Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office Platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during Transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Issuance Internal Amendment

Guarantee Issuance Internal Amendment allows the user to register a request for Internal Amendment of Guarantee/SBLC Issued received from the Applicant. If the request is received by mail/Courier, the user should be able to initiate the request.

This chapter contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Multi Level Approval

Common Initiation Stage

The user can initiate the new guarantee issuance internal amendment request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

As a Registration user, you can register an internal amendment to a Guaranteed/SBLC issued request, also can upload relevant documents and verify checklist items. If the request is received by mail/Courier, you can update the request.

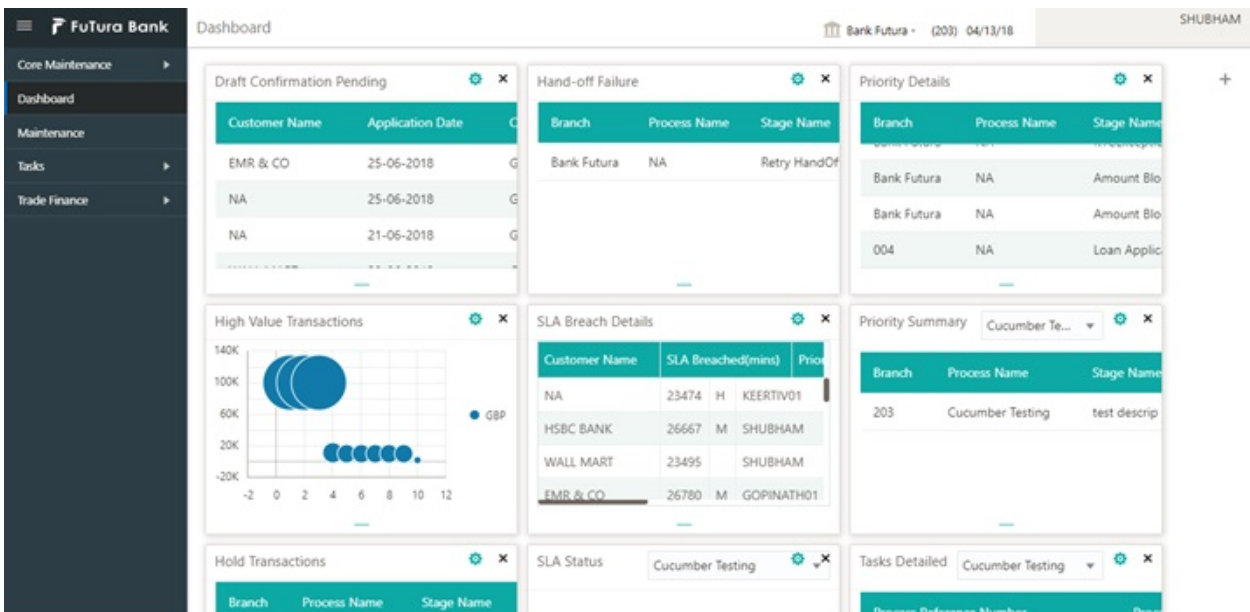

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

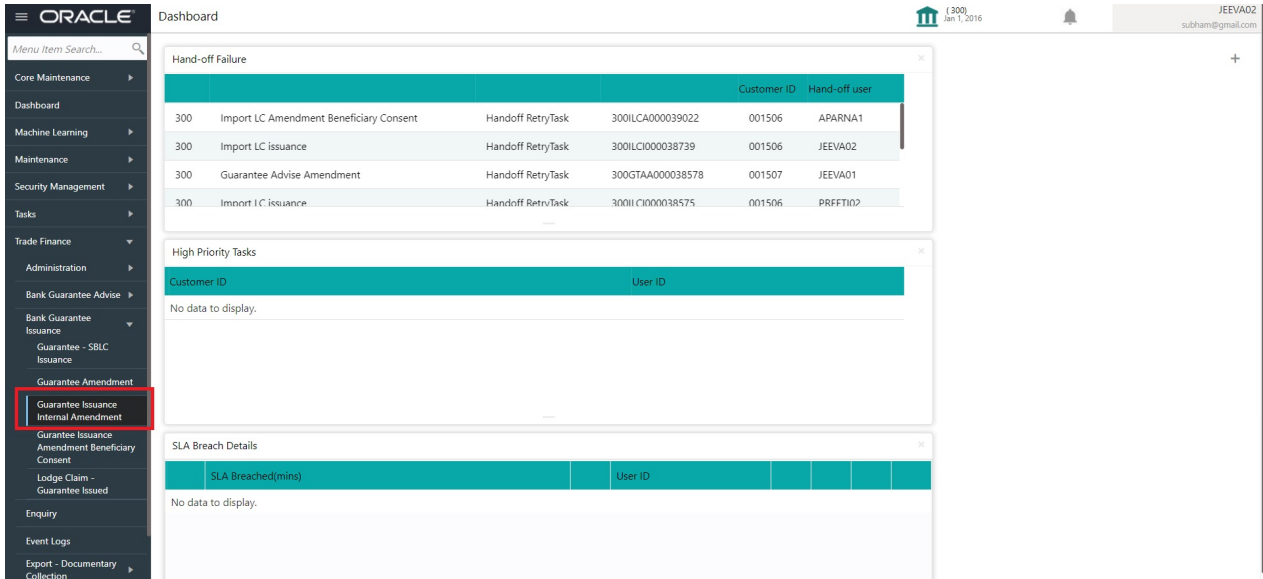

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

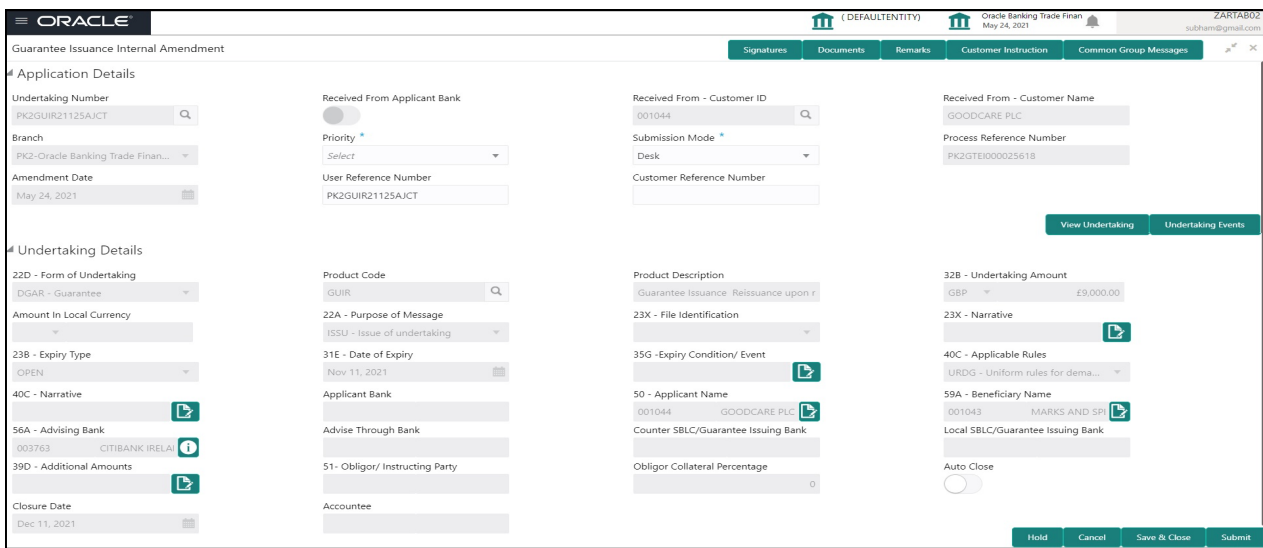

3. Click Trade Finance> Bank Guarantee Issuance > Guarantee Issuance Internal Amendment.

The Registration stage has two sections Application Details and Undertaking Details. Let's look at the Registration stage:

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Undertaking Number	Enter the undertaking number or alternatively select it from LOV'. As part of LOV criteria; user can input the Customer Id, Beneficiary name, Currency and amount.	
Received From Applicant Bank	Read only field. System will default the name of the customer as available in Guarantee.	Toggle off

Field	Description	Sample Values
Received From - Customer ID	Read Only Field System defaults the customer ID available in Guarantee.	001345
Received From - Customer Name	Read Only Field System defaults the customer ID available in Guarantee.	EMR & CO
Branch	Read only field. Branch Name will be auto-populated from Guarantee details.	203-Bank Futura -Branch FZ1
Priority	This field will be defaulted based on the priority maintained for the customer. Priority maintained will be populated as either 'Low or Medium or High'. If priority is not maintained for a customer, 'Medium' priority will be defaulted. Users are allowed to change the priority.	High
Submission Mode	System defaults the submission mode as 'Desk' for the transactions created via registration Users are allowed to change the values. The values are: Desk - Request received through Desk Courier - Request received through Courier Email - Request received through Email FAX - Request received through FAX	Desk
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	203GTEADV00 15920
Amendment Date	System defaults the branch's current system date.	04/13/2018
