SLA Maintenance

Banks may require to have a Service Level Agreement (SLA) with its customers or as an internal policy of the Bank. This User Manual lists the SLA maintenance requirements in OBTFPM and other Mid-office Applications

SLA Maintenance is available based on the Business Process-Stage- Priority combination.

SLA Maintenance to have two screens, one screen for Definition of SLA and another for Authorization/ Edit/ Delete.

SLA maintenance screens are used to calculate SLA. The user can Create SLA, and View SLA (for Edit, Copy, Delete).

The user can view the tasks that are either nearing SLA breach or that have already breached SLA in the **Free Task** and **My Task** queue. The status should be indicated for tasks at both the stage as well as process level by colours such as Red and Amber.

This section contains the following topics:

Creating SLA	Viewing SLA
Search SLA	SLA Standard Maintenance
	SLA Widget - SLA Status Summary

Creating SLA

This process allows the user to create SLA, let's look at the steps of creating a Checklist process:

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

ORACLE
Sign In

Provide the field description based on the following table. Action Buttons

Field	Description
Product/Application Code	User can select the Product or Application Code.
Product/Application Name	System displays the name of the Product/Application (Example Oracle Banking Trade Finance Process Management).
Business Process Code	User can select the Business Process Code for which the SLA maintenance has to be made.

Field	Description
Business Process Name	The Business Process name pertaining to the Business Process code selected is defaulted.
Branch	User can select the branch code for which SLA maintenance has to be done.
	There is also an option to select All as a value which will enable the SLA to be applicable for all branches in the bank.
Branch Working Hours	System populates the branch working hours.
Version Number	System defaults the version number on creating/updating the screen.
Include for SLA calculation	For calculation of SLA the user can include:
	 Branch Holidays: User can select this check box, if branch holidays is to be considered for SLA calculation
	 Currency Holidays: User can select this check box, if currency holidays is to be considered for SLA calculation
	 Hold Time: User can select this check box, if hold time is to be considered for SLA calculation.
	 Customer Clarification: User can select this check box, if Customer Clarification items is to be considered for SLA calculation
	 Off Branch Time Transactions: User can select this check box, if SLA should be calculated after branch hours.
Below fields appear on tab c	but after entering the above information.
Stage Name	On selection of the process code, the various stages available for the process should be defaulted.
Stage ID	System defaults the stage ID based on the stage name.
Parallel Stage	System defaults the various stages available for the process, on selection of the process code.
SLA Required	This toggle indicates whether SLA calculation is required for this stage. By Default, the toggle should be set to Yes. User can change the value to No. If the toggle is changed to No, user input should be disabled and the SLA values for the stage should be blank.
Time In	User can select the drop-down and system displays a pop-up UI for input of the Stage SLA in Days/Hours/Minutes combination. System converts this into minutes and display in the respective fields. Alternatively, user can directly input the SLA in Minutes.
Breach Alert Time	User can input the SLA Breach Alert time in minutes for the Stage. This will indicate the minutes before which a user needs to be alerted for likely SLA breach for the stage. This is the same for all the different priority combinations for a stage irrespective of the individual SLA times.
Low Priority (In Mins) Offline	User can input the SLA time in minutes.
Low Priority (In Mins)	User can input the SLA time in minutes.
Online	System validates that the time in minutes is not more than value input for offline.

Field	Description					
Medium Priority (In Mins)	User can input the SLA time in minutes.					
Offline	System validates that the time in minutes is not more than value input for offline.					
Medium Priority (In Mins)	User can input the SLA time in minutes.					
Online	System validates that the time in minutes is not more than value input for offline.					
	System validates the time in minutes is not more than value for Low Priority.					
High Priority (In Mins)	User can input the SLA time in minutes					
Offline	System validates that the time in minutes is not more than value input for offline.					
	System validates the time in minutes is not more than value for Low Priority					
High Priority (In Mins)	User can input the SLA time in minutes					
Online	System validates that the time in minutes is not more than value input for offline.					
	System validates the time in minutes is not more than value for Low Priority					

Action Buttons

Field	Description
Save	Click to save the to close the task and reopen it to work later.
Cancel	Click to cancel the SLA Maintenance window and return to dashboard. The data input will not be saved.

4. Click **Save** to save the created SLA. The new SLA is displayed as tile in the **View SLA** screen.

Viewing SLA

The user can view the summary of SLAs maintained in the form of tiles. The user can view the maintained SLA, if the SLA is already created in the system. The user can also create a new SLA using View SLA screen, by clicking the '+' icon.

1. Click Core Maintenance > SLA Maintenance > View SLA.

Status	Displays the status of the record. Values are Authorized and Unauthorized.

SLA Widget

The SLA status widget is available in the Dashboard and is accessible as per user credentials. The Widget displays the SLA status maintained at the process level. The Widget displays only those tasks that are not being handed off to Back Office system.

The user can view the SLA Widget in a graphical chart (doughnut chart) as well as in Tabular form by clicking the right arrow on the widget. The tabular form displays the Status, Branch, name of the Process, Stage Name, Process Reference Number, Customer Number, Currency and Amount.

The Widget should be designed in such a way that the user should be able to view the number of items in each status for all the processes. The widget also has filter option to view the details as per filter criteria.

The SLA Status Widget highlight the tasks that are within SLA (in green), approaching SLA breach (in amber) and that have breached SLA (in red).

The user can view the tasks that are either nearing SLA breach or that have already breached SLA in the **Free Task** and **My Task** queue. The status should be indicated for tasks at both the stage as well as process level by colours such as Red and Amber.

÷

SLA Status (Stage)	SLA Status (Process)	Indicator
