# 1. About this Manual

# 1.1 Introduction

This manual is designed to help acquaint you with the Oracle Banking Cash Management (OBCM).

It provides an overview of the system and guides you, through the various steps involved in setting up and providing the cash management services for the customers of your bank.

## 1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office executive	Input functions for transactions
Back office managers/officers	Authorization functions
Product Managers	Product definition and authorization

# 1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/us/corporate/accessibility/index.html.

# 1.4 Document Structure

This manual is organized into the following chapters:

Chapter	Description				
Chapter 1	About this manual: This chapter gives information on the intended audience, abbreviations, icons, and summary of chapters covered in this user manual.				
Chapter 2	Receivables (OBCM) - an overview: This chapter lists the benefits and functionalities provided by the receivables module.				
Chapter 3	Setting up reference data for the system.				
Chapter 4	Managing Receivables & Payables				
Chapter 5	Machine Learning				
Chapter 6	Payment Management				
Chapter 7	Manual Reconciliation				
Chapter 8	File Management				
Chapter 9	Performing inquiries				
Chapter 10	List of Batch jobs				

# 1.5 Abbreviations

Abbreviation	Detailed Description
OBCM	Oracle Banking Cash Management
OBSCF	Oracle Banking Supply Chain Finance
VAM	Virtual Account Management
FIFO	First In First Out
LIFO	Last In First Out
CIF	Customer Information File
CMS	Cash Management System
PDC	Post Dated Cheque
CDC	Current Dated Cheque
PUA	Payment Under Approval

# 1.6 Glossary of Icons

This User Manual may refer to all or some of the following icons:

lcon	Function
×	Close
+	Add a row
-	Remove a row
Ŵ	Delete a row
0	Search (Fetch)
С	Refresh
, and the second	Collapse
ж Ш	Expand
4	Flip
:	Options
${ \bigcirc }$	Authorize
6	Unlock
Ū	Сору

lcon	Function
Q	View

# 2. Receivables and Payables

## 2.1 Overview

In Oracle Banking Cash Management, the Receivables and Payables module enables a financial institution to manage the receivables and payables for its corporate customers. OBCM provides a technology platform capable of capturing account receivables and payables of corporates across disparate accounts and locations.

## 2.2 Benefits

- Cost Reduction Increased visibility of transactions and easy reconciliation helps corporates manage and control their cash flow and reduce costs.
- Smart Processing of Receivables and Payables Facilitate efficient receivable and payable management through enhanced automation and straight-through processing of key processes
- Regulatory Environment Leverage flexible configuration to launch quickly, respond to regulatory changes and expand into new geographies.

## 2.3 Functionality

- E-Invoice/Purchase Order
- Reconciliation
- Pricing

### 2.4 Home: Dashboard

Successfully signing into the OBCM application displays the Dashboard as your home screen.. It is a collection of various portlets that are displayed based on your role and access rights. Dashboard enables easy access and analysis of transactional and static data through these interactive and contextual portlets. User can drag and move different portlets, resize, auto adjust the size, and expand/collapse the portlet.

Post landing on Oracle Banking Cash Management application, below login screen is displayed:

OBCM Dashboard currently consists of the below mentioned portlet for receivable management.

- Unrealized Instrument Aging: Unrealized Instrument Aging graph displays the doughnut chart with number of cheques/instruments, which are unrealized for aging bucket (number of day). You can click on bar graph icon at the top-right of the portlet to change the view from doughnut (default) to bar graph. Landing page displays the number of unrealized cheques/instruments split as per aging buckets which are configurable. Maximum of seven ranges can be defined.
- **Cash Transaction Volume and Trend:** This portlet displays a bar graph depicting the amounts in branch currency that have been collected and withdrawn on a monthly-basis, within the specified time frame. The Cash Withdrawal and Cash Collection bars are color-coded for aiding quick visual analysis. You can alter the 'From Date' and 'To Date' by clicking the Filter icon and selecting the required dates.
- **Instrument Status:** The Instrument Status portlet displays the status wise total count and total value of the instruments for the period selected between From Date and To Date (Deposit from and To Date). By default, the date period is from 'current date-1' to 'current date'. The statuses displayed in the portlet are Lodged, Hold, Return, and Realized.
- **Facility Utilization:** The Facility Utilization widget classifies all facilities into three categories i.e., nearing breach, breached, and under-utilized. The drilldown allows the user to view these details at an entity level. There is an option to search and filter the details for a specific entity also.
  - Nearing Breach: When utilized amount is more than 85% of the sanctioned amount.
  - o Breached: When utilized amount equals the sanctioned amount.
  - o Under Utilized: When utilized amount is less than 20% of the sanctioned amount.
- **Facilities Expiring:** The Facility Expiring widget lists all facilities nearing expiry or expired and also offers a drilldown at each entity level.
- **Top 5 Corporate Cash Collection:** This portlet displays a jet-bar chart with the top 5 corporate parties with high-value cash collection in branch currency, within the specified time frame. You can alter the 'From Date' and 'To Date' by clicking the Filter icon, and selecting the required dates. Flip the portlet using the arrow on the side to view the top 5 corporates high-value cash withdrawal in branch currency, within the specified time frame.
- **Top 5 Corporates:** This portlet displays information of the top five customers; w.r.t. their total Receivables and Payables. On clicking the table icon at the top-right, the graph populates the business volume data of the same top 5 customers in tabular format.
- Aging of Invoices: This widget displays invoice aging information in the form of a doughnut. The graph displays the invoice amount volume split as per aging buckets which are configurable at the time of implementation i.e., 0-30 days, 30-60 days, and so on. Range criteria can be defined with a maximum of 6 ranges. On clicking any of the range buckets on the graph, a pop-up window appears with the list of corporates whose invoices are due for that ageing bucket. Clicking on the '+' (expand) icon against each corporate; launches invoice details pertaining to the information of that specific corporate such as supplier name, 'Invoice Due Date From', 'Invoice Due Date To'. Click the bar-chart icon on the top-right corner to change the view from doughnut (default) to bar chart. You can also flip the widget to view the same details for aging of overdue invoices.

- **Product-wise Instrument Collection Flow Value:** This portlet displays a line graph representing the collection amount flow in branch currency, within a specified time frame, for all Products that are associated with 'paper-based' category. Each product has a specific color code. You can alter the 'From Date' and 'To Date' by clicking the Filter icon, and selecting the required dates. Flip the portlet using the arrow on the side to view the count of instruments for each of the Products, for the specified time frame.
- **Top Defaulters:** Top defaulters widget shows list of top defaulters for the previous and current month.
- **Transaction Status Details:** Transactions are grouped product-wise into groups disbursed, partially settled or fully settled for a specific date range, which is editable. The user can select on any product to view further details of transaction for that product.
- **Invoices Raised:** This portlet displays the data for Invoices on monthly basis as a bar graph. On clicking the table icon on the top-right corner, same data is displayed in tabular format with invoices grouped into monthly buckets. On clicking the bar graph, the screen will popup with corporate name and aggregated invoice amount and further clicking on the '+' (expand) icon beside corporate name launches the Invoice Inquiry screen with data of invoices specific to the corporate, along with other relevant details as per the selected date.
- **Business Volume Trends:** This chart displays the business trends (total receivables and payables) of previous six months including current month based on historic data. The trend line is plotted based on the highs/peak.
- **Reconciliation Details:** This widget provides a snapshot of the reconciliation details of payments against the entity selected, i.e., invoice, cashflow, allocation, or finance. Click the respective icons to view these details as a donut or as a line-graph. You can view the volume percentage of payment records that are manually reconciled, auto reconciled, partially reconciled, and unreconciled. Using the filter options, you can select a specific customer and/or modify the date range. Click the refresh icon to reset the data. If you have selected the line-graph option, you can click on specific trend-line points where the Volume (Y) axis meets the Month (X) axis. A pop-up window appears, displaying the names of the corporates and the count of records for that particular month and reconciliation status.
- 3. User can perform following actions on the dashboard screen:
  - $\circ~$  To add more portlets, click the Add (+) icon located at the top-right corner of the Dashboard.
  - $\circ$  To remove a portlet, click the Remove (x) icon located at the portlet's top-right corner.
  - To configure the portlet, click the Configure Tile ( 9) located at the portlet's top-left corner.
  - To flip the portlet view, click the Flip Forward (<) or Flip Back (>) icon.
  - To change the portlet's position, click and hold the 'Drag to reorder' (....) icon at the portlet's bottom-center and then move portlet to the desired position.
  - To apply filter on the portlet's data, click the Filter ( $\mathbb{T}$ ) icon to view the pop-up select filter values.