User Reference Number	Specify the user reference number.	
Customer Reference Number	Specify the 'Reference number' provided by the applicant/applicant bank.	

Undertaking Details

Registration user can view the latest Guarantee/SBLC values defaulted in the respective fields in the Undertaking Details in this section. All the fields in this section is read only.

Provide the Undertaking Details based on the description in the following table:

Field	Description	Sample Values
Form of Undertaking	Read only field. System defaults the value from Guarantee Issuance details.	
Product Code	Read only field. System defaults the value from Guarantee Issuance details.	GUIA
Product Description	Description of the product. Read only field. System defaults the value from Guarantee Issuance details.	Guarantee Advising

Cancel	Cancels the Guarantee Issuance Internal Amendment. Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.

2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	
Document Title	Specify the document title.	

Field	Description	Sample Values
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
Search Result		
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	
Document Code	This field displays the document code from meta data.	

Field	Description	Sample Values
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Document screen appears.

The 'Edit Document' form contains the following fields:

- Document Id: 2400
- Document Title: wqwq
- Application Reference Number: PK2ILCI000019041
- Entity Reference Number: PK2ILCI000019041
- Document Type Id: TFPM_DOCTYPE001
- Document Description: (empty text area)
- Remarks: (empty text area)
- Document Expiry Date: Jun 29, 2022

At the bottom, there is a dashed box with the text 'Drop files here or click to select' and 'Current selected files: []'. 'Update' and 'Cancel' buttons are located at the bottom right.

Bi-Directional Flow

1. In OBTFPM, user clicks on **Request Clarification**, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
2. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
3. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'.
4. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

At this stage you can register a request for Internal Amendment of Guarantee/SBLC Issued.

As part of Data Enrichment, you can update the details already captured in Registration stage. If details are not captured in DE stage, you can input the details.

If the request is received by mail/Courier, the user can update the request. The request will have the details entered during the Registration stage.

If the request is received by SWIFT, then the Internal Amendment task needs to be auto created and available for the user in the Data Enrichment stage to handle.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task which completed the Registration and currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance> Tasks> Free Tasks**.
