Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import Documentary Collection Booking

This process handles the import document under collection. The Documents under Collection are submitted by the Exporter(also referred to as Drawer) directly to the Collecting Bank (Bank of the Importer or Drawee) or through the Exporter's Bank, the Remitting Bank. The collecting bank in turn will handle the documents under collection as instructed by the Drawer/Remitting bank.

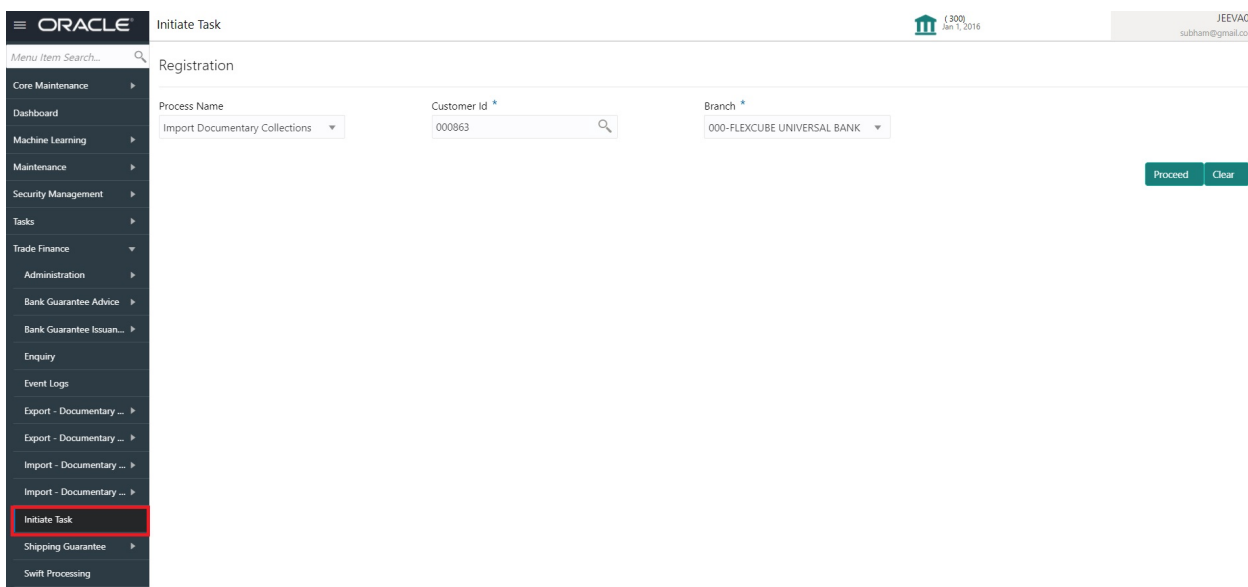

This section contains the following topics:

Common Initiation Stage	Document Linkage
Registration	Reject Approval
Multi Level Approval	

Common Initiation Stage

The user can initiate the new import documentary collection booking request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Customer ID	Select the customer id of the applicant or applicant's bank.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

If the request the request will be available for an Bill expert to handle the request in the next stage.

- Using the entitled login credentials for Registration stage, login to the OBTFPM application.