# 3. Setup Reference Data

# 3.1 Introduction

To enable the Cash Management related functionalities, there is certain amount of reference data that needs to be set up on day zero.

In the context of cash management, for instance, you need to set up reference data like relationship master, recon rules, charges, accounting, tolerance, payment terms, etc. This is the first step for initiating any transaction in up OBCM.

You may also need to identify administrators to perform admin related tasks (creating users, assigning tasks and functions to the users as per their profile).

This section explains the maintenance of such reference information for the modules used for cash management.

### 3.1.1 Maintaining Core Reference Data

Certain core reference data is required to be set up for execution of cash management system transactions such as country list, currency, customer category, holiday list, list of banks, branch, FX rates etc.

Refer to the 'Oracle Banking Common Core User Guide' for setting up core reference data.

### 3.2 Accounting Maintenance

One of the important reference data for executing receivables and payables transactions is 'accounting'. This is setup through various sub-modules of accounting, such as account mapping, entry codes, roles, and accounting entries.

### 3.2.1 Accounting Roles

#### 3.2.1.1 Create Accounting Role

This screen is used to create Account Roles. This is required to identify the Dr or Cr leg in an accounting entry. Dr or Cr legs with other parameters like amount type, are created through 'Accounting Entry Codes' submenu.

*Navigation Path:* Receivables & Payables > Maintenance > Accounting > Role > Create

Create					i Errors & Overrides	$_{\mu^{k}}$ $\times$
Accounting Role Code *	Accounting F	ole Description *				
AcRole1368	Accounting	Role for Customer Number				
					Court	Cancel
					Save	Cancel

1. Refer the following table for specifying details in the above screen:

Note: Fields marked with '\*' are mandatory.

Field Name	Description
Accounting Role Code *	Enter the unique code for role to create.
Accounting Role Description *	Enter the description to associate with the role.

2. Click **Save** to save the data and send for authorization (if applicable).

#### 3.2.1.2 View Accounting Role

Through this screen, user can view, modify, delete, or authorize the accounting role.

*Navigation Path:* Receivables & Payables > Maintenance > Accounting > Role > View

C				
Accounting Role Code: JPCOUNTRY_CHQ_P Accounting Role Description:	Accounting Role Code: : BRN_COLL_ACC Accounting Role Description:	Accounting Role Code: : LINEREVACC Accounting Role Description:	Accounting Role Code: : CHGINC_ACC : Accounting Role Description:	Accounting Role Code: CORRGL_LOC_CHQ : Accounting Role Description:

Search Reset				

b. Click Search.

OR

Click Reset to reset the filter criteria.

- Click the refresh (<sup>CC</sup>) icon to refresh the records.
- Click the Options (:) icon and then click any of the below options:
  - **Unlock** To modify the record details. Refer the **Create Accounting Role** section for field level details.
  - **Authorize** To authorize the record. Authorizing requires necessary access rights.
    - Optional: Click View to view the record details.
    - Select the record to authorize and then click **Approve**.
  - **Delete/Close** To remove the record.
    - Optional: On the confirmation pop-up window, enter the remark for deletion.
    - Click **Confirm** to delete the record.
  - **Copy** To create a new accounting role by using similar details.
  - View To view accounting role details.
  - **Reopen** To reopen a closed record.

### 3.2.2 Entry Codes

#### 3.2.2.1 Create Entry Codes

This screen is used to create entry codes or Dr and Cr legs for an accounting entry.

Navigation Path: Receivables & Payables > Maintenance > Accounting > Entry Codes > Create

    - Select the record to authorize and then click **Approve**.
  - **Delete/Close** To remove the record.
    - Optional: On the confirmation pop-up window, enter the remark for deletion.
    - Click **Confirm** to delete the record.

- Copy To create a new internal account mapping by using similar details.
- **View** To view inter account mapping details.
- **Reopen** To reopen a closed record.

# 3.3 Maintaining Charges

Financial institutions can levy charges on services extended to corporates with respect to managing and financing receivables and payables, like documentation charges, handling charges and so on. These charges can be configured at default/global level for specific products or parties. The charges to be levied can be linked to specific events such as auto-debit, EOD, etc. Once configured, the charges would get levied for manual as well as auto processing mode for transactions.

Charge pricing is determined by configuring various pricing methods such as fixed amount, fixed percentage, slab based pricing, count based pricing and so on. The frequency of calculation and collection, such as, daily/weekly/monthly/yearly, can also be defined for a charge.

Banks are also empowered to configure flexible and preferential pricing as per corporate profile and assessment.

### 3.3.1 Charge Code

#### 3.3.1.1 Create Charge Code

Navigation Path: Receivables & Payables > Maintenance > Charges > Charge Code > Create

reate							i Errors & Overrides	» <sup>2</sup>

Min Charge Percent *		Max Charge Percent *							
3	× ^	5	× •						
From *		то *		Amount		Percent			
10			~ ^				~ ^		
								Add	Reset
1									

1. Refer to the following table for specifying details on the above screen:

Field Name	Description
Charge Pricing Description *	Enter the charge pricing or rule description.
Annum Basis *	Select the number of days to be considered in a year for tenor-based calculations.
Pricing Category *	Select the pricing category. Based on the selected category, pricing methods will be available.
Pricing Method *	Select the method to configure the charge pricing.
Pricing Currency *	Select the currency in which pricing is to be done.
Charge in Txn Currency	Switch the toggle ON if the charge should be levied in transaction currency otherwise charge will get levied in pricing currency.
Min/Max Validation Criteria	Specify whether the charge should be validated based on an amount range or a percentage range.
Min Charge Amount/Percent	Enter the minimum charge amount/percentage to be considered for validation. This field is displayed based on the value selected in the Min/Max Validation Criteria field.
Max Charge Amount/Percent	Enter the maximum charge amount/percentage to be considered for validation. This field is displayed based on the value selected in the Min/Max Validation Criteria field.
Fixed Amount **	Enter the charge amount. This field is displayed only when the pricing category is Fixed Amount.
Flat Charge	Switch the toggle On if flat charge should be applied. Tenor is not taken into account for calculation if the flat charge switch is enabled. This field is displayed only when the pricing category is Fixed Percent or Tier Based Percent.
Fixed Percent **	Enter the charge percentage. This field is displayed only when the pricing category is Fixed Percent.
From	Enter the start value of the amount/tenor/count range. This field is displayed only for a tier based pricing category.

Note: Fields marked with '\*' are mandatory and '\*\*' are conditionally mandatory.

Field Name	Description
То	Enter the final value of the amount/tenor/count range.
	This field is displayed only for a tier based pricing category.
Amount	Enter the charge amount.
	This field is displayed only when the pricing category is selected as Tier Based Amount or Tier Based Mixed. The pricing currency is considered.
Units	Enter the number of charge units.
	This field is displayed only when the pricing method is selected as Variable/Slab Amount by Number of Count.
Percent	Enter the charge percentage.
	This field is displayed only when the pricing category is selected as Tier Based Percent or Tier Based Mixed.

- 2. If required, click **Reset** to clear the selected values.
- 3. Click **Add** to add charge details in the grid.

b. Click Search.

OR

Click Reset to reset the filter criteria.

