Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with Back End applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any Back End application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Update Details of Buyers Credit

Bank can arrange for a credit (Buyers Credit) for an Import Bill liquidation, based on the request from the customer through other Lending Banks.

In such cases, system should allow the bank user to liquidate the Import Bill using the Buyers Credit and to settle the Buyers Credit later on debiting the customer account.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exceptions
Multi Level Approval	Handoff

Common Initiation Stage

The user can initiate the new Update Details of Buyers Credit request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The process starts from Registration stage, during Registration stage, user can capture the basic details of the transaction and upload the related documents. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for an expert to handle the request in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

FuTura Bank

Cancel

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The screenshot shows the FuTura Bank dashboard with a sidebar menu on the left containing options like Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main dashboard area contains several widgets:

- Draft Confirmation Pending:** A table with columns Customer Name, Application Date, and a status indicator. Data includes EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns Branch, Process Name, and Stage Name. Data includes Bank Futura, NA, and Retry HandOf.
- Priority Details:** A table with columns Branch, Process Name, and Stage Name. Data includes Bank Futura, NA, Amount Blo, and 004, NA, Loan Applic.
- High Value Transactions:** A bubble chart showing transaction values on the y-axis (ranging from -20K to 140K) and a category on the x-axis (ranging from -2 to 12). A legend indicates GBP.
- SLA Breach Details:** A table with columns Customer Name, SLA Breached(mins), and Priority. Data includes NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns Branch, Process Name, and Stage Name. Data includes 203, Cucumber Testing, and test descrip.
- Hold Transactions:** A table with columns Branch, Process Name, and Stage Name.
- SLA Status:** A widget showing Cucumber Testing.
- Tasks Detailed:** A widget showing Cucumber Testing.

3. Click Trade Finance> Buyers Credit> Update Details of Buyers Credit.

The screenshot shows the Oracle dashboard with a sidebar menu on the left containing options like Core Maintenance, Dashboard, Machine Learning, Rule, Security Management, Task Management, Tasks, Trade Finance, Administration, Bank Guarantee Advise, Bank Guarantee Issuance, and Buyers Credit. The main dashboard area contains several widgets:

- SLA Status Summary:** A donut chart showing 9 items. A legend indicates Within SLA (green), Nearing SLA (orange), and SLA breached (red).
- % Oversight Corrections:** A widget showing Data Filtered on "All records" and No data to display.
- Model Inference Time:** A widget showing Data Filtered on "All records" and No data to display.
- Priority Summary:** A table with columns Branch, Process Name, Stage Name, and No of High Priority. Data includes No data to display.
- High Priority Tasks:** A table with columns Process Reference Number, Branch, and Process Name. Data includes PK2GADC000012104 (Guarantee SBLC Ad) and PK2GADC000012077 (Guarantee SBLC Ad).

The Registration stage has two sections Application Details and Buyers Credit Bill Details. Let's look at the details of Registration screens below:

Application Details

Provide the Application Details based on the description in the following table.

Field	Description	Sample Values

Other Details

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Debit Value Date	Specify the debit value date.	
Credit Value Date	Specify the credit value date.	
Value Date	Specify the value date.	

Other Bank Charges

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Other Bank Charges - 1	Charges to be collected for the other bank as part of the collection transaction.	
Other Bank Charges - 2	Charges to be collected for the other bank as part of the collection transaction.	
Other Bank Charges - 3	Charges to be collected for the other bank as part of the collection transaction.	

Other Bank Interest

This data segment displays the Interest details to be captured as a part of "Other Bank Interest" details section.

Provide the other bank interest based on the description in the following table:

Field	Description	Sample Values
Start Date	Read only field. The date from which the system starts calculating the Interest.	
Other Bank Interest-1, 2 and 3		
Component	Read only field. This field displays the name of the interest Component.	
Component Description	Read only field. The description of the interest component.	
Interest Rate	Read only field. The rate to be applied for the interest component.	
Interest Basis	Read only field. The calculation basis on which the Interest to be computed.	
Waive	Read only field. Indicates whether the interest to be waived off. The options are: <ul style="list-style-type: none"> • Yes • No 	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the scrutiny stage inputs and the task gets landed in My Task menu.	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	
Back	On click of Back, system moves the task back to the previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Advices

Advices menu displays the advices available under a product code from the back office as tiles. System populates the following advices:

- Payment Message (Debit advice) to the Customer

The screenshot shows a web application interface for 'Buyers Credit Update'. The top navigation bar includes buttons for 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', and 'Common Group Messages'. A left sidebar menu is visible with 'Advices' selected. The main content area displays a tile for an advice: 'Advice: PAYMENT_MESS...'. The details for this advice are: Advice Name: PAYMENT_MESSAGE, Advice Party, Party Name, Suppress: NO, and Advice. At the bottom of the interface, there is an 'Audit' button and a row of action buttons: 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

The user can also suppress the Advice, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values

Commission Details

Commission Details are auto-populated from back-end system.

Component	This field displays the commission component	
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.	
Currency	Defaults the currency in which the commission needs to be collected	

Field	Description	Sample Values
Amount	<p>This field displays the amount that is maintained under the product code.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Waive	<p>Select the check box to waive charges/ commission.</p> <p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	
Charge Details		
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Tag amount that is maintained under the product code.	
Currency	Defaults the currency in which the charges have to be collected.	

Field	Description	Sample Values
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not enable/disable the option, if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled..</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>Enable the toggle, if charges has to be waived.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if Defer toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

Field	Description	Sample Values
Component	Tax Component type	

Field	Description	Sample Values
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

The screenshot shows the 'FX Linkage' application window. It features a table with the following columns: FX Reference Number, Bought Currency, SOLD Currency, Available Contract Amount, Rate, Linked Amount, Current Utilized Amount, Total Utilized Amount, FX Expiry Date, and Action. The table contains one row with the following values: PK2FXF1200761010, (empty), (empty), US\$0.00, 0, US\$0.00, (empty), (empty), (empty), and (empty). Below the table, there is a pagination control showing 'Page 1 of 1 (1 of 1 items)' and a summary section for 'Average FX Rate' with a value of 0. At the bottom right, there are 'Save & Close' and 'Cancel' buttons.

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200761010			US\$0.00	0	US\$0.00

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV.</p> <p>On select and save and close, system defaults the available amount, bot currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>	
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	

Field	Description	Sample Values
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Preview Messages

User can preview the draft SWIFT message based on message type and the draft mail advice based on the advice type.

Provide the Preview details based on the description in the following table:

Exceptions

The Update Details of Buyers Credit request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into Oracle Banking Trade Finance Process Management application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Back	<p>Task moves to previous logical step.</p>	

Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

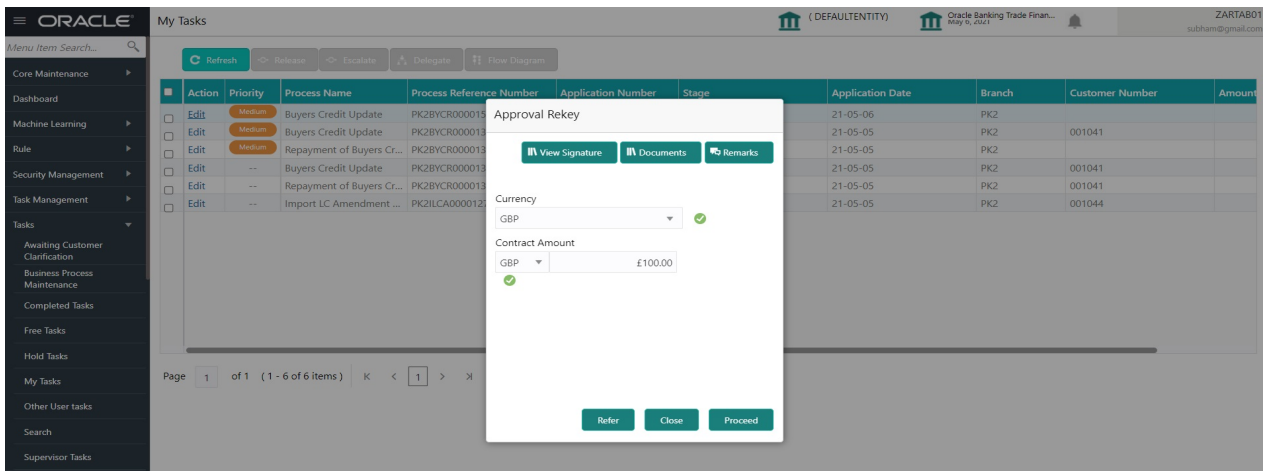

Authorization Re-Key

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

Action Buttons

Use action buttons based on the description in the following table:
