a payment or adjustment depending on whether the required algorithm is attached to the respective system event:

Initiate Cancellation	<p>Used to initiate the cancellation process for the fully-insured group policy.</p> <p>Note: The Initiate Cancellation button appears when the fully-insured group policy is in the In Force/Active status.</p>						
Cancel	<p>Used to cancel the fully-insured group policy.</p> <p>Note: The Cancel button appears when the fully-insured group policy is in the Pending Cancellation status.</p>						

Button Name	Button Description
Initiate Termination	Used to initiate the termination process for the fully-insured group policy.
	Note: The Initiate Termination button appears when the fully-insured group policy is in the In Force/Active status.
Terminate	Used to terminate the fully-insured group policy.
	Note: The Terminate button appears when the fully-insured group policy is in the In Force/Active, Pending Reinstatement, or Pending Termination status.
Initiate Reinstatement	Used to initiate the reinstatement process for the terminated policy.
	Note: The Initiate Reinstatement button appears when the fully-insured group policy is in the Terminated status.
Reinstate	Used to reinstate the terminated policy.
	Note: The Reinstate button appears when the fully-insured group policy is in the Pending Reinstatement or Terminated status.
Runout	Used to transition the self-funded policy to the Runout status.
	<p>Note:</p> <p>The Runout button appears when the self-funded policy is in the In Force/Active status. You cannot transition a self-funded policy to the Runout status when:</p> <ul style="list-style-type: none"> • The self-funded policy is renewed. • The runout end date is not specified. • The policy end date is earlier than the system date.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the policy is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the policy status is updated.
Create Date/Time	Displays the date and time when the policy is created.

- **Termination Information** - Displays the termination details of the fully-insured group policy. It appears when the policy is in the **Pending Termination** status. It contains the following fields:

Field Name	Field Description
Terminate Date	Displays the date when you want to terminate the policy.

Field Name	Field Description
Terminate Reason	Indicates the reason why the termination process is initiated for the policy. Note: It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the respective termination reason.

- **Reinstate Information** - Displays the reinstatement details of the terminated policy. It appears when the policy is in the **Pending Reinstatement** status. It contains the following fields:

Field Name	Field Description
Reinstate Reason	Indicates the reason why you want to reinstate the fully-insured group policy. Note: It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the respective reinstatement reason.

Policy Characteristics

The **Policy Characteristics** zone lists the characteristics of the fully-insured group or self-funded policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Column Name	Column Description
Description	Displays the description of the characteristic value.
	Note: The data appears in this column when the type of characteristic value is set to Predefined Value .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Policy - Plan

The **Plan** tab lists the plans defined for the policy and memberships defined for each policy plan. It contains the following zones:

- [Plans](#) on page 333
- [Memberships](#) on page 334

Plans

The **Plans** zone lists the plans which are defined in the policy. It contains the following columns:

Column Name	Column Description
Plan Information	Displays information about the policy plan. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Policy Plan screen appears where you can view the details of the respective policy plan.
Price Item Information	Indicates the price item to which the policy plan is directly associated.
	Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> • Commercial • Medicare Affiliated
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Edit	On clicking the Edit () icon, the Plan screen appears where you can edit the details of the policy plan.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new policy plan by clicking the **Add** link in the upper-right corner of this zone. On clicking the **Broadcast** () icon corresponding to a policy plan, the **Memberships** zone appears.

Note: Ideally, you define plans in a policy which is created using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**.

You can filter the list using various search criteria (such as, **Price Item**, **Plan Number**, and **Effective From**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper-right corner of this zone.

Memberships

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership. Note: It has a link. On clicking the link, the Membership screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> • Active • Inactive • Terminated
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> • COBRA • Medicare • Retiree

Column Name	Column Description
Benefits	On clicking the Benefits (🔗) icon, the Benefit screen appears where you can view the Medicare benefits of the member persons who belong to the membership.
	Note: The Benefits icon appears when a Medicare benefit is defined for a member person who belongs to the membership.
Membership ID	Displays the membership ID.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608

Policy - Log

The **Log** tab contains the following zone:

- [Policy Log](#) on page 335

Policy Log

The **Policy Log** zone lists the complete trail of actions performed on the policy. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the policy.
Details	Displays the details about the action performed on the policy.
User	Indicates the user who has performed the action on the policy.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the policy.
	Note: It contains a link. On clicking the link, the screen appears where you can view the details of the respective related object.
Status Reason	Indicates the reason why the status of the policy is changed.

Note: You can manually add a log entry for the policy by clicking the **Add Log Entry** link in the upper right corner of the **Policy Log** zone.

Activating a Policy

Procedure

To activate a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to activate.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Activate** button in the **Policy** zone.

The status of the policy is changed to **In Force/Active**.

Note:

The **Activate** button appears only when a policy of the respective category is in either of the following status:

Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> • Pending • Pending Termination
Self-Funded	<ul style="list-style-type: none"> • Pending

Editing a Policy

Prerequisites

To edit a policy, you should have:

- Values defined for the **C1-SourceSystemLookup** extendable lookup

Note: This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT_ADM_OPT_FLG** lookup field

Note: This prerequisite is applicable when you want to define a self-funded policy.

Procedure

To edit a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Policy** zone.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Displays information about the policy.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined.	Not applicable
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> • Pending • In Force/Active • Runout • Post Runout 	Not applicable
	Note: This field appears when you are editing a policy which is created using a policy type where the policy category is set to Self-Funded .	
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	Note: This field appears when you are editing a policy which is created using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual .	

Field Name	Field Description	Mandatory (Yes or No)
Start Date	<p>Used to specify the date from when the policy is effective.</p> <p>Note: The policy start date cannot be later than the policy end date. You cannot change the start date of a self-funded policy when it is in the In Force/Active, Runout, or Post Runout status.</p>	Yes
End Date	<p>Used to specify the date till when the policy is effective.</p> <p>Note: The policy end date cannot be earlier than the policy start date. You cannot change the end date when the self-funded policy is in the Runout status. You cannot set the end date of a self-funded policy to a date which is later than or equal to the start date of a pricing rule which is defined for the Runout status. You cannot change the end date when the policy is renewed.</p>	Yes
Runout End Date	<p>Used to specify the date when the runout period of the self-funded policy ends.</p> <p>Note: This field appears when you are editing a policy which is created using a policy type where the policy category is set to Self-Funded. The runout end date cannot be earlier than or equal to the policy end date. The runout end date cannot be earlier than or equal to the system date when the policy is in the Runout status. You cannot remove the runout end date when the policy is in the Runout or Post Runout status. You cannot set the runout end date to a date which is later than or equal to the start date of a pricing rule which is defined for the Post Runout status. You cannot set the runout end date to a date which is earlier than the end date of a pricing rule which is defined for the Runout status.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> • None • Percentage of Claim 	No
	<p>Note:</p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to Self-Funded.</p>	

Note:

The **Edit** button appears when a policy of the respective category is in either of the following status:

Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> • In Force/Active • Canceled • Pending Cancellation • Pending • Pending Reinstatement • Pending Termination • Terminated
Self-Funded	<ul style="list-style-type: none"> • In Force/Active • Pending • Runout

5. Modify the required details in the **Main** section.
6. Associate the persons with the policy, if required.

Note: While editing a policy, you must ensure that one person is associated as the main customer of the policy.

7. Define, edit, or remove characteristics of the policy, if required.
8. Click **Save**.

The changes made to the policy are saved.

Manually Changing the Status of a Self-Funded Policy to Runout

Prerequisites

To manually change the status of a self-funded policy to **Runout**, you should have:

- Runout end date specified in the self-funded policy.

Procedure

To manually change the status of a self-funded policy to **Runout**:

1. Search for the self-funded policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the self-funded policy whose status you want to change.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Runout** button in the **Policy** zone.

The status of the self-funded policy is changed to **Runout**.

Note:

The **Runout** button appears when the self-funded policy is in the **In Force/Active** status.

You cannot transition a self-funded policy to the **Runout** status when:

- The self-funded policy is renewed.
- The runout end date is not specified.
- The policy end date is earlier than the system date.

Renewing a Self-Funded Policy of a Bill Group

Oracle Revenue Management and Billing enables you to renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy when it is in the **In Force/Active** status and is not yet renewed. For more information, see [Self-Funded Policy Renewal](#) on page 409.

Procedure

To renew a self-funded policy of a bill group:

1. Search for the bill group who is associated with the self-funded policy (which you want to renew) in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the bill group whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears.

4. In the **Bill Group Self-Funded Policy Information** zone, click the **Renew** () icon in the **Renew** column corresponding to the self-funded policy which you want to renew.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the renewed policy.
- **Persons** - Used to associate or disassociate persons from the renewed policy.

Note: You cannot disassociate persons who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration.

- **Characteristics** - Used to define the characteristics for the renewed policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Base Policy Information	Indicates the policy which you want to renew.	Not applicable
Policy Type	Indicates the policy type using which the base policy is created.	Not applicable
Policy Number	Used to specify the policy number of the renewed policy.	Yes
Description	Used to specify the description for the renewed policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	<p>Used to specify the date from when the renewed policy is effective.</p> <p>Note:</p> <p>By default, the start date is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than or equal to the base policy's end date.</p>	Yes
End Date	<p>Used to specify the date till when the renewed policy is effective.</p> <p>Note: The end date cannot be earlier than the start date.</p>	Yes
Runout End Date	<p>Used to specify the date when the runout period of the renewed policy ends.</p> <p>Note: The runout end date cannot be earlier than or equal to the renewed policy's end date.</p>	No
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> • None • Percentage of Claim <p>Note: At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Copy Pricing Rules	<p>Used to indicate whether you want to copy the pricing rules of the base policy to the renewed policy. If you select the Copy Pricing Rules option, the system copies the following pricing rules of the base policy:</p> <ul style="list-style-type: none"> • Claim • Retention Type Claim Based • Retention Type Enrollment Based • Recurring Flat Fees • Ancillary <p>Note:</p> <p>While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively.</p> <p>If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.</p>	No
Copy Advance Level Funding Eligibility	<p>Used to indicate whether you want to copy the advance level funding eligibility value of the base policy to the renewed policy.</p> <p>Note:</p> <p>If the Copy Advance Level Funding Eligibility option is set to Y in the base policy, the system activates the renewed self-funded policy on the policy renewal even if the renewed policy's start date is later than the system date.</p> <p>This field appears only when you want to renew a self-funded policy.</p>	No

Note: The **Renew** icon appears when the policy is in the **In Force/Active** status and it is not yet renewed.

5. Enter the required details in the **Main** section.
6. Associate or disassociate persons from the renewed policy, if required.
7. Define, edit, or remove characteristics of the renewed policy, if required.
8. Click **Save**.

The renewed policy is created in the **Pending** status. The renewal date is stamped corresponding to the base policy in the **Bill Group Self-Funded Policy Information** zone.

Adding a Log Entry for a Policy

Procedure

To add a log entry for a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to add a log entry.

The **Policy** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Policy Log** zone.

The **Add Policy Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Displays information about the policy.	Not applicable
Log Details	Used to specify additional comments for the policy.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Policy Log** zone.

Individual Health Insurance

Topics:

- [Individual Membership](#)
- [Individual Membership Termination](#)
- [Individual Membership Renewal](#)
- [Automatic Contract Creation for Individual Membership](#)
- [Rate Guarantee for Individual Membership](#)
- [Late Setup Notification](#)
- [Young Adult Coverage in an Individual Membership](#)
- [Individual Membership Preference](#)
- [Binder Payment for Individual Membership](#)
- [Membership Status Reason Preference](#)

Individual health insurance is a coverage that an individual purchase on its own, on an individual or family basis, as opposed to obtaining through an employer. An individual can buy a generic, Medicare, Medicaid, or CHIP health insurance plan from a health insurance payer or from an insurance exchange.

A health insurance payer and insurance exchange sells different plans from the health products to an individual. A health product is a discrete package of health insurance coverage benefits that are offered using a particular product network type (such as health maintenance organization, preferred provider organization, exclusive provider organization, point of service, or indemnity) within a service area.

A health product can include multiple health benefit plans which may cover medical expenses, hospitalization, doctor and hospital visits, prescription drugs, wellness care, etc. A health benefit plan can be a primary or add-on plan. A primary health benefit plan is a standalone plan, which is sold directly. For example, Medical Insurance is a primary health insurance plan.

An add-on plan is also known as supplemental plan. An add-on plan can be an ancillary or rider plan. An add-on plan is not a standalone plan and hence it is not sold directly. For example, the Dental, Vision, Accidental Death, Disability, Critical Illness, Long-Term Care, and Life Insurance plans can be sold as add-on health insurance plans.

Oracle Revenue Management and Billing enables you to create and edit the following entities for a fully-insured individual business:

- Health Products
- Health Plans
- Individual Memberships
- Member Persons
- Medicare or Other Benefits
- Accounts
- Contracts
- Price Items (offered as services)
- Pricing Rule Types
- Pricing Rules
- Price Assignments
- Billable Charges

Two new business objects named **C1-HealthcareProduct** and **C1-HealthPlan** are introduced in this release. The **C1-HealthcareProduct** business object

enables you to create a health product. You can define and edit a health product through a health product and plan inbound message. While defining a health product, you need to specify the following details – product type, product sub type, product category, product LOB, product LOB category, start date, end date, status, etc. A health product can be a bundled or non-bundled product. A bundled product means it includes one or more health products. You can define characteristics for a health product. A health product should be associated with a division (i.e. service area). You can associate a health product to one or more divisions and one division can have one or more health products.

The **C1-HealthPlan** business object enables you to create a health plan for a health product. You can define and edit a health plan through a health product and plan inbound message. While defining a health plan, you need to specify the following details – health product, start date, end date, status, etc. In addition, you need to indicate whether the health plan is a charitable plan, standard plan, grandfather plan, qualified from exchange, ancillary plan, rider plan, add-on plan, etc. You can define characteristics for a health plan.

A health product can have one or more health plans. On inactivating a health product, the system will not automatically inactivate the respective health plans. An individual can subscribe for one or more health plans. The system creates an individual membership for each subscribed health plan. An individual membership can have one or more member persons. One member person in an individual membership must be the main subscriber. You can add one or more dependent persons in the individual membership. One member person in an individual membership should be financially responsible for the individual membership. For more information, see the [Individual Membership](#) on page 453 section.

If an individual subscribe for an add-on health plan along with a primary health plan, the system enables you to indirectly link a primary health plan with an add-on health plan by associating the primary individual membership with the add-on individual membership. At present, you can associate only one add-on individual membership with the primary individual membership. The system creates the billable charges for both primary and add-on individual memberships independently.

On terminating the primary individual membership, the system provides a facility to automatically terminate the individual membership on the add-on health plan. For more information, see the [Individual Membership Termination](#) on page 455 section. However, on canceling, reinstating, or renewing a primary individual membership, the system does not automatically cancel, reinstate, or renew the individual membership on the add-on health plan. To cancel, reinstate, or renew an individual membership on the add-on health plan, the system must receive the required information for the individual membership from the enrollment system.

Individual Membership

Oracle Revenue Management and Billing enables you to create and edit individual memberships from the user interface and through a health care inbound message or membership repricing inbound web service. Note that the user interface for adding and editing individual memberships is not yet well-designed and should only be used by the presales and sales teams for learning and demo purposes and not by the customers.

A new business object for individual membership named **C1-IndMembership** is introduced in this release. While creating an individual membership through a health care inbound message, you need to specify the following details:

- **Health Plan** - Used to indicate the health plan for which the main subscriber has enrolled.
- **Member Person Status** - Used to indicate the main subscriber or dependent person's status.
- **Status Reason** - Used to indicate the reason why you want to change the status of the main subscriber or dependent person.
- **Auto Renew** - Used to indicate whether the individual membership should be automatically renewed.
- **Contract Period** - Used to indicate the period (in months) for which the individual membership should be automatically renewed.
- **Membership Renewal Date** - Used to indicate the date when the individual membership should be renewed. It is required for manual renewal of the individual membership. In case of automatic renewal, the membership renewal date is calculated by the system.
- **Associated Membership Details** - Used to associate the individual membership with another individual membership which is created for the add-on health insurance plan.
- **Member Identifiers** - Used to specify one or more identifiers for the individual membership.
- **Exchange Details** - Used to indicate whether the individual membership is purchased from the exchange. If the individual membership is purchased from the exchange, you need to specify the exchange ID.
- **Binder Payment Details** - Used to indicate whether the binder payment is required for the individual membership. If so, you need to specify the following details:
 - Grace Days
 - Binder Liability Amount (if required)
 - Threshold Percentage (if required)
 - Hold Billing

For more information about the binder payments, see the [Binder Payment for Individual Membership](#) on page 468 section.

Note: On creating an individual membership for a health plan, the membership category is set to **INDV**. However, on creating a group membership for a policy plan, the membership category is set to **GRUP**.

The following table lists the statuses introduced in the lifecycle of the **C1-IndMembership** business object:

Individual Status	Membership	Description
Draft		An individual membership is created in the Draft status and then transitioned to either the Pending Effectuation or Active status as mentioned in the health care inbound message or membership repricing incoming message.

Individual Membership Status	Description
Pending Effectuation	<p>If the main subscriber status is set to Pending Effectuation, the system sets the status of the individual membership to Pending Effectuation. The system determines the individual membership status reason using the membership status reason preference which is specified in the Status Reason Mapping option type of the C1-ASOBLNG feature configuration.</p> <p>The system monitors whether the binder payments (if required) are received for the individual membership in the Pending Effectuation status. If the binder payments are received, the status of the individual membership is not automatically transitioned to Active. The status of the individual membership is changed from Pending Effectuation to Active only when the main subscriber status update information is received through a health care inbound message or membership repricing inbound web service.</p>
Active	<p>If the main subscriber status is set to Active, the system sets the status of the individual membership to Active. The system determines the individual membership status reason using the membership status reason preference which is specified in the Status Reason Mapping option type of the C1-ASOBLNG feature configuration.</p> <p>If the binder payments are not required for the individual membership, you can directly set the status of main subscriber to Active. In addition, if you want to reinstate the individual membership, you must set the status of main subscriber to Active. The system will then change the status of the individual membership from Terminated to Active. In case of reinstatement of the individual membership, the status of the dependent persons is not changed automatically from Inactive to Active unless the dependent person status update information is received through a health care inbound message or membership repricing inbound web service.</p>
Terminated	<p>If the main subscriber status is set to Inactive, the system sets the status of the individual membership to Terminated. The system determines the individual membership status reason using the membership status reason preference which is specified in the Status Reason Mapping option type of the C1-ASOBLNG feature configuration.</p> <p>Once the status of the individual membership is set to Terminated, the system automatically changes the status of the dependent persons to Inactive. Note that while inactivating the dependent persons, the system only considers the dependent persons who are in the Active status. The system determines the dependent person status reason using the membership status reason preference. The system also updates the end date of the individual membership, main subscriber, and dependent persons. For more information, see the Individual Membership Termination on page 455 section.</p>

Individual Status	Membership	Description
Canceled		<p>If the main subscriber status is set to Canceled, the system sets the status of the individual membership to Canceled. The system determines the individual membership status reason using the membership status reason preference which is specified in the Status Reason Mapping option type of the C1-ASOBLNG feature configuration.</p> <p>Once the status of the individual membership is set to Canceled, the system automatically changes the status of the dependent persons to Canceled. The system determines the dependent person status reason using the membership status reason preference.</p> <p>The system will also cancel the billable charges and bill segment (if any) created for the individual membership or financially responsible member person account.</p>

The system also enables you to change the status of a dependent person in the individual membership through a health care inbound message or membership repricing inbound web service. On changing the status of a member person to **Pending Effectuated** or **Active**, the system considers the member person during premium calculation.

On changing the status of the individual membership and member person, the system creates an audit event to trigger the repricing feature. The **C1-IndMembership** business object is configured for the entity audit framework. However, the repricing is triggered only when an active audit event type for the **C1-IndMembership** business object is created in the system.

The system creates appropriate log entries during the individual membership and member person status transition. You can view the status transition logs of individual membership in the **Log** tab of the **Membership (Used for Viewing)** screen. A new zone named **Member Person Log** is introduced in the **Main** tab of the **Membership (Used for Viewing)** screen. It enables you to view the log entries generated on the member person status transition.

You can define individual membership status reasons through the **Status Reason** screen. A new lookup field named **MEMB_PERS_STAT_RSN_FLG** is introduced in this release. Here, you can add the status reasons for the member person.

Individual Membership Termination

To terminate an individual membership, you need to change the status of the main subscriber to **Inactive** through a health care inbound message or membership repricing inbound web service. Along with the main subscriber status, you need to specify the status reason and end date for the main subscriber. If the end date is earlier than or equal to the inbound processing date, the system updates the status, status reason, and end date of the main subscriber and then changes the status of the individual membership to **Terminated**. The system determines the individual membership status reason using the membership status reason preference which is specified in the **Status Reason Mapping** option type of the **C1-ASOBLNG** feature configuration.

Once the status of the individual membership is set to **Terminated**, the system automatically changes the status of the dependent persons to **Inactive**. Note that while inactivating the dependent persons, the system only considers the dependent persons who are in the **Active** status. The system determines the dependent person status reason using the membership status reason preference.

If the main subscriber end date is later than the inbound processing date, the system creates a record in the **CI_MEMBERSHIP_PROCESS** table with the **Pending** status. The system stores the following information in the record:

- Membership ID
- Member Person ID
- Whether the member person is a main subscriber

- Processing date (it is set to future dated end date of the member person)
- Required action (is set to **Terminate**)

A new batch named **C1-MEPRC** is introduced in this release. On the **C1-MEPRC** batch execution, the system checks whether there are any records in the **CI_MEMBERSHIP_PROCESS** table with the **Pending** status. If so, the system checks whether the processing date of the record is earlier than or equal to the system date. If so, the system determines the required action to be taken for the individual membership from the record. If the **MEMB_PROCESS_FLG** column of the record is set to **Terminate** and the **MAIN_CUST_SW** column is set to **N**, the system changes the status of the dependent person to **Inactive** and updates the end date of the dependent person.

However, if the **MEMB_PROCESS_FLG** column of the record is set to **Terminate** and the **MAIN_CUST_SW** column is set to **Y**, the system updates the status and end date of the main subscriber and then changes the status of the individual membership to **Terminated**. Once the status of the individual membership is set to **Terminated**, the system automatically changes the status of the dependent persons to **Inactive**. The system also updates the end date of the individual membership and dependent persons.

The system enables you to configure whether the individual membership on the add-on health insurance plan should be automatically terminated when the primary individual membership is terminated. If the **Cascade Associate Membership** parameter in the **C1-MEMSTSUP** algorithm is set to **Y**, the system changes the status of the associated individual membership to **Terminated**. Once the status of the associated individual membership is set to **Terminated**, the system automatically changes the status of its main subscriber and dependent persons to **Inactive**. The system also updates the end date of the associated individual membership, its main subscriber and its dependent persons.

Once the required action is completed for the record in the **CI_MEMBERSHIP_PROCESS** table, the system changes the status of the record to **Complete**. However, if the system receives a reinstatement request for an individual membership before processing the termination request, the system changes the status of the record in the **CI_MEMBERSHIP_PROCESS** table to **Canceled**.

Individual Membership Renewal

Oracle Revenue Management and Billing enables you to renew an individual membership in the following two ways:

- Manually
- Automatically

While creating or editing an individual membership through a health care inbound message or membership repricing inbound web service, you must set the **Auto Renew** option for the individual membership to either **Y** or **N**.

If the **Auto Renew** option for an individual membership is set to **N**, you need to specify the following details in a health care inbound message or membership repricing incoming message:

- Membership renewal date
- Status, status reason, and end date of the main subscriber
- Status, status reason, and end date of the dependent person

The enrollment system can send the renewal information either during the enrollment period or after the enrollment period. Irrespective of when the renewal information is received, the membership renewal date must be set to the membership end date + 1. For example, if the enrollment period is from 01-01-2021 to 12-31-2021, then the system must receive the membership renewal date as 01-01-2022. On renewing an individual membership, the dependent person in the individual membership is not automatically activated unless the activation information is received for the dependent person from the enrollment system. The associated membership for an add-on health insurance plan is not automatically renewed unless the renewal information is received for the respective membership from the enrollment system.

If the **Auto Renew** option for an individual membership is set to **Y**, you need to specify the contract period for which the individual membership should be automatically renewed. The system then creates a record in the **CI_MEMBERSHIP_PROCESS** table with the **Pending** status. The system stores the following information in the record:

- Membership ID

- Main Subscriber ID
- Whether the member person is a main subscriber
- Processing date (it is set to the membership end date)
- Required action (is set to **Renew**)

On the **C1-MEPRC** batch execution, the system checks whether there are any records in the **CI_MEMBERSHIP_PROCESS** table with the **Pending** status. If so, the system checks whether the processing date of the record is earlier than or equal to the system date. If so, the system determines the required action to be taken for the individual membership from the record. If the **MEMB_PROCESS_FLG** column of the record is set to **Renew** and the **MAIN_CUST_SW** column is set to **Y**, the system calculates the renewal date and new end date for the individual membership.

The renewal date for the individual membership is set to membership end date + 1. For example, if the enrollment period is from 01-01-2021 to 12-31-2021, the system sets the renewal date to 01-01-2022 (i.e. 12-31-2021 + 1). The new membership end date is calculated using the renewal date and contract period. For example, if the renewal date is 01-01-2022 and contract period is 12 months, the system sets the end date of membership, main subscriber, and dependent persons to 12-31-2022. The associated membership for an add-on health insurance plan is not automatically renewed during the individual membership renewal.

The automatic renewal request for an individual membership must be received during the enrollment period. If the automatic renewal request for an individual membership is received after the enrollment period, the system will not renew the individual membership automatically.

Once the membership end date is changed, the system will trigger the repricing feature and accordingly create or extend the billable charge for the renewed period.

Automatic Contract Creation for Individual Membership

Oracle Revenue Management and Billing automatically creates contracts for each account of the financially responsible member person when:

- Person is added to an individual membership
- Account is added for a financially responsible member person
- Health plan is added or edited in the system

In the former two scenarios, the system derives the individual membership where the person is financially responsible for the membership. Once the individual membership is derived, the system derives the health plan for which the individual membership is enrolled.

Once the health plan is derived, the system checks whether the pricing rule types are associated with the health plan. If a pricing rule type is associated with the health plan and the pricing rule type contains one or more price items, it creates a contract using a distinct contract type which is associated with each price item. Let us assume that PRT1 is associated with the health plan and it contains three price items - PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two distinct contracts - C1 using CT1 and C2 using CT2.

If multiple pricing rule types are associated with the health plan and each pricing rule type contains multiple price items, it creates a contract using a distinct contract type which is associated with each price item of each pricing rule type.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective individual membership. If the same contract type is associated with the same or different price items on the same or different pricing rule types of different health plans, the contract start date is set to the start date of the earliest health plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

Note:

The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

Rate Guarantee for Individual Membership

At times, the insurance carriers provide rate guarantee health plans to a fully-insured individual wherein the insurance rate does not change for the rate guarantee period (i.e. lock-in period). Oracle Revenue Management and Billing enables you to configure guaranteed rate for one or more health insurance services offered to an individual person. Unless, there are some qualifying life events (QLE), the system will calculate the premium on the same rate for the next coverage period until the rate guarantee period is over.

The system enables you to maintain the rate guarantee details for each individual membership through a health care inbound message or through membership repricing inbound web service. It enables you to capture the following details:

- **Rate Guarantee Start Date** – Used to specify the date from when the rate guarantee is available for the individual membership.
- **Rate Guarantee End Date** – Used to specify the date till when the rate guarantee is available for the individual membership.
- **Rate Guarantee Status** – Used to indicate the status of the rate guarantee period. The valid values are - **Active** and **Inactive**.

You can send the rate guarantee details for an individual membership during enrollment (i.e. on membership creation), during coverage period, or during membership renewal. While sending the rate guarantee details of an individual membership, ensure that the active rate guarantee records do not have overlapping date range.

The system enables you to define the rate guarantee business rules. If the rate guarantee details are not specified for an individual membership during enrollment, the system derives the rate guarantee details for the individual membership through a rate guarantee business rule. The rate guarantee business rule indicates the following:

- **Rate Guarantee Applicability** – Used to indicate whether the rate guarantee is available for the individual membership.
- **Rate Guarantee Period** – Used to derive the rate guarantee start and end dates. The system sets the rate guarantee start date to the membership start date and the rate guarantee end date to the rate guarantee start date + rate guarantee period.

There might be situations wherein the rate guarantee details are received for an individual membership later during the coverage period or during membership renewal through a health care inbound message. In such scenarios, the system will then give precedence to the rate guarantee details which are received through a health care inbound message and will not derive the rate guarantee details from the rate guarantee business rule which is stamped against the individual membership.

A new column named **Rate Guarantee** is available in the **Price Items** section while defining or editing an age based or tier based pricing rule type. While creating a charge for an individual membership, the system checks whether the **Rate Guarantee** option is selected for the price item in the respective pricing rule type and whether the billable charge timeline falls within the rate guarantee period. If so, the system derives the rate guarantee pricing rule for the price items where the **Rate Guarantee** option is selected.

The system stores the pricing rule which is effective for such price items on the rate guarantee start date as the rate guarantee pricing rule. Until the rate guarantee period is over, the system considers the rate guarantee pricing rule for the individual membership during premium calculation. This ensures that the same rate is charged for a health insurance service even when the rate has increased for the health insurance service in the system.

The Entity Audit framework is configured for the Rate Guarantee feature. The system will create audit events when the rate guarantee records are added or updated for an individual membership.

Late Setup Notification

Oracle Revenue Management and Billing enables you to create a To Do notification when the details to include a member person in a group or individual membership is received in ORMB beyond the late setup threshold days from the member person start date. This notification can help the billing analyst to take appropriate actions, such as giving premium waiver to the member person if required.

To enable this feature, you need to set the following option types in the **C1-ASOBLLNG** feature configuration:

- **Monitor Late Setup** – Used to indicate whether you want to enable the late setup notification feature. The valid values are – **Y** and **N**. By default, the value is set to **N**.
- **Late Setup Threshold in Days** – Used to indicate the number of threshold days for late setup notification. This option type is required when the **Monitor Late Setup** option type is set to **Y**. The value must be greater than zero.

For example, if the system receives the information to add a member person with the start date as **01-15-2021** to an individual membership on **02-15-2021** and the late setup threshold days in the **C1-ASOBLLNG** feature configuration is set to **15**. In this case, the number of days between the member person start date and member person creation date is greater than late setup threshold days, and therefore a To Do is created using the To Do type which is specified in the **C1-LATESET** algorithm attached to the group or individual membership business object, respectively.

To implement this business requirement, the system stores the member person creation date (which was not done in the previous releases) while adding a member person to a group or individual membership. A new batch named **C1-LSUB** is introduced in this release. It derives the creation date for all member persons in the existing group and individual memberships and stamps it against the corresponding record in the **CRE_DTTM** column of the **CI_MEMBERSHIP_PER** table. This batch must be executed only once after upgrading to Oracle Revenue Management and Billing Version 3.1.0.0.0. For more information, refer to *Oracle Revenue Management and Billing Version 3.1.0.0.0 Upgrade Guide*.

Young Adult Coverage in an Individual Membership

Oracle Revenue Management and Billing enables you to calculate premium for the young adults who are covered in an individual membership. While creating or editing an individual membership, or while adding, editing, or inactivating a member person in an individual membership through a health care inbound message or through membership repricing inbound web service, the system derives the fully-insured pricing business rule for the individual membership. The system enables you to define the following young adult related output parameters in the fully-insured pricing business rules:

- **Young Adult Applicability** - Used to indicate whether you want to consider the young adults during the premium calculation. The valid values are - **Yes** and **No**.
- **Young Adult Max Age Limit** - Used to indicate the maximum age limit for young adults who are eligible for premium calculation. This output parameter is mandatory when the **Young Adult Applicability** parameter is set to **Yes**.

While deriving member relationship for each member person of the individual membership from a member relationship structure, the system considers the following information from the fully-insured pricing business rule of the individual membership:

- Young Adult Applicability
- Young Adult Max Age Limit

Similarly, while deriving subscription tier for the individual membership from a subscription tier structure, the system considers the following information from the fully-insured pricing business rule of the individual membership:

- Young Adult Applicability

- Young Adult Max Age Limit

Thus, while calculating the premium for an individual membership using an age based or tier based pricing rule, the system considers the young adult for the premium calculation based on the above two parameters set in the fully-insured pricing business rule.

Individual Membership Preference

The Individual Membership Preference enables you to set the attributes which are used during the creation of an individual membership. While deriving the details for an individual membership, the system uses the following attributes from the individual membership preference:

- Health Plan Characteristics

You can define, edit, delete, and copy an individual membership preference through the **Field Mapping** screen.

Searching for an Individual Membership Preference

Prerequisites

To search for an individual membership preference, you should have:

- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To search for an individual membership preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.
The **Field Mapping** screen appears.
4. Select the **Individual Membership** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of individual membership preferences that meet the search criteria appears in the **Search Results** section.

Viewing the Individual Membership Preference Details

Procedure

To view the details of an individual membership preference:

1. Search for the individual membership preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** () icon corresponding to the individual membership preference whose details you want to view.

The **Field Mapping** zone appears.

- View the details of the individual membership preference in the **Field Mapping** zone.

Defining an Individual Membership Preference

Prerequisites

To define an individual membership preference, you should have:

- Values defined in the **FIELD_CAT_FLG** and **FIELD_NAME_FLG** lookup fields
- Required characteristic type defined for the health plan in the application.

Procedure

To define an individual membership preference:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **F** and then click **Field Mapping**.

A sub-menu appears.

- Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the billing preference. The valid values are: <ul style="list-style-type: none"> Field Mapping Medicare Plan Benefit Package Membership Status Reason Mapping 	Yes

Note: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Field Mapping** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- Main** - Used to specify basic details of the billing preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the individual membership preference.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the individual membership preference.	Yes
Detailed Description	Used to specify additional information about the individual membership preference.	No
Status	Used to indicate the status of the billing preference. The valid values are: <ul style="list-style-type: none"> Active Inactive 	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> Billing Binder Payment Geographic Rating Area Individual Membership Medicare Medicare Plan Benefit Member Reconciliation Member Relationship and Subscription Tier Membership Status Reason Statement Construct 	Yes

- **Preference Settings** - Used to set the attributes in the individual membership preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the individual membership preference. The valid values are: <ul style="list-style-type: none"> Health Plan Characteristics - Used when you want to derive the health plan ID for an individual membership. 	Yes (Conditional)
		Note: This field is required while setting an attribute in the individual membership preference.

Field Name	Field Description	Mandatory (Yes or No)					
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the billing preference:	Yes (Conditional)					
	<table border="1"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then, this field is...</th> </tr> </thead> <tbody> <tr> <td>Health Plan Characteristics</td> <td>Used to specify the characteristic type which indicates the plan ID of the health plan. This characteristic type is defined for a health plan. The system uses this plan ID to create a health plan specific contract. The system then uses this characteristic type to determine the account of the financial responsible person for whom the billable charges should be generated.</td> </tr> <tr> <td colspan="2"> <p>Note: The list includes only those characteristics which are already defined in the system.</p> </td> </tr> </tbody> </table>	If the attribute is set to...	Then, this field is...	Health Plan Characteristics	Used to specify the characteristic type which indicates the plan ID of the health plan. This characteristic type is defined for a health plan. The system uses this plan ID to create a health plan specific contract. The system then uses this characteristic type to determine the account of the financial responsible person for whom the billable charges should be generated.	<p>Note: The list includes only those characteristics which are already defined in the system.</p>	
If the attribute is set to...	Then, this field is...						
Health Plan Characteristics	Used to specify the characteristic type which indicates the plan ID of the health plan. This characteristic type is defined for a health plan. The system uses this plan ID to create a health plan specific contract. The system then uses this characteristic type to determine the account of the financial responsible person for whom the billable charges should be generated.						
<p>Note: The list includes only those characteristics which are already defined in the system.</p>							
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> Account Billable Charge <p>Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.</p>	No					

Note: While defining an individual membership preference, you must set at least one attribute in the individual membership preference.

- Select the **Individual Membership** option from the **Preference Category** list.
- Enter the required details in the **Main** section.
- Select the required attribute and value from the respective fields.
- If you want to set more than one attribute in the individual membership preference, click the **Add (+)** icon and then repeat step 8.

Note: However, if you want to remove an attribute from the individual membership preference, click the **Delete** (🗑️) icon corresponding to the attribute.

10. Click Save.

The individual membership preference is defined.

Editing an Individual Membership Preference

Prerequisites

To edit an individual membership preference, you should have:

- Values defined in the **FIELD_CAT_FLG** and **FIELD_NAME_FLG** lookup fields
- Required characteristic type defined for the health plan in the application.

Procedure

To edit an individual membership preference:

1. Search for an individual membership preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the individual membership preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the individual membership preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the individual membership preference.	Not applicable
Description	Used to specify the description for the individual membership preference.	Yes
Detailed Description	Used to specify additional information about the individual membership preference.	No
Status	Used to indicate the status of the individual membership preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> • Individual Membership 	Not applicable

- **Preference Settings** - Used to set the attributes in the individual membership preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)				
Attribute	Used to indicate the attribute which you want to set in the individual membership preference. The valid values are: <ul style="list-style-type: none"> Health Plan Characteristics - Used when you want to derive the additional information of a health plan for an individual membership. 	Yes (Conditional) Note: This field is required while setting an attribute in the individual membership preference.				
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the individual membership preference: <table border="1" data-bbox="639 646 1182 982"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then, this field is...</th> </tr> </thead> <tbody> <tr> <td>Health Plan Characteristics</td> <td>Used to specify the health plan characteristics. Note: The list includes only those characteristics which are already defined in the system.</td> </tr> </tbody> </table>	If the attribute is set to...	Then, this field is...	Health Plan Characteristics	Used to specify the health plan characteristics. Note: The list includes only those characteristics which are already defined in the system.	Yes (Conditional) Note: This field is required while setting an attribute in the individual membership preference.
If the attribute is set to...	Then, this field is...					
Health Plan Characteristics	Used to specify the health plan characteristics. Note: The list includes only those characteristics which are already defined in the system.					
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> Account Billable Charge Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.	No				

Note: Alternatively, you can edit the details of an individual membership by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the individual membership, if required.

Note: You must set at least one attribute in an individual membership preference.

5. Click **Save**.

The changes made to the individual membership are saved.

Copying an Individual Membership Preference

Instead of creating an individual membership preference from scratch, you can create a new individual membership preference using an existing individual membership preference. This is possible through copying an individual membership preference. On copying an individual membership preference, the details including the attributes are copied to the new individual membership preference. You can then edit the details, if required.

Prerequisites

To copy an individual membership preference, you should have:

- Individual membership preference (whose copy you want to create) defined in the application
- Values defined in the **FIELD_CAT_FLG** and **FIELD_NAME_FLG** lookup fields
- Required characteristic type defined for the health plan in the application.

Procedure

To copy an individual membership preference:

1. Search for the individual membership preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the individual membership preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the individual membership preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the individual membership preference.	Yes
Description	Used to specify the description for the individual membership preference.	Yes
Detailed Description	Used to specify additional information about the individual membership preference.	No
Status	Used to indicate the status of the billing preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Indicates the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> • Individual Membership 	Not applicable

- **Preference Settings** - Used to set the attributes in the individual membership preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)				
Attribute	Used to indicate the attribute which you want to set in the individual membership preference. The valid values are: <ul style="list-style-type: none"> Health Plan Characteristics - Used when you want to derive the additional information of a health plan for an individual membership. 	Yes (Conditional) Note: This field is required while setting an attribute in the individual membership preference.				
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the billing preference: <table border="1" data-bbox="639 611 1182 951"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then, this field is...</th> </tr> </thead> <tbody> <tr> <td>Health Plan Characteristics</td> <td>Used to specify the health plan characteristics. Note: The list includes only those characteristics which are already defined in the system.</td> </tr> </tbody> </table>	If the attribute is set to...	Then, this field is...	Health Plan Characteristics	Used to specify the health plan characteristics. Note: The list includes only those characteristics which are already defined in the system.	Yes (Conditional) Note: This field is required while setting an attribute in the individual membership preference.
If the attribute is set to...	Then, this field is...					
Health Plan Characteristics	Used to specify the health plan characteristics. Note: The list includes only those characteristics which are already defined in the system.					
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> Account Billable Charge Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.	No				

Note: While defining an individual membership preference, you must set at least one attribute in the individual membership preference.

- Enter the required details in the **Main** section.
- Define, edit, or remove the attribute from the individual membership preference, if required.
- Click **Save**.

The new individual membership preference is defined.

Deleting an Individual Membership Preference

Procedure

To delete an individual membership preference:

1. Search for the individual membership preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the individual membership preference that you want to delete.

A message appears confirming whether you want to delete the individual membership preference.

Tip: Alternatively, you can delete an individual membership preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The individual membership preference is deleted.

Binder Payment for Individual Membership

On enrolling for an individual health insurance plan, the financial responsible member person needs to pay first month's premium often called as binder payment to complete the enrollment process. The individual membership enrollment is effectuated when the binder payment is received. The binder payment should be received by the billing system and not by the enrollment system. The binder payment is not required during individual membership renewal and reinstatement.

Few health insurance payers send bills to collect the binder payment, whereas few do not send bills to collect the binder payment. In other words, the bill generation process for individual membership is kept on hold by some health insurance payers until the binder payment is received.

Oracle Revenue Management and Billing enables you to create binder payments for an individual membership. For more information on how to create a binder payment, see the [Binder Payment Creation](#) on page 476 section. While creating an individual membership through a health care inbound message or through a membership repricing inbound web service, you must set the **Binder Payment Applicability** option for the individual membership to either **Y** or **N**. You can set the **Binder Payment Applicability** option to **Y** only when the following conditions are met:

- Individual membership status is set to the value specified in the **Membership Status Code for Pending Effectuation** attribute of the binder payment preference.
- Membership status reason is set to the value specified in the **Membership Status Reason when Awaiting Binder Payment** attribute of the binder payment preference.

The system considers the binder payment preference which is specified in the **Binder Payment Field Mapping** option type of the **C1-ASOBLLNG** feature configuration.

If the **Binder Payment Applicability** option is set to **Y** for an individual membership, it means that the system should monitor whether the binder payment is received before activating the individual membership. On receiving the binder payment for the individual membership, the system only changes the membership and its member persons' status reason and not the membership and its member person' status. The membership and its member persons' status is changed only when the system receives the main subscriber's status update information from the enrollment system through a health care inbound message. However, if the **Binder Payment Applicability** option is set to **N** for an individual membership,

it means that binder payment is not required for activating the individual membership. For more information about the binder payment monitor process, see the [Binder Payment Monitoring](#) on page 476 section.

If the **Binder Payment Applicability** option is set to **Y** for an individual membership, you need to specify the following binder payment details through a health care inbound message:

- **Grace Days** – Used to calculate the grace date for the individual membership.
- **Binder Liability Amount** – Used to specify the binder liability amount. This data is required when the **Consider Binder Liability Amount** attribute is set to **Y** in the binder payment preference.
- **Threshold Percentage** – Used to specify the threshold percentage using which the threshold amount should be calculated.
- **Hold Billing** – Used to indicate whether you want to hold the bill generation process for the individual membership until the binder payment is received.

The system facilitates you to validate binder payment against the threshold amount. If the **Consider Binder Liability Amount** attribute is set to **Y** in the binder payment preference, the system calculates the threshold amount for the binder payment using the binder liability amount and threshold percentage. For example, if the binder liability amount is set to 50 and threshold percentage is set to 20, the system sets the threshold amount to 10 (i.e. $(50*20)/100$). The system can receive one or more binder payments for an individual membership. If the **Consider Binder Liability Amount** attribute is set to **Y**, the system must receive the binder payments whose sum is equal to or greater than the threshold amount. However, if the **Consider Binder Liability Amount** attribute is set to **N**, the system does not calculate the threshold amount for the binder payment. In such case, the system must receive a binder payment with the amount greater than zero.

On editing the binder liability amount and threshold percentage for an individual membership, the system recalculates the threshold amount for the binder payment. On creating a billable charge for an individual membership where the **Hold Billing** option is set to **Y**, the system will set the bill after date in the billable charge to a far future date (i.e. 12-31-2099).

Prerequisites

To setup the binder payment process, you need to do the following:

- Define the binder payment identification characteristic type for the payment in the system.
- Define the required status reason for the membership in the system.
- Define the required configurations for the following binder payment fields in the system.
 - Binder Payment Applicability
 - Hold Billing
 - Threshold Percentage
 - Grace Days
- Define the binder payment field mapping preference in the system.
- Values defined for binder payment in the **FIELD_CAT_FLG** lookup field
- Set the values for the following option types in the **C1-ASOBLLNG** feature configuration:
 - Binder Payment Field Mapping
- Attach an algorithm of the **C1-THRSHDAMT** algorithm type to the **Post-Processing** system event of the **C1-IndMembership** business object.
- Attach an algorithm of the **C1-BNDRH** algorithm type to the **Enter** system event of the **C1-IndMembership** business object where the status is **Active**.
- Attach an algorithm of the **C1-FICRETBC** algorithm type to the **Billable Charge Creation Post Processing** system event of the **Fully Insured Age Based** and **Fully Insured Tier Based** pricing rule type.

- Attach an algorithm of the **C1-BNFTODO** algorithm type and attach it as a soft parameter in the **C1-BPMNT** batch.
- Define the values in the parameter of the **C1-CCPYTSADS** algorithm.
- Lockbox tender types defined in the **C1_LBX_TENDER_TYPE** lookup field.
- Lockbox record type, lockbox reference identification qualifier, and lockbox remittance identification types defined in the **C1_LBX_820_RECORD_TYPE**, **C1_LBX_REF_IDQ_LKP**, and **C1_LBX_RMR_ID_TYPE** lookup fields respectively.

Algorithms Used in Binder Payment

The following table lists the algorithms which are used in the binder payment:

Algorithm	Algorithm Type	Description
C1-THRSHDAMT	C1-THRSHDAMT	Refer to CI-THRSHDAMT on page 475
C1-BNDRH	C1-BNDRH	Refer to CI-BNDRH on page 470
C1-FICRETBC	C1-FICRETBC	Refer to CI-FICRETBC on page 473
C1-CCPYTSADS	C1-CCPYTSADS	Refer to CI-CCPYTSADS on page 471
C1-BNFTODO	C1-BNFTODO	Refer to CI-BNFTODO on page 471

C1-BNDRH

This algorithm is invoked during the membership activation process. It checks whether the binder payment is received for the membership. If the binder payment is received, the membership status is changed from **Pending Effectuation** to **Active**.

Note: At present, this algorithm is invoked only during the membership enrollment and not for membership reinstatement, where the membership status is changed from **Terminated** to **Active**.

This algorithm is invoked using the following scenario:

If...	Then...
The membership is in the Active status and the binder payment attributes like the Consider Binder Liability Amount Flag is configured as N along with the Membership Status Reason when Binder Payment Received is configured as Binder Payment Received in the Field Mapping screen	<p>The system checks whether the hold billing switch in the CI_MEMBERSHIP table contains any value. If any value exists, the system releases the billable charges which are kept on hold for the membership. In addition, the system performs the following operations:</p> <ul style="list-style-type: none"> • Retrieves the account (of the financial responsible person) for the membership. • Retrieves the non-binder payment contracts for the accounts from the CI_SA table. • Retrieves the billable charges present on the non-binder payment contracts where the membership ID is stamped as a characteristic. • Checks whether the bill after date of each billable charge contains a future date. If the bill after date contains a future date then it is changed to the system date minus one.

C1-BNFTODO

This algorithm is invoked from the **C1-BNDMNTR** binder payment monitoring batch, specifically for creating a To Do. This algorithm considers the following scenarios:

Scenario	System Behavior
The binder payment is received within the grace days	The algorithm creates a To Do and updates either the membership or corresponding member's status reason to Binder Payment Received .
The binder payment is not received within the grace days	The algorithm creates a To Do and updates either the membership or corresponding member's status reason to Binder Payment not Received .
The Consider Binder Liability Amount Flag attribute is set to Y and the binder payment amount is received.	The algorithm retrieves the value of the To Do Type for Binder Payment Received attribute from the Field Mapping screen and creates the To Do with the message, Binder Payment of Amount [%1] Received for Membership with Binder Payment Identifier [%2] and Health Plan [%3]
The Consider Binder Liability Amount Flag attribute is set to N and at least a single binder payment is received.	The algorithm retrieves the value of the To Do Type for Binder Payment Received attribute from the Field Mapping screen and creates the To Do with the message, Binder Payment of Amount [%1] Received for Membership with Binder Payment Identifier [%2] and Health Plan [%3]
The Consider Binder Liability Amount Flag attribute is set to Y and the binder payment is not received.	The algorithm retrieves the value of the To Do Type for Binder Payment Not Received attribute from the Field Mapping screen and creates the To Do with the message, Binder Payment of expected amount [%1] not received for Membership with Binder Payment Identifier [%2] and Health Plan [%3]
The Consider Binder Liability Amount Flag attribute is set to N and not even a single binder payment is received.	The algorithm retrieves the value of the To Do Type for Binder Payment Not Received attribute from the Field Mapping screen and creates the To Do with the message, Binder Payment is not received for Membership with Binder Payment Identifier [%1] and Health Plan [%2]

Note:

- [%1] refers to the total payment amount, comprising of all the payments made till date.
- [%2] refers to the binder payment identifier.
- [%3] refers to the specific health plan.

The **Consider Binder Liability Amount Flag** attribute is configured in the **Field Mapping** screen whereas the **To Do Creation** process happens when the **C1-BNFTODO** algorithm is attached as a soft parameter on the **C1-BNDMNTR** batch.

C1-CCPYTSADS

This algorithm is invoked when it is attached to the **Payment Tender Staging Distribution** system event of the customer class to which the account belongs. In addition, it checks whether the payment received is the first payment for the account. If the payment happens to be the first payment for the account, the payment is applied against the binder contract, which is created using the contract type specified in the payment distribution algorithm of the **Binder Payment** match type.

This algorithm introduces the following new parameters which are used for individual binder payment functionality:

- **Check Binder Payment For Individual** - Used when you want to transfer the payment to the binder contract. The valid values are:
 - Y
 - N

- **Membership Status Reason** - Used to notify the status reason of the binder payment for the membership. The valid value is:
 - **Awaiting Binder Payment**
- **Exchange Assigned Subscriber Number Characteristic** - Used while creating payment staging characteristic.
- **Exchange Assigned Subscriber Number Id Type** - Used when you want to identify the membership from the membership identifier (**CI_MEMBERSHIP_IDENTIFIER**) table.

This algorithm considers the following scenarios:

If...	Then...
The Check Promise To Pay parameter is set to Y	The algorithm checks whether there is an active promise to pay for the account. If an active promise to pay exists, the payment is applied against the contract which is created using the contract type specified in the payment distribution algorithm of the On Account match type.
The Check Payment Agreement Request parameter is set to Y	The algorithm checks whether there is an active payment agreement request for the account. If an active payment agreement exists, the payment is applied against the contract which is created using the contract type specified in the payment distribution algorithm of the On Account match type.
The Check Promise To Pay and Check Payment Agreement Request parameters are set to N	The payment is applied to the account's unpaid bills in the order of the due date. If the payment amount is greater than the sum total of the account's billed balance plus the overpayment threshold amount, the entire payment amount is applied against the excess credit contract of the account.
The payment amount is greater than the account's billed balance, but less than the sum total of the account's billed balance plus the overpayment threshold amount	The payment is first applied against the unpaid bills of the account and the overpayment amount is then applied against the excess credit contract of the account.
The Check Binder Payment for Individual parameter is set to Y	The algorithm retrieves the membership by using the binder payment identification value which is received in the payment characteristics from the EDI 820 file.
The Membership Status Code for Pending Effectuation attribute is set to Pending Effectuation and the Membership Status Reason Hold / Awaiting Binder Payment attribute is set to Awaiting Binder Payment in the Field Mapping screen	<p>The algorithm performs the following steps:</p> <ol style="list-style-type: none"> 1. Retrieves the Binder Contract Type attribute and its value from the Field Mapping screen. 2. If the contract information is not found in the Binder Contract Type attribute then a new contract Id of the type Binder Contract is created on the account. If the contract information is found, the contract Id of the account is retrieved using the Binder Contract Type attribute. 3. Creates a payment staging record using the Binder Payment Match Type soft parameter and the value as the binder contract Id of the account, retrieved using the Binder Contract Type attribute. 4. Stores the binder payment identification value as a characteristic on the payment.

If...	Then...
<p>If the Membership Status Code for Pending Effectuation attribute is not Pending Effectuation and the Membership Status Reason Hold / Awaiting Binder Payment attribute is not Awaiting Binder Payment in the Field Mapping screen</p>	<p>The algorithm performs the following steps:</p> <ol style="list-style-type: none"> 1. The payment is applied against the bill. 2. The binder payment identification value is added as a characteristic on the payment when the payment is received from the EDI 820 file against the bill Id. 3. The already existing soft parameters related to binder payment are removed and the binder related parameters are retrieved from the Field Mapping screen.

It contains the following parameters:

- **Check Binder Payment** - Used when you want to check whether the payment is the first payment for the account and the tender used for the payment is not an automatic payment. The valid values are:
 - Y
 - N
- **Check Promise To Pay** - Used when you want to check whether there is an active promise to pay for the account. The valid values are:
 - Y
 - N
- **Check Payment Agreement Request** - Used when you want to check whether there is an active payment agreement request for the account. The valid values are:
 - Y
 - N
- **Overpayment Threshold Amount** - Used to specify the overpayment threshold amount.
- **Bill Match Type** - Used to specify the match type using which you want to apply the payment against the unpaid bills of the account.
- **Binder Payment Match Type** - Used to specify the match type using which you want to apply the first non-automatic payment against the contract of the account.
- **On Account Match Type** - Used to specify the match type using which you want to apply the payment against the contract of the account.
- **Payment Review Reason Characteristic Type** - Used to specify the characteristic type which you want to use to store the payment reason.
- **Payment Review Reason for Active Promise To Pay** - Used to specify the characteristic value that must be specified when there is an active promise to pay for the account.
- **Payment Review Reason for Active Payment Agreement Request** - Used to specify the characteristic value that must be specified when there is an active payment agreement request for the account.
- **Payment Review Reason for Overpayment** - Used to specify the characteristic value that must be specified when the payment amount is greater than the sum total of account's billed balance plus overpayment threshold amount.
- **Excess Credit Contract Type** - Used to specify the contract type using which the excess credit contract should be created if it does not exist for the account.

C1-FICRETBC

Prerequisites

- Define the values for the option types **CTME (Characteristic Type For Membership Id)** and **PRSQ (Proration SQI)** in the **C1-ASOBLNG** feature configuration.
- Define the price item which is passed (as a billable charge data) through a health care inbound message.
- Define the pass-through billable charge pricing rule type on the policy plan.

This algorithm is invoked to create SQI (Service Quantity Identifier) based billable charges for fully-insured services. This algorithm creates the following set of SQI based billable charges:

- **Pre-calculated Premium Amount** - SQI based billable charges which are created for pre-calculated premium amount received through a healthcare inbound message.
- **Calculated Premium Amount** - Price items for which the SQI based billable charges are created using the pricing rules defined on the policy plan level.

This algorithm also performs the following operations:

- Creation of the new billable charges.
- Cancellation of the existing billable charges.
- End Date modification of the existing billable charges.

This algorithm is invoked in the following scenarios:

If...	Then...
A billable charge exists for a specific date range where the Billable Charge Status field is set to Billable option which is yet to be processed with the same start date, price item, and membership information	The algorithm modifies only the end date information of that specific billable charge.
The membership is in the Pending Effectuation status and the status reason is Awaiting Binder Payment , where the status reason is mapped with the attribute value of the Membership Status Reason Hold / Awaiting Binder Payment attribute field in Field Mapping screen	The algorithm retrieves the values of the binder payment applicability and hold billing switch from the CI_MEMBERSHIP table. If the binder payment applicability and the hold billing switch is set to Y , the algorithm updates the bill after date information on the billable charge to 31-Dec-2099 .
The billable charge for a particular price item and membership appear in the proposed date range and either of them have a different start date or amount	The algorithm cancels the billable charge.

Note:

Billable charges which are created or updated for calculated charges, are updated accordingly in the **PriceCalculationDetail** entity in the **CI_PRCE_CALC** table. Further, those billable charge entries are marked as **Completed**. The Pricing rule type corresponding to the price item (during the processing of the inbound billable charge information) is fetched from the **PricingRuleTypePriceitem** entity in the **C1_PRC_RULE_TYPE_PRICEITEM** table on the first found basis.

The inbound billable charge information is processed as per the latest billable charge data. Once the inbound message is invoked, the algorithm assumes the following conditions:

- The billable charge line characteristics are not available.
- Every billable charge line has the same currency code.

In the case of modification or cancellation of the existing billable charges, its corresponding bill segments go through the following conditions:

- If the billable charge end date is updated, the algorithm checks for all the bill segments where the date range exceeds the billable charge end date. If the date range exceeds the billable charge end date, then only those billable charges are either canceled or deleted based on the status of the bill segment.
- If the billable charge is canceled, then all the bill segments within that billable charge are either canceled or deleted based on the status of the bill segment.

Finally, the billable charges are stamped with the following information:

- Price Item
- SQI (derived from the **C1-ASOBLLNG** feature configuration)
- Pass-through billable charge entries in the **MEMO ONLY** state.
- Aggregated amount is stamped as service quantity.
- Additional information, if any...

It contains the following parameter:

- **Bill To Type Flag** - This flag is used when the **Contract ID** is added in the **MEMBERSHIP_SA** table.

C1-THRSHDAMT

This algorithm is invoked when the membership is in the **Pending Effectuation** status and the status reason is **Awaiting Binder Payment**, as per the binder payment preference configuration done in the **Field Mapping** screen. It monitors or checks the memberships from whom the binder payment is yet to be received.

This algorithm's behavior is shown as follows:

Scenario	System Behavior
If the BINDER_PAY_APPL_SW field (also known as the Binder Payment Applicability flag) from the CI_MEMBERSHIP table is set to Y	The algorithm retrieves the BINDER_LIABILITY_AMT from the CI_MEMBERSHIP table.
If the Consider Binder Liability Amount Flag is set to Y , and the Binder Liability Amount is blank or the Binder Liability Amount is less than zero	The algorithm generates an error, Binder Liability Amount can't be blank or less than zero if the Consider Liability Amount is Y .

Scenario	System Behavior
If the BINDER_LIABILITY_AMT field from the CI_MEMBERSHIP table is not blank and greater than zero	<p>The algorithm calculates the threshold amount using the following formula,</p> $\text{CI_MEMBERSHIP.THRESHOLD_AMT} = \frac{\text{CI_MEMBERSHIP.BINDER_LIABILITY_AMT}}{(\text{CI_MEMBERSHIP.BINDER_PAY_THRES \%})}$ <p>For example, Let's assume that the binder liability amount is \$100 and binder payment threshold percentage is 90%. The algorithm uses the above formula to derive the threshold amount which is $\\$100 * 90\% = 90$. The calculated threshold amount is added in the CI_MEMBERSHIP.THRESHOLD_AMT field for the membership which is in Pending Effectuation status where the status reason is Awaiting Binder Payment.</p>

Note: The threshold amount is updated whenever the binder liability amount or binder threshold percentage value changes for the membership which is in the **Pending Effectuation** status.

Binder Payment Creation

Oracle Revenue Management and Billing considers a payment as a binder payment when a characteristic is defined for the payment using the characteristic type specified in the **Binder Payment Identification Characteristics Type** attribute of the binder payment preference. The system considers the binder payment preference which is specified in the **Binder Payment Field Mapping** option type of the **C1-ASOBLNG** feature configuration. This type of characteristic must be defined when the binder payment is created. It stores the membership identifier to indicate the individual membership for which the binder payment is received.

You can create a binder payment through the following features or interfaces:

- Payment Web Service
- Payment Upload
- Payment Upload Staging
- Payment Request
- Payment Event
- EDI 820 File Upload

While creating a payment through any of the above mechanism except the latter one, you need to ensure that the binder payment identification characteristic is defined for the payment. However, in case of EDI 820 File Upload, the system will extract the data stored in the NM1 tag and store it in the payment characteristics staging table. This is done when the **C1-PUPSG** batch is executed.

You can view the binder payments received for the membership or financial responsible member person's account through the **Payment Event Summary** and **Customer 360° Information** screens.

Binder Payment Monitoring

A new batch named **C1-BPMNT** is introduced to monitor the binder payments for the individual memberships. It checks whether there are any individual memberships where:

- Individual membership status is set to the value specified in the **Membership Status Code for Pending Effectuation** attribute of the binder payment preference.
- Membership status reason is set to the value specified in the **Membership Status Reason when Awaiting Binder Payment** attribute of the binder payment preference.

Note: The batch considers the binder payment preference which is specified in the **Binder Payment Field Mapping** option type of the **C1-ASOBLNG** feature configuration.

If so, the batch checks whether the **Binder Payment Applicability** option is set to **Y** for the individual membership. If so, the system calculates grace date using the membership start date and grace days. If the grace date is equal to or earlier than system date, the batch derives the account for the individual membership. While deriving the account for the individual membership, the system checks whether the characteristic types specified in the **Account Identifier Type Char Type** and **Account Identifier Value Char Type** option types of the **C1-ASOBLNG** feature configuration are defined for the individual membership. If so, the system derives the account using these characteristics defined for the individual membership. If these characteristics are not defined for the individual membership, the system derives the account of financially responsible member person. The system checks whether a payment with the binder payment identification characteristic exists against any contract of the account. If so, the system derives the value from the **Binder Payment Identification ID Type** attribute of the binder payment preference. The system then checks whether the binder payments are received for the individual membership using the values from the following:

- Binder Payment Identification Characteristic
- Binder Payment Identification ID Type attribute of the binder payment preference

If the binder payments are received for the individual membership, the system does the following:

If the Consider Binder Liability Amount set to...	Then...
Y	<p>The system validates whether the sum of binder payments is equal to or greater than the threshold amount. If so, the system does the following:</p> <ul style="list-style-type: none"> • Creates a To Do using the To Do type which is specified in the To Do Type for Binder Payment Received attribute of the binder payment preference. • Updates the membership status reason to the value specified in the Membership Status Reason when Binder Payment Received attribute of the binder payment preference. • Updates the member person status reason using the membership status reason preference which is specified in the Status Reason Mapping option type of the C1-ASOBLNG feature configuration. • Changes the bill after date of the billable charges when the Hold Billing option for the individual membership is set to Y.

If the Consider Binder Liability Amount set to...	Then...
N	<p>The system does not validate the binder payment against the threshold amount. If the binder payment amount is greater than zero, the system does the following:</p> <ul style="list-style-type: none"> • Creates a To Do using the To Do type which is specified in the To Do Type for Binder Payment Received attribute of the binder payment preference. • Updates the membership status reason to the value specified in the Membership Status Reason when Binder Payment Received attribute of the binder payment preference. • Updates the member person status reason using the membership status reason preference which is specified in the Status Reason Mapping option type of the C1-ASOBLLNG feature configuration. <p>Note: In this case, the system does not update the bill after date of the billable charges when the Hold Billing option for the individual membership is set to Y. The system updates the bill after date of the billable charges when the status of the individual membership is changed to Active through a health care inbound message.</p>

If the grace date is later than the system date, the batch does the following irrespective of whether the **Consider Binder Liability Amount** attribute is set to **Y** or **N**:

- Creates a To Do using the To Do type which is specified in the **To Do Type for Binder Payment Not Received** attribute of the binder payment preference.
- Updates the membership status reason to the value specified in the **Membership Status Reason when Binder Payment Not Received** attribute of the binder payment preference.
- Updates the member person status reason using the membership status reason preference which is specified in the **Status Reason Mapping** option type of the **C1-ASOBLLNG** feature configuration.

Binder Payment Preference

The Binder Payment Preference enables you to set the attributes which are used during binder payment creation and monitoring. While deriving the binder payment details for a membership, the system uses the following attributes from the binder payment preference:

- Binder Contract Type
- Binder Payment Identification Characteristics Type
- Binder Payment Identification ID Type
- Consider Binder Liability Amount
- Membership Status Code for Active
- Membership Status Code for Pending Effectuation
- Membership Status Reason on Activating Membership
- Membership Status Reason when Awaiting Binder Payment
- Membership Status Reason when Binder Payment Not Received
- Membership Status Reason when Binder Payment Received
- To Do Type for Binder Payment Not Received

- To Do Type for Binder Payment Received

For more information about these attributes, see [Defining a Binder Payment Preference](#) on page 480.

The system considers the binder payment preference which is specified in the **Binder Payment Field Mapping** option type of the **C1-ASOBLNG** feature configuration. You can define, edit, delete, and copy a binder payment preference through the **Field Mapping** screen.

How to setup the C1-ASOBLNG feature configuration	Setting the C1-ASOBLNG Feature Configuration on page 3616

Searching for a Binder Payment Preference

Prerequisites

To search for a binder payment preference, you should have:

- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To search for a binder payment preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.
The **Field Mapping** screen appears.
4. Select the **Binder Payment** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of binder payment preferences that meet the search criteria appears in the **Search Results** section.

Viewing the Binder Payment Preference Details

Procedure

To view the details of a binder payment preference:

1. Search for the binder payment preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** () icon corresponding to the binder payment preference whose details you want to view.
The **Field Mapping** zone appears.
3. View the details of the binder payment preference in the **Field Mapping** zone.

Defining a Binder Payment Preference**Prerequisites**

To define a binder payment preference, you should have:

- Values defined for the **Binder Payment Field Mapping** option type in the **C1-ASOBLLNG** feature configuration.
- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To define a binder payment preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.

3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create a binder payment preference. The valid values are: <ul style="list-style-type: none"> • Field Mapping • Medicare Plan Benefit Package • Membership Status Reason Mapping 	Yes

Note: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

4. Select the **Field Mapping** option from the **Field Mapping Business Object** list.
5. Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the binder payment preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the binder payment preference.	Yes
Description	Used to specify the description for the binder payment preference.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the binder payment preference.	No
Status	Used to indicate the status of the binder payment preference. The valid values are: <ul style="list-style-type: none"> Active Inactive 	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> Billing Binder Payment Geographic Rating Area Individual Membership Medicare Medicare Plan Benefit Member Reconciliation Member Relationship and Subscription Tier Member Status Reason Preferences Statement Construct 	Yes
	Note: You must select Binder Payment option as the preference category while creating a binder payment preference.	

- **Preference Settings** - Used to set the attributes in the binder payment preference.

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the binder payment preference. The valid values are:</p> <ul style="list-style-type: none"> • Binder Contract Type - Used when you want to identify the binder contract in the binder payment preference. • Consider Binder Liability Amount Flag - Used when you want to set the consider binder liability amount flag once the binder payment is received in the binder payment preference. • Binder Payment Identification Characteristics Type - Used when you want to identify the membership for whom the payment is received in the binder payment preference. • Binder Payment Identification ID Type - Used when you want to identify the membership type in the binder payment preference. • Membership Status Code for Active - Used when you want to define the status code when the membership is in the Active status in the binder payment preference. • Membership Status Code for Pending Effectuation - Used when you want to define the status code when the membership is in the Pending Effectuation status in the binder payment preference. • Membership Status Reason on Activating Membership - Used when you want to define the status reason code once the binder payment is received and the membership status is changed to Active for the binder payment preference. 	<p>Yes (Conditional)</p> <p>Note: This field is required while defining the settings for a binder payment preference.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> • Membership Status Reason Hold/Awaiting Binder Payment - Used when you want to define the status reason code as Hold/Awaiting Binder Payment when the binder payment is not yet received for the membership in the binder payment preference. • Membership Status Reason when Binder Payment Not Received - Used when you want to define the status reason code as Binder Payment Not Received when the binder payment is not received for the membership in the binder payment preference. • Membership Status Reason when Binder Payment Received - Used when you want to define the status reason code as Binder Payment Received when the binder payment is received for the membership in the binder payment preference. • To Do Type for Binder Payment Not Received - Used when you want to specify a To Do type when the binder payment is not received for the membership in the binder payment preference. • To Do Type for Binder Payment Received - Used when you want to specify a To Do type when the binder payment is received for the membership in the binder payment preference. 	

Field Name	Field Description	Mandatory (Yes or No)												
Value	<p>Used to specify the attribute value. The list varies depending on the attribute you want to set in the binder payment preference:</p> <table border="1"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Consider Binder Liability Amount Flag</td> <td> <p>The list includes the following values:</p> <ul style="list-style-type: none"> • Yes (Y) • No (N) <p>Note:</p> <table border="1"> <thead> <tr> <th>If the value is...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Yes (Y)</td> <td>The system considers binder liability amount to calculate the threshold amount.</td> </tr> <tr> <td>No (N)</td> <td>The system does not calculate the threshold amount.</td> </tr> </tbody> </table> </td> </tr> <tr> <td>Binder Payment Identification ID Type</td> <td>The list includes only those binder payment identification ID types which are already defined in the system.</td> </tr> </tbody> </table>	If the attribute is set to...	Then...	Consider Binder Liability Amount Flag	<p>The list includes the following values:</p> <ul style="list-style-type: none"> • Yes (Y) • No (N) <p>Note:</p> <table border="1"> <thead> <tr> <th>If the value is...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Yes (Y)</td> <td>The system considers binder liability amount to calculate the threshold amount.</td> </tr> <tr> <td>No (N)</td> <td>The system does not calculate the threshold amount.</td> </tr> </tbody> </table>	If the value is...	Then...	Yes (Y)	The system considers binder liability amount to calculate the threshold amount.	No (N)	The system does not calculate the threshold amount.	Binder Payment Identification ID Type	The list includes only those binder payment identification ID types which are already defined in the system.	<p>Yes (Conditional)</p> <p>Note: This field is required while defining the settings for a binder payment preference.</p>
If the attribute is set to...	Then...													
Consider Binder Liability Amount Flag	<p>The list includes the following values:</p> <ul style="list-style-type: none"> • Yes (Y) • No (N) <p>Note:</p> <table border="1"> <thead> <tr> <th>If the value is...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Yes (Y)</td> <td>The system considers binder liability amount to calculate the threshold amount.</td> </tr> <tr> <td>No (N)</td> <td>The system does not calculate the threshold amount.</td> </tr> </tbody> </table>	If the value is...	Then...	Yes (Y)	The system considers binder liability amount to calculate the threshold amount.	No (N)	The system does not calculate the threshold amount.							
If the value is...	Then...													
Yes (Y)	The system considers binder liability amount to calculate the threshold amount.													
No (N)	The system does not calculate the threshold amount.													
Binder Payment Identification ID Type	The list includes only those binder payment identification ID types which are already defined in the system.													
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> • Account • Billable Charge <p>Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.</p>	No												

Note: While defining a binder payment preference, you must set at least one attribute in the binder payment preference.

6. Select the **Binder Payment** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.

9. If you want to set more than one attribute in the binder payment preference, click the **Add (+)** icon and then repeat step 8.

Note: However, if you want to remove an attribute from the binder payment preference, click the **Delete (🗑)** icon corresponding to the attribute.

10. Click **Save**.

The binder payment preference is defined.

Editing a Binder Payment Preference

Prerequisites

To edit a binder payment preference, you should have:

- Values defined for **Binder Payment Field Mapping** option type in the **C1-ASOBLNG** feature configuration.
- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To edit a binder payment preference:

1. Search for the binder payment preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit (✎)** icon in the **Edit** column corresponding to the binder payment preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the binder payment preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the binder payment preference.	Not applicable
Description	Used to specify the description for the binder payment preference.	Yes
Detailed Description	Used to specify additional information about the preference.	No
Status	Used to indicate the status of the binder payment preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Indicates the feature for which the preference is designed. The valid value is: <ul style="list-style-type: none"> • Binder Payment 	Not applicable

- **Preference Settings** - Used to define the settings for the member reconciliation preference.

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the binder payment preference. The valid values are:</p> <ul style="list-style-type: none"> • Binder Contract Type - Used when you want to identify the binder contract in the binder payment preference. • Consider Binder Liability Amount Flag - Used when you want to set the consider binder liability amount flag once the binder payment is received in the binder payment preference. • Binder Payment Identification Characteristics Type - Used when you want to identify the membership for whom the payment is received in the binder payment preference. • Binder Payment Identification ID Type - Used when you want to identify the membership type in the binder payment preference. • Membership Status Code for Active - Used when you want to define the status code when the membership is in the Active status in the binder payment preference. • Membership Status Code for Pending Effectuation - Used when you want to define the status code when the membership is in the Pending Effectuation status in the binder payment preference. • Membership Status Reason on Activating Membership - Used when you want to define the status reason code once the binder payment is received and the membership status is changed to Active for the binder payment preference. • Membership Status Reason Hold/Awaiting Binder Payment - Used when you want to define the status reason code as Hold/Awaiting Binder Payment when the binder payment is not yet received for the membership in the binder payment preference. 	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: This field is required while editing the settings for a binder payment preference.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> • Membership Status Reason when Binder Payment Not Received - Used when you want to define the status reason code as Binder Payment Not Received when the binder payment is not received for the membership in the binder payment preference. • Membership Status Reason when Binder Payment Received - Used when you want to define the status reason code as Binder Payment Received when the binder payment is received for the membership in the binder payment preference. • To Do Type for Binder Payment Not Received - Used when you want to specify a To Do type when the binder payment is not received for the membership in the binder payment preference. • To Do Type for Binder Payment Received - Used when you want to specify a To Do type when the binder payment is received for the membership in the binder payment preference. 	

Field Name	Field Description	Mandatory (Yes or No)												
Value	Used to specify the attribute value. The list varies depending on the attribute you want to set in the binder payment preference:	Yes (Conditional)												
	<table border="1"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Consider Binder Liability Amount Flag</td> <td> The list includes the following values: <ul style="list-style-type: none"> • Yes (Y) • No (N) </td> </tr> <tr> <td colspan="2"> Note: <table border="1"> <thead> <tr> <th>If the value is...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Yes (Y)</td> <td>The system considers binder liability amount to calculate the threshold amount.</td> </tr> <tr> <td>No (N)</td> <td>The system does not calculate the threshold amount.</td> </tr> </tbody> </table> </td> </tr> </tbody> </table>	If the attribute is set to...	Then...	Consider Binder Liability Amount Flag	The list includes the following values: <ul style="list-style-type: none"> • Yes (Y) • No (N) 	Note: <table border="1"> <thead> <tr> <th>If the value is...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Yes (Y)</td> <td>The system considers binder liability amount to calculate the threshold amount.</td> </tr> <tr> <td>No (N)</td> <td>The system does not calculate the threshold amount.</td> </tr> </tbody> </table>		If the value is...	Then...	Yes (Y)	The system considers binder liability amount to calculate the threshold amount.	No (N)	The system does not calculate the threshold amount.	Note: This field is required while editing the settings for a binder payment preference.
	If the attribute is set to...	Then...												
Consider Binder Liability Amount Flag	The list includes the following values: <ul style="list-style-type: none"> • Yes (Y) • No (N) 													
Note: <table border="1"> <thead> <tr> <th>If the value is...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Yes (Y)</td> <td>The system considers binder liability amount to calculate the threshold amount.</td> </tr> <tr> <td>No (N)</td> <td>The system does not calculate the threshold amount.</td> </tr> </tbody> </table>		If the value is...	Then...	Yes (Y)	The system considers binder liability amount to calculate the threshold amount.	No (N)	The system does not calculate the threshold amount.							
If the value is...	Then...													
Yes (Y)	The system considers binder liability amount to calculate the threshold amount.													
No (N)	The system does not calculate the threshold amount.													
Binder Payment Identification ID Type	The list includes only those binder payment identification ID types which are already defined in the system.													
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> • Account • Billable Charge 	No												
	Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.													

Tip: Alternatively, you can edit the details of a binder payment preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the binder payment preference, if required.

Note: You must set at least one attribute in a binder payment preference.

5. Click **Save**.

The changes made to the binder payment preference are saved.

Copying a Binder Payment Preference

Instead of creating a binder payment preference from scratch, you can create a new binder payment preference using an existing binder payment preference. This is possible through copying a binder payment preference. On copying a binder payment preference, the details including the attributes are copied to the new binder payment preference. You can then edit the details, if required.

Prerequisites

To copy a binder payment preference, you should have:

- Binder Payment preference (whose copy you want to create) defined in the application
- Values defined for **Binder Payment Field Mapping** option type in the **C1-ASOBLLNG** feature configuration.
- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To copy a binder payment preference:

1. Search for the binder payment preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the binder payment preference whose copy you want to create.
3. Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the binder payment preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the binder payment preference.	Yes
Description	Used to specify the description for the binder payment preference.	Yes
Detailed Description	Used to specify additional information about the binder payment preference.	No
Status	Used to indicate the status of the binder payment preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	Yes
Preference Category	Indicates the feature for which the preference is designed. The valid values is: <ul style="list-style-type: none"> • Binder Payment 	Not applicable

- **Preference Settings** - Used to set the attributes in the binder payment preference.

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the binder payment preference. The valid values are:</p> <ul style="list-style-type: none"> • Binder Contract Type - Used when you want to identify the binder contract in the binder payment preference. • Consider Binder Liability Amount Flag - Used when you want to set the consider binder liability amount flag once the binder payment is received in the binder payment preference. • Binder Payment Identification Characteristics Type - Used when you want to identify the membership for whom the payment is received in the binder payment preference. • Binder Payment Identification ID Type - Used when you want to identify the membership type in the binder payment preference. • Membership Status Code for Active - Used when you want to define the status code when the membership is in the Active status in the binder payment preference. • Membership Status Code for Pending Effectuation - Used when you want to define the status code when the membership is in the Pending Effectuation status in the binder payment preference. • Membership Status Reason on Activating Membership - Used when you want to define the status reason code once the binder payment is received and the membership status is changed to Active for the binder payment preference. • Membership Status Reason Hold/Awaiting Binder Payment - Used when you want to define the status reason code as Hold/Awaiting Binder Payment when the binder payment is not yet received for the membership in the binder payment preference. 	<p>Yes (Conditional)</p> <p>Note: This field is required while defining the settings for a binder payment preference.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> • Membership Status Reason when Binder Payment Not Received - Used when you want to define the status reason code as Binder Payment Not Received when the binder payment is not received for the membership in the binder payment preference. • Membership Status Reason when Binder Payment Received - Used when you want to define the status reason code as Binder Payment Received when the binder payment is received for the membership in the binder payment preference. • To Do Type for Binder Payment Not Received - Used when you want to specify a To Do type when the binder payment is not received for the membership in the binder payment preference. • To Do Type for Binder Payment Received - Used when you want to specify a To Do type when the binder payment is received for the membership in the binder payment preference. 	

Field Name	Field Description	Mandatory (Yes or No)

Deleting a Binder Payment Preference

Procedure

To delete a binder payment preference:

1. Search for the binder payment preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the binder payment preference that you want to delete.

A message appears confirming whether you want to delete the binder payment preference.

Tip: Alternatively, you can delete a binder payment preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The binder payment preference is deleted.

Membership Status Reason Preference

The Membership Status Reason preference enables you to map a member person status and status reason with an individual membership status reason. This mapping is used during:

- **Membership Status Transition** - When the member person status and status reason are received through a health care inbound message or membership repricing inbound web service
- **Member Person Status Transition** - When the binder payment is monitored for the individual membership

The system enables you to define, edit, delete, and copy a membership status reason preference through the **Field Mapping** screen. You can derive the member person status and member person status reason mapping attributes from the values specified in the **MEMBER_PER_STATUS_FLG** and **MEMB_PERS_STAT_RSN_FLG** lookup fields, where as the mapping attributes of the membership status reason can be derived from the **Status Reason** screen.

The system determines the individual membership status reason using the membership status reason preference which is specified in the **Status Reason Mapping** option type of the **C1-ASOBLNG** feature configuration.

Searching for a Membership Status Reason Preference

Prerequisites

To search for a membership status reason preference, you should have:

- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To search for a membership status reason preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.
The **Field Mapping** screen appears.
4. Select the **Membership Status Reason** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.
A list of membership status reason preferences that meet the search criteria appears in the **Search Results** section.

Viewing the Membership Status Reason Preference Details

Procedure

To view the details of a membership status reason preference:

1. Search for the membership status reason preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** () icon corresponding to the membership status reason whose details you want to view.
The **Field Mapping** zone appears.
3. View the details of the membership status reason in the **Field Mapping** zone.

Defining a Membership Status Reason Preference

Prerequisites

To define a membership status reason preference, you should have:

- Values defined in the **MEMBER_PER_STATUS_FLG** and **MEMB_PERS_STAT_RSN_FLG** lookup field
- Membership status reason defined in the application.

Procedure

To define a membership status reason preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.

- From the **Admin** menu, select **F** and then click **Field Mapping**.

A sub-menu appears.

- Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the billing preference. The valid values are: <ul style="list-style-type: none"> Field Mapping Medicare Plan Benefit Package Membership Status Reason Mapping 	Yes

Note: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Membership Status Reason Mapping** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Membership Status Reason Mapping** screen appears. It contains the following sections:

- Main** - Used to specify basic details of the membership status reason preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the membership status reason preference.	Yes
Description	Used to specify the description for the membership status reason preference.	Yes

- Status Reason Mapping** - Used to create the mappings in the membership status reason preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status	Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> Active Canceled Inactive Pending Effectuation 	Yes (Conditional)
	Note: This list includes only those statuses which are defined in the MEMBER_PER_STATUS_FLG lookup field.	Note: This field is required while creating a mapping in the membership status reason preference.

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status Reason	<p>Used to indicate the reason why the status of the member person is changed. The valid values are:</p> <ul style="list-style-type: none"> • Awaiting Binder Payment • Binder Payment Not Received • Binder Payment Received • Binder payment notification send to upstream • Member is added by mistake • Employee Left organization • New Enrollment • Membership is re-instated • Spouse legally separated • Membership is Terminated <p>Note: This list includes only those status reasons which are defined in the MEMB_PERS_STAT_RSN_FLG lookup field.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required while creating a mapping in the membership status reason preference.</p>
Membership Status Reason	<p>Used to indicate the reason why the status of the membership is changed.</p> <p>Note: You must specify a membership status reason which is already defined in the system.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required while creating a mapping in the membership status reason preference.</p>

Note: While defining a membership status reason preference, you must create at least one mapping in the membership status reason preference.

6. Enter the required details in the **Main** section.
7. Select the required status reason mapping from the respective fields.
8. If you want to set more than one status reason mapping in the membership status reason preference, click the **Add (+)** icon and then repeat step 8.

Note: However, if you want to remove a status reason mapping from the membership status reason preference, click the **Delete (🗑)** icon corresponding to the status reason mapping.

9. Click **Save**.

The membership status reason preference is defined.

Editing a Membership Status Reason Preference

Prerequisites

To edit a membership status reason preference, you should have:

- Values defined in the **MEMBER_PER_STATUS_FLG** and **MEMB_PERS_STAT_RSN_FLG** lookup field
- Membership status reason defined in the application.

Procedure

To edit a membership status reason preference:

1. Search for the membership status reason preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the membership status reason preference whose details you want to edit.

The **Membership Status Reason Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the membership status reason preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the membership status reason preference.	Not applicable
Description	Used to specify the description for the membership status reason preference.	Yes

- **Status Reason Mapping** - Used to create or edit the mappings in the membership status reason preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status	Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> • Active • Canceled • Inactive • Pending Effectuation 	Yes (Conditional)
	<p>Note: This list includes only those statuses which are defined in the MEMBER_PER_STATUS_FLG lookup field.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status Reason	<p>Used to indicate the reason why the status of the member person is changed. The valid values are:</p> <ul style="list-style-type: none"> • Awaiting Binder Payment • Binder Payment Not Received • Binder Payment Received • Binder payment notification send to upstream • Member is added by mistake • Employee Left organization • New Enrollment • Membership is re-instated • Spouse legally separated • Membership is Terminated <p>Note: This list includes only those status reasons which are defined in the MEMB_PERS_STAT_RSN_FLG lookup field.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required while editing a mapping in the membership status reason preference.</p>
Membership Status Reason	<p>Used to indicate the reason why the status of the membership is changed.</p> <p>Note: You must specify a membership status reason which is already defined in the system.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required while editing a mapping in the membership status reason preference.</p>

Tip: Alternatively, you can edit the details of a membership status reason preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the status reason mapping from the membership status reason preference, if required.

Note: You must create at least one status reason mapping in a membership status reason preference.

5. Click **Save**.

The changes made to the membership status reason preference are saved.

Copying a Membership Status Reason Preference

Instead of creating a membership status reason preference from scratch, you can create a new membership status reason preference using an existing membership status reason preference. This is possible through copying a membership status reason preference. On copying a membership status reason preference, the details including the attributes are copied to the new membership status reason preference. You can then edit the details, if required.

Prerequisites

To copy a membership status reason preference, you should have:

- Membership status reason preference (whose copy you want to create) defined in the application
- Values defined in the **MEMBER_PER_STATUS_FLG** and **MEMB_PERS_STAT_RSN_FLG** lookup field
- Membership status reason defined in the application.

Procedure

To copy a membership status reason preference:

1. Search for the membership status reason preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the membership status reason preference whose copy you want to create.

The **Membership Status Reason Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the membership status reason preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the membership status reason preference.	Yes
Description	Used to specify the description for the membership status reason preference.	Yes

- **Status Reason Mapping** - Used to create the mappings in the membership status reason preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status	Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> • Active • Canceled • Inactive • Pending Effectuation 	Yes (Conditional)
	<p>Note: This list includes only those statuses which are defined in the MEMBER_PER_STATUS_FLG lookup field.</p>	<p>Note: This field is required while creating a mapping in the membership status reason preference.</p>

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status Reason	<p>Used to indicate the reason why the status of the member person is changed. The valid values are:</p> <ul style="list-style-type: none"> • Awaiting Binder Payment • Binder Payment Not Received • Binder Payment Received • Binder payment notification send to upstream • Member is added by mistake • Employee Left organization • New Enrollment • Membership is re-instated • Spouse legally separated • Membership is Terminated <p>Note: This list includes only those status reasons which are defined in the MEMB_PERS_STAT_RSN_FLG lookup field.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required while creating a mapping in the membership status reason preference.</p>
Membership Status Reason	<p>Used to indicate the reason why the status of the membership is changed.</p> <p>Note: You must specify a membership status reason which is already defined in the system.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required while creating a mapping in the membership status reason preference.</p>

Note: While defining a membership status reason preference, you must create at least one mapping in the membership status reason preference.

3. Enter the required details in the **Main** section.
4. Define, edit, or remove the mapping from the membership status reason preference, if required.
5. Click **Save**.

The new membership status reason preference is defined.

Chapter 7

Customer Registration

Topics:

- [Customer Registration \(Without Approval\) Status Transition](#)
- [Customer Registration \(With Approval\) Status Transition](#)
- [Customer Registration Template](#)
- [Customer Registration Type](#)
- [Customer Registration \(Used for Searching\)](#)
- [Customer Registration \(Used for Viewing\)](#)

Until now, you were able to create person, account, policy, and policy plan from the different screens. Now, ORMB provides the ability to create a person, multiple accounts for the person, multiple policies for the person, and multiple policy plans for the policy from the same user interface. A new object named **Customer Registration** is introduced in this release. Through a customer registration object, you can create person, accounts, policies, and policy plans at the same time from the same interface. Before creating a customer registration object, you need to create the following:

- Customer Registration Template
- Customer Registration Type

While creating a customer registration object, you need to specify the following:

- A customer registration type using which the customer registration object should be created
- A source system from the customer information is received
- A type of person that you want to create through the customer registration object

Once you specify the above details, the **Customer Registration** screen appears with a set of pages and sections which are added in the respective person template. The default values for the fields, characteristic types, identifier types, and phone types are shown as specified in the person template. In addition, the field values, characteristic types, characteristic values, identifier types, identifier values, phone types, and phone numbers are disabled as specified in the person template. On the Accounts page, you can view one row for each account template which is added in the customer registration type. You can then edit the row and thereby create an account for the person. You can create multiple accounts for the person using the same or different template.

Note:

You cannot create sort records and derivation and pricing parameters for the bill group from the **Customer Registration** screen. You can only create these from the **Customer 360° Information** screen or using the health care inbound message.

The system creates effective dated address using the address business object which is specified in the customer registration type. By default, the account override address is effective from the date when the customer registration object is created in the system.

On the **Policies** page, you can view one row for each policy template which is added in the customer registration type. You can then edit the row and thereby

create a policy for the person. You can create multiple policies for the person using the same or different template. On clicking the **Add** icon corresponding to the policy row, you can view one row for each policy plan template which is added in the customer registration type. You can then edit the row and thereby create a policy plan for the policy.

On clicking the **View/Edit** icon or the **Add New Account** button in the **Accounts** page, the **Customer Registration - Add Account** screen appears with a set of pages and sections which are added in the respective account template. The default values for the fields, characteristic types, and identifier types are shown as specified in the account template. In addition, the field values, characteristic types, characteristic values, identifier types, and identifier values are disabled as specified in the account template.

On clicking the **View/Edit** icon or the **Add New Policy** button in the **Policies** page, you need to specify a policy type. The policy type indicates the category to which the policy belongs (i.e. whether it is Self Funded, Fully-Insured Group, or Fully-Insured Individual) and the policy business object using which the policy should be created. Once you specify a policy type, the **Policy** screen appears with a set of sections which are added in the respective policy template. The default values for the fields and characteristic types are shown as specified in the policy template. In addition, the field values, characteristic types, and characteristic values are disabled as specified in the policy template. You can create one or more policies for the person using the same or different policy type.

On clicking the **View/Edit** icon or the **Add New Plan** button corresponding to a policy plan row in the **Policies** page, the **Plan** screen appears with a set of sections which are added in the respective policy plan template. The default values for the fields and characteristic types are shown as specified in the policy plan template. In addition, the field values, characteristic types, and characteristic values are disabled as specified in the policy plan template.

You can save the person, account, policy, and policy plan details as and when you are entering the data by clicking the **Save as Draft** button. On clicking the **Save as Draft** button, the system creates a customer registration object in the Draft status. The status of the policies which are created through the customer registration object is set to Pending. Once the person, account, policy, and policy plan details are specified, you can click the **Validate and Save** button. The system then validates the information. You can edit, delete, or submit a customer registration object when it is in the **Draft** status. On submitting a customer registration object, the person, accounts, policies, and policy plans are created in the system. Finally, the status of the customer registration object is changed to the following depending on the type of person:

Person Type	Status
Parent Customer	Parent Customer Approved
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

You can optionally configure the approval process for the customer registration. If the **Approval Required** option is selected in the customer registration type, the status of the customer registration object is changed to **Approval In Progress** on submitting it. A To Do using the approval To Do type is created and assigned to the users with the approval To Do role. The approver can

then review the customer registration object and accordingly approve, reject, or request the submitter to resubmit the customer registration object for approval. On approving a customer registration object, the person, accounts, policies, and policy plans are created in the system. Finally, the status of the customer registration object is changed to the following depending on the type of person:

Person Type	Status
Parent Customer	Parent Customer Approved
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

If the approver rejects a customer registration object due to some reason, the status of the customer registration object is changed to **Rejected**. However, if the approver requests the submitter to resubmit a customer registration object for approval after making the required changes, the status of the customer registration object is changed to **Draft**. The submitter can then make the required changes and resubmit the customer registration object for approval.

The system provides the following two options while defining a customer registration type:

- Manual Billing Hierarchy and Pricing-** Used when you want to inform the user to create the billing hierarchy and pricing for the parent customer manually. In other words, you want the user to create the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters. If this option is selected, a To Do is created using the **Billing Hierarchy and Pricing To Do** type and assigned to the users with the **Billing Hierarchy and Pricing To Do** role. This feature can be used only for customer registration objects where the person type is set to **Parent Customer**. Once the billing hierarchy and pricing is created for the parent customer, the user must complete the corresponding To Do which is created using the **Billing Hierarchy and Pricing To Do** type. On executing the **Customer Registration Monitor (C1-CUSRG)** batch, the system considers all customer registration objects which are in the **Parent Customer Approved** or **Pending Pricing Correction** status. It checks whether the corresponding To Do (if any) created using the **Billing Hierarchy and Pricing To Do** type is completed. If so, it changes the status of the customer registration object to the following depending on whether the **Final Approval Required** option is selected:

Final Approval Required (Yes or No)	Status
Yes	Pending Final Approval
No	Complete

- Final Approval Required-** Used to indicate whether the final approval is required once the approver at the first level approves the customer registration object. Ideally, the final approval is required when the **Manual Billing Hierarchy and Pricing** option is selected. This ensures that the information related to the following entities is created and verified before the customer registration object moves to the **Complete** status:
 - Bill Group

- Bill Group's Accounts
- Bill Group's Sorting Records
- Bill Group's Derivation and Pricing Parameters
- Pricing Rules for the Policy Plans

If this option is selected, a To Do is created using the **Final Approval To Do** type and assigned to the users with the **Final Approval To Do** role. This feature can be used only for customer registration objects where the person type is set to **Parent Customer**. Once the user with the **Final Approval To Do** role approves the customer registration object, the status of the customer registration object is changed to **Complete**.

If the approver requests the submitter to resubmit a customer registration object for approval, the status of the customer registration object is changed to **Pending Pricing Correction**.

Note: The system enables you to create maximum 10 accounts and 5 policies for a person and maximum 10 policy plans for a policy through a customer registration object from the user interface.

Once the status of a customer registration object is changed to **Complete** or **Bill Group Approved**, the system changes the status of the policies created through the customer registration object to **In Force/Active**. In addition, the status of the pricing rules which are created for such policies' policy plans is set to **Active**.

You can also create a customer registration object using the **File Upload Interface** utility through an inbound message. On creating an inbound message using the **File Upload Interface** utility, the status of the inbound message is set to **Pending**. Once the inbound message is processed, a customer registration object is created in the following status depending on the person type:

Person Type	Status
Parent Customer	Complete
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

Note: The above status transition is mentioned based on the assumption that the data uploaded through the **File Upload Interface** utility will be pre-approved and does not require any approval in the system.

At present, only the XML format is supported for creating a customer registration object using the File Upload Interface utility through an inbound message. To implement the Customer Registration feature, the following new screens are introduced in this release:

- Customer Registration Template
- Customer Registration Type
- Customer Registration

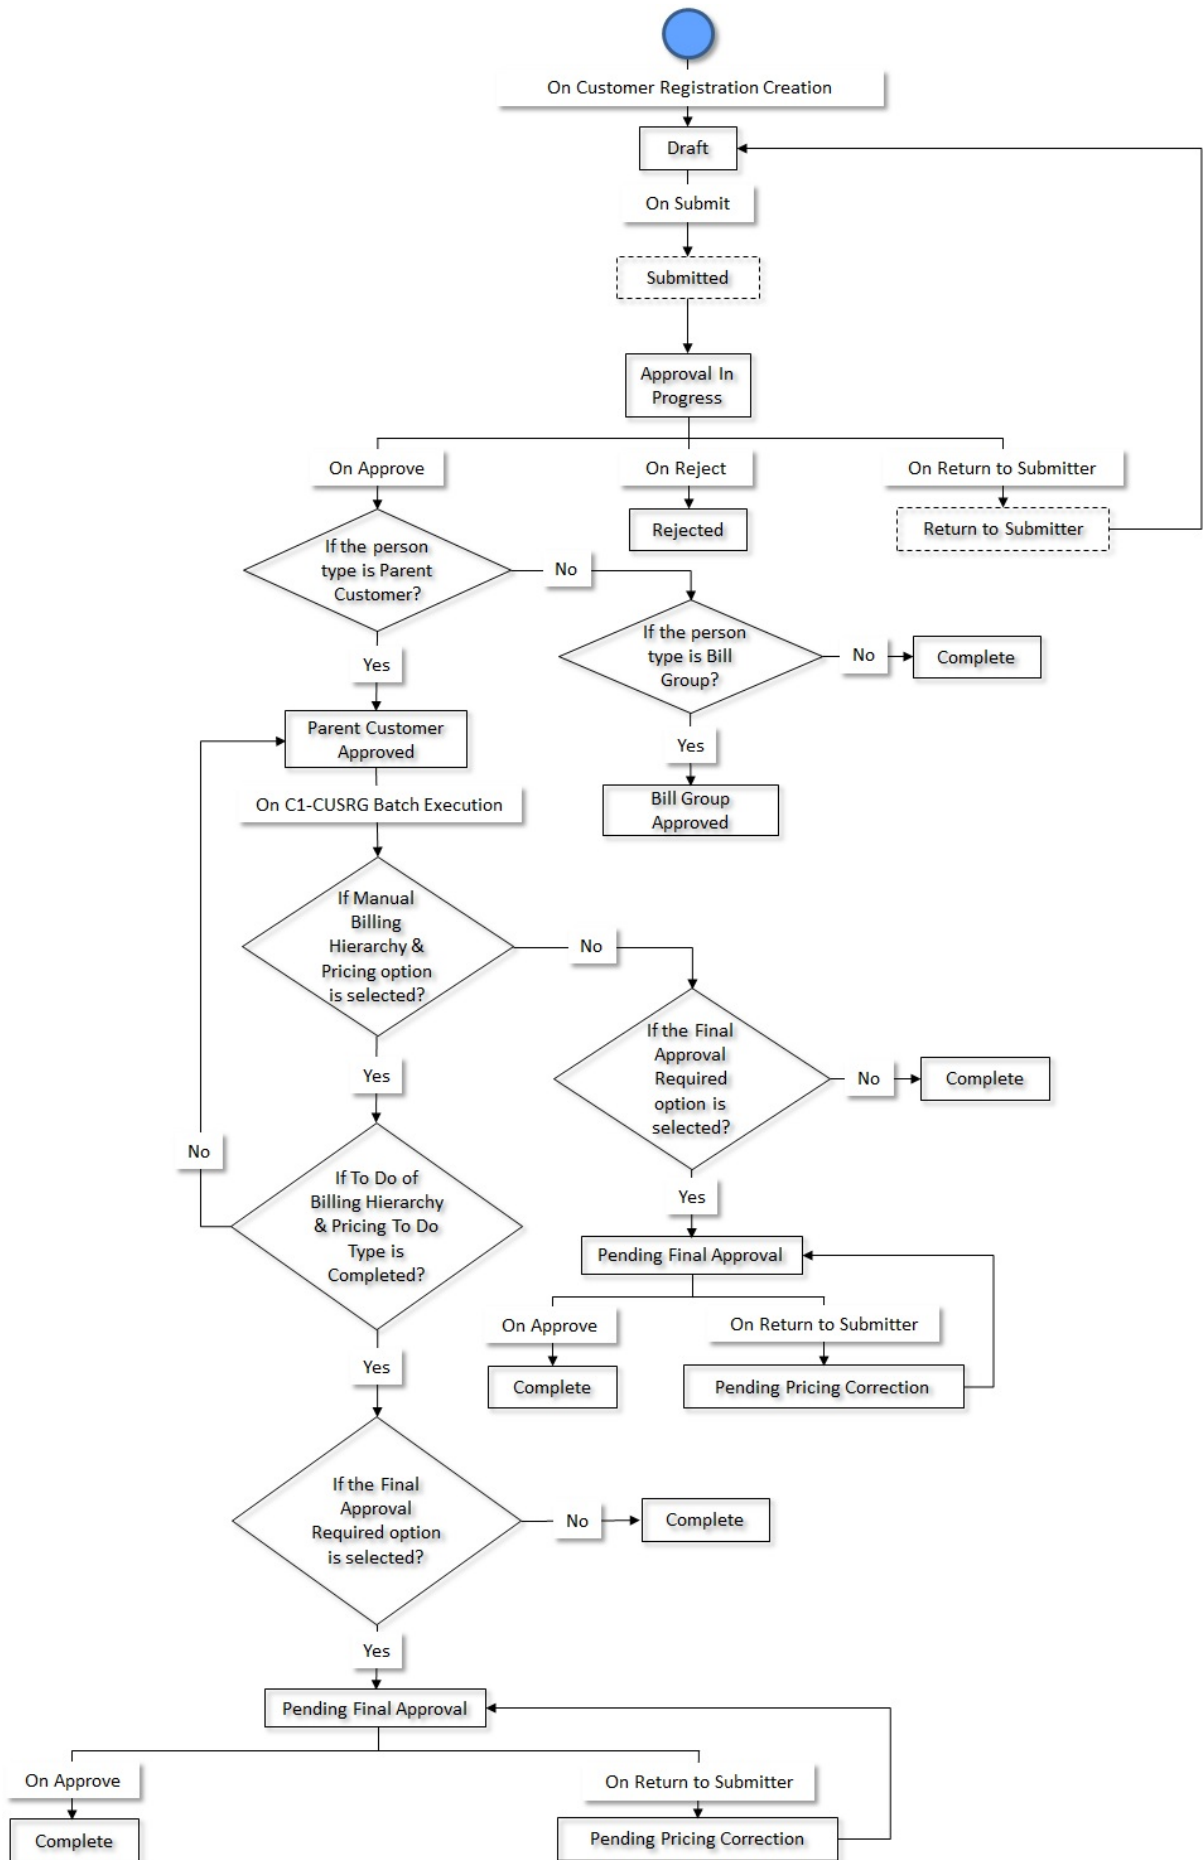

Customer Registration (Without Approval) Status Transition

The following figure graphically indicates how a customer registration object moves from one status to another when the approval process is not configured in the customer registration type:

Customer Registration (With Approval) Status Transition

The following figure graphically indicates how a customer registration object moves from one status to another when the approval process is configured in the customer registration type:

Customer Registration Template

A customer registration template encapsulates the following information:

- List of pages that should appear when you create a person, account, policy, or policy plan using the respective customer registration template
- List of sections that should appear in each page
- Field or characteristic attributes, such as:
 - Default value for a field or characteristic type
 - Default value for a person or account identifier type or phone type
 - Primary identifier type for a person or account
 - Mandatory field in each section
 - Enable or disable the field value, identifier type, identifier value, characteristic type, characteristic value, phone type, or phone number

You can create multiple customer registration templates for person, account, policy and policy plan. Depending on whether you are creating a customer registration template for person, account, policy or policy plan, you can include the following pages and define field or characteristic attributes for the following sections:

Template Category	Template Page	Template Section
Person	Main	Person Main
		Person Names
		Person Identifiers
		Person Phones
	Contact Information	Person Address
		Person Email
	Accounts	-
	Person Hierarchy	Person Hierarchy – Main
		Person Hierarchy – Characteristics
	Person Characteristics	Person Characteristics
	Policies	Policies
		Parent Policies
	Registration Characteristics	Customer Registration Characteristics
Account	Main	Account Information

Template Category	Template Page	Template Section
		Account Identifiers
	Auto Pay	Account Autopay
	Persons	Main
		Account Address Override Information
	Bill Routing	
Account Characteristics	Account Characteristics	
Policy	Policy – Main	Policy Main
		Policy Persons
		Policy Characteristics
Policy Plan	Plan	Plan - Main
		Plan - Characteristics

Search Customer Registration Template

The **Search Customer Registration Template** zone allows you to search for a customer registration template using various search criteria. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for customer registration templates using the banking template or the healthcare template details. The valid values are:</p> <ul style="list-style-type: none"> • Banking Template - Used to indicate whether you want to search for customer registration templates created using the C1-CustomerRegistrationTmplBK business object. • Healthcare Template - Used to indicate whether you want to search for customer registration templates created using the C1-CustomerRegistrationTmplHC business object. <p>Note: By default, the Banking Template option is selected.</p>	Yes
Template	Used to search for a particular template.	No

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to search for customer registration templates having a particular description.	No
Template Category	Used to search for customer registration templates which belong to a particular category. The valid values are: <ul style="list-style-type: none"> Account Person Policy Policy Plan 	No
	Note: The Policy and Policy Plan options appear when you select the Healthcare Template option from the Search By list.	

Note: You must specify at least one search criterion while searching for a customer registration template.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Template	Displays the customer registration template.
Description	Displays the description of the customer registration template.
Template Category	Displays the category to which the customer registration template belongs. The valid values are: <ul style="list-style-type: none"> Account Person Policy Policy Plan
Edit	On clicking the Edit (✎) icon, the Customer Registration Template screen appears where you can edit the details of the customer registration template.
Duplicate	On clicking the Duplicate (📄) icon, the Customer Registration Template screen appears where you can define a new customer registration template using an existing customer registration template.
Delete	On clicking the Delete (🗑) icon, you can delete the customer registration template. <p>Note: You can delete a customer registration template when a customer registration is not yet defined using the customer registration template.</p>

On clicking the **Broadcast** (📡) icon corresponding to a customer registration template, the **Customer Registration Template** zone appears with the details of the respective customer registration template.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Customer Registration Template

The **Customer Registration Template** zone displays the details of the customer registration template. It also allows you to edit, copy, and delete the customer registration template. It contains the following sections

- **Main** - Displays the basic information about the customer registration template. It contains the following fields:

Field Name	Field Description
Template	Displays the customer registration template.
Template Category	Indicates the category for which the customer registration template is created in the system. The valid values are: <ul style="list-style-type: none"> • Account • Person • Policy • Policy Plan <p>Note: The Policy and Policy Plan template categories appear when the customer registration template is created using the C1-CustomerRegistrationTmplHC business object.</p>
Description	Displays the description of the customer registration template.
Detailed Description	Displays additional information about the customer registration template.

- **Template Pages** - The **Template Pages** section lists the template pages, template sections added for a particular template category in a customer registration template. It contains the following columns:

Column Name	Column Description
Template Page	Indicates the template page which is added for the template category.
Template Section	Indicates the template section which is defined for the template page.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration template.
Delete	Used to delete the customer registration template. <p>Note: You can delete a customer registration template when a customer registration is not yet created using the customer registration template.</p>

Button Name	Button Description
Duplicate	Used to create a new customer registration template using an existing customer registration template.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the customer registration template is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.

By default, the **Customer Registration Template** zone does not appear in the **Customer Registration Template** screen. It appears when you click the **Broadcast** () icon corresponding to the customer registration template in the **Search Customer Registration Template** zone.

Searching for a Customer Registration Template

Prerequisites

To search for a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Customer registration templates defined in the application
- Customer registration templates associated with the template categories

Procedure

To search for a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Template**.
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Template** sub-menu.

The **Customer Registration Template** screen appears.

- Enter the search criteria in the **Search Customer Registration Template** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of customer registration templates that meet the search criteria appears in the **Search Results** section.

Viewing the Customer Registration Template Details

Procedure

To view the details of a customer registration template:

- Search for the customer registration template in the **Customer Registration Template** screen.
- In the **Search Results** section, click the **Broadcast** () icon corresponding to the customer registration template whose details you want to view.

The **Customer Registration Template** zone appears.

- View the details of the customer registration template in the **Customer Registration Template** zone.

Defining a Customer Registration Template

Prerequisites

To define a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Template categories defined in the application
- Template pages and sections defined in the application

Procedure

To define a customer registration template:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **C** and then click **Customer Registration Template**.

A sub-menu appears.

- Click the **Add** option from the **Customer Registration Template** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Template Business Object	Used to indicate the business object using which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> Customer Registration Template - Banking - Used to indicate that you want to define a customer registration template using the C1-CustomerRegistrationTmplBK business object. Customer Registration Template - Health Care - Used to indicate that you want to define a customer registration template using the C1-CustomerRegistrationTmplHC business object. 	Yes

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Template** screen.

- Select the required customer registration template business object from the respective field.
- Click **OK**.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the selected business object. It contains the following sections:

- Main** - Used to specify basic details about the customer registration template.
- Template Pages** - Used to add template pages and its related sections for the customer registration template.
- Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the customer registration template.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> • Account • Person • Policy • Policy Plan 	Yes
	Note: The Policy and Policy Plan options appear when you are defining a customer registration template using the CI-CustomerRegistrationTmplHC business object.	
Business Object	Indicates the business object using which you want to define the customer registration template.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

- Enter the required details in the **Main** section.
- Add the template pages and template sections for the customer registration template in the **Template Pages** section.
- Set the field attributes for the template sections in the **Template Pages** section.
- Click **Save**.

The customer registration template is defined.

Adding the Pages and Sections in a Customer Registration Template

Prerequisites

To add a page and its related sections in a customer registration template, you should have:

- Template categories defined in the application
- Template pages and sections defined in the application

Procedure

To define a customer registration template:

1. Ensure that the **Template Pages** section is expanded when you are defining, editing, or copying a customer registration template.

The **Template Pages** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)						
Template Page	Used to indicate the page which you want to add in a customer registration template for a particular template category.	Yes (Conditional) Note: This field is required while adding pages and sections in a customer registration template.						
Template Section	Used to indicate the section and its field attributes which you want to define for a particular page in a customer registration template. Note: On clicking the Add (+) icon, the following columns appear: <table border="1" data-bbox="609 913 1104 1344"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Template Section</td> <td>Used to indicate the section for a particular page.</td> </tr> <tr> <td>Field Attributes</td> <td>Used to define the field attributes of a section. Note: On clicking the Add (+) icon, you can define the field attributes for the section.</td> </tr> </tbody> </table>	Column Name	Column Description	Template Section	Used to indicate the section for a particular page.	Field Attributes	Used to define the field attributes of a section. Note: On clicking the Add (+) icon, you can define the field attributes for the section.	Yes (Conditional) Note: This field is required while adding pages and sections in a customer registration template.
Column Name	Column Description							
Template Section	Used to indicate the section for a particular page.							
Field Attributes	Used to define the field attributes of a section. Note: On clicking the Add (+) icon, you can define the field attributes for the section.							

The following table shows the pages and sections which you can add for a particular template category.

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
Account	Auto Pay	No	Account Autopay	No
	Account Characteristics	No	Account Characteristics	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
	Credit Ratings	No	Credit Rating	No
	<div style="border: 1px solid black; padding: 5px;"> <p>Note: This template page appears when you are defining, editing, or copying a customer registration template which is created using the C1-Customer Registration TmplBK business object.</p> </div>			
	Main	Yes	Account Identifiers	Yes
			Account Information	Yes
	Persons	Yes	Account Address Override Information	No
			Bill Routing	Yes
			Main	Yes
Person	Accounts	No	-	-
	Contact Information	No	Person Address	No
			Person Email	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
	Deal Information Note: This template page appears when you are defining, editing, or copying a customer registration template which is created using the C1-Customer Registration TmplBK business object.	No	Deal-Main	No
	Main	Yes	Person Identifiers	Yes
			Person Main	Yes
			Person Names	Yes
			Person Phones	No
	Person Characteristics	No	Person Characteristics	No
	Person Hierarchy	No	Person Hierarchy-Characteristics	No
			Person Hierarchy-Main	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
	Policies	No	Parent Policy	No
	<div style="border: 1px solid black; padding: 5px;"> <p>Note: This template page appears only when you are defining, editing, or copying a customer registration template which is created using the C1-Customer Registration TmplHC business object.</p> </div>		Policies	No
	Registration Characteristics	No	Customer Registration Characteristics	No
Policy	Policy-Main	Yes	Policy Characteristics	No
			Policy-Main	Yes
			Policy Persons	No
<div style="border: 1px solid black; padding: 5px;"> <p>Note: This template category appears only when you are defining, editing, or copying a customer registration template which is created using the C1-CustomerRegistration TmplHC business object.</p> </div>				

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
Policy Plan Note: This template category appears when you are defining, editing, or copying a customer registration template which is created using the C1-CustomerRegistration TmplHC business object.	Plan	Yes	Plan-Characteristics	No
			Plan-Main	Yes

- Enter the required details in the **Template Pages** section.
- Set the field attributes for the template section, if required.
- If you want to add more than one page or section for the customer registration template, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a page or section from the customer registration template, click the **Delete** (🗑) icon corresponding to the page or section.

- Click **Save**.

The pages and sections are added in the customer registration template.

Note:

You can add all the template pages available for a particular template category by clicking the **Select All** check box in the upper left corner of the **Template Pages** section.

You cannot edit or delete a template page or section if a customer registration is already defined using the customer registration template.

Setting the Field Attributes for a Template Section

Prerequisites

To set the field attributes for a template section, you should have:

- Template pages and sections associated with the template category
- Fields for the sections defined in the application

Procedure

To set the field attributes for a template section:

1. Ensure that the **Template Pages** section is expanded when you are defining, editing, or copying a customer registration template.

The **Template Pages** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)						
Template Page	Used to indicate the page which you want to add in a customer registration template for a particular template category.	Yes (Conditional) Note: This field is required while adding pages and sections in a customer registration template.						
Template Section	Used to indicate the section and its field attributes which you want to define for a particular page in a customer registration template. Note: On clicking the Add  icon, the following columns appear:	Yes (Conditional) Note: This field is required while adding pages and sections in a customer registration template.						
	<table border="1"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Template Section</td> <td>Used to indicate the section for a particular page.</td> </tr> <tr> <td>Field Attributes</td> <td>Used to define the field attributes of a section. Note: On clicking the Add  icon, you can define the field attributes for the section.</td> </tr> </tbody> </table>	Column Name	Column Description	Template Section	Used to indicate the section for a particular page.	Field Attributes	Used to define the field attributes of a section. Note: On clicking the Add  icon, you can define the field attributes for the section.	
Column Name	Column Description							
Template Section	Used to indicate the section for a particular page.							
Field Attributes	Used to define the field attributes of a section. Note: On clicking the Add  icon, you can define the field attributes for the section.							

2. Select the template page and template section from the respective columns.
3. Click the **Add**  icon in the **Field Attributes** column corresponding to the template section whose field attributes you want to set.

It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence of the field attribute.	Yes (Conditional)
		Note: This field is required while setting the field attributes for a template section.
Field	Used to indicate the field for which you want to set attributes.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Field Search window appears.</p> <p>On specifying the field, the description of the field appears corresponding to the field.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>
Default Field Value	Used to indicate the default value for the field in the template section.	Yes (Conditional)
	<p>Note:</p> <p>On specifying a field, the Search (🔍) icon appears corresponding to the Default Field Value field. On clicking the Search icon, a window appears depending on the field that you have selected.</p> <p>On specifying the default field value, the description of the default field value appears corresponding to the default field value.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>
Required	Used to indicate whether the field is mandatory in the template section.	Yes (Conditional)
	<p>Note: By default, the check box in the Required column is disabled. It is enabled when you specify the field in the Field column.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>
Disable Field Value	Used to indicate whether the field is disabled in the template section.	Yes (Conditional)
	<p>Note: By default, the check box in the Disable Field Value column is disabled. It is enabled when you specify the field in the Field column.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>

Field Name	Field Description	Mandatory (Yes or No)
Identifier Type	Used to indicate the type of identifier for which you want to set attributes.	Yes (Conditional)
	<p>Note:</p> <p>On specifying a field, the Search (🔍) icon appears corresponding to the Identifier Type field. On clicking the Search icon, the Search Zone for Person Identifier window appears.</p> <p>On specifying the identifier type, the description of the identifier type appears corresponding to the Identifier Type field.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>
Identifier Value	Used to specify the value for the identifier type for which you want to set attributes.	Yes (Conditional)
	<p>Note: By default, this field is disabled. It is enabled when you specify the identifier type in the Identifier Type column.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>
Primary ID	Used to indicate whether the identifier type and identifier value are primary or not.	Yes (Conditional)
	<p>Note: By default, the check box in the Primary ID field is disabled. It is enabled when you specify the identifier type in the Identifier Type column.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>
Disable Identifier Type	Used to indicate whether the identifier type is disabled in the template section.	Yes (Conditional)
	<p>Note: By default, the check box in the Disable Identifier Type column is disabled. It is enabled when you specify the identifier type in the Identifier Type column.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>
Disable Identifier Value	Used to indicate whether the identifier value is disabled in the template section.	Yes (Conditional)
	<p>Note: By default, the check box in the Disable Identifier Value column is disabled. It is enabled when you specify the identifier value in the Identifier Value column.</p>	<p>Note: This field is required while setting the field attributes for a template section.</p>

Editing a Customer Registration Template

Prerequisites

To edit a customer registration template, you should have:

- Template categories defined in the application
- Template pages and sections defined in the application

Procedure

To edit a customer registration template:

- Search for the customer registration template in the **Customer Registration Template** screen.
- In the **Search Results** section, click the **Edit (📎)** icon in the **Edit** column corresponding to the customer registration template whose details you want to edit.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the business object using which the customer registration template is defined. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration template.
- **Template Pages** - Used to add template pages and its related sections for the customer registration template.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Displays the customer registration template.	Not applicable
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> • Account • Person • Policy • Policy Plan 	Yes
	Note: The Policy and Policy Plan options appear when you are defining a customer registration template using the C1-CustomerRegistrationTmplHC business object.	
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

Tip: Alternatively, you can edit the details of a customer registration template by clicking the **Edit** button in the **Customer Registration Template** zone.

3. Modify the details in the **Main** section, if required.
4. Add, edit, or remove the template pages and template sections from the customer registration template, if required.
5. Add, edit, or remove the field attributes from the template section, if required.
6. Click **Save**.

The changes made to the customer registration template are saved.

Note: You can edit a customer registration template only when a customer registration it is not yet defined using the customer registration template.

Copying a Customer Registration Template

Instead of creating a customer registration template from scratch, you can create a new customer registration template using an existing customer registration template. This is possible through copying a customer registration template. On copying a customer registration template, the details including the template pages, template sections, and field attributes for the template sections are copied to the new customer registration template. You can then edit the details, if required.

Prerequisites

To copy a customer registration template, you should have:

- Customer registration template (whose copy you want to create) defined in the application
- Template categories defined in the application
- Template pages and sections defined in the application

Procedure

To copy a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Duplicate** () icon in the **Duplicate** column corresponding to the customer registration template whose copy you want to create.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the business object using which the customer registration template whose copy you want to create is defined. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration template.
- **Template Pages** - Used to add template pages and its related sections for the customer registration template.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the customer registration template.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> • Account • Person • Policy • Policy Plan 	Yes
	Note: The Policy and Policy Plan options appear when you are defining a customer registration template using the CI-CustomerRegistrationTmplHC business object.	
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

Tip: Alternatively, you can copy a customer registration template by clicking the **Duplicate** button in the **Customer Registration Template** zone.

3. Enter the required details in the **Main** section.
4. Add, edit, or remove the template pages and template sections from the customer registration template, if required.
5. Add, edit, or remove the field attributes from the template section, if required.
6. Click **Save**.

The new customer registration template is defined.

Deleting a Customer Registration Template

Procedure

To delete a Customer Registration Template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the customer registration template that you want to delete.

A message appears confirming whether you want to delete the customer registration template.

3. Click **OK**.

The customer registration template is deleted.

Note: You can delete a customer registration template when a customer registration is not yet created using the customer registration template.

Tip: Alternatively, you can delete a customer registration template by clicking the **Delete** button in the **Customer Registration Template** zone.

Customer Registration Type

A customer registration type encapsulates the following information:

- Users with a particular access group can only create a customer registration object using the customer registration type
- Whether the customer registration type can be used to create a customer registration object from the user interface, through the inbound message, or through the **File Upload Interface** utility
- Whether the approval is required when you create, edit, or delete a customer registration object
- Whether the final level approval is required once the approver at the first level approves the customer registration object
- Whether a To Do should be created indicating that the users have to manually create the billing hierarchy and pricing for the parent customer.
- The business objects using which the person, account, policy plan, membership, and address should be created when a customer registration object is created using the customer registration type
- A customer registration template which indicates the pages and sections that should appear when you are creating a customer registration object using the customer registration type. You can specify one customer registration template for person and one or more customer registration templates for account, policy, and policy plan.
- Information, such as person names, person identifiers, person phones, person characteristics, person addresses, person hierarchy, accounts, account identifiers, account characteristics, account auto pay information, account persons, account bill routing information, policies, policy plans, policy characteristics, or policy plan characteristics, which should be copied when you create a copy of a customer registration object which is created using the customer registration type.

Customer Registration Type List

The **Customer Registration Type List** zone lists the customer registration types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Customer Registration Type	Displays the customer registration type.
Description	Displays the description of the customer registration type.
Edit	On clicking the Edit (✎) icon, the Customer Registration Type screen appears where you can edit the details of the customer registration type.
Duplicate	On clicking the Duplicate (📄) icon, the Customer Registration Type screen appears where you can define a new customer registration type using an existing customer registration type.
Delete	On clicking the Delete (🗑) icon, you can delete the customer registration type.
	Note: You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.

You can filter the list using various search criteria (such as, **Customer Registration Type** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📢) icon corresponding to a customer registration type, the **Customer Registration Type** zone appears with the details of the respective customer registration type.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Customer Registration Type

Prerequisites

To search for a customer registration type, you should have:

- Customer registration types defined in the application

Procedure

To search for a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Type** sub-menu.

The **Customer Registration Type** screen appears with a list of customer registration types in the **Customer Registration Type List** zone.

4. Click the **Filters** (🔍) icon in the title bar of the **Customer Registration Type List** zone.

It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to search for a particular customer registration type.	No
Description	Used to search for customer registration types having a particular description.	No

- Enter the search criteria in the **Customer Registration Type List** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of customer registration types that meet the search criteria appears in the **Search Results** section.

Defining a Customer Registration Type

Prerequisites

To define a customer registration type, you should have:

- Customer registration type business objects defined in the application
- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

Note: The policy plan and membership business objects are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

Note: The billing hierarchy and pricing To Do types and To Do roles are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

Procedure

To define a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.
A sub-menu appears.
3. Click the **Add** option from the **Customer Registration Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type Business Object	Used to indicate the business object using which you want to create the customer registration type. The valid values are: <ul style="list-style-type: none"> • Customer Registration Type - Banking • Customer Registration Type - Healthcare 	Yes

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Type** screen.

Note: The **Select Business Object** screen appears when there are multiple customer registration type business objects defined in the application. If there is only one customer registration type business object defined in the application, the **Customer Registration Type** screen appears.

4. Select the required customer registration business object from the respective field.
5. Click **OK**.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> Active Inactive 	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type.	Yes
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Access Group field. On clicking the Search icon, the Access Group Search window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the Access Group field.</p>	
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> File Upload Inbound Message Manual 	Yes

- Enter the required details in the **Main** section.
- Define additional information about the customer registration type in the **Additional Data** section.
- Define a list of characteristics for the customer registration type in the **Characteristics** section.
- Associate customer registration templates with the customer registration type in the **Customer Registration Templates** section
- Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section.
- Click **Save**.

The customer registration type is defined.

Defining Additional Data for a Customer Registration Type

Prerequisites

To define additional data for a customer registration type, you should have:

- Person, account, policy plan, membership, and address business objects defined in the application

Note: The policy plan and membership business objects are required when you are defining, editing, or copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

Note: The billing hierarchy and pricing To Do types and To Do roles are required when you are defining, editing, or copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

Procedure

To define additional data for a customer registration type:

1. Ensure that the **Additional Data** section is expanded when you are defining, editing, or copying a customer registration type.

The **Additional Data** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required while creating the customer registration using the customer registration type.	Yes (Conditional)
		Note: This field is required for approving the customer registration which is created using the customer registration type.

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Type	Used to indicate the To Do entry of the specified To Do type is created when you submit the customer registration for approval.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Approval To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the Approval To Do Type field.</p> <p>This field appears when the Approval Required check box is selected.</p>	<p>Note: This field is required for approving the customer registration which is created using the customer registration type.</p>
Approval To Do Role	Used to indicate the users with the specified To Do role can approve, reject, or resubmit the customer registration for approval.	Yes (Conditional)
	<p>Note:</p> <p>This field appears when the Approval Required check box is selected.</p>	<p>Note: This field is required for approving the customer registration which is created using the customer registration type.</p>
Submitter To Do Type	Used to indicate the To Do entry of the specified To Do type is created when the customer registration is resubmitted by the approver.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Submitter To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the Submitter To Do Type field.</p>	<p>Note: This field is required for resubmitting the customer registration for approval.</p>
Submitter To Do Role	Used to indicate the users with the specified To Do role for whom the To Do task is created when the customer registration is resubmitted by the approver.	Yes (Conditional)
		<p>Note: This field is required for resubmitting the customer registration for approval.</p>

Field Name	Field Description	Mandatory (Yes or No)
Final Approval Required	Used to indicate whether final approval is required once the approver at the first level approves the customer registration.	Yes (Conditional)
	<p>Note:</p> <p>This field appears when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object.</p> <p>The final approval is required when the Manual Billing Hierarchy and Pricing option check box is selected.</p>	<p>Note: This field is required for approving the customer registration which is created using the customer registration type.</p>
Final Approval To Do Type	Used to indicate the To Do entry of the specified To Do type is created when you submit the customer registration for final approval.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Final Approval To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the Final Approval To Do Type field.</p> <p>This field appears when the Final Approval Required check box is selected.</p>	<p>Note: This field is required for final approval of the customer registration.</p>
Final Approval To Do Role	Used to indicate the users with the specified To Do role can only approve or resubmit the customer registration for final approval.	Yes (Conditional)
	<p>Note: This field appears when the Final Approval Required check box is selected.</p>	<p>Note: This field is required for final approval of the customer registration.</p>
Manual Billing Hierarchy and Pricing	Used to indicate whether the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters are created manually by the user while defining the customer registration.	Yes (Conditional)
	<p>Note:</p> <p>The Manual Billing Hierarchy and Pricing option can be used only for customer registrations where the person type is set to Parent Customer.</p> <p>This field appears when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object.</p>	<p>Note: This field is required for creating the billing hierarchy and pricing for the parent customer manually.</p>

Field Name	Field Description	Mandatory (Yes or No)
Billing Hierarchy and Pricing To Do Type	Used to indicate the To Do entry of the specified To Do type is created for the user to define or edit the billing hierarchy and pricing for the parent customer manually.	Yes (Conditional) Note: This field is required for creating the billing hierarchy and pricing for the parent customer manually.
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Billing Hierarchy and Pricing To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the Billing Hierarchy and Pricing To Do Type field.</p> <p>This field appears when the Manual Billing Hierarchy and Pricing check box is selected.</p>	
Billing Hierarchy and Pricing To Do Role	Used to indicate the users with the specified To Do role can only define or edit the billing hierarchy and pricing for the parent customer manually.	Yes (Conditional) Note: This field is required for creating the billing hierarchy and pricing for the parent customer manually.
	<p>Note: This field appears when the Manual Billing Hierarchy and Pricing check box is selected.</p>	
Person Business Object	Used to indicate the business object using which the customer registration for a person is created using the customer registration type.	Yes
Account Business Object	Used to indicate the business object using which the customer registration for an account is created using the customer registration type.	Yes
Policy Plan Business Object	Used to indicate the business object using which the customer registration for a policy plan is created using the customer registration type.	Yes
	<p>Note: This field appears when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Membership Business Object	Used to indicate the business object using which the customer registration for a membership is created using the customer registration type. Note: The Membership Business Object is required for creating customer registrations through an Inbound Message . This field appears when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object.	Yes
Benefits Business Object	Used to indicate the business object using which the customer registration for a benefit is created using the customer registration type.	No
Address Business Object	Used to indicate the business object using which the customer registration for an address is created using the customer registration type.	Yes
Statement Construct Business Object	Used to indicate the business object using which the customer registration for a statement construct is created using the customer registration type.	Yes

- Enter the required details in the **Additional Data** section.
- Click **Save**.

The additional data for the customer registration type is defined.

Defining a Characteristic for a Customer Registration Type

Prerequisites

To define a characteristic for a customer registration type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration Type**)

Procedure

To define a characteristic for a customer registration type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a customer registration type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to Customer Registration Type .	Note: This field is required when you are defining a characteristic for the customer registration type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Note: This field is required when you are defining a characteristic for the customer registration type.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the customer registration type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the customer registration type, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristic is defined for the customer registration type.

Associating a Customer Registration Template with a Customer Registration Type

Prerequisites

To associate a customer registration template with a customer registration type, you should have:

- Template categories defined in the application
- Customer registration templates associated to the template categories

Procedure

To associate a customer registration template with a customer registration type:

1. Ensure that the **Customer Registration Templates** section is expanded when you are defining, editing, or copying a customer registration type.

The **Customer Registration Templates** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence for the customer registration template.	Yes (Conditional) Note: This field is required when you are associating a customer registration template with a customer registration type.
Template Category	Used to indicate the category to which the customer registration template belongs. The valid values are: <ul style="list-style-type: none"> • Person • Account • Policy • Policy Plan Note: The Policy and Policy Plan template categories appear when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object. You can associate only one person template category and multiple account, policy, and policy plan template categories with the customer registration type.	Yes (Conditional) Note: This field is required when you are associating a customer registration template with a customer registration type.
Template	Used to specify the customer registration template which you want to associate with the customer registration type. Note: The Search (🔍) icon appears corresponding to the Template field. On clicking the Search icon, the Customer Registration Template Search window appears. On specifying the template, the description of the template appears corresponding to the Template field.	Yes (Conditional) Note: This field is required when you are associating a customer registration template with a customer registration type.

2. Enter the required details in the **Customer Registration Templates** section.
3. If you want to define more than one template for the customer registration type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a template from the customer registration type, click the **Delete** (🗑️) icon corresponding to the customer registration template.

4. Click **Save**.

The customer registration template is associated with the customer registration type.

Setting Attributes to Define a Customer Registration Using the Existing Customer Registration

Prerequisites

To set an attribute for defining a customer registration using the existing customer registration, you should have:

- **Person** attributes defined in the application
- **Account** attributes defined in the application
- **Policy** attributes defined in the application

Note: The **Policy** attributes are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- **Policy Plan** attributes defined in the application

Note: The **Policy Plan** attributes are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

Procedure

To set an attribute for defining a customer registration using the existing customer registration:

1. Ensure that the **Copy Customer Registration Details** section is expanded when you are defining, editing, or copying a customer registration type.

The **Copy Customer Registration Details** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Names	Used to indicate whether you want to copy the person details while copying a customer registration.	No
Accounts	Used to indicate whether you want to copy the account details while copying a customer registration.	No
Person Identifiers	Used to indicate whether you want to copy the person identifier details while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
Account Identifiers	Used to indicate whether you want to copy the account identifier details while copying a customer registration.	No
	Note: The check box of this field is enabled when the Accounts check box is selected in the Copy Customer Registration Details section.	
Person Phones	Used to indicate whether you want to copy the phone details of the person while copying a customer registration.	No
Account Characteristics	Used to indicate whether you want to copy the characteristic details of the account while copying a customer registration.	No
	Note: The check box of this field is enabled when the Accounts check box is selected in the Copy Customer Registration Details section.	
Person Characteristics	Used to indicate whether you want to copy the characteristic details of the person while copying a customer registration.	No
Account Auto pay Information	Used to indicate whether you want to copy the automatic payment details of the account while copying a customer registration.	No
	Note: The check box of this field is enabled when the Accounts check box is selected in the Copy Customer Registration Details section.	
Person Addresses	Used to indicate whether you want to copy the address details of the person while copying a customer registration.	No
Account Persons	Used to indicate whether you want to copy the details of the persons related to the account while copying a customer registration.	No
	Note: The check box of this field is enabled when the Accounts check box is selected in the Copy Customer Registration Details section.	
Person Hierarchy	Used to indicate whether you want to copy the person hierarchy details while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
Account Override Address	Used to indicate whether you want to copy the account override address details while copying a customer registration.	No
	Note: The check box of this field is enabled when the Accounts check box is selected in the Copy Customer Registration Details section.	
Bill Routing Information	Used to indicate whether you want to copy the bill routing details of the account while copying a customer registration.	No
	Note: The check box of this field is enabled when the Accounts check box is selected in the Copy Customer Registration Details section.	
Credit Rating History	Used to indicate whether you want to copy the credit rating history details while copying a customer registration.	No
	Note: The check box of this field is enabled when the Accounts check box is selected in the Copy Customer Registration Details section.	
Policies	Used to indicate whether you want to copy the policy details while copying a customer registration.	No
	Note: This field appears only when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object.	
Policy Plans	Used to indicate whether you want to copy the policy plan details while copying a customer registration.	No
	Note: This field appears when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object. The check box of this field is enabled only when the Policies check box is selected in the Copy Customer Registration Details section.	

Field Name	Field Description	Mandatory (Yes or No)
Policy Characteristics	Used to indicate whether you want to copy the policy characteristic details while copying a customer registration.	No
	<p>Note:</p> <p>This field appears when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object.</p> <p>The check box of this field is enabled only when the Policies check box is selected in the Copy Customer Registration Details section.</p>	
Policy Plan Characteristics	Used to indicate whether you want to copy the policy plan characteristic details while copying a customer registration.	No
	<p>Note:</p> <p>This field appears when you are defining, editing, or copying a Customer Registration Type using the C1-CustRegTypeHealthCare business object.</p> <p>The check box of this field is enabled when the Policy Plans check box is selected in the Copy Customer Registration Details section.</p>	

2. Select the required attributes in the **Copy Customer Registration Details** section.
3. Click **Save**.

The attributes are set for defining a customer registration using the existing customer registration.

Editing a Customer Registration Type

Prerequisites

To edit a customer registration type, you should have:

- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application

- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

Note: The policy plan and membership business objects are required when you are editing a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

Note: The billing hierarchy and pricing To Do types and To Do roles are required when you are editing a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

Procedure

To edit a customer registration type:

1. Search for the customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the customer registration type whose details you want to edit.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Displays the customer registration type.	Not applicable
Business Object	Indicates the business object using which the customer registration type is created in the system.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> Active Inactive 	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type.	Yes
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Access Group field. On clicking the Search icon, the Access Group Search window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the Access Group field.</p>	
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> File Upload Inbound Message Manual 	Yes

Tip: Alternatively, you can edit the details of a customer registration type by clicking the **Edit** button in the **Customer Registration Type** zone.

- Modify the required details in the **Main** section, if required.
- Modify additional information about the customer registration type in the **Additional Data** section, if required.
- Define, edit, or remove characteristics of the customer registration type in the **Characteristics** section, if required.
- Associate or disassociate customer registration templates from the customer registration type in the **Customer Registration Templates** section, if required.
- Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section, if required.
- Click **Save**.

The changes made to the customer registration type are saved.

Copying a Customer Registration Type

Instead of creating a customer registration type from scratch, you can create a new customer registration type using an existing customer registration type. This is possible through copying a customer registration type. On copying a customer registration type, the details including the additional data, characteristics, customer registration templates, and attributes set to define a customer registration from the existing customer registration are copied to the new customer registration type. You can then edit the details, if required.

Prerequisites

To copy a customer registration type, you should have:

- Customer registration type (whose copy you want to create) defined in the application
- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

Note: The policy plan and membership business objects are required when you are copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

Note: The billing hierarchy and pricing To Do types and To Do roles are required when you are copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

Procedure

To copy a customer registration type:

1. Search for a customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the customer registration type whose copy you want to create.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> • Active • Inactive 	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Access Group field. On clicking the Search icon, the Access Group Search window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the Access Group field.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> File Upload Inbound Message Manual 	Yes

Tip: Alternatively, you can copy a customer registration type by clicking the **Duplicate** button in the **Customer Registration Type** zone.

- Enter the required details in the **Main** section.
- Enter additional information about the customer registration type in the **Additional Data** section.
- Define, edit, or remove characteristics of the customer registration type in the **Characteristics** section.
- Associate or disassociate customer registration templates from the customer registration type in the **Customer Registration Templates** section.
- Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section.
- Click **Save**.

The new customer registration type is defined.

Deleting a Customer Registration Type

Procedure

To delete a Customer Registration Type:

- Search for the customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.

- In the **Customer Registration Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the customer registration type that you want to delete.

A message appears confirming whether you want to delete the customer registration type.

- Click **OK**.

The customer registration type is deleted.

Note: You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.

Tip: Alternatively, you can delete a customer registration type by clicking the **Delete** button in the **Customer Registration Type** zone.

	<p>Note: This field appears only when the Inbound Message Details option is selected from the Search By list.</p>	<p>Note: This field is required for searching customer registrations using the inbound message details.</p>
Source System	Used to search customer registrations whose information is received from a particular external system.	Yes (Conditional)
	<p>Note: This field appears when the Inbound Message Details option is selected from the Search By list.</p>	<p>Note: This field is required for searching customer registrations using the inbound message details.</p>

Field Name	Field Description	Mandatory (Yes or No)
External Source ID	Used to search for a customer registrations whose information is received from a particular external source system.	Yes (Conditional)
	Note: This field appears when the Inbound Message Details option is selected from the Search By list.	Note: This field is required for searching customer registrations using the inbound message details.
External Transaction ID	Used to search for a customer registration which is created as a result of a particular transaction in the external source system.	Yes (Conditional)
	Note: This field appears when the Inbound Message Details option is selected from the Search By list.	Note: This field is required for searching customer registrations using the inbound message details.
External Batch ID	Used to search customer registrations which are created through an external batch job.	Yes (Conditional)
	Note: This field appears when the Inbound Message Details option is selected from the Search By list.	Note: This field is required for searching customer registrations using the inbound message details.
Inbound Message Type	Used to search customer registrations which are created using a particular inbound message type.	Yes (Conditional)
	Note: This field appears when the Inbound Message Details option is selected from the Search By list.	Note: This field is required for searching customer registrations using the inbound message details.
Request Id	Used to search customer registrations which are created from a particular file uploaded through the File Upload Interface utility.	Yes (Conditional)
	Note: This field appears when the File Upload Details option is selected from the Search By list.	Note: This field is required for searching customer registrations using the file upload details.
File Name	Used to search customer registrations created from uploading a file with a particular name.	Yes (Conditional)
	Note: This field appears when the File Upload Details option is selected from the Search By list.	Note: This field is required for searching customer registrations using the file upload details.

Field Name	Field Description	Mandatory (Yes or No)
File Status	Used to search customer registrations created from the uploaded files having a particular status. The valid values are: <ul style="list-style-type: none"> • Approval Pending • Completed • Error • Pending • Rejected 	Yes (Conditional)
	Note: This field appears when the File Upload Details option is selected from the Search By list.	Note: This field is required for searching customer registrations using the file upload details.
File Request Type	Used to search customer registrations which are created from the uploaded files with a particular file request type.	Yes (Conditional)
	Note: This field appears when the File Upload Details option is selected from the Search By list.	Note: This field is required for searching customer registrations using the file upload details.

Note: You must specify at least one search criterion while searching for a customer registration. One more search criterion is required when you are searching for a customer registration using the division and/or person type.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the customer registration is created in the system.
Customer Registration Information	Displays the concatenated string of information about the customer registration. Note: It has a link. On clicking the link, the Customer Registration screen appears where you can view the details of the respective customer registration.

Column Name	Column Description
Status	<p>Indicates the status of the customer registration. The valid values are:</p> <ul style="list-style-type: none"> • Approval In Progress • Bill Group Approved • Complete • Draft • Draft for Update • Parent Customer Approved • Pending Final Approval • Pending Pricing Correction • Rejected
	<p>Note: The values listed above appear when the Registration Details option is selected from the Search By list.</p>
	<ul style="list-style-type: none"> • Pending • Processed • Rejected • Voided
	<p>Note: These values listed above appear when the Inbound Message Details option is selected from the Search By list.</p>
	<p>Note: This column appears only when the Registration Details, Person Details, or Inbound Message Details options are selected from the Search By list.</p>
Request Id	<p>Displays the request Id generated while uploading a file through the File Upload Interface utility for creating the customer registration object.</p>
	<p>Note: This column appears when the File Upload Details option is selected from the Search By list.</p>
Created By	<p>Displays the user who has created the customer registration.</p>
	<p>Note: This column appears when the Registration Details, Person Details, or Inbound Message Details options are selected from the Search By list.</p>
Inbound Message Information	<p>Displays the concatenated string of information about the inbound message.</p>
	<p>Note:</p> <p>It has a link. On clicking the link, the Inbound Message screen appears where you can view the details of the respective inbound message.</p> <p>This column appears when the Inbound Message Details option is selected from the Search By list.</p>

Column Name	Column Description
File ID	Displays the file which is uploaded for creating the customer registration through the File Upload Interface utility.
	Note: This column appears when the File Upload Details option is selected from the Search By list.
Copy	On clicking the Copy (📄) icon, the Customer Registration screen appears where you can define a new customer registration using an existing customer registration.
	Note: This column appears when the Registration Details option is selected from the Search By list.
Person Name	Displays the name of the person for whom the customer registration is defined in the system.
	Note: This column appears when the Person Details option is selected from the Search By list.
Inbound Message Type	Indicates the inbound message type using which the inbound message is created in the system.
	Note: This column appears when the Inbound Message Details option is selected from the Search By list.
File Name	Displays the name of the file which is uploaded for creating the customer registration through the File Upload Interface utility.
	Note: This column appears when the File Upload Details option is selected from the Search By list.
Primary Person Identifier Type	Indicates the primary identifier type associated with the person.
	Note: This column appears when the Person Details option is selected from the Search By list.
Source System	Indicates the source system from where the inbound message is received for creating the customer registration.
	Note: This column appears when the Inbound Message Details option is selected from the Search By list.
Request Type	Indicates the request type using which the file is uploaded through the File Upload Interface utility for creating the customer registration.
	Note: This column appears only when the File Upload Details option is selected from the Search By list.
Primary Person Identifier	Displays the primary person identifier.
	Note: This column appears when the Person Details option is selected from the Search By list.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Customer Registration

Prerequisites

To search for a customer registration, you should have:

- Customer registration business objects defined in the application
- Customer registration statuses and customer registration types defined in the application
- Divisions associated with the access group to which the user belongs
- Person types and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Inbound message statuses, inbound message types, and source systems defined in the application.
- File statuses and file request types defined in the application.

Procedure

To search for a customer registration:

- 1.** Click the **Menu** link in the **Application** toolbar.
A list appears.
- 2.** From the **Main** menu, select **Customer Management** and then click **Customer Registration**.
A sub-menu appears.
- 3.** Click the **Search** option from the **Customer Registration** sub-menu.
The **Customer Registration** screen appears.
- 4.** Enter the search criteria in the **Search Customer Registration** zone.

Note:

You must specify at least one search criterion while searching for a customer registration object. One more search criterion is required when you are searching for a customer registration using the division and/or person type.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

You must specify the division when you are searching for a customer registration of a person using the city.

You must specify division and/or any other criteria in the second group when you are searching for a customer registration using the person type.

If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the customer registration using the person ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **Search Customer Registration** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of customer registrations that meet the search criteria appears in the **Search Results** section.

Defining a Customer Registration

Prerequisites

To define a customer registration, you should have:

- Customer registration types, source systems, and person types defined in the application
- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Relationship types defined in the application
- Policy types and policy person roles defined in the application.

Note: These prerequisites are required when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

Procedure

To define a customer registration:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Customer Registration**.
A sub-menu appears.
3. Click the **Add** option from the **Customer Registration** sub-menu.

The **Add Customer Registration** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to indicate the customer registration type using which you want to define the customer registration.	Yes
Source System	Used to indicate the external system from where the customer registration information is received.	No
Person Type	Used to indicate the type of person for whom you want to define the customer registration.	Yes

Tip: Alternatively, you can access the **Add Customer Registration** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration** screen.

4. Select the required **Customer Registration Type** from the respective field.
5. Select the required **Source System** from the respective field, if required.

6. Select the required **Person Type** from the respective field.
7. Click **OK**.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Policies** - Used to specify the policy details of the person.

Note: This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	Yes
Division	Used to indicate the division to which the person belongs. Note: You can view only those divisions to which you have access in the Division list.	Yes
Person Since Date	Used to specify the date from when the person is the main customer.	Yes
Customer Segment	Used to indicate the customer segment to which the person belongs. Note: This field appears when you are defining a customer registration using the C1-CustomerRegistrationBanking business object.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Customer Tier	Used to indicate the customer tier of the customer segment to which the person belongs.	Yes
	Note: This field appears when you are defining a customer registration using the C1-CustomerRegistrationBanking business object.	
Access Group	Used to indicate the user group that can access the customer registration.	Yes
	Note: The Search (🔍) icon appears corresponding to the Access Group field. On clicking the Search icon, the Access Group Search window appears. On specifying the access group, the description of the access group appears corresponding to the Access Group field.	

8. Enter the required details in the **Main** section.
9. Add the names of the person in the **Person Names** section.
10. Add the phone details for the person in the **Person Phones** section.
11. Add the identifier details for the person in the **Person IDs** section.
12. Define the addresses of the person in the **Contact** page, if required.
13. Define a list of characteristics for the person in the **Person Characteristics** page, if required.
14. Define the person to person relationship for the person in the **Hierarchy** page, if required.
15. Add the account details of the person in the **Accounts** page, if required.
16. Add the policy details of the person in the **Policies** page, if required.

Note: This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

17. Define a list of characteristics for the customer registration in the **Registration Characteristics** page, if required.
18. Click **Validate and Save**.

The customer registration is defined.

Adding the Names of a Person

Prerequisites

To add the names of a person, you should have:

- Name types defined in the application.

Procedure

To add the names of a person:

1. Ensure that the **Person Names** section is expanded in the **Main** page when you are defining, editing, or copying a customer registration.

The **Person Names** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Name Type	Used to indicate the type of name which you want to add for the customer registration.	Yes (Conditional)
	Note: The list includes only those name types where the name type entity is set to Customer Registration .	Note: This field is required when you are adding a name for customer registration.
Name	Used to specify the name of the person.	Yes (Conditional)
		Note: This field is required when you are adding a name for customer registration.

2. Enter the required details in the **Person Names** section.
3. If you want to add more than one person name for the customer registration, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a person name from the customer registration, click the **Delete** (🗑️) icon corresponding to the person name.

4. Click **Validate and Save**.

The names are added for the person.

Adding an Account for a Person

Prerequisites

To add the account for a person, you should have:

- Customer class, divisions, currencies, account categories, access groups, accrual cycles, and bill cycles defined in the application
- Account identifier types defined in the application
- Auto pay source codes, auto pay methods, and auto pay route types defined in the application
- Account relationship types defined in the application
- Address sources, bill formats, and bill route types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

Procedure

To add an account for a person:

1. Ensure that the **Accounts** section is expanded in the **Accounts** page when you are adding, editing, or removing an account of a person.

The **Accounts** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the account.	Not applicable
Template	Displays the account template using which the account is added for the person.	Not applicable
Customer Class	Indicates the customer class to which the account belongs.	Not applicable
Division	Indicates the division to which the account belongs.	Not applicable
Primary Identifier Type	Indicates the primary identifier type using which the account is added for the person.	Not applicable
Identifier Value	Displays the value of the primary identifier type.	Not applicable
Account Information	Displays the concatenated string of information about the account that is added for the person.	Not applicable
View / Edit	On clicking the View / Edit (✎) icon, you can view or edit the details of the account.	Not applicable

Note: No information appears in the above columns if an account is not yet added for the person.

2. Click the **Add New Account** button in the **Accounts** section.

The **Customer Registration - Add Account** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the account.
- **Auto Pay** - Used to add the automatic payment details of the account.
- **Persons** - Used to associate a person to the account.
- **Account Characteristics** - Used to define a list of characteristics for the account.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the account.
- **Account Identifiers** - Used to add the identifier details for the account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	Used to indicate the customer class to which the account belongs.	Yes
Division	Used to indicate the division to which the account belongs.	Yes
	Note: You can only view those divisions to which you have access in the Division list.	

Field Name	Field Description	Mandatory (Yes or No)
Set Up Date	Used to specify the date from when the account is configured for the person.	Yes
	Note: By default, the current date appears in this field.	
Invoice Currency	Used to indicate the currency which you want to use for generating the invoice of the account.	Yes
	Note: The list includes only those currencies which are defined in the system.	
Account Category	Used to indicate the category to which the account belongs. The valid values are: <ul style="list-style-type: none"> • Invoice Account • Settlement Account • Usage Account 	Yes
	Note: The list includes only those values which are present in the ACCT_USAGE_FLG lookup field.	
Access Group	Used to indicate the user group that can access the account for the person.	Yes
	Note: The Search (🔍) icon appears corresponding to the Access Group field. On clicking the Search icon, the Access Group Search window appears. On specifying the access group, the description of the access group appears corresponding to the Access Group field.	
Exclude Accrual	Used to indicate whether the account is eligible for accrual.	No
	Note: By default, the account is eligible for accrual if the division to which the account belongs is eligible for accrual. If you do not want the account to be eligible for accrual, you must select the Exclude Accrual check box. On selecting the Exclude Accrual check box, the Accrual Cycle field is disabled.	

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to indicate the accrual cycle of the account in the division.	No
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Accrual Cycle field. On clicking the Search icon, the Accrual Cycle Search for Cust Reg window appears.</p> <p>On specifying the accrual cycle, the description of the accrual cycle appears corresponding to the Accrual Cycle field.</p> <p>This field is disabled when you click the Exclude Accrual check box.</p>	
Product	Used to indicate the product for which the account is enrolled.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Product field. On clicking the Search icon, the Search Product window appears.</p>	
Eligible for Repricing	Used to indicate whether the account is eligible for repricing when the account attributes (defined as parameters in the system) are changed.	No
	<p>Note:</p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p>	
Bill Cycle	Used to indicate the bill cycle for the account.	No
Bill Lead Days	Used to specify the number of days which is used to derive the cut-off date for advance billing.	Yes
	<p>Note: In case you don't want to bill the account in advance, you must specify 0 in this field.</p>	
Comments	Used to specify additional information about the account.	No

3. Enter the required details in the **Main** section.

4. Add, edit, or remove the identifier details of the account in the **Account Identifiers** section.
5. Add, edit, or remove the automatic payment details of the account in the **Auto Pay** page, if required.
6. Associate or disassociate persons from the account in the **Persons** page, if required.
7. Define, edit, or remove characteristics of the account in the **Account Characteristics** page, if required.
8. Add, edit, or remove the credit rating details of the account in the **Credit Ratings** page, if required.
9. Click **Validate and Save**.

The account is added for the person.

Defining a Policy

Prerequisites

To define a policy, you should have:

- Policy types defined in the application.
- Source systems defined in the application.
- Policy person roles defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To define a policy:

1. Ensure that the **Policies & Plans** section is expanded in the **Policies** page when you are defining, editing, or removing a policy from the person.

The **Policies & Plans** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the policy.	Not applicable
Template	Indicates the policy template using which the policy is defined for the person.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined for the person.	Not applicable
Policy Number	Displays the policy number.	Not applicable
View / Edit	On clicking the View / Edit (✎) icon, you can view or edit the details of the policy.	Not applicable
Policy Plans	On clicking the Add (+) icon, you can add policy plans for the policy.	Not applicable

Note: No information appears in the above columns if a policy is not yet defined for the person.

2. Click the **Add New Policy** button in the **Policies & Plans** section.

The **Select Policy Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to indicate the policy type using which you want to define a policy. Note: If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to Self-Funded .	Yes

3. Select the required policy type from the **Policy Type** field.
4. Click **OK**.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	Note: This field is enabled when you are defining a policy using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual .	
Start Date	Used to specify the date from when the policy is effective.	Yes
	Note: The policy start date cannot be later than the policy end date.	
End Date	Used to specify the date till when the policy is effective.	Yes
	Note: The policy end date cannot be earlier than the policy start date.	
Policy Person Role	Used to indicate the role of the person for whom you are defining the policy.	Yes

Note: The **Policies** page appears when you are defining, editing, or copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

- Enter the required details in the **Main** section.
- Define characteristics for the policy in the **Characteristics** section, if required.
- Associate persons to the policy in the **Persons** section, if required.
- Click **Validate and Save**.

The policy is defined for the person.

Associating a Person to a Policy

Prerequisites

To associate a person to a policy, you should have:

- Policy person roles defined in the application

Procedure

To associate a person to a policy:

1. Ensure that the **Persons** section is expanded in the **Policy** screen when you are defining or editing a policy.

The **Persons** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Person	Used to indicate the person that you want to associate to the policy.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Person field. On clicking the Search icon, the Person Search window appears.</p> <p>On specifying the person, the concatenated string of information about the person appears corresponding to the Person field separated by a comma (,).</p>	<p>Note: This field is required when you are associating a person to the policy.</p>
Sequence	Used to specify the sequence number for the associated person.	Yes (Conditional)
		<p>Note: This field is required when you are associating a person to the policy.</p>
Policy Person Role	Used to indicate the role of the associated person in the policy.	Yes (Conditional)
		<p>Note: This field is required when you are associating a person to the policy.</p>
Main Customer	Used to indicate whether the associated person is the main customer of the policy.	Yes (Conditional)
	<p>Note:</p> <p>At a time, only one person can be the main customer of the policy.</p> <p>You must select this option while associating a person who is the main customer of the policy.</p>	<p>Note: This field is required when you are associating a person to the policy.</p>

Column Name	Column Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the person is associated to the policy.	Yes (Conditional)
	<p>Note:</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than the policy start date and later than the policy end date.</p>	<p>Note: This field is required when you are associating a person to the policy.</p>
End Date	Used to specify the date till when the person is associated to the policy.	No
	<p>Note:</p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the policy start date and later than the policy end date.</p>	

- Enter the required details in the **Persons** section.
- If you want to associate more than one person to the policy, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a person from the person, click the **Delete (🗑)** icon corresponding to the person.

- Click **Validate and Save**.

The person is associated to the policy.

Defining a Characteristic for a Policy

Prerequisites

To define a characteristic for a policy, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To define a characteristic for a policy:

- Ensure that the **Characteristics** section is expanded in the **Policy** screen when you are defining or editing a policy.

The **Characteristics** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the policy.	Yes (Conditional) Note: This field is required when defining a characteristic for the policy.
Characteristic Type	Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Policy	Yes (Conditional) Note: This field is required when defining a characteristic for the policy.
Characteristic Value	Used to specify the value for the characteristic type. Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Yes (Conditional) Note: This field is required when defining a characteristic for the policy.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the policy, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the policy, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Validate and Save**.

The characteristic is defined for the policy.

Adding a Plan in a Policy

Prerequisites

To add a plan in a policy, you should have:

- Policy plan templates defined in the application.
- Policy plan business objects defined in the application.
- Pricing rule types defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**)

Procedure

To add a plan in a policy:

1. Ensure that the **Policies & Plans** section is expanded in the **Policies** page when you are adding, editing, or removing a policy plan from a policy.
2. Click the **Add**  icon in the **Policy Plans** column corresponding to the policy in which you want to add a policy plan.

The following columns appear in the **Policies & Plans** section:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the policy plan.	Not applicable
Template	Indicates the policy plan template using which the policy plan is added in the policy.	Not applicable
Plan Number	Displays the policy plan number.	Not applicable
Price Item	Displays the price item that is associated with the policy plan.	Not applicable
View / Edit	On clicking the View / Edit  icon, you can view or edit the details of the policy plan.	Not applicable

Note: No information appears in the above columns if a plan is not yet added in the policy.

3. Click the **Add New Plan** button in the **Policies & Plans** section.

The **Select Policy Plan Template** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to indicate the template using which you want to define the policy plan for the policy. Note: By default, the Policy Plan - Healthcare option is selected.	Yes
Business Object	Used to indicate the business object using which you want to define the policy plan for the policy. Note: By default, the Policy Plan option is selected.	Yes

4. Select the required template and business object from the respective fields.
5. Click **OK**.

The **Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the policy plan.
- **Characteristics** - Used to define the characteristics for the policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	<p>Used to indicate the price item which you want to directly associate with the policy plan.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Price Item field. On clicking the Search icon, the Price Item Search window appears.</p> <p>On the specifying the price item, the concatenated string of information about the price item appears corresponding to the Price Item field separated by a comma (,).</p>	Yes
Plan Number	Used to specify the policy plan number.	Yes
Plan Name	Used to specify the description for the policy plan.	No
Start Date	<p>Used to specify the date from when the policy plan is effective for the policy.</p> <p>Note:</p> <p>The policy plan start date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan start date cannot be later than the policy plan end date.</p>	Yes
End Date	<p>Used to specify the date till when the policy plan is effective for the policy.</p> <p>Note:</p> <p>The policy plan end date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan end date cannot be earlier than the policy plan start date.</p>	No

6. Enter the required details in the **Main** section.

7. Associate the pricing rule types with the policy plan in the **Pricing Rule Types** section, if required.
8. Define the characteristics for the policy plan in the **Characteristics** section, if required.
9. Click **Validate and Save**.

The policy plan is added in the policy.

Associating a Pricing Rule Type with a Policy Plan

Prerequisites

To associate a pricing rule type with a policy plan, you should have:

- Pricing rule types defined in the application.

Procedure

To associate a pricing rule type with a policy plan:

1. Ensure that the **Pricing Rule Types** section is expanded in the **Plan** screen when you are adding or editing a policy plan of a policy.

The **Pricing Rule Types** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Pricing Rule Type	Used to indicate the pricing rule type that you want to associate with the policy plan.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Pricing Rule Type field. On clicking the Search icon, the Pricing Rule Type Search window appears.</p> <p>On specifying the pricing rule type, the description of the pricing rule type appears corresponding to the Pricing Rule Type field.</p>	<p>Note: This field is required while associating a pricing rule type with the policy plan.</p>

2. Enter the required details in the **Pricing Rule Types** section.
3. If you want to associate more than one pricing rule type with the policy plan, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a pricing rule type from the policy plan, click the **Delete** (🗑️) icon corresponding to the pricing rule type.

4. Click **Validate and Save**.

The pricing rule type is associated with the policy plan.

Editing the Account Details of a Person

Prerequisites

To edit the account details of a person, you should have:

- Customer class, divisions, currencies, access groups, accrual cycles, and bill cycles defined in the application

- Account identifier types defined in the application
- Auto pay source codes, auto pay methods, and auto pay route types defined in the application
- Account relationship types defined in the application
- Address sources, bill formats, and bill route types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

Procedure

To edit the account details of a person:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose account details you want to edit.

The **Main** tab appears in the **Customer Registration** screen.

3. Click the **Edit** button in the **Customer Registration** zone.

The **Main** page appears in the **Customer Registration** screen.

4. Ensure that the **Accounts** section is expanded in the **Accounts** page.

5. Click the **Edit**() icon in the **View / Edit** column corresponding to the account whose details you want to edit.

The **Customer Registration - Add Account** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the account.
- **Auto Pay** - Used to add the automatic payment details of the account.
- **Persons** - Used to associate a person to the account.
- **Account Characteristics** - Used to define a list of characteristics for the account.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the account.
- **Account Identifiers** - Used to add the identifier details for the account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	Used to indicate the customer class to which the account belongs.	Yes
Division	Used to indicate the division to which the account belongs. Note: You can only view those divisions to which you have access in the Division list.	Yes
Set Up Date	Displays the date from when the account is configured for the person.	Not applicable
Invoice Currency	Used to indicate the currency which you want to use for generating the invoice of the account. Note: The list includes only those currencies which are defined in the system.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account Category	Displays the category to which the account belongs. The valid values are: <ul style="list-style-type: none"> • Invoice Account • Settlement Account • Usage Account 	Not applicable
	Note: The list includes only those values which are present in the ACCT_USAGE_FLG lookup field.	
Access Group	Used to indicate the user group that can access the account for the person.	Yes
	Note: The Search (🔍) icon appears corresponding to the Access Group field. On clicking the Search icon, the Access Group Search window appears. On specifying the access group, the description of the access group appears corresponding to the Access Group field.	
Exclude Accrual	Used to indicate whether the account is eligible for accrual.	No
	Note: By default, the account is eligible for accrual if the division to which the account belongs is eligible for accrual. If you do not want the account to be eligible for accrual, you must select the Exclude Accrual check box. On selecting the Exclude Accrual check box, the Accrual Cycle field is disabled.	
Accrual Cycle	Used to indicate the accrual cycle of the account in the division.	No
	Note: The Search (🔍) icon appears corresponding to the Accrual Cycle field. On clicking the Search icon, the Accrual Cycle Search for Cust Reg window appears. On specifying the accrual cycle, the description of the accrual cycle appears corresponding to the Accrual Cycle field. This field is disabled when you click the Exclude Accrual check box.	

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to indicate the product for which the account is enrolled.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Product field. On clicking the Search icon, the Search Product window appears.</p>	<p>Note: This field is required while enrolling an account for a product.</p>
Eligible for Repricing	Used to indicate whether the account is eligible for repricing when the account attributes (defined as parameters in the system) are changed.	No
	<p>Note:</p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p>	
Bill Cycle	Used to indicate the bill cycle for the account.	No
Bill Lead Days	Used to specify the number of days which is used to derive the cut-off date for advance billing.	Yes
	<p>Note: In case you don't want to bill the account in advance, you must specify 0 in this field.</p>	
Comments	Used to specify additional information about the account.	No

6. Modify the required details of the account in the **Main** page.
7. Add, edit, or remove the identifier details of the account in the **Account Identifiers** section.
8. Add, edit, or remove the automatic payment details of the account in the **Auto Pay** page, if required.
9. Associate or disassociate persons from the account in the **Persons** page, if required.
10. Define, edit, or remove characteristics of the account in the **Account Characteristics** page, if required.
11. Add, edit, or remove the credit rating details of the account in the **Credit Ratings** page, if required.
12. Click **Validate and Save**.

The changes made to the account are saved.

Copying a Customer Registration

Instead of creating a customer registration from scratch, you can create a new customer registration using an existing customer registration. This is possible through copying a customer registration. On copying a customer registration, the details including the characteristics are copied to the new customer registration. You can then edit the details, if required.

Prerequisites

To copy a customer registration, you should have:

- Customer registration (whose copy you want to create) defined in the application
- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic Types defined in the application
- Relationship types defined in the application
- Policy types and policy person roles defined in the application.

Note: These prerequisites are required when you are copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

Procedure

To copy a customer registration:

1. Search for the customer registration in the **Customer Registration** screen.
2. Click the **Copy**  icon in the **Copy** column corresponding to the customer registration whose copy you want to create.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Policies** - Used to specify the policy details of the person.

Note: This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	No
Division	Used to indicate the division to which the person belongs.	Not applicable
Person Since Date	Used to specify the date from when the person is the main customer.	No
Customer Segment	Used to indicate the customer segment to which the person belongs. Note: This field appears when you are defining a customer registration using the C1-CustomerRegistrationBanking business object.	No
Customer Tier	Used to indicate the customer tier of the customer segment to which the person belongs. Note: This field appears when you are defining a customer registration using the C1-CustomerRegistrationBanking business object.	No
Access Group	Used to indicate the user group that can access the customer registration. Note: The Search (🔍) icon appears corresponding to the Access Group field. On clicking the Search icon, the Access Group Search window appears.	No

3. Enter the required details in the **Main** section.

4. Add or remove the names of the person in the **Person Names** section.
5. Add or remove the phone details for the person in the **Person Phones** section.
6. Add, edit, or remove the identifier details for the person in the **Person IDs** section.
7. Define, edit, or remove the addresses of the person in the **Contact** page, if required.
8. Define, edit, or remove characteristics of the person in the **Person Characteristics** page, if required.
9. Define, edit, or remove the person to person relationship for the person in the **Hierarchy** page, if required.
10. Add, edit, or remove the account details of the person in the **Accounts** page, if required.

Editing the Policy Details

Prerequisites

To edit the policy details, you should have:

- Source systems defined in the application.
- Policy person roles defined in the application.

- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To edit the policy details:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose policy details you want to edit.

The **Main** tab appears in the **Customer Registration** screen.

3. Click the **Edit** button in the **Customer Registration** zone.

The **Main** page appears in the **Customer Registration** screen.

4. Ensure that the **Policies & Plans** section is expanded in the **Policies** page.

5. Click the **Edit**() icon in the **View / Edit** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which the policy is defined in the system.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated. Note: This field is enabled when you are defining a policy using a policy type where the policy category is set to Fully-Insured Group or Fully-Insured Individual .	Yes
Start Date	Used to specify the date from when the policy is effective. Note: The policy start date cannot be later than the policy end date.	Yes
End Date	Used to specify the date till when the policy is effective. Note: The policy end date cannot be earlier than the policy start date.	Yes
Policy Person Role	Used to indicate the role of the person for whom you are defining the policy.	Yes

Note: The **Policies** page appears when you are defining, editing, or copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

6. Modify the required details in the **Main** section.
7. Define, edit, or remove characteristics of the policy in the **Characteristics** section, if required.
8. Associate or disassociate persons from the policy in the **Persons** section, if required.
9. Click **Validate and Save**.

The changes made to the policy are saved.

Editing the Customer Registration Details

Prerequisites

To define a customer registration, you should have:

- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Relationship types defined in the application
- Policy types and policy person roles defined in the application.

Note: These prerequisites are required when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

Procedure

To edit a customer registration:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose details you want to edit.

The **Main** tab appears in the **Customer Registration** screen.

3. Click the **Edit** button in the **Customer Registration** zone.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Policies** - Used to specify the policy details of the person.

Note: This page appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	Yes
Division	Used to indicate the division to which the person belongs.	Yes
	Note: You can view only those divisions to which you have access in the Division list.	
Person Since Date	Used to specify the date from when the person is the main customer.	Yes
Customer Segment	Used to indicate the customer segment to which the person belongs.	Yes
	Note: This field appears when you are editing a customer registration which is created using the C1-CustomerRegistrationBanking business object.	
Customer Tier	Used to indicate the customer tier of the customer segment to which the person belongs.	Yes
	Note: This field appears when you are editing a customer registration which is created using the C1-CustomerRegistrationBanking business object.	
Access Group	Used to indicate the user group that can access the customer registration.	Yes
	Note: The Search (🔍) icon appears corresponding to the Access Group field. On clicking the Search icon, the Access Group Search window appears. On specifying the access group, the description of the access group appears corresponding to the Access Group field.	

4. Modify the required details in the **Main** section.
5. Add, edit, or remove the names of the person in the **Person Names** section.
6. Add, edit, or remove the phone details of the person in the **Person Phones** section.

7. Add or remove the identifier details of the person in the **Person IDs** section.
8. Define, edit, or remove the address of the person in the **Contact** page, if required.
9. Define, edit, or remove characteristics of the person in the **Person Characteristics** page, if required.
10. Define, edit, or remove the person to person relationship for the person in the **Hierarchy** page, if required.
11. Add, edit, or remove the account details of the person in the **Accounts** page, if required.
12. Add, edit, or remove the policy details of the person in the **Policies** page, if required.

Note: This page appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

13. Define, edit, or remove characteristics of the customer registration in the **Registration Characteristics** page, if required.
14. Click **Validate and Save**.

The changes made to the customer registration are saved.

Customer 360° View

Topics:

- [Prerequisites](#)
- [Customer 360° View](#)
- [Customer 360° Information](#)
- [Bill Information](#)

Oracle Revenue Management and Billing provides a new screen named **Customer 360° View** which enables you to quickly view in-depth information about the person. This screen can be used to view the 360° information of a person who is associated with the fully-insured group or self-funded policy. It provides the following information:

- Basic details, characteristics, child persons, person hierarchy, person billing hierarchy, and the customer contacts of the person.
- Customer registration objects through which the bill groups are created for a parent customer.
- List of accounts to which the parent customer and its bill groups are associated.
- Basic details, characteristics, administrative contracts, automatic payment options, billing and adjustment summary, financial and collections summary, and unpaid bills of the person's account.
- Consolidated view of the transactions (such as, billing, payment, payment cancellation, adjustment, adjustment cancellation, automatic payments sent to the auto clearing house for review, refund, write off, excess credit, and reconciliation) which are carried out for the person's account.
- List of policies to which the parent customer or bill group is associated. The system lists those policies where the policy category is set to **Self-Funded** and **Fully Insured Group**.
- Basic details, related persons, and policy plans in the person's policy.
- Basic and in-depth details of the pricing rules which are defined for a parent customer who is associated with the fully-insured group or self-funded policy.
- Basic and in-depth details of the pricing rules which are defined for a self-funded policy of a bill group.
- Basic details of the pricing groups which are defined for a bill group who is associated with the self-funded policy.
- Basic and in-depth details of the pricing rules which are defined for a fully-insured group policy.
- Basic and in-depth details of the pricing rules which are defined for a fully-insured group policy plan.
- Basic and in-depth details of the pricing rules which are defined for the states where the fully-insured group policy and its plans and memberships are issued.

- Basic details of the approval transactions which are created while defining, editing, and deleting the pricing rules for the self-funded or fully-insured group business.
- Basic details of the bill, adjustments which are swept onto the bill, activities (such as, payment, offset, refund, write off, or transfer) through which the bill is settled, high-level summary and details of the bill segments which are included in the bill, active hold requests due to which the bill is kept on hold, offset requests through which the bill is offset against another bill, and refund and write off requests through which the bill or its bill segment is either refunded or written off.

In other words, this feature allows you to drill-down to see or act on all current and historical revenue management and billing details. This allows you to professionally and efficiently handle customer inquiries and complaints at the first point of contact, raising your customer service from previously unattainable levels and reducing the associated time and cost.

Prerequisites

To setup the **Customer 360° View** feature, you need to do the following:

- Define the required divisions, customer classes, person types, person identifier types, account identifier types, policy types, and policy person roles in the system
- Define values for the **C1-SourceSystemLookup** extendable lookup
- Define the required characteristic types where the characteristic entity is set to **Person**
- Define the required characteristic types where the characteristic entity is set to **Account**
- Define the required characteristic types where the characteristic entity is set to **Policy**
- Define values for the **Administrative Contract Type** and **On Account Contract Type** option types in the **C1_CMO** feature configuration

Note: This prerequisite is not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

- Define values for **Premium Amount SQI** and **Coverage End Date SQI** option types in the **C1-BILLADJSQ** feature configuration

Note: This prerequisite is not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

- Define value for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration

Customer 360° View

The **Customer 360° View** screen allows you to search for a person, its accounts, and policies using various search criteria. It contains the following zone:

- [360° Search](#) on page 651

360° Search

The **360° Search** zone allows you to search for a person, account, and policy using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a person, account, or policy. The valid values are: <ul style="list-style-type: none"> • Policy • Person • Account 	Yes
	Note: By default, the Policy option is selected.	
Policy Type	Used to search policies which are created using a particular policy type.	No
	Note: This field appears when the Policy option is selected from the Search By list.	
Source System	Used to search policies which were created in a particular external system.	No
	Note: This field appears when the Policy option is selected from the Search By list.	
Policy Number	Used to search a policy with a particular policy number.	No
	Note: This field appears when the Policy option is selected from the Search By list.	
Policy ID	Used to search a particular policy.	No
	Note: This field appears when the Policy option is selected from the Search By list.	
Policy Person Role	Used to search policies where a person is assigned a particular person role.	No
	Note: This field appears when the Policy option is selected from the Search By list.	

Field Name	Field Description	Mandatory (Yes or No)
Person Name	<p>Used to search a particular person using its primary or secondary name. If you specify the person name while searching for an account, the system searches all accounts where the person is the main customer. However, if you specify the person name while searching for a policy, the system searches all policies where the person is the main customer.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required when you are searching for a policy using the policy person role.</p>
	<p>Note:</p> <p>This field appears when:</p> <ul style="list-style-type: none"> • The Policy or Person option is selected from the Search By list. • The Account option is selected from the Search By list and the Advanced Search link available in the right side of the 360° Search zone is clicked. 	
Status	<p>Used to search policies with a particular status. The valid values are:</p> <ul style="list-style-type: none"> • In Force/Active • Canceled • Pending Cancellation • Pending • Pending Reinstatement • Pending Termination • Post Runout • Reinstated • Runout • Terminated 	No
	<p>Note: This field appears when the Policy option is selected from the Search By list.</p>	
Start Date	<p>Used to search policies which are effective from a particular date.</p>	No
	<p>Note: This field appears when the Policy option is selected from the Search By list and the Advanced Search link available in the right side of the 360° Search zone is clicked.</p>	

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search policies which are effective till a particular date.	No
	Note: This field appears when the Policy option is selected from the Search By list and the Advanced Search link available in the right side of the 360° Search zone is clicked.	
Characteristic Type	Used to search persons, accounts, or policies with a particular type of characteristic.	No
	Note: This field appears when the Advanced Search link available in the right side of the 360° Search zone is clicked.	
Characteristic Value	Used to search persons, accounts, or policies with a particular characteristic.	Yes (Conditional)
	Note: This field appears when you are searching for a person, account, or policy using the characteristic type. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	
Division	Used to search persons or accounts which belong to a particular division.	No
	Note: This field appears when the Person or Account option is selected from the Search By list.	
Customer Class	Used to search accounts or persons' whose accounts belong to a particular customer class.	No
	Note: This field appears when the Person or Account option is selected from the Search By list.	
Person ID	Used to search a particular person.	No
	Note: This field appears when the Person option is selected from the Search By list.	
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for a person.	Yes (Conditional)
	Note: This field appears when the Person option is selected from the Search By list.	

Field Name	Field Description	Mandatory (Yes or No)
Person Identifier	Used to search a person with a particular identifier.	Yes (Conditional)
	Note: This field appears when the Person option is selected from the Search By list.	Note: If you specify the person identifier type as a search criteria, you have to enter the person identifier.
Person Type	Used to search persons of a particular type. The valid values are: <ul style="list-style-type: none"> • Business • Bill Group • Group • Broker • Person • Parent Customer 	No
	Note: This field appears when the Person option is selected from the Search By list and the Advanced Search link available in the right side of the 360° Search zone is clicked.	
Address	Used to search persons with a particular address or accounts' whose main customer has a particular address.	No
	Note: This field appears when the Person or Account option is selected from the Search By list and the Advanced Search link available in the right side of the 360° Search zone is clicked.	
City	Used to search persons who belong to a particular city or accounts' whose main customer belongs to a particular city.	No
	Note: This field appears when the Person or Account option is selected from the Search By list and the Advanced Search link available in the right side of the 360° Search zone is clicked.	

Field Name	Field Description	Mandatory (Yes or No)
Skip Months	Used to search accounts for which the skip months are defined through a billing preference.	No
	<p>Note:</p> <p>You can set the billing preference for an account through a characteristic type which is specified in the Bill Cycle Rule Code option type of the C1-ASOBLNG feature configuration. The system enables you to define, edit, delete, and copy a billing preference through the Field Mapping screen. For more information, see Defining a Billing Preference.</p> <p>This field appears when the Account option is selected from the Search By list and the Advanced Search link available in the right side of the 360° Search zone is clicked.</p>	
Phone Number	Used to search a person with a particular phone number or accounts' whose main customer has a particular phone number.	No
	<p>Note: This field appears when the Person or Account option is selected from the Search By list and the Advanced Search link available in the right side of the 360° Search zone is clicked.</p>	
Account ID	Used to search a particular account.	No
	<p>Note: This field appears when the Account option is selected from the Search By list.</p>	
Account Identifier Type	Used to indicate the account identifier type based on which you want to search for an account.	Yes (Conditional)
	<p>Note: This field appears when the Account option is selected from the Search By list.</p>	
Account Identifier	Used to search an account with a particular identifier.	Yes (Conditional)
	<p>Note: This field appears when the Account option is selected from the Search By list.</p>	
		<p>Note: If you specify the account identifier as a search criteria, you have to select the account identifier type.</p>
		<p>Note: If you specify the account identifier type as a search criteria, you have to enter the account identifier.</p>

Note:

You must specify at least one search criterion while searching for a person, account, or policy. One more search criterion is required when you are searching for a person or account using the division and/or customer class. Similarly, one more search criterion is required when you are searching for a policy using the policy type and/or source system.

If you have specified any other search criterion along with the person ID, account ID, or policy ID, the system ignores the additional search criterion and searches using the person ID, account ID, or policy ID, respectively.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Information	Displays information about the policy.
	<p>Note:</p> <p>It has a link. On clicking the link, the Policy screen appears where you can view the details of the respective policy.</p> <p>This column appears when the Policy option is selected from the Search By list.</p>
Main Customer	Indicates the main customer of the policy or account.
	<p>Note: This column appears when the Policy or Account option is selected from the Search By list.</p>
Source System	Displays the name of the external system in which the policy was created.
	<p>Note: This column appears when the Policy option is selected from the Search By list.</p>
Policy Number	Displays the policy number.
	<p>Note: This column appears when the Policy option is selected from the Search By list.</p>
Start Date	Displays the date from when the policy is effective.
	<p>Note: This column appears when the Policy option is selected from the Search By list.</p>
End Date	Displays the date till when the policy is effective.
	<p>Note: This column appears when the Policy option is selected from the Search By list.</p>

Column Name	Column Description
Status	<p>Indicates the status of the policy. The valid values are:</p> <ul style="list-style-type: none"> • In Force/Active • Canceled • Pending Cancellation • Pending • Pending Reinstatement • Pending Termination • Post Runout • Reinstated • Runout • Terminated <p>Note: This column appears when the Policy option is selected from the Search By list.</p>
Person Information	<p>Displays information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p>Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person. This column appears when the Person option is selected from the Search By list.</p>
Person Name	<p>Displays the name of the person.</p> <p>Note: This column appears when the Person option is selected from the Search By list.</p>
Person Type	<p>Indicates the type of the person. The valid values are:</p> <ul style="list-style-type: none"> • Business • Bill Group • Group • Broker • Person • Parent Customer <p>Note: This column appears when the Person option is selected from the Search By list.</p>
Primary Person Identifier Type	<p>Indicates the primary identifier type associated with the person.</p> <p>Note: This column appears when the Person option is selected from the Search By list.</p>

Column Name	Column Description
Primary Person Identifier	Displays the primary person identifier.
	Note: This column appears when the Person option is selected from the Search By list.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account. This column appears when the Account option is selected from the Search By list.
Division	Indicates the division to which the account belongs.
	Note: This column appears when the Account option is selected from the Search By list.
Customer Class	Indicates the customer class to which the account belongs.
	Note: This column appears when the Account option is selected from the Search By list.
Primary Account Identifier Type	Indicates the primary identifier type associated with the account.
	Note: This column appears when the Account option is selected from the Search By list.
Primary Account Identifier	Displays the primary account identifier.
	Note: This column appears when the Account option is selected from the Search By list.
Current Balance	Displays the total amount of funds in the account.
	Note: This column appears when the Account option is selected from the Search By list.
Also Known As	Displays the non-primary names of the person separated by semi-colon (;).
	Note: This column appears when the Person option is selected from the Search By list.

Note:

You can view the 360° information of the person, account, or policy by clicking the **View** () icon corresponding to the record in the **Search Results** section.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Person

Prerequisites

To search for a person, you should have:

- Divisions, customer classes, person types, and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Person**)

Procedure

To search for a person:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, click **Customer Management** and then click **Customer 360° View**.
The **Customer 360° View** screen appears.
3. Select the **Person** option from the **Search By** list to indicate that you want to search for a person.
4. Enter the required search criteria in the **360° Search** zone.

Note:

You must specify at least one search criterion while searching for a person. One more search criterion is required when you are searching for a person using the division and/or customer class.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

You must specify division and/or customer class when you are searching for a person using the city.

You must specify division, customer class, or any other criteria in the second group when you are searching for a person using the person type.

If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the person using the person ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of persons that meet the search criteria appears in the **Search Results** section.

Searching for an Account**Prerequisites**

To search for an account, you should have:

- Divisions, customer classes, and account identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

Procedure

To search for an account:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, click **Customer Management** and then click **Customer 360° View**.
The **Customer 360° View** screen appears.
3. Select the **Account** option from the **Search By** list to indicate that you want to search for an account.

4. Enter the required search criteria in the **360° Search** zone.

Note:

You must specify at least one search criterion while searching for an account. One more search criterion is required when you are searching for an account using the division and/or customer class.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the fourth criteria group) and account identifier (in the third criteria group), the system searches using the account identifier instead of the person name.

You must specify division and/or customer class when you are searching for an account using the city.

If you have specified any other search criterion along with the account ID, the system ignores the additional search criterion and searches for the account using the account ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of accounts that meet the search criteria appears in the **Search Results** section.

Searching for a Policy**Prerequisites**

To search for a policy, you should have:

- Policy types and policy person roles defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, click **Customer Management** and then click **Customer 360° View**.
The **Customer 360° View** screen appears.
3. Select the **Policy** option from the **Search By** list to indicate that you want to search for a policy.

- Enter the required search criteria in the **360° Search** zone.

Note:

You must specify at least one search criterion while searching for a policy. One more search criterion is required when you are searching for a policy using the policy type and/or source system.

If you have specified any other search criterion along with the policy ID, the system ignores the additional search criterion and searches for the policy using the policy ID.

You must specify the person name when you are searching for a policy using the policy person role.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

Viewing the 360° Information of a Person**Prerequisites**

To view the 360° information of a person, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLLNG** feature configuration

Procedure

To view the 360° information of a person:

- Search for the person in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen. It contains the following zones:

- [Person Information](#) on page 677
- [Person Characteristics](#) on page 678
- [Child Persons](#) on page 679
- [Person Hierarchy](#) on page 679

Note: The **Person Hierarchy** zone does not appear when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Person Billing Hierarchy](#) on page 680

Note: The **Person Billing Hierarchy** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Derivation and Pricing Parameters](#) on page 683

Note: The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Sorting](#) on page 685

Note: The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Customer Contacts](#) on page 686
- [Bill Groups Created Via Customer Registration](#) on page 687

Note: The **Bill Groups Created Via Customer Registration** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

3. View the basic details of the person in the **Person Information** zone.
4. View the characteristics of the person in the **Person Characteristics** zone.
5. View the child persons included in the person's hierarchy in the **Child Persons** zone.
6. View the accounts and policies where the person is the main customer and memberships where the person is the main subscriber in the **Person Hierarchy** zone.
7. View the parent customer's accounts and policies and its bill groups' accounts and policies in the **Person Billing Hierarchy** zone.
8. View the derivation and pricing parameters defined for the bill group and sort ID combinations in the **Bill Group Derivation and Pricing Parameters** zone.
9. View the sort IDs defined for the bill groups in the **Bill Group Sorting** zone.
10. View how and when the person was contacted in the **Customer Contacts** zone.
11. View the customer registration objects through which the bill groups are created for the parent customer in the **Bill Groups Created Via Customer Registration** zone.
12. If required, you can view the details of the account to which the person is associated in the **Account** tab.

Note:

If you are viewing the 360° information of a parent customer, the following zones appear in the **Account** tab when you click the **Broadcast** () icon corresponding to the account in the [Account List](#) on page 688 zone:

- [Account Information](#) on page 689
- [Auto Pay Details](#) on page 692
- [Account Characteristics](#) on page 691
- [Account Financial and Collections Summary](#) on page 693
- [Open Bills](#) on page 694
- [Billed Vs Paid](#) on page 696
- [Timeline](#) on page 698
- [Trial Bills](#) on page 702

13. If required, you can view the details of the policy to which the person is associated in the **Policy** tab.

14. If required, you can view the pricing information of the parent customer or its bill groups in the **Pricing Information** tab.

Viewing the 360° Information of an Account

Prerequisites

To view the 360° information of an account, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration
- Values defined for the **Administrative Contract Type** and **On Account Contract Type** option types in the **C1_CMO** feature configuration
- Values defined for the **Premium Amount SQI** and **Coverage End Date SQI** option types in the **C1-BILLADJSQ** feature configuration

Note: The latter two prerequisites are not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

Procedure

To view the 360° information of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.

The **Account** tab appears in the **Customer 360° Information** screen. It contains the following zones:

- [Account List](#) on page 688

Note: The **Account List** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Account Information](#) on page 689

- [Auto Pay Details](#) on page 692
- [Account Characteristics](#) on page 691
- [Administrative Contracts](#) on page 692

Note: The **Administrative Contracts** zone appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**.

- [Account Financial and Collections Summary](#) on page 693
- [Billing and Adjustment Summary](#) on page 693

Note: The **Billing and Adjustment Summary** zone appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**.

- [Open Bills](#) on page 694
 - [Billed Vs Paid](#) on page 696
 - [Timeline](#) on page 698
 - [Trial Bills](#) on page 702
3. View the accounts of the parent customer and its bill groups in the **Account List** zone.
 4. View the basic details of the account in the **Account Information** zone.
 5. View the automatic payment options defined for the account in the **Auto Pay Details** zone.
 6. View the characteristics of the account in the **Account Characteristics** zone.
 7. View the account's contracts which should be monitored closely for various administrative reasons in the **Administrative Contracts** zone.
 8. View the financial and collection details of the account in the **Account Financial and Collections Summary** zone.
 9. View the billing and adjustment summary of the account in the **Billing and Adjustment Summary** zone.
 10. View the unpaid bills of the account in the **Open Bills** zone.
 11. View various transactions of the account, such as bills, payments, adjustments, reconciliations, and so on, in the **Billed Vs Paid** zone.
 12. View the number of customer contacts, bills, and payments created for the account in a particular month in the **Timeline** zone.
 13. View the trial bills which are created for the account in the **Trial Bills** zone.

Viewing the Pricing Information of a Parent Customer

Prerequisites

To view the pricing information of a parent customer, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLLNG** feature configuration

Procedure

To view the pricing information of a parent customer:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears. It contains the following zones:

- [Parent Customer Pricing Rules](#) on page 708

Note: The **Parent Customer Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rule Summary](#) on page 712

Note: The **Bill Group Self-Funded Policy Pricing Rule Summary** zone appears when you are viewing 360° information of a parent customer who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Information](#) on page 713

Note: The **Bill Group Self-Funded Policy Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rules](#) on page 714

Note: The **Bill Group Self-Funded Policy Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Fully-Insured Pricing Rules](#) on page 720

Note: The **Fully-Insured Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group policy.

- [Pricing Rule Summary](#) on page 721

Note: The **Pricing Rule Summary** zone appears when you are viewing 360° information of a parent customer who is associated with the fully-insured group policy.

- [Pricing Rule Approval Transactions](#) on page 722

Note: The **Pricing Rule Approval Transactions** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group or self-funded policy.

4. Do either of the following:

If you are viewing 360° information of...	Then...
A parent customer who is associated with a self-funded policy	<ol style="list-style-type: none"> 1. View the pricing rules which are defined for the parent customer in the Parent Customer Pricing Rules zone. 2. View the list of pricing rules which are defined for the self-funded policies of the bill groups in a tree structure in the Bill Group Self-Funded Policy Pricing Rule Summary zone. 3. View the details of the policies to which a bill group is associated in the Bill Group Self-Funded Policy Information zone. 4. View the details of the pricing rules which are defined for a policy of a bill group in the Bill Group Self-Funded Policy Pricing Rules zone. 5. View the details of the pricing groups which are defined for a bill group in the Bill Group Pricing Groups zone.

If you are viewing 360° information of...	Then...
	<ol style="list-style-type: none"> 6. View the approval transactions which are created while defining, editing, or deleting a pricing rule of the parent customer and its bill groups in the Pricing Rule Approval Transactions zone.
A parent customer who is associated with a fully-insured group policy	<ol style="list-style-type: none"> 1. View the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue) in the Fully-Insured Pricing Rules zone. 2. View the list of pricing rules which are defined for the parent customer, fully-insured group policies, and policy plans in a tree structure in the Pricing Rule Summary zone. 3. View the approval transactions which are created while defining, editing, or deleting a pricing rule for different entities in the Pricing Rule Approval Transactions zone.

Viewing the Pricing Information of a Bill Group

Prerequisites

To view the pricing information of a bill group, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration

Procedure

To view the pricing information of a bill group:

1. Search for a person whose person type is set to **Bill Group** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears. It contains the following zones:

- [Parent Customer Pricing Rules](#) on page 708

Note: The **Parent Customer Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Parent Customer Pricing Rule Summary](#) on page 712

Note: The **Parent Customer Pricing Rule Summary** zone appears when you are viewing 360° information of a bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Information](#) on page 713

Note: The **Bill Group Self-Funded Policy Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rules](#) on page 714

Note: The **Bill Group Self-Funded Policy Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Pricing Groups](#) on page 719

Note: The **Bill Group Pricing Groups** zone appears when you are viewing 360° information of a bill group who is associated with the self-funded policy.

- [Fully-Insured Pricing Rules](#) on page 720

Note: The **Fully-Insured Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group policy.

- [Pricing Rule Approval Transactions](#) on page 722

Note: The **Pricing Rule Approval Transactions** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group or self-funded policy.

4. Do either of the following:

If you are viewing 360° information of...	Then...
A bill group who is associated with a self-funded policy	<ol style="list-style-type: none"> 1. View the pricing rules which are defined for the parent customer in the Parent Customer Pricing Rules zone. 2. View the information about the parent customer and its pricing rules in a tree structure in the Parent Customer Pricing Rule Summary zone. 3. View the details of the policies to which the bill group is associated in the Bill Group Self-Funded Policy Information zone. 4. View the details of the pricing rules which are defined for a policy of the bill group in the Bill Group Self-Funded Policy Pricing Rules zone. 5. View the details of the pricing groups which are defined for the bill group in the Bill Group Pricing Groups zone. 6. View the approval transactions which are created while defining, editing, or deleting the pricing rules of the bill group in the Pricing Rule Approval Transactions zone.
A bill group who is associated with a fully-insured group policy	<ol style="list-style-type: none"> 1. View the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy

If you are viewing 360° information of...	Then...

Person Information

The **Person Information** zone displays the details of the person. It contains the following sections:

- **Main** - Displays the basic information about the person. It contains the following fields:

Field Name	Field Description
Person Information	Displays information about the person. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the person.
Person Type	Indicates the type of the person. The valid values are: <ul style="list-style-type: none"> • Business • Bill Group • Group • Broker • Person • Parent Customer
Date of Birth	Displays the date when the person was born. Note: This field appears when the respective data is available for the person.

- **Person Names** - Lists the primary and non-primary names of the person. It contains the following columns:

Column Name	Column Description
Name Type	Indicates the type of the name.
Person Name	Displays the name of the person.

- **Person Identifiers** - Lists various types of identification associated with the person. It contains the following columns:

Column Name	Column Description
Person Identifier Type	Indicates the person identifier type.
Person Identifier	Displays the value of the person identifier type.

- **Contact Information** - Displays the contact details of the person. It contains the following fields:

Field Name	Field Description
Country	Indicates the country where the person is located.

Field Name	Field Description
Address 1	Displays the first line of the person's address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the person's address. It may contain details, such as street name.
Address 3	Displays the third line of the person's address. It may contain the landmark details.
Address 4	Displays the fourth line of the person's address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the person resides within the city limit or not. The valid values are: <ul style="list-style-type: none"> • Yes • No
City	Displays the city where the person is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the person is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.
Email ID	Displays the e-mail ID of the person.

Note: The above mentioned fields appear in the **Contact Information** section when the respective data is available for the person.

- **Phone Details** – Lists the phone details of the person. It contains the following columns:

Column Name	Column Description
Phone Type	Indicates the type of the phone number.
Phone Number	Displays the phone number of the person.
Extension	Displays the telephone extension number (if any).

Person Characteristics

The **Person Characteristics** zone lists the characteristics of the person. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the person.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Column Name	Column Description
Description	Displays the description of the characteristic value.
	Note: The data appears in this column when the type of characteristic value is set to Predefined Value or Foreign Key Value .

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∇) icon in the upper right corner of this zone.

Child Persons

The **Child Persons** zone lists the child persons included in the person's hierarchy. It contains the following columns:

Column Name	Column Description
Child Person Information	Displays information about the child person.
	Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the child person.
Relationship Type	Indicates how the child person is related to the parent person.
Start Date	Displays the date from when the child person is related to the parent person.
End Date	Displays the date till when the child person is related to the parent person.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the 360° information of a child person by clicking the **View** (🔗) icon corresponding to the child person in this zone.

You can create a new child person through the **Customer Registration** feature by clicking the **Add** link in the upper right corner of this zone. While adding a child person to a parent person, the child person is related to the parent person using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration.

You can filter the list using the **Person Relationship Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∇) icon in the upper right corner of this zone.

Bill Group Derivation and Pricing Parameters

An employer may have different bill groups. Each bill group will handle the claim and enrollment transactions of employees based on the employee attributes, such as location, employment status, employment department, and so on.

Oracle Revenue Management and Billing allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for the bill group and sort ID combination. These parameters are used to derive the bill group against which the claim and enrollment transactions should be billed in the system. For example, if you want bill group 1 to handle claim and enrollment transactions of employees who reside in the western location of city and belong to grade A and whose transactions are received from the X system, you need to define the derivation and pricing parameters for bill group 1 where the source system is set to X, parameter 1 is set to Western, and parameter 2 is set to Grade A. Similarly, if you want bill group 2 to handle claim and enrollment transactions of employees who reside in the eastern location of city and belong to grade A and whose transactions are received from the X system, you need to define the derivation and pricing parameters for bill group 2 where the source system is set to X, parameter 1 is set to Eastern, and parameter 2 is set to Grade A.

Note: In the above examples, the bill group is derived based on the specified attributes when the source system, parameter 1, and parameter 2 are mapped to the appropriate transaction fields in the pricing rule type using which the pricing rules are defined for the bill group.

You can also define criteria for a rule in a pricing group using the parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4. If a pricing rule is defined for a bill group using a pricing group, you can define more than one price in the pricing rule which is offered based on the attributes of the employees.

The derivation and pricing parameters for the bill group and sort ID combination are effective from a particular date. However, the effective date must fall within the date range defined for the sort ID of the bill group.

The **Bill Group Derivation and Pricing Parameters** zone lists the derivation and pricing parameters defined for all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

You can define and edit the derivation and pricing parameters for a bill group (who is effective child person of the parent customer) and sort ID combination through this zone. You can also upload the derivation and pricing parameters for one or more bill group and sort ID combinations at the same time using the **Upload Request** feature. You can upload the derivation and pricing parameters for a bill group and sort ID combination either from this zone or from the **Upload Request** screen. While creating an upload request for the derivation and pricing parameters, you need to specify the parent customer whose bill groups' derivation and pricing parameters you want to upload. Once the upload request is processed, the derivation and pricing parameters are defined for the bill group and sort ID combination in the system.

This zone contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the parent customer's bill group for whom the derivation and pricing parameters are defined. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective bill group (i.e. person).
Bill Group ID	Displays the bill group ID (i.e. person ID).
Source System	Indicates the source system from where the claim and enrollment transactions are received.
Parameter 1	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 2	Indicates the employee attribute based on which you want to derive the bill group.

Column Name	Column Description
Parameter 3	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 4	Indicates the employee attribute based on which you want to derive the bill group.
Sort ID	Indicates the sort ID of the bill group.
Effective Date	Displays the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.
Status	Indicates the status of the derivation and pricing parameters defined for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> Active Inactive

In addition, it contains the following buttons:

Button Name	Button Description
Edit	Used to edit the derivation and pricing parameters of a bill group and sort ID combination.

If you want to edit the derivation and pricing parameters of all bill group and sort ID combinations, you need to select the check box corresponding to the column header in this zone, and then click the **Edit** button. However, if you want to edit the derivation and pricing parameters of one or more bill group and sort ID combination, you need to select the check box corresponding to the bill group and sort ID combination, and then click the **Edit** button.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

If you select the check box corresponding to the column header in this zone, the system considers only those records which are present on the respective page for editing.

You can define the derivation and pricing parameters for a bill group (who is effective child person of the parent customer) and sort ID combination by clicking the **Add** link in the upper right corner of this zone. You can also upload the derivation and pricing parameters for one or more bill group (who is effective child person of the parent customer) and sort ID combinations by clicking the **Upload** link in the upper right corner of this zone.

You can filter the list using various search criteria (such as, **Parameter 1, Parameter 2, Parameter 3, Parameter 4, Bill Group ID, Sort ID, Status, and Bill Group Name**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Bill Group Sorting

Oracle Revenue Management and Billing allows you to define unique sort IDs for a bill group in a given date range. In future, the sort ID will be used to club transactions based on certain parameters and present them in the bill in the ascending or descending order. It may also be used to sort data while generating various reports.

The **Bill Group Sorting** zone lists the sort IDs defined for all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

You can define, edit, and delete a sort ID of a bill group (who is effective child person of the parent customer) through this zone. You can also upload a set of sort IDs for one or more bill groups (who are effective child persons of the parent customer) at the same time using the **Upload Request** feature. You can upload the sort IDs for bill groups either from this zone or from the **Upload Request** screen. While creating an upload request for bill group sort IDs, you need to specify the parent customer whose bill groups' sort IDs you want to upload. Once the upload request is processed, the sort ID is defined for the respective bill group in the system.

This zone contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the parent customer's bill group for whom the sort ID is defined. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective bill group (i.e. person).
Bill Group ID	Displays the bill group ID (i.e. person ID).
Sort ID	Displays the sort ID.
Description	Displays the description of the sort ID.
Start Date	Displays the date from when the sort ID is effective for the bill group.
End Date	Displays the date till when the sort ID is effective for the bill group.

In addition, it contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of a bill group's sort ID.
Delete	Used to delete a bill group's sort ID. Note: You can delete a bill group's sort ID when the derivation and pricing parameters are not yet defined for the bill group and sort ID combination.

If you want to edit or delete all sort IDs of effective bill groups, you need to select the check box corresponding to the column header in this zone, and then accordingly click the **Edit** or **Delete** button. However, if you want to edit or delete

one or more sort IDs of effective bill groups, you need to select the check box corresponding to the bill group and sort ID combination, and then accordingly click the **Edit** or **Delete** button.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

If you select the check box corresponding to the column header in this zone, the system considers only those records which are present on the respective page for editing or deleting.

You can define a sort ID for a bill group (who is effective child person of the parent customer) by clicking the **Add** link in the upper right corner of this zone. You can also upload a set of sort IDs for one or more bill groups (who are effective child persons of the parent customer) by clicking the **Upload** link in the upper right corner of this zone.

You can filter the list using the **Bill Group Name** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Customer Contacts

The **Customer Contacts** zone displays information about how and when the person was contacted. It contains the following columns:

Column Name	Column Description
Contact Date	Displays the date when the person was contacted.
Customer Contact Information	Displays information about the customer contact. Note: It has a link. On clicking the link, the Customer Contact screen appears where you can view the details of the customer contact.
Contact Type	Indicates how the person was contacted.
Comments	Displays additional information about the customer contact.

You can filter the list using various search criteria (such as, **On or Before Contact Date**, **Contact Class**, **Contact Type**, and **Show Open Contacts Only**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

Bill Groups Created Via Customer Registration

The **Bill Groups Created Via Customer Registration** zone lists the customer registration objects through which the parent customer's bill groups are created in the system. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**. It contains the following columns:

Column Name	Column Description
Customer Registration Information	Indicates the customer registration object through which the bill group is created. Note: It has a link. On clicking the link, the Customer Registration screen appears where you can view the details of the respective customer registration object.
Person Name	Displays the name of the bill group.
Person Relationship Type	Indicates how the bill group is related to the parent customer.
Status	Indicates the status of the customer registration object. The valid value is: <ul style="list-style-type: none"> Bill Group Approved

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Person Relationship Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Customer 360° Information - Account

The following table provides information about the **Account** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded or fully-insured group policy	The Account tab displays the following: <ul style="list-style-type: none"> List of the parent customer's and bill groups' accounts. Note that the system lists the accounts of all effective child persons whose person type is set to Bill Group and who are related to the parent customer using a relationship type which is specified in the Person Relationship Type option type of the C1-ASOBLLNG feature configuration. Basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the parent customer's or bill group's account.
A bill group who is associated with the fully-insured group or self-funded policy	The Account tab displays the basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the bill group's account. Note: If the bill group has multiple accounts, the system, by default, picks and displays the details of any one of its account.