- Click the refresh (C) icon to refresh the records.
- Click the Options (i) icon and then click any of the below options:
  - **Unlock** To modify the record details. Refer the **Create Charge Rule Maintenance** section for field level details.
  - Authorize To authorize the code. Authorizing requires necessary access rights.
    - Optional: Click View to view the record details.
    - Select the record to authorize and then click **Confirm**.
  - Delete/Close To remove the record.
    - Optional: On the confirmation pop-up window, click **View** to view the record details.
    - Click **Proceed** to delete the record.
  - **Copy** To create a new charge rule maintenance with same details for a new corporate.
  - View To view the charge rule maintenance details.
  - **Reopen** To reopen a closed record.

### 3.3.3 Charge Decisioning

Using this screen, the charge rule template and charge code created through earlier screens, can be mapped to a specific product, program, event, and so on. The charge party (buyer / supplier / insurance company) can also be defined. The calculation and collection frequencies for the charge can be defined as well.

#### 3.3.3.1 Create Charge Decisioning

**Navigation Path:** Receivables & Payables > Maintenance > Charges > Charge Decisioning > Create

Field Name	Description
Reference Tenor Start Date *	Specify which date should be considered to calculate the start of charge tenor duration.
Reference Tenor End Date *	Specify which date should be considered to calculate the end of charge tenor duration.
Effective Date *	Click the Calendar icon to select the start date of the charge decisioning validity.
Expiry Date *	Click the Calendar icon to select the end date of the charge decisioning validity.
Auto Waive	Switch the toggle On to enable automatic charge waiving at the time of transaction processing.
	This field is displayed only if filter criteria is selected as 'Instrument Type Status Based'.
Allow Waive	Switch the toggle On to enable manual charge waiving at the time of transaction processing.
	If Auto Waive toggle is switched on, then this toggle is switched off and disabled by default.
Allow Pricing Modification	Switch the toggle On to allow pricing rule modification at the time of transaction processing.
	If Auto Waive toggle is switched on, then this toggle is switched off and disabled by default.
Allow Override	Switch the toggle On to enable overriding of charge amount at the time of transaction processing.
	If Auto Waive toggle is switched on, then this toggle is switched off and disabled by default.
	Collection Parameters
Collection Type *	Specify how the charge should be collected.
Frequency	Specify the frequency for charge collection. This field is displayed only when the collection type is batch.
Reference Period	Specify when the collection should take place for the selected frequency.
	For monthly or half-yearly frequency, the collection can take place either at the beginning of the period (BOP) or end of the period (EOP).
	For weekly frequency, the collection can happen on a specific day of the week,
	This field is displayed only when the collection type is batch.
Units	This field specifies whether the charge collection should take place as per units of specified frequency. If monthly frequency is specified and no. of units is 2, then the charge would be collected once in two months.
	This field is displayed only when the collection type is batch.
	Calculation Parameters
Calculation Type *	Specify how the charge should be calculated.
	Specify the frequency for charge calculation.

Field Name	Description
Reference Period	Specify when the calculation should take place for the selected frequency.
	For monthly or half-yearly frequency, the calculation can take place either at the beginning of the period (BOP) or end of the period (EOP).
	For weekly frequency, the calculation can happen on a specific day of the week.
	This field is displayed only when the calculation type is batch.
Units	This field specifies whether the charge collection should take place as per units of specified frequency. If monthly frequency is specified and no. of units is 2, then the charge would be collected once in two months. This field is displayed only when the calculation type is batch.
Add/Override Charges grid	The details of new charges added, appears in this grid.
Default Charges grid	The default charges configured for the selected event, appear in this grid, if you select the Inherit Default Charges option from the Inherit Charges list. These charges cannot be modified.

- 2. If required, click **Reset** to clear the selected values.
- 3. Click **Add** to add details in the grid.

# 3.4 Maintaining Commodity

By using 'Commodity' screens, back office user can maintain the commodity details specific to supplier required for creation of invoice data either through UI or upload.

## 3.4.1 Create Commodity

This screen is used to create a commodity record required for creation of invoice/PO record. Newly created record takes effect once authorized and cannot be modified thereafter.

Navigation Path: Receivables & Payables > Maintenance > Commodity > Create Commodity

Name *	Description	Tax(%)	
	19 Inch Tyres	2.0000	~ ~
Drigin	Vear		
tes 🔻	2021		
	Origin	19 Inch Tyres Origin Year	19 Inch Tyres 2.0000 Drigin Year

1. Refer to the following table for specifying details on the above screen:

Field Name	Description		
Supplier Id *	Click the Search icon and select the supplier's Id.		
	This field cannot be modified once authorized.		
Commodity Code *	Enter unique commodity code to be created.		
Commodity Name *	Name of the commodity to create.		
Description	Enter description of the commodity.		
Tax(%)	Enter the percentage of tax to be levied on commodity.		
Discount(%)	Enter the percentage of discount applicable on commodity.		

Note: Fields marked with '\*' are mandatory.

Field Name	Description
Country of Origin	Select the country where the commodity is originated from.
Year	Enter the year of origination.

- 2. If required, click **Reset** to clear the selected values.
- 3. Click Add/ Edit to add details in the grid.

Commodity Code	Commodity Name	Description	Tax(%)	Discount(%)	Country of Origin	Year	Unit Details	Action
CMD1759PEGA847	Tyres	19 Inch Tyres	2	1	USA	2021	Add/Edit	1
Page 1 of 1 (1 of 1 item:	s) K < 1 > X							

Perform the following steps to take action on the records in the grid:

- a. Select the record in the grid and then click Options (<sup>‡</sup>) icon under 'Action' column.
- b. To modify the details, click **Edit** and repeat the step 1, 2, and 3.

#### OR

To remove the record, click **Delete**.

c. In the 'Unit Details' column of the grid, click Add/Edit link to update the unit details.

nit		Minimum Unit			Maximum	i Unit			Unit Price		
ilogram		10	~	^	100		~	^	250	~	^
Add/Edit	Reset										
Unit	Minimum Unit	Maximum Unit	U	nit Pr	rice	Action					
KILOGRAM	10	100	25	0		ł					
Page 1	of 1 (1 of 1 items)	К < 1 > Я									

- i. In the **Unit** field, enter the measuring unit for the commodity.
- ii. In the Minimum Unit field, enter the minimum units required for the commodity.
- iii. In the Maximum Unit field, enter the maximum units allowed for the commodity.
- iv. In the Unit Price field, enter the price per single unit of a commodity.
- v. If required, click **Reset** to clear the selected values.

OR

Click Add/Edit to add records in the grid or modify the selected records.

- vi. Click **OK** to go the parent page.
- 4. Click **Save** to save the record and send for authorization.

### 3.4.2 View Commodity

By using this screen, user can view, modify, delete, or authorize commodity code details.

**Navigation Path:** Receivables & Payables > Maintenance > Commodity Code > View Commodity Code

View Commodity				$_{\mu^{k'}}$ $\times$

  - **Copy** To copy the division code details for creating a new record.
  - **View** To view the division code details.
  - **Reopen** To reopen a closed record.

## 3.6 Maintaining Reconciliation Rules

Reconciliation is one of the core modules of OBCM application which can be performed for two categories namely 'Invoice payment' and 'Cash flow payment'.

- Invoice/Debit Note with Payment: Any outstanding invoice/debit note due from buyer can be reconciled against payment(s), as per the reconciliation rules configured in the application.
- Cashflow with Payment: Any outstanding expected cash flow raised by a corporate in the application, can be reconciled against payment(s), as per the reconciliation rules configured for this category in the application.
- Invoice with Credit Note: Any outstanding invoice due from buyer can be reconciled against credit note(s), as per the reconciliation rules configured in the application.

## 3.6.1 Reconciliation Rule Definition

Back office user can configure recon rules for reconciliation category through this module. Two types of rules can be configured: 'Exact' and 'Generic'.

For the 'Exact' type of rule, attributes of one entity are mapped with attributes of another entity, e.g.: for 'Expected Debit/Credit to Payment' recon category attributes of expected debit/credit entity are mapped to attributes of payment entity and similarly for 'Invoice to Payment' recon category, attributes of invoice are mapped to attributed of payment for matching purpose. Also, multiple recon rules can be defined at global/default level or mapped to the corporate with priority assignment.

For the 'Generic' type of rule, user can configure generic reconciliation methods such as FIFO, LIFO, HAFO, and LAFO. As per selected method, one can choose 'Based on' attribute. For example, in 'FIFO' for Expected Cashflow recon category, one can choose 'Expected Date' or 'Revised Expected Date'. Similarly, in 'FIFO' for Invoice Payment recon category, one can choose 'Invoice Date' or 'Invoice Due Date'.

#### 3.6.1.1 Create Exact Reconciliation Rule Definition

This screen is used for setting up recon rule for 'Exact' reconciliation category.

**Navigation Path:** Receivables & Payables > Maintenance > Reconciliation > Reconciliation Rule Definition > Create

Create				🚺 Errors & Overrides 🛛 🔎 🗙
Rule Description *	Recon Category *		Recon Type *	Allocation Details
RULE1014EV	Finance Payment Recon	-	Exact Generic	Account Based 💌

1. Refer to the following table for specifying details on the above screen:

Field Name	Description
Rule Description *	Description of recon rule.
Recon Category *	<ul> <li>Select any one of the below category of recon for which rule is defined.</li> <li>Invoice/Debit Notes to Credit Notes Recon</li> <li>Invoice/Debit Notes to Payment Recon</li> <li>Expected Cashflow To Payment Recon</li> <li>Allocation of Payment to Virtual Accounts</li> </ul>
Recon Type *	Select <b>Exact</b> as the category of the Recon definition.
Allocation Details	If allocation required, then select the appropriate value to specify whether the allocation should be done based on the account or attribute of entity like cashflow/payment/invoice.

Note: Fields marked with '\*' are mandatory.

Exact Recon	
AND OR Add Condition	Add Group
Expected Cashflow Attribute * Operator * Fixed Value *	
Cashflow Type v = v Inflow	
Expected Cashflow Attribute * Operator * Fixed Value *	
Amount v > v 1000	•
Validate and Preview	
(Cashflow Type = Inflow)and(Amount > 1000)	

- 2. In the 'Exact Recon' section, perform the following steps to create conditions or group of conditions:
- a. Click Add Condition to add a single line of condition.

Or

Click Add Group to add a group of conditions.

- b. Click inside the added container to view buttons for adding condition details.
- c. Click **Text between** to define the range of text to be validated.
- d. Click **Invoice/Expected Cashflow Attributes** to define condition for invoice/cashflow details.

Or

Click **Payment Attributes** to define condition for payment details.

Below are all the attributes available for Invoice, Credit Note, Expected Cashflow, and Payment:

Invoice:

Base Invoice Amount	Buyer Name Net Invoice Amt.		Supplier Division Code
Bank	Invoice CCY	Payment Due Date	Supplier ID
Branch	Filler (4 attributes)	PO No.	Supplier Name
Buyer Code	Invoice Date	Repayment Account No.	
Buyer Division Code	Invoice Due Date	BIC/Routing Code	
Buyer ID	Invoice No. Supplier Code		

#### Credit Note:

Credit Note Number	Supplier Code	Credit Note Base Amount	Buyer Name
Credit Note Date	Buyer Id	Net Credit Note Amount	Supplier Name

Credit Note Number	Supplier Code	Credit Note Base Amount	Buyer Name
Credit Note Expiry Date	Supplier Id	Buyer Division Code	Filler (10 Attributes)
Buyer Code	Currency	Supplier Division Code	Remarks

#### Expected Cashflow:

External Reference No	Cashflow Type	Revised Expected Date	Narration/Remarks	
Corporate ID	Bank Account Number	Counterparty Name	Free Field (10 Attributes)	
Code	Amount	Counterparty Id	Customer Reference No	
Description	Expected Date	Virtual Account Number		

#### Payment:

Payment Date	Credit Account no.	Bank	Relationship Code
Virtual Account Owner	Entity Ref No.	Branch	Filler (10 Attributes)
Payment Mode	Payment Party Id	Instrument Date	Virtual Account Flag
Payment Party Code	Counterparty Id	Remarks	Payment Reference No
Counterparty Code	unterparty Code Beneficiary Id		
Debit-Credit Indicator	Remitter Account No	Payment Amount	

- e. Click **Operator** to specify how to compare defined values.
- f. Click Fixed Value, Text between, Invoice/Payment Attributes, Payment Attributes, or Cashflow/Payment Attributes (depending on the selected recon category) to specify values with which previously defined values should be compared.
- g. If required, repeat the steps "a" to "f" to add more conditions and or group of conditions.

Or

To remove condition, click the Delete icon (<sup>a</sup>) located at the right-bottom of the condition container.

- h. Click **AND** / **OR** to define how many conditions or combination of conditions should be matched in order to execute the recon rule.
- i. Click **Validate and Preview** to check if the added conditions are valid or not.

Allocation Basis Grid			
		+	
Allocation Attribute	Percentage	Action	
Buyer ID ×	50	<b>*</b>	
Supplier ID 🗙	50	1	
Page 1 (1 of 2 items) K < 1	К		
			Save

- 3. In the 'Allocation Basis Grid' section, perform the following steps to define percentage of account/attribute allocation:
- a. Click **Add** to add a new row.
- b. Double click the row to add/edit attribute and percentage.
- c. Repeat the step "a" and "b" to add more attributes.

Or

If required, click the Delete icon ( ) under 'Action' column to remove the allocation row.

4. Click **Save** to save the data and send for authorization.

#### 3.6.1.2 Create Generic Reconciliation Rule Definition

This screen is used for setting up 'Generic' recon rule.

**Navigation Path:** Receivables & Payables > Maintenance > Reconciliation > Recon Rule Definition > Create

Create				i Errors & Overrides 🕺 💉 🗙
Rule Description *	Recon Category *		Recon Type *	Allocation Details
BaseGen	Invoice Payment Recon	Ŧ	Exact Generic	Attribute Based 💌

1. Refer to the following table for specifying details on the above screen:

Note: Fields marked with '\*' are mandatory.

Field Name	Description			
Rule Description *	Description of recon rule.			
Recon Category *	<ul> <li>Select any one of the below categories of recon for which rule is defined.</li> <li>Invoice/Debit Notes to Credit Notes Recon</li> <li>Invoice/Debit Notes to Payment Recon</li> <li>Expected Cashflow To Payment Recon</li> <li>Allocation of Payment to Virtual Accounts</li> </ul>			
Recon Type *	Select <b>Generic</b> as the category of the Recon definition.			
Allocation Basis	If required, select the value to specify whether the allocation should be done based on account or attribute.			

Generic Recon				
Base Entity	Generic Criteria *		Based On Attribute *	
Invoice	HAFO	T.	Outstanding Invoice Amount	Ŧ

2. In the 'Generic Recon' section, perform the following steps:

Note: The 'Base Entity' is auto-populated based on selected 'Recon Category'.

- a. In the Generic Criteria list, select the generic rule to be defined. viz. FIFO First In First Out, LIFO – Last In First Out, HAFO – Highest Amount First Out and LAFO – Least Amount First Out.
- b. In the **Based On Attribute** list, select the entity (invoice/cashflow) attribute on which the rule would be based. The available attributes are based on the combination of selected recon category and generic criteria.

Allocation Basis Grid				
<b>•</b>

1. Refer to the following table for specifying details on the above screen:

Field Name	Description
Filter Criteria *	Select the appropriate filter criteria for specific application of recon rule decisioning. This is the level to which the reconciliation rule is mapped Select any one of the below filter criteria to map the recon rule specifically to it:
	Program and Counterparty Based (Only for OBSCF)
	Program Based (Only for OBSCF)
	Corporate Based
	CounterParty Based
	Relationship and CounterParty Based
	Relationship Based
	Default

Note: Fields marked with '\*' are mandatory.

Field Name	Description
Program *	Click the Search icon and select the program to setup the recon rule for. This field is displayed only if 'Filter Criteria' includes program. This field is applicable to only OBSCF system.
Counterparty Id *	Click the Search icon and select the counterparty to setup the recon rule for.
	This field is displayed only if 'Filter Criteria' includes counterparty.
Corporate *	Click the Search icon and select the corporate to setup the recon rule for.
	This field is displayed only if 'Filter Criteria' includes corporate.
Relationship Code *	Click the Search icon and select the relationship to setup the recon rule for.
	This field is displayed only if 'Filter Criteria' includes relationship.
Priority *	The rules would get applied based on the ascending order of priority maintained here.
Recon Category *	Category of recon rule being mapped.
	For example: 'Expected Debit/Credit to Payment Recon', or 'Invoice Payment Recon'.
Recon Type *	User can selected either 'Generic' or 'Exact' rule.
Rule Id *	Once the recon category and type is selected, then user can search for all the existing rules available for recon category and type.
Rule Id Description	This is automatically populated based on the rule id selected.
Execute Generic Recon	User can select this if generic recon is to be executed if there are more than one matching records post exact reconciliation and if generic recon rule is to be executed for matching outstanding payment to invoice or cashflow.

- 2. If required, click **Reset** to clear the selected values.
- 3. Click Add/ Edit to add details in the grid.

#### OR

Perform the following steps to take action on the records in the grid:

- a. Select the record in the grid and then click Options (<sup>1</sup>) icon under 'Action' column.
- b. To modify the details, click **Edit** and repeat the step 1, 2, and 3.

OR

To remove the record, click **Delete**.

4. Click **Save** to save the data and send for authorization.

# 3.7 Maintaining Tolerance

Reconciliation of repayments with invoices/cashflows are executed basis configured exact and generic reconciliation rules such as FIFO, LIFO etc. Through this functionality, user can configure an acceptable discrepancy between invoice/cashflow outstanding amount and payment amount to enable automatic matching of invoices/cashflow with the respective payment records. Tolerances allow outstanding payments and invoice/ cashflow records to match even if the respective amount differ. Similarly, tolerance can be configured for other categories as well. Without the tolerance configuration, user intervention would be required for matching invoices/cash-flows and payment records that does not have equated amounts.

### 3.7.1 Create Tolerance

This screen is used to create a tolerance. Newly created tolerance takes effect once authorized and cannot be modified thereafter.

*Navigation Path:* Receivables & Payables > Maintenance > Tolerance > Create Tolerance

1. Refer to the following table for specifying details in the above screen:

Note: Fields marked with '*	' are mandatory.
Field Name	Description
Filter Criteria *	Select the appropriate filter criteria for specific application of tolerance.

Field Name	Description
Program *	This field is only applicable for OBSCF system. Click the Search icon and select the program.
	This field is only displayed when filter criteria includes 'Program'.
Spoke *	This field is only applicable for OBSCF system. Click the Search icon and select the spoke of the selected program. This field is only displayed when filter criteria includes 'Spoke'.
Relationship Code *	Click the Search icon and select the relationship code This field is only displayed when filter criteria includes 'Relationship'.
Counterparty Id *	Click the Search icon and select the counterparty id This field is only displayed when filter criteria includes 'Counterparty'.
Party *	Click the Search icon and select the party This field is only displayed when filter criteria includes 'Party'.

- 2. Click the Add icon (1) to add rows in the grid.
- 3. In the 'Action' column of grid, perform the following steps:
- Click Delete icon ( $\square$ ) to remove that specific row.

### OR

• Click Edit icon ( $\square$ ) and refer to the following table for specifying details in the grid:

Field Name	Description
Recon Category	Select the recon category to add the tolerance for.
Cash Flow Category	The cashflow category is auto-populated based on selected recon category.
Match Basis	Select the value to be matched from the reconciliation record. For example: AMOUNT.
Currency	Select the currency to be considered for threshold amount/percentage.
Absolute Lower Threshold	Enter the lower absolute variance of either amount.
Absolute Upper Threshold	Enter the upper absolute variance of either amount.
Percentage Lower Threshold	Enter the lower percentage variance of either amount.
Percentage Upper Threshold	Enter the upper percentage variance of either amount.

4. Click **Save** to save the record and send for authorization.

## 3.7.2 View Tolerance

By using this screen, user can view, modify, delete, or authorize tolerance details.

Navigation Path: Receivables & Payables > Maintenance > Tolerance > View Tolerance

९ <b>с</b>

# 3.9 Maintaining Relationships

With this functionality, corporates/back office user can create linkage between corporates and counterparty. Corporate/Back office users can link their customers or non-customers as counterparties through this module. In case, if record of non-customer to be linked is not established in the application then the same can be created through this UI.

### 3.9.1 Create Relationship

Using this UI, create relationship between corporates and buyers, or suppliers counterparties. Newly created relationships take effect once authorized and cannot be modified post authorization. However, the counterparty can be added/modified.

**Navigation Path:** Receivables & Payables > Maintenance > Relationship Management > Create Relationship

# **5. Receivables and Payables Management**

The 'Receivable and Payables Management' screen helps you to process and take various actions on instruments (Invoices/Purchase Order/Debit Note/Invoice & Dr Note). User can search the instruments based on the various parameters such as file name, reference number, supplier, date range, amount range, and so on.

After creating/searching an existing instrument, below is a list of actions user can take to manage them:

- Accept
- Assign (Only for OBSCF)
- Cancel
- Edit
- Initiate Finance (Only for OBSCF)
- Link Program (Only for OBSCF)
- Raise Dispute
- Re-assign (Only for OBSCF)
- Resolve Dispute
- Write off Dispute
- Mark PUA (Only for OBSCF)
- Mark Indirect Payment (Only for OBSCF)
- Accept Early Payment Offer (Only for OBSCF)

#### Navigation Path: Receivables & Payables > Receivables & Payables Management

# 6. Machine Learning

The **Machine Learning** module helps you to train the system for feeding the invoice/PO details. By using NLP toolkit under Machine Learning, user can train the system to fetch data from images (pdf or jpg format) of invoice/PO. Invoice engine reads the data extracted from images and creates invoices from the same.

## 6.1 Create Use Case

This screen is used to create, modify, authorize, and view the use cases to be utilized for machine learning.

२ <b>८</b> +				
Usecase Name: : Corporate Invoice	Usecase Name: :	Usecase Name: : Corporate PO OBDX	Usecase Name: Corporate Invoice OBDX	Usecase Name: Corporate Purchase Order

	1		Invoice Number	InvNum	Υ		
	2		Invoice Amount	InvAmt	Υ		
Page 1	of 1 (1 of 2 items) K <	1 > >					

Perform the following steps to add information about the tags:

- 1. In the Use Case Name field, enter name of the use case to be defined.
  - 2. In the **Description** field, enter the description of the use case.

- 3. In the **Straight Through Processing** option, select **Yes** in case if the use case should be auto-processed without user intervention. Else, select **No**.
- 4. Click the Add icon ( to add a row for tag information.
- 5. Double click on the row in table edit the tag details.
- 6. To remove a row, select the row and then click the Remove (
- 7. Click **Save** to create the use case and send for authorization.

### 6.2 Create Annotated File

This screen is used to create an annotated file where, a user can insert an invoice/PO image file and tag the labels to extract the values from images. By using this sub-menu, user can create the annotated file.

Annotator					, <sup>2</sup> ×
Action Type  Create New Annotated File  Edit Created Annotated File  Error Correction	Source File Definition Source File: Annotated File: Retrieved Doc Id:	on Source File Name Annotated file name Retrieved Doc Id	Select File Select File Get File	Document Type Select Annotated File Name: Source File Name.txt	Get Labels  Create Training File

Perform the following steps to filter the processing dashboard table:

- 4. In the **Document Type** list, select Corporate Invoice/Purchase Order.
- 5. In the Status list, select the current status of the document to filter the data.
- 6. Click refresh icon  $( \bigcirc )$  to reload the tabular data.

## 7. Manual Allocation

The **Manual Allocation** screen helps you to allocate payments in virtual accounts. Only payments that are unallocated or partially allocated with the 'Allocation Required' flag set to "Y" in the payment records can be manually allocated from this screen.

