Table of Contents

1.1   Background

Oracle Financial Services Software Limited has developed Oracle Banking Branch, which enable banks to streamline their retail branch operations. Oracle Banking Branch is a retail banking application that handles the retail branch operations including both branch and customer transactions. This application also helps Teller to get the 360-degree view of the Customer while performing the Customer transactions. This application enables to provide better customer-focused services as well as cross-sell and up-sell the other products and services of the bank.

Oracle Banking Branch is Oracle Javascript Extension Toolkit based front-end and facilitates the processing of several types of transactions that includes Branch transactions, Customer Cash Transactions, Cheques and Remittances, Loan Payments, Credit Card Payments, and Account Servicing transactions with rich user experience.

1.2   Purpose

The purpose of this Release Note is to propagate the features of Oracle Banking Branch 14.6.1.0.0.

1.3   Release Highlights

Oracle Banking Branch 14.6.1.0.0 offers a comprehensive standalone solution for retail branch operations. Following are the features included in the release along with forward porting of applicable fixes related to the incidences reported in previous versions.

- Enhancements in Account Services
- Enhancements in Party Services
- Enhancements in Loan Services
- Enhancements in Deposit Services
- Enhancements in Teller

This release also focussed on technical qualification to comply with approved Tech Stack along with data privacy features.

1.4   Release Enhancements

1.4.1   Enhancements in Account Services

Oracle Banking Branch initiates the request and handoff to FLEXCUBE Universal Banking for further verification and processing. The following screens are enhanced as a part of CASA Services in this release:

S.No	Screens	Description
1	Stop Cheque Payment	Enhanced existing functionality under Stop Cheque Payment to capture stop payment requests for a specific amount.
2	Cheque Book Request	Enhanced Cheque Book Request functionality to support editing the Delivery Branch ID that could be different from the Account Branch.

ORACLE®

1.4.2 <u>Enhancements in Party Services</u>

There are no enhancements in this release.

1.4.3 <u>Enhancements in Loan Servicing</u>

Oracle Banking Branch initiates the request and handoff to FLEXCUBE Universal Banking for further verification and processing. The following screens are introduced as a part of Loan Service in this release:

S.No	Screens	Description
1	Loan Payment and Closure	This screen facilitates paying dues, allocating arrears, paying the advance, partial pay off, and closing an account.
2	Loan Renegotiation Initiation	This screen facilities amendment, renegotiation, rollover, and modification of interest and fees for a loan account.

1.4.4 <u>Enhancements in Deposit Servicing</u>

The following are the updates as a part of Deposit Servicing in this release:

- A new button to see the overrides.

- A message box displays. Click on initiate submit where the user has to either accept/deny the overrides if any.

- The overrides will appear for the transaction in the transaction approval screen.

1.4.5 <u>Enhancements in Teller</u>

The following are the updates as a part of Teller in this release:

- A confirmation pop-up to specify the remarks and authorize transactions for all maintenance screens.

- Show History to view the modification history of the record in the Audit record.
