2.8 Straight Through Processing for onboarding requests received from Channels

For the onboarding requests received from Channels, there are configuration available to allow straight through processing of SMB onboarding and handoff to the core system without waiting for any manual intervention.

Refer below table for details of the configuration:

Table 27: Configurations

Configuration Parameter	Description	Default Value
STP_FLAG	This parameter indicates if straight through processing is allowed for SMB onboarding requests received from Channels subject to other mandatory information being available in the request. Accepted values are:	True

Configuration Parameter	Description	Default Value
	<p>TRUE - Straight through processing for SMB Onboarding shall be allowed subject to fulfillment of other mandatory details and business validation.</p> <p>FALSE - Straight through processing for SMB Onboarding shall not be allowed in any case, even if all mandatory and KYC details are sent from Channel.</p>	
CHANNEL_CONFIRMATION_REQUIRED	<p>This parameter indicates if a confirmation from channel is required before handoff to the core system. Accepted values are:</p> <p>True – System will wait for a confirmation from Channels before triggering the handoff to the core system</p> <p>False – System will go ahead with the handoff to the core system without waiting for any confirmation from Channels</p>	False

On receiving the SMB onboarding request from channels, the system will validate the configuration parameters as stated in the above table. If straight through processing is allowed i.e. STP_FLAG is set to True, the system validates if all the mandatory information including the KYC details are available in the request. Following cases are applicable:

1. Quick Onboarding - this will be quick onboarding with minimal attributes, equivalent to Quick Initiation. Further enrichment and KYC check for such requests can be done by a Bank user.
2. Detailed Onboarding without KYC Check - this will cover onboarding from channel with full customer details but without KYC Check. Such request shall fall under KYC stage. Bank users can pick such request and complete the remaining stages - KYC, review and Approval.
3. Detailed Onboarding with KYC Check (Straight **through processing**) - In this case, channel will capture and pass on all the mandatory information and KYC details. This shall be treated as straight through processing if STP_Flag is set to TRUE and the Party details shall be handed over to core system without need of any manual intervention.