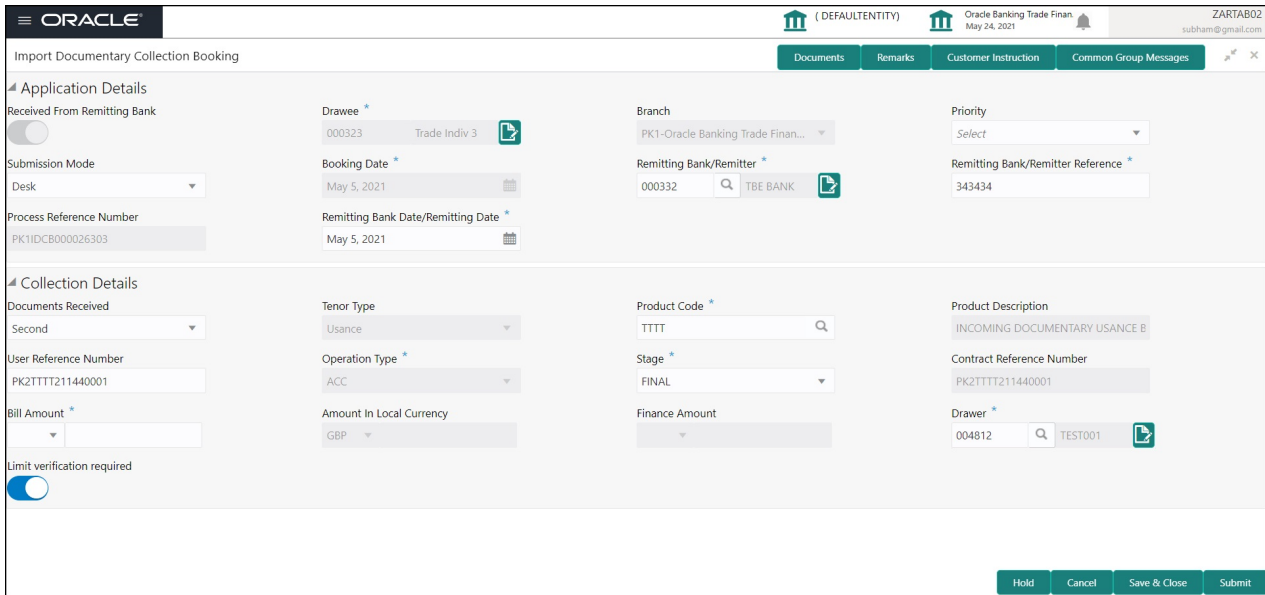

- On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Import Documentary Collection> Import Documentary Collection Booking.

The registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Received from Remitting Bank	<p>Toggle on: Set the toggle on, if documents are received from Remitting Bank. Applicable fields will be displayed to capture the Remitting Bank details.</p> <p>Toggle off: Set the toggle off, if the documents are received from drawer. Applicable fields will be displayed to capture the Drawee information.</p>	

Field	Description	Sample Values
Drawee	<p>Provide the Drawee ID and Drawee Name. Alternatively, user can search the Drawee ID using LOV.</p>  <p>Note If the selected drawee/ party is blacklisted the system displays a warning message.</p>	EMR & CO
Branch	<p>Read only field. Branch details will be defaulted based on the selected Drawee from the LOV.</p>	203-Bank Futura -Branch FZ1
Priority	<p>System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit of Registration stage.</p>	High
Submission Mode	<p>Select the submission mode of Import Collection - Booking request. By default the submission mode will have the value as 'Desk'.</p> <p>Desk- Request at the Desk Courier- Request received through Courier</p>	Desk
Booking Date	<p>By default, the application will display branch's current date.</p>	04/13/2018

Field	Description	Sample Values
Remitting Bank/ Remitter	<p>Select the Remitting Bank.</p> <p>Click the look up icon to search the Remitting bank based on Party ID/Party Name. You can also input the party ID and on tab out system will validate and populate the 'Remitting Bank' name.</p> <p> Note In case the selected Bank is not RMA Compliant, the system displays error message “RMA arrangement not available, Only MT999 messages can be sent to the bank”.</p> <p> Note If the selected remitting bank is blacklisted the system displays a warning message.</p> <p> Note If the Remitting Bank details and the Remitting Bank Reference is already available in another Collection Booking, system should display a configurable override message, “This is a Possible Duplicate Document under an existing Documentary Collection” COLREF”.</p>	
Remitting Bank/ Remitter Reference	User can update the Remitting Bank reference number, if available.	
Process Reference Number	<p>Unique OBTFPM task reference number for the transaction.</p> <p>This is auto generated by the system based on process name and branch code.</p>	
Remitting Bank Date/ Remitting Date	Provide the Remitting Bank message date.	

Collection Details

Registration user can provide collection details in this section. Alternately, collection details can be provided by Scrutiny user.

Collection Details

<p>Documents Received Second</p> <p>User Reference Number PK2TTTT211440001</p> <p>Bill Amount *</p> <p>Limit verification required <input checked="" type="checkbox"/></p>	<p>Tenor Type Usance</p> <p>Operation Type * ACC</p> <p>Amount In Local Currency GBP</p>	<p>Product Code * TTTT</p> <p>Stage * FINAL</p> <p>Finance Amount</p>	<p>Product Description INCOMING DOCUMENTARY USANCE B</p> <p>Contract Reference Number PK2TTTT211440001</p> <p>Drawer * 004812 TEST001</p>
--	--	---	---

Hold Cancel Save & Close Submit

Provide the Collection Details based on the description in the following table:

Field	Description	Sample Values
Document Received	Enables to user to select the number of sets of documents received from the LOV: <ul style="list-style-type: none"> First Second Both 	
Tenor Type	Select the Tenor Type from the LOV: <ul style="list-style-type: none"> Sight Usance Mixed 	
Product Code	Select the product code for the collection.	
Product Description	Read only field. This field displays the description of the product as per the product code.	
User Reference Number	User reference number is defaulted based on the description of the product as per the product code.	

Field	Description	Sample Values
Operation Type	<p>Operation type will be auto-populated from the collection booking. User can update the operation code, if required.</p> <p>User can book a documentary collection using the Operation Type as FOP, to indicate if the documents are to be delivered Free of Payment to the Drawee by the Collecting Bank.</p> <p> Note User cannot change the operation type, If the operation code is set as ADV or COL or DIS in collection Booking.</p> <p> Note User can change the operation type to ADV or DIS, if the operation code is set as ACC in collection booking.</p>	
Stage	<p>System displays the stage of the transaction. User can change the value from initial to final.</p> <p> Note User cannot change the stage value from Final to initial.</p> <p> Note For Operation Type, FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.</p>

Limit verification required	Toggle On- Enables for limit verification. If the toggle is disabled and Finance amount has been provided, the system prompts an override message on Submit.	

Miscellaneous

The screenshot shows the Oracle 'Import Documentary Collection Booking' form. It is divided into two main sections: 'Application Details' and 'Collection Details'.
Application Details: Includes fields for 'Received From Remitting Bank' (toggle), 'Submission Mode' (Desk), 'Process Reference Number' (PK1IDCB000026303), 'Drawee' (000323 Trade Indiv 3), 'Booking Date' (May 5, 2021), 'Remitting Bank Date/Remitting Date' (May 5, 2021), 'Branch' (PK1-Oracle Banking Trade Finan...), 'Remitting Bank/Remitter' (000332 TBE BANK), 'Priority' (Select), and 'Remitting Bank/Remitter Reference' (343434).
Collection Details: Includes 'Documents Received' (Second), 'User Reference Number' (PK2TTTT211440001), 'Bill Amount' (GBP), 'Limit verification required' (toggle), 'Tenor Type' (Usance), 'Operation Type' (ACC), 'Amount in Local Currency' (GBP), 'Product Code' (TTTT), 'Stage' (FINAL), 'Finance Amount', 'Product Description' (INCOMING DOCUMENTARY USANCE B), 'Contract Reference Number' (PK2TTTT211440001), and 'Drawer' (004812 TEST001).
 At the bottom right, there are buttons for 'Hold', 'Cancel', 'Save & Close', and 'Submit'.

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the Documentary Collection.	
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	

Field	Description	Sample Values
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Action Buttons		
Submit	On submit, task will move to next logical stage of Import Documentary Collection Booking. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Import Documentary Collection Booking Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

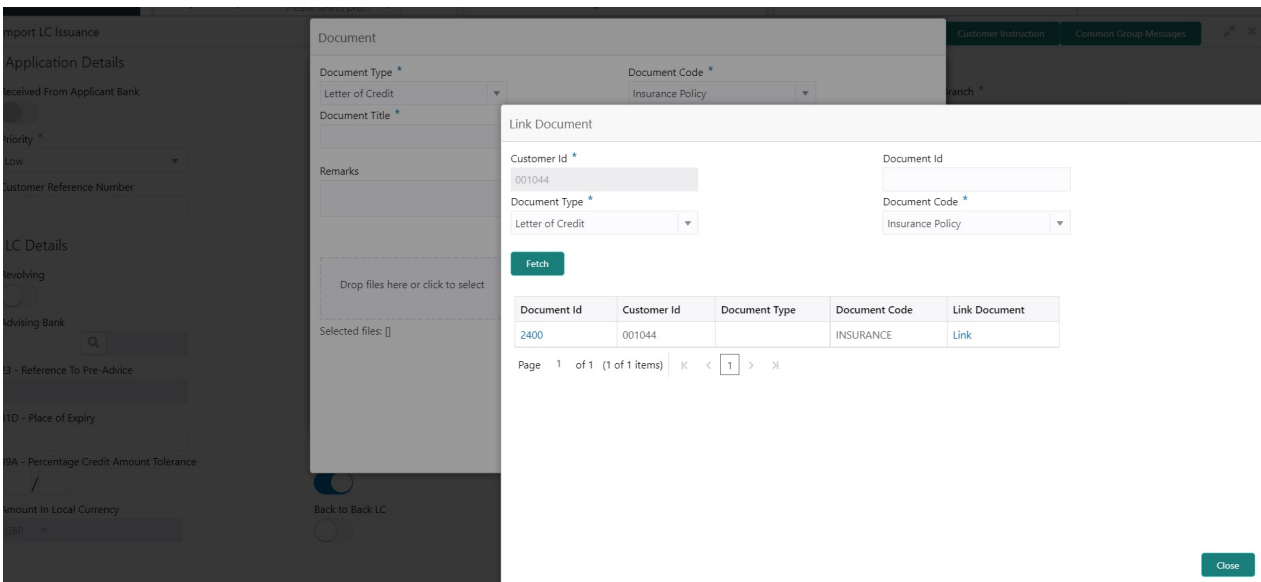

Document

<p>Document Type * <input type="text" value="Letter of Credit"/></p> <p>Document Title * <input type="text"/></p> <p>Remarks <input type="text"/></p> <div style="border: 1px dashed #ccc; padding: 5px; margin: 10px 0;">Drop files here or click to select</div> <p>Selected files: []</p>	<p>Document Code * <input type="text" value="Insurance Policy"/></p> <p>Document Description <input type="text"/></p> <p>Document Expiry Date <input type="text" value=""/></p> <p style="text-align: center; margin-top: 20px;">Link Document</p>
---	---

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	

Field	Description	Sample Values
Document Title	Specify the document title.	
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears. The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

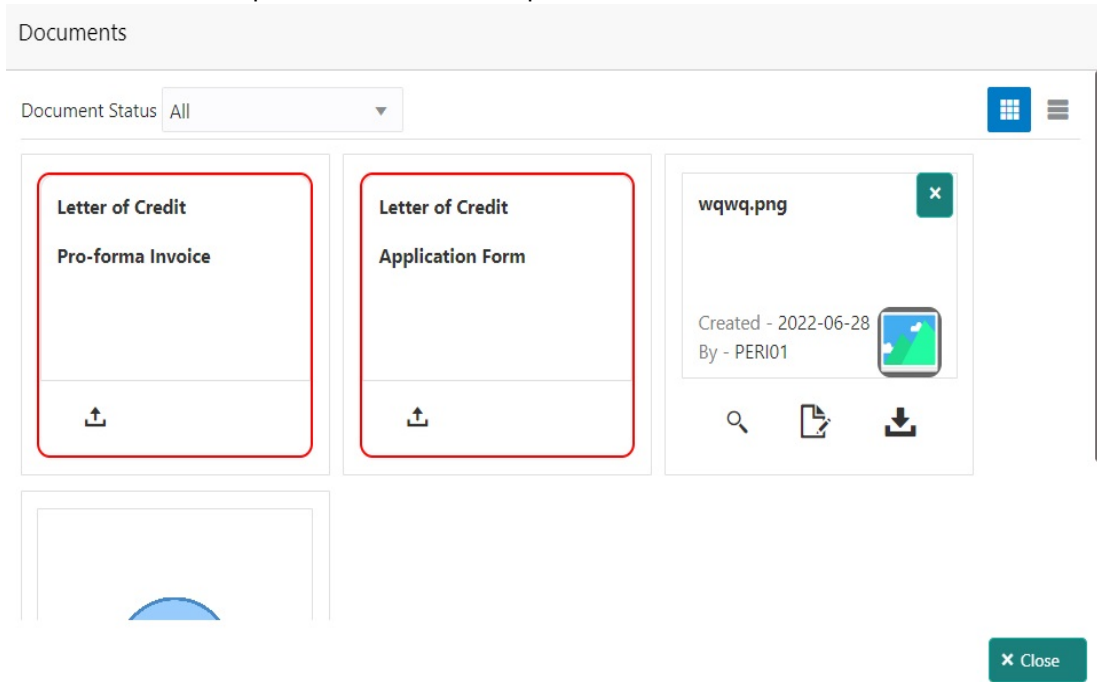

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
Search Result		
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	

Field	Description	Sample Values
Document Code	This field displays the document code from meta data.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Documents

The 'Edit Document' form contains the following fields:

- Document Id: 2400
- Document Title: wqwq
- Application Reference Number: PK2ILCI000019041
- Entity Reference Number: PK2ILCI000019041
- Document Type Id: TFPM_DOCTYPE001
- Document Description: (empty)
- Document Expiry Date: Jun 29, 2022
- Remarks: (empty)

At the bottom, there is a file upload area with the text 'Drop files here or click to select' and 'Current selected files: []'. 'Update' and 'Cancel' buttons are located at the bottom right.

Data Enrichment

As part of Data Enrichment, user can enter/update details of the Import Documentary Collection Booking.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task at Data enrichment stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Tasks> Free Tasks.

The Data Enrichment stage has five sections as follows:

- Main Details
- Document Details
- Other Details
- Shipment Details
- Maturity Details
- Additional Fields
- Advices
- Additional Details

- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User must be able to enter/update the following fields. Some of the fields that are already having value from Registration may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

The screenshot displays the Oracle Data Enrichment interface for an 'Import Documentary Collection Booking'. The interface is divided into two main sections: 'Application Details' and 'Collection Details'. The 'Application Details' section includes fields for 'Drawee' (000325 NATIONAL FREI), 'Branch' (PK1-Oracle Banking Trade Finan...), 'Priority' (Platinum), 'Booking Date' (May 24, 2021), 'Remitting Bank/Remitter' (003763 CITIBANK IREI), and 'Remitting Bank/Remitter Reference' (rrt). The 'Collection Details' section includes fields for 'Documents Received' (First), 'Tenor Type' (Sight), 'Product Code' (IMFP), 'Product Description' (INCOMING DOCUMENTARY USANCE B), 'User Reference Number' (PK2IMFP211440502), 'Operation Type' (FOP), 'Contract Reference Number' (PK2IMFP211440502), 'Bill Amount' (AOA), 'Amount In Local Currency' (GBP), 'Finance Amount' (AOA), and 'Drawer' (000328 HSBC BANK). The interface also features a navigation menu on the left, a top navigation bar with tabs like 'Clarification Details', 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', and 'Common Group Messages', and a bottom bar with buttons for 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Following field can be amended based on the description provided in the following table:

Field	Description	Sample Values
Priority	User can change the priority defaulted' Values are High, Medium and Low.	High

Collection Details

The fields listed under this section are same as the fields listed under the [Collection Details](#) section in [Registration](#). Refer to [Collection Details](#) for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Note
In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same.(Display only field if Submission mode is Online.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Document Details

This section enables the user to capture the details of the documents received.

