Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of Trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Issuance Amendment - Islamic

Guarantee Amendment enables the user to amend an already issued guarantee to the Beneficiary or to the Bank designated to Advise the Guarantee Amendment to the Beneficiary or to another Advising Bank.

Conventional Guarantee Amendment process enables the user to make an amendment to the Guarantee which had been already issued.

The common amendments that are made to Guarantees are:

- Expiry date
- Increase/Decrease in Guarantee amount
- Change in Terms and Conditions
- The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended Guarantee is parked awaiting beneficiary consent.

The various stages involved in Amendment of Guarantee Issued are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input amendment application details
- Upload of related mandatory and non-mandatory documents
- Input/Modify details of amendment of Guarantee - Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements and draft Amendment copies
- Notify customer on any negative statuses in any of the stages to the applicant
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Issuance Amendment process flow is similar to that of conventional Guarantee Issuance Amendment process flow.

This section contains the following topics:

Registration	OBTF-OBTFPM Bi-Directional Flow
Customer Draft Confirmation	Amount Block Exception Approval
Multi Level Authorization	

Registration

During registration stage, user can register request for an Islamic Guarantee amendment received at the front desk (as an application received physically/received by mail/fax). During registration, user captures the basic details of the application, check the signature of the applicant and upload related documents. On submit of the amendment request, the customer should be notified with acknowledgment and the request should be available for an Guarantee expert to handle in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract

Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance - Islamic > Bank Guarantee Issuance > Guarantee Amendment - Islamic.**

The Registration stage has two sections Application Details and SBLC/ Guarantee Details. Let's look at the details of Registration screens below:

Provide the Application Details based on the description in the following table. In case of MT798, Application Details are defaulted to SWIFT.

Field	Description	Sample Values
Application Details		
SBLC/Guarantee Number	The user identification of your external bank account. Provide the undertaking number. Alternatively, user can search the documentary undertaking number using LOV.	
Received From - Customer ID	Read only field. Customer ID will be auto-populated from Guarantee /SBLC Issuance.	001345
Received From - Customer Name	Read only field. Applicant Name will be auto-populated from Guarantee /SBLC Issuance.	
Branch	Read only field. Branch Name will be auto-populated from Guarantee /SBLC Issuance.  Note Once the request is submitted, Branch field is non-editable.	
Priority	System will default the Priority as Low/Medium/High based on maintenance. If no priority is maintained, system defaults the priority as Medium.	High

Field	Description	Sample Values
Amendment Number	Read only field. Amendment number will be auto-populated based on the system maintenance. Amendment number increases by 1 for each amendment.	
Submission Mode	Submission mode of Guarantee. Amendment request. By default the submission mode will have the value as 'Desk'. Desk - Request received through Desk Email - Request received through Email Courier - Request received through Courier	Desk
Process Reference Number	Unique process reference number for the transaction. This is auto generated by the system.	203GTEISS000 001134
Amendment Date	By default, the application will display branch's current date. User cannot change the date to back date or future date.	04/13/2018
Customer Reference Number	User can enter the 'Reference number' provided by the applicant/applicant bank. Enables the user to provide a unique Customer Reference Number for the amendment.	
Related Reference	Related reference number will be auto-populated based on the system maintenance	
Beneficiary Consent Required	Toggle on: Beneficiary consent required for the amendment made to the fields. Toggle off: Switch off the toggle if beneficiary consent is not required for the amendments	

SBLC/ Guarantee Details

Form of Undertaking	Read only field. Form of Undertaking defaults from Guarantee/ Standby Issuance	
Product Code	Read only field. This field displays the product code defaulted from Guarantee/ Standby Issuance.	
Product Description	Read only field. This field displays the description of the product as per the product code.	
Undertaking Amount	System defaults undertaking amount from registration stage. User can amend the value.	

Field	Description	Sample Values
Amount In Local Currency	System fetches the local currency equivalent value for the transaction amount from back office (with decimal places).	
Type of Undertaking	Read only field. Type of Undertaking defaults from Guarantee/ Standby Issuance.	
Purpose of Message	Read only field. Purpose of message defaults from Guarantee/ Standby Issuance.	
File Identification	This field enables the user to select the type of delivery channel and its associated file name or reference from the available values: <ul style="list-style-type: none"> • COUR - Courier delivery • EMAL - Email transfer • FACT - SWIFTNet FileAct • FAXT - Fax transfer • HOST - Host-to-Host • MAIL - Postal Delivery • OTHR - Other delivery channel 	
Narrative	If File Identification field values are COUR or OTHR , user must provide description in this field.	
Expiry Type	Select the expiry type. By default the system displays the expiry date as maintained in Issuance.	
Date of Expiry	Provide the expiry date of the Guarantee Issuance.	
Expiry Condition/Event	This field specifies the documentary condition/ event that indicates when the local undertaking will cease to be available. This field is applicable only if Date of Expiry field value is COND . For Guarantee Advising MT760, the value is read only and populated from Incoming MT 760.	
Applicable Rules	Read only field. This field displays the rules of the Guarantee/ Standby issuance.	
Narrative	The system displays the default expiry date. User can update the values.	
Applicant	Read only field. This field displays the details of the applicant of the selected LC.	

Field	Description	Sample Values
Beneficiary	<p>Read only field.</p> <p>This field displays the beneficiary details of the selected Guarantee/ Standby issuance and user can amend if required.</p>	
Advising Bank	<p>Read only field.</p> <p>This field displays the details of the advising bank.</p> <p> Note</p> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message “RMA arrangement not available, please change the bank or use MAIL Medium”.</p>	
Advising Through Bank	<p>Read only field.</p> <p>The value of advising through bank defaults from Guarantee/ Standby Issuance.</p>	
Counter SBLC/Guarantee Issuing Bank	<p>The value of Counter Guarantee Issuing Bank defaults from Guarantee/ Standby Issuance.</p> <p>This field is applicable only if the Purpose of Message field has value as ICCO.</p> <p> Note</p> <p>If Counter Issuing Bank has value, and in case the selected Bank is not RMA Compliant, the system displays error message “RMA arrangement not available”.</p>	
Local SBLC/Guarantee Issuing Bank	<p>The value of Local Guarantee Issuing Bank defaults from Guarantee/ Standby Issuance.</p> <p>This field is applicable only if the Purpose of Message field has value as ICCO or ISCO.</p> <p> Note</p> <p>If Local Issuing Bank has value and Counter Issuing Bank has no value, and in case the selected Bank is not RMA Compliant, the system displays error message “RMA arrangement not available”.</p>	
Additional Amounts	<p>Provide any additional amounts related to undertaking.</p>	

Field	Description	Sample Values
Closure Date	<p>System default the “Closure Date” value from the previous version of the contract.</p> <p>User can modify the system defaulted “Closure Date” and system should validate the same for the below conditions,</p> <ul style="list-style-type: none"> • Closure Date must be after the Issue Date. • Closure Date must be after the Expiry Date. • Closure Date cannot be blank 	
Revenue Sharing Percentage	Read only field.System populates the values from the “Trade Finance Customer Maintenance” if any from the Guarantee Contract.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Signature	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>
Documents	The user can upload the documents.
Remarks	The user can provide any additional information regarding the Guarantee ammendment. This information can be viewed by the users in other stages of the process.
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Field	Description
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.
Cancel	Cancels the Guarantee Amendment Registration stage inputs and system should clear the details captured in the screen. The task will get deleted.
Save and Close	Save the information provided and displays the task in you queue for working later. This option will not submit the request
Submit	Task will get moved to next logical stage of Islamic Guarantee Issuance that is Data Enrichment stage. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

OBTF-OBTFPM Bi-Directional Flow

1. In OBTFPM, user clicks on **Request Clarification**, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
2. In case submission mode is not "Online", the system will validates if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
3. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'.
4. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

As part of data enrichment, user can input new Islamic Guarantee Issuance request. User can enter/ update basic details of the incoming request.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

In case of MT798 message, if the User encounters validation error during handling the task, user can put the transaction into hold and seek clarification from the customer in this stage. In DE stage the task is verified and enriched. The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message place holder for the original value.

Do the following steps to acquire a task at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Tasks > Free Tasks**.

This section will be enabled only for customer initiated transactions.
Common Group Message	<p>Click Common Group Message button, to send MT799 and MT999 messages from within the task.</p>

Field	Description
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(763,767/768).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
View Undertaking	Clicking this button allows the user should to view the undertaking details.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system and the task may get terminated or moved to Reject Approval Stage.
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others
Hold	The details provided will be registered and status will be on hold.
Cancel	Cancels the details captured in the screen. The task will get deleted.
Save and Close	<p>User will save the information provided and close the details captured.</p> <p>This option will not submit the request.</p>
Submit	<p>Task will get moved to next logical stage of Guarantee Issuance.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>

Legal Verification

The Legal verification stage allows the user to review and approved the guarantee message received under a Guarantee Amendment.

Legal Verification may be required for Guarantee amendment based on guarantee text format (standard vs non-standard) and other factors. In case Legal verification is required, this task is created in the system.

As a legal approver, log in to Oracle Banking Trade Finance Process Management (OBTFFPM) system to see the legal verification required tasks for Trade Finance transactions listed in queue. On opening the task, the user views the guarantee text that has to be verified.

Application Details

All fields displayed under Application details section, would be read only.

Provide the Application Details based on the description in the following table:

Field	Description
Application Details	
Received From Applicant	Read only field.
Received From - Customer ID	Read only field.
Customer Name	Read only field.
Branch	Read only field.
Currency Code	Read only field.
Amount	Read only field.
Priority	Read only field.
Submission Mode	Read only field.
Process Reference Number	Read only field.
Application Date	Read only field.
Customer Reference Number	Read only field.
Draft Message	
All fields displayed under Draft Message section, would be read only.	
Language	Select the language for the SWIFT message.
Draft Message	Read only field.
Legal Verification	
Legal Verification required	Read only field.

Field	Description
Legal Verification Outcome	The user can update any of the below response based on vetting the guarantee text <ul style="list-style-type: none"> Accepted Not accepted - Change and Send for Review Again Not accepted - Change and Proceed Pending
Legal Remarks	The user can enter the observation/changes/remarks to be done to the guarantee text.
Verification Date	The user can enter the date on which the verification was done. The system date will be defaulted and the user can change the same.

Tiles Displayed in Summary

- Main Details - User can view the application details and Guarantee/Standby details. User can modify the details if required.
- Party Details - User can view the application details and Guarantee/Standby details. User can modify the details if required.
- Guarantee Details - User can view the Counter Guarantee details and Guarantee text. User can modify the details if required.
- Limits and Collaterals - User can view the limits and collateral details. User can modify the details if required.
- Charges - User can view the charge details. User can modify the details if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction checks.
- Draft Confirmation – User can view the draft guarantee details, legal verification and customer confirmation details. User can modify the details if required.
- Documents - User can view the document details
- Remarks - As a Reject approval user, you will be able to view the remarks captured in the process during earlier stages. User also can see the Reject code with reason for rejection in the Remarks column

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Submit	On submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Guarantee/SBLC Amendment. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

Field	Description
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. The user would be able to select a Reject code and give a Reject Description <p>Other users should be able to see the reject reason in remarks window throughout the process.</p>
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes.</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others.
Cancel	Cancel the Scrutiny Stage Inputs.
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p>
Back	On click Back , user navigates to previous step.

Customer Draft Confirmation

In this section, the user can review and handle the customer's response received for the draft confirmation for Guarantee Amendment transactions, which is sent to the customer for their verification and confirmation. The system sends Draft MT767 along with up to seven MT775 messages as attachment to the customer.

The customer response can be received both by online and offline mode.

In non-online mode, user receives the response in the branch. Log in into OBTFPM application, and open the task to see customer response pending tasks for trade transactions listed in queue. On opening the task, the user views and update the customer response.

In online mode, the customer would receive a mail notification from the bank with a draft of the Guarantee Amendment. The customer can 'Approve' or 'Reject' post reviewing the draft through mail. The customer response will automatically be updated in OBTFPM. Based on the customer response; the task will move to the next stage or are referred to the previous stage for further update.

The draft mail will be addressed to a primary contact and a secondary contact. On approval or reject, an acknowledgement will be sent to the primary and secondary contacts confirming receipt of response. As the draft mail is sent to more than one recipients, system to follow the below guidelines to register the customer response.

- Approved from Primary Mail, Rejected from Secondary Mail - Application already Approved from Primary mail
- Approved from Primary Mail, Approved from Secondary Mail - Application already Approved from Primary mail
- Rejected from Primary Mail, Approved from Secondary Mail - Application already Rejected from Primary mail
- Rejected from Primary Mail, Rejected from Secondary Mail – Application already Rejected from Primary mail
- Approved from Secondary Mail, Approved from Primary Mail - Application already Approved from Secondary mail
- Approved from Secondary Mail, Rejected from Primary Mail - Application already Approved from Secondary mail

Rejected from Secondary Mail, Approved from Primary Mail - Application already Rejected from Secondary mail

Rejected from Secondary Mail, Rejected from Primary Mail - Application already Rejected from Secondary mail

Amount Block Exception Approval

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off Refer:
- Refer
 - Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account
Amount Block Exception This section will display the amount block exception details

Application Details

All fields displayed under Application details section, would be read only.

Tiles Displayed in Summary

- Main Details - User can view the application details and Guarantee/Standby details. User can modify the details if required.
- Limits and Collaterals - User can view the limits and collateral details. User can modify the details if required.
- Charges - User can view the charge details. User can modify the details if required.
- Documents - User can view the document details
- Remarks - User can view the remarks details captured during earlier stages Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off

Amount Block Details

All the data elements shown in the tables below will go in as read-only information to the Amount Block exception System

Provide the Amount Block Details based on the description in the following table:

Limits Details

Provide the collateral details based on the description provided in the following table:

Field	Description	Sample Values
Customer ID	Unique Customer Identification Number of the customer for whom the credit exception approval is required.	
Line ID	Line ID under which the limit check was originally performed.	
Contribution%	Percentage of the transaction amount that need to be earmarked.	
Contribution Currency	Currency of the transaction.	

Field	Description	Sample Values
Contribution Amount	User can enter the contribution amount to be utilized under the selected limit.	
Limit Check Response	Response received from backend system. Response can be Limit Earmark Created or Limits not available.	

Field	Description	Sample Values
Collateral Type	This can be either Cash Collateral or Deposits.	
Collateral %	Percentage of the transaction amount that needs to be marked against a collateral.	
Currency	Currency of transaction.	
Amount	Amount that will be marked as collateral.	
Settlement Account	Amount that will be marked as collateral	

Charge Details

Provide the Charge Details based on the description provided in the following table:

Field	Description	Sample Values
Type	The type for which the amount block is required eg: charges, cash collateral, deposit etc.

Block Amount	The amount for which the block is required.	
Branch	The branch under which the amount block has to be made.	
Account	Settlement account to be used.	
Account Currency	Currency in which the settlement account is maintained.	
Available Balance	The outstanding balance in the account when the amount block was placed in contract currency.	
Block Reference Number	Unique Amount Block reference.	
Block Status	The status of amount block – Success or failure	
Block Status Detail	Failed Reason (This field will have value only if amount block is failed).	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Amount Block Exception Inputs.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	

Multi Level Authorization

The Approval user can approve a Guarantee Amendment Transaction.

As an approver user, log in into OBTFPM application and open the task to see the summary tiles.

The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to validate the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

In case of MT798, on approval the task is handed off to back office system to amend the Guarantee contract and generate the required MT767/768 messages. Re-Key Authorization

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Party
- Application Date
- Undertaking Currency
- Undertaking Amount
- Expiry Date

Re-key is applicable only in case of to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
