# **Oracle Banking Trade Finance Process Management**

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

#### Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

#### **Benefits**

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

#### **Key Features**

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# **Import LC Closure - Islamic**

As part of Conventional Import LC Close, System enables the user to close the LC which had been already issued.

The various stages involved for Import LC Close are:

- Receive and verify documents and input basic details (Non Online Channel)- Registration stage
- Upload of related mandatory and non-mandatory documents
- Input/Modify
- details of Close of LC Data Enrichment stage
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Import LC Close process flow is similar to that of conventional Import LC Close process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Multi Level Approval
Reject Approval	

## **Common Initiation Stage**

The user can initiate the new Islamic Import LC Closure from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

#### 2. Click Trade Finance > Initiate Task.

			( DEFAULTENTITY)	Oracle Banking Trade Finan 🏚	ZARTAB02 subham@gmail.com
egistration

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Documentary Credit Number	Select the Documentary Credit Number.

	Field	Description
_	Branch	Select the branch.

#### **Action Buttons**

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

## Registration

During the Registration stage, the user can register a request for an Islamic Import LC Closure received at the front desk (as an application received physically/received by mail/fax).

User can capture the basic details of the response, check the signature of the signatory from the advising bank and upload the related documents. On submit of the request, the customer should be notified with acknowledgment and the request should be available for an LC close expert to handle in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

## Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Documentary Credit Number	Provide the documentary credit number. Alternatively, user can search the documentary credit number using LOV.	
	In LOV search/advanced LOV search, user can input Customer ID, Beneficiary, Currency, Amount and User Reference to fetch the LC details. Based on the search result, select the applicable LC to be closed.	
Customer ID	Read only field.	001344
	Customer ID will be auto-populated based on the selected LC.	
Customer Name	Read only field.	EMR & CO
	Customer Name will be auto-populated based on the selected LC.	
Branch	Read only field.	203-Bank
	Branch details will be auto-populated based on the selected LC.	Futura -Branch FZ1
Process Reference Number	Unique OBTFPM task reference number for the transaction.	
	This is auto generated by the system based on process name and branch code.	
Priority	System will default the Priority as Low/Medium/ High based on maintenance.	High

Field	Description Sample Va	
Submission Mode	Select the submission mode of Import LC Closure request. By default the submission mode will have the value as 'Desk'.	Desk
	Desk- Request received through Desk	
	Fax- Request received through Fax	
	Email- Request received through Email	
	Courier- Request received through Courier	
Closure Date	By default, the application will display branch's current date.	04/13/2018
	<b>Note</b> Future date selection is not allowed.	
Customer Reference Number	User can enter the 'Reference number' provided by the applicant/ applicant bank. Enables the user to provide a unique Customer Reference Number for the closure.

### **Action Buttons**

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents.	
	Application will display the mandatory and optional documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.	
	Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	Click to view/ input the following	
	<ul> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> </ul>	
	• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signature	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
View LC	Enables user to view the details of the LC.	

Field	Description	Sample Values
View LC Events	Click this button to view all the Undertaking events under the LC Issued till date.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

### Advices

DE user can verify the Advices generated during Islamic Import LC Cancellation request. Advices menu displays the advices from the back office as tiles. User can edit the fields in the tile, if required.

#### DE User can view the Advices generated for Import LC Closure process.

### **Commission Details**

This section displays the commission details:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	This field displays the commission component.	

Field	Description	Sample Values
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.	
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field.	
	The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.	
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	If this toggle is enabled, charges/commissions has to be deferred and collected at any future step.	
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.	
	If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

### **Charges Details**

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
	On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.	
	The user can not select/de-select the check box if it is de-selected by default.	
	This field is disabled, if 'Defer' toggle is enabled.	
Defer	If charges have to be deferred and collected at any future step, this toggle has to be enabled.	
	On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.	
	The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	If charges have to be waived, this toggle has to be enabled.	
	Based on the customer maintenance, the charges should be marked for Billing or for Defer.	
	This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

#### Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

	R4- Insufficient Balance/Limits	
	R5 - Others.	
	Select a Reject code and give a Reject Description.	
	This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold.	
	This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user.User must select a Refer Reason from the values displayed by the system. Refer Codes:	
	<ul> <li>R1- Documents missing</li> </ul>	
	R2- Signature Missing	
	R3- Input Error	
	<ul><li>R4- Insufficient Balance- Limits</li><li>R5 - Others</li></ul>	
Cancel	Cancel the approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

## **Reject Approval**

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can been seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

#### Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details User can view details about application details and document under collection.
- Party Details User can view party details like applicant, Remitting Bank etc.
- Document Details User can view document details.
- Shipment Details User can view shipment details.
- Charges User can view charge details.
- Maturity Details User can view the maturity details.
- Message Preview User can view the preview of the simulating message to the remitting bank.

#### **Action Buttons**

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