As part of document details screen in DE stage the user can capture the Transport Document reference and document date. On click of 'Next' system should validate the value in Document Reference field against the transport document/Bill of Lading (MARDOC) against any Outstanding Shipping Guarantees issued for the drawee and is not linked to any Documentary Collection or Import Letter of Credit. System should default the Shipping Guarantee Reference in the next screen.

System to display an override if the Bill Of Lading reference mentioned in the document details screen matches with that of the Bill of Lading reference in any of the unlinked Shipping Guarantees issued for the customer.

Capture the information based on the description in the following table:

Field	Description	Sample Values
-------	-------------	---------------

Click '+' to add the document details.

Field	Description	Sample Values
Document Code	System will default the document codes based on the product selected. User can add or delete the code by selecting the line on the grid.	
Document Type	System will default the document type based on the product selected.	
Document Description	System will populate the document description based on the document code. User can edit the description.	
Document Reference	User can capture the document reference, if available. On click of 'Next' system should validate the value in this field against the transport document/ Bill of Lading (MARDOC) against any Outstanding Shipping Guarantees issued for the drawee and is not linked to any Documentary Collection or Import Letter of Credit. System should default the Shipping Guarantee Reference in the next screen.	
Copies Received	User can edit the actual copies received.	
Originals Received	User can edit the actual originals received.	
Document Date	User can edit the date on which the document is received. On click of 'Next' system should validate the value in this field against the transport document/ Bill of Lading (MARDOC) against any Outstanding Shipping Guarantees issued for the drawee and is not linked to any Documentary Collection or Import Letter of Credit. System should default the Shipping Guarantee Reference in the next screen.	
Action	Click Edit icon to edit the document code/ document date. Click Delete icon to delete the document code.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	

Field	Description	Sample Values
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

Other Details

Other Details enables the user to capture details like Shipping Guarantee reference, Credit Value Date, Debit Value Date, Other Bank charges etc.

Shipping Guarantee Reference

Field	Description	Sample Values
Click '+' to add the multiple shipping details.		
Shipping Guarantee Reference	Shipping Guarantee Reference is auto populated from the linked Shipping Guarantee details in the Shipping Detail Grid, based on the Transport Document Reference and Date provided in Bill, which is linked with the Shipping Guarantee. User can select the Shipping Guarantee from the lookup.	
Transport Document Reference	Transport Document Reference is auto populated from the underlying Shipping Guarantee details.. System validates the Shipping Guarantee Transport Document reference number with Transport Document Reference number in a Bill, if user manually provides the Shipping Guarantee detail.	
Transport Document Date	Transport Document Date is auto populated based on the date provided in Bill, which is linked with the Shipping Guarantee.	
Amount	Shipping Guarantee amount is displayed in this field.	
Action	Edit: Click edit to edit the shipping guarantee details. Delete: Click edit to edit the shipping guarantee detail.	

Other Details

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Debit Value Date	Provide the debit value date.	
Credit Value Date	Provide the credit value date.	
Value Date	Provide the value date.	

Other Bank Charges

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Other Bank Charges - 1	Charges to be collected for the other bank as part of the collection transaction.	

Field	Description	Sample Values
Other Bank Charges - 2	Charges to be collected for the other bank as part of the collection transaction.	
Other Bank Charges - 3	Charges to be collected for the other bank as part of the collection transaction.	
Other Bank Description -1	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -2 to 3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	

Other Bank Interest

The user can enter the Interest details to be captured as a part of “Other Bank Interest” details section.

Provide the other bank interest based on the description in the following table:

Field	Description	Sample Values
Start Date	Provide the date from which the system starts calculating the Interest.	
Other Bank Interest-1, 2 and 3		
Component	This field displays the name of the interest Component.	
Component Description	Provide the description of the interest component.	
Interest Rate	Provide the rate to be applied for the interest component.	
Interest Basis	Select the calculation basis on which the Interest to be computed.	
Waive	Select whether the interest to be waived off. The options are: <ul style="list-style-type: none"> • Yes • No 	

Shipment Details

The shipment and goods details as per the documents are captured in the respective fields.