Navigation Path: Receivables & Payables > Manual Allocation

Manual Allocation						,, <sup>12</sup> ×
Branch *		Action *		Processing Date		
004-LM BRANCH	×	Select	<b>.</b>	Jan 20, 2020	Proceed	

Perform the following steps to manually allocate payments:

- 1. In the **Branch** list, select the branch for which payment allocation needs to be done. By default, branch of the logged-in user is selected.
- 2. In the **Action** list, select the action as 'Allocate' or 'De-Allocate' for allocation or de-allocation of the payment respectively.
- 3. Click Proceed to view the search parameters to search payment record(s).

Payment Reference Number		Payment Mode		Debit-Credit Indicator		Payment Party

Search Reset							

4. Refer to the following table for specifying the search criteria:

Field Name	Description
Payment Reference Number	Enter the payment reference number to be searched.
Payment Mode	Select the mode of payment to search the payment by.
Debit-Credit Indicator	Select the value to specify whether the payment is for credit or debit.
Payment Party	Click the Search icon and select the party making the payment.
Counter Party	Click the Search icon and select the counter-party for the payment.
Beneficiary	Click the Search icon and select the beneficiary of the payment.
Account Owner	Click the Search icon and select the owner of the account.
Remitter Account Number	Click the Search icon and select the remitter's account number used for the payment.

Note: At least one criteria should be populated to fetch the search result.

Field Name	Description
Credit Account Number	Click the Search icon and select the account of the beneficiary.
Payment Towards	<ul> <li>Select the entity for towards which the payment has been initiated:</li> <li>None</li> <li>Finance</li> <li>Invoice</li> <li>Expected Cashflow</li> <li>Virtual Account</li> </ul>
Recon Status	Select the current recon status of the payment.
Allocation Status	Select the allocation status for reconciliation of the payment.
Amount Reference	Select the value to specify the reference for amount criteria.
Currency	Select the currency of the amount.
Amount From	Enter start of the amount-range within which the payment needs to be searched.
Amount To	Enter end of the amount-range within which the payment needs to be searched.
Date Reference Basis	Select the value to specify the reference for date criteria.
Date From	Click the Calendar icon and select the starting-range of the payment/value date.
Date To	Click the Calendar icon and select the range-ending of the payment/value date.

- 5. Click Search to view the payment records in the 'List of Payments' section.
- 6. Based on the option selected from the Action list, perform further steps:
  - If Allocate option is selected:

		Allocation	1			Sumr	nary	
st of I	Payments							
	Payment Ref No	Debit-Credit Indicator	Payment Party	Value Date	Unallocated Payment Amt	Amt to be Allocated	Allocation Basis	Allocation Details

Page 1 of 1 (1 of 1 items)	< < 1 > >			
				Save Close

- d. Perform the following steps in the 'Allocation Details' pop-up screen:
  - i. Click the Add icon (1) to add a row for a virtual account and double click in each field of the row to add/edit the details.
  - ii. In the **Allocation Attribute** field, select the attribute to allocate the virtual account for. This field is displayed only for attribute based allocation selection.
  - iii. In the **Virtual Account** field, click the Search icon to fetch and then select the virtual account to be allocated. This fields is displayed only for account based allocation selection.
  - iv. In the **Amount Allocated** field, enter the amount to be allocated to the selected virtual account. The **Percentage** field is auto-calculated based on total amount to be allocated.
  - v. In the **Percentage** field, enter the percentage of the amount being allocated. The **Amount Allocated** field is auto-calculated based on total amount to be allocated.
  - vi. If required, repeat the steps from 'a' to 'e' to add more rows. Click Delete icon
     (a) to remove a row or Edit icon (a) to modify the allocation details
  - vii. Click Save to save the allocation details.
- e. Click **Proceed** to view the allocation summary.

RECONOCT1801		Carrefour			Danone	USD50,000.00	USD30,000.00
Allocation Attribute	Virtual A	Account	Amount Al	located	Percentage		
CREDIT_ACC_NO	1000160		USD15,00	0.00	50		
REMITTER_ACC_NO	1000014		USD15,00	0.00	50		

- f. If required, click **Expand All** to view allocation details or **Collapse All** to hide the same.
- g. Click **Submit** to send the record(s) for authorization.
- If **De-Allocate** option is selected:

Payment Ref No	Debit-Credit Indicator	Payment Party	Counter Party	Value Date	Payment Amount	Allocated Payment Amount	Date Of Allocati
AUTOPAYMENT1JUN2021V01	Debit	RELIANCE	cust215	2020-01-09	USD 60,000.00	USD 500.00	2020-01-15
sonalpmt20033	Debit	RELIANCE	ABZ Solutions	2019-12-31	GBP 5,200.00	GBP 120.00	2020-01-16

- a. Select the payment to be de-allocated.
  b. Click **Proceed**. A message for confirming the de-allocation appears.
  c. Click **Confirm**. A message displaying the status of the transaction appears.

## 8. Manual Recon

The 'Manual Recon' screen helps to manually 'Reconcile' or 'De Reconcile' the payments/credit notes against invoices or cashflows in case of exceptions in the auto recon process.

In manual reconciliation, back-office user can search and reconcile records basis on invoice related attributes, payment related attribute, or cashflow related attributes depending upon the selected reconciliation category. From the search result, user can choose how to reconcile the data i.e. 'One Invoice to Many Payments' or 'Many Invoice to One Payment' or 'One Cashflow to Many Payment' etc.

Similarly, user can de-reconcile any record that was reconciled manually or automatically. This is useful to correct the reconciliation, incorrectly done manually or by automatic rule engine.

User can select a value from the list for the field 'Reconciled by'. Based on the value selected, the grid below will enable/disable 'Invoices/Cashflows' and/or 'Payments' row post selection.

Navigation Path: Receivables & Payables > Manual Recon

### 8.1 Search

The parameters to search the transactions for performing the manual reconciliation differs as per the recon category. Mainly there are two categories viz. 'Invoice/Debit Notes to Payments/Credit Notes' and 'Expected Cashflow to Payments'.

#### 8.1.1 Invoice/Debit Notes to Payments/Credit Notes recon

Perform the following steps for searching the invoices/payments to reconcile or de-reconcile.

tion *		Recon Category *		Branch *		Processing Date

- 1. In the Action field, select the action to be performed as 'Reconcile' or 'De Reconcile'.
  - 2. In the **Recon Category** list, select the category as 'Invoice/Debit Notes to Payment/Credit Notes.
  - 3. In the **Branch** list, select the branch for which reconciliation needs to be done. By default, branch of the logged-in user is selected.
  - 4. Click **Proceed** to view the search parameters to search transactions.

Refer to the following table for specifying details on the above search screen:

Field Name	Description
Reconcile Method	Specify whether the reconciliation was done by using 'Auto' or 'Manual' method.
	This field is displayed only when 'Action' is selected as 'De Reconcile'.
Reconciliation	Click the Search icon to select the reconciliation reference number.
Reference No	This field is mandatory and displayed for only 'Manual' de-reconciliation method.
Reconcile Date From	Click the Calendar icon to specify start date of range within which record was reconciled.
	This field is displayed only when 'Action' is selected as 'De Reconcile'.
Reconcile Date To	Click the Calendar icon to specify end date of range within which record was reconciled.
	This field is displayed only when 'Action' is selected as 'De Reconcile'.
	Invoices
Buyer	Click the Search icon to search buyer mentioned in the invoice.
Supplier	Click the Search icon to search supplier by whom invoice is generated.
Invoice Number	Enter the specific internal invoice reference number to search.
Invoice Currency	Enter the currency selected for Invoice.
Date Reference Basis	Select the value to specify the reference for date criteria.

Copyright @ 2022

Field Name	Description
Date From	Click the Calendar icon to specify the start date of range for selected date reference basis.
Date To	Click the Calendar icon to specify the end date of range for selected date reference basis.
Relationship	Click the Search icon to select the relationship code used in the transaction.
Program	Click the Search icon to select the program linked with the invoice. This field is applicable to only OBSCF system.
Amount Reference Basis	Select the reference basis of the amount range as base invoice amount or net invoice amount.
Amount From	Enter the lowest amount of the range.
Amount To	Enter the highest amount of the range.
Account Number	Click the Search icon to select the account number. This field is enabled only after selecting supplier.
	Payments
Payment Number	Enter the unique reference number generated while making a payment.
Date Reference Basis	Select the reference basis of the date range as payment date or value date.
Date From	Click the Calendar icon and select the start of the date-range.
Date To	Click the Calendar icon and select the end of the date-range.
Payment Party	Click the Search icon to select the party who made the payment.
Beneficiary Id	Click the Search icon to select the beneficiary id or name who received the payment. In case if supplier is selected in the 'Invoice' search parameter; then the same gets auto-populated here.
Payment Towards	Select the option that the payment is to be made towards.
Remarks	Enter the remarks added in the transaction.
Counter Party	Click the Search icon to select the counterparty.
Payment Mode	Select the mode by using which payment was done. For example: Account Transfer, NEFT etc.
Debit-Credit Indicator	Select the value to specify whether the transaction is of debit or credit type.
Remitter Account Number	Click the Search icon and select the remitter account of the transaction.
Credit Account Number	Click the Search icon and select the account credited with the amount.
Payment Currency	Select the currency in which payment is done.
Amount From	Select the minimum amount of the payment range.
Amount To	Select the maximum amount of the payment range.

Field Name	Description
Account Owner	Click the Search icon and select the owner of the account.
Relationship	Click the Search icon to select the relationship code used in the transaction.
Program	Click the Search icon to select the linked program.
	This field is applicable to only OBSCF system.
	Credit Notes
Credit Note Number	Enter the unique reference number generated for the credit note.
Buyer	Click the Search icon to search buyer mentioned in the credit note.
Supplier	Click the Search icon to search supplier by whom credit note is generated.
Remarks	Enter the remarks added in the transaction.
Currency	Enter the currency selected for credit note.
Amount From	Select the minimum amount of the credit note range.
Amount To	Select the maximum amount of the credit note range.
Relationship	Click the Search icon to select the relationship code used in the transaction.
Date Reference Basis	Select the reference basis of the date range as payment date or value date.
Date From	Click the Calendar icon and select the start of the date-range.
Date To	Click the Calendar icon and select the end of the date-range.
Program	Click the Search icon to select the linked program.
	This field is applicable to only OBSCF system.

- 5. Optional: Click **Reset** clear the selected values.
- 6. Click **Search** to view the result.

- 4. Perform the following steps to allocate payment manually:
- a. In the **Allocation Required** column, enable the toggle to allocate account and percentage.
- b. In the Virtual Account column, select the account to be allocated.
- c. In the **Allocated Amount** column, enter the amount to be allocated for the respective virtual account.
- d. In the **Percentage** column, enter the percentage of the amount.
- 5. Click **Submit** to confirm the reconciliation and send the record for authorization.

## 8.3 De-Reconcile

User can use this option to de-reconcile 'Invoice/Debit Notes to Payment/Credit Notes' or 'Expected Cashflow to Payment' that are reconciled incorrectly due to some erroneous mapping of payments to an invoice/cashflow either automatically or manually. This screen allows you to select multiple records or single record to de-reconcile.

Perform the following action on the search result displayed in the grid:

- 1. Select the records to de-reconcile.
  - 2. Click **Proceed** to send the record for authorization of de-reconciliation.

## 9. Payment Management

The **Payment Management** screen helps you to stop the payment from being reconciled automatically or manually. By using this screen, user can mark the payment for 'Not to be Reconciled' or 'Not to be Auto-Reconciled'.

*Navigation Path:* Receivables & Payables > Payment Management

ranch *		Action *		Processing Date				
004-LM BRANCH	Ŧ	Not to be Recon	×	Jan 20, 2020		Proceed

Perform the following steps to manage payment:

- 1. In the **Branch** list, select the branch for which the payment needs to be managed.
- 2. In the Action list, select any one of the following:
- Not to be Recon: To stop payment from being manually reconciled.
- Not to be Auto-Recon: To stop payment from being automatically reconciled.
- 3. Click **Proceed** to view the search parameters.
- 4. Refer to the following table for specifying the search criteria:

Note: At least one criteria should be populated to fetch the search result.

Field Name	Description
Payment Reference Number	Enter the payment reference number to be searched.
Payment Mode	Select the mode of payment to search the payment by.
Debit-Credit Indicator	Select the value to specify whether the payment is of type credit or debit.
Payment Party	Click the Search icon and select the party making the payment.
Counter Party	Click the Search icon and select the counter-party for the payment.
Beneficiary	Click the Search icon and select the beneficiary of the payment.
Remitter Account Number	Click the Search icon and select the remitter's account number used for the payment.
Credit Account Number	Click the Search icon and select the account of the beneficiary.

Field Name	Description
Payment Towards	Select the entity towards which the payment has been initiated i.e. Invoice (I) or Cashflow (E).
Recon Status	Select the current recon status of the payment.
Allocation Status	Select the allocation status of the payment.
Amount Reference	Select the value to specify the reference for amount criteria.
Currency	Select the currency of the amount.
Amount From	Enter start of the amount-range within which the payment needs to be searched.
Amount To	Enter end of the amount-range within which the payment needs to be searched.
Date Reference Basis	Select the value to specify the reference for date criteria.
Date From	Click the Calendar icon and select the starting-range of the payment/value date.
Date To	Click the Calendar icon and select the range-ending of the payment/value date.

#### 5. Click **Search** to view the payment records in the 'List of Payments' section.

pay102         C         Carrefour         2019-08-08         \$2,590.00           pay101         C         Future Group         2019-08-08         \$2,550.00	Payment Amount	Value Date	Counter Party	Payment Party	D-C Indicator	Payment Ref No

6. Select the payment records to process and then click **Submit** to send the records for authorization.

# 10. Managing Files

The File Management functionality helps you to upload files in a pre-defined format. These files are auto-processed by the system based on its type and set rules. The process is mainly divided into two screens, i.e. 'File Upload' to feed the data into the system and 'View File Upload Status' to manage the uploaded files.

## 10.1 Upload Files

This screen is used to upload files for auto-processing the data into system. The uploaded files are not processed until it is approved. The file can contain data records of invoices, purchase orders, payments, counterparties etc. The file format accepted by the system includes ".csv" files.

1. Refer to the following table for specifying details on the above screen:

Note: Select the value for at least one mandatory field to search payment details. Fields marked with '\*' are mandatory and marked with '\*\*' are conditionally mandatory.

Field Name	Description
File Name *	Enter the file name to search the
Payment Reference Number *	Enter the unique payment reference number to search for. It is generated by the remitting bank in case of EFT credit and host bank in case of account transfer or debit.
Debit-Credit Indicator	Select the payment type as debit or credit to search for.
Payment Party *	Click the Search icon and select the party who has made the payment.
Counter Party *	Click the Search icon and select the counterparty.
Beneficiary	Click the Search icon and select the beneficiary of the payment.
Credit Account No	Enter the account number into which the payment is credited.
Remitter Account No	Enter the account number from which the payment is debited.
Payment Mode	Select the mode through which payment is made.
Bank	Enter the bank name included in the payment details.
Entity Reference No	Enter the entity reference number linked with the payment.
Relationship	Click the Search icon and select the relationship code of the payment party or counterparty.
Program	Click the Search icon and select the program of the payment party or counterparty. This field is applicable only for OBSCF system.
Currency	Select the currency in which the payment is made.
Payment Amount From	Enter the lowest payment amount of the range.
Payment Amount To	Enter the highest payment amount of the range.
Remarks	Enter the remarks added in the payment transaction.

Field Name	Description
Date Reference Basis *	Select the reference basis of the date range as 'Payment Date' or 'Value Date'.
Date Range	Click the Calendar icon and select start date and end date of the date range. Maximum date range can be of 1 year.
Recon Status	Select the reconciliation status of the payment to search from. User can select multiple recon statuses.
Allocation Status	Select the payment allocation status to filter the search result.