If you are viewing the 360° information of...	Then...
A person whose person type is neither Parent Customer nor Bill Group	The Account tab displays the basic details, characteristics, automatic payment options, administrative contracts, financial and collections summary, billing and adjustment summary, and unpaid bills of the person's account.
	Note: If the person has multiple accounts, the system, by default, picks and displays the details of any one of its account.

It contains the following zones:

- [Account List](#) on page 688

Note: The **Account List** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Account Information](#) on page 689

Account List

The **Account List** zone lists the accounts of the parent customer and its bill groups. Note that the system lists the accounts of all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**. It contains the following columns:

Column Name	Column Description
Person Name	Indicates the person who is linked to the account.

Column Name	Column Description
Account Information	Displays information about the account. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account.
Person Type	Indicates the type of the person. The valid values are: <ul style="list-style-type: none"> • Business • Bill Group • Group • Broker • Person • Parent Customer
Person's Mailing Address	Displays the mailing address of the person.
Person ID	Displays the person ID.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (🔊) icon corresponding to an account, the following zones appear in the **Account** tab:

- Account Information
- Auto Pay Details
- Account Financial and Collections Summary
- Account Characteristics
- Open Bills
- Billed Vs Paid
- Timeline

You can filter the list using various search criteria (such as, **Person Name**, **Account ID**, **Person Type**, and **Include Ended Child Person's Accounts**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

Account Information

The **Account Information** zone displays the details of the account. It contains the following sections:

- **Main** – Displays the basic information about the account. It contains the following fields:

Field Name	Field Description
Account Information	Displays information about the account. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account.
Management Group	Indicates the account management group to which the account belongs.
	Note: It has a link. On clicking the link, the Account Management Group screen appears where you can view the details of the respective account management group. This field appears when the respective data is available for the account.

- **Contact Information** – Displays the contact details of the account’s main customer. It contains the following fields:

Field Name	Field Description
Address Source	Indicates which address should be used to route the account’s bills and/or quotes via the postal service.
Country	Indicates the country where the main customer is located.
Address 1	Displays the first line of the main customer’s address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the main customer’s address. It may contain details, such as street name.
Address 3	Displays the third line of the main customer’s address. It may contain the landmark details.
Address 4	Displays the fourth line of the main customer’s address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the main customer resides within the city limit or not. The valid values are: <ul style="list-style-type: none"> • Yes • No
City	Displays the city where the main customer is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the main customer is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.

Note: The above mentioned fields except **Address Source** appear in the **Contact Information** section when the address source of the main customer is set to **Account Override** and the respective data is available for the account.

- **Account Identifiers** – Lists various types of identification associated with the account. It contains the following columns:

Column Name	Column Description
Account Identifier Type	Indicates the account identifier type.
Account Identifier	Displays the value of the account identifier type.

- **Billing** – Displays the billing information of the account. It contains the following fields:

Field Name	Field Description
Bill Cycle	Indicates the bill cycle of the account. Note: It has a link. On clicking the link, the Bill Cycle screen appears where you can view the details of the respective bill cycle. This field appears when the respective data is available for the account.
Bill After Date	Displays the date when the billing should be resumed for the account. Note: This field appears when the respective data is available for the account.
Skip Months	Indicates the months separated by comma for which billing should be skipped for the account. Note: The system derives the skip months for an account using the billing preference. You can set the billing preference for an account through a characteristic type which is specified in the Bill Cycle Rule Code option type of the C1-ASOBLLNG feature configuration. The system enables you to define, edit, delete, and copy a billing preference through the Field Mapping screen. For more information, see Defining a Billing Preference .

Account Characteristics

The **Account Characteristics** zone lists the characteristics of the account. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the account.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value. Note: The data appears in this column when the type of characteristic value is set to Predefined Value or Foreign Key Value .

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

Administrative Contracts

The **Administrative Contracts** zone lists the account's contracts which should be monitored closely for various administrative reasons. It appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**. It contains the following columns:

Column Name	Column Description
Contract ID	Displays the contract ID.
	Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract.
Contract Type	Indicates the type of the contract.
Currency	Indicates the currency in which the contract balance is maintained.
Current Balance	Displays the current balance on the contract.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The data appears in this zone when you have defined the value for the **Administrative Contract Type** option type in the **C1_CMO** feature configuration.

Auto Pay Details

The **Auto Pay Details** zone lists the automatic payment options defined for the account. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the automatic payment option is effective.
End Date	Displays the date till when the automatic payment option is effective.
Auto Pay Source Code	Indicates the source of funds used to make the automatic payment. For example, debit or credit card.
Last Four Digits of Card	Displays the last four digits of the debit or credit card.
	Note: The data appears in this column when the external type of the auto pay source code's tender type is set to Credit Card Withdrawal .
Percentage	Indicates the percentage of automatic payment that must be made through the automatic payment option.
Priority	Indicates the order in which the automatic payment option should be considered for the effective date range.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Account Financial and Collections Summary

The **Account Financial and Collections Summary** zone displays the financial and collection details of the account. It contains the following fields:

Field Name	Field Description
Collection Class	Indicates the collection class to which the account belongs.
Current Credit Rating	Indicates the account's credit rating which is effective on the current date.
Last Credit Review Date	Displays the date when the account's debt was last reviewed.
Last Payment Date	Displays the date when the last payment was made for the account.
	Note: The system considers the last payment which is in the Frozen status.
Last Payment Amount	Displays the amount of the last payment.
	Note: The system considers the last payment which is in the Frozen status.
Current Balance	Displays the current balance of the account.
Payoff Balance	Displays the payoff balance of the account.
Account on Hold	Indicates whether the account is on hold or not. The valid values are: <ul style="list-style-type: none"> • Yes • No
Account on Promise to Pay	Indicates whether any promise to pay is scheduled for the account on the current or future date. The valid values are: <ul style="list-style-type: none"> • Yes • No
Account on Payment Arrangement	Indicates whether any payment arrangement exists for the account. The valid values are: <ul style="list-style-type: none"> • Yes • No
Account on Payment Agreement	Indicates whether any active payment agreement request exists for the account. The valid values are: <ul style="list-style-type: none"> • Yes • No

Billing and Adjustment Summary

The **Billing and Adjustment Summary** zone displays the billing and adjustment summary of the account. It appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**. It contains the following sections:

- **Quote Billed Balance** – Displays information about the account's billed balance. It contains the following fields:

Field Name	Field Description
Past Due Billed Balance	Displays the sum of open financial transactions of the account that are listed on a bill with a past due date.
Future Due Billed Balance	Displays the sum of open financial transactions of the account that are listed on a bill with a future due date.
Quote Billed Balance	Displays the sum of past due billed balance and future due billed balance.

- **Future Adjustments and Retroactivity** – Displays information about the account’s future adjustments and retro activities. It contains the following fields:

Field Name	Field Description
Future Adjustments	Displays the sum of adjustment financial transactions of the account which are swept onto the next bill.
Future Retro Terms (Credits)	Displays the sum of canceled bill segment financial transactions of the account which are presented on the next bill.
Future Retro Adds (Debits)	Displays the sum of membership premium billable charges which are not yet billed to the account. Note: The data appears in this field when the values are defined for the Premium Amount SQI and Coverage End Date SQI option types in the C1-BILLADJSQ feature configuration.
Future Balance with Adjustments & Debits/Credits	Displays the sum of quote billed balance, future adjustments, future retro terms (credits), and future retro adds (debits).

Open Bills

The **Open Bills** zone lists the unpaid bills of the account. By default, the bills where the unpaid amount is greater than zero are listed in this zone. It contains the following columns:

Column Name	Column Description										
Bill Date	<p>Displays the date when the bill was generated.</p> <p>Note: The data in this column is presented in a different color depending on the age bucket in which the bill's days past due falls. The following table lists the color used for presentation in various age buckets:</p> <table border="1"> <thead> <tr> <th>Age Bucket</th> <th>Color</th> </tr> </thead> <tbody> <tr> <td>Age 0 to 30 DPD</td> <td>Black</td> </tr> <tr> <td>Age 31 to 60 DPD</td> <td>Green</td> </tr> <tr> <td>Age 61 to 90 DPD</td> <td>Orange</td> </tr> <tr> <td>Age > 90 DPD</td> <td>Red</td> </tr> </tbody> </table>	Age Bucket	Color	Age 0 to 30 DPD	Black	Age 31 to 60 DPD	Green	Age 61 to 90 DPD	Orange	Age > 90 DPD	Red
Age Bucket	Color										
Age 0 to 30 DPD	Black										
Age 31 to 60 DPD	Green										
Age 61 to 90 DPD	Orange										
Age > 90 DPD	Red										
Bill ID	<p>Displays the bill ID.</p> <p>Note: It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill.</p>										
Due Date	Displays the date when the bill is due for payment.										
Bill Amount	Displays the bill amount.										
Bill Status	<p>Indicates the status of the bill. The valid values are:</p> <ul style="list-style-type: none"> • Pending • Complete 										
Unpaid Amount	Displays the unpaid amount of the bill.										
Age Bucket	<p>Indicates the age bucket in which the bill's days past due falls. The valid values are:</p> <ul style="list-style-type: none"> • Age 0 to 30 DPD • Age 31 to 60 DPD • Age 61 to 90 DPD • Age > 90 DPD 										
Days Past Due	Displays the number of days past after the due date.										
Overdue Process Information	<p>Indicates the overdue process which is initiated for the bill and is currently in the Active status. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p>Note: It has a link. On clicking the link, the Overdue Process screen appears where you can view the details of the respective overdue process.</p>										
Payment Agreement Request Information	<p>Indicates the active payment agreement request in which the bill is included.</p> <p>Note: It has a link. On clicking the link, the Payment Agreement Request screen appears where you can view the details of the respective payment agreement request.</p>										

You can view additional information about the bill by clicking the **View** () icon corresponding to the bill in the **Open Bills** zone.

You can filter the list using various search criteria (such as, **On or Before Bill Date** and **Show All Bills**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Note: If you select the **Show All Bills** option, the system lists all bills where the unpaid amount is greater than or equal to zero.

Billed Vs Paid

The **Billed Vs Paid** zone lists the following transactions of the account:

- Bills which are created for the account

Note: The system lists the bills which are created for the account either manually from the user interface or automatically through the batches. It also lists the bills which are created for the account through a manual or automatic invoice request.

- Any excess credit which is made for the account
- Payments which are created or canceled for the account
- Adjustments which are created or canceled for the account
- Refund or Write Off adjustments which are created or canceled for the account
- Payment transfer to the reconciliation contract of the account
- Payment transfer from the reconciliation contract to the payor account's contract
- Reconciliations through which the account's bill segments are reconciled
- Automatic payments sent to the auto clearing house for review before freezing them

Note: The excess credit information for the account appears when you have defined the value for the **On Account Contract Type** option type in the **C1_CMO** feature configuration. Accordingly, the excess credit information (if any) on the respective contracts is listed in this zone.

It contains the following columns:

Column Name	Column Description
Due Date	Displays the date when the bill is due for payment.
	Note: The data appears in this column when the transaction type is set to Bill .
Bill ID	Displays the bill ID.
	Note: It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill.
	The data appears in this column when the transaction type is set to Bill .

Column Name	Column Description

Timeline

The **Timeline** zone displays the following information in a graphical form:

- Number of customer contacts which are created for the account's main customer in a particular month
- Number of bills which are created for the account in a particular month
- Number of payments which are created for the account in a particular month

It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Month	Used to indicate the month till when you want to display the above stated information.	Yes
	Note: By default, the current month appears in this field.	

Field Name	Field Description	Mandatory (Yes or No)
Year	Used to indicate the year till when you want to display the above stated information.	Yes
	Note: By default, the current year appears in this field.	

Depending on the month and year specified in the above fields, the data for the respective month and previous 11 months is presented in the grid. For example, if the Month and Year is set to April 2017, then the data for the May 2016, Jun 2016, Jul 2016, Aug 2016, Sep 2016, Oct 2016, Nov 2016, Dec 2016, Jan 2017, Feb 2017, Mar 2017, and Apr 2017 appears in the grid. To view the data for a different period, you must accordingly change the month and year and then click **Search** (🔍) icon.

You can use the **Previous 12 Months** (⏮), **Previous Month** (⏪), **Go To Today** (🕒), **Next Month** (⏩), and **Next 12 Months** (⏭) icons to change the values specified in the above mentioned fields.

The following table indicates the data and the manner in which the data is presented in the grid:

Row Name	Row Description						
Customer Contacts	<p>A small icon appears for each customer contact which is created for the account's main customer in the respective month. For example, if two customer contacts are created for the main customer in the month of Jan 2017 and one customer contact is created in the month of Feb 2017, then two icons appear in the Jan 2017 column and one icon appear in the Feb 2017 column. A text indicating the day of the month when the customer contact was created appears on the icon. The following table indicates the color in which the icon appears depending on the condition which is satisfied:</p> <table border="1"> <thead> <tr> <th>If the contact action on the customer contact type is...</th> <th>Then the icon appears in...</th> </tr> </thead> <tbody> <tr> <td>Set to Send Letter</td> <td>Red</td> </tr> <tr> <td>Set to Action Algorithm</td> <td>Yellow</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding customer contact information appears at the bottom of this zone. It has a link. On clicking the link, the Customer Contact screen appears where you can view the details of the respective customer contact.</p> <p>Note: You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the C1-TL-CC-EVT algorithm.</p>	If the contact action on the customer contact type is...	Then the icon appears in...	Set to Send Letter	Red	Set to Action Algorithm	Yellow
If the contact action on the customer contact type is...	Then the icon appears in...						
Set to Send Letter	Red						
Set to Action Algorithm	Yellow						

Row Name	Row Description										
Bills	<p>A small icon appears for each bill which is created for the account in the respective month. For example, if three bills are created for the account in the month of Jan 2017, two bills are created in the month of Feb 2017, and one bill is created in the month of Apr 2017, then three icons appear in the Jan 2017 column, two icons appear in the Feb 2017 column, and one icon appears in the Apr 2017 column. A text indicating the day of the month when the bill was due appears on the icon. You can either display the day of the due date or bill date on the icon depending on the requirement. The following table indicates the color in which the icon appears depending on the condition which is satisfied:</p> <table border="1" data-bbox="467 485 1461 737"> <thead> <tr> <th data-bbox="475 491 964 533">If the bill is...</th> <th data-bbox="969 491 1453 533">Then the icon appears in...</th> </tr> </thead> <tbody> <tr> <td data-bbox="475 539 964 581">Fully Matched</td> <td data-bbox="969 539 1453 581">Green</td> </tr> <tr> <td data-bbox="475 588 964 630">Unmatched</td> <td data-bbox="969 588 1453 630">Red</td> </tr> <tr> <td data-bbox="475 636 964 678">Credit Note</td> <td data-bbox="969 636 1453 678">Blue</td> </tr> <tr> <td data-bbox="475 684 964 726">Scheduled for billing in the next bill cycle</td> <td data-bbox="969 684 1453 726">Black</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding bill information appears at the bottom of this zone. It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill.</p> <p>Note:</p> <p>If you want to display the day of the due date on the icon, you must set the Date To Use (D-Due Date, B-Bill Date) parameter in the C1-TL-OI-EVT algorithm to D. However, if you want to display the day of the bill date on the icon, you must set the Date To Use (D-Due Date, B-Bill Date) parameter in the C1-TL-OI-EVT algorithm to B.</p> <p>You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the C1-TL-OI-EVT algorithm.</p>	If the bill is...	Then the icon appears in...	Fully Matched	Green	Unmatched	Red	Credit Note	Blue	Scheduled for billing in the next bill cycle	Black
If the bill is...	Then the icon appears in...										
Fully Matched	Green										
Unmatched	Red										
Credit Note	Blue										
Scheduled for billing in the next bill cycle	Black										

Row Name	Row Description												
Payments	<p>A small icon appears for each payment which is created for the account in the respective month. For example, if one payment is created for the account in the month of Aug 2016, three payments are created in the month of Dec 2016, and four payments are created in the month of Mar 2017, then one icon appears in the Aug 2016 column, three icons appear in the Dec 2016 column, and four icons appear in the Mar 2017 column. A text indicating the day of the month when the payment was created appears on the icon. The following table indicates the color in which the icon appears depending on the status of the payment:</p> <table border="1"> <thead> <tr> <th>Status</th> <th>Color</th> </tr> </thead> <tbody> <tr> <td>Frozen</td> <td>Green</td> </tr> <tr> <td>Canceled</td> <td>Red</td> </tr> <tr> <td>Freezable</td> <td>Blue</td> </tr> <tr> <td>Error</td> <td>Red</td> </tr> <tr> <td>Incomplete</td> <td>Yellow</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding payment information appears at the bottom of this zone. It has a link. On clicking the link, the Payment screen appears where you can view the details of the respective payment.</p> <p>Note: You can change the color in which the text appears on the icon and the color in which the icon appears in the different status through the C1-TL-PY-EVT algorithm.</p>	Status	Color	Frozen	Green	Canceled	Red	Freezable	Blue	Error	Red	Incomplete	Yellow
Status	Color												
Frozen	Green												
Canceled	Red												
Freezable	Blue												
Error	Red												
Incomplete	Yellow												

Hold Details

The **Hold Details** zone lists the active hold requests due to which the bills of the respective account are kept on hold. It contains the following columns:

Column Name	Column Description
Hold Request Information	<p>Displays information about the hold request.</p> <p>Note: It has a link. On clicking the link, the Hold Request screen appears where you can view the details of the respective hold request.</p>
Status	<p>Indicates the status of the hold request. The valid values are:</p> <ul style="list-style-type: none"> Active Approval in Progress Deferred Processing Draft Rejected Released
Entity	<p>Indicates the type of the entity for which the hold request is created in the system. The valid value is:</p> <ul style="list-style-type: none"> Account
Hold Reason	Displays the reason for which the hold request is created for the account.
Hold Process	Indicates the process that is kept on hold for the account.

Column Name	Column Description
Start Date	Displays the date from when the hold request is effective for the account.
End Date	Displays the date till when the hold request is effective for the account.

Trial Bills

The **Trial Bills** zone lists the trial bills which are created for the account. It contains the following columns:

Column Name	Column Description
Creation Date	Displays the date when the trial bill is created.
Trial Bill Information	Displays information about the trial bill. Note: It has a link. On clicking the link, the Trial Bill screen appears where you can view the details of the respective trial bill.
Current Charges	Displays the trial bill amount.

Customer 360° Information - Policy

The following table provides information about the **Policy** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	<p>The Policy tab displays the following:</p> <ul style="list-style-type: none"> List of self-funded policies to which the parent customer's bill groups are associated. <p>Note: The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.</p> <ul style="list-style-type: none"> Basic details and policy persons of a self-funded policy where the parent customer is the policy holder.
A parent customer who is associated with the fully-insured group policy	<p>The Policy tab displays the following:</p> <ul style="list-style-type: none"> List of fully-insured group policies to which the parent customer or its bill groups are associated. <p>Note: The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.</p> <ul style="list-style-type: none"> Basic details, policy persons, and policy plans of a fully-insured group policy to which the parent customer or its bill group is associated.
A bill group who is associated with the self-funded policy	<p>The Policy tab displays the following:</p> <ul style="list-style-type: none"> List of self-funded policies to which the bill group is associated. Basic details and policy persons of a self-funded policy.

If you are viewing the 360° information of...	Then...
A bill group who is associated with the fully-insured group policy	<p>The Policy tab displays the following:</p> <ul style="list-style-type: none"> List of fully-insured group policies to which the bill group is associated. Basic details, policy persons, and policy plans of a fully-insured group policy.
A person whose person type is neither Parent Customer nor Bill Group	<p>The Policy tab displays the following:</p> <ul style="list-style-type: none"> List of fully-insured group or self-funded policies to which the person is associated. Basic details, policy persons, and policy plans of a self-funded or fully-insured group policy.

It contains the following zones:

- [Policy List](#) on page 703

Note: The **Policy List** zone appears when there is more than one policy associated with the person.

- [Policy Information](#) on page 704
- [Policy Persons](#) on page 705
- [Policy Plans](#) on page 705

Note: The **Policy Plans** zone appears when you are viewing the 360° information of a person who is associated with the fully-insured group policy.

Policy List

If you are viewing 360° information of a parent customer, the **Policy List** zone lists the policies to which the parent customer and its bill groups are associated. Note that the system lists the policies of all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration.

Note: The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.

If you are viewing 360° information of a bill group, the **Policy List** zone lists the policies to which the bill group is associated. If you are viewing 360° information of a person who is neither a parent customer nor a bill group, the **Policy List** zone lists the policies to which the person is associated. This zone appears when there is more than one policy associated with the person. It contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	Displays information about the policy.
	Note: It has a link. On clicking the link, the Policy screen appears where you can view the details of the respective policy.

Column Name	Column Description
Policy Type	Indicates the type of the policy.
Status	Indicates the status of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to a policy, the following zones appear in the **Policy** tab:

- Policy Information
- Policy Persons
- Policy Plans

You can filter the list using various search criteria (such as, **Policy Number**, **Start Date**, **Policy Type**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

Policy Information

The **Policy Information** zone displays the details of the policy. It contains the following sections:

- **Main** – Displays the basic information about the policy. It contains the following fields:

Field Name	Field Description
Policy Information	Displays information about the policy. Note: It has a link. On clicking the link, the Policy screen appears where you can view the details of the respective policy.
Source System	Displays the name of the external system in which the policy is created.
Policy Number	Displays the policy number.
Status	Indicates the status of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

Field Name	Field Description
Runout End Date	Displays the date when the runout period of the policy ends.
	Note: This field appears when you are viewing the 360° information of a person who is associated with a self-funded policy.
Runout Administration Fees	Indicates whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> • None • Percentage of Claim
	Note: This field appears when you are viewing the 360° information of a person who is associated with a self-funded policy. At present, this field is used only for the information purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.

- **Characteristics** – Lists the characteristics defined for the policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Policy Persons

The **Policy Persons** zone lists the persons associated with the policy. It contains the following columns:

Column Name	Column Description
Person Name	Indicates the person who is associated with the policy.
Policy Person Role	Indicates the role of the person with respect to the policy.
Start Date	Displays the date from when the person is associated with the policy.
End Date	Displays the date till when the person is associated with the policy.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the 360° information of a policy person by clicking the **View** () icon corresponding to the person in the **Policy Persons** zone.

Policy Plans

The **Policy Plans** zone lists the plans defined in the policy. It appears when you are viewing the 360° information of a person who is associated with the fully-insured group policy. It contains the following columns:

Column Name	Column Description
Policy Plan Information	Displays information about the policy plan. In addition, this column has a context menu which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Policy Plan screen appears where you can view the details of the respective policy plan.
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Plan Name	Indicates the plan to which the policy belongs.
Benefit Type	Indicates the benefit type of the policy plan. The valid values are: <ul style="list-style-type: none"> • Commercial • Medicare Affiliated
No. of Subscribers	Indicates the number of main subscribers in the policy plan.
No. of Members	Indicates the number of members in the policy plan.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Plan Start Date** and **Plan End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

Customer 360° Information - Pricing Information

The following table provides information about the **Pricing Information** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	<p>The Pricing Information tab displays the following:</p> <ul style="list-style-type: none"> • Basic details of the pricing rules which are defined for the parent customer. • Summarized tree view listing each bill group of the parent customer and the bill groups' self-funded policies and pricing rules. • Basic details of the self-funded policies which are associated with each bill group of the parent customer. • Basic details of the pricing rules which are defined for the self-funded policies of each bill group. • Basic details of the active pricing groups which are defined for each bill group. • Basic information about the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.

If you are viewing the 360° information of...	Then...
A bill group who is associated with the self-funded policy	<p>The Pricing Information tab displays the following:</p> <ul style="list-style-type: none"> Summarized tree view listing the parent customer and pricing rules which are defined for the parent customer. Basic details of the self-funded policies which are associated with the bill group. Basic details of the pricing rules which are defined for the self-funded policies of the bill group. Basic details of the active pricing groups which are defined for the bill group. Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.
A parent customer who is associated with the fully-insured group policy	<p>The Pricing Information tab displays the following:</p> <ul style="list-style-type: none"> Basic details of the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue). Summarized tree view listing the pricing rules which are defined for the parent customer, fully-insured group policies, and policy plans. Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules for different entities.
A bill group who is associated with the fully-insured group policy	<p>The Pricing Information tab displays the following:</p> <ul style="list-style-type: none"> Basic details of the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue). Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules for different entities.
A person whose person type is neither Parent Customer nor Bill Group	No data appears in the Pricing Information tab.

It contains the following zones:

- [Parent Customer Pricing Rules](#) on page 708

Note: The **Parent Customer Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rule Summary](#) on page 712

Note: The **Bill Group Self-Funded Policy Pricing Rule Summary** zone appears when you are viewing 360° information of a parent customer who is associated with the self-funded policy.

- [Parent Customer Pricing Rule Summary](#) on page 712

Note: The **Parent Customer Pricing Rule Summary** zone appears when you are viewing 360° information of a bill group who is associated with the self-funded policy.

Parent Customer Pricing Rules

The **Parent Customer Pricing Rules** zone lists the pricing rules which are defined for the parent customer. It appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy. It contains the following columns:

Column Name	Column Description
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.
	Note: It has a link. On clicking the link, the Pricing Rule Type screen appears where you can view the details of the respective pricing rule type.

Column Name	Column Description																		
Pricing Rule Information	Displays information about the pricing rule.																		
	Note: It has a link. On clicking the link, the Pricing Rule screen appears where you can view the details of the respective pricing rule.																		
Price Item Information	Indicates the price item for which the pricing rule is created.																		
	Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item.																		
Start Date	Displays the date from when the pricing rule is effective.																		
End Date	Displays the date till when the pricing rule is effective.																		
Status	Indicates the status of the pricing rule. The valid values are: <ul style="list-style-type: none"> • Active • Disaggregation Initiated • Inactive • Pending 																		
Edit	On clicking the Edit () icon, the following screen appears where you can edit the details of the respective pricing rule:																		
	<table border="1"> <thead> <tr> <th>If you are editing...</th> <th>Then the following screen appears...</th> </tr> </thead> <tbody> <tr> <td>A claim pricing rule</td> <td>Claim Pricing Rule</td> </tr> <tr> <td>A specific stop-loss pricing rule</td> <td>Specific Stop-Loss (SSL) Pricing Rule</td> </tr> <tr> <td>An aggregate stop-loss pricing rule</td> <td>Aggregate Stop-Loss (ASL) Pricing Rule</td> </tr> <tr> <td>A retention type claim based pricing rule</td> <td>Retention Type Claim Based Pricing Rule</td> </tr> <tr> <td>A retention type enrollment based pricing rule</td> <td>Retention Type Enrollment Based Pricing Rule</td> </tr> <tr> <td>An ancillary pricing rule</td> <td>Ancillary Pricing Rule</td> </tr> <tr> <td>A discount arrangement pricing rule</td> <td>Discount Arrangement Pricing Rule</td> </tr> <tr> <td>A level funded pricing rule</td> <td>Level Funded (LF) Pricing Rule</td> </tr> </tbody> </table>	If you are editing...	Then the following screen appears...	A claim pricing rule	Claim Pricing Rule	A specific stop-loss pricing rule	Specific Stop-Loss (SSL) Pricing Rule	An aggregate stop-loss pricing rule	Aggregate Stop-Loss (ASL) Pricing Rule	A retention type claim based pricing rule	Retention Type Claim Based Pricing Rule	A retention type enrollment based pricing rule	Retention Type Enrollment Based Pricing Rule	An ancillary pricing rule	Ancillary Pricing Rule	A discount arrangement pricing rule	Discount Arrangement Pricing Rule	A level funded pricing rule	Level Funded (LF) Pricing Rule
	If you are editing...	Then the following screen appears...																	
	A claim pricing rule	Claim Pricing Rule																	
	A specific stop-loss pricing rule	Specific Stop-Loss (SSL) Pricing Rule																	
	An aggregate stop-loss pricing rule	Aggregate Stop-Loss (ASL) Pricing Rule																	
	A retention type claim based pricing rule	Retention Type Claim Based Pricing Rule																	
	A retention type enrollment based pricing rule	Retention Type Enrollment Based Pricing Rule																	
	An ancillary pricing rule	Ancillary Pricing Rule																	
	A discount arrangement pricing rule	Discount Arrangement Pricing Rule																	
A level funded pricing rule	Level Funded (LF) Pricing Rule																		
Delete	On clicking the Delete () icon, you can delete the pricing rule.																		
	Note: You can delete a pricing rule only when it is not yet used in the system.																		
Price List Information	Indicates the price list that contains the price item pricing which is created through the pricing rule.																		
	Note: It has a link. On clicking the link, the Price List screen appears where you can view the details of the respective price list.																		

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new pricing rule for the parent customer by clicking the **Add** link in the upper right corner of this zone.

You can filter the list using various search criteria (such as, **Price Item**, **Start Date**, **Pricing Rule Type**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Bill Group Self-Funded Policy Information

The **Bill Group Self-Funded Policy Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy. If you are viewing the 360° information of a parent customer, the **Bill Group Self-Funded Policy Information** zone lists the policies to which each bill group of the parent customer is associated. However, if you are viewing the 360° information of a bill group, the **Bill Group Self-Funded Policy Information** zone lists the policies to which the bill group is associated. It contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the bill group to which the policy is associated. Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective bill group (i.e. person).
Policy Information	Displays information about the policy. Note: It has a link. On clicking the link, the Policy screen appears where you can view the details of the respective policy.

Column Name	Column Description
Renew	On clicking the Renew () icon, the Policy screen appears where you can renew the policy.
	Note: The Renew icon appears when the policy is in the In Force/Active status and it is not yet renewed.
Policy Number	Displays the policy number.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> • Pending • In Force/Active • Runout • Post Runout
Runout End Date	Displays the date when the runout period of the policy ends.
Renewal Date	Displays the date when the policy is renewed.
	Note: The data appears in this column when the policy is renewed.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to a bill group and policy combination, the **Bill Group Self-Funded Policy Pricing Rules** and **Bill Group Pricing Groups** zones appear.

You can filter the list using various search criteria (such as, **Bill Group Name**, **Policy Start Date**, and **Policy End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Bill Group Pricing Groups

The **Bill Group Pricing Groups** zone lists the pricing groups which are defined for the bill group. By default, the active pricing groups are listed in this zone. It appears when you are viewing 360° information of a bill group who is associated with the self-funded policy. It contains the following columns:

Column Name	Column Description
Pricing Group	Indicates the pricing group which is created for the bill group.
Status	Indicates the status of the pricing group. The valid values are: <ul style="list-style-type: none"> Active Inactive
Edit	On clicking the Edit () icon, the Pricing Group screen appears where you can edit the details of the pricing group.
Delete	On clicking the Delete () icon, you can delete the pricing group. <p>Note: You can delete a pricing group when it is not yet used while defining a pricing rule for the bill group.</p>
Duplicate	On clicking the Duplicate () icon, the Pricing Group screen appears where you can define a new pricing group using an existing pricing group.
Associated Price Items	Indicates the price items whose pricing is defined using the pricing group.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Group Pricing Groups** zone does not appear in the **Pricing** tab of the **Customer 360° Information** screen. It appears when you click the **Broadcast** () icon corresponding to a bill group in the **Bill Group Self-Funded Policy Information** zone.

You can define a new pricing group for the bill group by clicking the **Add** link in the upper right corner of this zone.

You can filter the list using the **Show All** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Note: If you select the **Yes** option from the **Show All** list, the system lists both the active and inactive pricing groups in the **Bill Group Pricing Groups** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Fully-Insured Pricing Rules

The **Fully-Insured Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group policy. If you are viewing the 360° information of a parent customer, the **Fully-Insured Pricing Rules** zone lists:

- Age based or tier based pricing rules defined for the parent customer's or its bill groups' fully-insured group policy plans
- Additional charge pricing rules defined for the parent customer
- Additional charge pricing rules defined for the fully-insured group policies and policy plans of the parent customer and its bill groups
- Additional charge pricing rules defined for the states where the fully-insured group policy, its policy plans, and memberships are issued

However, if you are viewing the 360° information of a bill group, the **Fully-Insured Pricing Rules** zone lists:

- Age based or tier based pricing rules defined for the bill group's fully-insured group policy plans
- Additional charge pricing rules defined for the parent customer
- Additional charge pricing rules defined for the fully-insured group policies and policy plans of the parent customer and the bill group
- Additional charge pricing rules defined for the states where the fully-insured group policy, its policy plans, and memberships are issued

It contains the following columns:

Column Name	Column Description
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created. Note: It has a link. On clicking the link, the Pricing Rule Type screen appears where you can view the details of the respective pricing rule type.
Pricing Rule Information	Displays information about the pricing rule. Note: It has a link. On clicking the link, the Pricing Rule screen appears where you can view the details of the respective pricing rule.
Price Item Information	Indicates the price item for which the pricing rule is created. Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item.

Column Name	Column Description
Pricing Level	Indicates the level at which the pricing rule is defined. The valid values are: <ul style="list-style-type: none"> • Parent Customer • Plan • Policy • State
Entity Information	Indicates the fully-insured group policy, policy plan, parent customer, or state for which the pricing rule is defined.
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Price List Information	Indicates the price list that contains the price item pricing which is created through the pricing rule. Note: It has a link. On clicking the link, the Price List screen appears where you can view the details of the respective price list.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Price Item**, **Start Date**, **Pricing Rule Type**, **End Date**, **Status**, and **Pricing Level**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

Pricing Rule Summary

The **Pricing Rule Summary** zone lists the following in a tree structure:

- Information string of the parent customer
- Information string of the pricing rule defined for the parent customer
- Information string of each fully-insured group policy where the parent customer is associated
- Information string of the pricing rule defined for the fully-insured group policy of the parent customer
- Information string of each plan defined for the fully-insured group policy of the parent customer
- Information string of the pricing rule defined for the fully-insured group policy plans

It appears when you are viewing 360° information of a parent customer who is associated with the fully-insured group policy. It contains the following column:

Column Name	Column Description
Hierarchy	Displays information about the parent customer, fully-insured group policies, policy plans, and pricing rules in a tree structure.

Pricing Rule Approval Transactions

The **Pricing Rule Approval Transactions** zone lists the following information:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	The Pricing Rule Approval Transactions zone lists the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.
A bill group who is associated with the self-funded policy	The Pricing Rule Approval Transactions zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.
A parent customer who is associated with the fully-insured group policy	The Pricing Rule Approval Transactions zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of different entities (such as parent customer, fully-insured group policy, policy plans, and state of issue).
A bill group who is associated with the fully-insured group policy	The Pricing Rule Approval Transactions zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of different entities (such as parent customer, fully-insured group policy, policy plans, and state of issue).

It contains the following columns:

Column Name	Column Description
Submitted On	Displays the date and time when the approval transaction is created by the submitter.
Approval Transaction ID	Displays the approval transaction ID. Note: It has a link. On clicking the link, the Comparison: New versus Existing screen appears where you can review and accordingly approve, reject, or revert the changes.
Pricing Level	Indicates whether the approval transaction is created for a pricing rule which is defined at the parent customer or bill group level. The valid values are: <ul style="list-style-type: none"> Parent Customer Bill Group
Person Name	Indicates the person for whom the pricing rule is created.
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.
Price Item Information	Indicates the price item for which the pricing rule is created. Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item.

Column Name	Column Description
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Approval Status	Indicates the status of the approval transaction. The valid values are: <ul style="list-style-type: none"> • Approved • Cancelled • Deleted • Inprocess • Pending • Rejected
Action	Indicates the type of action performed by the submitter on the pricing rule. The valid values are: <ul style="list-style-type: none"> • Add • Update • Delete
Submitted By	Indicates the user who has performed the action on the pricing rule.
Assigned To	Indicates the user to whom the approval transaction is manually assigned for review.
Approved/Rejected By	Indicates the user who has approved or rejected the approval transaction.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Status**, **Assigned To**, and **Price Item**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Defining a Sort ID for a Bill Group

Prerequisites

To define a sort ID for a bill group, you should have:

- Effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration

Procedure

To define a sort ID for a bill group:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

Note: The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- Click the **Add** link in the upper right corner of the **Bill Group Sorting** zone.

The **Bill Group Sorting** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' sort IDs you want to define.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Group Information	Used to indicate the bill group for whom you want to define the sort ID.	Yes
	Note: The values appear in this list when there are effective child persons whose person type is set to Bill Group and who are related to the parent customer using a relationship type which is specified in the Person Relationship Type parameter of the C1-ASOBLNG feature configuration.	
Description	Used to specify the description for the sort ID.	Yes
Sort ID	Used to specify the sort ID.	Yes
Start Date	Used to specify the date from when the sort ID is effective for the bill group.	Yes
	Note: The start date cannot be later than the end date.	
End Date	Used to specify the date till when the sort ID is effective for the bill group.	No
	Note: The end date cannot be earlier than the start date.	

- Enter the required details in the grid.
- If you want to define more than one sort ID for a bill group, click the **Add**  icon and then repeat step 5.

Note: However, if you want to remove a sort ID of a bill group, click the **Delete**  icon corresponding to the bill group and sort ID combination.

- Click **Save**.

A sort ID is defined for the bill group.

Editing a Sort ID of a Bill Group

Procedure

To edit a sort ID of a bill group:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

Note: The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. In the **Bill Group Sorting** zone, select the check box corresponding to the bill group and sort ID combination whose details you want to edit.

Note: If you want to edit all sort IDs of effective bill groups, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for editing.

5. Click **Edit**.

The **Bill Group Sorting** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' sort IDs you want to edit.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Group Information	Indicates the bill group whose sort ID you want to edit.	Not applicable
Description	Used to specify the description for the sort ID.	Yes
Sort ID	Displays the sort ID.	Not applicable
Start Date	Used to specify the date from when the sort ID is effective for the bill group. Note: The start date cannot be later than the end date. The start date cannot be later than the effective date specified in the derivation and pricing parameters which are defined for the bill group and sort ID combination.	Yes

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to specify the date till when the sort ID is effective for the bill group.	No
	<p>Note:</p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the effective date specified in the derivation and pricing parameters which are defined for the bill group and sort ID combination.</p>	

- Modify the details of a bill group's sort ID, if required.
- Click **Save**.

The changes made to the bill group's sort ID are saved.

Deleting a Sort ID of a Bill Group

Procedure

To delete a sort ID of a bill group:

- Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Expand the **Bill Group Sorting** zone.

Note: The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- In the **Bill Group Sorting** zone, select the check box corresponding to the bill group and sort ID combination that you want to delete.

Note: If you want to delete all sort IDs of effective bill groups, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for deleting.

- Click **Delete**.

A message appears confirming whether you want to delete the bill group's sort ID.

Note: You can delete a bill group's sort ID when the derivation and pricing parameters are not yet defined for the bill group and sort ID combination.

6. Click **OK**.

The bill group's sort ID is deleted.

Creating a Bill Group Sorting Upload Request

Procedure

To create a bill group sorting upload request:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

Note: The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Upload** link in the upper right corner of the **Bill Group Sorting** zone.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.	Yes
	Note: The list includes only those upload request types where the upload request business object with the Upload Type option type set to BG is selected.	

Note: The **Select Upload Request Type** screen appears when there are multiple upload request types where the upload request business object with the **Upload Type** option type set to **BG** is selected. If there is only one such upload request type defined in the application, the **Bill Group Sorting Upload Request** screen appears.

5. Select the required upload request type from the respective field.
6. Click **OK**.

The **Bill Group Sorting Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define the characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the bill group sorting upload request will be created.	Not applicable
Parent Customer	Used to indicate the person for whom you want to create the bill group sorting upload request. Note: By default, the parent customer's ID appears in this field. You can change the person, if required. The system allows you to create a bill group sorting upload request for a person whose person type is set to Parent Customer . The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Person Search window appears.	Yes
File Name	Used to specify the name and path of the file that you want to upload. Note: You can also click the Browse button corresponding to this field to browse to the location where the file is available in the system.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

7. Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

8. Browse to the location where the file that you want to upload is available in the system.
9. Click **Open**.

The file name along with the path appears in the **File Name** field.

10. Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.
11. Define characteristics for the upload request, if required.

12. Click Save.

A message appears indicating the number of records which are successfully uploaded. Then, a bill group sorting upload request is created in the **Draft** status. If the bill group ID is available in the record, the status of the record is set to **Pending**. However, if the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination when the bill group ID is not specified in the record, the status of the record is set to **Invalid**.

Defining the Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

Prerequisites

To define the derivation and pricing parameters for a bill group and sort ID combination, you should have:

- Effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration
- Sort ID defined for the bill group
- Values defined for the **C1-SourceSystemLookup** extendable lookup

Procedure

To define the derivation and pricing parameters for a bill group and sort ID combination:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Derivation and Pricing Parameters** zone.

Note: The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Add** link in the upper right corner of the **Bill Group Derivation and Pricing Parameters** zone.

The **Bill Group Derivation and Pricing Parameters** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' derivation and pricing parameters you want to define.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the source system from where the claim and enrollment transactions are received.	Yes
Parameter 1	Used to specify the employee attribute based on which you want to derive the bill group. Note: You must not specify the ampersand (&) character in this field.	Yes
Parameter 2	Used to specify the employee attribute based on which you want to derive the bill group. Note: You must not specify the ampersand (&) character in this field.	No
Parameter 3	Used to specify the employee attribute based on which you want to derive the bill group. Note: You must not specify the ampersand (&) character in this field.	No
Parameter 4	Used to specify the employee attribute based on which you want to derive the bill group. Note: You must not specify the ampersand (&) character in this field.	No
Effective Date	Used to specify the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination. Note: The effective date must be within the date range of the sort ID defined for the bill group.	Yes
Status	Indicates the status of the derivation and pricing parameters for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> • Active • Inactive Note: By default, the value is set to Active .	Not applicable
Bill Group Information	Used to indicate the bill group for whom you want to define the derivation and pricing parameters. Note: The values appear in this list when there are effective child persons whose person type is set to Bill Group and who are related to the parent customer using a relationship type which is specified in the Person Relationship Type parameter of the C1-ASOBLLNG feature configuration.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Sort ID	Used to indicate the sort ID of the bill group for which you want to define the derivation and pricing parameters.	Yes
	Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Sort ID Search window appears.	

- Enter the required details in the grid.
- If you want to define the derivation and pricing parameters for more than one bill group and sort ID combination, click the **Add** (+) icon and then repeat step 5.

Note: However, if you want to remove the derivation and pricing parameters of a bill group and sort ID combination, click the **Delete** (🗑) icon corresponding to the bill group and sort ID combination.

- Click **Save**.

The derivation and pricing parameters are defined for the bill group and sort ID combination.

Editing the Derivation and Pricing Parameters of a Bill Group and Sort ID Combination

Procedure

To edit the derivation and pricing parameters of a bill group and sort ID combination:

- Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Expand the **Bill Group Derivation and Pricing Parameters** zone.

Note: The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- In the **Bill Group Derivation and Pricing Parameters** zone, select the check box corresponding to the bill group and sort ID combination whose details you want to edit.

Note: If you want to edit the derivation and pricing parameters of all bill group and sort ID combinations, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for editing.

5. Click **Edit**.

The **Bill Group Derivation and Pricing Parameters** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' derivation and pricing parameters you want to edit.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Indicates the source system from where the claim and enrollment transactions are received.	Not applicable
Parameter 1	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 2	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 3	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 4	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Effective Date	Displays the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.	Not applicable
Status	Used to indicate the status of the derivation and pricing parameters for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> Active Inactive 	Yes
Bill Group Information	Indicates the bill group for whom the derivation and pricing parameters are defined.	Not applicable
Sort ID	Indicates the sort ID of the bill group for which the derivation and pricing parameters are defined.	Not applicable

6. If required, you can inactivate the derivation and pricing parameters of a bill group and sort ID combination.

7. Click **Save**.

The changes made to the derivation and pricing parameters of a bill group and sort ID combination are saved.

Creating a Bill Group Derivation and Pricing Parameters Upload Request

Procedure

To create a bill group derivation and pricing parameters upload request:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Derivation and Pricing Parameters** zone.

Note: The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Upload** link in the upper right corner of the **Bill Group Derivation and Pricing Parameters** zone.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.	Yes
	Note: The list includes only those upload request types where the upload request business object with the Upload Type option type set to BL is selected.	

Note: The **Select Upload Request Type** screen appears when there are multiple upload request types where the upload request business object with the **Upload Type** option type set to **BL** is selected. If there is only one such upload request type defined in the application, the **Bill Group Derivation and Pricing Parameters Upload Request** screen appears.

5. Select the required upload request type from the respective field.
6. Click **OK**.

The **Bill Group Derivation and Pricing Parameters Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define the characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the bill group derivation and pricing parameters upload request will be created.	Not applicable
Parent Customer	<p>Used to indicate the person for whom you want to create the bill group derivation and pricing parameters upload request.</p> <p>Note: By default, the parent customer's ID appears in this field. You can change the person, if required.</p> <p>The system allows you to create a bill group derivation and pricing parameters upload request for a person whose person type is set to Parent Customer.</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Person Search window appears.</p>	Yes
File Name	<p>Used to specify the name and path of the file that you want to upload.</p> <p>Note: You can also click the Browse button corresponding to this field to browse to the location where the file is available in the system.</p>	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

- Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

- Browse to the location where the file that you want to upload is available in the system.

- Click **Open**.

The file name along with the path appears in the **File Name** field.

- Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.

- Define characteristics for the upload request, if required.

- Click **Save**.

A message appears indicating the number of records which are successfully uploaded. Then, a bill group derivation and pricing parameters upload request is created in the **Draft** status. If the bill group ID is available in the record, the status of the record is set to **Pending**. However, if the system could not derive the bill group ID using the bill

group identifier type and bill group identifier combination when the bill group ID is not specified in the record, the status of the record is set to **Invalid**.

Renewing a Self-Funded Policy of a Bill Group

Oracle Revenue Management and Billing enables you to renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy when it is in the **In Force/Active** status and is not yet renewed. For more information, see [Self-Funded Policy Renewal](#) on page 409.

Procedure

To renew a self-funded policy of a bill group:

1. Search for the bill group who is associated with the self-funded policy (which you want to renew) in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the bill group whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears.

4. In the **Bill Group Self-Funded Policy Information** zone, click the **Renew** () icon in the **Renew** column corresponding to the self-funded policy which you want to renew.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the renewed policy.
- **Persons** - Used to associate or disassociate persons from the renewed policy.

Note: You cannot disassociate persons who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration.

- **Characteristics** - Used to define the characteristics for the renewed policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Base Policy Information	Indicates the policy which you want to renew.	Not applicable
Policy Type	Indicates the policy type using which the base policy is created.	Not applicable
Policy Number	Used to specify the policy number of the renewed policy.	Yes
Description	Used to specify the description for the renewed policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the renewed policy is effective.	Yes
	<p>Note:</p> <p>By default, the start date is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than or equal to the base policy's end date.</p>	
End Date	Used to specify the date till when the renewed policy is effective.	Yes
	<p>Note: The end date cannot be earlier than the start date.</p>	
Runout End Date	Used to specify the date when the runout period of the renewed policy ends.	No
	<p>Note: The runout end date cannot be earlier than or equal to the renewed policy's end date.</p>	
Runout Administration Fees	Used to indicate whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> • None • Percentage of Claim 	No
	<p>Note: At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Copy Pricing Rules	<p>Used to indicate whether you want to copy the pricing rules of the base policy to the renewed policy. If you select the Copy Pricing Rules option, the system copies the following pricing rules of the base policy:</p> <ul style="list-style-type: none"> • Claim • Retention Type Claim Based • Retention Type Enrollment Based • Recurring Flat Fees • Ancillary <p>Note:</p> <p>While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively.</p> <p>If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.</p>	No
Copy Advance Level Funding Eligibility	<p>Used to indicate whether you want to copy the advance level funding eligibility value of the base policy to the renewed policy.</p> <p>Note:</p> <p>If the Copy Advance Level Funding Eligibility option is set to Y in the base policy, the system activates the renewed self-funded policy on the policy renewal even if the renewed policy's start date is later than the system date.</p> <p>This field appears only when you want to renew a self-funded policy.</p>	No

Note: The **Renew** icon appears when the policy is in the **In Force/Active** status and it is not yet renewed.

5. Enter the required details in the **Main** section.
6. Associate or disassociate persons from the renewed policy, if required.
7. Define, edit, or remove characteristics of the renewed policy, if required.
8. Click **Save**.

The renewed policy is created in the **Pending** status. The renewal date is stamped corresponding to the base policy in the **Bill Group Self-Funded Policy Information** zone.

- [Refund and Write Off Details](#) on page 752

Bill Information

The **Bill Information** zone displays the details of the bill. It contains the following section:

- **Main** - Displays the basic information about the bill. It contains the following fields:

Field Name	Field Description
Bill Information	<p>Displays information about the bill. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p>Note: It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill.</p>
Alternate Bill ID	<p>Displays the alternate bill ID.</p> <p>Note: This field appears only when the respective data is available for the bill.</p>
Account Information	<p>Indicates the account for which the bill is generated. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p>Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account.</p>

Adjustments

The **Adjustments** zone lists the adjustments which are swept onto the bill. It contains the following columns:

Column Name	Column Description
Adjustment Information	Displays information about the adjustment.
	Note: It has a link. On clicking the link, the Adjustment screen appears where you can view the details of the respective adjustment.
Contract Information	Indicates the contract against which the adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract.