The screenshot displays the Oracle Import Documentary Collection Booking interface. The main form area is titled 'Shipment Details' and contains several sections:

- Transshipment:** A dropdown menu set to 'ALLOWED'.
- Partial Shipments:** A dropdown menu set to 'ALLOWED'.
- Date of Shipment:** A date field set to 'Sep 1, 2021'.
- Place of Taking in Charge:** A text field set to 'Mumbai'.
- Port of Loading:** A text field set to 'Mumbai'.
- Port of Discharge:** A text field set to 'London'.
- Place of Final Delivery:** A text field set to 'London'.
- Carrier Name:** An empty text field.
- Shipping Agent Name:** A text field set to 'John Smith'.
- Shipping Agent Address:** An empty text area.
- INCO Terms:** A dropdown menu set to 'DDP'.
- INCO Terms Description:** A text field set to 'Delivered Duty Paid (named place of de'.
- 45A Description of Goods and/or Services:** A text field.
- Goods Code Table:**

Goods Code	Goods Type	Goods Description	Action

- Policy Number:** An empty text field.
- Insurance Company Address:** A text field set to 'NO 8 .null .null .null .null'.
- Multi-model/ Transshipment details:**

Carrier Name	Port	Action
SAS Carrier	London	[Check] [Delete]

Shipment Details

Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
Transshipment	Provide the transshipment details of goods (if any) from the document received. The values are: <ul style="list-style-type: none"> Allowed Not Allowed 	
Partial Shipments	Provide the partial shipment details of goods (if any) from the document received. The values are: <ul style="list-style-type: none"> Allowed Not Allowed 	
Date Of Shipment	Provide the date of shipment.	

Field	Description	Sample Values
Place Of Taking In Charge	<p>This field specifies the place of taking in charge (in case of a multi-modal transport document), the place of receipt (in case of a road, rail or inland waterway transport document or a courier or expedited delivery service document), the place of dispatch or the place of shipment as indicated on the transport document.</p> <p>Provide the details of place of taking in charge.</p> <p> Note This field is alternate to Port Of Loading.</p>	
Port Of Loading	<p>This field specifies the port of discharge or airport of destination as indicated on the transport document.</p> <p>Provide the details of Port/Airport of Loading.</p> <p> Note This field is alternate to Place Of Taking In Charge.</p>	
Port Of Discharge	<p>This field specifies the port of discharge or airport of destination as indicated on the transport document.</p> <p>Provide the details of Port/Airport of Discharge.</p> <p> Note This field is alternate to Place Of Final Destination.</p>	
Place Of Final Delivery	<p>This field specifies the final destination or place of delivery as indicated on the transport document.</p> <p>Provide the details of Place Of Final Destination.</p> <p> Note This field is alternate to Port Of Discharge.</p>	
Carrier Name	Provide the name of the carrier through which the goods were shipped.	
Shipping Agent	Provide the shipping agent name as per the document received.	
Shipping Agent Address	Provide the shipping agent details, if more than one carrier is used for the shipment.	
INCO Terms	Select the appropriate INCO terms.	

Field	Description	Sample Values
INCO Terms Description	The description of the INCO Term.	

Description of Goods and/or Services

Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
+ Icon	Click + icon to add goods details.	
Goods Code	Click look up icon to select the goods code. Once you select goods code, value will populate in Goods Type and Goods Description.	
Goods Type	The goods type is auto populated depending on selected goods code.	
Goods Description	The goods description is auto populated depending on selected goods code.	
Action	Click Edit icon to edit the goods code. Click Delete icon to delete the goods code.	
Country of Origin	Provide the country of origin details as per the documents received.	
Insurance Company Code	Select the Insurance Company Code from the LOV.	
Insurance Company	Read only field. Insurance company details will be displayed as per the selected Insurance Company Code from the LOV.	
Policy Number	Provide the policy number.	
Insurance Company Address	Read only field. Insurance company address will be displayed as per the selected Insurance Company Code from the LOV.	

Multimodal/Transshipment Details

During shipment, if goods are shipped using multiple transports on its way or any transit ports, the details must be captured in this section.

Field	Description	Sample Values
Carrier Name	Provide the details of the carrier as per the documents received, if the goods were shipped via multiple carriers.	
Port	Provide the port details as per the document received, if the ship has transit on its way to the destination.	

Field	Description	Sample Values
Action	Click Edit icon to edit the Carrier name and port. Click Delete icon to delete the record.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	

Field	Description	Sample Values
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Maturity Details

A DE user can enrich the maturity details for Import Collection Booking'.

Draft Details

Update the maturity details based on the description in the following table:

Field	Description	Sample Values
Draft Code	Update the draft code. Alternatively, user can search the draft details using LOV.	
Draft Amount	Update the draft amount.	
Action	Click Edit icon to edit the draft code. Click Delete icon to delete the draft code.	

Maturity and Multi Tenor Liquidation Details

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

Field	Description	Sample Values
SNo.	Serial number of the tenor record.	
Tenor Basis	Provide the tenor basis. This field is disabled if the Tenor Type is 'Mixed'.	
Tenor Description	The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description.	
Start Date	Select the start date.	

