Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import Documentary Collection Booking - Islamic

This process handles the Islamic import document under collection. The : Under Import Documentary Collection, the Drawer after exporting the goods submits the documents to the Remitting bank. The Remitting bank forwards the Documents to the Collecting bank for Acceptance/Payment by the Drawee.

The various stages involved for Import Doc Collection Booking are:

- Receive and verify documents
- Input Import Collection details
- Upload of related mandatory and non-mandatory documents.
- Input Additional details of Import Collection - Data Enrichment stage
- Check for limit availability if applicable.
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Import Collection Booking process flow is similar to that of conventional Import Collection Booking process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Registration	Exceptions
Multi Level Approval	Reject Approval

Common Initiation Stage

The user can initiate the new Islamic import documentary collection booking request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

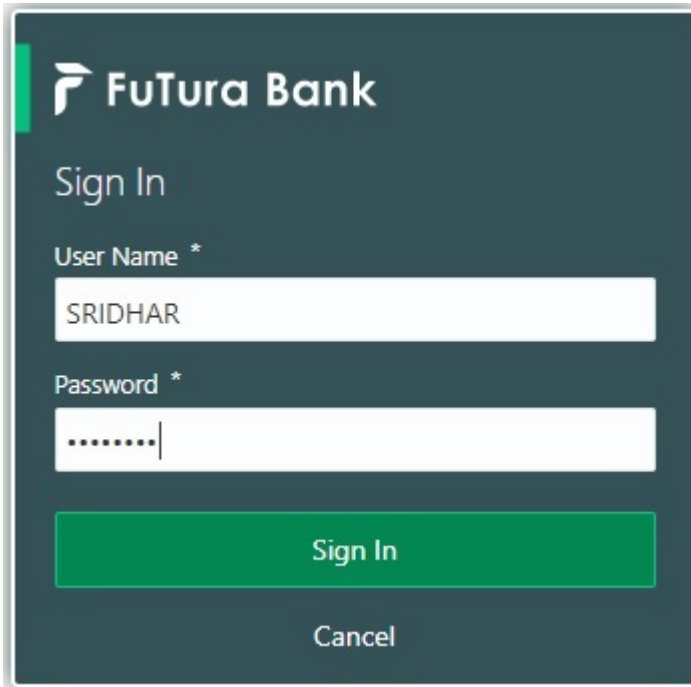

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

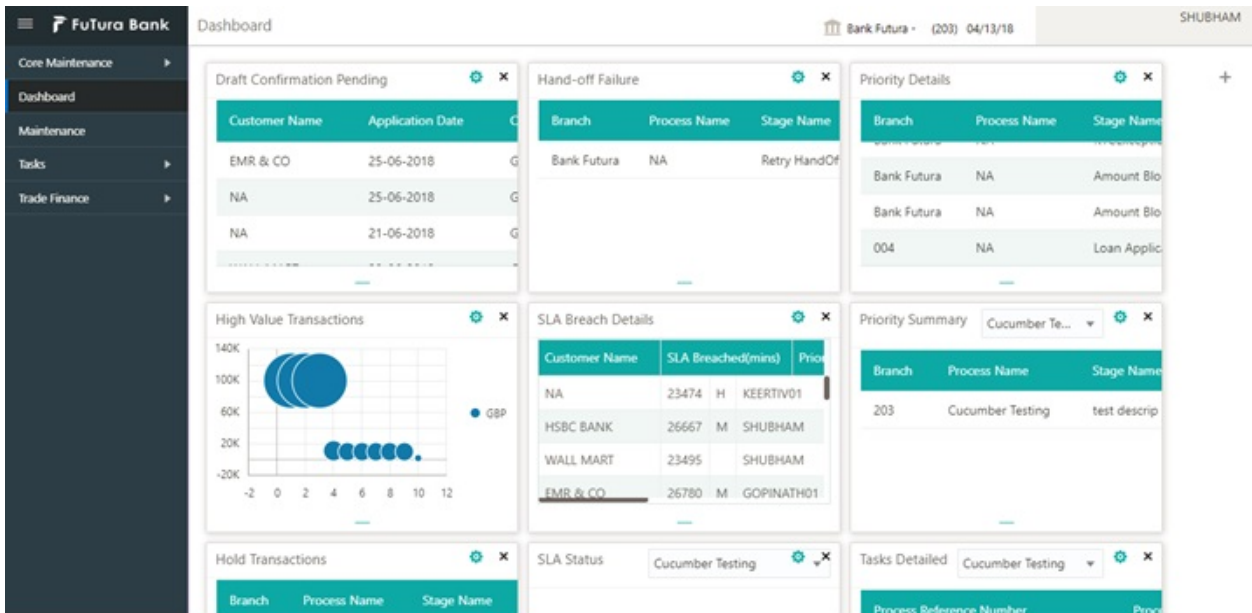

In the Registration stage, user can register request for an Islamic Import Collection Booking at the front desk. User can capture the basic details of the Collection and upload related documents. On submit of the request, the request should be available for Collection expert to handle in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text 'Sign In'. Below the header, there are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' with masked characters. At the bottom, there are two buttons: a green 'Sign In' button and a white 'Cancel' button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. On the left is a navigation sidebar with options like 'Core Maintenance', 'Dashboard', 'Maintenance', 'Tasks', and 'Trade Finance'. The main area contains several widgets:

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'. Data includes EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data includes Bank Futura, NA, and Retry HandOf.
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data includes Bank Futura, NA, Amount Blo, and 004, NA, Loan Applic.
- High Value Transactions:** A bubble chart showing transaction values for different customers. The y-axis ranges from -20K to 140K. A legend indicates 'GBP'.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Priority'. Data includes NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data includes 203, Cucumber Testing, and test descrip.
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A widget showing 'Cucumber Testing'.
- Tasks Detailed:** A widget showing 'Cucumber Testing'.

3. Click **Trade Finance - Islamic > Import Documentary Collection > Import Documentary Collection Booking - Islamic.**

The registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the Documentary Collection.	
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Action Buttons		
Submit	On submit, task will move to next logical stage of Import Documentary Collection Booking. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Import Documentary Collection Booking Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Data Enrichment

As part of Data Enrichment, user can enter/update details of the Islamic Import Documentary Collection Booking request, check documents and can verify if the request can be progressed further.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

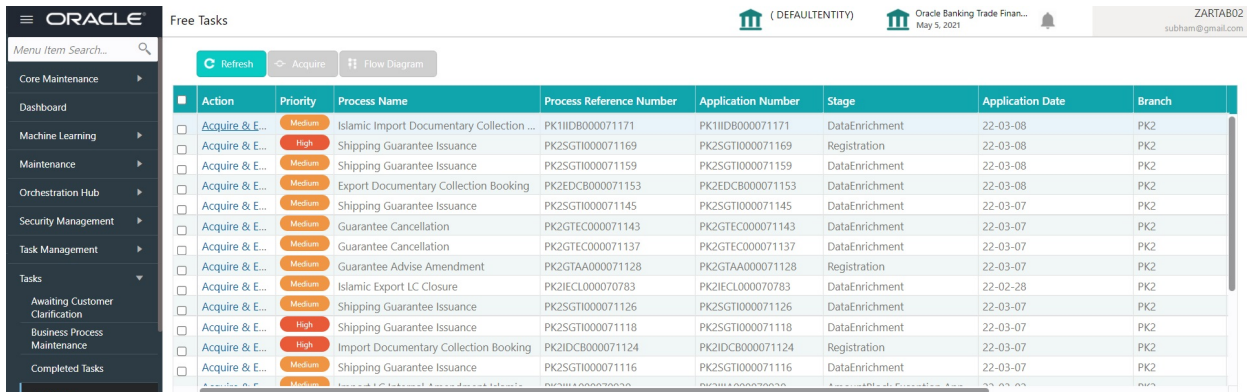

Do the following steps to acquire a task at Data enrichment stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