Settlement Activities

You may settle a bill or its bill segment by making a payment, offsetting, refunding, writing off, or by reconciling against pay instructions. The **Settlement Activities** zone lists the activities related to the bill or its bill segment settlement. It contains the following columns:

Column Name	Column Description
Activity Date	Displays the date when the settlement activity was performed in the system.
Activity Type	Indicates the type of the settlement activity. The valid values are: <ul style="list-style-type: none"> • Payment • Offset • Refund • Write Off • Transfer
Amount	Indicates the amount settled through the activity.
Related Object Information	Displays additional information about the settlement activity.
Related Object ID	Indicates the payment, offset request, refund request, write off request, or reconciliation adjustment which is created during settlement.
	Note: It has a link. On clicking the link, the Payment, Offset Request, Refund Request, Write Off Request, or Adjustment screen appears where you can view the details of the respective activity.

Bill Segment Summary

The system groups the bill segments with the same date range and price item combination and then provides the summarized information for each combination in the **Bill Segment Summary** zone. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segments.
End Date	Displays the end date of the bill segments.
Policy Number	Indicates the policy for which the bill segments are generated.
Price Item Description	Indicates the price item for which the bill segments are generated.

Column Name	Column Description
Amount	Displays the sum of the bill segment amount.
Unpaid Amount	Displays the sum of the unpaid amount of the bill segments.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Bill Segment Details

The **Bill Segment Details** zone displays the details of the bill segments which are included in the bill. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segment.
End Date	Displays the end date of the bill segment.
Policy Number	Indicates the policy for which the bill segment is generated.
Price Item Description	Displays the description of the price item.
Price Item	Indicates the price item for which the bill segment is generated.
Status	Indicates the status of the bill segment. The valid values are: <ul style="list-style-type: none"> • Incomplete • Error • Freezable • Pending Cancel • Frozen • Canceled
Amount	Displays the bill segment amount.
Billable Charge ID	Indicates the billable charge for which the bill segment is generated. <p>Note: It has a link. On clicking the link, the Billable Charge screen appears where you can view the details of the respective billable charge.</p>
Unpaid Amount	Displays the unpaid amount of the bill segment.
Price Item Parameters	Displays the concatenated string consisting of a list of parameters and their values based on which the price item pricing is defined.
External Membership ID	Indicates the membership for which the bill segment is generated.
Member's Primary Identifier	Displays the concatenated string consisting of member's primary identifier type and its value which are separated by a colon (:).
Member Name	Indicates the member for whom the bill segment is generated.
Plan Information	Indicates the plan to which the membership belongs. <p>Note: It has a link. On clicking the link, the Policy Plan screen appears where you can view the details of the respective policy plan.</p>

Column Name	Column Description
Auto Pay ID	Indicates the auto pay instruction through the automatic payment is created for the bill segment. Note: It has a link. On clicking the link, the Auto Pay Instruction screen appears where you can view the details of the respective auto pay instruction.
Bill Segment ID	Displays the bill segment ID. Note: It has a link. On clicking the link, the Bill Segment screen appears where you can view the details of the respective bill segment.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **View** () icon corresponding to a bill segment, the **Bill Segment** screen appears where you can view the additional details of the respective bill segment.

On clicking the **Broadcast** () icon corresponding to a bill segment, the **SQ Details**, **Bill Segment Calculation Lines**, and **Transaction Details** zones appear.

Note:

The **SQ Details** zone appears when the bill segment is generated for an SQI based billable charge.

The **Transaction Details** zone appears only when the bill segment is generated for a billable charge which is created through the transaction aggregation process.

You can filter the list using various search criteria (such as, **Start Date** and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

SQ Details

The **SQ Details** zone lists the service quantity identifiers (SQIs) used in the bill segment calculation. It appears when the bill segment is generated for an SQI based billable charge. It contains the following columns:

Column Name	Column Description
SQI	Indicates the service quantity identifier.
Billed Service Quantity	Displays the service quantity used by the rates engine for calculation. This amount differs from the initial service quantity when the rate's SQ rules manipulate the service quantity.

By default, the **SQ Details** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a bill segment in the **Bill Segment Details** zone.

Bill Segment Calculation Lines

The **Bill Segment Calculation Lines** zone lists the calculation lines of the bill segment. It contains the following columns:

Column Name	Column Description
Header Sequence	Indicates the sequence in which the calculation line is generated.
Sequence	Ideally, the sequence would be 1 unless multiple versions of the rate were effective during the bill period. If there is more than one effective rate version, there will be a separate set of calculation lines for each version applied. The lines that apply to the first part of the bill period would have a Sequence of 1, the lines for the next part of the bill period would have a Sequence of 2 and so on.
Description on Bill	Displays the summarized information about the charge that will be printed on the bill.
Amount	Displays the charge amount.
Distribution Code	Displays the distribution code which indicates the GL account to which the charge must be posted.
Service Quantity	Indicates the service quantity which is used for calculation.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Segment Calculation Lines** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a bill segment in the **Bill Segment Details** zone.

Transaction Details

The **Transaction Details** zone lists the transactions whose charges are billed through the bill segment. It contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID. Note: It has a link. On clicking the link, the Transaction Details screen appears where you can view the details of the respective transaction.
Transaction Date	Displays the date and time when the transaction was performed.
Transaction Volume	Displays the transaction volume.
Transaction Amount	Displays the transaction amount.
Transaction Currency	Displays the currency in which the transaction was performed.
Transaction Source	Displays the transaction source from where the transaction was received.
Transaction Record Type	Displays the record type of the transaction.
Initial Price Item	Indicates the price item to which the transaction is mapped.

Column Name	Column Description
Rule	Indicates the rule which was met while determining initial price item for the transaction.
	Note: It has a link. On clicking the link, the Rule screen appears where you can view the details of the respective rule.
Transaction Information	Displays information about the transaction.
	Note: It has a link. On clicking the link, the Transaction Details screen appears where you can view the details of the respective transaction.

By default, the **Transaction Details** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a bill segment in the **Bill Segment Details** zone.

On clicking the **Broadcast** (📡) icon corresponding to a transaction, the **Transaction Leg Calculation Lines** zone appears with the details of the respective transaction.

Transaction Leg Calculation Lines

The **Transaction Leg Calculation Lines** zone lists the calculation lines of all legs of the transaction which are rated before billing. It contains the following columns:

Column Name	Column Description
Transaction Calculation ID	Displays the transaction calculation ID.
Sequence	Indicates the sequence in which the calculation line was created. It is the sequence of the rate component which is used in the rate schedule.
Price Component ID	Indicates the price component which is used during calculation.
Rate	Indicates the rate which is used for the calculation.
SQI	Indicates the service quantity identifier (SQI) which is used in the calculation.
Billable Service Quantity	Indicates the service quantities used by the rates engine for calculation.
Calculated Amount	Displays the calculated charge amount which is rounded off (i.e. amount in precision). For example, 100. This amount appears in the invoice currency.
Precise Calculated Amount	Displays the calculated charge amount which is not rounded off (i.e. amount with precision and scale). For example, 98.67. This amount appears in the invoice currency.
Exempt Amount	Displays the amount of the calculated charge that the person does not have to pay due to tax exemption.
Base Amount	Displays the total amount derived from the cross-referenced line(s) that the current line then used to calculate the charge amount.
Pricing Amount	Displays the calculated charge amount which is not rounded off (i.e. amount with precision and scale). For example, 98.67. This amount appears in the pricing currency.

Column Name	Column Description
Exchange Rate	Indicates the exchange rate which is used when the invoice currency is different from the pricing currency.
Print	Indicates whether information about the calculation line must be printed on the person's bill. The valid values are: <ul style="list-style-type: none"> • Y • N
Description on Bill	Displays the summarized information about the charge that will be printed on the bill.
Distribution Code	Displays the distribution code which indicates the GL account to which the charge must be posted.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Aggregation Parameter Group ID	Indicates the aggregation parameter group using which the transaction legs are aggregated during calculation.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Transaction Leg Calculation Lines** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** () icon corresponding to a transaction in the **Transaction Details** zone.

Hold Details

The **Hold Details** zone lists the active hold requests due to which the bills of the respective account are kept on hold. It contains the following columns:

Column Name	Column Description
Hold Request Information	Displays information about the hold request. <p>Note: It has a link. On clicking the link, the Hold Request screen appears where you can view the details of the respective hold request.</p>
Status	Indicates the status of the hold request. The valid values are: <ul style="list-style-type: none"> • Active • Approval in Progress • Deferred Processing • Draft • Rejected • Released
Entity	Indicates the type of the entity for which the hold request is created in the system. The valid value is: <ul style="list-style-type: none"> • Account
Hold Reason	Displays the reason for which the hold request is created for the account.
Hold Process	Indicates the process that is kept on hold for the account.

Column Name	Column Description
Start Date	Displays the date from when the hold request is effective for the account.
End Date	Displays the date till when the hold request is effective for the account.

Offset Details

The **Offset Details** zone lists the offset requests through which the bill is offset against another bill. It contains the following columns:

Column Name	Column Description
Offset Request Information	Displays information about the offset request.
	Note: It has a link. On clicking the link, the Offset Request screen appears where you can view the details of the respective offset request.
Offset Amount	Indicates the bill amount which is offset against another bill.
Creation Mode	Indicates the mode in which the offset request is created. The valid values are: <ul style="list-style-type: none"> • Automatic • Manual

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Refund and Write Off Details

The **Refund and Write Off Details** zone lists the refund and write off requests through which the bill or its bill segment is either refunded or written off. It contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the refund or write off request is created.
Refund/Write Off Request Information	Displays information about the refund or write off request.
	Note: It has a link. On clicking the link, the Refund Request or Write Off Request screen appears depending on whether the request is created for refund or write off.
Refund/Write Off Amount	Displays the total refund or write off amount.
Status	Indicates the status of the refund or write off request. The valid values are: <ul style="list-style-type: none"> • Approval In Progress • Cancelled • Deferred Processing • Draft • Processed • Rejected • Voided

Column Name	Column Description
Action	Indicates whether the request is created for refund or write off. The valid values are: <ul style="list-style-type: none"> • Refund • Write Off
Account Information	Indicates the account for which the refund or write off request is created. In addition, this column has a context menu which helps in navigating to other screens in the application. <p>Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account.</p>
Created By	Indicates the user who has created the refund or write off request.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Action** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Viewing the SQ Details of a Bill Segment

Procedure

To view the SQ details of a bill segment:

1. Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.
The **Account** tab appears in the **Customer 360° Information** screen.
3. In the **Open Bills** zone, click the **View** () icon corresponding to the bill whose details you want to view.
The **Bill Information** screen appears.
4. In the **Bill Segment Details** zone, click the **Broadcast** () icon corresponding to the bill segment whose details you want to view.
The **SQ Details**, **Bill Segment Calculation Lines**, and **Transaction Details** zones appear.

Note:

The **SQ Details** zone appears when the bill segment is generated for an SQI based billable charge.

The **Transaction Details** zone appears when the bill segment is generated for a billable charge which is created through the transaction aggregation process.

5. View the SQ details of the bill segment in the **SQ Details** zone.

Viewing the Calculation Lines of a Bill Segment

Procedure

To view the calculation lines of a bill segment:

1. Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.

The **Account** tab appears in the **Customer 360° Information** screen.

3. In the **Open Bills** zone, click the **View** () icon corresponding to the bill whose details you want to view.

The **Bill Information** screen appears.

4. In the **Bill Segment Details** zone, click the **Broadcast** () icon corresponding to the bill segment whose details you want to view.

The **SQ Details**, **Bill Segment Calculation Lines**, and **Transaction Details** zones appear.

Note:

The **SQ Details** zone appears when the bill segment is generated for an SQI based billable charge.

The **Transaction Details** zone appears when the bill segment is generated for a billable charge which is created through the transaction aggregation process.

5. View the calculation lines of the bill segment in the **Bill Segment Calculation Lines** zone.

Chapter 9

Health Product 360° View

Topics:

- [Prerequisites](#)
- [Health Product 360° View \(Used for Searching\)](#)
- [Health Product 360° Information \(Used for Viewing\)](#)
- [Health Plan 360° Information \(Used for Viewing\)](#)

Until now, you were able to add and edit the health products and health plans through a health product and plan inbound message. But, you were not able to view the details of a health product and health plan from the user interface. Now, Oracle Revenue Management and Billing provides the ability to view the details of a health product and health plan from the user interface. A new screen named **Health Product 360° View** is introduced in this release. It enables you to search for a health product or health plan using the respective details. You can navigate to the **Health Product 360° View** screen from the **Pricing Management** menu. Through the **Health Product 360° View** screen, you can navigate to the following new screens:

- **Health Product 360° Information** – Enables you to view the details of the health product including its characteristics and health plans.
- **Health Plan 360° Information** – Enables you to view the details of the health plan including its characteristics and pricing rules.

Prerequisites

To setup the **Health Product 360° View** feature, you need to do the following:

- Define the required characteristic types where the characteristic entity is set to **Health Product**
- Define the required characteristic types where the characteristic entity is set to **Health Plan**
- Define the values for the **PRODUCT_HC_CAT_FLG** lookup field
- Define the values for the **PRODUCT_LOB_FLG** lookup field
- Define the values for the **PRODUCT_TYPE_FLG** lookup field
- Define the values for the **PRODUCT_LOB_CAT_FLG** lookup field
- Define the values for the **PRODUCT_SUB_TYPE_FLG** lookup field

Health Product 360° View (Used for Searching)

The **Health Product 360° View** screen allows you to search for a health product and health plan using various search criteria. It contains the following zone:

- [360° Search](#) on page 758

Through this screen, you can navigate to the following screen:

- [Health Product 360° Information \(Used for Viewing\)](#) on page 771

Health Plan Details	Used to search health plans with a particular characteristic. Note: This field appears when the Health Plan Details option is selected from the Search By list. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Note: If you specify the characteristic type as a search criteria, you have to enter the characteristics value.
	If the field is used for...	Then the purpose of Characteristic Value is...						
Health Product Details	Used to search health products with a particular characteristic. Note: This field appears when the Health Product Details option is selected from the Search By list. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.							
Health Plan Details	Used to search health plans with a particular characteristic. Note: This field appears when the Health Plan Details option is selected from the Search By list. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.							
Health Plan	Used to search health plans with a particular name. Note: This field appears when the Health Plan Details option is selected from the Search By list.	No						
Add On Plan	Used to search health plans which are defined as an add-on health plan. Note: This field appears when the Health Plan Details option is selected from the Search By list.	No						
Ancillary Benefits	Used to search health plans which provide ancillary benefits. Note: This field appears when the Health Plan Details option is selected from the Search By list.	No						

Field Name	Field Description	Mandatory (Yes or No)
Charitable Plan	Used to search health plans which provide subsidized health insurance coverage.	No
	Note: This field appears when the Health Plan Details option is selected from the Search By list.	
Grandfather Plan	Used to search health plans which are defined as grandfathered health plan.	No
	Note: This field appears when the Health Plan Details option is selected from the Search By list.	
Rider Benefits	Used to search health plans which provide rider benefits.	No
	Note: This field appears when the Health Plan Details option is selected from the Search By list.	
ACA Qualified	Used to search health plans which provide Affordable Care Act (ACA) qualified health insurance coverage.	No
	Note: This field appears when the Health Plan Details option is selected from the Search By list.	
Product Sub Type	Used to search health plans with medical accounts that are linked to the health product.	No
	Note: This field appears when the Health Plan Details option is selected from the Search By list.	
Product Category	Used to search health plans which are associated with a particular product category.	No
	Note: This field appears when the Health Plan Details option is selected from the Search By list.	
Product LOB	Used to search health plans which are associated with a particular product's line of business.	No
	Note: This field appears when the Health Plan Details option is selected from the Search By list.	
Status	Used to search health plans with a particular status. The valid values are: <ul style="list-style-type: none"> • Active • Inactive 	No
	Note: This field appears when the Health Plan Details option is selected from the Search By list.	

Note: You must specify at least one search criterion while searching for a health product or health plan.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description						
Health Product	<p>Displays information about the health product.</p> <p>Note: It has a link. On clicking the link, the Health Product 360° Information screen appears where you can view the details of the respective health product. This column appears when the Health Product Details option is selected from the Search By list.</p>						
Description	<p>Displays information based on the following search parameter:</p> <table border="1"> <thead> <tr> <th>If the search is performed for...</th> <th>Then the purpose of Description is...</th> </tr> </thead> <tbody> <tr> <td>Health Product Details</td> <td> <p>Displays the description of the health product.</p> <p>Note: This column appears when the Health Product Details option is selected from the Search By list.</p> </td> </tr> <tr> <td>Health Plan Details</td> <td> <p>Displays the description of the health plan.</p> <p>Note: This column appears when the Health Plan Details option is selected from the Search By list.</p> </td> </tr> </tbody> </table>	If the search is performed for... Searching for a Health Product

Prerequisites

To search for a health product, you should have:

- Values defined for the **PRODUCT_TYPE_FLG** lookup.
- Values defined for the **PRODUCT_HC_CAT_FLG** lookup.
- Values defined for the **PRODUCT_LOB_FLG** lookup.

- Characteristic types defined in the application (where the characteristic entity is set to **Health Product**)

Procedure

To search for a health product:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, click **Pricing Management** and then click **Health Product 360° View**.
The **Health Product 360° View** screen appears.
3. Select the **Health Product Details** option from the **Search By** list to indicate that you want to search for a health product.
4. Enter the required search criteria in the **360° Search** zone.

Note:

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

You must specify at least one search criterion while searching for a health product.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of health products that meet the search criteria appears in the **Search Results** section.

Searching for a Health Plan

Prerequisites

To search for a health plan, you should have:

- Values defined for the **PRODUCT_SUB_TYPE_FLG** lookup.
- Values defined for the **PRODUCT_HC_CAT_FLG** lookup.
- Values defined for the **PRODUCT_LOB_FLG** lookup.
- Characteristic types defined in the application (where the characteristic entity is set to **Health Plan**)

Procedure

To search for a health plan:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.

- From the **Main** menu, click **Pricing Management** and then click **Health Product 360° View**..
The **Health Product 360° View** screen appears.
- Select the **Health Plan Details** option from the **Search By** list to indicate that you want to search for a health plan.
- Enter the required search criteria in the **360° Search** zone.

Note:

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

You must specify at least one search criterion while searching for a health plan.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- Click **Search**.

A list of health plans that meet the search criteria appears in the **Search Results** section.

Product Information

The **Product Information** zone displays the details of the health product. It contains the following fields:

Field Name	Field Description
Health Product	<p>Displays information about the health product. In addition, a legend appears corresponding to this field which indicates the status of the health product.</p> <p>Note:</p> <ul style="list-style-type: none"> •  - Indicates that the health product is Active. •  - Indicates that the health product is Inactive.

Field Name	Field Description
Product Health Category	Indicates the health care category to which the health product belongs.
Product Type	Indicates how the health product can be classified based on the provider network.
Product Sub Type	Indicates the type of medical accounts that are linked to the health product.
Start Date	Displays the date from when the health product is effective.
End Date	Displays the date till when the health product is effective.
Product LOB	Indicates the line of business to which the health product belongs.
Product LOB Category	Indicates the line of business category to which the health product belongs.
Product Administration	Displays the name of the agency which administers the health product.
Bundled Product Flag	Indicates whether the health product is a bundled product.
Bundled Products	Displays the health products which are included in the bundled product.

Product Characteristics

The **Product Characteristics** zone lists the characteristics of the health product. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the health product.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	Note: The data appears in this column when the type of characteristic value is set to Predefined Value .

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Health Plans

The **Health Plans** zone displays the details of the health plan. It contains the following columns:

Column Name	Column Description
Health Plan	Displays information about the health plan.
	Note: It has a link. On clicking the link, the Health Plan 360° Information screen appears where you can view the details of the health plan.
Description	Displays the description of the health plan.
Add-On Plan	Indicates whether the health plan is an add-on health plan.

Column Name	Column Description
Start Date	Displays the date from when the health plan is effective.
End Date	Displays the date till when the health plan is effective.
Status	Indicates the status of the health plan. The valid legends are: <ul style="list-style-type: none"> ● - Indicates the status of the health product as Active. ● - Indicates the status of the health product as Inactive.

You can filter the list using various search criteria (such as **Plan Description** and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

Product Sub Type	Indicates the type of medical accounts that are linked to the health product.
Start Date	Displays the date from when the health product is effective.
End Date	Displays the date till when the health product is effective.
Product LOB	Indicates the line of business to which the health product belongs.
Product LOB Category	Indicates the line of business category to which the health product belongs.
Product Administration	Displays the name of the agency which administers the health product.
Bundled Product Flag	Indicates whether the health product is a bundled product.
Bundled Products	Displays the health products which are included in the bundled product.

Plan Characteristics

The **Plan Characteristics** zone lists the characteristics of the health plan. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the health plan.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Column Name	Column Description
Description	Displays the description of the characteristic value.
	Note: The data appears in this column when the type of characteristic value is set to Predefined Value .

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Pricing Rules

The **Pricing Rules** zone lists the pricing rules of the health plan. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays the price item or price item bundle code.
	Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item.
Pricing Rule Type Information	Displays the pricing rule type using which the pricing rule is created.
	Note: It has a link. On clicking the link, the Pricing Rule Type screen appears where you can view the details of the pricing rule type.
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Eligibility Parameters	On Clicking the Eligibility Parameters (🔍) icon, the Eligibility Parameters screen appears where you can view the eligible parameters of the pricing rule.
Rate Information	On Clicking the Rate Information (📄) icon, the Rate Information screen appears where you can view the rate information details of a pricing rule.
Status	Indicates the status of the pricing rule. The valid legends are: <ul style="list-style-type: none"> ● - Indicates that the pricing rule is Active. ● - Indicates that the pricing rule is Inactive.

Note:

You can view the 360° information of the pricing rule, by clicking the **View** () icon corresponding to the record in the **Pricing Rule** zone.

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Status**, **Price Item**, **Start Date**, **End Date** and **Pricing Information**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Chapter 10

Pricing Management (Health Insurance Business)

Topics:

- [Prerequisites \(Health Insurance Business\)](#)
- [Pricing Methodologies and Pricing Variation Based on Parameters \(Health Insurance Business\)](#)
- [Parameter](#)
- [Price Item \(Health Insurance Business\)](#)
- [Price List](#)
- [Rate Definition](#)
- [Tiering Criterion](#)

Oracle Revenue Management and Billing allows you to define prices for premiums, various fees, credits, discounts, and taxes that are defined as price items. Price for the price item may vary based on various attributes, which are defined as parameters in the system. Parameter values are derived either from transaction attributes (for example, for calculating claim based fees for a self-funded customer, pricing may vary based on claim transaction's health coverage class) or based on a field or characteristic of entities (for example, for calculating premium, pricing may vary based on member person's characteristic; whether a smoker or non-smoker). The system also supports deriving the pricing parameter through an algorithm, thereby enabling the custom derivation based on requirements.

Based on the line of business and the type of charge, you can define standard pricing which is common for multiple customers (for example, pricing defined for a health plan is applicable for all the subscribers subscribing to the health plan) or customer-specific pricing (for example, for fully-insured group customer, the pricing is specific to the group and you can define the policy plan level pricing in the system to achieve this. For more information about the fully-insured pricing, see [Fully-Insured Pricing](#) on page 3063.

The system enables you to define pricing at various levels in a customer hierarchy (for example, for a self-funded group customer, the pricing can be defined at the bill group level as well as at the parent customer level). If pricing is defined at multiple levels for a customer, the precedence is given to the pricing based on the level while searching for the pricing. For example, if pricing is defined for a price item at the bill group level as well as the parent customer level, the bill group level pricing takes precedence over the parent customer level pricing. Also, the parent customer level pricing is inherited by all the bill groups.

The pricing is triggered based on the transactions to calculate various charges or credit amounts eligible for a transaction. For example, for a self-funded customer, claim amounts with additional fees and markups, claim based fees, stop loss is calculated for claim transactions, enrollment based retention fees are calculated based on enrollment transactions, and ancillary fees are calculated based on ancillary transactions. For more information about the self-funded pricing, see [Self-Funded Pricing](#) on page 2491.

Transaction Based Pricing is invoked using the **Transaction Feed Management** module which processes different types of transactions (for example, claim, capitation, ancillary, enrollment, etc.) using the configurable validation and mapping rules to invoke the eligible pricing rules. For more information about the transaction feed management, see [Transaction Feed Management](#) on page 1175.

Pricing can also be triggered **based on qualifying life events** (for example, premium is calculated when a new membership is added, or a new member

is added to an existing membership, or every time the plan pricing is revised, etc.). The entity audit framework enables you to define various events for which pricing should be revised. For example, **addition of a new membership, addition of a new member, updates to the plan pricing, or the membership attributes which you want to monitor for premium change, etc.** The system enables you to define the algorithms to price the eligible events by invoking pricing rules. For more information about the entity audit framework, see [Entity Audit](#) on page 3351.

Prerequisites (Health Insurance Business)

To setup the pricing management feature, you need to do the following:

- Define the required SQIs and divisions in the system.
- Define the required parameters in the system.
- Define the tiering setup for rate components in the system.
- Define the required price items in the system.

Pricing Methodologies and Pricing Variation Based on Parameters (Health Insurance Business)

The specialized pricing methodologies are required for pricing the fully-insured and self-funded customers. Therefore, an out of box pricing solution is provided to the fully-insured and self-funded customers through distinct pricing rule types.

Fully-Insured Pricing

Age Banded Premium Pricing

Age banded premium pricing is one of the methodologies for premium calculation. In this methodology, Premium calculation is done **by determining the premium of each member separately mainly based on the age band in which the member falls, and then aggregating** these to derive the overall premium amount for a membership.

Apart from member's age, premium of age banded plans can vary based upon **different parameters; be it member's attribute or plan level attribute or LOB specific attributes**. For example, pricing can vary by different population segment characteristics such as Employee Type (Retiree, COBRA and Active) and/or by different regions, Employee Status (Permanent/contractual) etc. Age-banded pricing may also vary by different modifiers such as Tobacco usage, Gender etc.

ORMB provides Out of Box Pricing Rule Type 'Age Banded'. Using the same you can define pricing rule to define age-banded plan pricing. Pricing variation can be defined based on the pricing eligibility parameters where the source can be defined as Membership characteristics or Member characteristics or Plan characteristics. User can set **base fee** for set of parameters and can also set the **percentage or flat amount to be added over the base fee for each modifiers**.

Age-banded premium calculation algorithm which is configured in Age-banded pricing rule type process the premium pricing for each membership, derive the premium amount for each member and then aggregates the amount to derive the overall premium amount for a membership. **Maximum number of eligible dependents and the order of selection of the dependents like oldest first or youngest first is also configurable at Plan or State level.**

Age Banded Example:

Demo Corporation has a Group policy for the employees the Monthly premium for the policy is rated as follows

Base Premium Rate

Age Band	Location/Rating Area	Base Premium
Up to 15 Years	North California	\$200
	South California	\$210
16 to 18 Years	North California	\$210
	South California	\$220

Age Band	Location/Rating Area	Base Premium
18 to 40 Years	North California	\$220
	South California	\$240
40 to 60 Years	North California	\$250
	South California	\$260
60+ Years	North California	\$280
	South California	\$290

On Top of the base premium, additional 2% premium will be charged if the member is smoker

State of California is configured with the following pricing rules :

Max. No of Eligible Dependents = 2

Order of Dependent Selection = Oldest first

New Born Gift Days = 30

Proration Rule Defined for the account : Mid Month i.e. Member joining before 15th will be charged the premium for the entire month

Example 1:

North California Based Employee John Doe, a 45 years old smoker who enrolled himself with his spouse Mary Doe (Age 40) and daughter Elsa Doe aged 13, son Bob Doe aged 10 and daughter Laura Doe aged 8 the premium will be calculated as follows:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
	Smoker	\$5
Mary Doe	Base Premium	\$250
Elsa Doe	Base Premium	\$200
Bob Doe	Base Premium	\$200
Total Premium		\$905

Example 2 :

North California Based Employee John Doe a California based Employee is enrolled in to the plan along with his spouse Mary Doe, John enrolls his new born daughter Laura born on 3rd of July on 20th of July.

John's Premium for all the months till July will be calculated as follows

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250
Total Premium		\$500

With the new enrollment in the month of July, The premium for July and the following months will be recalculated, As the state of California has New Born Gift days = 30 days, the premium will be calculated as follows:

For the Month of July:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250
Laura Doe	Base Premium	\$200
	New Born Waiver	-\$200
Total Premium		\$500

For Month of August:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250
Laura Doe	Base Premium	\$200
Total Premium		\$700

Tiered Premium Pricing

Tiered based premium pricing is another methodology for premium calculation. In this methodology, Premium calculation is done by determining the **subscription tier** level for the membership directly to derive the premium amount for that membership.

Standard tier based pricing structure contains different tiers such as Employee only (E), Employee+ Spouse (ES), Family (F), Employee + Children (EC). A member can subscribe his/her dependents to a plan and fall into one of the tier. Tier-based premium varies based upon **membership tier level and different parameters**; parameters can be member's attribute or Plan level attribute or LOB specific attributes. For example, for a particular tier, pricing can vary by different population segment characteristics such as Employee Type (Retiree, COBRA and Active) and/or by different regions, Employee Status (Permanent/contractual) etc.

Like age-based pricing, tier-based pricing can be defined using pricing rule with tier-based pricing rule type You can set premium fee for set of parameters and tier level. Tier-based premium calculation algorithm which is configured in tier-based pricing rule type process the premium pricing for each membership based on the applicable rate for the parameters and tier value for that membership which is defined as membership characteristic.

Tier Based Pricing Example

Tier	Location/Rating Area	Premium
Employee Only	N. California	\$200
	S. California	\$210
Employee + Spouse	N. California	\$300
	S. California	\$310
Family	N. California	\$450

Tier	Location/Rating Area	Premium
	S. California	\$500

Example : North California Based Employee John Doe, a 45 years old smoker who enrolled himself with his spouse Mary Doe (Age 40) and daughter Elsa Doe aged 13 the premium charged will be \$450 per month.

State Level Configurations

Various state specific rules are defined in ORMB using state specific characteristics e.g. Gift Days to provide no additional premium when New Born is enrolled into the plan or various rules such as maximum dependents to be covered etc. The state and state characteristics can be defined state specific parameters. These parameters which define business rules may have overridden values at Plan or Membership levels. ORMB pricing calculation always checks for the parameters at membership and plan level first, if not found then the state level parameters are considered for the price calculations.

Premium Holiday and Proration

ORMB provides several options for correctly handling of proration; when a rate changes in middle of a billing period or when new Membership is added or terminated during the bill period. Configurable Proration Rule allows to define various options such as; mid-month proration where full premium is applicable if the membership starts before mid-coverage or proration based on covered days etc.

A configuration option can be set to handle special cases where proration is not to be applied even during a long or short bill period (e.g. when a flat charge is to be applied in full; even though the billing period is half of the standard period).

ORMB allows configuring or uploading the period for which premium holiday or waive off of premium needs to be given to the membership, based on which the premium is waived off, the rate configurations allow you to provide these details on the bill lines providing the required transparency to the customer.

Self-funded Pricing

ORMB provides you with a complete solution in terms of pricing, billing and revenue management to support ASO plans and also to provide risk coverage of offering self-funded plans through the stop loss or re-insurance services.

Claim Amount Processing

ORMB provides capability to calculate the final claim amount to be charged to the customer by summing up all the claim line items configured as billable for the customer. It also provides a facility to mark up or markdown these line items amounts as per customer specific pricing. You can also define the capping amounts per claim.

In order to support new '**Payments Integrity model**' ORMB enables you to define **the additional fees i.e. recovery fees / savings amounts** to be calculated as **flat or percentage based** on the claim charges and charge the same to the customers along with **Max / Min capping amounts**

ORMB allows you to define pricing rules, having different pricing strategy based on policy status e.g. **during the active policy period various chargeable items** like consumer driven health insurance charges, traditional health insurance charges, **are charged to the customer** whereas during **post runout period the entire claim amount will be written off.**

To enable easy configurations ORMB provides you a capability to define **claim templates** and with definition of multiple add-on fees and its usage with default pricing. Using a file upload utility or other custom process the claim transactions can be uploaded to ORMB.

Claim transactions contain information about the membership and details of various claim line items such as **ASO service provider charges, fee for network access, fee for non-network access, fee for collection services provided by external vendor, fee for hospital audit performed by external vendor**, and so on.

ORMB allows the ASO service provider to bill employers for claim amount and various additional fees based on the pricing defined. Claim pricing rules can be defined at the parent customer and bill group levels. Claim pricing rule enables you to define whether a particular claim line item should be billable to the customer or should be written off. Eligibility for billing can be defined based on rules using the transaction attributes.

Retention fee – Claim based

Retention fee is based upon claim amount either the percentage of claim or flat amount per claim transaction can also be calculated. ORMB provides you an ability to select the Claim line items eligible for claim based fees calculations. Claim based fees pricing can **vary based on either membership attributes or based on the claim transaction attributes** e.g. different claim based fees can be charged for claim with health coverage class as ‘Medical’ than that of the ‘Dental’

Retention fee – Enrollment based

In order to calculate fees / premium amount / various limits (e.g. ASL Limit based on the enrollments), ORMB provides out of box pricing rule type – retention fee – enrollment based. Enrollment based pricing rules can be defined at both customer or bill group level where, enrollment fees are defined as per member or per subscriber charges where **pricing variation can be provided based on parameters e.g. coverage tier or health coverage class(HCC) etc.** It also calculates the retention fee based upon enrollment count.

Flat and Recurring Fees

Ad-hoc one time fees (e.g. one time admin fees), recurring premium fees / charges e.g. charge the stop loss premium can be defined in ORMB using the flat and recurring fees pricing rule type. These types of charges are independent of no. of enrollments or claims and are charged as a flat fee per month over a period of time. ORMB provides flexibility to set up pricing rules for charging flat / one time fees or flat recurring fees with configurable recurring frequencies e.g. claim funds.

Ancillary fees

Ancillary service charges are basically an adjustments charge which are either pre-calculated charges which need to be included into the bill or to be calculated based on the utilization of the ancillary services Ancillary pricing rule can be defined at the parent customer and bill group levels. The ancillary in ORMB enables you to create an ancillary charge in either of the following ways:

- As **pass through charge without markup or markdown** (i.e. flat charge)
- As **pass through charge** where ORMB adds a **flat or percentage based markup or markdown** to charge the customer
- Or by creating a **rate based charge** using the rate defined in the ancillary pricing and the service quantity specified in the ancillary transaction. You can also apply markup or markdown to a rate based charge

Specific Stop Loss (SSL)

SSL is the form of excess risk coverage that provides protection for the **employer against a high claim on any one individual**. ORMB provides a pricing rule type – specific stop loss to support SSL calculations. SSL pricing rules are defined at two levels – parent level defines all the accumulation specific details which are common for all the bill groups and bill group – policy level pricing to define the limits and also **information about which charges are to be re-insured against SSL**. ORMB provides **complete flexibility** to define the **accumulation criteria** e.g. you can choose to calculate SSL only on the medical claims, out of network claim, etc. based on configurations. Ability to calculate and invoice the specific stop loss based on per subscriber or per member basis with a **facility to laser or excludes the subscribers / members**. ORMB’s flexible accumulation criteria definitions allow you to define SSL pricing for various types of policies -12/12 or 15/12 or 12/15 with ease. With ORMB you can choose the settlement frequency for the SSL

ORMB enables you to setup **SSL retrospectively or allow pricing updates by reprocessing**

Aggregated Stop Loss (ASL)

ORMB enables you to provide a **ceiling on the dollar amount of eligible expenses** that an employer would pay, **in total for all members or subscribers**, during a contract period. **ASL limit** can be configured **as either flat limit or based on the PSPM (Per subscriber per month) basis or enrollment based**. Similar to SSL, ASL pricing rules **enables to define eligibility rules for the transactions and claim line items** for the calculations of ASL. With ORMB you can choose the settlement frequency for the ASL. ORMB enables you to setup **ASL retrospectively or allow pricing updates by reprocessing**

Discount Arrangements Fees

ORMB discount arrangement pricing rule type enables to calculate and bill the discounts using two different methods – i.e: **discount share Fees** where discount amount to be charged to customer is calculated as percentage of the total

discount savings amount per claim and **discount guarantee** Fees where discount amount calculated based **on discount savings amount and guaranteed percentage of the covered amount**.

Pricing Rule type allows you to define maximum discount amount that can be charged per claim transaction and/or allow to configure the **minimum and maximum discount limit on the contract level**. It also allows defining the **rule based eligibility criteria to apply discount** and exclude few transactions based upon the parameters.

Level Funding Arrangements

ORMB level funding pricing rule type allows defining the required setup for monthly contribution mechanism which can be a **fixed monthly amount** or amount based upon enrollment **count**. ORMB enables you to collect the funds during **active policy period** to settle not only the claims and other fees during active period but also to take care of the **terminal liability** or the **claims and other fees during runout period**. ORMB also provides configurable setup to define the charges to be considered for settlement with specific criteria. ORMB enables to setup pricing rules for level funding products where the **claims, ancillary, retention based fees, discounts** can be settled against the level funded amounts.

ORMB has two variations of level funding based on the method to calculate premium fund. The portal enables you to define whether the price items included in the claim, retention type claim based, retention type enrollment based, ancillary, and discount pricing rule types are eligible for level funding. If the price items are eligible for level funding, you can then include them in the level funding pricing rule type indicating that the charges for these price items will not be included in the respective billable charge (for example, claim billable charge), but it would be settled against the funds billable charge. While adjusting such charges against the funds billable charge, there might be some **surplus or deficit** in funds at the time of settlement which is ideally at the end of year. In such case, the system enables to configure whether **a flat amount or percentage of surplus should be retained** by the ASO provider or whether a flat amount or percentage of deficit is offered as a discount to the self-funded employer. It allows you for different settlement options – **Close out – where the final settlement is done**. In case the customer is continuing for the next cycle with the payer you can provide an option to **Roll Forward the surplus funds to the next years funds**.

Level Funding Arrangements

ORMB level funding pricing rule type allows defining the required setup for monthly contribution mechanism which can be a **fixed monthly amount** or amount based upon enrollment **count**. ORMB enables you to collect the funds during **active policy period** to settle not only the claims and other fees during active period but also to take care of the **terminal liability** or the **claims and other fees during runout period**. ORMB also provides configurable setup to define the charges to be considered for settlement with specific criteria. ORMB enables to setup pricing rules for level funding products where the **claims, ancillary, retention based fees, discounts** can be settled against the level funded amounts.

ORMB has two variations of level funding based on the method to calculate premium fund. The portal enables you to define whether the price items included in the claim, retention type claim based, retention type enrollment based, ancillary, and discount pricing rule types are eligible for level funding. If the price items are eligible for level funding, you can then include them in the level funding pricing rule type indicating that the charges for these price items will not be included in the respective billable charge (for example, claim billable charge), but it would be settled against the funds billable charge. While adjusting such charges against the funds billable charge, there might be some **surplus or deficit** in funds at the time of settlement which is ideally at the end of year. In such case, the system enables to configure whether **a flat amount or percentage of surplus should be retained** by the ASO provider or whether a flat amount or percentage of deficit is offered as a discount to the self-funded employer. It allows you for different settlement options – **Close out – where the final settlement is done**. In case the customer is continuing for the next cycle with the payer you can provide an option to **Roll Forward the surplus funds to the next years funds**.

Parameter

The pricing for a price item may differ depending upon various transaction, person, account, or product attributes. Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. In addition, you can define the pricing, price list, and product eligibility criteria using one or more parameters.

Each parameter must be mapped to the following:

- **Source Entity** - Indicates the entity from where the parameter value is derived. A source entity can be account, person, product, transaction, service quantity identifier, or an algorithm.

- **Source Type** - Indicates the type of source from where the parameter value is derived. A source type can be field, characteristic, usage amount, or usage counter.
- **Source Type Code** - Indicates the source (such as, field, characteristic, usage amount, usage counter, SQL, or algorithm) from where the parameter value is derived.

The system allows you to define the following types of parameters:

- **Adhoc** - Used to store an adhoc value.
- **Predefined** - Used to store a predefined value. For example, you can create a parameter named **Country** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
AUT	Austria
AUS	Australia
CAN	Canada
CHN	China

In such case, while defining the pricing for a price item using the **Country** parameter, you can use any one of the above mentioned parameter values.

Another example, you can create a parameter named **Health Coverage Class** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
MEDICAL	Medical
DENTAL	Dental
VISION	Vision

In such case, while defining the pricing for a price item using the **Health Coverage Class** parameter, you can use any one of the above mentioned parameter values.

- **Reference** - Used to store a value which is already present in a table. For example, you can create a parameter named **Country** where the value type is set to **Reference** and the reference entity is set to **CI_COUNTRY_L** (i.e. where the description of all countries is stored). In such case, while defining the pricing for a price item using the **Country** parameter, you can specify a country which is present in the **CI_COUNTRY_L** table in the parameter value.

Parameter (Used for Searching)

The **Parameter** screen allows you to define, view, edit, delete and copy a parameter. It contains the following zone:

- [Search Parameter](#) on page 785

Search Parameter

The **Search Parameter** zone allows you to search for a parameter using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search a particular parameter.	No

Field Name	Field Description	Mandatory (Yes or No)
Value Type	Used to search parameters in which a particular type of value is stored. The valid values are: <ul style="list-style-type: none"> • Adhoc • Predefined • Reference 	No
Source Entity	Used to search parameters whose value is derived from a particular entity. The valid values are: <ul style="list-style-type: none"> • Account • Algorithm • Benefit • Health Plan • Health Product • Membership • Membership Person • Person • Policy Plan • Product • Service Quantity Identifier • State • Transaction 	No
Source Type	Used to search parameters whose value is derived from a particular type of source. The valid values are: <ul style="list-style-type: none"> • Characteristic • Field • Usage Amount • Usage Counter 	No
Description	Used to search parameters having a particular description.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Parameter	Displays the parameter.
Description	Displays the description of the parameter.

Column Name	Column Description
Value Type	<p>Indicates the type of value that you want to store in the parameter. The valid values are:</p> <ul style="list-style-type: none"> • Adhoc • Predefined • Reference
Source Entity	<p>Indicates the entity from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> • Account • Algorithm • Benefit • Health Plan • Health Product • Membership • Membership Person • Person • Policy Plan • Product • Service Quantity Identifier • State • Transaction
Source Type	<p>Indicates the type of source from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> • Characteristic • Field • Usage Amount • Usage Counter
View	<p>On clicking the View () icon corresponding to a parameter, the Parameter screen appears where you can view the details of the respective parameter.</p>
Edit	<p>On clicking the Edit () icon corresponding to a parameter, the Parameter screen appears where you can edit the details of the parameter.</p>

Column Name	Column Description
Delete	<p>On clicking the Delete (🗑️) icon corresponding to a parameter, you can delete the parameter.</p> <p>Note:</p> <p>You can delete a parameter when the following conditions are met:</p> <ul style="list-style-type: none"> • It is not yet associated to any price item or price item bundle. • It is not yet used while defining the pricing, price list, or pricing eligibility criteria.
Copy	<p>On clicking the Copy (📄) icon corresponding to a parameter, the Parameter screen appears where you can define a new parameter using an existing parameter.</p>

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Parameter

Procedure

To search for a parameter:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **P** and then click **Parameter**.
The **Parameter** screen appears.
3. Enter the search criteria in the **Search Parameter** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of parameters that meet the search criteria appears in the **Search Results** section.

Defining a Parameter

Prerequisites

To define a parameter, you should have:

- Validation algorithm defined using the **C1_PPARM_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

Note:

A sample algorithm type named **C1_PPARM_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

Procedure

To define a parameter:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **P** and then click **Parameter**.
The **Parameter** screen appears.
3. Click the **Add** button available in the **Page Title** area of the **Parameter** screen.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter.	Yes
	Note: You cannot specify any special character except underscore (_) in the parameter name.	

Field Name	Field Description	Mandatory (Yes or No)
Source Entity	<p>Used to indicate the entity from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> • Account • Algorithm • Benefit • Health Plan <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Health Product <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Membership <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Membership Person <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Person • Policy Plan <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Product <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the health insurance business.</div> <ul style="list-style-type: none"> • Service Quantity Identifier • State • Transaction 	Yes

Reference Entity	<p>Used to indicate the table whose primary key (column) you want to set as the reference entity.</p> <p>Note: This field appears only when the Reference option is selected from the Value Type list.</p> <p>The Search (🔍) icon appears corresponding to the Reference Entity field. On clicking the Search icon, the Reference Table Search window appears where you can search for the required table.</p> <p>You can only specify a language table, where the DESCR column is available, in the Reference Entity field.</p>	Yes
Field Name	<p>Indicates the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.</p> <p>Note: This field appears when the Reference option is selected from the Value Type list.</p>	Not applicable

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define the predefined values for the parameter. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Values	<p>Used to specify the value for the parameter.</p> <p>Note: You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.</p>	Yes (Conditional)
		Note: This field is required while defining the predefined parameter values.

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the parameter value.	Yes (Conditional)
		Note: This field is required while defining the predefined parameter values.

<p>Note:</p> <p>The Parameter Values section appears only when the Predefined option is selected from the Value Type list.</p> <p>At least one parameter value should be defined for a parameter where the value type is set to Predefined.</p> <p>If you want to define more than one predefined value for the parameter, click the Add (+) icon and then specify the details.</p> <p>However, if you want to remove a predefined value of the parameter, click the Delete (🗑) icon corresponding to the parameter value.</p>

- **Parameter Usage** - Used to indicate where you want to use the parameter in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)
Price Item	Used to indicate whether the parameter is associated with a price item or price item bundle. If the parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.	Yes (Conditional)
	Note: This option does not appear when the Algorithm , Health Product , or the Service Quantity Identifier option is selected from the Source Entity list.	
Pricing Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a pricing eligibility criteria using the parameter.
Pricing Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining a rule based pricing eligibility criteria.	Yes (Conditional)
	Note: This option appears only when the Membership or the Membership Person option is selected from the Source Entity list.	Note: This option is required while using the parameter for defining a rule based pricing eligibility criteria.

Option Name	Option Description	Mandatory (Yes or No)
Business Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining a rule based business eligibility criteria.	Yes (Conditional)
	Note: This option appears only when the Health Plan, Health Product, Membership, or the Membership Person option is selected from the Source Entity list.	Note: This option is required while using the parameter for defining a rule based business eligibility criteria.
Price List Eligibility Criteria	Used to indicate whether the parameter is used for defining the price list eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Health Product or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a price list eligibility criteria using the parameter.
Product Eligibility Criteria	Used to indicate whether the parameter is used for defining the product eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Algorithm, Health Product, Service Quantity Identifier, or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a product eligibility criteria using the parameter.
Rule Eligibility Criteria	Used to indicate whether the parameter is used while defining the parameter based rule type.	Yes (Conditional)
	Note: This option does not appear when the Health Product, Product, Service Quantity Identifier, or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a parameter based rule type.

Note: You must select at least one option in the **Parameter Usage** section.

4. Enter the required details in the **Parameter** screen.
5. Click **Save**.

The parameter is defined.

Note: If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

Editing a Parameter**Prerequisites**

To edit a parameter, you should have:

- Validation algorithm defined using the **C1_PPARM_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

Note:

A sample algorithm type named **C1_PPARM_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

Procedure

To edit a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the parameter whose details you want to edit.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Displays the parameter.	Not applicable
	Note: You cannot specify any special character except underscore (_) in the parameter name.	

Field Name	Field Description	Mandatory (Yes or No)
Source Entity	<p>Used to indicate the entity from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> • Account • Algorithm • Benefit • Health Plan <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Health Product <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Membership <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Membership Person <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Person • Policy Plan <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Product <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the health insurance business.</div> <ul style="list-style-type: none"> • Service Quantity Identifier • State • Transaction 	Yes
Description	Used to specify the description for the parameter.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Source Type	<p>Used to indicate the type of source from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> • Characteristic • Field • Usage Amount • Usage Counter <p>Note:</p> <p>This field appears when the Account, Person, Benefit, Health Plan, Health Product, Membership, Membership Person, Person, Policy Plan, Product, or State option is selected from the Source Entity list.</p> <p>The Usage Amount and Usage Counter options do not appear in the Source Type list when the Benefit, Health Plan, Health Product, Membership, Membership Person, Policy Plan, Product, or State option is selected from the Source Entity list.</p>	Yes
Value Type	<p>Displays the type of value that you want to store in the parameter. The valid values are:</p> <ul style="list-style-type: none"> • Adhoc • Predefined • Reference 	Not applicable

Field Name	Indicates the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.	Not applicable
	<p>Note: This field appears when the Reference option is selected from the Value Type list.</p>	

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define the predefined values for the parameter. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Values	Used to specify the value for the parameter.	Yes (Conditional)
	<p>Note: You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.</p>	<p>Note: This field is required while defining the predefined parameter values.</p>

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the parameter value.	Yes (Conditional)
		Note: This field is required while defining the predefined parameter values.

<p>Note:</p> <p>The Parameter Values section appears only when the Predefined option is selected from the Value Type list.</p> <p>At least one parameter value should be defined for a parameter where the value type is set to Predefined.</p> <p>If you want to define more than one predefined value for the parameter, click the Add (+) icon and then specify the details.</p> <p>However, if you want to remove a predefined value of the parameter, click the Delete (🗑) icon corresponding to the parameter value.</p>

- **Parameter Usage** - Used to indicate where you want to use the parameter in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)
Price Item	Used to indicate whether the parameter is associated with a price item or price item bundle. If the parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.	Yes (Conditional)
	Note: This option does not appear when the Algorithm , Health Product , or the Service Quantity Identifier option is selected from the Source Entity list.	
Pricing Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Transaction option is selected from the Source Entity list.	
Pricing Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining a rule based pricing eligibility criteria.	Yes (Conditional)
	Note: This option appears only when the Membership or the Membership Person option is selected from the Source Entity list.	

Option Name	Option Description	Mandatory (Yes or No)
Business Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining a rule based business eligibility criteria.	Yes (Conditional)
	Note: This option appears only when the Health Plan, Health Product, Membership, or the Membership Person option is selected from the Source Entity list.	Note: This option is required while using the parameter for defining a rule based business eligibility criteria.
Price List Eligibility Criteria	Used to indicate whether the parameter is used for defining the price list eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Health Product or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a price list eligibility criteria using the parameter.
Product Eligibility Criteria	Used to indicate whether the parameter is used for defining the product eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Algorithm, Health Product, Service Quantity Identifier, or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a product eligibility criteria using the parameter.
Rule Eligibility Criteria	Used to indicate whether the parameter can be used while defining the parameter based rule type.	Yes (Conditional)
	Note: This option does not appear when the Health Product, Product, Service Quantity Identifier, or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a parameter based rule type.

Note: You must select at least one option in the **Parameter Usage** section.

3. Modify the required details in the **Parameter** screen.
4. Click **Save**.

The changes made to the parameter are saved.

Deleting a Parameter

Procedure

To delete a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the parameter that you want to delete.

A message appears confirming whether you want to delete the parameter.

3. Click **OK**.

The parameter is deleted.

Note:

You can delete a parameter only when:

- It is not yet associated to any price item or price item bundle.
- It is not yet used while defining the pricing, business rule, price list, product eligibility, or rule eligibility criteria.

Copying a Parameter

Instead of creating a parameter from scratch, you can define a new parameter using an existing parameter. This is possible through copying a parameter. When you copy a parameter, the predefined values, validation algorithm, and reference entity (depending upon the value type) are copied along with the parameter usage details. You can then edit the details, if required.

Note: You cannot change the value type that is stored in the new parameter (which is created using an existing parameter).

Prerequisites

To copy a parameter, you should have:

- Parameter (whose copy you want to create) defined in the application
- Validation algorithm defined using the **C1_PPARM_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

Note:

A sample algorithm type named **C1_PPARAM_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

Procedure

To copy a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Copy**  icon in the **Copy** column corresponding to the parameter whose copy you want to create.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter.	Yes
	Note: You cannot specify any special character except underscore (_) in the parameter name.	

Field Name	Field Description	Mandatory (Yes or No)

Parameter Values	<p>Used to specify the value for the parameter.</p> <p>Note: You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required while defining the predefined parameter values.</p>

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the parameter value.	Yes (Conditional)
		Note: This field is required while defining the predefined parameter values.

<p>Note:</p> <p>The Parameter Values section appears only when the Predefined option is selected from the Value Type list.</p> <p>At least one parameter value should be defined for a parameter where the value type is set to Predefined.</p> <p>If you want to define more than one predefined value for the parameter, click the Add (+) icon and then specify the details.</p> <p>However, if you want to remove a predefined value of the parameter, click the Delete (🗑) icon corresponding to the parameter value.</p>

- **Parameter Usage** - Used to indicate where you want to use the parameter in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)
Price Item	Used to indicate whether the parameter is associated with a price item or price item bundle. If the parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.	Yes (Conditional)
	Note: This option does not appear when the Algorithm , Health Product , or the Service Quantity Identifier option is selected from the Source Entity list.	
Pricing Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a pricing eligibility criteria using the parameter.
Pricing Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining a rule based pricing eligibility criteria.	Yes (Conditional)
	Note: This option appears only when the Membership or the Membership Person option is selected from the Source Entity list.	Note: This option is required while using the parameter for defining a rule based pricing eligibility criteria.

Option Name	Option Description	Mandatory (Yes or No)
Business Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining a rule based business eligibility criteria.	Yes (Conditional)
	Note: This option appears only when the Health Plan, Health Product, Membership, or the Membership Person option is selected from the Source Entity list.	Note: This option is required while using the parameter for defining a rule based business eligibility criteria.
Price List Eligibility Criteria	Used to indicate whether the parameter is used for defining the price list eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Health Product or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a price list eligibility criteria using the parameter.
Product Eligibility Criteria	Used to indicate whether the parameter is used for defining the product eligibility criteria.	Yes (Conditional)
	Note: This option does not appear when the Algorithm, Health Product, Service Quantity Identifier, or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a product eligibility criteria using the parameter.
Rule Eligibility Criteria	Used to indicate whether the parameter can be used while defining the parameter based rule type.	Yes (Conditional)
	Note: This option does not appear when the Health Product, Product, Service Quantity Identifier, or the Transaction option is selected from the Source Entity list.	Note: This option is required while defining a parameter based rule type.

Note: You must select at least one option in the **Parameter Usage** section.

3. Enter the required details in the **Parameter** screen.
4. Click **Save**.

The new parameter is defined.

Note: If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

Viewing the Parameter Details**Procedure**

To view the details of a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **View** () icon in the **View** column corresponding to the parameter whose details you want to view.

The **Parameter** screen appears.

3. View the details of the parameter in the **Parameter** zone.

Parameter (Used for Viewing)

The **Parameter** screen allows you to view the details of a parameter. It contains the following zone:

- [Parameter](#) on page 811

Parameter

The **Parameter** zone displays the details of the parameter. It contains the following sections:

- **Main** – Displays basic information about the parameter. It contains the following fields:

Field Name	Field Description
Parameter	Displays the parameter name.
Description	Displays the description of the parameter.
Value Type	Indicates the type of value that you want to store in the parameter. The valid values are: <ul style="list-style-type: none"> • Adhoc • Predefined • Reference

Field Name	Field Description
Validation Algorithm	Indicates the algorithm using which you want to validate the adhoc parameter value.
	<p>Note:</p> <p>This field appears when the Adhoc option is selected from the Value Type list. It has a link. On clicking the link, the Algorithm screen appears where you can view the details of the respective algorithm.</p>
Referenced Table	Indicates the table whose primary key (i.e. column) is used to validate the parameter value.
	<p>Note:</p> <p>This field appears when the Reference option is selected from the Value Type list. It has a link. On clicking the link, the Table screen appears where you can view the details of the respective table.</p>

Field Name	Field Description
Source Entity	<p>Indicates the entity from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> • Account • Algorithm • Benefit • Health Plan <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Health Product <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Membership <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Membership Person <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Person • Policy Plan <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the banking business.</div> <ul style="list-style-type: none"> • Product <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px;">Note: This option is not applicable for the health insurance business.</div> <ul style="list-style-type: none"> • Service Quantity Identifier • State • Transaction
Source Type	<p>Indicates the type of source from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> • Characteristic • Field • Usage Amount • Usage Counter <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note:</p> <p>This field appears when the Account, Person, Benefit, Health Plan, Health Product, Membership, Membership Person, Person, Policy Plan, Product, or State option is selected from the Source Entity list.</p> <p>The Usage Amount and Usage Counter options do not appear in the Source Type list when the Benefit, Health Plan, Health Product, Membership, Membership Person, Policy Plan, Product, or State option is selected from the Source Entity list.</p> </div>

Field Name	Field Description
Source Type Code	Indicates the source, such as field, characteristic, usage amount, usage counter, SQL, or algorithm, from where the parameter value is derived.
	Note: This field does not appear when the Transaction option is selected from the Source Entity list.

- **Parameter Values** - Lists the predefined values of the parameter. It contains the following columns:

Column Name	Column Description
Parameter Value	Displays the value of the parameter.
Description	Displays the description of the parameter value.

Note: The **Parameter Values** section appears when the **Predefined** option is selected from the **Value Type** list.

- **Parameter Usage** – Indicates where you can use the parameter in the system. It contains the following options:

Option Name	Option Description
Price Item	Indicates whether the parameter is associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing. The following table lists the source entity and source type combinations when the Price Item option does not appear in the Parameter Usage section: Note: This option does not appear when the Algorithm , Health Product , or the Service Quantity Identifier option is selected from the Source Entity list.
Pricing Eligibility Criteria	Indicates whether the parameter is used for defining the pricing eligibility criteria. Note: This option does not appear when the Transaction option is selected from the Source Entity list.
Pricing Rule Eligibility Criteria	Indicates whether the parameter is used for defining a rule based pricing eligibility criteria. Note: This option appears only when the Membership or the Membership Person option is selected from the Source Entity list.
Business Rule Eligibility Criteria	Indicates whether the parameter is used for defining a rule based business eligibility criteria. Note: This option appears only when the Health Plan , Health Product , Membership , or the Membership Person option is selected from the Source Entity list.

Option Name	Option Description
Price List Eligibility Criteria	Indicates whether the parameter is used for defining the price list eligibility criteria.
	<p>Note:</p> <p>This option does not appear when the Health Product or the Transaction option is selected from the Source Entity list.</p>
Product Eligibility Criteria	Indicates whether the parameter is used for defining the product eligibility criteria.
	<p>Note:</p> <p>This option does not appear when the Algorithm, Health Product, Service Quantity Identifier, or the Transaction option is selected from the Source Entity list.</p>
Rule Eligibility Criteria	Indicates whether the parameter is used while defining the parameter based rule type.
	<p>Note:</p> <p>This option does not appear when the Health Product, Product, Service Quantity Identifier, or the Transaction option is selected from the Source Entity list.</p>

Price Item (Health Insurance Business)

The various charges that are to be charged to the customer (for example, premium or optional administration fees to a fully-insured group customer and claim based fees or enrollment based fees to a self-funded customer) are defined as price items in the system. Similarly, various charges credited to the customer are also defined as price items. Stop-loss arrangements for a self-funded customer (for example, specific stop-loss that is calculated and credited to customer) is represented using a price item in the system.

Once you define a price item, you can also define the pricing for the price item at various levels using pricing rules based on the requirements. For a fully-insured group customer, the pricing is defined at the policy plan level. Whereas, for a self-funded customer, the pricing can be defined either at the bill group policy level or at the parent customer level. For more information about the fully-insured pricing, see [Fully-Insured Pricing](#) on page 3063. And, for more information about the self-funded pricing, see [Self-Funded Pricing](#) on page 2491.

The system enables you to create price items which can be used for pricing and billing. It means that pricing can be defined for the price item and charges can be created against it in the system. The system enables you to create the following type of price items:

- **Fees Based Price Items** - The fees based services would include services on which fees is charged to the customers either annually or at regular intervals (for example, for the administrative services offered to the self-funded customer, the admin fees will be charged). You can create fees based price items which can be used for pricing and billing in the system.

You need to associate a contract type with a price item. The system allows you to create a charge (i.e. billable charge) for a price item on an account when a contract of the contract type which is associated with the price item is already present on the account.

You can create price items which can be assigned to any price list except global price list or which can be assigned to only global price lists. For more information about global price list, see [Price List](#) on page 877.

You can associate one or more parameters where the parameter usage is set to **Price Item** with a price item. These parameters can then be used for:

- Aggregating transactions which are mapped to the price item
- Defining multi parameter based pricing for the price item

If the parameter usage is set to **Aggregation** while associating a parameter with a price item, the parameter is only used for aggregating transactions which are mapped to the price item. However, if the parameter usage is set to **Pricing** while associating a parameter with a price item, the parameter is used for aggregating transactions as well as for defining multi parameter based pricing for the price item.

You can associate a price item to one or more divisions. In addition, you can do the following when a price item is associated to a division:

- Associate the Service Quantity Identifiers (SQIs) with the Price Item for the Division
- Define the Division-Specific Characteristics for the Price Item

Price Item (Used for Searching)

The **Price Item** screen allows you to search for a price item or price item bundle using various search criteria. It also allows you to create and copy a price item or price item bundle. It contains the following zone:

- [Search Price Item](#) on page 816

Through this screen, you can navigate to the following screens:

- [Price Item \(Used for Viewing\)](#) on page 859
- [Price Item Relationship](#)
- [Price Item Assignments](#)

Search Price Item

The **Search Price Item** zone allows you to search for a price item or price item bundle using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price item or price item bundle using the price item details. The valid value is: <ul style="list-style-type: none"> • Price Item Details 	Yes
	Note: By default, the Price Item Details option is selected.	
Price Item	Used to search a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search price items or price item bundles which are associated with a particular division.	No
	Note: You can only view those divisions to which you have access in the Division list.	
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> • Yes • No 	No
Price Item Usage	Used to search price items or price item bundles which is available for pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> • Pricing • Pricing and Billing 	No
	Note: By default, the Pricing and Billing option is selected.	
Bundle	Used to indicate whether you want to search a price item bundle. The valid values are: <ul style="list-style-type: none"> • Yes • No 	No
Price Item Type	Used to search a particular type of price items or price item bundles. The valid values are: <ul style="list-style-type: none"> • Fees • Rate 	No
	Note: This field appears when the Pricing option is selected from the Price Item Usage list.	

Note: You must specify at least one search criterion while searching for a price item or price item bundle.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle.
	Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item or price item bundle.

Column Name	Column Description
Bundle Type	<p>Indicates the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are:</p> <ul style="list-style-type: none"> • Phantom • Ratio • Regular <p>However, if the price item bundle is available for pricing and its price item type is set to Fees, the valid value is:</p> <ul style="list-style-type: none"> • Regular
Price Item Type	<p>Indicates the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> • Rate • Fees
Price Item Usage	<p>Indicates whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> • Pricing • Pricing and Billing
Duplicate	<p>On clicking the Duplicate  icon, the Price Item screen appears where you can create a new price item or price item bundle using an existing price item or price item bundle.</p>
Price Item Assigned To	<p>On clicking the View  icon in the Price Item Assigned To column, the Price Item Assignments screen appears where you can view the persons, accounts, and active price lists to which the price item or price item bundle is assigned.</p>
Price Item Relationship	<p>On clicking the View  icon in the Price Item Relationship column, the Price Item Relationship screen appears where you can view the list of the price items and price item bundles associated with the parent price item or added to the price item bundle.</p>

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Price Item or Price Item Bundle

Prerequisites

To search for a price item or price item bundle, you should have:

- Divisions defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To search for a price item or price item bundle:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.
A sub-menu appears.
3. Click the **Search** option from the **Price Item** sub-menu.
The **Price Item** screen appears.
4. Enter the search criteria in the **Search Price Item** zone depending on whether you want to search for a price item or price item bundle.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of price items or price item bundles that meet the search criteria appears in the **Search Results** section.

Defining a Price Item or Price Item Bundle

Prerequisites

To define a price item or price item bundle, you should have:

- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1_PRICING** feature configuration

Procedure

To define a price item or price item bundle:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.

A sub-menu appears.

- Click the **Add** option from the **Price Item** sub-menu.

The **Price Item** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the price item or price item bundle.
- Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

Note:

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:

- Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
- Define the accrual type criteria of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

Note: This step is not applicable for the health insurance business.

- Define the cost of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the average price floor and ceil limits of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the negotiability floor and ceil values of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the division-specific characteristics for the price item or price item bundle

- Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> • Pricing - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system. <div data-bbox="703 470 1157 548" style="border: 1px solid black; padding: 2px;"> <p>Note: This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> • Pricing and Billing - Used when you want to define pricing and create charges for the price item or price item bundle in the system. <div data-bbox="643 716 1157 793" style="border: 1px solid black; padding: 2px;"> <p>Note: By default, the Pricing and Billing option is selected.</p> </div>	Yes
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> • Rate - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items. <div data-bbox="703 1079 1157 1157" style="border: 1px solid black; padding: 2px;"> <p>Note: This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> • Fees - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item. <div data-bbox="643 1325 1157 1864" style="border: 1px solid black; padding: 2px;"> <p>Note:</p> <p>This field appears when the Pricing option is selected from the Price Item Usage list.</p> <p>By default, the Fees option is selected.</p> <p>You cannot create a price item bundle when the Pricing option is selected from the Price Item Usage list and Rate option is selected from the Price Item Type list.</p> <p>The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to Fees. Therefore, this field does not appear when the Pricing and Billing option is selected from the Price Item Usage list.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle	<p>Used to indicate whether you want to create a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No <p>Note: By default, the No option is selected. This field is not applicable for the health insurance business.</p>	Yes
Bundle Type	<p>Used to indicate the type of the price item bundle. If the Pricing and Billing option is selected from the Price Item Usage list, the valid values are:</p> <ul style="list-style-type: none"> • <i>Regular Bundle</i> • <i>Phantom Bundle</i> • <i>Ratio Bundle</i> <p>However, if the Pricing option is selected from the Price Item Usage list and the Fees option is selected from the Price Item Type list, you can only define a regular price item bundle. Therefore, by default, the value is set to Regular.</p> <p>Note: This field appears when the Yes option is selected from the Bundle list. This field is enabled when the Pricing and Billing option is selected from the Price Item Usage list and the Yes option is selected from the Bundle list. You cannot define a price item bundle when the Pricing option is selected from the Price Item Usage list and Rate option is selected from the Price Item Type list. This field is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required when you are creating a price item bundle.</p>
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No <p>Note: By default, the No option is selected.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p> <p>Note:</p> <p>This field appears when the Pricing and Billing option is selected from the Price Item Usage list.</p> <p>The Search (🔍) icon appears corresponding to the Contract Type field. On clicking the Search icon, the Contract Type Search window appears.</p>	Yes
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the Send Price Items for Approval button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Price Item Manager To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the Price Item Manager To Do Type field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p> <p>Note:</p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required when the price item manager To Do type is specified for the price item or price item bundle.</p>

Field Name	Field Description	Mandatory (Yes or No)
Average Price Floor and Ceil Type	<p>Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:</p> <ul style="list-style-type: none"> • Absolute Value Range - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$. • Spread Amount - Used when you want to define the average floor and ceil limits based on the spread amount. • Spread Percentage – Used when you want to define the average floor and ceil limits based on the spread percentage. 	Yes (Conditional)
	<p>Note:</p> <ul style="list-style-type: none"> • In case of Spread Amount and Spread Percentage options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived. • This field is not applicable for the health insurance business. 	<p>Note: This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.</p>
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal management module.	No

Field Name	Field Description	Mandatory (Yes or No)
Variable Price	Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module. Note: If the Variable Price option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system. However, if the Variable Price option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.	No

Tip: Alternatively, you can access the **Price Item** screen by clicking the **Add** button in the **Page Title** area of the **Price Item** screen.

4. Enter the required details in the **Main** section.
5. Associate the parameters with the price item or price item bundle, if required.

Note: For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.

6. Associate the price item or price item bundle with the required divisions.
7. Associate the SQIs with the price item or price item bundle for the required divisions.
8. Define the accrual type criteria of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business.

9. Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the required divisions.

Note: This step is not applicable for the health insurance business.

10. Define the cost of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business.

11. Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business.

12. Define the negotiability floor and ceil values of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business.

13. Define the division-specific characteristics for the price item or price item bundle. if required.

14. Define the characteristics for the price item or price item bundle, if required.

15. Click **Save**.

The price item is defined.

Note: While creating a price item or price item bundle which is available for pricing, the contract type specified in the **Default Contract Type** option type of the **C1_PRICING** feature configuration is automatically associated to the price item or price item bundle.

Associating a Parameter with a Price Item or Price Item Bundle

You can define multi parameter based pricing for a price item or price item bundle when the parameters using which you want to define the price item pricing are associated with the respective price item or price item bundle during the pricing date range. For example, a bank (from the financial services domain) may want to charge different price for the following price item depending on the return codes:

Service	Price Item	Parameter	Parameter Value	Price
SEPA Direct Debit Return	SEPADDR	Return Code (RTURNCD)	AC01	0.1\$
			AC04	0.2\$

Service	Price Item	Parameter	Parameter Value	Price
			AC06	0.3\$
			AG01	0.10\$

In such case, you need to first define a predefined parameter named Return Code where the parameter usage is set to **Price Item**). In the Return Code parameter, you must specify the above listed return codes (i.e. AC01, AC04, AC06, and AG01) as the predefined values. Then, in order to define multi parameter based pricing for the SEPADDR price item using the Return Code parameter, you must associate the Return Code parameter with the SEPADDR price item using the following specifications:

Parameter	Display Order	Mandatory (Yes or No)	Optional Priority
Return Code	10	Yes	-

Another example, a self-funded customer (from the health insurance domain) may be charged different claim based admin fees depending on the health coverage class and network type:

Service	Price Item	Health Coverage Class	Network Type	Fees
Claim Based Fees	CLBDFS	Medical	In	\$100
		Medical	Out	\$150
		Dental	In	\$50
		Dental	Out	\$75

In such case, you need to first define two predefined parameters named Health Coverage Class and Network Type where the parameter usage is set to **Price Item**). In the Health Coverage Class parameter, you must specify the above listed values (i.e. Medical and Dental) as the predefined values. And, in the Network Type parameter, you must specify the above listed values (i.e. In and Out) as the predefined values. Then, in order to define parameter based pricing for the CLBDFS price item using the Health Coverage Class and Network Type parameters, you must associate these parameters with the CLBDFS price item using the following specifications:

Parameter	Display Order	Mandatory (Yes or No)	Optional Priority
Health Coverage Class	10	Yes	-
Network Type	20	Yes	-

Prerequisites

To associate a parameter with a price item or price item bundle, you should have:

- Parameters defined in the application (where the parameter usage is set to **Price Item**)

Procedure

To associate a parameter with a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Parameters** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the parameter is associated with the price item or price item bundle.	Yes
Effective End Date	Used to specify the date till when the parameter is associated with the price item or price item bundle.	No
Parameter	<p>Used to indicate the parameter that you want to associate with the price item or price item bundle.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Parameter field. On clicking the Search icon, the Parameter Search window appears.</p> <p>In the Parameter Search window, the system allows you to search only those parameters where the parameter usage is set to Price Item.</p> <p>If you select a predefined parameter, the Add (➕) icon appears corresponding to the Parameter field. On clicking the Add icon, a grid appears where you can specify a list of predefined parameter values which are valid for the price item or price item bundle while defining its pricing. If you do not list any predefined parameter value in this grid, the system enables you to specify any predefined value of the parameter while defining the pricing for the price item or price item bundle.</p>	Yes
Business Label	Used to specify a business label for the parameter. If you specify the business label for a parameter, the business label appears throughout the application instead of the parameter name.	No
Display Order	Used to indicate the order in which the parameter and its value should appear in the pricing parameter information string across the application.	Yes
Parameter Usage	<p>Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> • Aggregation – Used when you want to use the parameter for aggregating transactions. • Pricing – Used when you want to use the parameter for aggregating transactions as well as for defining the price item pricing. 	Yes

Field Name	Field Description	Mandatory (Yes or No)
Mandatory	Used to indicate whether the parameter is mandatory while defining the price item pricing.	No
Priority	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.	Yes (Conditional)
	Note: This field is disabled when the Mandatory option is selected.	Note: This field is required when the Mandatory option is not selected.

Note:

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- Enter the required details in the **Parameters** section.
- If you want to associate more than one parameter with the price item or price item bundle, click the **Add (+)** icon and then repeat step 2.

Note:

However, if you want to remove a parameter from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the parameter. You can edit the parameter details and remove a parameter from the price item or price item bundle when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which is used for aggregation, whenever required. However, you can add a parameter which is used for pricing when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

- For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.
- Click **Save**.

The parameters are associated with the price item or price item bundle.

Note: By default, the priority of all parameters which are mandatory is set to 0.

How to define a price item or price item bundle	Defining a Price Item or Price Item Bundle on page 819
How to edit a price item or price item bundle	Editing a Price Item or Price Item Bundle on page 869
How to copy a price item or price item bundle	Copying a Price Item or Price Item Bundle on page 849
How to define the valid predefined parameter values for a price item or price item bundle	Defining the Valid Predefined Parameter Values for a Price Item or Price Item Bundle on page 830

Defining the Valid Predefined Parameter Values for a Price Item or Price Item Bundle

A predefined parameter may have hundreds of values defined in the system. But, there might be situations when only certain predefined parameter values are applicable for a price item or price item bundle while defining its pricing. In such case, you can define a set of valid predefined parameter values for a price item or price item bundle. For example, the Return Code parameter has the following predefined parameter values:

Parameter Value	Description
AC01	Account Identifier Incorrect (i.e. invalid IBAN)
AC04	Account Closed
AC06	Account Blocked
AG01	Direct Debit Forbidden for Regulatory Reasons
AG02	Operation/Transaction Code Incorrect
AM04	Insufficient Funds
AM05	Duplicate Collection
MD01	Unauthorized Transaction
MD06	Disputed Authorized Transaction

If only the MD01 and MD06 predefined parameter values are applicable for the SEPA Debit Refund (SEPADRF) price item, you can define MD01 and MD06 as the valid predefined parameter values for the SEPADRF price item. In such case, the system will allow you to define the pricing for the SEPADRF price item only using the MD01 or MD06 parameter value. However, if all the above listed predefined parameter values are applicable for the SEPA Direct Debit Return (SEPADDR) price item, you must not define the valid predefined parameter values for the SEPADDR price item. In such case, the system will allow you to define the pricing for the SEPADDR price item using any of the above listed parameter value.

Another example, the Health Coverage Class parameter has the following predefined parameter values:

Parameter Value	Description
MEDICAL	Medical
DENTAL	Dental
VISION	Vision

If only the MEDICAL and DENTAL predefined parameter values are applicable for the Claim Based Fees (CLBDFS) price item, you can define MEDICAL and DENTAL as the valid predefined parameter values for the CLBDFS price item. In such case, the system will allow you to define the pricing for the CLBDFS price item only using the MEDICAL or DENTAL parameter value. However, if all the above listed predefined parameter values are applicable for the Claim Based Fees (CLBDFS) price item, you must not define the valid predefined parameter values for the CLBDFS price item. In such case, the system will allow you to define the pricing for the CLBDFS price item using any of the above listed parameter value.

Prerequisites

To define the valid predefined parameter values for a price item or price item bundle, you should have:

- Predefined values defined for the parameter which is associated with the price item or price item bundle
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the valid predefined parameter values for a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Parameters** section appears.

2. Click the **Add** () icon in the **Parameter** column corresponding to the predefined parameter which is associated with the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.	Yes (Conditional)
	<p>Note:</p> <p>The Search () icon appears corresponding to the Parameter Value field. On clicking the Search icon, the Predefined Parameter Value Search window appears.</p> <p>On specifying the valid predefined parameter value for a price item or price item bundle, the description of the predefined parameter value appears corresponding to the Parameter Value field.</p>	<p>Note: This field is required when you are defining the valid predefined parameter values for the price item or price item bundle.</p>

3. Enter a predefined parameter value which is valid for the price item or price item bundle while defining its pricing.
4. If you want to define more than one valid predefined parameter value for the price item or price item bundle, click the **Add** () icon and then repeat step 3.

Note: However, if you want to remove a valid predefined parameter value from the price item or price item bundle, click the **Delete** () icon corresponding to the parameter value. You can remove a valid predefined parameter value from the price item or price item bundle when the parameter value is not yet used for defining the price item pricing.

5. Click **Save**.

The valid predefined parameter values are defined for the price item or price item bundle.

How to associate a parameter with a price item or price item bundle	Associating a Parameter with a Price Item or Price Item Bundle on page 826

Associating a Price Item or Price Item Bundle with a Division

You can assign a price item or price item bundle to a person or account when the price item or price item bundle is associated with the division to which the person or account belongs. For example, if the SEPA Direct Debit Return (SEPADDR) and Stop Payment (STPPMT) price items are associated with the following divisions:

Price Item	Division
SEPA Direct Debit Return (SEPADDR)	001-AL
	002-CA
	003-FL
	004-IN
Stop Payment (STPPMT)	002-CA
	003-FL
	004-IN

In such case, you can assign the SEPADDR price item to any person or account which belongs to the 001-AL, 002-CA, 003-FL, or 004-IN division. However, you can assign the STPPMT price item to any person or account which belongs to the 002-CA, 003-FL, or 004-IN division.

Another example, if the Claim Based Fees (CLBDFS) price item is associated with the following divisions:

Price Item	Division
Claim Based Fees (CLBDFS)	002-CA
	003-FL
	004-IN

In such case, you can charge the CLBDFS price item to any person or account which belongs to the 002-CA, 003-FL, or 004-IN division.

Prerequisites

To associate a price item or price item bundle with a division, you should have:

- Divisions defined in the application
- Divisions associated with the access group to which the user (i.e. who is performing this action) belongs

Procedure

To associate a price item or price item bundle with a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQIs	On clicking the Add (+) icon, you can associate an SQI with the price item or price item bundle for the division.	Not applicable
Division Characteristics	On clicking the Add (+) icon, you can define a division-specific characteristic for the price item or price item bundle.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	On clicking the Add  icon, you can define the accrual type criteria of the price item or price item bundle for the division.	Not applicable
	Note: This feature is not applicable for the health insurance business.	
Entity Hierarchy	On clicking the Add  icon, you can associate the price item or price item bundle with a hierarchy entity of an entity hierarchy relationship for the division.	Not applicable
	Note: This feature is not applicable for the health insurance business.	
Costs	On clicking the Add  icon, you can define the cost of the price item or price item bundle for the division.	Not applicable
	Note: This feature is not applicable for the health insurance business.	
Average Price Floor and Ceil Limits	On clicking the Add  icon, you can define the average price floor and ceil limits of the price item or price item bundle for the division.	Not applicable
	Note: This feature is not applicable for the health insurance business.	
Negotiability	On clicking the Add  icon, you can define the negotiability floor and ceil limits of the price item or price item bundle for the division.	No
	Note: This feature is not applicable for the health insurance business.	
Division	Used to indicate the division to which you want to associate the price item or price item bundle.	Yes (Conditional)
	Note: You can only view those divisions to which you have access in the Division list.	Note: This field is required while associating the price item or price item bundle with a division.

2. Select the division from the respective field.
3. If you want to associate the price item or price item bundle with more than one division, click the **Add**  icon and then repeat step 2.

Note: However, if you want to remove the price item or price item bundle from a division, click the **Delete**  icon corresponding to the division. You cannot remove the price item or price item bundle from a division when it is assigned to a person or account which belongs to the division.

4. Associate the SQIs with the price item or price item bundle for the required divisions.
5. Define the accrual type criteria of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business object.

6. Associate the price item or price item bundle with a hierarchy entity of an entity hierarchy relationship for the required divisions.

Note: This step is not applicable for the health insurance business object.

7. Define the cost of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business object.

8. Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business object.

9. Define the rate negotiability floor and ceil limits of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business object.

10. Define the division-specific characteristics for the price item or price item bundle. if required.

11. Click **Save**.

The price item or price item bundle is associated with the divisions.

Tip: Alternatively, you can associate a price item or price item bundle with a division using the **Division** screen. For more information, see [Associating a Price Item or Price Item Bundle with a Division](#) on page 985.

How to define a division-specific characteristic for a price item or price item bundle	Defining a Division-Specific Characteristic for a Price Item or Price Item Bundle on page 836

Associating an SQI with a Price Item or Price Item Bundle for a Division

In the transaction aggregation process, an SQI based billable charge is created for a price item or price item bundle (to which a transaction is mapped) when:

- The SQIs are associated with the price item or price item bundle for the division to which the account (i.e. for which the billable charge is created) belongs.
- The transaction aggregation rules are defined for such SQIs in the system.

Let us assume that the A1 account belongs to the 201-NJ division and the A2 account belongs to the 209-CA division. And, the Stop Payments (STPY) price item is associated with the following SQIs:

Price Item	Division	Service Quantity Identifiers (SQIs)
Stop Payments (STPY)	201-NJ	Number of Transactions (NBRTXN)
		Transaction Volume (TXNVOL)
		Transaction Amount (TXNAMT)
	209-CA	Number of Transactions (NBRTXN)
Transaction Amount (TXNAMT)		

Now, when an SQI based billable charge is created for the A1 account through the transaction aggregation process, the system calculates the following SQIs using the respective transaction aggregation rule:

- Number of Transactions (NBRTXN)
- Transaction Volume (TXNVOL)
- Transaction Amount (TXNAMT)

And, when an SQI based billable charge is created for the A2 account through the transaction aggregation process, the system calculates the following SQIs using the respective transaction aggregation rule:

- Number of Transactions (NBRTXN)
- Transaction Amount (TXNAMT)

Another example, you can calculate the enrollment based fees for a self-funded customer based on Per Subscriber Per Month or Per Member Per Month for the 201-NJ and 209-CA divisions. Therefore, you need to associate two SQIs — Subscriber Count and Member Count with the Enrollment Based Fees (ERBDFS) price item:

Price Item	Division	Service Quantity Identifiers (SQIs)
Enrollment Based Fees (ERBDFS)	201-NJ	Subscriber Count (SUBCNT)
		Member Count (MEMCNT)
	209-CA	Subscriber Count (SUBCNT)
		Member Count (MEMCNT)

Prerequisites

To associate an SQI with a price item or price item bundle for a division, you should have:

- Service Quantity Identifiers (SQIs) defined in the application

- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To associate an SQI with a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add** (⊕) icon in the **SQIs** column corresponding to the division for which you want to associate SQIs with the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQI	Used to indicate the SQI that you want to associate with the price item or price item bundle for the division.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to the SQI field. On clicking the Search icon, the Service Quantity Identifier Search window appears.</p> <p>On specifying the SQI, the description of the SQI appears corresponding to the SQI field.</p>	<p>Note: This field is required while associating an SQI with the price item or price item bundle for the division.</p>

3. Enter the required details in the **SQIs** grid.
4. If you want to associate more than one SQI with the price item or price item bundle for the division, click the **Add** (⊕) icon and then repeat step 3.

Note: However, if you want to remove an SQI from the price item or price item bundle for the division, click the **Delete** (🗑) icon corresponding to the SQI. You cannot remove an SQI from the price item or price item bundle for the division when an SQI based billable charge is created using the SQI.

5. Click **Save**.

The SQIs are associated with the price item or price item bundle for the division.

Defining a Division-Specific Characteristic for a Price Item or Price Item Bundle

Prerequisites

To define a division-specific characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Division/Price Item Combination**)
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define a division-specific characteristic for a price item or price item bundle:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add** (+) icon in the **Division Characteristics** column corresponding to the division for which you want to define division-specific price item or price item bundle characteristics.

The following fields appear in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the price item or price item bundle characteristic is effective for the division.	Yes (Conditional)
		Note: This field is required while defining a division-specific characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Division/Price Item Combination .	Yes (Conditional)
		Note: This field is required while defining a division-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type. Note: If you select a predefined characteristic type, the Search (Q) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Yes (Conditional)
		Note: This field is required while defining a division-specific characteristic for the price item or price item bundle.

3. Enter the required details in the **Divisions** section.
4. If you want to define more than one division-specific characteristic for the price item or price item bundle, click the **Add** (+) icon and then repeat step 3.

Note: However, if you want to remove a division-specific characteristic from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the characteristic.

5. Click **Save**.

The division-specific characteristics are defined for the price item or price item bundle.

Defining the Accrual Type Criteria of a Price Item or Price Item Bundle for a Division

Note: This topic is not applicable for the health insurance business.

The accrual type criteria of a price item or price item bundle is referred when the accrual is calculated for an account using an accrual type where the **Price Item Accrual Criteria Required** option is selected. The system behaves in the following manner when the **Price Item Accrual Criteria Required** option is selected in the accrual type:

If the accrual type criteria of a price item or price item bundle is set to...	Then...
Actual	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> The price item is not excluded in the accrual type. The accrual is calculated for an account using the accrual type where the accrual criteria is set to Actual.
Historical	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> The price item is not excluded in the accrual type. The accrual is calculated for an account using the accrual type where the accrual criteria is set to Historical.
Not Applicable	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> The price item is not excluded in the accrual type The accrual is calculated for an account using the accrual type where the accrual criteria is set to Actual or Historical.

The system enables you to define accrual type criteria of a price item or price item bundle for each division. For example, you can maintain different accrual type criteria of the Stop Payments (STPY) price item for each division as shown below:

Price Item	Division	Accrual Type Criteria
Stop Payments (STPY)	201-NJ	Actual
	209-CA	Historical
	210-FL	Not Applicable
	215-OX	Actual
	220-AL	Historical
	223-NJ	Not Applicable

Prerequisites

To define the accrual type criteria of a price item or price item bundle for a division, you should have:

- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the accrual type criteria of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Accrual Type Criteria** column corresponding to the division for which you want to define accrual type criteria of the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	Used to indicate whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: <ul style="list-style-type: none"> • Actual - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to Actual. • Historical - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to Historical. • Not Applicable - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to Actual or Historical. 	Yes (Conditional)
	Note: By default, the Not Applicable option is selected.	Note: This field is required while defining the accrual type criteria of the price item or price item bundle for the division.

3. Select the accrual type criteria from the respective field.
4. Click **Save**.

The accrual type criteria of the price item or price item bundle is defined for the division.

Associating a Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of a Division

Note: This topic is not applicable for the health insurance business.

Once you design the structure of an entity hierarchy relationship, you can associate a price item or price item bundle with a hierarchy entity at any level in the entity hierarchy relationship. You can associate a price item or price item bundle with a hierarchy entity only from the **Price Item** screen. The system enables you to define division-specific hierarchy for a price item or price item bundle. Therefore, while associating a price item or price item bundle with a hierarchy entity, you can select a hierarchy entity from any entity hierarchy relationship which is created for the division. However, the system checks whether the association date range is within the entity hierarchy relationship date range.

For example, you can associate the ACH Transfer (ACHTRN) price item with the Payments hierarchy entity in the Cash Management entity hierarchy relationship as shown below:

```
Cash Management
  Payments
    ACH Transfer
```

Associating a price item or price item bundle with a hierarchy entity does not have any impact on the billing module. At present, the price item hierarchy is only displayed in the Deal Modelling and Simulation module.

Prerequisites

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division, you should have:

- Entity hierarchy relationships defined for the required divisions
- Hierarchy entities included at the required levels in the entity hierarchy relationship
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Entity Hierarchy** column corresponding to the division for which you want to define price item or price item bundle hierarchy.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy	Used to indicate the entity hierarchy relationship in which you want to include the price item or price item bundle.	Yes (Conditional)
	Note: The Search  icon appears corresponding to the Hierarchy field. On clicking the Search icon, the Hierarchy Search window appears.	Note: This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
Parent Entity	Used to indicate the hierarchy entity to which you want to associate the price item or price item bundle.	Yes (Conditional)
	Note: The list appears when the entity hierarchy relationship is specified in the Hierarchy field. It contains the hierarchy entities which are included at the root and subsequent levels in the entity hierarchy relationship.	Note: This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship.	Yes (Conditional) Note: This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
	Note: The start date cannot be later than the end date. The start date cannot be earlier than the entity hierarchy relationship start date.	
End Date	Used to specify the date till when the price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship.	No
	Note: The end date cannot be earlier than the start date. The end date cannot be later than the entity hierarchy relationship end date.	

- Enter the required details in the **Entity Hierarchy** grid.
- If you want to associate the price item or price item bundle to more the one hierarchy entity in the same or different entity hierarchy relationship, click the **Add (+)** icon and then repeat step 3.

Note:

You cannot associate the price item or price item bundle to multiple hierarchy entities in the same or different entity hierarchy relationship for the same or overlapping date range.

However, if you want to disassociate the price item or price item bundle from a hierarchy entity of an entity hierarchy relationship, click the **Delete (🗑)** icon corresponding to the hierarchy and parent entity combination.

- Click **Save**.

The price item or price item bundle is associated with a hierarchy entity in an entity hierarchy relationship of the division.

Defining the Cost of a Price Item or Price Item Bundle for a Division

Note: This topic is not applicable for the health insurance business.

Oracle Revenue Management and Billing enables you to maintain the different types of fixed and variable costs of a price item or price item bundle for each division. The system uses the fixed and variable cost information while calculating the cost of a price item or price item bundle in a deal. It considers the cost which is defined for the division to which the account or person belongs. It derives the fixed and/or variable cost which is effective on the deal start date.

The system enables you to maintain the following types of costs in different currencies:

- Additional Fixed Cost
- Additional Variable Cost
- Fixed Third Party Cost
- Fixed Internal Cost
- Variable Internal Cost
- Variable Third Party Cost

While calculating the cost of a price item or price item bundle in a deal, the system converts the cost in the deal currency when the cost currency is different from the deal currency. As the name implies, the fixed cost is an expense that does not change with the increase or decrease in the price item volume or commitments. Therefore, the total fixed cost is equal to the sum of fixed cost which is effective on the deal start date for the division. However, the variable cost is an expense that change with the increase or decrease in the price item volume or commitments. Therefore, the total variable cost is equal to the sum of multiplication of variable cost (which is effective on the deal start date for the division) and price item volume or commitments.

Let us understand this with the help of an example:

Price Item	Division	Cost Type	Cost Amount
PI1	201-NJ	Fixed Third Party Cost	\$5
		Fixed Internal Cost	\$3
		Additional Fixed Cost	\$1
		Variable Third Party Cost	\$0.1
		Variable Internal Cost	\$0.65
		Additional Variable Cost	\$0.5

If a deal is created for a person who belongs to the 201-NJ division and if the PI1 price item is assigned to the person in the deal and if the original volume and proposed commitment of the PI1 price item in the deal is set to 100 and 200, respectively, the system calculates the cost of the PI1 price item in the following manner:

Original Cost	
Total Fixed Cost	$\$5 + \$3 + \$1 = \9
Total Variable Cost	$(100 * \$0.1) + (100 * \$0.65) + (100 * \$0.5) = \$10 + \$65 + \$50 = \$125$
Total Cost	$\$9 + \$125 = \$134$
Proposed Cost	
Total Fixed Cost	$\$5 + \$3 + \$1 = \9

Total Variable Cost	$(200 * \$0.1) + (200 * \$0.65) + (200 * \$0.5) = \$20 + \$130 + \$100 = \$250$
Total Cost	$\$9 + \$250 = \$259$

Here, the assumption is the deal and cost currency is same (i.e. USD). The system then uses the total original and proposed costs for calculating the original and proposed profitability of the deal.

Prerequisites

To define the cost of a price item or price item bundle for a division, you should have:

- Currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the cost of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add** (⊕) icon in the **Costs** column corresponding to the division for which you want to define the costs of the price item or price item bundle.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the cost of the price item or price item bundle is effective for the division.	Yes (Conditional) Note: This field is required while defining the cost of the price item or price item bundle for the division.
Cost Type	Used to indicate the type of cost incurred in the division for the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> • Additional Fixed Cost • Additional Variable Cost • Fixed Third Party Cost • Fixed Internal Cost • Variable Internal Cost • Variable Third Party Cost 	Yes (Conditional) Note: This field is required while defining the cost of the price item or price item bundle for the division.
Cost Value	Used to specify the cost amount.	Yes (Conditional) Note: This field is required while defining the cost of the price item or price item bundle for the division.

Field Name	Field Description	Mandatory (Yes or No)
Cost Currency	Used to specify the currency in which you want to define the cost. The system does currency conversion when the cost currency is different from the deal currency.	Yes (Conditional)
	Note: The list includes only those currencies which are already defined in the system.	Note: This field is required while defining the cost of the price item or price item bundle for the division.

- Enter the required details in the **Costs** grid.
- If you want to define more than one cost of the price item or price item bundle for the division, click the **Add (+)** icon and then repeat step 3.

Note: However, if you want to remove the cost of the price item or price item bundle from the division, click the **Delete (🗑)** icon corresponding to the cost.

- Click **Save**.

The cost of the price item or price item bundle is defined for the division.

Defining the Average Price Floor and Ceil Values of a Price Item or Price Item Bundle for a Division

Note: This topic is not applicable for the health insurance business.

Oracle Revenue Management and Billing enables you to define the average price floor and ceil limits of a price item or price item bundle for each division. Before you define the average price floor and ceil limits, you need to specify the floor and ceiling type for the price item or price item bundle. At present, the system supports the following floor and ceiling types for a price item or price item bundle:

- Absolute Value Range

Once the floor and ceiling type of a price item or price item bundle is set to **Absolute Value Range**, you can define the average price floor and ceil limits of the price item or price item bundle for the required divisions. The system enables you to define different average price floor and ceil limits for different To Do roles. The system uses the average price floor and ceil limits while approving the average price of the price item or price item bundle in a deal. The deal creator or an approver at any level in the division or deal approval hierarchy can approve the average price of a price item or price item bundle when the average price is within the floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the average price of the P1 price item in a deal is \$25 and the floor and ceil limits of the deal creator's To Do role is set to \$10-\$15, then the deal creator cannot approve the average price of the P1 price item in the deal.

If the average price floor and ceil limits is not defined for the deal creator's or approver's To Do role, the status of the price item or price item bundle in the deal is changed to **Error**. If the average price floor and ceil limits is defined for the deal creator's or approver's To Do role, but the average price of the price item or price item bundle is not within the floor and ceil limits, the status of the price item or price item bundle in the deal is changed to **Pending for Approval**. However, if the average price floor and ceil limits is defined for the deal creator's or approver's To Do role and the

average price of the price item or price item bundle is within the floor and ceil limits, the status of the price item or price item bundle in the deal is changed to **Approved**.

Here, you can also define the average price floor and ceil limits for the price item manager's To Do role. Note that the price item manager can approve the average price of the price item or price item bundle in a deal when the average price of the price item or price item bundle is within the floor and ceil limits of the price item manager's To Do role.

- Spread Amount

Once the average price floor and ceil type of a price item or price item bundle is set to **Spread Amount**, the system calculates the average price floor and ceil limits based on the average price and spread amount. The system calculates the average price of the price item or price item bundle. The system searches for the eligible price list in the price assignments assigned to the To Do roles. If a flat pricing is defined in the price assignment, then the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

Average Price = Price Item Revenue/Price Item Commitments

The system then considers the spread amount specified for the relationship manager's To Do role in the price item. Using the spread amount and average price, the system calculates the average price floor and ceil limit values. The deal creator or an approver at any level in the division or deal approval hierarchy can approve the average price of a price item or price item bundle when the average price is within the floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the spread amount set by you is 10 and the system calculated average price of the P1 price item in a deal is \$25 then the system sets the floor and ceil limits of the deal creator's To Do role to \$15-\$35. In this case the deal creator can approve the average price of the P1 price item in the deal.

The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

- Spread Percentage

Once the average price floor and ceil type of a price item is set to the **Spread Percentage**, the system calculates the average price floor and ceil limits based on the average price and spread percentage. The system calculates the average price of the price item or price item bundle. The system searches for the eligible price list in the price assignments assigned to the To Do roles. If a flat pricing is defined in the price assignment, then the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

Average Price = Price Item Revenue/Price Item Commitments

The system then considers the spread parentage specified for the relationship manager's To Do role in the price item. Using the spread percentage and average price, the system calculates the average price floor and ceil values. The deal creator or an approver at any level in the division or approver system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the spread percentage set by you is 10 and the system calculated average price of the P1 price item in a deal is \$50 then the system sets the floor and ceil limits of the deal creator's To Do role to \$45-\$55. In this case the deal creator can approve the average price of the P1 price item in the deal.

The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

Prerequisites

To define the average price floor and ceil limits of a price item or price item bundle for a division, you should have:

- To Do roles and currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the average price floor and ceil limits of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Average Price Floor and Ceil Limits** column corresponding to the division for which you want to define the average price floor and ceil limits of the price item or price item bundle.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Role	Used to indicate that users with the specified To Do role can approve the average price of the price item or price item bundle in a deal when it is within the specified floor and ceil limits.	Yes (Conditional)
	<p>Note:</p> <p>The Search  icon appears corresponding to the To Do Role field. On clicking the Search icon, the To Do Role Search window appears.</p> <p>On specifying the To Do role, the description of the To Do role appears corresponding to the To Do Role field.</p>	<p>Note: This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Floor Value	Used to specify the floor (i.e. lower) limit for the To Do role. The users who belong to the To Do role cannot approve the average price of the price item or price item bundle when it is below the floor limit.	Yes (Conditional)
	<p>Note: The floor value cannot be greater than the ceil value.</p>	<p>Note: This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Ceil Value	Used to specify the ceil (i.e. upper) limit for the To Do role. The users who belong to the To Do role cannot approve the average price of the price item or price item bundle when it is above the ceil limit.	Yes (Conditional)
	<p>Note: The ceil value cannot be lower than the floor value.</p>	<p>Note: This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Spread Amount	Used to specify the spread amount specified while defining a price item or price item bundle or assigned to a To Do role.	Yes (Conditional)
	<p>Note: This column appears when you select the Spread Amount option from the Average Price Floor and Ceil Type list for a price item or price item bundle.</p>	<p>Note: This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>

Field Name	Field Description	Mandatory (Yes or No)
Spread Percentage	Used to specify the spread percentage specified while defining a price item or price item bundle or assigned to a To Do role.	Yes (Conditional)
	Note: This column appears only when you select the Spread Percentage option from the Average Price Floor and Ceil Type list for a price item or price item bundle.	Note: This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.
Floor and Ceil Currency	Used to indicate the currency in which you want to define the floor and ceil limits. The system does the currency conversion when the pricing currency is different from the floor and ceil currency.	Yes (Conditional)
	Note: The list includes only those currencies which are already defined in the system.	Note: This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.

- Enter the required details in the **Average Price Floor and Ceil Limits** grid.
- If you want to define the average price floor and ceil limits for more than one To Do role, click the **Add (+)** icon and then repeat step 3.

Note: However, if you want to remove the average price floor and ceil limits of a To Do role from the division, click the **Delete** (🗑️) icon corresponding to the To Do role.

- Click **Save**.

The average price floor and ceil limits of the price item or price item bundle are defined for the division.

Defining a Characteristic for a Price Item or Price Item Bundle

Prerequisites

To define a characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

Procedure

To define a characteristic for a price item or price item bundle:

- Click the **Price Item Characteristics** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Price Item Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	Yes (Conditional)
		Note: This field is required while defining a characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	Note: The list includes only those characteristic types where the characteristic entity is set to Price Item .	Note: This field is required while defining a characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p>Note:</p> <p>If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.</p>	Note: This field is required while defining a characteristic for the price item or price item bundle.

- Enter the required details in the **Price Item Characteristics** section.
- If you want to define more than one characteristic for the price item or price item bundle, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price item or price item bundle.

Copying a Price Item or Price Item Bundle

Instead of creating a price item or price item bundle from scratch, you can create a new price item or price item bundle using an existing price item or price item bundle. This is possible through copying a price item or price item bundle.

On copying a price item or price item bundle, the details including the following are copied to the new price item or price item bundle:

- Parameters and Divisions associated with the price item or price item bundle
- SQIs associated with the price item or price item bundle for the divisions
- Division-specific characteristics of the price item or price item bundle
- Accrual type criteria of the price item or price item bundle for the divisions
- Hierarchy entity to which the price item or price item bundle is associated in the divisions
- Cost of the price item or price item bundle for the divisions
- Average price floor and ceil limits of the price item or price item bundle for the divisions
- Negotiability floor and ceil values of the price item or price item bundle for the required divisions

You can then edit the details, if required.

Prerequisites

To copy a price item or price item bundle, you should have:

- Price item or price item bundle (whose copy you want to create) defined in the application
- Price item or price item bundle (whose copy you want to create) associated with the division to which the user (i.e. who is performing this action) belongs
- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1_PRICING** feature configuration

Procedure

To copy a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the price item or price item bundle whose copy you want to create.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

Note:

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
 - Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
 - Define the accrual type criteria of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

Note: This step is not applicable for the health insurance business.

- Define the cost of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the average price floor and ceil limits of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the negotiability floor and ceil values of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the division-specific characteristics for the price item or price item bundle

- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> • Pricing - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system. <p>Note: This option is not applicable for the health insurance business.</p> <ul style="list-style-type: none"> • Pricing and Billing - Used when you want to define pricing and create charges for the price item or price item bundle in the system. 	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> • Rate - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items. <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p>Note: This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> • Fees - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item. <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p>Note: This field appears when the Pricing option is selected from the Price Item Usage list. You cannot create a price item bundle when the Pricing option is selected from the Price Item Usage list and Rate option is selected from the Price Item Type list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to Fees. Therefore, this field does not appear when the Pricing and Billing option is selected from the Price Item Usage list.</p> </div>	Yes
Bundle	<p>Used to indicate whether you want to create a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p>Note: This field is not applicable for the health insurance business.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle Type	<p>Used to indicate the type of the price item bundle. If the Pricing and Billing option is selected from the Price Item Usage list, the valid values are:</p> <ul style="list-style-type: none"> • <i>Regular Bundle</i> • <i>Phantom Bundle</i> • <i>Ratio Bundle</i> <p>However, if the Pricing option is selected from the Price Item Usage list and the Fees option is selected from the Price Item Type list, you can only define a regular price item bundle. Therefore, by default, the value is set to Regular.</p>	Yes (Conditional)
	<p>Note:</p> <p>This field appears when the Yes option is selected from the Bundle list.</p> <p>This field is enabled when the Pricing and Billing option is selected from the Price Item Usage list and the Yes option is selected from the Bundle list.</p> <p>You cannot define a price item bundle when the Pricing option is selected from the Price Item Usage list and Rate option is selected from the Price Item Type list.</p> <p>This field is not applicable for the health insurance business.</p>	<p>Note: This field is required when you are creating a price item bundle.</p>
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No 	Yes
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p>	Yes
	<p>Note:</p> <p>This field appears when the Pricing and Billing option is selected from the Price Item Usage list.</p> <p>The Search (🔍) icon appears corresponding to the Contract Type field. On clicking the Search icon, the Contract Type Search window appears.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the Send Price Items for Approval button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Price Item Manager To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the Price Item Manager To Do Type field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p> <p>Note:</p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required when the price item manager To Do type is specified for the price item or price item bundle.</p>

Field Name	Field Description	Mandatory (Yes or No)
Floor and Ceiling Type	<p>Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:</p> <ul style="list-style-type: none"> • Absolute Value Range - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$. • Spread Amount - Used when you want to define the average floor and ceil limits based on the spread amount. • Spread Percentage – Used when you want to define the average floor and ceil limits based on the spread percentage. 	Yes (Conditional)
	<p>Note:</p> <ul style="list-style-type: none"> • In case of Spread Amount and Spread Percentage options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived. • This field is not applicable for the health insurance business. 	<p>Note: This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.</p>
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal management module.	No

Field Name	Field Description	Mandatory (Yes or No)
Variable Price	Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module.	No
	<p>Note:</p> <p>If the Variable Price option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.</p> <p>However, if the Variable Price option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.</p>	

3. Enter the required details in the **Main** section.

4. Associate, edit, or disassociate parameters from the price item or price item bundle, if required.

Note: For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.

5. Associate or disassociate the price item or price item bundle from the required divisions.

6. Associate or disassociate the SQIs from the price item or price item bundle for the required divisions.

7. Define, edit, or remove the accrual type criteria of the price item or price item bundle from the required divisions.

Note: This step is not applicable for the health insurance business.

8. Associate or disassociate the price item or price item bundle from a hierarchy entity in an entity hierarchy relationship of the required divisions.

Note: This step is not applicable for the health insurance business.

9. Define, edit, or remove the cost of the price item or price item bundle from the required divisions.

Note: This step is not applicable for the health insurance business.

10. Define, edit, or remove the average price floor and ceil limits of the price item or price item bundle from the required divisions.

Note: This step is not applicable for the health insurance business.

11. Define, edit or remove the negotiability floor and ceil values of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business.

12. Define, edit, or remove the division-specific characteristics from the price item or price item bundle. if required.

13. Define, edit, or remove characteristics of the price item or price item bundle, if required.

14. Click **Save**.

The new price item is defined.

Note:

While creating a price item or price item bundle which is available for pricing, the contract type specified in the **Default Contract Type** option type of the **C1_PRICING** feature configuration is automatically associated to the price item or price item bundle.

The system allows you to add a price item to the new price item bundle when:

- Price item and price item bundle (whose copy you are creating) are associated to the same contract type.
- Price item is associated with the division to which the price item bundle (whose copy you are creating) is associated.
- Another price item bundle with the same price item, relationship type, and date range combination does not exist in the system.

Viewing the Price Item or Price Item Bundle Details

Procedure

To view the details of a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price item or price item bundle whose details you want to view.

The **Price Item** screen appears. It contains the following zones:

- *Price Item* on page 859
- *Price Item Characteristics*
- *Parameters* on page 862
- *Predefined Parameter Values for Price Item* on page 862
- *Divisions* on page 863
- *Division-Specific SQIs for Price Item* on page 863
- *Division-Specific Characteristics for Price Item* on page 864
- *Division-Specific Accrual Type Criteria for Price Item* on page 864
- *Division-Specific Hierarchy for Price Item* on page 865
- *Division-Specific Cost for Price Item* on page 866
- *Division-Specific Average Price Floor and Ceil Values for Price Item* on page 867
- *Division-Specific Negotiability Floor and Ceil Values for Price Item*
- *Price Item Relationship* on page 868

3. View the basic details of the price item or price item bundle in the **Price Item** zone.
4. View the characteristics of the price item or price item bundle in the **Price Item Characteristics** zone.
5. View the parameters associated with the price item or price item bundle in the **Parameters** zone.
6. View the valid predefined parameter values of the price item or price item bundle in the **Predefined Parameter Values for Price Item** zone.
7. View the divisions to which the price item or price item bundle is associated in the **Divisions** zone.
8. View the SQIs associated with the price item or price item bundle for a division in the **Division-Specific SQIs for Price Item** zone.
9. View the division-specific characteristics of the price item or price item bundle in the **Division-Specific Characteristics for Price Item** zone.
10. View the accrual type criteria of the price item or price item bundle for a division in the **Division-Specific Accrual Type Criteria for Price Item** zone.

Note: This step is not applicable for the health insurance business.

11. View the hierarchy entity to which the price item or price item bundle is associated in a division in the **Division-Specific Hierarchy for Price Item** zone.

Note: This step is not applicable for the health insurance business.

12. View the cost of the price item or price item bundle for a division in the **Division-Specific Cost for Price Item** zone.

Note: This step is not applicable for the health insurance business.

13. View the average price floor and ceil limits of the price item or price item bundle for a division in the **Division-Specific Floor and Ceil Values for Price Item** zone.

Note: This step is not applicable for the health insurance business.

14. View the negotiability floor and ceil values of the price item or price item bundle for a division in the **Division-Specific Negotiability Floor and Ceil Values for Price Item** zone.

Note: This step is not applicable for the health insurance business.

15. View the price items or price item bundles related to the parent price item or price item bundle in the **Price Item Relationship** zone.

Note: This step is not applicable for the health insurance business.

Price Item

The **Price Item** zone displays the details of the price item or price item bundle. It contains the following sections:

- **Main** – Displays basic information about the price item or price item bundle. It contains the following fields:

Field Name	Field Description
Price Item	Displays the price item or price item bundle.
Description	Displays the description of the price item or price item bundle.
Price Item Usage	Indicates whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> • Pricing • Pricing and Billing
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> • Rate • Fees
	Note: This field appears when the Pricing option is selected from the Price Item Usage list.
Bundle	Indicates whether the price item is a bundle. The valid values are: <ul style="list-style-type: none"> • Yes • No
Bundle Type	Indicates the type of the price item bundle. The valid values are: <ul style="list-style-type: none"> • Phantom • Ratio • Regular
	Note: This field appears when the Yes option is selected from the Bundle list.
Global Price List	Indicates whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> • Yes • No
Contract Type	Displays the contract type to which the price item or price item bundle is associated.
Price Item Manager To Do Type	Indicates the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the Send Price Items for Approval button) to approve the average price for the price item or price item bundle offered in a deal.
	Note: It has a link. On clicking the link, the To Do Type screen appears where you can view the details of the respective To Do type.

Field Name	Field Description
Price Item Manager To Do Role	<p>Indicates that users with the specified To Do role can approve the average price of the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits of the To Do role.</p> <p>Note: It has a link. On clicking the link, the To Do Role screen appears where you can view the details of the respective To Do role.</p>
Average Price Floor and Ceil Type	<p>Indicates the manner in which you want to define the average price floor and ceil limits of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> • Absolute Value Range • Spread Amount • Spread Percentage
Sort Sequence	Displays the sequence in which the price item appears in the price item hierarchy of the deal management module.
Variable Price	<p>Indicates whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module.</p> <p>Note:</p> <p>If the Variable Price option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.</p> <p>However, if the Variable Price option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.</p>

- **Record Actions** – The **Record Actions** section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price item or price item bundle.

- **Record Information** – The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	<p>Indicates the business object using which the price item or price item bundle is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p>Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.</p>

Parameters

The **Parameters** zone lists the parameters which are associated with the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the parameter is associated with the price item or price item bundle.
Effective End Date	Displays the date till when the parameter is associated with the price item or price item bundle.
Parameter	Indicates the parameter which is associated with the price item or price item bundle. Note: It has a link. On clicking the link, the Parameter screen appears where you can view the details of the respective parameter.
Business Label	Displays the business label of the parameter.
Display Order	Indicates the order in which the parameter and its value should appear in the pricing parameter information string across the application.
Parameter Usage	Indicates whether you can use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"> • Aggregation • Pricing
Mandatory	Indicates whether the parameter is mandatory while defining the price item pricing.
Priority	Indicates the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.

On clicking the **Broadcast** () icon corresponding to a parameter, the **Predefined Parameter Values for Price Item** zone appears where you can view the valid predefined parameter values of the price item or price item bundle.

Division-Specific Hierarchy for Price Item

Note: This topic is not applicable for the health insurance business.

The **Division-Specific Hierarchy for Price Item** zone lists the following in a tree structure:

- Information string of the hierarchy entity at the first level in the entity hierarchy relationship
- Information string of the hierarchy entities at the subsequent levels in the entity hierarchy relationship
- Information string of the price items which are associated with the hierarchy entities at different levels in the entity hierarchy relationship

For example,

Here, the Cash Management, US (at the first level), Payments, US (at the second level), and Statements, US (at the second level) are the hierarchy entity nodes. And, the ACH Payment, ACH Return, ACH Reversal, Mini Statement, and Yearly Statement are the price item nodes.

Each node in the tree has a link. If you click the link on the hierarchy entity node, the **Hierarchy Entity** screen appears where you can view the details of the respective hierarchy entity. However, if you click the link on the price item node, the **Price Item** screen appears where you can view the details of the respective price item.

It contains the following field:

Field Name	Field Description
Hierarchy	Displays the entity hierarchy relationship code.

In addition, it contains the following buttons:

Button Name	Button Description
Expand All	Used to expand all nodes at once in the entity hierarchy relationship.
Collapse All	Used to collapse all nodes at once in the entity hierarchy relationship.

By default, the **Division-Specific Hierarchy for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** () icon corresponding to a division in the **Divisions** zone.

Price Item Relationship

Note: This topic is not applicable for the health insurance business.

The **Price Item Relationship** zone lists the price items or price item bundles which are associated with the parent price item or added to the price item bundle. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle.
	Note: It has a link. On clicking the link, the Price Item screen appears where you can view the details of the respective price item or price item bundle.
Effective Start Date	Displays the date from when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Effective End Date	Displays the date till when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Relationship Type	Indicates how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: <ul style="list-style-type: none"> • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group
Bundle Type	Indicates the type of the price item bundle. The valid values are: <ul style="list-style-type: none"> • Phantom • Ratio • Regular
	Note: The data appears in this column when the associated price item is a bundle.
Price Item Parameters	Displays the parameters and their values based on which you want to determine pricing for the price item or price item bundle.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Price Item**, **Description**, **Effective Start Date**, and **Relationship Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

You can associate or disassociate a price item or price item bundle from a parent price item and add or remove a price item or price item bundle from a price item bundle by clicking the **Add/Edit** link in the upper right corner of this zone.

Editing a Price Item or Price Item Bundle

Prerequisites

To edit a price item or price item bundle, you should have:

- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1_PRICING** feature configuration

Procedure

To edit a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price item or price item bundle whose details you want to edit.

The **Price Item** screen appears.

3. Click the **Edit** button in the **Price Item** zone.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

Note:

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
 - Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
 - Define the accrual type criteria of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

 - Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

Note: This step is not applicable for the health insurance business.

 - Define the cost of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

 - Define the average price floor and ceil limits of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

 - Define the negotiability floor and ceil values of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

 - Define the division-specific characteristics for the price item or price item bundle
- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Displays the price item or price item bundle.	Not applicable
Description	Used to specify the description for the price item or price item bundle.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> • Pricing - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system. <div data-bbox="699 468 1157 548" style="border: 1px solid black; padding: 2px;"> <p>Note: This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> • Pricing and Billing - Used when you want to define pricing and create charges for the price item or price item bundle in the system. <div data-bbox="699 716 1157 888" style="border: 1px solid black; padding: 2px;"> <p>Note: You can change the price item usage of a price item or price item bundle from Pricing to Pricing and Billing. But, you cannot change the price item usage of a price item or price item bundle from Pricing and Billing to Pricing.</p> </div>	Yes
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> • Rate - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items. <div data-bbox="699 1171 1157 1251" style="border: 1px solid black; padding: 2px;"> <p>Note: This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> • Fees - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item. <div data-bbox="699 1419 1157 1913" style="border: 1px solid black; padding: 2px;"> <p>Note: This field appears when the Pricing option is selected from the Price Item Usage list. You cannot create a price item bundle when the Pricing option is selected from the Price Item Usage list and Rate option is selected from the Price Item Type list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to Fees. Therefore, this field does not appear when the Pricing and Billing option is selected from the Price Item Usage list.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle	Used to indicate whether you want to create a price item bundle. The valid values are: <ul style="list-style-type: none"> • Yes • No 	Yes
	Note: This field is not applicable for the health insurance business.	
Bundle Type	Used to indicate the type of the price item bundle. If the Pricing and Billing option is selected from the Price Item Usage list, the valid values are: <ul style="list-style-type: none"> • <i>Regular Bundle</i> • <i>Phantom Bundle</i> • <i>Ratio Bundle</i> <p>However, if the Pricing option is selected from the Price Item Usage list and the Fees option is selected from the Price Item Type list, you can only define a regular price item bundle. Therefore, by default, the value is set to Regular.</p>	Yes (Conditional)
	<p>Note:</p> <p>This field appears when the Yes option is selected from the Bundle list.</p> <p>This field is enabled when the Pricing and Billing option is selected from the Price Item Usage list and the Yes option is selected from the Bundle list.</p> <p>You cannot define a price item bundle when the Pricing option is selected from the Price Item Usage list and Rate option is selected from the Price Item Type list.</p> <p>This field is not applicable for the health insurance business.</p>	Note: This field is required when you are creating a price item bundle.
Global Price List	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> • Yes • No 	Yes

Field Name	Field Description	Mandatory (Yes or No)
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p> <p>Note:</p> <p>This field appears when the Pricing and Billing option is selected from the Price Item Usage list.</p> <p>The Search (🔍) icon appears corresponding to the Contract Type field. On clicking the Search icon, the Contract Type Search window appears.</p>	Yes
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the Send Price Items for Approval button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Price Item Manager To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the Price Item Manager To Do Type field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p> <p>Note:</p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p>Note: This field is required when the price item manager To Do type is specified for the price item or price item bundle.</p>

Field Name	Field Description	Mandatory (Yes or No)
Average Price Floor and Ceil Type	<p>Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:</p> <ul style="list-style-type: none"> • Absolute Value Range - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$. • Spread Amount - Used when you want to define the average floor and ceil limits based on the spread amount. • Spread Percentage – Used when you want to define the average floor and ceil limits based on the spread percentage. 	Yes (Conditional)
	<p>Note:</p> <ul style="list-style-type: none"> • In case of Spread Amount and Spread Percentage options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived. • This field is not applicable for the health insurance business. 	<p>Note: This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.</p>
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal management module.	No

Field Name	Field Description	Mandatory (Yes or No)
Variable Price	Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module.	No
	<p>Note:</p> <p>If the Variable Price option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.</p> <p>However, if the Variable Price option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.</p>	

4. Modify the required details in the **Main** section.
5. Associate, edit, or disassociate parameters from the price item or price item bundle, if required.

Note:

You can edit the parameter details and remove a parameter from the price item or price item bundle when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which is used for aggregation, whenever required. However, you can add a parameter which is used for pricing when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.

6. Associate or disassociate the price item or price item bundle from the divisions, if required.

Note: If the price item or price item bundle is associated to a division to which you do not have access, then the corresponding row in the **Divisions** section is grayed out.

7. Associate or disassociate the SQIs from the price item or price item bundle for the required divisions.
8. Define, edit, or remove the accrual type criteria of the price item or price item bundle from the required divisions.

Note: This step is not applicable for the health insurance business.

9. Associate or disassociate the price item or price item bundle from a hierarchy entity in an entity hierarchy relationship of the required divisions.

Note: This step is not applicable for the health insurance business.

10. Define, edit, or remove the cost of the price item or price item bundle from the required divisions.

Note: This step is not applicable for the health insurance business.

11. Define, edit, or remove the average price floor and ceil limits of the price item or price item bundle from the required divisions.

Note: This step is not applicable for the health insurance business.

12. Define, edit or remove the rate negotiability floor and ceil values of the price item or price item bundle for the required divisions.

Note: This step is not applicable for the health insurance business.

13. Define, edit, or remove the division-specific characteristics from the price item or price item bundle. if required.

14. Define, edit, or remove characteristics of the price item or price item bundle, if required.

15. Click **Save**.

The changes made to the price item or price item bundle are saved.

Price List

A price list allows you to define standard prices for a group of price items. In other words, a price list is a rate card for price items or services which are offered to the accounts or persons. You can create more than one price list. For example, you can create a price list for large, medium-sized, and small customers. You can also create a set of price lists for different regions. You can define two types of price lists — **Standard** and **Promotional**. You can also set eligibility criteria for the price list with effective start date, end date, and description. At present, there is no functionality associated with the price list type. The implementation team can use the price list type to define the custom logic as per the business requirements.

A price list and price item pricing within the price list are effective for a particular duration. You can define multiple pricing for the same price item and variance parameter or product parameters combination within a price list when the price item pricing date range is different. You can assign the same price item in multiple price lists and define different pricing for the price item in each price list based on the business requirements.

The system enables you to specify the duration for which the price list is available for assignment to an account or a person. However, note that at present, the availability start and end dates are not used in the product while assigning a price list to an account or a person. If required, the implementation team can build the custom logic using the availability start and end dates in the product.

Once you create a price list, you have to assign price items to the price list and define pricing for each price item assigned to the price list. The price lists are then assigned to accounts or persons to indicate the prices that will be charged for various price items or services offered to them. You can assign multiple price lists to an account or a person for an overlapping date range. But, you need to specify the priority or order for the price list in which the pricing from the price list should be considered. You can also assign the same price list to multiple accounts or persons.

You can define whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, you can define whether the account or person can inherit price item pricing from the price list hierarchy.

The system allows you to create the following:

- **Default Price List** – You can create a price list and set it as a default price list for a particular division. To define a default price list for a division, you need to set the value for the **Default Price List ID** parameter in the price assignment search algorithm which is attached to the division. If the effective price item pricing is not available at any level in the customer hierarchy, the system checks whether the default price list is specified in the price assignment search algorithm. If the default price list is specified in the algorithm, the system checks whether effective price item pricing is available in the default price list and accordingly uses the price item pricing. You can have the same price list as a the default price list for multiple divisions.
- **Global Price List** – You can create one global price list in the system. It is used when the price item pricing is not available at any level in the customer hierarchy and in the default price list associated with the division. You can assign only those price items in the global price list whose the **Global Price List** option is set to **Yes**. The global price list is used while searching an effective price item pricing when the **Global Price List** parameter in the price assignment search algorithm (attached to the division) is set to **Y**. Finally, if the effective price item pricing is not available in the default and/or global price list, an error message occurs indicating that the effective price item pricing is not available in the system.
- **Template Price List** – You can define a template price list and assign template price item pricing to a template price list. You cannot assign template price list to an account or a person. You can only create a copy of a template price item pricing which is assigned to a template price list. Once you create a copy of the template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

Price List (Used for Searching)

The **Price List** screen allows you to search for a price list using various search criteria. It also allows you to define a price list. It contains the following zones:

- [Search Price List](#) on page 878
- [Price List Price Items](#) on page 881
- [Price Item Pricing](#)
- [Price Assignment Tree](#)

Through this screen, you can navigate to the following screens:

- [Price List Price Item Pricing](#) on page 899
- [Price List Assignments](#) on page 948
- [Entities Eligible for Price List Assignment](#) on page 950
- [Price Item Pricing \(Used for Viewing\)](#)

Search Price List

The **Search Price List** zone allows you to search for a price list using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price list using the price list details. The valid value is: <ul style="list-style-type: none"> • Price List Details 	Yes
	Note: By default, the Price List Details option is selected.	
Price List ID	Used to search a particular price list.	No
Price List Description	Used to search price lists with a particular description.	No
Effective Start Date	Used to search price lists which are effective from a particular date onwards.	No
Effective End Date	Used to search price lists which are effective till a particular date.	No
Price List Type	Used to search price lists which belong to a particular type. The valid values are: <ul style="list-style-type: none"> • Promotional • Standard 	No
	Note: By default, the Standard option is selected.	
Global Price List	Used to indicate whether you want to search global price lists. The valid values are: <ul style="list-style-type: none"> • Yes • No 	No

Field Name	Field Description	Mandatory (Yes or No)
Availability Start Date	Used to search price lists which are available for assignment to an account or a person from a particular date.	No
	Note: This field appears when you click the Advanced Search link in the top right corner of this zone.	
Availability End Date	Used to search price lists which are available for assignment to an account or a person till a particular date.	No
	Note: This field appears when you click the Advanced Search link in the top right corner of this zone.	
Status	Used to search price lists with a particular status. The valid values are: <ul style="list-style-type: none"> • Active • Inactive • Proposed • Template 	No
	Note: This field appears when you click the Advanced Search link in the top right corner of this zone.	
Division	Used to search price lists which are associated with a particular division.	No
	Note: You can only view those divisions to which you have access in the Division list.	
Parent Price List	Used to search price lists which inherit pricing from a particular parent price list.	No
	Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Price List Search window appears where you can search for the respective parent price list. This field appears when you click the Advanced Search link in the top right corner of this zone.	

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List Effective Date	Used to search price lists that inherit pricing from a particular parent price list which is effective from a particular date onwards.	No
	Note: This field appears when you click the Advanced Search link in the top right corner of this zone.	

Note: You must specify at least one search criterion while searching for a price list.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	Displays the concatenated string of information about the price list separated by a comma (.).
	Note: It has a link. On clicking the link, the Price List screen appears where you can view the details of the respective price list.
Status	Indicates the current status of the price list. The valid values are: <ul style="list-style-type: none"> • Active • Inactive • Proposed • Template
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.
Duplicate	On clicking the Duplicate  icon, the Price List screen appears where you can create a new price list using an existing price list.
Price List Pricing	On clicking the View  icon in the Price List Pricing column, the Price List Price Item Pricing screen appears where you can view and edit a list of price items pricing information assigned to the price list.
Price List Assigned To	On clicking the View  icon in the Price List Assigned To column, the Price List Assignments screen appears where you can view the details of the persons and accounts to which the price list is assigned.
Eligible Accounts/Persons	On clicking the View  icon in the Eligible Accounts/Persons column, the Entities Eligible for Price List Assignment screen appears where you can search for a list of eligible accounts and persons to which you want to assign the price list in a particular division.

Note:

However, when you search for a price list by specifying the date (which can be current, past or future date) in the **Parent Price List Effective Date** field, the system retrieves the price lists that meet the search criteria along with the details of the parent price list that is effective on that date.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

On clicking the **Broadcast** () icon corresponding to the **Price List Information** field, the **Price List Price Items** zone appears where you can view a list of price items to which the price list is assigned.

Price List Price Items

The **Price List Price Items** zone lists price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a comma (,) for the price list. Note: It has a link. On clicking the link, the Price Item Pricing screen appears where you can view the pricing information of the respective price list.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Used to specify multiple parameters based on which you want to determine the pricing utilization. Note: This column appears only when the Multi Price Parameter option type of the Multi Parameter Based Pricing (C1_PPARAM_FLG) feature configuration is set to True .

Column Name	Column Description
Pricing Status	Displays the status of pricing for the price item. The valid values are: <ul style="list-style-type: none"> Active Inactive
Rate Info	Displays the rate of the price item. Note: If the price assignment has only one price component, you can view the rate defined in the pricing directly through the Rate Info column. However, if the price assignment has more than one price components, then the Rate Info column contains a string indicating the tiering type and pricing currency. It also contains “...” which indicates that for more information about the pricing you should navigate to the Price Item Pricing screen.
Start Date	Displays the date from when the price item pricing is effective for the price list.
End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: <ul style="list-style-type: none"> Regular Post Processing Post Processing – Invoice Based Post Processing – Price Item Based Note: This column appears when the Multi Price Parameter option type of the Multi Parameter Based Pricing (C1_PPARM_FLG) feature configuration is set to True .
Duplicate	On clicking the Duplicate (📄) icon, the Price Item Pricing screen appears where you can define a new price item pricing using an existing price item pricing.

By default, the **Price List Price Items** zone does not appear in the **Price List** screen. It appears when you click the **Broadcast** (📣) icon corresponding to the price list in the **Search Price List** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📣) icon corresponding to the **Pricing Information** field, the **Price Item Pricing** and **Pricing Structure** zones appear where you can view the details about the price item pricing and its structure.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Searching for a Price List

Prerequisites

To search for a price list, you should have:

- Divisions defined in the application
- Price list associated with the division to which the user belongs

Procedure

To search for a price list:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.
A sub-menu appears.
3. Click the **Search** option from the **Price List** sub-menu.
The **Price List** screen appears.
4. Enter the search criteria in the **Search Price List** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of price lists that meet the search criteria appears in the **Search Results** section.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Viewing Price Items Assigned to a Price List

Prerequisites

To view price items assigned to a price list, you should have:

- An algorithm defined using the **C1-PLPINFO** algorithm type and attached to **Pricelist Products Assignment Information** system event in the **Algorithms** tab of the **Installation Options – Framework** screen

Procedure

To view price items assigned to a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the price list whose price items details you want to view.

The **Price List Price Items** zone appears.

3. View the price items that are assigned to the price list in the **Price List Price Items** zone.

Defining a Price List

Procedure

To define a price list:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.
A sub-menu appears.
3. Click the **Add** option from the **Price List** sub-menu.

The **Price List** screen appears. It consists the following sections:

- **Main** - Used to specify basic details about the price list.
- **Hierarchy** - Used to associate the price list with one or more parent price lists for a particular duration.
- **Divisions** - Used to associate the price list with one or more divisions.
- **Eligibility** - Used to define eligibility criteria for the price list.
- **Characteristics** - Used to define the characteristics for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective.	Yes
	Note: By default, the current date appears in this field.	
Effective End Date	Used to specify the date till when the price list is effective.	No
	Note: The effective end date cannot be earlier than the effective start date.	

Field Name	Field Description	Mandatory (Yes or No)
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> • Standard • Promotional 	Yes
	Note: By default, the Standard option is selected.	
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> • Yes • No 	Yes
Availability Start Date	Used to the specify the date from when the price list is available for assignment to an account or a person.	No
	Note: At present, the availability start date is not used in the price item while assigning a price list to an account or a person. It is available for future use.	
Availability End Date	Used to the specify the date till when the price list is available for assignment to an account or a person.	No
	Note: The availability end date cannot be earlier than the availability start date. At present, the availability end date is not used in the price item while assigning a price list to an account or a person. It is available for future use.	
Available for Deal Pricing	Used to indicate whether the price list is available for deal pricing or not.	No
Standard for Deal Pricing	Used to indicate whether the price list is applicable for defining costs or floor and ceil limits or commitments at the time of deal pricing.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the price list. The valid values are: <ul style="list-style-type: none"> • Active - Used to indicate that the price list is used for billing. • Inactive - Used to indicate that the price list is no longer used for billing. • Proposed - Used to indicate that the price list is used for quotations. • Template - Used to indicate that the price list is a template price list. 	Yes
	Note: By default, the Active option is selected.	

Tip: Alternatively, you can access the **Price List** screen by clicking the **Add** button in the **Page Title** area of the **Price List** screen.

4. Enter the required details in the **Main** section.

Note: By default the **Main** section is displayed.

5. Click the **Show All** link from the **Section** to view all the sections and define or associate the following:

- Associate the price list with one or more parent price list, if required.
- Associate price list with one or more divisions, if required.
- Define eligibility criteria for the price list, if required.
- Define characteristics for the price list, if required.

6. Click **Save**.

Note: The price list ID is generated automatically when the price list is created.

Defining the Price List Hierarchy

Oracle Revenue Management and Billing allows you to define the price list hierarchy. It helps you to inherit the price item pricing from the parent price list if the price item pricing is not available in the price list (assigned to the account, person, or parent person). And, if the price item pricing is not available in the parent price list, the system will search for the price item pricing in the parent's parent price list (i.e. in the grandparent price list) and continue till it reaches the last level in the hierarchy.

In other words, when you define the price list hierarchy and assign the price list to an account or a person, the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. However, if the price item pricing is available on both the assigned and parent price lists, the system derives the price item pricing from the assigned price list.

You can define multiple parent price lists for a price list. But, only one parent price list is effective for a particular duration. Two or more price lists can have the same parent price list.

Procedure

To define the price list hierarchy:

1. Click the **Hierarchy** or **Show All** link from the **Section** in the **Price List** screen when you are defining, editing, or copying a price list.

The **Hierarchy** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List Effective From Date	Used to specify the date from when the price list inherits pricing from the parent price list.	Yes (Conditional) Note: This field is required when you are associating the price list with a parent price list.
Parent Price List Effective To Date	Used to specify the date till when the price list inherits pricing from the parent price list. Note: The parent price list effective to date cannot be earlier than the parent price list effective from date and later than price list effective end date.	No
Parent Price List	Used to specify the parent price list ID to which you want to associate the price list. Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Price List Search window appears. On specifying the parent price list, the description of the parent price list appears corresponding to the Parent Price List field.	Yes (Conditional) Note: This field is required when you are associating the price list with a parent price list.

2. Enter the required details in the **Hierarchy** section.

Note: You can search for a price list by clicking the **Search** (🔍) icon corresponding to the **Parent Price List** field.

3. If you want to associate the price list with more than one parent price list, click the **Add** (+) icon corresponding to the parent price list and then repeat step 2.

Note:

You can associate a price list with multiple parent price lists. But, only one parent price list is effective for a particular duration. Also, while associating a price list with a parent price list, you can only specify a price list which is effective during the specified duration.

If you want to remove a parent price list from the price list hierarchy, click the **Delete** (🗑️) icon corresponding to the parent price list.

4. Click Save.

The price list is associated with the parent price lists.

Defining a Characteristic for a Price List**Prerequisites**

To define a characteristic for a price list, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List**)

Procedure

To define a characteristics for a price list:

1. Click the **Characteristics** or **Show All** link from the **Section** in the **Price List** window when you are defining, editing, or copying a price list.

The **Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list.	Yes (Conditional)
		Note: This field is required when you are defining a characteristic for the price list.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		Note: The list includes only those characteristic types where the characteristic entity is set to Price List . Note: This field is required when you are defining a characteristic for the price list.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Predefined Characteristic Search window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.</p>	<p>Note: This field is required when you are defining a characteristic for the price list.</p>

- Enter the required details in the **Characteristics** section.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the price list, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the price list, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price list.

Associating a Price List with a Division

You can assign a price list only to those accounts or persons which belong to the division to which the price list is associated. Therefore, you need to associate the price list with appropriate divisions.

Prerequisites

To associate a price list with a division, you should have:

- Divisions defined in the application

Procedure

To associate a price list with a division:

- Click the **Divisions** or **Show All** link from the **Section** in the **Price List** window when you are defining, editing, or copying a price list.

The **Divisions** section appears. It contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the price list.	No
	Note: You can only view those divisions to which you have access in the Division list.	

- Select the required division from the list.
- If you want to associate the price list with more than one division, click the **Add (+)** icon corresponding to the division and then repeat step 2.

Note: However, if you want to remove the price list from a division, click the **Delete (🗑)** icon corresponding to the division.

- Click **Save**.

The price list is associated with the divisions.

Tip: Alternatively, you can associate a price list with a division using the **Division** screen.

Defining Eligibility Criteria for a Price List

Prerequisites

To define eligibility criteria for a price list, you should have:

- The **Price List Eligibility Criteria** check box selected in the **Parameter Usage** section while defining the parameter

Procedure

To define eligibility criteria for a price list:

- Click the **Eligibility** or **Show All** link from the **Section** in the **Price List** screen when you are defining, editing, or copying a price list.

The **Eligibility** section appears. It contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Criteria	On clicking the Add (+) icon, you can associate eligibility criteria of parameters for the price list.	Yes (Conditional)
		Note: This field is required when you are defining an eligibility criteria for the price list.

Column Name	Column Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the criteria is effective for the price list.	Yes (Conditional) Note: This field is required when you are defining an eligibility criteria for the price list.
Effective End Date	Used to specify the date till when the criteria is effective for the price list.	No
Description	Used to specify the description for the criteria type.	Yes

- Enter the required details in the **Eligibility** section.
- If you want to define more than one eligibility criteria for the price list, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove the eligibility criteria, click the **Delete (🗑)** icon corresponding to the criteria.

- Associate eligibility criteria of parameter for the price list, if required.
- If you want to define more than one eligibility criteria of parameter for the price item, click the **Add (+)** icon corresponding to the parameter.

Note: However, if you want to remove the eligibility criteria of parameter for the price item, click the **Delete (🗑)** icon corresponding to the parameter.

- Click **Save**.

The eligibility criteria are defined for the price list.

How to associate eligibility criteria of parameter for a price list	Associating Eligibility Criteria of Parameters for a Price List

Copying a Price List

Instead of creating a price list from scratch, you can create a new price list using an existing price list. This is possible through copying a price list. On copying a price list, the details including the pricing parameters, divisions, characteristics, eligibility criteria, and the assigned price items are copied to the new price list. You can then edit the details, if required.

Prerequisites

To copy a price list, you should have:

- Price list (whose copy you want to create) defined in the application
- Price list (whose copy you want to create) associated with the division to which the user belongs

Procedure

To copy a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Copy**  icon in the **Copy** column corresponding to the price list using which you want to define a new price list.

The **Price List** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price list.
- **Hierarchy** – Used to define parent price list for the price list for a particular duration.
- **Divisions** – Used to associate price list with one or more divisions.
- **Eligibility Criteria** – Used to define eligibility criteria for price list.
- **Characteristics** – Used to define the characteristics (which are applicable across divisions) for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective	Yes
Effective End Date	Used to specify the date till when the price list is effective.	No
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> • Standard • Promotional 	Yes
Global Price List	Used to Indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> • Yes • No 	Yes
Availability Start Date	Used to specify the date from when the price list is available for assignment to an account or a person.	Yes
Availability End date	Used to specify the date till when the price list is available for assignment to an account or a person.	No
Available for Deal Pricing	Used to indicate whether the price list is available for deal pricing or not.	No
Standard for Deal Pricing	Used to indicate whether the price list is applicable for defining costs or floor and ceil limits or commitments at the time of deal pricing.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the price list. The valid values are: <ul style="list-style-type: none"> Active Proposed Template 	Yes
Copy Pricing	Used to indicate whether you want to copy the pricing information to the price list. The valid values are: <ul style="list-style-type: none"> All None 	Yes (Conditional)

- Enter the required details in the **Main** section.
- Add, edit, or remove the parent price list details, if required.
- Associate or disassociate the price list from the required divisions.
- Define, edit, or remove the price list eligibility criteria and parameter eligibility criteria for price list in the, if required.
- Define, edit, or remove characteristics of the price list, if required.
- Click **Save**.

The new price list is defined.

Note: The price list ID is generated automatically when the price list is defined.

Viewing the Price List Details

Procedure

To view the details of a price list:

- Search for the price list in the **Price List** screen.
- In the **Search Results** section, click the link in the **Price List Information** column corresponding to the price list whose details you want to view.

The **Price List** screen appears. It contains the following zones:

- [Price List](#) on page 894
 - [Eligibility Criteria](#) on page 896
 - [Price List Price Items](#) on page 881
- View the basic details, hierarchy, divisions, and characteristics of the price list in the **Price List** zone.

4. View the eligibility criteria to which the price list is associated in the **Eligibility Criteria** zone.
5. View the price items that are assigned to the price list in the **Price List Price Items** zone.

Price List (Used for Viewing)

The **Price List** screen allows you to view the details of a price list. It also allows you to edit a price list. It contains the following zones:

- **Price List** - Displays the basic details of the price list.
- **Eligibility Criteria** - Displays the eligibility criteria for the price list.
- **Price List Price Items** - Displays the price items that are assigned to the price list.
- **Price Item Pricing**
 - Displays the price item pricing for price items that are assigned to the price list.
- **Pricing Structure**
 - Displays the structure of the price item pricing for price item that are assigned to the price list.

Price List

The **Price List** zone displays the details of the price list. It contains the following sections:

- **Main** - Displays basic information about the price list. It contains the following fields:

Field Name	Field Description
Price List ID	Displays the price list ID.
Price List Description	Displays the description for the price list.
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Price List Type	Indicates the type of the price list. The valid values are: <ul style="list-style-type: none"> • Standard • Promotional
Global Price List	Indicates whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> • Yes • No
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End date	Displays the date till when the price list is available for assignment to an account or a person.
Available for Deal Pricing	Indicates whether the price list can be assigned with a person or an account.

Field Name	Field Description
Standard for Deal Pricing	Indicates whether the price list can be considered to compare the average floor and ceil limit with the standard and average price of a price item associated with a price list.
Validity Period (in Days)	Displays the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.
Status	Indicates the status of the price list. The valid values are: <ul style="list-style-type: none"> • Active – Indicates that the price list is used for billing. • Inactive – Indicates that the price list is no longer used for billing. • Proposed – Indicates that the price list is used for quotations. • Template – Indicates that the price list is a template price list.

- **Hierarchy** - Lists the parent price list from which the price list has inherited the price item pricing for a particular duration. It contains the following columns:

Column Name	Column Description
Parent Price List ID	Displays the ID of the parent price list.
Parent Price List Effective From Date	Displays the date from when the price list can inherit pricing from the parent price list.
Parent Price List Effective To Date	Displays the date till when the price list can inherit pricing from the parent price list.

- **Divisions** - Lists the divisions to which the price list is associated. It contains the following column:

Column Name	Column Description
Division	Displays the division to which the price list is associated. Note: It has a link. On clicking the link, the Division screen appears where you can view the details of the respective division.

- **Characteristics** - Lists the characteristics that are associated with the price list. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price list.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

- **Record Actions** - This section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price list.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price list is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.

Eligibility Criteria

The **Eligibility Criteria** zone lists the eligibility criteria of the price list. It contains the following columns:

Field Name	Field Description
Effective Start Date	Displays the date from when the criteria is effective for the price list.
Effective End Date	Displays the date till when the criteria is effective for the price list.
Description	Displays the description for the criteria type.
Sequence	Indicates the order in which the price list eligibility criteria should be executed.
Parameter	Indicates the parameter (on the left hand side) is used in the pricing eligibility criteria.
Operator	Displays the relational operator to define the relation between the parameter name and value.
Parameter Value Type	Indicates whether the parameter (on the left hand side) must be compared against another parameter (on the right hand side) or directly against a parameter value.
Parameter	Indicates the parameter (on the right hand side) against which you want to compare the parameter (on the left hand side).
Parameter Value	Indicates the parameter value against which you want to compare the parameter (on the left hand side).
Is True	Indicates what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"> • Check Next Condition – Indicates that the condition with consecutive sequence number should be executed. • Rule Is False – Indicates that the action specified in the Rule False Action field should be executed • Rule Is True – Indicates that the action specified in the Rule True Action field should be executed.

Field Name	Field Description
Is False	Indicates what happens when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"> • Check Next Condition – Indicates that the condition with consecutive sequence number should be executed. • Rule Is False – Indicates that the action specified in the Rule False Action field should be executed • Rule Is True – Indicates that the action specified in the Rule True Action field should be executed.
Is Insufficient	Indicates what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"> • Check Next Condition – Indicates that the condition with consecutive sequence number should be executed. • Rule Is False – Indicates that the action specified in the Rule False Action field should be executed • Rule Is True – Indicates that the action specified in the Rule True Action field should be executed.

Editing a Price List

Procedure

To edit a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the link in the **Price List Information** column corresponding to the price list whose details you want to edit.

The **Price List** screen appears.

3. Click the **Edit** button in the **Price List** zone.

The **Price List** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price list.
- **Hierarchy** - Used to define parent price list to inherit price item pricing for the price list for a particular duration.
- **Divisions** - Used to associate price list with one or more divisions.
- **Eligibility Criteria** - Used to define eligibility criteria for the price list.
- **Characteristics** - Used to define the characteristics (which are applicable across divisions) for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the price list is effective.	Yes
	<p>Note: The system will not allow you to change the effective start date when:</p> <ul style="list-style-type: none"> • There is a price item assigned to the price list on that date. • The price list is assigned to an account or a person on that date. 	
Effective End Date	Used to specify the date till when the price list is effective.	No
	<p>Note: The effective end date cannot be earlier than the effective start date.</p>	
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> • Standard • Promotional 	Yes
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> • Yes • No 	Yes
Availability Start Date	Used to the specify the date from when the price list is available for assignment to an account or a person.	No
	<p>Note: At present, the availability start date is not used in the product while assigning a price list to an account or a person. It is available for future use.</p>	
Availability End Date	Used to the specify the date till when the price list is available for assignment to an account or a person.	No
	<p>Note:</p> <p>The availability end date cannot be earlier than the availability start date.</p> <p>At present, the availability end date is not used in the product while assigning a price list to an account or a person. It is available for future use.</p>	
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to indicate the status of the price list. The valid values are:</p> <ul style="list-style-type: none"> • Active – Used to indicate that the price list is used for billing. This value appears when you are editing a proposed price list • Proposed – Used to indicate that the price list is used for quotations. • Template – Used to indicate that the price list is a template price list. <p>Note: You cannot change the status of an active and a template price list.</p>	Yes

4. Modify the details in the **Main** section, if required.

Note: By default the **Main** section is displayed.

5. Add, edit or remove parent price list from the price list hierarchy, if required.
6. Associate or disassociate the price list from the divisions, if required.

Note: You can only view those divisions to which you have access in the **Division** list. If the price list is associated to a division to which you do not have access, then the **Divisions** section is grayed out.

7. Define, edit, or remove eligibility criteria from the price list, if required
8. Define, edit, or remove characteristics of the price list, if required.
9. Click **Save**.

The changes made to the price list are saved.

Price List Price Item Pricing

Once a price list is created, you can either assign a price item to the price list and then define pricing for the price item, or you can copy an existing price item pricing and assign it to the price list. The **Price List Price Item Pricing** screen allows you to:

- View and filter the price items that are assigned to the price list
- Search and assign price items to the price list
- Copy a price item pricing and assign it to the price list

The **Price List Price Item Pricing** screen contains the following zones:

- [Price List Price Items](#) on page 900
- [Search Price Item or Price Item Pricing](#) on page 902

Price List Price Items

The **Price List Price Items** zone lists the price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string of information about the price item pricing separated by a comma (,).
	Note: It has a link. On clicking the link, the Price Item Pricing screen appears where you can view the details of the respective price item pricing.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Displays a comma-separated list of parameter values based on which the pricing is defined for the price item. The order in which the parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item).
	Note: This column appears when the Multi Price Parameter option type of the Multi Parameter Based Pricing (C1_PPARM_FLG) feature configuration is set to True .
Pricing Status	Indicates the current status of the price item pricing. The valid values are: <ul style="list-style-type: none"> • Active – Indicates that the price assignment is used for billing. • Draft – Indicates that the price assignment is created as a draft. • Inactive – Indicates that the price assignment is no longer used for billing. • Proposed – Indicates that the price assignment is to be used for quotations. • Rejected – Indicates that the price assignment is rejected. • Template – Indicates that the price assignment is a template price list.
Rate Info	Displays the rate of the price item.
	Note: If the price assignment has only one price component, you can view the rate defined in the pricing directly through the Rate Info column. However, if the price assignment has more than one price components, then the Rate Info column contains a string indicating the tiering type and pricing currency. It also contains “...” which indicates that for more information about the pricing you should navigate to the Price Item Pricing screen.
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.

Column Name	Column Description
Price Assignment Type	<p>Indicates the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> • Post Processing – Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. • Post Processing – Invoice Based – Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. <p>Note: This is not applicable for price items which are defined for Pricing and where the Price Item Type field is set to Fees.</p> <ul style="list-style-type: none"> • Post Processing – Price Item Based – Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. • Regular – Indicates that the pricing is used to generate regular bill segment. <p>Note: This column appears when the Multi Price Parameter option type of the Multi Parameter Based Pricing (C1_PPARM_FLG) feature configuration is set to True.</p>
Edit	On clicking the Edit () icon, you can edit the price item pricing for the price list.
Delete	<p>On clicking the Delete () icon, you can remove the price item pricing from the price list.</p> <p>Note:</p> <p>The Delete icon appears in this column only when the price list is not yet assigned to any account or person.</p> <p>This column appears when the Multi Price Parameter option type of the Multi Parameter Based Pricing (C1_PPARM_FLG) feature configuration is set to False.</p>

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3608.

Related Topics

How to remove a price item from the price list	Removing a Price Item from a Price List on page 908

Search Price Item or Price Item Pricing

You can assign a price item or price item bundle to a price list and then define pricing for the price item or price item bundle, or you can copy an existing price item pricing and assign it to a price list. The **Search Price Item or Price Item Pricing** zone allows you to search for a price item pricing which is assigned to an account, person, or price list. You can then create a new price item pricing using an existing price item pricing through copying the price item pricing. Once you create a copy of an existing price item pricing, the new price item pricing is assigned to the price list. On copying a price item pricing, the pricing details including the price components, eligibility and tiering criteria for each price component, and characteristics are copied to the new price item pricing. You can then edit the details, if required.

The system allows you to create a copy of active, proposed, inactive, rejected, and template price item pricing. Once you create the copy of a template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

The **Search Price Item or Price Item Pricing** zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search price item, pricing assigned to price list and override pricing for an account, or person. The valid values are: <ul style="list-style-type: none"> • Price Item • Price list Pricing • Account Override Pricing • Person Override Pricing 	Yes
Price Item	Used to search a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No
	Note: This field appears when you select the Price Item option from the Search By list.	
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> • Yes • No 	No
Bundle	Used to indicate whether you want to search for price item bundles. The valid values are: <ul style="list-style-type: none"> • Yes • No 	No

Field Name	Field Description	Mandatory (Yes or No)
Price List ID	Used to search pricing of price items or price item bundles which are assigned to a particular price list.	No
	Note: This field appears when you select the Price List Pricing option from the Search By list.	
Effective Start Date	Used to search price item pricing on price lists which are effective from a particular date onwards.	No
	Note: This field appears when you select the Price List Pricing, Account Override Pricing, or Person Override Pricing option from the Search By list.

Defining a Characteristic for a Price Item Pricing

Note: This topic is not applicable for the health insurance business.

Prerequisites

To define a characteristic for a price item pricing, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

Procedure

To define a characteristic for a price item pricing:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or overriding a price item pricing.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing.	Yes (Conditional)
		Note: This field is required while defining a characteristic for the price item pricing.
Characteristic Type	Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Price Item .	Yes (Conditional)
		Note: This field is required while defining a characteristic for the price item pricing.
Characteristic Value	Used to specify the value for the characteristic type. Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Yes (Conditional)
		Note: This field is required while defining a characteristic for the price item pricing.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the price item pricing, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the price item pricing, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristic is defined for the price item pricing.