2. Click **Search** to view the search result in the grid.

## 12. Batch Jobs

There are several activities required to be performed on a daily basis in the system. These activities are run by the system as a batch job at the beginning and/or end of the day. This chapter includes the events that are part of Beginning of Day (BOD) and End of Day (EOD) batch jobs run by the system on daily basis.

### 12.1 EOD Batch

Refer to the section 3.5 of the Oracle Banking Common Core User Guide to Configure, Invoke, and View the EOD batch jobs.

**Note:** Events marked with \* are always executed. Below batch job events are only available if the Receivables and Payables module is integrated with OBSCF system.

Sr. No.	Event Name	Description
1	Stale Invoice *	This event marks the Invoices as stale based on the configured settings for each product.
2	Stale PO *	This event marks the POs as stale based on the configured settings for each product.
3	Invoice Acceptance *	This event changes invoice status as accepted based on the configurations set in the system.
4	Overdue Invoices *	Updating the invoices as overdue.
5	Invoice Charges *	This event calculates the charges for invoices. Invoices are grouped into different bunches and all the applicable charges are applied for the particular bunch. Once the charges are applied, those are calculated immediately if they are online charges. In case of periodic charges, charges are calculated if the charge calculation date matches with the business date on which EOD is run. Accounting entries are posted once charges are calculated.
6	PO Charges *	This event calculates charges for the purchase orders. Purchase orders are grouped into different bunches and all the applicable charges are applied for a particular bunch. Once the charges are applied, those are calculated immediately if they are online charges. In case of periodic charges, charges are calculated if the charge calculation date matches with the business date on which EOD is run. Accounting entries posted once charges are calculated.
7	Charges Batch Processing *	This event calculates & collect periodic charges. All the charges for all the transactions present in the system are calculated and account entries are posted if the charge calculation date matches with the business date on which EOD is run.

### 12.2 Independent Batch

Refer to the section 2 of the Tasks User Guide to Create, View, Configure, Trigger, and View status of the tasks.

Sr. No.	Event Name	Description
1	Auto-Reconciliation	This event reconciles transactions for invoice, debit note, and finance, with payment/credit note based on configured auto-recon rules.
2	Future Dated Disbursement Processing	This event processes transactions with future dated disbursements.
3	Auto Debit Finance	This event processes auto debits for finance transactions as per configurations set in the system.
4	Auto Debit Invoice	This event processes auto debits for invoice transactions as per configurations set in the system.

## **13. Process Codes**

### 13.1 Cash Management

Following table represents the manual stages in Cash Management workflow along with the functional activity codes which can be used for mapping in role activity screen under SMS menu.

Refer to the Role section of the Oracle Banking Security Management System User guide to understand procedure for creating roles and assigning activity to it.

Stage	Functional Activity Code	Description
Processing	CMS_FA_MANUAL_E NRICHMENT	This is the processing stage of instrument collection where the maker can submit/reject an entry of instrument. If the entry is rejected, the record will be deleted and if submitted, then the transaction will be sent to the Authorization stage.
Authorization	CMS_FA_AUTHORIS ATION	This is the authorization stage of instrument collection / instrument management, where the checker can approve/reject an entry of instrument.
Rework	CMS_FA_CMSWK_R EWORK	If the checker rejects an entry, it goes to the rework stage where the maker can do the required modifications to the entry and submit it again.
Posting Accounting Entries Exception	CMS_FA_POSTING_ ACC_EXCEPTION	This is the accounting-posting workflow stage exception, where posting to FCUBS fails due to errors. These errors need to be resolved.
Accounting Generation Exception	CMS_FA_ACC_GEN_ EXCEPTION	This is the accounting-generation workflow stage exception, where accounting generation fails due to accounting setup errors. These accounting setup errors need to be resolved.

#### 13.2 Recon

Following table represents the manual stages in Recon workflow along with the functional activity codes which can be used for mapping in role activity screen under SMS menu.

Refer to the Role section of the Oracle Banking Security Management System User guide to understand procedure for creating roles and assigning activity to it.

Stage	Functional Activity Code	Description
Processing	SCFCM_FA_PROCES SING_AUTH_REJECT	This is a stage before authorization in which transaction is under processing before rejection.
CL Exception	SCFCM_FA_CL_EXC EPTION	This stage is after authorization and transaction falls in this stage when integration for corporate lending is configured as 'Yes' in system parameters with another product and it fails.
Accounting Regeneration Exception	SCFCM_FA_AC_REG EN_EXCEPTION	This stage is after authorization and transaction falls in this stage when integration for accounting entries re- generation is configured as 'Yes' in system parameters with another product and regenerating the same fails.
Authorization	SCFCM_FA_PROCES SING_AUTH	This is authorization step wherein user can either Approve/Reject the record. Transaction falls in this stage when auto- authorization is disabled in Product/Program parameters.
Accounting Post Exception	SCFCM_FA_ACC_PO ST_EX	This stage is after authorization and transaction falls in this stage when accounting entries posting integration is configured as 'Yes' in system parameters with another product and posting fails.
Limits Update Exception	SCFCM_FA_LIMITS_ UPD_EX	This stage is after authorization and transaction falls in this stage when limits utilization/release fails due to technical error. The user can retry the transaction after the technical error is resolved.
VAM Integration Exception	SCFCM_VAM_INTG_ AUTH	This stage is after authorization and transaction falls in this stage when integration with virtual account management system fails.
Master Update Retry	SCFCM_FA_MASTER _UPDATE_ERROR	This stage is after authorization and transaction falls in this stage when work table to main table approval update fails due to technical errors. The user can retry the transaction after the technical error is resolved.

#### 13.3 Instrument

Following table represents the manual stages in Instrument workflow along with the functional activity codes which can be used for mapping in role activity screen under SMS menu.

Refer to the Role section of the Oracle Banking Security Management System User guide to understand procedure for creating roles and assigning activity to it.

Stage	Functional Activity Code	Description
MITagCorrection	SCFCM_FA_TXN_CR EATE_EXCEPTION	The transaction falls in this stage when transaction is not automatically created through file upload due to missing of tags.
Create Instrument Exception	SCFCM_FA_TXN_CR EATE_EXCEPTION	This is a stage before authorization and transaction falls in this stage if there is a technical error while creating a transaction for instrument.
Processing	SCFCM_FA_TXN_PR OC	This is a stage before authorization and transaction falls in this stage when auto- processing is disabled in Program/Product parameters.
Transaction Rejection Approval	SCFCM_FA_TXN_RE JECTION	This is a stage after authorization and transaction falls in this stage when it is rejected.
CL Exception	SCFCM_FA_CL_EXC EPTION	This stage is after authorization and transaction falls in this stage when integration for corporate lending is configured as 'Yes' in system parameters with another product and it fails.
Accounting Regeneration Exception	SCFCM_FA_AC_REG EN_EXCEPTION	This stage is after authorization and transaction falls in this stage when integration for accounting entries re- generation is configured as 'Yes' in system parameters with another product and regenerating the same fails.
Authorization	SCFCM_FA_TXN_AU TH	This is authorization step wherein user can either Approve/Reject the record. Transaction falls in this stage when auto- authorization is disabled in Product/Program parameters.
Accounting Post Exception	SCFCM_FA_ACC_PO ST_EX	This stage is after authorization and transaction falls in this stage when accounting entries posting integration is configured as 'Yes' in system parameters with another product and posting fails.
Limits Update Exception	SCFCM_FA_LIMITS_ UPD_EX	This stage is after authorization and transaction falls in this stage when limits utilization/release fails due to technical error. The user can retry the transaction after the technical error is resolved.

Stage	Functional Activity Code	Description
Instrument Master Update Exception	SCFCM_FA_MASTER _UPD_EXCEPTION	This stage is after authorization and transaction falls in this stage when update of linked instrument in the master table fails due to technical errors. The user can retry the transaction after the technical error is resolved.
File Upload Exception	SCFCM_FA_FILE_UP LOAD_EX	This is a stage before authorization and transaction falls in this stage when upload of file fails.
Portal Response Exception	SCFCM_FA_PORTAL _RES_EX	This is a stage where in portal does not respond due to the technical error. The user can retry the transaction after the technical error is resolved.