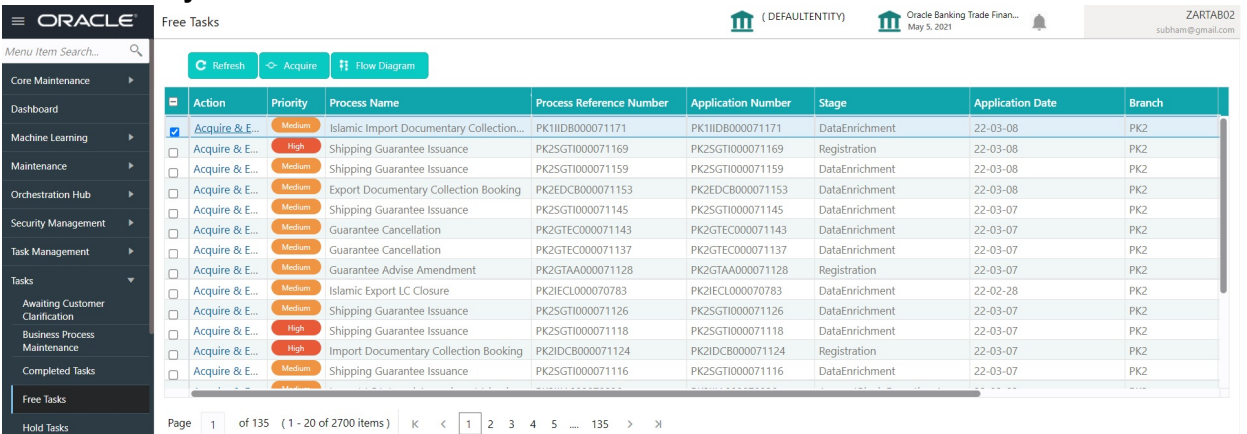

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Tasks > Free Tasks.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks** tab.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for data enrichment stage.

The screenshot shows the Oracle Flexcube Universal Bank interface. The 'Free Tasks' tab is active, displaying a table of tasks. The 'Acquire & Edit' button is highlighted in red. The table has the following columns: Action, Priority, Process Name, Process Reference, Application Number, Stage, Application Date, Branch, and Cost. The first row is selected, showing a task with the action 'Acquire & Edit', priority 'M', process name 'Import Documentary- B...', process reference '000IDCB000030087', application number '000IDCB000030087', stage 'DataEnrichment', application date '1587020236841', branch '000', and cost '0000'.

Shipment Details

Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
Transshipment	Provide the transshipment details of goods (if any) from the document received. The values are: <ul style="list-style-type: none"> Allowed Not Allowed 	
Partial Shipments	Provide the partial shipment details of goods (if any) from the document received. The values are: <ul style="list-style-type: none"> Allowed Not Allowed 	
Date Of Shipment	Provide the date of shipment.	

Field	Description	Sample Values
Place Of Taking In Charge	<p>This field specifies the place of taking in charge (in case of a multi-modal transport document), the place of receipt (in case of a road, rail or inland waterway transport document or a courier or expedited delivery service document), the place of dispatch or the place of shipment as indicated on the transport document.</p> <p>Provide the details of place of taking in charge.</p> <p> Note This field is alternate to Port Of Loading.</p>	
Port Of Loading	<p>This field specifies the port of discharge or airport of destination as indicated on the transport document.</p> <p>Provide the details of Port/Airport of Loading.</p> <p> Note This field is alternate to Place Of Taking In Charge.</p>	
Port Of Discharge	<p>This field specifies the port of discharge or airport of destination as indicated on the transport document.</p> <p>Provide the details of Port/Airport of Discharge.</p> <p> Note This field is alternate to Place Of Final Destination.</p>	
Place Of Final Delivery	<p>This field specifies the final destination or place of delivery as indicated on the transport document.</p> <p>Provide the details of Place Of Final Destination.</p> <p> Note This field is alternate to Port Of Discharge.</p>	
Carrier Name	Provide the name of the carrier through which the goods were shipped.	
Shipping Agent	Provide the shipping agent name as per the document received.	
Shipping Agent Address	Provide the shipping agent details, if more than one carrier is used for the shipment.	
INCO Terms	Select the appropriate INCO terms.	

Field	Description	Sample Values
INCO Terms Description	The description of the INCO Term.	

Description of Goods and/or Services

Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
+ Icon	Click + icon to add goods details.	
Goods Code	Click look up icon to select the goods code. Once you select goods code, value will populate in Goods Type and Goods Description.	
Goods Type	The goods type is auto populated depending on selected goods code.	
Goods Description	The goods description is auto populated depending on selected goods code.	
No of Units	Enter the number of units being imported or exported.	
Price per Unit	Enter the value for price per unit.	
Total Amount	System to calculate the total price. In case of online request, the system should populate the total amount from incoming request. System should validate that the total amount is equal to the value of the transaction (LC/ Collection).	
Action	Click Edit icon to edit the goods code. Click Delete icon to delete the goods code.	
Country of Origin	Provide the country of origin details as per the documents received.	
Insurance Company Code	Select the Insurance Company Code from the LOV.	
Insurance Company	Read only field. Insurance company details will be displayed as per the selected Insurance Company Code from the LOV.	
Policy Number	Provide the policy number.	
Insurance Company Address	Read only field. Insurance company address will be displayed as per the selected Insurance Company Code from the LOV.	

Multimodal/Transshipment Details

During shipment, if goods are shipped using multiple transports on its way or any transit ports, the details must be captured in this section.

Field	Description	Sample Values
Carrier Name	Provide the details of the carrier as per the documents received, if the goods were shipped via multiple carriers.	
Port	Provide the port details as per the document received, if the ship has transit on its way to the destination.	
Action	Click Edit icon to edit the Carrier name and port. Click Delete icon to delete the record.	

Action Buttons

Use action buttons based on the description in the following table:

FX Linkage

This section enables the user to link the existing FX contract(s) to the Liquidation. User can link one or more FX deals to a Bill. The linked value of an FX deal(s) must not exceed the value of the drawing/bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized

during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200762005	GBP	USD	\$1,000.00	1.33	\$1,000.00			Jun 28, 2020

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV.</p> <p>On select and save and close, system defaults the available amount, bot currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>	

Field	Description	Sample Values
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available ContractAmount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Tracers

This section enables the user to view the tracer maintained at Back Office. It also allows the user to add new tracer details. Add new tracer details based on the description in the following table:

Acknowledgement Tracer, Acceptance Tracer and Payment Tracer are applicable for this process.

Tracer Details x

Payment Tracer

Tracer Required Number of Tracers Tracer Frequency Tracer Medium

Tracer Receiver Party Tracer Start Date Template ID

Acceptance Tracer

Tracer Required Number of Tracers Tracer Frequency Tracer Medium

Tracer Receiver Party Tracer Start Date Template ID

Field	Description	Sample Values
Tracer Required	Select if tracer is required or not from the available drop list: <ul style="list-style-type: none"> • Required • Not required • Till resolved 	
Number of Tracers	Provide the number tracers required.	
Tracer Frequency	Provide the frequency for generation of the tracer. <p style="text-align: center;"> Note This field is applicable only if Tracer Required has value as Till Resolved.</p>	
Tracer Medium	Select the tracer medium from the LOV. <p style="text-align: center;"> Note This field is applicable only if Tracer Required has value as Required or Till Resolved.</p>	
Tracer Receiver Party	Select the tracer receiver party from the LOV. <p style="text-align: center;"> Note This field is applicable only if Tracer Required has value as Required or Till Resolved.</p>	

Field	Description	Sample Values
Tracer Start Date	Select the tracer start date. Start date cannot be earlier than the branch date.  Note This field is applicable only if Tracer Required has value as Required or Till Resolved .	
Template ID	Select the template ID from LOV.	

Finance Preference

This section enables the user to link a finance to liquidate the document under collection. This section will be enabled based on the product selected for documents under collection.

Finance Preferences screen is enabled if the underlying Import Drawing/Collection product allows Advance by Finance Option. The details can be captured in Import Collection/ Drawing Booking or Update or Liquidation processes and the loan gets created during Liquidation process.

Provide the loan preference details based on the description in the following table:

Field	Description	Sample Values
Drawing/Collection Ref	Defaults from the underlying task. User cannot change the value.	
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount. Defaults from the underlying task. User cannot change the value.	
Customer Id	Defaults from the underlying task. User cannot change the value.	

Field	Description	Sample Values
Customer Name	Applicant/ Drawee Name. Defaults from the underlying task. User cannot change the value.	
Product Code	Defaults from the underlying Collection/ Drawing Product maintenance. User cannot change the value.	
Finance Currency-Amount	Finance currency is defaulted from the bill currency. User can change this to Local Currency. System should display an error message on tab out if the currency selected is not a Bill currency or Local Currency. System populates the loan account based on the outstanding drawing/ Collection amount less the collateral amount. User cannot change the Loan amount.	
Original Exchange Rate	System displays the Original Exchange rate.	
Exchange Rate	Exchange rate applicable for Local Currency. User can enter the Exchange rate. System validates the exchange rate is within the allowed range.	
Finance Tenor Units	Period of finance. System defaults the value. User can change the value. The numerical value for Days or months or Years is applicable.	
Tenor Type	System defaults the value. User can change the value. Values are Days, Months and Years. The numerical value for Days or months or Years is applicable.	
Rate Type	System defaults the Rate Type.	
Rate Code	System defaults the Rate Code.	
Finance Value Date	System defaults the branch date as Value date. User cannot change the value.	
Finance Maturity Date	Finance maturity date as default based on Tenor type and Tenor units. User cannot change the value.	
Liquidate Charge/Comm On LC	Toggle On: Turn the toggle on to include the outstanding Commission/charge to be included as part of Liquidation.	

Field	Description	Sample Values
Finance Profit/UDE Details		
User Defined Element ID	System populates the UDE Element ID as part of simulation. User are allowed to change the selection through LOV.	
UDE Description	System populates the UDE description as part of simulation. If a user changes the UDE ID, system should populate the description.	
Rate Code	System populates the Rate code as part of simulation.	
Usage	System populates the details as part of simulation.	
UDE Value	System populates the value as part of simulation.	
Limits		
Serial Number	System defaults the value.	
Linkage Type	System defaults the linkage type as "Facility" from back office.	
Linkage Reference Number	System defaults the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.	
Linked Percentage	User can enter the value. Maximum is 100. User cannot enter negative values.	
Limit Amount	System defaults the value. System should populate the value based on the contribution percentage.	

Profit Details

The user can view and modify the Profit Details Simulated from Back Office system.

Component	Component Description	Rate Type	Rate Code	Min Spread	Max Spread	Spread	Min Rate	Max Rate	Rate	Modified Rate	Special Pricing Reference Number	Currency	Amount
No data to display.													

Field	Description	Sample Values
Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office. Value can be: <ul style="list-style-type: none"> • Fixed Floating • Special 	
Rate Code	This field displays the rate code applicable for the Component.	
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code. User can change the value if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	
Currency	System defaults the Interest currency in this field.	

Field	Description	Sample Values
Amount	User can input the interest amount, in case the Rate Type is Special , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	System displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..	
Settlement Account	System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display an override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM).	

Preview Message

User can preview the message simulated for correspondence with Remitting Bank.

User can preview the MT999 messages for the applicable MT7XX messages generated by the Back office system in the Preview Message.

The screenshot shows a 'Preview Message' window with two panes. The left pane is titled 'Preview - SWIFT Message' and contains a 'Language' dropdown set to 'English' and a 'Message Type' dropdown. The right pane is titled 'Preview - Mail Advice' and contains a 'Language' dropdown set to 'English' and an 'Advice Type' dropdown. Both panes have a large grey area for the message content. At the bottom right, there are 'Save & Close' and 'Close' buttons.

Exchange Rate	The exchange rate.	
Deal Reference Number	The exchange deal reference number.	

Summary

User can review the summary of details updated in Data Enrichment stage of Islamic Import Collection - Booking request.

As part of summary screen, the user can see the summary tiles. The tiles should display a list of important fields with values.

Tiles Displayed in Summary

- Main Details - User can view details about application details and Bill details.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Draft Details - User can view the draft details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Additional Fields - User can view additional fields.
- Advices - User can view the advices.
- Payment Details - User can view the payment details.
- FX Linkage - User can view the FX Linkage details.
- Loan Preferences - User can view the Loan Preference details.
- Settlement Details - User can view the settlement details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

- Accounting Details - User can view the accounting entries generated by back office system.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message “ Value Date is different from Transaction Date for one or more Accounting entries.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Submit	Task will move to next logical stage of Import Documentary Collection Booking. If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	

Exceptions

The Import Collection Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify details provided for charges, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the Import Collection Booking Amount Block Exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Document Details - User can view document details.
- Draft Details - User can view the draft details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Advices - User can view the advices.
- Payment Details - User can view the payment details.
- FX Linkage - User can view the FX Linkage details.
- Settlement Details - User can view the settlement details.

- Message Preview - User can view the preview of the simulating message to the remitting bank.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	<p>Cancel the Import Collection Booking KYC exception check.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key

Application will request approver for few field values to validate authorization. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the 'My Tasks' interface in the Futura Bank system. A modal window titled 'Approval Rekey' is open, allowing a user to update key fields for a task. The modal includes tabs for 'Incoming Message', 'Documents', and 'Remarks'. The fields being re-keyed are: Drawee Name (000263), Drawer Name (000265), Currency (GBP), and Amount (£2,000.00). Each field has a green checkmark indicating it is valid. The background shows a table of tasks with columns for Action, Priority, Application Number, and Back Office Ref No.

User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the approval.	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