Field	Description	Sample Values
Tenor Days	Provide the tenor days. This field is disabled if the Tenor Type is 'Mixed'.	
Transit Days	Provide the transit days. This field is disabled if the Tenor Type is 'Mixed'.	
Maturity Date	Maturity date as Start date + Tenor Days or Transit Days. This field is disabled if the Tenor Type is 'Mixed'.	
	 <p>Note</p> <p>In case if the Operation Type is FOP, Due date (Maturity date) is not applicable in this case and current branch date will be populated in the Maturity date field.</p>	
Bill Amount	Provide the bill amount.	
Liquidated Amount	Provide the liquidated amount.	
Exchange Rate	Provide the Exchange Rate.	
Liquidation Date	Provide the liquidation date.	
Liquidation Amount	Provide the bill amount.	
Rebate Amount	Provide the value for bill rebate amount.	
Action	Click Edit icon to edit the tenor record. Click Delete icon to delete the tenor record.	
Interest from Date	Select the interest from date. The interest from date cannot be earlier than branch date and later than maturity date.	
Interest to Date	Maturity date is auto-populated in this filed.	
Accept Commission From Date	Provide the accept commission from date.	
Accept Commission To Date	Provide the accept commission to date.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>

Account Currency	Currency of the account.	
Account Branch	Branch of the customer's account.	
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF	
Exchange Rate	The exchange rate.	
Deal Reference Number	The exchange deal reference number.	
Action	Click Edit icon to edit the split settlement details record. Click Delete icon to delete the split settlement details record.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the Liquidation. User can link one or more FX deals to a Bill. The linked value of an FX deal(s) must not exceed the value of the drawing/bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized

during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200762005	GBP	USD	\$1,000.00	1.33	\$1,000.00			Jun 28, 2020

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV.</p> <p>On select and save and close, system defaults the available amount, bot currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>	

Field	Description	Sample Values
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available ContractAmount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Tracers

This section enables the user to view the tracer maintained at Back Office. It also allows the user to add new tracer details. Add new tracer details based on the description in the following table:

Acknowledgement Tracer, Acceptance Tracer and Payment Tracer are applicable for this process.

Payment Tracer

Tracer Required:

Number of Tracers: Tracer Frequency: Tracer Medium:

Tracer Receiver Party: Tracer Start Date: Template ID:

Acceptance Tracer

Tracer Required:

Number of Tracers: Tracer Frequency: Tracer Medium:

Tracer Receiver Party: Tracer Start Date: Template ID:

Field	Description	Sample Values
Tracer Required	Select if tracer is required or not from the available drop list: <ul style="list-style-type: none"> Required Not required Till resolved 	
Number of Tracers	Provide the number tracers required.	
Tracer Frequency	Provide the frequency for generation of the tracer. <div style="text-align: center;">  <p>Note</p> <p>This field is applicable only if Tracer Required has value as Till Resolved.</p> </div>	
Tracer Medium	Select the tracer medium from the LOV. <div style="text-align: center;">  <p>Note</p> <p>This field is applicable only if Tracer Required has value as Required or Till Resolved.</p> </div>	
Tracer Receiver Party	Select the tracer receiver party from the LOV. <div style="text-align: center;">  <p>Note</p> <p>This field is applicable only if Tracer Required has value as Required or Till Resolved.</p> </div>	

Field	Description	Sample Values
Tracer Start Date	Select the tracer start date. Start date cannot be earlier than the branch date.  Note This field is applicable only if Tracer Required has value as Required or Till Resolved .	
Template ID	Select the template ID from LOV.	

Loan Preference

This section enables the user to link a loan to liquidate the document under collection. This section will be enabled based on the product selected for documents under collection.

Loan Preferences screen is enabled if the underlying Import Drawing/Collection product allows Advance by Loan Option. The details can be captured in Import Collection/ Drawing Booking or Update or Liquidation processes and the loan gets created during Liquidation process.

Provide the loan preference details based on the description in the following table:

Field	Description	Sample Values
Drawing/Collection Ref	Defaults from the underlying task. User cannot change the value.	
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount. Defaults from the underlying task. User cannot change the value.	
Customer Id	Defaults from the underlying task. User cannot change the value.	

Field	Description	Sample Values
Customer Name	Applicant/ Drawee Name. Defaults from the underlying task. User cannot change the value.	
Product Code	Defaults from the underlying Collection/ Drawing Product maintenance. User cannot change the value.	
Loan Currency-Amount	Loan currency is defaulted from the bill currency. User can change this to Local Currency. System should display an error message on tab out if the currency selected is not a Bill currency or Local Currency. System populates the loan account based on the outstanding drawing/ Collection amount less the collateral amount. User cannot change the Loan amount.	
Original Exchange Rate	System displays the Original Exchange rate.	
Exchange Rate	Exchange rate applicable for Local Currency. User can enter the Exchange rate. System validates the exchange rate is within the allowed range.	
Loan Tenor Units	Period of loan. System defaults the value. User can change the value. The numerical value for Days or months or Years is applicable.	
Tenor Type	System defaults the value. User can change the value. Values are Days, Months and Years. The numerical value for Days or months or Years is applicable.	
Loan/Finance Value Date	System defaults the branch date as Value date. User cannot change the value.	
Loan Maturity Date	Loan maturity date as default based on Tenor type and Tenor units. User cannot change the value.	
Liquidate Charge/Comm On LC	Toggle On: Turn the toggle on to include the outstanding Commission/charge to be included as part of Liquidation.	
Loan Interest/UDE Details		
User Defined Element ID	System populates the UDE Element ID as part of simulation. User are allowed to change the selection through LOV.	

Field	Description	Sample Values
UDE Description	System populates the UDE description as part of simulation. If a user changes the UDE ID, system should populate the description.	
Rate Code	System populates the Rate code as part of simulation.	
Usage	System populates the details as part of simulation.	
UDE Value	System populates the value as part of simulation.	
Limits		
Serial Number	System defaults the value.	
Linkage Type	System defaults the linkage type as "Facility" from back office.	
Linkage Reference Number	System defaults the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.	
Linked Percentage	User can enter the value. Maximum is 100. User cannot enter negative values.	
Limit Amount	System defaults the value. System should populate the value based on the contribution percentage.	

Interest Details

The user can view and modify the Interest Details Simulated from Back Office system.

Field	Description	Sample Values
Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office. Value can be: <ul style="list-style-type: none"> • Fixed Floating • Special 	
Rate Code	This field displays the rate code applicable for the Componen.	
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code. User can change the value if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	
Currency	System defaults the Interest currency in this field.	

Field	Description	Sample Values
Amount	User can input the interest amount, in case the Rate Type is Special , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	System displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..	
Settlement Account	System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM).	

Preview Message

User can preview the message simulated for correspondence with Remitting Bank.

User can preview the MT999 messages for the applicable MT7XX messages generated by the Back office system in the Preview Message.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Submit	<p>Task will move to next logical stage of Import Documentary Collection Booking.</p> <p>If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.</p>	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	

Field	Description	Sample Values
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Next	Click Next to move to next logical screen of Data Enrichment stage.	

Settlement Details

Provide the settlement details based on the description in the following table:

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	System displays the default currency for the component.	
Debit/Credit	System displays the debit/credit indicators for the components.	
Account	System displays the account details for the components.	
Account Description	System displays the description of the selected account.	
Account Currency	System defaults the currency for all the items based on the account number.	
Netting Indicator	System displays the applicable netting indicator.	
Current Event	System displays the current event as Y or N.	
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF	
Exchange Rate	The exchange rate.	

Field	Description	Sample Values
Deal Reference Number	The exchange deal reference number.	

Summary

User can review the summary of details updated in Data Enrichment stage Import Collection - Booking request.

The screenshot shows the Oracle system interface for an Import Documentary Collection Booking. The page is titled "Summary" and displays various details in a grid format. The details are organized into several sections:

- Main Details:** Booking Date : 2019-05-06, Submission Mode : Desk, Remitter Reference : 45466, Bill Amount : USD 1200.
- Document Details:** Document 1, Document 2.
- Other Details:** Value Date : 2019-05-06, Debit Value Date : 2019-05-06, Credit Value Date : 2019-05-06.
- Shipment Details:** Port of Loading, Port of Discharge, Shipment Date, Carrier Name.
- Maturity Details:** Tenor Type : Usance.
- Additional Fields:** Click here to view Additional fields.
- Advices:** Advice 1, Advice 2.
- Limits and Collaterals:** Limit Currency, Limit Contribution, Limit Status : Not Verified, Collateral Currency, Collateral Status : Not Verified.
- Commission, Charges and Taxes:** Charge, Commission, Tax, Block Status : Not Initia.
- Preview Messages:** Language : ENG, Preview Message : -.
- FX Linkage:** Reference Number, Contract Amount, Contract Currency.
- Loan Preference:** Loan Product, linkageRefNo, Loan Tenor, Loan Currency, Loan Amount, Loan Maturity.
- Tracer Details:** Payment Tracer : No, Acceptance Tracer : No, Charge Tracer : No.
- Payment Details:** Advance by Loan : No, Allow Rollover, Liquidate using, Collateral.
- Settlement Details:** Component, Account Number, Currency.
- Parties Details:** Drawee : WIPRO TECHNO, RemittingBank : 014892, Drawer : DEEPALI C.
- Compliance details:** KYC : Not Initia, Sanctions : Not Initia, AML : Not Initia.
- Accounting Details:** Event, Account Number, Branch.

Tiles Displayed in Summary

Exceptions

The Import Collection Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify details provided for charges, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	<p>Cancel the Import Collection Booking Amount Block Exception check.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the amount block exception details.

Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key

Application will request approver for few field values to validate authorization. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Advices - User can view the advices.
- Payment Details - User can view the payment details.
- FX Linkage - User can view the FX Linkage details.
- Settlement Details - User can view the settlement details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	

Field	Description	Sample Values
Cancel	Cancel the approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

Action Buttons

Use action buttons based on the description in the following table:
