Hold Reason	Used to indicate the reason why you want to hold the entity.	Yes
	<b>Note:</b> The hold reason must exist in the <b>HOLD_REASON_FLG</b> lookup field and its status must be <b>Active</b> .	

Column Name	Description	Mandatory (Yes or No)
Hold Entity	Used to indicate the type of the entity for which you want to create the hold request. The valid values are: <ul style="list-style-type: none"> <li>ACCT</li> <li>BILL</li> <li>PERS</li> </ul>	Yes
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional)
		<b>Note:</b> This data is required when the hold entity is <b>ACCT</b> and the entity ID is not specified.
Account Identifier	Used to specify the identifier of the account for which you want to create the hold request.	Yes (Conditional)
		<b>Note:</b> This data is required when the hold entity is <b>ACCT</b> and the entity ID is not specified.
Person Identifier Type	Used to specify the person identifier type.	Yes (Conditional)
		<b>Note:</b> This data is required when the hold entity is <b>PERS</b> and the entity ID is not specified.
Person Identifier	Used to specify the identifier of the person for which you want to create the hold request.	Yes (Conditional)
		<b>Note:</b> This data is required when the hold entity is <b>PERS</b> and the entity ID is not specified.
Hold Entity ID	Used to specify the entity ID.	Yes (Conditional)
		<b>Note:</b> This data is required when the hold entity is <b>BILL</b> .
	<b>Note:</b> If the hold entity is <b>ACCT</b> , you must specify the account ID in this field. If the hold entity is <b>PERS</b> , you must specify the person ID in this field. And, if the hold entity is <b>BILL</b> , you must specify the bill ID in this field.  If you do not specify the account ID, the system derives the account ID using the account identifier type and account identifier combination. Similarly, if you do not specify the person ID, the system derives the person ID using the person identifier type and person identifier combination.	
Comments	Used to specify additional information about the hold request.	No
Hold Entity Start Date	Used to specify the date from when you want to hold the entity.	Yes

Column Name	Description	Mandatory (Yes or No)
	<b>Note:</b> The hold entity start date must be between the hold request start and end dates and between at least one process's start and end dates.  The hold entity start date cannot be later than the hold entity end date.	
Hold Entity End Date	Used to specify the date till when you want to hold the entity.  <b>Note:</b> The hold entity end date must be between hold request start and end dates and between the process's start and end dates.  The hold entity end date cannot be earlier than the hold entity start date.	No
Hold Funding	Used to indicate whether you want to hold the funding process for the entity. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <b>Note:</b> You can hold the funding process when the hold entity is <b>PERS</b> or <b>BILL</b> .	No
Hold Funding Start Date	Used to specify the date from when you want to hold the funding process.  <b>Note:</b> The hold funding start date must be between the hold request start and end dates.  The hold funding start date cannot be later than the hold funding end date.	Yes (Conditional)  <b>Note:</b> This data is required when the funding process must be kept on hold.
Hold Funding End Date	Used to specify the date till when you want to hold the funding process.  <b>Note:</b> The hold funding end date must be between the hold request start and end dates.  The hold funding end date cannot be earlier than the hold funding start date.	No
Hold Overdue	Used to indicate whether you want to hold the overdue process for the entity. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No

Column Name	Description	Mandatory (Yes or No)
Hold Overdue Start Date	Used to specify the date from when you want to hold the overdue process.	Yes (Conditional)
	<b>Note:</b> The hold overdue start date must be between the hold request start and end dates. The hold overdue start date cannot be later than the hold overdue end date.	<b>Note:</b> This data is required when the overdue process must be kept on hold.
Hold Overdue End Date	Used to specify the date till when you want to hold the overdue process.	No
	<b>Note:</b> The hold overdue end date must be between the hold request start and end dates. The hold overdue end date cannot be earlier than the hold overdue start date.	
Hold Bill Generation	Used to indicate whether you want to hold the bill generation process for the entity. The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul>	No
Hold Bill Generation Start Date	Used to specify the date from when you want to hold the bill generation process.	Yes (Conditional)
	<b>Note:</b> The hold bill generation start date must be between the hold request start and end dates. The hold bill generation start date cannot be later than the hold bill generation end date.	<b>Note:</b> This data is required when the bill generation process must be kept on hold.
Hold Bill Generation End Date	Used to specify the date till when you want to hold the bill generation process.	No
	<b>Note:</b> The hold bill generation end date must be between the hold request start and end dates. The hold bill generation end date cannot be earlier than the hold bill generation start date.	
Hold Auto Pay	Used to indicate whether you want to hold the automatic payment process for the entity. The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul>	No

Column Name	Description	Mandatory (Yes or No)
Hold Autopay Start Date	Used to specify the date from when you want to hold the automatic payment process.	Yes (Conditional)
	<b>Note:</b> The hold autopay start date must be between the hold request start and end dates. The hold autopay start date cannot be later than the hold autopay end date.	<b>Note:</b> This data is required when the automatic payment process must be kept on hold.
Hold Autopay End Date	Used to specify the date till when you want to hold the automatic payment process.	No
	<b>Note:</b> The hold autopay end date must be between the hold request start and end dates. The hold autopay end date cannot be earlier than the hold autopay start date.	
Effective Date1, Effective Date2, ....., Effective Date5	Used to specify the date from when the characteristic is effective for the hold request.	Yes (Conditional)
		<b>Note:</b> This data is required when the characteristic type or characteristic value is specified.
Char Type1, Char Type2, ....., Char Type5	Used to indicate the characteristic that must be defined for the hold request.	Yes (Conditional)
	<b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> .	<b>Note:</b> This data is required when the effective date or characteristic value is specified.
Char Val1, Char Val2, ....., Char Val5	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This data is required when the effective date or characteristic type is specified.

## CSV File Format for Refund Request Upload

Before uploading a refund request file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Refund Request Type	Used to specify the refund request type.	Yes
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional)

Column Name	Description	Mandatory (Yes or No)
		<b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account Identifier	Used to specify the account identifier of the account for which you want to create the refund request.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account ID	Used to specify the account for which you want to create the refund request.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account Identifier Type</b> and <b>Account Identifier</b> are not specified.
Entity Type	Used to specify the entity type.	Yes
Entity ID	Used to specify the entity ID.	Yes
Adjustment Type	Used to specify the adjustment type using which the refund adjustments are created.	No
Refund Amount	Used to specify the amount that you want to refund.	Yes
Comments	Used to specify the comments which are added on the refund request.	No
Effective Date1, Effective Date2, ....., Effective Date5	Used to indicate the effective date of the characteristics.	Yes (Conditional) <b>Note:</b> This data is required when <b>Char Type</b> or <b>Char Val</b> is specified.
Char Type1, Char Type2, ....., Char Type5	Used to indicate the characteristic that must be defined for the refund request.	Yes (Conditional) <b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Val</b> is specified.
Char Val1, Char Val2, ....., Char Val5	Used to specify the value of the characteristic type.	Yes (Conditional) <b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Type</b> is specified.

## CSV File Format for Write Off Request Upload

Before uploading a write off request file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Write Off Request Type	Used to specify the write off request type.	Yes
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional)
		<b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account Identifier	Used to specify the account identifier of the account for which you want to create the write off request.	Yes (Conditional)
		<b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account ID	Used to specify the account for which you want to create the write off request.	Yes (Conditional)
		<b>Note:</b> This data is required when the <b>Account Identifier Type</b> and <b>Account Identifier</b> are not specified.
Entity Type	Used to specify the entity type.	Yes
Entity ID	Used to specify the entity ID.	Yes
Adjustment Type	Used to specify the adjustment type using which the write off adjustments are created.	No
Write Off Amount	Used to specify the amount that you want to write off.	Yes
Comments	Used to specify the comments which are added on the write off request.	No
Effective Date1, Effective Date2, ....., Effective Date5	Used to indicate the effective date of the characteristics.	Yes (Conditional)
		<b>Note:</b> This data is required when <b>Char Type</b> or <b>Char Val</b> is specified.
Char Type1, Char Type2, ....., Char Type5	Used to indicate the characteristic that must be defined for the write off request.	Yes (Conditional)
		<b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Val</b> is specified.
Char Val1, Char Val2, ....., Char Val5	Used to specify the value of the characteristic type.	Yes (Conditional)
		<b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Type</b> is specified.

## CSV File Format for Reinstatement Upload Request

Before uploading a policy reinstatement file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Policy ID	Used to indicate the policy which you want to reinstate.	No
	<b>Note:</b> If you do not specify the policy ID, the system derives the policy ID using the source system and policy number combination.	
Source System	Used to indicate the external system from where the policy is originated.	Yes (Conditional)
		<b>Note:</b> This data is required when the policy ID is not specified.
Policy Number	Used to indicate the policy number.	Yes (Conditional)
		<b>Note:</b> This data is required when the policy ID is not specified.
Reinstatement Reason	Used to indicate the reason why you want to reinstate the policy.	Yes
	<b>Note:</b> You must specify a reason which is defined for the status specified in the <b>Policy Reinstatement Status for Reason Verification</b> parameter of the <b>C1-REN-VALID</b> algorithm.	

## CSV File Format for Bill Group Sorting Upload Request

Before uploading a bill group sorting file, you need to ensure that the CSV file contains the following values in the specified order separated by a comma:

Sr. No.	Value	Description	Mandatory (Yes or No)
1	Bill Group ID	Used to indicate the bill group (i.e. person) for whom you want to define the sort ID.	Yes (Conditional)
		<b>Note:</b> You must specify an effective child person of the parent customer for whom you are creating the bill group sorting upload request. In addition, note that you must specify a child person whose person type is set to <b>Bill Group</b> and who is related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLLNG</b> feature configuration.	<b>Note:</b> This data is required when the bill group (i.e. person) identifier type and bill group (i.e. person) identifier are not specified.
2	Bill Group Identifier Type	Used to specify the bill group (i.e. person) identifier type.	Yes (Conditional)
			<b>Note:</b> This data is required when the bill group (i.e. person) ID is not specified.

Sr. No.	Value	Description	Mandatory (Yes or No)
3	Bill Group Identifier	Used to specify identifier of the bill group (i.e. person) for whom you want to define the sort ID.	Yes (Conditional)
			<b>Note:</b> This data is required when the bill group (i.e. person) ID is not specified.
4	Sort ID	Used to specify the sort ID.	Yes
5	Description	Used to specify the description for the sort ID.	Yes
6	Start Date	Used to specify the date from when the sort ID is effective for the bill group.	Yes
		<b>Note:</b> The start date cannot be later than the end date.	
7	End Date	Used to specify the date till when the sort ID is effective for the bill group.	No
		<b>Note:</b> The end date cannot be earlier than the start date.	

## CSV File Format for Bill Group Derivation and Pricing Parameters Upload Request

Before uploading a bill group derivation and pricing parameters file, you need to ensure that the CSV file contains the following values in the specified order separated by a comma:

Sr. No.	Value	Description	Mandatory (Yes or No)
1	Source System	Used to indicate the source system from where the claim and enrollment transactions are received.	Yes
		<b>Note:</b> You must specify a source system which already exists in the extendable lookup which is specified in the <b>Source System Extendable Lookup</b> parameter of the <b>C1-BLVLVALID</b> algorithm.	
2	Parameter 1	Used to specify the employee attribute based on which you want to derive the bill group.	Yes
		<b>Note:</b> You must not specify the ampersand (&) character in the parameter 1.	
3	Parameter 2	Used to specify the employee attribute based on which you want to derive the bill group.	No
		<b>Note:</b> You must not specify the ampersand (&) character in the parameter 2.	

Sr. No.	Value	Description	Mandatory (Yes or No)
4	Parameter 3	Used to specify the employee attribute based on which you want to derive the bill group.	No
		<b>Note:</b> You must not specify the ampersand (&) character in the parameter 3.	
5	Parameter 4	Used to specify the employee attribute based on which you want to derive the bill group.	No
		<b>Note:</b> You must not specify the ampersand (&) character in the parameter 4.	
6	Effective Date	Used to specify the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.	Yes
		<b>Note:</b> The effective date must be within the date range of the sort ID defined for the bill group.	
7	Bill Group ID	Used to indicate the bill group (i.e. person) for whom you want to define the derivation and pricing parameters.	Yes (Conditional)
		<b>Note:</b> This data is required when the bill group (i.e. person) identifier type and bill group (i.e. person) identifier are not specified.	
		<b>Note:</b> You must specify an effective child person of the parent customer for whom you are creating the bill group derivation and pricing parameters upload request. In addition, note that you must specify a child person whose person type is set to <b>Bill Group</b> and who is related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLLNG</b> feature configuration.	
8	Bill Group Identifier Type	Used to specify the bill group (i.e. person) identifier type.	Yes (Conditional)
			<b>Note:</b> This data is required when the bill group (i.e. person) ID is not specified.
9	Bill Group Identifier	Used to specify identifier of the bill group (i.e. person) for whom you want to define the derivation and pricing parameters.	Yes (Conditional)
			<b>Note:</b> This data is required when the bill group (i.e. person) ID is not specified.
10	Sort ID	Used to indicate the sort ID of the bill group for which you want to define the derivation and pricing parameters.	Yes

## Upload Request Type

Oracle Revenue Management and Billing allows you to define an upload request type using which you can upload a file. An upload request of the specified upload request type is created on uploading the file. It is the upload request type which helps the system to understand how to process the file. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.

The **Adjustment Upload Request Type (C1-AdjRequestType)** business object is used for the maintenance of upload request types for uploading CSV data. Configurations like upload file size, approval workflow can be configured using this object. If you are going to upload adjustment data files using an upload request type, you need to specify the match types (using which the adjustments must be created) in the upload request type. At present, the following two match types are shipped with the product:

- Contract
- Contract Type

You can also define custom match types, if required. You must use the **ADJ\_MATCH\_TYPE** lookup field to add a new match type. You need to attach an algorithm to each match type to determine the contract against which the adjustment must be created. At present, the following algorithm types and sample algorithms are shipped with the product:

Match Type	Algorithm Type	Sample Algorithm	Algorithm Description
Contract	C1-MTCIALG	C1-MTCIALG	This algorithm fetches contract ID for each adjustment record where the match type is set to <b>Contract (CONT)</b> .
Contract Type	C1-MTCTALG	C1-MTCTALG	This algorithm fetches contract ID based on the contract type and account ID for each adjustment record where the match type is set to <b>Contract Type (CNTY)</b> . If there are multiple active contracts of the specified contract type on the account, the contract ID with the latest start date will be fetched.

The **Upload Request Type (C1-UplRequestType)** business object will be used for the maintenance of upload request types for uploading CSV data. Configurations like upload file size, approval workflow can be configured using this object. The system enables you to upload data for the following using the **Upload Request** feature:

- Billable Charge (Adhoc and Regular)
- Hold Request
- Refund Request
- Write Off Request
- Policy Reinstatement
- Bill Group Sort ID
- Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

It also enables you to update the following information:

- Contract rider of a contract
- Bill cycle of an account

It is the upload request type which helps the system to determine:

- Whether the file must be approved by the approver before creating or updating the entities
- Which business object must be used for creating the upload request
- Which business object must be used for creating or updating entities through an upload request
- Which foreign key reference must be used for generating information string for the entity
- A set of fields using which you can search records uploaded through an upload request

You can also define custom algorithm types and algorithms, if required. The **Upload Request Type** screen allows you to define, edit, copy, and delete an upload request type. This screen consists of the following zones:

- [Upload Request Type List](#) on page 1252
- [Upload Request Type](#) on page 1253

## Upload Request Type List

The **Upload Request Type List** zone lists upload request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Upload Request Type	Displays the upload request type.
Description	Displays the description of the upload request type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Upload Request Type</b> screen appears where you can edit the details of the upload request type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Upload Request Type</b> screen appears where you can define an upload request type using an existing upload request type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the upload request type.
	<b>Note:</b> You can delete an upload request type when you have not uploaded a file (i.e. created an upload request) using the upload request type.
Mapping	On clicking the <b>Mapping</b> (🔗) icon, the mapping screen appears where you can map the columns of CSV file with the upload request type.

On clicking the **Broadcast** (📡) icon corresponding to an upload request type, the **Upload Request Type** zone appears with the details of the respective upload request type.

## Upload Request Type

The **Upload Request Type** zone displays the details of the upload request type. This zone contains the following sections:

- **Main** – This section provides basic information about the upload request type. It contains the following fields:

Field Name	Field Description
Upload Request Type	Displays the upload request type.
Upload Request Business Object	Indicates the business object that will be used to create the upload request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Description	Displays the description of the upload request type.
Detailed Description	Displays additional information about the upload request type.
Status	Indicates the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
File Size (KB)	Displays the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.
	<b>Note:</b> This field appears when you create upload request type using <b>Adjustment Upload Request Type</b> business object.
Defer Algorithm	Indicates the algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit. If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.
	<b>Note:</b> This field appears when you create upload request type using <b>Adjustment Upload Request Type</b> business object. It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm. In <b>Upload Request Type</b> , online and deferred mode is used for processing the file if approval is not required. The defer algorithm is invoked if the number of records to be processed on the respective business object is more than the count specified on the algorithm then the status for number of records is changed from <b>Validated</b> to <b>Deferred Processing</b> else the status is changed to <b>Processed</b> .

Field Name	Field Description
Approval Required	Indicates whether approval is required for a file which is uploaded using the upload request type.
Approval To Do Type	Indicates that the To Do entry of the specified To Do type must be created when you submit the upload request for approval.
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.
Approval To Do Role	Indicates that users with the specified To Do role can only approve or reject the upload request submitted for approval.
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected. On selecting the <b>To Do Type</b> , the <b>To Do Roles</b> configured on the <b>To Do Type</b> is populated. It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.
FK Reference	Indicates the foreign key reference which specifies the created upload request type.
	<b>Note:</b> This field appears when you create upload request type using <b>Upload Request Type</b> business object. It has a link. On clicking the link, the <b>Foreign Key Reference</b> screen appears with the details of the respective foreign key.

In addition, this section has the following columns:

Column Name	Column Description
Match Type	Indicates the match type using which the adjustments must be created when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>
	<b>Note:</b> The <b>Match Type</b> column is displayed for <b>Adjustment Upload Request</b> Business Object.
Algorithm	Indicates the algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears with the details of the respective algorithm. The <b>Algorithm</b> column is displayed for <b>Adjustment Upload Request</b> Business Object.

- **Characteristics** – This section lists the characteristics of the upload request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the upload request type.
Delete	Used to delete the upload request type. <b>Note:</b> You can delete an upload request type when you have not uploaded a file (i.e. created an upload request) using the upload request type.
Duplicate	Used to create a new upload request type using an existing upload request type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the upload request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Upload Request Type** zone does not appear in the **Upload Request Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to an upload request type in the **Upload Request Type List** zone.

## Defining an Upload Request Type

### Prerequisites

To define an upload request type, you should have:

- Upload request business objects defined in the application
- Defer algorithm for adjustment is defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the **Contract** match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do while submitting an adjustment upload request for approval
- **C1-BCUUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill cycle update upload request for approval
- **C1-CRUUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a contract rider update upload request for approval
- **C1-HLDUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a hold upload request for approval
- **C1-REFUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a refund upload request for approval
- **C1-WOUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a write off upload request for approval
- **C1-BCUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a billable charge upload request for approval
- **C1-RPUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a reinstatement upload request for approval
- **C1-BGSRT** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill group sorting upload request for approval
- **C1-BGDVP** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill group derivation and pricing parameters upload request for approval

### **Procedure**

To define an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Upload Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type Business Object	Used to indicate the business object that you want to use to create the upload request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Upload Request Type** screen.

**Note:** The **Select Business Object** screen appears when there are multiple upload request type business objects defined in the application. If there is only one upload request type business object defined in the application, the **Upload Request Type** screen appears.

4. Select the required upload request type business object from the respective field.
5. Click **OK**.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define the characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to specify the upload request type.	Yes
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type.	Not applicable
Upload Request Business Object	Used to indicate the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No
Status	Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
File Size (KB)	Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.	Yes
	<b>Note:</b> This field appears when <b>Adjustment Upload Request Type</b> business object is selected.	
Defer Algorithm	Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).</p> <p>This field appears when <b>Adjustment Upload Request Type</b> business object is selected.</p> <p>In <b>Upload Request Type</b>, online and deferred mode is used for processing the file if approval is not required. The defer algorithm is invoked if the number of records to be processed on the respective business object is more than the count specified on the algorithm then the status for number of records is changed from <b>Validated</b> to <b>Deferred Processing</b> else the status is changed to <b>Processed</b>.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	
Entity Business Object	<p>Used to indicate for creating Business Object of the entity using the upload request type.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> <p>This field appears when <b>Upload Request Type</b> business object is selected.</p>	No
Approval Required	Used to indicate whether approval is required for a file which is uploaded using the upload request type.	No
Approval To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)																						
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.  The following table lists the To Do type using which the To Do must be generated for the different upload requests:	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.																						
	<table><tr><th>Upload Request</th><th>To Do Type</th></tr><tr><td>Adjustment</td><td>C1-ADJUP</td></tr><tr><td>Bill Cycle Update</td><td>C1-BCUUR</td></tr><tr><td>Billable Charge</td><td>C1-BCUR</td></tr><tr><td>Contract Rider Update</td><td>C1-CRUUR</td></tr><tr><td>Hold Request</td><td>C1-HLDUR</td></tr><tr><td>Refund Request</td><td>C1-REFUR</td></tr><tr><td>Write Off Request</td><td>C1-WOUR</td></tr><tr><td>Policy Reinstatement</td><td>C1-RPUR</td></tr><tr><td>Bill Group Sorting</td><td>C1-BGSRT</td></tr><tr><td>Bill Group Derivation and Pricing Parameters</td><td>C1-BGDVP</td></tr></table>	Upload Request	To Do Type	Adjustment	C1-ADJUP	Bill Cycle Update	C1-BCUUR	Billable Charge	C1-BCUR	Contract Rider Update	C1-CRUUR	Hold Request	C1-HLDUR	Refund Request	C1-REFUR	Write Off Request	C1-WOUR	Policy Reinstatement	C1-RPUR	Bill Group Sorting	C1-BGSRT	Bill Group Derivation and Pricing Parameters	C1-BGDVP	
	Upload Request	To Do Type																						
	Adjustment	C1-ADJUP																						
	Bill Cycle Update	C1-BCUUR																						
	Billable Charge	C1-BCUR																						
	Contract Rider Update	C1-CRUUR																						
	Hold Request	C1-HLDUR																						
	Refund Request	C1-REFUR																						
	Write Off Request	C1-WOUR																						
	Policy Reinstatement	C1-RPUR																						
	Bill Group Sorting	C1-BGSRT																						
	Bill Group Derivation and Pricing Parameters	C1-BGDVP																						
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.																						
FK Reference	Used to indicate the FK Reference code to display the entity information.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears.  This field appears when <b>Upload Request Type</b> business object is selected.	No																						

In addition, this section contains the following fields in the grid:

**Note:** This field appears when **Adjustment Upload Request Type** business object is selected.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.	Yes (Conditional)
		<b>Note:</b> This field is required when you select the match type from the respective field.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	

6. Enter the required details.

**Note:**

You can search for an algorithm by clicking the **Search** (🔍) icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add** (+) icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete** (🗑) icon corresponding to the match type.

7. Define characteristics for the upload request type, if required.

8. Click **Save**.

The upload request type is defined.

How to define a characteristic for an upload request type	<a href="#">Defining a Characteristic for an Upload Request Type</a> on page 1260

## Defining a Characteristic for an Upload Request Type

### **Prerequisites**

To define a characteristic for an upload request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Upload Request Type)

### **Procedure**

To define a characteristic for an upload request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an upload request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Upload Request Type.	<b>Note:</b> This field is required when you are defining a characteristic for the upload request type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the upload request type.

- Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the upload request type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the upload request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

How to copy an upload request type	<a href="#">Copying an Upload Request Type</a> on page 1265

## Editing an Upload Request Type

### Prerequisites

To edit an upload request type, you should have:

- Upload request business objects defined in the application
- Defer algorithm for adjustment is defined using the **C1-UPLDEFVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the Contract match type
- Algorithm defined using the **C1-MTCTALG** algorithm type when you want to create adjustment using the Contract Type match type
- C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do entries generated while submitting an adjustment upload request for approval

- **C1-UPLAPPENT** To Do type assigned to a To Do role whose users must receive To Do generated while submitting an upload request for approval

### **Procedure**

To edit an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the upload request type whose details you want to edit.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define the characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Displays the upload request type.	Not applicable
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type.	Not applicable
Upload Request Business Object	Used to specify the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No
Status	Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
File Size (KB)	Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.	Yes
	<b>Note:</b> This field appears when the business object is <b>Adjustment Upload Request Type</b> .	
Defer Algorithm	Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p>creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).</p> <p>This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p>	
Entity Business Object	<p>Used to indicate for creating Business Object of the entity using the upload request type.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p>	No
Approval Required	Used to indicate whether approval is required for a file which is uploaded using the upload request type.	No
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
FK Reference	Used to indicate the FK Reference code to display the entity information.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears.</p> <p>This field appears when the business object is <b>Upload Request Type</b>.</p>	

In addition, this section contains the following fields in the grid:

**Note:** The below section appears when the business object is **Adjustment Upload Request Type**.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>	Yes (Conditional) <p><b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.</p>
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.	Yes (Conditional) <p><b>Note:</b> This field is required when you select the match type from the respective field.</p>

**Tip:** Alternatively, you can click the **Edit** button in the **Upload Request Type** zone to edit the details of the upload request type.

#### 4. Modify the required details.

<p><b>Note:</b></p> <p>You can search for an algorithm by clicking the <b>Search</b> (🔍) icon corresponding to the respective field.</p> <p>If you want to associate more than one match type with the upload request type, click the <b>Add</b> (+) icon and then specify the details. However, if you want to remove a match type from the upload request type, click the <b>Delete</b> (🗑) icon corresponding to the match type.</p>
---

#### 5. Define, edit, or remove characteristics of the upload request type, if required.

#### 6. Click **Save**.

The changes made to the upload request type are saved.

## Deleting an Upload Request Type

### Procedure

To delete an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Delete** (■) icon in the **Delete** column corresponding to the upload request type that you want to delete.  
A message appears confirming whether you want to delete the upload request type.

**Note:** You can delete an upload request type when you have not uploaded a file (i.e. created an upload request) using the upload request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Upload Request Type** zone to delete the upload request type.

4. Click **OK**.  
The upload request type is deleted.

## Copying an Upload Request Type

Instead of creating an upload request type from scratch, you can create a new upload request type using an existing upload request type. This is possible through copying an upload request type. On copying an upload request type, the details including the match types (only for adjustments) and characteristics are copied to the new upload request type. You can then edit the details, if required.

### Prerequisites

To copy an upload request type, you should have:

- Upload request type (whose copy you want to create) defined in the application
- Upload request business objects defined in the application
- Defer algorithm defined using the **C1-UPLDEFVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the Contract match type

- Algorithm defined using the **C1-MTCTALG** algorithm type when you want to create adjustment using the Contract Type match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do entries generated while submitting an upload request for approval
- **C1-UPLAPPENT** To Do type assigned to a To Do role whose users must receive To Do generated while submitting an upload request for approval

### **Procedure**

To copy an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Duplicate**() icon in the **Duplicate** column corresponding to the upload request type whose copy you want to create.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define the characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to specify the upload request type.	Yes
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type (whose copy you want to create).	Not applicable
Upload Request Business Object	Used to specify the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No
Status	Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
File Size (KB)	Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.	Yes
	<b>Note:</b> This field appears when the business object is <b>Adjustment Upload Request Type</b> .	
Defer Algorithm	Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p>checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the <b>Defer</b> algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).</p> <p>This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p>	
Entity Business Object	<p>Used to indicate to create the copy of Business Object of the entity using the upload request type.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> <p>This field appears when the business object is <b>Upload Request Type</b>.</p>	No
Approval Required	Used to indicate whether approval is required for a file which is uploaded using the upload request type.	No
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
FK Reference	Used to indicate the FK Reference code to display the entity information.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears. This field appears when the business object is <b>Upload Request Type</b> .	

In addition, this section contains the following fields in the grid:

**Note:** The below section appears when the business object is **Adjustment Upload Request Type**.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.	Yes (Conditional)
		<b>Note:</b> This field is required when you select the match type from the respective field.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Upload Request Type** zone to create a copy of the upload request type.

4. Enter the required details.

**Note:**

You can search for an algorithm by clicking the **Search** (🔍) icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add** (+) icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete** (🗑) icon corresponding to the match type.

5. Define, edit, or remove characteristics of the upload request type, if required.

6. Click **Save**.

The new upload request type is defined.

## Mapping an Upload Request Type

### Prerequisites

To map an upload request type, you should have:

- Upload request type (whose columns you want to map with the CSV file) defined in the application
- Upload request business objects defined in the application

**Note:** Once an upload request type is used for creating an upload request, then mapping for the same cannot be edited. Duplicating the upload request type will not duplicate the mapping data. You have to add the mapping details manually after duplicating an upload request type.

### Procedure

To map an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Mapping**() icon in the **Mapping** column corresponding to the upload request type whose columns you want to map with the CSV file.

The **Upload Request Type Mapping** screen appears. It contains the following field:

**Note:** The **Mapping** icon is applicable only for upload request type created using **Upload Request Type (C1-UplRequestType)** business object, and it is not applicable for upload request type created using **Adjustment Upload Request Type (C1-AdjRequestType)** business object.

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type.	Not applicable

The **Upload Request Type Mapping** screen also contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
CSV Column Header	Used to specify the rows correspond to the columns in CSV file.	Yes (Conditional)
		<b>Note:</b> This column is required when you search the <b>Data Records</b> zone in the <b>Upload Request</b> screen.
Use for Searching	Used to indicate whether the defined <b>CSV Column Header</b> is searchable or not.	Yes (Conditional)

Column Name	Column Description	Mandatory (Yes or No)
	<b>Note:</b> Upto 10 rows can be selected as searchable rows.	<b>Note:</b> This column is required to be selected to be shown in the <b>Data Records</b> zone in the <b>Upload Request</b> screen
Sequence Number	Used to specify the sequence of the searchable fields.	Yes (Conditional)
	<b>Note:</b> Searchable rows should have sequence less than or equal to 10.	<b>Note:</b> This column is required to be selected to be shown sequentially in the <b>Data Records</b> zone in the <b>Upload Request</b> screen

4. Enter the required details.

**Note:** If you want to add more than one column names mapped to the upload request type, click the **Add (+)** icon and then specify the details. However, if you want to remove a column name mapped to the upload request type, click the **Delete (■)** icon corresponding to the column header.

5. Click **Save**.

The columns are mapped to the CSV files for upload request type.

## Viewing the Upload Request Type Details

### Procedure

To view the details of an upload request type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
- Click the **Search** option from the **Upload Request Type** sub-menu.  
The **Upload Request Type** screen appears.
- In the **Upload Request Type List** zone, click the **Broadcast** (📡) icon corresponding to the upload request type whose details you want to view.  
The **Upload Request Type** zone appears.
- View the details of the upload request type in the **Upload Request Type** zone.

Upload Request Type zone	<a href="#">Upload Request Type</a> on page 1253

## Upload Request (Used for Searching)

The **Upload Request** screen allows you to upload, validate and process the transaction data. Through this screen, you can navigate to the following screen:

- [Upload Request \(Used for Viewing\)](#) on page 1705

This screen consists of the following zone:

- [Search Upload Request](#) on page 1699

## Search Upload Request

The **Search Upload Request** zone allows you to search for a upload request using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an upload request using <b>Request Details</b> .	Yes
Upload Date From	Used to search upload requests which are created from a particular date.	No
To	Used to search upload requests which are created till a particular date.	No
Status	Used to search upload requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Canceled</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Validated</li> </ul>	No
Upload Request Type	Used to search upload requests which are created using a particular upload request type.	No
User ID	Used to search upload requests which are created by a particular user.	No
Upload Request ID	Used to search a particular upload request.	No
File Name	Used to search a particular file name.	No

**Note:** You must specify at least one search criterion while searching for an upload request.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Upload Date	Displays the date and time when the upload request was created in the system.
Payment Request Information	Displays information about the upload request.
	<b>Note:</b> It has a link. On clicking the link, the <b>Upload Request</b> screen appears where you can view the details of the respective upload request.
Status	Indicates the status of the upload request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Canceled</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Validated</li> </ul>
Upload Request Type	Displays the upload request type using which the upload request is created.
Entity Business Object	Displays the business object code of the entity.
File Name	Displays the uploaded file name.
Total Records	Displays the total number of records in the uploaded csv file.
Created By	Indicates the user who has created the upload request.

## **Searching for an Upload Request**

### **Prerequisites**

To search for an upload request, you should have:

- Upload request types defined in the application

### **Procedure**

To search for an upload request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Tools** and then click **Upload Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Upload Request** sub-menu.

The **Upload Request** screen appears.

4. Enter the search criteria in the **Search Upload Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of upload requests that meet the search criteria appears in the **Search Results** section.

## Viewing the Upload Request Details

### Procedure

To view the details of an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose details you want to view.

The **Upload Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following two zones:
  - **Upload Request** – Displays the details of the upload request.
  - **Data Records** – Lists the details of data records uploaded in the csv file.
- **Log** – This tab lists the complete trail of actions performed on the upload request.

3. View the details of the upload request in the **Upload Request** zone.
4. View the data records in the csv file of the upload request in the **Data Records** zone.

## Creating an Upload Request

### Prerequisites

To create an upload request, you should have:

- Upload request types defined in the application

### **Procedure**

To create an upload request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Tools** and then click **Upload Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Upload Request** sub-menu.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.	Yes
	<b>Note:</b> The following upload request types are shipped with the product: <ul style="list-style-type: none"> <li>• ADJ_UPL_REQ_TYPE_APVL</li> <li>• ADJ_UPL_REQ_TYPE_WO_APVL</li> <li>• BC_UPL_REQ_TYPE</li> <li>• BILL_CYCLE_UPD_UPL_REQ_TYPE</li> <li>• BILL_LVL_UPL_REQ_TYPE</li> <li>• BILL_SRT_UPL_REQ_TYPE</li> <li>• HOLD_UPL_REQ_TYPE</li> <li>• REFUND_UPL_REQ_TYPE</li> <li>• REIN_UPL_REQ_TYPE</li> <li>• SA_RIDER_UPD_UPL_REQ_TYPE</li> <li>• WO_UPL_REQ_TYPE</li> </ul>	

**Tip:** Alternatively, you can access the **Select Upload Request Type** screen by clicking the **Upload** button in the **Page Title** area of the **Upload Request** screen.

**Note:** The **Select Upload Request Type** screen appears when there are multiple upload request types defined in the application. If there is only one upload request type defined in the application, the **{XXX} Upload Request** screen appears.

4. Select the required upload request type from the respective field.
5. Click **OK**.

The **{XXX} Upload Request** screen appears. Here, **{XXX}** changes depending on the upload request type that you have selected. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define the characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the upload request will be created.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Parent Customer	Used to indicate the person for whom you want to create the bill group sorting or bill group derivation and pricing parameters upload request.	Yes
	<b>Note:</b> This field appears when you are creating an upload request using an upload request type where the upload request business object is set to <b>C1-BillGrpSortUploadRequest</b> or <b>C1-BillLevelUploadRequest</b> . The system allows you to create a bill group sorting or bill group derivation and pricing parameters upload request for a person whose person type is set to <b>Parent Customer</b> . The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	
File Name	Used to specify the name and path of the file that you want to upload.	Yes
	<b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the file is available in the system.	
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

6. Click the **Browse** button corresponding to the **File Name** field.  
The **Choose File to Upload** dialog box appears.
7. Browse to the location where the file that you want to upload is available in the system.
8. Click **Open**.  
The file name along with the path appears in the **File Name** field.
9. Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.
10. Define characteristics for the upload request, if required.
11. Click **Save**.  
A message appears indicating the number of records which are successfully uploaded. Then, an upload request is created in the **Draft** status. If the required identifier (such as account ID, person ID, policy ID, or bill group ID) is available in the record, the status of the record is set to **Pending**. However, if the required identifier could not be derived from the system, the status of the record is set to **Invalid**.

How to define a characteristic for an upload request	<a href="#">Defining a Characteristic for an Upload Request</a> on page 1704

## Defining a Characteristic for an Upload Request

### Prerequisites

To define a characteristic for an upload request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Upload Request**)

### Procedure

To define a characteristic for an upload request:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an upload request.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the upload request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the upload request.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Upload Request</b> .	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the upload request.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the upload request.

2. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the upload request, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the upload request, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Upload Request (Used for Viewing)

Once you create an upload request, the **Upload Request** screen allows you to:

- Edit the details of an upload request
- Delete an upload request
- View the details of an upload request
- Validate an upload request
- Cancel an upload request
- Submit an upload request
- Approve or reject an upload request
- View the data uploaded to a request
- View the log of an upload request
- Add a log entry for an upload request

This screen consists of the following tabs:

- **Main** – This tab contains the following two zones:
  - **Upload Request** – Displays the details of the upload request.
  - **Data Records** – Lists the data records of the upload request.
- **Log** – This tab lists the complete trail of actions performed on the upload request.

### Upload Request - Main

The **Main** tab contains the following zones:

- [Upload Request](#) on page 1705
- [Data Records](#) on page 1707

### Upload Request

The **Upload Request** zone displays the details of the upload request. This zone contains the following sections:

- **Main** – This section provides basic information about the upload request. It contains the following fields:

Field Name	Field Description
Upload Request Information	Displays information about the upload request.
Upload Request Type	Indicates the upload request type using which the upload request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Upload Request Type</b> screen appears where you can view the details of the upload request type.
Status	Indicates the status of the payment request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Approved</li> <li>• Cancelled</li> </ul>

Field Name	Field Description
	<ul style="list-style-type: none"> <li>Deferred Processing</li> <li>Draft</li> <li>Processed</li> <li>Rejected</li> <li>Submitted</li> <li>Validated</li> </ul>
File Name	Displays name of the uploaded file.

- **Statistics** – This section lists the statistics of records in the upload request. It contains the following fields:

Field Name	Field Description
Total Records	Displays total number of records in CSV file.
Valid Records	Displays the count of valid data records.
Error Records	Displays the count of data records in error status.
Pending Records	Displays the count of data records pending after successful derivation.
Invalid Records	Displays the count of data records after unsuccessful derivation.
Processed Records	Displays the count of data records after processing.

- **Characteristics** – This section lists the characteristics of the upload request. It contains the following columns:

Column Name	Column Description
Effective Date	Indicates the date from when the characteristic is effective for the upload request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Column Name	Column Description
Edit	Used to edit the details of the upload request.
	<b>Note:</b> The <b>Edit</b> button appears when the upload request is in the <b>Draft</b> or <b>Validated</b> status.
Delete	Used to delete the upload request.
	<b>Note:</b> The <b>Delete</b> button appears when the upload request is in the <b>Draft</b> status.
Validate	Used to validate the upload request.
	<b>Note:</b> The <b>Validate</b> button appears when the upload request is in the <b>Draft</b> status.
Cancel	Used to cancel the upload request.
	<b>Note:</b> The <b>Cancel</b> button appears when the upload request is in the <b>Validated</b> status.
Submit	Used to submit the upload request for approval.

Column Name	Column Description
	<b>Note:</b> The <b>Submit</b> button appears when: <ul style="list-style-type: none"> <li>The upload request is in the <b>Validated</b> status.</li> <li>The <b>Approval Required</b> check box is selected in the upload request type using which the upload request is created.</li> </ul>
Approve	Used to approve the upload request.  <b>Note:</b> The <b>Approve</b> button appears when: <ul style="list-style-type: none"> <li>The upload request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the upload request.</li> </ul>
Reject	Used to reject the upload request.  <b>Note:</b> The <b>Reject</b> button appears when: <ul style="list-style-type: none"> <li>The upload request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the upload request.</li> </ul>

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the upload request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the upload request status is updated
Create Date/Time	Displays the date and time when the upload request is created.

## Data Records

The **Data Records** zone lists the data records of the upload request. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search Criteria 1, Search Criteria 2, .....,Search Criteria 10	Used to search for data from the CSV file with respect to the field.	No
<b>Note:</b> We have used generic field labels here. However, these labels will change depending on the mapping defined in the respective upload request type.		

Field Name	Field Description	Mandatory (Yes or No)
Record Status	Used to indicate whether you want to search data records for an upload request. The valid values are: <ul style="list-style-type: none"> <li>Error</li> <li>Invalid</li> <li>Pending</li> <li>Processed</li> <li>Valid</li> </ul>	No

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
View	On clicking the <b>View</b> (🔍) icon, the <b>Data Record Details</b> window appears where you can view the details of the data records.
Search Result 1, Search Result 2, ....., Search Result 10	Displays data from the CSV file.
<b>Note:</b> We have used generic field labels here. However, these labels will change depending on the mapping defined in the respective upload request type.	
Record Status	Indicates the status of the data record. The valid values are: <ul style="list-style-type: none"> <li>Error</li> <li>Invalid</li> <li>Pending</li> <li>Processed</li> <li>Valid</li> </ul>
Message(s)	Displays message for the data record respective to it's status.
Entity ID	Displays entity ID of the upload request.
	<b>Note:</b> The entity ID is displayed only for data records with <b>Processed</b> status.
Entity Information	Displays entity information for the <b>FK Reference</b> selected in <b>Upload Request Type</b> screen.
	<b>Note:</b> The entity information is displayed only for data records with <b>Processed</b> status.

**Note:** By default the **Search Results** section displays data records for all the statuses though data is not added or selected to any of the fields and are searched through the **Search Criteria** section.

## Upload Request - Log

The **Log** tab contains the following zone:

- [Upload Request Log](#) on page 1709

### Upload Request Log

The **Upload Request Log** zone on the **Upload Request** screen lists the complete trail of actions performed on the upload request. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the upload request.
Details	Displays the details about the action performed on the upload request.
User	Indicates the user who has performed the action on the upload request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the upload request.
Status Reason	Displays the status reason of action performed on the upload request.

**Note:** You can manually add a log entry for the upload request by clicking the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

The **Add Upload Request Log** window appears. Enter **Log Details** and click **Save**. The upload request log is added.

## Editing an Upload Request

### Procedure

To edit an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose details you want to edit.  
The **Upload Request** screen appears.
3. Click the **Edit** button in the **Upload Request** zone.

**Note:** The **Edit** button appears when the upload request is in the **Draft** or **Validated** status.

The entity **Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Displays the upload request type using which the upload request is created.	Not applicable
File Name	Displays name of the uploaded CSV file.	Not applicable
Comments	Used to indicate the comments for upload request.	No

- **Characteristics** – Used to define the characteristics for the upload request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the upload request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the upload request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Upload Request</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the Upload request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the Upload request.

4. Modify the details of the upload request, if required.
5. Define, edit, or remove characteristics of the upload request, if required.
6. Click **Save**.

The changes made to the upload request are saved.

## Deleting an Upload Request

### Procedure

To delete an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to delete.  
The **Upload Request** screen appears.
3. Click the **Delete** button in the **Upload Request** zone.  
A message appears confirming whether you want to delete the upload request.

**Note:** The **Delete** button appears when the upload request is in the **Draft** status.

4. Click **OK**.  
The upload request is deleted.

## Validating an Upload Request

### Prerequisites

To validate an upload request, you should have:

- Upload Request Types defined in the request.

### Procedure

To validate an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to validate.  
The **Upload Request** screen appears.
3. Click the **Validate** button in the **Upload Request** zone.

**Note:** The **Validate** button appears when the upload request is in the **Draft** status.

For more information about the **Upload Request Periodic Monitor (C1-UPLRQ)** batch, refer to Oracle Revenue Management and Billing Batch Guide.

The status of the upload request is changed to **Validated**.

### Related Topics

## Cancelling an Upload Request

### Prerequisites

To cancel an upload request, you should have:

- Cancellation reasons defined in the application

**Note:** While cancelling an upload request, you need to specify the reason why you want to cancel the upload request. You can select the appropriate cancellation reason when you have defined the reasons for the **Canceled** status of the **C1-UplRequestType** business object in the **Status Reason** screen.

### Procedure

To cancel an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to cancel.  
The **Upload Request** screen appears.
3. Click the **Cancel** button in the **Upload Request** zone.

The **Cancel Reason** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Cancel Reason	Used to indicate the reason why you want to cancel the upload request.	Yes
Comments	Used to specify additional information while cancelling the upload request.	No

**Note:** The **Cancel** button appears when the upload request is in the **Validated** status.

4. Select the cancellation reason from the **Cancel Reason** list.
5. Click **Save**.  
The status of the upload request is changed to **Canceled**.

### Related Topics

## Submitting an Upload Request

### Procedure

To submit an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to submit.  
The **Upload Request** screen appears.
3. Click the **Submit** button in the **Upload Request** zone.

The system behaves in the following manner:

If...	Then...																				
The <b>Approval Required</b> check box is selected in the upload request type using which the upload request is created	<p>A To Do of the specified To Do type is created and sent to the approver for approval. The following table lists the To Do type using which the To Do is created for the different upload requests:</p> <table> <tr> <th>Upload Request</th><th>To Do Type</th></tr> <tr> <td>Bill Cycle Update</td><td>C1-BCUUR</td></tr> <tr> <td>Billable Charge</td><td>C1-BCUR</td></tr> <tr> <td>Contract Rider Update</td><td>C1-CRUUR</td></tr> <tr> <td>Hold Request</td><td>C1-HLDUR</td></tr> <tr> <td>Refund Request</td><td>C1-REFUR</td></tr> <tr> <td>Write Off Request</td><td>C1-WOUR</td></tr> <tr> <td>Policy Reinstatement</td><td>C1-RPUR</td></tr> <tr> <td>Bill Group Sorting</td><td>C1-BGSRT</td></tr> <tr> <td>Bill Group Derivation and Pricing Parameters</td><td>C1-BGDVP</td></tr> </table> <p>In addition, the status of the upload request is changed to <b>Approval In Progress</b>.</p>	Upload Request	To Do Type	Bill Cycle Update	C1-BCUUR	Billable Charge	C1-BCUR	Contract Rider Update	C1-CRUUR	Hold Request	C1-HLDUR	Refund Request	C1-REFUR	Write Off Request	C1-WOUR	Policy Reinstatement	C1-RPUR	Bill Group Sorting	C1-BGSRT	Bill Group Derivation and Pricing Parameters	C1-BGDVP

## Approving an Upload Request

You can view the number of upload requests which are pending for approval in the **Upload Request** screen. The approver can review, and accordingly approve or reject the upload request based on the observations.

**Note:** The system will not allow you to approve or reject an upload request submitted by you.

**Procedure**

To approve an upload request:

1. Do either of the following:

If you want to...	Then...
<b>Approve a upload request through the Upload Request screen</b>	<ol style="list-style-type: none"> <li>a. Search for the upload request in the <b>Upload Request</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>Upload Request Information</b> column corresponding to the upload request which you want to review.</li> </ol>
<b>Approve a upload request from the To Do List screen</b>	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</li> </ol>

If you want to...	Then...
	<p>The <b>To Do Type for User Search</b> window appears.</p> <p>c. Enter the required To Do type in the respective field.</p> <p>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p>f. Click the link in the <b>Message</b> column corresponding to the To Do of the upload request that you want to review.</p>

The **Upload Request** screen appears.

- Review the upload request details.
- Click the **Approve** button in the **Upload Request** zone.

The system behaves in the following manner:

If...	Then...																				
The number of valid records in the upload request does not exceed the online record process limit defined in the <b>C1-DEFERUPLD</b> algorithm	<p>The following table lists the behavior for the different upload requests:</p> <table> <tr> <th>Upload Request</th><th>Behavior</th></tr> <tr> <td>Bill Cycle Update</td><td>The bill cycle information is updated for the accounts.</td></tr> <tr> <td>Billable Charge</td><td>The billable charges are created.</td></tr> <tr> <td>Contract Rider Update</td><td>The contract rider information is updated for the contracts.</td></tr> <tr> <td>Hold Request</td><td>The hold requests are created.</td></tr> <tr> <td>Refund Request</td><td>The refund requests are created.</td></tr> <tr> <td>Write Off Request</td><td>The write off requests are created.</td></tr> <tr> <td>Policy Reinstatement</td><td>The policies are reinstated and the status of the policies is changed to the one defined in the <b>Policy Status after Processing Reinstatement Upload Request</b> parameter of the <b>C1-REN-VALID</b> algorithm.</td></tr> <tr> <td>Bill Group Sorting</td><td>The sort ID is defined for the respective bill group.</td></tr> <tr> <td>Bill Group Derivation and Pricing Parameters</td><td>The derivation and pricing parameters are defined for the</td></tr> </table>	Upload Request	Behavior	Bill Cycle Update	The bill cycle information is updated for the accounts. 		respective bill group and sort ID combination.
The number of valid records in the upload request exceeds the online record process limit defined in the <b>C1-DEFERUPLD</b> algorithm	In addition, the status of the upload request is changed to <b>Processed</b> .	
	The system changes the status of the upload request to <b>Deferred Processing</b> . When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred Processing</b> status. If there is an upload request in the <b>Deferred Processing</b> status, the system behaves in the following manner for the different upload requests:	
	<b>Upload Request</b>	<b>Behavior</b>
	Bill Cycle Update	The bill cycle information is updated for the accounts.
	Billable Charge	The billable charges are created.
	Contract Rider Update	The contract rider information is updated for the contracts.
	Hold Request	The hold requests are created.
	Refund Request	The refund requests are created.
	Write Off Request	The write off requests are created.
	Policy Reinstatement	The policies are reinstated and the status of the policies is changed to the one defined in the <b>Policy Status after Processing Reinstatement Upload Request</b> parameter of the <b>C1-REN-VALID</b> algorithm.
	Bill Group Sorting	The sort ID is defined for the respective bill group.
	Bill Group Derivation and Pricing Parameters	The derivation and pricing parameters are defined for the respective bill group and sort ID combination.
In addition, the status of the upload request is changed to <b>Processed</b> .		

**Note:** The **Approve** button appears when:

- The upload request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the upload request.

## Rejecting an Upload Request

### Prerequisites

To reject an upload request, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting an upload request, you need to specify the reason why you want to reject the upload request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-UplRequestType** business object in the **Status Reason** screen.

The system will not allow you to approve or reject an upload request submitted by you.

### Procedure

To reject an upload request:

1. Do either of the following:

If you want to	Then
<b>Reject an upload request through the Upload Request screen</b>	<ol style="list-style-type: none"> <li>a. Search for the upload request in the <b>Upload Request</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>Upload Request Information</b> column corresponding to the upload request which you want to review.</li> </ol>
<b>Reject an upload request from the To Do List screen</b>	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>c. Enter the required To Do type in the respective field.</li> <li>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> </ol>

If you want to	Then
	<p><b>e.</b> Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p><b>f.</b> Click the link in the <b>Message</b> column corresponding to the To Do of the upload request that you want to review.</p>

The **Upload Request** screen appears.

- Review the upload request details.
- Click the **Reject** button in the **Upload Request** zone.

The **Reject Upload Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the upload request.	Yes
Comments	Used to specify additional information while rejecting the upload request.	No

**Note:** The **Reject** button appears when:

- The upload request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the upload request.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

The status of the upload request is changed to **Rejected**.

## Viewing the Data Record Details

### Procedure

To view the details of a data record:

- Search for the data record in the **Data Records** zone in the **Upload Request** screen.
- In the **Search Results** section, click the **View** (🔍) icon in the **View** column corresponding to the data record whose details you want to view.

The **Data Record Details** window appears. It contains the following fields:

Field Name	Field Description
Sr. No.	Displays the sequential number of data.

Field Name	Field Description
CSV Column Header	Displays name of the column in uploaded CSV file.
CSV Column Value	Displays value in the column in uploaded CSV file.

- View the details of the data record in the **Data Record Details** window.

## Viewing the Log of an Upload Request

### Procedure

To view the log of an upload request:

- Search for the upload request in the **Upload Request** screen.
- In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose log you want to view.

The **Upload Request** screen appears. It consists of the following tabs:

- Main** – Displays information about the upload request. It contains the following zones:
  - Upload Request** – Displays the details of the upload request.
  - Data Records** – Lists the data records of the upload request.
  - Log** – Lists the complete trail of actions performed on the upload request. This tab contains the following zone:
    - Upload Request Log** – Displays the trail of actions performed on the particular upload request.

- Click the **Log** tab.

The **Upload Request Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the upload request.
Details	Displays the details about the action performed on the upload request.
User	Indicates the user who has performed the action on the upload request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the upload request.
Status Reason	Indicates the reason why the upload request was rejected.

**Note:** You can manually add a log entry for the upload request by clicking the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

## Adding a Log Entry for an Upload Request

### Procedure

To add a log entry for an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose log you want to edit.

The **Upload Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the upload request. It contains the following zones:
  - **Upload Request** – Displays the details of the upload request.
  - **Data Records** – Lists the data records of the upload request.
- **Log** – Lists the complete trail of actions performed on the upload request. This tab contains the following zone:
  - **Upload Request Log** – Displays the trail of actions performed on the particular upload request.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

The **Add Upload Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Information	Displays information about the upload request.	Not applicable
Log Details	Used to specify additional comments for the upload request.	Yes

5. Enter the comments in the **Log Details** field.
  6. Click **Save**.
- The log entry is added in the **Upload Request Log** zone.

## General Ledger (GL) Accounting Template

---

### Topics:

- [GL Accounting Template \(Without Approval\) Status Transition](#)
- [GL Accounting Template \(With Approval\) Status Transition](#)
- [Algorithms Used in C1- GLAT](#)
- [Prerequisites](#)
- [GL Accounting Template \(Used for Searching\)](#)
- [GL Accounting Template \(Used for Viewing\)](#)

Oracle Revenue Management and Billing until now created FT GL entries while generating the financial transactions for adjustments, payments, and bill segments. The FT GL entries were created using the distribution codes from the adjustment type, rate component, billable charge pass through line, or contract type depending on the type of financial transaction. Now, the system enables you to override the distribution code used for creating FT GL entries using the GL Accounting Template feature.

The system allows you to define a GL Accounting template for each process and sub processes combination for a date range. Based on the parameters defined in the **FT Generation** algorithms, the system either uses the standard process or GL Accounting Template for FT GL creation. The GL Accounting template for the specified process and sub processes combination which is effective on the accounting date is used for FT GL creation.

There should be at least one debit and credit lines in the GL Accounting template. You can define maximum 10 lines in the GL Accounting template. Each line should contain the following information:

- Whether the line should be used to create a debit FT GL entry or credit FT GL entry
- Conditional algorithm (created using the **C1-GLATLC** algorithm type) to indicate whether the line should be used to create the FT GL entry or not
- Distribution code to indicate the GL Account against which the FT GL entry should be created
- User defined amount, such as Amount 01, Amount 02, or Amount 03

The line with the Amount 01 user defined amount is used to create balancing FT GL entry against the contract type. The line with the Amount 02, Amount 03, ..., and Amount 10 user defined amount is used to create FT GL entries for bill segment calculation lines, non-calculated adjustments, adjustment calculation lines, or payments. In case of bill segments and calculated adjustments, the lines with the Amount 02, Amount 03, ..., Amount 10 user defined amount are mapped to calculation line amounts based on the rate component sequence.

You can optionally configure the system to use the approval workflow process while activating or deactivating the GL Accounting templates. If you want to enable the approval workflow process, you need to define algorithms using the following algorithm types:

- C1-GLATAPPEN
- C1-GLATSUB

If the **Approval Required (Y or N)** parameter in an algorithm created using the **C1-GLATSUB** algorithm type is set to **Y**, then on submitting or deactivating the GL Accounting template, the approval workflow process creates a To Do for the approver to review the GL Accounting template. Once the approver approves

a GL Accounting template, the status of the GL Accounting template is set to **Active** or **Inactive**.

We are supporting the following process and sub processes combinations while creating the GL Accounting template:

Process	BS	AD	PS
Sub Process 1	Contract Type	Adjustment Type	Bank Account
Sub Process 2	Division	Contract Type	Contract Type
Sub Process 3	Rate Schedule	Division	Division
Sub Process 4	-	-	-
Sub Process 5	-	-	-

For example, you can define the following the GL Accounting templates using the above supported process and sub processes combinations:

GL Accounting Template	Process	Sub Process 1	Sub Process 2	Sub Process 3
GLAT1	BS	CT1	D1	RS1
GLAT2	BS	CT2	D1	RS1
GLAT3	BS	CT3	D2	RS2
GLAT4	PS	BA1	CT1	D1
GLAT5	PS	BA2	CT2	D2
GLAT6	AD	AT1	CT1	D1
GLAT7	AD	AT1	CT2	D2

While creating the GL Accounting template for BS and AD processes, you need to ensure that the line with the Amount 1 user defined amount is a debit line. However, while creating the GL Accounting template for PS process, you need to ensure that the line with the Amount 1 user defined amount is a credit line.

Based on the customer requirements, you can define GL Accounting template for various custom process and sub processes combinations.

The **Create Additional FT GL Entries** parameter is added in the **Assign GL Account to Financial Transaction (C1-GLASN)** and **Assign GL Account to Financial Transaction (GLASSGN2)** batches. If you set this parameter to **Y**, the **C1-GLCE** algorithm is invoked. Based on the parameters defined in the algorithm, the system checks whether there is a GL Accounting template which is effective on the accounting date for the specified process and sub processes combination. If the effective GL Accounting template is available, the system creates additional FT GL entries for the financial transactions. If the financial transaction's currency is different from the division's base currency, the algorithm will create FT GL extension for the respective financial transaction.

Two new parameters are added in the **ADJT-NM**, **ADJT-AC**, **ADJT-TA**, **ADJT-TC**, **ADJT-AD**, **ADJT-GL**, **PSEG-NM**, **PSEG-AC**, **PSEG-CA**, **BSBF-BA**, **BSBF-LO** algorithm types:

- **Use GL Accounting Template (Y or N)** - Indicates whether the FT GL entries should be created using the lines in the GL Accounting template. The valid values are **Y** and **N**.
- **Show the GL Accounting Template Error When Header Record Not Found (Y or N)** - Indicates whether you want to show error message when the effective GL Accounting template is not available for the process and sub processes combination. If you set the value of this parameter to **N**, the algorithm uses the standard process for FT GL creation when the effective GL Accounting template is not available.

The following table explains how the algorithms created using the following algorithm types create FT GL entries:

Algorithm Type	Use GL Accounting Template (Y or N)	Calculated Adjustment Distribution Code Source (AT - Adjustment Type, CL - Calc Lines)	Algorithm Behaviour
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	N	CL	Creates FT GL for the adjustment calculation line using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	Y	CL	Creates debit and credit FT GL entries using the lines in the GL Accounting template.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	N	AT	Creates FT GL for the adjustment using the distribution code on the respective adjustment type and the balancing FT GL using the distribution code on contract type.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	Y	AT	Creates debit and credit FT GL entries using the lines in the GL Accounting template.

If the **Use GL Accounting Template (Y or N)** parameter is set to **N** in the algorithms created using the **PSEG-NM**, **PSEG-AC**, and **PSEG-CA** algorithm types, the system creates FT GL for the payment segment using the distribution code on the respective payment segment type and the balancing FT GL using the distribution code on contract type. However, if the **Use GL Accounting Template (Y or N)** parameter is set to **Y**, the system creates debit and credit FT GL entries using the lines in the GL Accounting template.

If the **Use GL Accounting Template (Y or N)** parameter is set to **N** in the algorithms created using the **BSBF-BA** and **BSBF-LO** algorithm types, the system behaves in the following manner:

If the bill segment is...	Then, the system...
Created from a billable charge with SQI and/or price item details	Creates FT GL for the bill segment calculation line using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.
Created from a pass through billable charge	Creates FT GL for the pass through line using the distribution code on the respective pass through line and the balancing FT GL using the distribution code on contract type.
Created from a billable charge with pass through charges, SQI, and price item details	Creates... <ul style="list-style-type: none"> <li>• FT GL for the bill segment calculation line using the distribution code on the respective rate component</li> <li>• FT GL for the pass through line using the distribution code on the respective pass through line</li> <li>• Balancing FT GL using the distribution code on contract type</li> </ul>
A post processing bill segment	Creates FT GL for the post processing FT using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.

However, if the **Use GL Accounting Template (Y or N)** parameter is set to **Y** in the algorithms created using the **BSBF-BA** and **BSBF-LO** algorithm types, the system behaves in the following manner:

If the bill segment is...	Then, the system...
Created from a billable charge with SQI and/or price item details	Creates debit and credit FT GL entries using the lines in the GL Accounting template.
Created from a pass through billable charge	Does not use the GL Accounting template. It creates FT GL for the pass through line using the distribution code on the respective pass through line and the balancing FT GL using the distribution code on contract type.
Created from a billable charge with pass through charges, SQI, and price item details	Creates... <ul style="list-style-type: none"> <li>• FT GL for bill segment calculation line using the lines in the GL Accounting template.</li> <li>• FT GL for the pass through line using the distribution code on the respective pass through line.</li> </ul>

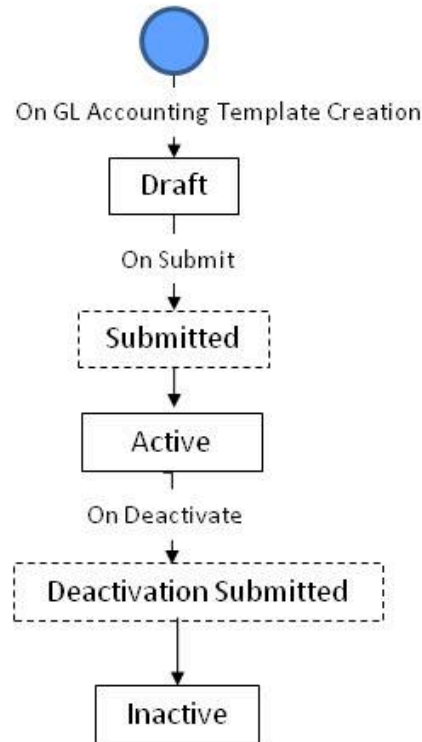

If the bill segment is...	Then, the system...
	<ul style="list-style-type: none"><li>• Balancing FT GL using the line in the GL Accounting template.</li></ul>
A post processing bill segment	Creates debit and credit FT GL entries using the lines in the GL Accounting template.

## GL Accounting Template (Without Approval) Status Transition

---

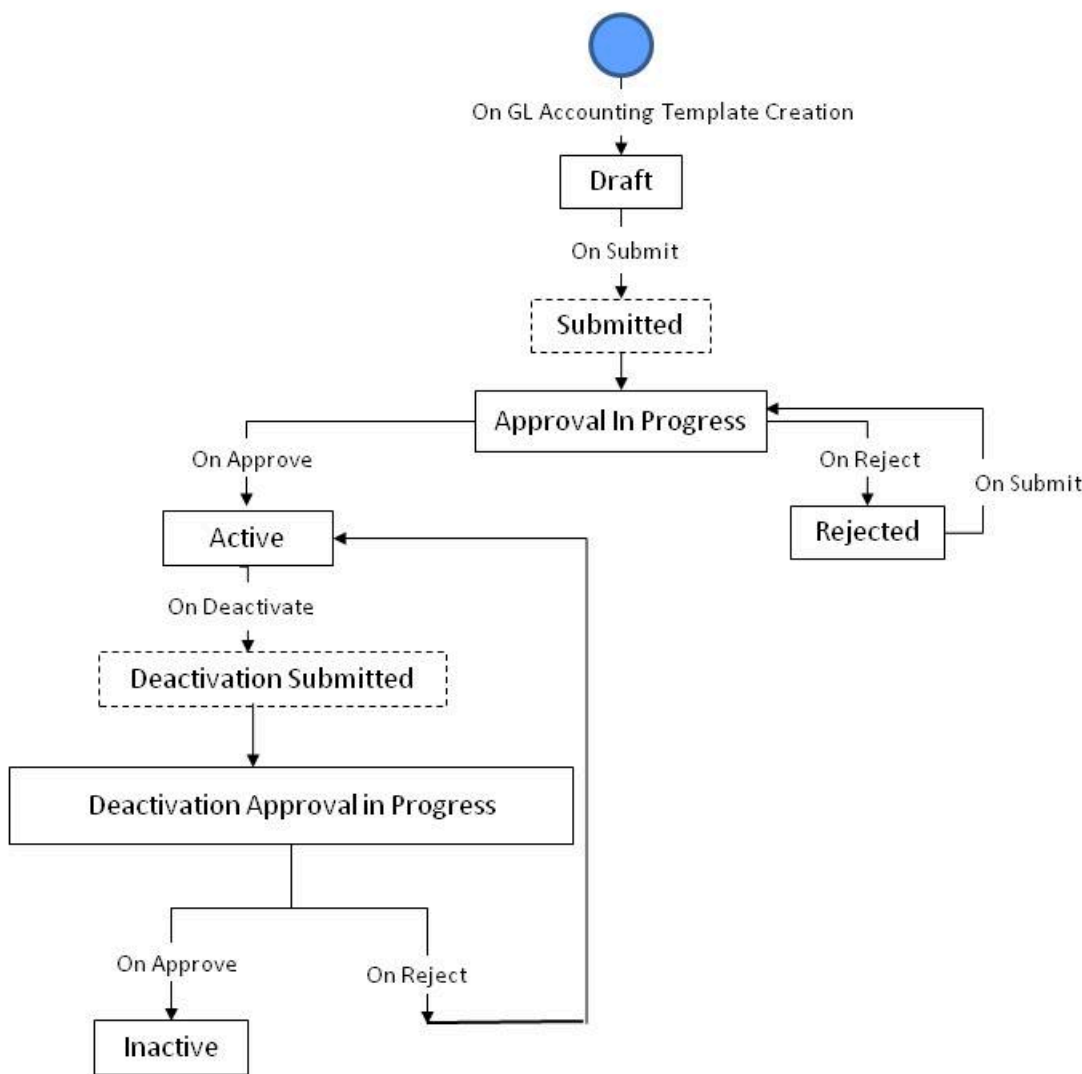

The following figure graphically indicates how a GL accounting template moves from one status to another when the Approval Required (Y or N) parameter in the C1-GLATSUB algorithm is set to N.

## GL Accounting Template (With Approval) Status Transition

---

The following figure graphically indicates how a GL accounting template moves from one status to another when the Approval Required (Y or N) parameter in the C1-GLATSUB algorithm is set to Y.

## Algorithms Used in C1- GLAT

The following table lists the algorithms which are attached to the **C1-GLAT** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-GLAT-INF	C1-GLAT-INF	This algorithm generates the GLAT information string which appears throughout the application. This algorithm concatenates the following fields: <ul style="list-style-type: none"><li>GLAT Description</li><li>GLAT Status Description</li><li>GLAT ID</li></ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-GLAT** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Submitted	Enter	C1-GLATSUB	C1-GLATSUB	This algorithm checks the following: <ul style="list-style-type: none"> <li>If soft parameter value is set to Y then approval workflow will be triggered.</li> </ul>
Approval in Progress	Enter	C1-GLATAPPEN	C1-GLATAPPEN	This algorithm creates the To Do based on the Approval To Do Type configured in algorithm.
Approval in Progress	Exit	C1-GLATAPPEX	C1-GLATAPPEX	This algorithm checks whether an approver is associated with the approval To Do Role specified in the <b>C1-GLATAAPEN</b> Algorithm. It does not allow the submitter to approve or reject the GLAT request.
Approval in Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Active	-	-	-	-
Deactivation Submitted	Enter	C1-GLATSUB	C1-GLATSUB	This algorithm checks the following: <ul style="list-style-type: none"> <li>If soft parameter value is set to Y then approval workflow will be triggered.</li> </ul>
Deactivation Approval In Progress	Enter	C1-GLATAPPEN	C1-GLATAPPEN	This algorithm creates the To Do based on the Approval To Do Type configured in algorithm.
Deactivation Approval In Progress	Exit	C1-GLATAPPEX	C1-GLATAPPEX	This algorithm checks whether an approver is associated with the approval To Do Role specified in the <b>C1-GLATAAPEN</b> Algorithm. It

Status	System Event	Algorithm	Algorithm Type	Description
				does not allow the submitter to approve or reject the GLAT request.
Deactivation Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Rejected	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Inactive	-	-	-	-

## Prerequisites

To setup the GL Accounting Template, you need to do the following:

- Define rejected status reasons for the **C1-GLAT** business object
- Define deactivated status reasons for the **C1-GLAT** business object
- Assign the **C1-GLAT** To Do type to a To Do role whose users must receive To Do generated while submitting a template for approval
- Define the required algorithms, for approval and To Do type role and configurations

## GL Accounting Template (Used for Searching)

The **GL Accounting Template** screen allows you to search for a template using various search criteria. It also allows you to create template. Through this screen, you can navigate to the following screen:

- [GL Accounting Template \(Used for Viewing\)](#) on page 1737

This screen consists of the following zones:

- [Search GL Accounting Template](#) on page 1732
- [GL Accounting Template Lines](#) on page 1733

## Search GL Accounting Template

The **Search GL Accounting Template** zone allows you to search for GL accounting templates using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template ID	Used to search a particular template.	No
Description	Used to specify the description of a template.	No
Status	Used to indicate the status of the template. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> <li>• Deactivation Approval In Progress</li> <li>• Active</li> <li>• Inactive</li> <li>• Rejected</li> </ul>	No
Process	Used to search a particular process.	No
Sub Process 1	Used to search a particular Sub Process 1.	No
Sub Process 2	Used to search a particular Sub Process 2.	No
Sub Process 3	Used to search a particular Sub Process 3.	No
Sub Process 4	Used to search a particular Sub Process 4.	No
Sub Process 5	Used to search a particular Sub Process 5.	No
Effective Start Date	Used to search templates which are effective from a particular date.	No
Effective End Date	Used to search templates which are effective till a particular date.	No

**Note:** You must specify at least one search criterion while searching for a template.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Process	Displays the process.
GL Accounting Template Request Information	Displays information about the template.
	<b>Note:</b> It has a link. On clicking the link, the <b>GL Accounting Template</b> screen appears where you can view the details of the respective template.
Description	Displays the description of process.
Sub Process 1	Displays the Sub Process 1.
Sub Process 2	Displays the Sub Process 2.
Sub Process 3	Displays the Sub Process 3.

Column Name	Column Description
Sub Process 4	Displays the Sub Process 4.
Sub Process 5	Displays the Sub Process 5.
Effective Start Date	Displays the date from when the template is effective.
Effective End Date	Displays the date till when the template is effective.
Status	Displays the status of template.

## Searching for a GL Accounting Template

**Procedure**

To search for a GL Accounting template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **G** and then click **GL Accounting Template**.  
The **GL Accounting Template** screen appears.
3. Enter the search criteria in the **Search GL Accounting Template** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of templates that meet the search criteria appears in the **Search Results** section.

## Creating a GL Accounting Template

---

**Prerequisites**

To create a GL Accounting template, you should have:

- Conditional Algorithms and Distribution codes defined in the application.

**Procedure**

To create a GL Accounting template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **G** and then click **GL Accounting Template**.  
The **GL Accounting Template** screen appears.
3. Click the **Add** button in the **Page Title** area of the **GL Accounting Template** screen.

The **GL Accounting Template** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the template. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Process	Used to specify a particular process.	Yes
Description	Used to indicate the description of a process.	Yes
Sub Process 1	Used to specify a Sub Process 1.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		<b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment</b> or <b>Payment Segment</b> or <b>Adjustments</b>
Sub Process 2	Used to specify a Sub Process 2.	Yes (Conditional)
		<b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment</b> or <b>Payment Segment</b> or <b>Adjustments</b>
Sub Process 3	Used to specify a Sub Process 3.	Yes (Conditional)
		<b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment</b> or <b>Payment Segment</b> or <b>Adjustments</b> .
Sub Process 4	Used to specify a Sub Process 4.	No
Sub Process 5	Used to specify a Sub Process 5.	No
Effective Start Date	Used to specify date for a template which is effective from a particular date.	Yes
Effective End Date	Used to specify date for a template which is effective till a particular date.	No

- **GL Accounting Template Lines** —Used to specify the template lines in a GL accounting template. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No	Used to specify the sequence number.	Yes
Credit/Debit	Used to indicate whether template lines are of credit or debit.	Yes
Conditional Algorithm	Used to specify the algorithm which specifies that template line is valid or not.	No
Distribution Code	Used to indicate the distribution code which indicates the template associated with the charge.	Yes
User Defined Amount Field	Used to indicate the amount to be used in a template line.	Yes

#### 4. Enter the required details

**Note:**

You can search for a conditional algorithm and distribution code by clicking the **search** (🔍) icon corresponding to the respective field.

At least one credit and one debit line is required while defining a template.

System will not allow to add a template having same set of process, sub processes and effective date. If there is a template already created and its status is Inactive, then only template can be created with same set of process, sub processes and effective date.

Each conditional line must have unique User Defined Amount Field value.

5. Add template lines for a template defined.

6. Click **Save**.

The GL Accounting template is created and the status of the template is set to **Draft**. The **GL Accounting Template** screen appears with the details of template.

## Viewing the GL Accounting Template Details

**Procedure**

To view the details of a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose details you want to view.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
  - **GL Accounting Template** – Displays the details of the template.
  - **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
    - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

3. View the details of the template in the **GL Accounting Template** zone.

## GL Accounting Template (Used for Viewing)

---

Once you create a template, the **GL Accounting Template** screen allows you to:

- View the details of a template
- Edit the details of a template
- Delete a template
- Submit a template for approval
- Approve or reject a template
- Deactivate a template

This screen consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
  - **GL Accounting Template** – Displays the details of the template.
- **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
  - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

## GL Accounting Template - Main

---

The **Main** tab on the **GL Accounting Template** contains the following zone:

[GL Accounting Template](#) on page 1737

### GL Accounting Template

The **GL Accounting Template** zone displays the details of the template. This zone contains the following sections:

- **Main** – This section provides basic information about the GL Accounting template. It contains the following fields:

Field Name	Field Description
GL Accounting Template Information	Displays information about the template
Status	Indicates the status of the template.
Process	Displays the process.
Description	Displays the description of the process.
Sub Process 1	Displays the Sub Process 1.
Sub Process 2	Displays the Sub Process 2.
Sub Process 3	Displays the Sub Process 3.
Sub Process 4	Displays the Sub Process 4.
Sub Process 5	Displays the Sub Process 5.
Effective Start Date	Displays the date from when the template is effective.
Effective End Date	Displays the date till when the template is effective.

- **GL Accounting Template Lines** – Lists the GL Accounting template lines. It contains the following columns:

Column Name	Column Description
Sequence No	Displays the sequence number.
Credit/Debit	Displays whether the template lines are of credit or debit.
Conditional Algorithm	Displays the algorithm that specified that template line is valid or not.
Distribution Code	Displays the distribution code which indicates the template associated with the charge.
User Defined Amount Field	Displays the amount to be used in a template line.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the template.
	<b>Note:</b> The <b>Edit</b> button appears when the template is in the <b>Draft</b> or <b>Rejected</b> status.
Delete	Used to delete the template.
	<b>Note:</b> The <b>Delete</b> button appears when the template is in the <b>Draft</b> or <b>Rejected</b> status.
Submit	Used to activate the template.
	<b>Note:</b> The <b>Submit</b> button appears when the template is in the <b>Draft</b> or <b>Rejected</b> status.
Approve	Used to approve the template.
	<b>Note:</b> the <b>Approve</b> button appears when the template is in the <b>Approval In Progress</b> or <b>Deactivation Approval In Progress</b> status.
Reject	Used to reject the template.

Button Name	Button Description
	<b>Note:</b> the <b>Reject</b> button appears when the template is in the <b>Approval In Progress</b> or <b>Deactivation Approval In Progress</b> status.
Deactivate	Used to deactivate the active template.
	<b>Note:</b> The <b>Deactivate</b> button appears when the template is in the <b>Active</b> status.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## GL Accounting Template - Log

The **Log** tab on the **GL Accounting Template** screen contains the following zone:

[GL Accounting Template Log](#) on page 1739

## GL Accounting Template Log

The **GL Accounting Template Log** zone on the **GL Accounting Template** screen lists the complete trail of actions performed on the GL Accounting template. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the template.
Details	Displays the details about the action performed on the template.
User	Indicates the user who has performed the action on the template.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the template.
Status Reason	Displays the status reason of action performed on the template.

**Note:** You can manually add a log entry for the template by clicking the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

The **Add GL Accounting Template Log** window appears. Enter **Log Details** and click **Save**. The GL Accounting Template log is added.

### Related Topics

## Editing a GL Accounting Template

### Procedure

To edit a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose details you want to edit.  
The **GL Accounting Template** screen for editing appears.
3. Click the **Edit** button in the **GL Accounting Template** zone.

**Note:** The **Edit** button appears when the template is in the **Draft** or **Rejected** status.

The **GL Accounting Template** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the template. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Process	Used to specify a particular process.	Yes
Description	Used to indicate the description of a process.	Yes
Sub Process 1	Used to specify a Sub Process 1.	Yes (Conditional)
		<b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment or Payment Segment or Adjustments</b>
Sub Process 2	Used to specify a Sub Process 2.	Yes (Conditional)
		<b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment or Payment Segment or Adjustments</b>
Sub Process 3	Used to specify a Sub Process 3.	Yes (Conditional)
		<b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment or Payment Segment or Adjustments.</b>
Sub Process 4	Used to specify a Sub Process 4.	No
Sub Process 5	Used to specify a Sub Process 5.	No
Effective Start Date	Used to specify date for a template which is effective from a particular date.	Yes
Effective End Date	Used to specify date for a template which is effective till a particular date.	No

- **GL Accounting Template Lines** — Used to specify the template lines in a GL accounting template. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No	Used to specify the sequence number.	Yes
Credit/Debit	Used to indicate whether template lines are of credit or debit.	Yes
Conditional Algorithm	Used to specify the algorithm which specifies that template line is valid or not.	No
Distribution Code	Used to indicate the distribution code which indicates the template associated with the charge.	Yes
User Defined Amount Field	Used to indicate the amount to be used in a template line.	Yes

**Note:**

If you want to specify more than one template lines, click the **Add (+)** icon corresponding to the sequence No and then specify the details.

However, if you want to remove a template line from the template, click the **Delete (🗑)** icon corresponding to the sequence No.

You can search for a conditional algorithm and distribution code by clicking the **search (🔍)** icon corresponding to the respective field.

At least one credit and one debit line is required while defining a template.

4. Modify the details of the template, if required.
5. Click **Save**.  
The changes made to the GL Accounting template are saved.

## Deleting a GL Accounting Template

---

**Procedure**

To delete a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to delete.  
The **GL Accounting Template** screen appears.
3. Click the **Delete** button in the **GL Accounting Template** zone.  
A message appears confirming whether you want to delete the template.

**Note:** The **Delete** button appears when the template is in the **Draft** or **Rejected** status.

4. Click **OK**.  
The GL Accounting template is deleted.

**Note:**

You can delete a template when its status is **Draft**.

## Submitting a GL Accounting Template

### Prerequisites

To submit a GL Accounting Template, you should have:

- Process and GL Accounting template lines defined in the template.

### Procedure

To submit a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to submit.  
The **GL Accounting Template** screen appears.
3. Click the **Submit** button in the **GL Accounting Template** zone.  
The system behaves in the following manner:

If...	Then...
Approval Required Flag is set to Yes in the <b>C1-GLATSUB</b> algorithm.	A To Do of the <b>C1-GLAT</b> To Do type is created and sent to the approver and the status of the template is changed to <b>Approval In Progress</b> .
Approval Required Flag is set to No in the <b>C1-GLATSUB</b> algorithm.	The template is created using the specified process and the status of the template is changed to <b>Active</b> .

**Note:**

The **Submit** button appears when the template is in the **Draft** or **Rejected** status.

## Approving a GL Accounting Template

You can view the number of GL Accounting templates which are pending for approval in the **GL Accounting Template** screen. The approver can review, and accordingly approve or reject the template based on the observations.

**Note:** The system will not allow you to approve or reject a template submitted by you.

### Procedure

To approve a template:

1. Do either of the following:

If you want to...	Then...
<b>Approve a GL Accounting Template through the GL Accounting template screen</b>	<ol style="list-style-type: none"> <li>a. Search for the template in the <b>GL Accounting template</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>GL Accounting Template Information</b> column corresponding to the template which you want to review.</li> </ol>
<b>Approve a GL Accounting Template from the To Do List screen</b>	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>c. Enter <b>C1-GLAT</b> in the <b>To Do Type</b> field.</li> <li>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>f. Click the link in the <b>Message</b> column corresponding to the To Do of the GL Accounting template that you want to review.</li> </ol>

The **GL Accounting Template** screen appears.

2. Review the template details.
3. Click the **Approve** button in the **GL Accounting Template** zone.

The system behaves in the following manner:

If you are...	Then...
Approving a GL Accounting template	The status of the template is changed to <b>Active</b> as specified in the GL Accounting template.

**Note:** The **Approve** button appears when the template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.

### Related Topics

## Rejecting a GL Accounting Template

### Prerequisites

To reject a GL Accounting template, you should have:

- Rejection reasons defined in the application

### Note:

While rejecting a GL Accounting template, you need to specify the reason why you want to reject the template. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-GLAT** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a template submitted by you.

### Procedure

To reject a GL Accounting template

1. Do either of the following:

If you want to	Then
Reject a GL Accounting template through the <b>GL Accounting Template</b> screen	<ol style="list-style-type: none"> <li>a. Search for the template in the <b>GL Accounting Template</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>GL Accounting Template Information</b> column corresponding to the template which you want to review.</li> </ol>
Reject a GL Accounting template from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>c. Enter <b>C1-GLAT</b> in the <b>To Do Type</b> field.</li> </ol>

If you want to	Then
	<p><b>d.</b> Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p><b>e.</b> Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p><b>f.</b> Click the link in the <b>Message</b> column corresponding to the To Do of the template that you want to review.</p>

The **GL Accounting Template** screen appears.

- Review the template details.
- Click the **Reject** button in the **GL Accounting Template** zone.

The **Reject GLAT Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the template	Yes
Comments	Used to specify additional information while rejecting the template.	No

**Note:** The **Reject** button appears when:

- The template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.
- A user with the approval To Do role is reviewing the template.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

The status of the template is changed to **Rejected**.

## **Deactivating a GL Accounting Template**

### **Prerequisites**

To deactivate a GL Accounting template, you should have:

- Deactivation reasons defined in the application.

**Note:**

While deactivating a GL Accounting template, you need to specify the reason why you want to deactivate the template. You can select the appropriate deactivation reason when you have defined the reasons for the deactivation status of the **C1-GLAT** business object in the **Status Reason** screen.

**Procedure**

To deactivate a GL Accounting template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to deactivate.  
The **GL Accounting Template** screen appears.
3. Click the **Deactivate** button in the **GL Accounting Template** zone.

**Note:** The **Deactivate** button appears when the template is in the **Active** status.

The **Deactivate GLAT Request** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason for deactivating a template	Yes
Comments	Used to specify the additional comments for the deactivation of template.	No

4. Click **OK**.  
The GL Accounting template status is changed to **Deactivation Approval In Progress**.

## Viewing the Log of a GL Accounting Template

**Procedure**

To view the log of a GL Accounting template:

1. Search for the template in the **GL Accounting template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose log you want to view.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
  - **GL Accounting Template** – Displays the details of the template.
- **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
  - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

### 3. Click the **Log** tab.

The **GL Accounting Template Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the template.
Details	Displays the details about the action performed on the template.
User	Indicates the user who has performed the action on the template.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the template.
Status Reason	Indicates the reason why the template was rejected or voided.

**Note:** You can manually add a log entry for the template by clicking the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

## Adding a Log Entry for a GL Accounting Template

### Procedure

To add a log entry for a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose log you want to edit.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
  - **GL Accounting Template** – Displays the details of the template.
  - **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
    - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

### 3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

The **Add GL Accounting Template Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
GL Accounting Template Information	Displays information about the template.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Log Details	Used to specify additional comments for the template.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **GL Accounting Template Log** zone.

Oracle Revenue Management and Billing enables you to calculate and create accrual for accounts. An accrual allows an entity to record expenses and revenues for which it expects to expend cash or receive cash, respectively, in a future reporting period.

The accrual is an adjustment which is created for the following:

- Revenues that have been earned but are not yet recorded in the books of accounts.
- Expenses that have been incurred but are not yet recorded in the book of accounts.

The system also enables you to reverse the accrual for accounts. You need to define whether the accounts belonging to a division are eligible for accrual or not. If a division is eligible for accrual, by default, all accounts belonging to the division are eligible for accrual. However, you can exclude an account from accrual, if required. To enable the accruals feature, you need to define the following:

- **Accrual Cycle** – You must specify the following information in the accrual cycle:

- Dates when accrual should be calculated and created for the accounts where the accrual cycle is defined.
- Accrual reversal period for each accrual date.

If a division is eligible for accrual, you need to specify the accrual cycle for the division. By default, all accounts belonging to a division will inherit the accrual cycle of the division. However, you can override the accrual cycle of an account

- **Accrual Type** – You must specify the following information in the accrual type:

- Type of the accrual object that you want to create for posting the accrual amount. At present, the product enables you to create adjustments to record accruals for accounts in the system.
- Whether you want to calculate the accrual based on the historical or actual data. If you want to calculate the accrual based on the historical data, you need to specify the number of historical bills that you want to consider for accrual calculation. The system will only consider the completed historical bills during accrual calculation. Besides specifying the historical bill count, you also need to specify the type of day (i.e. Business Day or Calendar Day) which is used to calculate the accrual amount. However, if you want to calculate the accrual based on the actual data, you need to specify whether trial bill or unbilled pass through billable charges created through the Transaction Feed Management process should be considered to calculate the accrual amount.

- Whether you want to calculate accrual at the bill or bill segment level.
- Cancel reason that you want to use while reversing the accrual
- Algorithms that you want to use during the accrual calculation, creation, and reversal
- Whether any objects, such as adjustments created using a particular adjustment type, bill segments created for a particular price item, or adjustments' or bill segments' financial transactions where a particular distribution code is used, must be excluded during the accrual calculation.
- Divisions to which you want to associate the accrual type.

The accrual process includes the following sub-processes:

- **Accrual Calculation** – In this process, accounts that are eligible for accrual will have its accrual amount calculated on the basis of the accrual type configuration.
- **Accrual Creation** – In this process, on the basis of the calculated accrual amount and information configured on the accrual type, the accrual adjustment will be created.
- **Accrual Reversal** – In this process, reversal of accrual adjustments will be done to prevent double posting of revenue, once billing is done. On the basis of the accrual reversal schedule, an account with accrual adjustments will be selected for accrual reversal processing. For every frozen adjustment, a cancellation is done in order to reverse journal entries.

During the accrual process, an accrual goes through various statuses in its lifecycle. You can execute accrual process either using user interface (UI), or batch. For more information about the accrual statuses, see, [Accrual Created through UI \(Without Approval\) Status Transition](#) on page 1751, [Accrual Created through UI \(With Approval\) Status Transition](#) on page 1751, [Accrual Created through Batch \(Without Approval\) Status Transition](#) on page 1752, and [Accrual Created through Batch \(With Approval\) Status Transition](#) on page 1753

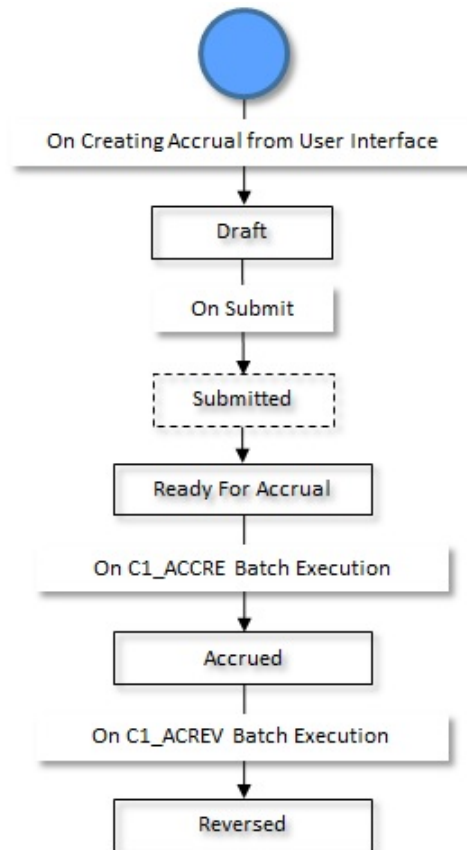

Note that the lifecycle of an accrual is driven by the business object using which the accrual is created. An accrual business object named **C1\_ACCRUALS** is shipped with the product. The accrual feature explained in this document is articulated based on the lifecycle and logic defined in the **C1\_ACCRUALS** business object.

## Accrual Created through UI (Without Approval) Status Transition

---

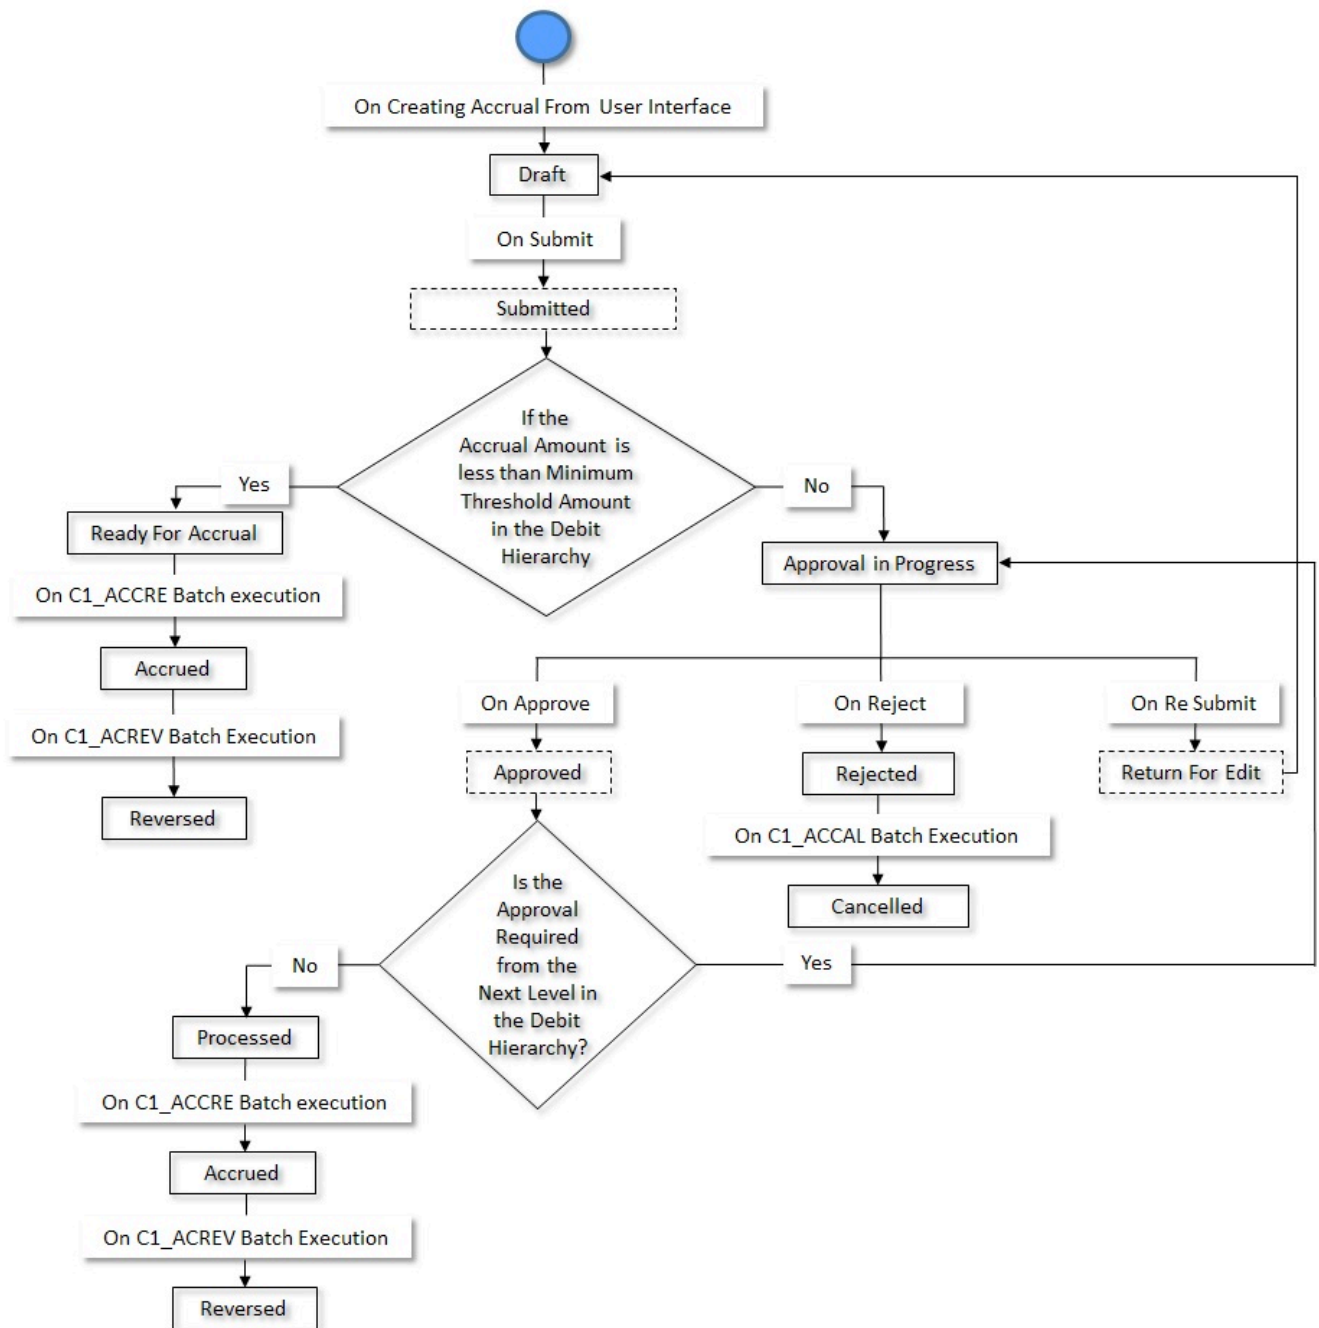

The following figure graphically indicates how an accrual created from the user interface moves from one status to another when approval workflow is off:

## Accrual Created through UI (With Approval) Status Transition

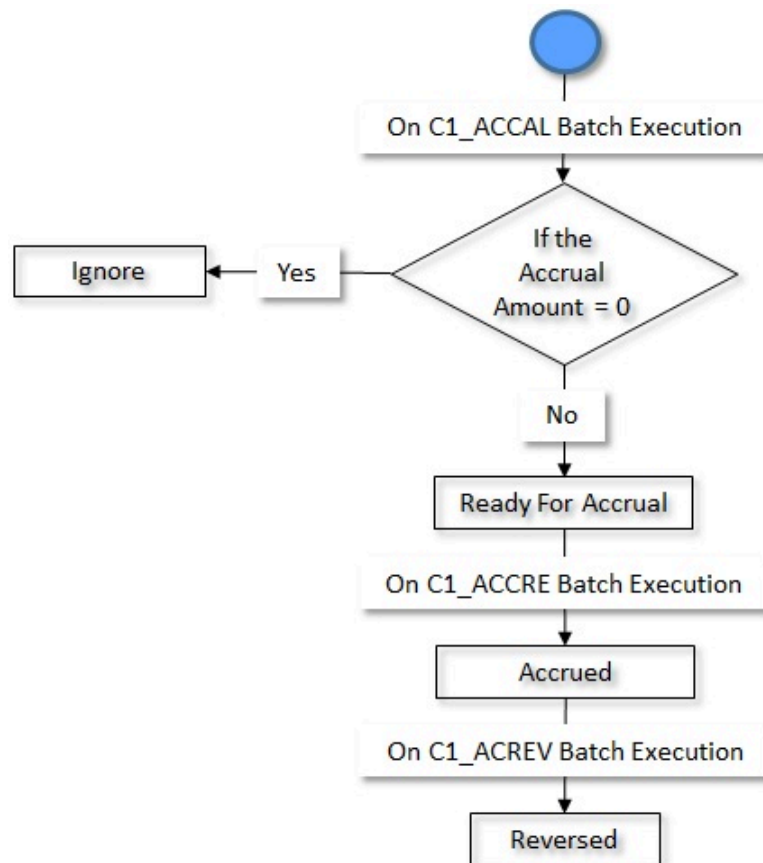

---

The following figure graphically indicates how an accrual created from the user interface moves from one status to another when the approval workflow is on:

## Accrual Created through Batch (Without Approval) Status Transition

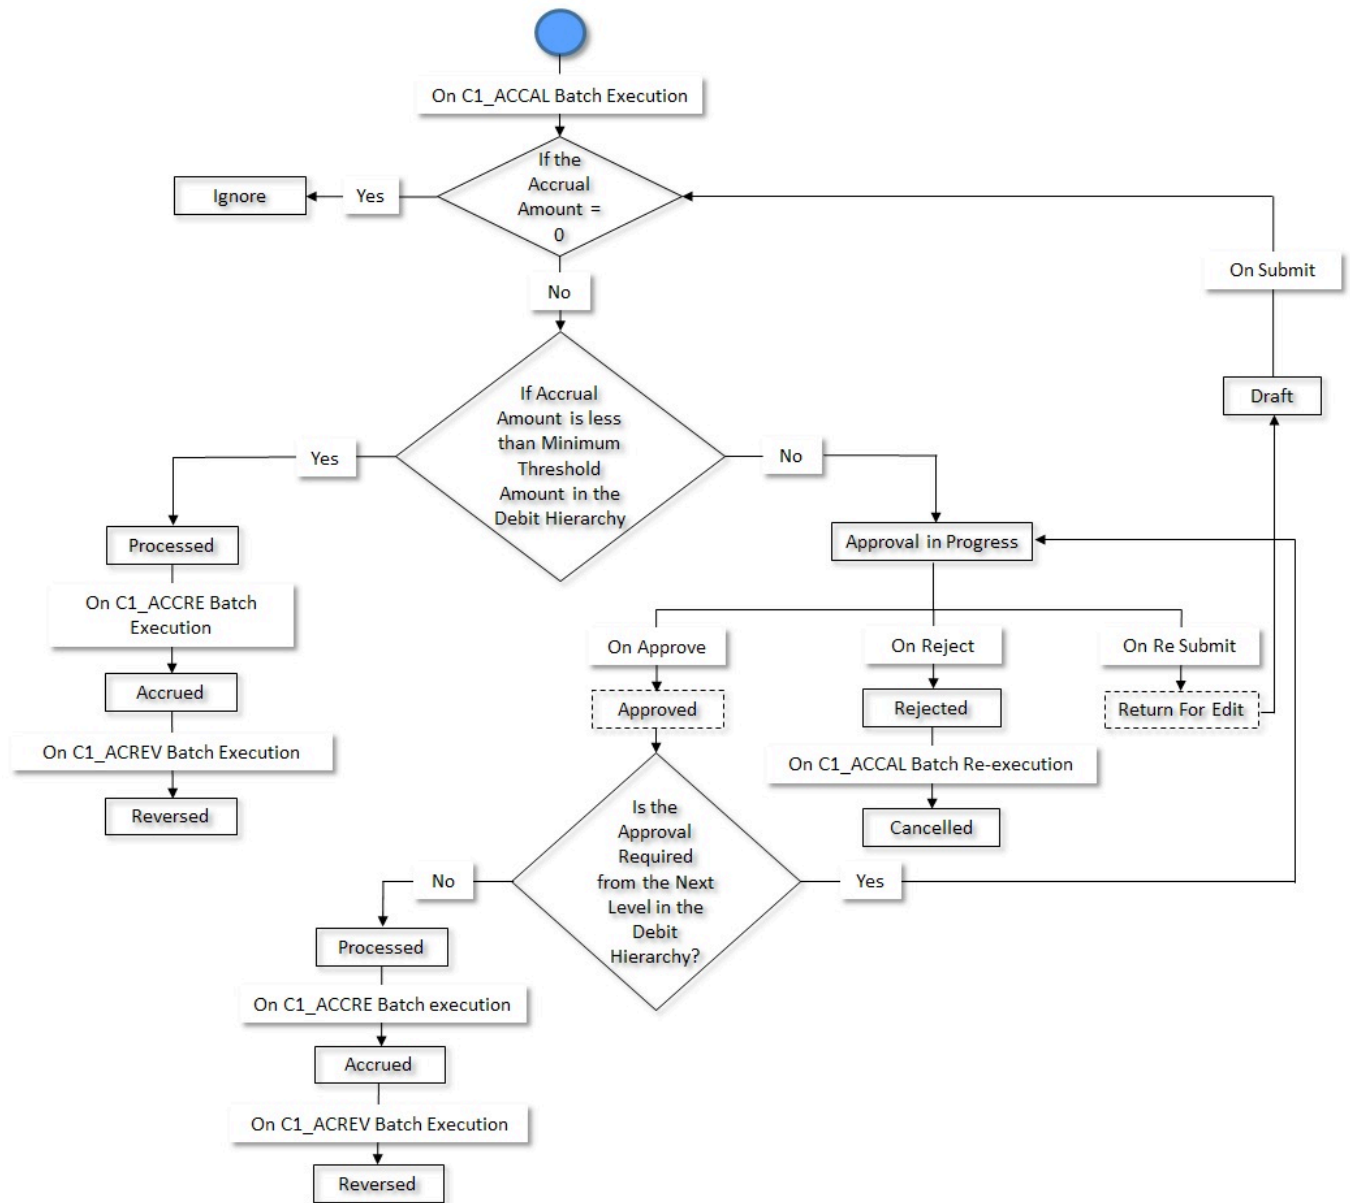

The following figure graphically indicates how an accrual created through the batch moves from one status to another when the approval workflow is off:

**Note:** For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

## Accrual Created through Batch (With Approval) Status Transition

The following figure graphically indicates how an accrual created through the batch moves from one status to another when the approval workflow is on:

**Note:** For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

## Accrual Processes

An accrual allows an entity to record expenses and revenues for which it expects to expend cash or receive cash, respectively, in a future reporting period. Following are the accrual processes to implement accrual in the application:

- [Account's Eligibility Check for Accrual](#) on page 1755
- [Accrual Calculation](#) on page 1755
- [Accrual Creation](#) on page 1756
- [Accrual Reversal](#) on page 1757

## Account's Eligibility Check for Accrual

The accrual eligibility process checks a number of account attributes to ensure that the accounts are eligible for accrual. The following table lists the internal process that identifies an account's eligibility for accrual. There will be a switch/indicator in the division and account levels that captures the information as given below:

Division Accrual (Yes/ No)	Account Accrual (Yes/ No)	Eligibility for Accrual (Yes/No)	Description
Yes	No	No	Account has the highest priority over division.
Yes	Blank	Yes	Division has the highest priority in the absence of account information.
Yes	Yes	Yes	Account has the highest priority over division.
No	Yes	No	If the division is set to no, ignore the account level switch.
No	No	No	If the division is set to no, ignore the account level switch.
No	Blank	No	If the division is set to no, ignore the account level switch.

Following accounts are considered for accrual eligibility:

1. The Invoicing Group's (IG) Master Account is the only account which is eligible for accrual.
2. The Invoice Construct Usage Account is not eligible for accrual.
3. You can only process the accrual eligible accounts for calculation purposes.

## Accrual Calculation

The accrual calculation process calculates the accrual amount of only those accounts that are eligible for accrual. Depending upon the accrual type of those eligible accounts, an algorithm is created to calculate the accrual amount that is based on the following parameters:

- [Calculate Accrual at the Bill Level Based on Historical Data](#) on page 1755
- [Calculate Accrual at the Price Item Level Based on Historical Data](#) on page 1756
- [Calculate Accrual at the Bill Level Based on Actual Data](#) on page 1756
- [Calculate Accrual at the Price Item Level Based on Actual Data](#) on page 1756

**Note:** By default, all the adjustments (for bill level and bill segment level) are included in the accrual calculation. However, some adjustments from the calculation lines are excluded, through the look up references provided in the application.

### Calculate Accrual at the Bill Level Based on Historical Data

The accounts eligible for accrual have their accrual amount calculated at the bill level based on the historical data. The number of historical bills to be considered for accrual calculation is based on the value configured in the accrual type of the eligible account.

For example, if there are two historical bills, the system considers the last two completed bills for accrual calculation. The accrual amount is the average of the bill segments and frozen adjustments on the last two bills. If the option from the Type of Day field is set as Business Day, the system does not consider the weekends and holidays during the accrual calculation. However, if the option from the Type of Day field is set as Calendar Day, the system considers the weekends and holidays during the accrual calculation.

## Calculate Accrual at the Price Item Level Based on Historical Data

The accounts eligible for accrual have their accrual amount calculated at the price item level based on the historical data. The number of historical bills to be considered for accrual calculation is based on the value configured in the accrual type of the eligible account.

For example, if there are two historical bills, then the system considers the last two completed bills for accrual calculation. The accrual amount is the average of price items on the last two bills. If the option from the **Type of Day** field is set as **Business Day**, the system does not consider the weekends and holidays during the accrual calculation. However, if the option from the **Type of Day** is set as **Calendar Day**, the system considers the weekends and holidays during the accrual calculation.

## Calculate Accrual at the Bill Level Based on Actual Data

The accounts eligible for accrual have their accrual amount calculated at the bill level based on the actual data. The actual data can be sourced from a trial bill or rated Transaction Feed Management transaction. The accrual source to be considered is based on the value configured in the accrual type of the account.

Following scenarios indicate how the accrual amount is calculated:

- If the accrual source is transaction feed and accrual amount is calculated at bill level; the accrual amount is the sum of unbilled pass through billable charges created for the account either manually or automatically through the Transaction Feed Management process and frozen adjustments of the account.
- If the accrual source is transaction feed and accrual amount is calculated at bill segment level; the accrual amount is the sum of unbilled pass through billable charges created for the account automatically through the Transaction Feed Management process.

## Calculate Accrual at the Price Item Level Based on Actual Data

The accounts eligible for accrual have their accrual amount calculated at the price item level based on the actual data. The actual data can be sourced from a trial bill or rated Transaction Feed Management transaction. The accrual source to be considered is based on the value configured in the accrual type of the account.

Following scenarios indicate how the accrual amount is calculated:

- If the accrual source is trial bill and accrual amount is calculated at bill level; the accrual amount is the sum of price items and frozen adjustments on the latest trial bill.
- If the accrual source is trial bill and accrual amount is calculated at price item level; the accrual amount is the sum of price items on the latest trial bill.

## Accrual Creation

The accrual creation takes place based on the calculated accrual amount and accrual type information which is used to create an accrual adjustment. You can create the adjustments for accruals through the **C1\_ACCRE** batch process. The accruals which are either in the **Ready for Accrual** or **Processed** status are considered in this batch process. Based on the adjustment type defined in the accrual type, the system accordingly creates the accrual adjustment for the account. The status of the accrual is changed to **Accrued**.

### Note:

For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

The system also enables you to manually create the accrual for an account. You can optionally configure the approval workflow process for accruals. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. The debit approval hierarchy is used for approving the accrual. You can define an approval hierarchy where users with different To Do role at each level can approve or reject the accrual. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the accrual, the status of the accrual is changed to **Processed**. However, if an approver at any level in the hierarchy rejects the accrual, the status of the accrual is changed to **Rejected**.

## Accrual Reversal

The reversal of accrual adjustments is done to prevent double posting of revenue, once the billing is done. On the basis of the accrual reversal schedule, an account with accrual adjustments is selected for the accrual reversal processing. For every frozen adjustment, a cancellation is done in order to reverse journal entries.

You can reverse the accrual through the **C1\_ACREV** batch process. On reversing the accrual, the accrual adjustments are cancelled and the status of the accrual is changed to **Reversed**.

**Note:** For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Accrual Cycle (Used for Searching)

The **Accrual Cycle** screen allows you to search for an accrual cycle using various search criteria. It also allows you to define an accrual cycle. It contains the following zone:

- [Search Accrual Cycle](#) on page 1757

## Search Accrual Cycle

The **Search Accrual Cycle** zone allows you to search for an accrual cycle using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to search a particular accrual cycle.	No
Description	Used to search an accrual cycles with a particular description.	No

**Note:** You must specify at least one search criterion while searching for an accrual cycle.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Cycle	Displays the name of accrual cycle.
Accrual Cycle Information	Displays information about the accrual cycle.
	<b>Note:</b> It has a link. On clicking the link, the <b>Accrual Cycle</b> screen appears where you can view the details of the respective accrual cycle.

How to define an accrual cycle	<a href="#">Defining an Accrual Cycle</a> on page 1759

## Searching for an Accrual Cycle

### Prerequisites

To search for an accrual cycle, you should have:

- Accrual cycles defined in the application

### Procedure

To search for an accrual cycle:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Cycle**.  
The **Accrual Cycle** screen appears.
3. Enter the search criteria in the **Search Accrual Cycle** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of accrual cycles that meet the search criteria appear in the **Search Results** section.

## Viewing the Accrual Cycle Details

### Procedure

To view the details of an accrual cycle:

1. Search for an accrual cycle in the **Accrual Cycle** screen.
2. In the **Search Results** section, click the link in the **Accrual Cycle Information** column corresponding to the *accrual* cycle whose details you want to view.  
  
The **Accrual Cycle** screen appears.
3. View the details of the accrual cycle in the **Accrual Cycle** zone.

### Related Topics

## Defining an Accrual Cycle

---

### Prerequisites

To define an accrual cycle, you should have:

- Accrual business object defined in the application.

### Procedure

To define an accrual cycle:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Cycle**.  
The **Accrual Cycle** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Accrual Cycle** screen.

The **Accrual Cycle** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual cycle.
- **Schedule Periods** – Used to specify the schedule period of an accrual cycle for which the accrual is calculated.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to specify the accrual cycle.	Yes
Description	Used to specify the description for the accrual cycle.	Yes

4. Enter the required details in the **Main** section.
5. Add the schedule periods for the accrual cycle.
6. Click **Save**.  
The accrual cycle is defined.

## Adding a Schedule Period in an Accrual Cycle

---

### Prerequisites

To add a schedule period in an accrual cycle, you should have:

- Accrual cycles (in which you want to add a schedule period) defined in the application

### Procedure

To add a schedule period in an accrual cycle:

1. Ensure that the **Schedule Periods** section is expanded when you are defining or editing an accrual cycle.

The **Schedule Periods** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Date	Used to specify the date from when the accrual creation process for an applicable account is initiated.	Yes
Reversal Start Date	Used to specify the date from when the accrual reversal process starts.	Yes
	<b>Note:</b> The <b>Reversal Start Date</b> must be later than the <b>Accrual Date</b> . The <b>Reversal Start Date</b> cannot be later than the <b>Reversal End Date</b> .	
Reversal End Date	Used to specify the date till when the accrual reversal process ends.	Yes
	<b>Note:</b> The <b>Reversal End Date</b> cannot be earlier than the <b>Reversal Start Date</b> .	

2. Enter the required details in the **Schedule Periods** section.
3. If you want to add more than one schedule period in an accrual cycle, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a schedule period from an accrual cycle, click the **Delete (🗑)** icon corresponding to the **Accrual Date** field.

4. Click **Save**.  
The schedule period is added in the accrual cycle.

## Accrual Cycle (Used for Viewing)

The **Accrual Cycle** screen allows you to view the details of an accrual cycle. It also allows you to define, edit, or delete an accrual cycle. It contains the following zone:

- [Accrual Cycle](#) on page 1760

## Accrual Cycle

The **Accrual Cycle** zone displays the details of an accrual cycle. It contains the following sections:

- **Main** – Displays basic information about the accrual cycle. It contains the following fields:

Field Name	Field Description
Accrual Cycle	Displays the accrual cycle.
Description	Displays the description of the accrual cycle.

- **Schedule Periods** – Displays information about when the accrual creation process is initiated for the applicable accounts. It contains the following columns:

Column Name	Column Description
Accrual Date	Displays the date from when the accrual creation process for an applicable account is initiated.
Reversal Start Date	Displays the date from when the accrual reversal process starts.
Reversal End Date	Displays the date till when the accrual reversal process ends.

- **Record Actions** – The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of an accrual cycle.
Delete	Used to delete an accrual cycle.

- **Record Information** – The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the accrual cycle is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

### Related Topics

## Editing an Accrual Cycle

### Procedure

To edit an accrual cycle:

1. Search for the accrual cycle in the **Accrual Cycle** screen.
2. In the **Search Results** section, click the link in the **Accrual Cycle Information** column corresponding to the *accrual* cycle whose details you want to edit.  
The **Accrual Cycle** screen appears.
3. Click the **Edit** button in the **Accrual Cycle** zone.

The **Accrual Cycle** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual cycle.
- **Schedule Periods** – Used to specify the schedule period of an accrual cycle for which the accrual is calculated.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to specify the accrual cycle.	Yes
Description	Used to specify the description for the accrual cycle.	Yes

4. Modify the required details in the **Main** section.
5. Add, edit, or remove the schedule period information from the accrual cycle.
6. Click **Save**.

The changes made to the accrual cycle are saved.

**Note:** You can edit an accrual cycle only when the accrual cycle is not referenced to an accrual type for creating an accrual.

## Deleting an Accrual Cycle

### Procedure

To delete an accrual cycle:

1. Search for the accrual cycle in the **Accrual Cycle** screen.
2. In the **Search Results** section, click the link in the **Accrual Cycle Information** column corresponding to the *accrual* cycle that you want to delete.  
The **Accrual Cycle** screen appears.
3. Click the **Delete** button in the **Accrual Cycle** zone.  
A message appears confirming whether you want to delete the accrual cycle.
4. Click **OK**.  
The accrual cycle is deleted.

**Note:** You can delete an accrual cycle only when the accrual cycle is not referenced to an accrual type for creating an accrual.

## Accrual Type (Used for Searching)

The **Accrual Type** screen allows you to search for an accrual type using various search criteria. It also allows you to define an accrual type. It contains the following zone:

- [Search Accrual Type](#) on page 1763

### Search Accrual Type

The **Search Accrual Type** zone allows you to search an accrual type using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to search a particular accrual type.	No
Description	Used to search accrual types having a particular description.	No
Accrual Criteria	Used to search accrual types which are created to calculate accruals based on a particular bill criteria. The valid values are: <ul style="list-style-type: none"> <li>• <b>Actual</b> - Used to search accrual types which are created to calculate accruals based on the actual bill data.</li> <li>• <b>Historical</b> - Used to search accrual types which are created to calculate accruals based on the historical bill data.</li> </ul>	No
Posting Method	Used to search accrual types which are created to calculate accruals at a particular level. The valid values are: <ul style="list-style-type: none"> <li>• <b>Bill Level</b> - Used to search accrual types which are created to accrue the bill segments and adjustments of bills at the bill level.</li> <li>• <b>Bill Distribution Code Level</b> - Used to search accrual types which are created to accrue the bill segments and adjustments of bills at the distribution code level.</li> <li>• <b>Price Item Level</b> - Used to search accrual types which are created to accrue the bill segments and adjustments of bills at the price item level.</li> <li>• <b>Price Item Distribution Code Level</b> - Used to search accrual types which are created to accrue the bill segments of a particular price item at the distribution code level.</li> </ul>	No
Division	Used to search accrual types which are associated to a particular division.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	

**Note:** You must specify at least one search criterion while searching for an accrual type.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Type	Displays the accrual type.
Accrual Type Information	Displays information about the accrual type.
	<b>Note:</b> It has a link. On clicking the link, the <b>Accrual Type</b> screen appears where you can view the details of the respective accrual type.
Accrual Criteria	Indicates the bill criteria which is used to calculate the accrual.
Posting Method	Indicates the bill level at which the accrual is calculated.
Type of Day	Indicates the type of day which is used as a reference for calculating the accruals.
Division	Indicates the division to which the accrual type is associated.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Viewing the Accrual Type Details

### Procedure

To view the details of an accrual type:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the *accrual* type whose details you want to view.

The **Accrual Type** screen appears. It contains the following zone:

- [Accrual Type](#) on page 1775

3. View the details of the accrual type in the **Accrual Type** zone.

### Related Topics

For more information on...	See...
How to search for an accrual type	<a href="#">Searching for an Accrual Type</a> on page 1764
Accrual Type screen	<a href="#">Accrual Type (Used for Viewing)</a> on page 1775

## Defining an Accrual Type

### Prerequisites

To define an accrual type, you should have:

- Accrual type business object defined in the application.
- Accrual business object defined in the application.
- Adjustment types defined in the application (where the **Print by Default** and **Influence Next Bill Balance** check box is not selected).

### Procedure

To define an accrual type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Type**.  
The **Accrual Type** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Accrual Type** screen.

The **Accrual Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual type.
- **Algorithms** – Used to associate algorithms with the accrual type.
- **Objects to Exclude** – Used to specify the entities that you want to exclude while accrual calculation.
- **Divisions** – Used to specify the divisions to which the accrual type can be associated.
- **Characteristics** – Used to define a list of characteristics for the accrual type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to specify the accrual type.	Yes
Description	Used to specify the description for the accrual type.	Yes
Accrual Object	Used to indicate the type of accrual object that you want to create while posting the accrual details. The valid values are: <ul style="list-style-type: none"> <li>Adjustment</li> <li>Custom</li> </ul>	Yes
	<b>Note:</b> At present, you can only create adjustments to record the accruals for the accounts in the application.	
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created while posting the accrual details..	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.  On specifying the adjustment type, the description of the adjustment type appears corresponding to the <b>Adjustment Type</b> field.  The <b>Adjustment Type</b> field appears only when you select the <b>Adjustment</b> option from the <b>Accrual Object</b> field.	
Accrual Criteria	Used to indicate the bill criteria using which you want to calculate the accrual. The valid values are: <ul style="list-style-type: none"> <li><b>Actual</b> - Used to indicate whether you want to calculate accruals based on the actual bill data.</li> <li><b>Historical</b> - Used to indicate whether you want to calculate accruals based on the historical bill data.</li> </ul>	Yes
Accrual Source	Used to indicate the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are: <ul style="list-style-type: none"> <li>Transaction Feed</li> <li>Trial Bill</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for calculating accruals using the actual data.

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears only when you select the <b>Actual</b> option from the <b>Accrual Criteria</b> field.	
Historical Bill Count	Used to specify the number of historical bills that you want to consider for calculating the accrual.	Yes (Conditional)
	<b>Note:</b> This field appears only when you select the <b>Historical</b> option from the <b>Accrual Criteria</b> field.	<b>Note:</b> This field is required for calculating accruals using the historical data.
Accrual Request Business Object	Used to indicate the business object using which you want to create the accrual request.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.  On specifying the business object, the description of the business object appears corresponding to the <b>Accrual Request Business Object</b> field.	
Approval Required	Used to indicate whether approval is required for the accruals which are created using the accrual type.	No
Approval Profile	Used to indicate the approval profile which you want to use for approving the accruals which are created using the accrual type.	Yes (Conditional)
	<b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required for approving the accruals.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required for the accruals which are created using the accrual type.	Yes (Conditional)
	<b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required for specifying the hierarchy using which you want to approve the accruals.
Submitter To Do Type	Used to indicate the To Do task assigned to the To Do type for the approver who can resubmitting the accrual for approval	Yes (Conditional)
		<b>Note:</b> This field is required for approving the accruals.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the submitter To Do type, the description of the submitter To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> <p>The <b>Submitter To Do Type</b> field appears only when the <b>Approval Required</b> check box is selected.</p>	
Submitter To Do Role	Used to indicate the To Do role of the approver who can resubmit the accrual for approval.	Yes (Conditional)
	<b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required for approving the accruals.
Type of Day	<p>Used to indicate the type of day for which you want to calculate the accrual amount.</p> <ul style="list-style-type: none"> <li>• Business Day</li> <li>• Calendar Day</li> </ul>	Yes
	<p><b>Note:</b></p> <p>If the <b>Business Day</b> option is selected, the system calculates the accrual amount using the following formula:</p> <p>Accrual amount = (Sum of resulting bill amount / Total number of business days from previous bills) * Number of business days for the current billing cycle.</p> <p>If the <b>Calendar Day</b> option is selected, the system calculates the accrual amount using the following formula:</p> <p>Accrual amount = (Sum of bill amount / Total number of calendar days of previous bills) * Number of calendar days for the current billing cycle.</p>	
Posting Method	<p>Used to indicate the level at which you want to calculate the accruals. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Bill Level</b> - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the bill level.</li> <li>• <b>Bill Distribution Code Level</b> - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>Price Item Level</b> - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the price item level.</li> <li>• <b>Price Item Distribution Code Level</b> - Used to indicate that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.</li> </ul>	
Proration Required	<p>Used to indicate whether you want to prorate the accrual amount for the trail bills and historical bill segments for the recurring and non-recurring charges using different posting methods. It is calculated using the below formula:</p> <p>Expected accrual amount for each price item = (Sum of resulting bill segment amount / Total number of days) * Number of days in the accrual cycle</p> <p><b>Note:</b> This field appears in the following scenarios:</p> <ul style="list-style-type: none"> <li>• When the <b>Actual</b> and the <b>Trial Bill</b> options are selected from the <b>Accrual Criteria</b> and the <b>Accrual Source</b> fields respectively.</li> <li>• When the <b>Historical</b> option is selected from the <b>Accrual Criteria</b> field.</li> </ul>	No
Calculation Lines Required	Used to indicate whether you want to view the bill segments and adjustments which are used for calculating the accrual amount.	No

Field Name	Field Description	Mandatory (Yes or No)															
	<p><b>Note:</b></p> <p>You can view the accrual calculation lines in the <b>Accrual</b> screen only when the following conditions are satisfied:</p> <ul style="list-style-type: none"> <li>• Accrual is created using the batch process and not manually from the user interface.</li> <li>• Accrual is created using an accrual type with either of the following combinations:</li> </ul> <table border="1"> <thead> <tr> <th>Accrual Criteria</th><th>Accrual Source</th><th>Posting Method</th></tr> </thead> <tbody> <tr> <td>Historical</td><td>-</td><td>Bill Level</td></tr> <tr> <td>Historical</td><td>-</td><td>Price Item Level</td></tr> <tr> <td>Actual</td><td>Trial Bill</td><td>Bill Level</td></tr> <tr> <td>Actual</td><td>Trial Bill</td><td>Price Item Level</td></tr> </tbody> </table> <ul style="list-style-type: none"> <li>• When the <b>Do you want to insert detail level calculation?</b> parameter in the <b>Accrual Calculation (C1_ACCR_CAL)</b> algorithm is set to <b>Y</b>.</li> </ul> <p>The <b>Calculation Lines Required</b> check box is by default selected and cannot be unchecked if you select the <b>Bill Distribution Code Level</b> or the <b>Price Item Distribution Code Level</b> option from the <b>Posting Method</b> field.</p>	Accrual Criteria	Accrual Source	Posting Method	Historical	-	Bill Level	Historical	-	Price Item Level	Actual	Trial Bill	Bill Level	Actual	Trial Bill	Price Item Level	
Accrual Criteria	Accrual Source	Posting Method															
Historical	-	Bill Level															
Historical	-	Price Item Level															
Actual	Trial Bill	Bill Level															
Actual	Trial Bill	Price Item Level															
Price Item Accrual Criteria Required	Used to indicate whether accrual criteria is required for calculating accrual at the price item level.	No															
Cancel Reason	<p>Used to indicate the cancel reason that you want to use while reversing the accrual. The valid values are:</p> <ul style="list-style-type: none"> <li>• Broken Payment Arrangement</li> <li>• Credit Note</li> <li>• Enter</li> </ul> <p><b>Note:</b> The list includes only those values which are specified in the <b>ACCR_CAN_RSN_CD</b> lookup field.</p>	No															
Contract Type	Used to indicate the contract type whose contract exists on the accounts.	Yes															

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (Q) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears where you can select the required contract type.	
Applicable for Account	Used to indicate whether the <b>Accrual Type</b> is used to calculate accruals at the account level.	Yes (Conditional)
	<b>Note:</b> If you do not select the <b>Applicable for Account</b> check box, the system will consider the accrual type to calculate accruals at the division level.	<b>Note:</b> This field is required for indicating the accrual type can be associated to an account and not the division for calculating accruals.

4. Enter the required details in the **Main** section.
5. Associate algorithms with the accrual type in the **Algorithms** section, if required.
6. Exclude the entities which are not required for calculating the accrual using the accrual type in the **Objects to Exclude** section, if required.
7. Associate a list of divisions to which you want to associate the accrual type in the **Divisions** section, if required.
8. Define a list of characteristics for the accrual type in the **Characteristics** section, if required.
9. Click **Save**.  
The accrual type is defined.

## **Associating an Algorithm with an Accrual Type**

### **Prerequisites**

To associate an algorithm with an accrual type, you should have:

- System events defined in the application
- Algorithms defined for the system events

### **Procedure**

To associate an algorithm with an accrual type:

1. Ensure that the **Algorithms** section is expanded in the **Accrual Type** screen when you are defining, editing, or copying an **Accrual Type**.

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	<p>Used to indicate the system event for which the algorithm is executed. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Accrual Calculation</b> - Used to attach an algorithm which is triggered for calculating an accrual.</li> <li>• <b>Accrual Creation</b> - Used to attach an algorithm which is triggered for creating an accrual request.</li> <li>• <b>Accrual Eligibility</b> - Used to attach an algorithm which is triggered to verify the eligibility of the accrual.</li> <li>• <b>Accrual Post Calculation</b> - Used to attach an algorithm which is triggered for undertaking the post calculation activities for the accrual amount.</li> <li>• <b>Accrual Post Processing</b> - Used to attach an algorithm which is triggered for undertaking some postprocessing activities on the accrual amount.</li> <li>• <b>Accrual Pre Processing</b> - Used to attach an algorithm which is triggered for undertaking some preprocessing activities on the accrual amount.</li> <li>• <b>Accrual Reversal</b> - Used to attach an algorithm which is triggered for the accrual reversal process.</li> <li>• <b>Accrual Reversal Post Processing</b> - Used to attach an algorithm which is triggered for undertaking some postprocessing activities on the accrual reversal process.</li> <li>• <b>Accrual Reversal Pre Processing</b> - Used to attach an algorithm which is triggered for undertaking some preprocessing activities on the accrual reversal process.</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while associating an algorithm with the accrual type.
Sequence	Used to specify the order in which the algorithms with the same system event must be executed.	Yes (Conditional)
		<b>Note:</b> This field is required while associating an algorithm with the accrual type.
Algorithm	Used to specify the algorithm that you want to execute on the system event.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Algorithm</b> field. On clicking the <b>Search</b> (🔍) icon, the <b>Algorithm Search</b> window appears.  On specifying the algorithm, the description of the algorithm appears corresponding to the <b>Algorithm</b> field.	<b>Note:</b> This field is required while associating an algorithm with the accrual type.

- Enter the required details in the **Algorithms** section.
- If you want to associate more than one algorithm to the accrual type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to disassociate an algorithm from the accrual type, click the **Delete** (🗑️) icon corresponding to the algorithm.

- Click **Save**.  
The algorithm is associated with an accrual type.

## Excluding an Entity from an Accrual Type

### Procedure

To exclude an entity from an accrual type:

- Ensure that the **Objects To Exclude** section is expanded in the **Accrual Type** screen when you are defining, editing, or copying an **Accrual Type**.

The **Objects To Exclude** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	Used to indicate the type of entity. The valid values are: <ul style="list-style-type: none"> <li>Adjustment Type</li> <li>Distribution Code</li> <li>Price Item</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while excluding an entity from the accrual type.
Sequence	Used to specify the order in which the entities must be excluded from the accrual type.	Yes (Conditional)
		<b>Note:</b> This field is required while excluding an entity from the accrual type.

Field Name	Field Description	Mandatory (Yes or No)
Entity	Used to indicate the value for the selected entity type.	Yes (Conditional)
	<b>Note:</b> On selecting a predefined entity type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Entity</b> field. On clicking the <b>Search</b> (🔍) icon, you can search for a predefined entity value.  On specifying the entity, the description of the entity appears corresponding to the <b>Entity</b> field.  By default, the <b>Entity</b> field is disabled. It is enabled only when you select a predefined entity type from the <b>Entity Type</b> field.	<b>Note:</b> This field is required while excluding an entity from the accrual type.

- Enter the required details in the **Objects To Exclude** section.
- If you want to exclude more than one entity from the accrual type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove an excluded entity from the accrual type, click the **Delete** (🗑) icon corresponding to the entity.

- Click **Save**.  
The entity is excluded from the accrual type.

## Associating a Division with an Accrual Type

### Prerequisites

To associate a division with an accrual type, you should have:

- Divisions defined in the application.

### Procedure

To associate a division with an accrual type:

- Ensure that the **Divisions** section is expanded in the **Accrual Type** screen when you are defining, editing, or copying an **Accrual Type**.  
The **Divisions** section contains the following fields in a grid:

Fields Name	Fields Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the accrual type is effective for the division.	Yes (Conditional)

Fields Name	Fields Description	Mandatory (Yes or No)
		<b>Note:</b> This field is required while associating a division with an accrual type.
Division	Used to indicate division to which you want to associate the accrual type.	Yes (Conditional) <b>Note:</b> This field is required while associating a division with an accrual type.

- Enter the required details in the **Divisions** section.
- If you want to associate more than one division with the accrual type, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to disassociate a division from the accrual type, click the **Delete (🗑)** icon corresponding to the division.

- Click **Save**.  
The division is associated with the accrual type.

## Accrual Type (Used for Viewing)

The **Accrual Type** screen allows you to view the details of an accrual type. It also allows you to define, edit, copy, or delete an accrual type. It contains the following zone:

- [Accrual Type](#) on page 1775

## Accrual Type

The **Accrual Type** zone displays the details of an accrual type. It contains the following sections:

- Main** – Displays basic information about the accrual type. It contains the following fields:

Field Name	Field Description
Accrual Type	Displays the accrual type.
Description	Displays the description of the accrual type.
Accrual Object	Indicates the type of accrual object that you want to create while posting the accrual details. The valid values are: <ul style="list-style-type: none"> <li>Adjustment</li> <li>Custom</li> </ul>
Adjustment Type	Indicates the adjustment type using which the adjustment must be created while posting the accrual details.

Field Name	Field Description
	<p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.</p>
Accrual Criteria	<p>Indicates the bill criteria using which you want to calculate the accrual. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Actual</b> - Indicates whether you want to calculate accruals based on the actual bill data.</li> <li>• <b>Historical</b> - Indicates whether you want to calculate accruals based on the historical bill data.</li> </ul>
Accrual Source	<p>Indicates the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are:</p> <ul style="list-style-type: none"> <li>• Transaction Feed</li> <li>• Trial Bill</li> </ul>
Historical Bill Count	<p>Displays the number of historical bills that you want to consider for calculating the accrual.</p>
Accrual Request Business Object	<p>Indicates the business object using which you want to create the accrual request.</p>
Approval Required	<p>Indicates whether approval is required for the accruals which are created using the accrual type.</p>
Approval Profile	<p>Indicates the approval profile which you want to use for approving the accruals which are created using the accrual type.</p>
Hierarchical Approval	<p>Indicates whether multi-level or single-level approval is required for the accruals which are created using the accrual type.</p>
Submitter To Do Type	<p>Indicates the To Do task assigned to the To Do type for the approver who can resubmitting the accrual for approval</p>
Submitter To Do Role	<p>Indicates the To Do role of the approver who can resubmit the accrual for approval.</p>
Type of Day	<p>Indicates the type of day for which you want to calculate the accrual amount.</p> <ul style="list-style-type: none"> <li>• Business Day</li> <li>• Calendar Day</li> </ul>
Posting Method	<p>Indicates the level at which you want to calculate the accruals. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Bill Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the bill level.</li> <li>• <b>Bill Distribution Code Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level.</li> <li>• <b>Price Item Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the price item level.</li> <li>• <b>Price Item Distribution Code Level</b> - Indicates that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.</li> </ul>

Field Name	Field Description
Proration Required	Indicates whether you want to prorate the accrual amount for the trail bills which have recurring bill segments.
Calculation Lines Required	Indicates whether you want to view the bill segments and adjustments which are used for calculating the accrual amount.
Price Item Accrual Criteria Required	Indicates whether accrual criteria is required for calculating accrual at the price item level.
Cancel Reason	Indicates the cancel reason that you want to use while reversing the accrual. The valid values are: <ul style="list-style-type: none"> <li>• Broken Payment Arrangement</li> <li>• Credit Note</li> <li>• Enter</li> </ul>
Contract Type	Indicates the contract type whose contract exists on the accounts.
Applicable for Account	Indicates whether the <b>Accrual Type</b> is used to calculate accruals at the account level.

- **Algorithms** – Lists the algorithms that are associated with the accrual type. It contains the following columns:

Column Name	Column Description
System Event	Indicates the system event for which the algorithm is executed. The valid values are: <ul style="list-style-type: none"> <li>• <b>Accrual Calculation</b> - Used to indicate the algorithm which is triggered for calculating an accrual.</li> <li>• <b>Accrual Creation</b> - Used to indicate the algorithm which is triggered for creating an accrual request.</li> <li>• <b>Accrual Eligibility</b> - Used to indicate the algorithm which is triggered to verify the eligibility of the accrual.</li> <li>• <b>Accrual Post Calculation</b> - Used to indicate the algorithm which is triggered for undertaking the post calculation activities for the accrual amount.</li> <li>• <b>Accrual Post Processing</b> - Used to indicate the algorithm which is triggered for undertaking some postprocessing activities on the accrual amount.</li> <li>• <b>Accrual Pre Processing</b> - Used to indicate the algorithm which is triggered for undertaking some preprocessing activities on the accrual amount.</li> <li>• <b>Accrual Reversal</b> - Used to indicate the algorithm which is triggered for the accrual reversal process.</li> <li>• <b>Accrual Reversal Post Processing</b> - Used to indicate the algorithm which is triggered for undertaking some postprocessing activities on the accrual reversal process.</li> <li>• <b>Accrual Reversal Pre Processing</b> - Used to indicate the algorithm which is triggered for undertaking some preprocessing activities on the accrual reversal process.</li> </ul>
Sequence	Displays the order in which the algorithms with the same system event must be executed.
Algorithm	Displays the algorithm that is executed on the system event.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.

- **Objects to Exclude** – Lists the entities that are excluded from the accrual type for calculating the accrual. It contains the following columns:

Column Name	Column Description
Entity Type	Indicates the type of entity. The valid values are: <ul style="list-style-type: none"> <li>• Adjustment Type</li> <li>• Distribution Code</li> <li>• Price Item</li> </ul>
Sequence	Displays the order in which the entities are excluded from the accrual type.
Entity	Indicates the value for the selected entity type.

- **Divisions** – Lists the divisions which are associated with the accrual type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the accrual type is effective for the division.
Division	Indicates the division which you want to associate with the accrual type.

- **Characteristics** – Lists the characteristics of the accrual type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the accrual type.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the accrual type.
Delete	Used to delete the accrual type.
Duplicate	Used to create a new accrual type using an existing accrual type.

- **Record Information** – The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the accrual type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>

## Editing an Accrual Type

### Prerequisites

To edit an accrual type, you should have:

- Accrual type business object defined in the application.
- Accrual business object defined in the application.
- Adjustment types defined in the application (where the **Print by Default** and **Influence Next Bill Balance** check box is not selected).

### Procedure

To edit an accrual type:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the *accrual* type whose details you want to edit.  
The **Accrual Type** screen appears.
3. Click the **Edit** button in the **Accrual Type** zone.

The **Accrual Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual type.
- **Algorithms** – Used to associate algorithms with the accrual type.
- **Objects to Exclude** – Used to specify the entities that you want to exclude while accrual calculation.
- **Divisions** – Used to specify the divisions to which the accrual type can be associated.
- **Characteristics** – Used to define a list of characteristics for the accrual type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to specify the accrual type.	Not applicable
Description	Used to specify the description for the accrual type.	Yes
Accrual Object	Used to indicate the type of accrual object that you want to create while posting the accrual details. The valid values are: <ul style="list-style-type: none"> <li>• Adjustment</li> <li>• Custom</li> </ul>	Yes
	<b>Note:</b> At present, you can only create adjustments to record the accruals for the accounts in the application.	

Field Name	Field Description	Mandatory (Yes or No)
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created while posting the accrual details..	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.  On specifying the adjustment type, the description of the adjustment type appears corresponding to the <b>Adjustment Type</b> field.  The <b>Adjustment Type</b> field appears only when you select the <b>Adjustment</b> option from the <b>Accrual Object</b> field.	
Accrual Criteria	Used to indicate the bill criteria using which you want to calculate the accrual. The valid values are: <ul style="list-style-type: none"> <li>• <b>Actual</b> - Used to indicate whether you want to calculate accruals based on the actual bill data.</li> <li>• <b>Historical</b> - Used to indicate whether you want to calculate accruals based on the historical bill data.</li> </ul>	Yes
Accrual Source	Used to indicate the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>• Transaction Feed</li> <li>• Trial Bill</li> </ul>	<b>Note:</b> This field is required for calculating accruals using the actual data.
	<b>Note:</b> This field appears only when you select the <b>Actual</b> option from the <b>Accrual Criteria</b> field.	
Historical Bill Count	Used to specify the number of historical bills that you want to consider for calculating the accrual.	Yes (Conditional)
	<b>Note:</b> This field appears only when you select the <b>Historical</b> option from the <b>Accrual Criteria</b> field.	<b>Note:</b> This field is required for calculating accruals using the historical data.
Accrual Request Business Object	Used to indicate the business object using which you want to create the accrual request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> <p>On specifying the business object, the description of the business object appears corresponding to the <b>Accrual Request Business Object</b> field.</p>	
Approval Required	Used to indicate whether approval is required for the accruals which are created using the accrual type.	No
Approval Profile	Used to indicate the approval profile which you want to use for approving the accruals which are created using the accrual type.	Yes (Conditional)
	<b>Note:</b> This field is required for approving the accruals.	
	<b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required for the accruals which are created using the accrual type.	Yes (Conditional)
	<b>Note:</b> This field is required for specifying the hierarchy using which you want to approve the accruals.	
	<b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	
Submitter To Do Type	Used to indicate the To Do task assigned to the To Do type for the approver who can resubmitting the accrual for approval	Yes (Conditional)
	<b>Note:</b> This field is required for approving the accruals.	
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the submitter To Do type, the description of the submitter To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> <p>The <b>Submitter To Do Type</b> field appears only when the <b>Approval Required</b> check box is selected.</p>	
Submitter To Do Role	Used to indicate the To Do role of the approver who can resubmit the accrual for approval.	Yes (Conditional)
	<b>Note:</b> This field is required for approving the accruals.	
	<b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	
Type of Day	Used to indicate the type of day for which you want to calculate the accrual amount.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Business Day</li> <li>Calendar Day</li> </ul> <p><b>Note:</b></p> <p>If the <b>Business Day</b> option is selected, the system calculates the accrual amount using the following formula:</p> $\text{Accrual amount} = (\text{Sum of resulting bill amount} / \text{Total number of business days from previous bills}) * \text{Number of business days for the current billing cycle.}$ <p>If the <b>Calendar Day</b> option is selected, the system calculates the accrual amount using the following formula:</p> $\text{Accrual amount} = (\text{Sum of bill amount} / \text{Total number of calendar days of previous bills}) * \text{Number of calendar days for the current billing cycle.}$	
Posting Method	<p>Used to indicate the level at which you want to calculate the accruals. The valid values are:</p> <ul style="list-style-type: none"> <li><b>Bill Level</b> - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the bill level.</li> <li><b>Bill Distribution Code Level</b> - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level.</li> <li><b>Price Item Level</b> - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the price item level.</li> <li><b>Price Item Distribution Code Level</b> - Used to indicate that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.</li> </ul>	Yes
Proration Required	<p>Used to indicate whether you want to prorate the accrual amount for the trail bills and historical bill segments for the recurring and non-recurring charges using different posting methods. It is calculated using the below formula:</p> $\text{Expected accrual amount for each price item} = (\text{Sum of resulting bill segment amount} / \text{Total number of days}) * \text{Number of days in the accrual cycle}$	No

Field Name	Field Description	Mandatory (Yes or No)															
	<p><b>Note:</b> This field appears in the following scenarios:</p> <ul style="list-style-type: none"> <li>When the <b>Actual</b> and the <b>Trial Bill</b> options are selected from the <b>Accrual Criteria</b> and the <b>Accrual Source</b> fields respectively.</li> <li>When the <b>Historical</b> option is selected from the <b>Accrual Criteria</b> field.</li> </ul>																
Calculation Lines Required	<p>Used to indicate whether you want to view the bill segments and adjustments which are used for calculating the accrual amount.</p> <p><b>Note:</b></p> <p>You can view the accrual calculation lines in the <b>Accrual</b> screen only when the following conditions are satisfied:</p> <ul style="list-style-type: none"> <li>Accrual is created using the batch process and not manually from the user interface.</li> <li>Accrual is created using an accrual type with either of the following combinations:</li> </ul> <table border="1"> <thead> <tr> <th>Accrual Criteria</th><th>Accrual Source</th><th>Posting Method</th></tr> </thead> <tbody> <tr> <td>Historical</td><td>-</td><td>Bill Level</td></tr> <tr> <td>Historical</td><td>-</td><td>Bill Segment Level</td></tr> <tr> <td>Actual</td><td>Trial Bill</td><td>Bill Level</td></tr> <tr> <td>Actual</td><td>Trial Bill</td><td>Bill Segment Level</td></tr> </tbody> </table> <ul style="list-style-type: none"> <li>When the <b>Do you want to insert detail level calculation?</b> parameter in the <b>Accrual Calculation (C1_ACCR_CAL)</b> algorithm is set to <b>Y</b>.</li> </ul> <p>The <b>Calculation Lines Required</b> check box is by default selected and cannot be unchecked if you select the <b>Bill Distribution Code Level</b> or the <b>Price Item Distribution Code Level</b> option from the <b>Posting Method</b> field.</p>	Accrual Criteria	Accrual Source	Posting Method	Historical	-	Bill Level	Historical	-	Bill Segment Level	Actual	Trial Bill	Bill Level	Actual	Trial Bill	Bill Segment Level	No
Accrual Criteria	Accrual Source	Posting Method															
Historical	-	Bill Level															
Historical	-	Bill Segment Level															
Actual	Trial Bill	Bill Level															
Actual	Trial Bill	Bill Segment Level															
Price Item Accrual Criteria Required	Used to indicate whether accrual criteria is required for calculating accrual at the price item level.	No															
Cancel Reason	<p>Used to indicate the cancel reason that you want to use while reversing the accrual. The valid values are:</p> <ul style="list-style-type: none"> <li>Broken Payment Arrangement</li> </ul>	No															

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Credit Note</li> <li>Enter</li> </ul>	
	<b>Note:</b> The list includes only those values which are specified in the <b>ACCR_CAN_RSN_CD</b> lookup field.	
Contract Type	Used to indicate the contract type whose contract exists on the accounts.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears where you can select the required contract type.	
Applicable for Account	Used to indicate whether the <b>Accrual Type</b> is used to calculate accruals at the account level.	Yes (Conditional)
	<b>Note:</b> If you do not select the <b>Applicable for Account</b> check box, the system will consider the accrual type to calculate accruals at the division level.  This field is disabled when you are editing an account level accrual type (i.e. when the <b>Applicable for Account</b> field check box is selected).	<b>Note:</b> This field is required for indicating the accrual type can be associated to an account and not the division for calculating accruals.

4. Modify the required details in the **Main** section.
5. Associate or disassociate algorithms from the accrual type.
6. Add, edit, or remove the excluded entities from the accrual type.
7. Associate or disassociate divisions from the accrual type.
8. Define, edit, or remove characteristics from the accrual type.
9. Click **Save**.

The changes made to the accrual type are saved.

**Note:** You can edit an accrual type only when the accrual type is not yet used for creating an accrual.

## Deleting an Accrual Type

### Procedure

To delete an accrual type:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the *accrual* type that you want to delete.  
The **Accrual Type** screen appears.
3. Click the **Delete** button in the **Accrual Type** zone.  
A message appears confirming whether you want to delete the accrual type.
4. Click **OK**.  
An accrual type is deleted.

**Note:** You can delete an accrual type only when the accrual type is not yet used for creating an accrual.

## Accrual (Used for Searching)

The **Accrual** screen allows you to search for an accrual using various search criteria. It also allows you to define an accrual manually. It contains the following zone:

- [Search Accrual](#) on page 1785

## Search Accrual

The **Search Accrual** zone allows you to search for an accrual. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an accrual using the accrual details. The valid value is: <ul style="list-style-type: none"> <li>• <b>Accrual Details</b></li> </ul>	Not applicable
Account ID	Used to indicate whether you want to search for accruals belonging to a particular account.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears where you can specify the account whose accrual details you want to view.	
Division	<p>Used to indicate whether you want to search for accruals associated with a particular division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.</p>	No
Accrual Type	Used to search for accruals which are created using a particular accrual type.	No
Posting Method	<p>Used to indicate whether you want to search for accruals which are calculated at a particular level. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Bill Level</b> - Used to indicate whether you want to search for accruals whose bill segments and adjustments of bills are calculated at the bill level.</li> <li>• <b>Bill Distribution Code Level</b> - Used to indicate whether you want to search for accruals whose bill segments and adjustments of bills are calculated at the distribution code level.</li> <li>• <b>Price Item Level</b> - Used to indicate whether you want to search for accruals whose bill segments and adjustments of bills are calculated at the at the price item level.</li> <li>• <b>Price Item Distribution Code Level</b> - Used to indicate whether you want to search for accruals whose bill segments of a particular price item are calculated at the distribution code level.</li> </ul>	No
Accrual Cycle	Used to search for accruals which are created using a particular accrual cycle.	No
Creation Date From	Used to indicate whether you want to search for accruals which are created from a particular date onwards.	No
Accrual Creation Mode	<p>Used to indicate whether you want to search for accruals which are created using a particular mode. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Batch</b> - Used to indicate whether you want to search for accruals which are created in the system using the batch mode.</li> <li>• <b>Manual</b> - Used to indicate whether you want to search for accruals which are created manually in the system.</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Creation Date To	Used to search accruals which are created till a particular date.	No
Status	Used to search for accruals with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• <b>Ready For Accrual</b></li> <li>• <b>Accrued</b></li> <li>• <b>Reversed</b></li> <li>• <b>Approval In Progress</b></li> <li>• <b>Cancelled</b></li> <li>• <b>Draft</b></li> <li>• <b>Ignore</b></li> <li>• <b>Processed</b></li> <li>• <b>Rejected</b></li> </ul>	No

**Note:** You must specify at least one search criterion while searching for an accrual.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Information	Displays the concatenated string of information about the accrual separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Accrual</b> screen appears where you can view the details of the respective accrual.
Division	Indicates the division to which the accrual account belongs.
Accrual Type	Indicates the accrual type using which the accrual is created for the account in the system.
Posting Method	Indicates the level at which the accrual is calculated for the account.
Accrual Creation Mode	Indicates the creation mode using which the accrual is created for the account in the system.
Status	Displays the current status of the accrual.
Create Date/Time	Displays the date and time when the accrual is created in the system.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for an Accrual

### Procedure

To search for an accrual :

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Accrual**.  
A sub-menu appears.
3. Click the **Search** option from the **Accrual** sub-menu.  
The **Accrual** screen appears.
4. Enter the search criteria in the **Search Accrual** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of accruals that meet the search criteria appears in the **Search Results** section.

## Viewing the Accrual Details

### Procedure

To view the details of an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose details you want to view.  
The **Accrual** screen appears. It contains the following tabs:
  - [Accrual - Main](#) on page 1794
  - [Accrual - Log](#) on page 1798
3. Ensure that the **Main** tab is selected.
4. View the details of the accrual in the **Accrual** zone.

## Defining an Accrual

### Prerequisites

To define an accrual, you should have:

- Account (for which you want to define the accrual) defined in the application.
- Accrual-specific active contract associated with the account.
- Batch **C1\_ACCRE** defined in the application, if an accrual creation takes place through a batch.
- Algorithm **C1\_ACCR\_CRE** defined for accrual creation in the application.
- Algorithm **C1\_ACCR\_CAL** defined for accrual calculation in the application.
- Algorithm **C1\_ACCR\_REV** defined for accrual reversal in the application.
- Accrual type associated with the division to which the account belongs or accrual type associated with the account for accrual calculation.
- Characteristic types defined in the application (where the characteristic entity is set to **Accrual**).

### Procedure

To define an accrual:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Accrual**.  
A sub-menu appears.
3. Click the **Add** option from the **Accrual** sub menu.

The **Accrual** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual.
- **Characteristics** – Used to specify the detail-specific characteristics for an accrual.
- **Accrual Details** – Used to specify the accrual details for an accrual.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the account for which you want to define an accrual.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears. On specifying the account, the description of the account appears corresponding to the <b>Account ID</b> field.	
Contract	Indicates the accrual-specific active contract that is associated with the account.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field is populated automatically when you specify the account in the <b>Account ID</b> field. It is a read-only field and cannot be edited.	
Reversal Start Date	Used to specify the date from when the accrual reversal process starts. <b>Note:</b> The <b>Reversal Start Date</b> must be later than the <b>Accrual Date</b> . The <b>Reversal Start Date</b> cannot be later than the <b>Reversal End Date</b> .	Yes
Reversal End Date	Used to specify the date till when the accrual reversal process ends. <b>Note:</b> The <b>Reversal End Date</b> cannot be earlier than the <b>Reversal Start Date</b> .	Yes
Posting Method	Indicates the level at which the accrual is calculated for the account. The valid values are: <ul style="list-style-type: none"> <li>• <b>Bill Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the bill level.</li> <li>• <b>Bill Distribution Code Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level.</li> <li>• <b>Price Item Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the price item level.</li> <li>• <b>Price Item Distribution Code Level</b> - Indicates that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.</li> </ul> <b>Note:</b> This field is populated automatically when you specify the account in the <b>Account ID</b> field. It is a read-only field and cannot be edited.	Not applicable
Accrual Type	Indicates the accrual type associated with the account.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field is populated automatically when you specify the account in the <b>Account ID</b> field. It is a read-only field and cannot be edited.	
Accrual Creation Mode	Indicates the method using which the accrual is created for the account in the system. The valid values are: <ul style="list-style-type: none"> <li>• <b>Batch</b> - Indicates whether the accrual is created using the batch mode.</li> <li>• <b>Manual</b> - Indicates whether the accrual is created manually in the system.</li> </ul> <b>Note:</b> This field is populated automatically when you specify the account in the <b>Account ID</b> field. It is a read-only field and cannot be edited.	Not applicable
Currency	Indicates the currency using which the accrual is calculated for the account in the system. <b>Note:</b> This field is populated automatically when you specify the account in the <b>Account ID</b> field. It is a read-only field and cannot be edited.	Not applicable
Comments	Used to specify additional information about the accrual.	No

**Tip:** Alternatively, you can access the **Accrual** screen by clicking the **Add** button in the **Page Title** area of the **Accrual** screen.

4. Define detail-specific characteristics for the accrual, if required.
5. Add details about the accrual, if required.
6. Click **Save**.
7. The accrual is defined.

#### **Related Topics**

## Defining a Characteristic for an Accrual

### Prerequisites

To define a characteristic for an accrual, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Accrual**).

### Procedure

To define a characteristic for an accrual:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an accrual.

The **Characteristics** section contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Accrual Detail Sequence	Used to specify the sequence in which the accrual processing must be executed.	Not applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Effective Date	Used to specify the date from when the characteristic is effective for an accrual.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for an accrual.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Accrual</b> .	<b>Note:</b> This field is required when you are defining a characteristic for an accrual.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b>	<b>Note:</b> This field is required when you are defining a characteristic for an accrual.
	<p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for an accrual., click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from an accrual, click the **Delete** (🗑) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for an accrual..

### Related Topics

How to define an accrual	<a href="#">Defining an Accrual</a> on page 1789
How to edit an accrual	<a href="#">Editing an Accrual</a> on page 1802

## Adding the Details for an Accrual

### Procedure

To add the details for an accrual:

1. Ensure that **Accrual Details** section is expanded when you are defining or editing an accrual.

The **Accrual Details** section contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item for an accrual.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	<b>Note:</b> This field is required when the price item information is not defined for the accrual contract.
Amount	Used to specify the accrual amount.	Yes
Override Reason	Used to specify the override reason for the accrual.	No

2. Enter the required details in the **Accrual Details** section.

3. Click **Save**.

The accrual details are defined for an accrual.

### Related Topics

How to define an accrual	<a href="#">Defining an Accrual</a> on page 1789
How to edit an accrual	<a href="#">Editing an Accrual</a> on page 1802

## Accrual (Used for Viewing)

The **Accrual** screen allows you to do the following:

- View the details of an accrual
- Define an accrual manually
- Edit an accrual
- Submit an accrual for approval
- Approve, Reject, and Re-Submit an accrual
- Delete an accrual
- View the accrual calculation lines

The **Accrual** screen contains the following tabs:

- [Accrual - Main](#) on page 1794
- [Accrual Log](#) on page 1798

## Accrual - Main

The **Main** tab displays information about the accrual. It contains the following zones:

- [Accrual](#) on page 1794
- [Accrual Details](#) on page 1796
- [Accrual Calculation Lines](#) on page 1797

## Accrual

The **Accrual** zone displays the details of an accrual. It contains the following sections:

- **Main** – Displays basic information about the accrual. It contains the following fields:

Field Name	Field Description
Accrual Information	Displays the concatenated string of information about the accrual separated by a comma (,).
Account Information	Displays the concatenated string of information about the account for which the accrual is created separated by a comma (,). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Contract Information	Displays the accrual-specific active contract that is associated with the account. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Division	Indicates the division which is associated with the accrual.
Status	Indicates the current status of the accrual. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> <li>• Ready For Accrual</li> <li>• Accrued</li> <li>• Accrual Reversed</li> <li>• Rejected</li> <li>• Processed</li> <li>• Ignore</li> <li>• Cancelled</li> </ul>
Accrual Cycle	Indicates the accrual cycle associated with the deal type which is used for creating the accrual.
Accrual Date	Displays the date on which the accrual is processed for the account.

Field Name	Field Description
Reversal Start Date	Displays the date from when the accrual reversal process starts for the account.
Reversal End Date	Displays the date till when the accrual reversal process ends for the account.
Accrual Type	Indicates the accrual type using which the accrual is calculated for the account.
Accrual Creation Mode	Displays the creation mode using which the accrual is calculated. <ul style="list-style-type: none"> <li>• <b>Batch</b> - Indicates whether the accrual is created using the batch mode.</li> <li>• <b>Manual</b> - Indicates whether the accrual is created manually in the system.</li> </ul>
Posting Method	Displays the level at which the accrual is calculated for the account. The valid values are: <ul style="list-style-type: none"> <li>• <b>Bill Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the bill level.</li> <li>• <b>Bill Distribution Code Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level.</li> <li>• <b>Price Item Level</b> - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the price item level.</li> <li>• <b>Price Item Distribution Code Level</b> - Indicates that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.</li> </ul>
Accrual Amount	Displays the accrual amount.

- **Characteristics** – Lists the detail-specific characteristics defined for the accrual. It contains the following fields:

Field Name	Field Description
Accrual Detail Sequence	Displays the sequence of the accrual detail.
Effective Date	Displays the date from when the characteristic is effective for the accrual detail.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of an accrual.
	<b>Note:</b> The <b>Edit</b> button appears only when the accrual is in the <b>Draft</b> or <b>Ready for Accrual</b> status.
Delete	Used to delete an accrual.
	<b>Note:</b> The <b>Delete</b> button appears only when the accrual is in the <b>Draft</b> or <b>Ready for Accrual</b> status.
Return to Draft	Used to send the accrual in the <b>Draft</b> status for editing.

Button Name	Button Description
	<b>Note:</b> The <b>Return to Draft</b> button appears only when the accrual is in the <b>Ready for Accrual</b> status.
Submit	Used to submit an accrual for approval. <b>Note:</b> The <b>Submit</b> button appears only when the accrual is in the <b>Draft</b> status.
Approve	Used to approve the accrual. <b>Note:</b> The <b>Approve</b> button appears only when the accrual is in the <b>Approval in Progress</b> status.
Reject	Used to reject the accrual. <b>Note:</b> The <b>Reject</b> button appears only when the accrual is in the <b>Approval in Progress</b> status.
Re Submit	Used to resubmit the accrual for specific changes. <b>Note:</b> The <b>Re Submit</b> button appears only when the accrual is in the <b>Approval in Progress</b> status.

- **Record Information** – The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the accrual is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the accrual status is updated in the system.
Create Date/Time	Displays the date and time when the accrual is created in the system.

How to view the details of an accrual	<a href="#">Viewing the Accrual Details</a> on page 1788

## Accrual Details

The **Accrual Details** zone displays the details of an accrual. It contains the following columns:

Column Name	Column Description
Sequence Number	Displays the sequence in which the accrual detail is considered for accrual calculation.
Price Item	Displays the price item that is defined for the accrual calculation.

Column Name	Column Description
	<b>Note:</b> It contains a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective accrual adjustment.
Amount	Displays the accrual amount.
Override Reason	Displays the reason why the price item or the accrual amount is overridden in case if the accrual is edited.
Adjustment Information	Displays information about the adjustment that is created using the accrual creation batch.
	<b>Note:</b> It contains a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.

On clicking the **Broadcast** (📡) icon corresponding to an accrual detail, the **Accrual Calculation Lines** zone appears where you can view a list of calculation lines for the respective accrual detail.

**Note:**

The **Accrual Calculation Lines** zone appears only when the following conditions are satisfied:

- The **Calculation Lines Required** check box is selected for the accrual type which is associated with the accrual.
- Accrual is created using the batch process and not manually from the user interface.
- Accrual is created using an accrual type with either of the following combinations:

Accrual Criteria	Accrual Source	Posting Method
Historical	-	Bill Level
Historical	-	Price Item Level
Actual	Trial Bill	Bill Level
Actual	Trial Bill	Price Item Level

- When the **Do you want to insert detail level calculation?** parameter in the **Accrual Calculation (C1\_ACCR\_CAL)** algorithm is set to Y.

## Accrual Calculation Lines

The **Accrual Calculation** zone displays the calculation lines generated after the accrual creation batch is executed for a particular accrual detail. It contains the following columns:

Column Name	Column Description
Entity Information	Displays the concatenated string of information about the entity separated by a comma (,) for which the calculation line is created.
Entity Type	Indicates the type of the entity.
Inclusion Amount	Displays the amount calculated for the specific entity for accrual.

Column Name	Column Description
Bill Cycle Days	Displays the number of days after which the accrual calculation is done for the entity.
Historical Calculation Days	Displays the historical days for which the accrual calculation is done for the entity.
Bill Information	Displays the concatenated string of information about the bill separated by a comma (.). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.
Recurring Charge Calculation Days	Displays the number of days after which the recurring charge is calculated for the entity.
Recurring Charge Total Days	Displays the total number of days for which the recurring charge is calculated for the entity.

By default, the **Accrual Calculation Lines** zone does not appear in the **Accrual** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the accrual detail in the **Accrual Details** zone.

## Accrual - Log

The **Log** tab lists the complete trail of actions performed on the accrual. It consists of the following zone:

- [Accrual Log](#) on page 1798

### Accrual Log

The **Accrual Log** zone lists the complete trail of actions performed on the accrual. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the accrual.
Details	Displays the details about the action performed on the accrual.
User	Indicates the user who has performed the action on the accrual.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the accrual.

**Note:**

You can manually add a log entry for the accrual by clicking the **Add Log Entry** link in the upper right corner of the **Accrual Log** zone.

## Viewing the Log of an Accrual

---

**Procedure**

To view the log of an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose log you want to view.

The **Accrual** screen appears.

3. Click the **Log** tab.  
The **Log** tab appears.
4. View the complete trail of actions performed on the accrual in the **Accrual Log** zone.

**Related Topics**

## Adding a Log Entry for an Accrual

---

**Procedure**

To add a log entry for an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual for which you want to add a log entry.

The **Accrual** screen appears.

3. Click the **Log** tab.  
The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Accrual Log** zone.

The **Add Accrual Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Information	Displays the concatenated string of information about the accrual separated by a comma (,).	Not applicable
Log Details	Used to specify the reason for creating a new log entry for the accrual.	Yes

5. Enter the required details in the **Log Details** field.

6. Click **Save**.

The log entry is added for the accrual.

## Approving an Accrual

### **Procedure**

To approve an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the *accrual* that you want to approve.  
The **Accrual** screen appears. It consists of the following tabs:
3. Ensure that the **Main** tab is selected.
4. Click the **Approve** button in the **Accrual** zone.  
The status of the accrual is changed to **Processed**.

**Note:** The **Approve** button appears only when the accrual is in the **Approval in Progress** status.

## Rejecting an Accrual

### **Procedure**

To reject an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the *accrual* that you want to reject.  
The **Accrual** screen appears. It consists of the following tabs:
3. Ensure that the **Main** tab is selected.
4. Click the **Reject** button in the **Accrual** zone.  
The **Accrual** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the payment request.	Yes
Comments	Used to specify additional information for rejecting the accrual.	No

**Note:** The **Reject** button appears only when the accrual is in the **Approval in Progress** status.

5. Enter the required details in the **Accrual** window.
6. Click **Save**.  
The status of the accrual is changed to **Rejected**.

## Resubmitting an Accrual

### **Procedure**

To resubmit an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the *accrual* that you want to resubmit.  
The **Accrual** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Re Submit** button in the **Accrual** zone.  
The **Resubmit Accrual** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify details about resubmitting the accrual.	Yes

**Note:** The **Re Submit** button appears only when the accrual is in the **Approval in Progress** status.

5. Click **Save**.  
The status of the accrual is changed to **Draft**.

**Related Topics**

<b>Accrual</b> zone	<a href="#">Accrual</a> on page 1794

**Editing an Accrual****Prerequisites**

To edit an accrual, you should have:

- Account (for which you want to define the accrual) defined in the application.
- Accrual-specific active contract associated with the account.
- Batch **C1\_ACCRE** defined in the application, if an accrual creation takes place through a batch.
- Algorithm **C1\_ACCR\_CAL** defined for accrual calculation in the application.
- Algorithm **C1\_ACCR\_REV** defined for accrual reversal in the application.
- Accrual type associated with the division to which the account belongs or accrual type associated with the account for accrual calculation.
- Characteristic types defined in the application (where the characteristic entity is set to **Accrual**).

**Procedure**

To edit an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose details you want to edit.  
The **Accrual** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Accrual** zone  
The **Accrual** screen appears. It contains the following sections:
  - **Main** – Used to specify basic details about the accrual. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search a particular account.	Yes
	<b>Note:</b> It is a read-only field and cannot be edited.	
Contract	Used to specify the accrual contract of the account.	Not applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Accrual Cycle	Used to specify the accrual cycle for the account.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> It is a read-only field and cannot be edited.	
Posting Method	Used to specify the posting method used for an accrual. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Accrual Type	Used to specify the type of an accrual. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Accrual Creation Mode	Used to specify the creation method of an accrual. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Currency	Used to specify the currency used for calculating the accrual. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Comments	Used to specify the comments for an accrual.	No

5. Add, edit, or remove the detail-specific characteristics from the accrual, if required.

6. Add, edit, or remove the details of the accrual.

7. Click **Save**.

The changes made to the accrual are saved.

**Note:**

You can edit an accrual only when it is in the **Ready for Accrual** status.

While editing an accrual which is created through a batch process, the system allows you to edit only the accrual amount of the bill or the price item in the **Accrual Details** zone. Whereas, if you are editing an accrual which is created manually, the system allows you to edit the price item code as well as the accrual amount of the price item or the bill in the **Accrual Details** zone. The override reason is mandatory when you are editing a manually created accrual in the system.

## Deleting an Accrual

---

### **Procedure**

To delete an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual that you want to delete.  
The **Accrual** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Accrual** zone.  
A message appears confirming whether you want to delete the accrual.
5. Click **OK**.  
The accrual is deleted.

**Note:** You can delete an accrual only when it is created manually in the system and is in the **Draft** or **Ready for Accrual** status.

## Payment Agreement Request

---

### Topics:

- [Payment Agreement Request \(Without Approval\) Status Transition](#)
- [Payment Agreement Request \(With Approval\) Status Transition](#)
- [Prerequisites](#)
- [Algorithms Used in C1-PaymentAgreementRequest](#)
- [Payment Agreement Request Type](#)
- [Payment Agreement Request \(Used for Searching\)](#)
- [Payment Agreement Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing provides the ability to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. Let us understand this with the help of an example. The following bills of the account A1 are unpaid:

- B1 (Bill Amount – 100\$, Unpaid Amount - 75\$)
- B2 (Bill Amount – 250\$, Unpaid Amount – 125\$)
- B3 (Bill Amount – 150\$, Unpaid Amount – 150\$)

Through a payment agreement request, you can schedule payments for these three bills in various installments. For example, you can schedule the following payments for the account A1:

Schedule Date	Schedule Amount
01-Jan-2017	100
15-Jan-2017	100
01-Feb-2017	100
15-Feb-2017	50

While creating a payment agreement request, you need to specify the payment agreement request type using which you want to create the payment agreement request. It is the payment agreement request type which helps the system to determine:

- The business object using which the payment agreement request should be created
- Whether the approval is required for the payment agreement request

You can only add completed bills of the account which are unpaid in a payment agreement request. Once a payment agreement request is created for an account, the status of the payment agreement request is set to **Draft**. You can then edit or delete the payment agreement request, if required. Once you add the unpaid bills of the account, you can submit the payment agreement request. On submitting a payment agreement request, the status of the payment agreement request is set to **Active**.

You can optionally configure the system to use the approval workflow process for a payment agreement request. If the **Approval Required** flag is set to **Yes** in a payment agreement request type, then on submitting the respective payment agreement request, the approval workflow process creates a To Do for the approver to review the payment agreement request. Once the approver approves the payment agreement request, the status of the payment agreement request is set to **Active**. The approver can approve, reject, or resubmit the payment

agreement request. When the payment agreement request is resubmitted to the submitter, the status of the payment agreement request is set to **Draft**.

Even if the approval workflow is configured for a payment agreement request type, you can skip the approval workflow for a payment agreement request. The system enables you to skip the approval workflow for a payment agreement request until you exceed the maximum limit defined in the **C1-PASUBMIT** algorithm. You can define the following parameters in the **C1-PA-SUBMIT** algorithm:

- Number of days to consider in past to check whether any payment agreement request with a particular status exist in the specified duration (for example, 365)
- Maximum number of payment agreement requests which can be activated without approval (for example, 1)
- Status in which payment agreement request should exist in the specified duration (for example, Broken Promise)

In the above example, on clicking the **Submit** button, the system will check how many payment agreement requests for the account in the last 365 days exist in the **Broken Promise** status. If the system finds one or more than one payment agreement requests in the **Broken Promise** status in the last 365 days, the approval workflow process creates a To Do for the approver to review the payment agreement request. However, if the system does not find any payment agreement request in the **Broken Promise** status in the last 365 days, the payment agreement request is not sent for approval and the status of the payment agreement request is directly changed to **Active**.

When the **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch is invoked, the system checks whether there are any payment agreement requests in the **Active** status. If there is a payment agreement request in the **Active** status, the system checks whether the total unpaid amount of the bills is equal to zero and whether each bill is fully matched. If so, the status of the payment agreement request is changed to **Kept Promise**. However, if the total unpaid amount of the bills is not equal to zero, the system checks whether the current date is later than the schedule date and does not fall within the grace period. If so, the system checks whether total unpaid amount is greater than the total future schedule amount. If so, the status of the payment agreement request is changed to **Broken Promise**. However, if the current date is earlier than the schedule date or falls within the grace period, or the total unpaid amount is less than the total future schedule amount, the status of payment agreement request remains in **Active**. The system enables you to edit a payment agreement request which is in the **Active** status.

While defining a payment agreement request, you need to specify the payment method through which the payment will be done and whether the payment will be done through the payor or third party payor account. If the **Auto Pay** flag is set to **Yes** for a payment method, you need to also specify the automatic payment option using which the automatic payment should be created on the schedule date. One more batch named **Generate Auto Pay for Payment Agreement (C1-APPAB)** is introduced in this release. When the **Generate Auto Pay for Payment Agreement (C1-APPAB)** batch is invoked, the system checks whether there are any payment agreement requests in the **Active** status. If so, whether the account for which the payment agreement request is created is eligible for automatic payment and the defer auto pay date (if any) defined for the account is earlier than the batch business date. If so, the system checks whether the extract date of the unpaid bill (with the earliest due date) is earlier than the schedule date.

If so, the system creates the automatic payment for the unpaid bill on the schedule date. However, if the account is not eligible for automatic payment, or the defer auto pay date is equal to or later than batch business date, or the extract date is equal to or later than the schedule date, the automatic payment is not generated for the account.

During the payment agreement request process, a payment agreement request creation goes through various statuses in its lifecycle. For more information about the payment agreement request statuses, see [Payment Agreement Request \(Without Approval\) Status Transition](#) on page 1808 and [Payment Agreement Request \(With Approval\) Status Transition](#) on page 1808. If the payment agreement request type is without approval then payment agreement status will automatically move from draft to active. The approval configuration algorithm **C1-PA-APPEXT** decides whether the request will be sent for approval or not. If the payment agreement request type is with approval then payment agreement will be sent for approval depending on:

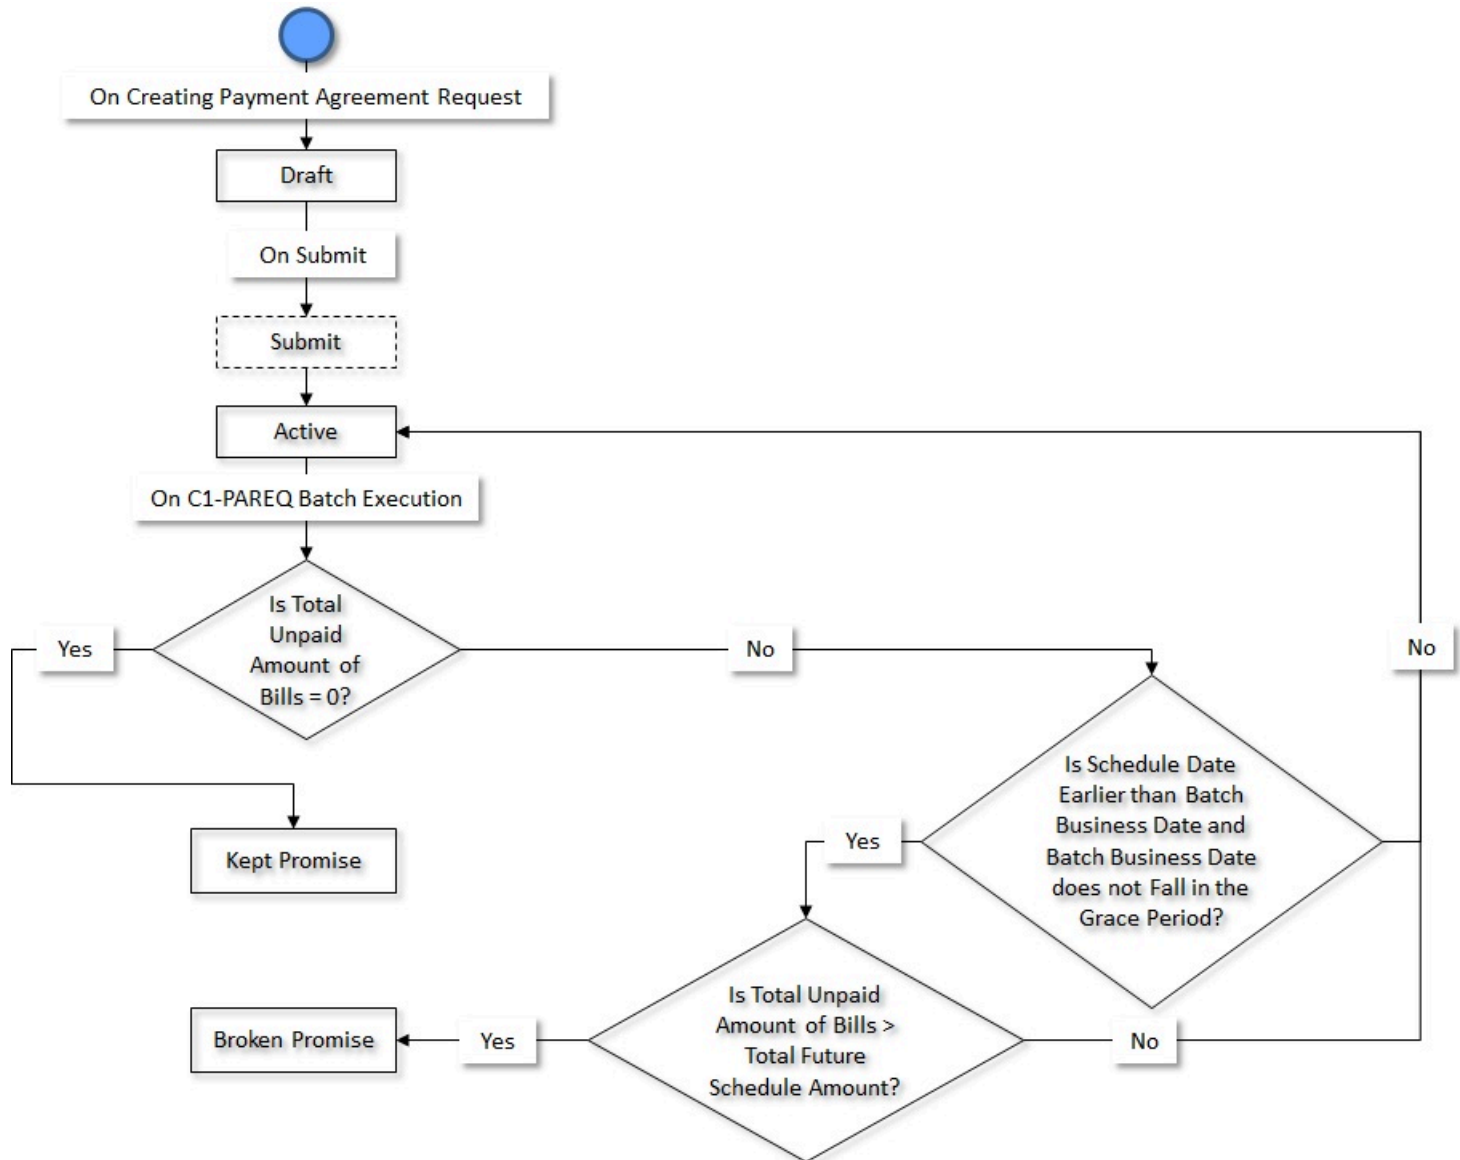

- The number of days checked for approval workflow
- Payment agreement statuses (active, broken, kept) to be considered
- The maximum number of payment agreements allowed

**Note:** The lifecycle of a payment agreement request creation is driven by the respective business object using which the request is created. The payment agreement request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the payment agreement request process, see [Prerequisites](#) on page 1809.

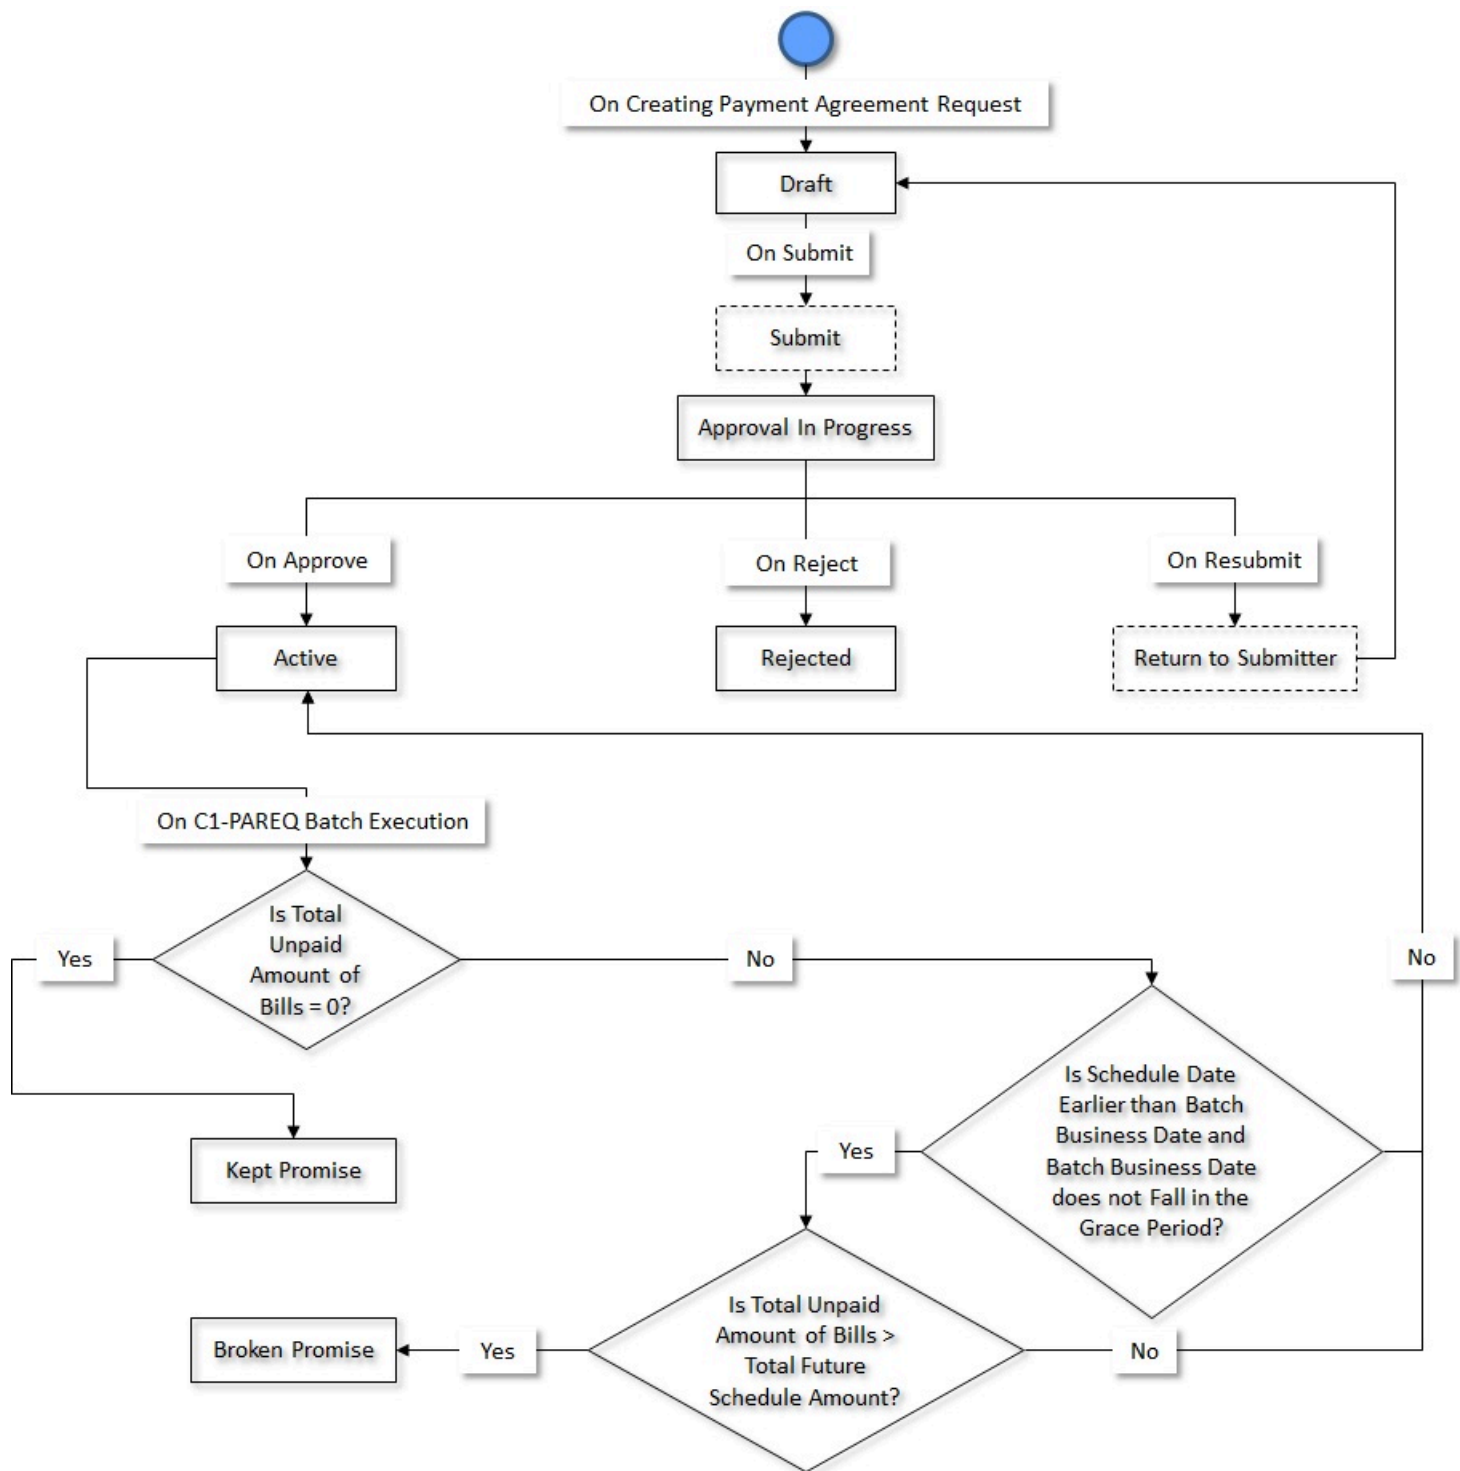

## Payment Agreement Request (Without Approval) Status Transition

The following figure graphically indicates how a payment agreement request moves from one status to another when approval workflow is off:

## Payment Agreement Request (With Approval) Status Transition

The following figure graphically indicates how a payment agreement request moves from one status to another when approval workflow is on:

## Prerequisites

To setup the payment agreement request process, you need to do the following:

- Define the required payment agreement request types in the system
- Define the required characteristic types where the characteristic entity is set to **Payment Agreement Request**
- Define the required characteristic types where the characteristic entity is set to **Payment Agreement Request Type**

- Define the required pay methods for **Payment Agreement Request**
- Define the required third party payors for **Payment Agreement Request**
- Create an algorithm using the **C1-PA-INFO** algorithm type if you want to create Payment Agreement Requests using the payment agreement request information.
- Define the kept promise status reason for the **C1-PaymentAgreementRequest** business object
- Define the broken promise status reason for the **C1-PaymentAgreementRequest** business object
- Defined rejected status reason for the **C1-PaymentAgreementRequest** business object
- Assign the **C1-PAREQ** To Do type to a To Do role whose users must receive To Do generated while submitting or resubmitting a payment agreement request for approval
- The **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch process to monitor the payment agreement request and move the request to next stage

## Algorithms Used in C1-PaymentAgreementRequest

The following table lists the algorithms which are attached to the **C1-PaymentAgreementRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-PA-INFO	C1-PA-INFO	Refer to <a href="#">C1-PA-INFO</a> on page 1810
Pre-Processing	C1-PA-PRE	C1-PA-PRE	Refer to <a href="#">C1-PA-PRE</a> on page 1811
Validation	C1-PA-VAL	C1-PA-VAL	Refer to <a href="#">C1-PA-PRE</a> on page 1811

The following table lists the algorithms which are used in the lifecycle of the **C1-PaymentAgreementRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Submit	Enter	C1-PA-SUBMIT	C1-PA-SUBMIT	Refer to <a href="#">C1-PA-SUBMIT</a> on page 1811
Approval Progress	In Enter	C1-PA-APPENT	C1-PA-APPENT	Refer to <a href="#">C1-PA-APPENT</a> on page 1811
Approval Progress	In Exit	C1-PA-APPEXT	C1-PA-APPEXT	Refer to <a href="#">C1-PA-APPEXT</a> on page 1811
Return to Submitter	Enter	C1-PA-RESUB	C1-PA-RESUB	Refer to <a href="#">C1-PA-RESUB</a> on page 1811
Active	Monitor	C1-PA-MONTR	C1-PA-MONTR	Refer to <a href="#">C1-MONTR</a> on page 1811
Active	Enter	C1-PA-ACTENT	C1-PA-ACTENT	Refer to <a href="#">C1-ACTENT</a> on page 1811

### C1-PA-INFO

This algorithm generates the payment agreement request information string which appears throughout the application. This algorithm concatenates the following fields:

- Payment Agreement Request Type Description
- Payment Agreement Request Status Description
- Payment Agreement Request ID

## C1-PA-PRE

---

This Algorithm is used to avoid the concurrency issue for payment agreement.

## C1-PA-SUBMIT

---

This Algorithm is used to validate payment agreement request.

## C1-PA-APPENT

---

This algorithm creates **To Do** based on the **Approval To Do Type** configured in Payment Agreement Request Type.

## C1-PA-APPEXT

---

This algorithm checks whether an approver is associated with the approval **To Do Role** specified in the **Payment Agreement Request Type**. It does not allow the submitter to approve or reject the payment agreement request.

## C1-PA-RESUB

---

This algorithm is invoked on **Re-Submit** button. It moves the status of Payment Agreement Request into **Draft**. A 'To Do' will be generated for the user as submitter whose **To Do Type** and **To Do Role** are fetched from Payment Agreement Request Type.

## C1-MONTR

---

This algorithm is invoked from the **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch. It changes the status of the payment request from **Active** to **KP** (Kept Promise) or **BP** (Broken Promise) based on payment received.

## C1-ACTENT

---

This algorithm will validate Payment Agreement Request before activation.

# Payment Agreement Request Type

---

Oracle Revenue Management and Billing allows you to define, edit, copy and delete a payment agreement request type using which you can pay current unpaid debt bills in multiple installments whose payment amount is greater than zero. A payment agreement provide flexibility in payment of installment amount and schedule of payment.

The **C1-PaymentAgreementRequest** business object is created for payment agreement maintenance.

The **Payment Agreement Request Type** screen consists of the following zones:

- [Payment Agreement Request Type List](#) on page 1812
- [Payment Agreement Request Type](#) on page 1812

## Payment Agreement Request Type List

The **Payment Agreement Request Type List** zone lists payment agreement request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Payment Agreement Request Type	Displays the payment agreement request type.
Description	Displays the description of the payment agreement request type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Payment Agreement Request Type</b> screen appears where you can edit the details of the payment agreement request type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Payment Agreement Request Type</b> screen appears where you can define a payment agreement request type using an existing payment agreement request type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the payment agreement request type.
	<b>Note:</b> You can delete a payment agreement request type when you have not created a payment agreement request using the payment agreement request type.

On clicking the **Broadcast** (📡) icon corresponding to a payment agreement request type, the **Payment Agreement Request Type** zone appears with the details of the respective payment agreement request type.

## Defining a Payment Agreement Request Type

### Prerequisites

To define a payment agreement request type, you should have:

- Payment agreement request business objects defined in the application
- The Payment Agreement Request Information algorithm is defined using the **C1-PA-INFO** algorithm type
- **C1-PAREQ** To Do Type assigned to a To Do role whose users must receive To Do generated while submitting a payment agreement request for approval.

### Procedure

To define a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Payment Agreement Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type Business Object	Used to indicate the business object that you want to use to create the payment agreement request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Payment Agreement Request Type** screen.

**Note:** The **Select Business Object** screen appears when there are multiple payment agreement request type business objects defined in the application. If there is only one payment agreement request type business object defined in the application, the **Payment Agreement Request Type** screen appears.

4. Select the required payment agreement request type business object from the respective field.
5. Click **OK**.

The **Payment Agreement Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the payment agreement request type.
- **Characteristics** – Used to define the characteristics for the payment agreement request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to specify the payment agreement request type.	Yes
Business Object	Indicates the payment agreement request type business object used while defining the payment agreement request type.	Not applicable
Description	Used to specify the description for the payment agreement request type.	Yes
Payment Agreement Request Business Object	Used to indicate the business object that you want to use while creating the payment agreement request.	Yes
Detailed Description	Used to specify additional information about the payment agreement request type.	No
Status	Used to indicate the status of the payment agreement request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Status Change Notification Type	Used to indicate the notification type on the status change of payment agreement request type. The valid values are: <ul style="list-style-type: none"> <li>• Alert</li> <li>• To Do</li> <li>• Both</li> </ul>	No
Approval Required	Used to indicate whether approval is required for creating payment agreement request using the payment agreement request type.	No
Approval To Do Type	Used to indicate that To Do of the specified To Do type must be created when you submit the payment agreement request for approval.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the payment agreement request submitted for approval.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
		The list will include only those To Do roles which are associated with the To Do type specified in the <b>Approval To Do Type</b> field.
Submitter To Do Type	Used to indicate the To Do type for the submitter when the payment agreement request is resubmitted by the approver.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Submitter To Do Role	Used to indicate the To Do role for the submitter when the payment agreement request is resubmitted by the approver.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
		The list will include only those To Do roles which are associated with the To Do type specified in the <b>Submitter To Do Type</b> field.

6. Enter the required details.
7. Define characteristics for the payment agreement request type, if required.
8. Click **Save**.  
The payment agreement request type is defined.

How to define a characteristic for a payment agreement request type	<a href="#">Defining a Characteristic for a Payment Agreement Request Type</a> on page 1817

## Defining a Characteristic for a Payment Agreement Request Type

### Prerequisites

To define a characteristic for a payment agreement request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Payment Agreement Request Type)

## Procedure

To define a characteristic for a payment agreement request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a payment agreement request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Payment Agreement Request Type.	<b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request type.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the payment agreement request type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the payment agreement request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Copying a Payment Agreement Request Type

Instead of creating a payment agreement request type from scratch, you can create a new payment agreement request type using an existing payment agreement request type. This is possible through copying a payment agreement request type. On copying a payment agreement request type, the details including the characteristics are copied to the new payment agreement request type. You can then edit the details, if required.

### Prerequisites

To copy a payment agreement request type, you should have:

- Payment agreement request type (whose copy you want to create) defined in the application
- Payment agreement request business objects defined in the application
- The Payment Agreement Request Information algorithm is defined using the **C1-PA-INFO** algorithm type
- **C1-PAREQ** To Do Type assigned to a To Do role whose users must receive To Do generated while submitting a payment agreement request for approval

### Procedure

To copy a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request Type** sub-menu.  
The **Payment Agreement Request Type** screen appears.
4. In the **Payment Agreement Request Type List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the payment agreement request type whose copy you want to create.

The **Payment Agreement Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the payment agreement request type.
- **Characteristics** – Used to define the characteristics for the payment agreement request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to specify the payment agreement request type.	Yes
Business Object	Indicates the payment agreement request type business object used while defining the payment agreement request type (whose copy you want to create).	Not applicable
Description	Used to specify the description for the payment agreement request type.	Yes
Payment Agreement Request Business Object	Used to specify the business object that you want to use while creating the payment agreement request.	Yes
Detailed Description	Used to specify additional information about the payment agreement request type.	No
Status	Used to indicate the status of the payment agreement request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Inactive</li> </ul>

## Bill Details

The **Bill Details** zone lists unpaid debt bill details. You will not find any records in this zone if the payment agreement request list does not have any unpaid bills assigned to it. This zone contains the following columns:

Column Name	Column Description
Bill Information	Indicates the bill against which the payment agreement request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.

Column Name	Column Description
Original Bill Amount	Displays the bill amount when the bill was generated.
Current Bill Balance	Displays the outstanding amount.
Due Date	Displays the due date of the bill.

By default, the **Bill Details** zone does not appear in the **Payment Agreement Request** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the payment agreement request in the **Search Payment Agreement Request** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4106.

## Searching for a Payment Agreement Request

### Prerequisites

To search for a payment agreement request, you should have:

- Payment agreement request types defined in the application

### Procedure

To search for a payment agreement request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Delinquency Management** and then click **Payment Agreement Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request** sub-menu.  
The **Payment Agreement Request** screen appears.
4. Enter the search criteria in the **Search Payment Agreement Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of payment agreement requests that meet the search criteria appears in the **Search Results** section.

## Creating a Payment Agreement Request

### Prerequisites

To create a payment agreement request, you should have:

- Payment agreement request types defined in the application

### Procedure

To create a payment agreement request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Delinquency Management** and then click **Payment Agreement Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Payment Agreement Request** sub-menu.

The **Add Payment Agreement Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to indicate the payment agreement request type using which you want to create the payment agreement request.	Yes
Account ID	Used to search for unpaid bills of a particular account.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	Yes

**Tip:** Alternatively, you can access the **Add Payment Agreement Request** screen by clicking the **Add** button in the **Page Title** area of the **Payment Agreement Request** screen.

4. Select the required payment agreement request type and account ID from the respective fields.
5. Click **OK**.

The **Payment Request** screen appears.

## Defining a Characteristic for a Payment Agreement Request

### Prerequisites

To define a characteristic for a payment agreement request:

- Characteristic types defined in the application (where the characteristic entity is set to **Payment Agreement Request**)

### Procedure

To define a characteristic for a Payment Agreement Request:

1. Ensure that the **Characteristics** section is expanded when you are editing, submitting, approving, rejecting or resubmitting a payment agreement.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to indicate the date from when the characteristic is effective for the payment agreement request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Payment Agreement Request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the payment agreement request, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the payment agreement request, click the **Delete** (🗑) icon corresponding to the characteristic.

**Defining Payment Schedule for a Payment Agreement Request**

**Prerequisites**

To define payment schedule for a payment agreement request:

- Scheduled date, sum of installments for overdue or unpaid bills defined in the application for which the payment is scheduled is set to **Payment Agreement Request**

**Procedure**

To define payment schedule for a Payment Agreement Request:

1. Ensure that the **Payment Schedule** section is expanded when you are editing, submitting, approving, rejecting or resubmitting a payment agreement.

The **Payment Schedule** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Schedule Date	Used to indicate the date schedule for the payment.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a payment schedule for the payment agreement request.
Schedule Amount	Used to indicate the amount scheduled for overdue or unpaid bills to be paid in installments.	Yes (Conditional)
		<b>Note:</b> This field is required when you select a <b>Schedule Date</b> for the payment schedule.
	<b>Note:</b> This field appears when you select a <b>Schedule Date</b> for the payment schedule.	
Auto Pay ID	Used to indicate the auto pay id of the payor.	No
	<b>Note:</b> This field appears when you select auto pay method option for <b>Pay Method</b> .	
	The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Auto Pay ID Search</b> window appears.	

2. Enter the required details.

**Note:** If you select a auto pay method option for **Pay Method**, the **Search** (🔍) icon appears corresponding to the **Auto Pay ID** field. On clicking the **Search** icon, you can search for a **Payor Account ID**.

3. If you want to define more than one payment schedule for the payment agreement request, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a payment schedule from the payment agreement request, click the **Delete** (🗑️) icon corresponding to the payment schedule.

<b>Search Bills</b> zone	<a href="#">Search Bills</a> on page 1836

## Approving a Payment Agreement Request

You can view the number of payment agreement requests which are pending for approval in the **Payment Agreement Request** screen. The approver can review, and accordingly approve or reject the payment agreement request based on the observations.

**Note:** The system will not allow you to approve or reject a payment agreement request submitted by you.

### Procedure

To approve a payment agreement request:

1. Do either of the following:

If you want to	Then
Approve a payment agreement request through the <b>Payment Agreement Request</b> screen	<ol style="list-style-type: none"> <li>a. Search for the payment agreement request in the <b>Payment Agreement Request</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>Payment Agreement Request Information</b> column corresponding to the payment agreement request which you want to review.</li> </ol>
Approve a payment agreement request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>c. Enter the to do type <b>C1-PAREQ</b> in the <b>To Do Type</b> field for the entity payment agreement request.</li> <li>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>f. Click the link in the <b>Message</b> column corresponding to the To Do of the payment agreement request that you want to review.</li> </ol>

The **Payment Agreement Request** screen appears.

- Review the payment agreement request details.
- Click the **Approve** button in the **Payment Agreement Request** zone.

The system behaves in the following manner:

If you are...	Then
Approving a payment agreement request	The status of the payment agreement request is changed to <b>Approval In Progress</b> as specified in the payment agreement request type.

**Note:** The **Approve** button appears when:

- The payment agreement request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the payment agreement request.

## Rejecting a Payment Agreement Request

### Prerequisites

To reject a payment agreement request, you should have:

- Rejection reasons defined in the application

**Note:**

While rejecting a payment agreement request, you need to specify the reason why you want to reject the payment agreement request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-PaymentAgreementRequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a payment agreement request submitted by you.

### Procedure

To reject a payment agreement request:

- Do either of the following:

If you want to	Then
<b>Reject a payment agreement request through the Payment Agreement Request screen</b>	<ol style="list-style-type: none"> <li>Search for the payment agreement request in the <b>Payment Agreement Request</b> screen.</li> <li>In the <b>Search Results</b> section, click the link in the <b>Payment Agreement Request Information</b> column corresponding to the payment request which you want to review.</li> </ol>
<b>Reject a payment agreement request from the To Do List screen</b>	<ol style="list-style-type: none"> <li>Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> </ol>

If you want to	Then
	<p><b>b.</b> From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</p> <p>The <b>To Do Type for User Search</b> window appears.</p> <p><b>c.</b> Enter the to do type <b>C1-PAREQ</b> in the <b>To Do Type</b> field for the entity payment agreement request.</p> <p><b>d.</b> Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p><b>e.</b> Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p><b>f.</b> Click the link in the <b>Message</b> column corresponding to the To Do of the payment agreement request that you want to review.</p>

The **Payment Agreement Request** screen appears.

- Review the payment agreement request details.
- Click the **Reject** button in the **Payment Agreement Request** zone.

The **Reject Payment Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the payment agreement request.	Yes
Comments	Used to specify additional information while rejecting the payment agreement request.	No

**Note:** The **Reject** button appears when:

- The payment agreement request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the payment agreement request.

- Select the rejection reason from the **Status Reason** list.
  - Click **Save**.
- The status of the payment agreement request is changed to **Rejected**.

## Resubmitting a Payment Agreement Request

### Prerequisites

To resubmit a payment agreement request, you should have:

- Entities added in the payment agreement request which is submitted for approval.

**Procedure**

To resubmit a payment agreement request:

- 1. Search for the payment agreement request in the **Payment Agreement Request** screen.
- 2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request that you want to resubmit.  
The **Payment Agreement Request** screen appears.
- 3. Click the **Resubmit** button in the **Payment Agreement Request** zone.  
The **Resubmit Payment Agreement Request** screen appears.

**Note:** The **Resubmit** button appears when the payment agreement request is in the **Approval In Progress** status.

A To Do of the **C1-PAREQ** To Do type is created and sent to the request submitter using the submitter TO DO Role and the status of the payment agreement request is changed to **Draft**.

- 4. Enter the comments in the respective field and click **Save**.

**Note:** While resubmitting, To Do will be sent to the submitter of the request using the submitter To Do Role mapped on the payment agreement request type and the request will be moved to Draft status. The submitter can do necessary changes and re submit the request. Log will be maintained when the approver sends the request back to submitter.

**Filtering Overdue Bills of an Account**

The **Search Bills** zone lists bills that are overdue for an account. You will not find any records in this zone if the payment agreement request does not have overdue bills in the account. This zone contains the following fields as search criteria:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a payment agreement request using bill details.	Yes
	<b>Note:</b> By default, the <b>Bill Details</b> option is selected.	
Bill ID	Used to search for a particular bill.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears.	
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No

By default, the **Search Bills** zone appears in the **Bills** tab of **Payment Agreement Request** screen. By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (∇) icon in the upper right corner of this zone.

By default, the search results section displays the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Unpaid Amount	Displays the amount which is eligible for payment agreement request against the bill.
Overdue Process Information	Displays the overdue process information for the bill.

How to add an overdue bill in a payment agreement request	<a href="#">Adding an Overdue Bill in a Payment Agreement Request</a> on page 1847

## Adding an Overdue Bill in a Payment Agreement Request

### Prerequisites

To add an overdue bill in a payment agreement request, you should have:

- Overdue bills should be available for accounts to add in payment agreement request

### Procedure

To add an overdue bill in a payment agreement request:

**Note:** A bill with outstanding amount greater than zero which is not part of an overdue process will be allowed to be added in a payment agreement request. While a bill with negative outstanding amount will not be allowed to be added in a payment agreement request.

1. Search for the payment agreement request in the **Payment Agreement Request** screen which is in **Draft** or **Active** status.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose details you want to view.  
The **Payment Agreement Request** screen appears.
3. Click the **Bills** tab.  
The **Bills** tab appears.
4. Enter the search criteria in the **Search Bills** zone.  
In the **Search Results** section, list of bills meeting the search criteria are displayed.
5. Select the check box corresponding to the bill which you want to add to the payment agreement request from the **Search Results** section.  
You can add more than one bill to the payment agreement request at the same time.

6. Click **Add**.

A message appears indicating that selected bills have been successfully added to the payment agreement request.

7. Click **OK**.

Note that the bill is added in the **Bill Details** zone in the **Main** tab.

## Viewing the Log of a Payment Agreement Request

**Procedure**

To view the log of a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose log you want to view.

The **Payment Agreement Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following three zones:
  - **Payment Agreement Request** – Displays the details of the payment agreement request.
  - **Bill Details** – Lists the bill details of the payment agreement request.
  - **Payment Schedule** – Lists the payment schedule details of the bills for the payment agreement request.
- **Bills** – This tab lists the unpaid bill amount details for the same account.

**Note:** This tab will be displayed when the payment agreement is in **Draft** status.

- **Log** – This tab lists the complete trail of actions performed on the payment agreement request.
3. Click the **Log** tab.

The **Payment Agreement Request Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the payment agreement request.
Details	Displays the details about the action performed on the payment agreement request.
User	Indicates the user who has performed the action on the payment agreement request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the payment agreement request.
Status Reason	Indicates the reason why the payment agreement request was rejected.

Column Name	Column Description
Old Payment Schedule	Displays the details of old payment schedule.

**Note:** You can manually add a log entry for the payment agreement request by clicking the **Add Log Entry** link in the upper right corner of the **Payment Agreement Request Log** zone.

## Adding a Log Entry for a Payment Agreement Request

### Procedure

To add a log entry for a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose log you want to edit.

The **Payment Agreement Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following three zones:
  - **Payment Agreement Request** – Displays the details of the payment agreement request.
  - **Bill Details** – Lists the bill details of the payment agreement request.
  - **Payment Schedule** – Lists the payment schedule details of the bills for the payment agreement request.
- **Bills** – This tab lists the unpaid bill amount details for the same account.

**Note:** This tab will be displayed when the payment agreement is in **Draft** status.

- **Log** – This tab lists the complete trail of actions performed on the payment agreement request.
3. Click the **Log** tab.  
The **Log** tab appears.
  4. Click the **Add Log Entry** link in the upper right corner of the **Payment Agreement Request Log** zone.

The **Add Payment Agreement Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Information	Displays information about the payment agreement request.	Not applicable
Log Details	Used to specify additional comments for the payment agreement request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.  
The log entry is added in the **Payment Agreement Request Log** zone.

## Dispute Request

---

### Topics:

- [Dispute Request \(Without Approval\) Status Transition](#)
- [Dispute Request \(With Approval\) Status Transition](#)
- [Prerequisites](#)
- [Algorithms Used in C1-DisputeRequest](#)
- [Dispute Request Type](#)
- [Dispute Request \(Used for Searching\)](#)
- [Dispute Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing allows you to create a dispute request for an account. Through a dispute request, the dispute against a particular bill, bill segment, and/or adjustment is tracked and closed. While creating a dispute request, you need to specify the dispute request type using which you want to create the dispute request. It is the dispute request type which helps the system to determine:

- The business object using which the dispute request should be created
- Whether the dispute request must be approved before creating adjustments to settle a dispute against a bill, bill segment, or adjustment
- Approval profile using which the dispute request must be approved
- Whether multi-level or single-level approval is required for a dispute request
- Whether debit or credit hierarchy must be used for approval when the dispute request amount is zero
- Default adjustment type using which adjustments must be created

You can add completed bills, its bill segments, and adjustments in the dispute request. In other words, at present, the system enables you to resolve the dispute against a bill, bill segment, and adjustment. If the dispute is against a bill, the system, by default, sets the dispute amount and does not allow you to change the dispute amount. The dispute amount is set to the original bill amount because the original bill amount and dispute amount must be equal. However, if the original bill amount is positive, then the dispute amount is set to negative, and vice versa. If the dispute is against a bill segment or adjustment, you can change the dispute amount, if required.

Once a dispute request is created, the status of the dispute request is set to Draft. You can then edit or delete the dispute request, if required. Once you add the bills, bill segments, or adjustments in a dispute request, you can submit the dispute request. On submitting a dispute request, the system behaves in the following manner:

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Bill	Fully Paid	Not applicable	The system does the following: <ol style="list-style-type: none"><li>1. Creates the adjustment using the specified adjustment type for the bill.</li><li>2. Swaps the adjustment onto the next bill.</li></ol>
Bill	Unpaid	Yes	The system does the following:

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
			<ol style="list-style-type: none"> <li>1. Stops the automatic payment created for the current bill.</li> <li>2. A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the <b>Overdue Monitor (C1-ADMOV)</b> batch.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <b>Note:</b> The above step (2) occurs when the approval is required for the dispute request.         </div> <ol style="list-style-type: none"> <li>3. Reopens the current bill of the account.</li> <li>4. Creates the adjustment using the specified adjustment type for the bill and swaps the adjustment onto the current bill.</li> <li>5. Completes and freeze the current bill.</li> </ol>
Bill	Unpaid	No	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the bill.</li> <li>2. Swaps the adjustment onto the current or next bill depending on the value defined for the <b>Adjustment on Next Bill</b> parameter in an algorithm created using the <b>C1- ENTERADJ</b> algorithm type.</li> </ol>
Bill	Partially Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates two adjustments using the specified adjustment type for the bill.</li> <li>2. Swaps one adjustment onto the current bill and another adjustment onto the next bill.</li> </ol> <p><b>Example:</b> A dispute is raised against a bill (Bill Amount – 100, Dispute Amount – 100, and Unpaid Amount - 50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.</p>
Bill Segment	Fully Paid	Not applicable	<p>The system does the following:</p>

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
			<ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the bill segment.</li> <li>2. Swaps the adjustment onto the next bill.</li> </ol>
Bill Segment	Unpaid	Yes	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Stops the automatic payment created for the current bill.</li> <li>2. A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the <b>Overdue Monitor (C1-ADMOV)</b> batch.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> The above step (2) occurs when the approval is required for the dispute request.</p> </div> <ol style="list-style-type: none"> <li>3. Reopens the current bill of the account.</li> <li>4. Creates the adjustment using the specified adjustment type for the bill segment and swaps the adjustment onto the current bill.</li> <li>5. Completes and freeze the current bill.</li> </ol>
Bill Segment	Unpaid	No	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the bill segment.</li> <li>2. Swaps the adjustment onto the current or next bill depending on the value defined for the <b>Adjustment on Next Bill</b> parameter in an algorithm created using the <b>C1- ENTERADJ</b> algorithm type.</li> </ol>
Bill Segment	Partially Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates two adjustments using the specified adjustment type for the bill segment.</li> <li>2. Swaps one adjustment onto the current bill and another adjustment onto the next bill.</li> </ol> <p><b>Example:</b> A dispute is raised against a bill segment (Bill Segment Amount – 100, Dispute Amount – 100, and Unpaid Bill Segment Amount -</p>

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
			50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.
Adjustment	Fully Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute).</li> <li>2. Swaps the adjustment onto the next bill.</li> </ol>
Adjustment	Unpaid	Yes	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Stops the automatic payment created for the current bill.</li> <li>2. A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the <b>Overdue Monitor (C1-ADMOV)</b> batch.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> The above step (2) occurs when the approval is required for the dispute request.</p> </div> <ol style="list-style-type: none"> <li>3. Reopens the current bill of the account.</li> <li>4. Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute) and swaps the adjustment onto the current bill.</li> <li>5. Completes and freeze the current bill.</li> </ol>
Adjustment	Unpaid	No	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute).</li> <li>2. Swaps the adjustment onto the current or next bill depending on the value defined for the <b>Adjustment on Next Bill</b> parameter in an algorithm created using the <b>C1- ENTERADJ</b> algorithm type.</li> </ol>

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Adjustment	Partially Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates two adjustments using the specified adjustment type for the adjustment (against which you have raised a dispute).</li> <li>2. Swaps one adjustment onto the current bill and another adjustment onto the next bill.</li> </ol> <p><b>Example:</b> A dispute is raised against an adjustment (Adjustment Amount – 100, Dispute Amount – 100, and Unpaid Adjustment Amount - 50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.</p>

Finally, the status of the dispute request is changed to **Processed**. You can optionally configure the system to use the approval workflow process for a dispute request. If the **Approval Required** flag is set to **Yes** in a dispute request type, then on submitting the respective dispute request, the approval workflow process creates a To Do for the approver to review the dispute request. Once the approver approves the dispute request, the system behaves as mentioned in the above table. The approver can approve, reject, or resubmit the dispute request. When the dispute request is resubmitted to the submitter, the submitter can edit, cancel, or submit the dispute request.

The approval process is configured through the approval profile. The approval profile allows you to define the debit and credit hierarchy. If the dispute request amount is negative, the credit hierarchy in the approval profile is used for approval. However, if the dispute request amount is positive, the debit hierarchy in the approval profile is used for approval. You can either opt to use single-level or multi-level approval for the dispute requests.

During the dispute request process, a dispute request creation goes through various statuses in its lifecycle. For more information about the dispute request statuses, see [Dispute Request \(Without Approval\) Status Transition](#) on page 1856 and [Dispute Request \(With Approval\) Status Transition](#) on page 1856.

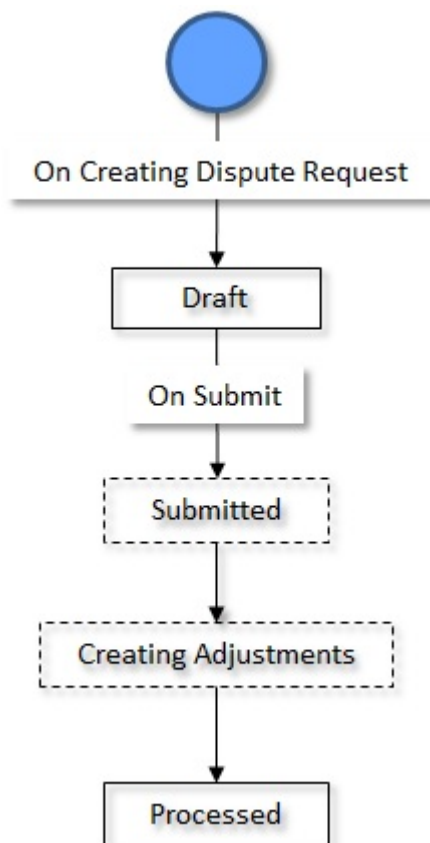

**Note:** The lifecycle of a dispute request creation is driven by the respective business object using which the request is created. The dispute request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the dispute request process, see [Prerequisites](#) on page 1857.

## Dispute Request (Without Approval) Status Transition

---

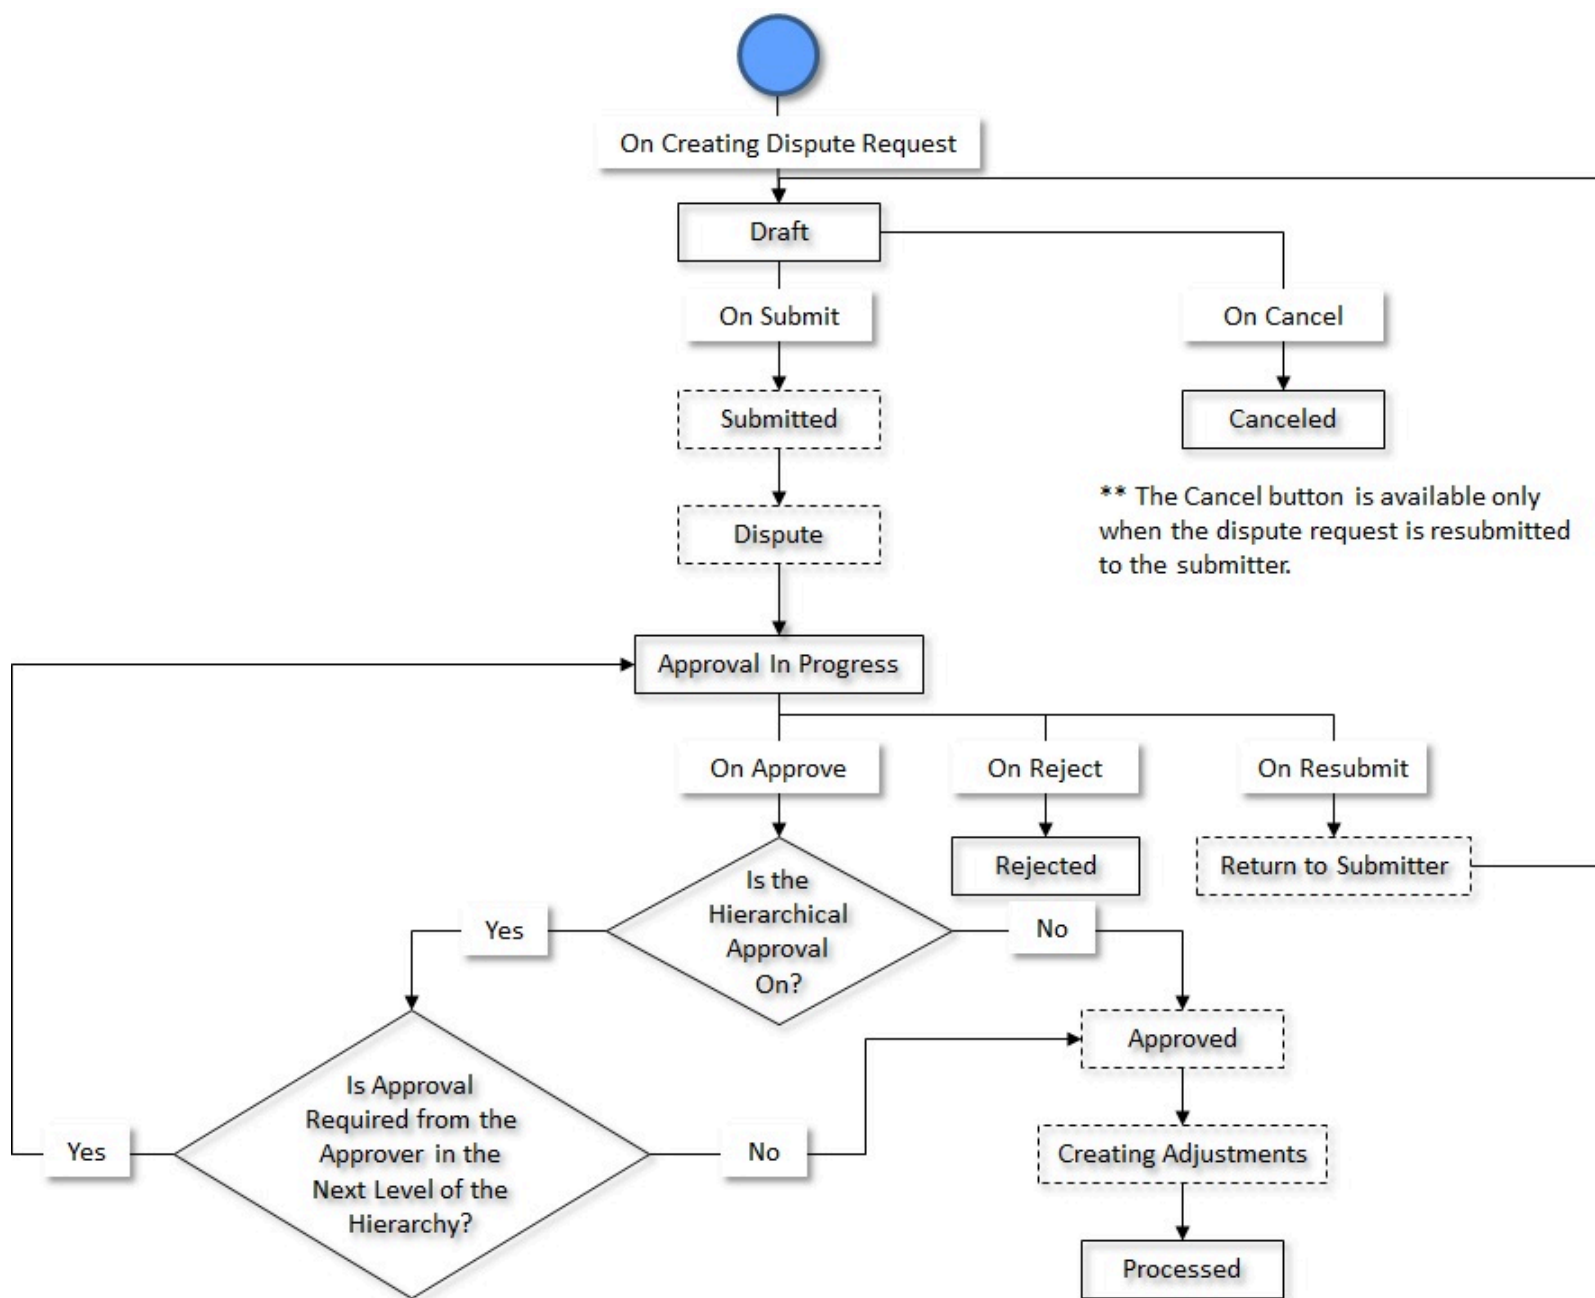

The following figure graphically indicates how a dispute request moves from one status to another when approval workflow is off:

## Dispute Request (With Approval) Status Transition

---

The following figure graphically indicates how a dispute request moves from one status to another when approval workflow is on:

## Prerequisites

To setup the dispute request process, you need to do the following:

- Define the required refund request types in the system
- Define the required adjustment types (for creating dispute adjustments) where A/P request type is defined
- Define the required characteristic types where the characteristic entity is set to **Dispute Request Type**
- Define the required characteristic types where the characteristic entity is set to **Dispute Request**
- Define rejected status reasons for the **C1-DisputeRequest** business object
- Assign the **C1-DSPSB** To Do type to a To Do role whose users must receive To Do generated while submitting a dispute request for approval

- Define the required approval profiles with the credit/debit hierarchy and **C1\_DISAP** To Do type
- Create an algorithm using the **C1-DSPTRQINF** algorithm type if you want to create Dispute Requests using the dispute request information.
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options – Framework** screen

## Algorithms Used in C1-DisputeRequest

The following table lists the algorithms which are attached to the **C1-DisputeRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-DSPTRQINF	C1-DSPTRQINF	<p>This algorithm generates the dispute request information string which appears throughout the application. It concatenates the following fields:</p> <ul style="list-style-type: none"> <li>• Dispute Request Type Description</li> <li>• Dispute Request Status Description</li> <li>• Dispute Request ID</li> </ul>
Validation	C1-DSPTVADN	C1-DSPTVADN	<p>This algorithm validates following:</p> <p><b>Draft</b> status validations:</p> <ul style="list-style-type: none"> <li>• At-least one entity should be selected to submit a dispute. <b>Dispute Request</b> with at-least one <b>Bill</b> or <b>Bill Line Item</b> should be added for submission</li> <li>• Dispute amount cannot be zero or null</li> <li>• If a bill is already present in dispute request and request is not in final status then user should not be allowed to add same bill in another dispute request</li> <li>• Disputed Amount should be equal to bill outstanding amount if bill Line item contain multiple contracts</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-DisputeRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Enter	C1-DISPUTSUB	C1-DISPUTSUB	<p>This algorithm checks the following:</p> <ul style="list-style-type: none"> <li>• Whether the approval is required for the dispute request. If the approval is required for a dispute request, the status of the dispute request is changed to <b>Approval In Progress</b>. However, if the approval is not required for a dispute request, the status of the dispute request is changed to <b>Creating Adjustment</b>.</li> <li>• At least one entity, such as payment event, payment, or credit bill line item (such as credit bill segment or adjustment) is selected in the dispute request.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
				<ul style="list-style-type: none"> <li>Whether the approval profile attached to the <b>Dispute Request Type</b> has the credit hierarchy and <b>To Do Type</b> defined.</li> </ul>
Submitted	Enter	C1-DPTSTAUPY	C1-DPTSTAUPY	<p>This algorithm is used to stop auto pay on bill.</p> <p><b>Parameter – Characteristic Type</b></p> <p>Characteristic Type is used to add the characteristic which is stamped on the bill to postpone overdue process</p>
Dispute	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm type transitions business object current state to the input <b>Next Status</b> or to the status related to the input <b>Next Transition Condition</b>. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.</p>
Dispute	Enter	C1-DPTSTAUPY	C1-DPTSTAUPY	<p>This algorithm is used to stop auto pay on bill.</p> <p><b>Parameter – Characteristic Type</b></p> <p>Characteristic Type is used to add the characteristic which is stamped on the bill to postpone overdue process</p>
Creating Adjustments	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm type transitions business object current state to the input <b>Next Status</b> or to the status related to the input <b>Next Transition Condition</b>. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.</p>
Creating Adjustments	Enter	C1-ENTERADJS	C1-ENTERADJ	<p>This algorithm is executed on submit or on approve of an dispute request. It creates the adjustments which will be swapped on the current or next bill.</p> <p>Adjustment are created with below logic</p> <p><b>Unpaid Bill logic</b></p> <ul style="list-style-type: none"> <li>If stop auto pay switch is <b>No</b> and auto pay exist then create adjustment on next bill</li> <li>If stop auto pay switch is <b>Yes</b> then perform below step <ul style="list-style-type: none"> <li>If bill cannot be reopen or adjustment need to be created on next bill then create adjustment on next bill</li> </ul> </li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
				<ul style="list-style-type: none"> <li>• If approval is configured then create to do for manual creation of auto pay (Auto Pay is stopped while submitting the request)</li> <li>• Else <ul style="list-style-type: none"> <li>• create adjustment on current bill</li> <li>• if approval is configured then <ul style="list-style-type: none"> <li>• Bill reopen and complete (Auto Pay is stopped while submitting the request)</li> <li>• Delete overdue char from bill</li> </ul> </li> </ul> </li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
				<ul style="list-style-type: none"> <li>• Else <ul style="list-style-type: none"> <li>• Stop auto pay</li> <li>• Reopen and complete</li> </ul> </li> </ul> <p><b>Paid Bill logic</b></p> <ul style="list-style-type: none"> <li>• Adjustment will be created on next bill</li> </ul> <p><b>Partial Bill Logic</b></p> <ul style="list-style-type: none"> <li>• Adjustment will be created to balance current bill and another adjustment will be created for remaining amount and it will be stamped on next bill.</li> <li>• If dispute adjustment will increase the debit or credit balance then adjustment will be stamped on next bill.</li> </ul> <p>There are four parameters for this algorithm.</p> <p><b>Parameter 1 – Adjustment on Next Bill (Required)</b></p> <ul style="list-style-type: none"> <li>• Adjustments should be swapped on the current or next bill. It is used only for unpaid bill.</li> </ul> <p><b>Parameter 2 – Match Type Entity Flag (Required)</b></p> <ul style="list-style-type: none"> <li>• Valid values for this parameter are <b>BILL</b>, <b>BSEG</b> and <b>SA</b>. This parameter defines the open item at which the match events are to be created. For bills which are not paid yet, new match events will be created based on the value of this parameter.</li> <li>• Based on the flag defined <b>Match Events</b> are created as follows,</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
				<ul style="list-style-type: none"> <li>If the <b>Match Type Flag</b> is <b>BILL</b>, then all FTs on a bill have the same Match Event.</li> <li>If the <b>Match Type Flag</b> is <b>BSEG</b>, then each line item (bill segment or adjustment) on the bill will have a unique match event.</li> <li>If the <b>Match Type Flag</b> is <b>SA</b>, then line items belonging to the same contract within a bill will have the same match event.</li> </ul> <p><b>Parameter 3 – To Do Type</b></p> <ul style="list-style-type: none"> <li>To Do will be sent to the user if bill can't be reopen and auto pay has been stopped.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
				<p><b>Parameter 4 – Characteristic Type</b></p> <ul style="list-style-type: none"> <li>Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process</li> </ul>
Approval Progress	In Enter	C1-DSPTAPP	C1-DSPTAPP	<p>This algorithm creates the following:</p> <ul style="list-style-type: none"> <li>A To Do using the To Do type specified in the approval profile which is attached to the dispute request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.</li> <li>A log entry is added when a To Do is created using the To Do type.</li> </ul>
Approval Progress	In Exit	F1-TODOCOMPL	F1-TODOCOMPL	<p>This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an <b>Exclude To Do Type Characteristic Type</b> indicating that it should not be automatically completed.</p>
Approved	Enter	C1-DSPAPPRVD	C1-DSPAPPRVD	<p>This algorithm is triggered when the approver clicks the <b>Approve</b> button. It checks whether the approval is required from users at the next level in the approval hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the dispute request is changed to <b>Approval In Progress</b> and the algorithm attached to the Approval In Progress status is invoked. If further approval is not</p>

Status	System Event	Algorithm	Algorithm Type	Description
				required, the status of the dispute request is changed to <b>Creating Adjustment</b> .
Return to Submitter	Enter	C1-DSPTRESUB	C1-DSPTRESUB	This algorithm is invoked on <b>Re-Submit</b> button. It moves the status of <b>Dispute Request</b> into <b>Draft</b> . A <b>To Do</b> will be generated for the user as submitter whose <b>To Do Type</b> and <b>To Do Role</b> are fetched from <b>Dispute Request Type</b> .
Rejected	Enter	C1-DSPTREJT	C1-DSPTREJT	This algorithm is executed when on reject. <b>Parameter 1 – To Do Type</b> <ul style="list-style-type: none"> <li>To Do will be sent to the user if bill can't be reopen and auto pay has been stopped.</li> </ul> <b>Parameter 2 – Characteristic Type</b> <ul style="list-style-type: none"> <li>Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process</li> </ul>
Canceled	Enter	C1-DSPTREJT	C1-DSPTREJT	This algorithm is executed when on reject. <b>Parameter 1 – To Do Type</b> <ul style="list-style-type: none"> <li>To Do will be sent to the user if bill can't be reopen and auto pay has been stopped.</li> </ul> <b>Parameter 2 – Characteristic Type</b> <ul style="list-style-type: none"> <li>Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process</li> </ul>

## Dispute Request Type

Oracle Revenue Management and Billing allows you to define:

- **Dispute Request Type** – It is used to create a dispute request. You can define multiple dispute request types in the system. A dispute request type helps the system to determine:
  - Whether the dispute request must be approved before creating dispute adjustments in the system
  - Approval profile using which the dispute request must be approved
  - Whether multi-level or single-level approval is required while creating dispute adjustments in the system
  - Adjustment type using which the dispute adjustment must be created when the total dispute amount is less than the minimum dispute amount
  - Default adjustment type using which dispute adjustments must be created

While defining a dispute request type where approval workflow is required, you need to select the **Approval Required** check box. If the **Approval Required** check box is selected, the dispute request (which is created using the dispute request type) is sent for approval before creating the dispute adjustments. However, if the **Approval Required** check box is not selected, the dispute adjustments are created immediately on submitting a dispute request. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. You can define a debit and credit hierarchy in the approval profile using the threshold amount. The debit approval hierarchy and credit approval hierarchy is used for approving dispute request. Therefore, while defining an approval profile for dispute, you need to define credit and debit hierarchy and set the To Do Type to **C1-DISAP**.

You can define an approval hierarchy where users with different To Do role at each level can approve or reject the dispute request. For example, you can define an approval profile called A1 with two levels of approval. At the first level, a user with the *Manager* To Do role will approve or reject the dispute request, and at the second level, a user with the *Senior Manager* To Do role will approve or reject the dispute request. On submitting a dispute request where approval is required, a notification in the form of To Do is sent to all users with the To Do role defined at the first level in the hierarchy. Once the request is approved at the first level, a notification is sent to all users with the To Do role defined at the next level in the hierarchy. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the dispute request, the dispute adjustments are created. However, if an approver at any level in the hierarchy rejects the request, the dispute adjustments are not created.

The approval hierarchy is controlled by the threshold amount. For example, you define an approval profile called A1 with two levels of approval – First Level (Threshold Amount: 300, To Do Role: *Manager*) and Second Level (Threshold Amount: 500, To Do Role: *Senior Manager*). Now, if the total dispute amount is equal to 300 or less than 500, then the approval is required only from the first level in the hierarchy and not from the second level in the hierarchy. However, if the total dispute amount is equal to or greater than 500, then the approval is required from the first level and then from the second level in the hierarchy. But, if the total dispute amount is less than 300, then the approval is not required from any levels in the hierarchy. The system will automatically approve the dispute request and create the dispute adjustments.

The system supports both single-level and multi-level approval process while approving dispute request. If the **Hierarchical Approval** check box is selected while defining a dispute request type, the approval hierarchy defined in the approval profile is followed based on the threshold limit. However, if the **Hierarchical Approval** check box is not selected while defining a dispute request type, the approval is required only from the approval level where the total dispute amount falls within the threshold limit. Let us understand this with the help of some examples.

Dispute Request Type	Approval Profile	Approval Hierarchy	Hierarchical Approval								
D1	Dispute Analyst	<b><u>Credit Hierarchy</u></b>	Yes								
		<table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>\$500</td><td>Senior Analyst</td></tr><tr><td>\$750</td><td>Manager</td></tr><tr><td>\$1500</td><td>Senior Manager</td></tr></table>		Threshold Amount	To Do Role	\$500	Senior Analyst	\$750	Manager	\$1500	Senior Manager
		Threshold Amount		To Do Role							
		\$500		Senior Analyst							
		\$750		Manager							
\$1500	Senior Manager										
D2	Dispute Analyst	<b><u>Credit Hierarchy</u></b>	No								
		<table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>\$500</td><td>Senior Analyst</td></tr><tr><td>\$750</td><td>Manager</td></tr><tr><td>\$1500</td><td>Senior Manager</td></tr></table>		Threshold Amount	To Do Role	\$500	Senior Analyst	\$750	Manager	\$1500	Senior Manager
		Threshold Amount		To Do Role							
		\$500		Senior Analyst							
		\$750		Manager							
\$1500	Senior Manager										
D3	Dispute Analyst	<b><u>Debit Hierarchy</u></b>	Yes								
		<table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>\$100</td><td>Senior Analyst</td></tr><tr><td>\$200</td><td>Manager</td></tr><tr><td>\$300</td><td>Senior Manager</td></tr></table>		Threshold Amount	To Do Role	\$100	Senior Analyst	\$200	Manager	\$300	Senior Manager
		Threshold Amount		To Do Role							
		\$100		Senior Analyst							
		\$200		Manager							
\$300	Senior Manager										

Dispute Request Type	Approval Profile	Approval Hierarchy		Hierarchical Approval
D4	Dispute Analyst	<u>Debit Hierarchy</u>		No
		Threshold Amount	To Do Role	
		\$100	Senior Analyst	
		\$200	Manager	
		\$300	Senior Manager	

The following table indicates how the system will behave in different dispute scenarios:

Dispute Request	Dispute Request Type	Total Refund Amount (\$)	Comments
DR1	D1	200	This dispute request is automatically approved by the system because the total dispute amount is less than \$500.
DR2	D1	750	<p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> </ol> <p>This is because the total dispute amount is either equal to \$750 or less than \$1500 and hierarchical approval is required.</p>
DR3	D1	2000	<p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> <li>3. Users with the Senior Manager To Do role</li> </ol> <p>This is because the total dispute amount is greater than \$1500 and hierarchical approval is required.</p>
DR4	D2	200	This dispute request is automatically approved by the system because the total dispute amount is less than \$500.
DR5	D2	750	The To Do is sent for approval to users with the Manager To Do role. This is because the total dispute amount is either equal to \$750 or less than \$1500 and hierarchical approval is not required.
DR6	D2	2000	The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total dispute amount is greater than \$1500 and hierarchical approval is not required.
DR7	D3	90	This dispute request is automatically approved by the system because the total dispute amount is less than \$100.
DR8	D3	250	<p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> </ol>

Dispute Request	Dispute Request Type	Total Refund Amount (\$)	Comments
			<b>2.</b> Users with the <b>Manager To Do</b> role This is because the total dispute amount is either equal to \$200 or less than \$300 and hierarchical approval is required.
DR9	D3	500	The To Do is sent for approval to the following users in the specified order: <b>1.</b> Users with the <b>Senior Analyst To Do</b> role <b>2.</b> Users with the <b>Manager To Do</b> role <b>3.</b> Users with the <b>Senior Manager To Do</b> role This is because the total dispute amount is greater than \$300 and hierarchical approval is required.
DR10	D4	90	This dispute request is automatically approved by the system because the total dispute amount is less than \$100.
DR11	D4	250	The To Do is sent for approval to users with the <b>Manager To Do</b> role. This is because the total dispute amount is either equal to \$200 or less than \$300 and hierarchical approval is not required.
DR12	D4	500	The To Do is sent for approval to users with the <b>Senior Manager To Do</b> role. This is because the total dispute amount is greater than \$300 and hierarchical approval is not required.

The **Dispute Request Type** screen allows you to define, edit, delete, and copy a dispute request type. This screen consists of the following zones:

- [Dispute Request Type List](#) on page 1865
- [Dispute Request Type](#) on page 1866

## Dispute Request Type List

The **Dispute Request Type List** zone lists dispute request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Dispute Request Type	Displays the dispute request type.
Description	Displays the description of the dispute request type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Dispute Request Type</b> screen appears where you can edit the details of the dispute request type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Dispute Request Type</b> screen appears where you can define a dispute request type using an existing dispute request type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the dispute request type.
	<b>Note:</b> You can delete a dispute request type when you have not created a dispute request using the dispute request type.

On clicking the **Broadcast** (📢) icon corresponding to dispute request type, the **Dispute Request Type** zone appears with the details of the respective dispute request type.

## Dispute Request Type

The **Dispute Request Type** zone displays the details of the dispute request type. This zone consists of the following sections:

- **Main** – This section provides basic information about the dispute request type. It contains the following fields:

Field Name	Field Description
Dispute Request Type	Displays the dispute request type.
Description	Displays the description of the dispute request type.
Dispute Request Business Object	Indicates the business object that will be used to create the dispute request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the dispute request type.
Status	Indicates the status of the dispute request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Default Adjustment Type	Indicates the adjustment type using which the dispute adjustment must be created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Approval Required	Indicates whether approval is required while creating the dispute adjustments using the dispute request type.
Approval Profile	Indicates the approval profile which must be used to define approval hierarchy for the dispute request type.

Field Name	Field Description
	<p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>Approval Profile</b> screen appears where you can view the details of the respective approval profile.</p>
Hierarchical Approval	<p>Indicates whether multi-level or single approval is required while creating the dispute adjustments using the dispute request type.</p> <p><b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.</p>
Zero Threshold Amount Hierarchy	Indicates that based on the approval profile hierarchy, To Do Type from the hierarchy (credit/debit) will be picked up.
Submitter To Do Type	<p>Indicates the To Do type for the submitter when the dispute request type is resubmitted by the approver.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>
Submitter To Do Role	<p>Indicates the To Do role for the submitter when the dispute request type is resubmitted by the approver.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>

- **Characteristics** – This section lists the characteristics of the dispute request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the dispute request type.
Delete	<p>Used to delete the dispute request type.</p> <p><b>Note:</b> You can delete a dispute request type when you have not created a dispute request using the dispute request type.</p>
Duplicate	Used to create a new dispute request type using an existing dispute request type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the dispute request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Dispute Request Type** zone does not appear in the **Dispute Request Type** screen. It appears when you click the **Broadcast** (📢) icon corresponding to the dispute request type in the **Dispute Request Type List** zone.

## Defining a Dispute Request Type

### Prerequisites

To define a dispute request type, you should have:

- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### Procedure

To define a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Dispute Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type Business Object	Used to indicate the business object that you want to use to create the dispute request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Dispute Request Type** screen.

**Note:** The **Select Business Object** screen appears when there are multiple dispute request type business objects defined in the application. If there is only one dispute request type business object defined in the application, the **Dispute Request Type** screen appears.

4. Select the required dispute request type business object from the respective field.
5. Click **OK**.

The **Dispute Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the dispute request type.
- **Characteristics** – Used to define the characteristics for the dispute request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Used to specify the dispute request type.	Yes
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No
Status	Used to indicate the status of the dispute request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of a dispute request type to <b>Inactive</b> if there are dispute requests which are created using the dispute request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.	
Default Adjustment Type	Used to indicate the adjustment type using which the dispute adjustment must be created.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type.	No
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	
Zero Threshold Amount Hierarchy	Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy will be selected. The valid values are: <ul style="list-style-type: none"> <li>• Credit</li> <li>• Debit</li> </ul>	No
Submitter To Do Type	Used to indicate the To Do type for the submitter when the dispute request is resubmitted by the approver.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Submitter To Do Role	Used to indicate the To Do role for the submitter when the dispute request is resubmitted by the approver.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.

**Note:**

When the threshold amount is equal to zero for the request then based on the value in **Zero Threshold Amount Hierarchy**, the to do type will be picked from the **Approval Profile** hierarchy to send notification.

Only when the **Approval Required** checkbox is selected, you will be able to select **Hierarchical Approval** and **Approval Profile** to be used. If hierarchical approval is not selected, the request has to be approved by a single approver (highest level approver determined by the dispute amount and approval profile).

6. Enter the required details depending on whether you want to define dispute request type.
7. Define characteristics for the dispute request type, if required.
8. Click **Save**.  
The dispute request type is defined.

How to define a characteristic for a dispute request type	<a href="#">Defining a Characteristic for a Dispute Request Type</a> on page 1871

## Defining a Characteristic for a Dispute Request Type

### Prerequisites

To define a characteristic for a dispute request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Dispute Request Type**)

### Procedure

To define a characteristic for a dispute request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a dispute request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Dispute Request Type</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the dispute request type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the dispute request type.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the dispute request type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the dispute request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Editing a Dispute Request Type

### Prerequisites

To edit a dispute request type, you should have:

- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### Procedure

To edit a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Dispute Request Type** sub-menu.  
The **Dispute Request Type** screen appears.
4. In the **Dispute Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the dispute request type whose details you want to edit.

The **Dispute Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the dispute request type.
- **Characteristics** – Used to define the characteristics for the dispute request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Displays the dispute request type.	Not applicable
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the dispute request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of a dispute request type to <b>Inactive</b> if there are dispute requests which are created using the dispute request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.	
Default Adjustment Type	Used to indicate the adjustment type using which the dispute adjustment is created.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type.	No
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	
Zero Threshold Amount Hierarchy	Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy is selected. The valid values are: <ul style="list-style-type: none"> <li>Credit</li> <li>Debit</li> </ul>	No

## Deleting a Dispute Request Type

### Procedure

To delete a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Dispute Request Type** sub-menu.  
The **Dispute Request Type** screen appears.
4. In the **Dispute Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the dispute request type that you want to delete.

A message appears confirming whether you want to delete the dispute request type.

**Note:** You can delete a dispute request type when you have not defined a dispute request using the dispute request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Dispute Request Type** zone to delete the dispute request type.

5. Click **OK**.

The dispute request type is deleted.

## Copying a Dispute Request Type

Instead of creating a dispute request type from scratch, you can create a new dispute request type using an existing dispute request type. This is possible through copying a dispute request type. On copying a dispute request type, the details including the characteristics are copied to the new dispute request type. You can then edit the details, if required.

#### Prerequisites

To copy a dispute request type, you should have:

- Dispute request type (whose copy you want to create) defined in the application
- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

#### Procedure

To copy a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Dispute Request Type** sub-menu.  
The **Dispute Request Type** screen appears.
4. In the **Dispute Request Type List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the dispute request type whose copy you want to create.

The **Dispute Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the dispute request type.
- **Characteristics** – Used to define the characteristics for the dispute request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Used to specify the dispute request type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No
Status	Used to indicate the status of the dispute request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of a dispute request type to <b>Inactive</b> if there are dispute requests which are created using the dispute request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.	
Default Adjustment Type	Used to indicate the adjustment type using which the dispute adjustment must be created.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	
Zero Threshold Amount Hierarchy	Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy will be selected. The valid values are: <ul style="list-style-type: none"> <li>• Credit</li> <li>• Debit</li> </ul>	No
Submitter To Do Type	Used to indicate the To Do type for the submitter when the dispute request is resubmitted by the approver.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
	The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	
Submitter To Do Role	Used to indicate the To Do role for the submitter when the dispute request is resubmitted by the approver.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Dispute Request Type** zone to create a copy of the dispute request type.

5. Enter the required details.
6. Define, edit, or remove characteristics of the dispute request type, if required.
7. Click **Save**.  
The new dispute request type is defined.

## Dispute Request (Used for Searching)

The **Dispute Request** screen allows you to search for a dispute request using various search criteria. It also allows you to create a dispute request. Through this screen, you can navigate to the following screen:

- [Dispute Request \(Used for Viewing\)](#) on page 1886

This screen consists of the following zone:

- [Search Dispute Request](#) on page 1878

## Search Dispute Request

The **Search Dispute Request** zone allows you to search for dispute requests using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a dispute request using request, person, account or bill details. The valid values are: <ul style="list-style-type: none"> <li>• <b>Request Details</b> – Used when you want to search for dispute requests.</li> <li>• <b>Person, Account, or Bill Details</b> – Used when you want to search for person, account, or bill requests.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> By default, the <b>Request Details</b> option is selected.	
Dispute Request Type	Used to search dispute requests which are created using a particular dispute request type.	No
	<b>Note:</b> This field appears when you select the <b>Request Details</b> option from the <b>Search By</b> list.	
Status	Used to search dispute requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Cancelled</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> </ul>	No
	<b>Note:</b> This field appears when you select the <b>Request Details</b> option from the <b>Search By</b> list.	
User ID	Used to search dispute requests which are created by a particular user.	No
	<b>Note:</b> This field appears when you select the <b>Request Details</b> option from the <b>Search By</b> list.	
Created From	Used to search dispute requests which are created from a particular date onwards.	No
	<b>Note:</b> This field appears when you select the <b>Request Details</b> option from the <b>Search By</b> list.	
To	Used to search dispute requests which are created till a particular date.	No
	<b>Note:</b> This field appears when you select the <b>Request Details</b> option from the <b>Search By</b> list.	
Dispute Request ID	Used to search a particular dispute request.	No
	<b>Note:</b> This field appears when you select the <b>Request Details</b> option from the <b>Search By</b> list.	
Account ID	Used to search dispute requests which are created for a particular account.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	
Dispute Reason	Used to search dispute requests which are created using a particular dispute reason for the bill.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.	
Person ID	Used to search dispute requests which are created for a particular person.  <b>Note:</b> This field appears when you select the <b>Person, Account, or Bill Details</b> option from the <b>Search By</b> list.  The <b>Search</b> (Q) icon appears corresponding to the field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	No
Bill ID	Used to search dispute requests which includes bill segments or adjustments of a particular bill.  <b>Note:</b> This field appears only when you select the <b>Person, Account, or Bill Details</b> option from the <b>Search By</b> list.  The <b>Search</b> (Q) icon appears corresponding to the field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears.	No
Alternate Bill ID	Used to search dispute requests which are created for a particular bill using the alternate bill ID.  <b>Note:</b> This field appears when you select the <b>Person, Account, or Bill Details</b> option from the <b>Search By</b> list.	No
Bill Date From	Used to search dispute requests which includes bill segments or adjustments of bills which are created from a particular date onwards.  <b>Note:</b> This field appears when you select the <b>Person, Account, or Bill Details</b> option from the <b>Search By</b> list.	No
To	Used to search dispute requests which includes bill segments or adjustments of bills which are created till a particular date.  <b>Note:</b> This field appears when you select the <b>Person, Account, or Bill Details</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a dispute request.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Create Date Time	Displays the date and time when the dispute request is created.
Dispute Request Information	Displays information about the dispute request.
	<b>Note:</b> It has a link. On clicking the link, the <b>Dispute Request</b> screen appears depending on whether the request is for dispute.
Status	Indicates the status of the dispute request.
Account Information	Displays additional information about the account for which the dispute request is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears with the details of the respective account.
Created By	Indicates the user who has created the dispute request.

## Searching for a Dispute Request

### Prerequisites

To search for a dispute request, you should have:

- Dispute request types defined in the application

### Procedure

To search for a dispute request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Dispute Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Dispute Request** sub-menu.  
The **Dispute Request** screen appears.
4. Enter the search criteria in the **Search Dispute Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of dispute requests that meet the search criteria appears in the **Search Results** section.

## Viewing the Dispute Request Details

### Procedure

To view the details of a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to view.

The **Dispute Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute.
  - **Log** – Lists the complete trail of actions performed on the dispute request.
3. View the details of the dispute request in the **Dispute Request** zone.
  4. View the entities such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed in the **Dispute Details** zone.
  5. View the adjustment details of dispute request in the **Dispute Adjustments** zone.
  6. View the details of the bill which must be disputed in the **Previous Dispute Requests** zone.

## Creating a Dispute Request

### Prerequisites

To create a dispute request, you should have:

- Dispute request types defined in the application

### Procedure

To create a dispute request:

1. Do either of the following:

<b>If you want to</b>	<b>Then</b>
<b>Define a dispute request from the Account Receivable Central screen</b>	<p><b>a.</b> Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</p> <p><b>b.</b> From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Account Receivable Central</b>.</p> <p>The <b>Account Receivable Central</b> screen appears.</p> <p><b>c.</b> Search for the bill in the <b>Account Receivable Central</b> screen.</p> <p><b>d.</b> In the <b>Search Results</b> section, select the required bill and then click <b>Dispute</b>.</p> <p><b>Note:</b> Only one bill at a time is allowed to select for <b>Dispute Request</b> from the <b>Account Receivable Central</b> screen.</p>
<b>Define a dispute request from the Dispute Request screen</b>	<p><b>a.</b> Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</p> <p><b>b.</b> From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Dispute Request</b>.</p> <p>A sub-menu appears.</p> <p><b>c.</b> Click the <b>Add</b> option from the <b>Dispute Request</b> sub-menu.</p>

The **Select Dispute Request Type** screen appears. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Dispute Request Type	Used to indicate the request type using which you want to create the dispute request.	Yes
Account ID	Used to search dispute requests which are created for a particular account.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	
Dispute Reason	Used to indicate the dispute requests which are created using a particular dispute reason for the bill.	Yes

**Tip:** Alternatively, you can access the **Select Dispute Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Dispute Request** screen.

2. Select the required dispute request type from the respective field.
3. Click **Save**.

The dispute request is defined and the status of the dispute request is set to **Draft**. The **Dispute Request** screen appears where you can view the details of the dispute request. It contains the following tabs:

**Note:** The dispute request can be created only for bill with zero outstanding amount.

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute.
  - **Log** – Lists the complete trail of actions performed on the dispute request.
4. Add auto payment events, or credit bill line items that you want to dispute.
  5. Edit the dispute amount of each entity, if required.
  6. Define characteristics for the dispute request, if required.

How to define a characteristic for a dispute request	<a href="#">Defining a Characteristic for a Dispute Request</a> on page 1885

## Defining a Characteristic for a Dispute Request

### Prerequisites

To define a characteristic for a dispute request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Dispute Request**)

### Procedure

To define a characteristic for a dispute request:

- Search for the dispute request in the **Dispute Request** screen.
- In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to edit.  
The **Dispute Request** screen appears.
- Click the **Edit** button in the **Dispute Request** zone.  
The **Dispute Request** screen appears.

**Note:** The **Edit** button appears when the dispute request is in the **Draft** status.

- Ensure that the **Characteristics** section is expanded when you are editing the dispute request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the dispute request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the dispute request.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Dispute Request</b> .	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the dispute request.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the dispute request.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the dispute request, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove a characteristic from the dispute request, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Dispute Request (Used for Viewing)

---

Once you create a dispute request, the **Dispute Request** screen allows you to:

- Edit and delete a dispute request
- View the details of a dispute request
- Submit a dispute request for approval
- Approve or reject a dispute request
- View the log of a dispute request
- Add a log entry for a dispute request

This screen consists of the following tabs:

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.
 

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.
- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute. It contains the following zones:
  - **Search Bills** – Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** – Lists the debit and credit bill segments and adjustments of the bill.

This tab appears when the dispute request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the dispute request.

### Dispute Request - Main

---

The **Main** tab displays information about the dispute request. It contains the following zones:

- [Dispute Request](#) on page 1887
- [Dispute Details](#) on page 1888

- [Previous Dispute Requests](#) on page 1890

## Dispute Request

The **Dispute Request** zone displays the details of the dispute request. This zone contains the following sections:

- **Main** – This section provides basic information about the dispute request. It contains the following fields:

Field Name	Field Description
Dispute Request Information	Displays information about the dispute request.
Dispute Request Type	Indicates the dispute request type using which the dispute request is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Dispute Request Type</b> screen appears where you can view the details of the dispute request type.
Status	Indicates the status of the refund request. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> <li>• Cancelled</li> <li>• Rejected</li> <li>• Processed</li> </ul>
Dispute Reason	Indicates the reason why the dispute request is rejected.
Account Information	Indicates the account for which the dispute request is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Comments	Displays additional information about the dispute request.

- **Characteristics** – Lists the characteristics defined for the dispute request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the dispute request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the dispute request.
	<b>Note:</b> The <b>Edit</b> button appears when the dispute request is in the <b>Draft</b> status.
Delete	Used to delete the dispute request.
	<b>Note:</b> The <b>Delete</b> button appears when the dispute request is in the <b>Draft</b> status.
Submit	Used to submit the dispute request for approval.
	<b>Note:</b> The <b>Submit</b> button appears when the dispute request is in the <b>Draft</b> status.
Cancel	Used to cancel the dispute request resubmitted for approval.

Button Name	Button Description
	<b>Note:</b> The <b>Cancel</b> button appears when the dispute request is in the <b>Draft</b> status.
Approve	Used to approve the dispute request. <b>Note:</b> The <b>Approve</b> button appears when: <ul style="list-style-type: none"> <li>The dispute request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the dispute request.</li> </ul>
Reject	Used to reject the dispute request. <b>Note:</b> The <b>Reject</b> button appears when: <ul style="list-style-type: none"> <li>The dispute request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the dispute request.</li> </ul>
Re Submit	Used to resubmit the dispute request to the submitter. <b>Note:</b> The <b>Re-Submit</b> button appears when the dispute request is in the <b>Approval In Progress</b> status.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the dispute request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the dispute request status is updated
Create Date/Time	Displays the date and time when the dispute request is created.

## Dispute Details

The **Dispute Details** zone lists the credit/debit bill line items (such as bill segments and adjustments) that you have added to the dispute request. This zone contains the following columns:

Column Name	Column Description
Entity Type	Indicates whether the entity is a bill, bill segment, or an adjustment.
Entity ID	Displays the entity ID.
Currency	Indicates the currency in which the entity was created.
Dispute Amount	Displays the entity amount.
Adjustment Type	Indicates the adjustment type using which the dispute adjustment must be created.

Column Name	Column Description
	<p><b>Note:</b></p> <p>By default, the adjustment type specified in the dispute request type appears in this column. You can change the adjustment type, if required, by editing the dispute request.</p> <p>It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment.</p>
Stop Auto Pay	<p>Displays whether to stop auto payment or not. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Entity Information	<p>Displays information about the entity. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the respective entity screen appears with the details of the respective entity.</p>

**Note:**

On clicking the Broadcast (📡) icon corresponding to the entity type as **Bill**, the **Dispute Adjustments** and **Previous Dispute Requests** zones appears with the details of the respective bill.

The **Dispute Details** zone appears when the status is **Processed**.

**Dispute Amount** currency will be same as bill or invoice currency. It cannot be zero or null. It will be less than or equal to the original, outstanding bill amount, or bill line item amount if the bill line item contains multiple contract.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

## Dispute Adjustments

The **Dispute Adjustments** zone lists the adjustment details of dispute request. This zone contains the following columns:

Column Name	Column Description
Adjustment Information	<p>Displays information about the adjustments in dispute request.</p> <p><b>Note:</b> It has a link. On clicking the link, the respective <b>Adjustment</b> screen appears with the details of adjustment for respective entity.</p>
Adjustment Amount	Displays the adjustment amount.

**Note:**

On clicking the Broadcast (📡) icon corresponding to the entity type as **Bill**, the **Dispute Adjustments** zone appears with the details of the respective bill.

The **Dispute Adjustments** zone appears when the status is **Processed**.

**Dispute Adjustment Amount** cannot be zero or null, it should be delta amount.

## Dispute Request - Bills

The **Bills** tab allows you to search bills with credit/debit line items, such as credit/debit bill segments and adjustments, that you want to dispute. It contains the following zones:

- [Search Bills](#) on page 1891
- [Bill Line Items](#) on page 1892

### Search Bills

The **Search Bills** zone lists completed bills of the account which are either with credit/debit balance or have one or more credit/debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for a bill using the bill details. The valid values are: <ul style="list-style-type: none"> <li>• Bill Details</li> <li>• Bill and Price Item Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Bill Details</b> option is selected.	
Bill ID	Used to search a particular bill.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears.	
Price Item	Used to search bills which are created for a particular price item.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when you select <b>Bill and Price Item Details</b> option from the <b>Search By</b> list.  You can search for a price item by clicking the <b>Search</b> (🔍) icon corresponding to the field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No

- **Search Results** – On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Bill Amount	Displays the total bill amount.

If you want to dispute a bill with credit/debit balance and all credit/debit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All credit/debit bill segments and adjustments of the bill are added in the **Dispute Details** zone on the **Main** tab. However, if you select a bill (with credit/debit balance) which contains one or more credit/debit line items or if you select a bill (with credit/debit balance) which contains one or more credit/debit line items, the system will not allow you to add the credit/debit line items by directly adding the bill. In such case, you need to individually select the credit/debit bill segments and adjustments of the bill and then add them to the dispute request.

<b>Note:</b>  If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the <b>Search Bills</b> zone. In addition, a bill with all credit line items are not listed in the <b>Search Bills</b> zone.  Multiple bill of same account can be added to the dispute request. Multiple bill line items of any bill can also be added to the dispute request.
---

## Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. If the entity is a bill segment then on clicking the link, the <b>Bill Segment</b> screen appears with the details of the respective bill segment. However, if the entity is an adjustment then on clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.
Entity Amount	Displays the bill segment or adjustment amount.
Currency	Displays the currency in which the amount is billed.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

You can select one or more credit/debit bill segments or adjustments and click the **Add** button in this zone to add selected credit/debit bill segments or adjustments to the dispute request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** (📢) icon corresponding to the bill in the **Search Bills** zone.

## Dispute Request - Log

The **Log** tab contains the following zone:

- [Dispute Request Log](#) on page 1893

### Dispute Request Log

The **Dispute Request Log** zone lists the complete trail of actions performed on the dispute request. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the dispute request.
Details	Displays the details about the action performed on the dispute request.
User	Indicates the user who has performed the action on the dispute request.
Log Type	Indicates the type of log.

Column Name	Column Description
Related Object	Indicates the object or entity which is generated when the action is performed on the dispute request.
Status Reason	Displays the status reason of action performed on the dispute request.

**Note:** You can manually add a log entry for the dispute request by clicking the **Add Log Entry** link in the upper right corner of the **Dispute Request Log** zone.

The **Add Request Log** window appears. Enter **Log Details** and click **Save**. The dispute request log is added.

## Editing a Dispute Request

#### Prerequisites

To edit a dispute request, you should have:

- Adjustment types with A/P request type defined in the application

#### Procedure

To edit a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to edit.  
The **Dispute Request** screen appears.
3. Click the **Edit** button in the **Dispute Request** zone.

The **Dispute Request** screen appears. It contains the following section:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Displays information about the dispute request.	Not applicable
Dispute Reason	Used to indicate the dispute requests which are created using a particular dispute reason for the bill.	Yes
Account Information	Indicates the account for which the dispute request is created.	Not applicable
Comments	Used to specify additional information about the dispute request.	No

In addition, this screen contains the following two sections:

- **Characteristics** – Used to define the characteristics for the dispute request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the dispute request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the dispute request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Dispute Request</b> .
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the dispute request.

4. Modify the details of the dispute request, if required.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Define, edit, or remove characteristics of the dispute request, if required.

6. Click **Save**.

The changes made to the dispute request are saved.

## Submitting a Dispute Request

#### **Prerequisites**

To submit a dispute request, you should have:

- Credit/debit bill line items added in the dispute request

#### **Procedure**

To submit a dispute request:

- Search for the dispute request in the **Dispute Request** screen.
- In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request that you want to submit.  
The **Dispute Request** screen appears.
- Click the **Submit** button in the **Dispute Request** zone.

The system behaves in the following manner:

If...	Then
The <b>Approval Required</b> and <b>Hierarchical Approval</b> check boxes are selected in the dispute request type using which the dispute request is created	A To Do of the <b>C1-DSPSB</b> To Do type is created and sent to the approver at the first level in the approval hierarchy, and the status of the dispute request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is selected, but the <b>Hierarchical Approval</b> check box is not selected in the dispute request type using which the dispute request is created	A To Do of the <b>C1-DSPSB</b> To Do type is created and sent to the approver at the hierarchy level where the total dispute amount falls within the threshold limit. In addition, the status of the dispute request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is not selected in the dispute request type using which the dispute request is created	The dispute adjustments are created using the specified adjustment types and the status of the dispute request is changed to <b>Processed</b> .

#### **Note:**

The **Submit** button appears when the dispute request is in the **Draft** status.

Dispute request with atleast one bill or bill line item has to be added for submission.

**Approving a Dispute Request**

You can view the number of dispute requests which are pending for approval in the **Dispute Request** screen. The approver can review, and accordingly approve or reject the dispute request based on the observations.

**Note:** The system will not allow you to approve or reject a dispute request submitted by you.

**Procedure**

To approve a dispute request:

1. Do either of the following:

If you want to	Then
Approve a dispute request through the <b>Dispute Request</b> screen	<ol style="list-style-type: none"> <li>a. Search for the dispute request in the <b>Dispute Request</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>Dispute Request Information</b> column corresponding to the dispute request which you want to review.</li> </ol>
Approve a dispute request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>c. Enter <b>C1_DISAP</b> in the <b>To Do Type</b> field.</li> <li>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>f. Click the link in the <b>Message</b> column corresponding to the To Do of the dispute request that you want to review.</li> </ol>

The **Dispute Request** screen appears.

2. Review the dispute request details.
3. Click the **Approve** button in the **Dispute Request** zone.

The system behaves in the following manner:

If...	Then
The <b>Hierarchical Approval</b> check box is not selected in the dispute request type using which the dispute request is created	The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to <b>Processed</b> .

**Note:** The **Approve** button appears when:

- The dispute request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the dispute request.

## Rejecting a Dispute Request

### Prerequisites

To reject a dispute request, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting a dispute request, you need to specify the reason why you want to reject the dispute request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-DisputeRequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a dispute request submitted by you.

### Procedure

To reject a dispute request:

1. Do either of the following:

If you want to	Then
<b>Reject a dispute request through the Dispute Request screen</b>	<ol style="list-style-type: none"> <li>a. Search for the dispute request in the <b>Dispute Request</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>Dispute Request Information</b> column corresponding to the dispute request which you want to review.</li> </ol>
<b>Reject a dispute request from the To Do List screen</b>	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> </ol>

If you want to	Then
	<p>c. Enter <b>C1-DISAP</b> in the <b>To Do Type</b> field.</p> <p>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p>f. Click the link in the <b>Message</b> column corresponding to the To Do of the dispute request that you want to review.</p>

The **Dispute Request** screen appears.

- Review the dispute request details.
- Click the **Reject** button in the **Dispute Request** zone.

The **Reject Dispute Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the dispute request.	Yes
Comments	Used to specify additional information while rejecting the dispute request.	No

**Note:** The **Reject** button appears when:

- The dispute request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the dispute request.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

The status of the dispute request is changed to **Rejected**.

## **Resubmitting a Dispute Request**

### **Prerequisites**

To resubmit a dispute request, you should have:

- Entities added in the dispute request which is submitted for approval.

### **Procedure**

To resubmit a dispute request:

- Search for the dispute request in the **Dispute Request** screen.

- In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request that you want to resubmit.  
The **Dispute Request** screen appears.
- Click the **Re Submit** button in the **Dispute Request** zone.  
The **Resubmit Dispute Request** screen appears.

**Note:** The **Resubmit** button appears when the dispute request is in the **Approval In Progress** status.

A To Do of the **C1-DSPSB** To Do type is created and sent to the request submitter using the submitter TO DO Role and the status of the dispute request is changed to **Draft**.

- Enter the comments in the respective field and click **Save**.

**Note:** While resubmitting, To Do will be sent to the submitter of the request using the submitter To Do Role mapped on the dispute request type and the request will be moved to Draft status. The submitter can do necessary changes and re-submit the request. Log will be maintained when the approver sends the request back to submitter.

## Editing the Dispute Details

### Prerequisites

To edit the dispute details, you should have:

- Adjustment types with A/P request type defined in the application

### Procedure

To edit the dispute details:

- Search for the dispute request in the **Dispute Request** screen.
- In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose bill line item details you want to edit.  
The **Dispute Request** screen appears.
- Select the bill whose details you want to edit in the **Dispute Details** zone and click the **Edit** button available in the upper left corner of this zone.  
The **Edit Dispute Details** screen appears.

**Note:** A bill line item from the dispute request can be edited when the dispute request is in the **Draft** status.

The **Edit Dispute Details** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request ID	Displays the dispute request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable

In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	Indicates the entity type. The valid values are <ul style="list-style-type: none"> <li>Adjustments</li> <li>Bill</li> <li>Bill Segment</li> </ul>
Entity ID	Displays the entity ID.
Entity Information	Displays the entity information.
Dispute Amount	Indicates the amount that must be disputed.
Currency	Displays the currency in which the entity was created.
Adjustment Type	Displays the adjustment type using which the dispute adjustment must be created.
Stop Auto Pay	Displays whether auto pay needs to be stopped for the entity of the dispute request.

4. Modify the details of the bill line items.
5. Click **Save**.  
The changes made to the dispute bill line items are saved.

## Adding a Bill to the Dispute Request

You can dispute the credit/debit bills to the account.

### Prerequisites

To add a credit/debit bill to the dispute request, you should have:

- Completed bills for the account with one or more credit/debit line items

### Procedure

To add a credit/debit bill to the dispute request:

- Click the **Bills** tab in the **Dispute Request** screen.  
The **Bills** tab appears.
- Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone.

- Do either of the following:

If...	Then...
A bill has all credit/debit line items and you want to add the credit/debit bill to the dispute request	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, select the bills that you want to dispute.</li> <li>Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol>
A bill has credit balance and one or more debit line items and you want to add the credit bill to the dispute request	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, select the bills that you want to dispute.</li> <li>Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol>

- Click **Add**.

A message appears indicating that the selected bills are added to the dispute request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the dispute request.

- Click **OK**.

Note that all the credit/debit bill segments or adjustments of the bills are added in the **Dispute Details** zone on the **Main** tab.

**Note:** Irrespective of whether you select a credit/debit bill, or credit/debit bill segments or adjustments, the credit/debit bill segments or adjustments are added in the **Dispute Details** zone. The credit/debit bill is not added to the **Dispute Details** zone.

## Adding a Bill Line Item to the Dispute Request

You can dispute the credit/debit bill line items, such as bill segments and adjustments, to the account. While adding a credit/debit bill line item to the dispute request, you can either:

- Directly add all credit/debit line items of a bill to the dispute request by adding the bill which has all bill segments and adjustments in credit
- Individually add a credit bill segment or adjustment of a bill (with one or more credit/debit line items) to the dispute request

### Prerequisites

To add a credit/debit bill line item to the dispute request, you should have:

- Completed bills for the account with one or more credit/debit line items

### Procedure

To add a credit/debit bill line item to the dispute request:

1. Click the **Bills** tab in the **Dispute Request** screen.  
The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

3. Do either of the following:

If...	Then...
A bill has all credit line items and you want to add a particular credit bill line item to the dispute request	<ol style="list-style-type: none"><li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li><li>b. Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.</li></ol>
A bill has credit balance and one or more debit line items	<ol style="list-style-type: none"><li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li><li>b. Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.</li></ol>
A bill has debit balance and one or more credit line items	<ol style="list-style-type: none"><li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li><li>b. Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.</li></ol>

4. Click **Add**.

A message appears indicating that the selected bill segments or adjustments are added to the dispute request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the dispute request.

5. Click **OK**.

Note that the credit bill segments or adjustments are added in the **Dispute Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a credit/debit bill, or credit/debit bill segments or adjustments, the credit/debit bill segments or adjustments are added in the **Dispute Details** zone. The credit bill is not added to the **Dispute Details** zone.

The system will not allow you to add a debit line item to the **Dispute Details** zone.

## Viewing the Log of a Dispute Request

**Procedure**

To view the log of a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose log you want to view.

The **Dispute Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute. It contains the following zones:
  - **Search Bills** – Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** – Lists the debit and credit bill segments and adjustments of the bill.

This tab appears when the dispute request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the dispute request.
3. Click the **Log** tab.
  4. View the log of the dispute request in the **Dispute Request Log** zone.

**Note:** You can manually add a log entry for the dispute request by clicking the **Add Log Entry** link in the upper right corner of the **Dispute Request Log** zone.

# Adding a Log Entry for a Dispute Request

**Procedure**

To add a log entry for a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose log you want to edit.

The **Dispute Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute. It contains the following zones:
  - **Search Bills** – Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** – Lists the debit and credit bill segments and adjustments of the bill.

This tab appears when the dispute request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the dispute request.
3. Click the **Log** tab.  
The **Log** tab appears.
  4. Click the **Add Log Entry** link in the upper right corner of the **Dispute Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the dispute request.	Not applicable
Log Details	Used to specify additional comments for the dispute request.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Dispute Request Log** zone.

- [Financial Transaction Distribution \(Used for Viewing\)](#)

Oracle Revenue Management and Billing enables you to generate the earnings credit rate (ECR) when the account is eligible for earnings credit rate and is associated with a contract of a contract type where the **Financial Transaction Distribution Object** characteristic is defined. In other words, the system enables you to create the financial transaction distribution (ECR) object when the adjustment and/or bill segment financial transaction created against an ECR contract is frozen. The status of the financial transaction distribution object is set to **Pending**.

To enable the Earnings Credit Rate (ECR) feature, you need to setup the following:

- **Financial Transaction Distribution Type** – A financial transaction distribution type is an object which controls the distribution of a credit and debit bill segment or adjustment financial transaction. It is associated to a contract type through a financial transaction distribution object. It helps the system to determine:
  - Whether it is defined for adjustment or bill segment financial transactions whose credit or debit amount should be distributed.
  - The type of adjustment (such as transfer adjustment) should be created when the credit or debit amount on the financial transaction distribution object is distributed.
  - The financial transaction distribution rule using which the credit or debit amount on the financial transaction distribution object should be distributed.
  - Whether the credit or debit amount on the financial transaction distribution object should be used to offset an adjustment or bill segment of the same account (where ECR is earned), another account of the customer (for whom ECR is earned), or the account identified as per the distribution hierarchy.
  - Whether the credit or debit amount on the financial transaction distribution object should be written off when it is equal to or less than the write off threshold amount.
  - The type of adjustment that should be created when the credit or debit amount on the financial transaction distribution object is written off.
  - The type of adjustment that should be created when the credit or debit amount on the financial transaction distribution object is expired.
  - The type of adjustment that should be created when the excess credit amount on the financial transaction distribution object is refunded at the end of the year.
  - The business object using which the financial transaction distribution object should be created.

- **Financial Transaction Distribution Rule** – A financial transaction distribution rule is associated with one or more financial transaction distribution types. It helps the system to determine:
  - The method using which the credit or debit amount on the financial transaction distribution object should be distributed. If the distribution method is set to **Fee Based**, the system will distribute the credit or debit amount on the financial transaction distribution object to offset fees starting from the highest to lowest amount. If the distribution method is set to **Priority Based**, the system will distribute the credit or debit amount on the financial transaction distribution object to the accounts in the order of their account distribution priority. If the distribution method is set to **Weighted Average**, the system will distribute the credit or debit amount on the financial transaction distribution object to the accounts in the weighted average ratio.
  - The distribution hierarchy using which the accounts, to which the credit or debit amount on the financial transaction distribution object should be distributed, should be derived.
  - The priority in which the objects, such as adjustments of a particular adjustment type or bill segments created for a particular price item, should be offset using the credit or debit amount on the financial transaction distribution object.
  - The objects, such as adjustments of a particular adjustment type or bill segments created for a particular price item, should be excluded from offsetting.
  - Algorithms that should be used to select the accounts, interpret the order of distribution, and then distribute the credit or debit amount.
- **Expiration Cycle** – An expiration cycle is an extendable lookup reference object which indicates the frequency at which the financial transaction distribution object created for the account should be expired (i.e. after two months or 45 days from the date of creation). You can associate an expiration cycle with one or more accounts.
- **Distribution Hierarchy** – A distribution hierarchy is an extendable lookup reference object which indicates the list of hierarchies that should be considered while deriving accounts for offsetting the credit or debit amount on the financial transaction distribution object. The valid hierarchy lists are:
  - **IGA Member Accounts Same Division** – If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against other member accounts of an invoicing group in which the source account is also a member account.
  - **Person Relationship (Child) Same Division** – If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the child persons' accounts who are related to the parent person (i.e. source customer) using a particular relationship type and belongs to the same division.
  - **Person Relationship (Child) Other Division** – If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the child persons' accounts who are related to the parent person (i.e. source customer) using a particular relationship type and belongs to a different division.
  - **Person Relationship (Parent) Same Division** – If this option is selected, the system will first offset the credit or debit amount on the

financial transaction distribution object against the source account, other accounts of the source customer, and then against the parent persons' accounts who are related to the child person (i.e. source customer) using a particular relationship type and belongs to the same division.

- **Person Relationship (Parent) Other Division** – If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the parent persons' accounts who are related to the child person (i.e. source customer) using a particular relationship type and belongs to a different division.

You can associate a distribution hierarchy with one or more financial transaction distribution rules.

- **Financial Transaction Distribution Object** – A financial transaction distribution type is associated to a contract type through a financial transaction distribution object. You can include multiple financial transaction distribution types in a financial transaction distribution object. You can associate a financial transaction distribution object to one or more contract types.
- **Earnings Credit Rate Eligibility** – You can define earnings credit rate eligibility for each account in the system. It helps the system to determine:
  - Whether the account is eligible for generating earnings credit rate (i.e. financial transaction distribution object).
  - Whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.
  - The priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.
  - The expiration cycle for the account.

The following two batches are introduced in this release:

- **Financial Transaction Distribution Monitor (C1-FTDPR)** – It is used to monitor or check whether there are any financial transaction distribution objects in the Pending status. If there is a financial transaction distribution object in the Pending status, the system validates the financial transaction distribution object and changes the status of the financial transaction distribution object to Validated. From the Validated status, the status of the financial transaction distribution object is changed to either of the following:
  - **Refund** (when there is excess credit amount on the financial transaction distribution object at the end of the year and the source account belongs to a particular customer class where refund is allowed).
  - **Write Off** (when the credit or debit amount on the financial transaction distribution object is equal to or less than the write off threshold amount)
  - **Expire** (when the credit or debit amount on the financial transaction distribution object is expired)

Accordingly, the refund, write off, and expire adjustments are created. However, if none of the above conditions are met, the status of the financial transaction distribution object remains as **Validated**.

- **FT Distribution Single Threaded Transition Batch (C1-FTDTS)** – It is used to monitor or check whether there are any financial transaction distribution objects in the Validated status. If there is a financial transaction distribution object in the Validated status, the system changes the status of the financial transaction distribution object to **Apply Rule** and executes

the algorithm attached to the **Apply Rule** system event on the financial transaction distribution rule version which is effective on the batch business date. Once the credit or debit distribution array of accounts is created, the status of the financial transaction distribution object is changed to **Distributed** and then the algorithm attached to the Distribute system event on the financial transaction distribution rule version which is effective on the batch business date is executed. On the credit or debit amount distribution, two adjustments are created – one against the source contract and another against the bill segment or adjustment's contract to which the amount is distributed. Once the credit or debit amount on the financial transaction distribution object is fully distributed, the status of the financial transaction distribution object is changed to **Complete**. However, if the credit or debit amount on the financial transaction distribution object is not yet fully distributed, the status of the financial transaction distribution object is changed to **Validated**.

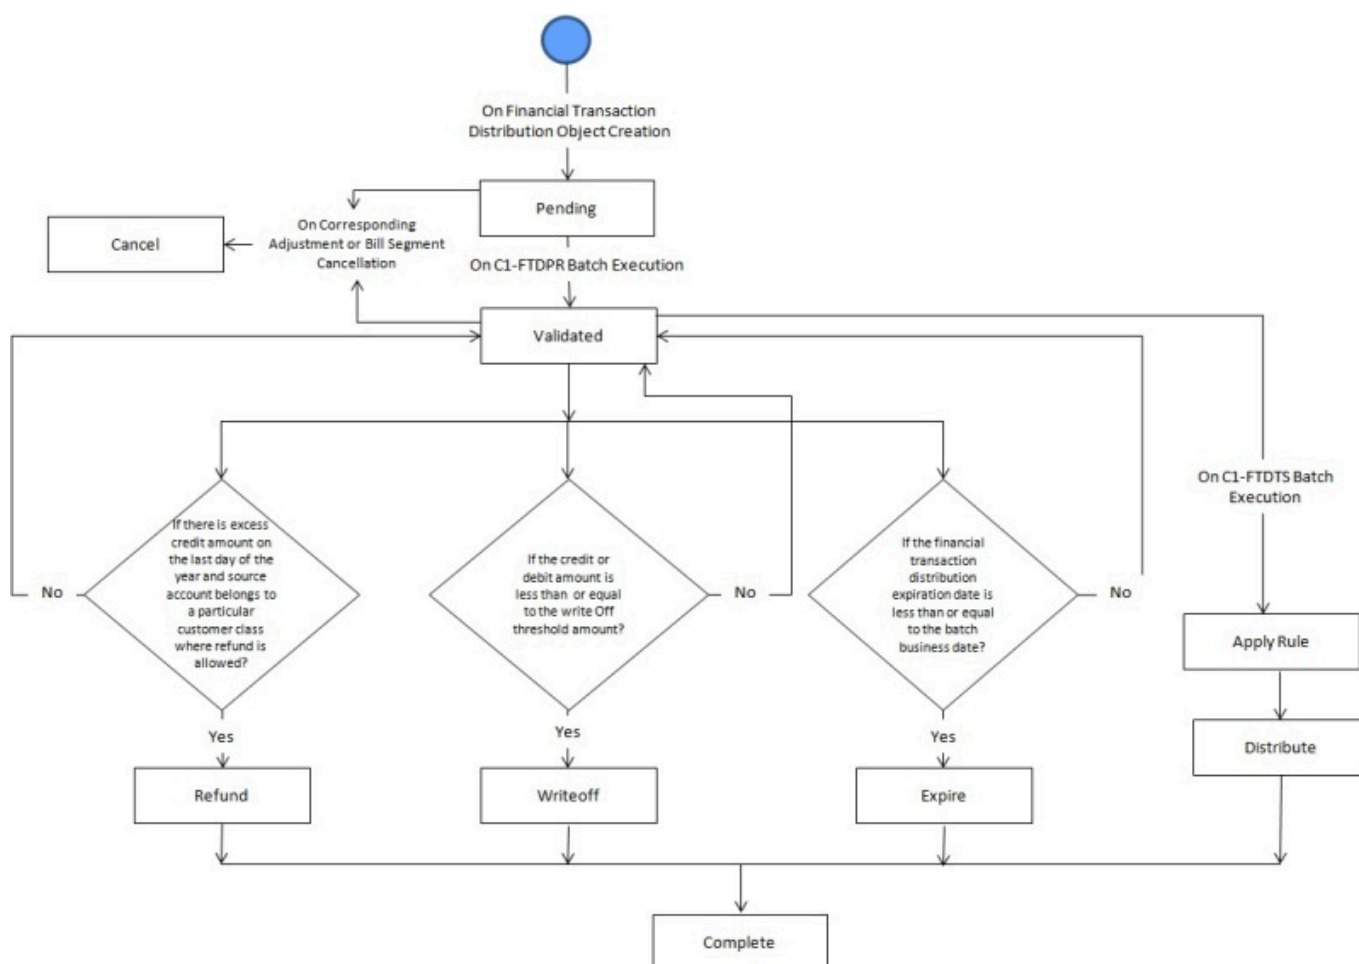

## Prerequisites

To setup the earnings credit rate process, you need to do the following:

- Add the earnings credit rate to the eligible accounts.
- Define the required financial transaction distribution types in the system.
- Define the required financial transaction distribution rules in the system.
- Define the following extendable lookup reference objects in the system:
  - Expiration Cycle
  - Distribution Hierarchy
  - Financial transaction distribution object

## Financial Transaction Distribution Object Status Transition

The following figure graphically indicates how an financial transaction distribution object is created in the system:

**Note:** For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

## Algorithms Used in C1-FTDIST

The following table lists the algorithms which are attached to the **C1-FTDIST** business object:

System Event	Algorithm	Algorithm Type	Description																																
Information	C1-FTDISTINF	C1-FTDISTINF	This algorithm formats the FT Distribution that appears throughout the system. It concatenates the fields and separator specified as algorithm parameters. Possible fields are:																																
			<table><tr><th>Field</th><th>Description</th></tr><tr><td>ACCT_ID</td><td>Account ID</td></tr><tr><td>ADJ_ID</td><td>Adjustment ID</td></tr><tr><td>BO_STATUS_CD</td><td>Status</td></tr><tr><td>BO_STATUS_REASON_CD</td><td>Status Reason</td></tr><tr><td>BSEG_ID</td><td>Bill Segement ID</td></tr><tr><td>BUS_OBJ_CD</td><td>Business Object</td></tr><tr><td>CRE_DTTM</td><td>Creation Date/Time</td></tr><tr><td>EXPIRATION_DT</td><td>Expiration Date</td></tr><tr><td>FT_DISTRIBUTION_ID</td><td>FT Distribution</td></tr><tr><td>FT_DIST_TYPE_CD</td><td>FT Distribution Type</td></tr><tr><td>FT_ID</td><td>FT ID</td></tr><tr><td>ILM DT</td><td>ILM Date</td></tr><tr><td>SA_ID</td><td>SA ID</td></tr><tr><td>STATUS_UPD_DTTM</td><td>Status Update Date/Time</td></tr><tr><td>TOT_AMT</td><td>Payoff Amount</td></tr></table>	Field	Description	ACCT_ID	Account ID	ADJ_ID	Adjustment ID	BO_STATUS_CD	Status	BO_STATUS_REASON_CD	Status Reason	BSEG_ID	Bill Segement ID	BUS_OBJ_CD	Business Object	CRE_DTTM	Creation Date/Time	EXPIRATION_DT	Expiration Date	FT_DISTRIBUTION_ID	FT Distribution	FT_DIST_TYPE_CD	FT Distribution Type	FT_ID	FT ID	ILM DT	ILM Date	SA_ID	SA ID	STATUS_UPD_DTTM	Status Update Date/Time	TOT_AMT	Payoff Amount

			FT_DIST_TYPE_CD	FT Distribution Type																															
			FT_ID	FT ID																															
			ILM DT	ILM Date																															
			SA_ID	SA ID																															
			STATUS_UPD_DTTM	Status Update Date/Time																															
			TOT_AMT	Payoff Amount																															
			Validation	C1-VALFTDIST	C1-VALFTDIST	<p>This algorithm validates the Business Object - Financial Transaction Distribution, which includes:</p> <ul style="list-style-type: none"><li>Adjustment ID or Bill Segment ID must be supplied.</li></ul>																													

The following table lists the algorithms which are used in the lifecycle of the **C1-FTDIST** business object:

Status	System Event	Algorithm	Algorithm Type	Description
In Progress	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either one but not both soft parameters may be specified.

Status	System Event	Algorithm	Algorithm Type	Description
				If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Validate	Monitor	C1-FTDVALIDT	C1-FTDVALIDT	<p>This algorithm transitions the FT Distribution record from validate to any of the following statuses based on certain conditions:</p> <ul style="list-style-type: none"> <li>• It transitions to <b>Expire</b> status (based on Parameter Expire Status Transition Condition) when the credit is not fully distributed and process date is before or on the same day as the Expiration Date defined in the record.</li> <li>• It transitions to <b>Write Off</b> status (based on Parameter Write Off Status Transition Condition) when the Total Amount is less than or equal to the Write Off Threshold defined in the FT Distribution Type linked to the record. It also uses Parameter Handle Negative or Positive for Write Off. If the Parameter is Negative and the Payoff Amount of the record is negative or the Parameter is Positive and the Payoff Amount of the record is positive, then proceed with Write Off.</li> <li>• It transitions to <b>Refund status</b> (based on Parameter Refund Status Transition Condition) when the Parameter Refund at End of Year is Y and the record's source account's customer class is equal to Parameter Applicable Customer Class for Refund. If none of the conditions are met, the record remains at Validate status.</li> </ul> <p>If none of the conditions are met, the record remains at <b>Validate</b> status.</p>
Apply Rule	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either of the one soft parameters may be specified. If

Status	System Event	Algorithm	Algorithm Type	Description
				both the soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Apply Rule	Enter	C1-FTDAPRL	C1-FTDAPRL	This algorithm will call the pre-processing and apply rule algorithms that are configured in the effective rule version of the FT Distribution Rule of the Financial Transaction Distribution record's FT Distribution Type.
Distributed	Enter	C1-FTDDIST	C1-FTDDIST	This algorithm will trigger the distribute algorithms configured in the effective rule version of the FT Distribution Rule linked to the FT Distribution Type of the Financial Transaction Distribution record. After invoking the algorithms, the FT Distribution amount is compared to the sum of the distribution amounts with frozen transfer adjustments in the list. If the amounts are equal, the FT Distribution record is transitioned to <b>Complete</b> (based on the Parameter Complete Status Transition Condition). Otherwise, it is transitioned back to <b>Validate</b> (based on the Validate Status Transition Condition).
Expire	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Expire	Enter	C1-FTDEXP	C1-FTDEXP	This algorithm expires credit amount by creating an expiration adjustment defined in the FT Distribution Type. The Expiration Adjustment created will have a characteristic of type Parameter Financial Transaction Distribution Characteristic Type and

Status	System Event	Algorithm	Algorithm Type	Description
				value equal to the FT Distribution ID. The FT Distribution record will have a characteristic of type Write off Adjustment with value equal to the Expiration Adjustment ID.
Refund	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either of the one soft parameters may be specified. If both the soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Refund	Enter	C1-FTDREFUND	C1-FTDREFUND	This algorithm refunds the credit amount by creating a refund adjustment defined in the FT Distribution Type. The Refund Adjustment will be linked to the Refund Contract (with type equal to Parameter Refund Contract Type) attached to the source Account of the FT Distribution. The Refund Adjustment will be linked to the FT Distribution via a characteristic with type Parameter Financial Transaction Distribution Characteristic Type. Also, the FT Distribution record will have a characteristic of type Refund Adjustment with value equal to the Refund Adjustment ID.
Write Off	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Write Off	Enter	C1-FTDWRTOFF	C1-FTDWRTOFF	This algorithm writes off the credit amount by creating a write off adjustment defined in the FT Distribution Type. The Write off

Status	System Event	Algorithm	Algorithm Type	Description
				Adjustment created will have a characteristic of type Parameter Financial Transaction Distribution Characteristic Type and value equal to the FT Distribution ID. The FT Distribution record will have a characteristic of type Write Off Adjustment with value equal to the Write Off Adjustment ID.
Cancel	Enter	C1-FTDCANCEL	C1-FTDCANCEL	This algorithm will cancel all the transfer adjustments listed in the Financial Transaction Distribution record's Distribution List. The cancel reason code will be copied or taken from the original Distribution Object's cancel reason. If it is not provided, it will use the parameter Default Cancel Reason.
Complete	Enter	C1-FTDCOMP	C1-FTDCOMP	This algorithm will trigger the post-processing algorithms configured in the effective rule version of the FT Distribution Rule linked to the FT Distribution Type of the Financial Transaction Distribution record.

## Earnings Credit Rate Eligibility

This screen allows you to add earnings credit rate eligibility for each account in the system and helps you to determine the following:

- Whether the account is eligible for generating earnings credit rate (i.e. financial transaction distribution object).
- Whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.
- The priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.
- The expiration cycle for the account.

This screen contains the following zone:

- [Earnings Credit Rate Eligibility](#) on page 1918

## Earnings Credit Rate Eligibility

The **Earnings Credit Rate Eligibility** zone allows you to add earnings credit rate eligibility for each account in the system.

This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Earnings Credit Rate ID	Displays the earnings credit rate ID.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search for a particular account.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	
Earnings Credit Rate Eligible	Used to define whether an earned credit rate can be calculated and created for the account or not.	No
Offset Eligibility	Used to define whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.	No
Offset Distribution Type	Used to search the financial transaction distribution type which would be used to offset the credit or debit amount from another account. If this field is left blank, then the financial transaction distribution type for the earning credit rate source account will be used.	No
	<b>Note:</b>  This field is enabled when the <b>Offset Eligibility</b> check box is selected. This field is enabled when the <b>Offset Eligibility</b> check box is selected.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.	
Account Distribution Priority	Used to indicate the priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.	No
Expiration Cycle	Used to indicate the expiration cycle for the account.	Yes

### Related Topics

How to define earnings credit rate eligibility for an account	<a href="#">Defining Earnings Credit Rate Eligibility for an Account</a> on page 1919

## Defining Earnings Credit Rate Eligibility for an Account

### Prerequisites

To define an earnings credit rate eligibility for an account, you should have:

- Accounts defined in the application.
- Expiration cycle defined in the application.
- Financial transaction distribution type defined in the application.

## Procedure

To define earnings credit rate eligibility for an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Earnings Credit Rate Eligibility**.  
The **Earnings Credit Rate Eligibility** screen appears. It contains the following section:
  - **Main** – Used to add the basic details about the earnings credit rate eligibility for an account. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Earnings Credit Rate ID	Displays the earnings credit rate ID.	Not applicable
Account ID	Used to search for a particular account.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	
Earnings Credit Rate Eligible	Used to define whether an earned credit rate can be calculated and created for the account or not.	No
Offset Eligibility	Used to define whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.	No
Offset Distribution Type	Used to search the financial transaction distribution type which would be used to offset the credit or debit amount from another account. If this field is left blank, then the financial transaction distribution type for the earning credit rate source account will be used.	No
	<b>Note:</b>  This field is enabled when the <b>Offset Eligibility</b> check box is selected. This field is enabled when the <b>Offset Eligibility</b> check box is selected.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.	
Account Distribution Priority	Used to indicate the priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.	No
Expiration Cycle	Used to indicate the expiration cycle for the account.	Yes

3. Enter the required details.
4. Click **Save**.  
The earnings credit rate eligibility is defined for the account.

## Financial Transaction Distribution Type

---

The **Financial Transaction Distribution Type** screen allows you to define, edit, copy, and delete a financial transaction distribution object type.

This screen contains the following zones:

- [Financial Transaction Distribution Type List](#) on page 1921
- [Financial Transaction Distribution Type](#) on page 1922

## Financial Transaction Distribution Type List

---

The **Financial Transaction Distribution Type List** zone allows you to view the list of financial transaction distribution types that are already defined in the system.

This zone contains the following columns:

Column Name	Column Description
FT Distribution Type	Displays the financial transaction distribution type.
Description	Displays the description of the financial transaction distribution type.  <b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction Distribution Type</b> zone appears with the details of the respective financial transaction distribution type.
Related Transaction BO	Displays the corresponding transaction business object. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.
FT Adjustment Type	Displays the adjustment type used in the financial transaction adjustment.
Distribution Object Type	Displays the financial transaction object type used in distributing the credit.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>FT Distribution Type</b> screen appears where you can edit the details of the financial transaction distribution type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>FT Distribution Type</b> screen appears where you can define a financial transaction distribution type using an existing financial transaction distribution type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the financial transaction distribution type.

On clicking the **Broadcast** (📡) icon corresponding to the financial transaction distribution type, the **Financial Transaction Distribution Type** zone appears with the details of the respective financial transaction distribution type.

You can filter the list using the **Financial Transaction Distribution Type**, **Description**, or **Financial Transaction Object Type** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Financial Transaction Distribution Type

The **Financial Transaction Distribution Type** zone displays the details of the financial transaction distribution types that are already defined in the system. This zone contains the following sections:

- **Main** – This section provides basic information about the financial transaction distribution type. It contains the following fields:

Field Name	Field Description
FT Distribution Type	Displays the financial transaction distribution type.
Description	Displays the description of the financial transaction distribution type.
FT Object Type	Indicates the business object that will be used to create the financial transaction distribution type.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
FT Adjustment Type	Displays the adjustment type used in the financial transaction adjustment.
Distribution Object Type	Displays the financial transaction object type used in distributing the credit.
Distribution Adjustment Type	Displays the adjustment type which is used for distribution if the <b>Transfer Adjustment</b> option is selected from the <b>Distribution Object Type</b> list.

Field Name	Field Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
FT Distribution Rule	Displays the financial transaction distribution rule to be used for distributing the credit or debit in an account. <b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction Distribution Rule</b> screen appears where you can view the details of the respective financial transaction distribution rule.
Write Off Threshold Amount	Displays the minimum credit amount for write off. Any amount specified in this field is assumed to be negative. For example, a value of “2” is treated as “-2”. Such that if the credit is only “-2”, then this will be written off instead of distributing it to offset.
Write Off Adjustment Type	Displays the adjustment type used for write off. <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Expiration Adjustment Type	Displays the adjustment type used for expiration. <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Refund Adjustment Type	Displays the adjustment type used for refund. <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Offset Indicator	Displays whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.
Related Transaction BO	Displays the object using which financial transaction object is created. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Characteristics** – This section lists the characteristics of the financial transaction distribution type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the financial transaction distribution type.
Delete	Used to delete the financial transaction distribution type.
Duplicate	Used to create a new financial transaction distribution type using an existing financial transaction distribution type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Financial Transaction Distribution Type** zone does not appear in the **Financial Transaction Distribution Type** screen. It appears when you click the **Broadcast** (📢) icon corresponding to the financial transaction distribution type in the **Financial Transaction Distribution Type List** zone.

## Defining a Financial Transaction Distribution Type

### Prerequisites

To define a financial transaction distribution type, you should have:

- Financial transaction distribution objects defined in the application.
- Adjustment types defined in the application.
- Financial transaction distribution rule defined in the application.
- Required characteristics defined in the application.

### Procedure

To define a financial transaction distribution type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.

2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Financial Transaction Distribution Type** sub-menu.

The **Financial Transaction Distribution Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details of the financial transaction distribution type.
- **Characteristics** – Used to define the characteristics for the financial transaction distribution type.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to specify the financial transaction distribution type.	Yes
Description	Used to specify the description of the financial transaction distribution type.	Yes
FT Object Type	Used to indicate the business object that will be used to create the financial transaction distribution type. The valid values are: <ul style="list-style-type: none"> <li>• Adjustment</li> <li>• Bill Segment</li> </ul>	Yes
FT Adjustment Type	Used to indicate the adjustment type used in the financial transaction adjustment.	Yes (Conditional)
	<b>Note:</b> By default, this field is disabled. This field gets enabled when you select <b>Adjustment</b> option from the <b>FT Object Type</b> list.	<b>Note:</b> This field is required when you are selecting the <b>Adjustment</b> option for the <b>FT Object Type</b> list.
Distribution Object Type	Used to indicate the financial transaction object type used in distribution.	Yes
Distribution Adjustment Type	Used to indicate the adjustment type which is used for distribution if the <b>Transfer Adjustment</b> option is selected from the <b>Distribution Object Type</b> list.	No
FT Distribution Rule	Used to indicate the financial transaction distribution rule to be used for distributing the credit or debit in an account.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.	
Offset Indicator	Used to indicate whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.	No

Field Name	Field Description	Mandatory (Yes or No)
Write Off Threshold Amount	Used to specify the minimum credit amount for write off.	Yes (Conditional)
		<b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Write Off Adjustment Type	Used to indicate the adjustment type used for write off.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)
		<b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Expiration Adjustment Type	Used to indicate the adjustment type used for expiration.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)
		<b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Refund Adjustment Type	Used to indicate the adjustment type used for refund.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)
		<b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Related Transaction BO	Used to indicate the object using which financial transaction object is created.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Business Object Search</b> window appears.	Yes

**Characteristics** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the financial transaction distribution type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Column Name	Column Description	Mandatory (Yes or No)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the financial transaction distribution type.

**Tip:** Alternatively, you can access the **Financial Transaction Distribution Type** screen by clicking the **Add** button in the **Page Title** area of the **Financial Transaction Distribution Type** screen.

- Enter the required details.
- Define characteristics for the financial transaction distribution type, if required.
- Click **Save**.  
The financial transaction distribution type is defined.

## Copying a Financial Transaction Distribution Type

Instead of creating a financial transaction distribution type from scratch, you can create a new financial transaction distribution type using an existing financial transaction distribution type. This is possible through copying a financial transaction distribution type. On copying a financial transaction distribution type, the details including the characteristics are copied to the new financial transaction distribution type. You can then edit the details, if required.

**Prerequisites**

To copy a financial transaction distribution type, you should have:

- Financial transaction distribution type (whose copy you want to create) defined in the application
- Financial transaction distribution type business objects defined in the application

**Procedure**

To copy a financial transaction distribution type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Type** sub-menu.  
The **Financial Transaction Distribution Type** screen appears.
4. In the **Financial Transaction Distribution Type List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the financial transaction distribution type whose copy you want to create.

The **Financial Transaction Distribution Type** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the financial transaction distribution type.
- **Characteristics** — Used to define the characteristics for the financial transaction distribution type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to specify the financial transaction distribution type.	Yes
Description	Used to specify the description of the financial transaction distribution type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
FT Object Type	Used to indicate the business object that will be used to create the financial transaction distribution type. The valid values are: <ul style="list-style-type: none"> <li>Adjustment</li> <li>Bill Segment</li> </ul>	Yes
FT Adjustment Type	Used to indicate the adjustment type used in the financial transaction adjustment.	Yes (Conditional)
	<b>Note:</b> By default, this field is disabled. This field gets enabled when you select <b>Adjustment</b> option from the <b>FT Object Type</b> list.	<b>Note:</b> This field is required when you are selecting the <b>Adjustment</b> option for the <b>FT Object Type</b> list.
Distribution Object Type	Used to indicate the financial transaction object type used in distribution.	Yes
Distribution Adjustment Type	Used to indicate the adjustment type which is used for distribution if the <b>Transfer Adjustment</b> option is selected from the <b>Distribution Object Type</b> list.	No
FT Distribution Rule	Used to indicate the financial transaction distribution rule to be used for distributing the credit or debit in an account.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.	
Offset Indicator	Used to indicate whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.	No
Write Off Threshold Amount	Used to specify the minimum credit amount for write off.	Yes (Conditional)
		<b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Write Off Adjustment Type	Used to indicate the adjustment type used for write off.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	<b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.

Field Name	Field Description	Mandatory (Yes or No)
Expiration Adjustment Type	Used to indicate the adjustment type used for expiration.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	<b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Refund Adjustment Type	Used to indicate the adjustment type used for refund.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	<b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Related Transaction BO	Used to indicate the object using which financial transaction object is created.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Business Object Search</b> window appears.	

**Tip:** Alternatively, you can click the **Duplicate** button in the **Financial Transaction Distribution Type** zone to create a copy of the financial transaction distribution type

- Enter the required details.
- Define, edit, or remove characteristics of the financial transaction distribution type, if required.
- Click **Save**.  
The new financial transaction distribution type is defined.

## Financial Transaction Distribution Rule

The **Financial Transaction Distribution Rule** zone allows you to view the details of financial transaction distribution rule. This zone contains the following sections:

- **Main** – This section displays the details of the financial transaction distribution rule. It contains the following columns:

Column Name	Column Description
FT Distribution Rule	Displays the financial transaction distribution rule.
Description	Displays the description of the financial transaction distribution rule.
Detailed Description	Displays the additional information about the financial transaction distribution rule.
Distribution Method	Indicates the principle for distributing credit for the accounts other than the credit or debit source account. The valid values are: <ul style="list-style-type: none"> <li>• Fee Based</li> <li>• Priority Based</li> <li>• Weighted Average</li> </ul>
Distribution Hierarchy	Indicates the hierarchy of accounts in which the distribution needs to be made.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Financial Transaction Distribution Rule</b> screen appears where you can edit the details of the financial transaction distribution rule.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Financial Transaction Distribution Rule</b> screen appears where you can define a financial transaction distribution rule using an existing financial transaction distribution rule.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the financial transaction distribution rule.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the financial transaction distribution rule
Delete	Used to delete the financial transaction distribution rule.
Duplicate	Used to create a new financial transaction distribution rule using an existing financial transaction distribution rule.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution rule is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Financial Transaction Distribution Rule** zone does not appear in the **Financial Transaction Distribution Rule** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule of the **Financial Transaction Distribution Rule List** zone.

## Financial Transaction Distribution Rule Version List

The **Financial Transaction Distribution Rule Version List** zone allows you to view the list of financial transaction distribution rule version that are already defined in the system and are used as the basis for credit distribution.

This zone contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.
Description	Displays the description of the associated financial transaction distribution rule.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Financial Transaction Distribution Rule Version</b> screen appears where you can edit the details of the financial transaction distribution rule version.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Financial Transaction Distribution Rule Version</b> screen appears where you can define a financial transaction distribution rule version using an existing financial transaction distribution rule version.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the financial transaction distribution version.

By default, the **Financial Transaction Distribution Rule Version** zone does not appear in the **Financial Transaction Distribution Rule** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule of the **Financial Transaction Distribution Rule List** zone.

You can filter the list using the **Description** or **Effective Date** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Financial Transaction Distribution Rule Version

The **Financial Transaction Distribution Rule Version** zone allows you to view the details of the financial transaction distribution rule version. This zone contains the following sections:

- **Main** – This section displays the details of the financial transaction distribution rule version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.
Version Description	Displays the description of the financial transaction distribution rule version.
Detailed Description	Displays the additional information about the financial transaction distribution rule version.

- **Included Objects** – This section displays the list of object that are included for credit distribution. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence in which the objects should be included in the financial transaction distribution rule version.
Priority	Displays the sequence of objects for the credit or debit distribution within an account.
Object Type	Displays the type of object.
Value	Displays the value of the object type.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p>
Bill Status	Displays the status of the bill.

- **Excluded Objects** – This section displays the list of object that are excluded from credit distribution. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence in which the objects should be excluded from the financial transaction distribution rule version.
Object Type	Displays the type of object.
Value	Displays the value of the object type.
	<b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Business Object Search</b> window appears.

- **Algorithms** – This section displays the list of algorithms that are included. It contains the following columns:

Column Name	Column Description
System Event	Indicates the system event on which the algorithm must be executed.
Sequence	Displays the order in which the algorithms for each system event must be executed.
Algorithm	Displays the algorithm code.
	<b>Note:</b> It has a link. On clicking the link, <b>Algorithm</b> screen appears with the details of the respective algorithm.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the financial transaction distribution rule version.
Delete	Used to delete the financial transaction distribution rule version.
Duplicate	Used to create a new financial transaction distribution rule version using an existing financial transaction distribution rule version.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution rule version is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.

By default, the **Financial Transaction Distribution Rule Version** zone does not appear in the **Financial Transaction Distribution Rule** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule version of the **Financial Transaction Distribution Rule Version List** zone.

## Defining a Financial Transaction Distribution Rule

### Prerequisites

To define a financial transaction distribution rule, you should have:

- Distribution method and hierarchy defined in the application.

### Procedure

To define a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Add** option from the **Financial Transaction Distribution Rule** sub-menu.

The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the financial transaction distribution rule.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: <ul style="list-style-type: none"> <li>• Fee Based</li> <li>• Priority Based</li> <li>• Weighted Average</li> </ul>	Yes
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

**Tip:** Alternatively, you can access the **Financial Transaction Distribution Rule** screen by clicking the **Add** button in the **Page Title** area of the **Financial Transaction Distribution Rule** screen.

4. Enter the required details.

5. Click **Save**.

The financial transaction distribution rule is defined.

## Editing a Financial Transaction Distribution Rule

### Procedure

To edit a financial transaction distribution rule:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
- Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
- In the **Financial Transaction Distribution Rule List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

- Main** – Used to specify basic details about the financial transaction distribution rule.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: <ul style="list-style-type: none"> <li>Fee Based</li> <li>Priority Based</li> <li>Weighted Average</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

**Tip:** Alternatively, you can click the **Edit** button in the **Financial Transaction Distribution Rule** zone to edit the details of the financial transaction distribution rule.

- Modify the details of the financial transaction distribution rule.
- Click **Save**.  
The changes made to the financial transaction distribution rule are saved.

## Deleting a Financial Transaction Distribution Rule

### Procedure

To delete a financial transaction distribution rule:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
- Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
- In the **Financial Transaction Distribution Rule List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the financial transaction distribution rule that you want to delete.  
  
A message appears confirming whether you want to delete the financial transaction distribution rule.

**Tip:** Alternatively, you can click the **Delete** button in the **Financial Transaction Distribution Rule** zone to delete the financial transaction distribution rule.

- Click **OK**.  
The financial transaction distribution rule is deleted.

## Copying a Financial Transaction Distribution Rule

Instead of creating a financial transaction distribution rule from scratch, you can create a new financial transaction distribution rule using an existing financial transaction distribution rule. This is possible through copying a financial transaction distribution rule. On copying a financial transaction distribution rule, the details are copied to the new financial transaction distribution rule. You can then edit the details, if required.

### Prerequisites

To copy a financial transaction distribution rule, you should have:

- Financial transaction distribution rule (whose copy you want to create) defined in the application
- Financial transaction distribution rule business objects defined in the application

### Procedure

To copy a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the financial transaction distribution rule whose copy you want to create.

The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the financial transaction distribution rule.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: <ul style="list-style-type: none"> <li>• Fee Based</li> <li>• Priority Based</li> <li>• Weighted Average</li> </ul>	Yes
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

**Tip:** Alternatively, you can click the **Duplicate** button in the **Financial Transaction Distribution Rule** zone to create a copy of the financial transaction distribution rule.

5. Enter the required details.
6. Click **Save**.  
The new financial transaction distribution rule is defined.

## Defining a Financial Transaction Distribution Rule Version

### Prerequisites

To define a financial transaction distribution rule version, you should have:

- Financial transaction distribution rule defined in the application.
- Object types and algorithms defined in the application.

### Procedure

To define a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. Click the **Add** link in the upper right corner of the **Financial Transaction Distribution Rule Version List** zone.  
The **Financial Transaction Distribution Rule Version** screen appears. It contains the following sections:
  - **Main** – Used to specify basic details about the financial transaction distribution rule version.
  - **Included Objects** – Used to include the objects in financial transaction distribution rule version.
  - **Excluded Objects** – Used to exclude the objects in financial transaction distribution rule version.
  - **Algorithms** – Used to define the algorithms that are added for financial transaction distribution rule version.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Displays the financial transaction distribution rule.	Not applicable
Effective Date	Used to specify the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

The **Included Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.	No
	<p><b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p>	
Bill Status	Used to indicate the status of the bill.	No

**Note:** If you include object, then all the fields are mandatory.

The **Excluded Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.	No

Column Name	Column Description	Mandatory (Yes or No)
	<p><b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p>	

**Note:** If you exclude object, then all the fields are mandatory.

The **Algorithms** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No
Algorithm	<p>Used to specify the algorithm code.</p> <p><b>Note:</b> It has a link. On clicking the link, <b>Algorithm</b> screen appears with the details of the respective algorithm.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No

**Note:** While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Enter the required details.
7. Include or exclude the object types, if required.
8. Add the algorithms, if required.
9. Click **Save**.  
The financial transaction distribution rule version is defined.

## Associating Algorithms with a Financial Transaction Distribution Rule Version

### Prerequisites

To associate algorithms with a financial transaction distribution rule version, you should have:

- Algorithms defined in the application.

### Procedure

To associate algorithms with a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.

The **Financial Transaction Distribution Rule** screen appears.

4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the financial transaction distribution rule version whose details you want to edit.  
The **Financial Transaction Distribution Rule Version** screen appears.
6. Ensure that the **Algorithms** section is expanded when you are editing the financial transaction distribution rule version.
7. Enter the required details in the **Algorithms** section.

**Note:** On clicking the **Search** (🔍) icon corresponding to the **Algorithm** column, you can search for a predefined algorithm.

8. If you want to associate more than one algorithm to the financial transaction distribution rule version, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to disassociate an algorithm from the financial transaction distribution rule version, click the **Delete** (🗑) icon corresponding to the algorithm.

## Editing a Financial Transaction Distribution Rule Version

### Procedure

To edit a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the financial transaction distribution rule version whose details you want to edit.  
The **Financial Transaction Distribution Rule Version** screen appears. It contains the following sections:
  - **Main** – Used to specify basic details about the financial transaction distribution rule version.
  - **Included Objects** – Used to include the objects in financial transaction distribution rule version.
  - **Excluded Objects** – Used to exclude the objects in financial transaction distribution rule version.
  - **Algorithms** – Used to define the algorithms in the financial transaction distribution rule version.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Displays the financial transaction distribution rule.	Not applicable
Effective Date	Used to specify the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.	Yes
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

The **Included Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.	No
	<b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.	
Bill Status	Used to indicate the status of the bill.	No

**Note:** If you include object, then all the fields are mandatory.

The **Excluded Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No

Column Name	Column Description	Mandatory (Yes or No)
Value	Used to specify the value of the object type.	No
	<b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.	

**Note:** If you exclude object, then all the fields are mandatory.

The **Algorithms** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No
Algorithm	Used to specify the algorithm code.	No
	<b>Note:</b> It has a link. On clicking the link, <b>Algorithm</b> screen appears with the details of the respective algorithm.	

**Note:** While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Modify the details of the financial transaction distribution rule version.
7. Modify the included or excluded objects from the financial transaction distribution rule version, if required.
8. Edit the algorithms, if required
9. Click **Save**.

The changes made to the financial transaction distribution rule version are saved.

## **Deleting a Financial Transaction Distribution Rule Version**

### **Procedure**

To delete a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the financial transaction distribution rule version that you want to delete.  
A message appears confirming whether you want to delete the financial transaction distribution rule version.
6. Click **OK**.  
The financial transaction distribution rule version is deleted.

## Copying a Financial Transaction Distribution Rule Version

Instead of creating a financial transaction distribution rule version from scratch, you can create a new financial transaction distribution rule version using an existing financial transaction distribution rule version. This is possible through copying a financial transaction distribution rule version. On copying a financial transaction distribution rule version, the details are copied to the new financial transaction distribution rule. You can then edit the details, if required.

### Prerequisites

To copy a financial transaction distribution rule, you should have:

- Financial transaction distribution rule version (whose copy you want to create) defined in the application
- Financial transaction distribution rule version business objects defined in the application

### Procedure

To copy a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.

5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the financial transaction distribution rule version whose copy you want to create.

The **Financial Transaction Distribution Rule Version** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the financial transaction distribution rule version.
- **Included Objects** – Used to include the objects in financial transaction distribution rule version.
- **Excluded Objects** – Used to exclude the objects in financial transaction distribution rule version.
- **Algorithms** – Used to define the algorithms in the financial transaction distribution rule version.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Displays the financial transaction distribution rule.	Not applicable
Effective Date	Used to specify the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.	Yes
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

**Note:** If you include object, then all the fields are mandatory.

**Included Objects** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.	No

Column Name	Column Description	Mandatory (Yes or No)
	<b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	
Bill Status	Used to indicate the status of the bill.	No

**Excluded Objects** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.  <b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	No

**Note:** If you exclude object, then all the fields are mandatory.

**Algorithms** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No
Algorithm	Used to specify the algorithm code.	No

Column Name	Column Description	Mandatory (Yes or No)
	<b>Note:</b> It has a link. On clicking the link, <b>Algorithm</b> screen appears with the details of the respective algorithm.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	

**Note:** While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Enter the required details.
7. Define, edit, or remove objects from the financial transaction distribution rule version , if required.
8. Associate or dissociate the algorithms from the financial transaction distribution rule version, if required
9. Click **Save**.  
The new financial transaction distribution rule version is defined.

## Viewing the Financial Transaction Distribution Rule Version Details

### Procedure

To view the details of a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule whose details you want to view.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule version whose details you want to view.  
The **Financial Transaction Distribution Rule Version** zone appears.

6. View the details of the financial transaction distribution rule version in the **Financial Transaction Distribution Rule Version** zone.

## Expiration Cycle Extendable Lookup

The **Expiration Cycle Extendable Lookup** screen allows you to search for an expiration cycle. An expiration cycle is an extendable lookup reference object which indicates the frequency at which the financial transaction distribution object created for the account should be expired (i.e. after two months or 45 days from the date of creation). You can associate an expiration cycle with one or more accounts. This screen contains the following zone:

- [Extendable Lookup Search](#) on page 1957

## Extendable Lookup Search

The **Extendable Lookup Search** zone allows you to search the details of expiration cycle business object. This zone contains the following two sections:

- **Search Criteria** – This section contains the following fields:

Field Name	Field Description
Business Object	Used to search the expiration cycle business object.
Description	Used to search the expiration cycle business object with a particular description.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Business Object	Displays the business objects.
Description	Displays description of the business object.
	<b>Note:</b> It has a link. On clicking the link, the <b>Extendable Lookup</b> screen appears where you can view the details of the respective business object.

**Note:** You must specify at least one search criterion while searching for the expiration cycle business object.

#### Related Topics

For more information on...	See...

## Searching for an Expiration Cycle Extendable Lookup

### Prerequisites

To search for an expiration cycle extended lookup, you should have:

- Expiration cycle extended lookup defined in the application.

### Procedure

To search for an expiration cycle extended lookup:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **E** and then click **Extendable Lookup**.  
The **Extendable Lookup Query** screen appears.
3. Search for **C1-EXPCYCLE** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business object.  
The **Extended Lookup** screen appears.
5. View the list of expiration cycle extended lookup values in the **Extendable Lookup Value List** zone.

#### **Note:**

You must specify at least one search criterion while searching for an expiration cycle extended lookup.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

## Extendable Lookup (Expiration Cycle)

Once you create an expiration cycle, the **Extendable Lookup** (Expiration Cycle) screen allows you to:

- Edit the details of an expiration cycle
- Copy an expiration cycle
- Delete an expiration cycle
- View the details of an expiration cycle

This screen contains the following zones:

- [Extendable Lookup Value List](#) on page 1959
- [Extendable Lookup Value](#) on page 1959

## Extendable Lookup Value List

The **Extendable Lookup Value List** zone allows you to view the list of expiration cycle extended lookup values that are already defined in the system.

This zone contains the following columns:

Column Name	Column Description
Value	Displays the expiration cycle extended lookup value.
Description	Displays the description of the expiration cycle extended lookup value.
Detailed Description	Displays the additional information about the expiration cycle extended lookup value.
Owner	Displays the owner of the expiration cycle extended lookup value.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Expiration Cycle</b> screen appears where you can edit the details of the expiration cycle extended lookup value.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Expiration Cycle</b> screen appears where you can define a expiration cycle extended lookup value using an existing expiration cycle extended lookup value.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the expiration cycle extended lookup value.

On clicking the **Broadcast** (📡) icon corresponding to the expiration cycle extended lookup value, the **Extendable Lookup Value** zone appear with the details of the respective expiration cycle extended lookup value.

You can filter the list using the **Value** or **Description** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Extendable Lookup Value

The **Extendable Lookup Value** zone allows you to view the details of the expiration cycle extended lookup value. This zone contains the following section:

- **Main** – This section allows you to view the details of the expiration cycle extended lookup value. It contains the following fields:

Field Name	Field Description
Expiration Cycle	Displays the expiration cycle extended lookup value.
Description	Displays the description of the expiration cycle extended lookup value.
Override Description	Displays the overridden description of the expiration cycle extended lookup value.
Detailed Description	Displays the additional information about the expiration cycle extended lookup value.
Status	Displays the status of expiration cycle extended lookup value.
Duration Unit	Displays the duration unit of the expiration cycle extended lookup value.
Duration Value	Displays the period till when the expiration cycle extended lookup value is active.
Consider Holiday	Displays whether to consider holidays or not while calculating the duration value.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the expiration cycle extended lookup value.
Delete	Used to delete the expiration cycle extended lookup value.
Duplicate	Used to create a new expiration cycle extended lookup value using an existing expiration cycle extended lookup value.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the expiration cycle extended lookup value is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.
Owner	Indicates the person or entity that created the expiration cycle business object.

By default, the **Extendable Lookup Value** zone does not appear in the **Extendable Lookup** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the extendable lookup value of the **Extendable Lookup Value List** zone.

## Defining an Expiration Cycle

### Procedure

To define an expiration cycle:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **E** and then click **Extended Lookup**.  
The **Extended Lookup Query** screen appears.
3. Search for **C1-EXPCYCLE** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business object.  
The **Extended Lookup** screen appears.
5. Click the **Add** button in the **Page Title** area of the **Extended Lookup** screen.  
The **Expiration Cycle** screen appears. It contains the following section:
  - **Main** – Used to specify basic details about the expiration cycle.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Expiration Cycle	Used to specify the value of expiration cycle.	Yes
Description	Used to specify the description of the expiration cycle.	Yes
Override Description	Used to specify the override description of the expiration cycle.	No
Detailed Description	Used to specify the additional information about the expiration cycle.	No
Status	Used to indicate the status of the expiration cycle.	No
Duration Unit	Used to indicate the duration unit of the expiration cycle.	Yes
Duration Value	Used to indicate the period till when the expiration cycle is active.	Yes
Consider Holiday	Used to indicate whether to consider the holiday while calculating the duration value.	No

6. Enter the required details.
7. Click **Save**.  
The expiration cycle is defined.

## Editing an Expiration Cycle

### Procedure

To edit an expiration cycle:

1. Search for the **C1-EXPCYCLE** business object in the **Extended Lookup Query** screen.
2. In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business object. The **Extended Lookup** screen appears.
3. In the **Extended Lookup Value List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the *extended* lookup value whose details you want to edit.

The **Expiration Cycle** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the expiration cycle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Expiration Cycle	Used to specify the value of expiration cycle.	Yes
Description	Used to specify the description of the expiration cycle.	Yes
Override Description	Used to specify the override description of the expiration cycle.	No
Detailed Description	Used to specify the additional information about the expiration cycle.	No
Status	Used to indicate the status of the expiration cycle.	No
Duration Unit	Used to indicate the duration unit of the expiration cycle.	Yes
Duration Value	Used to indicate the period till when the expiration cycle is active.	Yes
Consider Holiday	Used to indicate whether to consider the holiday while calculating the duration value.	No

**Tip:** Alternatively, you can click the **Edit** button in the **Extended Lookup Value** zone to edit the details of the expiration cycle.

4. Modify the details, if required.
5. Click **Save**.  
The changes made to the expiration cycle are saved.

## Copying an Expiration Cycle

Instead of creating an expiration cycle from scratch, you can create a new expiration cycle using an existing expiration cycle. This is possible through copying an expiration cycle. On copying an expiration cycle, the details are copied to the new expiration cycle. You can then edit the details, if required.

### Prerequisites

To copy an expiration cycle, you should have:

- Expiration cycle(whose copy you want to create) defined in the application
- Expiration cycle business objects defined in the application

### Procedure

To copy an expiration cycle:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **E** and then click **Extended Lookup**.  
The **Extended Lookup Query** screen appears.
3. Search for **C1-EXPCYCLE** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business object.  
The **Extended Lookup** screen appears.
5. In the **Extended Lookup Value List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the expiration cycle whose copy you want to create.

The **Expiration Cycle** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the expiration cycle.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Expiration Cycle	Used to specify the value of expiration cycle.	Yes
Description	Used to specify the description of the expiration cycle.	Yes
Override Description	Used to specify the override description of the expiration cycle.	No
Detailed Description	Used to specify the additional information about the expiration cycle.	No
Status	Used to indicate the status of the expiration cycle.	No
Duration Unit	Used to indicate the duration unit of the expiration cycle.	Yes
Duration Value	Used to indicate the period till when the expiration cycle is active.	Yes
Consider Holiday	Used to indicate whether to consider the holiday while calculating the duration value.	No

**Tip:** Alternatively, you can click the **Duplicate** button in the **Extended Lookup Value** zone to create a copy of the expiration cycle.

6. Enter the required details.
7. Click **Save**.  
The new expiration cycle is defined.

## Extendable Lookup Value

The **Extendable Lookup Value** zone allows you to view the details of the distribution hierarchy extended lookup value. This zone consists of the following section:

- **Main** - This section lists the distribution hierarchy extended lookup values. It contains the following fields:

Field Name	Field Description
Hierarchy Code	Displays the unique hierarchy code.

Field Name	Field Description
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.
Description	Displays the description of the distribution hierarchy extended lookup value.
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.
Status	Displays the status of the distribution hierarchy extended lookup value.

- **Hierarchy List** - This section lists the hierarchy of the distribution. It contains the following columns:

Column Name	Column Description
Sequence	Displays the order of priority according to which the distribution will be made in hierarchy.
Value	Displays the value of hierarchy.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the distribution hierarchy extended lookup value.
Delete	Used to delete the distribution hierarchy extended lookup value.
Duplicate	Used to create a new distribution hierarchy extended lookup value using an existing distribution hierarchy extended lookup value.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the distribution hierarchy extended lookup value is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.
Owner	Indicates the person or entity that created the distribution hierarchy business object.

By default, the **Extendable Lookup Value** zone does not appear in the **Extendable Lookup** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the extendable lookup value of the **Extendable Lookup Value List** zone.

## Defining a Distribution Hierarchy

### Procedure

To define a distribution hierarchy:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **E** and then click **Extended Lookup**.  
The **Extended Lookup Query** screen appears.
3. Search for **C1-HIERARCHY** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-HIERARCHY** business object.  
The **Extended Lookup** screen appears.
5. Click the **Add** button in the **Page Title** area of the **Extended Lookup** screen.  
The **Hierarchy** screen appears. It contains the following sections:
  - **Main** – Used to specify basic details about the distribution hierarchy.
  - **Hierarchy List** – Used to specify the hierarchy of the distribution.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Code	Displays the unique hierarchy code.	Yes
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.	No
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.	No
Description	Displays the description of the distribution hierarchy extended lookup value.	Yes
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.	No
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.	No
Status	Displays the status of the distribution hierarchy extended lookup value.	No

**Hierarchy List** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order of priority according to which the distribution will be made in hierarchy.	Yes
Value	Used to specify the value of hierarchy.	Yes

**Note:**

You must specify at least one hierarchy list while defining a distribution hierarchy.

If you want to specify more than one hierarchy within the hierarchy list, click the **Add (+)** icon in the **Hierarchy List** section and then specify the details. However, if you want to remove a hierarchy from the hierarchy list, click the **Delete (🗑)** icon corresponding to the hierarchy.

6. Enter the required details.

7. Click **Save**.

The distribution hierarchy is defined.

## Editing a Distribution Hierarchy

---

**Procedure**

To edit a distribution hierarchy:

1. Search for the **C1-HIERARCHY** business object in the **Extended Lookup Query** screen.
2. In the **Search Results** section, click the **Description** link corresponding to the **C1-HIERARCHY** business object. The **Extended Lookup** screen appears.
3. In the **Extended Lookup Value List** zone, click the **Edit (✎)** icon in the **Edit** column corresponding to the extended lookup value whose details you want to edit.  
The **Hierarchy** screen appears. It contains the following sections:
  - **Main** – Used to specify basic details about the distribution hierarchy.
  - **Hierarchy List** – Used to specify the hierarchy of the distribution.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Code	Displays the unique hierarchy code.	Yes
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.	No
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.	No
Description	Displays the description of the distribution hierarchy extended lookup value.	Yes
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.	No
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Displays the status of the distribution hierarchy extended lookup value.	No

**Hierarchy List** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order of priority according to which the distribution will be made in hierarchy.	Yes
Value	Used to specify the value of hierarchy.	Yes

**Note:**

You must specify at least one hierarchy list while defining a distribution hierarchy.

If you want to specify more than one hierarchy within the hierarchy list, click the **Add (+)** icon in the **Hierarchy List** section and then specify the details. However, if you want to remove a hierarchy from the hierarchy list, click the **Delete (🗑)** icon corresponding to the hierarchy.

**Tip:** Alternatively, you can click the **Edit** button in the **Extended Lookup Value** zone to edit the details of the distribution hierarchy.

4. Modify the details, if required.
5. Add to the hierarchy list, if required.
6. Click **Save**.  
The changes made to the distribution hierarchy are saved.

## Copying a Distribution Hierarchy

Instead of creating a distribution hierarchy from scratch, you can create a new distribution hierarchy using an existing distribution hierarchy. This is possible through copying a distribution hierarchy. On copying a distribution hierarchy, the details are copied to the new distribution hierarchy. You can then edit the details, if required.

**Prerequisites**

To copy a distribution hierarchy, you should have:

- Distribution hierarchy(whose copy you want to create) defined in the application
- Distribution hierarchy business object defined in the application

**Procedure**

To copy a distribution hierarchy:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **E** and then click **Extended Lookup**.  
The **Extended Lookup Query** screen appears.
3. Search for **C1-HIERARCHY** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-HIERARCHY** business object.  
The **Extended Lookup** screen appears.
5. In the **Extended Lookup Value List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the distribution hierarchy whose copy you want to create.

The **Hierarchy** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the distribution hierarchy.
- **Hierarchy List** – Used to specify the hierarchy list of distribution.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Code	Displays the unique hierarchy code.	Yes
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.	No
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.	No
Description	Displays the description of the distribution hierarchy extended lookup value.	Yes
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.	No

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.	No
Status	Displays the status of the distribution hierarchy extended lookup value.	No

**Hierarchy List** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order of priority according to which the distribution will be made in hierarchy.	Yes
Value	Used to specify the value of hierarchy.	Yes

**Note:**

You must specify at least one hierarchy list while defining a distribution hierarchy.

If you want to specify more than one hierarchy within the hierarchy list, click the **Add (+)** icon in the **Hierarchy List** section and then specify the details. However, if you want to remove a hierarchy from the hierarchy list, click the **Delete (🗑)** icon corresponding to the hierarchy.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Extended Lookup Value** zone to create a copy of the distribution hierarchy.

- Enter the required details.
- Add to the hierarchy list, if required.
- Click **Save**.  
The new distribution hierarchy is defined.

## Financial Transaction Distribution Object Extendable Lookup

The **Financial Transaction Distribution Object Extendable Lookup** screen allows you to search for a financial transaction distribution object. A financial transaction distribution object is an extendable lookup reference object which handles all the information related to the transactional data for a credit or debit that will be distributed or in the middle of distribution. It contains the financial transaction source information, expiration dates of the credit, and recipients. This screen contains the following zone:

- [Extendable Lookup Search](#) on page 1974

### Extendable Lookup Search

The **Extendable Lookup Search** zone allows you to search the details of financial transaction distribution object business object. This zone contains the following two sections:

- **Search Criteria** - This section contains the following fields:

Field Name	Field Description
Business Object	Used to search the financial transaction distribution object business object.
Description	Used to search the financial transaction distribution object business object with a particular description.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Business Object	Displays the business object.
Description	Displays information about the business object.
	<b>Note:</b> It has a link. On clicking the link, the <b>Extendable Lookup</b> screen appears where you can view the details of the respective business object.

**Note:** You must specify at least one search criterion while searching for the financial transaction distribution object business object.

## Extendable Lookup (Financial Transaction Distribution Object)

The **Extendable Lookup** (Financial Transaction Distribution Object) screen allows you to add, edit, copy, and delete a financial transaction distribution object. This screen contains the following zones:

- [Extendable Lookup Value List](#) on page 1975
- [Extendable Lookup Value](#) on page 1976

### Extendable Lookup Value List

The **Extendable Lookup Value List** zone allows you to view the list of financial transaction distribution object extended lookup values that are already defined in the system..

This zone contains the following columns:

Column Name	Column Description
Value	Displays the financial transaction distribution object extended lookup value.
Description	Displays the description of the financial transaction distribution object extended lookup value.
Detailed Description	Displays the additional information about financial transaction distribution object extended lookup value.
Owner	Displays the person or entity that created the financial transaction distribution object extended lookup value.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Financial Transaction Distribution Object</b> screen appears where you can edit the details of the distribution financial transaction distribution object extended lookup value.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Financial Transaction Distribution Object</b> screen appears where you can define a financial transaction distribution object extended lookup value using an existing financial transaction distribution object extended lookup value.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the financial transaction distribution object extended lookup value.

On clicking the **Broadcast** (📡) icon corresponding to the financial transaction distribution object extended lookup value, the **Extendable Lookup Value** zone appear with the details of the respective financial transaction distribution object extended lookup value.

You can filter the list using the **Value** or **Description** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Financial Transaction Distribution (Used for Searching)

The **Financial Transaction Distribution** screen allows you to search a financial transaction distribution object using various search criteria. This screen contains the following zone:

- [Financial Transaction Distribution Search](#) on page 1983

### Financial Transaction Distribution Search

The **Financial Transaction Distribution Search** zone allows you to search the details of the financial transaction distribution using various search criteria. This zone contains the following two sections:

- **Search Criteria** – This section contains the following fields:

Field Name	Field Description
Search By	Used to indicate whether you want to search for financial transaction distribution object using which of the following options: <ul style="list-style-type: none"> <li>• FT Distribution Type/Status/Expiry Date</li> <li>• FT Distribution ID</li> </ul>
FT Distribution ID	Used to specify the financial transaction distribution ID.  <b>Note:</b> This field appears when you select the <b>FT Distribution ID</b> option from the <b>Search By</b> list.
FT Distribution Type	Used to indicate the financial transaction distribution type against which the object is created.  <b>Note:</b> This field appears only when you select the <b>FT Distribution Type/Status/Expiry Date</b> option from the <b>Search By</b> list. The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Distribution Type FK Search</b> window appears.
FT Object Type	Used to indicate the business object that was used to create the financial transaction distribution type.  <b>Note:</b> This field appears when you select the <b>FT Distribution Type/Status/Expiry Date</b> option from the <b>Search By</b> list.
Contract	Used to specify the contract on which financial transaction distribution object is created.  <b>Note:</b> This field appears when you select the <b>FT Distribution Type/Status/Expiry Date</b> option from the <b>Search By</b> list. The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Search</b> window appears.

Field Name	Field Description
Expiration Date	Used to specify the credit expiration date of the financial transaction distribution object.
	<b>Note:</b> This field appears when you select the <b>FT Distribution Type/Status/Expiry Date</b> option from the <b>Search By</b> list.
Status	Used to indicate the status of the financial transaction distribution object.
	<b>Note:</b> This field appears when you select the <b>FT Distribution Type/Status/Expiry Date</b> option from the <b>Search By</b> list.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Information	Indicates the information about the financial transaction distribution object.
	<b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction Distribution</b> screen appears with the details of the respective financial transaction distribution.
Status	Indicates the status of financial transaction distribution object.
Financial Transaction Distribution Type	Indicates the financial transaction distribution type information against which the object is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction Distribution Type</b> screen appears where you can view the details of the respective financial transaction distribution type.
Contract	Indicates the contract information on which the financial transaction distribution object is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears with the details of the respective contract.
Create Date Time	Displays the date and time when the financial transaction distribution object is created.
Expiration Date	Displays the expiration date of the financial transaction distribution object.

How to search for a financial transaction distribution	<a href="#">Searching for a Financial Transaction Distribution Object</a> on page 1984

## Searching for a Financial Transaction Distribution Object

### Prerequisites

To search for a financial transaction distribution, you should have:

- Financial transaction distribution types defined in the application.

### **Procedure**

To search for a financial transaction distribution:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Financial Transaction Distribution**.  
The **Financial Transaction Distribution** screen appears.
3. Enter the search criteria in the **Financial Transaction Distribution Search** zone depending on whether you want to search for a financial transaction distribution.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required. In case of **Financial Transaction Distribution ID**, wild card search is not supported.

## **Viewing the Financial Transaction Distribution Details**

### **Procedure**

To view the details of a financial transaction distribution :

1. Search for the financial transaction distribution in the **Financial Transaction Distribution** screen.
2. In the **Search Results** section, click the link in the **Information** column corresponding to the financial transaction distribution whose details you want to view.  
The **Financial Transaction Distribution** screen appears. It consists of the following tabs:
  - **Main** – Displays information about the financial transaction distribution. It contains the following zone:
    - **Financial Transaction Distribution** – Displays the details of the financial transaction distribution object.
    - **Log** – Lists the complete trail of actions performed on the financial transaction distribution object.
3. View the details of the financial transaction distribution in the **Financial Transaction Distribution** zone.

### **Related Topics**

## Financial Transaction Distribution (Used for Viewing)

The **Financial Transaction Distribution** screen allows you to view the details of the financial transaction distribution. This screen consists of the following tabs:

- [Financial Transaction Distribution - Main](#) on page 1986
- [Financial Transaction Distribution - Log](#) on page 1988

### Financial Transaction Distribution - Main

The **Main** tab on the **Financial Transaction Distribution** screen contains the following zone:

- [Financial Transaction Distribution](#) on page 1986

### Financial Transaction Distribution

The **Financial Transaction Distribution** zone displays the details of the financial transaction distribution types that are already defined in the system. This zone consists of the following sections:

- **Main** – This section provides basic information about the financial transaction distribution type. It contains the following fields:

Field Name	Field Description
Information	Indicates the information about the financial transaction distribution object.
FT Distribution Type	Displays the financial transaction distribution type.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Financial Transaction Distribution Type</b> screen appears with the details of the respective financial transaction distribution type.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Distribution Type FK Search</b> window appears.</p>
Account	Indicates the account on which the financial transaction distribution object is distributed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Contract	Indicates the contract on which the financial transaction distribution object is distributed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.

Field Name	Field Description
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective account.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Search</b> window appears.</p>
Status	Indicates the status of the financial transaction distribution object.
Financial Transaction ID	Displays the financial transaction ID.
Bill segment	<p>Indicates the bill segment information on which the financial transaction distribution object is distributed. a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment.</p>
Amount	Displays the distributed amount.
Expiration Date	Displays the expiration date of the financial transaction distribution object.

- **Distribution List** – This section displays the distribution list of the financial transaction distribution object. It contains the following columns:

Column Name	Column Description
Account	<p>Indicates the account on which the financial transaction distribution object is distributed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Contract	<p>Indicates the contract on which the financial transaction distribution object is distributed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective account.</p>
Transfer Adjustment	Indicates the transfer adjustments made on the financial transaction distribution object.
Distribution Amount	Displays the distributed amount.

- **Characteristics** – This section lists the characteristics of the financial transaction distribution type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the financial transaction distribution object.
Characteristic Type	Indicates the characteristic type.

Column Name	Column Description
Characteristic Value	Displays the value of the characteristic type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution object is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the financial transaction distribution object status is updated.
Create Date/Time	Displays the date and time when the financial transaction distribution object is created.

## Financial Transaction Distribution - Log

The **Log** tab contains the following zone:

- [Financial Transaction Distribution Log](#) on page 1988

### Financial Transaction Distribution Log

The **Financial Transaction Distribution Log** zone on the **Financial Transaction Distribution** screen lists the complete trail of actions performed on the financial transaction distribution object. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the financial transaction distribution object.
Details	Displays the details about the action performed on the financial transaction distribution object.
User	Indicates the user who has performed the action on the financial transaction distribution object.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the financial transaction distribution object.
Status Reason	Displays the status reason of action performed on the financial transaction distribution object.

**Note:** You can manually add a log entry for the financial transaction distribution object by clicking the **Add Log Entry** link in the upper right corner of the **Financial Transaction Distribution** zone.

The **Add Log Entry** window appears. Enter **Log Details** and click **Save**. The financial transaction distribution object log is added.

How to view the log of a financial transaction distribution	<a href="#">Viewing the Log of a Financial Transaction Distribution</a> on page 1989

## Viewing the Log of a Financial Transaction Distribution

### Procedure

To view the log of a financial transaction distribution:

1. Search for the financial transaction distribution object in the **Financial Transaction Distribution** screen.
2. In the **Search Results** section, click the link in the **Information** column corresponding to the financial transaction distribution object whose log you want to view.

The **Financial Transaction Distribution** screen appears. It consists of the following tabs:

- **Main** – Displays information about the financial transaction distribution. It contains the following zone:
  - **Financial Transaction Distribution** – Displays information about the financial transaction distribution object.
- **Log** – Lists the complete trail of actions performed on the financial transaction distribution object. This tab contains the following zone:
  - **Financial Transaction Distribution Log** – Displays the trail of actions performed on the particular financial transaction distribution object.

3. Click the **Log** tab.
4. View the log of a financial transaction distribution in the **Financial Transaction Distribution Log** zone.

## Adding a Log Entry for a Financial Transaction Distribution

### Procedure

To add a log entry for a financial transaction distribution:

1. Search for the financial transaction distribution object in the **Financial Transaction Distribution** screen.
2. In the **Search Results** section, click the link in the **Information** column corresponding to the financial transaction distribution whose log you want to edit.

The **Financial Transaction Distribution** screen appears. It consists of the following tabs:

- **Main** – Displays information about the financial transaction distribution. It contains the following zone:
  - **Financial Transaction Distribution** – Displays information about the financial transaction distribution object.
- **Log** – Lists the complete trail of actions performed on the financial transaction distribution object. This tab contains the following zone:
  - **Financial Transaction Distribution Log** – Displays the trail of actions performed on the particular financial transaction distribution object.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Financial Transaction Distribution Log** zone.

The **Add Log Entry** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution	Displays information about the financial transaction distribution object.	Not applicable
Log Details	Used to specify additional comments for the financial transaction distribution object.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Financial Transaction Distribution Log** zone.

## Deferred Revenue Recognition

---

### Topics:

- [Prerequisites](#)
- [Deferred Revenue Recognition Status Transition](#)
- [Algorithms Used in Deferred Revenue Recognition](#)
- [Deferred Revenue Recognition Template \(Used for Searching\)](#)
- [Deferred Revenue Recognition Template \(Used for Viewing\)](#)
- [Deferred Revenue Recognition \(Used for Searching\)](#)
- [Deferred Revenue Recognition \(Used for Viewing\)](#)

Most often, insurance company bill policies in installments, but Accounts Receivable (AR) and revenue for the total premium are booked as new business in the beginning of the policy term. Regulations, restrictions, or company policies may require that revenue for the total premium must be initially booked to the general ledger as deferred revenue. As time passes, the deferred revenue is realized as earned revenue. For example, the total premium for six months auto-policy (July 1 to Dec 31) is \$1200. When this new business is booked, the revenue of \$1200 is initially booked as deferred revenue. However, on July 31, August 31, September 30, October 31, November 30, and December 31, \$200 must be transferred from deferred revenue GL to earned revenue GL. In order to manage this process, adjustments are created that transfer amount from deferred revenue GL to earned revenue GL.

A deferred revenue recognition schedule determines when these deferred revenue recognition adjustments must be created and posted. On the recognition date, the deferred revenue recognition adjustment is created to transfer a portion of deferred revenue to earned revenue. The corresponding financial transaction does not impact customer's account balance.

You need to create a deferred revenue recognition template for each distribution code and contract type combination for which you want to create a deferred revenue recognition (when the bill segment and adjustment financial transactions created against the respective contracts are frozen). It is the deferred revenue recognition template which helps the system to determine:

- Adjustment type using which the adjustment should be created when the deferred revenue is recognized
- Whether the recognition amount and date in the deferred revenue recognition schedule are editable until recognized
- Whether the deferred revenue recognition schedule must be generated automatically or manually
- Whether the deferred revenue must be recognized daily, weekly, or monthly
- Whether the deferred revenue amount must be prorated when the recognition schedule is set to Monthly
- Algorithm using which the recognition lines in the deferred revenue recognition schedule should be created
- Algorithm using which the adjustment must be generated when the deferred revenue is recognized

During the deferred revenue recognition process, a deferred revenue recognition creation goes through various statuses in its lifecycle. For more information about the deferred revenue recognition statuses, see [Deferred Revenue Recognition Status Transition](#) on page 1993.

**Note:** The lifecycle of a deferred revenue recognition creation is driven by the respective business object using which the deferred revenue recognition is generated. The deferred revenue recognition feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the deferred revenue recognition process, see [Prerequisites](#) on page 1993.

## Prerequisites

---

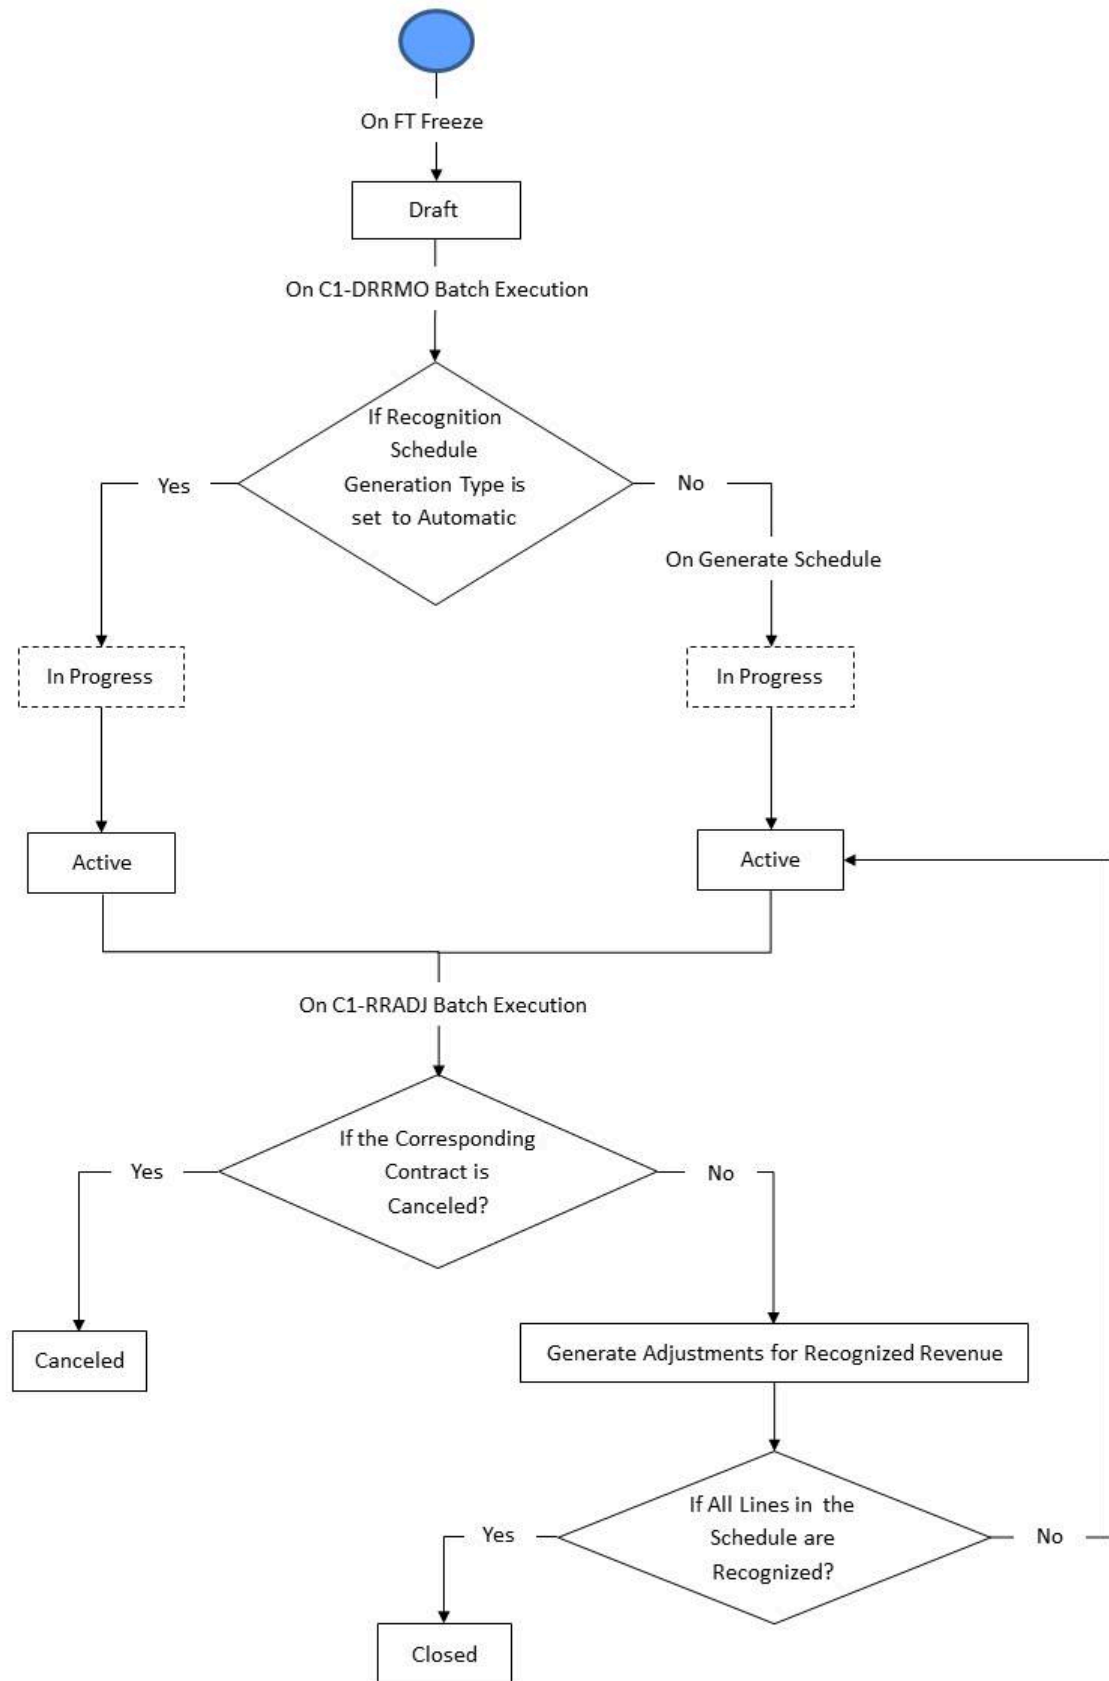

To setup the deferred revenue recognition feature, you need to do the following:

- Define the required deferred revenue recognition templates in the system.
- Define the required characteristic types where the characteristic entity is set to **Deferred Revenue Recognition**.
- Define the values for the following parameters in the **C1-REVRECITM** algorithm:
  - Use Calendar or Business Days (C or B)
  - Override Default Recognition Date (Y or N)
  - Override Default Weekly Recognition Day (Mon, Tue, Wed, Thu, Fri, Sat, Sun)
  - Override Default Monthly Recognition Date (1-31)
- Define the value for the **Use Contract Expiration Date (Y or N)** parameter in the **C1-REVRECSCH** algorithm.
- Define the value for the **Create Adjustments (Y or N)** parameter in the **C1-REVITMREC** algorithm.
- Set the batch control type of the **Deferred Revenue Recognition Periodic Monitor (C1-RRSMO)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

## Deferred Revenue Recognition Status Transition

---

The following figure graphically indicates how a deferred revenue recognition status transition moves from one status to another:

## Algorithms Used in Deferred Revenue Recognition

The following table lists the algorithms which are used in the lifecycle of the business object:

Status	System Event	Algorithm	Algorithm Type	Description
		C1-REVRECSCH	C1-REVRECSCH	<p>This algorithm is invoked when the status of the bill segment and adjustment financial transactions created against the contracts (of the contract type to which the algorithm is attached) is set to Frozen. It checks whether an active deferred revenue recognition template exists for the distribution code and contract type combination. If so, it creates a deferred revenue recognition using the template and sets the status of the deferred revenue recognition to Draft. It then checks whether the type of the corresponding financial transaction is Bill Segment or Adjustment. If the type of the corresponding financial transaction is Bill Segment, it sets the valid until date of the deferred revenue recognition to the bill segment end date. However, if the type of the corresponding financial transaction is Adjustment, it checks whether the Use Contract Expiration Date (Y or N) parameter is set to Y or N. If the Use Contract Expiration Date (Y or N) parameter is set to Y, it sets the valid until date of the deferred revenue recognition to the contract expiration date. However, if the Use Contract Expiration Date (Y or N) parameter is set to N, it sets the valid until date of the deferred revenue recognition to the financial transaction arrears date. In addition, on creating the deferred revenue recognition, an appropriate log entry is added which you can view in the Deferred Revenue Recognition Log zone. It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• Use Contract Expiration Date (Y or N) – Used to indicate whether the valid until date must be set to the contract expiration date when the type of the corresponding financial transaction is Adjustment. The valid values are Y and N. This parameter is mandatory.</li> </ul>
		C1-REVRECITM	C1-REVRECITM	<p>This algorithm creates schedule for the deferred revenue recognition. It considers the valid until date and accordingly creates the recognition lines within the schedule. If the recognition schedule is Weekly, by default, the recognition day is set to Mon</p>

Status	System Event	Algorithm	Algorithm Type	Description
				<p>(which means Monday of each week). However, if the recognition schedule is Monthly, by default, the recognition date is set to the last day of the month (i.e. 28, 29, 30, or 31) It contains the following parameters:</p> <ul style="list-style-type: none"> <li>• <b>Use Calendar or Business Days (C or B)</b> - Used to indicate whether you want to use the calendar or business days while generating the recognition schedule. The business days are derived using the work calendar defined on the financial transaction. If you do not specify any value for this parameter, by default, it is set to C. This parameter is mandatory.</li> <li>• <b>Override Default Recognition Date (Y or N)</b> – Used to indicate whether you want to override the default weekly or monthly recognition date. The valid values are Y and N. This parameter is mandatory.</li> <li>• <b>Override Default Weekly Recognition Day (Mon, Tue, Wed, Thu, Fri, Sat, Sun)</b> – Used to indicate the day of the week when you want to recognize the deferred revenue. The valid values are Mon, Tue, Wed, Thu, Fri, Sat, and Sun. This parameter is required when you want to override the default weekly recognition day.</li> <li>• <b>Override Default Monthly Recognition Date (1-31)</b> - Used to indicate the day of the month when you want to recognize the deferred revenue. The valid values are 1, 2, 3, ..., 31. This parameter is required when you want to override the default monthly recognition date.</li> </ul>
		C1-REVRECADJ	C1-REVRECADJ	<p>This algorithm creates deferred revenue recognition adjustment using the adjustment type defined on the respective deferred revenue recognition template. Before creating the deferred revenue recognition adjustment, it checks whether the contract for which the deferred revenue recognition is created is cancelled. If so, the status of the deferred revenue recognition is set to Canceled. If all lines in the recognition schedule are recognized, the status of the deferred revenue recognition is set to Closed.</p>

Status	System Event	Algorithm	Algorithm Type	Description
		C1-REVITMREC	C1-REVITMREC	<p>If this algorithm is attached in the deferred revenue recognition template, it is invoked while executing the C1-RRADJ batch. It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• <b>Create Adjustments (Y or N)</b> – Used to indicate whether the deferred revenue recognition adjustment must be created or not when the recognition date is earlier than or equal to the batch business date. The valid values are Y and N. This parameter is mandatory.</li> </ul>
		C1-DRRTM-INF	C1-DRRTM-INF	<p>This algorithm generates the deferred revenue recognition template information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:</p> <ol style="list-style-type: none"> <li>1. Deferred Revenue Recognition Template</li> <li>2. Description</li> </ol>
		C1-DRRTMPVAL	C1-DRRTMPVAL	<p>This algorithm validates the deferred revenue recognition template. It checks the following:</p> <ul style="list-style-type: none"> <li>• Whether the data is specified in the mandatory fields, such as Deferred Revenue Recognition Template, Description, Status, Distribution Code, Contract Type, Adjustment Type, Recognition Schedule Generation Type, and Recognition Schedule.</li> <li>• Whether an algorithm is attached to the Create Deferred Revenue Recognition Schedule and Generate Deferred Revenue Recognition Adjustment system events.</li> <li>• Whether a deferred revenue recognition template already exists for the specified distribution code and contract type combination.</li> <li>• Whether special characters except underscore are specified in the Deferred Revenue Recognition Template field.</li> <li>• Whether the high proration limit is between 0 to 31 and is greater than the low proration limit.&gt;&gt; Whether the low proration limit is between 0 to 31 and is less than the high proration limit.</li> </ul> <p>In addition, it does not allow you to:</p>

Status	System Event	Algorithm	Algorithm Type	Description
				<ul style="list-style-type: none"> <li>Delete a deferred revenue recognition template when it is used to create a deferred revenue recognition.</li> <li>Edit a deferred revenue recognition template when the corresponding deferred revenue recognition is in the Draft status.</li> <li>Inactivate a deferred revenue recognition template when the corresponding deferred revenue recognition is not in the Closed status.</li> </ul> <p>You must attach this validation algorithm to the custom business object which is used to create a deferred revenue recognition template. Otherwise, erroneous results might occur.</p>
		C1-DRRSC-INF	C1-DRRSC-INF	<p>This algorithm generates the deferred revenue recognition information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:</p> <ol style="list-style-type: none"> <li>1. Deferred Revenue Recognition Template</li> <li>2. Deferred Revenue Recognition Status</li> <li>3. Distribution Code</li> <li>4. Deferred Revenue Recognition ID</li> </ol>
		C1-REVMON	C1-REVMON	<p>This algorithm is invoked when the C1-DRRMO batch is executed. It checks whether there are any deferred revenue recognitions in the Draft status. If there is any deferred revenue recognition in the Draft status, it checks whether the recognition schedule generation type in the respective deferred revenue recognition template is set to Automatic or Manual. If the recognition schedule generation type is set to Automatic, the status of the deferred revenue recognition is changed to In Progress. However, if the recognition schedule generation type is set to Manual, the status of the deferred revenue recognition remains as Draft.</p>
		C1-REVRECINP	C1-REVRECINP	<p>This algorithm creates an appropriate log entry when the status of the deferred revenue recognition is changed to In Progress. It invokes the algorithm attached to the Create Deferred Revenue Recognition Schedule system event of the respective deferred revenue recognition template. Once the recognition schedule is successfully created, the status of the deferred revenue recognition is changed to Active.</p>

Status	System Event	Algorithm	Algorithm Type	Description
		C1-REVRECACT	C1-REVRECACT	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>Next Status</li> <li>Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle. This algorithm creates an appropriate log entry when the status of the deferred revenue recognition is changed to Active.</p>

## Deferred Revenue Recognition Template (Used for Searching)

The **Deferred Revenue Recognition** screen allows you to search for a deferred revenue recognition template using various search criteria. Through this screen, you can navigate to the following screen:

- [Deferred Revenue Recognition Template \(Used for Viewing\)](#) on page 2006

This screen consists of the following zone:

- [Search Deferred Revenue Recognition Template](#) on page 1999

## Search Deferred Revenue Recognition Template

The **Search Deferred Revenue Recognition Template** zone allows you to search for a deferred revenue recognition template using various search criteria. It contains the following two sections:

- Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition Template	Used to search the basic information about the deferred revenue recognition template.	Yes
Description	Used to search the description of the deferred revenue recognition template.	No
Recognition Schedule	Used to search deferred revenue recognition with a particular schedule. The valid values are: <ul style="list-style-type: none"> <li>Daily</li> <li>Monthly</li> <li>Weekly</li> </ul>	No
Status	Used to indicate the deferred revenue recognition template with a particular status. The valid values are:	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	

**Note:** You must specify at least one search criterion while searching for a deferred revenue recognition template.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Template	<p>Displays the deferred revenue recognition.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition Template</b> screen appears where you can view the details of the respective deferred revenue recognition template.</p>
Distribution Code	Indicates the distribution code associated with the rate component.
Contract Type	Displays the contract which is generated against a particular type of contract.
Recognition Schedule	Displays the schedule when the deferred revenue is recognized.

#### **Related Topics**

For more information on...	See...
How to view the details of a deferred revenue recognition template	<a href="#">Viewing the Deferred Revenue Recognition Template Details</a> on page 2006
How to search for a deferred revenue recognition template	<a href="#">Searching for a Deferred Revenue Recognition Template</a> on page 2000

## **Searching for a Deferred Revenue Recognition Template**

### **Prerequisites**

To search for a deferred revenue recognition template, you should have:

- Deferred revenue recognition template defined in the system.
- Deferred Revenue Recognition Schedule defined in the system.

### **Procedure**

To search for a deferred revenue recognition template:

1. Click the **Admin** menu in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.  
The **Deferred Revenue Recognition Template** screen appears.
3. Enter the search criteria in the **Search Deferred Revenue Recognition Template** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

A list of deferred revenue recognition templates that meet the search criteria appears in the **Search Results** section.

#### Related Topics

## Defining a Deferred Revenue Recognition Template

### Prerequisites

To define a deferred revenue recognition template, you should have:

- Contract types defined in the system

### Procedure

To define a deferred revenue recognition template:

1. Click the **Admin** menu in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.  
The **Deferred Revenue Recognition Template** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Deferred Revenue Recognition Template** screen.

The **Deferred Revenue Recognition Template** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the deferred revenue recognition template.
- **Parameters** – Used to specify the various parameters for the deferred revenue recognition template.
- **Algorithms** – Used to associate algorithms with the deferred revenue recognition template.
- **Divisions** – Used to associate a deferred revenue recognition template with a division.
- **Characteristics** – Used to define the characteristics for the deferred revenue recognition template.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition Template	Used to specify the deferred revenue recognition template.	Yes
Description	Used to specify the description of the deferred revenue recognition template.	No
Status	Used to indicate the status of the deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

The **Parameters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Distribution Code	Used to indicate the distribution code associated with the deferred revenue recognition.	Yes
	<b>Note:</b> The <b>Search</b> (🔍 icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Distribution Code Search</b> window appears.	
Contract Type	Used to indicate a particular type of contract.	Yes
	<b>Note:</b> The <b>Search</b> (🔍 icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.	
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.	No
	<b>Note:</b> The <b>Search</b> (🔍 icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	
Allow Editing	Used to allow editing of recognition schedule.	No
Generation Type	Used to indicate the type of deferred revenue recognition generation. The valid values are: <ul style="list-style-type: none"> <li>Automatic</li> <li>Manual</li> </ul>	Yes (Conditional)
Recognition Schedule	Used to indicate the schedule of deferred revenue recognition generation. The valid values are: <ul style="list-style-type: none"> <li>Daily</li> <li>Monthly</li> <li>Weekly</li> </ul>	Yes
Allow Proration	Used to allow proration.	Yes
	<b>Note:</b> The <b>Allow Proration</b> field appears when you select <b>Recognition Schedule</b> as <b>Monthly</b> .	
High Proration Limit (Days)	Used to specify whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is greater than the specified limit, then the amount is prorated.	Yes (Conditional)
	<b>Note:</b> This field appears when you check the tick-box for <b>Allow Proration</b> .	
Low Proration Limit (Days)	Used to specify whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	(in which it is enrolled) is less than the specified limit, then the amount is prorated.	<b>Note:</b> This field is required when the recognition schedule is selected as monthly and when the <b>Allow Proration</b> check box is selected.
	<b>Note:</b> This field appears when you check the tick-box for <b>Allow Proration</b> .	

- Enter the required details.
- Associate algorithms with the deferred revenue recognition template, if required.
- View the division to which the deferred revenue recognition template is associated in the **Divisions** section.
- Define the characteristics specific to division to which the deferred revenue recognition template is associated in the **Characteristics** section.
- Click **Save**.  
The deferred revenue recognition template is created.

## Associating Algorithms with a Deferred Revenue Recognition Template

### Procedure

To associate algorithms with a deferred revenue recognition template:

- Ensure that the **Algorithms** section is expanded when you are defining or editing a deferred revenue recognition template.

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event for an algorithm.	Yes
Sequence	Used to specify the sequence number.	Yes
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	
Algorithm	Used to associate an algorithm to the system event that you have selected.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the algorithm for a system event, the description of the algorithm appears corresponding to the <b>Algorithm</b> field.</p>	

- Enter the required details in the **Algorithms** section.
- If you want to define more than one algorithm for the deferred revenue recognition template, click the **Add (+)** icon, and then repeat 2.

**Note:** However, if you want to remove an algorithm from the deferred revenue recognition template, click the **Delete** (🗑️) icon corresponding to the algorithm.

## Associating Deferred Revenue Recognition Template With A Division

### Prerequisites

To associate deferred revenue recognition template with a division, you should have:

- Divisions defined in the application

### Procedure

To associate deferred revenue recognition template with a division:

- Ensure that the **Divisions** section is expanded when you are creating or editing a deferred revenue recognition template.

The **Divisions** section appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the deferred revenue recognition template.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	

- Select the required division from the list.
- If you want to associate the deferred revenue recognition template with more than one division, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove the deferred revenue recognition template from a division, click the **Delete** (🗑) icon corresponding to the division.

4. Click **Save**.

The deferred revenue recognition template is associated with the divisions.

## Defining a Characteristic for a Deferred Revenue Recognition Template

**Prerequisites**

To define a characteristic for a deferred revenue recognition template, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deferred Revenue Recognition Template**)

**Procedure**

To define a characteristic for a deferred revenue recognition template:

- Ensure that the **Characteristics** section is expanded when you are defining or editing a deferred revenue recognition template.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition template.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> On specifying the value for a characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Valued</b> field.
		<b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition template.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the deferred revenue recognition template, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the deferred revenue recognition template, click the **Delete** (🗑) icon corresponding to the characteristic.

## Viewing the Deferred Revenue Recognition Template Details

### Procedure

To view the details of a deferred revenue recognition template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.  
The **Deferred Revenue Recognition Template** screen appears.
3. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
4. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to view.

The **Deferred Revenue Recognition Template** screen appears.

5. View the details of the deferred revenue recognition template in the **Deferred Revenue Recognition Template** zone.

## Deferred Revenue Recognition Template (Used for Viewing)

Once the deferred revenue recognition templates are created, the **Deferred Revenue Recognition Template** screen allows you to:

- Generate the deferred revenue recognition schedule
- View the details of a deferred revenue recognition template
- Edit a deferred revenue recognition template
- Delete a deferred revenue recognition template

This screen consists of the following zone:

- [Deferred Revenue Recognition Template](#) on page 2007

## Deferred Revenue Recognition Template

The **Deferred Revenue Recognition Template** zone displays the details of the deferred revenue recognition template. It contains the following sections:

- **Main** – Displays basic information about the deferred revenue recognition template. It contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Template	Displays the deferred revenue recognition template
Description	Used to specify the description of the deferred revenue recognition template
Status	Used to indicate the status of the deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>

- **Parameters** – Displays the parameters used in the deferred revenue recognition template.

Field Name	Field Description
Distribution Code	Indicates the distribution code.
	<b>Note:</b> It has a link. On clicking the link, the <b>Distribution Code</b> screen appears where you can view the details of the respective distribution code.
Contract Type	Displays the <b>Deferred Revenue Recognition Template</b> which are generated against a particular type of contract.
Adjustment Type	Indicates the adjustment type using which the adjustment must be created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Generation Type	Displays the type of deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> <li>• Manual</li> <li>• Automatic</li> </ul>
Allow Editing	Indicates the editing of recognition schedule.
Recognition Schedule	Indicates the schedule when the deferred revenue is recognized. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Monthly</li> <li>• Weekly</li> </ul>
Allow Proration	Used to allow proration.
	<b>Note:</b> The <b>Allow Proration</b> field appears when you select <b>Recognition Schedule</b> as <b>Monthly</b> .
High Proration Limit (Days)	Displays whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end

Field Name	Field Description
	of the month (in which it is enrolled) is greater than the specified limit, then the amount is prorated.
	<b>Note:</b> This field appears when you check the tick-box for <b>Allow Proration</b> .
Low Proration Limit (Days)	Displays whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is less than the specified limit, then the amount is prorated.
	<b>Note:</b> This field appears when you check the tick-box for <b>Allow Proration</b> .

- **Divisions** – Displays the associated deferred revenue recognition template with one or more divisions. It contains the following column:

Column Name	Column Description
Division	Displays the division to which you want to associate the deferred revenue recognition template.

- **Algorithms** – Lists the algorithms associated with the deferred revenue recognition template. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Indicates the system event on which the algorithm must be executed	No
Sequence	Displays the sequence number.	No
Algorithm	Displays an algorithm that needs to be attached to the selected system event.	No
	<b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.	

- **Characteristics** – Lists the characteristics defined for the deferred revenue recognition template. It contains the following fields:

Column Name	Column Description
Characteristic Type	Displays the characteristic type.
Characteristic Type	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to define, edit, and remove algorithms of the deferred revenue recognition template.
	<b>Note:</b> The <b>Edit</b> button appears when the deferred revenue recognition template is in the <b>Active</b> status.
Delete	Used to delete the deferred revenue recognition template.

- 
- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the deferred revenue recognition template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Editing a Deferred Revenue Recognition Template

### Procedure

To edit a deferred revenue recognition template:

1. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to edit.  
The **Deferred Revenue Recognition Template** screen appears.
3. Click the **Edit** button in the **Deferred Revenue Recognition Template** zone.  
The **Deferred Revenue Recognition Template** screen appears.

**Note:** The **Edit** button appears when the deferred revenue recognition template is in the **Active** status.

4. Associate, edit, or remove algorithms from the deferred revenue recognition template, if required.
5. Define, edit, or remove characteristics of the deferred revenue recognition template, if required.
6. Associate deferred revenue recognition template with a division, if required.
7. Click **Save**.  
The changes made to the deferred revenue recognition template are saved.

## Deleting a Deferred Revenue Recognition Template

### Procedure

To delete a deferred revenue recognition template:

1. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.

2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template that you want to delete.  
The **Deferred Revenue Recognition Template** screen appears.
3. Click the **Delete** button in the **Deferred Revenue Recognition Template** zone.  
A message appears confirming whether you want to delete the deferred revenue recognition template.
4. Click **OK**.  
The deferred revenue recognition template is deleted.

## Viewing the Deferred Revenue Recognition Template Details

### Procedure

To view the details of a deferred revenue recognition template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.  
The **Deferred Revenue Recognition Template** screen appears.
3. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
4. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to view.

The **Deferred Revenue Recognition Template** screen appears.

5. View the details of the deferred revenue recognition template in the **Deferred Revenue Recognition Template** zone.

## Deferred Revenue Recognition (Used for Searching)

The **Deferred Revenue Recognition** screen allows you to search for a deferred revenue recognition using various search criteria. Through this screen, you can navigate to the following screen:

- [Deferred Revenue Recognition \(Used for Viewing\)](#) on page 2016

This screen consists of the following zone:

- [Search Deferred Revenue Recognition](#) on page 2011

## Search Deferred Revenue Recognition

The **Search Deferred Revenue Recognition** zone allows you to search for a deferred revenue recognition using various search criteria. It contains the following two sections:

- **Search Criteria** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a deferred revenue recognition using the deferred revenue recognition, person, account, or policy details. The valid values are: <ul style="list-style-type: none"> <li>• Account Details</li> <li>• Person Details</li> <li>• Deferred Revenue Recognition Details</li> <li>• Financial Transaction Details</li> <li>• Policy Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Account Details</b> option is selected.	
Person ID	Used to search deferred revenue recognition which are assigned to a particular person.	No
	<b>Note:</b> This field appears when you select the <b>Person Details</b> option from the <b>Search By</b> list.	
Account ID	Used to search the account ID.	No
	<b>Note:</b> This field appears only when you select the <b>Account Details</b> option from the <b>Search By</b> list.	
Person Identifier Type	Used to select the identifier type based on which you want to search deferred revenue recognition through which the person's record is created or updated in the system.	Yes (Conditional)
		<b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to specify the value for the person identifier type.	Yes (Conditional)
		<b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Account Identifier Type	Used to specify the account identifier type of the account whose details you want to search.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when you select the <b>Account Details</b> option from the <b>Search By</b> list.	<b>Note:</b> If you specify the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier.	Yes (Conditional)
	<b>Note:</b> This field appears when you select the <b>Account Details</b> option from the <b>Search By</b> list.	
Contract ID	Used to specify the contract ID linked to the account.	No
	<b>Note:</b> This field appears when you select the <b>Account Details</b> option from the <b>Search By</b> list.	
Person Hierarchy	Used to indicate whether to display hierarchy of the person linked to a particular bill.	No
	<b>Note:</b> This field appears when you select the <b>Person Details</b> option from the <b>Search By</b> list.	
Status	Used to search deferred revenue recognition with a particular status. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Closed</li> <li>Canceled</li> <li>Draft</li> </ul>	No
	<b>Note:</b> This field appears when you select the <b>Person Details</b> , <b>Account Details</b> , or <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	
Deferred Revenue Recognition Template	Used to indicate the template used for deferred revenue recognition.	No
	<b>Note:</b> This field appears when you select the <b>Person Details</b> , <b>Account Details</b> , or <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	
Valid Until Date	Used to specify the date till which the deferred revenue recognition is valid.	No
	<b>Note:</b> This field appears when you select the <b>Person Details</b> or <b>Account Details</b> option from the <b>Search By</b> list.	
Deferred Revenue Recognition ID	Used to search a particular deferred revenue recognition	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when you select the <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	
Description	Used to specify the description of the deferred revenue recognition.  <b>Note:</b> This field appears when you select the <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	No
Recognition Schedule	Used to search deferred revenue recognition with a particular schedule. The valid values are: <ul style="list-style-type: none"><li>• Daily</li><li>• Monthly</li><li>• Weekly</li></ul> <b>Note:</b> This field appears when you select the <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	No
Financial Transaction ID	Used to search deferred revenue recognition which are assigned to a particular financial transaction.  <b>Note:</b> This field appears only when you select the <b>Financial Transaction Details</b> option from the <b>Search By</b> list.	
Policy Type	Used to indicate the type of policy.  <b>Note:</b> This field appears when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	Yes
Policy Number	Used to indicate the policy number.  <b>Note:</b> This field appears when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No
Plan Number	Used to indicate the plan number of the policy.  <b>Note:</b> This field appears when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No
Source System	Used to indicate the name of the external system from where the policy originated.  <b>Note:</b> This field appears when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No
Start Date	Used to indicate the date from when the policy is effective.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	
End Date	Used to indicate the date till when the policy is effective. <b>Note:</b> This field appears when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a deferred revenue recognition.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition</b> screen appears where you can view the details of the respective deferred revenue recognition.
Contract Information	Displays the basic information about the contract corresponding to the deferred revenue recognition. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.
	<b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction</b> screen appears where you can view the details of the respective financial transaction.

### Related Topics

For more information on...	See...
How to view the details of a deferred revenue recognition	<a href="#">Viewing the Deferred Revenue Recognition Details</a> on page 2015
How to search for a deferred revenue recognition	<a href="#">Searching for a Deferred Revenue Recognition</a> on page 2014

## Searching for a Deferred Revenue Recognition

### Prerequisites

To search for a deferred revenue recognition, you should have:

- Deferred Revenue Recognition Template defined in the application.
- Person identifier types defined in the application
- Account identifier types defined in the application

- Recognition Schedules defined in the application
- Source Systems defined in the application

### **Procedure**

To search for a deferred revenue recognition:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable**.  
A sub-menu appears.
3. Click the **Search** option from the **Deferred Revenue Recognition** sub-menu.  
The **Deferred Revenue Recognition** screen appears.
4. Enter the search criteria in the **Search Deferred Revenue Recognition** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of deferred revenue recognition that meet the search criteria appears in the **Search Results** section.

### **Related Topics**

For more information on...	See...
<b>Deferred Revenue Recognition</b> screen	<a href="#">Deferred Revenue Recognition (Used for Searching)</a> on page 2010
<b>Search Deferred Revenue Recognition</b> zone	<a href="#">Search Deferred Revenue Recognition</a> on page 2011

## **Viewing the Deferred Revenue Recognition Details**

### **Procedure**

To view the details of a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose details you want to view.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2016
- [Deferred Revenue Recognition - Log](#) on page 2019

3. Ensure that the **Main** tab is selected.
4. View the details of the deferred revenue recognition in the **Deferred Revenue Recognition** zone.

### **Related Topics**

## Deferred Revenue Recognition (Used for Viewing)

The **Deferred Revenue Recognition** screen allows you to:

- View the details of a deferred revenue recognition
- Edit a deferred revenue recognition
- Generate the deferred revenue recognition schedule
- Add related deferred revenue recognitions
- Edit the details of a deferred revenue recognition schedule
- View the log of a deferred revenue recognition
- Add a log entry for a deferred revenue recognition

This screen consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2016
- [Deferred Revenue Recognition - Log](#) on page 2019

### Deferred Revenue Recognition - Main

The **Main** tab displays information about the deferred revenue recognition. It contains the following zones:

- [Deferred Revenue Recognition](#) on page 2016
- [Associated Deferred Revenue Recognitions](#) on page 2018
- [Recognition Schedule](#) on page 2018
- [Revenue Recognition Items](#) on page 2019

### Deferred Revenue Recognition

The **Deferred Revenue Recognition** zone displays the details of the deferred revenue recognition. It contains the following sections:

- **Main** – Displays basic information about the deferred revenue recognition. It contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.
Deferred Revenue Recognition Template Information	Displays information about the deferred revenue recognition template.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition Template</b> screen appears where you can view the details of the deferred revenue recognition template.
Distribution Code	Displays the distribution code which indicates the template associated with the deferred revenue recognition.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.
	<b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction Information</b> screen appears where you can view the details of the financial transaction.
Total Revenue Deferred	Displays the total revenue deferred.

Field Name	Field Description
Total Revenue Recognized	Displays the total revenue recognized.
Status	Indicates the status of the deferred revenue recognition. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Closed</li> <li>• Canceled</li> <li>• Draft</li> </ul>

- **Related Deferred Revenue Recognitions** - Lists the related deferred revenue recognitions. It contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays the basic information of the related Deferred Revenue Recognition Schedules (i.e. DRR Schedule of the BS/AD, corresponding to the BX/AX)
Create Date Time	Displays the date and time when the deferred revenue recognition is created.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to define, edit and remove characteristics, related deferred revenue recognitions of the deferred revenue recognition.
	<b>Note:</b> The <b>Edit</b> button appears when the deferred revenue recognition is in the <b>Active</b> status.
Generate Schedule	Used to generate the deferred revenue recognition schedule.
	<b>Note:</b> The <b>Generate Schedule</b> button appears only when the deferred revenue recognition is in the <b>Draft</b> status.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the deferred revenue recognition is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Create Date/Time	Displays the date and time when the deferred revenue recognition schedule is created.
Status Date/Time	Displays the date and time when the deferred revenue recognition status is updated.

- **Characteristics** – Lists the characteristics defined for the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the deferred revenue recognition.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

## Associated Deferred Revenue Recognitions

The **Associated Deferred Revenue Recognitions** zone Displays the basic information of the other schedules linked to the same **FT** having a separate **Schedule** due to the different **Distribution Code**. Purpose of this section is to show all the associated **Schedules** generated for a single **FT**. It contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition</b> screen appears where you can view the details of the deferred revenue recognition.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.
	<b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction</b> screen appears where you can view the details of the respective deferred revenue recognition.
Distribution Code	Displays the distribution code which indicates the template associated with the deferred revenue recognitions.
Deferred Revenue Recognition Template Information	Displays information about the deferred revenue recognition template.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition Template</b> screen appears where you can view the details of the deferred revenue recognition template.
Status	Indicates the status of the associated deferred revenue recognition. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Closed</li> <li>Canceled</li> </ul>

## Recognition Schedule

The **Recognition Schedule** zone lists the adjustment information and the recognition amount of the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Recognition Date	Displays the date on which the recognition is scheduled.
Recognition Amount	Displays the amount of the recognition scheduled.
Adjustment Information	Displays information about the adjustments in recognition schedule.

This zone contains the **Edit** button. It is used to edit the details of recognition schedule

**Note:** This zone appears when the deferred revenue recognition is in the **Active** status.

## Revenue Recognition Items

The **Revenue Recognition Items** zone displays the adjustment information about the recognition items. It contains the following columns:

Column Name	Column Description
Recognition Date	Displays the date on which the recognition is scheduled.
Recognition Amount	Displays the amount of the recognition scheduled.
Adjustment Information	Displays information about the adjustments in recognition schedule. “
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the deferred revenue recognition.

## Deferred Revenue Recognition - Log

The **Log** tab contains the following zone:

- [Deferred Revenue Recognition Log](#) on page 2019

## Deferred Revenue Recognition Log

The **Deferred Revenue Recognition Log** zone lists the complete trail of actions performed on the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the deferred revenue recognition
Details	Displays the details about the action performed on the deferred revenue recognition
User	Indicates the user who has performed the action on the deferred revenue recognition
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the deferred revenue recognition.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the deferred revenue recognition is changed.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the deferred revenue recognition by clicking the **Add Log Entry** link in the upper right corner of the **Deferred Revenue Recognition Log** zone.

## Editing a Deferred Revenue Recognition

### Procedure

To edit a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column \orresponding to the deferred revenue recognition whose details you want to edit.  
The **Deferred Revenue Recognition** screen appears.
3. Click the **Edit** button in the **Deferred Revenue Recognition** zone.  
The **Deferred Revenue Recognition** screen appears.

**Note:** The **Edit** button appears when the deferred revenue recognition is in the **Active** status.

4. Modify the required details in the **Main** section.
5. Define, edit, or remove related deferred revenue recognitions from the deferred revenue recognition, if required.
6. Define, edit, or remove characteristics of the deferred revenue recognition, if required.
7. Click **Save**.  
The changes made to the deferred revenue recognition are saved.

## Creating the Deferred Revenue Recognition Schedule

### Prerequisites

To create the deferred revenue recognition schedule, you should have:

- Should have **Revenue Recognition Schedule Creation Algorithm** attached in the **DRR Template**

### Procedure

To create the deferred revenue recognition schedule:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.

- In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose recognition schedule you want to generate. The **Deferred Revenue Recognition** screen appears.
- Click the **Generate Schedule** button in the **Deferred Revenue Recognition** zone.

**Note:** The **Generate Schedule** button appears when the deferred revenue recognition is in the **Draft** status.

The status of the deferred revenue recognition is changed to **Active**.

## Defining a Characteristic for a Deferred Revenue Recognition

### Prerequisites

To define a characteristic for a deferred revenue recognition, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deferred Revenue Recognition**)

### Procedure

To define a characteristic for a deferred revenue recognition:

- Ensure that the **Characteristics** section is expanded when you are editing a deferred revenue recognition.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deferred revenue recognition.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deferred Revenue Recognition</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition.

2. Enter the required details in the **Characteristics** section.

**Note:** If you select a characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a characteristic value.

3. If you want to define more than one characteristic for the deferred revenue recognition, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the deferred revenue recognition, click the **Delete** (🗑️) icon corresponding to the characteristic.

### Related Topics

For more information on...	See...
How to edit a deferred revenue recognition	<a href="#">Editing a Deferred Revenue Recognition</a> on page 2020

## Adding Related Deferred Revenue Recognitions

### Prerequisites

To add related deferred revenue recognitions, you should have:

- Deferred revenue recognition template defined in the system.

### Procedure

To add related deferred revenue recognitions:

1. Ensure that the **Related Deferred Revenue Recognitions** section is expanded when you are editing a deferred revenue recognition.

The **Related Deferred Revenue Recognitions** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition ID	Used to specify the ID of the deferred revenue recognition.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Deferred Revenue Recognition Search</b> window appears.	
Create Date Time	Used to indicate the creation date and time of the deferred revenue recognition.	Yes
Financial Transaction ID	Used to specify the ID of the financial transaction corresponding to the deferred revenue recognition.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transactions Search</b> window appears.	

2. Enter the required details in the **Related Deferred Revenue Recognitions** section.
3. If you want to add more than one related deferred revenue recognition for the deferred revenue recognition, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a related deferred revenue recognition from the deferred revenue recognition, click the **Delete** (🗑️) icon corresponding to the related deferred revenue recognition.

**Related Topics**

For more information on...	See...
How to edit a deferred revenue recognition	<a href="#">Editing a Deferred Revenue Recognition</a> on page 2020

## Editing the Deferred Revenue Recognition Schedule Details

**Prerequisites**

To edit the details of the deferred revenue recognition schedule, you should have:

- Should have **Allow Editing Switch** as **Yes** on deferred revenue recognition template.

**Procedure**

To edit the details of the deferred revenue recognition schedule:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose deferred revenue recognition schedule details you want to edit.  
  
The **Deferred Revenue Recognition** screen appears.
3. Select the recognition whose details you want to edit in the **Recognition Schedule** zone and click the **Edit** button available in the upper left corner above the table in this zone.  
The **Edit Recognition Schedule** screen appears.

**Note:** A recognition schedule from the deferred revenue recognition can be edited when the deferred revenue recognition is in the **Active** status.

The **Edit Recognition Schedule** screen contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Information	Displays the information about the deferred revenue recognition.
Financial Transaction Information	Displays the information of the financial transaction corresponding to the deferred revenue recognition.

In addition to these fields, this screen contains following columns:

Column Name	Column Description	Mandatory (Yes or No)
Recognition Date	Used to display the date on which the deferred revenue is recognized.	Yes
Recognition Amount	Used to display the amount of the deferred revenue.	Yes
Adjustment ID	Used to display the adjustment id.	Not applicable

4. Modify the details of the recognition schedule.
5. If you want to define more than one recognition schedule for the deferred revenue recognition, click the **Add (+)** icon and then repeat step 4.

**Note:** However, if you want to remove a recognition schedule from the deferred revenue recognition, click the **Delete** (■) icon corresponding to the recognition schedule.

6. Click **Save**.

The changes made to the recognition schedule are saved.

## **Viewing the Log of a Deferred Revenue Recognition**

### **Procedure**

To view the log of a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose log you want to view.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2016
- [Deferred Revenue Recognition - Log](#) on page 2019

3. Click the **Log** tab.  
The **Log** tab appears.
4. View the complete trail of actions performed on the deferred revenue recognition in the **Deferred Revenue Recognition Log** zone.

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the dispute request.
Details	Displays the details about the deferred revenue recognition log
User	Indicates the user who has performed deferred revenue recognition
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the deferred revenue recognition
Status Reason	Displays the status reason of action performed on the deferred revenue recognition

### **Related Topics**

## **Adding a Log Entry for a Deferred Revenue Recognition**

### **Procedure**

To add a log entry for a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose log you want to edit.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2016
- [Deferred Revenue Recognition - Log](#) on page 2019

3. Click the **Log** tab.

The **Log** tab appears.

4. Click on the **Add Log Entry** link in the upper right corner of the **Deferred Revenue Recognition Log** zone.

The **Add Deferred Revenue Recognition Schedule Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes Or No)
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.	Not applicable
Log Details	Used to specify additional comments for the deferred revenue recognition.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Deferred Revenue Recognition Log** zone.

- [Product Service \(Used for Viewing\)](#)
- [Product \(Used for Searching\)](#)
- [Product Version \(Used for Viewing\)](#)
- [Product \(Used for Viewing\)](#)
- [Product Enrollment \(Used for Searching\)](#)
- [Product Enrollment \(Used for Viewing\)](#)

Oracle Revenue Management and Billing facilitates a process of managing the entire lifecycle of a product from inception to service and then to retirement. The system allows you to create the following types of products:

- **Standard** - This type of product is a standalone product.
- **Packaged** - This type of a product is a bundle or group of products.
- **Informational** - This type of a product is used in the product hierarchy, but does not have its own pricing.

On creating a product, the status of the product is set to **Draft**. You can associate a product to one or more divisions. You can create a product to product relationship in the system. You can add product versions in the product. A product version is the entity which holds the following information:

- Product services which are offered with the product
- Price list from where the pricing for offered product services should be obtained.
- Eligibility criteria which must be satisfied when the account enrolls for the product.

The above information is captured when you create a product version for a standard product. However, when you create a product version for a packaged product, it holds the following information:

- Standard products which are offered in the packaged product.

**Note:** Some of these products might be compulsorily offered with the packaged product while some of the products might be optional.

- Standard products' services which are offered in the packaged product.

**Note:** Some of these product services might be compulsorily offered with the standard product while some of the product services might be optional.

- Add-on product services which are offered in the packaged product.
- Price list from where the pricing for offered product services and add-on product services should be obtained.
- Eligibility criteria which must be satisfied when the account enrolls for the packaged product.

A product version is effective from a particular date and its effective date must fall within the product date range. On creating a product version, the status of the product version is set to **In Progress**. You can activate a product when at least one of its product versions is in the **Finalized** status.

A product service can be associated to one or more price items. A product service can be offered with a product when it is associated with at least one price item in the system.

Once the product is activated, you can enroll the account for the product. On enrolling for a product, the system retrieves the product details from the product version which is effective on the system date. While enrolling for a standard product, you cannot remove mandatory product services from the product. However, you can enroll for optional product services which are offered with the product.

Similarly, while enrolling for a packaged product, you cannot remove mandatory products and product services from the packaged product. However, you can enroll for optional products and product services which are offered with the packaged product. While enrolling an account for a product, you can set the product enrollment priority for the account.

Once you create the product enrollment, the status of the enrollment is set to **Pending**. On submitting the product enrollment, the validation process is initiated. If all conditions are met, the status of the product enrollment is changed to **Enrolled**. You can unenroll for the product, whenever required.

You can retire a product, whenever required. The product, product version, and product enrollment goes through various statuses in their lifecycle.

The following batches are newly introduced for the Product Lifecycle Management feature:

- Product BO Monitor (C1-PRTRN)
- Product Enrollment Monitor (C1-ENTRN)

For more information on how to setup the product lifecycle management feature, see [Prerequisites](#) on page 2029.

## Prerequisites

---

To setup the product lifecycle management feature, you need to do the following:

- Define the required customer and account in the system.
- Create a approval workflow group with a group name **PRODUCTPLM** for the product and product version.
- Define the feature configuration as **C1-PRODCH**.
- Define the sequence of execution of **C1-PROD-TDCC**, **C1-TRAN-RETR**, and **C1-PROD-ACTV** algorithms, in the **ACTIVE** status of the **C1\_PRODUCT\_BO** business object.
- Define the following parameters for the predefined **C1-PROD-TDCC** algorithm-type.
  - To Do Type1
  - Number of Days
  - Customer Contact
- Define the parameters for the predefined **C1-PRTRN** batch control.

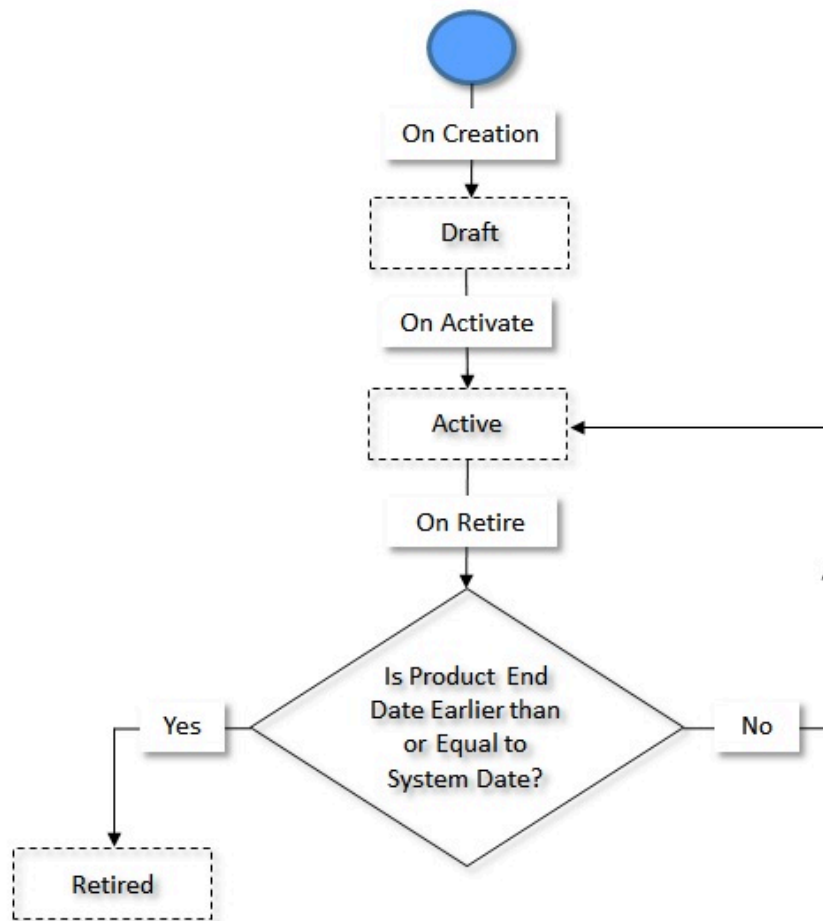

<b>Note:</b> If the batch date is not defined while creating the batch control, system date is assigned as the batch date.
--

- Define at least one packaged or standard product for product enrollment purposes.
- Associate at least one price list with a product, when you are defining single or multiple product versions.

## Product Status Transition through User Interface

---

The following figure graphically indicates how a product moves from one status to another through the user interface:

---

The following figure graphically indicates how a product enrollment moves from one status to another through the **Product Enrollment Monitor (C1-ENTRN)** batch:

## Product Service (Used for Searching)

The **Product Service** screen allows you to search for a product service using various search criteria. Through this screen, you can navigate to the following screen:

- [Product Service \(Used for Viewing\)](#) on page 2043

This screen consists of the following zone:

- [Search Product Service](#) on page 2036

For more information on...	See...
How to search for a product service	<a href="#">Searching for a Product Service</a> on page 2037
How to view the details of a product service	<a href="#">Viewing the Product Service Details</a> on page 2042

## Search Product Service

The **Product Service Search** zone allows you to search for a product service using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to search for a product service based on the unique user-defined product service.	No
Description	Used to specify the description of a product service.	No
Start Date	Used to search for product service which starts from a particular date onwards.	No
End Date	Used to search for product service which is created till a particular date.	No
Price Item Information	Used to search for product service for which a price item information is created or updated in the system.	No

**Note:** You must specify at least one search criterion while searching for a product service.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Product Service	Displays the service code of a product service.
Description	Displays the description of product service. <b>Note:</b> It has a link. On clicking the link, the <b>Product Service</b> screen appears where you can view the details of the respective product service.
Start Date	Displays the date from when the product service is effective.
End Date	Displays the date till when the product service is effective.

On clicking the **Broadcast** (📢) icon corresponding to a service code, the **Price Items** zone appears with the details of the respective product service.

### Related Topics

How to view the details of a product service	<a href="#">Viewing the Product Service Details</a> on page 2042
Associated Price Item zone	<a href="#">Price Items</a> on page 2044

## Associated Price Items

The **Product Service Price Item** zone lists various price items that are associated with a service. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays the price item information that is associated with a service.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the product service will begin.
End Date	Displays the date till when the product service will be available.

### Related Topics

For more information on...	See...
How to search for a product service	<a href="#">Searching for a Product Service</a> on page 2037
How to view the price items associated with a product service	<a href="#">Viewing the Product Service Price Items</a> on page 2038

## Searching for a Product Service

### Prerequisite

To search for a product service, you should have:

- Product Service defined in the application.
- Price Item defined in the application.

### Procedure

To search for a product service:

1. From the **Main** menu, select **Pricing Management** and then click **Product Service**.  
A sub-menu appears.
2. Click the **Search** option from the **Product Service** sub-menu.  
The **Product Service** screen appears.
3. Enter the search criteria in the [Search Product Service](#) on page 2036 zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of product services that meet the search criteria appear in the **Search Results** section.

**Related Topics**

For more information on...	See...
Search Product Service screen	<a href="#">Product Service (Used for Searching)</a> on page 2035

## Viewing the Product Service Price Items

**Procedure**

To view the price items of the product:

1. Search for a product service in the **Product Service** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to a service code whose details you want to view.

The **Price Items** zone appears. It contains the following columns:

Column Name	Column Description
Price Item	Displays the price item code that is set for each product service.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the product service will begin.
End Date	Displays the date till when the product service will be available.

**Related Topics**

Product Service Search zone	<a href="#">Search Product Service</a> on page 2036

## Defining a Product Service

**Prerequisites**

To define a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)
- Price Item business object defined in the application.

### **Procedure**

To define a product service:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product Service**.  
The sub-menu appears.
3. Click the **Add** option from the **Product Service** sub-menu.

The **Product Service** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the product service.
- **Characteristics** - Used to define the characteristics for a product service.
- **Price Items** - Used to define price item for a product service.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to specify the product service.	Yes
	<b>Note:</b> While defining a product service, ensure that at least one price item is associated with the product service.	
Description	Used to specify the description of a product service.	Yes
Start Date	Used to specify the date from when the product service is effective.	Yes
	<b>Note:</b> The product service end date cannot be earlier than the product service start date.	
End Date	Used to specify the date till when the product service is effective.	Yes
	<b>Note:</b> The product service end date cannot be earlier than the product service start date.	

#### **Note:**

If the product service is used in one or more product versions, the product service's end date cannot be earlier than the product version's effective date.

4. Enter the required details in the **Main** section.

#### **Note:**

The Start Date field is mandatory.

5. Define the characteristics for a product service, if required.
6. Define the price item for a product service.
7. Click **Save**.  
The product service is defined.

### **Related Topics**

For more information on...	See...
Defining the characteristics for a product service	<a href="#">Defining a Characteristics for a Product Service</a> on page 2041
Associating the product service with a Price Item	<a href="#">Associating a Product Service with a Price Item</a> on page 2040

## Associating a Product Service with a Price Item

### Prerequisites

To associate a product service with a price item, you should have:

- Price Item business object defined in the application.

### Procedure

To associate a product service with a price item:

1. Ensure that the **Price Items** section is expanded when you are defining, editing, or copying a product service.

The Price Item section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item which is associated with this product service.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	
Start Date	Used to specify the date from when the product service is effective.	No
End Date	Used to specify the date till when the product service is effective.	No
	<b>Note:</b> The price item end date cannot be earlier than the price item start date.	

2. Enter the required details in the **Price Items** section.

**Note:** The product service is used in one or more product versions, and therefore the product service's start date cannot be later than the product version's effective date.

3. If you want to associate one or more price items with the product service, click the **Add (+)** icon and then repeat step 2. However, if you want to remove the price items from the product service, click the **Delete** (🗑️) icon corresponding to the price item.
4. Click **Save**.

**Note:**

You cannot associate the same price item multiple times with the product service.

You can remove a price item from the product service even though the product version is in the Finalized status. A To Do Type named **C1-SVCU1** gets created whenever any modifications are made to the product service.

You can associate a price item with a product service when the price item's date range is within the product service's date range.

If there are changes with respect to the price items associated with the product service, then you must create a new version for that product.

The product service is associated with the price item.

## Defining a Characteristics for a Product Service

**Prerequisites**

To define a characteristic for a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)

**Procedure**

To define a characteristic for a product service:

1. Ensure that the **Characteristics** section is expanded when you are *defining*, *editing*, or *copying* a product service.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the product service.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the product service.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the product service.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for a predefined characteristic value.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required when you are defining a characteristic for the product service.</p>

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the product service, click the **Add (+)** icon and then repeat step 2. However, if you want to remove a characteristic from the product service, click the **Delete** (🗑) icon corresponding to the characteristic.
- Select an appropriate characteristic type from the **Characteristic Type** list.

## Viewing the Product Service Details

### Procedure

To view the details of the product service:

- Search for a product service in the **Product Service** screen.
- In the **Search Results** section, click the link in the **Description** column corresponding to the service code whose details you want to view.

The **Product Service** screen appears. It contains the following zones:

- Product Service**
- Associated Price Items**

## Product Service (Used for Viewing)

The **Product Service** screen allows you to:

- View the details and characteristics of the product service
- Edit, Delete, and Copy the details of the product service
- View the product service business object
- View the price items that are associated with the product service

The **Product Service** screen consists of the following zones:

- [Product Service](#) on page 2043
- [Price Items](#) on page 2044

## Product Service

The **Product Service** zone displays the details of the product service. It contains the following sections:

- **Main** - Displays the basic information about the product service. It contains the following fields:

Field Name	Field Description
Product Service	Displays the product service that is assigned to a product service.
Description	Displays the description of the product service.
Start Date	Displays the date when the product service starts.
End Date	Displays the date when the product service ends.

- **Characteristics** - Lists the characteristics defined for the product service. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the product service.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the product service.
Delete	Used to delete the product service.
Duplicate	Used to create a new product service using an existing product service information.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product service is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Price Items

The **Product Service Price Item** zone lists various price items that are associated with a service. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays the price item information that is associated with a service.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the product service will begin.
End Date	Displays the date till when the product service will be available.

## Editing a Product Service

### Procedure

To edit a product service:

1. Search for the product service in the **Product Service**.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the product service whose details you want to edit.  
The **Product Service** screen appears.
3. Click the **Edit** button in the **Product Service** zone.  
The **Product Service** screen appears.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Modify the details of the product service in the main section, if required.
5. Modify the characteristics for a product service, if required.

6. Associate the price items with a product service, if required.
7. Click **Save**.  
The changes made to the product service are saved.

## **Deleting a Product Service**

### **Procedure**

To delete a product service:

1. Search for the product service in the **Product Service**.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. In the **Search Results** section, click the link in the **Description** column corresponding to the product service whose details you want to delete.  
The **Product Service** screen appears.
3. Click the **Delete** button in the **Product Service** zone.  
A message appears confirming whether you want to delete the product service.

**Note:** If the product service is associated with the product version, then the product service cannot be deleted.

4. Click **OK**.  
The product service is deleted.

## Copying a Product Service

Instead of creating a product service from scratch, you can create a new product service using an existing product service. This is possible through copying a product service. On copying a product service, the details including the algorithms and characteristics are copied to the new product service. You can then edit the details, if required.

### Prerequisites

To define a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)
- Price Item business object defined in the application.

### Procedure

To define a product service:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product Service**.  
The sub-menu appears.
3. Click the **Search** option from the **Product Service** sub-menu.

The **Product Service** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the product service.
- **Characteristics** - Used to define the characteristics for a product service.
- **Price Items** - Used to define price item for a product service.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to specify the product service.	Yes
Description	Used to specify the description of a product service.	Yes
Start Date	Used to specify the date from when the product service is effective.	Yes
End Date	Used to specify the date till when the product service is effective.	Yes

**Tip:** Alternatively, you can click the **Duplicate** button in the **Record Actions** section, in the **Product Service** zone to create a copy of the product service.

4. Enter the required details in the **Main** section.
5. Define the characteristics for a product service, if required.
6. Define the price item for a product service, if required.
7. Click **Save**.  
The new product service is defined.

## Search Product

The **Search Product** zone allows you to search for a product using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to search for a particular product.	No
Description	Used to search products with a particular description.	No
Start Date	Used to search for products which are created from a particular date onwards.	No
End Date	Used to search for products which are created till a particular date.	No
Product Type	Used to search for products which are created using a particular product type. The valid values are: <ul style="list-style-type: none"> <li>• Packaged</li> <li>• Informational</li> <li>• Standard</li> </ul>	No
Product Category	Used to search for products which are created using a specific category. The valid values are: <ul style="list-style-type: none"> <li>• Checking</li> <li>• Loans</li> <li>• Others</li> <li>• Savings</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to search for products which are created using a specific status. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Draft</li> <li>Error</li> <li>Retired</li> </ul>	No
Division	Used to search for products which belong to a specific division.	No
Product Manager's To Do Role	Used to search for products which belong to a specific Product Manager's To Do Role. <div> <p><b>Note:</b></p> <p>If you select a predefined To Do Role, the <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager's To Do Role</b> field. On clicking the <b>Search</b> icon, you can search for a predefined To Do value.</p> <p>On specifying the value for a predefined To Do Role, the description of the To Do Role value appears corresponding to the <b>Product Manager's To Do Role</b> field.</p> </div>	No

**Note:** You must specify at least one search criterion while searching for a product.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Product	Displays the code of the product.
Description	Displays the description of the product. <div> <p><b>Note:</b> It has a link. On clicking the link, the <b>Product</b> screen appears with the details of the respective product.</p> </div>
Status	Displays the status of the product.
Product Type	Indicates the type of the product.
Product Category	Indicates the category of the product.
Start Date	Displays the date from when the product is effective.
End Date	Displays the date till when the product is effective.

On clicking the **Broadcast** (📢) icon corresponding to the product column, the **Product Version List** zone appears with the details of the respective product.

## Defining a Product

### Prerequisites

To define a product, you should have:

- Product Type should be defined in the application.
- Product Category should be defined in the application.

### Procedure

To define a product:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product**.  
The sub-menu appears.
3. Click the **Add** option from the **Product** sub-menu.

The **Product** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the product.
- **Divisions** - Used to define the characteristics for a product.
- **Product to Product Relationship** - Used to define product to product relationship for a product.
- **Characteristics** - Used to define the characteristics for a product.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to specify the product.	Yes
Description	Used to specify the description of a product.	Yes
Status	Displays the status of the product.	Yes
	<b>Note:</b> Whenever a new product is added, it will have the status as <b>Draft</b> .	
Product Type	Used to indicate the type of a product.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Product Category	Used to indicate the category of a product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Compliance Number	Used to specify the compliance number received from the legal department.	No
Product Manager To Do Role	Used to specify all the To Do raised against this product that are further assigned to this product manager To Do role.	No

4. Enter the required details in the **Main** section.

**Note:**

You cannot add or edit a product version when the product is in the Retired status.

The Start Date field is mandatory.

5. Associate a division with a product, if required.
6. Define the characteristics for a product, if required.

**Note:**

Ensure that the value is specified for the characteristic type option type in the C1-PRODCH feature configuration.

Ensure that a valid value is specified for the characteristic type.

7. Define the price item for a product, if required.
8. Click **Save**.  
The product is defined.

## Associating a Product with a Division

**Prerequisites**

To associate product with a division, you should have:

- Division defined in the application.

**Procedure**

To associate product with a division:

1. Ensure that the **Divisions** section is expanded when you are defining, editing, or copying a product.

The Division section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division of the product.	Yes

2. Enter the required details in the **Divisions** section.

**Note:**

At least one division must be associated with the product.

3. If you want to associate one or more divisions with the product, click the **Add (+)** icon and then repeat step 2.

**Note:**

However, if you want to remove the divisions from the product, click the **Delete** (🗑️) icon corresponding to the product.

4. Click **Save**.

**Note:**

Ensure that the division associated with the product is associated to the price list.

You cannot remove the division from the product because the price list associated to the product version which is effective on (mention date) is associated to the division.

The divisions are associated with the product.

## Defining a Product to Product Relationship

**Prerequisites**

To define a product to product relationship, you should have:

- Relationship Type defined in the application.

**Procedure**

To define a product to product relationship:

1. Ensure that the **Product to Product Relationship** section is expanded when you are defining, editing, or copying a product.

The Product to Product Relationship section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to specify the product.	Yes
Relationship Type	Used to indicate the relationship type with the product. The valid values are: <ul style="list-style-type: none"> <li>Child product</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Parent product</li> </ul>	
Effective Start Date	Used to specify the date from when the product to product relationship will begin.	No
Effective End Date	Used to specify the date till when the product to product relationship will be available.	No

- Define the details of the product in the main section, if required.

**Note:**

The product to product relationship start and end dates must be within the product's start and end dates.

- Define the division for a product, if required.

**Note:**

The division associated with the child product is not associated with the packaged product.

- Define the product to product relationship for a product, if required.

**Note:**

The child product that you want to add in the product version is not effective, as it must be in an active state.

- Define the characteristics for a product, if required.

- Click **Save**.

The product to product relationship is defined.

## Product Version - Main

The **Product Version - Main** tab displays information about the product version and services. It contains the following zones:

- [Product Version](#) on page 2066
- [Services](#) on page 2069
- [Add-on Product Services](#) on page 2068
- [Price Items](#) on page 2044
- [Eligibility Criteria](#) on page 2070

## Product Version

The **Product Version** zone displays the details of the product version. It contains the following sections:

- **Main** - Displays the basic information about the product version. It contains the following fields:

Field Name	Field Description
Product	Displays information about the product.
	<b>Note:</b> It has a link. On clicking the link, the <b>Product</b> screen appears where you can view the details of the product.
Effective Date	Displays the date from when the product version will be effective.
Product Type	Displays the type of product for which the product version is created.
Status	Displays the status of the product version.
Description	Displays the description of the product version.
Terms and Conditions	Displays the terms and conditions that are applicable for the product version.

- **Record Actions** - This section contains the following fields:

Button Name	Button Description
Edit	Used to edit the details of the product version.
	<b>Note:</b> The <b>Edit</b> button appears when the product version status is <b>In Progress</b> , <b>Finalized</b> , and <b>Draft</b> .

Button Name	Button Description
Delete	Used to delete the details of the product version.
	<b>Note:</b> The <b>Delete</b> button appears when the product version status is <b>In Progress, Finalized, and Draft</b> .
Duplicate	Used to create a new version using an existing product version.
	<b>Note:</b> The <b>Duplicate</b> button appears when the product version status is <b>In Progress, Finalized, and Draft</b> .
Finalized	Used to finalize all the changes and make the product <b>Active</b> .

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product version is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Characteristics** - Lists the characteristics defined for the product version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the product version is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- Enter the required details in the [Products](#) on page 2067 zone.
- Enter the required details in the [Product Services](#) on page 2068 zone.

**Note:** Products and Product Services section is displayed when the product type is selected as **Packaged** product from the [Search Product](#) on page 2047 zone in the **Product** screen.

- Enter the required details in the [Add-on Product Services](#) on page 2068 zone.
- Enter the required details in the [Services](#) on page 2069 zone.

**Note:** The services section appear when the product type is selected as a **Standard** product from the [Search Product](#) on page 2047 zone in the **Product** screen.

- Enter the required details in the [Price List](#) on page 2070 zone.
- Enter the required details in the [Eligibility Criteria](#) on page 2070 zone.

## Products

The **Products** zone displays the details of the product. It contains the following fields:

Field Name	Field Description
Product	Displays the product service that is assigned to a product.
Effective Date	Displays the date from when the product is effective.
Description	Displays the description of the product

## Product Version - Log

The **Product Version - Log** tab contains the following zone:

- [Product Version Log](#) on page 2072

### Product Version Log

The **Product Version - Log** zone lists the complete trail of actions performed on the product version. It contains the following columns:

Column Name	Column Description
Date Time	Displays the date and time when the action was performed on the product version.
Details	Displays the details about the action performed on the product version.
User	Displays the user who has performed the action on the product version.
Log Type	Displays the type of log.
Related Object	Displays the object or entity that is generated when the action is performed on the product version.
Status Reason	Displays the status reason of action performed on the product version.

## Editing a Product Version

### Procedure

To edit a product version:

1. Search for the product in the **Search Product** zone.
2. In the **Search Results** section, click the **Broadcast** (📢) icon, corresponding to the product column.  
The **Product Version List** zone appears.
3. Click the link in the **Description** column, corresponding to the status column.  
The **Product Version** screen appears.
4. Click the **Edit** button in the **Product Version** zone.  
The **Product Version** screen appears.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Modify the details of the product version in the main section, if required.

**Note:**

The effective date of a product version cannot be later than the product end date.

6. Define, edit, or remove the products and/or services for a product version, if required.

**Note:**

You must select the Inclusion check box when the product service is defined as mandatory in the effective product version.

7. Modify the price list for a product version, if required.
8. Define, edit, or remove the eligibility for a product version, if required.
9. Define, edit, or remove the characteristics for a product version, if required.
10. Click **Save**.

**Note:**

You cannot edit the details of the product version except the characteristics when the product version is in the Finalized status.

The changes made to the product version are saved.

## Deleting a Product Version

**Procedure**

To delete a product version:

1. Search for the product in the **Search Product** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. In the **Search Results** section, click the **Broadcast** (📢) icon, corresponding to the product column.  
The **Product Version List** zone appears.
3. Click the link in the **Description** column, corresponding to the status column.  
The **Product Version** screen appears.
4. Click the **Delete** button in the **Product Version** zone.

A message appears confirming whether you want to delete the product version.

5. Click **OK**.

**Note:**

You cannot delete the product version which is in the Finalized status.

The product version is deleted.

## Copying a Product Version

Instead of creating a product version from scratch, you can create a new product version using an existing product version. This is possible through copying a product version. On copying a product version, the details including the algorithms and characteristics are copied to the new product version. You can then edit the details, if required.

**Prerequisites**

To copy a product version, you should have:

- Product and Product Type defined in the application.
- Product Status and Service Code defined in the application.
- Product Category, Division, and Product To Do Role defined in the application.
- Eligibility Type, Characteristic Type, Price List, and Terms and Conditions defined in the application.
- Parameter, Operator, Parameter Value Type, Is True, Is False, and Is Sufficient defined in the application.

**Procedure**

To copy a product version:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product**.  
The sub-menu appears.
3. Click the **Search** option from the **Product** sub-menu.  
The **Product** screen appears.
4. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the product column whose version you want to copy.  
The **Product Version List** zone appears.
5. Click the link in the **Description** column, to view the details of the product version.  
The **Product Version** screen appears.
6. Click the **Duplicate** button in the **Record Actions** section.  
The **Product Version** screen appears. It contains the following sections:
  - **Main** - Used to specify basic details of the product version.
  - **Products and Services** - Used to define the products and services for a product version.
  - **Price List**
    - Used to define the Price List for the product version.
  - **Eligibility**
    - Used to define the Eligibility for the product version.
  - **Characteristics**

- Used to define the Characteristics for the product version.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Type	Displays the product type.	Not applicable
Product	Displays the product code.	Not applicable
Effective Date	Used to specify the effective date from when the product version will be effective.	Yes
Status	Used to specify the status of the version.	Yes
	<b>Note:</b> It is a read-only field, and cannot be edited.	
Description	Used to specify the description for the version.	No
Terms and Conditions	Used to specify the terms and conditions for the version.	Yes
	<b>Note:</b> Click the <b>Search</b> (🔍) icon appearing corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, you can search for a predefined terms and conditions.	

7. Enter the required details in the **Products and Services** and/or **Product Services** section.

**Note:** If the product type is **Packaged** then **Products and Services** section appears. If the product type is **Standard** then **Product Services** section appears. If the product type is **Information Only** neither of these sections are displayed.

8. Enter the required details in the **Price List** section.
9. Enter the required details in the **Eligibility** section.
10. Enter the required details in the **Characteristics** section.
11. Click **Save**.

The new product service is defined.

## Finalizing a Product Version

### Prerequisites

To finalize a product version, you should have:

- Product Version status as In Progress

### Procedure

To finalize a product version:

1. Search for the product in the **Product Search** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the product whose details you want to view.  
The **Product Version List** screen appears.
3. In the **Product Version List** zone, click the link in the **Description** column, for that product version, whose product version log you want to view.  
The **Product Version** screen appears.
4. Click the **Finalize** button in the **Product Version** zone.  
The status of the product version is changed to **Finalized**.

#### Note:

You cannot finalize the product version when its effective date is earlier than the product start date.

#### Note:

The **Finalize** button appears when the product version is in the **In Progress** status.

## Viewing the Log of a Product Version

### Procedure

To view the log of a Product Version:

1. Search for the product in the **Product** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the product, whose product version log you want to view.  
The **Product Version List** screen appears.
3. In the **Product Version List** zone, click the link in the **Description** column, for that product version, whose product version log you want to view.  
The **Product Version** screen appears. It consists of the following tabs:
  - [Product Version - Main](#) on page 2066

- [Product Version - Log](#) on page 2072
- Click the **Log** tab.  
The **Log** tab appears.
  - View the complete trail of actions performed on the product version in the **Product Version Log** zone.

## Product (Used for Viewing)

The **Product** screen allows you to:

- View the details of the product
- View the division of the product
- View the product to product relationship
- View the characteristics of the product
- View the product version list of the product
- Edit the details of the product
- Retire a product
- Add a product version to the product

This screen contains the following tabs:

- [Product - Main](#) on page 2077
- [Product - Log](#) on page 2079

For more information on...	See...
How to edit the details of product	<a href="#">Editing a Product</a> on page 2080

## Product - Main

The **Product - Main** tab displays information about the product, division, product to product relationship, characteristics, and product version. It contains the following zones:

- [Product Details](#) on page 2077
- [Product Version List](#) on page 2049

### Product Details

The **Product Details** zone displays the details of the product. It contains the following sections:

- **Main** - Displays the basic information about the product. It contains the following fields:

Field Name	Field Description
Product	Displays information about the product.
	<b>Note:</b> It has a link. On clicking the link, the <b>Product</b> screen appears where you can view the details of the product.
Description	Displays the description of the product version.
Status	Displays the status of the product version.
Product Type	Displays the type of product for which the product version is created.
Product Category	Displays the category to which the product is associated.
Start Date	Displays the date from when the product is effective.
End Date	Displays the date from till when the product is effective.
Compliance Number	Displays the number supplied by the legal department
Product Manager To Do Role	Displays all the To Dos that are raised against this product, and are assigned to this particular To Do Role.

- **Record Actions** - This section contains the following fields:

Button Name	Button Description
Edit	Used to edit the details of the product.
	<b>Note:</b> The <b>Edit</b> button appears when the product status is <b>Active</b> and <b>Draft</b> .
Duplicate	Used to create a new product using an existing product.
	<b>Note:</b> The <b>Duplicate</b> button appears when the product status is <b>Active</b> and <b>Draft</b> .
Retire	Used to indicate that the product is no longer available for use.
	<b>Note:</b> The <b>Retire</b> button appears only when the product status is <b>Active</b> .
Active	Used to activate the product.
	<b>Note:</b> The <b>Active</b> button appears when the product status is <b>Draft</b> .

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product version is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Divisions** - Displays the division defined for the product. It contains the following columns:

Column Name	Column Description
Division	Displays the division to which the product belongs.
	<b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the division.

- **Product to Product Relationship** - Lists the characteristics of the product version. It contains the following columns:

Column Name	Column Description
Product	Displays the product with whom the relationship has to be made.
Relationship Type	Displays the type of relationship.
Effective Start Date	Displays the date from when the product to product relationship will be effective.
Effective End Date	Displays the date till when the product to product relationship will be effective.

- **Characteristics** - Lists the characteristics defined for the product version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristics for the product will be effective.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the characteristic value.

## Product Version List

The **Product Version List** zone lists the information related to the product version.

Column Name	Column Description
Effective Date	Displays the date from when the product version is effective.
Description	Displays the description of the product version.
	<b>Note:</b> It has a link. On clicking the link, the <b>Product Version</b> screen appears where you can view the details of the respective product version.
Status	Displays the status of the product version.

## Product - Log

The **Product - Log** tab contains the following zone:

- [Product Log](#) on page 2080

## Product Log

The **Product Log** zone lists the complete trail of actions performed on the product. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the product.
Details	Displays the details about the action performed on the product.
User	Displays the user who has performed the action on the product.
Log Type	Displays the type of log.
Related Object	Displays the object or entity that is generated when the action is performed on the product.
Status Reason	Displays the status reason of action performed on the product.

## Editing a Product

### Procedure

To edit a product:

1. Search for the product in the **Search Product** zone.
2. In the **Search Results** section, click the link in the **Description** column, corresponding to the product column whose details you want to edit.  
The **Product** screen appears.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

3. Click the **Edit** button in the **Record Actions** zone.  
The **Product** screen appears.
4. Modify the details of the product in the main section, if required.

**Note:**

The product start date cannot be later than its product version's effective date.

The product end date cannot be earlier than its product version's effective date.

You cannot update the product type field because a product version is already defined for the product.

You cannot add or edit a product version when the product is in the Retired status.

5. Define, edit, or remove the divisions for a product, if required.

**Note:**

You cannot remove the division from the product because an account from this division is already enrolled to the product.

You cannot remove the division from the packaged product because the child product is associated to the division.

6. Define, edit, or remove the product to product relationship for a product, if required.
7. Define, edit, or remove the characteristics for a product, if required.

**Note:**

You cannot change the value of the characteristic when the product is in the Active status. To change the value of the characteristic, the characteristic type should not be of **C1-STOPE** type.

**8. Click Save.**

The changes made to the product are saved.

## Copying a Product

Instead of creating a product from scratch, you can create a new product using an existing product. This is possible through copying a product. On copying a product, the details including the algorithms and characteristics are copied to the new product. You can then edit the details, if required.

**Prerequisites**

To copy a product, you should have:

- Product, Product Type, Product Category, and Product Manager's To Do Role defined in the application.
- Division defined in the application.
- Relationship Type and Characteristic Type defined in the application.

**Procedure**

To copy a product:

1. Search for a product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding to the product column, whose details you want to copy.  
The **Product** screen appears.
3. Click the **Duplicate** button in the **Record Actions** section.  
The **Product** screen appears.
4. Enter the required product details in the **Main** section, if required.
5. Define, edit, or remove the divisions for a product, if required.
6. Define, edit, or remove the product to product relationship for a product, if required.
7. Define, edit, or remove the characteristics for a product, if required.
8. Click **Save**.  
The new product is defined.

## Activating a Product

---

### Prerequisites

To activate a product, you should have:

- Product must have the status as Draft.
- Product Version Status should be Finalized.

### Procedure

To activate a product:

1. Search for a product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding to the product column that needs to be activated.  
The **Product** screen appears.
3. Click the **Active** button in the **Record Actions** section.

#### **Note:**

You can activate a product when there is at least one product version in the Finalized status.

The product is activated, as the status is changed from **Draft** to **Active**.

How to retire a product	<a href="#">Retiring a Product</a> on page 2082

## Retiring a Product

---

### Prerequisites

To retire a product, you should have:

- Product Status must be Active.
- Product End Date less than equal to current date.

### Procedure

To retire a product:

1. Search for a product in the **Product** screen.

- In the **Search Results** section, click the link in the **Description** column, corresponding to the product column that needs to be activated.  
The **Product** screen appears.
- Click the **Retire** button in the **Record Actions** section.  
The **Retire Product** screen appears.
- Mention the **End Date** of the product.

**Note:**

The enrollments for the product, which you are retiring, are still effective.

- Click **Save**.

The product is retired, as the status is changed from **Active** to **Retired**.

**Note:**

On retiring the product, the end date of the effective product enrollments is set to the system date.

## Search Enrollment

The **Search Enrollment** zone allows you to search for the enrolled products using various search criteria. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an enrolled product using the option of Product Enrollment. The valid values are: <ul style="list-style-type: none"> <li>• Product Enrollment</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Product Enrollment</b> option is selected.	
Enrollment ID	Used to search an enrollment, based on the enrollment ID.	No
Account ID	Used to search an enrollment, based on the account ID.	No
Person ID	Used to search an enrollment, based on the person ID.	No
Product	Used to search an enrollment, based on the product ID.	No
Status	Used to search an enrollment with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Canceled</li> <li>• Enrolled</li> <li>• Error</li> <li>• Pending</li> <li>• Unenrolled</li> <li>• Validated</li> </ul>	No
Start Date	Used to search enrollments which are initiated from a specific date.	No
Enrollment Channel	Used to search enrollments based on a enrollment source. The valid values are: <ul style="list-style-type: none"> <li>• Oracle Revenue Management and Billing</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search enrollments which are initiated till a specific date.	No

**Note:** You must specify at least one search criterion while searching for an enrollment.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product.
	<b>Note:</b> It has a link. On clicking the link, the <b>Product Enrollment</b> screen appears where you can view the details of the respective enrolled product.
Account Information	Displays the account ID of the enrolled product.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Start Date	Displays the date from when the enrolled product is effective.
End Date	Displays the date till when the enrolled product is effective.

On clicking the **Broadcast** (📡) icon corresponding to an enrollment ID, the **Enrolled Products** zone appears with the details of the products that are enrolled.

- **Enrolled Products** - The **Enrolled Products** section contains the following columns:

Column Name	Column Description
Product Type	Displays the type of product which is enrolled.
Product	Displays the name of the enrolled product.
Version Description	Displays the description of the enrolled product version.
	<b>Note:</b> It has a link. On clicking the link, the <b>Product Version</b> screen appears where you can view the details of the respective enrolled product.
Start Date	Displays the date from when the enrolled product is effective.
End Date	Displays the date till when the enrolled product is effective.

- **Enrolled Services** - The **Enrolled Services** section contains the following columns:

Column Name	Column Description
Service Code	Displays the type of service which is enrolled.
Description	Displays the description of the enrolled service.
	<b>Note:</b> It has a link. On clicking the link, the <b>Product Service</b> screen appears where you can view the details of the respective enrolled service.
Start Date	Displays the date from when the enrolled service is effective.
End Date	Displays the date till when the enrolled service is effective.

## **Searching for a Product Enrollment**

### **Prerequisite**

To search for a product enrollment, you should have:

- Enrollment Details defined in the application.
- Account ID and Person ID defined in the application.
- Product and Status defined in the application.
- Enrollment defined in the application.

### **Procedure**

To search for a product enrollment:

1. From the **Main** menu, select **Pricing Management** and then click **Product Enrollment**.  
A sub-menu appears.
2. Click the **Search** option from the **Product Enrollment** sub-menu.  
The **Product Enrollment** screen appears.
3. Enter the search criteria in the [Search Enrollment](#) on page 2084 zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of enrolled products that meet the search criteria appear in the **Search Results** section.

**Note:** If you have specified any other search criterion other than the product enrollment ID, the system generates a message saying that the product enrollment ID is invalid.

## Enrolling an Account for One or More Products and Services

#### Prerequisites

To enroll an account for one or more products and services, you should have:

- Account Information defined in the application.
- Enrollment Channel defined in the application.
- Product defined in the application.
- Characteristic Type defined in the application.

#### Procedure

To enroll an account for one or more products and services:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product Enrollment**.  
The sub-menu appears.
3. Click the **Add** option from the **Product Enrollment** sub-menu.

The **Product Enrollment** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the account for product enrollment. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Used to specify the enrollment ID once the product is defined for an enrollment.	Yes
	<b>Note:</b> Enrollment ID is displayed when the product is added for enrollment.	
Account ID	Used to specify the account ID.	Yes
	<b>Note:</b> You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the <b>Account Information</b> field.	
Status	Displays the status of the product.	No
	<b>Note:</b> The product enrollment will always have the status as <b>Pending</b> .	
Start Date	Used to specify the date from when the product enrollment is effective.	Yes
End Date	Used to specify the date till when the product enrollment is effective.	Yes
Enrollment Channel	Used to specify the source for product enrollment.	Yes
Comments	Used to specify the comments for product enrollment.	No

- **Product and Services** - Used to define products and services for a product. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to specify the product for enrollment.	No
	<b>Note:</b> You can search for a product by clicking the <b>Search</b> (🔍) icon corresponding to the <b>Product</b> field.	
Start Date	Used to specify the date from when the product is effective.	No
End Date	Used to specify the date till when the product is effective.	No
Inclusion	Used to indicate whether the product is used for enrollment.	No
Standard Product	Displays the standard product which is included within the main product.	No

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the standard product is effective.	No
End Date	Used to specify the date till when the standard product is effective.	No
Inclusion	Used to indicate whether the standard product is used for enrollment.	No
Services	Displays the service that is a part of the standard product.	No
Start Date	Used to specify the date from when the service is effective.	No
End Date	Used to specify the date till when the service is effective.	No
Inclusion	Used to indicate whether the service is used for enrollment.	No
	<b>Note:</b> The inclusion check-box is already checked, if the service has been marked as <b>Mandatory</b> in the <b>Product Version</b> zone.	
Add on Services	Displays the add-on service which is a part of the packaged product.	No
Start Date	Used to specify the date from when the add-on service is effective.	No
End Date	Used to specify the date till when the add-on service is effective.	No
Inclusion	Used to indicate whether the add-on service is used for enrollment.	No

- **Product Priority** - Used to define the product priority for product enrollment.

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Displays the enrollment ID.	No
Packaged Products	Displays the packaged product which is added for enrollment.	No
Standard Products	Displays the standard product which is added for enrollment.	No
Product Enrolled Start Date	Displays the date from when the product's enrolled date is effective.	No
Product Enrolled End Date	Displays the date till when the product's enrolled date is effective.	No
Priority	Displays the priority of the product in terms of enrollment.	No

- **Characteristics** - Used to define the characteristics for a product enrollment.

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic will be effective.	No
Characteristics Type	Used to indicate the characteristic type for a characteristic.	No

Field Name	Field Description	Mandatory (Yes or No)
Characteristics Value	Used to indicate the characteristic value.	No

4. Enter the required details in the **Main** section.

**Note:**

The Start Date field is mandatory.

5. Enter the required details in the **Product and Services** section.

**Note:**

At least one product service must be added in the product version.

6. Enter the required details in the **Product Priority** section.

**Note:**

Ensure that priority for the product is specified.

7. Enter the required details in the **Characteristics** section.

8. Click **Save**.

**Note:**

You cannot enroll for a product where none of its product versions are effective within the enrollment date range.

You cannot enroll for a product where the product start date is later than the enrollment start date.

The enrollment start and end dates should be within the start and end dates of the product.

At least one product must be selected while enrolling products for an account.

At least one price item associated with the product service must be effective during enrollment.

The account is added for enrollment.

## **Defining a Characteristic for a Product Enrollment**

#### **Procedure**

To define a characteristic for a product enrollment:

1. Search for an enrollment in the **Search Enrollment** zone.
2. Click the **Add** button in the **Page Title** area of **Product Enrollment** zone.  
The **Product Enrollment** screen appears.
3. Click the **Characteristic** link from the **Section** group, located in the left-most area of the screen.  
The **Characteristics** section appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic will be effective for enrollment.	No
Characteristics Type	Used to indicate the characteristic type for a characteristic.	No
Characteristics Value	Used to indicate the characteristic value.	No

4. Enter the required details in the **Characteristics** section.
5. If you want to add more than one characteristic to the product enrollment, click the **Add (+)** icon. However, if you want to remove a characteristic from the enrollment, click the **Delete (■)** icon corresponding to the effective date field.
6. Click **Save**.  
The characteristics are defined for the product enrollment.

### Product Enrollment - Main

The **Product Enrollment - Main** tab displays information about the product enrollment, services, and its priority. It contains the following zones:

- [Product Enrollment](#) on page 2095
- [Enrolled Products](#) on page 2096
- [Enrolled Services](#) on page 2097
- [Enrolled Standard Products](#) on page 2097
- [Enrolled Add-on Services](#) on page 2087
- [Product Priority](#) on page 2099

### Product Enrollment

The **Product Enrollment** zone displays the details of the enrollment. It contains the following sections:

- **Main** - Displays the basic information about the enrollment. It contains the following fields:

Field Name	Field Description
Enrollment ID	Displays the enrollment ID.
Account Information	Displays information about the account. In addition, this column has a context menu (▼) which helps in navigating to other screens in the application.
Status	Displays the status of the enrollment.
Start Date	Displays the date from when product enrollment is effective.
End Date	Displays the date till when product enrollment is effective.
Enrollment Channel	Indicates the channel which is used for product enrollment.

Field Name	Field Description
Comments	Displays the comments that are added for product enrollment.

- **Record Actions** - This section contains the following fields:

Button Name	Button Description
Edit	Used to edit the details of the product enrollment.
	<b>Note:</b> The <b>Edit</b> button appears when the product enrollment status is <b>Enrolled</b> , <b>Cancelled</b> , and <b>Pending</b> status.
Duplicate	Used to create a new product enrollment using an existing enrollment.
	<b>Note:</b> The <b>Duplicate</b> button appears when the product enrollment status is <b>Enrolled</b> , <b>Cancelled</b> , <b>Pending</b> , and <b>Unenrolled</b> .
Delete	Used to delete a product enrollment.
	<b>Note:</b> The <b>Delete</b> button appears when the product enrollment status is <b>Canceled</b> .
Unenroll	Used to unenroll already conducted product enrollment.
	<b>Note:</b> The <b>Unenroll</b> button appears when the product enrollment status is <b>Enrolled</b> .
Submit	Used to submit the product for an enrollment.
	<b>Note:</b> The <b>Submit</b> button appears when the product enrollment status is <b>Pending</b> .

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product enrollment is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Characteristics** - Lists the characteristics defined for the product version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristics are effective for product enrollment.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the characteristic value.

## Enrolled Products

The **Enrolled Products** zone displays the products that have been enrolled. It contains the following columns:

Columns Name	Column Description
Product Type	Displays the type of the product.
Product	Displays the name of the product.

Columns Name	Column Description
Version Description	Displays the description of the enrolled product version.
	<b>Note:</b> It has a link. On clicking the link, the <b>Product Version</b> screen appears where you can view the details of the respective product version.
Start Date	Displays the date from when the enrollment is effective.
End Date	Displays the date till when the enrollment is effective.

**Note:** By default, the **Enrolled Services** zone does not appear. It appears when the product type is **Standard** and you click the **Broadcast** (📡) icon corresponding to the product type column.

## Product Enrollment - Log

The **Product Enrollment - Log** tab contains the following zone:

- [Enrollment Log](#) on page 2099

## Enrollment Log

The **Enrollment Log** zone lists the complete trail of actions performed in the product enrollment. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed in the product enrollment.

Column Name	Column Description
Details	Displays the details about the action performed in the product enrollment.
User	Displays the user who has performed the action in the product enrollment.
Log Type	Displays the type of log.
Related Object	Displays the object or entity that is generated when the action is performed in the product enrollment.
Status Reason	Displays the status reason of action performed in the product enrollment.

## Viewing the Standard Products Included in an Enrolled Product

### Procedure

To view the standard product included in an enrolled product:

1. Search for an enrolled product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Enrollment ID** column whose details you want to view.

The **Product Enrollment** screen appears.

**Note:** To view the standard products that are included in an enrolled product, the product must be a **Packaged** product.

3. In the **Enrolled Products** zone, click the **Broadcast** (📡) icon corresponding to the product type, whose enrolled standard products you want to view.

The **Enrolled Standard Products** zone appears.

4. View the list of the standard products that are enrolled in the **Enrolled Standard Products** screen.

**Note:** The **Enrolled Standard Products** zone appears when the product is of **Business** type, displayed in the **Enrolled Products** zone.

### Related Topics

Enrolled Standard Products zone	<a href="#">Enrolled Standard Products</a> on page 2097
How to search for enrolled products	<a href="#">Searching for a Product Enrollment</a> on page 2088

## Editing a Product Enrollment

### Procedure

To edit a product enrollment:

1. Search for the product in the **Search Enrollment** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.

The **Product Enrollment** screen appears.

3. Click the **Edit** button in the **Product Enrollment** zone.  
The **Product Enrollment** screen appears.
4. Modify the details of the product version in the main section, if required.
5. Define, edit, or remove the products and/or services for a product enrollment, if required.
6. Modify the product priority for a product enrollment, if required.

**Note:**

The priority for the enrolled product must be greater than zero (0).

7. Define, edit, or remove the characteristics for a product enrollment, if required.
8. Click **Save**.

**Note:**

You cannot edit the details of the product enrollment when it is in the enrolled status.

The changes made to the product enrollment are saved.

You cannot enroll for more than one product with the same product type and priority combination.

## Copying a Product Enrollment

---

Instead of creating a product enrollment from scratch, you can create a new product enrollment using an existing enrollment. This is possible through copying a product enrollment. On copying a product enrollment, the details including the algorithms and characteristics are copied to the new product. You can then edit the details, if required.

### Prerequisites

To copy a product enrollment, you should have:

- Account ID, Account Start and End Date, and Enrollment Channel defined in the application.
- Product and Characteristic Type defined in the application.

### Procedure

To copy a product enrollment:

1. Search for a product in the **Product Enrollment** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding to the product column, whose details you want to copy.  
The **Product Enrollment** screen appears.
3. Click the **Duplicate** button in the **Record Actions** section.  
The **Product Enrollment** screen appears.
4. Enter the required product details in the **Main** section, if required.
5. Define, edit, or remove the products and services, if required.
6. Define, edit, or remove the product priority, if required.
7. Define, edit, or remove the characteristics, if required.
8. Click **Save**.  
The new product enrollment is defined.

How to define the characteristics for a product enrollment	<a href="#">Defining a Characteristic for a Product Enrollment</a> on page 2094

## Enrolling a Product Enrollment

### Prerequisites

To enroll a product for an enrollment, you should have:

- Status of the product defined as Pending or Validated.
- Account Information defined in the application.
- Enrollment Channel defined in the application.
- Product defined in the application.
- Characteristic Type defined in the application.

### Procedure

To enroll a product for an enrollment:

1. Search for the product in the **Search Enrollment** zone.
2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.  
The **Product Enrollment** screen appears.
3. Click the **Submit** button in the **Product Enrollment** zone.  
The product status gets changed to **Enroll**.

**Note:** Once the submit button is clicked the ORMB application validates the account information, enrollment channel, product, and characteristic type field to ensure that they contain appropriate data. If any information is missing then an error message is displayed.

## Unenrolling a Product Enrollment

### Prerequisites

To unenroll a product for an enrollment, you should have:

- Status of the product defined as enrolled.
- Account Information defined in the application.
- Enrollment Channel defined in the application.

- Product defined in the application.
- Characteristic Type defined in the application.

### **Procedure**

To unenroll a product for an enrollment:

1. Search for the product in the **Search Enrollment** zone.
2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.  
The **Product Enrollment** screen appears.
3. Click the **Unenroll** button in the **Product Enrollment** zone.

The Unenroll Product Enrollment Pre Transition window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Displays the enrollment ID of the enrolled product.	Not applicable
Status	Displays the status of the enrolled product.	Not applicable
Start Date	Displays the start date of the enrolled product.	Not applicable
End Date	Displays the end date of the enrolled product.	No

**Note:** If the user manually performs the unenrollment process, the application will simply change the product enrollment status from **Enroll** to **Unenroll**. If in-case the **End Date** is not mentioned during the enrollment, the application keeps the **End Date** in an **Open** state. If the user does not performs the unenrollment process, then a batch named **C1-EXTRN** gets executed. This batch performs a check to ensure that the product end date and the business date make a match. If they both match, then all of the enrollments with relation to the product are unenrolled.

4. Click **Save**.  
The product enrollment status is changed to **Unenroll**.

## **Viewing the Log of a Product Enrollment**

### **Procedure**

To view the log of a Product Enrollment:

1. Search for the product enrollment in the **Product Enrollment** screen.
2. In the **Search Results** section, click the **Enrollment ID** link corresponding to the broadcast icon, whose product enrollment log you want to view.

The **Product Enrollment** screen appears. It consists of the following tabs:

- [Product Enrollment - Main](#) on page 2095
- [Product Enrollment - Log](#) on page 2099

3. Click the **Log** tab.  
The **Log** tab appears.
4. View the complete trail of actions performed on the product enrollment in the **Product Enrollment Log** zone.

## Subscription Billing

---

### Topics:

- [Prerequisites](#)
- [Subscription Type \(Used for Searching\)](#)
- [Subscription Type \(Used for Viewing\)](#)
- [Account Subscription \(Used for Searching\)](#)
- [Account Subscription \(Used for Viewing\)](#)

Oracle Revenue Management and Billing (ORMB) facilitates the service based billing wherein the customers pay a subscription price to have access to a product or service. For example, the customer may subscribe for newspaper service, cable service, internet service, video service (like Netflix, Amazon Prime Video), cloud service, and so on. The consumers may have to pay one or more charges with respect to the subscribed service. These charges can be one-time or recurring charges in nature.

In **ORMB**, you can carry out service based billing for an account by creating subscription on the account. While creating an account subscription, you need to specify the subscription type using which you want to create the account subscription. It is the subscription type which helps the system to determine:

- The business object using which the account subscription must be created in the system.
- The division and contract type for which the subscription type is created.
- The default duration for which the account subscription or service charge must be renewed when the automatic renewal option is selected.
- Whether the service charges should be prorated when the account subscription is suspended for a particular duration, or when one or more services or the entire account subscription is terminated.
- Whether already billed charges should be adjusted on the next bill in case of suspension and termination.
- The adjustment type using which the adjustments must be created when the account subscription is edited, suspended, or resumed.
- The adjustment type using which the adjustments must be created when one or more services or the entire account subscription is terminated.
- The services which the consumer can subscribe when the account subscription is created using the subscription type.
- The charges which can be charged when the consumer subscribes for a particular service.
- The distribution code for each charge which indicates the GL account to which the corresponding financial transaction must be posted.
- Whether the monthly recurring revenue is exempted for the service.
- The algorithm which must be executed when the account subscription is terminated, suspended, or resumed.

While creating an account subscription, the system allows you to use only those subscription types for the account which are defined for the division to which the account belongs and which are associated with the contract type whose contract exists on the account. You can specify whether the account subscription must be automatically renewed for the default duration (which is specified in the subscription type). In case of subscription renewal, you can specify whether there is any cost escalation at the time of renewal. You can add services and its charges in the account subscription depending on the subscription type. The

system allows you to indicate whether the charge is a one-time charge or a recurring charge. You can specify the frequency at which the recurring charges should be created for the subscribed services. In case of service charge renewal, you can specify whether there is any cost escalation at the time of renewal.

Once an account subscription is created, the status of the account subscription is set to **Draft**. You can then edit, delete, submit, or cancel the account subscription, if required. You can optionally configure approval workflow for the account subscription. On submitting an account subscription when the approval workflow is off, the status of the account subscription is changed to Active. However, on submitting an account subscription when the approval workflow is on, an approval transaction is created for the account subscription. Only when the approver approves the approval transaction, the status of the account subscription is changed to Active. Note that the status of the account subscription is changed to Active when the subscription start date is past dated. However, if the subscription start date is a future date, the status of the account subscription is changed to **Validated** irrespective of whether the approval workflow is on or off.

A new batch named **Account Subscription Periodic Monitor (C1-ASUBM)** batch is introduced in this release. It monitors or checks whether there are any account subscriptions in the **Validated** status. If there is an account subscription in the **Validated** status and its subscription start date is earlier than or equal to batch business date, the status of the account subscription is changed to **Active**. You can then edit the details, if required. However, while editing, you can only change end dates and add the services and charges in the account subscription. You cannot remove a service or charge from the account subscription once it is in the Active status. For more information on batch, see **Oracle Revenue Management and Billing Batch Guide**.

The system allows you to suspend the account subscription for a particular duration. While suspending the account subscription, you need to specify the suspension reason and suspension condition indicating whether fees should be charged or not for the suspended period. Based on the suspension condition and proration options defined, the system will accordingly update or cancel billable charges.

The system also allows you to terminate a particular service or all services at the same time. While terminating a service, you can specify the termination charges, if any. If the termination charges are specified, the adjustments will be created and posted accordingly on the next bill.

## Prerequisites

To setup the subscription billing feature, you need to do the following:

- Define the required subscription billing types in the system.
- Define the required characteristic types where the characteristic entity is set to **Subscription Type**.
- Define the required characteristic types where the characteristic entity is set to **Account Subscription**.
- Define values for the option types in the feature configuration.
- Define values for the lookup field.
- Define predefined values for the characteristic type.
- Adjustment Type will be validated based on the adjustment type profile attached on the Contract Type.
- At least one subscription charge is mandatory, for each subscription service.
- An account with a division same as the division of the selected subscription type.
- An account with a unique contract ID on the contract type.
- At least one subscription service is mandatory, for each subscription type.

<b>Subscription Billing Overview</b>	<a href="#">Subscription Billing</a> on page 2105

## Subscription Type (Used for Searching)

The **Subscription Type** screen allows you to search for the subscription type details using various search criteria. It contains the following zone:

- [Search Subscription Type](#) on page 2107

Through this screen, you can navigate to the following screen:

- [Subscription Type \(Used for Viewing\)](#) on page 2113

## Search Subscription Type

The **Search Subscription Type** zone allows you to search for a subscription type using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to search by a subscription type.	Yes
Description	Used to search a subscription type with a particular description.	No
Division	Used to search a subscription type which is associated with a particular division.	No
Contract Type	Used to specify the contract type to which the contract to which the subscription type belongs.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.	
Status	Used to search the subscription type with a particular status. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	No

**Note:** You must specify at least one search criterion while searching for a subscription type.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Subscription Information Type	Displays the basic information about the subscription type.
	<b>Note:</b> It has a link. On clicking the link, the <b>Subscription Type</b> screen appears where you can view the details of the respective subscription type.
Status	Indicates the status of the subscription type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Division	Displays the division to which the subscription type belongs.
Contract Type	Displays the contract type that you want to associate with the subscription type.

### Related Topics

## Searching for a Subscription Type

### Prerequisites

To search for a subscription type, you should have:

- Subscription type business objects defined in the application
- Subscription Services defined in the application

### Procedure

To search for a subscription type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **S** and then click **Subscription Type**.

The **Subscription Type** screen appears.

- Enter the search criteria in the **Search Subscription Type** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of subscription types that meet the search criteria appears in the **Search Results** section.

**Note:** You must specify at least one search criterion while searching for a subscription type.

## Viewing the Subscription Type Details

### Procedure

To view the subscription type details:

- Search for the subscription type in the **Subscription Type** screen.
- In the **Search Results** section, click the link in the **Subscription Type Information** column whose details you want to view.  
The **Subscription Type** screen appears.
- View the details of the subscription type in the **Subscription Type** zone.

## Defining a Subscription Type

### Prerequisites

To define a subscription type, you should have:

- Subscription type business objects defined in the application
- Subscription Services defined in the application

### Procedure

To define a subscription type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.

2. From the **Admin** menu, select **S** and then click **Subscription Type**.  
The **Subscription Type** screen appears.
3. Enter the search criteria in the **Search Subscription Type** zone.
4. Click **Add** button in the page title area of the **Subscription Type** screen.  
The **Subscription Type** screen appears. It contains the following sections:
  - **Main** – Used to specify basic details about the subscription services.
  - **Subscription Services** – Used to specify the details of the subscription services.
  - **Algorithms** – Used to specify the algorithms used in the subscription type.
  - **Characteristics** – Used to define the characteristics for the subscription type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to specify the subscription type.	Yes
Description	Used to specify the description for the subscription type.	Yes
Account Subscription Business Object	Used to indicate the business object using which you want to create a person when the corresponding account subscription is processed.	Yes
Detailed Description	Used to specify additional information about the subscription type.	No
Division	Used to indicate the division to which you want to associate the subscription type.	Yes
Contract Type	Used to indicate the <b>Contract Type</b> to which you want to associate the subscription type.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.	
Renewal Duration Type	Used to indicate the renewal cycle. The valid values are: <ul style="list-style-type: none"> <li>• Day</li> <li>• Month</li> <li>• Week</li> <li>• Year</li> </ul>	Yes
Renewal Duration	Used to specify the duration of the renewal of the subscription.	Yes
Status	Used to indicate the status of the subscription type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.	No
Adjust Billed Charges	Indicates the billed charges adjusted.	No
	<b>Note:</b> This field appears when you check the <b>Prorate Charges</b> check box.	

Field Name	Field Description	Mandatory (Yes or No)
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.	No
	<b>Note:</b> This field appears when you check the <b>Prorate Charges</b> and <b>Adjust Billed Charges</b> check box.	
Termination Adjustment Type	Used to indicate the adjustment type used for termination of the subscription service.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	

The **Subscription Services** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Monthly Recurring Revenue (MRR) Exempted	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Distribution Code	Used to indicate distribution code linked to the service that will be used on the billable charge.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Distribution Code Search</b> window appears.	

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event.	Yes
Sequence	Used to specify the sequence number.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	

- Enter the required details in the **Main** section.
- Add algorithms for the subscription type, if required.
- Define characteristics for the subscription type, if required.
- Click **Save**.  
The subscription type is defined.

<b>Subscription Type</b> screen	<a href="#">Subscription Type (Used for Viewing)</a> on page 2113
<b>Search Subscription Type</b> zone	<a href="#">Search Subscription Type</a> on page 2107
How to define a characteristic for a subscription type	<a href="#">Defining a Characteristic for a Subscription Type</a> on page 2112

## Defining a Characteristic for a Subscription Type

### Prerequisites

To define a characteristic for a subscription type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Subscription Type**)

### Procedure

To define a characteristic for a subscription type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a subscription type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for a subscription type.
Characteristic Type	Used to specify the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for a subscription type.
Characteristic Value	Used to specify the value of characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for a subscription type.

2. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the subscription type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the subscription type, click the **Delete** (🗑️) icon corresponding to the characteristic.

How to copy a subscription type	<a href="#">Copying a Subscription Type</a> on page 2117

## Subscription Type (Used for Viewing)

The **Subscription Type** screen allows you to define, edit, copy, and delete subscription type. It contains the following zone:

- [Subscription Type](#) on page 2113

### Subscription Type

The **Subscription Type** zone displays the details of the subscription type. It contains the following sections:

- **Main** – Displays basic information about the subscription type. It contains the following fields:

Field Name	Field Description
Subscription Type	Displays the subscription type.
Description	Displays the description for the subscription type.
Account Subscription Business Object	Indicates the business object using which you want to create a person when the corresponding account subscription is processed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the subscription type.
Division	Indicates the division to which you want to associate the subscription type.
	<b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the respective division.
Contract Type	Indicates the <b>Contract Type</b> to which you want to associate the subscription type.
Renewal Duration Type	Indicates the renewal cycle. The valid values are: <ul style="list-style-type: none"> <li>• Day</li> <li>• Month</li> <li>• Week</li> <li>• Year</li> </ul>
Renewal Duration	Displays the duration of the renewal of the subscription.

Field Name	Field Description
Status	Indicates the status of the subscription type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
	<b>Note:</b> You cannot change the status of a <b>Subscription Type</b> to <b>Inactive</b> if there are account subscriptions that are created using the <b>Subscription Type</b> and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancellation occurs in the middle of the month.
Adjust Billed Charges	Indicates the billed charges adjusted.
	<b>Note:</b> This field appears when you check the <b>Prorate Charges</b> check box.
Adjustment Type	Indicates the adjustment type using which the adjustment must be created.
	<b>Note:</b> This field appears when you check the <b>Prorate Charges</b> and <b>Adjust Billed Charges</b> check box.  It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective business object.
Termination Adjustment Type	Indicates the adjustment type used for termination of the subscription service.

- The **Subscription Services** section contains the following columns:

Column Name	Column Description
Subscription Service	Displays the type of the subscription service.
Monthly Recurring Revenue (MRR) Exempted	Indicates whether the service type is exempted from MRR calculation.
Subscription Charge	Indicates the charges related to the subscription service.
Distribution Code	Indicates the distribution code linked to the service that will be used on the billable charge.

- Characteristics** – Lists the characteristics defined for the subscription type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the subscription is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the subscription type.
Delete	Used to delete the subscription type.

Button Name	Button Description
	<b>Note:</b> You can delete an subscription type when you have not created an subscription type using the subscription type.
Duplicate	Used to create a new subscription type using an existing subscription type.

- **Record Information** – This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the subscription type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- The **Algorithms** section contains the following columns:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Displays the system event.	Yes
Sequence	Displays the sequence number.	Yes
Algorithm	Displays an algorithm associated to the system event that you have selected.	Yes
	<b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective subscription type.

## Editing a Subscription Type

### Procedure

To edit a subscription type:

1. Search for the subscription type in the **Subscription Type** screen.
2. In the **Search Results** section, click the link in the **Subscription Type Information** column corresponding to the subscription type whose details you want to edit.  
The **Subscription Type** screen appears.
3. Click the **Edit** button in the **Subscription Type** zone.  
The **Subscription Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the subscription services.
- **Subscription Services** – Used to specify the details of the subscription services.
- **Algorithms** – Used to specify the algorithms used in the subscription type.
- **Characteristics** – Used to define the characteristics for the subscription type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to specify the subscription type.	Yes
Description	Used to specify the description for the subscription type.	Yes
Account Subscription Business Object	Used to indicate the business object using which you want to create a person when the corresponding account subscription is processed.	Yes
Detailed Description	Used to specify additional information about the subscription type.	No
Division	Used to indicate the division to which you want to associate the subscription type.	Yes
Contract Type	Used to indicate the <b>Contract Type</b> to which you want to associate the subscription type.	Yes
Renewal Duration Type	Used to indicate the renewal cycle. The valid values are: <ul style="list-style-type: none"> <li>• Day</li> <li>• Month</li> <li>• Week</li> <li>• Year</li> </ul>	Yes
Renewal Duration	Used to specify the duration of the renewal of the subscription.	Yes
Status	Used to indicate the status of the subscription type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.	No
Adjust Billed Charges	Indicates the billed charges adjusted.	No
	<b>Note:</b> This field appears when you check the <b>Prorate Charges</b> check box.	
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.	No
	<b>Note:</b> This field appears when you check the <b>Prorate Charges</b> and <b>Adjust Billed Charges</b> check box.	
Termination Adjustment Type	Used to indicate the adjustment type used for termination of the subscription service.	No

The **Subscription Services** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Monthly Recurring Revenue (MRR) Exempted	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Distribution Code	Used to indicate distribution code linked to the service that will be used on the billable charge.	No

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event.	Yes
Sequence	Used to specify the sequence number.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	

4. Add algorithms for the subscription type, if required.
5. Define, edit, or remove characteristics of the subscription type, if required.
6. Click **Save**.

The changes made to the subscription type are saved.

## Copying a Subscription Type

### Prerequisites

To copy a subscription type, you should have:

- Subscription type (whose copy you want to create) defined in the application
- Account Subscription business objects defined in the application

### Procedure

To copy a subscription type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **S** and then click **Subscription Type**.  
The **Subscription Type** screen appears.
3. Enter the search criteria in the **Search Subscription Type** zone.
4. In the **Search Results** section, click the link in the **Subscription Type Information** column whose details you want to view.
5. Click the **Duplicate** button in the **Subscription Type** zone.  
The **Subscription Type** screen appears. It contains the following sections:
  - **Main** – Used to specify basic details about the subscription services.
  - **Subscription Services** – Used to specify the details of the subscription services.
  - **Algorithms** – Used to specify the algorithms used in the subscription type.
  - **Characteristics** – Used to define the characteristics for the subscription type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to specify the subscription type.	Yes
Description	Used to specify the description for the subscription type.	Yes
Account Subscription Business Object	Used to indicate the business object using which you want to create a person when the corresponding account subscription is processed.	Yes
Detailed Description	Used to specify additional information about the subscription type.	No
Division	Used to indicate the division to which you want to associate the subscription type.	Yes
Contract Type	Used to indicate the <b>Contract Type</b> to which you want to associate the subscription type.	Yes
Renewal Duration Type	Used to indicate the renewal cycle. The valid values are: <ul style="list-style-type: none"> <li>• Day</li> <li>• Month</li> <li>• Week</li> <li>• Year</li> </ul>	Yes
Renewal Duration	Used to specify the duration of the renewal of the subscription.	Yes
Status	Used to indicate the status of the subscription type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Prorate Charges	Used to indicate whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.	No
Adjust Billed Charges	Used to indicate the billed charges adjusted.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when you check the <b>Prorate Charges</b> check box.	
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.	No
	<b>Note:</b> This field appears when you check the <b>Prorate Charges</b> and <b>Adjust Billed Charges</b> check box.	
Termination Adjustment Type	Used to indicate the adjustment type used for termination of the subscription service.	No

The **Subscription Services** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Monthly Recurring Revenue Exempted (MRR)	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Distribution Code	Used to indicate distribution code linked to the service that will be used on the billable charge.	No

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event.	Yes
Sequence	Used to specify the sequence number.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	

6. Enter the required details in the **Main** section.
7. Add algorithms for the subscription type, if required.
8. Define characteristics for the subscription type, if required.
9. Click **Save**.  
The new subscription type is defined.

Column Name	Column Description
Subscription Information	Displays the basic information about the subscription type.
	<b>Note:</b> It has a link. On clicking the link, the <b>Subscription Type</b> screen appears where you can view the details of the respective upload request.
Account Information	Displays the basic information about the account.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective upload request.

## Searching for an Account Subscription

### Prerequisites

To search for an account subscription, you should have:

- Subscription type defined in the application
- Subscription Services defined in the application

### Procedure

To search for an account subscription:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Account Subscription**.  
A sub-menu appears.
3. Click the **Search** option from the **Account Subscription** sub-menu.  
The **Account Subscription** screen appears.
4. Enter the search criteria in the **Search Account Subscription** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of account subscriptions that meet the search criteria appears in the **Search Results** section.

**Note:** You must specify at least one search criterion while searching for an account subscription.

## Defining an Account Subscription

### Prerequisites

To define an account subscription, you should have:

- Subscription type business objects defined in the application
- Subscription Services defined in the application

### Procedure

To define an account subscription:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Account Subscription**.  
A sub-menu appears.
3. Click the **Add** option from the **Account Subscription** sub-menu.  
The **Account Subscription** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to search a particular subscription type.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the window appears.	
Account ID	Used to search a particular subscription type.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	

**Tip:** Alternatively, you can access the **Account Subscription** screen by clicking the **Add** button in the page title area of the **Account Subscription** screen.

4. Click **OK**.  
The **Account Subscription** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the subscription services.
- **Subscription Services and Charges** – Used to specify the details of the subscription services.
- **Characteristics** – Used to define the characteristics for the subscription type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Information Type	Displays the basic information about the subscription type.	Not applicable
Account Information	Displays the basic information about the account linked to the subscription type.	Not applicable
Subscription Start Date	Used to specify the date from when the subscription is effective.	Yes
	<b>Note:</b> The subscription start date cannot be later than the subscription end date.	
Subscription End Date	Used to specify the date till when the subscription is effective.	Yes
	<b>Note:</b> The subscription end date cannot be earlier than the subscription start date.	
Automatic Renewal	Used to indicate whether you want to renew the subscription automatically.	No
Cost Escalation (in Percentage)	<b>Note:</b> This field appears when <b>Automatic Renewal</b> check box is selected.	No
Comments	Used to specify additional information about the account subscription.	No

The **Subscription Services and Charges** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Service Start Date	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Service End Date	Used to indicate distribution code linked to the service that will be used on the billable charge.	No
Subscription Charge	Used to specify the type of the subscription charges.	Yes
Charge Amount	Used to specify the charges related to the subscription charge.	Yes
Charge Start Date	Used to specify the date from when the charges are effective.	Yes
Charge End Date	Used to specify the date till when the charges are effective.	Yes

Field Name	Field Description	Mandatory (Yes or No)
One-Time Charge	Used to indicate whether you want to pay the subscription charges one-time.	No
Recurring Charge Frequency	Used to specify whether you want to pay the subscription charges on regular recurring basis.	No
	<b>Note:</b> This field gets enabled when you select the check box corresponding to the <b>One-Time Charge</b> field.	
Automatic Renewal	Used to indicate whether you want to renew the subscription services and charges automatically.	No
Cost Escalation (in Percentage)	Used to indicate the percentage in which the subscription charge amount must increase when the automatic renewal of the subscription is triggered.	No
	<b>Note:</b> This field appears when <b>Automatic Renewal</b> check box is selected.	
Description on Bill	Used to specify the description on the bill.	No

- Enter the required details in the **Main** section.
- Enter the required details in the **Subscription Services and Charges** section.
- Define characteristics for an account subscription, if required.
- Click **Save**.  
The account subscription is defined.

	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Subscription Start Date	Displays the subscription start date.
Subscription End Date	Displays the subscription end date.
Automatic Renewal	Indicates whether the automatic renewal of the subscription is opted.
Status	Displays the status of the account subscription. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Canceled</li> <li>• Expired</li> <li>• Draft</li> <li>• Renewed</li> <li>• Suspended</li> <li>• Validated</li> <li>• Terminated</li> </ul>
Comments	Displays the additional information about the account subscription.

- **Characteristics** – This section lists the characteristics of the account subscription. It contains the following columns:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the account subscription.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Field Name	Field Description
Edit	Used to edit the details of the account subscription.
	<b>Note:</b> The <b>Edit</b> button appears when the account subscription is in the <b>Active</b> or <b>Draft</b> status.
Suspend	Used to suspend the account subscription.
	<b>Note:</b> The <b>Suspend</b> button appears when the account subscription is in the <b>Active</b> status.
Terminate	Used to terminate the account subscription service. Used to suspend the account subscription.
	<b>Note:</b> The <b>Terminate</b> button appears when the account subscription is in the <b>Active</b> or <b>Suspended</b> status.
Delete	Used to delete the account subscription.
	<b>Note:</b> The <b>Delete</b> button appears when the account subscription is in the <b>Active</b> or <b>Suspended</b> status.
Submit	Used to submit the account subscription details.
	<b>Note:</b> The <b>Submit</b> button appears when the account subscription is in the <b>Draft</b> status.
Cancel	Used to cancel the account subscription.
	<b>Note:</b> The <b>Cancel</b> button appears when the account subscription is in the <b>Draft</b> and <b>Validated</b> status.
Resume	Used to resume the account subscription service.
	<b>Note:</b> The <b>Resume</b> button appears when the account subscription is in the <b>Suspended</b> status.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the account subscription is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date Time	Displays the date and time when the account subscription status is updated.
Creation Date Time	Displays the date and time when the account subscription is created.

## Subscription Services

The **Subscription Services** zone displays the details of the subscription services. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence number.
Subscription Service	Displays the type of subscription service.
Service Start Date	Displays the date from when the subscription service is effective.
Service End Date	Displays the date till when the subscription service is effective.
Termination Date	Displays the date on which the subscription service is terminated.
Termination Reason	Displays the reason for the termination of subscription service.
Edit	Used to edit the details of the subscription service.
Delete	Used to delete the subscription service.

## Subscription Service Charges

The **Subscription Service Charges** zone displays the details of the charges related to the subscription services. It contains the following columns:

Column Name	Column Description
Subscription Charge	Displays the charges related to the subscription service.
Charge Amount	Displays the charges related to the subscription charge.
Charge Start Date	Displays the date from when the charges are effective.
Charge End Date	Displays the date till when the charges are effective.
One-Time Charge	Indicates the one-time charges related to the subscription services. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

## Viewing the Charges of a Subscription Service

### Procedure

To view the charges of a subscription service:

1. Search for the account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding to the account subscription whose log you want to view.  
The **Account Subscription** screen appears.
3. Click the **Broadcast** (📡) icon corresponding to the subscription service whose charges you want to view.  
The **Subscription Service Charges** zone appears.
4. View the details in the **Subscription Service Charges** zone.

### Related Topics

## Viewing Related Entities of a Subscription Service Charge

### Procedure

To view the related entities of a subscription service charge:

1. Search for the account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding to the account subscription whose log you want to view.  
The **Account Subscription** screen appears.
3. Click the **Broadcast** (📡) icon corresponding to the subscription service whose charges you want to view.  
The **Subscription Service Charges** zone appears.
4. Click the **Broadcast** (📡) icon corresponding to the subscription charge whose details you want to view.  
The **Subscription Service Charge Entities** zone appears.
5. View the details as required in the **Subscription Service Charge Entities** zone.

## Viewing Suspension History of the Account Subscription

### Procedure

To view the suspension history of the account subscription:

1. Search for the account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding to the account subscription whose log you want to view.  
The **Account Subscription** screen appears.
3. Click the **Broadcast** (📡) icon corresponding to the subscription service whose charges you want to view.  
The **Subscription Service Charges** zone appears.
4. Ensure that the **Account Subscription Suspension History** zone is expanded.
5. View the details as required in the **Account Subscription Suspension History** zone.

## Viewing Termination Charges of the Account Subscription

### Procedure

To view the termination charges of the account subscription:

1. Search for the account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding to the account subscription whose log you want to view.  
The **Account Subscription** screen appears.
3. Click the **Broadcast** (📡) icon corresponding to the subscription service whose charges you want to view.  
The **Subscription Service Charges** zone appears.
4. Ensure that the **Account Subscription Termination Charges** zone is expanded.
5. View the details as required in the **Account Subscription Termination Charges** zone.

## Suspending an Account Subscription

### Procedure

To suspend an account subscription:

1. Search for an account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding to an account subscription whose details you want to edit.  
The **Account Subscription** screen appears.
3. Click the **Suspend** button in the **Account Subscription** zone.  
The **Account Subscription Suspension** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Suspension Start Date	Used to specify the start date of the account subscription suspension.	Yes
Suspension End Date	Used to specify the end date of the account subscription suspension.	Yes
Suspension Condition	Used to specify the condition of the account subscription suspension.	Yes
Suspension Reason	Used to specify the reason of the account subscription suspension.	Yes

4. Click **Save**.  
An account subscription is suspended.

**Note:** You can suspend only those account subscriptions whose status is in **Active** status.

## Terminating an Account Subscription

### Procedure

To terminate an account subscription:

1. Search for an account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding to an account subscription whose details you want to edit.  
The **Account Subscription** screen appears.
3. Click the **Terminate** button in the **Account Subscription** zone.  
The **Account Subscription Service Termination** window appears. It contains the following sections:
  - **Main**
    - Used to specify basic details about the subscription services.
  - **Termination Charges** – Used to specify the charges related to the termination of the account subscription services.

The **Main** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to indicate the type of subscription service.	Yes
Termination Date	Used to specify date of the termination subscription service.	Yes
Termination Reason	Used to specify reason of the termination subscription service.	Yes

The **Termination Charges** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Termination Charge Type	Used to indicate the type of account subscription termination charges.	Yes
Charge Amount	Used to indicate the charges for the termination of the account subscription.	Yes
Termination Adjustment Type	Used to specify termination adjustment type.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> screen appears.	Yes

4. Click **Save**.  
An account subscription is terminated.

**Note:** You can terminate only those account subscriptions whose status is in **Active** or **Suspended** status.

## **Resuming an Account Subscription**

### **Procedure**

To resume an account subscription:

1. Search for an account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding to an account subscription whose details you want to edit.  
The **Account Subscription** screen appears.
3. Click the **Resume** button in the **Account Subscription** zone.  
The **Confirm Resume** window appears.
4. Click **OK**.  
An account subscription is resumed.

**Note:** You can resume only those account subscriptions whose status is in **Suspended** status.

## Mass Pricing Update

---

### Topics:

- [Prerequisites](#)
- [Mass Pricing Update Request \(Without Approval\) Status Transition](#)
- [Mass Pricing Update Request \(With Approval\) Status Transition](#)
- [Algorithms Used in C1-MassPricingReq](#)
- [Request Type](#)
- [Mass Pricing Update Request \(Used for Searching\)](#)
- [Mass Pricing Update Request \(Used for Viewing\)](#)
- [Mass Pricing Update Request](#)

Oracle Revenue Management and Billing provides the ability for mass price item pricing update. In other words, the system enables you to update multiple active price item pricing assigned to a person, account, price list, or product at the same time. You can search for the price assignments which you want to update using the following fields:

- Price Item
- Price Item Parameters
- Account ID
- Person ID
- Division
- Update Date
- Pricing Entity Type

On specifying the search criteria, the system fetches the number of entities on which the price item pricing is defined and the number of price assignments on a particular type of pricing entity. Once you select one or more price item pricing, you can create the mass pricing update request by clicking the **Mass Pricing Update** button. While creating a mass pricing update request, you need to specify the mass pricing update request type using which you want to create the mass pricing update request. It is the mass pricing update request type which helps the system to determine:

- The business object using which the mass pricing update request should be created in the system.
- Whether the approval is required for the mass pricing update request.
- Whether the mass pricing update must be performed in the deferred mode when the number of price assignments in the mass pricing update request exceeds the defer processing count.

Once the mass pricing update request type is selected, you need to specify the mass pricing update criteria, mass pricing update type, and rate value. Once a mass pricing update request is created in the **Draft** status, you can submit the mass pricing update request. On submitting a mass pricing update request, the status of the mass pricing update request is changed to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count. If the status is changed to **Deferred Processing**, you need to click the **Submit Batch** button. On clicking the **Submit Batch** button, the system automatically creates a batch job using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined for the **Thread Count** and **Thread Pool Name** option types in the **C1-MASPRI** feature configuration.

Once the batch job is executed, the status of the mass pricing update request is changed to **Updating Price Assignments**. If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment

is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to **Processed**. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to **Error**. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to Error. Finally, the status of the mass pricing update request is changed to **Processed**.

You can optionally configure the approval workflow for the mass pricing update request. If the **Approval Required** field is set to **Yes** in the mass pricing update request type, the status of the mass pricing update request is changed to **Approval In Progress** when you submit the mass pricing update request. Once the approver approves the mass pricing update request, the status of the mass pricing update request is changed to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count. However, if the approver rejects a mass pricing update request, the status of the mass pricing update request is changed to **Rejected**.

For more information on how to setup the mass pricing update process, see [Prerequisites](#) on page 2145.

## Prerequisites

---

To setup the mass pricing update feature, you need to do the following:

- Define the required mass pricing update request types in the system.
- Set the **Mass Pricing Update (C1-MASPRI)** feature configuration
- Attach a currency conversion algorithm to the **Currency Conversion For Bill Segments** algorithm spot of the required divisions
- Define one To Do type for submitter and another To Do type for approver when the approval is required for a mass pricing update request
- Assign a To Do role to the required To Do types in the application

Updating Price Assignments		Enter	C1-MPRIUPDPA	C1-MPRIUPDPA	Refer to <a href="#">C1-MPRIUPDPA</a> on page 2150
Processed		-	-	-	-
Rejected		Enter	C1-MPRIRJTD	C1-MPRIRJTD	Refer to <a href="#">C1-MPRIRJTD</a> on page 2150

## C1-REQST-INF

This algorithm generates the request information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

1. Request Type Description
2. Request Status
3. Request ID

## C1-MPRIVALDN

This algorithm is invoked when you create a mass pricing update request. It checks the following:

- Whether the mass pricing update criteria is specified.
- Whether the mass pricing update type is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
- Whether the rate value is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
- Whether the currency is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price** and the mass pricing update type is set to **Absolute**.
- If any of the above conditions are not met, the system does not allow you to create the mass pricing update request.

## C1-MPRISUBMT

---

This algorithm is invoked when you submit a mass pricing update request. If the approval workflow is configured on the respective mass pricing update request type, it changes the status of the mass pricing update request to **Approval in Progress**. However, if the approval workflow is not configured on the respective mass pricing update request type, it changes the status of the mass pricing update request to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count.

## C1-MPRIPTD

---

This algorithm is invoked when the status of the mass pricing update request is changed to **Approval in Progress**. It creates a To Do using the approval To Do type which is specified in the respective mass pricing update request type. Once a To Do is created, it is assigned to all users with an approval To Do role which is specified in the respective mass pricing update request type.

## F1-TODOCOMPL

---

This algorithm type completes the To Do entries that are linked to an object when the object exits the given status.

It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

## F1-AT-RQJ

---

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-MPRIDEFER

---

This algorithm is invoked when the status of the mass pricing update request is changed to **Running C1-GENRQ Batch**. It creates a batch job using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined in the **Thread Count** and **Thread Pool Name** option types of the **Mass Pricing Update (C1-MASPRI)** feature configuration. It also creates a log for the mass pricing update request which indicates the batch job ID.

## C1-MPRIAPRD

---

This algorithm is invoked when you approve a mass pricing update request. If the number of price assignments in the mass pricing update request exceeds the defer processing count, the status of the mass pricing update request is changed to **Deferred Processing**. However, if the number of price assignments in the mass pricing update request does not exceed the defer processing count, the status of the mass pricing update request is changed to **Updating Price Assignments**.

## C1-MPRIUPDPA

This algorithm is invoked when the status of the mass pricing update request is changed to **Updating Price Assignments**. If a price assignment is referred in past, this algorithm ends the existing price assignment and creates a new price assignment. However, if a price assignment is not yet referred in the system, this algorithm updates the existing price assignment. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to **Processed**. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to **Error**. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to **Error**. Note that if a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.

## C1-MPRIRJTD

This algorithm is invoked when the status of the mass pricing update request is changed to **Rejected**. It creates a To Do using the submitter To Do type which is specified in the respective mass pricing update request type. Once a To Do is created, it is assigned to all users with a submitter To Do role which is specified in the respective mass pricing update request type.

## Request Type

Oracle Revenue Management and Billing allows you to define a mass pricing update request type using which you can create mass pricing update requests. It is the mass pricing request type which helps the system to determine:

- The business object using which the mass pricing update request should be created in the system.
- Whether the approval is required for the mass pricing update request.
- Whether the mass pricing update must be performed in the deferred mode when the number of price assignments in the mass pricing update request exceeds the defer processing count.

The **Request Type** screen allows you to define, edit, copy, and delete a mass pricing update request type. It contains the following zones:

- [Request Type List](#) on page 2150
- [Request Type](#) on page 2151

## Request Type List

The **Request Type List** zone lists the mass pricing update request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Request Type	Displays the mass pricing update request type.
Description	Displays the description of the mass pricing update request type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Mass Pricing Request Type</b> screen appears where you can edit the details of the mass pricing update request type.
Duplicate	On clicking the <b>Duplicate</b> (⌕) icon, the <b>Mass Pricing Request Type</b> screen appears where you can define a new mass pricing update request type using an existing mass pricing update request type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the mass pricing update request type.

Column Name	Column Description
	<b>Note:</b> You can delete the mass pricing update request type when you have not created a mass pricing update request using the mass pricing update request type.

On clicking the **Broadcast** (📡) icon corresponding to a mass pricing update request type, the **Request Type** zone appears with the details of the respective mass pricing update request type.

You can define a new mass pricing update request type by clicking the **Add** link in the upper right corner of the **Request Type List** zone.

#### Related Topics

How to view the details of a mass pricing update request type	<a href="#">Viewing the Mass Pricing Update Request Type Details</a> on page 2163

## Request Type

The **Request Type** zone displays the details of the mass pricing update request type. It contains the following sections:

- **Main** - Displays the basic information about the mass pricing update request type. It contains the following fields:

Field Name	Field Description
Request Type	Displays the mass pricing update request type.
Request Business Object	Indicates the business object using which you want to create a mass pricing update request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Description	Displays the description for the mass pricing update request type.
Detailed Description	Displays the additional information about the mass pricing update request type.
Status	Indicates the status of the mass pricing update request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Defer Processing Count	Indicates whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count.

Field Name	Field Description
	<p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).</p>
Approval Required	Indicates whether approval is required before updating the price item pricing through a mass pricing update request.
Approval Type	Indicates the type of approval. The valid value is: <ul style="list-style-type: none"> <li>Request Level Approval</li> </ul>
Approval To Do Type	Indicates that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval. <p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of respective To Do type.</p>
Approval To Do Role	Indicates that the users with the specified To Do role will receive the mass pricing update request when it is submitted for approval. <p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of respective To Do role.</p>
Submitter To Do Type	Indicates that To Do entry of the specified To Do type must be created when an approver rejects a mass pricing update request. <p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of respective To Do type.</p>
Submitter To Do Role	Indicates that the users with the specified To Do role will receive the mass pricing update request when it is rejected by an approver.

Field Name	Field Description
	<p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of respective To Do role.</p>

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the mass pricing update request type.
Delete	Used to delete the mass pricing update request type.
	<p><b>Note:</b> You can delete a mass pricing update request type when you have not created a mass pricing update request using the mass pricing update request type.</p>
Duplicate	Used to create a new mass pricing update request type using an existing mass pricing update request type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the mass pricing update request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>

By default, the **Request Type** zone does not appear in the **Request Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a mass pricing update request type in the **Request Type List** zone.

You can define a new mass pricing update request type by clicking the **Add** link in the upper right corner of this zone.

How to edit a mass pricing update request type	<a href="#">Editing a Mass Pricing Update Request Type</a> on page 2156
How to copy a mass pricing update request type	<a href="#">Copying a Mass Pricing Update Request Type</a> on page 2159
How to delete a mass pricing update request type	<a href="#">Deleting a Mass Pricing Update Request Type</a> on page 2162
How to view the details of a mass pricing update request type	<a href="#">Viewing the Mass Pricing Update Request Type Details</a> on page 2163

## Defining a Mass Pricing Update Request Type

### Prerequisites

To define a mass pricing update request type, you should have:

- Mass pricing update request type business objects defined in the application.

- Mass pricing update request business objects defined in the application.
- One To Do type defined for submitter and another To Do type defined for approver when the approval is required for a mass pricing update request
- A To Do role assigned to the required To Do types in the application

### **Procedure**

To define a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Request Type Business Object	Used to indicate the business object using which you want to create the mass pricing update request type.	Yes
	<b>Note:</b> You can create a mass pricing update request type using the <b>Mass Pricing Request Type (C1-MassPricingReqType)</b> business object.	

**Note:** Alternatively, you can access this screen by clicking the **Add** link in the upper right corner of the **Request Type List** zone.

4. Select the **Mass Pricing Request Type** business object from the respective field.
5. Click **OK**.

The **Mass Pricing Update Request Type** screen appears. It contains the following section:

- **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: <ul style="list-style-type: none"> <li>• Mass Pricing Request</li> </ul>	Yes
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Inactive</li> </ul>	
Defer Processing Count	<p>Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count.</p> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).</p>	No
Approval Required	Used to indicate whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	<p>Used to indicate the type of approval. The valid value is:</p> <ul style="list-style-type: none"> <li>Request Level Approval</li> </ul> <p><b>Note:</b> This field appears when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>The <b>Approval To Do Type</b> field appears when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Approval To Do Role	Used to indicate that the users with the specified To Do role must receive the mass pricing update request for approval.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Approval Required</b> option is selected.  The list includes only those To Do roles which are associated to the specified approval To Do type.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Submitter To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the mass pricing update request.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.  The <b>Submitter To Do Type</b> field appears when the <b>Approval Required</b> option is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Submitter To Do Role	Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the mass pricing update request.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> option is selected.  The list includes only those To Do roles which are associated to the specified submitter To Do type.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.

6. Enter the required details in the **Main** section.

7. Click **Save**.

The mass pricing update request type is defined.

## Editing a Mass Pricing Update Request Type

### Prerequisites

To edit a mass pricing update request type, you should have:

- Mass pricing update request business objects defined in the application.

### Procedure

To edit a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Request Type** sub-menu.  
The **Request Type** screen appears.
4. In the **Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the mass pricing update request type whose details you want to edit.

The **Mass Pricing Update Request Type** screen appears. It contains the following section:

- **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: <ul style="list-style-type: none"> <li>• Mass Pricing Request</li> </ul>	Yes
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Defer Processing Count	Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).</p>	
Approval Required	Indicates whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	Indicates the type of approval. The valid value is:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>Request Level Approval</li> </ul>	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
	<b>Note:</b> This field appears when the <b>Approval Required</b> option is selected.	
Approval To Do Type	Indicates that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>The <b>Approval To Do Type</b> field appears when the <b>Approval Required</b> option is selected.</p>	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Approval To Do Role	Indicates that the users with the specified To Do role must receive the mass pricing update request for approval.	Yes (Conditional)
		<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
	<p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>The list includes only those To Do roles which are associated to the specified approval To Do type.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Type	Indicates that To Do entry of the specified To Do type must be created when the approver rejects the mass pricing update request.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears. The <b>Submitter To Do Type</b> field appears when the <b>Approval Required</b> option is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Submitter To Do Role	Indicates that the users with the specified To Do role must receive a To Do when the approver rejects the mass pricing update request.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> option is selected. The list includes only those To Do roles which are associated to the specified submitter To Do type.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.

**Tip:** Alternatively, you can edit the details of a mass pricing update request type by clicking the **Edit** button in the **Request Type** zone.

5. Modify the required details in the **Main** section.

6. Click **Save**.

The changes made to the mass pricing update request type are saved.

## **Copying a Mass Pricing Update Request Type**

Instead of creating a mass pricing update request type from scratch, you can create a new mass pricing update request type using an existing mass pricing update request type. This is possible through copying a mass pricing update request type. On copying a mass pricing update request type, the details including the characteristics are copied to the new mass pricing update request type. You can then edit the details, if required.

#### Prerequisites

To copy a mass pricing update request type, you should have:

- Mass pricing update request type (whose copy you want to create) defined in the application.
- Mass pricing update request business objects defined in the application.

**Procedure**

To copy a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Request Type** sub-menu.  
The **Request Type** screen appears.
4. In the **Request Type List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the request type whose copy you want to create.

The **Mass Pricing Update Request Type** screen appears. It contains the following section:

- **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: <ul style="list-style-type: none"> <li>• Mass Pricing Request</li> </ul>	Yes
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Defer Processing Count	Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).</p>	
Approval Required	Used to indicate whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	Used to indicate the type of approval. The valid value is:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>Request Level Approval</li> </ul>	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
	<b>Note:</b> This field appears when the <b>Approval Required</b> option is selected.	
Approval To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>The <b>Approval To Do Type</b> field appears when the <b>Approval Required</b> option is selected.</p>	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Approval To Do Role	Used to indicate that the users with the specified To Do role must receive the mass pricing update request for approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>The list includes only those To Do roles which are associated to the specified approval To Do type.</p>	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the mass pricing update request.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears. The <b>Submitter To Do Type</b> field appears when the <b>Approval Required</b> option is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Submitter To Do Role	Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the mass pricing update request.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> option is selected. The list includes only those To Do roles which are associated to the specified submitter To Do type.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.

**Tip:** Alternatively, you can copy a mass pricing update request type by clicking the **Duplicate** button in the **Request Type** zone.

- Enter the required details in the **Main** section.
- Click **Save**.  
The new mass pricing update request type is defined.

## Deleting a Mass Pricing Update Request Type

### Procedure

To delete a mass pricing update request type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **R** and then click **Request Type**.  
A sub-menu appears.
- Click the **Search** option from the **Request Type** sub-menu.  
The **Request Type** screen appears.

- In the **Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the mass pricing update request type that you want to delete.  
A message appears confirming whether you want to delete the mass pricing update request type.

**Note:** You can delete a mass pricing update request type when you have not created a mass pricing update request using the mass pricing update request type.

**Tip:** Alternatively, you can delete a mass pricing update request type by clicking the **Delete** button in the **Request Type** zone.

- Click **OK**.  
The mass pricing update request type is deleted.

**Search Mass Pricing Update Request**

The **Search Mass Pricing Update Request** zone allows you to search for a mass pricing update request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Created From	Used to search mass pricing update requests which are created from a particular date onwards.	No
Status	Used to search mass pricing update requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approval in Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Running C1-GENRQ Batch</li> </ul>	No
Created Until	Used to search mass pricing update requests which are created till a particular date.	No
User ID	Used to search mass pricing update requests which are created by a particular user.	No
Request Type	Used to search mass pricing update requests which are created using a particular mass pricing update request type.	No
Request ID	Used to search a particular mass pricing update request.	No

**Note:** You must specify at least one search criterion while searching a mass pricing update request.

- **Search Result** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Result** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the mass pricing update request is created.
Request Information	Displays information about the mass pricing update request.
	<b>Note:</b> It has a link. On clicking the link, the <b>Mass Pricing Update Request</b> screen appears where you can view the details of the respective mass pricing update request.
Status	Indicates the status of the mass pricing update request. The valid values are: <ul style="list-style-type: none"> <li>• Approval in Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Running C1-GENRQ Batch</li> </ul>
Created By	Indicates the user who has created the mass pricing update request.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for a Mass Pricing Update Request

### Prerequisites

To search for a mass pricing update request, you should have:

- Mass pricing update request types defined in the application

### Procedure

To search for a mass pricing update request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Mass Pricing Update Request** sub-menu.  
The **Mass Pricing Update Request** screen appears.
4. Enter the search criteria in the **Search Mass Pricing Update Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of mass pricing update requests that meet the search criteria appears in the **Search Results** section.

## Creating a Mass Pricing Update Request

**Prerequisites**

To define a mass pricing update request, you should have:

- Mass pricing update request types defined in the application
- A currency conversion algorithm attached to the **Currency Conversion For Bill Segments** algorithm spot of the respective division

**Procedure**

To define a mass pricing update request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Mass Pricing Update Request** sub-menu.  
The **Mass Pricing Update Request** screen appears.
4. Search for the required price assignments which you want to update in the **Search Price Assignments** zone.
5. Do either of the following:

If you want to...	Then...
Update all price assignments of a particular pricing entity type	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the respective pricing entity type.</li> <li>b. Click <b>Mass Pricing Update</b>.</li> </ol>
Update all price assignments of one or more pricing entity type	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the respective pricing entity types.</li> <li>b. Click <b>Mass Pricing Update</b>.</li> </ol>
Update all price assignments of all pricing entity types	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to all pricing entity types.</li> <li>b. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular person	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the <b>Customer Agreed</b> pricing entity type. The <b>Customer Agreed Price Assignments</b> zone appears.</li> <li>b. Select the check box corresponding to the required price item pricing that you want to update in the <b>Customer Agreed Price Assignments</b> zone.</li> <li>c. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular account	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the <b>Account Agreed</b> pricing entity type. The <b>Account Agreed Price Assignments</b> zone appears.</li> <li>b. Select the check box corresponding to the required price item pricing that you want to update in the <b>Account Agreed Price Assignments</b> zone.</li> <li>c. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular price list	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the <b>Price List</b> pricing entity type. The <b>Price list Price Assignments</b> zone appears.</li> <li>b. Select the check box corresponding to the required price item pricing that you want to update in the <b>Price list Price Assignments</b> zone.</li> <li>c. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular price list associated to a particular product	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the <b>Product</b> pricing entity type.</li> </ol>

If you want to...	Then...
	<p>The <b>Product Price list Price Assignments</b> zone appears.</p> <p><b>b.</b> Select the check box corresponding to the required price item pricing that you want to update in the <b>Product Price list Price Assignments</b> zone.</p> <p><b>c.</b> Click <b>Mass Pricing Update</b>.</p>

The **Select Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Mass Pricing Update Request Type	Used to indicate the mass pricing update request type using which you want to create a mass pricing update request.	Yes

6. Select the required mass pricing update request type from the respective field.
7. Click **OK**.

The **Mass Pricing Update Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Mass Pricing Update Criteria	Used to indicate whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: <ul style="list-style-type: none"> <li>Decrease Price</li> <li>End Date Price</li> <li>Increase Price</li> </ul>	Yes
Mass Pricing Update Type	Used to indicate whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: <ul style="list-style-type: none"> <li>Absolute</li> <li>Percentage</li> </ul>	Yes (Conditional)
	<b>Note:</b> This field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .	
Rate Value	Used to specify the rate by which you want to increase or decrease the price.	Yes (Conditional)
	<b>Note:</b> This field appears when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> . You cannot specify a negative value or zero in the <b>Rate Value</b> field.	<b>Note:</b> This field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .
Currency	Used to indicate the currency in which the rate is specified.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when the mass pricing update type is set to <b>Absolute</b>.</p> <p>If the pricing currency is different from the currency which is specified in the mass pricing update request, the system does the currency conversion using the algorithm which is attached to the <b>Currency Conversion For Bill Segments</b> algorithm spot of the respective division.</p>	<p><b>Note:</b> This field is required when the mass pricing update type is set to <b>Absolute</b>.</p>
Update Date	<p>Displays the date when you want to update the price assignments. The system fetches the price assignments which are effective on the update date. If you want to forcibly end a price item pricing through the mass pricing update request, the end date in the price item pricing is set to the update date. However, if you want to increase or decrease the rate in a price item pricing through the mass pricing update request, the system behaves in the following manner:</p> <ul style="list-style-type: none"> <li>• If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created.</li> <li>• If a price assignment is not yet referred in the system, the existing price assignment is updated.</li> </ul> <p><b>Note:</b> You cannot update a price assignment through a mass pricing update request when the start or end date of the price assignment is equal to the update date.</p>	Not applicable

8. Enter the required details in the **Mass Pricing Update Request** screen.

9. Click **Save**.

The mass pricing update request is defined in the **Draft** status. And, the status of all price assignment records in the mass pricing update request is set to **Pending**.

## **Mass Pricing Update Request (Used for Viewing)**

The **Mass Pricing Update Request** screen allows you to:

- View the details of a mass pricing update request
- Edit the details of a mass pricing update request
- Delete a mass pricing update request
- Submit a mass pricing update request for processing

- Approve or reject a mass pricing update request
- Submit a batch job for a mass pricing update request
- View the log of a mass pricing update request
- Add a log entry for a mass pricing update request

It consists of the following tabs:

- [Mass Pricing Update Request - Main](#) on page 2170
- [Mass Pricing Update Request - Log](#) on page 2173

## Mass Pricing Update Request - Main

The **Main** tab displays information about the mass pricing update request. It contains the following zones:

- [Mass Pricing Update Request](#) on page 2170
- [Price Assignments](#) on page 2172

## Mass Pricing Update Request

The **Mass Pricing Update Request** zone displays the details of the mass pricing update request. It contains the following sections:

- **Main** - Displays basic information about the mass pricing update request. It contains the following fields:

Field Name	Field Description
Request Information	Displays information about the mass pricing update request.
Mass Pricing Update Request Type	Indicates the mass pricing update request type using which the mass pricing update request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Request Type</b> screen appears where you can view the details of the respective mass pricing update request type.
Status	Indicates the status of the mass pricing update request. The valid values are: <ul style="list-style-type: none"> <li>• Approval in Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Running C1-GENRQ Batch</li> </ul>
Mass Pricing Update Criteria	Indicates whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: <ul style="list-style-type: none"> <li>• Decrease Price</li> <li>• End Date Price</li> <li>• Increase Price</li> </ul>
Mass Pricing Update Type	Indicates whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: <ul style="list-style-type: none"> <li>• Absolute</li> <li>• Percentage</li> </ul>

Field Name	Field Description
	<b>Note:</b> This field appears when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .
Rate Value	Displays the rate by which you want to increase or decrease the price. <b>Note:</b> This field appears when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .
Currency	Indicates the currency in which the rate is specified. <b>Note:</b> This field appears when the mass pricing update type is set to <b>Absolute</b> .
Update Date	Displays the date when you want to update the price assignments.

- **Statistics** - Displays summarized information about the records which are included in the mass pricing update request. It contains the following fields:

Field Name	Field Description
Total Records	Displays the total number of price assignments which are included in the mass pricing update request.
Processed Records	Displays the total number of price assignments which are successfully updated through the mass pricing update request.
Error Records	Displays the total number of price assignments which could not be updated through the mass pricing update request.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the mass pricing update request. <b>Note:</b> The <b>Edit</b> button appears when the mass pricing update request is in the <b>Draft</b> status.
Delete	Used to delete the mass pricing update request. <b>Note:</b> The <b>Delete</b> button appears when the mass pricing update request is in the <b>Draft</b> status.
Submit	Used to submit the mass pricing update request for updating the price assignments. <b>Note:</b> The <b>Submit</b> button appears when the mass pricing update request is in the <b>Draft</b> status.
Submit Batch	Used to generate a batch job using the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch control. <b>Note:</b> The <b>Submit Batch</b> button appears when the mass pricing update request is in the <b>Deferred Processing</b> status.
Approve	Used to approve the mass pricing update request.

Button Name	Button Description
	<b>Note:</b> The <b>Approve</b> button appears when: <ul style="list-style-type: none"> <li>The mass pricing update request is in the <b>Approval in Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the mass pricing update request.</li> </ul>
Reject	Used to reject the mass pricing update request.  <b>Note:</b> The <b>Reject</b> button appears when: <ul style="list-style-type: none"> <li>The mass pricing update request is in the <b>Approval in Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the mass pricing update request.</li> </ul>

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the mass pricing update request is created. In addition, a context menu appears corresponding to the <b>Business Object</b> field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date Time	Displays the date and time when the mass pricing update request status is updated.
Creation Date Time	Displays the date and time when the mass pricing update request is created.

## Price Assignments

The **Price Assignments** zone lists the price assignments which you want to update through the mass pricing update request. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays information about the price item pricing.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of the respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.  <b>Note:</b> The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).
Entity ID	Indicates the entity to which the price item pricing is assigned.
Pricing Entity Type	Indicates the type of entity on which the price assignment is done. The valid values are: <ul style="list-style-type: none"> <li>Account Agreed</li> <li>Customer Agreed</li> <li>Price List</li> <li>Product</li> </ul>

Column Name	Column Description
Mass Pricing Update Status	Indicates the status of the price assignment record which is included in the mass pricing update request. The valid values are: <ul style="list-style-type: none"> <li>Pending</li> <li>Processed</li> <li>Error</li> </ul>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Mass Pricing Update Request - Log

The **Log** tab contains the following zone:

- [Mass Pricing Update Request Log](#) on page 2173

### Mass Pricing Update Request Log

The **Mass Pricing Update Request Log** zone lists the complete trail of actions performed on the mass pricing update request. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the mass pricing update request.
Details	Displays the details of the action performed on the mass pricing update request.
User	Indicates the user who has performed the action on the mass pricing update request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the mass pricing update request.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the mass pricing update request is changed.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the mass pricing update request by clicking the **Add Log Entry** link in the upper right corner of the **Mass Pricing Update Request Log** zone.

## Creating a Mass Pricing Update Request

### Prerequisites

To define a mass pricing update request, you should have:

- Mass pricing update request types defined in the application
- A currency conversion algorithm attached to the **Currency Conversion For Bill Segments** algorithm spot of the respective division

### Procedure

To define a mass pricing update request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Mass Pricing Update Request** sub-menu.  
The **Mass Pricing Update Request** screen appears.
4. Search for the required price assignments which you want to update in the **Search Price Assignments** zone.
5. Do either of the following:

If you want to...	Then...
Update all price assignments of a particular pricing entity type	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the respective pricing entity type.</li> <li>b. Click <b>Mass Pricing Update</b>.</li> </ol>
Update all price assignments of one or more pricing entity type	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the respective pricing entity types.</li> <li>b. Click <b>Mass Pricing Update</b>.</li> </ol>
Update all price assignments of all pricing entity types	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to all pricing entity types.</li> <li>b. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular person	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the <b>Customer Agreed</b> pricing entity type. The <b>Customer Agreed Price Assignments</b> zone appears.</li> <li>b. Select the check box corresponding to the required price item pricing that you want to update in the <b>Customer Agreed Price Assignments</b> zone.</li> <li>c. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular account	<ol style="list-style-type: none"> <li>a. Select the check box corresponding to the <b>Account Agreed</b> pricing entity type. The <b>Account Agreed Price Assignments</b> zone appears.</li> <li>b. Select the check box corresponding to the required price item pricing that you want to update in the <b>Account Agreed Price Assignments</b> zone.</li> <li>c. Click <b>Mass Pricing Update</b>.</li> </ol>

If you want to...	Then...
<b>Update the price item pricing assigned to a particular price list</b>	<p><b>a.</b> Select the check box corresponding to the <b>Price List</b> pricing entity type.</p> <p>The <b>Price list Price Assignments</b> zone appears.</p> <p><b>b.</b> Select the check box corresponding to the required price item pricing that you want to update in the <b>Price list Price Assignments</b> zone.</p> <p><b>c.</b> Click <b>Mass Pricing Update</b>.</p>
<b>Update the price item pricing assigned to a particular price list associated to a particular product</b>	<p><b>a.</b> Select the check box corresponding to the <b>Product</b> pricing entity type.</p> <p>The <b>Product Price list Price Assignments</b> zone appears.</p> <p><b>b.</b> Select the check box corresponding to the required price item pricing that you want to update in the <b>Product Price list Price Assignments</b> zone.</p> <p><b>c.</b> Click <b>Mass Pricing Update</b>.</p>

The **Select Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Mass Pricing Update Request Type	Used to indicate the mass pricing update request type using which you want to create a mass pricing update request.	Yes

6. Select the required mass pricing update request type from the respective field.
7. Click **OK**.

The **Mass Pricing Update Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Mass Pricing Update Criteria	Used to indicate whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: <ul style="list-style-type: none"> <li>Decrease Price</li> <li>End Date Price</li> <li>Increase Price</li> </ul>	Yes
Mass Pricing Update Type	Used to indicate whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: <ul style="list-style-type: none"> <li>Absolute</li> <li>Percentage</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .

Field Name	Field Description	Mandatory (Yes or No)
Rate Value	Used to specify the rate by which you want to increase or decrease the price.	Yes (Conditional)
	<b>Note:</b> This field appears when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> . You cannot specify a negative value or zero in the <b>Rate Value</b> field.	<b>Note:</b> This field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .
Currency	Used to indicate the currency in which the rate is specified.	Yes (Conditional)
	<b>Note:</b> This field appears when the mass pricing update type is set to <b>Absolute</b> .  If the pricing currency is different from the currency which is specified in the mass pricing update request, the system does the currency conversion using the algorithm which is attached to the <b>Currency Conversion For Bill Segments</b> algorithm spot of the respective division.	<b>Note:</b> This field is required when the mass pricing update type is set to <b>Absolute</b> .
Update Date	Displays the date when you want to update the price assignments. The system fetches the price assignments which are effective on the update date. If you want to forcibly end a price item pricing through the mass pricing update request, the end date in the price item pricing is set to the update date. However, if you want to increase or decrease the rate in a price item pricing through the mass pricing update request, the system behaves in the following manner:	Not applicable
	<ul style="list-style-type: none"> <li>• If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created.</li> <li>• If a price assignment is not yet referred in the system, the existing price assignment is updated.</li> </ul>	
	<b>Note:</b> You cannot update a price assignment through a mass pricing update request when the start or end date of the price assignment is equal to the update date.	

8. Enter the required details in the **Mass Pricing Update Request** screen.

9. Click **Save**.

The mass pricing update request is defined in the **Draft** status. And, the status of all price assignment records in the mass pricing update request is set to **Pending**.

## Editing a Mass Pricing Update Request

### Procedure

To edit a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request whose details you want to edit.  
The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Mass Pricing Update Request** zone.

The **Mass Pricing Update Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Mass Pricing Update Criteria	Used to indicate whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: <ul style="list-style-type: none"> <li>• Decrease Price</li> <li>• End Date Price</li> <li>• Increase Price</li> </ul>	Yes
Mass Pricing Update Type	Used to indicate whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: <ul style="list-style-type: none"> <li>• Absolute</li> <li>• Percentage</li> </ul>	Yes (Conditional)
	<b>Note:</b> The <b>Mass Pricing Update Type</b> field appears when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .	<b>Note:</b> The <b>Mass Pricing Update Type</b> field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .
Rate Value	Used to specify the rate by which you want to increase or decrease the price.	Yes (Conditional)
	<b>Note:</b> The <b>Rate Value</b> field appears when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .  You cannot specify a negative value or zero in the <b>Rate Value</b> field.	<b>Note:</b> The <b>Rate Value</b> field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b> .

Field Name	Field Description	Mandatory (Yes or No)
Currency	Used to indicate the currency in which the rate is specified.	Yes (Conditional)
	<b>Note:</b> The <b>Currency</b> field appears when the mass pricing update type is set to <b>Absolute</b> .  If the pricing currency is different from the currency which is specified in the mass pricing update request, the system does the currency conversion using the algorithm which is attached to the <b>Currency Conversion For Bill Segments</b> algorithm spot of the respective division.	<b>Note:</b> The <b>Currency</b> field is required when the mass pricing update type is set to <b>Absolute</b> .
Update Date	Displays the date when you want to update the price assignments. The system fetches the price assignments which are effective on the update date. If you want to forcibly end a price item pricing through the mass pricing update request, the end date in the price item pricing is set to the update date. However, if you want to increase or decrease the rate in a price item pricing through the mass pricing update request, the system behaves in the following manner:	Not applicable
	<ul style="list-style-type: none"> <li>• If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created.</li> <li>• If a price assignment is not yet referred in the system, the existing price assignment is updated.</li> </ul>	
	<b>Note:</b> You cannot update a price assignment through a mass pricing update request when the start or end date of the price assignment is equal to the update date.	

**Note:** The **Edit** button appears when the mass pricing update request is in the **Draft** status.

5. Modify the required details in the **Mass Pricing Update Request** screen.

6. Click **Save**.

The changes made to the mass pricing update request are saved.

## Deleting a Mass Pricing Update Request

### Procedure

To delete a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request that you want to delete.  
The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Mass Pricing Update Request** zone.  
A message appears confirming whether you want to delete the mass pricing update request.

**Note:** The **Delete** button in the **Mass Pricing Update Request** zone appears when the mass pricing update request is in the **Draft** status.

**Note:** The **Delete** button appears when the mass pricing update request is in the **Draft** status.

5. Click **OK**.  
The mass pricing update request is deleted.

<b>Mass Pricing Update Request</b> zone	<a href="#">Mass Pricing Update Request</a> on page 2170

## Submitting a Mass Pricing Update Request

### Procedure

To submit a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request that you want to submit.  
The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Submit** button in the **Mass Pricing Update Request** zone.

The system behaves in the following manner:

If...	Then...
The <b>Approval Required</b> option is selected in the mass pricing update request type using which the mass pricing update request is created	The status of the mass pricing update request is changed to <b>Approval in Progress</b> . A To Do is created using the approval To Do type which is specified in the mass pricing update request type. Once a To Do is created, it is assigned to all users with an approval To Do role which is specified in the mass pricing update request type.
The <b>Approval Required</b> option is not selected in the mass pricing update request type and the number of price assignments in the mass pricing update request exceeds the defer processing count	The status of the mass pricing update request is changed to <b>Deferred Processing</b> .

If...	Then...
The <b>Approval Required</b> option is not selected in the mass pricing update request type and the number of price assignments in the mass pricing update request does not exceed the defer processing count	The status of the mass pricing update request is changed to <b>Updating Price Assignments</b> . If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to <b>Processed</b> . However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to <b>Error</b> . In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to <b>Error</b> . Finally, the status of the mass pricing update request is changed to <b>Processed</b> .
	<b>Note:</b> If a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.

**Note:** The **Submit** button appears when the mass pricing update request is in the **Draft** status.

## Generating a Batch Job for a Mass Pricing Update Request

### Procedure

To generate a batch job for a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request for which you want to submit a batch job.  
The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Submit Batch** button in the **Mass Pricing Update Request** zone.

A batch job is created using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined in the **Thread Count** and **Thread Pool Name** option types of the **Mass Pricing Update (C1-MASPRI)** feature configuration. In addition, a log is created for the mass pricing update request which indicates the batch job ID. Finally, the status of the mass pricing update request is changed to **Running C1-GENRQ Batch**.

**Note:** The **Submit Batch** button appears when the mass pricing update request is in the **Deferred Processing** status.

## Approving a Mass Pricing Update Request

---

**Procedure**

To approve a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the *mass pricing* update request whose details you want to review.  
The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Approve** button in the **Mass Pricing Update Request** zone.

The system behaves in the following manner:

If...	Then...
The number of price assignments in the mass pricing update request exceeds the defer processing count	The status of the mass pricing update request is changed to <b>Deferred Processing</b> .
The number of price assignments in the mass pricing update request does not exceed the defer processing count	The status of the mass pricing update request is changed to <b>Updating Price Assignments</b> . If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to <b>Processed</b> . However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to <b>Error</b> . In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to <b>Error</b> . Finally, the status of the mass pricing update request is changed to <b>Processed</b> .
	<b>Note:</b> If a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.

**Note:**

The mass pricing update request is in the **Approval In Progress** status.

A user with the approval To Do role is reviewing the mass pricing update request.

The system will not allow you to approve or reject a mass pricing update request submitted by you.

## Rejecting a Mass Pricing Update Request

---

**Procedure**

To reject a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request whose details you want to review.  
The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Reject** button in the **Mass Pricing Update Request** zone.

The status of the mass pricing update request is changed to **Rejected**. A To Do is created using the submitter To Do type which is specified in the mass pricing update request type. Once a To Do is created, it is assigned to all users with a submitter To Do role which is specified in the mass pricing update request type.

**Note:**

The mass pricing update request is in the **Approval In Progress** status.

A user with the approval To Do role is reviewing the mass pricing update request.

The system will not allow you to approve or reject a mass pricing update request submitted by you.

## Mass Pricing Update Request

The **Mass Pricing Update Request** screen allows you to search for price assignments using various search criteria. The search results (i.e. price assignments) are grouped based on the pricing entity type, such as **Account Agreed**, **Customer Agreed**, **Price List**, and **Product**. You can then create a mass pricing update request for the following:

- All price assignments of a particular pricing entity type
- All price assignments of one or more pricing entity type
- All price assignments of all pricing entity types
- A price item pricing assigned to a particular person, account, or price list
- A price item pricing assigned to a price list which is associated to a product
- One or more price assignments of a person, account, or price list
- One or more price assignments of a price list which is associated to a product

It contains the following zones:

- [Search Price Assignments](#) on page 2184
- [Account Agreed Price Assignments](#) on page 2186
- [Customer Agreed Price Assignments](#) on page 2187
- [Price List Price Assignments](#) on page 2188
- [Product Price List Price Assignments](#) on page 2189

## Search Price Assignments

The **Search Price Assignments** zone allows you to search for active price assignments on different pricing entity type. It contains the following sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to search pricing which is defined for a particular price item.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	
Account ID	Used to search pricing which is assigned to a particular account.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search pricing which is assigned to a particular person.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Person ID</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	
Division	Used to search pricing which belongs to a particular division.	Yes
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Update Date	Used to search pricing which is effective on a particular date.	Yes
	<b>Note:</b> By default, this field is set to the current date. The update date cannot be earlier than the system date.	
Pricing Entity Type	Used to search pricing which is defined on a particular type of entity. The valid values are: <ul style="list-style-type: none"> <li>Account Agreed</li> <li>Customer Agreed</li> <li>Price List</li> <li>Product</li> </ul>	No
	<b>Note:</b> This field appears when you click the <b>Advanced Search</b> link available in the right side of the <b>Search Price Assignments</b> zone.	

In addition, it contains the **Price Item Parameters** section which has the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search pricing which is defined using a particular parameter.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.	
Parameter Value	Used to search pricing which is defined using a particular parameter value.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> If the value type of the parameter is <b>Adhoc</b> or <b>Predefined</b> , the <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter Value</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Value Search</b> window appears.	<b>Note:</b> This field is required when you are searching for price assignments which are created using a particular parameter.

**Note:** If you want to add more than one parameter while searching for price assignments, click the **Add** (+) icon and then specify the parameter and parameter value. However, if you want to remove a parameter and parameter value combination from the search criteria, click the **Delete** (🗑) icon corresponding to the parameter and parameter value combination.

- **Search Result** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Result** section contains the following columns:

Column Name	Column Description
Pricing Entity Type	Indicates the type of entity on which the price item pricing is defined. The valid values are: <ul style="list-style-type: none"> <li>• Account Agreed</li> <li>• Customer Agreed</li> <li>• Price List</li> <li>• Product</li> </ul>
Pricing Entity Count	Indicates the number of entities on which the price item pricing is defined.
Price Assignment Count	Indicates the number of price assignments on a particular type of pricing entity.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

On clicking the **Broadcast** (📡) icon corresponding to a pricing entity type, the **Account Agreed Price Assignments**, **Customer Agreed Price Assignments**, **Price List Price Assignments**, or **Product Price List Price Assignments** zone appears depending on the pricing entity type.

A check box appears corresponding to each pricing entity type. On selecting the check box, you can create a mass pricing update request for all price assignments which are done on the respective pricing entity type. You can also create a mass pricing update request for all price assignments which are done on one or more pricing entity types at the same time. In addition, you can select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are done on all pricing entity types.

## Account Agreed Price Assignments

The **Account Agreed Price Assignments** zone lists the active pricing of a price item which is assigned to an account. It contains the following columns:

Column Name	Column Description
Account Information	Indicates the account to which the price item pricing is assigned. In addition, the <b>Account Information</b> column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Account Identifier Type	Indicates the primary identifier type of the account.
Account Identifier	Indicates the account to which the price item pricing is assigned.
Pricing Information	Displays information about the price item pricing.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.
	<b>Note:</b> The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined at the account level.

## Customer Agreed Price Assignments

The **Customer Agreed Price Assignments** zone lists the active pricing of a price item which is assigned to a person. It contains the following columns:

Column Name	Column Description
Person Information	Indicates the person to whom the price item pricing is assigned. In addition, the <b>Person Information</b> column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Person Identifier Type	Indicates the primary identifier type of a person.
Person Identifier	Indicates the person to whom the price item pricing is assigned.

Column Name	Column Description
Pricing Information	Displays information about the price item pricing.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.
	<b>Note:</b> The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined at the person level.

## Price List Price Assignments

The **Price List Price Assignments** zone lists the active pricing of a price item which is assigned to a price list. It contains the following columns:

Column Name	Column Description
Price List Information	Indicates the price list to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.
Pricing Information	Displays information about the price item pricing.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.
	<b>Note:</b> The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined in the price lists.

## Product Price List Price Assignments

The **Product Price List Price Assignments** zone lists the active pricing of a price item which is added in the price lists associated with the products. It contains the following columns:

Column Name	Column Description
Product	Displays information about the product.
Product Version	Displays information about the effective product version.
Price List Information	Indicates the price list associated with the product to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of respective price list.
Pricing Information	Displays information about the price item pricing.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.
	<b>Note:</b> The order in which parameter values appear in the <b>Pricing Parameters</b> field is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined in the price lists associated with the products.

## Searching for Price Assignments on a Pricing Entity

### Prerequisites

To search for price assignments on a pricing entity, you should have:

- Price items, accounts, persons, and divisions defined in the application
- Price item associated with the required division
- Access to the required division

### Procedure

To search for price assignments on a pricing entity:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Mass Pricing Update Request** sub-menu.  
The **Mass Pricing Update Request** screen appears.
4. Enter the search criteria in the **Search Price Assignments** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

The number of price assignments on the following types of pricing entity are listed in the **Search Results** section:

- Account Agreed
- Customer Agreed
- Price List
- Product

## Viewing the Price Assignments Defined at the Account Level

### Procedure

To view the price assignments defined at the account level:

1. Search for price assignments in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the **Account Agreed** pricing entity type whose details you want to view.  
The **Account Agreed Price Assignments** zone appears.
3. View the price item pricing assigned to the accounts in the **Account Agreed Price Assignments** zone.

## Viewing the Price Assignments Defined at the Person Level

---

### Procedure

To view the price assignments defined at the person level:

1. Search for price assignments in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the **Customer Agreed** pricing entity type whose details you want to view.  
The **Customer Agreed Price Assignments** zone appears.
3. View the price item pricing assigned to the persons in the **Customer Agreed Price Assignments** zone.

## Viewing the Price Assignments Defined on the Price Lists

---

### Procedure

To view the price assignments defined on the price lists:

1. Search for price assignments in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the **Price List** pricing entity type whose details you want to view.  
The **Price List Price Assignments** zone appears.
3. View the price item pricing assigned to the price lists in the **Price List Price Assignments** zone.

## Viewing the Price Assignments Defined on the Price Lists Associated to the Products

---

### Procedure

To view the price assignments defined on the price lists which are associated to the products:

1. Search for price assignments in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the **Product** pricing entity *type* whose details you want to view.  
The **Product Price List Price Assignments** zone appears.
3. View the price item pricing assigned to the price lists which are associated to the products in the **Product Price List Price Assignments** zone.

## Price Item, Parameter, and SQI Upload

---

### Topics:

- [Uploading a Price Item File in the XML Format](#)
- [Uploading a Price Item File in the CSV Format](#)
- [C1-PRCITM-PR](#)
- [C1-PRICEUPL](#)
- [XML File Format for Uploading Price Items](#)
- [Sample XML Format for Uploading Price Items](#)
- [CSV File Format for Uploading Price Items](#)
- [Sample CSV Format for Uploading Price Items](#)
- [Uploading a Parameter File in the XML Format](#)
- [Uploading a Parameter File in the CSV Format](#)
- [XML File Format for Uploading Parameters](#)
- [Sample XML Format for Uploading Parameters](#)
- [CSV File Format for Uploading Parameters](#)
- [Sample CSV Format for Uploading Parameters](#)
- [Uploading an SQI File in the XML Format](#)
- [Uploading an SQI File in the CSV Format](#)
- [XML File Format for Uploading Service Quantity Identifiers \(SQIs\)](#)
- [Sample XML Format for Uploading Service Quantity Identifiers \(SQIs\)](#)
- [CSV File Format for Uploading Service Quantity Identifiers \(SQIs\)](#)

There might be situations when the customer wants to move the price item, parameter, and service quantity identifier information from the legacy system to Oracle Revenue Management and Billing (ORMB). In such situations, you can use the **Price Item, Parameter, and SQI Upload** feature in ORMB to create new price items or edit the existing price items using the **File Upload Interface** utility. You can also use the **Price Item, Parameter, and SQI Upload** feature to create new parameters and SQIs using the **File Upload Interface** utility. However, at present, you cannot edit the existing parameters and SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters and SQIs from the respective user interface.

**Note:** If you want to edit an existing price item in the system, you must provide all details of the price item and not just the details which you want to update. This is because the **File Upload Interface** utility supports the **Replace** operation and not the **Edit** operation while editing the price item.

You can upload the price item, parameter, and SQI files in the XML or CSV format using the **File Upload Interface** utility. You can specify the following in the XML and CSV files along with the basic details of the price item:

- Parameters and divisions which you want to associate with the price item
- Characteristics for the price item
- Division-specific characteristics for the price item
- Division-specific SQIs for the price item
- Details of the price item relationship

**Note:** While uploading the price item file, you need to ensure that the parameters and service quantity identifiers mentioned in the price item file are already present in the system.

You can upload the price items, parameters, and SQIs from the same file or from individual files based on the business requirements. For more information, refer to [Uploading Price Items, Parameters, and SQIs from the Same File](#) on page 2253.

At present, the system does not allow you to configure the approval process for the **Price Item, Parameter, and SQI Upload** feature. Therefore, you must ensure that the files are pre-approved before uploading them in the system.

- [Sample CSV Format for Uploading SQIs](#)
- [Uploading Price Items, Parameters, and SQIs from the Same File](#)

## Uploading a Price Item File in the XML Format

To upload a price item file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading price items in the XML format
2. Upload the price item file
3. Create or update the price items in the system

### Related Topics

For more information on...	See...
How to define a file request type for uploading price items in the XML format	<a href="#">Defining a File Request Type for Uploading Price Items in the XML Format</a> on page 2195
How to upload a price item file	<a href="#">Uploading a Price Item File</a> on page 2196
How to create or update the price items in the system	<a href="#">Creating or Updating Price Items</a> on page 2196

## Defining a File Request Type for Uploading Price Items in the XML Format

### Procedure

To define a file request type for uploading price items in the XML format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Object** option from the **Service Type** list.
9. Enter the **C1\_PRICEITEM\_BO** business object or custom price item business object in the **Service Name** field.
10. Attach an algorithm created using the **C1-PRCITM-PR** algorithm type to the **Pre-Processing Algorithm** field corresponding to the price item business object.

**Note:** For more information about the **C1-PRCITM-PR** algorithm, refer to [C1-PRCITM-PR](#) on page 2198.

11. Select the **Add** or **Replace** option from the **Operation** list depending on whether you want to create new price items or edit the existing price items using the file request type.
12. Click **Save**.

The file request type is defined for uploading price items in the XML format.

## Uploading a Price Item File

You can upload a price item file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating or Updating Price Items

You can create or edit the price items in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Uploading a Price Item File in the CSV Format

To upload a price item file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading price items in the CSV format
2. Upload the price item file
3. Create or update the price items in the system

### Related Topics

For more information on...	See...
How to define a file request type for uploading price items in the CSV format	<a href="#">Defining a File Request Type for Uploading Price Items in the CSV Format</a> on page 2196
How to upload a price item file	<a href="#">Uploading a Price Item File</a> on page 2197
How to create or update the price items in the system	<a href="#">Creating or Updating Price Items</a> on page 2197

## Defining a File Request Type for Uploading Price Items in the CSV Format

### Procedure

To define a file request type for uploading price items in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Select the **Data Transformation Required** option.  
The **File Format** field is enabled.
6. Select the **Comma Separated Values** option from the **File Format** list.
7. Enter **csv** in the **File Extension** field.
8. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
9. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.

10. In the **Services** section, enter the required sequence number.
11. Select the **Business Object** option from the **Service Type** list.
12. Enter the **C1\_PRICEITEM\_BO** business object or custom price item business object in the **Service Name** field.
13. Attach an algorithm created using the **C1-PRCITM-PR** algorithm type to the **Pre-Processing Algorithm** field corresponding to the price item business object.

**Note:** For more information about the **C1-PRCITM-PR** algorithm, refer to [C1-PRCITM-PR](#) on page 2198.

14. Select the **Add** or **Replace** option from the **Operation** list depending on whether you want to create new price items or edit the existing price items using the file request type.
15. If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** section.
16. Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** section.
17. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	PRICEITEMCODE	C1_PRICEITEM_BO/priceItemCode
2	DESCRIPTION	C1_PRICEITEM_BO/description

18. Click **Save**.  
The file request type is defined for uploading price items in the CSV format.

## Uploading a Price Item File

You can upload a price item file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating or Updating Price Items

You can create or edit the price items in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## C1-PRCITM-PR

The **C1-PRCITM-PR** algorithm does the following:

- Defaults the following fields which are required to create the price item, but are not provided by the legacy system:

Field Name	Condition	Default Value	Default Value Description
Price Item Usage	-	PRBL	Pricing and Billing
Price Item Type	Price Item Usage = PRBL	FEES	Fees
Bundle	-	No	No
Bundle Type	Price Item Usage = PRIC, Price Item Type = FEES and Bundle = Yes	REGU	Regular
Price Item Status	-	ACTV	Active
Global Price List	-	No	No

- Generates the price item parameter group using the parameter codes and parameter values for each the price item relationship.
- Validates whether the division, SQL, price item characteristic types, division-specific price item characteristic type, and parameters are already defined in the system.

### Related Topics

For more information on...	See...

## C1-PRICEUPL

The **C1-PRICEUPL** algorithm does the following:

- Defaults the following fields which are required to create the parameter, but are not provided by the legacy system:

Field Name	Condition	Default Value
Parameter Usage	Source Entity = TRN	Price Item

### Related Topics

## XML File Format for Uploading Price Items

Before uploading a price item file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1_PRICEITEM_BO	Used to specify the details of the price item or price item bundle whose record you want to create or update in the system.	Yes
priceItemCode	Used to specify the price item or price item bundle.	Yes
description	Used to specify the description for the price item or price item bundle.	Yes
priceItemAvailFor	Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• <b>PRIC</b> - Enables you to use the price item or price item bundle for only pricing.</li> <li>• <b>PRBL</b> - Enables you to use the price item or price item bundle for pricing and billing.</li> </ul>	Yes
priceItemType	Used to indicate the type of the price item or price item bundle. If the price item or price item bundle is used for only pricing, the valid values are: <ul style="list-style-type: none"> <li>• FEES</li> <li>• RATE</li> </ul> However, if the price item or price item bundle is used for the pricing and billing, the valid value is: <ul style="list-style-type: none"> <li>• FEES</li> </ul>	Yes
piStatusFlag	Used to indicate the status of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACTV</b> - Enables you to set the price item or price item bundle to <b>Active</b>.</li> <li>• <b>INAC</b> - Enables you to set the price item or price item bundle to <b>Inactive</b>.</li> </ul>	Yes
bundleSw	Used to indicate whether you want to define a price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes
bundleTypeFlg	Used to indicate the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are: <ul style="list-style-type: none"> <li>• <b>PHAN</b> - Enables you to create a phantom price item bundle.</li> <li>• <b>REGU</b> - Enables you to create a regular price item bundle.</li> <li>• <b>RTIO</b> - Enables you to create a ratio price item bundle.</li> </ul> However, if the price item bundle is available for only pricing and the price item type is set to <b>FEES</b> , the valid value is:	Yes (Conditional)
		<b>Note:</b> This data is required when you are creating a price item bundle.

Tag Name	Tag Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li><b>REGU</b> - Enables you to create a regular price item bundle.</li></ul>	
	<b>Note:</b> You cannot define a price item bundle when it is available for only pricing and when the price item type is set to <b>RATE</b> .	
asgnGlobalPISw	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"><li>Y</li><li>N</li></ul>	Yes
saType	Used to indicate the contract type that you want to associate with the price item or price item bundle.	Yes (Conditional)
		<b>Note:</b> This data is required when the price item or price item bundle is used for pricing and billing.
priceItemParm	Used to specify the details of the parameter which you want to associate with the price item or price item bundle.	No
startDate	You can use this tag within the following tags:	
	<b>If this tag is used within...</b>	<b>Then the purpose of the version tag is...</b>
	priceItemParm	Used to specify the date from when the parameter is effective for the price item or price item bundle.
	priceItemRel	Used to specify the date from when the price item or price item bundle is associated with the parent price item or added to the price item or price item bundle.
	<b>Note:</b> This data is required when you want to do either of the following: <ul style="list-style-type: none"><li>Associate a parameter with the price item or price item bundle</li><li>Associate a price item or price item bundle with the parent price item</li><li>Add a price item or price item bundle to the price item bundle</li></ul>	
endDate	You can use this tag within the following tags:	
	<b>If this tag is used within...</b>	<b>Then the purpose of the version tag is...</b>
	priceItemParm	Used to specify the date till when the parameter is effective for the price item or price item bundle.

Tag Name	Tag Description		Mandatory (Yes or No)
	If this tag is used within...	Then the purpose of the version tag is...	
	priceItemRel	Used to specify the date till when the price item or price item bundle is associated with the parent price item or added to the price item or price item bundle.	
priceParmCode	Used to indicate the parameter that you want to associate with the price item or price item bundle.		Yes (Conditional)
	<b>Note:</b> You must specify a parameter which is already defined in the system.  The system allows you to specify only those parameters where the parameter usage is set to <b>Price Item</b> .		<b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.
overridePriceParmLabel	Used to specify a business label for the parameter. If the business label is defined for a parameter, the business label appears instead of the parameter name.		No
displayOrder	Used to indicate the order in which the parameter and its value should be displayed in the price item parameter information string across the application.		Yes (Conditional)
			<b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.
parmUsageFlg	Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• <b>AGG</b> - Indicates that you want to use the parameter for aggregating transactions.</li> <li>• <b>PRI</b> - Indicates that you want to use the parameter for aggregating transactions and defining the price item pricing.</li> </ul>		Yes (Conditional)
			<b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.
isRequired	Used to indicate whether the parameter is mandatory while defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>		No
priorityNum	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.		Yes (Conditional)

Tag Name	Tag Description	Mandatory (Yes or No)
		<b>Note:</b> This data is required when you want to associate an optional parameter with the price item or price item bundle.
priceItemParmVal	Used to specify a list of predefined parameter values which are valid for the price item or price item bundle.  <b>Note:</b> The data should be added in this tag when the value type of the parameter is set to <b>Predefined</b> .	No
priceParmVal	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.	Yes (Conditional)  <b>Note:</b> This data is required when you want to define valid predefined parameter values for the price item or price item bundle.
divPriceitem	Used to specify a list of divisions which you want to associate with the price item or price item bundle.	Yes
division	Used to indicate the division to which you want to associate the price item or price item bundle.	Yes
priceItemSqi	Used to specify a list of division-specific SQIs for the price item or price item bundle.	No
serviceQuantityIdentifier	Used to indicate the SQI to which you want to associate the price item or price item bundle in the division.	Yes (Conditional)  <b>Note:</b> This data is required when you want to define a division-specific SQI for the price item or price item bundle.
sqlFragment	At present, the data from this tag is not stored in the system. If you want to use this tag, you need to implement a custom logic to meet the requirements.	Not applicable
sqiCalcAlgCd	At present, the data from this tag is not stored in the system. If you want to use this tag, you need to implement a custom logic to meet the requirements.	Not applicable
allowIncrUpdateSw	At present, the data from this tag is not stored in the system. If you want to use this tag, you need to implement a custom logic to meet the requirements.	Not applicable
divPriceItemChar	Used to specify a list of division-specific characteristics for the price item or price item bundle.	No
characteristicType	You can use this tag within the following tags:	Yes (Conditional)

Tag Name	Tag Description		Mandatory (Yes or No)
	<b>If this tag is used within...</b>	<b>Then the purpose of the version tag is...</b>	<b>Note:</b> This data is required when you want to do the following: <ul style="list-style-type: none"> <li>Define a characteristic for the price item or price item bundle</li> <li>Define a division-specific characteristic for the price item or price item bundle</li> <li>Define a relationship-specific characteristic for the price item or price item bundle</li> </ul>
	divPriceItemChar	Used to specify a characteristic type when you are defining a division-specific characteristic for the price item or price item bundle.	
	priceItemChar	Used to specify a characteristic type for the price item or price item bundle.	
	priceItemRelCharacteristic	Used to specify a characteristic type when you are defining a relationship-specific characteristic for the price item or price item bundle.	
	<b>Note:</b> You must specify a characteristic type which is already defined in the system. If you are defining a characteristic for: <ul style="list-style-type: none"> <li><b>A Price Item</b> - You must specify a characteristic type where the characteristic entity is set to <b>Price Item</b>.</li> <li><b>A Price Item in a specific division</b> - You must specify a characteristic type where the characteristic entity is set to <b>Division/Price Item Combination</b>.</li> <li><b>A Price Item Relationship</b> - You must specify a characteristic type where the characteristic entity is set to <b>Price Item Relationship</b>.</li> </ul>		
effectiveDate	You can use this tag within the following tags:		Yes (Conditional)
	<b>If this tag is used within...</b>	<b>Then the purpose of the version tag is...</b>	<b>Note:</b> This data is required when you want to do the following: <ul style="list-style-type: none"> <li>Define a characteristic for the price item or price item bundle</li> <li>Define a division-specific characteristic for the price item or price item bundle</li> <li>Define a relationship-specific characteristic for the price item or price item bundle</li> </ul>
	divPriceItemChar	Used to specify the date from when the price item or price item bundle characteristic is effective for the division.	
	priceItemChar	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	

Tag Name	Tag Description		Mandatory (Yes or No)
	If this tag is used within...	Then the purpose of the version tag is...	
	priceItemRelCharacteristic	Used to specify the date from when the relationship-specific characteristic is effective for the price item or price item bundle.	
characteristicValue	If this tag is used within...	Then the purpose of the version tag is...	Yes (Conditional)
	divPriceItemChar	Used to specify the value for characteristic type when you are defining a division-specific characteristic for the price item or price item bundle.	<b>Note:</b> This data is required when you want to do the following: <ul style="list-style-type: none"><li>Define a characteristic for the price item or price item bundle</li><li>Define a division-specific characteristic for the price item or price item bundle</li><li>Define a relationship-specific characteristic for the price item or price item bundle</li></ul>
	priceItemChar	Used to specify the value for the characteristic type when you are defining a characteristic for the price item or price item bundle.	
	priceItemRelCharacteristic	Used to specify the value for the characteristic type when you are defining a relationship-specific characteristic for the price item or price item bundle.	
priceItemChar	Used to specify a list of characteristics for the price item or price item bundle.		No
priceItemRel	Used to specify a list of price items or price item bundles that you want to associate with the parent price item or add to the price item bundle.		No
priceItemChildCd	Used to indicate the price item or price item bundle that you want to associate with the parent price item or add to the price item bundle.		Yes (Conditional)

Tag Name	Tag Description	Mandatory (Yes or No)
		<p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul>
startDate	Used to specify the date from when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul>
endDate	Used to specify the date till when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	No
priceItemReTypeFlg	Used to indicate how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li><b>BNDL</b> - Enables you to set the relationship type to <b>Bundle</b>.</li> <li><b>CG</b> - Enables you to set the relationship type to <b>Custom</b>.</li> <li><b>DENB</b> - Enables you to set the relationship type to <b>Denominator</b>.</li> <li><b>NUMB</b> - Enables you to set the relationship type to <b>Numerator</b>.</li> <li><b>OTHR</b> - Enables you to set the relationship type to <b>Other</b>.</li> <li><b>PROD</b> - Enables you to set the relationship type to <b>Price Item</b>.</li> <li><b>SVC</b> - Enables you to set the relationship type to <b>Service</b>.</li> <li><b>SVCG</b> - Enables you to set the relationship type to <b>Service Group</b>.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul>

Tag Name	Tag Description	Mandatory (Yes or No)
	<b>Note:</b> You must use the <b>OTHR</b> , <b>CG</b> , <b>PROD</b> , <b>SVC</b> , or <b>SVCG</b> relationship type while associating a price item or price item bundle to the parent price item. However, you must use the <b>BNDL</b> relationship type while adding a price item or price item bundle in the regular and phantom price item bundles. However, you can use the <b>DENB</b> and <b>NUMB</b> relationship type while adding a price item or price item bundle in the ratio price item bundles.	
priceItemParmGroup	Used to specify the parameter and its value based on which you want to determine pricing for the price item or price item bundle.	No
priceParmCode	Used to specify the parameter using which you want to determine the pricing for the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> You must specify a parameter which is associated with the price item or price item bundle and whose parameter usage is set to <b>Pricing</b> .  You cannot specify any special character except underscore ( _ ) in the parameter name.	<b>Note:</b> This data is required when you want to determine the pricing for the price item or price item bundle using a parameter.
priceParmVal	Used to specify the parameter value using which you want to determine the pricing for the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore ( _ ), equal to (=), tilde (~), and semi-colon(;) in the parameter value.	<b>Note:</b> This data is required when you want to determine the pricing for the price item or price item bundle using a parameter.
priceItemRelCharacteristic	Used to specify a list of relationship-specific characteristics for the price item or price item bundle.	No

**Note:** When you want to edit the existing price items using the **File Upload Interface** utility, you need to provide all details of the price item and not just the details which you want to update. This is because the system supports replace operation and not the edit operation while editing the price items.

## Sample XML Format for Uploading Price Items

Using the below example, you can create the following price items:

Price Items	Related Price Item	Relationship Type
Overdraft Returned	-	-
Additional Negative Balance Fees	-	-
Overdraft Assistance	Overdraft Returned	Service
	Additional Negative Balance Fees	Service Group

**Note:** The system will create the above price items when the required contract types, parameters, predefined parameter values, divisions, SQIs, characteristic types, predefined characteristic values are defined in the application.

## CSV File Format for Uploading Price Items

Before uploading a price item file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following data:

Price Item	Used to specify the price item or price item bundle.	Yes
------------	--	-----

Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• <b>PRIC</b> - Enables you to use the price item or price item bundle for only pricing.</li> <li>• <b>PRBL</b> - Enables you to use the price item or price item bundle for pricing and billing.</li> </ul>	Yes
Price Item Type	Used to indicate the type of the price item or price item bundle. If the price item or price item bundle is used for only pricing, the valid values are: <ul style="list-style-type: none"> <li>• FEES</li> <li>• RATE</li> </ul> However, if the price item or price item bundle is used for the pricing and billing, the valid value is: <ul style="list-style-type: none"> <li>• FEES</li> </ul>	Yes
Status	Used to indicate the status of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACTV</b> - Enables you to set the price item or price item bundle to <b>Active</b>.</li> <li>• <b>INAC</b> - Enables you to set the price item or price item bundle to <b>Inactive</b>.</li> </ul>	Yes
Bundle	Used to indicate whether you want to define a price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes
Bundle Type	Used to indicate the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are: <ul style="list-style-type: none"> <li>• <b>PHAN</b> - Enables you to create a phantom price item bundle.</li> <li>• <b>REGU</b> - Enables you to create a regular price item bundle.</li> <li>• <b>RTIO</b> - Enables you to create a ratio price item bundle.</li> </ul> However, if the price item bundle is available for only pricing and the price item type is set to <b>FEES</b> , the valid value is: <ul style="list-style-type: none"> <li>• <b>REGU</b> - Enables you to create a regular price item bundle.</li> </ul>	Yes (Conditional)
		<b>Note:</b> This data is required when you are creating a price item bundle.
	<b>Note:</b> You cannot define a price item bundle when it is available for only pricing and when the price item type is set to <b>RATE</b> .	

Global Price List	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"><li>Y</li><li>N</li></ul>	Yes
Contract Type	Used to indicate the contract type that you want to associate with the price item or price item bundle.	Yes (Conditional)
		<b>Note:</b> This data is required when the price item or price item bundle is used for pricing and billing.
Price Item Parameter Information		
Effective Start Date	Used to specify the date from when the parameter is effective for the price item or price item bundle.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.
Effective End Date	Used to specify the date till when the parameter is effective for the price item or price item bundle.	No
Parameter	Used to indicate the parameter that you want to associate with the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> You must specify a parameter which is already defined in the system.  The system allows you to specify only those parameters where the parameter usage is set to <b>Price Item</b> .	<b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.
Business Label	Used to specify a business label for the parameter. If the business label is defined for a parameter, the business label appears instead of the parameter name.	No
Display Order	Used to indicate the order in which the parameter and its value should be displayed in the price item parameter information string across the application.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.
Parameter Usage	Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"><li><b>AGG</b> - Indicates that you want to use the parameter for aggregating transactions.</li><li><b>PRI</b></li></ul>	Yes (Conditional)
		<b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.

	- Indicates that you want to use the parameter for aggregating transactions and defining the price item pricing.	
Mandatory	Used to indicate whether the parameter is mandatory while defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No
Priority	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.	Yes (Conditional) <b>Note:</b> This data is required when you want to associate an optional parameter with the price item or price item bundle.
<b>Predefined Parameter Values for Price Item</b>		
Predefined Parameter Value for Price Item	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.	Yes (Conditional) <b>Note:</b> This data is required when you want to define valid predefined parameter values for the price item or price item bundle.
<b>Division Information</b>		
Division	Used to indicate the division to which you want to associate the price item or price item bundle.	Yes
<b>Division-Specific SQIs for Price Item</b>		
SQI	Used to indicate the SQI to which you want to associate the price item or price item bundle in the division.	Yes (Conditional) <b>Note:</b> This data is required when you want to define a division-specific SQI for the price item or price item bundle.
<b>Division-Specific Characteristics for Price Item</b>		
Characteristic Type	Used to specify the characteristic type.	Yes (Conditional)
	<b>Note:</b> You must specify a characteristic type which is already defined in the system.  You must specify a characteristic type where the characteristic entity is set to <b>Division/Price Item Combination</b> .	<b>Note:</b> This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
Effective Date	Used to specify the date from when the price item or price item bundle characteristic is effective for the division.	Yes (Conditional)

		<b>Note:</b> This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
<b>Price Item Characteristics</b>		
Characteristic Type	Used to specify the characteristic type.	Yes (Conditional)
	<b>Note:</b> You must specify a characteristic type which is already defined in the system.  You must specify a characteristic type where the characteristic entity is set to <b>Price Item</b> .	<b>Note:</b> This data is required when you are defining a characteristic for the price item or price item bundle.
Effective Date	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	Yes (Conditional)
		<b>Note:</b> This data is required when you are defining a characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This data is required when you are defining a characteristic for the price item or price item bundle.
<b>Price Item Relationship</b>		
Price Item	Used to indicate the price item or price item bundle that you want to associate with the parent price item or add to the price item bundle.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to do either of the following: <ul style="list-style-type: none"> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul>
Effective Start Date	Used to specify the date from when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	Yes (Conditional)

		<p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul>
Effective End Date	Used to specify the date till when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	No
Relationship Type	<p>Used to indicate how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li><b>BNDL</b> - Enables you to set the relationship type to <b>Bundle</b>.</li> <li><b>CG</b> - Enables you to set the relationship type to <b>Custom</b>.</li> <li><b>DENB</b> - Enables you to set the relationship type to <b>Denominator</b>.</li> <li><b>NUMB</b> - Enables you to set the relationship type to <b>Numerator</b>.</li> <li><b>OTHR</b> - Enables you to set the relationship type to <b>Other</b>.</li> <li><b>PROD</b> - Enables you to set the relationship type to <b>Price Item</b>.</li> <li><b>SVC</b> - Enables you to set the relationship type to <b>Service</b>.</li> <li><b>SVCG</b> - Enables you to set the relationship type to <b>Service Group</b>.</li> </ul>	Yes (Conditional)
		<p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul>
Price Item Parameter=Parameter Value	Used to specify the parameter and its value using which you want to determine the pricing for the child price item or price item bundle.	Yes (Conditional)

	<p><b>Note:</b></p> <p>You must specify a parameter which is associated with the price item or price item bundle and whose parameter usage is set to <b>Pricing</b>.</p> <p>You cannot specify any special character except underscore ( _ ) in the parameter name.</p> <p>You can specify any special characters except ampersand (&amp;), comma (,), underscore ( _ ), equal to (=), tilde (~), and semi-colon(;) in the parameter value.</p> <p>You cannot specify more than 50 parameter and parameter value combinations while uploading the price item file in the CSV format.</p>	<p><b>Note:</b> This data is required when you want to determine the pricing for the child price item or price item bundle using a parameter.</p>
<b>Relationship-Specific Characteristics for Price Item</b>		
Characteristic Type	Used to specify the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>You must specify a characteristic type which is already defined in the system.</p> <p>You must specify a characteristic type where the characteristic entity is set to <b>Price Item Relationship</b>.</p>	<p><b>Note:</b> This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.</p>
Effective Date	Used to specify the date from when the relationship-specific characteristic is effective for the price item or price item bundle.	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.</p>
Characteristic Value	Used to specify the value for the characteristic type.	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.</p>

## Sample CSV Format for Uploading Price Items

Using the below example, you can create the following price items:

		Service Group

**Note:** The system will create the above price items when the required contract types, parameters, predefined parameter values, divisions, SQIs, characteristic types, predefined characteristic values are defined in the application.

In addition, the file request type which is used for uploading the price item file in the CSV format must contain the following field transformation details:

1	Price Item	C1_PRICEITEM_BO/priceItemCode
2	Description	C1_PRICEITEM_BO/description
3	Price Item Usage	C1_PRICEITEM_BO/priceItemAvailFor
4	Price Item Type	C1_PRICEITEM_BO/priceItemType
5	Status	C1_PRICEITEM_BO/piStatusFlag
6	Bundle	C1_PRICEITEM_BO/bundleSw
7	Bundle Type	C1_PRICEITEM_BO/bundleTypeFlg
8	Global Price List	C1_PRICEITEM_BO/asgnGlobalPlSw
9	Contract type	C1_PRICEITEM_BO/saType
10	Effective Start Date	C1_PRICEITEM_BO/0/priceItemParm/startDate
11	Effective End Date	C1_PRICEITEM_BO/0/priceItemParm/endDate
12	Parameter	C1_PRICEITEM_BO/0/priceItemParm/priceParmCode
13	Business Label	C1_PRICEITEM_BO/0/priceItemParm/overridePriceParmLabel

14	Display Order	C1_PRICEITEM_BO/0/priceItemParm/displayOrder
15	Parameter Usage	C1_PRICEITEM_BO/0/priceItemParm/parmUsageFlg
16	Mandatory	C1_PRICEITEM_BO/0/priceItemParm/isRequired
17	Priority	C1_PRICEITEM_BO/0/priceItemParm/priorityNum
18	Parameter Value	C1_PRICEITEM_BO/0/priceItemParm/0/ priceItemParmVal/priceParmVal
19	Parameter Value	C1_PRICEITEM_BO/0/priceItemParm/1/ priceItemParmVal/priceParmVal

## Uploading a Parameter File in the XML Format

To upload a parameter file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading parameters in the XML format
2. Upload the parameter file
3. Create the parameters in the system

**Related Topics**

## Defining a File Request Type for Uploading Parameters in the XML Format

### Procedure

To define a file request type for uploading parameters in the XML format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Object** option from the **Service Type** list.
9. Enter the **C1\_PRICE\_PARM** business object or custom parameter business object in the **Service Name** field.
10. Attach an algorithm created using the **C1-PRICEUPL** algorithm type to the **Pre-Processing Algorithm** field corresponding to the parameter business object.

**Note:** For more information about the **C1-PRICEUPL** algorithm, refer to [C1-PRICEUPL](#) on page 2198.

11. Select the **Add** option from the **Operation** list.

**Note:** At present, you cannot edit the existing parameters using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters from the user interface.

12. Click **Save**.  
The file request type is defined for uploading parameters in the XML format.

## Uploading a Parameter File

You can upload a parameter file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating Parameters

You can create the parameters in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Uploading a Parameter File in the CSV Format

To upload a parameter file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading parameters in the CSV format
2. Upload the parameter file
3. Create the parameters in the system

## Defining a File Request Type for Uploading Parameters in the CSV Format

### Procedure

To define a file request type for uploading parameters in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Select the **Data Transformation Required** option.  
The **File Format** field is enabled.
6. Select the **Comma Separated Values** option from the **File Format** list.
7. Enter **csv** in the **File Extension** field.
8. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
9. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
10. In the **Services** section, enter the required sequence number.
11. Select the **Business Object** option from the **Service Type** list.
12. Enter the **C1\_PRICE\_PARM** business object or custom parameter business object in the **Service Name** field.
13. Attach an algorithm created using the **C1-PRICEUPL** algorithm type to the **Pre-Processing Algorithm** field corresponding to the parameter business object.

**Note:** For more information about the **C1-PRICEUPL** algorithm, refer to [C1-PRICEUPL](#) on page 2198.

14. Select the **Add** option from the **Operation** list.

**Note:** At present, you cannot edit the existing parameters using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters from the user interface.

15. If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** section.

16. Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** section.
17. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	PRICEPARMCODE	C1_PRICE_PARM/priceParmCode
2	DESCRIPTION	C1_PRICE_PARM/description

18. Click **Save**.

The file request type is defined for uploading parameters in the CSV format.

## Uploading a Parameter File

You can upload a parameter file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating Parameters

You can create the parameters in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## XML File Format for Uploading Parameters

Before uploading a parameter file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1_PRICE_PARM	Used to specify the details of the parameter whose record you want to create or update in the system.	Yes
pricingEligibilitySw	Used to indicate whether the parameter can be used while defining the pricing eligibility criteria. The valid values are: <ul style="list-style-type: none"> <li>Y</li> </ul>	No

Tag Name	Tag Description	Mandatory (Yes or No)														
	<ul style="list-style-type: none"><li>N</li></ul>															
	<b>Note:</b> You must ensure that this tag contains <b>N</b> when the <b>sourceEntityFlg</b> tag contains <b>TRN</b> .															
priceItemSw	<p>Used to indicate whether the parameter can be associated with a price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"><li>Y</li><li>N</li></ul> <p><b>Note:</b></p> <p>You must ensure that this tag contains <b>N</b> when a parameter is defined using the following source entity and source type combinations:</p> <table><tr><th>Source Entity</th><th>Source Type</th></tr><tr><td>ACCT</td><td>BAL</td></tr><tr><td>ACCT</td><td>CNT</td></tr><tr><td>PERS</td><td>BAL</td></tr><tr><td>PERS</td><td>CNT</td></tr><tr><td>ALGO</td><td>—</td></tr><tr><td>SQI</td><td>—</td></tr></table>	Source Entity	Source Type	ACCT	BAL	ACCT	CNT	PERS	BAL	PERS	CNT	ALGO	—	SQI	—	No
Source Entity	Source Type															
ACCT	BAL															
ACCT	CNT															
PERS	BAL															
PERS	CNT															
ALGO	—															
SQI	—															
priceListEligibilitySw	<p>Used to indicate whether the parameter can be used while defining the price list eligibility criteria. The valid values are:</p> <ul style="list-style-type: none"><li>Y</li><li>N</li></ul> <p><b>Note:</b> You must ensure that this tag contains <b>N</b> when the <b>sourceEntityFlg</b> tag contains <b>TRN</b>.</p>	No														
productEligibilitySw	<p>Used to indicate whether the parameter can be used while defining the product eligibility criteria. The valid values are:</p> <ul style="list-style-type: none"><li>Y</li><li>N</li></ul> <p><b>Note:</b> You must ensure that this tag contains <b>N</b> when the <b>sourceEntityFlg</b> tag contains <b>ALGO</b>, <b>SQI</b>, or <b>TRN</b>.</p>	No														
priceParmCode	<p>Used to specify the parameter name.</p> <p><b>Note:</b> You cannot specify any special character except underscore ( <b>_</b> ) in the parameter name.</p>	Yes														

Tag Name	Tag Description	Mandatory (Yes or No)
description	Used to specify the description for the parameter.	Yes
priceParmTypeFlag	Used to indicate the type of value that you want to store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• <b>ADV</b> - Enables you to store an adhoc value in the parameter.</li> <li>• <b>DFV</b> - Enables you to store a predefined value in the parameter.</li> <li>• <b>FKV</b> - Enables you to store a reference value in the parameter.</li> </ul>	Yes
sourceEntityFlg	Used to indicate the entity from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Enables you to derive the parameter value from the account.</li> <li>• <b>ALGO</b> - Enables you to derive the parameter value from an algorithm.</li> <li>• <b>PERS</b> - Enables you to derive the parameter value from the person.</li> <li>• <b>PRD</b> - Enables you to derive the parameter value from the product.</li> <li>• <b>SQI</b> - Enables you to derive the parameter value from a service quantity identifier.</li> <li>• <b>TRN</b> - Enables you to derive the parameter value from a transaction.</li> </ul>	Yes
sourceTypeCode	Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)																																				
	<p><b>Note:</b></p> <p>You must ensure that this tag contains no value when the <b>sourceEntityFlg</b> tag contains <b>TRN</b>.</p> <p>You must ensure that this tag contains the following information depending on the source entity and source type combination:</p> <table border="1"> <thead> <tr> <th>Source Entity</th><th>Source Type</th><th>Source Type Code</th></tr> </thead> <tbody> <tr> <td>ACCT</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to <b>Account</b>.</td></tr> <tr> <td>ACCT</td><td>FLD</td><td>A field from the <b>CI_ACCT</b> table.</td></tr> <tr> <td>ACCT</td><td>BAL</td><td>A value from the <b>BAL_FLG</b> lookup field.</td></tr> <tr> <td>ACCT</td><td>CNT</td><td>A value from the <b>CNT_FLG</b> lookup field.</td></tr> <tr> <td>PERS</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to <b>Person</b>.</td></tr> <tr> <td>PERS</td><td>FLD</td><td>A field from the <b>CI_PER</b> table.</td></tr> <tr> <td>PERS</td><td>BAL</td><td>A value from the <b>BAL_FLG</b> lookup field.</td></tr> <tr> <td>PERS</td><td>CNT</td><td>A value from the <b>CNT_FLG</b> lookup field.</td></tr> <tr> <td>PRD</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to <b>Product</b>.</td></tr> <tr> <td>PRD</td><td>FLD</td><td>A field from the <b>C1_PRODUCT</b> table.</td></tr> <tr> <td>SQI</td><td>—</td><td>A service quantity identifier which is already defined in the system.</td></tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	ACCT	CHAR	A characteristic type where the characteristic entity is set to <b>Account</b> .	ACCT	FLD	A field from the <b>CI_ACCT</b> table.	ACCT	BAL	A value from the <b>BAL_FLG</b> lookup field.	ACCT	CNT	A value from the <b>CNT_FLG</b> lookup field.	PERS	CHAR	A characteristic type where the characteristic entity is set to <b>Person</b> .	PERS	FLD	A field from the <b>CI_PER</b> table.	PERS	BAL	A value from the <b>BAL_FLG</b> lookup field.	PERS	CNT	A value from the <b>CNT_FLG</b> lookup field.	PRD	CHAR	A characteristic type where the characteristic entity is set to <b>Product</b> .	PRD	FLD	A field from the <b>C1_PRODUCT</b> table.	SQI	—	A service quantity identifier which is already defined in the system.	
Source Entity	Source Type	Source Type Code																																				
ACCT	CHAR	A characteristic type where the characteristic entity is set to <b>Account</b> .																																				
ACCT	FLD	A field from the <b>CI_ACCT</b> table.																																				
ACCT	BAL	A value from the <b>BAL_FLG</b> lookup field.																																				
ACCT	CNT	A value from the <b>CNT_FLG</b> lookup field.																																				
PERS	CHAR	A characteristic type where the characteristic entity is set to <b>Person</b> .																																				
PERS	FLD	A field from the <b>CI_PER</b> table.																																				
PERS	BAL	A value from the <b>BAL_FLG</b> lookup field.																																				
PERS	CNT	A value from the <b>CNT_FLG</b> lookup field.																																				
PRD	CHAR	A characteristic type where the characteristic entity is set to <b>Product</b> .																																				
PRD	FLD	A field from the <b>C1_PRODUCT</b> table.																																				
SQI	—	A service quantity identifier which is already defined in the system.																																				
sourceTypeFlg	<p>Used to indicate the type of source from where the parameter value should be derived. The valid values are:</p> <ul style="list-style-type: none"> <li><b>CHAR</b> - Enables you to derive the parameter value from a characteristic.</li> </ul>	Yes																																				

Tag Name	Tag Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li><b>FLD</b> - Enables you to derive the parameter value from a field.</li> <li><b>BAL</b> - Enables you to derive the parameter value from a usage amount.</li> <li><b>CNT</b> - Enables you to derive the parameter value from a usage counter.</li> </ul>	
	<b>Note:</b> You must ensure that this tag contains no value when the <b>sourceEntityFlg</b> tag contains <b>ALGO</b> , <b>SQI</b> , or <b>TRN</b> . You must ensure that this tag does not contain <b>BAL</b> or <b>CNT</b> when the <b>sourceEntityFlg</b> tag contains <b>PRD</b> .	
validationAlgoCd	Used to indicate the algorithm using which you want to validate the adhoc parameter value.	No
	<b>Note:</b> You must ensure that this tag contains value when the <b>priceParmTypeFlag</b> tag contains <b>ADV</b> .	
referredTable	Used to indicate the table whose primary key (column) you want to set as the reference entity.	Yes (Conditional)
		<b>Note:</b> This data is required when the <b>priceParmTypeFlag</b> tag contains <b>FKV</b> .
referredField	Used to indicate the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.	Yes (Conditional)
		<b>Note:</b> This data is required when the <b>priceParmTypeFlag</b> tag contains <b>FKV</b> .
priceParmValue	Used to specify a list of predefined values for the parameter.	Yes (Conditional)
		<b>Note:</b> This data is required when the <b>priceParmTypeFlag</b> tag contains <b>DFV</b> .
priceParmVal	Used to specify the parameter value.	Yes (Conditional)
	<b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	<b>Note:</b> This data is required when the <b>priceParmTypeFlag</b> tag contains <b>DFV</b> .
descr	Used to specify the description for the parameter value.	Yes (Conditional)

Tag Name	Tag Description	Mandatory (Yes or No)
		<b>Note:</b> This data is required when the <b>priceParmTypeFlag</b> tag contains <b>DFV</b> .

# Sample XML Format for Uploading Parameters

Using the below example, you can create the following parameters:

- Country
- Currency

**Note:** The system will create the above parameters when the required fields, characteristic types, usage amount, usage counter, validation algorithm, referenced tables, and referenced fields are defined in the application.

```
<root>
<request>
<payload>
<C1_PRICE_PARM>
  <priceParmCode>COUNTRY</priceParmCode>
  <description>COUNTRY</description>
  <priceParmTypeFlag>DFV</priceParmTypeFlag>
  <sourceEntityFlg>PERS</sourceEntityFlg>
  <sourceTypeFlg>FLD</sourceTypeFlg>
  <sourceTypeCode>COUNTRY</sourceTypeCode>
  <validationAlgoCd></validationAlgoCd>
  <referredTable></referredTable>
  <referredField></referredField>
  <priceParmValue>
    <priceParmVal>AUT</priceParmVal>
    <descr>Austria</descr>
  </priceParmValue>
  <priceParmValue>
    <priceParmVal>AUS</priceParmVal>
    <descr>Australia</descr>
  </priceParmValue>
  <priceParmValue>
    <priceParmVal>CAN</priceParmVal>
    <descr>Canada</descr>
  </priceParmValue>
  <priceParmValue>
    <priceParmVal>CHN</priceParmVal>
    <descr>China</descr>

XML File Format for Uploading Parameters	<a href="#">XML File Format for Uploading Parameters</a> on page 2231

## CSV File Format for Uploading Parameters

Before uploading a parameter file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following data:

Parameter	Used to specify the parameter name.	Yes
	<b>Note:</b> You cannot specify any special character except underscore ( _ ) in the parameter name.	
Description	Used to specify the description for the parameter.	Yes
Value Type	Used to indicate the type of value that you want to store in the parameter. The valid values are: <ul style="list-style-type: none"> <li><b>ADV</b> - Enables you to store an adhoc value in the parameter.</li> </ul>	Yes

	<ul style="list-style-type: none"> <li>• <b>DFV</b> - Enables you to store a predefined value in the parameter.</li> <li>• <b>FKV</b> - Enables you to store a reference value in the parameter.</li> </ul>	
Source Entity	<p>Used to indicate the entity from where the parameter value should be derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Enables you to derive the parameter value from the account.</li> <li>• <b>ALGO</b> - Enables you to derive the parameter value from an algorithm.</li> <li>• <b>PERS</b> - Enables you to derive the parameter value from the person.</li> <li>• <b>PRD</b> - Enables you to derive the parameter value from the product.</li> <li>• <b>SQI</b> - Enables you to derive the parameter value from a service quantity identifier.</li> <li>• <b>TRN</b> - Enables you to derive the parameter value from a transaction.</li> </ul>	Yes
Source Type	<p>Used to indicate the type of source from where the parameter value should be derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>CHAR</b> - Enables you to derive the parameter value from a characteristic.</li> <li>• <b>FLD</b> - Enables you to derive the parameter value from a field.</li> <li>• <b>BAL</b> - Enables you to derive the parameter value from a usage amount.</li> <li>• <b>CNT</b> - Enables you to derive the parameter value from a usage counter.</li> </ul> <p><b>Note:</b></p> <p>You must not specify the source type when the source entity is set to <b>ALGO</b>, <b>SQI</b>, or <b>TRN</b>.</p> <p>You must not specify the source type as <b>BAL</b> or <b>CNT</b> when the source entity is set to <b>PRD</b>.</p>	Yes
Source Code	<p>Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived.</p>	Yes

	<p><b>Note:</b></p> <p>You must not specify the source type code when the source entity is set to <b>TRN</b>.</p> <p>You must specify the source type code depending on the following source entity and source type combination:</p> <table> <tr> <th>Source Entity</th><th>Source Type</th><th>Source Type Code</th></tr> <tr> <td>ACCT</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to <b>Account</b>.</td></tr> <tr> <td>ACCT</td><td>FLD</td><td>A field from the <b>CI_ACCT</b> table.</td></tr> <tr> <td>ACCT</td><td>BAL</td><td>A value from the <b>BAL_FLG</b> lookup field.</td></tr> <tr> <td>ACCT</td><td>CNT</td><td>A value from the <b>CNT_FLG</b> lookup field.</td></tr> <tr> <td>PERS</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to <b>Person</b>.</td></tr> <tr> <td>PERS</td><td>FLD</td><td>A field from the <b>CI_PER</b> table.</td></tr> <tr> <td>PERS</td><td>BAL</td><td>A value from the <b>BAL_FLG</b> lookup field.</td></tr> <tr> <td>PERS</td><td>CNT</td><td>A value from the <b>CNT_FLG</b> lookup field.</td></tr> <tr> <td>PRD</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to <b>Product</b>.</td></tr> <tr> <td>PRD</td><td>FLD</td><td>A field from the <b>CI_PRODUCT</b> table.</td></tr> <tr> <td>SQI</td><td>—</td><td>A service quantity identifier which is already defined in the system.</td></tr> </table>	Source Entity	Source Type	Source Type Code	ACCT	CHAR	A characteristic type where the characteristic entity is set to <b>Account</b> .	ACCT	FLD	A field from the <b>CI_ACCT</b> table.	ACCT	BAL	A value from the <b>BAL_FLG</b> lookup field.	ACCT	CNT	A value from the <b>CNT_FLG</b> lookup field.	PERS	CHAR	A characteristic type where the characteristic entity is set to <b>Person</b> .	PERS	FLD	A field from the <b>CI_PER</b> table.	PERS	BAL	A value from the <b>BAL_FLG</b> lookup field.	PERS	CNT	A value from the <b>CNT_FLG</b> lookup field.	PRD	CHAR	A characteristic type where the characteristic entity is set to <b>Product</b> .	PRD	FLD	A field from the <b>CI_PRODUCT</b> table.	SQI	—	A service quantity identifier which is already defined in the system.	
Source Entity	Source Type	Source Type Code																																				
ACCT	CHAR	A characteristic type where the characteristic entity is set to <b>Account</b> .																																				
ACCT	FLD	A field from the <b>CI_ACCT</b> table.																																				
ACCT	BAL	A value from the <b>BAL_FLG</b> lookup field.																																				
ACCT	CNT	A value from the <b>CNT_FLG</b> lookup field.																																				
PERS	CHAR	A characteristic type where the characteristic entity is set to <b>Person</b> .																																				
PERS	FLD	A field from the <b>CI_PER</b> table.																																				
PERS	BAL	A value from the <b>BAL_FLG</b> lookup field.																																				
PERS	CNT	A value from the <b>CNT_FLG</b> lookup field.																																				
PRD	CHAR	A characteristic type where the characteristic entity is set to <b>Product</b> .																																				
PRD	FLD	A field from the <b>CI_PRODUCT</b> table.																																				
SQI	—	A service quantity identifier which is already defined in the system.																																				
Validation Algorithm	<p>Used to indicate the algorithm using which you want to validate the adhoc parameter value.</p> <p><b>Note:</b> You must specify a validation algorithm when the value type is set to <b>Adhoc</b>.</p>	No																																				
Reference Entity	Used to indicate the table whose primary key (column) you want to set as the reference entity.	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the value type is set to <b>Reference</b>.</p>																																				

Field Name	Used to indicate the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.	Yes (Conditional)														
		<b>Note:</b> This data is required when the value type is set to <b>Reference</b> .														
Predefined Parameter Values																
Parameter Value	Used to specify the parameter value.	Yes (Conditional)														
	<b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	<b>Note:</b> This data is required when the value type is set to <b>Predefined</b> .														
Description	Used to specify the description for the parameter value.	Yes (Conditional)														
		<b>Note:</b> This data is required when the value type is set to <b>Predefined</b> .														
Parameter Usage Information																
Price Item	Used to indicate whether the parameter can be associated with a price item or price item bundle. The valid values are: <ul style="list-style-type: none"><li>Y</li><li>N</li></ul>	No														
	<b>Note:</b> You must specify the value as N when a parameter is defined using the following source entity and source type combinations:															
	<table><tr><th>Source Entity</th><th>Source Type</th></tr><tr><td>ACCT</td><td>BAL</td></tr><tr><td>ACCT</td><td>CNT</td></tr><tr><td>PERS</td><td>BAL</td></tr><tr><td>PERS</td><td>CNT</td></tr><tr><td>ALGO</td><td>—</td></tr><tr><td>SQI</td><td>—</td></tr></table>		Source Entity	Source Type	ACCT	BAL	ACCT	CNT	PERS	BAL	PERS	CNT	ALGO	—	SQI	—
	Source Entity		Source Type													
	ACCT		BAL													
	ACCT		CNT													
	PERS		BAL													
	PERS		CNT													
	ALGO		—													
	SQI		—													
Pricing Eligibility Criteria	Used to indicate whether the parameter can be used while defining the pricing eligibility criteria. The valid values are: <ul style="list-style-type: none"><li>Y</li><li>N</li></ul>	No														
Price List Eligibility Criteria	Used to indicate whether the parameter can be used while defining the price list eligibility criteria. The valid values are: <ul style="list-style-type: none"><li>Y</li></ul>	No														

	<ul style="list-style-type: none"> <li>N</li> </ul>	
	<b>Note:</b> You must specify the value as <b>N</b> when the source entity is set to <b>TRN</b> .	
Product Eligibility Criteria	Used to indicate whether the parameter can be used while defining the product eligibility criteria. The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul>	No
	<b>Note:</b> You must specify the value as <b>N</b> when the source entity is set to <b>ALGO</b> , <b>SQI</b> , or <b>TRN</b> .

## Sample CSV Format for Uploading Parameters

Using the below example, you can create the following parameters:

- Country
- Currency

**Note:** The system will create the above parameters when the required fields, characteristic types, usage amount, usage counter, validation algorithm, referenced tables, and referenced fields are defined in the application.

	Parameter	
1	Parameter	C1_PRICE_PARM_BO/priceParmCode
2	Description	C1_PRICE_PARM_BO/description
3	Value Type	C1_PRICE_PARM_BO/priceParmTypeFlag
4	Source Entity	C1_PRICE_PARM_BO/sourceEntityFlg
5	Source Type	C1_PRICE_PARM_BO/sourceTypeFlg
6	Source Type Code	C1_PRICE_PARM_BO/sourceTypeCode
7	Validation Algorithm	C1_PRICE_PARM_BO/validationAlgoCd
8	Reference Entity	C1_PRICE_PARM_BO/referredTable
9	Field Name	C1_PRICE_PARM_BO/referredField

## Uploading an SQI File in the XML Format

To upload an SQI file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading SQIs in the XML format
2. Upload the SQI file
3. Create the SQIs in the system

### Related Topics

How to create the SQIs in the system	<a href="#">Creating SQIs</a> on page 2248

## Defining a File Request Type for Uploading SQIs in the XML Format

---

### Procedure

To define a file request type for uploading SQIs in the XML format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Service** option from the **Service Type** list.
9. Enter the **C1-SQIUPLOAD** business service or custom SQI business service in the **Service Name** field.
10. Select the **Add** option from the **Operation** list.

**Note:** At present, you cannot edit the existing SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing SQIs from the user interface.

11. Click **Save**.  
The file request type is defined for uploading SQIs in the XML format.

## Uploading an SQI File

---

You can upload an SQI file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating SQIs

---

You can create the SQIs in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Uploading an SQI File in the CSV Format

---

To upload an SQI file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading SQIs in the CSV format
2. Upload the SQI file
3. Create the SQIs in the system

### Related Topics

For more information on...	See...
How to define a file request type for uploading SQIs in the CSV format	<a href="#">Defining a File Request Type for Uploading SQIs in the CSV Format</a> on page 2249
How to upload an SQI file	<a href="#">Uploading an SQI File</a> on page 2250
How to create the SQIs in the system	<a href="#">Creating SQIs</a> on page 2250

## Defining a File Request Type for Uploading SQIs in the CSV Format

### Procedure

To define a file request type for uploading SQIs in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Select the **Data Transformation Required** option.  
The **File Format** field is enabled.
6. Select the **Comma Separated Values** option from the **File Format** list.
7. Enter `csv` in the **File Extension** field.
8. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
9. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
10. In the **Services** section, enter the required sequence number.
11. Select the **Business Service** option from the **Service Type** list.
12. Enter the **C1-SQIUPLOAD** business service or custom SQI business service in the **Service Name** field.
13. Select the **Add** option from the **Operation** list.

**Note:** At present, you cannot edit the existing SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing SQIs from the user interface.

14. If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** section.
15. Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** section.
16. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	DECIMALPOSITIONS	C1-SQIUPLOAD/decimalPositions
2	DESCRIPTION	C1-SQIUPLOAD/description

17. Click **Save**.

The file request type is defined for uploading SQIs in the CSV format.

## Uploading an SQI File

You can upload an SQI file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating SQIs

You can create the SQIs in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

# XML File Format for Uploading Service Quantity Identifiers (SQIs)

Before uploading an SQI file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-SQIUPLOAD	Used to specify the details of the SQI whose record you want to create or update in the system.	Yes
serviceQuantityIdentifier	Used to specify the service quantity identifier (SQI).	Yes (Conditional)
		<b>Note:</b> This data is required when you want to define an SQI.
description	Used to specify the description for the SQI.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to define an SQI.
decimalPositions	Used to specify the appropriate number of decimal positions for the SQI.	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<b>Note:</b> If you do not specify the value in this tag, by default, it is set to zero (0).  You can specify maximum precision of 18 decimal positions for an SQI.

## Sample XML Format for Uploading Service Quantity Identifiers (SQIs)

Using the below example, you can create the following SQIs:

- ACCTBAL
- AVGDBAL
- OVDLMT

```
<root>
<request>
<payload>
<C1-SQIUPLOAD>
  <serviceQuantityIdentifier>ACCTBAL</serviceQuantityIdentifier>
  <description>Account Balance</description>
  <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
<C1-SQIUPLOAD>
  <serviceQuantityIdentifier>AVGDBAL</serviceQuantityIdentifier>
  <description>Average Daily Balance</description>
  <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
<C1-SQIUPLOAD>
  <serviceQuantityIdentifier>OVDLMT</serviceQuantityIdentifier>
  <description>Overdraft Limit</description>
  <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
</payload>
</request>
</root>
```

## CSV File Format for Uploading Service Quantity Identifiers (SQIs)

Before uploading an SQI file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following data:

Data	Description	Mandatory (Yes or No)
Service Identifier	Quantity Used to specify the service quantity identifier (SQI).	Yes (Conditional)
		<b>Note:</b> This data is required when you want to define an SQI.
Description	Used to specify the description for the SQI.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to define an SQI.
Decimal Positions	Used to specify the appropriate number of decimal positions for the SQI.	No
	<b>Note:</b> If you do not specify the value in this tag, by default, it is set to zero (0).  You can specify maximum precision of 18 decimal positions for an SQI.

## Sample CSV Format for Uploading SQIs

Using the below example, you can create the following SQIs:

- ACCTBAL
- AVGDBAL
- OVDLMT

**Note:** The system will create the above SQIs when the required value types, source entities, source types, source type codes, algorithms, and reference entity values are defined in the application.

1	SQI	C1-SQIUPLOAD/serviceQuantityIdentifier
2	Description	C1-SQIUPLOAD/description
3	Decimal Positions	C1-SQIUPLOAD/decimalPositions

4	SQI	C1-SQIUPLOAD/serviceQuantityIdentifier
5	Description	C1-SQIUPLOAD/description
6	Decimal Positions	C1-SQIUPLOAD/decimalPositions
7	SQI	C1-SQIUPLOAD/serviceQuantityIdentifier
8	Description	C1-SQIUPLOAD/description
9	Decimal Positions	C1-SQIUPLOAD/decimalPositions

**Sample CSV**

```
ACCTBAL,Account Balance,18,AVGDBAL,Average Daily Balance,18,OVDLMT,Overdraft Limit,18
```

## Uploading Price Items, Parameters, and SQIs from the Same File

---

If the price item, parameter, and SQI information is given in the same file, you need to use a file request type where the following business objects and business service are added in the **Services** section:

- C1\_PRICE\_PARM
- C1-SQIUPLOAD
- C1\_PRICEITEM\_BO

Note that the **C1\_PRICE\_PARM** business object and the **C1-SQIUPLOAD** business service should have higher sequence compared to the **C1\_PRICEITEM\_BO** business object in such file request type. Otherwise, erroneous results might occur.

## Product and Product Version Upload

---

Oracle Revenue Management and Billing enables you to create new products and edit the existing products using the **File Upload Interface** utility. You can upload the product file in the XML or CSV format using the **File Upload Interface** utility. You can specify the following in the XML and CSV files along with the basic details of the product:

- Divisions which you want to associate with the product
- Characteristics for the product
- Details of the product to product relationship

The system also enables you to create new product versions and edit the existing product versions using the **File Upload Interface** utility. You can upload product versions along with the product or separately based on the requirements. You can specify the following in the XML and CSV files along with the basic details of the product version:

- Characteristics for the product version
- Eligibility criteria for the product version
- Services and price list which you want to add in the product version
- Standard products and their services which you want to add in the product version (in case of packaged product)

## Price List and Price Item Pricing Upload

---

Oracle Revenue Management and Billing enables you to create new price lists and edit the existing price lists using the **File Upload Interface** utility. You can upload the price list file in the XML or CSV format using the **File Upload Interface** utility.

You can specify the following in the XML and CSV files along with the basic details of the price list:

- Divisions which you want to associate with the price list
- Characteristics for the price list
- Eligibility criteria for the price list
- Hierarchy details for the price list

To upload the price list file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
  - Set the **File Format** field to **Extensible Markup Language**.
  - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
  - Add the **C1\_PRICEASSIGN\_SERVICE** business service in the **Services** section.
  - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price lists or edit the existing price lists using the file request type.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price list file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price lists in the system.

**Note:** For more information about the XML file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

To upload the price list file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
  - Set the **File Format** field to **Comma Separated Values**.
  - Select the **Data Transformation Required** option.
  - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
  - Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.

- Add the **C1\_PRICEASSIGN\_SERVICE** business service in the **Services** section.
- Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price lists or edit the existing price lists using the file request type.
- Specify the following details in the Field Transformation section:
  - **Sequence** – Used to specify the data field in the CSV record which should be uploaded in the system.
  - **Field Name** – Used to indicate the field for which the data is uploaded in the system.
  - **Map Field XPath** – Used to specify the XPath of the field where you want to store the data field from the CSV record.

For example,

Sequence	Field Name	Map Field XPath
1	PRICELISTID	C1_PRICEASSIGN_SERVICE/0/pricelist/priceListId
2	DESCRIPTION	C1_PRICEASSIGN_SERVICE/0/pricelist/description

This means that the system should upload the first value (i.e. price list ID) and second value (i.e. price list description) from the CSV record in the **priceListId** and **description** fields using the **C1\_PRICEASSIGN\_SERVICE** business service.

2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price list file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price lists in the system.

**Note:** For more information about the CSV file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

The system also enables you to create new price item pricing for an account, customer, or price list and edit the existing price item pricing assigned to an account, customer, or price list using the **File Upload Interface** utility. You can upload price item pricing along with the price list or separately based on the requirements.

You can specify the following in the XML and CSV files along with the basic details of price item pricing:

- Person, account, or price list to which you want to assign the price item pricing
- Characteristics for the price item pricing
- Price item parameters based on which you want to define the price item pricing
- Basic details for the price components
- Tiering criteria for the price component (if the **Tiering Type** of the corresponding rate component is set to **STEP** or **Threshold**)
- Eligibility criteria for the price component (if the **Tiering Type** of the corresponding rate component is set to **STEP** or **Threshold**)

To upload the price assignments file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
  - Set the **File Format** field to **Extensible Markup Language**.
  - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
  - Add the **C1\_PRICEASSIGN\_SERVICE** business service in the **Services** section.
  - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price item pricing or edit the existing price item pricing using the file request type.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price assignments file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price item pricing in the system.

**Note:** For more information about the XML file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

To upload the price assignments file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
  - Set the **File Format** field to **Comma Separated Values**.
  - Select the **Data Transformation Required** option.
  - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
  - Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
  - Add the **C1\_PRICEASSIGN\_SERVICE** business service in the **Services** section.
  - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price item pricing or edit the existing price item pricing using the file request type.
  - Specify the following details in the Field Transformation section:
    - **Sequence** – Used to specify the data field in the CSV record which should be uploaded in the system.
    - **Field Name** – Used to indicate the field for which the data is uploaded in the system.
    - **Map Field XPath** – Used to specify the XPath of the field where you want to store the data field from the CSV record.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price assignments file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price item pricing in the system.

**Note:** For more information about the CSV file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

## Invoice Request

---

### Topics:

- [Prerequisites](#)
- [Types of Invoice Request](#)
- [Invoice Request Manual Trial Bill Generation \(Without Approval\) Status Transition](#)
- [Invoice Request Manual Regular Bill Generation \(Without Approval\) Status Transition](#)
- [Invoice Request Manual Regular Bill Generation \(With Approval\) Status Transition](#)
- [Invoice Request Automatic Regular Bill Generation \(Without Approval\) Status Transition](#)
- [Invoice Request Type](#)
- [Invoice Request \(Used for Searching\)](#)
- [Invoice Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing enables you to generate an adhoc regular or trial bill for an account through an invoice request. The system enables you to create an invoice request manually or automatically. It enables you to create an invoice request for a person or an account. You can create an invoice request for an account where the **Eligible For Invoice Request Creation (INVRACTE)** characteristic is set to **Y**.

If you create an invoice request for a person, the system will consider all those accounts of the person where the **Eligible For Invoice Request Creation (INVRACTE)** characteristic is set to **Y**. You can then exclude an account from the invoice request, if required. The system also enables you to consider all accounts of the person and its child persons where the **Eligible For Invoice Request Creation (INVRACTE)** characteristic is set to **Y**.

**Note:** The system searches for the characteristic type which is specified in the **Invoice Request Account Eligibility Char Type** option type of the **C1-INVREQ** feature configuration. By default, this option type is set to **INVRACTE**. You can change the characteristic type, if required.

In other words, the system enables you to create the following types of invoice request:

- **Manual Regular Bill Generation Invoice Request** - It is used to generate an adhoc regular bill for an account. You can create a manual regular bill generation invoice request for a person or an account from the user interface.
- **Manual Trial Bill Generation Invoice Request** - It is used to generate an adhoc trial bill for an account. You can create a manual trial bill generation invoice request for a person or an account from the user interface.
- **Automatic Regular Bill Generation Invoice Request** - It is used to generate an adhoc regular bill for an account. You can configure the system such that an automatic regular bill generation invoice request is created for an account automatically when a fully-insured group policy is activated, terminated, reinstated, or renewed from the user interface or through a health care inbound message.

**Note:**

The automatic invoice request creation feature is only designed to work for the fully-insured group health insurance business and not for the financial services or self-funded health insurance business.

You cannot create an automatic regular bill generation invoice request for a person.

At present, the system is not designed to create an automatic trial bill generation invoice request.

While creating an invoice request, you need to specify an invoice request type using which you want to create the invoice request. The system enables you to create the invoice request types with the following combinations:

Invoice Mode	Bill Generation Type	Approval Process
Manual	Regular	On
Manual	Regular	Off
Manual	Trial	Off
Automatic	Regular	Off

It is the invoice request type which helps the system to determine:

- The business object using which the invoice request should be created in the system

**Note:** Two invoice request business objects named **Invoice Request - Regular Bill Generation (C1-InvoiceRequest)** and **Invoice Request - Trial Bill Generation (C1-InvoiceRequestTrial)** are introduced in this release. If the **Bill Generation Type** field is set to **Regular**, you must select the **Invoice Request - Regular Bill Generation** business object from the **Invoice Request Business Object** list. However, if the **Bill Generation Type** field is set to **Trial**, you must select the **Invoice Request - Trial Bill Generation** business object from the **Invoice Request Business Object** list.

- Whether a manual or automatic invoice request should be created in the system
- Whether a regular or trial bill generation invoice request should be created in the system
- Whether a manual regular bill generation invoice request for an account should be processed in the online or deferred mode

**Note:**

The system will process a manual regular bill generation invoice request for an account in the deferred mode when the number of billable charges of the account exceeds the defer processing billable charge count.

The defer processing billable charge count is not considered when a manual regular bill generation invoice request is created for a person.

You can specify the defer processing billable charge count when the invoice mode is set to **Manual** and bill generation type is set to **Regular**.

- Whether the approval is required for the invoice request

**Note:** You can only set the **Approval Required** flag when the invoice mode is set to **Manual** and bill generation type is set to **Regular**.

- The wait days which is used to calculate the processing date for an invoice request

**Note:**

If the invoice request is processed in the online mode, the system will process the invoice request when the processing date is earlier than or equal to the system date. However, if the invoice request is processed in the deferred mode, the system will process the invoice request when the processing date is earlier than or equal to the batch business date.

If required, you can configure the system such that the processing date does not fall on a holiday. To implement this requirement you need to specify the work calendar which helps to determine the working day.

- The date calculation algorithm which is used to calculate the processing date for an automatic regular bill generation invoice request

**Note:** In addition, you can configure threshold days for automatic invoice request creation. It is used to determine whether the number of days between the bill cycle date and processing date is greater than the threshold days. This parameter is used in Invoice Request Date Calculation algorithm to check whether the processing date of the invoice request is within threshold period. If so, the automatic invoice request is not created for the account. This parameter is only applicable while activating or renewing a fully-insured group policy.

While creating a manual invoice request, you need to specify the following – invoice request type, entity (i.e. person or account for which the invoice request should be created), cutoff date, accounting date, and bill date.

**Note:** The cutoff date, accounting date, and bill date are derived while creating an automatic invoice request for an account.

For more information about the types of invoice request, see [Types of Invoice Request](#) on page 2264.

For more information on how to setup the invoice request feature, see [Prerequisites](#) on page 2264.

## Prerequisites

---

To setup the invoice request process, you need to do the following:

- Define the required invoice request types in the system.
- Define the required characteristic types where the characteristic entity is set to **Invoice Request Type**
- Define the required characteristic types where the characteristic entity is set to **Invoice Request**
- Assign the **C1-INVRA** To Do type to a To Do role whose users must receive To Do generated while submitting an invoice request for approval
- Assign the **C1-INVRS** To Do type to a To Do role whose users must receive To Do generated while resubmitting an invoice request
- Set the batch control type of the **Invoice Request Periodic Monitor (C1-INVQR)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

For more information about the **Invoice Request Periodic Monitor (C1-INVQR)** batch, see *Oracle Revenue Management and Billing Batch Guide*.

- Set the batch control type of the **Pending Bill Generation (BILLOPEN)**, **Bill Segment Generation (BSGENREG)**, and **Bill Completion (POSTPROC)** batches to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

For more information about these batches, see *Oracle Revenue Management and Billing Batch Guide*.

Set the following feature configuration in the system:

- **Invoice Request Configuration (C1-INVREQ)**

## Types of Invoice Request

---

The system allows you to create the following types of invoice requests:

- [Manual Regular Bill Generation Invoice Request](#) on page 2264
- [Manual Trial Bill Generation Invoice Request](#) on page 2266
- [Automatic Regular Bill Generation Invoice Request](#) on page 2266

## Manual Regular Bill Generation Invoice Request

---

Once a manual regular bill generation invoice request is created in the **Draft** status, the system checks whether it is created for a person or an account. If a manual regular bill generation invoice request is created for an account, you can submit the invoice request. On submitting the invoice request, the system checks whether the number of the billable charges of the account exceed the defer processing billable charge count. If the number of the billable charges of the account exceed the defer processing billable charge count, the status of the invoice request is changed to **Defer Processing Batch**. However, if the number of the billable charges of the account does not exceed the defer processing

billable charge count, the system checks whether the processing date of the invoice request is earlier than or equal to the system date. If the processing date is later than the system date, the status of the invoice request is changed to **Defer Processing**. On the **C1-INVREQ** batch execution, the system checks whether there are any invoice requests in the **Defer Processing** status. If there is an invoice request in the **Defer Processing** status, the system checks whether the processing date of the invoice request is earlier than or equal to the system date. If the processing date is later than the system date, the status of the invoice request remains as **Defer Processing**.

**Note:** The system enables you to cancel an invoice request which is in the **Defer Processing Batch** or **Defer Processing** status.

However, if the processing date is earlier than or equal to the system date, the system checks whether the pending bill already exists for the account. If the pending bill does not exist for the account, the system checks whether the cutoff date is later than the bill after date. If cutoff date is later than the bill after date, the system checks whether the accounting calendar is open for the accounting date. If the accounting calendar is open for the accounting date, the system creates the adhoc regular bill for the account in the online mode. Finally, the status of the invoice request is changed to **Processed**.

However, if the pending bill exists for the account, or if the cutoff date is earlier than or equal to the bill after date, or if the accounting calendar is not open for the accounting date, or if an error occurs while creating adhoc regular bill or its bill segments, the status of the invoice request is changed to **Error**. The system enables you to move such erroneous invoice request back to the **Draft** status.

However, if a manual regular bill generation invoice request is created for a person, the system checks whether the number of accounts of the person (if the **Include Person Hierarchy** option is not selected) or the number of accounts of the person and its child persons (if the **Include Person Hierarchy** option is selected) exceeds the limit defined in the **Account Limit** option type of the **C1-INVREQ** feature configuration. If the number of accounts does not exceed the account limit, the system derives the account of the person or the person and its child persons. Once the accounts are successfully derived, the status of the invoice request is changed to **Defer Processing Batch**.

However, if the number of accounts exceeds the account limit, the status of the invoice request is changed to **Account Derivation Pending**. On the **C1-INVREQ** batch execution, the system checks whether there are any invoice requests in the **Account Derivation Pending** status. If there is an invoice request in the **Account Derivation Pending** status, the system derives the accounts of the person or the person and its child persons. Once the accounts are successfully derived, the status of the invoice request is changed to **Defer Processing Batch**.

When you execute the **BILLOPEN** batch with the **Off Cycle Switch** parameter set to **Y**, the system checks whether the account that meets the search criteria is included in any invoice request which is in the **Defer Processing Batch** status. If the account is included in the invoice request, the system checks whether the processing date of the invoice request is earlier than or equal to the batch business date. If processing date is earlier than or equal to the batch business date, the system checks whether there is any record in the **Processing** status for the account in the invoice request. If so, the system checks whether the pending bill already exists for the account. If the pending bill does not exist for the account, the system checks whether the cutoff date is later than the bill after date. If cutoff date is later than the bill after date, the system checks whether the accounting calendar is open for the accounting date. If the accounting calendar is open for the accounting date, the system creates the adhoc regular bill for the account in the **Pending** status. When you execute the **BSGENREQ** batch with the **Off Cycle Switch** parameter set to **Y**, the system creates the bill segments for the adhoc regular bill. When you execute the **POSTPROC** batch with the **Off Cycle Switch** parameter set to **Y**, the system creates the post-processing bill segments (if any) and completes the adhoc regular bill of the account. Finally, the status of the invoice request is changed to **Processed**.

However, if the pending bill exists for the account, or if the cutoff date is earlier than or equal to the bill after date, or if the accounting calendar is not open for the accounting date, or if an error occurs while creating adhoc regular bill or its bill segments, or if a To Do is generated for the bill review, the status of the record in the invoice request is changed to **Error**. If all records in the invoice request are in the **Error** status, the status of the invoice request is changed to **Error**. The system enables you to move such erroneous invoice request back to the **Draft** status.

You can optionally configure the approval process for the manual regular bill generation invoice request. If the **Approval Required** flag is set to **Yes** in the invoice request type, the status of the manual regular bill generation invoice request is changed to **Approval In Progress** when you submit the invoice request. The approver can then approve or reject the manual regular bill generation invoice request based on the observations.

## Manual Trial Bill Generation Invoice Request

The manual regular bill generation invoice request and manual trial bill generation invoice request are created and processed identically with the following exceptions:

- On submitting the manual trial bill generation invoice request for an account, the system does not check whether the number of the billable charges of the account exceed the defer processing billable charge count. Therefore, the manual trial bill generation invoice request is always processed in the deferred mode.
- You need to specify the following parameters while executing the **BILLOPEN**, **BSGENREQ**, and **POSTPROC** batches:
  - Bill Generation Type (set to **Trial**)
  - Description for Trial Billing Batch Run
  - Off Cycle Switch (set to **Y**)
- The **BSGENREQ** batch will not freeze and complete a trail bill for the account.
- At present, a To Do is not generated for a trial bill review, and therefore the system does not check whether a To Do is generated for a trial bill review.

## Automatic Regular Bill Generation Invoice Request

To enable the automatic invoice request creation feature for the fully-insured group health insurance business, you need to attach the following algorithms:

If you want to create an automatic invoice request for an account while...	Then attach the algorithm....			
	Business Object	Status	System Event	Algo
Activating a Fully-Insured Group Policy	C1-POLICY	In Force/Active	Enter	C1-IN
<b>Note:</b> This happens only on the customer onboarding. If an invoice request is already processed for any account in the person's hierarchy, the system will not create an invoice request for the account.				
Terminating a Fully-Insured Group Policy		Terminated	Enter	C1-IN
Reinstating a Fully-Insured Group Policy		Reinstated	Enter	C1-IN
Renewing a Fully-Insured Group Policy		-	Audit	C1-IR
Creating an Account for a Parent Customer or Bill Group who is the Main Customer of the Fully-Insured Group Policy	C1-AccountBO	-	Post-Processing	C1-IN
<b>Note:</b> This happens only on the customer onboarding. If an invoice request is already processed for any account in the person's hierarchy, the system will not create an invoice request for the account.				

The above algorithms contain a parameter wherein you can specify the invoice request type using which the automatic invoice request should be created in the system.

If the automatic invoice request creation feature is configured for the fully-insured group health insurance business, the system creates an automatic regular bill generation invoice request in the **Defer Processing Batch** status for an account when:

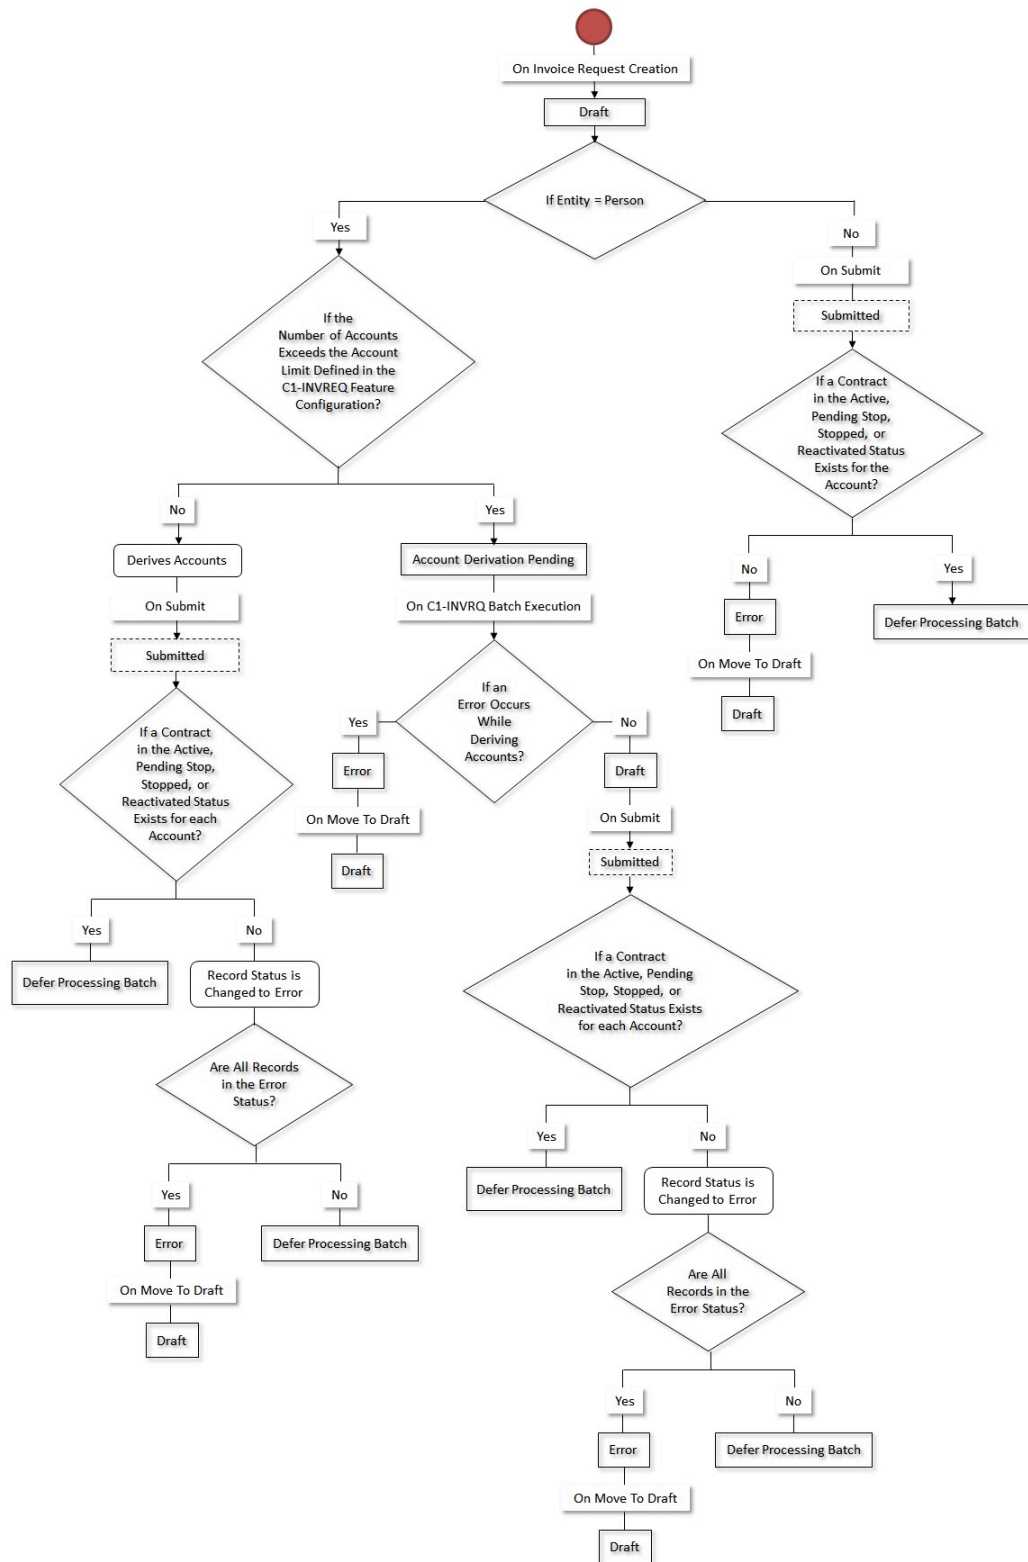

- A fully-insured group policy is activated, terminated, reinstated, or renewed
- An account is created for a parent customer or bill group who is the main customer of the fully-insured group policy

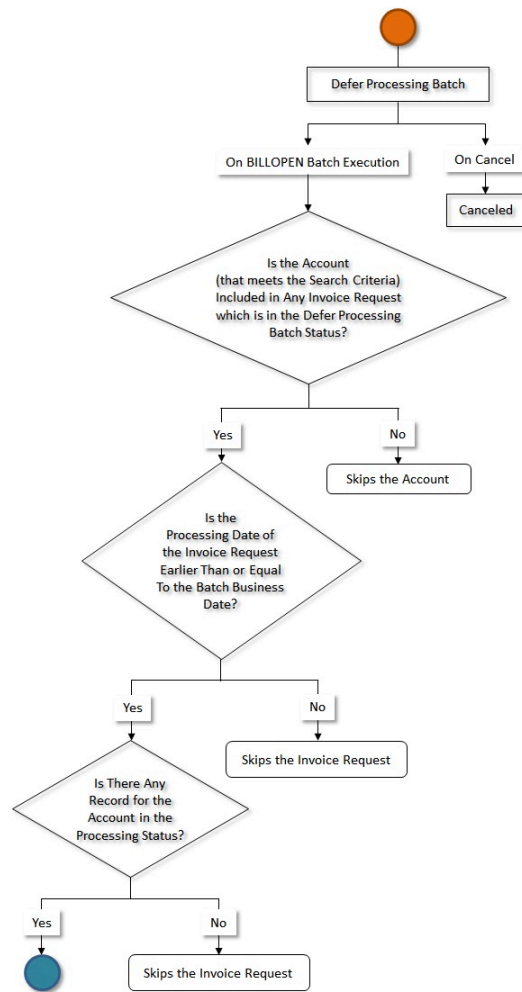

The deferred mode processing for manual regular bill generation invoice request and automatic regular bill generation invoice request is identical.

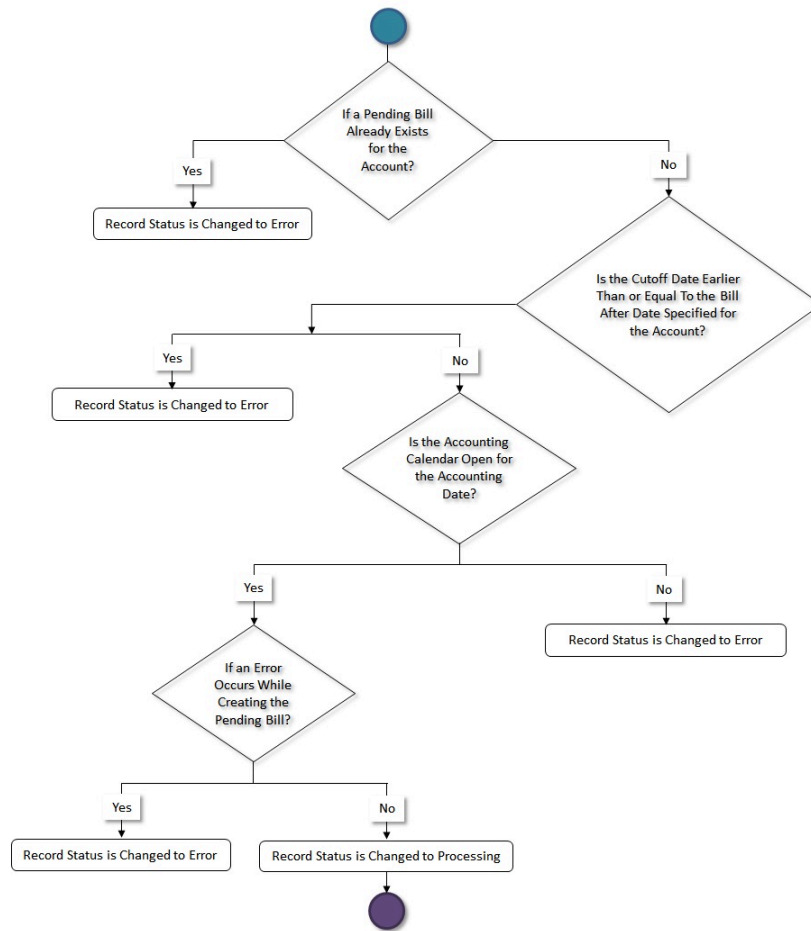

## Invoice Request Manual Trial Bill Generation (Without Approval) Status Transition

---

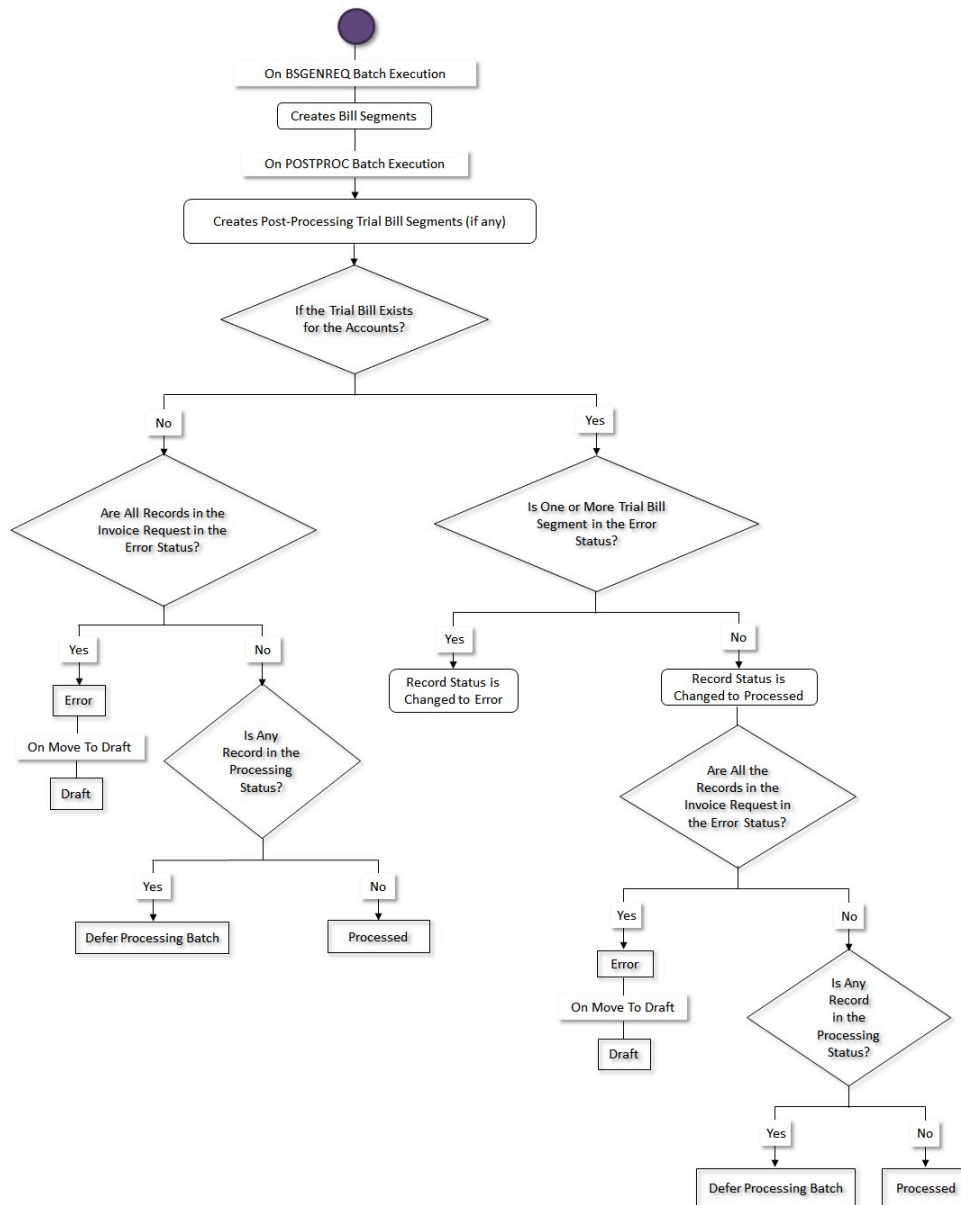

The following figure graphically indicates how an invoice request in the manual trial bill generation process moves from one status to another when the approval process is not configured in the invoice request type:

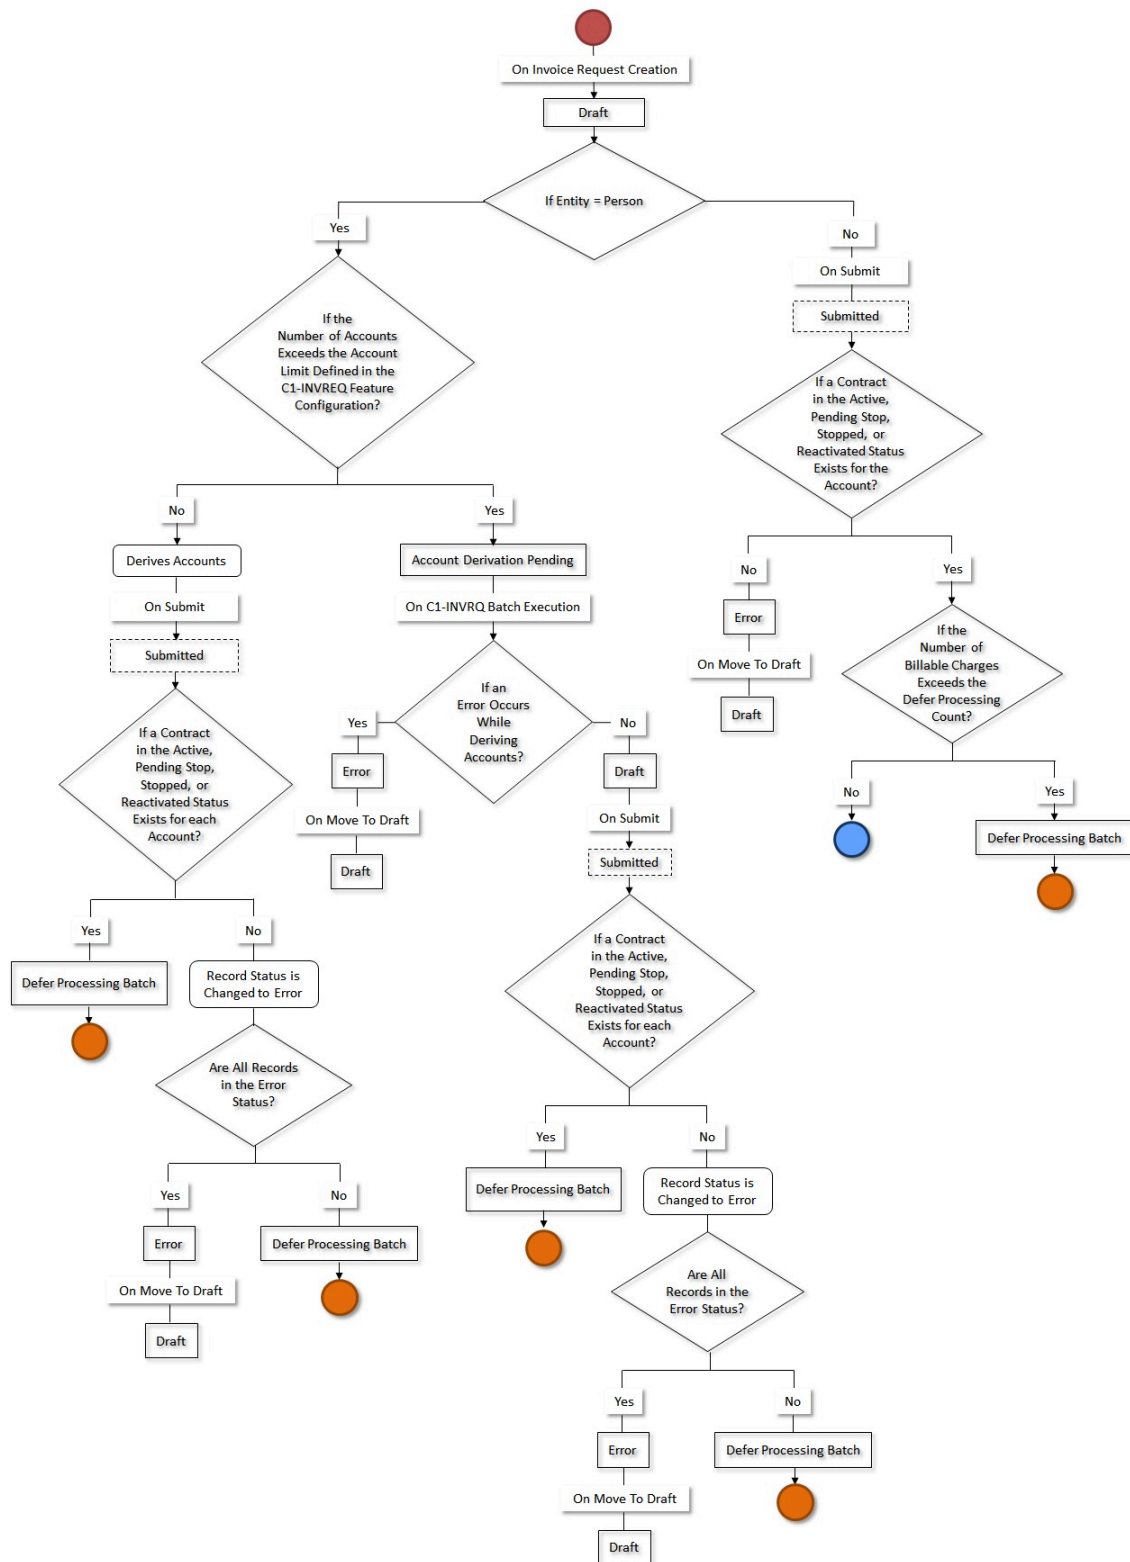

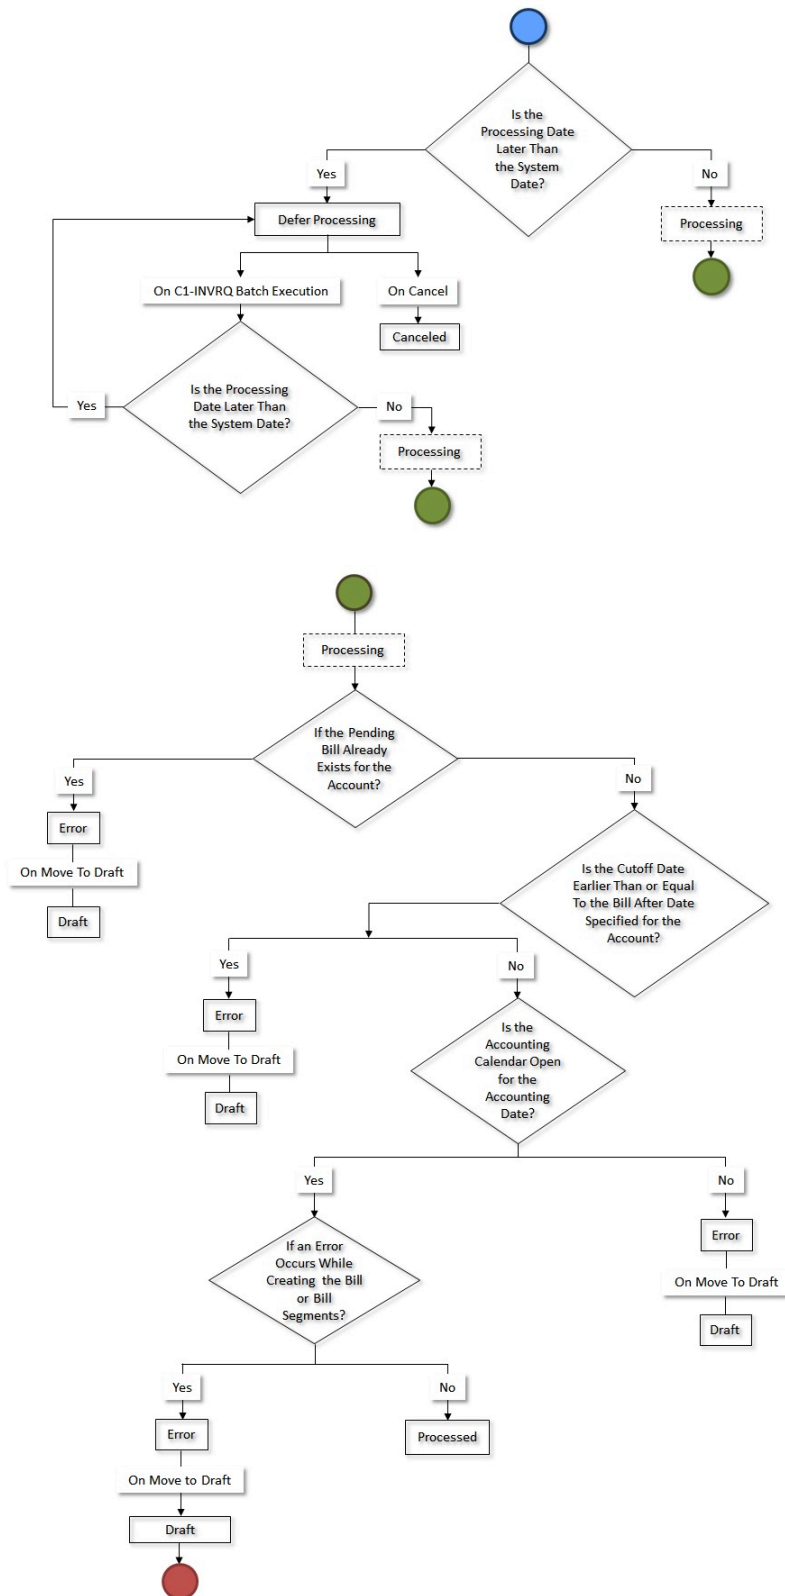

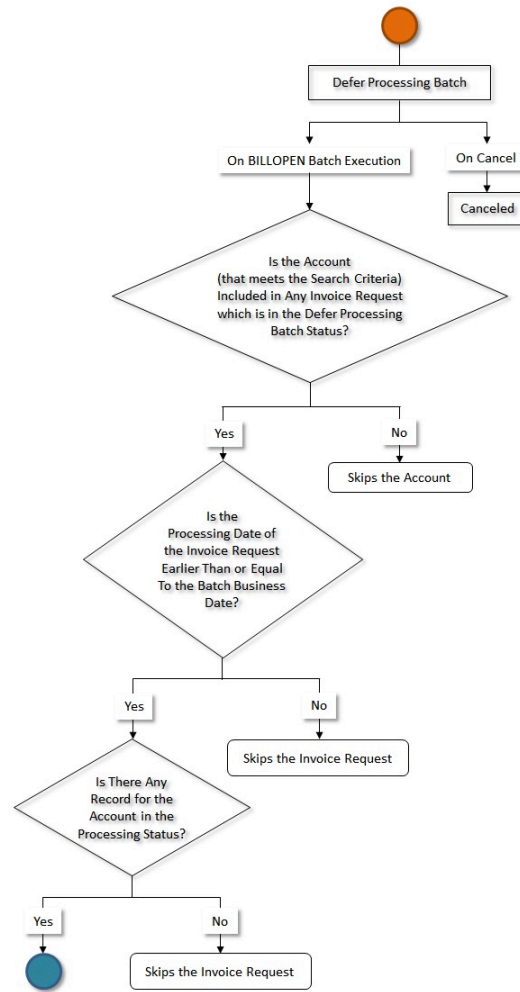

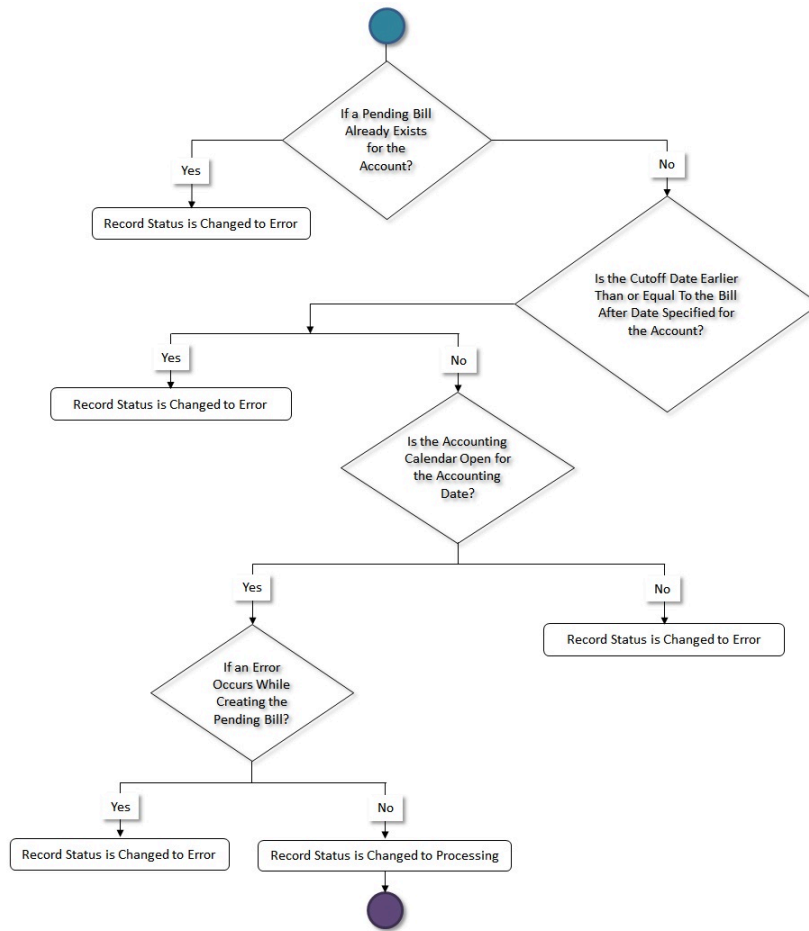

## Invoice Request Manual Regular Bill Generation (Without Approval) Status Transition

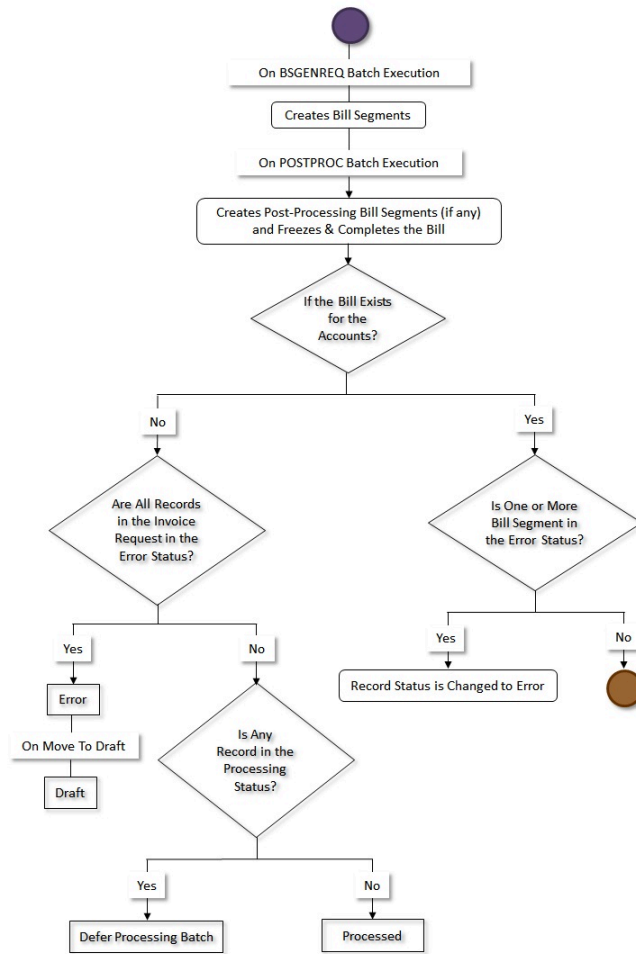

The following figure graphically indicates how an invoice request in the manual regular bill generation process moves from one status to another when the approval process is not configured in the invoice request type:

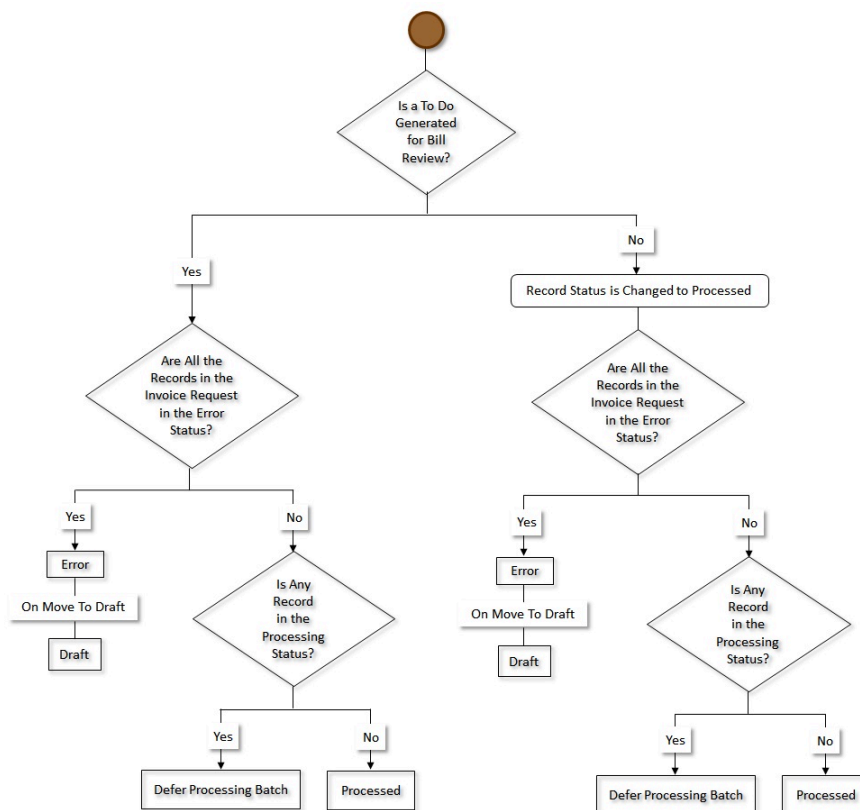

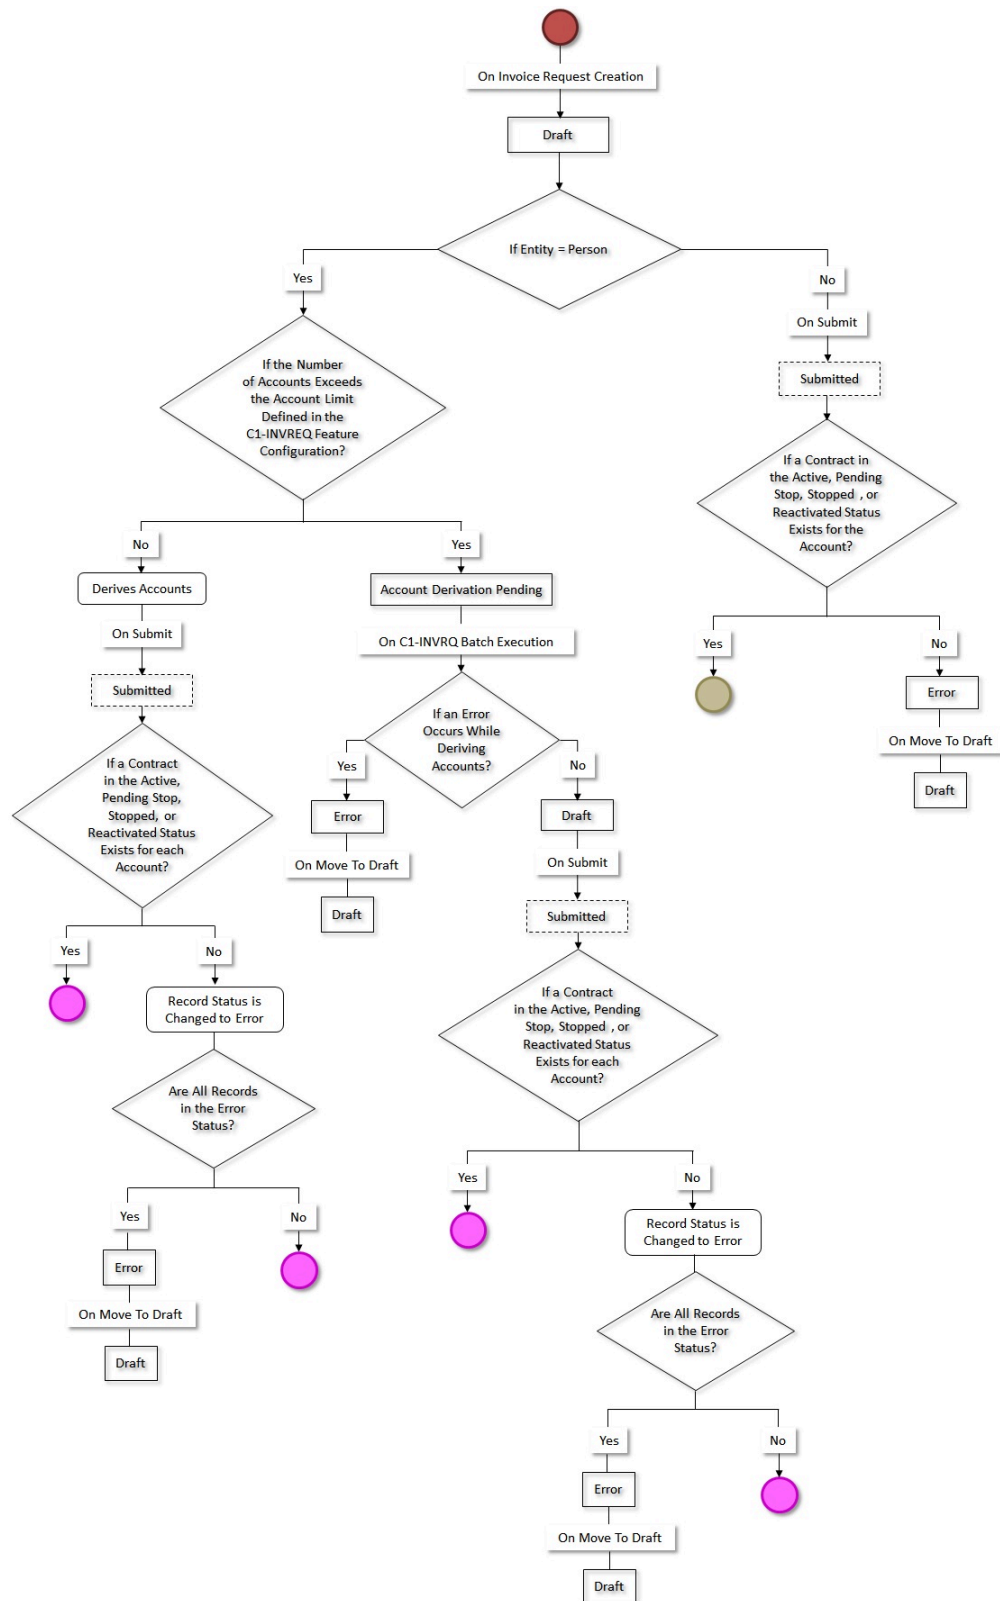

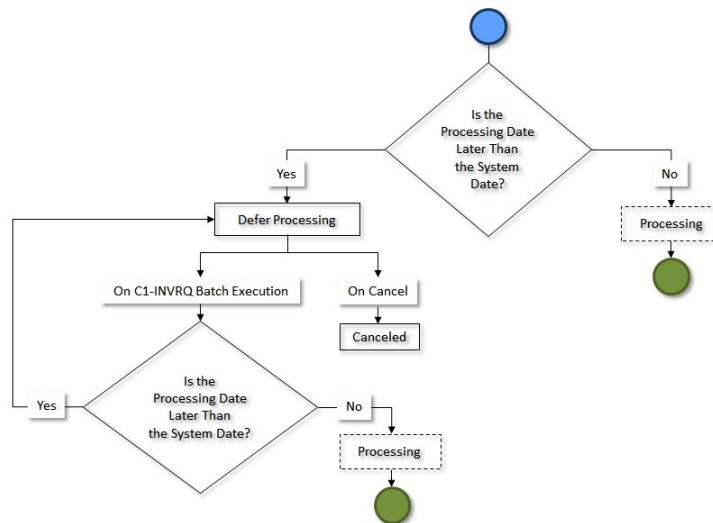

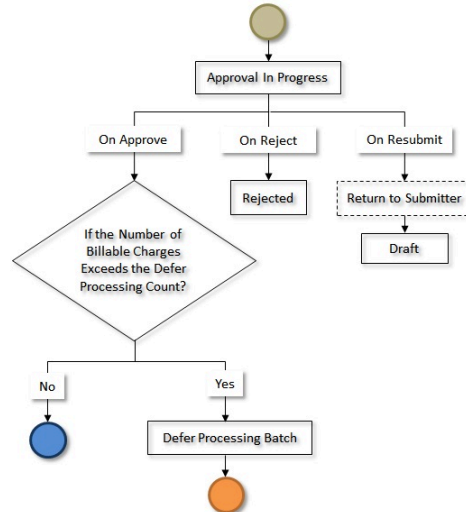

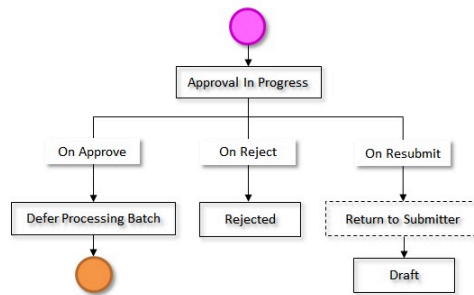

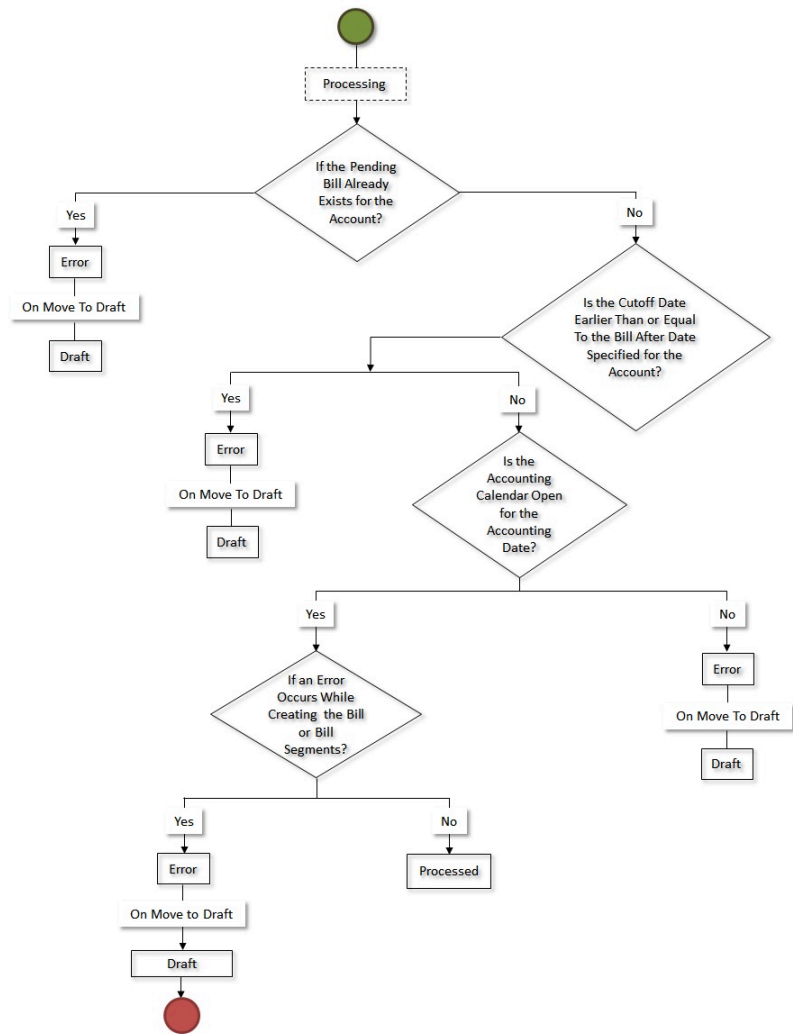

## Invoice Request Manual Regular Bill Generation (With Approval) Status Transition

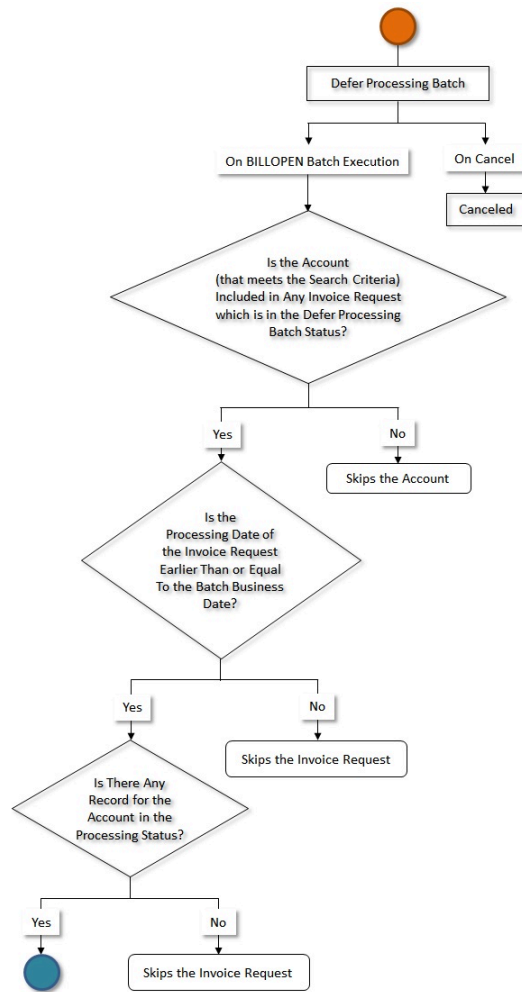

The following figure graphically indicates how an invoice request created through the manual regular bill generation process moves from one status to another when the approval process is configured in the invoice request type:

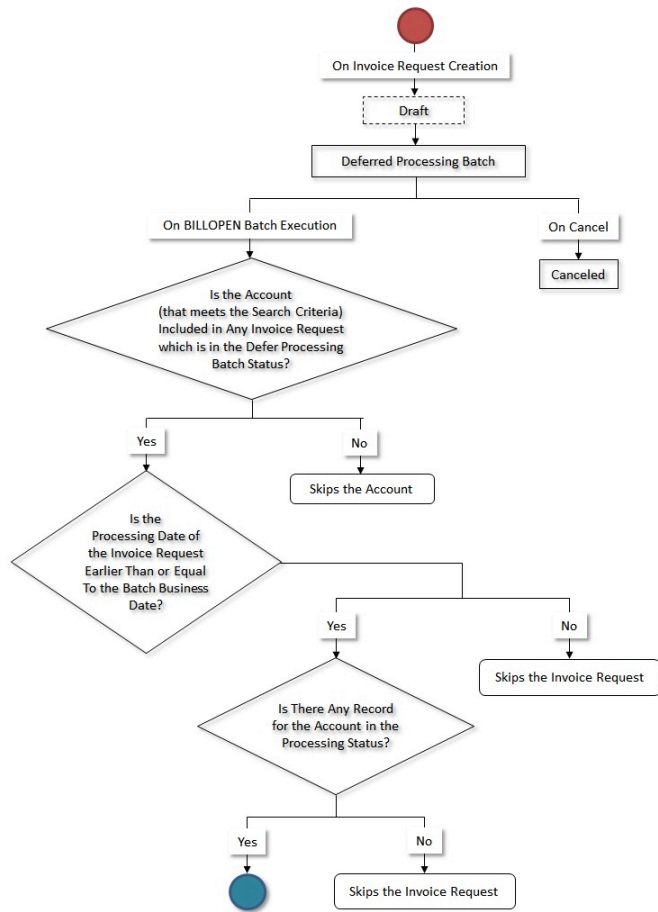

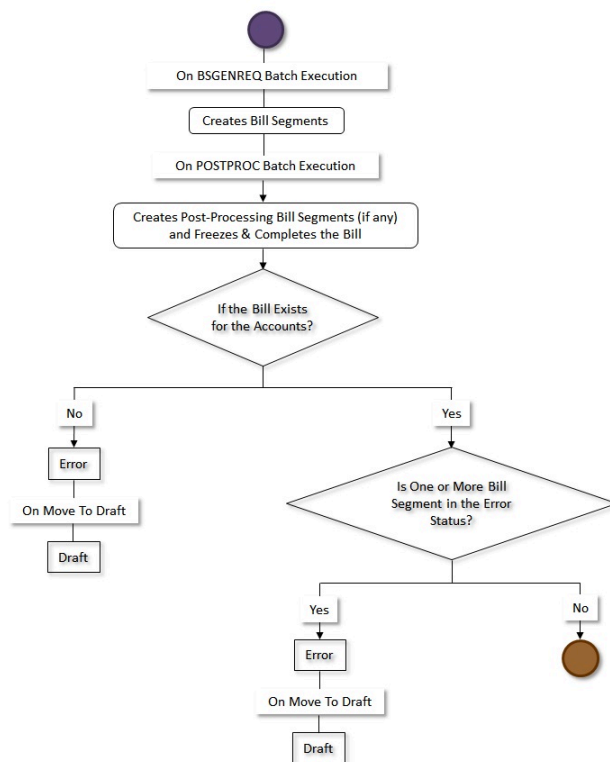

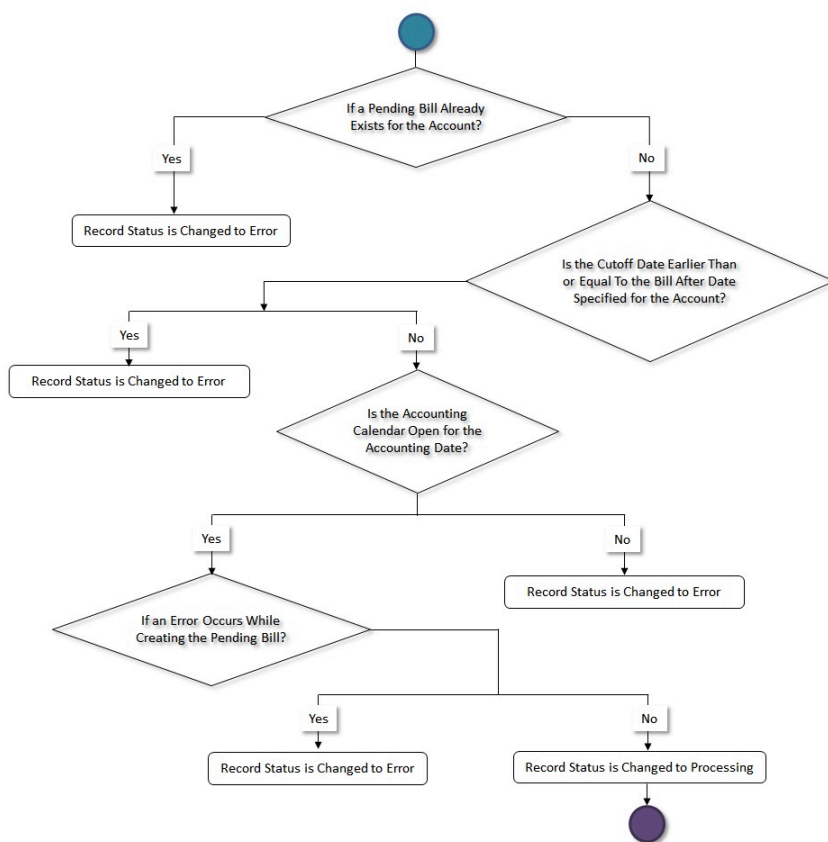

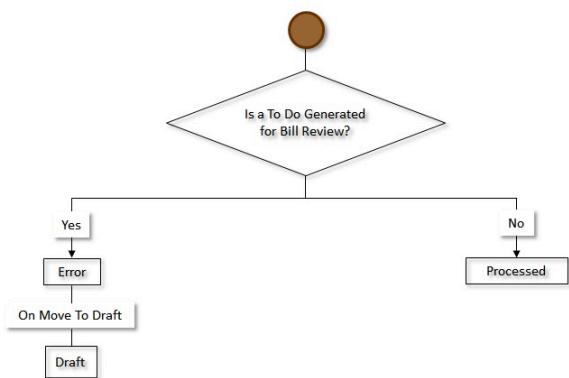

## Invoice Request Automatic Regular Bill Generation (Without Approval) Status Transition

The following figure graphically indicates how an invoice request created through the automatic regular bill generation process moves from one status to another when the approval process is not configured in the invoice request type:

# Invoice Request Type

Oracle Revenue Management and Billing enables you to define an invoice request type using which you can create an invoice request. The invoice request type helps the system to determine:

- The business object using which the invoice request should be created in the system
- Whether a manual or automatic invoice request should be created in the system
- Whether a regular or trial bill generation invoice request should be created in the system
- Whether a manual regular bill generation invoice request for an account should be processed in the online or deferred mode
- Whether the approval is required for the invoice request
- The wait days which is used to calculate the processing date for an invoice request
- The date calculation algorithm which is used to calculate the processing date for an automatic regular bill generation invoice request

**Note:** The automatic invoice request is only designed to work for the fully-insured group and individual health insurance businesses and not for the financial services or self-funded health insurance businesses.

The **Invoice Request Type** screen allows you to define, edit, copy, and delete an invoice request type. It contains the following zones:

- [Invoice Request Type List](#) on page 2285
- [Invoice Request Type](#) on page 2286

## Invoice Request Type List

The **Invoice Request Type List** zone lists the invoice request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Invoice Request Type	Displays the invoice request type.
Description	Displays the description of the invoice request type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Invoice Request Type</b> screen appears where you can edit the details of the invoice request type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Invoice Request Type</b> screen appears where you can define a new invoice request type using an existing invoice request type.

Column Name	Column Description
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the invoice request type.
	<b>Note:</b> You can delete an invoice request type when an invoice request is not created using the invoice request type.

On clicking the **Broadcast** (📡) icon corresponding to an invoice request type, the **Invoice Request Type** zone appears with the details of the respective invoice request type.

## Invoice Request Type

The **Invoice Request Type** zone displays the details of the invoice request type. It contains the following sections:

- **Main** - Displays basic information about the invoice request type. It contains the following fields:

Field Name	Field Description
Invoice Request Type	Displays the invoice request type.
Description	Displays the description of the invoice request type.
Invoice Request Business Object	Indicates the business object using which an invoice request should be created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the invoice request type.
Status	Indicates the status of the invoice request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Invoice Mode	Indicates the mode of the invoice request type. The valid values are: <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul>
Bill Generation Type	Indicates the bill generation type, using which an invoice request should be created. The valid values are:

Field Name	Field Description
	<ul style="list-style-type: none"> <li>Regular</li> <li>Trial</li> </ul>
	<b>Note:</b> If <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list, this field is disabled, and by default, is set to <b>Regular</b> .
Defer Processing Billable Charge Count	<p>Displays the count which helps to determine whether an invoice request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately). If the number of billable charges created for the bills which are selected in the invoice request exceeds the defer processing billable charge count, the system processes the invoice request in the deferred mode. However, if the number of billable charges created for the bills which are selected in the invoice request does not exceed the defer processing billable charge count, the system processes the invoice request in real time (i.e. immediately).</p> <p><b>Note:</b></p> <p>You cannot specify a negative value in this field.</p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>This field appears when the <b>Manual</b> option is selected from the <b>Invoice Mode</b> list, and <b>Regular</b> option is selected from the <b>Bill Generation Type</b> list.</p> <p>If you set the defer processing billable charge count to zero (0), the system resets the default value to 500.</p>
Date Calculation Algorithm	Indicates the algorithm using which the date should be calculated while adding a bill in an invoice request.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</p> <p>This field appears when the <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list.</p>
Invoice Request Approval Required	Indicates whether approval is required while invoicing bills through an invoice request.
	<b>Note:</b> This field appears when the <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list.
Approval To Do Type	Indicates that the To Do entry of the specified To Do type must be created when an invoice request is submitted for approval.

Field Name	Field Description
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do Type.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>
Approval To Do Role	<p>Indicates that users with the specified To Do role can only approve an invoice request which is submitted for approval.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do Role.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	<p>Indicates the submitter To Do type. At present, the submitter To Do type is not used to create To Do entry when the approver rejects an invoice request. It is only used to fetch the roles associated with the submitter To Do type while defining or editing the invoice request type.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>
Submitter To Do Role	<p>Indicates that users with the specified To Do role cannot approve an invoice request which is submitted for approval.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>
Freeze and Complete	<p>Indicates whether the invoice request raised through an automatic or manual invoice mode should be freeze and complete.</p> <p><b>Note:</b></p> <p>This field is not mandatory if the <b>Invoice Mode - Manual</b> option is selected.</p> <p>By default, this field is selected and disabled when the <b>Invoice Mode - Automatic</b> option is selected.</p> <p>The field should not be checked when the <b>Bill Generation Type - Trial</b> option is selected.</p> <p>Once it is defined and saved, it cannot be changed as it is linked to request(s) which are under processing.</p> <p>For the <b>Batch</b> mode, this field value will be passed to the batch parameter <b>Freeze and Complete</b>.</p>
Wait Days	<p>Displays the maximum wait period (in days) after which the bills in an invoice request are processed.</p> <p><b>Note:</b> You cannot specify a negative value in the <b>Wait Days</b> field.</p>

- **Characteristics** - Lists the characteristics defined for the invoice request type. It contains the following columns:

Field Name	Field Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the invoice request type.
Delete	Used to delete the invoice request type. <b>Note:</b> You can delete an invoice request type when an invoice request is not created using the invoice request type.
Duplicate	Used to create a new invoice request type using an existing invoice request type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the invoice request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Invoice Request Type** zone does not appear in the **Invoice Request Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to an invoice request type in the **Invoice Request Type List** zone.

## Defining an Invoice Request Type

### Prerequisites

To define an invoice request type, you should have:

- Invoice request type business objects defined in the application.
- Invoice request business objects defined in the application.
- Date calculation algorithm defined using the **C1-INVREDTCA** algorithm type.
- Required To Do role assigned to the **C1-INVRA** and **C1-INVRS** To Do types in the application

### Procedure

To define an invoice request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **I** and then click **Invoice Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Invoice Request Type** sub-menu.

The **Invoice Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the invoice request type.
- **Characteristics** - Used to define the characteristics for the invoice request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Used to specify the invoice request type.	Yes
Business Object	Indicates the business object using which you are defining the invoice request type.	Not applicable
Description	Used to specify the description for the invoice request type.	Yes
Invoice Request Business Object	Used to indicate the business object using which you want to create an invoice request. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Request - Regular Bill Generation</li> <li>• Invoice Request - Trial Bill Generation</li> </ul>	Yes
Detailed Description	Used to specify additional information about the invoice request type.	No
Status	Used to indicate the status of the invoice request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Invoice Mode	Used to indicate the mode of the invoice request type. The valid values are: <ul style="list-style-type: none"> <li>• Manual</li> <li>• Automatic</li> </ul>	Yes
	<b>Note:</b> The automatic mode is not supported while creating an invoice request type for the financial services domain.	
Bill Generation Type	Used to indicate the bill generation type, using which an invoice request should be created. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Trial</li> </ul>	Yes
	<b>Note:</b> If <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list, this field is disabled, and by default, is set to <b>Regular</b> .	
Defer Processing Billable Charge Count	Used to specify the count which helps to determine whether an invoice request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately). If the number of billable charges created	No

Field Name	Field Description	Mandatory (Yes or No)
	<p>for the bills which are selected in the invoice request exceeds the defer processing billable charge count, the system processes the invoice request in the deferred mode. However, if the number of billable charges created for the bills which are selected in the invoice request does not exceed the defer processing billable charge count, the system processes the invoice request in real time (i.e. immediately).</p> <p><b>Note:</b></p> <p>You cannot specify a negative value in this field.</p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>This field appears when the <b>Manual</b> option is selected from the <b>Invoice Mode</b> list, and <b>Regular</b> option is selected from the <b>Bill Generation Type</b> list.</p> <p>If you set the defer processing billable charge count to zero (0), the system resets the default value to 500.</p>	
Date Calculation Algorithm	Used to indicate the algorithm using which the date should be calculated while adding a bill in an invoice request.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Date Calculation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the date calculation algorithm, the description of the date calculation algorithm appears corresponding to the <b>Date Calculation Algorithm</b> field.</p> <p>You can specify the date calculation algorithm when the <b>Invoice Mode</b> is selected as <b>Automatic</b>.</p>	<p><b>Note:</b></p> <p>This field is required when <b>Invoice mode</b> is <b>Automatic</b>.</p>
Invoice Request Approval Required	Used to indicate whether approval is required while invoicing bills through an invoice request.	No
	<p><b>Note:</b> This field appears when the <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list.</p>	
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when an invoice request is submitted for approval.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (Q) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>The <b>C1-INVRA</b> To Do type is shipped with the product. You can use the <b>C1-INVRA</b> To Do type or a custom To Do type, if required.</p>	<p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve an invoice request which is submitted for approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the approval To Do type.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>	<p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	Used to indicate the submitter To Do type. At present, the submitter To Do type is not used to create To Do entry when the approver rejects an offset request. It is only used to fetch the roles associated with the submitter To Do type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (Q) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> <p>The <b>C1-INVRS</b> To Do type is shipped with the product. You can use the <b>C1-INVRS</b> To Do type or a custom To Do type, if required.</p>	<p><b>Note:</b></p> <p>This field is required when the <b>Approval Required</b> option is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	Used to indicate that users with the specified To Do role cannot approve an invoice request which is submitted for approval.	Yes (Conditional)
	<b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.  Once it is defined and saved, it cannot be changed as it is linked to request(s) which are under processing.
Wait Days	Used to indicate the threshold days before which no other invoice request for any bill generation process will be initiated.	No
	<b>Note:</b> By default, the value displayed for wait days is <b>0</b> .	

- Enter the required details in the **Main** section.
- Define characteristics for the invoice request type, if required.
- Click **Save**.  
The invoice request type is defined.

## Defining a Characteristic for an Invoice Request Type

### Prerequisites

To define a characteristic for an invoice request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Invoice Request Type**)

### Procedure

To define a characteristic for an invoice request type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an invoice request type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Invoice Request Type</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the invoice request type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the invoice request type.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the invoice request type, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the invoice request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Editing an Invoice Request Type

### Prerequisites

To edit an invoice request type, you should have:

- Invoice request type business objects defined in the application.
- Invoice request business objects defined in the application.
- Date calculation algorithm defined using the **C1-INVREDTCA** algorithm type.
- Required To Do role assigned to the **C1-INVRA** and **C1-INVRS** To Do types in the application

### Procedure

To edit an invoice request type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **I** and then click **Invoice Request Type**.  
A sub-menu appears.
- Click the **Search** option from the **Invoice Request Type** sub-menu.  
The **Invoice Request Type** screen appears.

4. In the **Invoice Request Type List** zone, click the **Edit**  icon in the **Edit** column corresponding to the invoice request type whose details you want to edit.

The **Invoice Request Type** screen appears. It contains the following section:

- **Main** - Used to specify basic details about the invoice request type.
- **Characteristics** - Used to define the characteristics for the offset request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Displays the invoice request type.	Not applicable
Business Object	Indicates the business object using which you are defining the invoice request type.	Not applicable
Description	Used to specify the description for the invoice request type.	Yes
Invoice Request Business Object	Used to indicate the business object using which you want to create an invoice request. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Request - Regular Bill Generation</li> <li>• Invoice Request - Trial Bill Generation</li> </ul>	Yes
Detailed Description	Used to specify additional information about the invoice request type.	No
Status	Used to indicate the status of the invoice request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Invoice Mode	Used to indicate the mode of the invoice request type. The valid values are: <ul style="list-style-type: none"> <li>• Manual</li> <li>• Automatic</li> </ul>	Yes
	<b>Note:</b> The automatic mode is not supported while creating an invoice request type for the financial services domain.	
Bill Generation Type	Used to indicate the bill generation type, using which an invoice request should be created. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Trial</li> </ul>	Yes
	<b>Note:</b> If <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list, this field is disabled, and by default, is set to <b>Regular</b> .	
Defer Processing Billable Charge Count	Used to specify the count which helps to determine whether an invoice request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately). If the number of billable charges created for the bills which are selected in the invoice request exceeds the defer processing billable charge count, the system processes the invoice request in the deferred mode. However, if the number of	No

Field Name	Field Description	Mandatory (Yes or No)
	<p>billable charges created for the bills which are selected in the invoice request does not exceed the defer processing billable charge count, the system processes the invoice request in real time (i.e. immediately).</p> <p><b>Note:</b></p> <p>You cannot specify a negative value in this field.</p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>This field appears when the <b>Manual</b> option is selected from the <b>Invoice Mode</b> list, and <b>Regular</b> option is selected from the <b>Bill Generation Type</b> list.</p> <p>If you set the defer processing billable charge count to zero (0), the system resets the default value to 500.</p>	
Date Calculation Algorithm	Used to indicate the algorithm using which the date should be calculated while adding a bill in an invoice request.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Date Calculation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the date calculation algorithm, the description of the date calculation algorithm appears corresponding to the <b>Date Calculation Algorithm</b> field.</p> <p>You can specify the date calculation algorithm when the <b>Invoice Mode</b> is selected as <b>Automatic</b>.</p>	<p><b>Note:</b></p> <p>This field is required when <b>Invoice mode</b> is <b>Automatic</b>.</p>
Invoice Request Approval Required	Used to indicate whether approval is required while invoicing bills through an invoice request.	No
	<b>Note:</b> This field appears when the <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list.	
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when an invoice request is submitted for approval.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>The <b>C1-INVRA</b> To Do type is shipped with the product. You can use the <b>C1-INVRA</b> To Do type or a custom To Do type, if required.</p>	<p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve an invoice request which is submitted for approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the approval To Do type.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>	<p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	At present, the submitter To Do type is not used to create To Do entry when the approver rejects an offset request. It is only used to fetch the roles associated with the submitter To Do type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> <p>The <b>C1-INVRS</b> To Do type is shipped with the product. You can use the <b>C1-INVRS</b> To Do type or a custom To Do type, if required.</p>	<p><b>Note:</b></p> <p>This field is required when the <b>Approval Required</b> option is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	Used to indicate that users with the specified To Do role cannot approve an invoice request which is submitted for approval.	Yes (Conditional)
	<b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.  Once it is defined and saved, it cannot be changed as it is linked to request(s) which are under processing.
Wait Days	Used to specify the maximum wait period (in days) after which the bills in an invoice request are processed.	No
	<b>Note:</b> You cannot specify a negative value in the <b>Wait Days</b> field.	

**Tip:** Alternatively, you can access this screen by clicking the **Edit** button in the **Invoice Request Type** zone.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the invoice request type, if required.
7. Click **Save**.  
The changes made to the invoice request type are saved.

## Deleting an Invoice Request Type

### Procedure

To delete an invoice request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **I** and then click **Invoice Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Invoice Request Type** sub-menu.  
The **Invoice Request Type** screen appears.

- In the **Invoice Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the invoice request type that you want to delete.

A message appears confirming whether you want to delete the invoice request type.

**Note:** You can delete an invoice request type when an invoice request is not created using the invoice request type.

**Tip:** Alternatively, you can delete an invoice request type by clicking the **Delete** button in the **Invoice Request Type** zone.

- Click **OK**.  
The invoice request type is deleted.

## Copying an Invoice Request Type

Instead of creating an invoice request type from scratch, you can create a new invoice request type using an existing invoice request type. This is possible through copying an invoice request type. On copying an invoice request type, the details including the characteristics are copied to the new invoice request type. You can then edit the details, if required.

#### Prerequisites

To copy an invoice request type, you should have:

- Invoice request type (whose copy you want to create) defined in the application.
- Invoice request business objects defined in the application.
- Date calculation algorithm defined using the **C1-INVREDTCA** algorithm type.
- Required To Do role assigned to the **C1-INVRA** and **C1-INVRS** To Do types in the application

#### Procedure

To copy an invoice request type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **I** and then click **Invoice Request Type**.  
A sub-menu appears.
- Click the **Search** option from the **Invoice Request Type** sub-menu.  
The **Invoice Request Type** screen appears.
- In the **Request Type List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the invoice request type whose copy you want to create.

The **Invoice Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the invoice request type. It contains the following fields:
- **Characteristics** - Used to define the characteristics for the invoice request type.

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Used to specify the invoice request type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Indicates the business object using which you are defining the invoice request type.	Not applicable
Description	Used to specify the description for the invoice request type.	Yes
Invoice Request Business Object	Used to indicate the business object using which you want to create an invoice request. The valid values are: <ul style="list-style-type: none"> <li>Invoice Request - Regular Bill Generation</li> <li>Invoice Request - Trial Bill Generation</li> </ul>	Yes
Detailed Description	Used to specify additional information about the invoice request type.	No
Status	Used to indicate the status of the invoice request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Invoice Mode	Used to indicate the mode of the invoice request type. The valid values are: <ul style="list-style-type: none"> <li>Manual</li> <li>Automatic</li> </ul>	Yes
	<b>Note:</b> The automatic mode is not supported while creating an invoice request type for the financial services domain.	
Bill Generation Type	Used to indicate the bill generation type, using which an invoice request should be created. The valid values are: <ul style="list-style-type: none"> <li>Regular</li> <li>Trial</li> </ul>	Yes
	<b>Note:</b> If <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list, this field is disabled, and by default, is set to <b>Regular</b> .	
Defer Processing Billable Charge Count	Used to specify the count which helps to determine whether an invoice request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately). If the number of billable charges created for the bills which are selected in the invoice request exceeds the defer processing billable charge count, the system processes the invoice request in the deferred mode. However, if the number of billable charges created for the bills which are selected in the invoice request does not exceed the defer processing billable charge count, the system processes the invoice request in real time (i.e. immediately).	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>You cannot specify a negative value in this field.</p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>This field appears when the <b>Manual</b> option is selected from the <b>Invoice Mode</b> list, and <b>Regular</b> option is selected from the <b>Bill Generation Type</b> list.</p> <p>If you set the defer processing billable charge count to zero (0), the system resets the default value to 500.</p>	
Date Calculation Algorithm	Used to indicate the algorithm using which the date should be calculated while adding a bill in an invoice request.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Date Calculation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the date calculation algorithm, the description of the date calculation algorithm appears corresponding to the <b>Date Calculation Algorithm</b> field.</p> <p>You can specify the date calculation algorithm when the <b>Invoice Mode</b> is selected as <b>Automatic</b>.</p>	<p><b>Note:</b></p> <p>This field is required when <b>Invoice mode</b> is <b>Automatic</b>.</p>
Invoice Request Approval Required	Used to indicate whether approval is required while invoicing bills through an invoice request.	No
	<b>Note:</b> This field appears when the <b>Automatic</b> option is selected from the <b>Invoice Mode</b> list.	
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when an invoice request is submitted for approval.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> <p>The <b>C1-INVRA</b> To Do type is shipped with the product. You can use the <b>C1-INVRA</b> To Do type or a custom To Do type, if required.</p>	<p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve an invoice request which is submitted for approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the approval To Do type.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p>	<p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	Used to indicate the submitter To Do type. At present, the submitter To Do type is not used to create To Do entry when the approver rejects an offset request. It is only used to fetch the roles associated with the submitter To Do type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> <p>The <b>C1-INVRS</b> To Do type is shipped with the product. You can use the <b>C1-INVRS</b> To Do type or a custom To Do type, if required.</p>	<p><b>Note:</b></p> <p>This field is required when the <b>Approval Required</b> option is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	Used to indicate that users with the specified To Do role cannot approve an invoice request which is submitted for approval.	Yes (Conditional)
	<b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.	<b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.  Once it is defined and saved, it cannot be changed as it is linked to request(s) which are under processing.
Wait Days	Used to indicate the threshold days before which no other invoice request for any bill generation process will be initiated.	No
	<b>Note:</b> By default, the value displayed for wait days is 0.	

**Tip:** Alternatively, you can copy an invoice request type by clicking the **Duplicate** button in the **Invoice Request Type** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove characteristics of the invoice request type, if required.
- Click **Save**.  
The new invoice request type is defined.

## Invoice Request (Used for Searching)

The **Invoice Request** screen allows you to search for an invoice request using various search criteria. It also allows you to define an invoice request. It contains the following zone:

- [Search Invoice Request](#) on page 2304

Through this screen, you can navigate to the following screen:

- [Invoice Request \(Used for Viewing\)](#) on page 2310

## Search Invoice Request

The **Search Invoice Request** zone allows you to search for an invoice request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an invoice request using the invoice request or bill details. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Requests for Accounts</li> <li>• Invoice Requests for Persons</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Invoice Requests for Accounts</b> option is selected.	
Invoice Request ID	Used to search a particular invoice request.	No
Created From	Used to search invoice requests which are created from a particular date onwards.	No
Created To	Used to search invoice requests which are created till a particular date.	No
Cutoff From	Used to indicate the date from when the billable charges are considered for processing the invoice request.	No
Cutoff To	Used to indicate the date till when the billable charges are considered for processing the invoice request.	No

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Used to search invoice requests which are created using a particular invoice request type.	No
Status	Used to search invoice requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>Account Derivation Pending</li> <li>Approved</li> <li>Approval In Progress</li> <li>Canceled</li> <li>Deferred Processing</li> <li>Deferred Processing Batch</li> <li>Draft</li> <li>Error</li> <li>Processed</li> <li>Rejected</li> </ul>	No
Person ID	Used to search invoice requests which include bills of a particular person.	No
	<b>Note:</b> The <b>Search</b>  icon appears corresponding to <b>Person ID</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	
Account ID	Used to search invoice requests which include bills of a particular account.	No
	<b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	
Bill Generation Type	Used to indicate the bill generation type. The valid values are: <ul style="list-style-type: none"> <li>Regular</li> <li>Trial</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Invoice Requests for Accounts</b> option is selected from the <b>Search By</b> list.	
External Reference Type	Used to indicate the external reference type. The valid value is: <ul style="list-style-type: none"> <li>Policy</li> </ul>	No
	<b>Note:</b> This is a read-only field.  This field is populated when the invoice request is created with the invoice mode option as <b>Automatic</b> .	
External Reference ID	Used to specify the external reference ID of the invoice request.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>External Reference ID</b> field. On clicking the <b>Search</b> icon, the <b>Policy Search</b> window appears.	

**Note:** You must specify at least one search criterion while searching for an invoice request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the invoice request is created.
Invoice Request Information	Displays information about the invoice request.
	<b>Note:</b> It has a link. On clicking the link, the <b>Invoice Request</b> screen appears where you can view the details of the respective invoice request.
Created By	Indicates the user who has created the invoice request.
Cutoff Date	Displays the date till when all the billable charges are considered for processing the invoice request.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.  This column appears when the <b>Invoice Requests for Accounts</b> option is selected from the <b>Search By</b> list.
Person Information	Displays additional information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears with the details of the respective person.  This column appears when the <b>Invoice Requests for Persons</b> option is selected from the <b>Search By</b> list.
Status	Indicates the status of the invoice request. The valid values are: <ul style="list-style-type: none"> <li>• Account Derivation Pending</li> <li>• Approved</li> <li>• Approval In Progress</li> <li>• Canceled</li> <li>• Deferred Processing</li> <li>• Deferred Processing - Batch</li> </ul>

Column Name	Column Description						
	<ul style="list-style-type: none"><li>• Draft</li><li>• Error</li><li>• Processed</li><li>• Rejected</li></ul>						
Bill Information	Displays information about the bill.						
	<b>Note:</b>						
	<table><tr><th>If you select ...</th><th>Then...</th></tr><tr><td><b>Invoice Requests for Account</b> option from the <b>Search By</b> list and<b>Regular</b> option from the <b>Bill Generation Type</b> list.</td><td>This column has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill. In addition this column has a context menu which helps in navigating to other screens in the application.</td></tr><tr><td><b>Invoice Requests for Account</b> option from the <b>Search By</b> list and<b>Trial</b> option from the <b>Bill Generation Type</b> list.</td><td>This column has a link. On clicking the link, the <b>Trial Bill</b> screen appears where you can view the details of the respective trial bill.</td></tr></table>	If you select ...	Then...	<b>Invoice Requests for Account</b> option from the <b>Search By</b> list and <b>Regular</b> option from the <b>Bill Generation Type</b> list.	This column has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill. In addition this column has a context menu which helps in navigating to other screens in the application.	<b>Invoice Requests for Account</b> option from the <b>Search By</b> list and <b>Trial</b> option from the <b>Bill Generation Type</b> list.	This column has a link. On clicking the link, the <b>Trial Bill</b> screen appears where you can view the details of the respective trial bill.
	If you select ...	Then...					
	<b>Invoice Requests for Account</b> option from the <b>Search By</b> list and <b>Regular</b> option from the <b>Bill Generation Type</b> list.	This column has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill. In addition this column has a context menu which helps in navigating to other screens in the application.					
	<b>Invoice Requests for Account</b> option from the <b>Search By</b> list and <b>Trial</b> option from the <b>Bill Generation Type</b> list.	This column has a link. On clicking the link, the <b>Trial Bill</b> screen appears where you can view the details of the respective trial bill.					
By default, this column has a content menu which helps in navigating to other screens in the application.							
This column appears when the <b>Invoice Requests for Accounts</b> option is selected from the <b>Search By</b> list.							
Error Message	Displays the error message indicating the error that occurred while processing the bills in the invoice request.						
	<b>Note:</b> This column appears when the <b>Invoice Requests for Accounts</b> option is selected from the <b>Search By</b> list.						
Bill Generation Type	Indicates the bill generation type. The valid values are: <ul style="list-style-type: none"><li>• Regular</li><li>• Trial</li></ul>						
	<b>Note:</b> This column appears when the <b>Invoice Requests for Accounts</b> option is selected from the <b>Search By</b> list.						

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

How to search for an invoice request	<a href="#">Searching for an Invoice Request</a> on page 2308

## Searching for an Invoice Request

---

### Prerequisites

To search for an invoice request, you should have:

- Invoice request types defined in the application

### Procedure

To search for an invoice request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Billing Management** and then click **Invoice Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Invoice Request** sub-menu.  
The **Invoice Request** screen appears.
4. Enter the search criteria in the **Search Invoice Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of invoice requests that meet the search criteria appears in the **Search Results** section.

### Related Topics

## Manually Creating an Invoice Request

---

### Prerequisites

To create an invoice request, you should have:

- Invoice request types defined in the application
- Bills created in the application
- Account and Person entity defined in the application

### Procedure

To create an invoice request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Billing Management** and then click **Invoice Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Invoice Request** sub-menu.  
The **Add Invoice Request** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Used to indicate the invoice request type using which you want to create the invoice request.	Yes

**Tip:** Alternatively, you can access this window by clicking the **Add** button in the **Page Title** area of the **Invoice Request** screen.

4. Select the required invoice request type from the **Invoice Request Type** list.
5. Click **OK**.

The **Invoice Request** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the invoice request.
- **Characteristics** - Used to define the characteristics for the invoice request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Indicates the invoice request type using which the invoice request is created.	Not applicable
Entity	Used to indicate the entity using which you want to create an invoice request. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> </ul>	Not applicable
	<b>Note:</b> By default, the <b>Account</b> option is selected.	
Account ID	Used to indicate the account for which you want to create an invoice request.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	
Person ID	Used to indicate the person for whom the invoice request is generated.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to <b>Person ID</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	
Cutoff Date	Used to specify the date till when the billable charges are considered for processing the invoice request.	No
	<b>Note:</b> By default, the current date appears in this field.	
Accounting Date	Used to specify the accounting date of the bill.	No
	<b>Note:</b> By default, the current date appears in this field.	
Bill Date	Used to specify the processing date on which the bill is completed.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The bill date cannot be on or earlier than the last bill date of the account. By default, the current date appears in this field.	
Comments	Used to specify additional information about the invoice request.	No

- Enter the required details in the **Main** section.
- Define characteristics for the invoice request, if required.
- Click **Save**  
The invoice request is created in the **Draft** status, and the status of all the records (in the invoice request) is set to **Pending**.

## Invoice Request (Used for Viewing)

The **Invoice Request** screen allows you to:

- View the details of the invoice request
- Edit the details of the invoice request

- Delete the invoice request
- Submit the invoice request for processing
- Approve or reject the invoice request
- Cancel the invoice request
- View the log of the invoice request
- Add a log entry for the invoice request

It consists of the following tabs:

- [Invoice Request - Main](#) on page 2311
- [Invoice Request - Log](#) on page 2315

## Invoice Request - Main

---

The **Main** tab displays information about the invoice request. It contains the following zones:

- [Invoice Request](#) on page 2311
- [Invoice Request Details/Account List](#) on page 2314

## Invoice Request

The **Invoice Request** zone displays the details of the invoice request. It contains the following sections:

- **Main** - Displays basic information about the invoice request. It contains the following fields:

Field Name	Field Description
Invoice Request Information	Displays information about the invoice request.
Invoice Request Type	Indicates the invoice request type using which the invoice request is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Invoice Request Type</b> screen appears where you can view the details of the respective invoice request type.
Entity	Indicates the entity using which an invoice request is created.
Account Information	Indicates the account using which an invoice request is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Cutoff Date	Indicates the date till when the billable charges are considered for processing the invoice request.
	<b>Note:</b> This field is applicable only for <b>Entity Type</b> as <b>Account</b> .
Accounting Date	Indicates the accounting date for which the financial transaction of the bill is created.
Bill Date	Indicates the date when the bill is completed.
	<b>Note:</b> The bill date must not be equal to or earlier than the last bill date of the account for which the invoice request is generated.
Processing Date	Indicates the date when the invoice request is processed.

Field Name	Field Description
	<p><b>Note:</b></p> <p>Processing Date = Invoice Request Creation Date + ' Wait Day + Work Days</p>
Status	<p>Indicates the status of the invoice request. The valid values are:</p> <ul style="list-style-type: none"> <li>• Draft</li> <li>• Account Derivation Pending</li> <li>• Submitted</li> <li>• Approval In Progress</li> <li>• Approved</li> <li>• Deferred Processing</li> <li>• Deferred Processing - Batch</li> <li>• Rejected</li> <li>• Cancelled</li> <li>• Error</li> <li>• Processing</li> <li>• Processed</li> <li>• Return to Submitter</li> </ul>
Status Reason	<p>Indicates the reason why the status of the invoice request is changed.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective status.</p>

- **Characteristics** - Lists the characteristics defined for the invoice request. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the invoice request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the invoice request.
	<b>Note:</b> The <b>Edit</b> button appears when the invoice request is in the <b>Draft</b> status.
Delete	Used to delete the invoice request.
	<b>Note:</b> The <b>Delete</b> button appears when the invoice request is in the <b>Draft</b> status.
Submit	Used to submit the invoice request.
	<b>Note:</b> The <b>Submit</b> button appears when the invoice request is in the <b>Draft</b> status.
Cancel	Used to cancel the invoice request.

Button Name	Button Description
	<b>Note:</b> The <b>Cancel</b> button appears when the invoice request is in the <b>Deferred Processing Batch</b> status.
Approve	Used to approve the invoice request.  <b>Note:</b> The <b>Approve</b> button appears when: <ul style="list-style-type: none"> <li>The invoice request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the invoice request.</li> </ul>
Reject	Used to reject the invoice request.  <b>Note:</b> The <b>Reject</b> button appears when: <ul style="list-style-type: none"> <li>The invoice request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the invoice request.</li> </ul>
Re Submit	Used to request for resubmitting the invoice request.  <b>Note:</b> The <b>Re Submit</b> button appears when: <ul style="list-style-type: none"> <li>The invoice request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the invoice request.</li> </ul>

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the invoice request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the invoice request status is updated.
Create Date/Time	Displays the date and time when the invoice request is created.

- **External Reference** - Lists the external references defined for the invoice request. This section contains the following columns:

**Note:** This section appears when the invoice request is in the **Deferred Processing Batch** or **Canceled** status.

Column Name	Column Description
External Reference Type	Indicates the external reference type of the invoice request.
External Reference Information	Displays additional information about the external reference type.  <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears with the details of the respective policy.

## Invoice Request Details/Account List

The **Invoice Request Details/Account List** zone lists the bills or the accounts which are added to the invoice request. It contains the following columns:

Column Name	Column Description
Account Information	Indicates the account for which the invoice request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Person Information	Indicates the person for which the invoice request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Record Status	Indicates the status of the bills in the invoice request. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• Error</li> <li>• Processing</li> </ul>
Bill Information	Indicates the bill which is added to the invoice request. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.
Error Message	Displays the error message indicating the error that occurred while processing the bills in the invoice request.
Recent Billed Date	Displays the date of the bill that has been recently processed from the invoice request.

A check box appears corresponding to each account. On selecting the check box, and clicking the **Exclude** button, you can exclude the account from the invoice request. You can also select multiple accounts at the same time. In addition, you can select the check box corresponding to the column header. This allows you to exclude all accounts listed in the respective page from the invoice request.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The **Filter** icon appears when the zone is **Account List**.

You can filter the list using various search criteria (such as, **Record Status**, **Account ID**, and **Person ID**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Excluded Accounts

The **Excluded Accounts** zone lists the accounts which are excluded from the invoice request. It appears when **Invoice Requests for Persons** option is selected from the **Search By list** in the **Search Invoice Request** zone. It contains the following columns:

Column Name	Column Description
Account Information	Indicates the account for which the invoice request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Person Information	Indicates the person for which the invoice request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.

A check box appears corresponding to each account. On selecting the check box, and clicking the **Include** button, you can include the account to the invoice request. You can also select multiple accounts at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all accounts listed in the respective page to the invoice request.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The **Filter** icon appears when the zone is **Account List**.

You can filter the list using various search criteria (such as, **Record Status**, **Account ID**, and **Person ID**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Invoice Request - Log

The **Log** tab contains the following zone:

- [Invoice Request Log](#) on page 2315

### Invoice Request Log

The **Invoice Request Log** zone lists the complete trail of actions performed on the invoice request. It contains the following columns:

Column Name	Column Description
Creation Date/Time	Displays the date and time when the action was performed on the invoice request.
Details	Displays the details of the action performed on the invoice request.
User	Indicates the user who has performed the action on the invoice request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the invoice request.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the invoice request was rejected by the approver.
	<b>Note:</b> The data appears in this column when the invoice request is in the <b>Rejected</b> status.

**Note:** You can manually add a log entry for the invoice request by clicking the **Add Log Entry** link in the upper right corner of the **Invoice Request Log** zone.

## **Editing an Invoice Request**

### **Prerequisites**

To edit an invoice request, you should have:

- Invoice request types defined in the application
- Bills created in the application
- Account and Person entity defined in the application

### **Procedure**

To edit an invoice request:

1. Search for the invoice request in the **Invoice Request** screen.
2. In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to the invoice request whose details you want to edit.  
The **Invoice Request** screen appears.
3. Click the **Edit** button in the **Invoice Request** zone.

The **Edit Invoice Request** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the invoice request.
- **Characteristics** - Used to define the characteristics for the invoice request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Information	Displays information about the invoice request.	Not applicable
Invoice Request Type	Indicates the invoice request type using which the invoice request is created.	Not applicable
Entity	Used to indicate the entity using which you want to edit an invoice request. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> </ul>	Not applicable
	<b>Note:</b> This field is in the read-only mode.	
Account ID	Used to indicate the account using which you want to edit an invoice request.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	
Cutoff Date	Used to specify the date till when the billable charges are considered for processing the invoice request.	No
	<b>Note:</b> If the cutoff date is not mentioned, the system considers current date as the cutoff date.	
Accounting Date	Used to specify the accounting date of the bill.	No
	<b>Note:</b> If the accounting date is not mentioned, the system considers current date as the accounting date.	
Bill Date	Used to specify the processing date on which the bill is completed.	No
	<b>Note:</b> The bill date cannot be on or earlier than the last bill date of the account. If the bill date is not mentioned, the system considers current date as the bill date.	
Comments	Used to specify additional information about the invoice request.	No

**Note:** The **Edit** button appears when the invoice request is in the **Draft** status.

4. Modify the details of the invoice request, if required.
5. Define, edit, or remove characteristics of the invoice request, if required.

**6. Click Save.**

The changes made to the invoice request are saved.

How to define a characteristic for an invoice request	<a href="#">Defining a Characteristic for an Invoice Request</a> on page 2318

## Defining a Characteristic for an Invoice Request

---

**Prerequisites**

To define a characteristic for an invoice request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Invoice Request**)

**Procedure**

To define a characteristic for an invoice request:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an invoice request type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the invoice request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the invoice request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Invoice Request</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the invoice request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for a predefined characteristic value.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required when you are defining a characteristic for the invoice request.</p>

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the invoice request, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the invoice request, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.  
The characteristics are defined for the invoice request.

How to edit an invoice request	<a href="#">Editing an Invoice Request</a> on page 2316

## Deleting an Invoice Request

### Procedure

To delete an invoice request:

- Search for the invoice request in the **Search Invoice Request** screen.
- In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to the invoice request that you want to delete.  
The **Invoice Request** screen appears.
- Click the **Delete** button in the **Invoice Request** zone.  
A message appears confirming whether you want to delete the invoice request.

**Note:** The **Delete** button appears when the invoice request is in the **Draft** status.

- Click **OK**.  
The invoice request is deleted.

## Canceling an Invoice Request

### Prerequisites

To cancel an invoice request, you should have:

- Reasons defined for the **Canceled** status of the **C1-InvoiceRequest** business object in the **Status Reason** screen

### Procedure

To cancel an invoice request:

- Search for the invoice request in the **Search Invoice Request** screen.
- In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to the invoice request that you want to cancel.  
The **Invoice Request** screen appears.
- Click the **Cancel** button in the **Invoice Request** zone.

The **Invoice Request** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to cancel the invoice request.	Yes
	<b>Note:</b> The list includes only those reasons which are defined for the <b>Canceled</b> status of the <b>C1-InvoiceRequest</b> business object in the <b>Status Reason</b> screen.	

**Note:** The **Cancel** button appears when the invoice request is in the **Deferred Processing** or **Deferred Processing - Batch** status.

- Select the reason for canceling the invoice request from the **Status Reason** list.
- Click **Save**.  
The status of the invoice request (along with the bills within the invoice request) is changed to **Canceled**.

## Submitting an Invoice Request

### Prerequisites

To submit an invoice request, you should have:

- The status of the invoice request in the **Draft** status.
- The invoice request type as **Manual**.

### **Procedure**

To submit an invoice request:

1. Search for the invoice request in the **Search Invoice Request** screen.
2. In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to the invoice request that you want to submit.  
The **Invoice Request** screen appears.
3. Click the **Submit** button in the **Invoice Request** zone.

The system behaves in the following manner:

<b>If...</b>	<b>Then...</b>
The <b>Approval Required</b> option is selected in the respective invoice request type	The status of the invoice request is changed to <b>Approval In Progress</b> . In this status, you can perform various actions on the invoice request, such as, <b>Approve</b> or <b>Reject</b> or <b>Return To Submitter</b> . If the approver clicks the <b>Approve</b> button, the status of the invoice request is changed to <b>Approval In Progress</b> . If the approver clicks the <b>Reject</b> button, the status of the invoice request is changed to <b>Rejected</b> . If the approver clicks the <b>Return To Submitter</b> button, a To Do is generated and the invoice request is changed to <b>Draft</b> . The submitter updates the invoice request and redirects it back to the approver for approval purposes.
The <b>Approval Required</b> option is not selected in the respective invoice request type and the entity type is <b>Person</b>	The status of the invoice request is changed to <b>Processed</b> , or <b>Deferred Processing</b> or <b>Deferred Processing - Batch</b> .
The <b>Approval Required</b> option is not selected in the respective invoice request type, and the entity type is <b>Account</b> , and the billable charge count exceeds the defer processing billable charge count	The status of the invoice request is changed to <b>Deferred Processing - Batch</b> .
The <b>Approval Required</b> option is not selected in the respective invoice request type, and the entity type is <b>Account</b> , and the billable charge count does not exceed the defer processing billable charge count, and the invoice processing date does not exceed the system date	The status of the invoice request is changed to <b>Processed</b> else it is changed to <b>Defer Processing</b> .

### **Note:**

The **Submit** button appears when the invoice request is in the **Draft** status and invoice request type is **Manual**.

### **Related Topics**

## Approving an Invoice Request

You can view the number of invoice requests which are pending for approval in the **Invoice Request** screen. The approver can review, and accordingly approve, reject, or ask the submitter to resubmit the invoice request based on the observations.

**Note:** The system will not allow you to approve, reject, or resubmit an invoice request submitted by you.

### Prerequisites

To approve an invoice request, you should have:

- Approval To Do role assigned in the system

### Procedure

To approve an invoice request:

1. Do either of the following:

If you want to...	Then...
Approve an invoice request through the Invoice Request screen	<ol style="list-style-type: none"> <li>a. Search for the invoice request in the <b>Invoice Request</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>Invoice Request Information</b> column corresponding to the invoice request which you want to review.</li> </ol>
Approve an Invoice request from the To Do List screen	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>c. Enter <b>C1-INVRATODO</b> in the <b>To Do Type</b> field.</li> <li>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>f. Click the link in the <b>Message</b> column corresponding to the To Do of the invoice request that you want to review.</li> </ol>

The **Invoice Request** screen appears.

2. Review the details in the **Invoice Request** screen.
3. If the information in the invoice request is accurate, then click the **Approve** button in the **Invoice Request** zone.

The system behaves in the following manner:

If...	Then...
The status of the invoice request is changed to <b>Approved</b>	A To Do entry is created using the To Do type <b>F1-TODOCOMPL</b> specified in the approval profile and is assigned back to the submitter to complete the invoice request.

**Note:** The **Approve** button appears when:

- The invoice request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the invoice request.

**Related Topics**

<b>Invoice Request</b> screen	<a href="#">Invoice Request (Used for Viewing)</a> on page 2310
<b>Invoice Request</b> zone	<a href="#">Invoice Request</a> on page 2311

## Rejecting an Invoice Request

**Prerequisites**

To reject an invoice request, you should have:

- Reasons defined for the **Rejected** status of the **C1-InvoiceRequest** business object in the **Status Reason** screen.

**Note:** The system will not allow you to approve, reject, or resubmit an invoice request submitted by you.

**Procedure**

To reject an invoice request:

- Do either of the following:

If you want to...	Then...
<b>Reject an invoice request through the Invoice Request screen</b>	<ol style="list-style-type: none"> <li>Search for the invoice request in the <b>Invoice Request</b> screen.</li> <li>In the <b>Search Results</b> section, click the link in the <b>Invoice Request Information</b> column corresponding to the invoice request which you want to review.</li> </ol>
<b>Reject an invoice request from the To Do List screen</b>	<ol style="list-style-type: none"> <li>Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>Enter <b>C1-INVRATODO</b> in the <b>To Do Type</b> field.</li> <li>Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>Click the link in the <b>Message</b> column corresponding to the To Do of the invoice request that you want to review.</li> </ol>

The **Invoice Request** screen appears.

- Review the details in the **Invoice Request** screen.
- If the information in the invoice request is incorrect, then click the **Reject** button in the **Invoice Request** zone.

The **Reject Invoice Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the invoice request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those reasons which are defined for the <b>Rejected</b> status of the <b>C1-InvoiceRequest</b> business object in the <b>Status Reason</b> screen.	
Comments	Used to specify additional information while rejecting the invoice request.	No

**Note:** The **Reject** button appears when:

- The invoice request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the invoice request.

4. Select the reason for rejecting the invoice request from the **Status Reason** list.

5. Click **Save**.

The status of the invoice request is changed to **Rejected**.

## Requesting to Resubmit an Invoice Request

### Procedure

To request to resubmit an invoice request:

1. Do either of the following:

If you want to...	Then...
<b>Request for resubmitting an invoice request through the Invoice Request screen</b>	<p>a. Search for the invoice request in the <b>Invoice Request</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the link in the <b>Invoice Request Information</b> column corresponding to the invoice request which you want to review.</p>
<b>Request for resubmitting an invoice request from the To Do List screen</b>	<p>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</p> <p>The <b>To Do Type for User Search</b> window appears.</p> <p>c. Enter <b>C1-INVRATODO</b> in the <b>To Do Type</b> field.</p> <p>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p>

If you want to...	Then...
	f. Click the link in the <b>Message</b> column corresponding to the To Do of the invoice request that you want to review.

The **Invoice Request** screen appears.

- Review the details in the **Invoice Request** screen.
- If the information in the invoice request is incomplete and you want the submitter to make the required changes and resubmit the invoice request for approval, then click the **ReSubmit** button in the **Invoice Request** zone.

The **Resubmit Invoice Request** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes which the submitter should make in the invoice request before resubmitting it for approval.	Yes

**Note:** The **Re Submit** button appears when:

- The invoice request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the invoice request.

- Enter the comments in the respective field and then click **Save**.  
A To Do is created using the submitter To Do type and assigned to all users with a submitter To Do role specified in the invoice request type. In addition, the status of the invoice request is changed to **Draft**.

Oracle Revenue Management and Billing allows you to refund and write off amount to the account. If the amount received from the payor account is matched against the suspense or excess credit contract, the system facilitates you to refund the amount to the payor. In addition, you can refund the amount of a credit bill line item, such as credit bill segment or adjustment, if required. To refund the amount to the account holder, you need to create refund adjustments through a refund request. While creating a refund request, you need to specify the refund request type using which you want to create the refund request. It is the refund request type which helps the system to determine:

- Whether the refund request must be approved before creating refund adjustments in the system
- Approval profile using which the refund request must be approved
- Whether multi-level or single-level approval is required while creating refund adjustments in the system
- Tolerance limit for refund (i.e. minimum refund amount)
- Adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount
- Default adjustment type using which refund adjustments must be created

The system allows you to create refund adjustments only using those adjustment types where A/P request type is defined. Once the refund adjustments are created, the A/P Extract process will extract the information and accordingly refund the amount to the payor. During the refund request process, a refund request goes through various statuses in its lifecycle. For more information about the refund request statuses, see [Refund Request \(Without Approval\) Status Transition](#) on page 2329 and [Refund Request \(With Approval\) Status Transition](#) on page 2330.

Note that the lifecycle of a refund request is driven by the business object using which the refund request is created. A refund request business object named **C1-RefundReq** is shipped with the product. The refund request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-RefundReq** business object.

Similarly, the system facilitates you to write off the amount to the account through a write off request. While creating a write off request, you need to specify the write off request type using which you want to create the write off request. It is the write off request type which helps the system to determine:

- Whether the write off request must be approved before creating write off adjustments in the system
- Approval profile using which the write off request must be approved
- Whether multi-level or single-level approval is required while creating write off adjustments in the system
- Default adjustment type using which write off adjustments must be created

The system allows you to create write off adjustments only using those adjustment types where A/P request type is not defined. During the write off request process, a write off request goes through various statuses in its lifecycle. For more information about the write off request statuses, see [Write Off Request \(Without Approval\) Status Transition](#) on page 2331 and [Write Off Request \(With Approval\) Status Transition](#) on page 2332.

Note that the lifecycle of a write off request is driven by the business object using which the write off request is created. A write off request business object named **C1-WORequest** is shipped with the product. The write off request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-WORequest** business object.

For more information on how to setup the refund and write off request processes, see [Prerequisites](#) on page 2329.

## Prerequisites

---

To setup the refund request process, you need to do the following:

- Define the required adjustment types (for creating refund adjustments) where A/P request type is defined
- Define the required adjustment types (for creating write up adjustments) where A/P request type is not defined
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request Type**
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request**
- Define voided and rejected status reasons for the **C1-RefundReq** business object
- Assign the **C1-REFRQ** To Do type to a To Do role whose users must receive To Do generated while submitting a refund request for approval
- Define the required approval profiles with the credit hierarchy and **C1-REFRQ** To Do type
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options — Framework** screen
- Define the required refund request types in the system

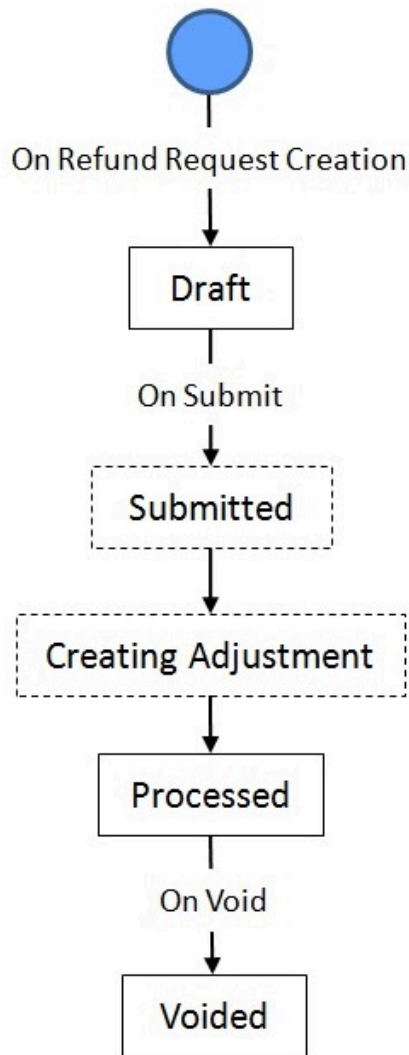

To setup the write off request process, you need to do the following:

- Define the required adjustment types (for creating write off adjustments) where A/P request type is not defined
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request Type**
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request**
- Define cancelled and rejected status reasons for the **C1-WOREquest** business object
- Assign the **C1-WOREQ** To Do type to a To Do role whose users must receive To Do generated while submitting a write off request for approval
- Define the required approval profiles with the debit hierarchy and **C1-WOREQ** To Do type
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options — Framework** screen
- Define the required write off request types in the system

## Refund Request (Without Approval) Status Transition

## **Write Off Request (With Approval) Status Transition**

---

The following figure graphically indicates how a write off request moves from one status to another when approval workflow is on:

## Account Level Refund/Write Off

Oracle Revenue Management and Billing enables you to create a refund/write off request at the account level. A new field named **Adjustment Level** is available while defining a refund/write off request. It allows you to control how the refund/write off adjustment should be created for the refund/write off request. It supports the following values:

- **Account** – Used when you want to create the refund/write off request at the account level. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the health insurance domain.

- **Bill** – Used when you want to create the refund/write off request for a bill. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the financial services domain.
- **Segment** – Used when you want to create the refund/write off request for a bill, bill segment, adjustment, or payment of an account. Here, the refund/write off adjustment is created against the bill segment, adjustment, or payment segment, respectively. If you select this option, the system behaves in the traditional manner.

If you do not specify the value for the **Adjustment Level** field, the system considers the value defined in the **Default Adjustment Level** option type of the **C1\_REFWO** feature configuration. If you select the **Account** option from the **Adjustment Level** list, the system checks the account balance while creating the refund/write off request. If the account balance is zero, the system throws an appropriate error message and does not allow you to create the refund/write off request at the account level. However, if the account balance is in credit, the system allows you to create a refund request for the account. Similarly, if the account balance is in debit, the system allows you to create a write off request for the account.

While creating a refund/write off request at the account level, the system, by default, sets the total refund/write off amount to the account balance. You cannot edit the refund/write off amount. Even, the post processing algorithms cannot update the refund/write off amount in the refund/write off request.

**Note:** The **Bills** and **Payments and Adjustments** tabs do not appear in the **Refund Request** and **Write Off Request** screens when the refund/write off request is created at the account level.

Before creating the refund/write off request at the account level, you need to do the following:

- Attach the **C1-NTACBAL** algorithm to the **Netting Account Balance** system event in the **Algorithms** tab of the **Installation Options – Framework** screen
- Set the netting contract type on the respective refund/write off request type

The system invokes the **C1-NTACBAL** algorithm while processing the refund/write off request where the adjustment level is set to **Account**. The **C1-NTACBAL** algorithm creates transfer adjustments on the netting contract of the account. The transfer adjustment creation process slightly varies depending on the adjustment level that is selected while defining a refund/write off request.

If the adjustment level is set to **Account**, the system checks whether a netting contract created using the netting contract type (specified in the refund/write off request type) exists for the account. If so, the system considers the unmatched financial transactions of the account and then creates a transfer adjustment against each of them on the netting contract. However, if the netting contract does not exist for the account, then the system does the following:

1. Creates a netting contract using the netting contract type specified in the refund/write off request type
2. Considers the unmatched financial transactions of the account and then creates a transfer adjustment against each of them on the netting contract

You can opt to exclude unmatched financial transactions of contracts created using a particular contract type by setting the **Excluded Contract types for netting** option type of the **C1\_CMO** feature configuration. You can exclude multiple contract types by defining the **Excluded Contract types for netting** option type multiple times (with unique sequence number) in the feature configuration. This option type is considered only when the adjustment level is set to **Account**.

On submitting or approving a refund/write off request at the account level, the system validates whether the refund/write off amount matches the current account balance. If the refund/write off amount does not match the current account balance, the system does not allow you to process the refund/write off request. However, if the refund/write off amount matches the current account balance, the system creates the transfer adjustments and refund/write off adjustment on the netting contract of the account.

On voiding a refund request where the adjustment level is set to **Account**, the system cancels the transfer adjustments and refund adjustment on the netting contract of the account. And, on canceling a write off request where the adjustment level is set to **Account**, the system cancels the transfer adjustments and write off adjustment on the netting contract of the account.

## Refund/Write Off Adjustment at Bill Level

Until now, you were able to create the refund/write off request for a bill or bill line item (i.e. bill segment or adjustment) of an account. On processing the refund/write off request, the system used to create refund/write off adjustment against the bill line item irrespective of whether the refund/write off is done at the bill or bill line item level. There was a requirement wherein the system should allow to create the refund/write off adjustment against the bill and not against the bill line items when the refund/write off is done at the bill level.

Now, Oracle Revenue Management and Billing enables you to create a refund/write off adjustment at the bill level. A new field named **Adjustment Level** is available while defining a refund/write off request. It allows you to control how the refund/write off adjustment should be created for the refund/write off request. It supports the following values:

- **Account** – Used when you want to create the refund/write off request at the account level. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the health insurance domain.
- **Bill** - Used when you want to create the refund/write off request for a bill. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the financial services domain.
- **Segment** - Used when you want to create the refund/write off request for a bill, bill segment, adjustment, or payment of an account. Here, the refund/write off adjustment is created against the bill segment, adjustment, or payment segment, respectively. If you select this option, the system behaves in the traditional manner.

By default, the adjustment level is set to **Segment**. If you select the **Bill** option from the **Adjustment Level** list, the system checks the account balance while creating the refund/write off request. If the account balance is zero, the system throws an appropriate error message and does not allow you to create the refund/write off request for the account. However, if the account balance is in credit, the system allows you to create a refund request for the account. Similarly, if the account balance is in debit, the system allows you to create a write off request for the account.

**Note:** The **Payments and Adjustments** tab does not appear in the **Refund Request** screen when the adjustment level is set to **Bill** in the refund request.

Before creating the refund/write off request where the adjustment level is set to **Bill**, you need to do the following:

- Attach the **C1-NTACBAL** algorithm to the **Netting Account Balance** system event in the **Algorithms** tab of the **Installation Options – Framework** screen
- Set the netting contract type on the respective refund/write off request type

The system invokes the **C1-NTACBAL** algorithm while processing the refund/write off request where the adjustment level is set to **Bill**. The **C1-NTACBAL** algorithm creates transfer adjustments on the netting contract of the account. The transfer adjustment creation process slightly varies depending on the adjustment level that is selected while defining a refund/write off request.

If the adjustment level is set to **Bill**, then the system checks whether a netting contract created using the netting contract type (specified in the refund/write off request type) exists for the account and its contract balance is equal to zero. If both the conditions are met, the system considers the unpaid bill segments and adjustments of the bill and then creates a transfer adjustment against each of them on the netting contract. However, if the netting contract does not exist for the account, then the system does the following:

1. Creates a netting contract using the netting contract type specified in the refund/write off request type
2. Considers the unpaid bill segments and adjustments of the bill and then creates a transfer adjustment against each of them on the netting contract

And, if the netting contract exists for the account, but its contract balance is not equal to zero, the system throws an appropriate error message on the user interface.

On voiding a refund request where the adjustment level is set to **Bill**, the system cancels the transfer adjustments and refund adjustment on the netting contract of the account. And, on canceling a write off request where the adjustment level is set to **Bill**, the system cancels the transfer adjustments and write off adjustment on the netting contract of the account.

## Algorithms Used in C1-RefundReq

The following table lists the algorithms which are attached to the **C1-RefundReq** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-REFREQINF	C1-REFREQINF	This algorithm generates the refund and write off request information string which appears throughout the application. It concatenates the following fields: <ul style="list-style-type: none"> <li>Refund or Write Off Request Type Description</li> <li>Refund or Write Off Request Status Description</li> <li>Refund or Write Off Request ID</li> </ul>
Post-Processing	C1-REFWOPOSP	C1-REFWOPOSP	This algorithm recalculates and updates the total refund amount in the <b>Refund Request</b> zone when you change the refund amount against an entity while editing a refund request.
Validation	C1-REFUNDVAL	C1-REFUNDVAL	This algorithm validates the following for each entity that you have selected in the refund request: <ul style="list-style-type: none"> <li>The mandatory data, such as refund amount and adjustment type, is specified.</li> <li>The refund amount is not less than zero.</li> <li>The refund amount is not greater than the entity amount.</li> <li>The refund amount is not greater than the eligible refund amount.</li> <li>The partial refund is not done at the payment event or bill level.</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-RefundReq** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-REF-DFT	C1-REF-DFT	This algorithm fetches the account's main customer's name and address and displays in the <b>Refund Request</b> zone. In addition, when you refund the payments from the <b>Payment Event Summary</b> screen, this algorithm does the following: <ul style="list-style-type: none"> <li>The total eligible refund amount is calculated and accordingly displayed in the <b>Refund Request</b> screen.</li> <li>The default refund adjustment type specified in the refund request type is fetched and displayed against the selected payment event or payments.</li> <li>On selecting a payment event for refund, if all payments in the payment event are matched</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
				against the same suspense or excess credit contract, the payment event is added in the <b>Refund Details</b> zone. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the <b>Refund Details</b> zone.
Submitted	Enter	C1-REFUNDSUB	C1-REFUNDSUB	<p>This algorithm checks the following:</p> <ul style="list-style-type: none"> <li>Whether the approval is required for the refund request. If the approval is required for a refund request, the status of the refund request is changed to <b>Approval In Progress</b>. However, if the approval is not required for a refund request, the status of the refund request is changed to <b>Creating Adjustment</b>.</li> <li>At least one entity, such as payment event, payment, or credit bill line item (such as credit bill segment or adjustment) is selected in the refund request.</li> <li>Whether the approval profile attached to the refund request type has the credit hierarchy and C1-REFRQ To Do type defined.</li> </ul>
Approval In Progress	Enter	C1-REFUNDAPP	C1-REFUNDAPP	<p>This algorithm creates the following:</p> <ul style="list-style-type: none"> <li>A To Do using the To Do type specified in the approval profile which is attached to the refund request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.</li> <li>A log entry is added when a To Do is created using the To Do type.</li> </ul>
Approved	Enter	C1-REFAPPRVD	C1-REFAPPRVD	<p>This algorithm is triggered when the approver clicks the <b>Approve</b> button. It checks whether the approval is required from users at the next level in the approval hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the refund request is changed to <b>Approval In Progress</b> and the algorithm attached to the <b>Approval In Progress</b> status is invoked. If further approval is not required, the status</p>

Status	System Event	Algorithm	Algorithm Type	Description
				of the refund request is changed to <b>Creating Adjustment</b> .
Rejected	-	-	-	-
Creating Adjustment	Enter	C1-REFADJCRI	C1-REFADJCRI	<p>This algorithm does the following:</p> <ul style="list-style-type: none"> <li>Creates the refund adjustments for the refund request. These refund adjustments are created in the <b>Frozen</b> status. The adjustment ID is displayed corresponding to the entity in the <b>Refund Details</b> zone.</li> <li>Stamps the bill ID of credit line item on the adjustment and the corresponding financial transaction.</li> <li>If a match event is present for the credit bill line item and for payments which are matched against the excess credit contract, the existing match event is stamped on the refund or write up adjustment and the corresponding financial transaction. However, when a match event is not present for payments which are matched against the suspense contract or if the match event does not exist, a new match event is created and stamped on the refund or write up adjustment and the corresponding financial transaction.</li> <li>If you are doing a partial refund for any entity, the corresponding match event status is set to <b>Open</b>. However, if you are refunding the entire eligible amount, the corresponding match event status is set to <b>Balanced</b>.</li> <li>The details of the refund adjustments are added in the <b>A/P Check Request (CI_ADJ_APREQ)</b> table.</li> <li>If a write up adjustment is created, the write up adjustment type specified in the refund request type is displayed corresponding to the entity in the <b>Refund Details</b> zone.</li> </ul>
Processed	-	-	-	-
Voided	Enter	C1-REFVOID	C1-REFVOID	This algorithm is invoked on click of the <b>Void</b> button for a refund request which is in processed state.

Status	System Event	Algorithm	Algorithm Type	Description
				<p>The algorithm cancels all the frozen adjustments created for the refund request.</p> <p>The algorithm fetches the adjustment cancel reason required for cancelling the adjustments in the status reason characteristics (<b>F1_BUS_OBJ_STATUS_RSN_CHAR</b> table). If the reason is not found, it will use the status reason selected by the user</p>

## Algorithms Used in C1-WORequest

The following table lists the algorithms which are attached to the **C1-WORequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-REFREQINF	C1-REFREQINF	<p>This algorithm generates the refund and write off request information string which appears throughout the application. It concatenates the following fields:</p> <ul style="list-style-type: none"> <li>Refund or Write Off Request Type Description</li> <li>Refund or Write Off Request Status Description</li> <li>Refund or Write Off Request ID</li> </ul>
Post-Processing	C1-WOPOSP	C1-WOPOSP	<p>This algorithm recalculates and updates the total write off amount in the <b>Write Off Request</b> zone when you change the write off amount against an entity while editing a write off request.</p>
Validation	C1-WOBOVAL	C1-WOBOVAL	<p>This algorithm validates the following for each entity that you have selected in the write off request:</p> <ul style="list-style-type: none"> <li>The mandatory data, such as write off amount and adjustment type, is specified.</li> <li>The write off amount is not less than zero.</li> <li>The write off amount is not greater than the entity amount.</li> <li>The write off amount is not greater than the eligible write off amount.</li> <li>The partial write off is not done at the bill level.</li> <li>The A/P Request Type is not defined in the selected adjustment type.</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-WORequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Submitted	Enter	C1-WOSUBMIT	C1-WOSUBMIT	This algorithm checks the following:

Status	System Event	Algorithm	Algorithm Type	Description
				<ul style="list-style-type: none"> <li>Whether the approval is required for the write off request. If the approval is required for a write off request, the status of the write off request is changed to <b>Approval In Progress</b>. However, if the approval is not required for a write off request, the status of the write off request is changed to <b>Creating Adjustment</b>.</li> <li>At least one debit bill line item (such as debit bill segment or adjustment) is selected in the write off request.</li> <li>Whether the approval profile attached to the write off request type has the debit hierarchy and C1-WOREQ To Do type defined.</li> </ul>
Approval In Progress	Enter	C1-WOAPPROVL	C1-WOAPPROVL	<p>This algorithm creates the following:</p> <ul style="list-style-type: none"> <li>A To Do using the To Do type specified in the approval profile which is attached to the write off request type. Processed	-	-	-	-
Cancelled	Enter	C1-WOCANCEL	C1-WOCANCEL	<p>This algorithm is invoked on click of the <b>Cancel</b> button for a write off request which is in the <b>Processed</b> state.</p> <p>This algorithm cancels all the frozen adjustments created for the write off request.</p> <p>The algorithm fetches the adjustment cancel reason required for cancelling the adjustments in the status reason characteristics (<b>F1_BUS_OBJ_STATUS_RSN_CHAR</b> table). If the reason is not found, it will use the status reason selected by the user.</p>

## Refund/Write Off Request Type

Oracle Revenue Management and Billing allows you to define:

- **Refund Request Type** — It is used to create a refund request. You can define multiple refund request types in the system. A refund request type helps the system to determine:
  - Whether the refund request must be approved before creating refund adjustments in the system
  - Approval profile using which the refund request must be approved

- Whether multi-level or single-level approval is required while creating refund adjustments in the system
- Tolerance limit for refund (i.e. minimum refund amount)
- Adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount
- Default adjustment type using which refund adjustments must be created
- **Write Off Request Type** — It is used to create a write off request. You can define multiple write off request types in the system. A write off request type helps the system to determine:
  - Whether the write off request must be approved before creating write off adjustments in the system
  - Approval profile using which the write off request must be approved
  - Whether multi-level or single-level approval is required while creating write off adjustments in the system
  - Default adjustment type using which write off adjustments must be created

While defining a refund or write off request type where approval workflow is required, you need to select the **Approval Required** check box. If the **Approval Required** check box is selected, the refund or write off request (which is created using the refund or write off request type) is sent for approval before creating the refund or write off adjustments. However, if the **Approval Required** check box is not selected, the refund or write off adjustments are created immediately on submitting a refund or write off request. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. You can define a debit and credit hierarchy in the approval profile using the threshold amount. The debit approval hierarchy is used for approving write off request and credit approval hierarchy is used for approving refund request. Therefore, while defining an approval profile for refund, you need to define credit hierarchy and set the To Do Type to **C1-REFRQ**. However, while defining an approval profile for write off, you need to define debit hierarchy and set the To Do Type to **C1-WOREQ**.

You can define an approval hierarchy where users with different To Do role at each level can approve or reject the refund or write off request. For example, you can define an approval profile called A1 with two levels of approval. At the first level, a user with the **Manager** To Do role will approve or reject the refund or write off request, and at the second level, a user with the **Senior Manager** To Do role will approve or reject the refund or write off request. On submitting a refund or write off request where approval is required, a notification in the form of To Do is sent to all users with the To Do role defined at the first level in the hierarchy. Once the request is approved at the first level, a notification is sent to all users with the To Do role defined at the next level in the hierarchy. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the refund or write off request, the refund or write off adjustments are created. However, if an approver at any level in the hierarchy rejects the request, the refund or write off adjustments are not created.

The approval hierarchy is controlled by the threshold amount. For example, you define an approval profile called A1 with two levels of approval — First Level (Threshold Amount: 300, To Do Role: **Manager**) and Second Level (Threshold Amount: 500, To Do Role: **Senior Manager**). Now, if the total refund or write off amount is equal to 300 or less than 500, then the approval is required only from the first level in the hierarchy and not from the second level in the hierarchy. However, if the total refund or write off amount is equal to or greater than 500, then the approval is required from the first level and then from the second level in the hierarchy. But, if the total refund or write off amount is less than 300, then the approval is not required from any levels in the hierarchy. The system will automatically approve the refund or write off request and create the refund or write off adjustments.

The system supports both single-level and multi-level approval process while approving refund or write off request. If the **Hierarchical Approval** check box is selected while defining a refund or write off request type, the approval hierarchy defined in the approval profile is followed based on the threshold limit. However, if the **Hierarchical Approval** check box is not selected while defining a refund or write off request type, the approval is required only from the approval level where the total refund or write off amount falls within the threshold limit. Let us understand this with the help of some examples.

#### Example 1

Refund Request Type	Approval Profile	Approval Hierarchy	Hierarchical Approval
R1	Refund Analyst	<u>Credit Hierarchy</u>	Yes

Refund Request Type	Approval Profile	Approval Hierarchy		Hierarchical Approval
		<b>Threshold Amount</b>	<b>To Do Role</b>	
		\$500	Senior Analyst	
		\$750	Manager	
		\$1500	Senior Manager	
R2	Refund Analyst	<b><u>Credit Hierarchy</u></b>		No
		<b>Threshold Amount</b>	<b>To Do Role</b>	
		\$500	Senior Analyst	
		\$750	Manager	
		\$1500	Senior Manager	

The following table indicates how the system will behave in different refund scenarios:

Refund Request	Refund Request Type	Total Refund Amount (\$)	Comments
RR1	R1	200	This refund request is automatically approved by the system because the total refund amount is less than \$500.
RR2	R1	750	The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> </ol> This is because the total refund amount is either equal to \$750 or less than \$1500 and hierarchical approval is required.
RR3	R1	2000	The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> <li>3. Users with the Senior Manager To Do role</li> </ol> This is because the total refund amount is greater than \$1500 and hierarchical approval is required.
RR4	R2	200	This refund request is automatically approved by the system because the total refund amount is less than \$500.
RR5	R2	750	The To Do is sent for approval to users with the Manager To Do role. This is because the total refund amount is either equal to \$750 or less than \$1500 and hierarchical approval is not required.
RR6	R2	2000	The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total refund amount is greater than \$1500 and hierarchical approval is not required.

**Example 2**

Write Off Request Type	Approval Profile	Approval Hierarchy	Hierarchical Approval
W1	Write Off Analyst	<b>Debit Hierarchy</b>	Yes
		<b>Threshold Amount</b>	
		<b>To Do Role</b>	
		\$100	
		Senior Analyst	
W2	Write Off Analyst	<b>Debit Hierarchy</b>	No
		<b>Threshold Amount</b>	
		<b>To Do Role</b>	
		\$100	
		Senior Analyst	

The following table indicates how the system will behave in different write off scenarios:

Write Off Request	Write Off Request Type	Total Write Off Amount (\$)	Comments
WO1	W1	90	This write off request is automatically approved by the system because the total write off amount is less than \$100.
WO2	W1	250	The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> </ol> This is because the total write off amount is either equal to \$200 or less than \$300 and hierarchical approval is required.
WO3	W1	500	The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> <li>3. Users with the Senior Manager To Do role</li> </ol> This is because the total write off amount is greater than \$300 and hierarchical approval is required.
WO4	W2	90	This write off request is automatically approved by the system because the total write off amount is less than \$100.
WO5	W2	250	The To Do is sent for approval to users with the Manager To Do role. This is because the total write off amount is either equal to \$200 or less than \$300 and hierarchical approval is not required.

Write Off Request	Write Off Request Type	Total Write Off Amount (\$)	Comments
WO6	W2	500	The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total write off amount is greater than \$300 and hierarchical approval is not required.

The **Refund/Write Off Request Type** screen allows you to define, edit, delete, and copy a refund and write off request type. This screen consists of the following zones:

- [Refund/Write Off Request Type List](#) on page 2345
- [Refund/Write Off Request Type](#) on page 2346

## Refund/Write Off Request Type List

The **Refund/Write Off Request Type List** zone lists refund and write off request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Refund/Write Off Request Type	Displays the refund or write off request type.
Description	Displays the description of the refund or write off request type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Refund/Write Off Request Type</b> screen appears where you can edit the details of the refund and write off request type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Refund/Write Off Request Type</b> screen appears where you can define a refund and write off request type using an existing refund and write off request type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the refund or write off request type.
	<b>Note:</b> You can delete a refund or write off request type when you have not created a refund or write off request using the refund or write off request type.

On clicking the **Broadcast** (📡) icon corresponding to refund or write off request type, the **Refund/Write Off Request Type** zone appears with the details of the respective refund or write off request type.

## Refund/Write Off Request Type

The **Refund/Write Off Request Type** zone displays the details of the refund or write off request type. This zone consists of the following sections:

- **Main** — This section provides basic information about the refund or write off request type. It contains the following fields:

Field Name	Field Description
Refund/Write Off Request Type	Displays the refund or write off request type.
Refund/Write Off Request Business Object	Indicates the business object that will be used to create the refund or write off request.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.
Description	Displays the description of the refund or write off request type.
Detailed Description	Displays additional information about the refund or write off request type.
Status	Indicates the status of the refund or write off request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Action	Indicates whether the request type is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>
Minimum Refund Amount	Displays the minimum refund amount.
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Refund</b> .
Write Up Adjustment Type	Indicates the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount.
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Refund</b> .
Approval Required	Indicates whether approval is required while creating the refund or write off adjustments using the refund or write off request type.
Approval Profile	Indicates the approval profile which must be used to define approval hierarchy for the refund or write off request type.
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>Approval Profile</b> screen appears with the details of the respective approval profile.

Field Name	Field Description
Hierarchical Approval	Indicates whether multi-level or single approval is required while creating the refund or write off adjustments using the refund or write off request type.
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.
Adjustment Type	Indicates the adjustment type using which the refund or write off adjustments must be created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears with the details of the respective adjustment type.

- **Characteristics** — This section lists the characteristics of the refund or write off request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the refund or write off request type.
Delete	Used to delete the refund or write off request type.
	<b>Note:</b> You can delete a refund or write off request type when you have not created a refund or write off request using the refund or write off request type.
Duplicate	Used to create a new refund or write off request type using an existing refund or write off request type.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the refund or write off request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Refund/Write Off Request Type** zone does not appear in the **Refund/Write Off Request Type** screen. It appears when you click the **Broadcast** (🔊) icon corresponding to the refund or write off request type in the **Refund/Write Off Request Type List** zone.

## Defining a Refund or Write Off Request Type

### Prerequisites

To define a refund or write off request type, you should have:

- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### Procedure

To define a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Refund/Write Off Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type Business Object	Used to indicate the business object that you want to use to create the refund or write off request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request Type** screen.

**Note:** The **Select Business Object** screen appears when there are multiple refund and write off request type business objects defined in the application. If there is only one refund and write off request type business object defined in the application, the **Refund/Write Off Request Type** screen appears.

4. Select the required refund and write off request type business object from the respective field.
5. Click **OK**.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define the characteristics for the refund or write off request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Used to specify the refund or write off request type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Indicates the refund and write off request type business object used while defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object that you want to use while creating the refund or write off request.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	Used to indicate the status of the refund or write off request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of a refund or write off request type to <b>Inactive</b> if there are refund or write off requests which are created using the refund or write off request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.	
Action	Used to indicate whether the request type is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>Refund</li> <li>Write Off</li> </ul>	Yes
Minimum Refund Amount	Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment.	Yes
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Refund</b> .	
Write Up Adjustment Type	Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Refund</b> . You can create write up adjustments only using those adjustment types where A/P request type is not defined.	
Approval Required	Used to indicate whether approval is required while creating the refund or write off adjustments using the refund or write off request type.	No
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the refund or write off request type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the refund or write off adjustments using the refund or write off request type.	No
	<b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	
Refund Adjustment Type	Used to indicate the adjustment type using which the refund adjustments must be created. This default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request.	Yes
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Refund</b> . The list includes only those adjustment types where A/P request type is defined.	
Write Off Adjustment Type	Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then change	Yes

Field Name	Field Description	Mandatory (Yes or No)
	the adjustment type, if required, while editing a write off request.	
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Write Off</b> .  You can create write off adjustments only using those adjustment types where A/P request type is not defined.	

6. Enter the required details depending on whether you want to define refund or write off request type.

**Note:** You can search for an adjustment type by clicking the **Search** (🔍) icon corresponding to the respective field.

7. Define characteristics for the refund or write off request type, if required.

8. Click **Save**.

The refund or write off request type is defined.

How to define a characteristic for a refund or write off request type	<a href="#">Defining a Characteristic for a Refund or Write Off Request Type</a> on page 2351

## Defining a Characteristic for a Refund or Write Off Request Type

### Prerequisites

To define a characteristic for a refund or write off request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request Type**)

### Procedure

To define a characteristic for a refund or write off request type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a refund or write off request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request Type</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the refund or write off request type.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the refund or write off request type.

2. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the refund or write off request type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the refund or write off request type, click the **Delete** (🗑) icon corresponding to the characteristic.

## Editing a Refund or Write Off Request Type

### Prerequisites

To edit a refund or write off request type, you should have:

- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### Procedure

To edit a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.  
The **Refund/Write Off Request Type** screen appears.
4. In the **Refund/Write Off Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the refund or write off request type whose details you want to edit.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define the characteristics for the refund or write off request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Displays the refund or write off request type.	Not applicable
Business Object	Indicates the refund and write off request type business object used while defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object that you want to use while creating the refund or write off request.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	Used to indicate the status of the refund or write off request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of a refund or write off request type to <b>Inactive</b> if there are refund or write off requests which are created using the refund or write off request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.	
Action	Indicates whether the request type is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>Refund</li> <li>Write Off</li> </ul>	Not applicable

## Copying a Refund or Write Off Request Type

Instead of creating a refund or write off request type from scratch, you can create a new refund or write off request type using an existing refund or write off request type. This is possible through copying a refund or write off request type. On copying a refund or write off request type, the details including the characteristics are copied to the new refund or write off request type. You can then edit the details, if required.

#### Prerequisites

To copy a refund or write off request type, you should have:

- Refund or Write Off request type (whose copy you want to create) defined in the application
- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

#### Procedure

To copy a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.  
The **Refund/Write Off Request Type** screen appears.
4. In the **Refund/Write Off Request Type List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the refund or write off request type whose copy you want to create.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define the characteristics for the refund or write off request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Used to specify the refund or write off request type.	Yes
Business Object	Indicates the refund and write off request type business object used while defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object that you want to use while creating the refund or write off request.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	Used to indicate the status of the refund or write off request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of a refund or write off request type to <b>Inactive</b> if there are refund or write off requests which are created using the refund or write off request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.	
Action	Used to indicate whether the request type is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>	Yes
Minimum Refund Amount	Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less	Yes

Field Name	Field Description	Mandatory (Yes or No)
	than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment.	
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Refund</b> .	
Write Up Adjustment Type	Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount.	Yes
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Refund</b> . You can create write up adjustments only using those adjustment types where A/P request type is not defined.	
Approval Required	Used to indicate whether approval is required while creating the refund or write off adjustments using the refund or write off request type.	No
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the refund or write off request type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected.	<b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the refund or write off adjustments using the refund or write off request type.	No
	<b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	
Refund Adjustment Type	Used to indicate the adjustment type using which the refund adjustments must be created. This default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Refund</b> . The list includes only those adjustment types where A/P request type is defined.	
Write Off Adjustment Type	Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then change the adjustment type, if required, while editing a write off request. <b>Note:</b> This field appears when the <b>Action</b> field is set to <b>Write Off</b> . You can create write off adjustments only using those adjustment types where A/P request type is not defined.	Yes

**Tip:** Alternatively, you can click the **Duplicate** button in the **Refund/Write Off Request Type** zone to create a copy of the refund or write off request type.

- Enter the required details in the **Main** section.

**Note:** You can search for an adjustment type by clicking the **Search** (🔍) icon corresponding to the respective field.

- Define, edit, or remove characteristics of the refund or write off request type, if required.
- Click **Save**.  
The new refund or write off request type is defined.

## Deleting a Refund or Write Off Request Type

### Procedure

To delete a refund or write off request type:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.  
The **Refund/Write Off Request Type** screen appears.
4. In the **Refund/Write Off Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the refund or write off request type that you want to delete.

A message appears confirming whether you want to delete the refund or write off request type.

**Note:** You can delete a refund or write off request type when you have not defined a refund or write off request using the refund or write off request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Refund/Write Off Request Type** zone to delete the refund or write off request type.

5. Click **OK**.  
The refund or write off request type is deleted.

## Searching for a Refund or Write Off Request

### Prerequisites

To search for a refund or write off request, you should have:

- Refund or Write Off request types defined in the application

### Procedure

To search for a refund or write off request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Refund/Write Off Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request** sub-menu.  
The **Refund/Write Off Request** screen appears.
4. Enter the search criteria in the **Search Refund/Write Off Request** zone depending on whether you want to search for a refund or write off request.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of refund or write off requests that meet the search criteria appears in the **Search Results** section.

## Creating a Refund Request

### Prerequisites

To create a refund request, you should have:

- Refund request types defined in the application

**Procedure**

To create a refund request:

1. Do either of the following:

If you want to...	Then...
Define a refund request from the Account Receivable Central screen	<p>a. Click the <b>Main</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Account Receivable Central</b>.</p> <p>c. Search for the bill in the <b>Account Receivable Central</b> screen.</p> <p>d. In the <b>Search Results</b> section, select the required bill and then click <b>Refund</b>.</p> <p><b>Note:</b> Only one bill at a time is allowed to select for <b>Refund Request</b> from the <b>Account Receivable Central</b> screen.</p>
Define a refund request from the Refund Request screen	<p>a. Click the <b>Main</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Refund/Write Off Request</b>.</p> <p>A sub-menu appears.</p> <p>c. Click the <b>Add</b> option from the <b>Refund/Write Off Request</b> sub-menu.</p>
Define a refund request from the Payment Event Summary screen	<p>a. Click the <b>Main</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>Payments</b> and then click <b>Payment Event Summary</b>.</p> <p>c. Search for the payment event (whose payments you want to refund) in the <b>Payment Event Summary</b> screen.</p> <p>d. In the <b>Search Results</b> section, click the <b>Broadcast</b> (📡) icon corresponding to the payment event whose payments you want to view.</p> <p>The <b>Payments</b> zone appears.</p> <p>e. Select the check box corresponding to the payments that you want to refund.</p> <p>f. Click the <b>Refund</b> button in the <b>Payments</b> zone.</p>

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	Displays the type of request (refund or write off) to be created.	Not applicable
	<p><b>Note:</b></p> <p>This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen.</p> <p>This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Used to indicate the request type using which you want to create the refund or write off request.	Yes
	<b>Note:</b> The refund request types are listed when you set the <b>Action</b> field to <b>Refund</b> and the write off request types are listed when you set the <b>Action</b> field to <b>Write Off</b> .	
Account	Used to indicate the account for which you want to create the refund or write off request.	Yes
	<b>Note:</b>  This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen.  This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.  You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the respective field.	

**Tip:**

Alternatively, you can access the **Select Request Type** screen:

- By clicking the **Add** button in the **Page Title** area of **Refund/Write Off Request** screen.
- By selecting the payment which you want to refund in the **Payment Event Summary** screen and then clicking the **Refund** button. Note that the system will allow you to refund only those payments which are in the **Frozen** status and matched against the suspense or excess credit contract.

2. Select the required refund request type from the respective field.
3. Click **Save**.

The refund request is defined and the status of the refund request is set to **Draft**. The **Refund Request** screen appears where you can view the details of the refund request. It contains the following tabs:

**Note:** The refund request can be created only for bill with outstanding amount lesser than zero.

- **Main** – Displays information about the refund request. It contains the following zones:
  - **Refund Request** – Displays the details of the refund request.
  - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Payments** – Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the refund request.
- 4. Add payment events, payments, or credit bill line items that you want to refund.
- 5. Edit the refund amount of each entity, if required.
- 6. Define characteristics for the refund request, if required.
- 7. Override the address if you want to sent the refund to an address other than the account's main customer address.

## Refund Request

Once you create a refund request, the **Refund Request** screen allows you to:

- Edit and delete a refund request
- View the details of a refund request
- Submit a refund request for approval
- Approve or reject a refund request
- View the log of a refund request

- Add a log entry for a refund request
- Void a refund request

This screen consists of the following tabs:

- **Main** – Displays information about the refund request. It contains the following zones:
  - **Refund Request** – Displays the details of the refund request.
  - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Bill Line Items** — Displays the details of the bill which must be refunded.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Refund Details** zone.

- **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. It contains the following zones:
  - **Search Bills** — Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** — Lists the debit and credit bill segments and adjustments of the bill.

This tab appears when the refund request is in the **Draft** status.

- **Payments** — Used to search payment events or individual payments that you want to refund. It contains the following zones:
  - **Search Payment Event** — Lists the payment events which are created for the account. You can filter the payment events using various search criteria.
  - **Payments** — Lists all payments created through the payment event.

This tab appears when the refund request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the refund request.

## Refund Request - Main

The **Main** tab displays information about the refund request. It contains the following zones:

- [Refund Request](#) on page 2371
- [Refund Details](#) on page 2373
- [Bill Line Items](#) on page 2374

## Refund Request

The **Refund Request** zone displays the details of the refund request. This zone contains the following sections:

- **Main** — This section provides basic information about the refund request. It contains the following fields:

Field Name	Field Description
Refund Request Information	Displays information about the refund request.
Refund Request Type	Indicates the refund request type using which the refund request is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Refund/Write Off Request Type</b> screen appears where you can view the details of the refund request type.
Status	Indicates the status of the refund request. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> </ul>

Field Name	Field Description
	<ul style="list-style-type: none"> <li>Rejected</li> <li>Processed</li> <li>Voided</li> </ul>
Status Reason	<p>Indicates the reason why the refund request is rejected or voided.</p> <p><b>Note:</b></p> <p>This field appears when the refund request is in the <b>Rejected</b> or <b>Voided</b> status. It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the rejected or voided reason.</p>
Account Information	<p>Indicates the account for which the refund request is created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Person Name	Indicates the person for whom the refund request is created.
Override Address	Indicates whether the account's mailing address is overridden.
Address 1	Displays the house number and apartment name.
Address 2	Displays the street name.
Address 3	Indicates the landmark, if available.
Address 4	Displays the village, town, or city name.
City	Displays the city name.
State	Displays the state name.
Country	Displays the country name.
Postal	Displays the postal or zip code.
Comments	Displays additional information about the refund request.
Total Refund Amount	Displays the total refund amount.

- **Characteristics** — Lists the characteristics defined for the refund request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the refund request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	<p>Used to edit the details of the refund request.</p> <p><b>Note:</b> The <b>Edit</b> button appears when the refund request is in the <b>Draft</b> status.</p>
Delete	Used to delete the refund request.

Button Name	Button Description
	<b>Note:</b> The <b>Delete</b> button appears when the refund request is in the <b>Draft</b> status.
Submit	Used to submit the refund request for approval. <b>Note:</b> The <b>Submit</b> button appears when the refund request is in the <b>Draft</b> status.
Approve	Used to approve the refund request. <b>Note:</b> The <b>Approve</b> button appears when: <ul style="list-style-type: none"> <li>The refund request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the refund request.</li> </ul>
Reject	Used to reject the refund request. <b>Note:</b> The <b>Reject</b> button appears when: <ul style="list-style-type: none"> <li>The refund request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the refund request.</li> </ul>
Void	Used to void the refund request. <b>Note:</b> The <b>Void</b> button appears when the refund request is in the <b>Processed</b> status.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the refund request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the refund request status is updated
Create Date/Time	Displays the date and time when the refund request is created.

## Refund Details

The **Refund Details** zone lists the payment events, payments, and credit bill line items (such as bill segments and adjustments) that you have added to the refund request. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the entity ID.
Entity Type	Indicates whether the entity is a payment event, payment, bill, bill segment, or an adjustment.
Currency	Indicates the currency in which the entity was created.
Entity Amount	Displays the entity amount.

Column Name	Column Description
Refund Amount	Displays the amount that must be refunded.
	<b>Note:</b> By default, the amount which is eligible for refund appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created or against which the payment is matched. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created.
	<b>Note:</b> By default, the adjustment type specified in the refund request type appears in this column. You can change the adjustment type, if required, by editing the refund request.
Adjustment Information	Displays information about the refund adjustment.
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment. The data appears in this column when the status of the refund request is <b>Processed</b> . The information string appears when an algorithm of the <b>C1-ADI-INFO</b> algorithm type is attached to the <b>Adjustment Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options — Framework</b> screen.

**Note:** On clicking the Broadcast (📡) icon corresponding to the entity type as **Bill**, the **Bill Line Items** zone appears with the details of the respective bill.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

## Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.

Column Name	Column Description
Currency	Displays the currency in which the entity was created.
Entity Amount	Displays the bill segment or adjustment amount.
Request Amount	Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.
	<b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Adjustment Information	Displays information about the refund adjustment.

By default, the **Bill Line Items** zone does not appear in the **Main** tab. It appears only when you click the **Broadcast** (📡) icon corresponding to the bill in the **Refund Details** zone.

## Refund Request - Bills

The **Bills** tab allows you to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. It contains the following zones:

- [Search Bills](#) on page 2375
- [Bill Line Items](#) on page 2377

### Search Bills

The **Search Bills** zone lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a bill using bill or bill and price item details. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Bill Details</li> <li>Bill and Price Item Details</li> </ul>	
	<b>Note:</b> By default, the <b>Bill Details</b> option is selected.	
Bill ID	Used to search a particular bill.	No
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No
Price Item	Used to search bills which are created for a particular price item.	No
	<b>Note:</b> This field appears when you select <b>Bill and Price Item Details</b> option from the <b>Search By</b> list. You can search for a price item by clicking the <b>search</b> (🔍) icon corresponding to the field.	

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Amount	Displays the total bill amount.

If you want to refund a bill with credit balance and all credit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All credit bill segments and adjustments of the bill are added in the **Refund Details** zone on the **Main** tab. However, if you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

## Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. If the entity is a bill segment, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment on clicking the link. However, if the entity is an adjustment, the <b>Adjustment</b> screen appears with the details of the respective adjustment on clicking the link.
Entity Amount	Displays the bill segment or adjustment amount.
Eligible Amount	Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.
	<b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.
Amount Refunded	Displays the amount which is already refunded to the account.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

You can select one or more credit bill segments or adjustments and click the **Add** button in this zone to add selected credit bill segments or adjustments to the refund request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** (📢) icon corresponding to the bill in the **Search Bills** zone.

## Refund Request - Payments

The **Payments** tab allows you to search payment events or individual payments that you want to refund. It contains the following zones:

- [Search Payment Event](#) on page 2378
- [Payments](#) on page 2379

## Search Payment Event

The **Search Payment Event** zone lists the payment events which are created for the account. You can filter the payment events using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for a payment event using the payment details. The valid values are: <ul style="list-style-type: none"> <li>• Payment Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Payment Details</b> option is selected.	
Payment Event ID	Used to search a particular payment event.	No
Suspense/Excess Credit Contract	Used to search payment events which include payments made against a particular suspense or excess credit contract.	No
	<b>Note:</b> The suspense and excess credit contracts are listed when these contracts are associated with the account	
Check Number	Used to search a payment event which includes payment made through a particular check.	No
Payment Date	Used to search payment events which include payments created from a particular date onwards.	No
To	Used to search payment events which include payments created till a particular date.	No
MICR ID	Used to search payment events which include payments made with a particular MICR code.	No

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Payment Event Information	Displays additional information about the payment event.
	<b>Note:</b> It has a link. On clicking the link, the <b>Payment Event</b> screen appears where you can view the details of the respective payment event.
Payment Date	Displays the date when the payments were created.
Tender Amount	Displays the tender amount.
Payment Event ID	Displays the payment event ID.

If you want to refund all payments of a payment event, you need to select the check box corresponding to the payment event and then click the **Add** button in the **Search Results** section. If all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details** zone on the **Main** tab. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

**Note:** If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

## Payments

The **Payments** zone lists only those payments which are created through the payment event and are currently in the **Frozen** status. This zone contains the following columns:

Column Name	Column Description
Payment ID	Displays the payment ID.
	<b>Note:</b> It has a link. On clicking the link, the <b>Payment</b> screen appears where you can view the details of the respective payment.
Payee Account Information	Displays additional information about the account for which the payment was made.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Payment Amount	Displays the payment amount.
Payment Currency	Indicates the currency in which the payment was made.
Payment Status	Indicates the status of the payment.
Match Type	Indicates the match type using which the payment was matched.
Match Value	Indicates the entity (such as bill, contract, and so on) against which the payment was matched.
Amount Refunded	Displays the amount which is already refunded to the payor account.

You can select one or more payments and click the **Add** button in this zone to add selected payments to the refund request.

By default, the **Payments** zone does not appear in the **Payments** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the payment event in the **Search Payment Event** zone.

## Creating a Refund Request

### Prerequisites

To create a refund request, you should have:

- Refund request types defined in the application

### Procedure

To create a refund request:

1. Do either of the following:

If you want to...	Then...
Define a refund request from the Account Receivable Central screen	<ol style="list-style-type: none"> <li>a. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Account Receivable Central</b>.</li> <li>c. Search for the bill in the <b>Account Receivable Central</b> screen.</li> <li>d. In the <b>Search Results</b> section, select the required bill and then click <b>Refund</b>.</li> </ol>
	<b>Note:</b> Only one bill at a time is allowed to select for <b>Refund Request</b> from the <b>Account Receivable Central</b> screen.
Define a refund request from the Refund Request screen	<ol style="list-style-type: none"> <li>a. Click the <b>Main</b> link in the <b>Application</b> toolbar.</li> </ol>

If you want to...	Then...
	<p>A list appears.</p> <p><b>b.</b> From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Refund/Write Off Request</b>.</p> <p>A sub-menu appears.</p> <p><b>c.</b> Click the <b>Add</b> option from the <b>Refund/Write Off Request</b> sub-menu.</p>
<b>Define a refund request from the Payment Event Summary screen</b>	<p><b>a.</b> Click the <b>Main</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p><b>b.</b> From the <b>Main</b> menu, select <b>Payments</b> and then click <b>Payment Event Summary</b>.</p> <p><b>c.</b> Search for the payment event (whose payments you want to refund) in the <b>Payment Event Summary</b> screen.</p> <p><b>d.</b> In the <b>Search Results</b> section, click the <b>Broadcast</b> (📢) icon corresponding to the payment event whose payments you want to view.</p> <p>The <b>Payments</b> zone appears.</p> <p><b>e.</b> Select the check box corresponding to the payments that you want to refund.</p> <p><b>f.</b> Click the <b>Refund</b> button in the <b>Payments</b> zone.</p>

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	Displays the type of request (refund or write off) to be created.	Not applicable
	<p><b>Note:</b></p> <p>This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen.</p> <p>This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.</p>	
Refund/Write Off Request Type	Used to indicate the request type using which you want to create the refund or write off request.	Yes
	<p><b>Note:</b> The refund request types are listed when you set the <b>Action</b> field to <b>Refund</b> and the write off request types are listed when you set the <b>Action</b> field to <b>Write Off</b>.</p>	
Account	Used to indicate the account for which you want to create the refund or write off request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen.</p> <p>This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.</p> <p>You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the respective field.</p>	

**Tip:**

Alternatively, you can access the **Select Request Type** screen:

- By clicking the **Add** button in the **Page Title** area of **Refund/Write Off Request** screen.
- By selecting the payment which you want to refund in the **Payment Event Summary** screen and then clicking the **Refund** button. Note that the system will allow you to refund only those payments which are in the **Frozen** status and matched against the suspense or excess credit contract.

2. Select the required refund request type from the respective field.
3. Click **Save**.

The refund request is defined and the status of the refund request is set to **Draft**. The **Refund Request** screen appears where you can view the details of the refund request. It contains the following tabs:

**Note:** The refund request can be created only for bill with outstanding amount lesser than zero.

- **Main** – Displays information about the refund request. It contains the following zones:
    - **Refund Request** – Displays the details of the refund request.
    - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Payments** – Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the refund request.
4. Add payment events, payments, or credit bill line items that you want to refund.
  5. Edit the refund amount of each entity, if required.
  6. Define characteristics for the refund request, if required.
  7. Override the address if you want to sent the refund to an address other than the account's main customer address.

How to define a characteristic for a refund request	<a href="#">Defining a Characteristic for a Refund Request</a> on page 2383

## Defining a Characteristic for a Refund Request

### Prerequisites

To define a characteristic for a refund request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request**)

### Procedure

To define a characteristic for a refund request:

- Search for the refund request in the **Refund/Write Off Request** screen.
- In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose details you want to edit.  
The **Refund Request** screen appears.
- Click the **Edit** button in the **Refund Request** zone.  
The **Edit Refund Request** screen appears.

**Note:** The **Edit** button appears only when the refund request is in the **Draft** status.

- Ensure that the **Characteristics** section is expanded when you are editing the refund request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the refund request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the refund request.

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	

5. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the refund request, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove a characteristic from the refund request, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Adding a Payment Event to the Refund Request

### Prerequisites

To add a payment event to the refund request, you should have:

- Payments made by the account for which you need to create the refund request

### Procedure

To add a payment event to the refund request:

1. Click the **Payments** tab in the **Refund Request** screen.  
The **Payments** tab appears.
2. Filter the payment events, if required, in the **Search Payment Event** zone.

**Note:** You can only refund payments, which are matched against suspense or excess credit contracts, to the payor account. Therefore, you can only view payment events which includes payments matched against suspense or excess credit contracts. If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

3. Select the check box corresponding to the payment event, whose payments you want to refund, in the **Search Results** section.

**Note:** You can add more than one payment event to the refund request at the same time.

4. Click **Add**.  
A message appears indicating that the selected payment events are added to the refund request.
5. Click **OK**.

Note that the entity is added in the **Refund Details** zone on the **Main** tab.

**Note:**

You can only refund payments which are in the **Frozen** status.

If all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details** zone. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

## Adding a Credit Bill to the Refund Request

You can refund the credit bills to the account.

### Prerequisites

To add a credit bill to the refund request, you should have:

- Completed bills for the account with one or more credit line items

### Procedure

To add a credit bill to the refund request:

- Click the **Bills** tab in the **Refund Request** screen.  
The **Bills** tab appears.
- Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

- Do either of the following:

If...	Then...
A bill has all credit line items and you want to add the credit bill to the refund request	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, select the bills that you want to refund.</li> <li>Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol>
	<b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.
A bill has credit balance and one or more debit line items and you want to add the credit bill to the refund request	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, select the bills that you want to refund.</li> <li>Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol>
	<b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.

- Click **Add**.

A message appears indicating that the selected bills are added to the refund request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

- Click **OK**.

Note that all the credit bill segments or adjustments of the bills are added in the **Refund Details** zone on the **Main** tab.

### Note:

Irrespective of whether you select a credit bill, or credit bill segments or adjustments, the credit bill segments or adjustments are added in the **Refund Details** zone. The credit bill is not added to the **Refund Details** zone.

The system will not allow you to add a debit line item to the **Refund Details** zone.

## Adding a Credit Bill Line Item to the Refund Request

You can refund the credit bill line items, such as bill segments and adjustments, to the account. While adding a credit bill line item to the refund request, you can either:

- Directly add all credit line items of a bill to the refund request by adding the bill which has all bill segments and adjustments in credit
- Individually add a credit bill segment or adjustment of a bill (with one or more credit line items) to the refund request

**Prerequisites**

To add a credit bill line item to the refund request, you should have:

- Completed bills for the account with one or more credit line items

**Procedure**

To add a credit bill line item to the refund request:

1. Click the **Bills** tab in the **Refund Request** screen.  
The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

3. Do either of the following:

If...	Then...
A bill has all credit line items and you want to add a particular credit bill line item to the refund request	<ol style="list-style-type: none"> <li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li> <li>b. Select the check box corresponding to the credit bill segment or adjustment that you want to refund.</li> </ol>
A bill has credit balance and one or more debit line items	<ol style="list-style-type: none"> <li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li> <li>b. Select the check box corresponding to the credit bill segment or adjustment that you want to refund.</li> </ol>
A bill has debit balance and one or more credit line items	<ol style="list-style-type: none"> <li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li> </ol>

If...	Then...
	<b>b.</b> Select the check box corresponding to the credit bill segment or adjustment that you want to refund.

4. Click **Add**.

A message appears indicating that the selected bill segments or adjustments are added to the refund request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

5. Click **OK**.

Note that the credit bill segments or adjustments are added in the **Refund Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a credit bill, or credit bill segments or adjustments, the credit bill segments or adjustments are added in the **Refund Details** zone. The credit bill is not added to the **Refund Details** zone.

The system will not allow you to add a debit line item to the **Refund Details** zone.

## Editing a Refund Request

**Prerequisites**

To edit a refund request, you should have:

- Adjustment types with A/P request type defined in the application

**Procedure**

To edit a refund request:

- Search for the refund request in the **Refund/Write Off Request** screen.
- In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose details you want to edit.  
The **Refund Request** screen appears.
- Click the **Edit** button in the **Refund Request** zone.

The **Edit Refund Request** screen appears. It contains the following section:

Field Name	Field Description	Mandatory (Yes or No)
Refund Request Information	Displays information about the refund request.	Not applicable
Account Information	Indicates the account for which the refund request is created.	Not applicable
Person Name	Used to indicate the person for whom the refund request is created.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> The system maintains a log when you edit the person name in a refund request. A log is created in the following format:</p> <pre>Person Name is changed; ' Old Value: &lt;OLD NAME&gt;; New ' Value: &lt;NEW NAME&gt;</pre>	
Override Address	<p>Used to indicate whether the account's mailing address must be overridden.</p> <p><b>Note:</b></p> <p>By default, the account's main customer's address appears in the following fields — Address 1, Address 2, Address 3, Address 4, City, Country, State, and Postal. You can override the address in these fields, if required.</p> <p>The system maintains a log when you edit the address in a refund request. A log is created in the following format:</p> <pre>Address is changed; Old ' Value: &lt;OLD ADDRESS&gt;; New ' Value: &lt;NEW ADDRESS&gt;</pre>	No
Address 1	Used to specify the house number and apartment name.	No
Address 2	Used to specify the street name.	No
Address 3	Used to specify any landmark, if available.	No
Address 4	Used to specify the village, town, or city name.	No
City	Used to specify the city name.	No
Country	Used to specify the country name.	No
State	Used to specify the state name.	No
Postal	Used to specify the postal or zip code.	No
Comments	Used to specify additional information about the refund request.	No

In addition, this screen contains the following two sections:

- **Characteristics** — Used to define the characteristics for the refund request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the refund request.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		<b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the refund request.

4. Modify the details of the refund request, if required.
5. Define, edit, or remove characteristics of the refund request, if required.
6. Click **Save**.

The changes made to the refund request are saved.

## Editing the Refund Details

### Prerequisites

To edit the refund details, you should have:

- Adjustment types with A/P request type defined in the application

### Procedure

To edit the refund details:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose bill line item details you want to edit.  
The **Refund Request** screen appears. You can edit the bill line items by either of the following ways:

If...	Then
Select the bill whose details you want to edit in the <b>Refund Details</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.	The <b>Edit Request Details</b> screen appears.
In the <b>Refund Details</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items details you want to edit.	The <b>Bill Line Items</b> zone appears.
	<b>Note:</b> This zone appears when the Entity Type is <b>Bill</b> .
	<p><b>a.</b> Select the bill line item whose details you want to edit in the <b>Bill Line Items</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.</p> <p>The <b>Edit Request Details</b> screen appears.</p>

**Note:** A bill line item from the refund request can be edited when the refund request is in the **Draft** status.

The **Edit Request Details** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request ID	Displays the refund request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable
Adjustment Type	<p>Indicates the adjustment type of the refund request type.</p> <p>You can search for an adjustment type by clicking the <b>Search</b>(🔍) icon corresponding to the field.</p>	No

In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	<p>Indicates the entity type. The valid values are</p> <ul style="list-style-type: none"> <li>Adjustments</li> <li>Bill</li> <li>Bill Segment</li> <li>Payment Event</li> <li>Payment</li> </ul>
Entity ID	Displays the entity ID.
Entity Amount	Displays the entity amount.
Currency	Displays the currency in which the entity was created.
Request Amount	Displays the amount that must be refunded.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created.

Column Name	Column Description
	<b>Note:</b> You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the field.
Bill ID	Displays the bill ID.

In addition to the above columns, the screen has following button:

Button Name	Button Description
Override	Used to override an adjustment type of the refund request.

<b>Note:</b> In the <b>Bill Line Items</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill line item which you want to delete Pagination is used to display limited number of records in the <b>Search Results</b> section. By default, 10 records are displayed in the <b>Search Results</b> section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as <b>First</b> (◀), <b>Previous</b> (◀), <b>Next</b> (▶), and <b>Last</b> (▶) to navigate between pages. You can also select the page to which you want to navigate from the <b>Go To</b> list. The values appear in the <b>Page Limit</b> list when you define values for the <b>PAGE_NUMBER</b> lookup field.
---

3. Modify the details of the bill line items.
4. Click **Save**.  
The changes made to the refund bill line items are saved.

## Submitting a Refund Request

**Prerequisites**

To submit a refund request, you should have:

- Payment events, payments, or credit bill line items added in the refund request

**Procedure**

To submit a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request that you want to submit.  
The **Refund Request** screen appears.
3. Click the **Submit** button in the **Refund Request** zone.

The system behaves in the following manner:

If...	Then...
The <b>Approval Required</b> and <b>Hierarchical Approval</b> check boxes are selected in the refund request type using which the refund request is created	A To Do of the <b>C1-REFRQ</b> To Do type is created and sent to the approver at the first level in the approval hierarchy, and the status of the refund request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is selected, but the <b>Hierarchical Approval</b> check box is not selected in the refund request type using which the refund request is created	A To Do of the <b>C1-REFRQ</b> To Do type is created and sent to the approver at the hierarchy level where the total refund amount falls within the threshold limit. In addition, the status of the refund request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is not selected in the refund request type using which the refund request is created	The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to <b>Processed</b> .

If...	Then...
	<p><b>Note:</b> The refund adjustments are created in the <b>Frozen</b> status. If a match event is present for the credit bill line items (such as bill segments and adjustments) and for the payments which are matched against the excess credit contract, the existing match event is stamped on the refund adjustments and on the corresponding financial transactions. However, when a match event is not present for the payments which are matched against the suspense contract or if the match events does not exist, a new match event is created and stamped on the refund adjustments and on the corresponding financial transactions. If you are doing a partial refund for any entity, the corresponding match event status is set to <b>Open</b>. However, if you are refunding the entire eligible amount, the corresponding match event status is set to <b>Balanced</b>.</p>
<p>The total refund amount is less than minimum refund amount</p>	<p>The write up adjustment is created using the write up adjustment type specified in the refund request type. In addition, the status of the refund request is changed to <b>Processed</b>.</p> <p><b>Note:</b> The write up adjustment is created in the <b>Frozen</b> status. If a match event is present for the credit bill line items (such as bill segments and adjustments) and for the payments which are matched against the excess credit contract, the existing match event is stamped on the write up adjustment and on the corresponding financial transaction. However, when a match event is not present for the payments which are matched against the suspense contract or if the match events does not exist, a new match event is created and stamped on the write up adjustment and on the corresponding financial transaction. ## Rejecting a Refund Request

### Prerequisites

To reject a refund request, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting a refund request, you need to specify the reason why you want to reject the refund request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-RefundReq** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a refund request submitted by you.

### Procedure

To reject a refund request:

1. Do either of the following:

If you want to...	Then...
Reject a refund request through the Refund/Write Off Request screen	<ol style="list-style-type: none"> <li>Search for the refund request in the <b>Refund/Write Off Request</b> screen.</li> <li>In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the refund request which you want to review.</li> </ol>
Reject a refund request from the To Do List screen	<ol style="list-style-type: none"> <li>Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>Enter <b>C1-REFRQ</b> in the <b>To Do Type</b> field.</li> <li>Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>Click the link in the <b>Message</b> column corresponding to the To Do of the refund request that you want to review.</li> </ol>

The **Refund Request** screen appears.

- Review the refund request details.
- Click the **Reject** button in the **Refund Request** zone.

The **Reject Refund Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the refund request.	Yes
Comments	Used to specify additional information while rejecting the refund request.	No

**Note:** The **Reject** button appears when:

- The refund request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the refund request.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

The status of the refund request is changed to **Rejected**.

## Viewing the Log of a Refund Request

### Procedure

To view the log of a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose log you want to view.

The **Refund Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the refund request. It contains the following zones:
  - **Refund Request** – Displays the details of the refund request.
  - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Bill Line Items** — Displays the details of the bill which must be refunded.

#### Note:

This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Refund Details** zone.

- **Payments** — Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the refund request.
3. Click the **Log** tab.
  4. View the log of the refund request in the **Refund Request Log** zone.

**Note:** You can manually add a log entry for the refund request by clicking the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.

## Voiding a Refund Request

There might be situations when incorrect refund request is processed in the system. In such case, the system provides you with an ability to void or cancel the refund request. However, note that you can void a refund request when the refund request is in the **Processed** status.

### Prerequisites

To void a refund request, you should have:

- Void reasons defined in the application

**Note:** While voiding a refund request, you need to specify the reason why you want to void the refund request. You can select the appropriate void reason when you have defined the reasons for the **Voided** status of the **C1-RefundReq** business object in the **Status Reason** screen.

### Procedure

To void a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request that you want to void.  
The **Refund Request** screen appears.
3. Click the **Void** button in the **Refund Request** zone.

The **Void Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to void the refund request.	Yes
Comments	Used to specify additional information while voiding the refund request.	No

**Note:** The **Void** button appears when the refund request is in the **Processed** status.

4. Select the void reason from the **Status Reason** list.
5. Click **Save**.  
The status of the refund request is changed to **Voided**.

**Note:** The **C1-REFVOID** algorithm cancels all the frozen adjustments created for the refund request which is in the **Processed** state.

## Write Off Request

Once you create a write off request, the **Write Off Request** screen allows you to:

- Edit and delete a write off request
- View the details of a write off request
- Submit a write off request for approval
- Approve or reject a write off request
- View the log of a write off request
- Add a log entry for a write off request
- Cancel a write off request

This screen consists of the following tabs:

- **Main** – Displays information about the write off request. It contains the following zones:
  - **Write Off Request** – Displays the details of the write off request.
  - **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bill Line Items** — Displays the details of the bill which must be written off.

**Note:**

This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Write Off Details** zone.

- **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. It contains the following zones:
  - **Search Bills** — Lists completed bills of the account which are either with debit balance or have one or more debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** — Lists the debit and credit bill segments and adjustments of the bill.

This tab appears when the write off request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the write off request.

## Write Off Request - Main

---

The **Main** tab displays information about the write off request. It contains the following zones:

- [Write Off Request](#) on page 2403
- [Write Off Details](#) on page 2405
- [Bill Line Items](#) on page 2406

## Write Off Request

The **Write Off Request** zone displays the details of the write off request. This zone contains the following sections:

- **Main** — This section provides basic information about the write off request. It contains the following fields:

Field Name	Field Description
Write Off Request Information	Displays information about the write off request.
Write Off Request Type	Indicates the write off request type using which the write off request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Refund/Write Off Request Type</b> screen appears where you can view the details of the write off request type.
Status	Indicates the status of the write off request. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> <li>• Rejected</li> <li>• Processed</li> <li>• Cancelled</li> </ul>
Status Reason	Indicates the reason why the write off request is rejected or cancelled.  <b>Note:</b> This field appears when the write off request is in the <b>Rejected</b> or <b>Cancelled</b> status. It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the rejected or cancelled reason.
Account Information	Indicates the account for which the write off request is created.

Field Name	Field Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Comments	Displays additional information about the write off request.
Total Write Off Amount	Displays the total write off amount.

- **Characteristics** — Lists the characteristics defined for the write off request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the write off request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the write off request.
	<b>Note:</b> The <b>Edit</b> button appears when the write off request is in the <b>Draft</b> status.
Delete	Used to delete the write off request.
	<b>Note:</b> The <b>Delete</b> button appears when the write off request is in the <b>Draft</b> status.
Submit	Used to submit the write off request for approval.
	<b>Note:</b> The <b>Submit</b> button appears when the write off request is in the <b>Draft</b> status.
Approve	Used to approve the write off request.
	<b>Note:</b> The <b>Approve</b> button appears when: <ul style="list-style-type: none"> <li>• The write off request is in the <b>Approval In Progress</b> status.</li> <li>• A user with the approval To Do role is reviewing the write off request.</li> </ul>
Reject	Used to reject the write off request.
	<b>Note:</b> The <b>Reject</b> button appears when: <ul style="list-style-type: none"> <li>• The write off request is in the <b>Approval In Progress</b> status.</li> <li>• A user with the approval To Do role is reviewing the write off request.</li> </ul>
Cancel	Used to cancel the write off request.
	<b>Note:</b> The <b>Cancel</b> button appears when the write off request is in the <b>Processed</b> status.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the write off request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the write off request status is updated
Create Date/Time	Displays the date and time when the write off request is created.

## Write Off Details

The **Write Off Details** zone lists the debit bill line items (such as bill segments and adjustments) that you have added to the write off request. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the entity ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.
Currency	Indicates the currency in which the entity was created.
Entity Amount	Displays the entity amount.
Write Off Amount	Displays the amount that must be written off.
	<b>Note:</b> By default, the amount which is eligible for write off appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the write off adjustment must be created.
	<b>Note:</b> By default, the adjustment type specified in the write off request type appears in this column. You can change the adjustment type, if required, by editing the write off request.
Adjustment Information	Displays information about the write off adjustment.

Column Name	Column Description
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.</p> <p>The data appears in this column when the status of the write off request is <b>Processed</b>.</p> <p>The information string appears when an algorithm of the <b>C1-ADI-INFO</b> algorithm type is attached to the <b>Adjustment Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options — Framework</b> screen.</p>

**Note:**

On clicking the **Broadcast** (📡) icon corresponding to the entity type as **Bill**, the **Bill Line Items** zone appears with the details of the respective bill.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

## Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.
Currency	Displays the currency in which the entity was created.
Entity Amount	Displays the bill segment or adjustment amount.
Request Amount	Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.
	<b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Adjustment Information	Displays information about the refund adjustment.

By default, the **Bill Line Items** zone does not appear in the **Main** tab. It appears only when you click the **Broadcast** (📡) icon corresponding to the bill in the **Write Off Details** zone.

## Write Off Request - Bills

The **Bills** tab allows you to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. It contains the following zones:

- [Search Bills](#) on page 2407
- [Bill Line Items](#) on page 2408

### Search Bills

The **Search Bills** zone lists completed bills of the account which are either with debit balance or have one or more debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for a bill using the bill details. The valid values are: <ul style="list-style-type: none"> <li>• Bill Details</li> <li>• Bill and Price Item Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Bill Details</b> option is selected.	
Bill ID	Used to search a particular bill.	No
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No
Price Item	Used to search bills which are created for a particular price item.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when you select <b>Bill and Price Item Details</b> option from the <b>Search By</b> list. You can search for a price item by clicking the <b>search</b> (🔍) icon corresponding to the field.	

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Amount	Displays the total bill amount.

If you want to write off a bill with debit balance and all debit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All debit bill segments and adjustments of the bill are added in the **Write Off Details** zone on the **Main** tab. However, if you select a bill (with debit balance) which contains one or more credit line items or if you select a bill (with credit balance) which contains one or more debit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

## Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application.

Column Name	Column Description
	<b>Note:</b> It has a link. If the entity is a bill segment, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment on clicking the link. However, if the entity is an adjustment, the <b>Adjustment</b> screen appears with the details of the respective adjustment on clicking the link.
Entity Amount	Displays the bill segment or adjustment amount.
Eligible Amount	Displays the bill segment or adjustment amount which is eligible for write off. In other words, it means entity amount minus amount written off.  <b>Note:</b> If the bill segment or adjustment has credit balance, the eligible amount for write off would be zero.
Amount Written Off	Displays the amount which is already written off to the account.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

You can select one or more debit bill segments or adjustments and click the **Add** button in this zone to add selected debit bill segments or adjustments to the write off request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** (📢) icon corresponding to the bill in the **Search Bills** zone.

## Write Off Request - Log

The **Log** tab contains the following zone:

- [Write Off Request Log](#) on page 2409

### Write Off Request Log

The **Write Off Request Log** zone lists the complete trail of actions performed on the write off request. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the write off request.
Details	Displays the details about the action performed on the write off request.
User	Indicates the user who has performed the action on the write off request.
Log Type	Indicates the type of log.

Column Name	Column Description
Related Object	Indicates the object or entity which is generated when the action is performed on the write off request.
Status Reason	Displays the status reason of action performed on the write off request.

**Note:** You can manually add a log entry for the write off request by clicking the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

The **Add Request Log** window appears. Enter **Log Details** and click **Save**. The write off request log is added.

## Creating a Write Off Request

### Prerequisites

To create a write off request, you should have:

- Write off request types defined in the application

### Procedure

To create a write off request:

1. Do either of the following:

If you want to...	Then...
Define a write off request from the Account Receivable Central screen	<ol style="list-style-type: none"> <li>a. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Account Receivable Central</b>.</li> <li>c. Search for the bill in the <b>Account Receivable Central</b> screen.</li> <li>d. In the <b>Search Results</b> section, select the required bill and then click <b>Write Off</b>.</li> </ol> <p><b>Note:</b> Only one bill at a time is allowed to select for <b>Write Off Request</b> from the <b>Account Receivable Central</b> screen.</p>
Define a write off request from the Write Off Request screen	<ol style="list-style-type: none"> <li>a. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Refund/Write Off Request</b>. A sub-menu appears.</li> <li>c. Click the <b>Add</b> option from the <b>Refund/Write Off Request</b> sub-menu.</li> </ol>

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	Displays the type of request (refund or write off) to be created.	Yes
	<b>Note:</b> This field is pre-populated if the write off request is created from the <b>Account Receivable Central</b> screen.  This field is editable if the write off request is created from the <b>Refund/Write Off Request</b> screen.	
Refund/Write Off Request Type	Used to indicate the request type using which you want to create the refund or write off request.	Yes
	<b>Note:</b> The refund request types are listed when you set the <b>Action</b> field to <b>Refund</b> and the write off request types are listed when you set the <b>Action</b> field to <b>Write Off</b> .	
Account	Used to indicate the account for which you want to create the refund or write off request.	Yes
	<b>Note:</b> This field is pre-populated if the write off request is created from the <b>Account Receivable Central</b> screen.  This field is editable if the write off request is created from the <b>Refund/Write Off Request</b> screen.  You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the respective field.	

**Tip:** Alternatively, you can access the **Select Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request** screen.

2. Select the required write off request type and account from the respective fields.
3. Click **Save**.

The write off request is defined and the status of the write off request is set to **Draft**. The **Write Off Request** screen appears with the details of the write off request. It contains the following tabs:

**Note:** The write off request can be created only for bill with outstanding amount greater than zero.

- **Main** – Displays information about the write off request. It contains the following zones:
  - **Write Off Request** – Displays the details of the write off request.

- **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the write off request.
4. Add debit bill line items that you want to write off.
  5. Edit the write off amount of each entity, if required.
  6. Define characteristics for the write off request, if required.

## Defining a Characteristic for a Write Off Request

### Prerequisites

To define a characteristic for a write off request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request**)

### Procedure

To define a characteristic for a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose details you want to edit.  
The **Write Off Request** screen appears.
3. Click the **Edit** button in the **Write Off Request** zone.  
The **Edit Write Off Request** screen appears.

**Note:** The **Edit** button appears only when the write off request is in the **Draft** status.

4. Ensure that the **Characteristics** section is expanded when you are editing the write off request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the write off request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the write off request.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the write off request.

5. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the write off request, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove a characteristic from the write off request, click the **Delete** (🗑) icon corresponding to the characteristic.

## Adding a Debit Bill to the Write Off Request

### Prerequisites

To add a debit bill to the write off request, you should have:

- Completed bills for the account with one or more debit line items

### Procedure

To add a debit bill to the write off request:

- Click the **Bills** tab in the **Write Off Request** screen.  
The **Bills** tab appears.
- Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

- Do either of the following:

If...	Then...
A bill has all debit line items and you want to add the debit bill to the write off request	<p><b>a.</b> In the <b>Search Bills</b> zone, select the bills that you want to write off.</p> <p><b>b.</b> Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</p>
	<b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.
A bill has debit balance and one or more credit line items and you want to add the debit bill to the write off request	<p><b>a.</b> In the <b>Search Bills</b> zone, select the bills that you want to write off.</p> <p><b>b.</b> Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</p>
	<b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.

4. Click **Add**.

A message appears indicating that the selected bills are added to the write off request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

5. Click **OK**.

Note that the debit bill segments or adjustments are added in the **Write Off Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a debit bill, or debit bill segments or adjustments, the debit bill segments or adjustments are added in the **Write Off Details** zone. The debit bill is not added to the **Write Off Details** zone.

The system will not allow you to add a credit line item to the **Write Off Details** zone.

## Adding a Debit Bill Line Item to the Write Off Request

You can write off the debit bill line items, such as bill segments and adjustments, of the account. While adding a debit bill line item to the write off request, you can either:

- Directly add all debit line items of a bill to the write off request by adding the bill which has all bill segments and adjustments in debit
- Individually add a debit bill segment or adjustment of a bill (with one or more debit line items) to the write off request

**Prerequisites**

To add a debit bill line item to the write off request, you should have:

- Completed bills for the account with one or more debit line items

**Procedure**

To add a debit bill line item to the write off request:

1. Click the **Bills** tab in the **Write Off Request** screen.  
The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

3. Do any of the following:

If...	Then...
A bill has all debit line items and you want to add a particular debit bill line item to the write off request	<ol style="list-style-type: none"> <li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li> <li>b. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.</li> </ol>
A bill has debit balance and one or more credit line items	<ol style="list-style-type: none"> <li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li> <li>b. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.</li> </ol>
A bill has credit balance and one or more debit line items	<ol style="list-style-type: none"> <li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li> <li>b. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.</li> </ol>

4. Click **Add**.

A message appears indicating that the selected bill segments or adjustments are added to the write off request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

5. Click **OK**.

Note that the debit bill segments or adjustments are added in the **Write Off Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a debit bill, or debit bill segments or adjustments, the debit bill segments or adjustments are added in the **Write Off Details** zone. The debit bill is not added to the **Write Off Details** zone.

The system will not allow you to add a credit line item to the **Write Off Details** zone.

## Editing a Write Off Request

### Prerequisites

To edit a write off request, you should have:

- Adjustment types without A/P request type defined in the application

### Procedure

To edit a write off request:

- Search for the write off request in the **Refund/Write Off Request** screen.
- In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose details you want to edit.  
The **Write Off Request** screen appears.
- Click the **Edit** button in the **Write Off Request** zone.

The **Edit Write Off Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Write Off Request Information	Displays information about the write off request.	Not applicable
Account Information	Indicates the account for which the write off request is created.	Not applicable
Comments	Used to specify additional information about the write off request.	No

In addition, this screen contains the following two sections:

- Characteristics** — Used to define the characteristics for the write off request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the write off request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the write off request.

4. Modify the details of the write off request, if required.
5. Define, edit, or remove characteristics of the write off request, if required.
6. Click **Save**.

The changes made to the write off request are saved.

## Editing the Write Off Details

### Prerequisites

To edit the write off details, you should have:

- Adjustment types with A/P request type defined in the application

### Procedure

To edit the write off details:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose bill line item details you want to edit.  
The **Write Off Request** screen appears. You can edit the bill line items of the write off request by using either of the following ways:

If...	Then...
Select the bill whose details you want to edit in the <b>Write Off Details</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.	The <b>Edit Request Details</b> screen appears.
In the <b>Write Off Details</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items details you want to edit.	The <b>Bill Line Items</b> zone appears.
	<b>Note:</b> This zone appears when the Entity Type is <b>Bill</b> .  <b>a.</b> Select the bill line item whose details you want to edit in the <b>Bill Line Items</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.

If...	Then...
	The <b>Edit Request Details</b> screen appears.

**Note:** A bill line item from the write off request can be edited when the write off request is in the **Draft** status.

The **Edit Request Details** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request ID	Displays the write off request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable
Adjustment Type	Indicates the adjustment type of the write off request type.  You can search for an adjustment type by clicking the <b>Search</b> (🔍) icon corresponding to the field.	No

In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	Indicates the entity type. The valid values are <ul style="list-style-type: none"> <li>Adjustments</li> <li>Bill</li> <li>Bill Segment</li> <li>Payment Event</li> <li>Payment</li> </ul>
Entity ID	Displays the entity ID.
Entity Amount	Displays the entity amount.
Currency	Displays the currency in which the entity was created.
Request Amount	Displays the amount that must be write off.
Adjustment Type	Indicates the adjustment type using which the write off adjustment must be created.  <b>Note:</b> You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the field.
Bill ID	Displays the bill ID.

In addition to the above columns, the screen has following button:

Button Name	Button Description
Override	Used to override an adjustment type of the write off request.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. By default, 10 records are displayed in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** (<<), **Previous** (<), **Next** (>), and **Last** (>>) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

The values appear in the **Page Limit** list when you define values for the **PAGE\_NUMBER** lookup field.

3. Modify the details of the bill line items.
4. Click **Save**.  
The changes made to the write off bill line items are saved.

## Submitting a Write Off Request

### Prerequisites

To submit a write off request, you should have:

- Debit bill line items added in the write off request

### Procedure

To submit a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request that you want to submit.  
The **Write Off Request** screen appears.
3. Click the **Submit** button in the **Write Off Request** zone.

The system behaves in the following manner:

If...	Then
The <b>Approval Required</b> and <b>Hierarchical Approval</b> check boxes are selected in the write off request type using which the write off request is created	A To Do of the <b>C1-WOREQ</b> To Do type is created and sent to the approver at the first level in the approval hierarchy, and the status of the write off request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is selected, but the <b>Hierarchical Approval</b> check box is not selected in the write off request type using which the write off request is created	A To Do of the <b>C1-WOREQ</b> To Do type is created and sent to the approver at the hierarchy level where the total write off amount falls within the threshold limit. In addition, the status of the write off request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is not selected in the write off request type using which the write off request is created	The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to <b>Processed</b> .
	<b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b> . However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b> .
The total write off amount is less than the minimum threshold amount	The write off request is automatically approved by the system and write off adjustments are created using the specified adjustment types. In addition, the status of the write off request is changed to <b>Processed</b> .

If...	Then
	<b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b> . However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b> .

**Note:** The **Submit** button appears when the write off request is in the **Draft** status.

## Approving a Write Off Request

You can view the number of write off requests which are pending for approval in the **Refund/Write Off Request** screen. The approver can review, and accordingly approve or reject the write off request based on the observations.

**Note:** The system will not allow you to approve or reject a write off request submitted by you.

### Procedure

To approve a write off request:

1. Do either of the following:

If you want to...	Then...
Approve a write off request through the <b>Refund/Write Off Request</b> screen	<ol style="list-style-type: none"> <li>a. Search for the write off request in the <b>Refund/Write Off Request</b> screen.</li> <li>b. In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the write off request which you want to review.</li> </ol>
Approve a write off request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</li> </ol>

If you want to...	Then...
	<p>The <b>To Do Type for User Search</b> window appears.</p> <p>c. Enter <b>C1-WOREQ</b> in the <b>To Do Type</b> field.</p> <p>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p>f. Click the link in the <b>Message</b> column corresponding to the To Do of the write off request that you want to review.</p>

The **Write Off Request** screen appears.

- Review the write off request details.
- Click the **Approve** button in the **Write Off Request** zone.

The system behaves in the following manner:

If...	Then...
The <b>Hierarchical Approval</b> check box is selected in the write off request type using which the write off request is created and the total write off amount is greater than the threshold amount specified at the next level in the approval hierarchy	A To Do of the <b>C1-WOREQ</b> To Do type is created and sent to the approver at the next level in the approval hierarchy, and the status of the write off request remains as <b>Approval In Progress</b> .
The <b>Hierarchical Approval</b> check box is selected in the write off request type using which the write off request is created and the total write off amount is less than the threshold amount specified at the next level in the approval hierarchy	The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to <b>Processed</b> .
	<p><b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b>. However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b>.</p>
The <b>Hierarchical Approval</b> check box is not selected in the write off request type using which the write off request is created	The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to <b>Processed</b> .

If...	Then...
	<p><b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b>. However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b>.</p>

**Note:** The **Approve** button appears when:

- The write off request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the write off request.

## Rejecting a Write Off Request

### Prerequisites

To reject a write off request, you should have:

- Rejection reasons defined in the application

### Note:

While rejecting a write off request, you need to specify the reason why you want to reject the write off request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-WORequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a write off request submitted by you.

### Procedure

To reject a write off request:

1. Do either of the following:

If you want to...	Then...
<b>Reject a write off request through the Refund/Write Off Request screen</b>	<ol style="list-style-type: none"> <li>a. Search for the write off request in the <b>Refund/Write Off Request</b> screen.</li> </ol>

If you want to...	Then...
	<b>b.</b> In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the write off request which you want to review.
<b>Reject a write off request from the To Do List screen</b>	<b>a.</b> Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears. <b>b.</b> From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b> . The <b>To Do Type for User Search</b> window appears. <b>c.</b> Enter <b>C1-WOREQ</b> in the <b>To Do Type</b> field. <b>d.</b> Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears. <b>e.</b> Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos. <b>f.</b> Click the link in the <b>Message</b> column corresponding to the To Do of the write off request that you want to review.

The **Write Off Request** screen appears.

- Review the write off request details.
- Click the **Reject** button in the **Write Off Request** zone.

The **Reject Write Off Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the write off request.	Yes
Comments	Used to specify additional information while rejecting the write off request.	No

**Note:** The **Reject** button appears when:

- The write off request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the write off request.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.  
The status of the write off request is changed to **Rejected**.

## Viewing the Log of a Write Off Request

### Procedure

To view the log of a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose log you want to view.

The **Write Off Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the write off request. It contains the following zones:
  - **Write Off Request** – Displays the details of the write off request.
  - **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bill Line Items** — Displays the details of the bill which must be written off.

#### Note:

This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Write Off Details** zone.

- **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the write off request.
3. Click the **Log** tab
  4. View the log of the write off request in the **Write Off Request Log** zone.

**Note:** You can manually add a log entry for the write off request by clicking the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

## Adding a Log Entry for a Write Off Request

### Procedure

To add a log entry for a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose log you want to edit.

The **Write Off Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the write off request. It contains the following zones:

- **Write Off Request** – Displays the details of the write off request.
  - **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the write off request.
- Click the **Log** tab.  
The **Log** tab appears.
  - Click the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.  
The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the write off request.	Not applicable
Log Details	Used to specify additional comments for the write off request.	Yes

- Enter the comments in the **Log Details** field.
- Click **Save**.  
The log entry is added in the **Write Off Request Log** zone.

## Cancelling a Write Off Request

There might be situations when incorrect write off request is processed in the system. In such case, the system provides you with an ability to cancel the write off request. However, note that you can cancel a write off request when the write off request is in the **Processed** status.

#### Prerequisites

To cancel a write off request, you should have:

- Cancel reasons defined in the application

**Note:** While cancelling a write off request, you need to specify the reason why you want to cancel the write off request. You can select the appropriate cancel reason when you have defined the reasons for the **Cancelled** status of the **C1-WORequest** business object in the **Status Reason** screen.

#### Procedure

To cancel a write off request:

- Search for the write off request in the **Refund/Write Off Request** screen.
- In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request that you want to cancel.  
The **Write Off Request** screen appears.
- Click the **Cancel** button in the **Write Off Request** zone.

The **Cancel Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to cancel the write off request.	Yes
Comments	Used to specify additional information while cancelling the write off request.	No

**Note:** The **Cancel** button appears when the write off request is in the **Processed** status.

4. Select the cancel reason from the **Status Reason** list.
5. Click **Save**.  
The status of the write off request is changed to **Cancelled**.

**Note:** The **C1-WOCANCEL** algorithm cancels all the frozen adjustments created for the write off request which is in the **Processed** state.

- [Terms and Conditions Selection in a Deal Based on Characteristic Value](#)

Oracle Revenue Management and Billing enables you to create a deal for an existing customer, account, or prospect person. A deal facilitates you to simulate the proposed pricing on the proposed commitments, and thereby analyze the cost, revenue, and profitability of the deal. The system provides different ways in which you can simulate the pricing for an existing customer, account, or prospect person. You can use the following simulation types while creating a deal:

- **Customer** - This simulation type can be used while creating a deal for an existing customer or a prospect person. If you use this simulation type for an existing customer, the system does the following:
  - Copies the customer, all its accounts, and the customer hierarchy (i.e. its child persons and child persons' accounts), and creates the corresponding prospect persons and accounts in the system
  - Copies the price list assignments and price assignments of the customer, accounts, child persons and child persons' accounts, and assigns the price lists and pricing to the respective prospect persons and accounts in the **Proposed** status
  - Copies the product enrollments of the customer's and child persons' accounts, and enrolls the respective prospect accounts for the products in the **Proposed** status
  - Copies the commitments from the SQL-based billable charges of the customer's and child persons' accounts (based on the deal frequency and usage period), and accordingly adds proposed commitments for the respective prospect accounts

However, if you use this simulation type for a prospect person, you need to manually:

- Assign a price list and pricing to the prospect person, its accounts, and to its hierarchy
- Enroll the prospect account for a product
- Add commitments for the prospect account
- **Account** - This simulation type can be used while creating a deal for an existing account. If you use this simulation type, the system does the following:
  - Copies the account and creates the corresponding prospect account in the system
  - Copies the price list assignments and price assignments of the account and assigns the price lists and pricing to the respective prospect account in the **Proposed** status
  - Copies the product enrollments of the account, and enrolls the respective prospect account for the products in the **Proposed** status

- Copies the commitments from the SQI-based billable charges of the account (based on the deal frequency and usage period), and accordingly adds proposed commitments for the respective prospect account
- **Deal** - This simulation type can be used while creating a deal for an existing customer or a prospect person. If you use this simulation type for an existing customer, the system does the following:

- Copies the customer and creates the corresponding prospect customer in the system
- Copies the price list assignments and price assignments of the customer, and assigns the price lists and pricing to the respective prospect person in the **Proposed** status
- Copies the commitments from the SQI-based billable charges of the customer's accounts (based on the deal frequency and usage period), and accordingly adds the rolled up proposed commitments for the respective prospect person

However, if you use this simulation type for a prospect person, you need to manually:

- Assign a price list and pricing to the prospect person
- Add commitments for the prospect person

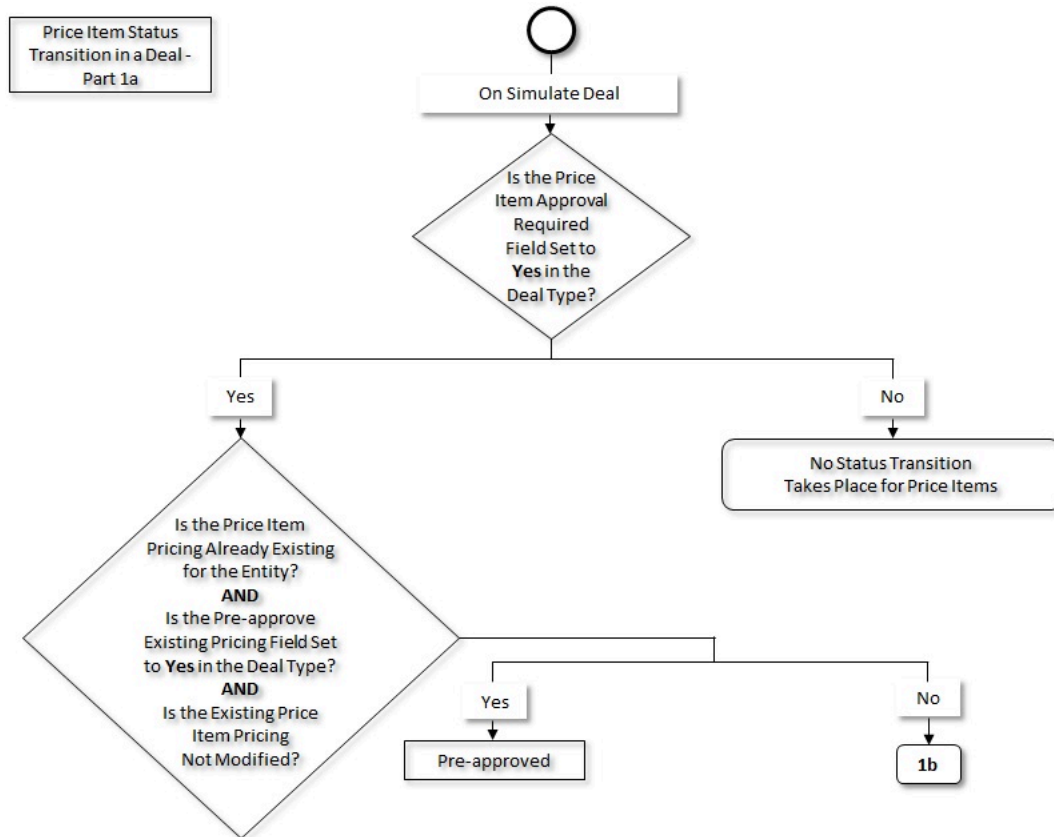

For more information about different stages involved in the deal lifecycle, see [Different Stages in Deal Lifecycle](#) on page 2464.

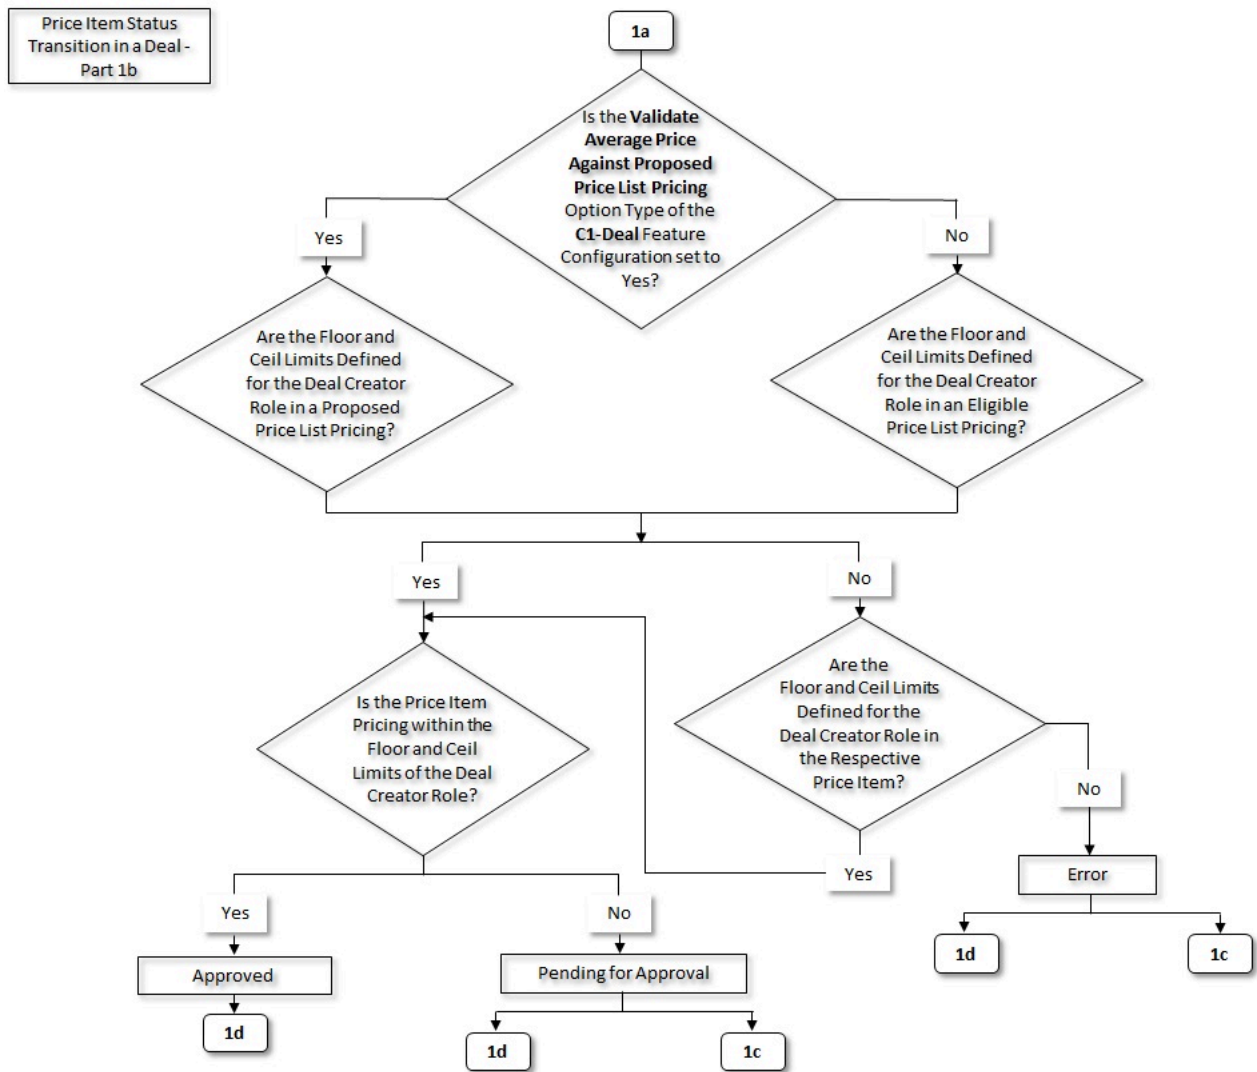

**Note:** The **Deal Management** feature is tested and certified on Google Chrome and not on Internet Explorer.

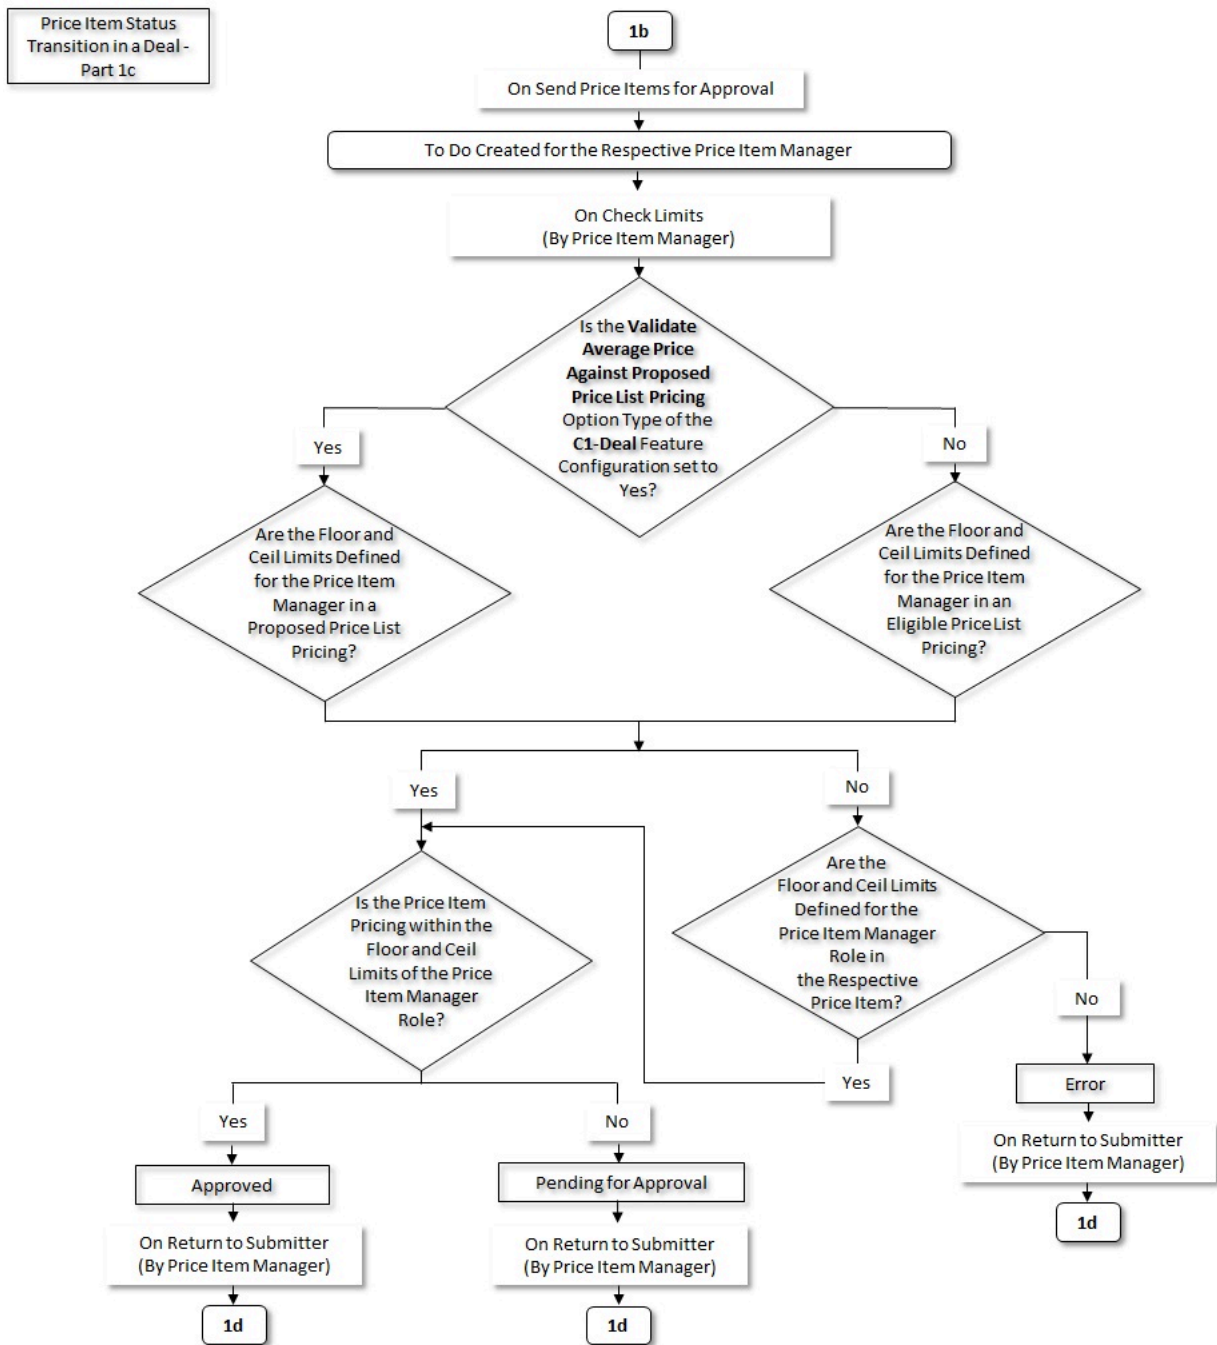

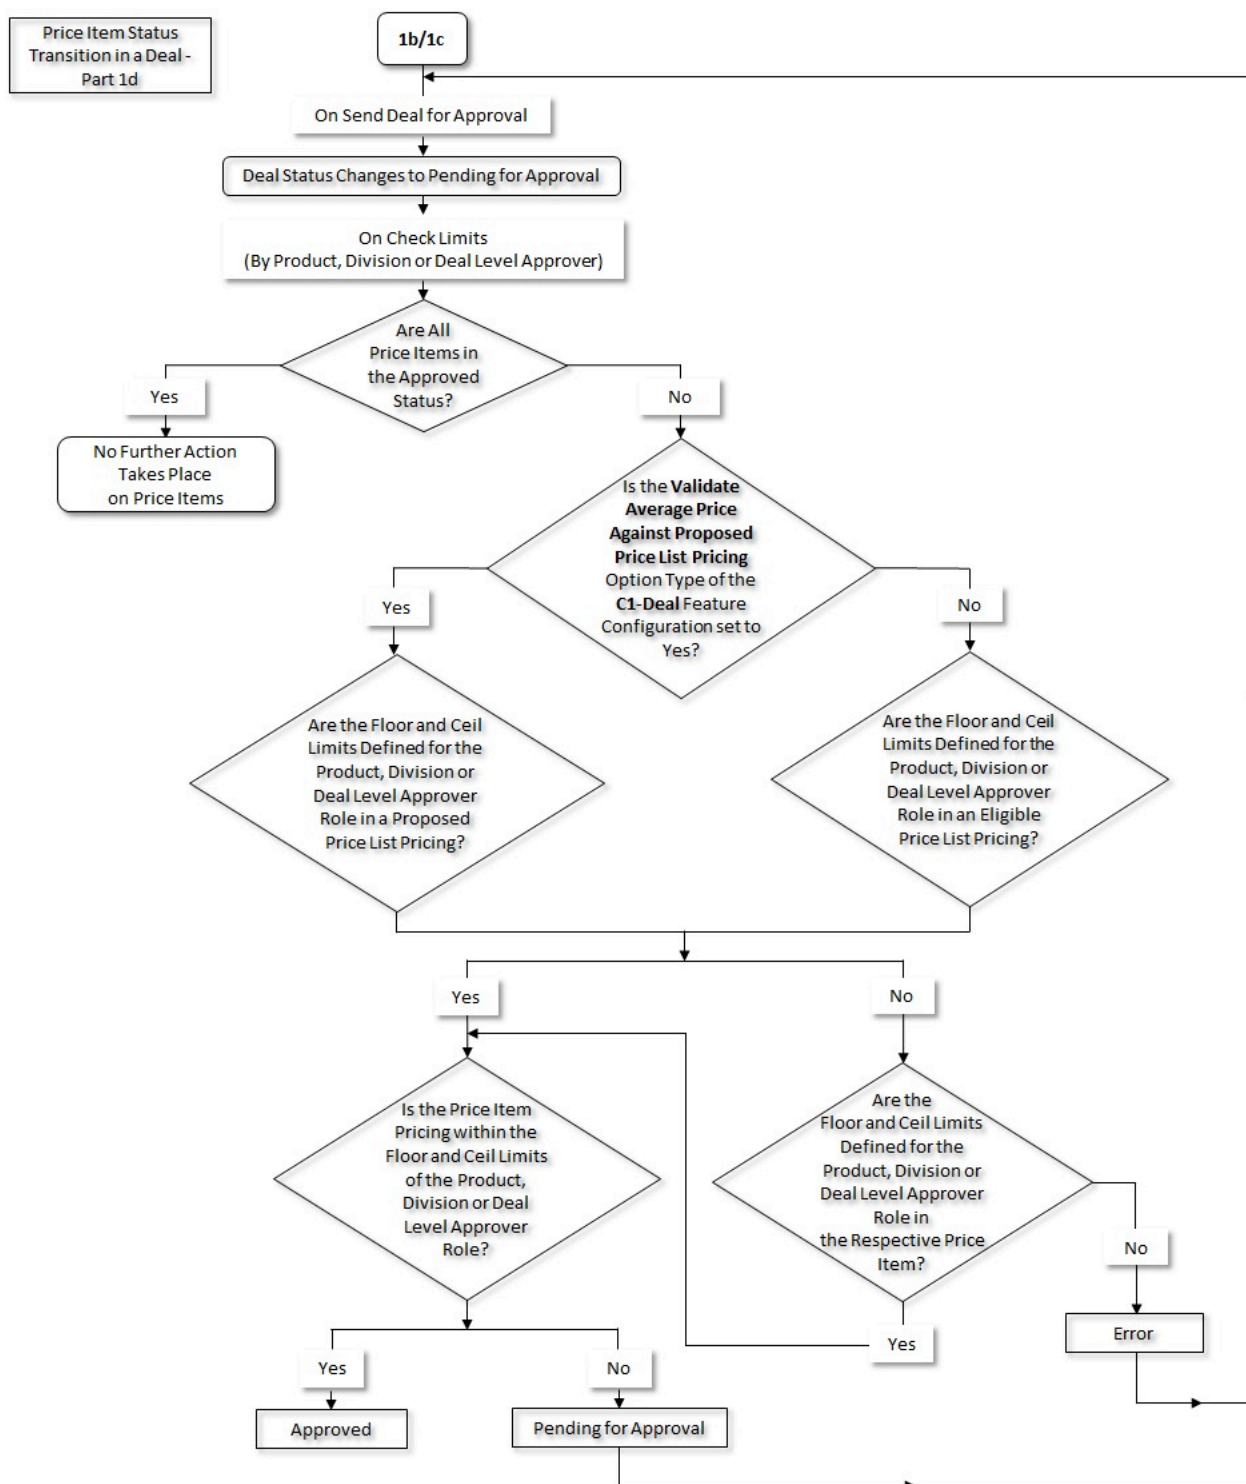

## Price Item Status Transition in a Deal

The following figure graphically indicates how a price item moves from one status to another in a deal lifecycle. Since the price item status transition flow spans across multiple pages, we have split the flow into four parts — Part 1a, Part 1b, Part 1c, and Part 1d.

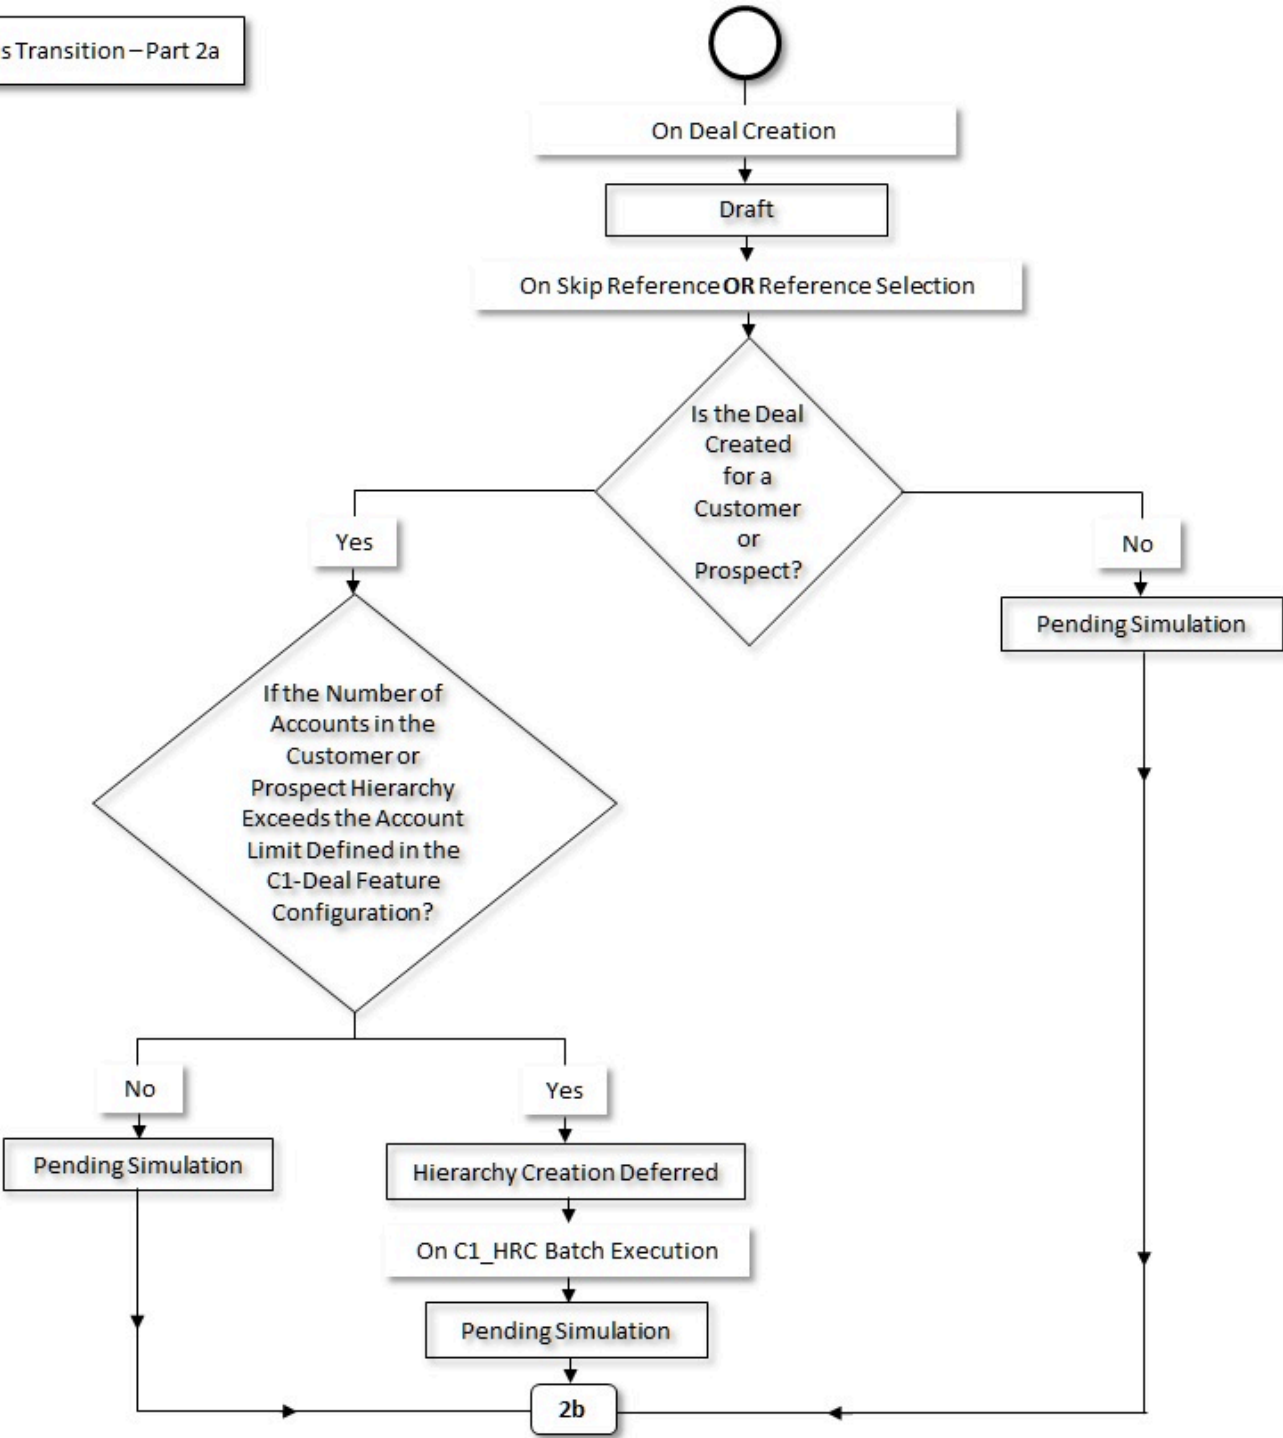

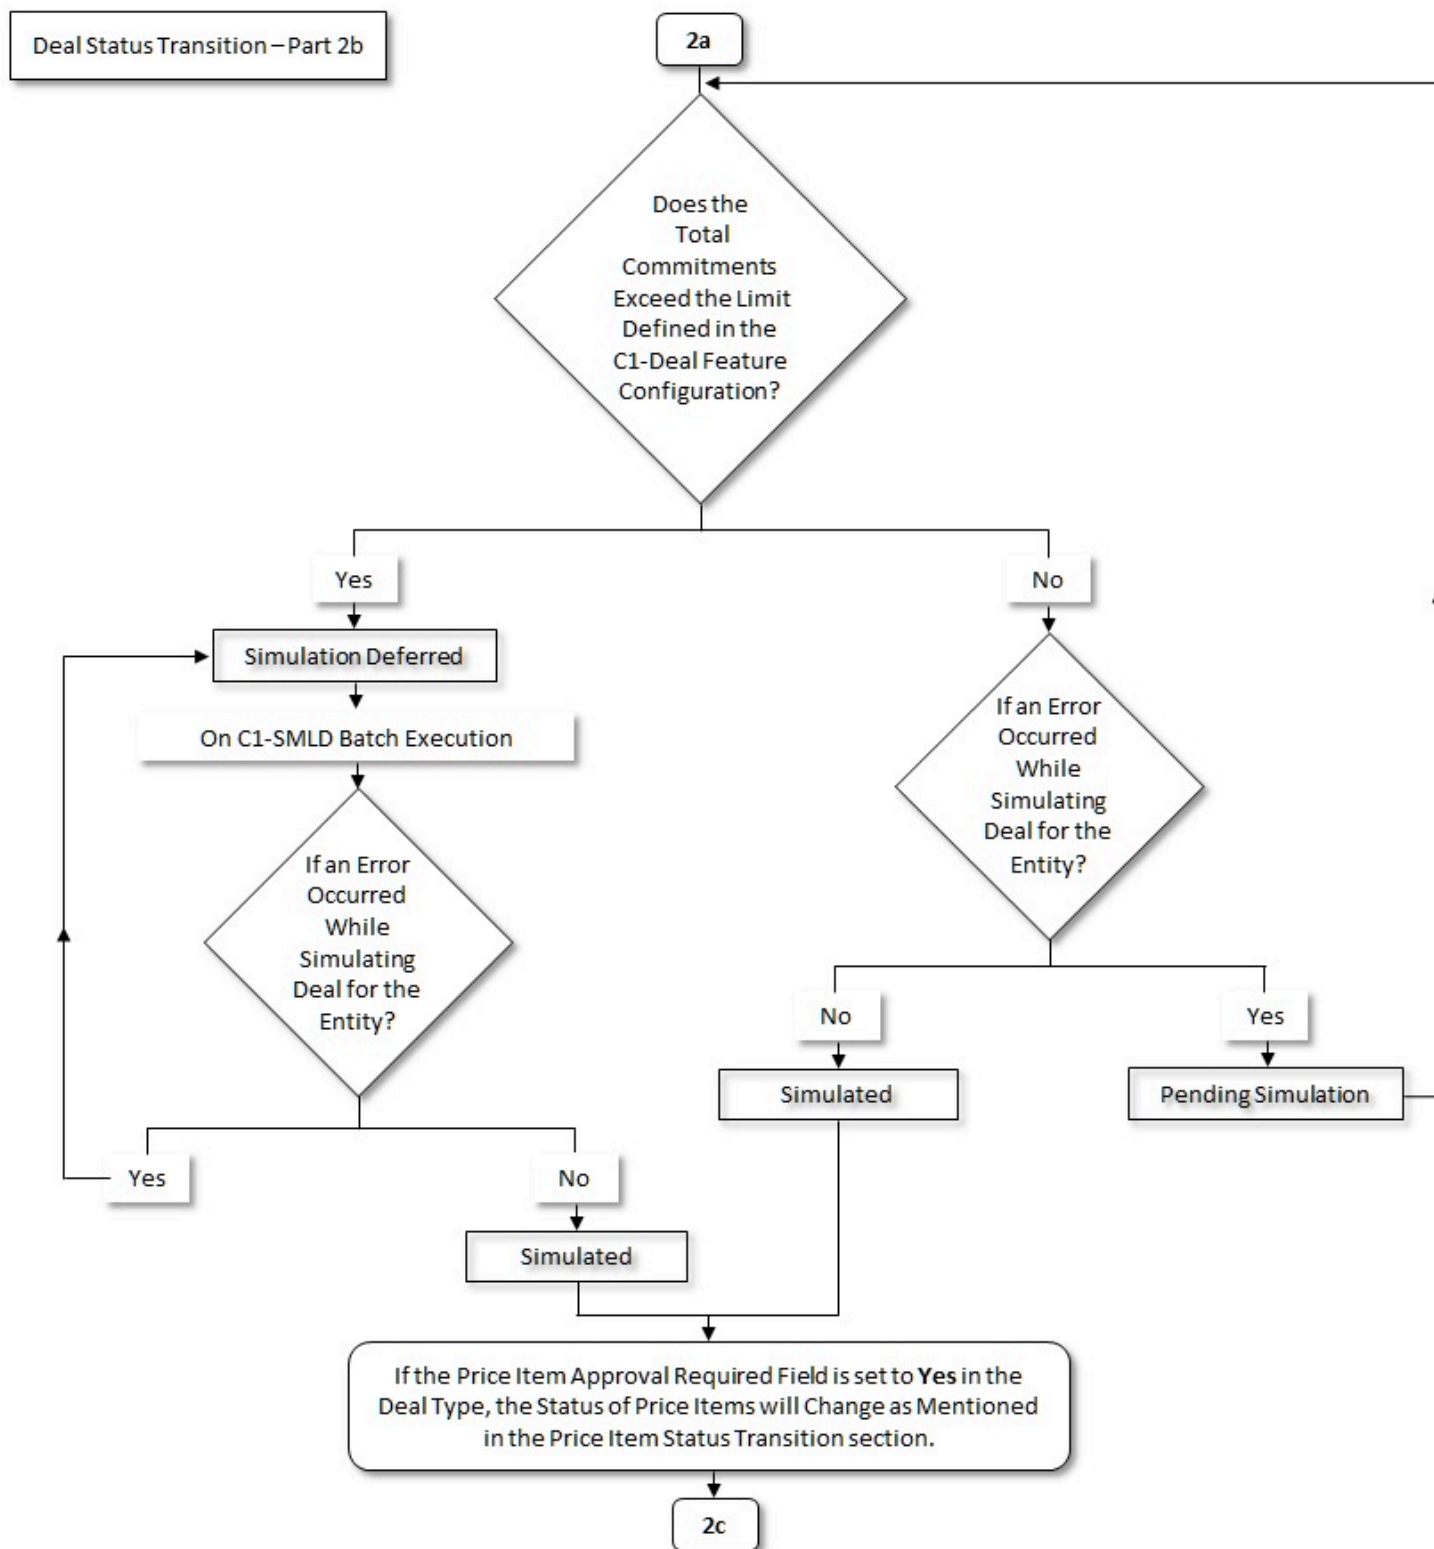

## Deal Status Transition

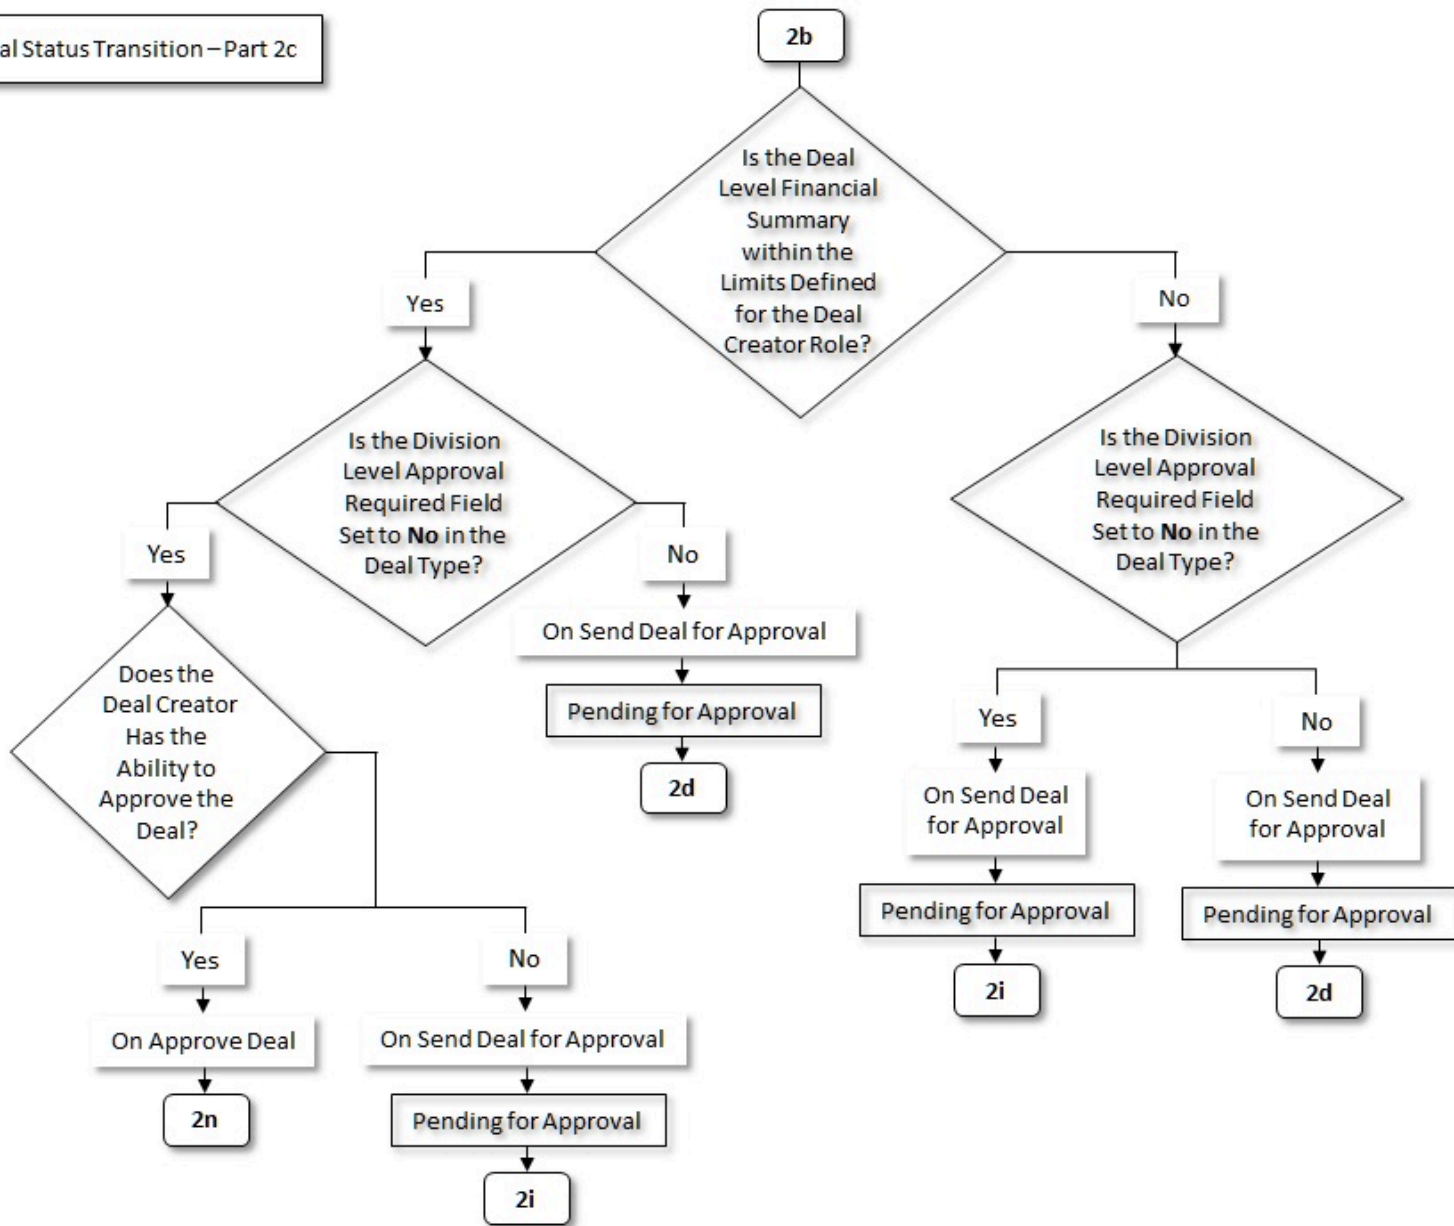

The following figure graphically indicates how a deal moves from one status to another in its lifecycle. Since the deal status transition flow spans across multiple pages, we have split the flow into multiple parts — Part 2a, Part 2b, Part 2c, Part 2d, Part 2e, Part 2f, Part 2g, Part 2h, Part 2i, Part 2j, Part 2k, Part 2l, Part 2m, and Part 2n.

Deal Status Transition – Part 2a

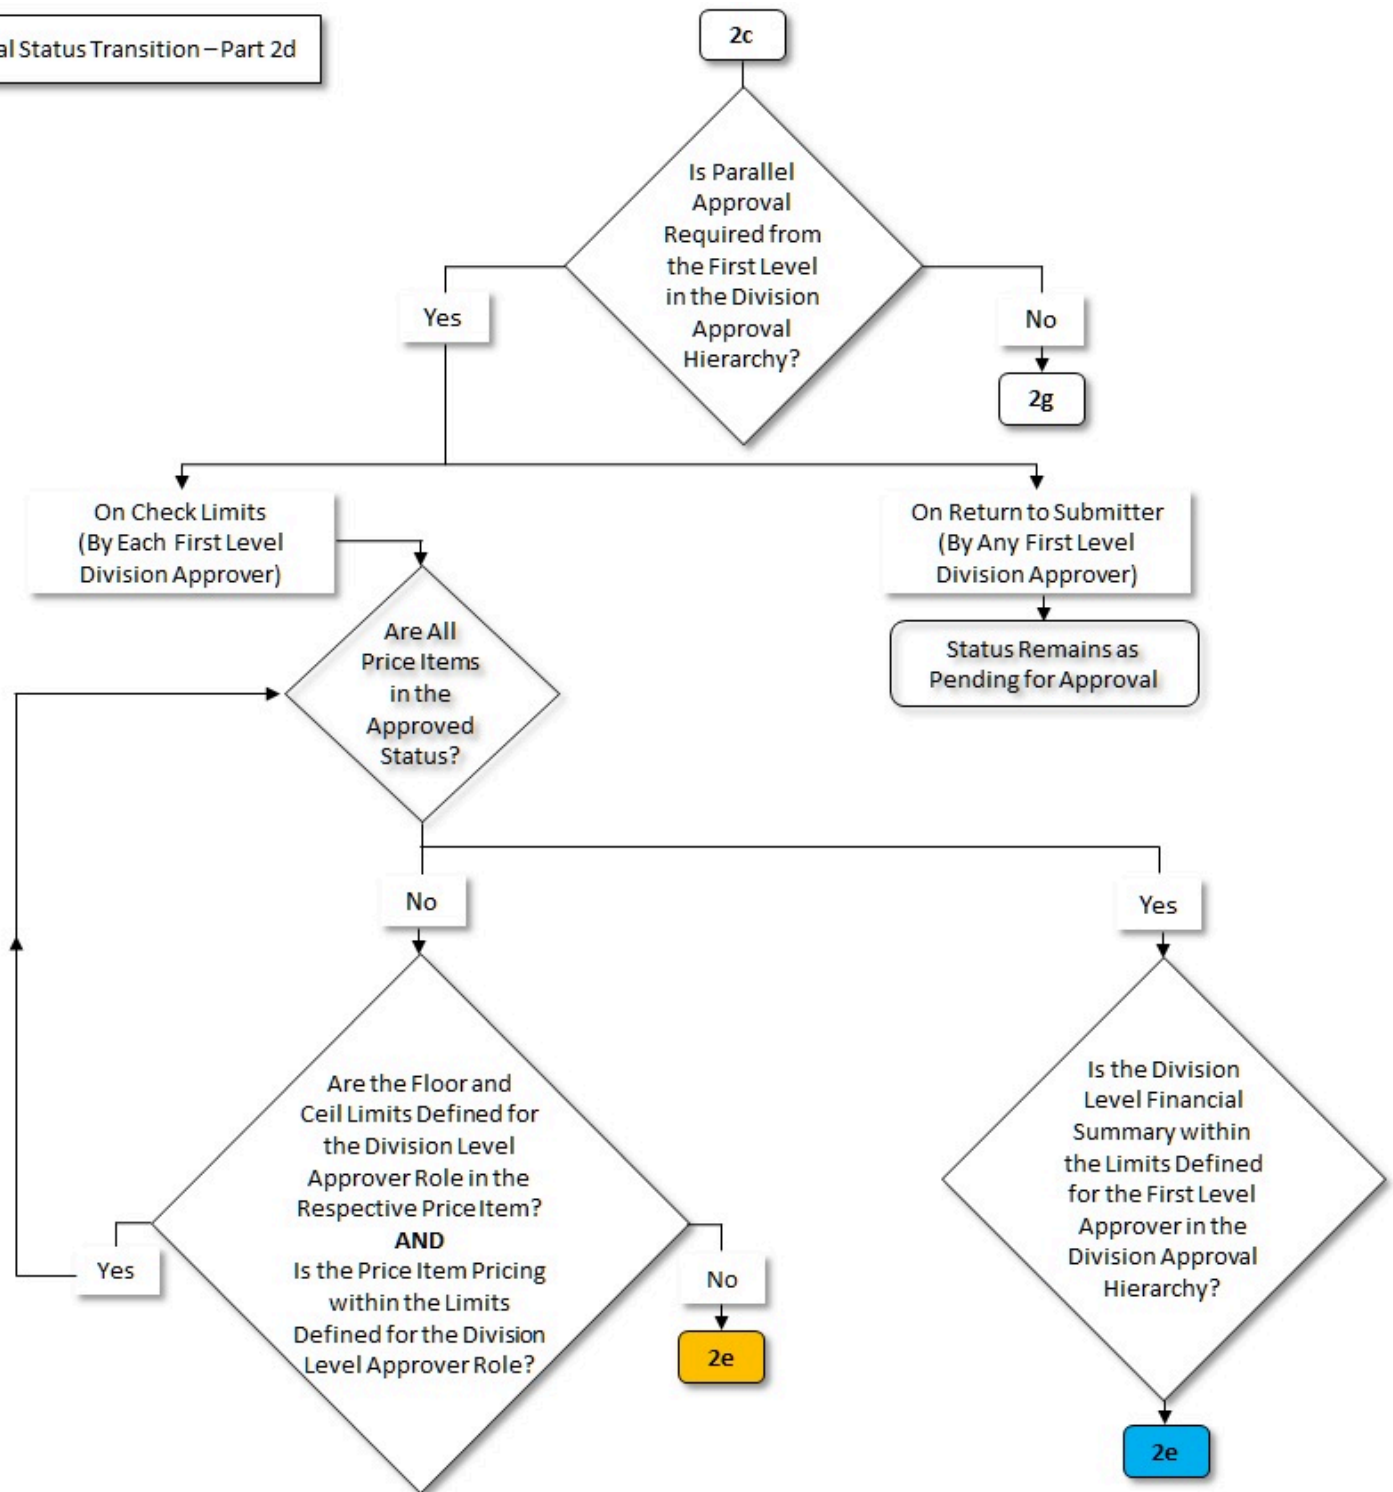

## Deal Status Transition – Part 2c

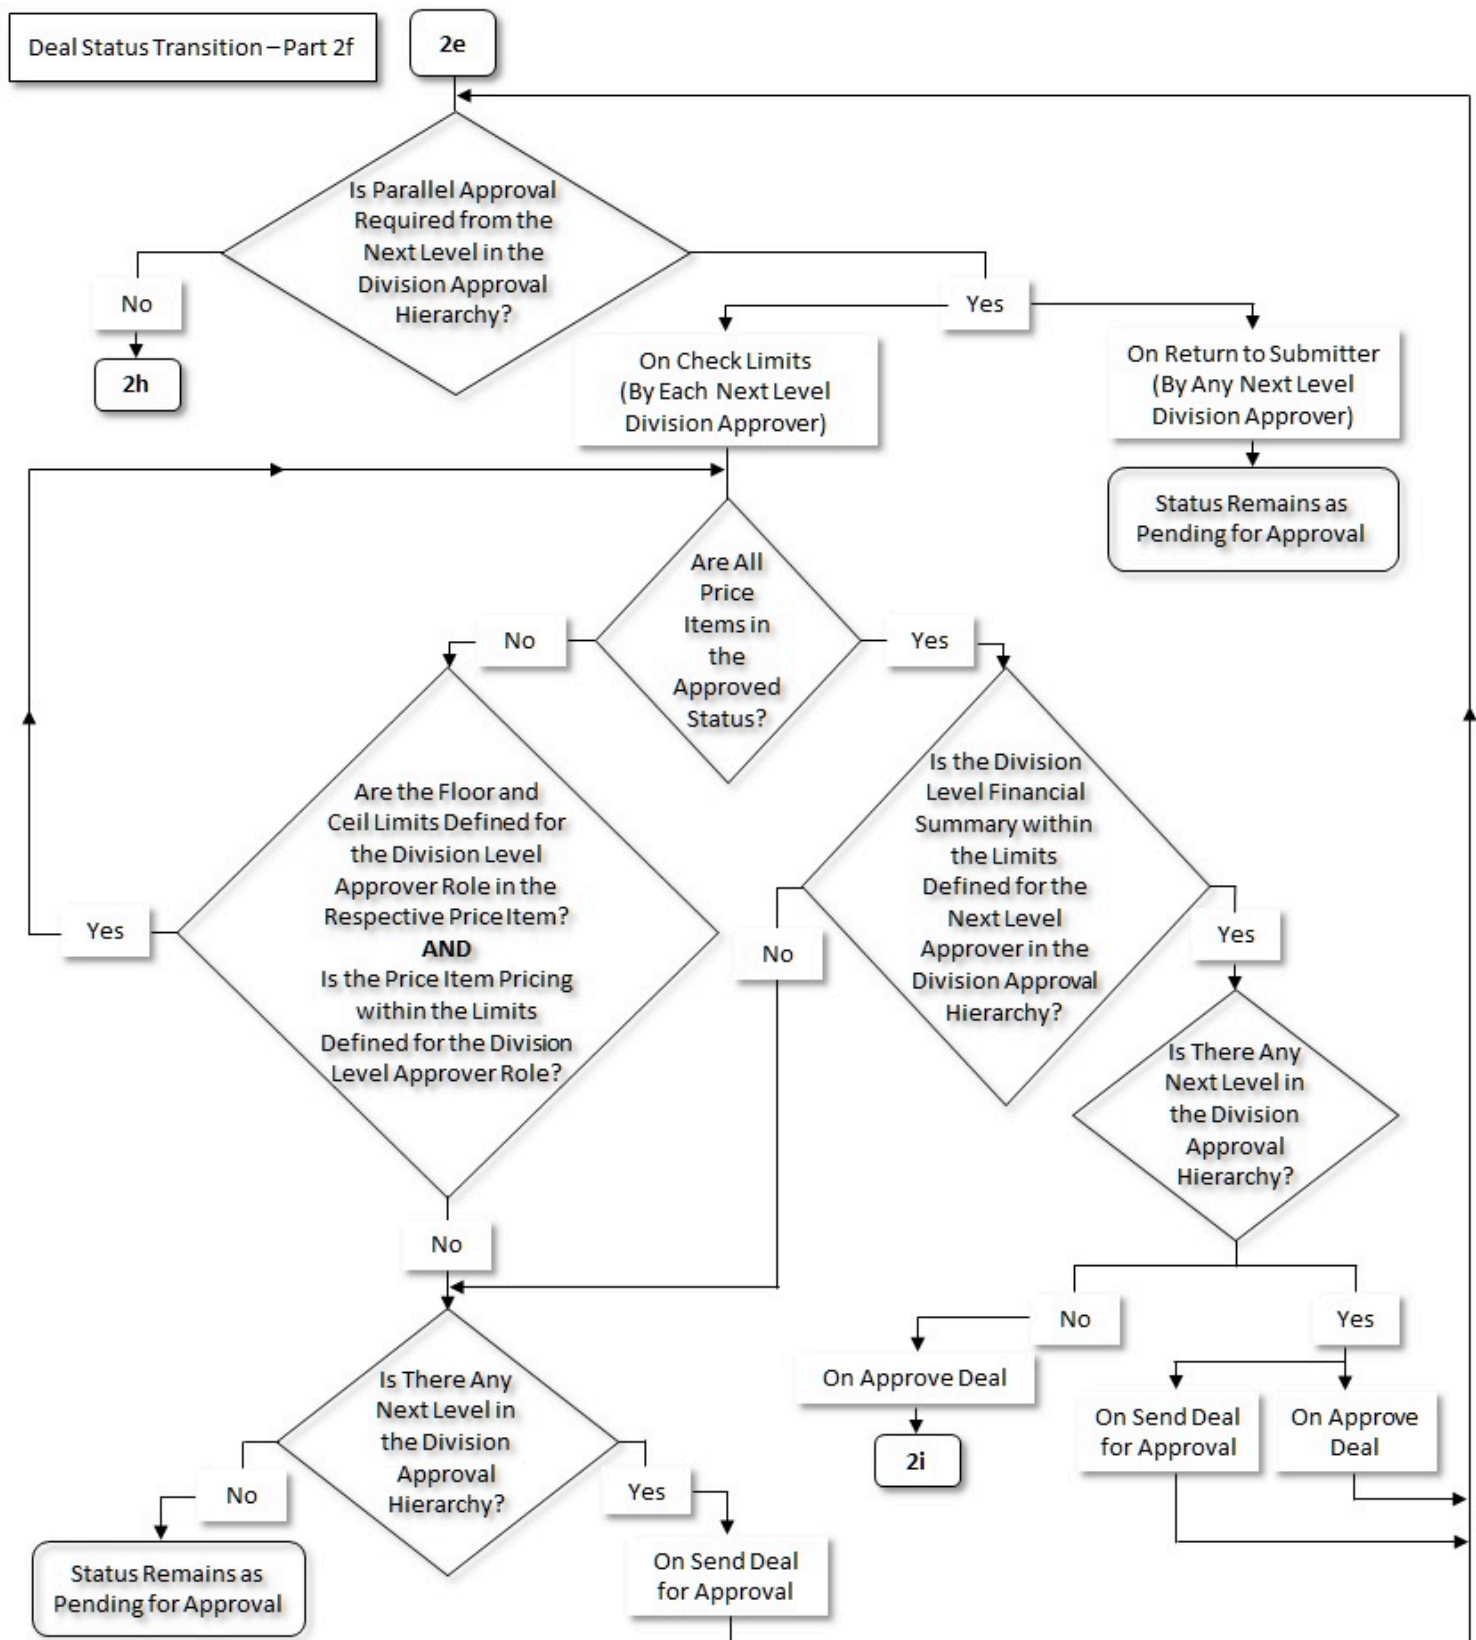

## Deal Status Transition – Part 2d

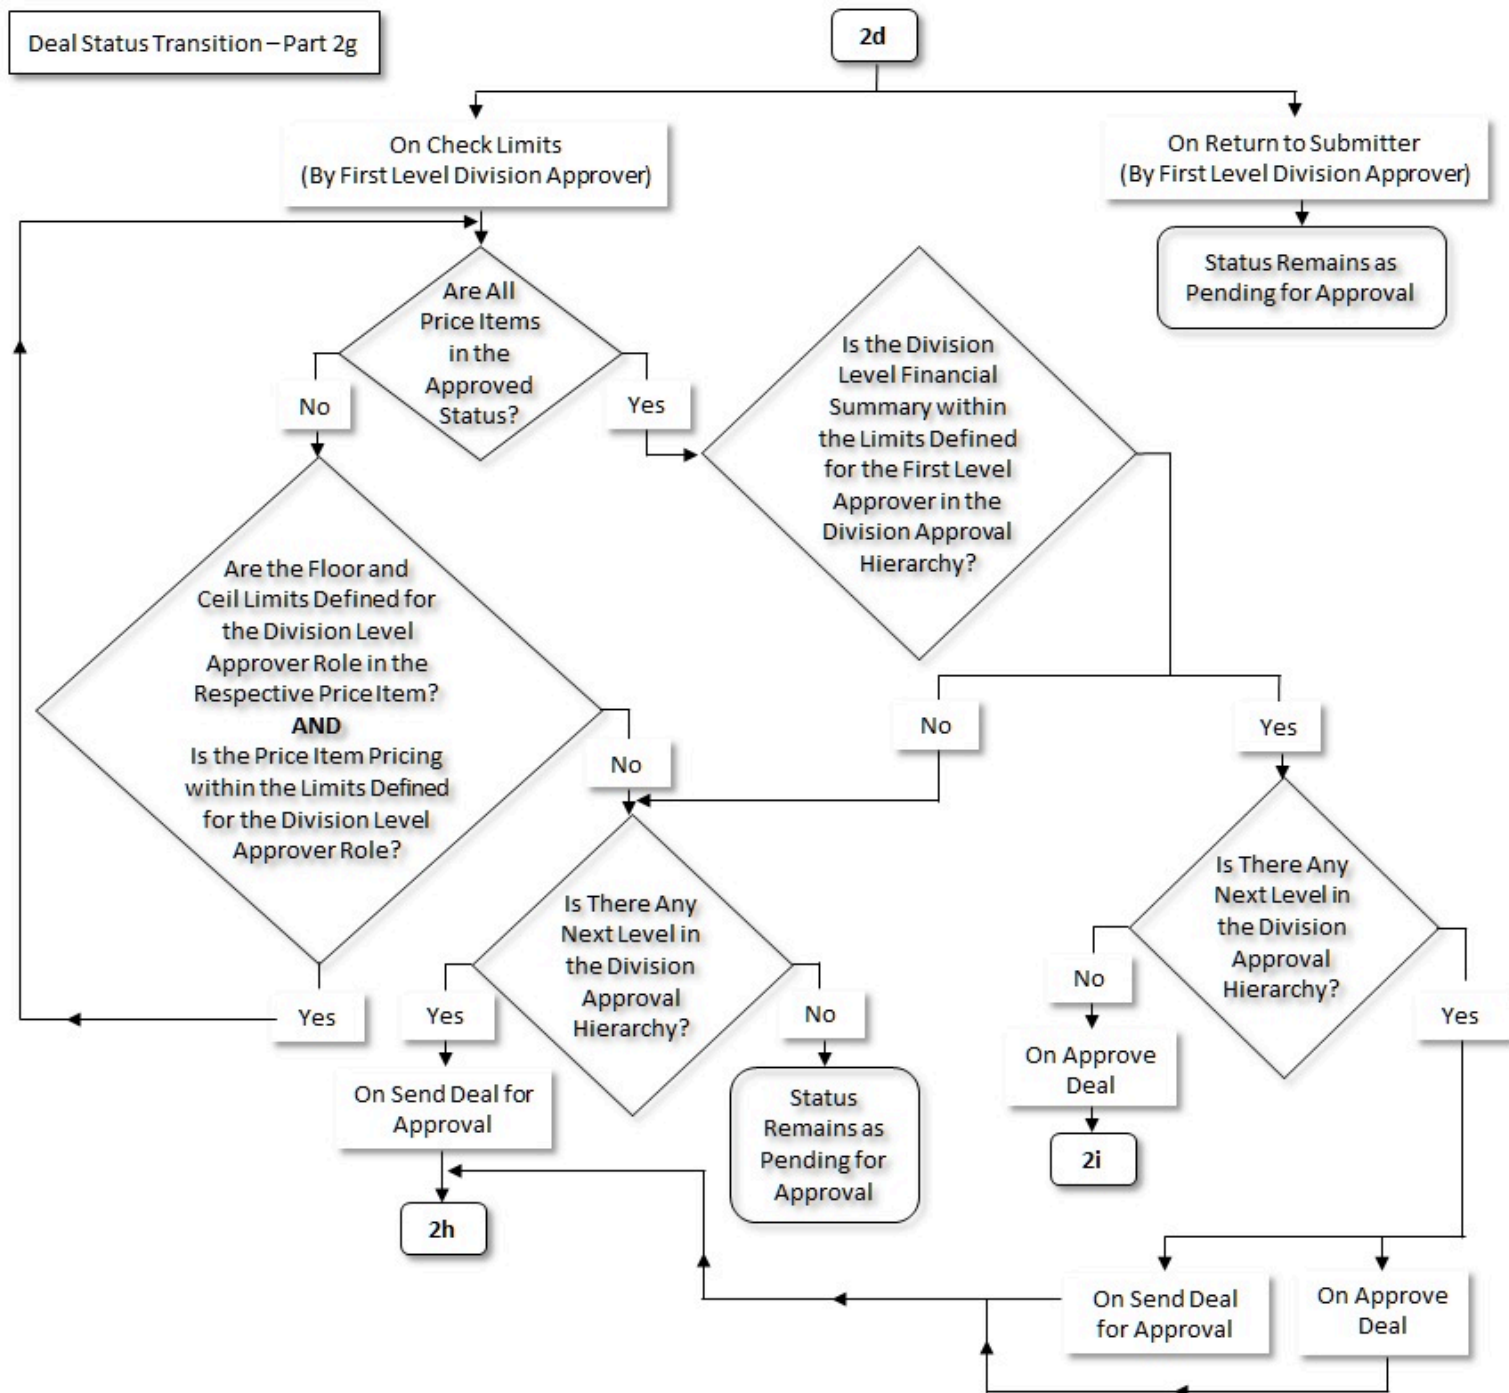

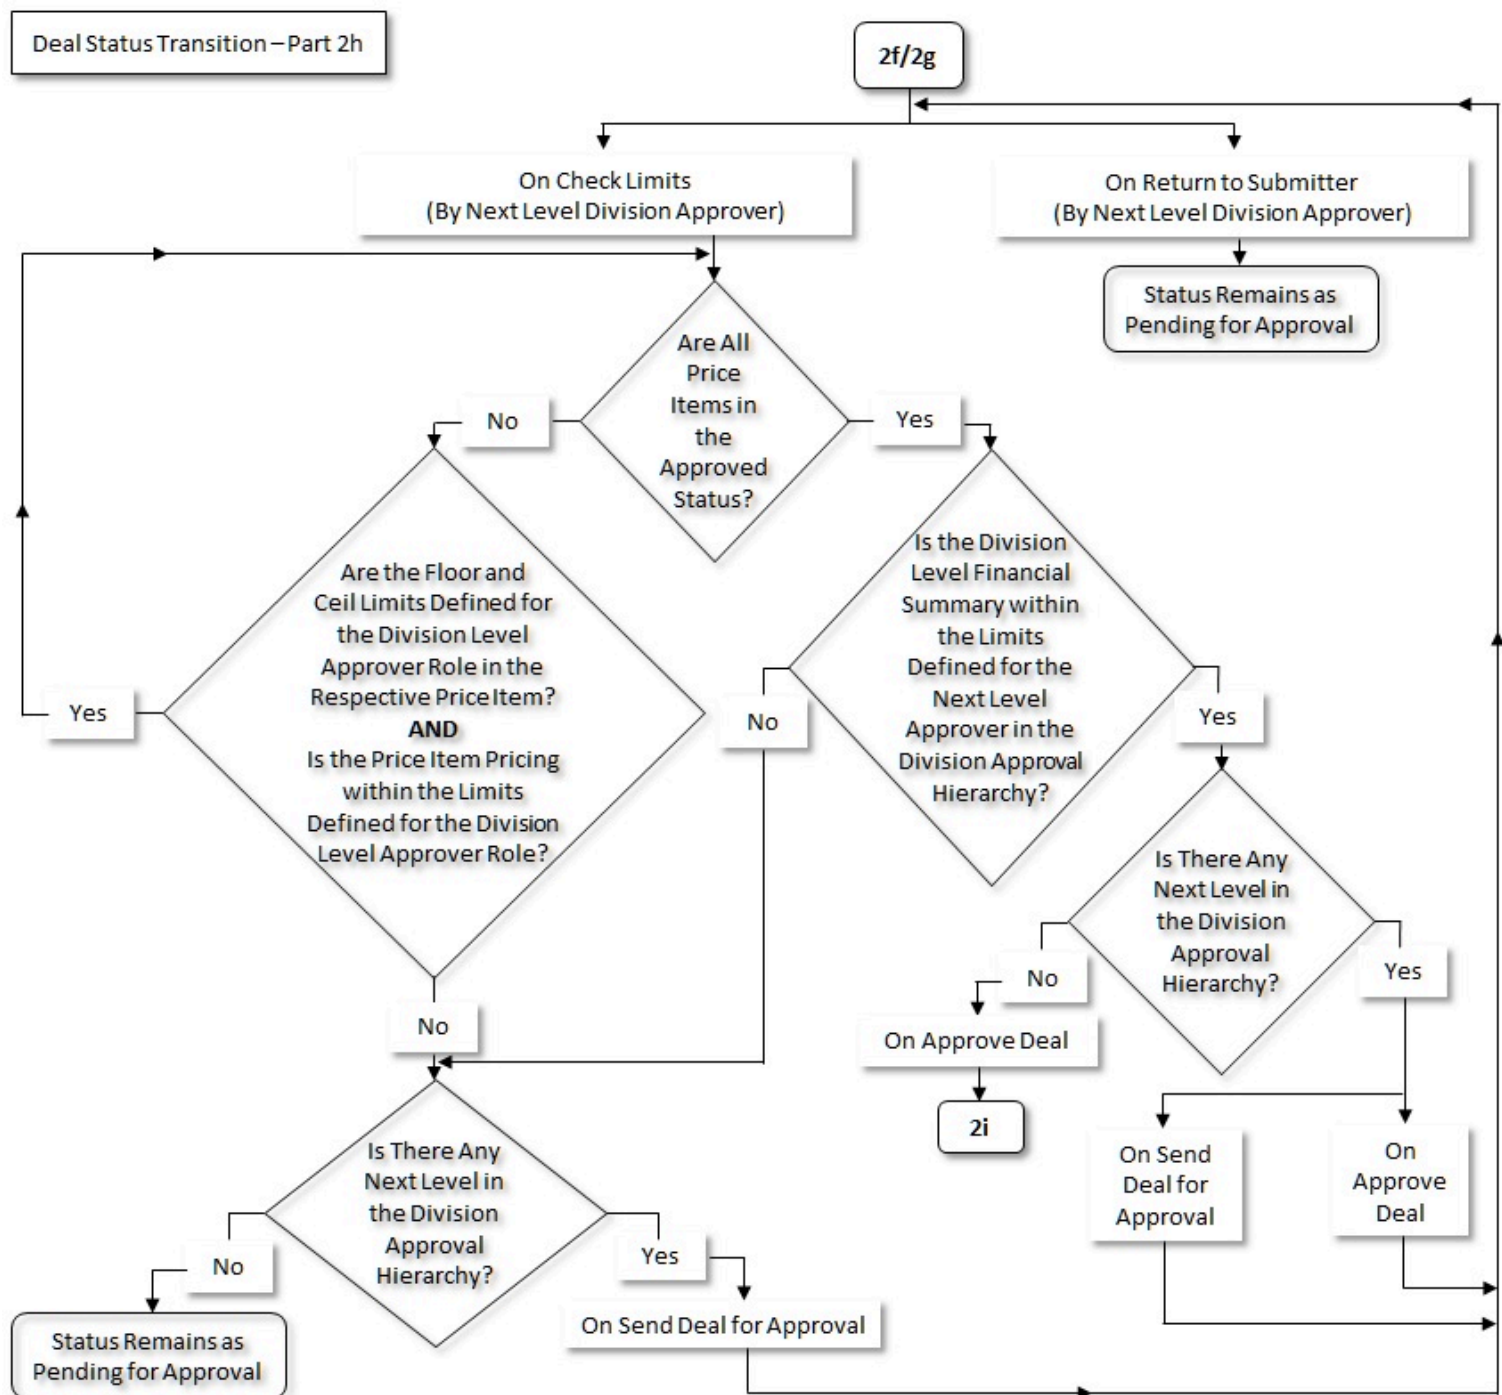

Deal Status Transition – Part 2e

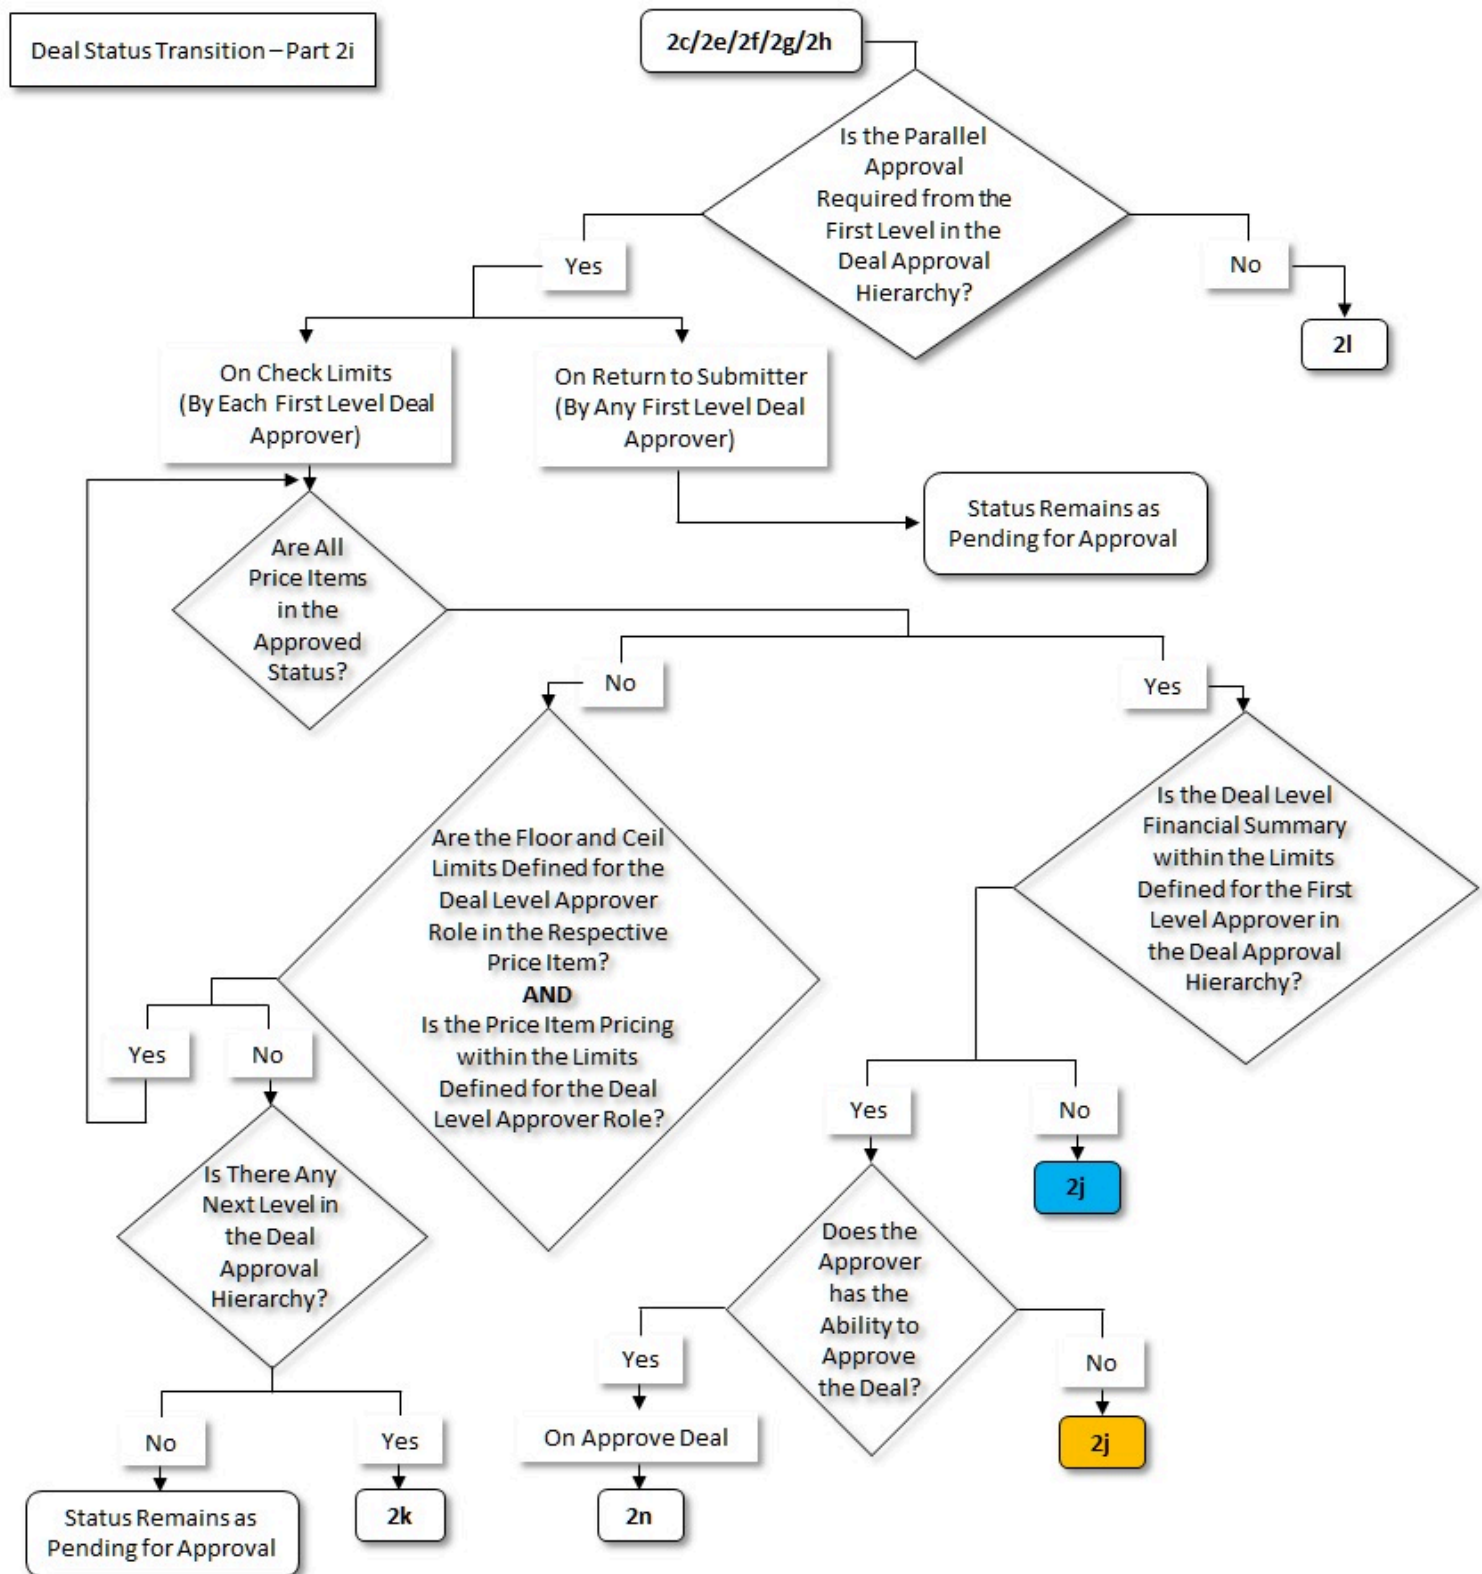

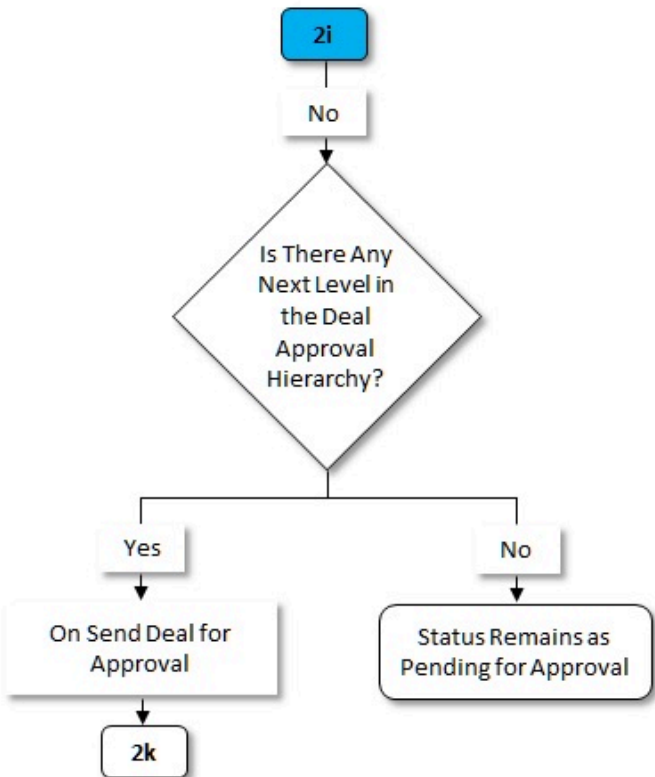

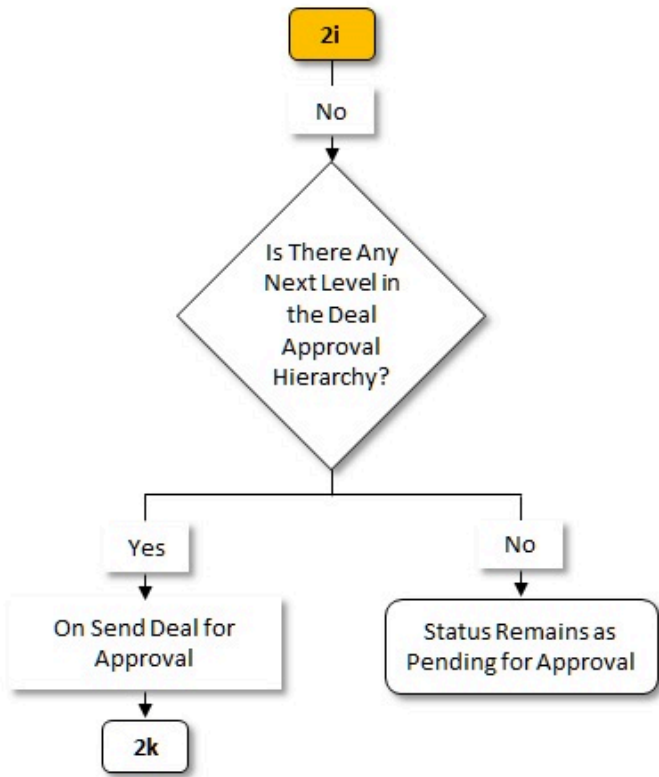

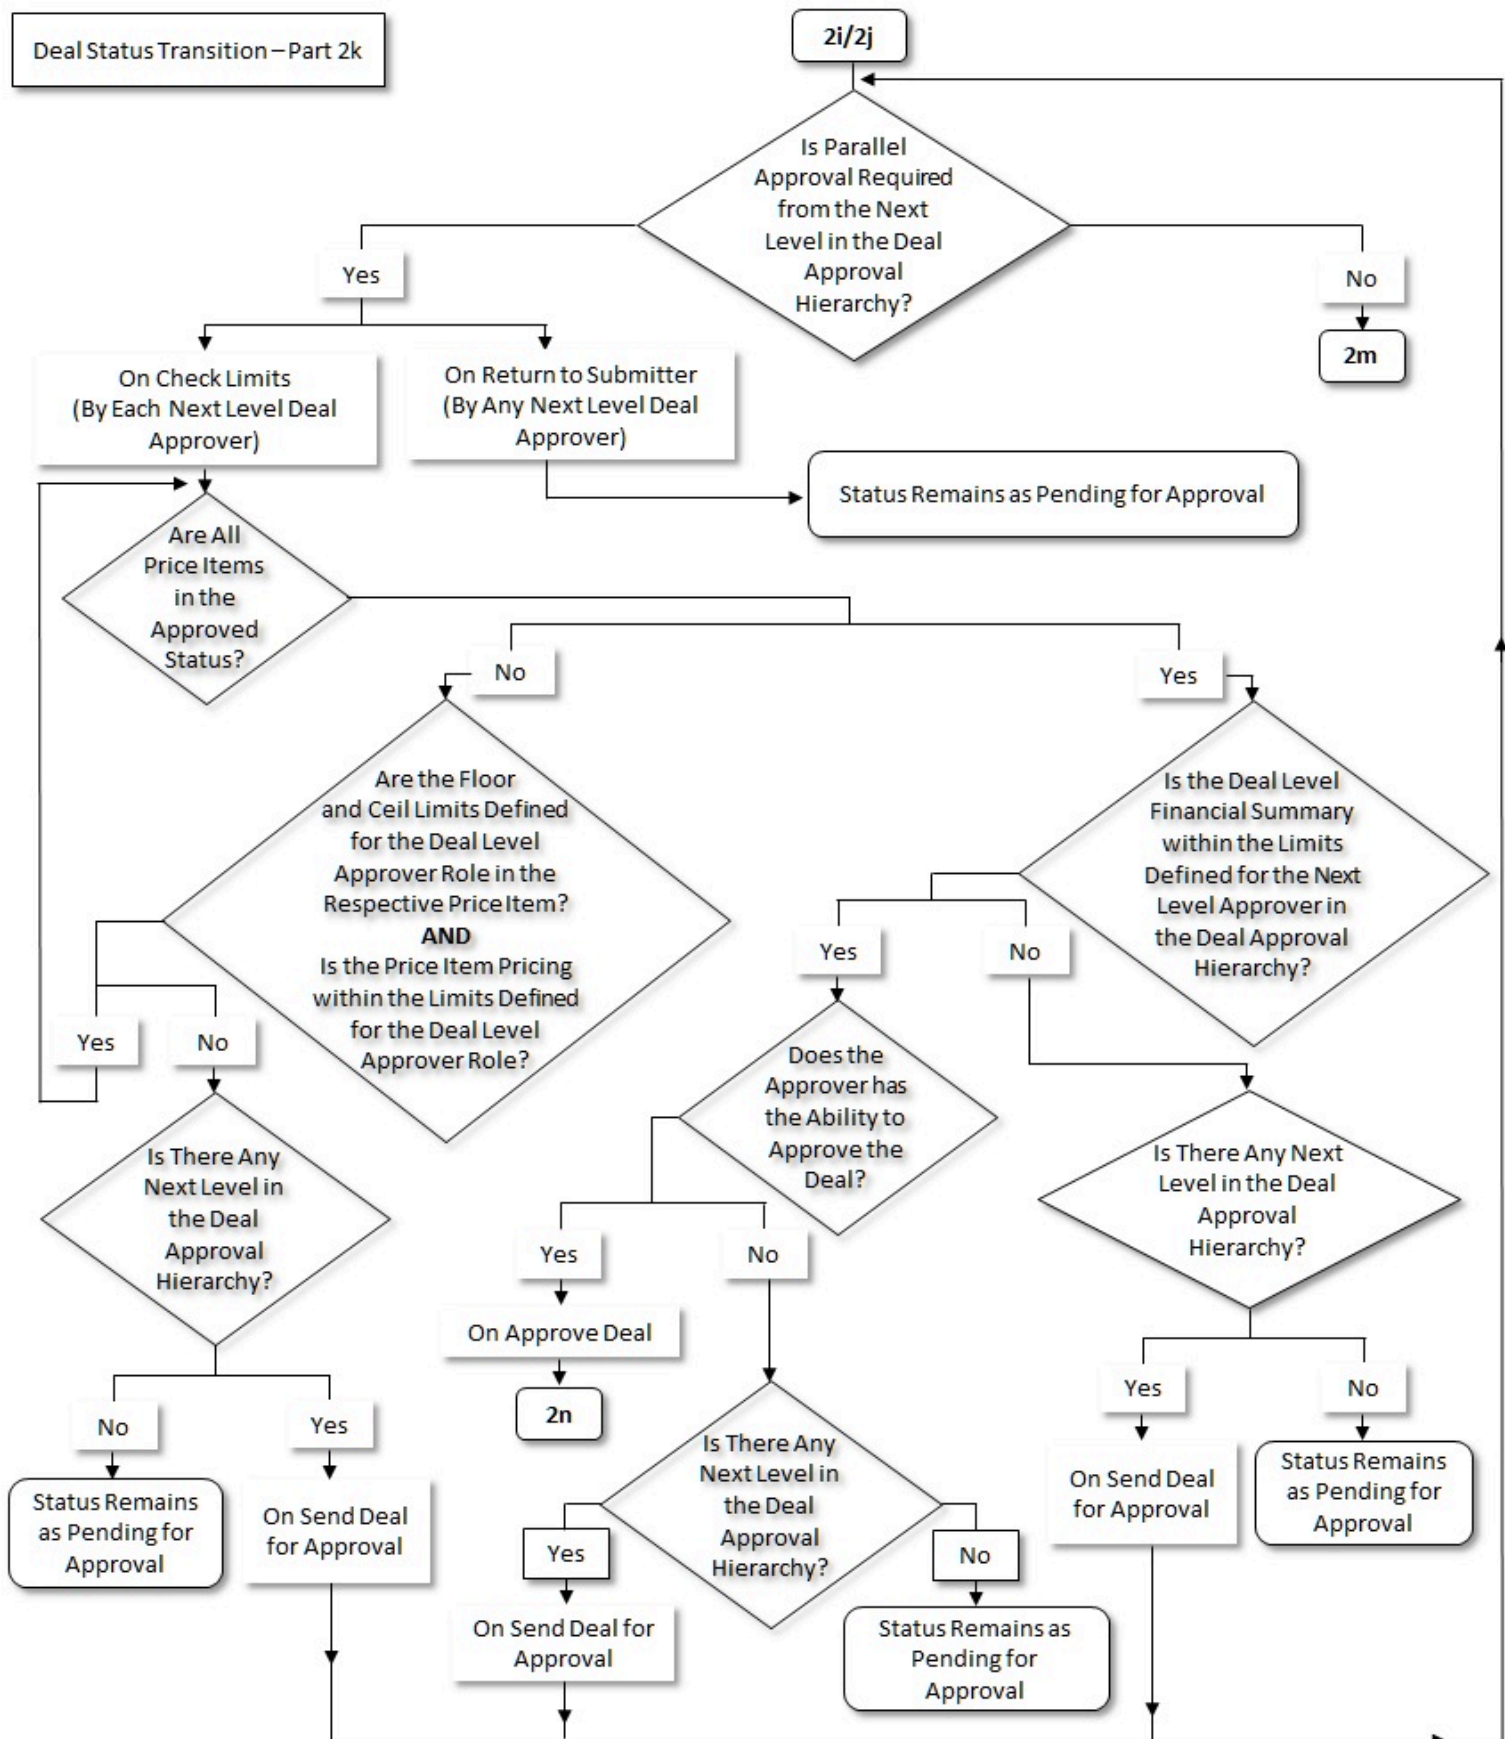

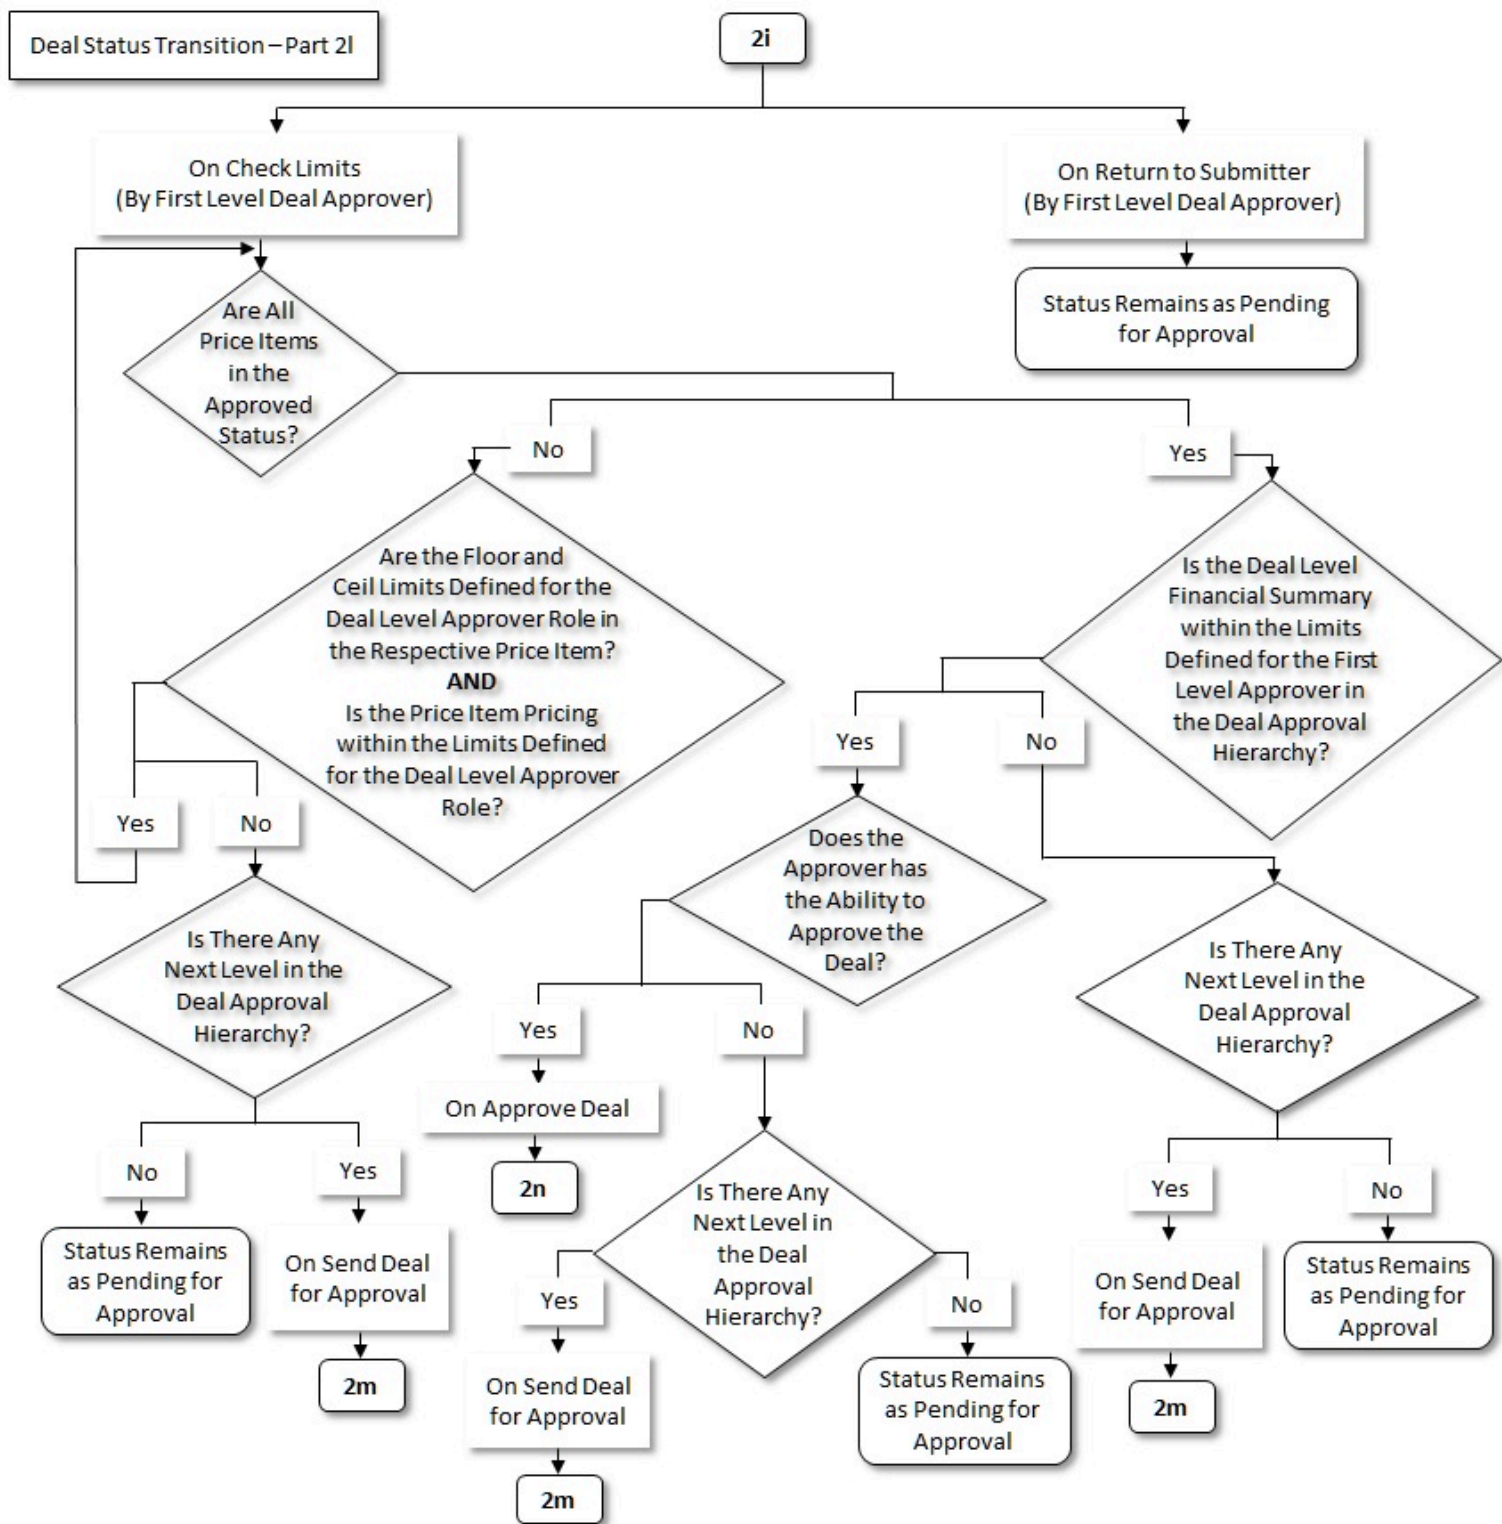

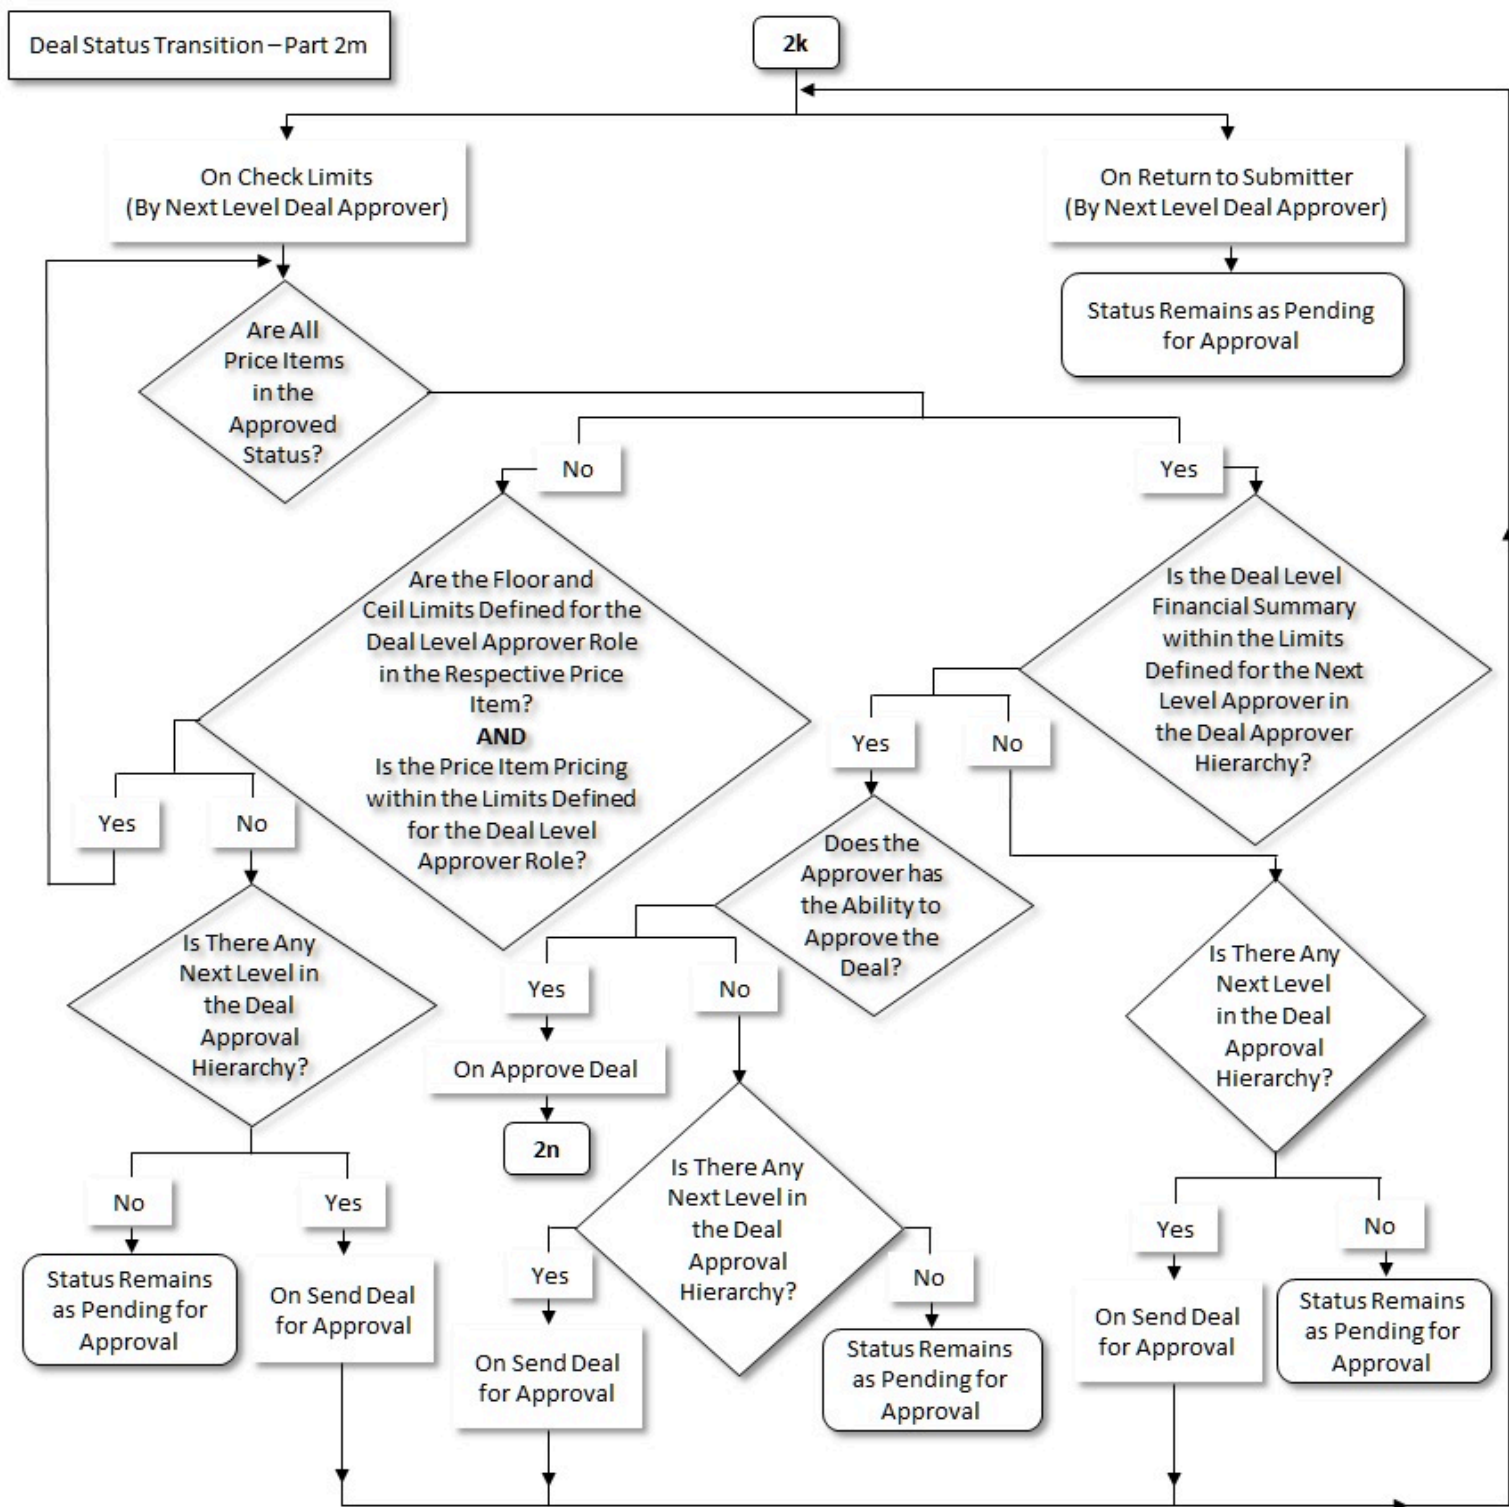

Deal Status Transition – Part 2j

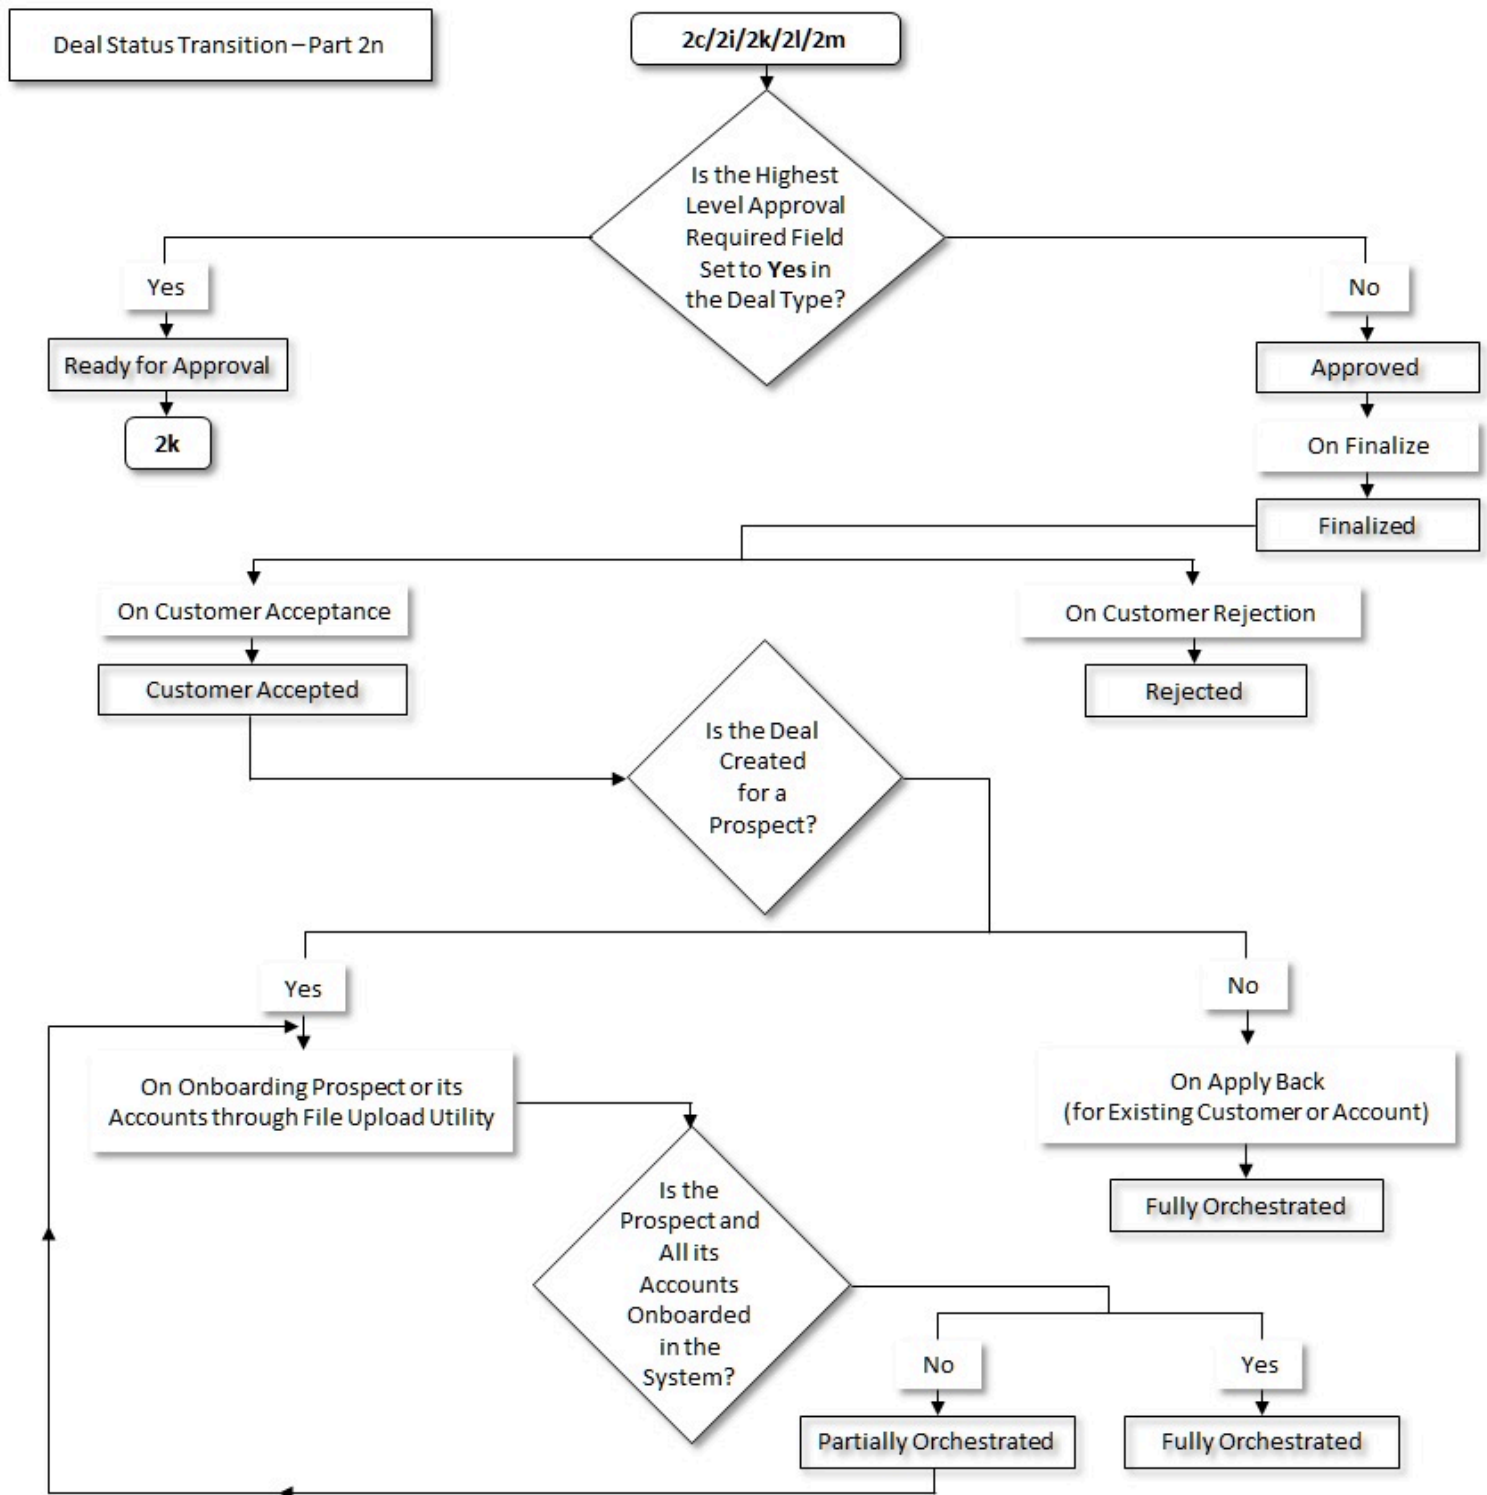

## Deal Approval Scenarios

This section illustrates how a deal moves from one approver to another in the following scenarios:

- [Deal Approval Scenario 1](#) on page 2449
- [Deal Approval Scenario 2](#) on page 2449

- [Deal Approval Scenario 3](#) on page 2450
- [Deal Approval Scenario 4](#) on page 2451
- [Deal Approval Scenario 5](#) on page 2452
- [Deal Approval Scenario 6](#) on page 2453
- [Deal Approval Scenario 7](#) on page 2455
- [Deal Approval Scenario 8](#) on page 2457
- [Deal Approval Scenario 9](#) on page 2459
- [Deal Approval Scenario 10](#) on page 2461

## Deal Approval Scenario 1

The following table illustrates the different levels of approval that are required for a deal in scenario 1:

<b>Scenario 1</b>	Price Item Approval Required	No
	Product Level Approval Required	No
	Division Level Approval Required	No
	Parallel Approval in the Deal Approval Hierarchy	No
	Highest Level Approval Required	Yes

The following table lists the approvers at different levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	No
Level 1	Pricing Manager (PM)	No
Level 2	Senior Pricing Manager (SPM)	No
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

## Deal Approval Scenario 2

The following table illustrates the different levels of approval that are required for a deal in scenario 2:

<b>Scenario 2</b>	Price Item Approval Required	No
	Product Level Approval Required	No
	Division Level Approval Required	No
	Parallel Approval in the Deal Approval Hierarchy	Yes
	Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

### Deal Approval Scenario 3

The following table illustrates the different levels of approval that are required for a deal in scenario 3:

Scenario 3	Price Item Approval Required	Yes
	Product Level Approval Required	No
	Division Level Approval Required	No
	Parallel Approval in the Deal Approval Hierarchy	No
	Highest Level Approval Required	Yes

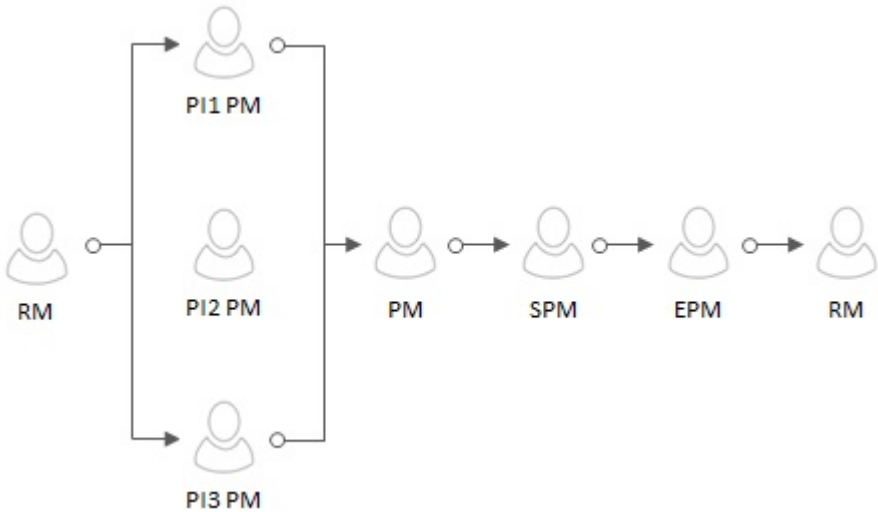

The following table lists the approvers at different levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	No
Level 1	Pricing Manager (PM)	Yes
Level 2	Senior Pricing Manager (SPM)	No
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers	
PI1	PI1 Pricing Manager (PI1 PM)
PI2	PI2 Pricing Manager (PI2 PM)
PI3	PI3 Pricing Manager (PI3 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

Deal Approval Scenario 4

The following table illustrates the different levels of approval that are required for a deal in scenario 4:

Scenario 4	Price Item Approval Required	Yes
	Product Level Approval Required	No
	Division Level Approval Required	No
	Parallel Approval in the Deal Approval Hierarchy	Yes
	Highest Level Approval Required	Yes

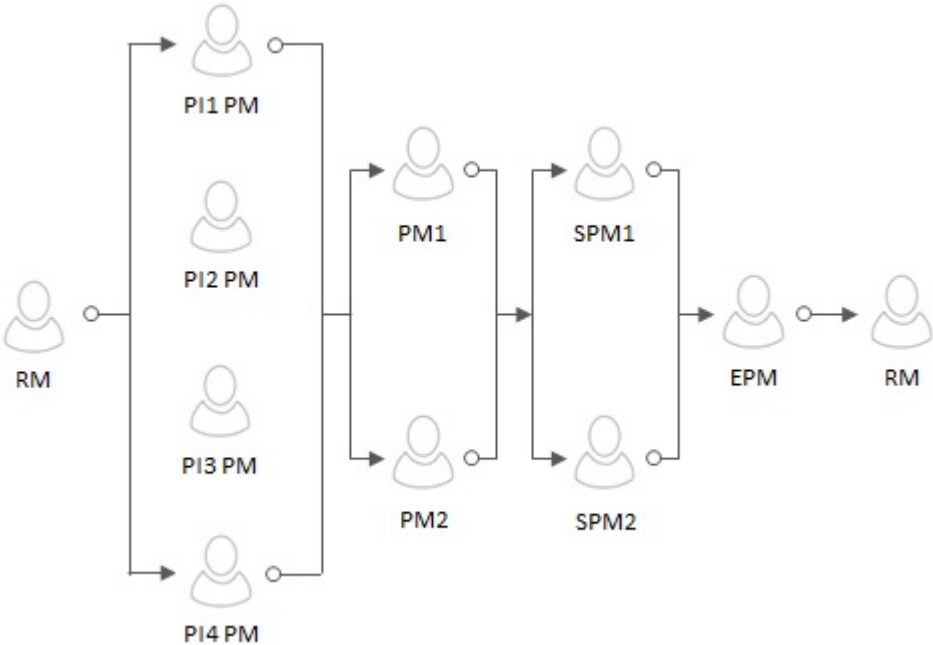

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers	
PI1	PI1 Pricing Manager (PI1 PM)
PI2	PI2 Pricing Manager (PI2 PM)
PI3	PI3 Pricing Manager (PI3 PM)
PI4	PI4 Pricing Manager (PI4 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

### Deal Approval Scenario 5

The following table illustrates the different levels of approval that are required for a deal in scenario 5:

Scenario 5	Price Item Approval Required	No
	Product Level Approval Required	No
	Division Level Approval Required	Yes
	Parallel Approval in the Division or Deal Approval Hierarchy	No
	Highest Level Approval Required	Yes

The following table lists the approvers at different levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 2	D1 Senior Pricing Manager (D1 SPM)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

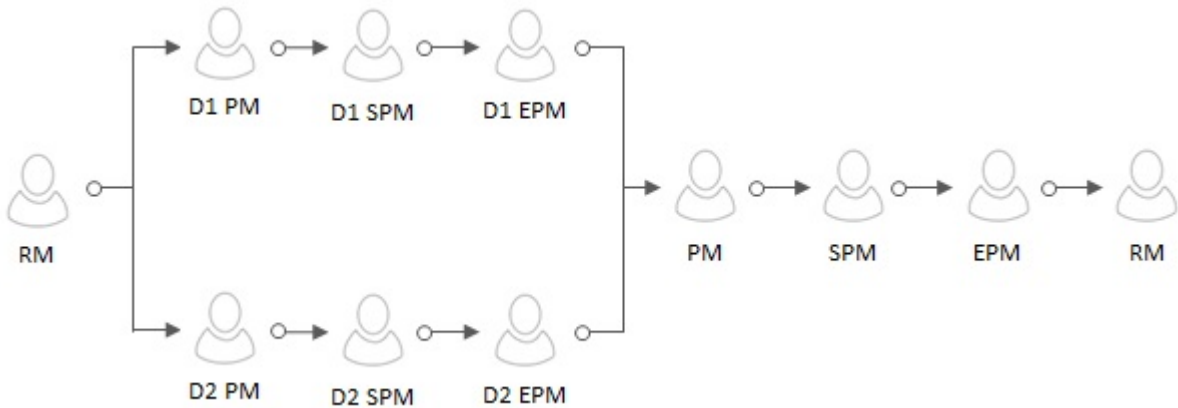

The following table lists the approvers at different levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager (D2 PM)	Yes
Level 2	D2 Senior Pricing Manager (D2 SPM)	Yes
Level 3	D2 Executive Pricing Manager (D2 EPM)	Yes

The following table lists the approvers at different levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager (PM)	Yes
Level 2	Senior Pricing Manager (SPM)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

Deal Approval Scenario 6

The following table illustrates the different levels of approval that are required for a deal in scenario 6:

Scenario 6	Price Item Approval Required	Yes
	Product Level Approval Required	No
	Division Level Approval Required	Yes

	Parallel Approval in the Division or Deal Approval Hierarchy	No
	Highest Level Approval Required	Yes

The following table lists the approvers at different levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager (D1 SPM)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager (D2 PM)	Yes
Level 2	D2 Senior Pricing Manager (D2 SPM)	Yes
Level 3	D2 Executive Pricing Manager (D2 EPM)	Yes

The following table lists the approvers at different levels in the deal approval hierarchy:

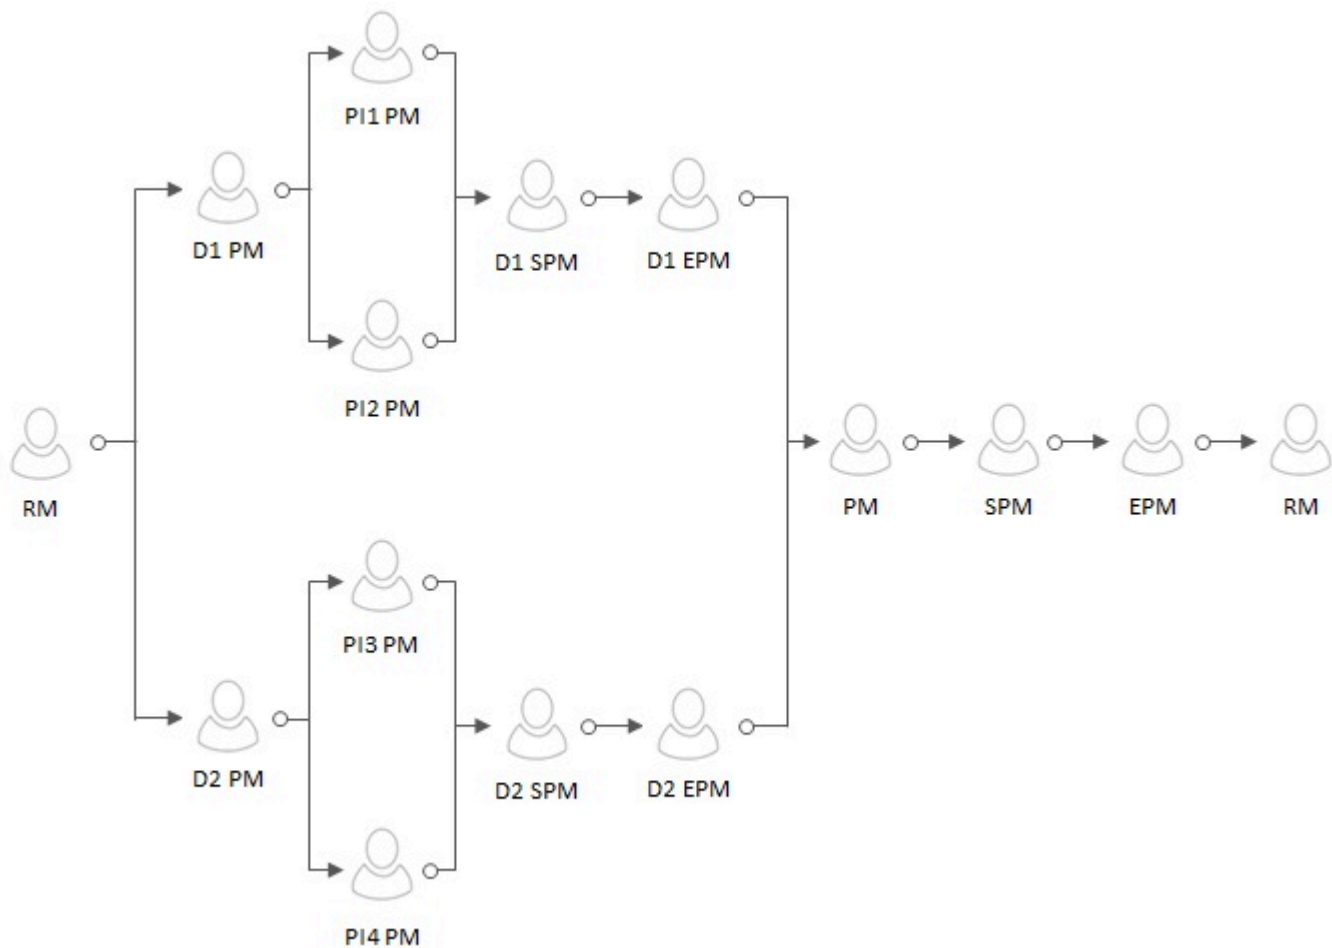

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager (PM)	Yes
Level 2	Senior Pricing Manager (SPM)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers		
Price Item	Division	Price Item Manager
PI1	D1	PI1 Price Item Manager (PI1 PM)
PI2	D1	PI2 Price Item Manager (PI2 PM)
PI3	D2	PI3 Price Item Manager (PI3 PM)
PI4	D2	PI4 Price Item Manager (PI4 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

## Deal Approval Scenario 7

The following table illustrates the different levels of approval that are required for a deal in scenario 7:

Scenario 7	Price Item Approval Required	No
	Product Level Approval Required	No
	Division Level Approval Required	Yes
	Parallel Approval in the Division or Deal Approval Hierarchy	Yes
	Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager 1 (D1 SPM1)	Yes
Level 2	D1 Senior Pricing Manager 2 (D1 SPM2)	Yes

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

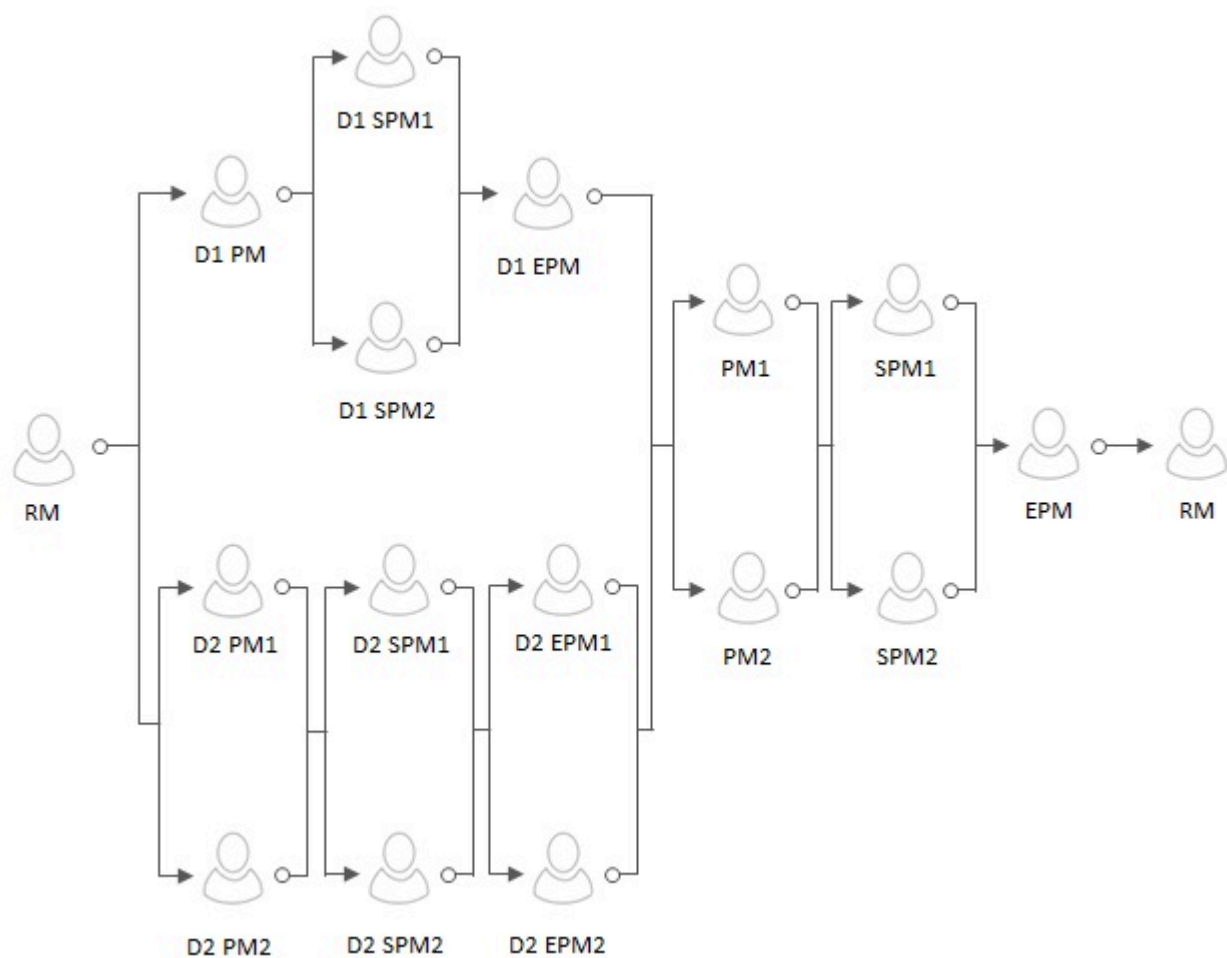

The following table lists the approvers at different levels including the parallel levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager 1 (D2 PM1)	Yes
Level 1	D2 Pricing Manager 2 (D2 PM2)	Yes
Level 2	D2 Senior Pricing Manager 1 (D2 SPM1)	Yes
Level 2	D2 Senior Pricing Manager 2 (D2 SPM2)	Yes
Level 3	D2 Executive Pricing Manager 1 (D2 EPM1)	Yes
Level 3	D2 Executive Pricing Manager 2 (D2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

## Deal Approval Scenario 8

The following table illustrates the different levels of approval that are required for a deal in scenario 8:

Scenario 8	Price Item Approval Required	Yes
	Product Level Approval Required	No
	Division Level Approval Required	Yes
	Parallel Approval in the Division or Deal Approval Hierarchy	Yes
	Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager 1 (D1 SPM1)	Yes
Level 2	D1 Senior Pricing Manager 2 (D1 SPM2)	Yes

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager 1 (D2 PM1)	Yes
Level 1	D2 Pricing Manager 2 (D2 PM2)	Yes
Level 2	D2 Senior Pricing Manager 1 (D2 SPM1)	Yes
Level 2	D2 Senior Pricing Manager 2 (D2 SPM2)	Yes
Level 3	D2 Executive Pricing Manager 1 (D2 EPM1)	Yes
Level 3	D2 Executive Pricing Manager 2 (D2 EPM2)	Yes

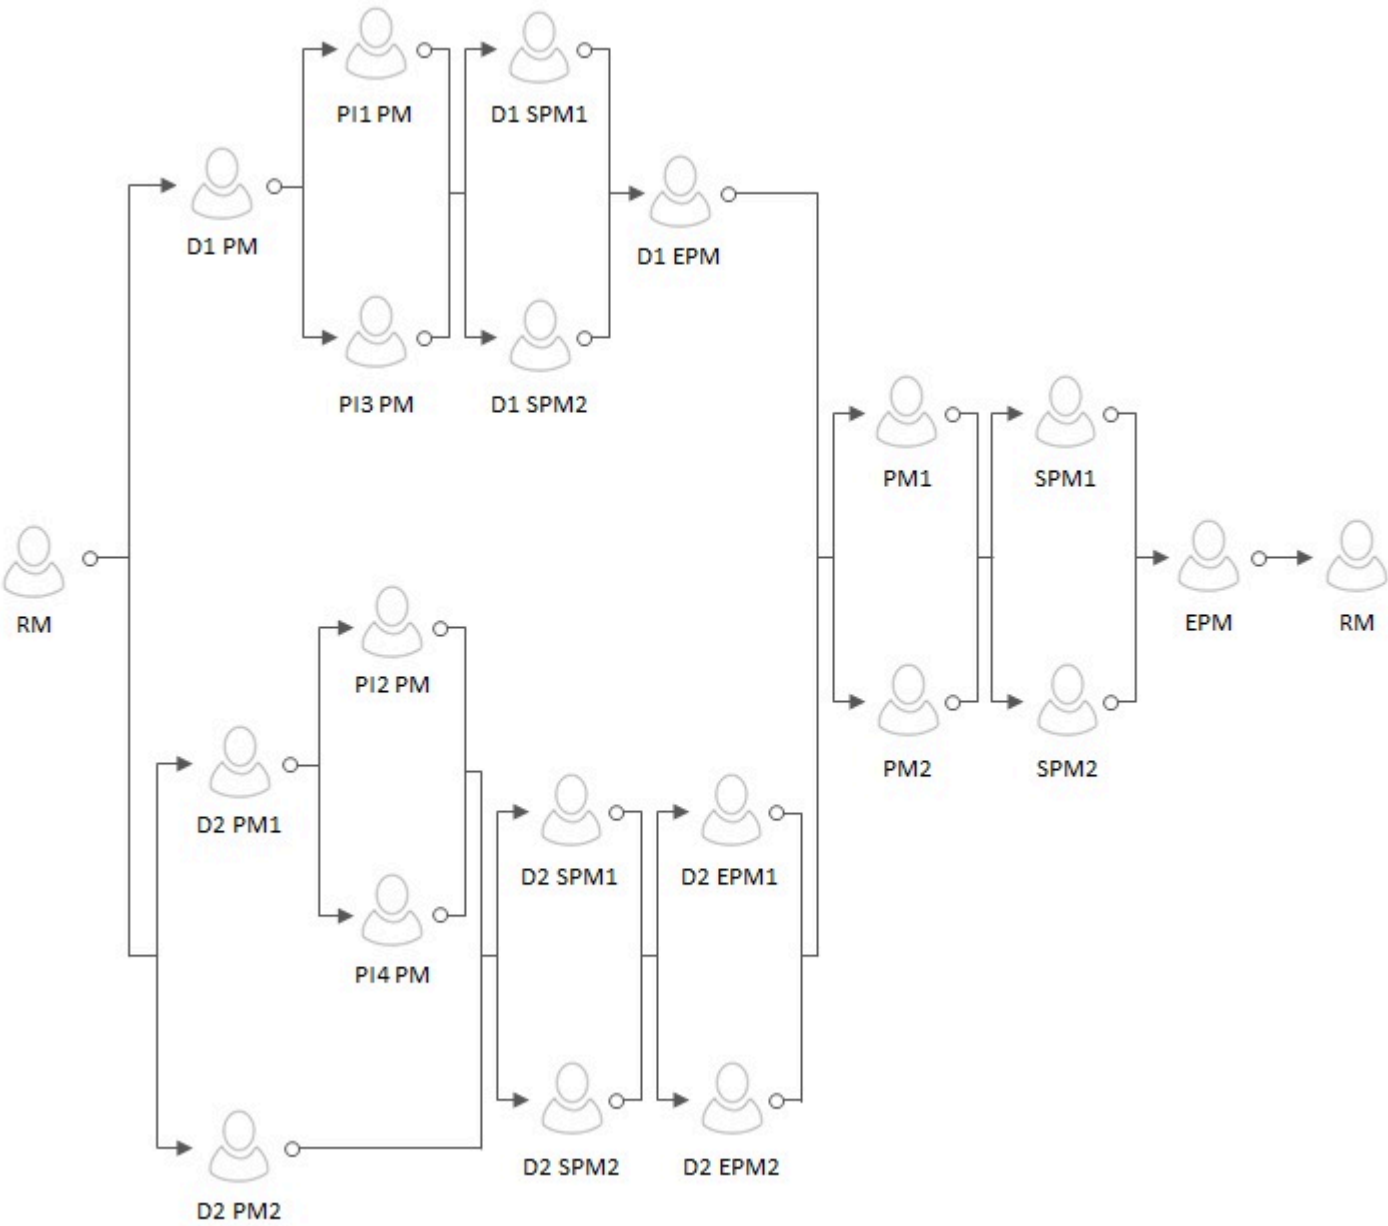

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers		
Price Item	Division	Price Item Manager
PI1	D1	PI1 Price Item Manager (PI1 PM)
PI2	D2	PI2 Price Item Manager (PI2 PM)
PI3	D1	PI3 Price Item Manager (PI3 PM)
PI4	D2	PI4 Price Item Manager (PI4 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

Deal Approval Scenario 9

The following table illustrates the different levels of approval that are required for a deal in scenario 9:

Scenario 9	Price Item Approval Required	No
	Product Level Approval Required	Yes
	Division Level Approval Required	Yes
	Parallel Approval in the Product, Division, or Deal Approval Hierarchy	Yes
	Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the P1 product approval hierarchy:

P1 Product Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	P1 Product Manager 1 (P1 PM1)	Yes
Level 1	P1 Product Manager 2 (P1 PM2)	Yes
Level 2	P1 Senior Product Manager 1 (P1 SPM1)	Yes
Level 2	P1 Senior Product Manager 2 (P1 SPM2)	Yes
Level 3	P1 Executive Product Manager (P1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the P2 product approval hierarchy:

P2 Product Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	P2 Product Manager (P2 PM1)	Yes
Level 2	P2 Senior Product Manager 1 (P2 SPM1)	Yes
Level 2	P2 Senior Product Manager 2 (P2 SPM2)	Yes
Level 3	P2 Executive Product Manager 1 (P2 EPM1)	Yes
Level 3	P2 Executive Product Manager 2 (P2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager 1 (D1 SPM1)	Yes
Level 2	D1 Senior Pricing Manager 2 (D1 SPM2)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

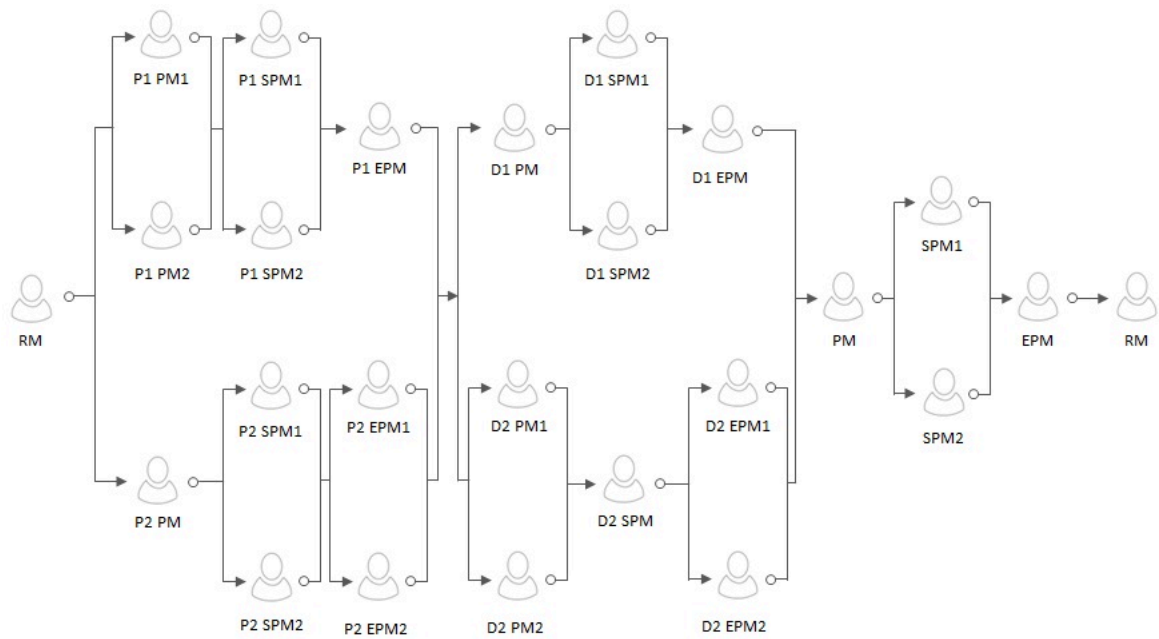

The following table lists the approvers at different levels including the parallel levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager 1 (D2 PM1)	Yes
Level 1	D2 Pricing Manager 2 (D2 PM2)	Yes
Level 2	D2 Senior Pricing Manager (D2 SPM)	Yes
Level 3	D2 Executive Pricing Manager 1 (D2 EPM1)	Yes
Level 3	D2 Executive Pricing Manager 2 (D2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager (PM)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

### Deal Approval Scenario 10

The following table illustrates the different levels of approval that are required for a deal in scenario 10:

Scenario 10	Price Item Approval Required	Yes
	Product Level Approval Required	Yes
	Division Level Approval Required	Yes
	Parallel Approval in the Product, Division, or Deal Approval Hierarchy	Yes
	Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the P1 product approval hierarchy:

P1 Product Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	P1 Product Manager 1 (P1 PM1)	Yes
Level 1	P1 Product Manager 2 (P1 PM2)	Yes
Level 2	P1 Senior Product Manager 1 (P1 SPM1)	Yes
Level 2	P1 Senior Product Manager 2 (P1 SPM2)	Yes
Level 3	P1 Executive Product Manager (P1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the P2 product approval hierarchy:

P2 Product Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	P2 Product Manager (P2 PM1)	Yes
Level 2	P2 Senior Product Manager 1 (P2 SPM1)	Yes
Level 2	P2 Senior Product Manager 2 (P2 SPM2)	Yes
Level 3	P2 Executive Product Manager 1 (P2 EPM1)	Yes
Level 3	P2 Executive Product Manager 2 (P2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager 1 (D1 SPM1)	Yes
Level 2	D1 Senior Pricing Manager 2 (D1 SPM2)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager 1 (D2 PM1)	Yes
Level 1	D2 Pricing Manager 2 (D2 PM2)	Yes
Level 2	D2 Senior Pricing Manager 1 (D2 SPM1)	Yes
Level 2	D2 Senior Pricing Manager 2 (D2 SPM2)	Yes
Level 3	D2 Executive Pricing Manager 1 (D2 EPM1)	Yes
Level 3	D2 Executive Pricing Manager 2 (D2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

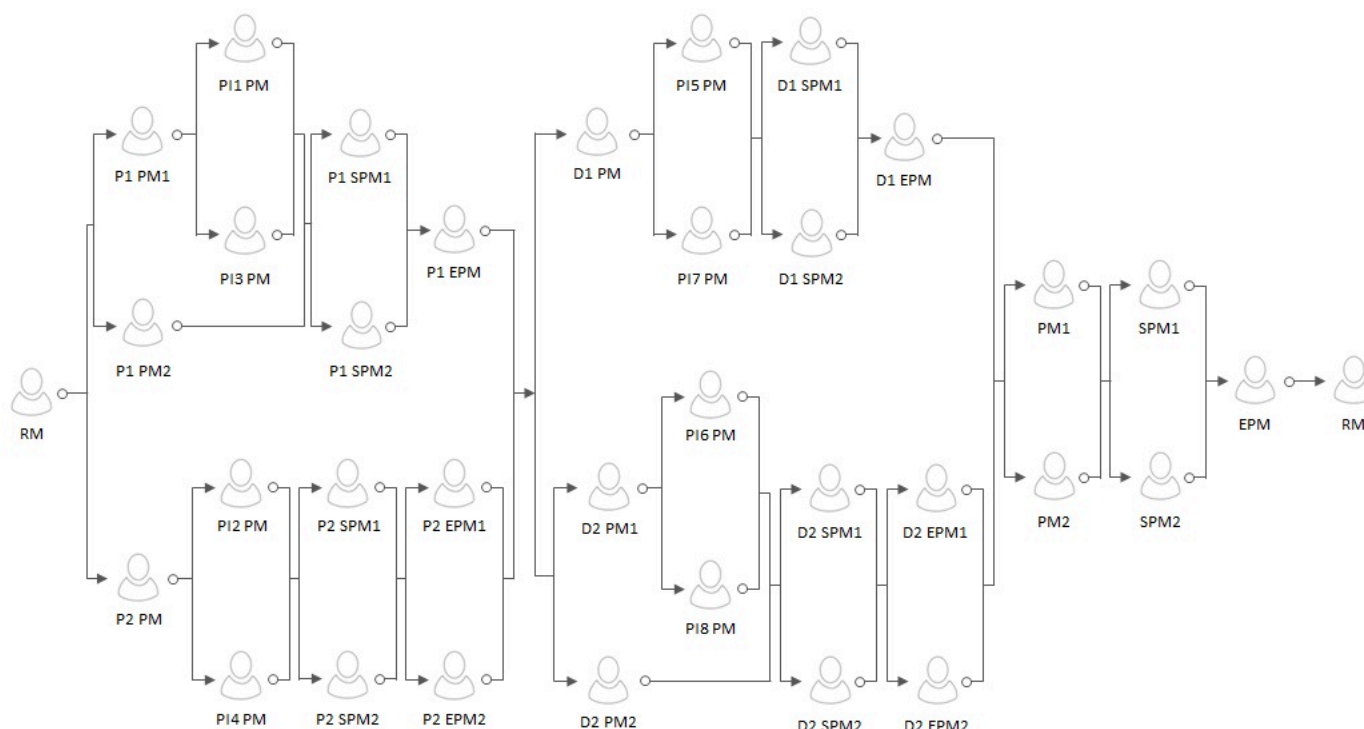

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers			
Price Item	Product	Division	Price Item Manager
PI1	P1		PI1 Pricing Manager (PI1 PM)
PI2	P2		PI2 Pricing Manager (PI2 PM)
PI3	P1		PI3 Pricing Manager (PI3 PM)
PI4	P2		PI4 Pricing Manager (PI4 PM)
PI5		D1	PI5 Pricing Manager (PI5 PM)
PI6		D2	PI6 Pricing Manager (PI6 PM)
PI7		D1	PI7 Pricing Manager (PI7 PM)
PI8		D2	PI8 Pricing Manager (PI8 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

## Different Stages in Deal Lifecycle

Following stages are involved in deal modelling:

- [Deal Creation](#) on page 2464
- [Reference Selection](#) on page 2465
- [Simulation](#) on page 2466
- [Price Item Approval](#) on page 2466
- [Division Level Approval](#) on page 2466
- [Deal Level Approval](#) on page 2467
- [Deal Finalization](#) on page 2467
- [Customer Acceptance or Rejection](#) on page 2467
- [Apply Back or Orchestration](#) on page 2467

## Deal Creation

While creating a deal, you need to specify various details, such as entity for which you want to create the deal, simulation type, deal type, deal date range, price selection date, deal frequency, usage period, review frequency, deal version, etc. You can maintain different versions of a deal. A deal version feature facilitates you to perform what-if analysis. Through each deal version, you can analyze the cost, revenue, and profitability for a different set of proposed pricing and commitments. However, you can only send one best version of a deal for the approval. The system then automatically discards the other versions in a deal.

A deal type helps the system to determine:

- Whether the pricing for each price item should be approved in the deal.
- Whether the deal should be assigned to users for approval as per the limits defined in the deal approval profile.
- Whether the pricing and financial summary should be approved by the respective division.
- Whether the highest level approval is required for the deal.

- Whether the existing pricing should be pre-approved in the deal.
- The deal approval profile that should be used for a division level approval.
- The deal approval profile that should be used for the deal level approval based on the division, customer segment, and customer tier combination.

Whereas, the deal approval profile helps the system to determine:

- Different levels in the division or deal approval hierarchy which can approve the pricing and financial summary of the deal.

**Note:** At present, you can add an approval level from 0 to 10. If required, you can add more approval levels in the system through the **C1\_DEALHIERARCHYLEVEL** lookup field.

- To Do type using which a To Do should be created for the approver at each level.
- To Do role whose users must receive the To Do for approval.
- Whether the users at the approval level can propose a new pricing for a price item while approving the deal.

**Note:** As per the business requirements, a deal level approver can only propose a new pricing for a price item while approving a deal. However, this feature is currently not implemented and would be available for use in the future release.

- Whether the users at the approval level can request the respective price item manager to approve the pricing for the price item.
- Whether the users at the approval level can approve the deal.
- Whether the users at the approval level should only view those price items for approval for whom floor and ceil limits are defined for the price item.
- The minimum and maximum profitability, deviation, and revenue which the users at the approval level can approve in the deal.

The system enables you to configure parallel approval at any level in the division or deal approval hierarchy. Once the deal is created in the **Draft** status, you can either skip the reference or provide the reference.

## Reference Selection

---

The system enables you to refer another customer, account, or deal for pricing and commitments. The system does the following when you select the respective reference:

- **Customer** - You can refer another customer while creating a deal for an existing customer or a prospect person. If you use this reference, the system does the following:
  - Copies the price list assignments and price assignments of the referenced customer and assigns the price lists and pricing to the prospect person in the **Proposed** status.
  - Copies the commitments from the SQI-based billable charges of the referenced customer's accounts (based on the deal frequency and usage period), and accordingly adds rolled up proposed commitments for the prospect person.

In addition, if you use this reference for a prospect person, the system copies the hierarchy of the referenced customer when the **Refer Customer Hierarchy** option is selected.

- **Account** - You can refer another account while creating a deal for an existing account. If you use this reference, the system does the following:
  - Copies the price list assignments and price assignments of the referenced account and assigns the price lists and pricing to the prospect account in the **Proposed** status.
  - Copies the commitments from the SQI-based billable charges of the referenced account (based on the deal frequency and usage period), and accordingly adds proposed commitments for the prospect account.
- **Deal** - You can refer another deal which is created for a customer while creating a deal for an existing customer or a prospect person. And, you can refer another deal which is created for an account while creating a deal for an existing account. If you use this reference for an existing customer or a prospect person, the system does the following:

- Copies the price list assignments and price assignments of the referenced deal's customer and assigns the price lists and pricing to the prospect person in the **Proposed** status.
- Copies the commitments from the SQI-based billable charges of the referenced deal's customer (based on the deal frequency and usage period), and accordingly adds proposed commitments for the prospect person.

However, if you use this reference for an existing account, the system does the following:

- Copies the price list assignments and price assignments of the referenced deal's account and assigns the price lists and pricing to the prospect account in the **Proposed** status.
- Copies the commitments from the SQI-based billable charges of the referenced deal's account (based on the deal frequency and usage period), and accordingly adds proposed commitments for the prospect account.

Once you select or skip the reference, the system checks whether the number of accounts in the customer hierarchy exceeds the account limit defined in the **C1-Deal** feature configuration. If the number of accounts in the customer hierarchy does not exceed the account limit, the system creates the corresponding prospect persons and accounts immediately and then changes the status of the deal to **Pending Simulation**. However, if the number of accounts in the customer hierarchy exceeds the account limit, the status of the deal is changed to **Hierarchy Creation Deferred**. On executing the **C1\_HRC** batch, the system checks whether there are any deals in the **Hierarchy Creation Deferred** status. If so, the system creates the corresponding prospect persons and accounts for the deal and then changes the status of the deal to **Pending Simulation**.

## Simulation

---

Once the deal is in the **Pending Simulation** status, you can do the following:

- Assign a new price list to the prospect person or account
- Edit/override the proposed price assignment of the prospect person or account
- Enroll the prospect account for a new product
- Edit the proposed commitments of the prospect account

Once the required changes are made to the deal, you can simulate the proposed pricing on the proposed commitments. In other words, you can simulate the deal version. On simulating a deal version, the system checks whether the proposed commitments exceed the limit defined in the **C1-Deal** feature configuration. If the proposed commitments do not exceed the limit, the system calculates the cost, revenue, and profitability for the deal version immediately and then changes the status of the deal to **Simulated**. However, if the proposed commitments exceed the limit, the status of the deal is changed to **Simulation Deferred**. On executing the **C1\_SMLD** batch, the system checks whether there are any deals in the **Simulation Deferred** status. If so, the system calculates the cost, revenue, and profitability for the deal version and then changes the status of the deal and its version to **Simulated**.

## Price Item Approval

---

If the **Price Item Approval Required** field is set to **Yes** in the deal type, the pricing of all the price items should be approved before the deal is approved. An approver at any level in the division or deal approval hierarchy can approve the pricing of a price item when the pricing falls within the floor and ceil limits of the approver. Additionally, if the **Submit Price Item for Approval** field is set to **Yes** for an approval level, the approver at the respective level can request the price item manager to approve the pricing for the price item. On clicking the **Submit Price Item for Approval** button, the status of the deal is changed to **Pending for Approval**.

## Division Level Approval

---

If the **Division Level Approval Required** field is set to **Yes** in the deal type, the system creates a To Do for the approver at the first level in the division approval hierarchy. The approver can either approve the division-specific pricing and financial summary or request the submitter to resubmit the deal for approval after making the required changes. If the approver at the first level in the division approval hierarchy approves the division-specific pricing and financial

summary, or if the approver at the first level in the division approval hierarchy cannot approve the division-specific pricing and financial summary, the system creates a To Do for the approver at the next level in the division approval hierarchy. This process continues until the approval is received from all the levels in the division approval hierarchy.

## Deal Level Approval

---

Once the approval is received from all the levels in the division approval hierarchy, the system creates a To Do for the approver at the first level in the deal approval hierarchy. The approver can either approve the deal or request the submitter to resubmit the deal for approval after making the required changes. If the approver at the first level in the deal approval hierarchy approves the deal and if the highest level approval is not required, the system changes the status of the deal to **Approved**. However, if the approver at the first level in the deal approval hierarchy cannot approve the deal, the system creates a To Do for the approver at the next level in the deal approval hierarchy. This process continues until the deal is approved by any level in the deal approval hierarchy. However, if the highest level approval is required for the deal, this process continues until the deal is approved by the highest level in the deal approval hierarchy.

## Deal Finalization

---

Once a deal is approved, you can finalize the deal. On clicking the **Finalize** button, the status of the deal is changed to **Finalized**.

## Customer Acceptance or Rejection

---

The system enables you to either accept or reject the finalized deal based on the customer feedback. On clicking the **Accept** button, the status of the deal is changed to **Customer Accepted**. However, on clicking the **Reject** button, the status of the deal is changed to **Rejected**.

## Apply Back or Orchestration

---

Once the deal is accepted for an existing customer or account, you can click the **Apply Back** button. On clicking the **Apply Back** button, the system does the following:

- Copies a new proposed price list assignment and assigns the price list to the respective customer or account in the **Active** status.
- Ends the price assignment of the respective customer or account when it is overridden or edited for the prospect customer or account.
- Creates a new price assignment for respective customer or account when it is overridden or edited for the prospect customer or account.
- Copies a new proposed product enrollment and enrolls the respective account for the product in the **Active** status.

The customer acceptance date is used as the start date while adding the new price list assignments, price assignments, and product enrollments.

Once the above changes are made, the system changes the status of the deal to **Fully Orchestrated**. The system enables you to onboard a prospect person or account through the **File Upload Request** utility. Once the person or account is created, the system checks whether there is any deal with the specified deal identifier in the **Customer Accepted** status. If so, the system checks whether the primary person or account identifier matches with the primary prospect person or account identifier, respectively. If so, the system adds the person or account ID corresponding to the prospect person or account. Then, the system changes the status of the deal to **Partially Orchestrated**. Once the system creates persons and accounts for the entire prospect hierarchy, the status of the deal is changed to **Fully Orchestrated**.

## Deal Monitoring

Oracle Revenue Management and Billing enables the relationship manager to assess the deal at regular intervals using the **Deal Monitoring** feature. The system sends the To Do reminders to the relationship manager at predefined intervals to review the deal. On assessing a deal, the relationship manager can accordingly add the review comments for the deal.

To send the To Do reminders for deal review, you need to set the following fields in the required deal types:

- **To Do Reminder Days** – Used to indicate the number of days using which the system calculates the To Do reminder date.
- **To Do High Priority Days** – Used to indicate the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.
- **Deal Monitor To Do Type** – Used to indicate the To Do type using which the To Do should be created for the deal review.

The **Deal Monitoring (C1\_DLMTR)** batch is used to monitor or check whether there is any deal in the **Fully Orchestrated** status. If there is a deal in the **Fully Orchestrated** status, the system considers its deal version which is in the **Fully Orchestrated** status. It then does the following:

- Calculates the review date and To Do reminder date for the deal
- Create a To Do for deal review and changes the status of the deal to **Pending For Review** when the To Do reminder date is equal to the system date

If the deal is not yet reviewed even once, the batch calculates the first review date using the deal effective start date and deal review frequency. For example, if there is a deal which is effective from 07-01-2020 to 12-31-2021 and where the deal review frequency is set to **Biannually**, the system sets the first review date to 01-01-2021 (i.e. 07-01-2020 + 6 months). However, if the deal is already reviewed in the past, the batch calculates the subsequent review date using the last review date and deal review frequency. For example, if there is a deal which is effective from 07-01-2020 to 12-31-2021 and where the last review date is set to 01-01-2021 and the deal review frequency is set to **Biannually**, the system sets the subsequent review date to 07-01-2021 (i.e. 01-01-2021 + 6 months). Note that if the calculated review date is later than the deal effective end date, then the batch sets the review date to the deal effective end date. For example, if there is a deal which is effective from 07-01-2020 to 12-31-2021 and where the last review date is set to 07-01-2021 and the deal review frequency is set to **Biannually**, the system sets the subsequent review date to 12-31-2021. This is because the calculated review date (i.e. 01-01-2022) is later than the deal effective end date (i.e. 12-31-2021).

In addition, the batch calculates the To Do reminder date which is review date minus the To Do reminder days. For example, if the review date is 12-31-2021 and To Do reminder days is 60, the system sets the To Do reminder date to 11-01-2021. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*. After executing the **Deal Monitoring (C1\_DLMTR)** batch, you need to execute the **Recalculate To Do Priority (F1-TDCLP)** batch. The **Recalculate To Do Priority (F1-TDCLP)** batch recalculates and changes the priority of the To Do reminder using the following formula:

$(\text{To Do Reminder Days} - \text{To Do High Priority Days}) / \text{Number of Priority}$

For example,

The following table lists the parameters and their values which are used for calculating the priority of the To Do reminders:

To Do Reminder Days	90
To Do High Priority Days	30
To Do Reminder Date	01-April-20
Deal Review Date	30-June-20
Number of Priority	8

In this case, the system changes the priority of the To Do reminder after every 8 days (i.e.  $(90-30)/8=7.5$ ) as mentioned in the below table:

System Date	Priority
1-April-2020	Lowest - Priority 9
9-April-2020	Priority 8
17-April-2020	Priority 7
25-April-2020	Priority 6
02-May-2020	Priority 5
10-May-2020	Priority 4
18-May-2020	Priority 3
26-May-2020	Priority 2
01-June-2020	Highest Priority 1

The system changes the To Do priority from Priority 9 to Priority 1 where 9 is the lowest and 1 is the highest. The system always ensures that the priority of the To Do reminder to highest is set 10 days before the deal review date. However, if the output of the above formula is zero, the system changes the priority of the To Do reminder every day.

If a deal is in the **Pending For Review** status, the **Review Deal** icon appears corresponding to the deal in the **Search Deal** zone of the **Deal Dashboard** screen. On clicking the **Review Deal** icon, the **Deal Review** window appears. Here, the relationship manager can add the review comments for the deal after assessing its performance. On adding the review comments, the status of the deal is changed from **Pending For Review** to **Fully Orchestrated**.

## Product Level Approval for Deals

Until now, the relationship manager could send one best version of the deal for the division and deal level approvals. Now, in addition, the relationship manager can send one best version of the deal for the product level approval when the following conditions are met:

- Customers or accounts in the deal have enrolled for the products
- **Product Level Approval Required** field is set to **Yes** in the respective deal type
- Deal approval profile is specified for the division and product combination in the respective deal type

The system enables you to design a deal approval profile for the product approval hierarchy. The deal approval profile of a product and division combination helps the system to determine:

- Different levels in the product approval hierarchy which can approve the price item pricing and financial summary of the product in the deal. Note that the product level approver can only approve the pricing of those price items which are included in the product.
- Whether the product level approver can recommend a new pricing for a price item while approving the deal.
- Whether the product level approver can request the respective price item manager to approve the pricing for the price item.
- Whether the product level approver can approve the deal.
- Whether the product level approver should only view those price items for approval for which floor and ceil limits are within his approval range.
- The minimum and maximum profitability, profit, profit variation, and revenue which the product level approver can approve in the deal.

In a deal type, you can now specify the approval profile for a division and product combination using the approval type as **Product**. If a product is associated to multiple divisions, you can specify the approval profile for each division and product combination. If a deal is created for a customer or prospect whose accounts belong to different divisions,

but have enrolled for the same product, the system then creates a product approval hierarchy for each division and product combination. For example, if the SAVINGS product is associated to two divisions named CA and US and an approval profile is specified for both the combinations (i.e. SAVINGS and CA; SAVINGS and US) in the deal type, the system will create two product approval hierarchies when two accounts belonging to different divisions (i.e. CA and US) have enrolled for the SAVINGS product in a deal. One product approval hierarchy would be for the SAVINGS and US combination and another product approval hierarchy would be for the SAVINGS and CA combination. However, if the SAVINGS product is associated to two divisions named CA and US and an approval profile is specified only for the SAVINGS and CA combination in the deal type, the system will create one product approval hierarchy for the SAVINGS and CA combination. The system will not create product approval hierarchy for the SAVINGS and US combination because there is no approval profile configured for this combination in the deal type.

**Note:** You cannot specify the same approval profile for the same or different product and different division combination. However, you can specify the same approval profile for the different product and same division combination.

The system enables you to configure parallel approval at any level in the product approval hierarchy. If the **Product Level Approval Required** field is set to **Yes** and the **Division Level Approval Required** field is set to **Yes**, the system first sends the deal to the product approval hierarchy, then to the division approval hierarchy and finally to the deal approval hierarchy for approval. However, if the **Product Level Approval Required** field is set to **Yes** and the **Division Level Approval Required** field is set to **No**, the system first sends the deal to the product approval hierarchy and then to the deal approval hierarchy for approval.

If the **Product Level Approval Required** field is set to **Yes** in the deal type, the system creates a To Do for the approver at the first level in the product approval hierarchy. The approver can either approve the product-specific price item pricing and product financial summary or request the submitter to resubmit the deal for approval after making the required changes. If the approver at the first level in the product approval hierarchy approves the product-specific price item pricing and product financial summary, or if the approver at the first level in the product approval hierarchy cannot approve the product-specific price item pricing and product financial summary, the system creates a To Do for the approver at the next level in the product approval hierarchy. This process continues until the approval is received from all the levels in the product approval hierarchy.

Note that a product level approver can recommend a price for a price item which is included in the product when the **Propose Pricing** field is set to **Yes** for the approval level in the deal type. After recommending a new price (i.e. rate), the product level approver needs to request the submitter to resubmit the deal for approval after considering the recommended price.

If the **Product Level Approval Required** field is set to **Yes** and if customers or accounts in the deal have enrolled for the products, the **Product Financial Summary** section appears in the **Simulation Details** zone when you simulate the deal. It indicates the revenue, cost, profit, and profitability for each product and division combination. In addition, the **Product Financial Summary** section appears in the **Pricing and Commitments** screen. It indicates the revenue and cost of each product to which existing customer's or prospect's account is enrolled. The system calculates the revenue and cost based on the original, proposed, and recommended prices, and accordingly shows the variation between original, proposed and recommended revenue.

## Recommended Pricing

Oracle Revenue Management and Billing enables the approver at any level in the product approval hierarchy, division approval hierarchy, and deal approval hierarchy to recommend a price for a price item. An approver can recommend a price for a price item when the **Propose Pricing** field is set to **Yes** for the respective level in the approval hierarchy.

**Note:** The **Propose Pricing** field is non-editable for the Level 0 in the deal approval hierarchy. By default, it is set to **No**.

The recommended pricing related columns (such as **Pricing Information**, **Average Price**, and **Revenue**) are visible to the approver in the **Pricing and Commitments** section of the **Pricing and Commitments** screen. The **Recommend Price** link appears in the **Pricing Information** column corresponding to each price item. On clicking the **Recommend Price** link, the **Deal Pricing** screen appears. The **Rate** field corresponding to each price component is editable in the **Projected Pricing** section of the **Deal Pricing** screen. The approver can recommend a new price for the price item.

However, note that the recommended price for the price item should be within the negotiability floor and ceil limits of the approver.

On simulating the deal, the system calculates the average price, revenue, cost, profit, and profitability based on the recommended price. It checks whether the average price of the price item is within the average price floor and ceil limits of the approver and accordingly changes the status of the price item to **Approved**, **Pending for Approval**, or **Error**. After analyzing the profitability of the deal, the approver can click the **Return to Submitter** button and thereby request the submitter to consider the recommended price for the price item. On clicking the **Return to Submitter** button, the status of the price item is changed to **Approver Recommended**. In addition, a To Do is generated for the relationship manager of the deal. If required, the approver who has recommended the price can edit or delete the recommended price before clicking on the **Return to Submitter** button.

If the approver has sent the price item to the price item manager for approval, the approver cannot recommend the price for the price item. And, if the approver has recommended the price for a price item, the approver cannot send the price item to the price item manager for approval. In such case, the approver can send the price item to the price item manager for approval only after deleting the recommended price for the price item.

In case of parallel approval, if one approver has recommended the price for a price item, the other approver can view the recommended price for the price item. But, the other approver cannot edit or delete the recommended price for the price item. Also, in case of parallel approval, if one approver has sent the price item to the price item manager for approval, then other approver cannot recommended price for the price item. And, vice-versa, if one approver has recommended price for the price item, then other approver cannot send the price item to the price item manager for approval.

On viewing the recommended price for the price item, the relationship manager may or may not edit the price of the price item based on the approver recommendation. If the relationship manager edits the price of the price item based on the approver recommendation, the system checks whether the proposed price is within the negotiability floor and ceil limits of the relationship manager. Then, on simulating the deal, the system calculates the average price, revenue, cost, profit, and profitability based on the new proposed price. It checks whether the average price of the price item is within the average price floor and ceil limits of the relationship manager. Here, the system derives a new floor and ceil range for the relationship manager dynamically using the approver recommended price and accordingly changes the status of the price item to **Approved**, **Pending for Approval**, or **Error**.

## Deal Currency Conversion

---

Oracle Revenue Management and Billing enables you to view the division financial summary (i.e. revenue, cost, profit, and profitability of the division) in the deal currency or in the respective division currency. A toggle switch appears above the **Division Financial Summary** section. By default, the division financial summary is shown in the deal currency. On clicking the toggle switch, you can view the division financial summary in the division's base currency.

In addition, the system enables you to:

- View the original and proposed revenue and cost of a customer (in the customer hierarchy) in the deal currency or in the respective customer's division currency
- View the original and proposed revenue and cost of an account (in the customer hierarchy) in the deal currency or in the respective account's invoice currency
- View the original and proposed revenue and cost of a price item assigned to a customer in the deal currency or in the respective customer's division currency
- View the original and proposed revenue and cost of a price item assigned to an account in the deal currency or in the respective account's invoice currency
- View the average price of a price item assigned to a customer in the pricing currency or in the respective customer's division currency
- View the average price of a price item assigned to an account in the pricing currency or in the respective account's invoice currency

A toggle switch appears above the respective section. By default, the original and proposed revenue and cost are shown in the deal currency and the average price of the price item is shown in the pricing currency. On clicking the toggle

switch, you can view the original and proposed revenue and cost and average price of the price item in the customer's division currency or account's invoice currency.

During currency conversion, the system uses the currency conversion algorithm attached to the **Currency Conversion For Bill Segments** system event of the division. Note that the currency conversion happens when the **Allow Multi-Currency Accounts** option type of the **C1\_MLTCURACC** feature configuration is set to **Y**.

## Reference Selection Based on Questionnaire

---

Oracle Revenue Management and Billing enables you to derive reference customers and deals during a deal creation using a questionnaire. Note that the reference deals are those deals which belong to the reference customers which are derived using the questionnaire. The system displays the questions from the questionnaire template which is specified in the respective deal type. Note that the system considers the questionnaire template specified in the deal type when it is effective on the deal start date. You can also skip the questionnaire using the **Skip Questionnaire** option. If a questionnaire template is not specified in the respective deal type or if the questionnaire template is not effective on the deal start date or if the **Skip Questionnaire** option is selected during the deal creation, the system derives the reference customers for the deal using the division, customer segment, and customer tier combination. Note that reference deals are not derived when the **Skip Questionnaire** option is selected during the deal creation.

While defining a questionnaire template, you can specify the following:

- The date range when the questionnaire template is effective
- Whether to display the questions from the questionnaire template in a particular sequence or when a rule of a particular rule type is satisfied
- A set of questions that you want the customer to answer
- Whether the answer for the question should be:
  - Date
  - Decimal Value
  - From Multi Selection Drop Down List
  - From Multi Selection Check Box List
  - Numeric Value
  - Percentage
  - From Radio Button List
  - From Single Selection Drop Down List
  - Text
- Whether the answer value set for the following answer types should be derived from the reference data or from a predefined list:
  - Multi Selection Drop Down List
  - Multi Selection Check Box List
  - Radio Button List
  - Single Selection Drop Down List
- The reference table, column, and criteria when the answer value set is set to **Reference Data**. Note that you can only use the Equal To and IN operators while defining the reference criteria.
- The default answer for the question
- Whether the question is mandatory or optional in the questionnaire
- The parameter which helps to derive the reference customers when the question is answered in the questionnaire. Note that you can only specify a parameter where the source entity is set to **Person** or **Account** and the source type is set to **Characteristic** or **Field**.
- The rule type which helps to determine the rules that should be executed to display the next question in the questionnaire
- Whether the response from the question should be used to derive the reference customer list
- The predefined values when the answer value set is set to **Predefined List**

A new screen named **Questionnaire Template** is introduced in this release. You can define, edit, delete, copy, and preview a questionnaire template through this screen. On previewing a sequence based or rule based questionnaire template, the questions appear in the specified sequence. When a rule based questionnaire template is used during a deal creation, the system displays the next question based on the output of the previous question.

A new page named **Questionnaire** is added to the **Deal Information** screen which helps to answer the questionnaire. The number of questions that appear in the **Questionnaire** page depends on the value specified in the **Questionnaire UI Pagination Limit** option type of the **C1-DEAL** feature configuration.

## Rate Negotiability for Price Item in Deal

---

Oracle Revenue Management and Billing enables you to indicate whether the rate is negotiable for a price item in a deal. A new field named **Negotiability Switch** is introduced while defining or editing a price item. The system enables you to set the negotiability option for a price item at the division level. Therefore, you can set different the negotiability option for the divisions to which the price item is associated. By default, the **Negotiability Switch** field is set to **No**.

If you set the **Negotiability Switch** field to **No** for a division of a price item, you cannot edit or override the rate of the price item in a deal when the customer or account to which the price item is assigned belongs to the division. However, if you set the **Negotiability Switch** field to **Yes** for a division of a price item, you can edit or override the rate of the price item in a deal when the customer or account to which the price item is assigned belongs to the division. Along with the **Negotiability Switch** field, you can also set the **Only Within Range** field which indicates that the system should validate whether the negotiated rate is within the negotiability floor and ceil limits. The **Only Within Range** field is enabled only when the **Negotiability Switch** field is set to **Yes**. By default, the **Only Within Range** field is set to **No**.

If the **Only Within Range** field is set to **No**, the system does not validate whether the negotiated rate is within the negotiability floor and ceil limits. However, if the **Only Within Range** field is set to **Yes**, the system validates whether the negotiated rate is within the negotiability floor and ceil limits. You can define the negotiability floor and ceil limits for a division of a price item at the price item level or at the price assignment level.

On clicking the link in the **Pricing Information** column corresponding to a price item in the **Pricing and Commitments** screen, the system enables you to edit or override the original pricing when the **Negotiability Switch** field is set to **Yes** for the price item and thereby create a proposed pricing. If the **Only Within Range** field is set to **Yes**, the system first validates whether the negotiated rate is within the negotiability floor and ceil limits specified in the original pricing (in case of override) or proposed pricing (in case of edit). To validate the rate, the system considers the pricing where the price item, pricing currency, and division (for which pricing is defined on the customer or account) is same. If the negotiated rate is within the negotiability floor and ceil limits specified in the original or proposed pricing, the system enables you to edit or override the rate. However, if the negotiated rate is not within the negotiability floor and ceil limits specified in the original or proposed pricing, an error occurs indicating that the specified rate is not within the negotiability floor and ceil limits.

If the negotiability floor and ceil limits are not specified for the division in the original or proposed pricing, the system checks whether the negotiated rate is within the negotiability floor and ceil limits specified at the price item level. The system considers the negotiability range of the pricing currency. If the negotiated rate is within the negotiability floor and ceil limits specified at the price item level, the system enables you to edit or override the rate. However, if the negotiated rate is not within the negotiability floor and ceil limits specified at the price item level, an error occurs indicating that the specified rate is not within the negotiability floor and ceil limits. If the negotiability range is not defined for the pricing currency, the system does not validate whether the negotiated rate is within the negotiability floor and ceil limits of the price item.

If the rate negotiability feature is configured for a price item, the system enables:

- The relationship manager to propose a negotiated rate for the price item
- The product level approver, division level approver, and deal level approver to recommend a rate for the price item.

## Price Item Selection during Deal Creation

---

Oracle Revenue Management and Billing enables you to select the price items which you want to offer in a deal. If you create a deal for an existing customer, the system, by default, selects the following price items:

- Whose pricing is directly assigned to the customer
- Whose pricing is inherited by the customer

Note that the system does not by default select the price items assigned to the customer's accounts and the price items assigned to the child customers and their accounts. And, if you create a deal for an existing account, the system, by default, selects the following price items:

- Whose pricing is directly assigned to the account
- Whose pricing is inherited by the account

The default price item selection is done when the following conditions are met:

- Deal is created for an existing customer or an account
- Default commitments are not defined in the respective deal type

However, if the deal is created for a proposed customer or if the default commitments are defined in the respective deal type, the system does not select the price items, by default, in the **Price Item Group Selection** screen. You have to manually select the required price items in the **Price Item Group Selection** screen. Only then, the system considers the pricing and commitments of the selected price items in the deal.

If required, you can deselect a price item the **Price Item Group Selection** screen. You can access the **Price Item Group Selection** screen in either of the following ways:

- By clicking the **Edit** (✎) icon in the **Price Item Group Selection** column corresponding to the customer or account in the **Simulation Details** zone of the **Deal Information** screen
- By clicking the **Select Price Item Group** button in the **Pricing and Commitments** screen
- By clicking the **Save and Select Price Item Group** button in the **Price List Assignment** screen

Only the selected price items are then considered in the deal for simulation. On assigning a price list to an entity in the customer hierarchy, you need to select the price items whose pricing you want to inherit from the price list. Only the selected price items from the price list will be considered in the deal for simulation. If you remove a price list which is newly assigned to an entity in the deal, the price item pricing inherited from the price list is removed from the **Pricing and Commitments** screen.

However, if you override a price list pricing and create a customer or account agreed pricing for the entity, the system does not delete the customer or account agreed pricing when the assigned price list is removed from the deal.

The system enables you to select or deselect all price items within a root level or non-root level hierarchy entity by selecting the check box corresponding to the root level or non-root level hierarchy entity. On clicking the check box corresponding to the root level hierarchy entity, all the subsequent non-root level hierarchy entities and their price items are selected.

## Price Item and Hierarchy Entity Selection in a Deal Based on Characteristic Value

---

The system provides an alternative solution wherein the price items and hierarchy entities are automatically selected based on their characteristic in the **Price Item Group Selection** screen. Two new algorithm spots named **Price Item Group List Filter** and **Price Item Selection Validation** are available while defining a deal type. A new algorithm type named **C1-DPIG-ELIG** is introduced in this release. This algorithm checks whether the characteristic type specified in the parameter is defined on each price item and hierarchy entity. A new characteristic type named **C1\_SEL\_T** is shipped with the product. It has three predefined values – **Standard**, **Mandatory**, and **Optional**. On accessing the **Price**

**Item Group Selection** screen of an entity for the first time in a deal, the system checks whether the **C1-DPIG-ELIG** algorithm is attached to the **Price Item Group List Filter** system event in the respective deal type.

If the **C1-DPIG-ELIG** algorithm is not attached to the **Price Item Group List Filter** system event in the respective deal type, the system behaves in the traditional manner. However, if the **C1-DPIG-ELIG** algorithm is attached to the **Price Item Group List Filter** system event in the respective deal type, the system checks whether the characteristic type specified in the **C1-DPIG-ELIG** algorithm is defined for each price item and hierarchy entity. If so, the system behavior for each price item and hierarchy entity varies depending on the value defined for the **C1\_SEL\_T** characteristic type on the respective price item and hierarchy entity. The following table explains the significance of each predefined characteristic value:

Characteristic Value	System Behavior
Standard	If the characteristic value is set to <b>Standard</b> , the system, by default, selects the check box corresponding to the price item or hierarchy entity in the <b>Price Item Group Selection</b> screen. The check box is editable. If the <b>C1_SEL_T</b> characteristic of a parent entity in the price item hierarchy is set to <b>Standard</b> , the system checks the <b>C1_SEL_T</b> characteristic of each child entity in the respective hierarchy and behaves based on the value defined for the <b>C1_SEL_T</b> characteristic type on the respective child entity.
Mandatory	If the characteristic value is set to <b>Mandatory</b> , the system, by default, selects the check box corresponding to the price item or hierarchy entity in the <b>Price Item Group Selection</b> screen. The check box is non-editable. If the <b>C1_SEL_T</b> characteristic of a parent entity in the price item hierarchy is set to <b>Mandatory</b> , the system checks the <b>C1_SEL_T</b> characteristic of each child entity in the respective hierarchy and behaves based on the value defined for the <b>C1_SEL_T</b> characteristic type on the respective child entity.
Optional	If the characteristic value is set to <b>Optional</b> , the system, by default, does not select the check box corresponding to the price item or hierarchy entity in the <b>Price Item Group Selection</b> screen. The check box is editable. If the <b>C1_SEL_T</b> characteristic of a parent entity in the price item hierarchy is set to <b>Optional</b> , the system does not check the <b>C1_SEL_T</b> characteristic of each child entity in the respective hierarchy and considers all the child and grandchild entities as optional.

The following table illustrates how the price items and hierarchy entities would be selected based on their characteristic value:

Level 1	Level 2	Level 3	Characteristic Value	Check Box Selected (Y or N)	Check Box Disabled (Y or N)
PG1	-	-	Standard	Y	N
	PG2	-	Mandatory	Y	Y
		PI1	Mandatory	Y	Y
		PI2	Optional	N	N
	PI3	-	Standard	Y	N
	PI4	-	Optional	N	N
	PG3	-	Optional	N	N
		PI5	Mandatory	Y	Y
		PI6	Standard	Y	N

If a user deselects a price item or hierarchy entity, the system deselects all the child entities including the mandatory entity (if any) in the respective hierarchy. However, if a user selects a price item (for example, PI1 in the above example which was deselected earlier), the system does the following:

- Checks the **C1\_SEL\_T** characteristic of other siblings (i.e. PI2) in the hierarchy and behaves based on the value defined for the **C1\_SEL\_T** characteristic type on the respective sibling entity.
- Selects the check box corresponding to the immediate parent and its grandparent hierarchy entities (i.e. PG2 and PG1) in the price item hierarchy.
- Checks the **C1\_SEL\_T** characteristic of the child entities in the parent and grandparent hierarchies (i.e. PI3, PI4, PG3) and behaves based on the value defined for the **C1\_SEL\_T** characteristic type on the respective child entity.

However, if a user selects a hierarchy entity (i.e. PG2), the system does the following:

- Checks the **C1\_SEL\_T** characteristic of the child entities (i.e. PI1 and PI2) in the respective hierarchy and behaves based on the value defined for the **C1\_SEL\_T** characteristic type on the respective child entity.
- Selects the check box corresponding to the immediate parent and its grandparent hierarchy entities (i.e. PG1) in the price item hierarchy.
- Checks the **C1\_SEL\_T** characteristic of the child entities in the parent and grandparent hierarchies (i.e. PI3, PI4, PG3) and behaves based on the value defined for the **C1\_SEL\_T** characteristic type on the respective child entity.

You can opt to validate the selection (if required) by designing a custom logic and then attaching the algorithm to the **Price Item Selection Validation** system event of the respective deal type. On clicking the **Save & View Pricing & Commitment** button, the system will invoke the algorithm attached to the **Price Item Selection Validation** system event and accordingly validate the price item and hierarchy entity selection of an entity in the deal.

Earlier, while using the search filter in the **Price Item Group Selection** screen, the system used to extract only those price items and hierarchy entities which met the search criteria. Now, the system highlights the price item hierarchies in the entire set with either the green or grey color. Two shades of grey are used – one highlights the entire price item hierarchy where none of price items or hierarchy entities meet the search criteria, and another highlights the price item hierarchy where one or more price items or hierarchy entities but not all meets the search criteria. The system highlights the price item hierarchy with the green color when all its price items or hierarchy entities meet the search criteria. Two new icons named **Up** and **Down** are available in the **Search Criteria** section which enable you to quickly jump from one search result to another (highlighted in the green color).

Now, on clicking the **Select All** button in the **Price Item Group Selection** screen, the system selects all the hierarchy entities and price items irrespective of the **C1\_SEL\_T** characteristic value. However, on clicking the **Deselect All** button in the **Price Item Group Selection** screen, the system deselects all the hierarchy entities and price items except the ones where the **C1\_SEL\_T** characteristic value is set to **Mandatory**.

## Seasonal Pricing for Price Items in a Deal

Oracle Revenue Management and Billing enables the relationship manager to create a seasonal pricing for a price item. This feature enables the relationship manager to offer different rates for a price item for different periods. You can create a seasonal pricing for a price item by overriding the proposed pricing of the price item which is effective from the deal start date. While creating a seasonal pricing, you need to ensure the following:

- Start and end dates are specified in the seasonal pricing
- Start date is later than the deal start date
- End date is not later than the date which is calculated using the start date and number of months specified in the **Validity Period for Deal in Months** option type of the **C1-Deal** feature configuration
- Price assignment type of the seasonal pricing should be same as the proposed pricing which is overridden

If the proposed pricing which you are overriding to create the seasonal pricing is open-ended (i.e. the end date is not specified in the proposed pricing), the system automatically ends the proposed pricing of the price item. The end date of the proposed pricing is set to Seasonal Pricing Start Date - 1.

You can define more than one seasonal pricing for a price item which is effective during a different date range. However, note that you cannot define more than 10 seasonal pricing for a customer or an account. Along with the proposed pricing,

the system sends the seasonal pricing of a price item for product, division, and deal level approval. An approver can only approve the seasonal pricing, but cannot recommend a change in the seasonal pricing. An approver can approve the seasonal pricing when the average price falls within the floor and ceil limits of the approver. The relationship manager or approver can send the seasonal pricing of a price item to the price item manager for approval. In such case, the price item manager can view both proposed and seasonal pricing for the price item. But, the price item manager can only approve the seasonal pricing of the price item.

You cannot specify the commitments for the seasonal pricing in the deal. By default, the system considers the commitments of the proposed pricing while calculating the revenue from the seasonal pricing. Also, the system does not consider the seasonal pricing of a price item while calculating the product, division, and deal level financial summary. The system only considers the proposed pricing of a price item while calculating the product, division, and deal level financial summary. You can view the revenue generated for a price item from the seasonal pricing in the **Pricing and Commitments** screen.

If the seasonal pricing is created for a price item with the assignment level other than **Customer Agreed** or **Account Agreed**, the system will automatically consider the proposed pricing of the price item after the seasonal pricing's effective end date. However, if the seasonal pricing is created for a price item with the assignment level as **Customer Agreed** or **Account Agreed**, the relationship manager will have to create a new seasonal pricing for the price item for the remaining deal period.

The following table illustrates different seasonal pricing scenarios at different assignment levels:

Scenario	Assignment Level	Proposed Pricing		Seasonal Pricing	
		Start Date	End Date	Start Date	End Date
Scenario 1	Customer Price List or Account Price List	01-01-2021	31-12-2021	01-03-2021	30-06-2021
Scenario 2	Customer Agreed or Account Agreed	01-01-2021	31-12-2021	01-02-2021	31-05-2021

In scenario 1, the system considers the proposed pricing of the price item after the seasonal pricing of the price item is expired. However, in scenario 2, the relationship manager will have to create a new seasonal pricing for the price item which is effective from 01-06-2021 to 31-12-2021.

## Include Customer Hierarchy in a Deal

Earlier, while creating a deal for an existing customer, the system, by default, considered all child and grandchild persons and their accounts in the customer hierarchy. Now, the system facilitates you to indicate whether you want to consider all child and grandchild persons and their accounts in the customer hierarchy while creating a deal.

A new option named **Include Hierarchy** is introduced in this release. It appears when the entity type is set to **Customer** and simulation type is set to **Customer** while creating a deal. If you select the **Include Hierarchy** option while creating a deal, the system considers all child and grandchild persons and their accounts in the customer hierarchy. Note that if you select a reference customer while creating a deal for an existing customer, the system considers all child and grandchild persons and their accounts in the referenced customer's hierarchy irrespective of whether the **Include Hierarchy** option is selected or not.

## Contracted Deal

At present, the relationship manager of a deal can offer a customer or account agreed pricing for a price item or can inherit the pricing for a price item from a price list. If you inherit the pricing for a price item from a price list in a deal and if you change the price item pricing in the price list after orchestrating the deal, the price list is updated in the system.

As a result, the pricing offered for a price item to an entity in the deal is overridden. Oracle Revenue Management and Billing enables you to handle this issue by creating a contracted deal.

A new option named **Contracted Deal** is introduced in this release. If you select the **Contracted Deal** option while creating a deal for an existing customer, account, or prospect, any change in the price item pricing of the price list (after orchestration) will not affect the price item pricing offered in the deal.

The **Contracted Deal** option works in conjunction with a new option named **Variable Price** which is available while defining a price item. If the **Variable Price** option is selected for a price item, the system will inherit the pricing for the price item from the price list. In such case, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.

However, if the **Variable Price** option is not selected for a price item, the system will create a customer or account agreed pricing for the price item, whose pricing is inherited from the price list, whenever the relationship manager orchestrates the deal. In such case, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe. Note that the system creates a customer or account agreed pricing for the price item whose pricing is inherited from the price list only when the commitments are specified for the price item in the deal. If the commitments are not specified for the price item in the deal, the system does not create customer or account agreed pricing for the price item, whose pricing is inherited from the price list. In such case, the system ignores the price items without commitments. It neither creates an error message nor creates a To Do to indicate the error that occurred while creating the price assignments during orchestration.

While accepting a contracted deal, you need to specify the customer acceptance end date. The system then uses the customer acceptance end date as the effective end date while creating the customer or account agreed price assignments during orchestration.

**Note:** You cannot define seasonal pricing for a price item in a contracted deal.

## Deal Inactivation

Oracle Revenue Management and Billing enables the relationship manager to create multiple deals and deal versions until he reaches the best-optimized deal for a customer. Most of the deals which are created to check multiple permutation combinations to reach the best deal are later not updated in the system. Oracle Revenue Management and Billing provides the ability to automatically inactivate such deals which are not active in the system for a long time. The system stamps the last updated date on a deal when an action is performed on the deal or when there is a change in the deal status.

To automatically inactivate the deals which are not updated in the system for a long time, you need to:

- Attach an algorithm which is created using the **C1-INACDEAL** algorithm type to the **Deal Inactivation** system event in the required deal types.
- Set the following fields in the required deal types:
  - **Days to Inactivate Deal** – Used to indicate the number of days after which the deal should be inactivated when it is not active in the system. Here, you must specify a numeric value greater than zero. The numeric value should be greater than the values specified in the **To Do Reminder Days** and **To Do High Priority Days** fields. This field is required when the deal inactivation algorithm is attached to the deal type.
  - **To Do Reminder Days** - Used to indicate the number of days using which the system calculates the first To Do reminder date.
  - **To Do High Priority Days** - Used to indicate the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.

The deal inactivation algorithm (i.e. **C1-INACDEAL**) does the following:

- Calculates the following dates for the deal:
  - **Deal Inactivation Date** = Last Updated Date + Days to Inactivate Deal
  - **First To Do Reminder Date** = Deal Inactivation Date – To Do Remainder Days
  - **Second To Do Remainder Date** = Deal Inactivation Date – To Do High Priority Days

- Creates two reminder notifications (i.e. To Dos) for the relationship manager which indicates that the system will inactivate the deal on a particular date if no actions are performed on it before the deal inactivation date. The reminder notifications are sent when the First To Do Reminder Date or Second To Do Remainder Date is equal to the system date.
- Changes the status of the deal to **Inactive** when the deal inactivation date is equal to the system date.

This algorithm is triggered when the **Deal Monitoring (C1\_DLMTR)** batch is executed. The **Deal Monitoring (C1\_DLMTR)** batch considers all deals which are in the following status:

- Draft
- Error
- Hierarchy Creation Deferred
- Pending For Approval
- Pending Simulation
- Ready For Approval
- Simulated
- Simulation Deferred

For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*. Once a deal is inactivated, you can only view the profitability details of its deal version and extract the deal version information in the PDF and Excel formats. If the inactivated deal has simulation date, then its deal version is available for deal comparison. All other functionalities, such as viewing approval workflow, finalizing deal, accepting deal, rejecting deal, deal orchestration, reviewing deal, etc. are not available for an inactivated deal. Also, you cannot refer an inactivated deal or use an inactivated deal as a template deal.

## Average Price Validation Using Floor and Ceil Limits

---

Until now, the system ensured that the relationship manager, division level or deal level approver, and price item manager could approve the average price of a price item in a deal when it is within the absolute floor and ceil limits of the respective To Do role. Now, in addition, the system provides the following features:

- Validate Average Price Using Spread Amount or Spread Percentage
- Validate Average Price Against Eligible Price List Pricing

On simulating the deal, the system checks whether the **Price Item Approval Required** field is set to **Yes** in the respective deal type. If the **Price Item Approval Required** field is set to **Yes**, the system derives the eligible price lists for the customer using the division, customer segment, and customer tier attributes. If one or more eligible price lists exist for the customer, the system checks whether a price assignment for the price item exists in any of the eligible price list. If the price assignment exists for the price item in an eligible price list, the system checks whether the **Average Price Floor and Ceil Limits** field in the price assignment is set to **Absolute Value Range**, **Spread Amount**, or **Spread Percentage**. The system does the following depending on the value specified in the **Average Price Floor and Ceil Limits** field:

- **Absolute Value Range** – If the **Average Price Floor and Ceil Limits** field in the price assignment is set to **Absolute Value Range**, the system checks whether the average price of the price item in the deal is within the floor and ceil limits of the relationship manager's To Do role. If the pricing currency is different from the floor and ceil currency, the system does the currency conversion. If the average price of the price item in the deal is within the absolute floor and ceil limits, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the absolute floor and ceil limits, the status of the price item remains as **Pending for Approval**.
- **Spread Amount** - If the **Average Price Floor and Ceil Limits** field in the price assignment is set to **Spread Amount**, the system calculates the average price of the price assignment. If a flat pricing is defined in the price assignment, the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

Average Price = Price Item Revenue/Price Item Commitments

The system then considers the spread amount specified for the relationship manager's To Do role in the price assignment. Using the spread amount and average price, the system calculates the average price floor and ceil values. The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

- **Spread Percentage** - If the **Average Price Floor and Ceil Limits** field in the price assignment is set to **Spread Percentage**, the system calculates the average price of the price assignment. If a flat pricing is defined in the price assignment, the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread parentage specified for the relationship manager's To Do role in the price assignment. Using the spread percentage and average price, the system calculates the average price floor and ceil values. The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

If the absolute floor and ceil limits, spread amount, or spread percentage is not defined for the To Do role in the price assignment, the system checks whether the **Average Price Floor and Ceil Limits** field in the price item is set to **Absolute Value Range**, **Spread Amount**, or **Spread Percentage**. The system does the following depending on the value specified in the **Average Price Floor and Ceil Limits** field:

- **Absolute Value Range** - If the **Average Price Floor and Ceil Limits** field in the price item is set to **Absolute Value Range**, the system checks whether the average price of the price item in the deal is within the floor and ceil limits of the relationship manager's To Do role. If the pricing currency is different from the floor and ceil currency, the system does the currency conversion. If the average price of the price item in the deal is within the absolute floor and ceil limits, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the absolute floor and ceil limits, the status of the price item remains as **Pending for Approval**.
- **Spread Amount** - If the **Average Price Floor and Ceil Limits** field in the price item is set to **Spread Amount**, the system calculates the average price of the price assignment. If a flat pricing is defined in the price assignment, the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread amount specified for the relationship manager's To Do role in the price item. Using the spread amount and average price, the system calculates the average price floor and ceil values. The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

- **Spread Percentage** - If the **Average Price Floor and Ceil Limits** field in the price item is set to **Spread Percentage**, the system calculates the average price of the price assignment. If a flat pricing is defined in the price assignment, the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread parentage specified for the relationship manager's To Do role in the price item. Using the spread percentage and average price, the system calculates the average price floor and ceil values. The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

However, if the absolute floor and ceil limits, spread amount, or spread percentage is not defined for the To Do role in the price item, the system changes the status of the price item to **Error**. If the system could not derive a price assignment for

the price item from any of the eligible price list, the system checks whether the **Average Price Floor and Ceil Limits** field in the price item is set to **Absolute Value Range**, **Spread Amount**, or **Spread Percentage**. If the **Average Price Floor and Ceil Limits** field in the price item is set to **Absolute Value Range**, the system validates the average price of the price item in the deal using the absolute floor and ceil values of the respective To Do role. But, if the **Average Price Floor and Ceil Limits** field in the price item is set to **Spread Amount** or **Spread Percentage**, the system changes the status of the price item to **Error**.

Similarly, the system validates the average price of a price item when the product level approver, division level approver, deal level approver, or price item manager approves the price item in a deal.

## Considering Pass Through Charges While Calculating Original Revenue

---

The system considers the recurring and non-recurring pass through charges of an account while calculating the original revenue of the account and customer in a deal. It also considers the recurring and non-recurring pass through charges which are generated through the **Transaction Aggregation** process (in the **Transaction Feed Management (TFM)** module). The system does the following while deriving the recurring and non-recurring pass through charges of an account:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date specified in the deal
2. Considers those billable charges with the pass through amount where the usage start or end date falls within the billable charge start and end dates
3. Calculates the pass through charges for the usage period in the deal frequency
4. Converts the pass through charges in the account's invoice currency and deal currency when the pass through charges are in the different currency

You can view the pass through charges of a price item which are billed to the account in the **Pass Through Charge Information** section of the **Pricing and Commitments** screen. The system enables you to derive the pass through charges of an account in either of the following mode:

- **Online Mode** - If you set the **Refer Volume Aggregation** option type of the **C1-DEAL** feature configuration to **N**, the system derives the recurring and non-recurring pass through charges of an account in the online mode. The online mode means that the pass through charges of an account are derived for the usage period in the deal frequency at the runtime when you view the pricing and commitment details of the account.
- **Deferred Mode** - If you set the **Refer Volume Aggregation** option type of the **C1-DEAL** feature configuration to **Y**, the system derives the recurring and non-recurring pass through charges of an account in the deferred mode (i.e. in the background). The deferred mode means when you execute the following batches:
  - **Aggregate Account's Volume and Count (PREAGGR)** - The **Aggregate Account's Volume and Count (PREAGGR)** batch derives the recurring and non-recurring pass through charges of an account for all deal frequencies (i.e. Monthly, Quarterly, Half Annually, and Annually) and stores the information in the **C1\_CHARGE\_AGGR** table. If you want to derive the pass through charges of an account in the deferred mode, you need to execute the **Aggregate Account's Volume and Count (PREAGGR)** batch before creating a deal for an existing account. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.
  - **Aggregate Customer's Volume and Count (CSTPREAG)** - The **Aggregate Customer's Volume and Count (CSTPREAG)** batch aggregates the pass through charges of all accounts of a customer for all deal frequencies (i.e. Monthly, Quarterly, Half Annually, and Annually) and stores the information in the **C1\_CHARGE\_AGGR** table. If you want to aggregate the pass through charges of all accounts of a customer in the deferred mode, you need to execute the **Aggregate Customer's Volume and Count (CSTPREAG)** batch after executing the **Aggregate Account's Volume and Count (PREAGGR)** batch. For more information about these batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

The system then extracts the pass through charges of an account from the **C1\_CHARGE\_AGGR** table while creating a deal. We recommend you to use this mode to experience a better system performance.

### Recurring Pass Through Charge Calculation

Let us understand how the recurring pass through charges are calculated for a usage period in a deal frequency.

### Example 1:

A deal is created for an account named A1 where the deal start date is set to 01-Jul-2020, deal end date is set to 31-Aug-2020, deal currency is set to USD, price selection date is set to 01-Aug-2020, usage period is set to Monthly, and deal frequency is set to Quarterly. Let us assume that the following recurring pass through charges exists for the A1 account where the invoice currency is set to INR:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jul-20	31-Aug-20	Bill Period	Monthly	10	100 INR	20	200 INR	100 + 200 = 300 INR	PI1
15-Jul-20	20-Aug-20	Bill Period	Monthly	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2
1-Jan-20	31-Mar-20	Bill Period	Monthly	10	125 INR	20	325 INR	125 + 325 = 450 INR	PI2
1-Apr-20	31-May-20	Bill Period	Monthly	10	100 INR	20	450 INR	100 + 450 = 550 INR	PI1

Now, while calculating the original revenue, the system derives the recurring pass through charges for the usage period in the deal frequency. To derive the recurring pass through charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 01-Aug-2020
Usage End Date = Price Selection Date = 01-Aug-2020
Usage Start Date = Usage End Date -- Usage Frequency = 01-Aug-2020 -- 1 -
Month (i.e. 30 days) = 02-Jul-2020
Usage Period = 02-Jul-2020 to 01-Aug-2020
```

2. Considers those recurring billable charges with the pass through amount where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following recurring billable charges of the A1 account:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jul-20	31-Aug-20	Bill Period	Monthly	10	100 INR	20	200 INR	100 + 200 = 300 INR	PI1
15-Jul-20	20-Aug-20	Bill Period	Monthly	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2

3. Derives the final start and end dates for the selected billable charges in the following manner:

```
Final Start Date = Billable Charge Start Date or Usage Period Start Date -
whichever is later
Final End Date = Billable Charge End Date or Usage Period End Date whichever -
is earlier
```

The following table indicates the final start and end dates for the selected billable charges:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Total Pass Through Charges	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation
1-Jul-20	31-Aug-20	Bill Period	Monthly	100 + 200 = 300 INR	PI1	2-Jul-20	1-Aug-20
15-Jul-20	20-Aug-20	Bill Period	Monthly	150 + 350 = 500 INR	PI2	15-Jul-20	1-Aug-20

4. Derives the factor using the final start and end dates and recurring method in the following manner:

Let us assume that the **Monthly** bill period contains the following schedules:

Bill Date	Bill Segment End Date
1-Jan-20	31-Jan-20
1-Feb-20	29-Feb-20
1-Mar-20	31-Mar-20
1-Apr-20	30-Apr-20
1-May-20	31-May-20
1-Jun-20	30-Jun-20
1-Jul-20	31-Jul-20
1-Aug-20	31-Aug-20

In such case, the system will derive the factor using the bill period in the following manner:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Total Pass Through Charges	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation	Factor (Number of Bill Period Schedules between which Final Start and End Dates Fall)
1-Jul-20	31-Aug-20	Bill Period	Monthly	100 + 200 = 300 INR	PI1	2-Jul-20	1-Aug-20	2
15-Jul-20	20-Aug-20	Bill Period	Monthly	150 + 350 = 500 INR	PI2	15-Jul-20	1-Aug-20	2

- Multiplies the total pass through charges with the factor, and thereby derives the final pass through charges in the following manner:

Total Recurring Pass Through Charges of PI1 =  $(300 \times 2) = 600$  INR  
Total Recurring Pass Through Charges of PI2 =  $(500 \times 2) = 1000$  INR

- Calculates the pass through charges for the usage period in the deal frequency in the following manner:

Recurring Pass Through Charges of PI1 for the Usage Period in the Deal - Frequency =  $(\text{Total Recurring Pass Through Charges of PI1} \times \text{Deal Frequency}) / \text{Usage Period} = (600 \times 3 \text{ (i.e. Quarterly)}) / 1 \text{ (i.e. Monthly)} = 1800$  INR  
Recurring Pass Through Charges of PI2 for the Usage Period in the Deal - Frequency =  $(\text{Total Recurring Pass Through Charges of PI2} \times \text{Deal Frequency}) / \text{Usage Period} = (1000 \times 3 \text{ (i.e. Quarterly)}) / 1 \text{ (i.e. Monthly)} = 3000$  INR

- Converts the pass through charges in the deal currency (i.e. USD) using the available exchange rate (for example, 0.013):

Recurring Pass Through Charges of PI1 in USD =  $1800 \times 0.013 = 23.4$  USD -  
Recurring Pass Through Charges of PI2 in USD =  $3000 \times 0.013 = 39$  USD -

In this way, the system calculates and derives the recurring pass through charges for the A1 account in the D1 deal.

### Example 2:

A deal is created for an account named A2 where the deal start date is set to 01-Jan-2020, deal end date is set to 28-Feb-2020, deal currency is set to USD, price selection date is set to 20-Jan-2020, usage period is set to Annually, and deal frequency is set to Quarterly. Let us assume that the following recurring pass through charges exists for the A2 account where the invoice currency is set to EURO:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	10	125 INR	20	325 INR	125 + 325 = 450 INR	PI2
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	10	100 INR	20	450 INR	100 + 450 = 550 INR	PI1

Now, while calculating the original revenue, the system derives the recurring pass through charges for the usage period in the deal frequency. To derive the recurring pass through charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 20-Jan-2020
Usage End Date = Price Selection Date = 20-Jan-2020
Usage Start Date = Usage End Date -- Usage Frequency = 20-Jan-2020 -- 1 -
Year (i.e. Annually)= 21-Jan-2019
Usage Period = 21-Jan-2019 to 20-Jan-2020
```

2. Considers those recurring billable charges with the pass through amount where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following recurring billable charges of the A2 account:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	10	125 INR	20	325 INR	125 + 325 = 450 INR	PI2
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	10	100 INR	20	450 INR	100 + 450 = 550 INR	PI1

3. Derives the final start and end dates for the selected billable charges in the following manner:

```
Final Start Date = Billable Charge Start Date or Usage Period Start Date -
whichever is later
Final End Date = Billable Charge End Date or Usage Period End Date whichever -
is earlier
```

The following table indicates the final start and end dates for the selected billable charges:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Total Pass Through Charges	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	150 + 350 = 500 INR	PI2	21-Jan-19	31-Dec-19
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	125 + 325 = 450 INR	PI2	1-Jun-19	20-Jan-20
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	100 + 450 = 550 INR	PI1	1-Jan-20	20-Jan-20

4. Derives the factor using the final start and end dates and recurring method in the following manner:

Let us assume that the **Quarterly** invoice frequency contains the following periodic intervals:

Start Date	End Date
1-Jan-19	31-Mar-19
1-Apr-19	30-Jun-19
1-Jul-19	30-Sep-19
1-Oct-19	31-Dec-19
1-Jan-20	31-Mar-20
1-Apr-20	30-Jun-20
1-Jul-20	30-Sep-20
1-Oct-20	31-Dec-20

In such case, the system will derive the factor using the invoice frequency in the following manner:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Total Pass Through Charges	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation	Factor (Number of Periodic Intervals between which Final Start and End Dates Fall)
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	150 + 350 = 500 INR	PI2	21-Jan-19	31-Dec-19	4
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	125 + 325 = 450 INR	PI2	1-Jun-19	20-Jan-20	4
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	100 + 450 = 550 INR	PI1	1-Jan-20	20-Jan-20	1

5. Multiplies the total pass through charges with the factor, and thereby derives the final pass through charges in the following manner:

Total Recurring Pass Through Charges of PI1 =  $(550 \times 1) = 550$  INR  
 Total Recurring Pass Through Charges of PI2 =  $(500 \times 4) + (450 \times 4) = 2000 + 1800 = 3800$  INR

6. Calculates the pass through charges for the usage period in the deal frequency in the following manner:

Recurring Pass Through Charges of PI1 for the Usage Period in the Deal - Frequency =  $(\text{Total Recurring Pass Through Charges of PI1} \times \text{Deal Frequency}) / \text{Usage Period} = (550 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (1650 / 12) = 137.5$  INR  
 Recurring Pass Through Charges of PI2 for the Usage Period in the Deal - Frequency =  $(\text{Total Recurring Pass Through Charges of PI2} \times \text{Deal Frequency}) / \text{Usage Period} = (3800 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (11400 / 12) = 950$  INR

7. Converts the pass through charges in the account's invoice currency (i.e. EURO) and deal currency (i.e. USD) using the available exchange rates:

For example, to convert the pass through charges in the account's invoice currency, the exchange rate from INR to USD is 0.013:

Recurring Pass Through Charges of PI1 in USD =  $137.5 \times 0.013 = 1.79$  USD -  
 Recurring Pass Through Charges of PI2 in USD =  $950 \times 0.013 = 12.35$  USD -

For example, to convert the pass through charges in the deal currency, the exchange rate from INR to EURO is 0.012:

Recurring Pass Through Charges of PI1 in EURO =  $137.5 \times 0.012 = 1.65$  EURO -  
 Recurring Pass Through Charges of PI2 in EURO =  $950 \times 0.012 = 11.4$  EURO -

In this way, the system calculates and derives the recurring pass through charges for the A2 account in the D1 deal.

### **Non-Recurring Pass Through Charge Calculation**

Let us understand how the non-recurring pass through charges are calculated for a usage period in a deal frequency.

#### **Example 3:**

A deal is created for an account named A1 where the deal start date is set to 01-Jul-2020, deal end date is set to 31-Aug-2020, deal currency is set to USD, price selection date is set to 01-Aug-2020, usage period is set to Monthly, and deal frequency is set to Quarterly. Let us assume that the following non-recurring pass through charges exists for the A1 account where the invoice currency is set to INR:

Billable Charge Start Date	Billable Charge End Date	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jul-20	31-Aug-20	10	100 INR	20	200 INR	100 + 200 = 300 INR	PI1
15-Jul-20	20-Aug-20	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2
1-Jan-20	31-Mar-20	10	125 INR	20	325 INR	125 + 325 = 450 INR	PI2
1-Apr-20	31-May-20	10	100 INR	20	450 INR	100 + 450 = 550 INR	PI1

Now, while calculating the original revenue, the system derives the non-recurring pass through charges for the usage period in the deal frequency. To derive the non-recurring pass through charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 01-Aug-2020
Usage End Date = Price Selection Date = 01-Aug-2020
Usage Start Date = Usage End Date -- Usage Frequency = 01-Aug-2020 -- 1 -
Month (i.e. 30 days) = 02-Jul-2020
Usage Period = 02-Jul-2020 to 01-Aug-2020
```

2. Considers those non-recurring billable charges with the pass through amount where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following non-recurring billable charges of the A1 account:

Billable Charge Start Date	Billable Charge End Date	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jul-20	31-Aug-20	10	100 INR	20	200 INR	100 + 200 = 300 INR	PI1
15-Jul-20	20-Aug-20	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2

3. Derives the former start date and latter end date of the billable charges in the following manner:

```
Former Start Date = Compare the Start Dates of All Billable Charges and -
Reterive the Earliest Start Date -
Latter End Date = Compare the End Dates of All Billable Charges and Reterive -
the Latest End Date
```

In this case, the former start date is 01-Jul-2020 and latter end date is 31-Aug-2020.

4. Derives the number of months between the former start date and latter end date. In this case, the number of months between 01-Jul-2020 and 31-Aug-2020 is 2.
5. Derives the monthly non-recurring pass through charges in the following manner:

```
Monthly Non-Recurring Pass Through Charges of PI1 = Total Non-Recurring -
Pass Through Charges of PI1/Number of Months between Former Start and -
Latter End Dates = 300/2 = 150 INR
Monthly Non-Recurring Pass Through Charges of PI2 = Total Non-Recurring -
Pass Through Charges of PI2/Number of Months between Former Start and -
Latter End Dates = 500/2 = 250 INR
```

6. Calculates the non-recurring pass through charges for the usage period in the deal frequency in the following manner:

```
Non-Recurring Pass Through Charges of PI1 for the Usage Period in the Deal -
Frequency = (Monthly Non-Recurring Pass Through Charges * Deal Frequency)/
Usage Frequency =(150 * 3 (i.e. Quarterly))/1(i.e. Monthly) = (450/1) = -
450 INR
Non-Recurring Pass Through Charges of PI2 for the Usage Period in the Deal -
Frequency = (Monthly Non-Recurring Pass Through Charges * Deal Frequency)/
Usage Frequency =(250 * 3 (i.e. Quarterly))/1(i.e. Monthly) = (750/1) = -
750 INR
```

7. Converts the pass through charges in the deal currency (i.e. USD) using the available exchange rate (for example, 0.013):

```
Non-Recurring Pass Through Charges of PI1 in USD = 450*0.013 = 5.85 USD -
Non-Recurring Pass Through Charges of PI2 in USD = 750*0.013 = 9.75 USD -
```

In this way, the system calculates and derives the non-recurring pass through charges for the A1 account in the D1 deal.

## Considering SQI Based Billable Charges While Calculating Commitments

---

The system considers the recurring and non-recurring SQI based billable charges of an account while calculating the original and proposed commitments of the account and customer in a deal. It also considers the recurring and non-recurring SQI based billable charges which are generated through the **Transaction Aggregation** process (in the **Transaction Feed Management** (TFM) module). The system does the following while deriving the service quantities from the recurring and non-recurring billable charges of an account:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date specified in the deal
2. Considers those SQI based billable charges where the usage start or end date falls within the billable charge start and end dates
3. Calculates the service quantities for the usage period in the deal frequency

The system enables you to derive the service quantities from the recurring and non-recurring billable charges of an account in either of the following mode:

- **Online Mode** - If you set the **Refer Volume Aggregation** option type of the **C1-DEAL** feature configuration to **N**, the system derives the service quantities from the recurring and non-recurring billable charges of an account in the online mode. The online mode means that the service quantities from the recurring and non-recurring billable charges of an account are derived for the usage period in the deal frequency at the runtime when you view the pricing and commitment details of the account.
- **Deferred Mode** - If you set the **Refer Volume Aggregation** option type of the **C1-DEAL** feature configuration to **Y**, the system derives the service quantities from the recurring and non-recurring billable charges of an account in the deferred mode (i.e. in the background). The deferred mode means when you execute the following batches:
  - **Aggregate Account's Volume and Count (PREAGGR)** - The **Aggregate Account's Volume and Count (PREAGGR)** batch derives the service quantities from the recurring and non-recurring billable charges of an account for all deal frequencies (i.e. Monthly, Quarterly, Half Annually, and Annually) and stores the information in the **C1\_VOLUME\_AGGR** table. If you want to derive the service quantities from the recurring and non-recurring billable charges of an account in the deferred mode, you need to execute the **Aggregate Account's Volume and Count (PREAGGR)** batch before creating a deal for an existing account. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.
  - **Aggregate Customer's Volume and Count (CSTPREAG)** - The **Aggregate Customer's Volume and Count (CSTPREAG)** batch aggregates the billed service quantities of all accounts of a customer for all deal frequencies (i.e. Monthly, Quarterly, Half Annually, and Annually) and stores the information in the **C1\_VOLUME\_AGGR** table. If you want to aggregate the billed service quantities of all accounts of a customer in the deferred mode, you need to execute the **Aggregate Customer's Volume and Count (CSTPREAG)** batch after executing the **Aggregate Account's Volume and Count (PREAGGR)** batch. For more information about these batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

The system then extracts the billed service quantities of an account from the **C1\_VOLUME\_AGGR** table while creating a deal. We recommend you to use this mode to experience a better system performance.

### Considering Recurring SQI Based Billable Charges for Commitment Calculation

Let us understand how the original and proposed commitments are calculated from the recurring SQI based billable charges for a usage period in a deal frequency.

#### Example 1:

A deal is created for an account named A1 where the deal start date is set to 01-Jul-2020, deal end date is set to 31-Aug-2020, deal currency is set to USD, price selection date is set to 01-Aug-2020, usage period is set to Monthly, and deal frequency is set to Quarterly. Let us assume that the following recurring SQI based billable charges exists for the A1 account where the invoice currency is set to INR:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item
1-Jul-20	31-Aug-20	Bill Period	Monthly	Number of Transactions	1000	PI1
				Transaction Volume	25000	
15-Jul-20	20-Aug-20	Bill Period	Monthly	Number of Transactions	1500	PI2
				Transaction Volume	50000	
1-Jan-20	31-Mar-20	Bill Period	Monthly	Number of Transactions	3500	PI2
				Transaction Volume	25000	
1-Apr-20	31-May-20	Bill Period	Monthly	Number of Transactions	4000	PI1
				Transaction Volume	25000	

Now, while calculating the original and proposed commitments, the system derives the service quantities from the recurring billable charges for the usage period in the deal frequency. To derive the service quantities from the recurring billable charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 01-Aug-2020
Usage End Date = Price Selection Date = 01-Aug-2020
Usage Start Date = Usage End Date -- Usage Frequency = 01-Aug-2020 -- 1 -
Month (i.e. 30 days) = 02-Jul-2020
Usage Period = 02-Jul-2020 to 01-Aug-2020
```

2. Considers those recurring SQI based billable charges where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following recurring billable charges of the A1 account:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item
1-Jul-20	31-Aug-20	Bill Period	Monthly	Number of Transactions	1000	PI1
				Transaction Volume	25000	
15-Jul-20	20-Aug-20	Bill Period	Monthly	Number of Transactions	1500	PI2
				Transaction Volume	50000	

3. Derives the final start and end dates for the selected billable charges in the following manner:

```
Final Start Date = Billable Charge Start Date or Usage Period Start Date -
whichever is later
Final End Date = Billable Charge End Date or Usage Period End Date whichever -
is earlier
```

The following table indicates the final start and end dates for the selected billable charges:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation
1-Jul-20	31-Aug-20	Bill Period	Monthly	Number of Transactions	1000	PI1	2-Jul-20	1-Aug-20
				Transaction Volume	25000			
15-Jul-20	20-Aug-20	Bill Period	Monthly	Number of Transactions	1500	PI2	15-Jul-20	1-Aug-20
				Transaction Volume	50000			

4. Derives the factor using the final start and end dates and recurring method in the following manner:

Let us assume that the **Monthly** bill period contains the following schedules:

Bill Date	Bill Segment End Date
1-Jan-20	31-Jan-20
1-Feb-20	29-Feb-20
1-Mar-20	31-Mar-20
1-Apr-20	30-Apr-20
1-May-20	31-May-20
1-Jun-20	30-Jun-20
1-Jul-20	31-Jul-20
1-Aug-20	31-Aug-20

In such case, the system will derive the factor using the bill period in the following manner:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation	Factor (Number of Bill Period Schedules between which Final Start and End Dates Fall)
1-Jul-20	31-Aug-20	Bill Period	Monthly	Number of Transactions	1000	PI1	2-Jul-20	1-Aug-20	2
				Transaction Volume	25000				
15-Jul-20	20-Aug-20	Bill Period	Monthly	Number of Transactions	1500	PI2	15-Jul-20	1-Aug-20	2
				Transaction Volume	50000				

5. Multiplies the service quantities with the factor in the following manner:

Total Number of Transactions of PI1 =  $(1000 \times 2) = 2000$   
 Total Transaction Volume of PI1 =  $(25000 \times 2) = 50000$

Total Number of Transactions of PI2 =  $(1500 \times 2) = 3000$   
 Total Transaction Volume of PI2 =  $(50000 \times 2) = 100000$

6. Calculates the service quantities for the usage period in the deal frequency in the following manner:

Number of Transactions of PI1 for the Usage Period in the Deal Frequency -  
 =  $(\text{Total Number of Transactions of PI1} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 =  $(2000 \times 3 \text{ (i.e. Quarterly)}) / 1 \text{ (i.e. Monthly)} = 6000$   
 Number of Transactions of PI2 for the Usage Period in the Deal Frequency -  
 =  $(\text{Total Number of Transactions of PI2} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 =  $(3000 \times 3 \text{ (i.e. Quarterly)}) / 1 \text{ (i.e. Monthly)} = 9000$

Transaction Volume of PI1 for the Usage Period in the Deal Frequency = -  
 =  $(\text{Total Transaction Volume of PI1} \times \text{Deal Frequency}) / \text{Usage Frequency} = (50000 \times 3 \text{ (i.e. Quarterly)}) / 1 \text{ (i.e. Monthly)} = 150000$   
 Transaction Volume of PI2 for the Usage Period in the Deal Frequency = -  
 =  $(\text{Total Transaction Volume of PI2} \times \text{Deal Frequency}) / \text{Usage Frequency} = (100000 \times 3 \text{ (i.e. Quarterly)}) / 1 \text{ (i.e. Monthly)} = 300000$

In this way, the system derives the original and proposed commitments for the A1 account in the D1 deal.

### Example 2:

A deal is created for an account named A2 where the deal start date is set to 01-Jan-2020, deal end date is set to 28-Feb-2020, deal currency is set to USD, price selection date is set to 20-Jan-2020, usage period is set to Annually, and deal frequency is set to Quarterly. Let us assume that the following recurring SQI based billable charges exists for the A2 account where the invoice currency is set to EURO:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	Number of Transactions	500	PI2
				Transaction Volume	2500	
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	Number of Transactions	750	PI2
				Transaction Volume	5000	
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	Number of Transactions	1000	PI1
				Transaction Volume	50000	

Now, while calculating the original and proposed commitments, the system derives the service quantities from the recurring billable charges for the usage period in the deal frequency. To derive the service quantities from the recurring billable charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 20-Jan-2020
Usage End Date = Price Selection Date = 20-Jan-2020
Usage Start Date = Usage End Date -- Usage Frequency = 20-Jan-2020 -- 1 -
Year (i.e. Annually)= 21-Jan-2019
Usage Period = 21-Jan-2019 to 20-Jan-2020
```

2. Considers those recurring SQI based billable charges where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following recurring billable charges of the A2 account:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	Number of Transactions	500	PI2
				Transaction Volume	2500	
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	Number of Transactions	750	PI2
				Transaction Volume	5000	
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	Number of Transactions	1000	PI1
				Transaction Volume	50000	

3. Derives the final start and end dates for the selected billable charges in the following manner:

```
Final Start Date = Billable Charge Start Date or Usage Period Start Date -
whichever is later
Final End Date = Billable Charge End Date or Usage Period End Date whichever -
is earlier
```

The following table indicates the final start and end dates for the selected billable charges:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	Number of Transactions	500	PI2	21-Jan-19	31-Dec-19
				Transaction Volume	2500			
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	Number of Transactions	750	PI2	1-Jun-19	20-Jan-20
				Transaction Volume	5000			
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	Number of Transactions	1000	PI1	1-Jan-20	20-Jan-20
				Transaction Volume	50000			

4. Derives the factor using the final start and end dates and recurring method in the following manner:

Let us assume that the **Quarterly** invoice frequency contains the following periodic intervals:

Start Date	End Date
1-Jan-19	31-Mar-19
1-Apr-19	30-Jun-19
1-Jul-19	30-Sep-19
1-Oct-19	31-Dec-19
1-Jan-20	31-Mar-20
1-Apr-20	30-Jun-20
1-Jul-20	30-Sep-20
1-Oct-20	31-Dec-20

In such case, the system will derive the factor using the invoice frequency in the following manner:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation	Factor (Number of Periodic Intervals between which Final Start and End Dates Fall)
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	Number of Transactions	500	PI2	21-Jan-19	31-Dec-19	4
				Transaction Volume	2500				
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	Number of Transactions	750	PI2	1-Jun-19	20-Jan-20	4
				Transaction Volume	5000				
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	Number of Transactions	1000	PI1	1-Jan-20	20-Jan-20	1
				Transaction Volume	50000				

5. Multiplies the service quantities with the factor in the following manner:

Total Number of Transactions of PI1 =  $(1000 \times 1) = 1000$   
 Total Transaction Volume of PI1 =  $(50000 \times 1) = 50000$

Total Number of Transactions of PI2 =  $(500 \times 4) + (750 \times 4) = 2000 + 3000 = 5000$   
 Total Transaction Volume of PI2 =  $(2500 \times 4) + (5000 \times 4) = 10000 + 20000 = 30000$

6. Calculates the service quantities for the usage period in the deal frequency in the following manner:

Number of Transactions of PI1 for the Usage Period in the Deal Frequency =  
 $= (\text{Total Number of Transactions of PI1} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 $= (1000 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (3000 / 12) = 250$   
 Number of Transactions of PI2 for the Usage Period in the Deal Frequency =  
 $= (\text{Total Number of Transactions of PI2} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 $= (5000 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (15000 / 12) = 1250$

Transaction Volume of PI1 for the Usage Period in the Deal Frequency =  
 $= (\text{Total Transaction Volume of PI1} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 $= (50000 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (150000 / 12) = 12500$   
 Transaction Volume of PI2 for the Usage Period in the Deal Frequency =  
 $= (\text{Total Transaction Volume of PI2} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 $= (30000 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (90000 / 12) = 7500$

In this way, the system derives the original and proposed commitments for the A2 account in the D1 deal.

### **Considering Non-Recurring SQI Based Billable Charges for Commitment Calculation**

Let us understand how the original and proposed commitments are calculated from the non-recurring SQI based billable charges for a usage period in a deal frequency.

#### **Example 3:**

A deal is created for an account named A1 where the deal start date is set to 01-Jul-2020, deal end date is set to 31-Aug-2020, deal currency is set to USD, price selection date is set to 01-Aug-2020, usage period is set to Monthly, and deal frequency is set to Quarterly. Let us assume that the following non-recurring SQI based billable charges exists for the A1 account where the invoice currency is set to INR:

Billable Charge Start Date	Billable Charge End Date	SQI	Service Quantity	Price Item
1-Jul-20	31-Aug-20	Number of Transactions	100	PI1
		Transaction Volume	2500	
15-Jul-20	20-Aug-20	Number of Transactions	150	PI2
		Transaction Volume	5000	
1-Jan-20	31-Mar-20	Number of Transactions	350	PI2
		Transaction Volume	2500	
1-Apr-20	31-May-20	Number of Transactions	400	PI1
		Transaction Volume	2500	

Now, while calculating the original and proposed commitments, the system derives the service quantities from the non-recurring billable charges for the usage period in the deal frequency. To derive the service quantities from the non-recurring billable charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 01-Aug-2020
Usage End Date = Price Selection Date = 01-Aug-2020
Usage Start Date = Usage End Date -- Usage Frequency = 01-Aug-2020 -- 1 -
Month (i.e. 30 days) = 02-Jul-2020
Usage Period = 02-Jul-2020 to 01-Aug-2020
```

2. Considers those non-recurring SQI based billable charges where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following non-recurring billable charges of the A1 account:

Billable Charge Start Date	Billable Charge End Date	SQI	Service Quantity	Price Item
1-Jul-20	31-Aug-20	Number of Transactions	100	PI1
		Transaction Volume	2500	
15-Jul-20	20-Aug-20	Number of Transactions	150	PI2
		Transaction Volume	5000	

3. Derives the former start date and latter end date of the billable charges in the following manner:

```
Former Start Date = Compare the Start Dates of All Billable Charges and -
Retain the Earliest Start Date -
Latter End Date = Compare the End Dates of All Billable Charges and Retain -
the Latest End Date
```

In this case, the former start date is 01-Jul-2020 and latter end date is 31-Aug-2020.

4. Derives the number of months between the former start date and latter end date. In this case, the number of months between 01-Jul-2020 and 31-Aug-2020 is 2.
5. Derives the monthly commitments in the following manner:

```
Monthly Number of Transactions of PI1 = Total Number of Transactions of -
PI1/Number of Months between Former Start and Latter End Dates = 100/2 = 50
Monthly Number of Transactions of PI2 = Total Number of Transactions of -
PI2/Number of Months between Former Start and Latter End Dates = 150/2 = 75
```

```
Monthly Transaction Volume of PI1 = Total Transaction Volume of PI1/Number -
of Months between Former Start and Latter End Dates = 2500/2 = 1250
Monthly Transaction Volume of PI2 = Total Transaction Volume of PI2/Number -
of Months between Former Start and Latter End Dates = 5000/2 = 2500
```

6. Calculates the commitments for the usage period in the deal frequency in the following manner:

```
Number of Transactions of PI1 for the Usage Period in the Deal Frequency = -
(Monthly Number of Transactions of PI1 * Deal Frequency)/Usage Frequency = -
= (50 * 3 (i.e. Quarterly))/1(i.e. Monthly) = 150
Number of Transactions of PI2 for the Usage Period in the Deal Frequency = -
(Monthly Number of Transactions of PI2 * Deal Frequency)/Usage Frequency = -
= (75 * 3 (i.e. Quarterly))/1(i.e. Monthly) = 225
```

```
Transaction Volume of PI1 for the Usage Period in the Deal Frequency = -
(Monthly Transaction Volume of PI1 * Deal Frequency)/Usage Frequency = -
(1250 * 3 (i.e. Quarterly))/1(i.e. Monthly) = 3750
Transaction Volume of PI2 for the Usage Period in the Deal Frequency = -
(Monthly Transaction Volume of PI2 * Deal Frequency)/Usage Frequency = -
(2500 * 3 (i.e. Quarterly))/1(i.e. Monthly) = 7500
```

In this way, the system derives the original and proposed commitments for the A1 account in the D1 deal.

## Stacking Commitments in Deal

Oracle Revenue Management and Billing enables you to stack commitments of a customer in a deal when a price assignment of its account is defined at the parent customer, grandparent customer, or at the sibling customer level in the customer hierarchy. Stacking means aggregating the service quantities of the customer, parent customers, grandparent customers, and sibling customers in the customer hierarchy. The system then derives the tiered pricing based on the stacked commitments of the customer instead of using the actual commitments of the account. To enable the stacking feature for a deal, you need to do the following:

- Ensure that the **Stacking Required (Y/N)** parameter is set to **Y** in the rate value algorithm of the required rate components
- Attach the **C1\_STACKDEAL** algorithm to the **Hierarchy Creation Completion** system event in the respective deal type

When you create a deal for an existing customer without reference, the system stacks the commitments (if required) and uses it as the original and proposed commitments of the customer during the customer hierarchy creation. The system then calculates the original and proposed average price and revenue using the stacked commitments of the customer. However, when you create a deal for an existing customer with reference or when you create a deal for an existing account with or without reference, the system stacks the commitments (if required) and uses it as the original commitments of the customer during the customer hierarchy creation. The system then calculates the original average price and revenue using the stacked commitments of the customer.

## Terms and Conditions Selection in a Deal Based on Characteristic Value

Earlier, the system, by default, did not select the deal, price item, or hierarchy entity level terms and conditions while creating a deal. You had to manually select the required terms and conditions for the deal, price items, and hierarchy entities.

Now, the system provides an alternative solution wherein the terms and conditions at the deal, price item, and hierarchy entity levels are automatically selected based on their characteristic in the **Terms and Conditions** screen. Two new algorithm spots named **Terms and Conditions Filter** and **Terms and Conditions Selection Validation** are available while defining a deal type. A new algorithm type named **C1-DEAL-TCFL** is introduced in this release. This algorithm checks whether the selection characteristic type specified in the parameter is defined on the deal, price item and hierarchy entity level terms and conditions. A new characteristic type named **C1\_SEL\_T** is shipped with the product. It has three predefined values – **Standard**, **Mandatory**, and **Optional**. While creating a deal, the system checks whether the **C1-DEAL-TCFL** algorithm is attached to the **Terms and Conditions Filter** system event in the respective deal type. If

the **C1-DEAL-TCFL** algorithm is not attached to the **Terms and Conditions Filter** system event in the respective deal type, the system behaves in the traditional manner. However, if the **C1-DEAL-TCFL** algorithm is attached to the **Terms and Conditions Filter** system event in the respective deal type, the system checks whether the selection characteristic type specified in the **C1-DEAL-TCFL** algorithm is defined for the deal, price item, and hierarchy entity level terms and conditions. If so, the system behavior for each terms and conditions varies depending on the value defined for the **C1\_SEL\_T** characteristic type on the respective terms and conditions. The following table explains the significance of each predefined characteristic value:

Characteristic Value	System Behavior
Standard	If the characteristic value is set to <b>Standard</b> , the system, by default, selects the check box corresponding to the deal, price item, or hierarchy entity level terms and conditions in the <b>Terms and Conditions</b> screen. The check box is editable.
Mandatory	If the characteristic value is set to <b>Mandatory</b> , the system, by default, selects the check box corresponding to the deal, price item, or hierarchy entity level terms and conditions in the <b>Terms and Conditions</b> screen. The check box is non-editable.
Optional	If the characteristic value is set to <b>Optional</b> , the system, by default, does not select the check box corresponding to the deal, price item, or hierarchy entity level terms and conditions in the <b>Terms and Conditions</b> screen. The check box is editable.

The following table explains the above scenarios with the help of an example:

Level	Terms and Conditions	Characteristic Value	Check Box Selected (Y or N)	Check Box Disabled (Y or N)
Deal	T1	Standard	Y	N
Deal	T2	Mandatory	Y	Y
Deal	T3	Optional	N	N
Price Item	T4	Standard	Y	N
Price Item	T5	Mandatory	Y	Y
Price Item	T6	Optional	N	N
Hierarchy Entity	T7	Standard	Y	N
Hierarchy Entity	T8	Mandatory	Y	Y
Hierarchy Entity	T9	Optional	N	N

If required, you can anytime deselect or select any standard or optional terms and conditions at the deal, price item, or hierarchy entity level. If the selection characteristic type is not specified in the **C1-DEAL-TCFL** algorithm or if the selection characteristic type is not defined for the terms and conditions, the system considers the terms and conditions as optional at the respective level.

You can opt to validate the selection (if required) by designing a custom logic and then attaching the algorithm to the **Terms and Conditions Selection Validation** system event of the respective deal type. On clicking the **Save** button, the system will invoke the algorithm attached to the **Terms and Conditions Selection Validation** system event and accordingly validate the terms and conditions selection at the deal, price item, or hierarchy entity level. Now, on clicking the **Select All** button in the **Terms and Conditions** screen, the system selects all the terms and conditions at the respective level irrespective of the **C1\_SEL\_T** characteristic value. However, on clicking the **Deselect All** button in the **Terms and Conditions** screen, the system deselects all the terms and conditions at the respective level except the ones where the **C1\_SEL\_T** characteristic value is set to **Mandatory**.

## Terms and Conditions Grouping in a Deal Based on Characteristic Value

Oracle Revenue Management and Billing provides the ability to automatically group the terms and conditions at the deal, price item, and hierarchy entity levels based on their characteristic in the **Terms and Conditions** screen. Two new algorithm spots named **Terms and Conditions Filter** and **Terms and Conditions Selection Validation** are available while defining a deal type. A new algorithm type named **C1-DEAL-TCFL** is introduced in this release. This algorithm checks whether the grouping characteristic type specified in the parameter is defined on the deal, price item and hierarchy entity level terms and conditions. You need to create a characteristic type for terms and conditions grouping and define the group names as its predefined characteristic values.

While creating a deal, the system checks whether the **C1-DEAL-TCFL** algorithm is attached to the **Terms and Conditions Filter** system event in the respective deal type. If the **C1-DEAL-TCFL** algorithm is attached to the **Terms and Conditions Filter** system event in the respective deal type, the system checks whether the grouping characteristic type specified in the **C1-DEAL-TCFL** algorithm is defined for the deal, price item, and hierarchy entity level terms and conditions. If so, the system logically groups the terms and conditions at the deal, price item, and hierarchy entity levels based on the group name (i.e. based on the value defined for the grouping characteristic type). If the **C1-DEAL-TCFL** algorithm is not attached to the **Terms and Conditions Filter** system event in the respective deal type or if the grouping characteristic type is not specified in the **C1-DEAL-TCFL** algorithm, or if the grouping characteristic is not defined for a terms and conditions, the system does not group the terms and conditions under any head.

The following table explains the grouping logic with the help of an example:

Level	Terms and Conditions	Characteristic Value
Deal	T1	G1
Deal	T2	G2
Deal	T3	G1
Deal	T10	-
Deal	T11	-
Price Item	T4	G3
Price Item	T5	G3
Price Item	T6	G3
Hierarchy Entity	T7	G4
Hierarchy Entity	T8	G4
Hierarchy Entity	T9	G4

In the above example, the system will group T1 and T3 under G1 and T2 under G2 at the deal level. Note that the system will not group T10 and T11 under any head at the deal level. Similarly, the system will group T4, T5, and T6 under G3 at the price item level and T7, T8, and T9 under G4 at the hierarchy entity level.

## Overriding Terms and Conditions in a Deal

Oracle Revenue Management and Billing enables you to override the default terms and conditions at the deal, price item, and hierarchy entity levels and add specific information related to the deal. The system maintains the edited version of terms and conditions separately from the default version for each deal. You can view both the default and edited versions of the terms and conditions in the **Terms and Conditions (Used for Editing in Deal)** screen. On subsequent

edits, the system overrides the edited version of the terms and conditions. The system highlights the edited and non-edited versions of the terms and conditions with different color scheme.

## Refreshing Terms and Conditions in a Deal

Oracle Revenue Management and Billing enables you to refresh the terms and conditions at the deal, price item, and hierarchy entity levels. On refreshing the terms and conditions, the system updates the terms and conditions based on their selection and grouping characteristics. Note that while refreshing the terms and conditions, the system loses the manual selection and deselection of terms and conditions and edited version of the terms and conditions. The adhoc terms and conditions are retained while refreshing the terms and conditions at the deal, price item, and hierarchy entity levels.

## Deal Approval Profile

The **Deal Approval Profile** screen allows you to define the approval hierarchy levels with the required limits and rights for approving a deal. This profile is then associated to the deal type to specify whether it will be used for product level, division level, or deal level approval. It also allows you to edit, copy, and delete a deal approval profile. It contains the following zones:

- [Deal Approval Profile List](#) on page 2496
- [Deal Approval Profile](#) on page 2497

## Deal Approval Profile List

The **Deal Approval Profile List** zone lists the deal approval profiles that are already defined in the system. It contains the following columns:

Column Name	Column Description
Deal Approval Profile	Displays the deal approval profile.
Description	Displays the description of the deal approval profile.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Deal Approval Profile</b> screen appears where you can edit the details of the deal approval profile.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Deal Approval Profile</b> screen appears where you can define a new deal approval profile using an existing deal approval profile.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the deal approval profile.
	<b>Note:</b> You can delete a deal approval profile only when the deal approval profile is not yet used for creating a deal type.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Deal Approval Profile**, **Status**, **Description**, **To Do Type**, **Approval Profile Currency**, and **To Do Role**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to a deal approval profile, the **Deal Approval Profile** zone appears where you can view the details of the respective deal approval profile.

**Deal Approval Profile**

The **Deal Approval Profile** zone displays the details of the deal approval profile. It contains the following sections:

- **Main** - Displays basic information about the deal approval profile. It contains the following fields:

Field Name	Field Description
Deal Approval Profile	Indicates the deal approval profile.
Description	Displays the description of the deal approval profile.
Detailed Description	Displays additional information about the deal approval profile.
Approval Profile Currency	Indicates the currency in which the amounts are mentioned in the deal approval profile.
Status	Indicates the status of the deal approval profile. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>

- **Approval Hierarchy** - Displays the approval hierarchy levels with their required limits and rights defined for approving a deal. It contains the following columns:

Column Name	Column Description
Level	Indicates the approval level.
To Do Type	Indicates the To Do Type using which the To Do task is assigned to the approver/user group for approving the deal at the specified hierarchy level.  <b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective <b>To Do Type</b> .
To Do Role	Indicates the approver/user group to whom the To Do task of the To Do Type is assigned for approving the deal at the specified hierarchy level.  <b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective <b>To Do Role</b> .
Recommend Pricing	Indicates whether the approver/user (other than the relationship manager) at the specified hierarchy level is entitled to recommend a change in the proposed pricing of the price item. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

Column Name	Column Description
Submit Price Item For Approval	Indicates whether the approver/user at the specified hierarchy level is entitled to submit one or more price items to the product manager for approval. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Approve Deal	Indicates whether the approver/user at the specified hierarchy level is entitled to approve the deal after all the discretion check is confirmed. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
View Only Eligible Price Items	Indicates whether the approver/user at the specified hierarchy level can view only those price items which meet the pricing limits as set in the approval hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Minimum Profitability (%)	Displays the minimum deal profitability percentage which is set for the approver/user at the specified hierarchy level for approving the deal.
Maximum Profitability (%)	Displays the maximum deal profitability percentage which is set for the approver/user at the specified hierarchy level for approving the deal.
Minimum Profit	Displays the minimum deal profitability amount which is set for the approver/user at the specified hierarchy level for approving the deal.
Maximum Profit	Displays the maximum deal profitability amount which is set for the approver/user at the specified hierarchy level for approving the deal.
Minimum Profit Variation (%)	Displays the minimum deal profitability variation percentage which is set for the approver/user at the specified hierarchy level for approving the deal.
Maximum Profit Variation (%)	Displays the maximum deal profitability variation percentage which is set for the approver/user at the specified hierarchy level for approving the deal.
Minimum Profit Variation	Displays the minimum deal profitability variation amount which is set for the approver/user at the specified hierarchy level for approving the deal.
Maximum Profit Variation	Displays the maximum deal profitability variation amount which is set for the approver/user at the specified hierarchy level for approving the deal.
Minimum Revenue	Displays the minimum deal revenue which can be approved by the approver/user at a specified hierarchy level.
Maximum Revenue	Displays the maximum deal revenue which can be approved by the approver/user at a specified hierarchy level.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the deal approval profile.
Delete	Used to delete the deal approval profile.
	<b>Note:</b> You can delete a deal approval profile only when the deal approval profile is not yet used for creating a deal type.

Button Name	Button Description
Duplicate	Used to create a new deal approval profile using an existing deal approval profile.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the deal approval profile is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Deal Approval Profile** zone does not appear in the **Deal Approval Profile** screen. It appears when you click the **Broadcast** (📢) icon corresponding to a deal approval profile in the **Deal Approval Profile List** zone.

## Defining a Deal Approval Profile

### Prerequisites

To define a deal approval profile, you should have:

- Currencies defined in the application
- Approval hierarchy levels defined in the application
- To Do roles and To Do types defined in the application

### Procedure

To define a deal approval profile:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
3. Click the **Add** option from the **Deal Approval Profile** sub-menu.

The **Deal Approval Profile** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal approval profile.
- **Approval Hierarchy** - Used to define the approval levels in the approval hierarchy with their required limits and rights for approving a deal.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Approval Profile	Used to specify the deal approval profile.	Yes
Description	Used to specify the description for the deal approval profile.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the deal approval profile.	Yes
Approval Profile Currency	Used to indicate the currency in which the amounts are mentioned in the deal approval profile.	Yes
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	
Status	Used to indicate the status of the deal approval profile. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> Only the active deal approval profiles can be assigned to the deal type for approving the deal.	

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Deal Approval Profile** screen.

- Enter the required details in the **Main** section.
- Define approval levels in the approval hierarchy with the required limits and rights for approving the deal.
- Click **Save**.  
The deal approval profile is defined.

<b>Deal Approval Profile</b> screen	<a href="#">Deal Approval Profile</a> on page 2496
How to define an approval level in the approval hierarchy	<a href="#">Defining an Approval Level in the Approval Hierarchy</a> on page 2500

## Defining an Approval Level in the Approval Hierarchy

### Prerequisites

To define an approval level in the approval hierarchy, you should have:

- Approval hierarchy levels defined in the application.
- To Do roles and To Do types defined in the application.

### Procedure

To define an approval level in the approval hierarchy:

- Ensure that the **Approval Hierarchy** section is expanded in the **Deal Approval Profile** screen when you are defining, editing, or copying a deal approval profile.

The **Approval Hierarchy** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Level	Used to indicate the approval level.	Yes
	<b>Note:</b> The user who creates the deal i.e. the relationship manager (RM) should always belong to the first level (Level 0) in the deal approval hierarchy.  There cannot be a parallel level for the first level (Level 0) in the approval hierarchy. In other words, there can be only one relationship manager (RM) in the entire deal approval hierarchy.	
To Do Type	Used to specify the To Do task which is assigned to the approver/user group for approving the deal at the specified hierarchy level.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.  On specifying the value for a predefined To Do type, the description of the To Do type appears corresponding to the <b>To Do Type</b> field.	
To Do Role	Used to indicate the approver/user group to whom the To Do task is assigned for approving the deal at the specified hierarchy level.	Yes
Propose Pricing	Used to indicate whether the approver/user (other than the relationship manager) at the specified hierarchy level is entitled to recommend a change in the proposed pricing of the price item. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
	<b>Note:</b> By default, this field is read only and the value is set to <b>No</b> for the first level (Level 0) approver/user i.e. the relationship manager (RM) in the approval hierarchy.	
Submit Price Item for Approval	Used to indicate whether the approver/user at the specified hierarchy level is entitled to submit one or more price items to the respective product managers for approval. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	<b>Note:</b> This field is required while defining approval levels for the approving a deal.

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The approver/user can submit the price items to the respective product managers for approval when the values for the <b>Price Item Manager To Do Type</b> and <b>Price Item Manager To Do Role</b> fields are defined in the respective <b>Price Item</b> screen.	
Approve Deal	Used to indicate whether the approver/user at the specified hierarchy level is entitled to approve the deal after all the discretion check is confirmed. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes (Conditional)
	<b>Note:</b> At least one approval hierarchy level must have the value of the <b>Approve Deal</b> field set to <b>Yes</b> . If the value of the <b>Approve Deal</b> field is set to <b>Yes</b> , then, the approver/user can change the status of the deal from <b>Draft</b> to <b>Ready for Approval</b> or <b>Approved</b> .	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
View Only Eligible Price Items	Used to indicate whether the approver/user at the specified hierarchy level can approve only those price items which meet the pricing limits as set in the approval hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes (Conditional)
	<b>Note:</b> By default, this field is read only and the value is set to <b>No</b> for the first level (Level 0) approver/user i.e. the relationship manager (RM) in the approval hierarchy.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Minimum Profitability (%)	Used to specify the minimum deal profitability percentage for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Profitability (%)	Used to specify the maximum deal profitability percentage for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Minimum Profitability Amount	Used to specify the minimum deal profitability amount for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Profitability Amount	Used to specify the maximum deal profitability amount for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Minimum Deviation (%)	Used to specify the minimum deal variation percentage for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Deviation (%)	Used to specify the maximum deal variation percentage for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Minimum Deviation Amount	Used to specify the minimum deal variation amount for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Deviation Amount	Used to specify the maximum deal variation amount for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Minimum Revenue Amount	Used to specify the minimum deal revenue which can be approved by the approver/user at a specified hierarchy level.	Yes (Conditional)
		<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Revenue Amount	Used to specify the maximum deal revenue which can be approved by the approver/user at a specified hierarchy level.	Yes (Conditional)
		<b>Note:</b> This field is required while defining approval levels for the approving a deal.

2. Enter the required details in the **Approval Hierarchy** section.
3. If you want to define more than one approval level in the approval hierarchy, click the **Add (+)** icon and then repeat step 2.

**Note:**

However, if you want to remove an approval level from the approval hierarchy, click the **Delete (🗑)** icon corresponding to the approval hierarchy.

At present, you can add an approval level from 0 to 10. If required, you can add more approval levels in the system through the **C1\_DEALHIERARCHYLEVEL** lookup field.

4. Click **Save**.  
The approval level is defined in the approval hierarchy.

## Editing a Deal Approval Profile

---

**Prerequisites**

To edit a deal approval profile, you should have:

- Currencies defined in the application
- Approval hierarchy levels defined in the application.
- To Do roles and To Do types defined in the application.

**Procedure**

To edit a deal approval profile:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Approval Profile** sub-menu.  
The **Deal Approval Profile** screen appears.
4. In the **Deal Approval Profile List** zone, click the **Edit (✎)** icon in the **Edit** column corresponding to the deal approval profile whose details you want to edit.

The **Deal Approval Profile** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal approval profile.
- **Approval Hierarchy** - Used to define the approval levels in the approval hierarchy with the required limits and rights for approving a deal.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Approval Profile	Used to specify the deal approval profile.	Not applicable
Description	Used to specify the description for the deal approval profile.	Yes
Detailed Description	Used to specify additional information about the deal approval profile.	Yes
Approval Profile Currency	Used to indicate the currency in which the amounts are mentioned in the deal approval profile.	Yes
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	
Status	Used to indicate the status of the deal approval profile. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> Only the active deal approval profiles can be assigned to the deal type for approving the deal.	

**Tip:** Alternatively, you can edit the details of a deal approval profile by clicking the **Edit** button in the **Deal Approval Profile** zone.

5. Modify the required details in the **Main** section.
6. Add, edit, or remove approval levels in the approval hierarchy, if required.
7. Click **Save**.

The changes made to the deal approval profile are saved.

## **Copying a Deal Approval Profile**

Instead of creating a deal approval profile from scratch, you can create a new deal approval profile using an existing deal approval profile. This is possible through copying a deal approval profile. On copying a deal approval profile, the details including the approval levels in the approval hierarchy are copied to the new deal approval profile. You can then edit the details, if required.

#### **Prerequisites**

To copy a deal approval profile, you should have:

- Deal approval profile (whose copy you want to create) defined in the application
- Currencies defined in the application
- Approval hierarchy levels defined in the application.
- To Do roles and To Do types defined in the application.

### **Procedure**

To copy a deal approval profile:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Approval Profile** sub-menu.  
The **Deal Approval Profile** screen appears.
4. In the **Deal Approval Profile List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the deal approval profile whose copy you want to create.

The **Deal Approval Profile** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal approval profile.
- **Approval Hierarchy** - Used to define the approval levels in the approval hierarchy with the required limits and rights for approving a deal.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Approval Profile	Used to specify the deal approval profile.	Yes
Description	Used to specify the description for the deal approval profile.	Yes
Detailed Description	Used to specify additional information about the deal approval profile.	Yes
Approval Profile Currency	Used to indicate the currency in which the amounts are mentioned in the deal approval profile.	Yes
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	
Status	Used to indicate the status of the deal approval profile. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> Only the active deal approval profiles can be assigned to the deal type for approving the deal.	

**Tip:** Alternatively, you can copy a deal approval profile by clicking the **Duplicate** button in the **Deal Approval Profile** zone.

5. Enter the required details in the **Main** section.
6. Add, edit, or remove approval levels in the approval hierarchy, if required.
7. Click **Save**.

The new deal approval profile is defined.

## Deleting a Deal Approval Profile

### Procedure

To delete a deal approval:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Approval Profile** sub-menu.  
The **Deal Approval Profile** screen appears.
4. In the **Deal Approval Profile List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the *deal* approval profile that you want to delete.  
A message appears confirming whether you want to delete the deal approval profile.

**Note:** You can delete a deal approval profile only when the deal approval profile is not yet used for creating a deal type.

**Tip:** Alternatively, you can delete a deal approval profile by clicking the **Delete** button in the **Deal Approval Profile** zone.

5. Click **OK**.  
The deal approval profile is deleted.

## Viewing the Deal Approval Profile Details

### Procedure

To view the details of a deal approval profile:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.

2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Approval Profile** sub-menu.  
The **Deal Approval Profile** screen appears.
4. In the **Deal Approval Profile List** zone, click the **Broadcast** (📡) icon corresponding to the deal approval profile whose details you want to view.  
The **Deal Approval Profile** zone appears.
5. View the details of the deal approval profile in the **Deal Approval Profile** zone.

<b>Deal Approval Profile</b> zone	<a href="#">Deal Approval Profile</a> on page 2497

## Deal Type

A deal type helps the system to determine:

- Whether the pricing for each price item should be approved in the deal
- Whether the deal should be assigned to users for approval as per the limits defined in the deal approval profile
- Whether the pricing and financial summary should be approved at the product level
- Whether the pricing and financial summary should be approved at the division level
- Whether the highest level approval in the approval hierarchy is required for the deal
- Whether the existing pricing should be pre-approved in the deal
- The questionnaire template using which you want to find references for creating a deal
- The deal approval profile that should be used for a product level approval
- The deal approval profile that should be used for a division level approval
- The deal approval profile that should be used for the deal level approval based on the division, customer segment, and customer tier combination

The **Deal Type** screen allows you to define, view, edit, copy, and delete a deal type. It contains the following zones:

- [Deal Type List](#) on page 2508
- [Deal Type](#) on page 2509
- [Deal Approval Profiles](#) on page 2513
- [Customer Characteristics](#) on page 2514

## Deal Type List

The **Deal Type List** zone lists the deal types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Deal Type	Displays the deal type.
Description	Displays the description of the deal type.
Edit	On clicking the <b>Edit</b> (✎) icon corresponding to a deal type, the <b>Deal Type</b> screen appears where you can edit the details of the deal type.

Column Name	Column Description
Duplicate	On clicking the <b>Duplicate</b> (🔗) icon corresponding to a deal type, the <b>Deal Type</b> screen appears where you can define a new deal type using an existing deal type.
Delete	On clicking the <b>Delete</b> (🗑️) icon corresponding to a deal type, you can delete the deal type.
	<b>Note:</b> You can delete a deal type only when the deal type is not yet used for creating a deal.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Deal Type**, **Description**, **Division**, **Customer Segment**, **Effective Date**, **Customer Tier**, **Status**, **Approval Type**, and **Deal Approval Profile**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📢) icon corresponding to a deal type, the **Deal Type** and **Deal Approval Profiles** zones appear with the respective details.

## Deal Type

The **Deal Type** zone displays the details of the deal type. It contains the following sections:

- **Main** - Displays basic information about the deal type. It contains the following fields:

Field Name	Field Description
Deal Type	Displays the deal type.
Description	Displays the description of the deal type.
Detailed Description	Displays additional information about the deal type.
Deal Commitment Frequency	Indicates the periodic analysis of deal usage as per the commitments made by the customer for calculating the deal financial summary. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>

Field Name	Field Description
Price Item Approval Required	Indicates whether discretion check of the individual price item is required by the approver/user for approving the deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Assign Only If In Range	Indicates whether the deal is assigned to the approver/user as per the limits set in the <b>Approval Hierarchy</b> section of the <b>Deal Approval Profile</b> screen. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Product Level Approval Required	Indicates whether discretion check of the price items at the product level is required for approving a deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Division Level Approval Required	Indicates whether discretion check of the price items at the division level is required for approving a deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Highest Level Approval Required	Indicates whether hierarchical approval of the deal is required for approving a deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Status	Indicates the status of the deal type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Pre-Approve Existing Pricing	Indicates whether the existing price items pricing and commitments are approved for confirming the financial summary before approving a deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
To Do Reminder Days	Indicates the number of days using which the system calculates the first To Do reminder date.
To Do High Priority Days	Indicates the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.
Days to Inactivate	Displays the number of days prior to the last updated date of the deal after which you want to inactivate the deal.
	<b>Note:</b> The deal is automatically inactivated if no action is performed on the deal within the specified number of days in this field. The status of the deal is changed to <b>Inactive</b> when the deal inactivation date is equal to the system date.

Field Name	Field Description
Reminder To Do Type	Indicates the To Do task that you want to send as a notification to the user for the priority days set for reviewing the deal.
Questionnaire Template	Indicates the questionnaire template that you want to associate with the deal type.

- **Algorithms** - Lists the algorithms associated with the deal type. It contains the following columns:

Column Name	Column Description
System Event	<p>Indicates the system event when the algorithm is executed. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Customer/Deal References Using Quest</b> - Indicates the algorithm that is triggered to search for deal references based on the questionnaire associated with the deal.</li> <li>• <b>Deal Inactivation</b> - Indicates the algorithm that is triggered to automatically inactivate the deals which are not updated in the system for a long time.</li> <li>• <b>Hierarchy Creation Completion</b> - Indicates the algorithm that is triggered for aggregating the service quantities of the customer, parent customers, grandparent customers, and sibling customers in the customer hierarchy of the deal.</li> <li>• <b>Post Processing Price Item Post Simulation</b> - Indicates the algorithm that is triggered after the price item with post processing price assignment type is simulated.</li> <li>• <b>Price Item Group List Filter</b> - Indicates the algorithm that is triggered to select the price items and the hierarchy entities of an entity automatically based on whether the selection characteristic type specified in the parameter is defined for the respective price item and hierarchy entity.</li> <li>• <b>Price Item Selection Validation</b> - Indicates the algorithm that is triggered to validate the price item and hierarchy entity selection of an entity in a deal.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> The algorithm attached to the <b>Price Item Selection Validation</b> system event is invoked when you click the <b>Save &amp; View Pricing &amp; Commitment</b> button in the <b>Price Item Group Selection</b> screen of the deal.</p> </div> <ul style="list-style-type: none"> <li>• <b>Price Item Approval</b> - Indicates the algorithm that is triggered for approving the price items assigned to the entities in the customer hierarchy of the deal.</li> <li>• <b>Profitability Calculation</b> - Indicates the algorithm that is triggered for calculating the profitability of the proposed commitments defined for the price items while simulating the deal.</li> <li>• <b>Recommended Products Using Questionnaire</b> - Indicates the algorithm that is triggered for searching the recommended products for the deal.</li> <li>• <b>Regular Price Item Post Simulation</b> - Indicates the algorithm that is triggered after the price item with regular price assignment type is simulated.</li> <li>• <b>Simulation Completion</b> - Indicates the algorithm that is triggered after the deal is simulated.</li> <li>• <b>Standard Price List Search</b> - Indicates the algorithm that is triggered to derive the standard price list for the entity.</li> <li>• <b>Terms and Conditions Filter</b> - Indicates the algorithm that is triggered for selecting the deal, price item, and hierarchy entity level terms and conditions automatically based on whether the selection characteristic type specified in the parameter is defined for the respective deal, price item, and hierarchy entity.</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"> <li><b>Terms and Conditions Search Validation</b> - Indicates the algorithm that is triggered to validate the terms and conditions selection of an entity at the deal, price item, and hierarchy entity level.</li> </ul> <div> <b>Note:</b> The algorithm attached to the <b>Terms and Conditions Search Validation</b> system event is invoked when you click the <b>Save</b> button in the <b>Terms and Conditions</b> screen. </div>
Sequence	Displays the order in which the algorithms with the same system event should be executed.
Algorithm	Indicates the algorithm attached to the system event.  <b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.

- Characteristics** - Lists the characteristics defined for the deal type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the deal type.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the deal type.
Delete	Used to delete the deal type.  <b>Note:</b> You can delete a deal type only when the deal type is not yet used for creating a deal.
Duplicate	Used to create a new deal type using an existing deal type.

- Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the deal type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Deal Type** zone does not appear in the **Deal Type** screen. It appears when you click the **Broadcast** (📢) icon corresponding to a deal type in the **Deal Type List** zone.

## Deal Approval Profiles

The **Deal Approval Profiles** zone lists the deal level, division level, or product level approval profiles associated with the deal type using which the deal is approved in the system. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the deal approval profile is effective for the deal type.
Effective End Date	Displays the date till when the deal approval profile is effective for the deal type.
Approval Type	Indicates whether the deal type is used for approving a deal in the product level approval workflow, deal level approval workflow, or division level approval workflow. The valid values are: <ul style="list-style-type: none"> <li>Deal</li> <li>Division</li> <li>Product</li> </ul>
Division	Indicates the division for which the deal level approval, division level approval, or product level approval is required. <p><b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the respective division.</p>
Customer Segment	Indicates the customer segment for which the deal approval profile is required.
Customer Tier	Indicates the customer tier for which the deal approval profile is required.
Product	Indicates the product for which the product level approval is required. <p><b>Note:</b> It has a link. On clicking the link, the <b>Product</b> screen appears where you can view the details of the respective product.</p>
Deal Approval Profile	Indicates the approval profile used for approving the deal. <p><b>Note:</b> It has a link. On clicking the link, the <b>Deal Approval Profile</b> screen appears where you can view the details of the respective deal approval profile.</p>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Deal Approval Profiles** zone does not appear in the **Deal Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a deal type in the **Deal Type List** zone.

On clicking the **Broadcast** (📡) icon corresponding to a deal approval profile, the **Customer Characteristics** zone appears which lists the characteristics of the customers for whom the deal is defined using the deal type.

## Defining a Deal Type

### Prerequisites

To define a deal type you should have:

- Business object defined for the deal type
- Values defined for the **FREQUENCY\_FLG** lookup field.
- Deal approval profiles defined in the application
- Algorithms defined in the system
- Algorithms associated with the system events
- Characteristic types defined in the application (where the characteristic entity is set to **Deal Type**).

- Reminder To Do types defined in the application
- Questionnaire templates defined in the application

### **Procedure**

To define a deal type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Deal Type** sub-menu.

The **Deal Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal type.
- **Deal Approval Profiles** - Used to associate deal level, division level, or product level approval profiles with the deal type for approving the deal.
- **Algorithms** - Used to associate algorithms with the system events defined for the deal type
- **Characteristics** - Used to define the characteristics for the deal type

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Type	Used to specify the deal type.	Yes
Description	Used to specify the description for the deal type.	Yes
Detailed Description	Used to specify additional information about the deal type.	No
Deal Commitment Frequency	Used to indicate the duration for the periodic analysis of deal usage as per the commitments made by the customer for calculating the deal financial summary. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.	
Price Item Approval Required	Used to indicate whether the discretion check of an individual price item is required by the approver/user for approving the deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Assign Only If In Range	Used to indicate whether the deal is assigned to the approver/user as per the limits set in	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p>the <b>Approval Hierarchy</b> section of the <b>Deal Approval Profile</b> screen.</p> <p>For example, if the deal profitability % range of the approver/user is set as follows:</p> <ul style="list-style-type: none"> <li>• <b>RM</b> (0% - 5%)</li> <li>• <b>PM</b> (6% - 15%)</li> <li>• <b>SPM</b> (16% - 50%)</li> </ul> <p>Then,</p> <ul style="list-style-type: none"> <li>• If the calculated deal profitability % is 4 %, then the deal will be assigned to the relationship manager (<b>RM</b>).</li> <li>• If the calculated deal profitability % is 11 %, then the deal will be assigned to the pricing manager (<b>PM</b>).</li> <li>• If the calculated deal profitability % is 25 %, then the deal will be assigned to the senior pricing manager (<b>SPM</b>).</li> </ul> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	<p><b>Note:</b> This field is required for assigning the deal when the deal financial summary falls within the specified limits defined for the approver/user.</p>
	<p><b>Note:</b> This field is valid only for deal level approval profiles.</p>	
Product Level Approval Required	<p>Used to indicate whether the discretion check of the price items at the product level is required for approving a deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for approving deal at product level.</p>
Division Level Approval Required	<p>Used to indicate whether the discretion check of the price items at the division level is required for approving a deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for approving deal at division level.</p>
Highest Level Approval Required	<p>Used to indicate whether the hierarchical approval of the deal is required for approving a deal.</p> <p>For example, if the approval hierarchy has three levels <b>L0 (RM)</b>, <b>L1 (PM)</b>, and <b>L2 (SPM)</b>, then the deal will pass through all the three levels for approval respectively. <b>L0 (RM)</b> will not be able to finalize the deal without the approval of <b>L2 (SPM)</b>.</p> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for approving a deal by each level in the approval hierarchy.</p>

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the deal type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> Only an <b>Active</b> deal type can be used for creating a deal.	
Pre-Approve Existing Pricing	Used to indicate whether the existing price items pricing and commitments should be pre-approved to confirm the financial summary of the deal. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for approving the existing price item pricing and commitments of the entity.
To Do Reminder Days	Used to specify the number of days using which the system calculates the first To Do reminder date.	Yes
To Do High Priority Days	Used to specify the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.	Yes
	<b>Note:</b> You can set a maximum of <b>9</b> priority days for the To Do reminder days.	
Days to Inactivate	Used to specify the number of days prior to the last updated date of the deal after which you want to inactivate the deal.	Yes (Conditional)
	<b>Note:</b> You must specify a numeric value greater than zero in this field. Also, the numeric value should be greater than the values specified in the <b>To Do Reminder Days</b> and <b>To Do High Priority Days</b> fields.  The deal is automatically inactivated if no action is performed on the deal within the specified number of days in this field.  The status of the deal is changed to <b>Inactive</b> when the deal inactivation date is equal to the system date.	<b>Note:</b> This field is required for inactivating deals which are not updated in the system for a long time.
Reminder To Do Type	Used to indicate the To Do task that you want to send as a notification to the user for the priority days set for reviewing the deal.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Monitor To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the value for a To Do type, the description of the To Do type appears corresponding to the <b>To Do Type</b> field.</p>	
Questionnaire Template	Used to indicate the questionnaire template that you want to associate with the deal type using which the system searches for a list of deals which can be used as references while creating a deal.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Questionnaire Template</b> field. On clicking the <b>Search</b> icon, the <b>Search Questionnaire Template</b> window appears.</p> <p>On specifying the value for a questionnaire template, the description of the questionnaire template appears corresponding to the <b>Questionnaire Template</b> field.</p>	<p><b>Note:</b> This field is required for associating a questionnaire template with the deal type.</p>

4. Enter the required details in the **Main** section.
5. Associate deal approval profiles with the deal type in the **Deal Approval Profiles** section.
6. Associate algorithms with the deal type in the **Algorithms** section, if required.
7. Define characteristics for the deal type in the **Characteristics** section, if required.
8. Click **Save**.  
The deal type is defined.

## Associating a Deal Approval Profile with a Deal Type

### Prerequisites

To associate a deal approval profile with a deal type, you should have:

- Approval types defined in the application
- Divisions defined in the application
- Customer segments and customer tiers defined in the application
- Products defined in the application
- Deal approval profiles defined in the application

### **Procedure**

To associate a deal approval profile with a deal type:

1. Ensure that the **Deal Approval Profiles** section is expanded in the **Deal Type** screen when you are defining, editing, or copying a deal type.

The **Deal Approval Profiles** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to indicate the date from when the deal approval profile is effective for the deal type.	Yes
	<b>Note:</b> The effective start date cannot be later than the effective end date.	
Effective End Date	Used to indicate the date till when the deal approval profile is effective for the deal type.	No
	<b>Note:</b> The effective end date cannot be earlier than the effective start date.	
Approval Type	Used to indicate whether the deal type is used for approving a deal in the product level approval workflow, deal level approval workflow, or division level approval workflow. The valid values are: <ul style="list-style-type: none"> <li>• Deal</li> <li>• Division</li> <li>• Product</li> </ul>	Yes
Division	Used to indicate the division for which the deal level approval, division level approval, or product level approval is required.	Yes
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Customer Segment	Used to indicate the customer segment to which the deal type is associated.	Yes
	<b>Note:</b> This field is disabled when you select the <b>Division</b> or the <b>Product</b> option from the <b>Approval Type</b> field.	
Customer Tier	Used to indicate the customer tier to which the deal type is associated.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field is disabled when you select the <b>Division</b> or the <b>Product</b> option from the <b>Approval Type</b> field.	
Product	Used t to indicate the product for which the product level approval is required.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Product Search</b> window appears.  On specifying a product, the description of the product appears corresponding to the <b>Product</b> field.  This field is enabled only when you select the <b>Product</b> option from the <b>Approval Type</b> field.	<b>Note:</b> This field is required for approving a deal in the product level approval workflow.
Deal Approval Profile	Used to indicate the approval profile which you want to use for approving the deal.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Approval Profile</b> field. On clicking the <b>Search</b> icon, the <b>Deal Approval Profile Search</b> window appears.  On specifying the value for a deal approval profile, the description of the deal approval profile appears corresponding to the <b>Deal Approval Profile</b> field.	

- Enter the required details in the **Deal Approval Profiles** section.
- If you want to associate more than one deal approval profile with the deal type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to disassociate a deal approval profile from the deal type, click the **Delete** (🗑) icon corresponding to the deal approval profile.

- Click **Save**.  
The deal approval profile is associated with the deal type.

## Associating an Algorithm with a Deal Type

### Prerequisites

To associate an algorithm with a deal type, you should have:

- System events defined in the application
- Algorithms defined for the system events

### Procedure

To associate an algorithm with a deal type:

1. Ensure that the **Algorithms** section is expanded in the **Deal Type** screen when you are defining, editing, or copying a deal type.

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	<p>Used to indicate the system event when the algorithm is executed. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Customer/Deal References Using Quest</b> - Used to indicate the algorithm that is triggered to search for deal references based on the questionnaire associated with the deal.</li> <li>• <b>Deal Inactivation</b> - Used to indicate the algorithm that is triggered to automatically inactivate the deals which are not updated in the system for a long time.</li> <li>• <b>Hierarchy Creation Completion</b> - Used to indicate the algorithm that is triggered for aggregating the service quantities of the customer, parent customers, grandparent customers, and sibling customers in the customer hierarchy of the deal.</li> <li>• <b>Post Processing Price Item Post Simulation</b></li> <li>• <b>Price Item Group List Filter</b> - Used to indicate the algorithm that is triggered to select the price items and the hierarchy entities of an entity automatically based on whether the selection characteristic type specified in the parameter is defined for the respective price item and hierarchy entity.</li> <li>• <b>Price Item Selection Validation</b> - Used to indicate the algorithm that is triggered to validate the price item and hierarchy entity selection of an entity in a deal.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> The algorithm attached to the <b>Price Item Selection Validation</b> system event is invoked when you click the <b>Save &amp; View Pricing &amp; Commitment</b> button in the <b>Price Item Group Selection</b> screen of the deal.</p> </div> <ul style="list-style-type: none"> <li>• <b>Price Item Approval</b> - Used to indicate the algorithm that is triggered for approving the</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p>price items assigned to the entities in the customer hierarchy of the deal.</p> <ul style="list-style-type: none"> <li>• <b>Profitability Calculation</b> - Used to indicate the algorithm that is triggered for calculating the profitability of the proposed commitments defined for the price items while simulating the deal.</li> <li>• <b>Recommended Products Using Questionnaire</b> - Used to indicate the algorithm that is triggered for searching the recommended products for the deal.</li> <li>• Regular Price Item Post Simulation</li> <li>• Simulation Completion</li> <li>• Standard Price List Search</li> <li>• <b>Terms and Conditions Filter</b> - Used to indicate the algorithm that is triggered for selecting the deal, price item, and hierarchy entity level terms and conditions automatically based on whether the selection characteristic type specified in the parameter is defined for the respective deal, price item, and hierarchy entity.</li> <li>• <b>Terms and Conditions Search Validation</b> - Used to indicate the algorithm that is triggered to validate the terms and conditions selection of an entity at the deal, price item, and hierarchy entity level.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The algorithm attached to the <b>Terms and Conditions Search Validation</b> system event is invoked when you click the <b>Save</b> button in the <b>Terms and Conditions</b> screen.</p> </div> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The list includes only those values which are specified in the <b>DEAL_TYPE_ALG_ENT_FLG</b> lookup field.</p> </div>	
Sequence	Used to specify the order in which the algorithms with the same system event is executed.	Yes
Algorithm	<p>Used to indicate the algorithm attached to the system event.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the value for an algorithm, the description of the algorithm appears corresponding to the <b>Algorithm</b> field.</p> </div>	Yes

2. Enter the required details in the **Algorithms** section.
3. If you want to associate more than one algorithm with the deal type, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to disassociate an algorithm from the deal type, click the **Delete (🗑)** icon corresponding to the algorithm.

4. Click **Save**.  
The algorithm is associated with the deal type.

## Defining a Characteristic for a Deal Type

### Prerequisites

To define a characteristic for a deal type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deal Type**)

### Procedure

To define a characteristic for a deal type:

1. Ensure that the **Characteristics** section is expanded in the **Deal Type** screen when you are defining, editing, or copying a deal type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deal type.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the deal type.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deal Type</b> .	<b>Note:</b> This field is required while defining a characteristic for the deal type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required while defining a characteristic for the deal type.</p>

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the deal type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the deal type, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.  
The characteristic is defined for the deal type.

#### **Related Topics**

<b>Deal Type</b> screen	<a href="#">Deal Type</a> on page 2508
How to define a deal type	<a href="#">Defining a Deal Type</a> on page 2514
How to edit a deal type	<a href="#">Editing a Deal Type</a> on page 2524
How to copy a deal type	<a href="#">Copying a Deal Type</a> on page 2528

## **Editing a Deal Type**

### **Prerequisites**

To edit a deal type you should have:

- Deal approval profiles defined in the application
- Values defined for the **FREQUENCY\_FLG** lookup field.
- Deal approval profiles defined in the application
- Algorithms defined in the system
- Algorithms associated with the system events
- Characteristic types defined in the application (where the characteristic entity is set to **Deal Type**).
- Reminder To Do types defined in the application
- Questionnaire templates defined in the application

### **Procedure**

To edit a deal type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Type**.

A sub-menu appears.

3. Click the **Search** option from the **Deal Type** sub-menu.

The **Deal Type** screen appears.

4. In the **Deal Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the deal type whose *details* you want to edit.

The **Deal Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal type.
- **Deal Approval Profiles** - Used to associate deal level, division level, or product level approval profiles with the deal type for approving the deal.
- **Algorithms** - Used to associate algorithms with the system events defined for the deal type
- **Characteristics** - Used to define the characteristics for the deal type

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Type	Used to specify the deal type.	Not Applicable
Description	Used to specify the description for the deal type.	Yes
Detailed Description	Used to specify additional information about the deal type.	No
Deal Commitment Frequency	Used to indicate the duration for the periodic analysis of deal usage as per the commitments made by the customer for calculating the deal financial summary. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.	
Price Item Approval Required	Used to indicate whether the discretion check of an individual price item is required by the approver/user for approving the deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Assign Only If In Range	Used to indicate whether the deal is assigned to the approver/user as per the limits set in the <b>Approval Hierarchy</b> section of the <b>Deal Approval Profile</b> screen.	Yes (Conditional)
	For example, if the deal profitability % range of the approver/user is set as follows: <ul style="list-style-type: none"> <li>• <b>RM</b> (0% - 5%)</li> <li>• <b>PM</b> (6% - 15%)</li> <li>• <b>SPM</b> (16% - 50%)</li> </ul>	<b>Note:</b> This field is required for assigning the deal when the deal financial summary falls within the specified limits defined for the approver/user.
	Then,	

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>If the calculated deal profitability % is 4 %, then the deal will be assigned to the relationship manager (<b>RM</b>).</li> <li>If the calculated deal profitability % is 11 %, then the deal will be assigned to the pricing manager (<b>PM</b>).</li> <li>If the calculated deal profitability % is 25 %, then the deal will be assigned to the senior pricing manager (<b>SPM</b>).</li> </ul> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	
	<b>Note:</b> This field is valid only for deal level approval profiles.	
Product Level Approval Required	Used to indicate whether the discretion check of the price items at the product level is required for approving a deal. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	<b>Note:</b> This field is required for approving deal at product level.
Division Level Approval Required	Used to indicate whether the discretion check of the price items at the division level is required for approving a deal. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	<b>Note:</b> This field is required for approving deal at division level.
Highest Level Approval Required	Used to indicate whether the hierarchical approval of the deal is required for approving a deal.	Yes (Conditional)
	For example, if the approval hierarchy has three levels <b>L0 (RM)</b> , <b>L1 (PM)</b> , and <b>L2 (SPM)</b> , then the deal will pass through all the three levels for approval respectively. <b>L0 (RM)</b> will not be able to finalize the deal without the approval of <b>L2 (SPM)</b> .	<b>Note:</b> This field is required for approving a deal by each level in the approval hierarchy.
	The valid values are:	
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	
Status	Used to indicate the status of the deal type. The valid values are:	Yes
	<ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	
	<b>Note:</b> Only an <b>Active</b> deal type can be used for creating a deal.	

Field Name	Field Description	Mandatory (Yes or No)
Pre-Approve Existing Pricing	Used to indicate whether the existing price items pricing and commitments should be pre-approved to confirm the financial summary of the deal. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for approving the existing price item pricing and commitments of the entity.
To Do Reminder Days	Used to specify the number of days using which the system calculates the first To Do reminder date.	Yes
To Do High Priority Days	Used to specify the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.	Yes
	<b>Note:</b> You can set a maximum of <b>9</b> priority days for the To Do reminder days.	
Days to Inactivate	Used to specify the number of days prior to the last updated date of the deal after which you want to inactivate the deal.	Yes (Conditional)
	<b>Note:</b> You must specify a numeric value greater than zero in this field. Also, the numeric value should be greater than the values specified in the <b>To Do Reminder Days</b> and <b>To Do High Priority Days</b> fields.  The deal is automatically inactivated if no action is performed on the deal within the specified number of days in this field.  The status of the deal is changed to <b>Inactive</b> when the deal inactivation date is equal to the system date.	<b>Note:</b> This field is required for inactivating deals which are not updated in the system for a long time.
Reminder To Do Type	Used to indicate the To Do task that you want to send as a notification to the user for the priority days set for reviewing the deal.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Monitor To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.  On specifying the value for a To Do type, the description of the To Do type appears corresponding to the <b>To Do Type</b> field.	
Questionnaire Template	Used to indicate the questionnaire template that you want to associate with the deal type using	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	which the system searches for a list of deals which can be used as references while creating a deal.	<b>Note:</b> This field is required for associating a questionnaire template with the deal type.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Questionnaire Template</b> field. On clicking the <b>Search</b> icon, the <b>Search Questionnaire Template</b> window appears.  On specifying the value for a questionnaire template, the description of the questionnaire template appears corresponding to the <b>Questionnaire Template</b> field.	

5. Modify the required details in the **Main** section.

**Note:** You cannot edit the fields from the **Main** section when a deal is already created using the deal type.

6. Associate or disassociate deal approval profiles from the deal type, if required.
7. Associate or disassociate algorithms from the deal type, if required.
8. Define, edit, or remove characteristics from the deal type, if required.
9. Click **Save**.  
The changes made to the deal type are saved.

**Tip:** Alternatively, you can edit the details of a deal type by clicking the **Edit** button in the **Deal Type** zone.

## Copying a Deal Type

Instead of creating a deal type from scratch, you can create a new deal type using an existing deal type. This is possible through copying a deal type. On copying a deal type, the details including the deal approval profiles, algorithms, and characteristics are copied to the new deal type. You can then edit the details, if required.

### Prerequisites

To copy a deal type you should have:

- Deal type (whose copy you want to create) defined in the application
- Values defined for the **FREQUENCY\_FLG** lookup field.
- Deal approval profiles defined in the application
- Algorithms defined in the system

- Algorithms associated with the system events
- Characteristic types defined in the application (where the characteristic entity is set to **Deal Type**).
- Deal monitor To Do types defined in the application
- Questionnaire templates defined in the application

### **Procedure**

To copy a deal type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Type** sub-menu.  
The **Deal Type** screen appears.
4. In the **Deal Type List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the deal type whose copy you want to create.

The **Deal Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal type.
- **Deal Approval Profiles** - Used to associate deal level, division level, or product level approval profiles with the deal type for approving the deal.
- **Algorithms** - Used to associate algorithms with the system events defined for the deal type
- **Characteristics** - Used to define the characteristics for the deal type

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Type	Used to specify the deal type.	Yes
Description	Used to specify the description for the deal type.	Yes
Detailed Description	Used to specify additional information about the deal type.	No
Deal Commitment Frequency	Used to indicate the duration for the periodic analysis of deal usage as per the commitments made by the customer for calculating the deal financial summary. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.	
Price Item Approval Required	Used to indicate whether the discretion check of an individual price item is required by the approver/user for approving the deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Assign Only If In Range	Used to indicate whether the deal is assigned to the approver/user as per the limits set in the <b>Approval Hierarchy</b> section of the <b>Deal Approval Profile</b> screen.	Yes (Conditional)
	For example, if the deal profitability % range of the approver/user is set as follows: <ul style="list-style-type: none"> <li>• <b>RM</b> (0% - 5%)</li> <li>• <b>PM</b> (6% - 15%)</li> <li>• <b>SPM</b> (16% - 50%)</li> </ul> Then, <ul style="list-style-type: none"> <li>• If the calculated deal profitability % is 4 %, then the deal will be assigned to the relationship manager (<b>RM</b>).</li> <li>• If the calculated deal profitability % is 11 %, then the deal will be assigned to the pricing manager (<b>PM</b>).</li> <li>• If the calculated deal profitability % is 25 %, then the deal will be assigned to the senior pricing manager (<b>SPM</b>).</li> </ul> The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	<b>Note:</b> This field is required for assigning the deal when the deal financial summary falls within the specified limits defined for the approver/user.
	<b>Note:</b> This field is valid only for deal level approval profiles.	
Product Level Approval Required	Used to indicate whether the discretion check of the price items at the product level is required for approving a deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for approving deal at product level.
Division Level Approval Required	Used to indicate whether the discretion check of the price items at the division level is required for approving a deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for approving deal at division level.
Highest Level Approval Required	Used to indicate whether the hierarchical approval of the deal is required for approving a deal.	Yes (Conditional)
		<b>Note:</b> This field is required for approving a deal by each level in the approval hierarchy.
		For example, if the approval hierarchy has three levels <b>L0 (RM)</b> , <b>L1 (PM)</b> , and <b>L2 (SPM)</b> , then the deal will pass through all the three levels for approval respectively. <b>L0 (RM)</b> will not be able to finalize the deal without the approval of <b>L2 (SPM)</b> .
	The valid values are:	

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	
Status	Used to indicate the status of the deal type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> Only an <b>Active</b> deal type can be used for creating a deal.	
Pre-Approve Existing Pricing	Used to indicate whether the existing price items pricing and commitments should be pre-approved to confirm the financial summary of the deal. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for approving the existing price item pricing and commitments of the entity.
To Do Reminder Days	Used to specify the number of days using which the system calculates the first To Do reminder date.	Yes
To Do High Priority Days	Used to specify the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.	Yes
	<b>Note:</b> You can set a maximum of <b>9</b> priority days for the To Do reminder days.	
Days to Inactivate	Used to specify the number of days prior to the last updated date of the deal after which you want to inactivate the deal.	Yes (Conditional)
	<b>Note:</b> You must specify a numeric value greater than zero in this field. Also, the numeric value should be greater than the values specified in the <b>To Do Reminder Days</b> and <b>To Do High Priority Days</b> fields.  The deal is automatically inactivated if no action is performed on the deal within the specified number of days in this field.  The status of the deal is changed to <b>Inactive</b> when the deal inactivation date is equal to the system date.	<b>Note:</b> This field is required for inactivating deals which are not updated in the system for a long time.
Deal Monitor To Do Type	Used to indicate the To Do task that you want to send as a notification to the user for the priority days set for reviewing the deal.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Monitor To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the value for a To Do type, the description of the To Do type appears corresponding to the <b>To Do Type</b> field.</p>	
Questionnaire Template	Used to indicate the questionnaire template that you want to associate with the deal type using which the system searches for a list of deals which can be used as references while creating a deal.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Questionnaire Template</b> field. On clicking the <b>Search</b> icon, the <b>Search Questionnaire Template</b> window appears.</p> <p>On specifying the value for a questionnaire template, the description of the questionnaire template appears corresponding to the <b>Questionnaire Template</b> field.</p>	<p><b>Note:</b> This field is required for associating a questionnaire template with the deal type.</p>

5. Enter the required details in the **Main** section.
6. Associate or disassociate deal approval profiles from the deal type, if required.
7. Associate or disassociate algorithms from the deal type, if required.
8. Define, edit, or remove characteristics of the deal type, if required.
9. Click **Save**.  
The new deal type is defined.

**Tip:** Alternatively, you can copy a deal type by clicking the **Duplicate** button in the **Deal Type** zone.

## Deleting a Deal Type

### Procedure

To delete a deal type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Type** sub-menu.  
The **Deal Type** screen appears.
4. In the **Deal Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the deal type that you want to delete.  
A message appears confirming whether you want to delete the deal type.

**Note:** You can delete a deal type only when the deal type is not yet used for creating a deal.

**Tip:** Alternatively, you can delete a deal type by clicking the **Delete** button in the **Deal Type** zone.

5. Click **OK**.  
The deal type is deleted.

## Questionnaire Template (Used for Searching)

The **Questionnaire Template** screen allows you to search for a questionnaire template using various search criteria. It also allows you to define, edit, copy, delete, and preview a questionnaire template. It contains the following zone:

- [Search Questionnaire Template](#) on page 2534

Through this screen, you can navigate to the following screen:

- [Questionnaire Template \(Used for Viewing\)](#) on page 2550

## Search Questionnaire Template

The **Search Questionnaire Template** zone allows you to search for a questionnaire template using various search criteria. It also allows you to edit, copy, delete, and preview an existing questionnaire template. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Questionnaire Template	Used to search a particular questionnaire template.	No
Description	Used to search questionnaire templates having a particular description.	No
Start Date	Used to search questionnaire templates which are effective from a particular date onwards.	No
End Date	Used to search questionnaire templates which are effective till a particular date.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Questionnaire Template Information	Displays the concatenated string of information about the questionnaire template separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Questionnaire Template</b> screen appears where you can view the details of the respective questionnaire template.
Description	Displays the description of the questionnaire template.
Start Date	Displays the date from when the questionnaire template is effective.
End Date	Displays the date till when the questionnaire template is effective.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Questionnaire Template</b> screen appears where you can edit the questionnaire template details.

Column Name	Column Description
Duplicate	On clicking the <b>Duplicate</b> (🔗) icon, the <b>Questionnaire Template</b> screen appears where you can define a questionnaire template using an existing questionnaire template.
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can delete the questionnaire template.
Preview	On clicking the <b>Preview</b> (🔍) icon, <b>Preview Questionnaire Template</b> screen appears where you can preview the questions of a questionnaire template.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Searching for a Questionnaire Template

### Procedure

To search for a questionnaire template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **Q** and then click **Questionnaire Template**.  
A sub-menu appears.
3. Click the **Search** option from the **Questionnaire Template** sub-menu.  
The **Questionnaire Template** screen appears.
4. Enter the required details in the **Search Questionnaire Template** zone.
5. Click **Search**.  
A list of questionnaire templates that meet the search criteria appears in the **Search Results** section.

## Defining a Questionnaire Template

### Prerequisites

To define a questionnaire template you should have:

- Questions defined in the application.
- Reference tables and reference columns defined in the application.
- Validation algorithms defined in the application.
- Reference parameter defined in the application.
- Rule types defined in the application.
- Values defined for the **DEAL\_QUE\_DISP\_FLG**, **ANS\_DISPLAY\_FLG** and **APPLICABLE\_FOR\_FLG** lookup fields.

### Procedure

To define a questionnaire template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **Q** and then click **Questionnaire Template**.  
A sub-menu appears.
3. Click the **Add** option from the **Questionnaire Template** sub-menu.

The **Questionnaire Template** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Questionnaire Template	Used to specify the questionnaire template.	Yes
Description	Used to specify the description for the questionnaire template.	Yes
Start Date	Used to specify the date from when the questionnaire template is effective.	Yes
End Date	Used to specify the date till when the questionnaire template is effective.	No
Question Display Order	Used to indicate the order in which the questions of the questionnaire template should appear in the <b>Questionnaire Template</b> screen. The valid values are: <ul style="list-style-type: none"> <li>• Rule based</li> <li>• Sequence based</li> </ul>	Yes

- **Questions** - Used to associate the rule based or sequence based questions with the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Question	Used to specify the question that you want to associate with the questionnaire template.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Question Search</b> window appears where you can search for a question.</p>	
Question Text	Used to specify the question statement.	Yes
Sequence	Used to specify the sequence number of the question.	Yes
Answer Type	<p>Used to indicate the type in which you want to select the answer for the question. The valid values are:</p> <ul style="list-style-type: none"> <li>• Date</li> <li>• Decimal Value</li> <li>• Multi Selection Check Box List</li> <li>• Multi Selection from Drop Down List</li> <li>• Numeric Value</li> <li>• Percentage</li> <li>• Radio Button List</li> <li>• Single Selection Drop Down List</li> <li>• Text</li> </ul>	Yes
Answer Value Set	Indicates the references from where you want to search for the answer of the question. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>• <b>Reference Data</b></li> </ul> <p>- Used to indicate that you want to search for the answer from a specific reference table given in the system.</p>	<p><b>Note:</b> This field is required for searching answers from a given reference.</p>
	<p><b>Note:</b> This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</p> <ul style="list-style-type: none"> <li>• <b>Predefined List</b></li> </ul> <p>- Used to indicate that you want to search for the answer from a predefined list defined in the system.</p> <p><b>Note:</b> This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</p>	
Reference Table	Used to indicate a specific table that you want to set as a source for searching the answer of the question.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Table Search</b> window appears.</p> <p>On specifying the table, the description of the table appears corresponding to the <b>Reference Table</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p><b>Note:</b> This field is required for searching the answer from a reference table.</p>
Reference Column	<p>Used to indicate the column in the reference table from where you want to search for the answer of the question.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Column Search</b> window appears.</p> <p>On specifying the column, the description of the column appears corresponding to the <b>Reference Column</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for searching the answer from a reference table.</p>
Reference Criteria	Used to specify the criteria based on which you want to search for the answer from the given reference.	No
Validation Algorithm	<p>Used to indicate the algorithm that you want to use for validating the answer of the question.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for an algorithm.</p>	Yes
Default Answer	Used to specify the answer that you want to set as default for the question.	No
Mandatory	Used to indicate whether the question is mandatory or not.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> On selecting the check box of the <b>Mandatory</b> field, the question appears with an asterisk (*) sign in the questionnaire template.</p>	
Reference Parameter	<p>Used to indicate the parameter which is used to check the eligibility while recommending the reference customers / products / packages.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> <p>On specifying the parameter, the description of the parameter appears corresponding to the <b>Reference Parameter</b> field.</p>	No
Rule Type	<p>Used to indicate the rule type using which the next question appears in the <b>Questionnaire Template</b> screen.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rule Type Search</b> window appears.</p> <p>On specifying the rule type, the description of the rule type appears corresponding to the <b>Rule Type</b> field.</p> <p>This field is used when the <b>Question Display Order</b> is selected as <b>Rule Based</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is used for displaying the next question based on the answer provided for the previous question in the questionnaire template.</p>
Question Applicability	<p>Used to indicate the question applicability based on which the references are derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Customer and Deal References</li> <li>• Package and Product References</li> <li>• Others</li> </ul>	Yes
Predefined Value	<p>Used to specify the predefined list from where you want the system to search the answer for a question.</p> <p><b>Note:</b> This field is enabled when the <b>Predefined List</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p>Yes (Conditional).</p> <p><b>Note:</b> This field is required for searching the answer from a predefined list.</p>

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description of the predefined list.	Yes (Conditional)
		<b>Note:</b> This field is required for searching the answer from a predefined list.

- Enter the required details in the **Main** section.
- Define questions for the questionnaire template in the **Questions** section.
- If you want to define more than one question for the questionnaire template, click the **Add (+)** icon in the **Questions** section.

**Note:** However, if you want to remove a question from the questionnaire template, click the **Delete** (🗑) icon in the **Questions** section.

- Click **Save**.  
The questionnaire template is defined.

## Editing a Questionnaire Template

### Prerequisites

To edit a questionnaire template you should have:

- Questions defined in the application.
- Reference tables and reference columns defined in the application.
- Validation algorithms defined in the application.
- Reference parameter defined in the application.
- Rule types defined in the application.
- Values defined for the **DEAL\_QUE\_DISP\_FLG**, **ANS\_DISPLAY\_FLG** and **APPLICABLE\_FOR\_FLG** lookup fields.

### Procedure

To edit a questionnaire template:

- Search for the questionnaire template in the **Questionnaire Template** screen.
- In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the questionnaire template whose details you want to edit.

The **Questionnaire Template** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Questionnaire Template	Used to specify the questionnaire template.	Not applicable
Description	Used to specify the description for the questionnaire template.	No

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the questionnaire template is effective.	Yes
End Date	Used to specify the date till when the questionnaire template is effective.	No
Question Display Order	Used to indicate the order in which the questions of the questionnaire template should appear in the <b>Questionnaire Template</b> screen. The valid values are: <ul style="list-style-type: none"> <li>• Rule based</li> <li>• Sequence based</li> </ul>	Yes

- **Questions** - Used to associate the rule based or sequence based questions with the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Question	Used to specify the question that you want to associate with the questionnaire template.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Question Search</b> window appears where you can search for a question.	
Question Text	Used to specify the question statement.	Yes
Sequence	Used to specify the sequence number of the question.	Yes
Answer Type	Used to indicate the type in which you want to select the answer for the question. The valid values are: <ul style="list-style-type: none"> <li>• Date</li> <li>• Decimal Value</li> <li>• Multi Selection Check Box List</li> <li>• Multi Selection from Drop Down List</li> <li>• Numeric Value</li> <li>• Percentage</li> <li>• Radio Button List</li> <li>• Single Selection Drop Down List</li> <li>• Text</li> </ul>	Yes
Answer Value Set	Indicates the references from where you want to search for the answer of the question. The valid values are: <ul style="list-style-type: none"> <li>• <b>Reference Data</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a specific reference table given in the system.</li> </ul> </li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for searching answers from a given reference.

Field Name	Field Description	Mandatory (Yes or No)
	<div>Note: This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</div> <ul style="list-style-type: none"> <li>• <b>Predefined List</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a predefined list defined in the system.</li> </ul> </li> </ul> <div>Note: This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</div>	
Reference Table	Used to indicate a specific table that you want to set as a source for searching the answer of the question.	Yes (Conditional)
	<div>Note:</div> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Table Search</b> window appears.</p> <p>On specifying the table, the description of the table appears corresponding to the <b>Reference Table</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<div>Note: This field is required for searching the answer from a reference table.</div>
Reference Column	Used to indicate the column in the reference table from where you want to search for the answer of the question.	Yes (Conditional)
	<div>Note:</div> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Column Search</b> window appears.</p> <p>On specifying the column, the description of the column appears corresponding to the <b>Reference Column</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<div>Note: This field is required for searching the answer from a reference table.</div>

Field Name	Field Description	Mandatory (Yes or No)
Reference Criteria	Used to specify the criteria based on which you want to search for the answer from the given reference.	No
Validation Algorithm	Used to indicate the algorithm that you want to use for validating the answer of the question.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for an algorithm.	
Default Answer	Used to specify the answer that you want to set as default for the question.	No
Mandatory	Used to indicate whether the question is mandatory or not.	No
	<b>Note:</b> On selecting the check box of the <b>Mandatory</b> field, the question appears with an asterisk (*) sign in the questionnaire template.	
Reference Parameter	Used to indicate the parameter which is used to check the eligibility while recommending the reference customers / products / packages.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.  On specifying the parameter, the description of the parameter appears corresponding to the <b>Reference Parameter</b> field.	
Rule Type	Used to indicate the rule type using which the next question appears in the <b>Questionnaire Template</b> screen.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rule Type Search</b> window appears.  On specifying the rule type, the description of the rule type appears corresponding to the <b>Rule Type</b> field.  This field is used when the <b>Question Display Order</b> is selected as <b>Rule Based</b> .	<b>Note:</b> This field is used for displaying the next question based on the answer provided for the previous question in the questionnaire template.
Question Applicability	Used to indicate the question applicability based on which the references are derived. The valid values are: <ul style="list-style-type: none"> <li>• Customer and Deal References</li> <li>• Package and Product References</li> <li>• Others</li> </ul>	Yes
Predefined Value	Used to specify the predefined list from where you want the system to search the answer for a question.	Yes (Conditional).
	<b>Note:</b> This field is enabled when the <b>Predefined List</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a predefined list.
Description	Used to specify the description of the predefined list.	Yes (Conditional)
		<b>Note:</b> This field is required for searching the answer from a predefined list.

3. Modify the required details in the **Main** section.
4. Add, edit, or remove questions from the questionnaire template, if required.

**Note:** Click the **Previous** (⏮) or **Next** (⏭) icons in the **Questions** section to navigate through the existing questions of the questionnaire template which you want to edit or delete.

5. Click **Save**.  
The changes made to the questionnaire template are saved.

**Tip:** Alternatively, you can edit the details of a questionnaire template by clicking the **Edit** button in the **Questionnaire Template** zone of the **Questionnaire Template** screen.

## Copying a Questionnaire Template

Instead of creating a questionnaire template from scratch, you can create a new questionnaire template using an existing questionnaire template. This is possible through copying a questionnaire template. On copying a questionnaire template, the details including the questions are copied to the new questionnaire template. You can then edit the details, if required.

### Prerequisites

To copy a questionnaire template you should have:

- Questions defined in the application.
- Reference tables and reference columns defined in the application.
- Validation algorithms defined in the application.
- Reference parameter defined in the application.
- Rule types defined in the application.
- Values defined for the **DEAL\_QUE\_DISP\_FLG**, **ANS\_DISPLAY\_FLG** and **APPLICABLE\_FOR\_FLG** lookup fields.

### Procedure

To copy a questionnaire template:

1. Search for the questionnaire template in the **Questionnaire Template** screen.
2. In the **Search Results** section, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the questionnaire template whose copy you want to create.

The **Questionnaire Template** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Questionnaire Template	Used to specify the questionnaire template.	Yes
Description	Used to specify the description for the questionnaire template.	Yes
Start Date	Used to specify the date from when the questionnaire template is effective.	Yes
End Date	Used to specify the date till when the questionnaire template is effective.	No
Question Display Order	Used to indicate the order in which the questions of the questionnaire template should appear in the <b>Questionnaire Template</b> screen. The valid values are: <ul style="list-style-type: none"> <li>• Rule based</li> <li>• Sequence based</li> </ul>	Yes

- **Questions** - Used to associate the rule based or sequence based questions with the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Question	Used to specify the question that you want to associate with the questionnaire template.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Question Search</b> window appears where you can search for a question.	
Question Text	Used to specify the question statement.	Yes
Sequence	Used to specify the sequence number of the question.	Yes
Answer Type	Used to indicate the type in which you want to select the answer for the question. The valid values are: <ul style="list-style-type: none"> <li>• Date</li> <li>• Decimal Value</li> <li>• Multi Selection Check Box List</li> <li>• Multi Selection from Drop Down List</li> <li>• Numeric Value</li> <li>• Percentage</li> <li>• Radio Button List</li> <li>• Single Selection Drop Down List</li> <li>• Text</li> </ul>	Yes
Answer Value Set	Indicates the references from where you want to search for the answer of the question. The valid values are: <ul style="list-style-type: none"> <li>• <b>Reference Data</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a specific reference table given in the system.</li> </ul> </li> </ul>	Yes (Conditional)
	<b>Note:</b> This field is disabled when you select the <b>Date</b> , <b>Decimal Value</b> , <b>Numeric Value</b> , <b>Percentage</b> , or <b>Text</b> option from the <b>Answer Type</b> list.	<b>Note:</b> This field is required for searching answers from a given reference.
	<ul style="list-style-type: none"> <li>• <b>Predefined List</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a predefined list defined in the system.</li> </ul> </li> </ul>	
	<b>Note:</b> This field is disabled when you select the <b>Date</b> , <b>Decimal Value</b> , <b>Numeric Value</b> , <b>Percentage</b> , or <b>Text</b> option from the <b>Answer Type</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Reference Table	Used to indicate a specific table that you want to set as a source for searching the answer of the question.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Table Search</b> window appears. On specifying the table, the description of the table appears corresponding to the <b>Reference Table</b> field. This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a reference table.
Reference Column	Used to indicate the column in the reference table from where you want to search for the answer of the question.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Column Search</b> window appears. On specifying the column, the description of the column appears corresponding to the <b>Reference Column</b> field. This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a reference table.
Reference Criteria	Used to specify the criteria based on which you want to search for the answer from the given reference.	No
Validation Algorithm	Used to indicate the algorithm that you want to use for validating the answer of the question.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for an algorithm.	
Default Answer	Used to specify the answer that you want to set as default for the question.	No
Mandatory	Used to indicate whether the question is mandatory or not.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> On selecting the check box of the <b>Mandatory</b> field, the question appears with an asterisk (*) sign in the questionnaire template.</p>	
Reference Parameter	<p>Used to indicate the parameter which is used to check the eligibility while recommending the reference customers / products / packages.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> <p>On specifying the parameter, the description of the parameter appears corresponding to the <b>Reference Parameter</b> field.</p>	No
Rule Type	<p>Used to indicate the rule type using which the next question appears in the <b>Questionnaire Template</b> screen.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rule Type Search</b> window appears.</p> <p>On specifying the rule type, the description of the rule type appears corresponding to the <b>Rule Type</b> field.</p> <p>This field is used when the <b>Question Display Order</b> is selected as <b>Rule Based</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is used for displaying the next question based on the answer provided for the previous question in the questionnaire template.</p>
Question Applicability	<p>Used to indicate the question applicability based on which the references are derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Customer and Deal References</li> <li>• Package and Product References</li> <li>• Others</li> </ul>	Yes
Predefined Value	<p>Used to specify the predefined list from where you want the system to search the answer for a question.</p> <p><b>Note:</b> This field is enabled when the <b>Predefined List</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p>Yes (Conditional).</p> <p><b>Note:</b> This field is required for searching the answer from a predefined list.</p>

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description of the predefined list.	Yes (Conditional)
		<b>Note:</b> This field is required for searching the answer from a predefined list.

- Enter the required details in the **Main** section.
- Add, edit, or remove questions from the questionnaire template, if required.

**Note:** Click the **Previous** (↶) or **Next** (↷) icons in the **Questions** section to navigate through the existing questions of the questionnaire template which you want to edit or delete.

- Click **Save**.  
The new questionnaire template is defined.

## Editing a Question

### Prerequisites

To edit a question of a questionnaire template you should have:

- Questions defined in the application.
- Reference tables and reference columns defined in the application.
- Validation algorithms defined in the application.
- Reference parameter defined in the application.
- Rule types defined in the application.

- Values defined for the **DEAL\_QUE\_DISP\_FLG**, **ANS\_DISPLAY\_FLG** and **APPLICABLE\_FOR\_FLG** lookup fields.

### **Procedure**

To edit a question:

- Search for the questionnaire template in the **Questionnaire Template** screen.
- In the **Search Results** section, click the link in the **Questionnaire Template Information** column corresponding to the questionnaire template whose question you want to edit.  
The **Questionnaire Template** screen appears.
- Ensure that the **Questions** zone is expanded in the **Questionnaire Template** screen.
- Click the **Edit** (✎) icon in the **Edit** column corresponding to the question that you want to edit.

The **Question** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Question	Used to specify the question that you want to associate with the questionnaire template.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Question Search</b> window appears where you can search for a question.	
Question Text	Used to specify the question statement.	Yes
Sequence	Used to specify the sequence number of the question.	Yes
Answer Type	Used to indicate the type in which you want to select the answer for the question. The valid values are: <ul style="list-style-type: none"> <li>Date</li> <li>Decimal Value</li> <li>Multi Selection Check Box List</li> <li>Multi Selection from Drop Down List</li> <li>Numeric Value</li> <li>Percentage</li> <li>Radio Button List</li> <li>Single Selection Drop Down List</li> <li>Text</li> </ul>	Yes
Answer Value Set	Indicates the references from where you want to search for the answer of the question. The valid values are: <ul style="list-style-type: none"> <li><b>Reference Data</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a specific reference table given in the system.</li> </ul> </li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for searching answers from a given reference.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</p> <ul style="list-style-type: none"> <li>• <b>Predefined List</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a predefined list defined in the system.</li> </ul> </li> </ul> <p><b>Note:</b> This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</p>	
Reference Table	Used to indicate a specific table that you want to set as a source for searching the answer of the question.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Table Search</b> window appears.</p> <p>On specifying the table, the description of the table appears corresponding to the <b>Reference Table</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p><b>Note:</b> This field is required for searching the answer from a reference table.</p>
Reference Column	Used to indicate the column in the reference table from where you want to search for the answer of the question.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Column Search</b> window appears.</p> <p>On specifying the column, the description of the column appears corresponding to the <b>Reference Column</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p><b>Note:</b> This field is required for searching the answer from a reference table.</p>
Reference Criteria	Used to specify the criteria based on which you want to search for the answer from the given reference.	No

Field Name	Field Description	Mandatory (Yes or No)
Validation Algorithm	Used to indicate the algorithm that you want to use for validating the answer of the question.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for an algorithm.	
Default Answer	Used to specify the answer that you want to set as default for the question.	No
Mandatory	Used to indicate whether the question is mandatory or not.	No
	<b>Note:</b> On selecting the check box of the <b>Mandatory</b> field, the question appears with an asterisk (*) sign in the questionnaire template.	
Reference Parameter	Used to indicate the parameter which is used to check the eligibility while recommending the reference customers / products / packages.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears. On specifying the parameter, the description of the parameter appears corresponding to the <b>Reference Parameter</b> field.	
Rule Type	Used to indicate the rule type using which the next question appears in the <b>Questionnaire Template</b> screen.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rule Type Search</b> window appears. On specifying the rule type, the description of the rule type appears corresponding to the <b>Rule Type</b> field. This field is used when the <b>Question Display Order</b> is selected as <b>Rule Based</b> .	<b>Note:</b> This field is used for displaying the next question based on the answer provided for the previous question in the questionnaire template.

Field Name	Field Description	Mandatory (Yes or No)
Question Applicability	Used to indicate the question applicability based on which the references are derived. The valid values are: <ul style="list-style-type: none"> <li>Customer and Deal References</li> <li>Package and Product References</li> <li>Others</li> </ul>	Yes
Predefined Value	Used to specify the predefined list from where you want the system to search the answer for a question.	Yes (Conditional).
	<b>Note:</b> This field is enabled when the <b>Predefined List</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a predefined list.
Description	Used to specify the description of the predefined list.	Yes (Conditional)
		<b>Note:</b> This field is required for searching the answer from a predefined list.

5. Click **Save**.

The changes made to the question are saved.

## Prospect

---

The **Prospect** screen allows you to search for a prospect using various search criteria. It also allows you to define and edit a prospect. It contains the following zone:

- [Prospect](#) on page 2556

## Prospect

---

The **Prospect** zone allows you to search for a prospect using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search prospects which are associated with a particular division.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Prospect Person Name	Used to search for a particular prospect person.	No
Customer Segment	Used to search prospects which are associated to a particular business component.	No
	<b>Note:</b> This field appears when you click the <b>Advanced Search</b> link in the top right corner of this zone.	
Prospect Person ID	Used to search for a particular prospect.	No
Prospect Person Identifier Type	Used to indicate the identifier type based on which you want to search for a prospect.	Yes (Conditional)
		<b>Note:</b> If you specify the prospect person identifier as a search criteria, you have to select the prospect person identifier type.
Prospect Person Identifier	Used to specify the identifier based on which you want to search for a prospect person.	Yes (Conditional)
		<b>Note:</b> If you indicate the prospect person identifier type as a search criteria, you have to enter the prospect person identifier.

**Note:** You must specify at least one search criterion while searching for a prospect.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Prospect Person Information	Displays the concatenated string of information about the prospect separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Prospect Person</b> screen appears where you can view or edit the details of the respective prospect.
Prospect Person Identifier Type	Indicates the identifier type of the prospect.
Prospect Person Identifier	Displays the value of the prospect person identifier type.
Division	Displays the division to which the prospect belongs.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (∇) icon in the upper right corner of this zone.

## Searching for a Prospect

### Prerequisites

To search for a prospect, you should have:

- Divisions defined in the application
- Prospects associated with the division
- Customer segments defined in the application
- Prospects associated with the respective customer segment
- Prospect customer identifier types defined in the application

### Procedure

To search for a prospect:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Prospect**.  
A sub-menu appears.
3. Click the **Search** option from the **Prospect** sub-menu.  
The **Prospect** screen appears.
4. Enter the search criteria in the **Prospect** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of prospects that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Editing a Prospect Person

### Prerequisites

To edit a prospect person, you should have:

- Prospect (which you want to edit) defined in the application
- Customer segments and customer tiers defined in the application
- Access groups defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Person**)
- Person identifier types defined in the application
- Relationship types defined in the application

### Procedure

To edit a prospect person:

1. Search for the prospect person in the **Prospect** screen.
2. In the **Search Results** section, click the link in the **Prospect Person Information** column corresponding to the prospect whose details you want to edit.

The **Prospect Person** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the prospect person.
- **Prospect Person Address** - Used to define or edit the address of the prospect person.
- **Prospect Person Characteristics** - Used to define, edit, or remove characteristics of the prospect person.
- **Prospect Person Identifiers** - Used to associate or disassociate identifiers from the prospect person.
- **Prospect Person Relationships** - Used to associate or disassociate child persons with the prospect person.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person ID	Indicates the prospect person ID for which you want to edit the prospect person details.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Person ID</b> field is in the read-only mode.	
Prospect Person Name	Used to specify the name for the prospect person.	No
Division	Used to indicate the division to which the prospect person is associated.	No
	<b>Note:</b> This field cannot be edited when an account is defined for the prospect person. You can only view those divisions to which you have access in the <b>Division</b> list.	
Customer Segment	Used to indicate the business component to which you want to associate the prospect person.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field.	
Customer Tier	Used to indicate the customer tier. <b>Note:</b> The list includes only those values which are present in the <b>CUST_TIER_FLG</b> lookup field.	No
Access Group	Used to indicate the users who can view and edit the details of the prospect person.	Yes
Email Address	Used to specify the email address of the prospect person.	No
Date Of Birth	Used to specify the date of birth of the prospect person.	No

3. Modify the required details in the **Main** section.
4. Define or edit address of the prospect person, if required.
5. Define, edit, or remove characteristics of the prospect person, if required.
6. Associate or disassociate identifiers from the prospect person, if required.
7. Associate or disassociate child persons from the prospect person, if required.
8. Click **Save**.

The changes made to the prospect person are saved.

## Editing a Prospect Account

### Prerequisites

To edit a prospect account, you should have:

- Prospect (whose account details you want to edit) defined in the application
- Customer class defined in the application
- Currencies defined in the application
- Bill Cycles defined in the application

- Characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Account identifier types defined in the application

### **Procedure**

To edit a prospect account:

1. Search for the prospect person whose account details you want to edit in the **Prospect** screen.
2. Modify the required details in the **Prospect Person** screen, if required.
3. Click **Save**.  
The changes made to the prospect person are saved.
4. Click **Next**.

The **Prospect Account** screen appears. It contains the following sections:

- **Prospect Account List** - Lists the accounts which are associated with the prospect person.

**Note:** By default, the **Prospect Account List** section does not appear. It appears only when an account is defined for a prospect person.

- **Main** - Used to specify basic details about the prospect account.
- **Prospect Account Characteristics** - Used to define, edit, or remove characteristics of the prospect account.
- **Prospect Account Identifiers** - Used to add, edit, or remove identifiers from the prospect account.

The **Prospect Account List** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Prospect Person ID	Displays the prospect person to which the account is associated.	Not applicable
Prospect Account Information	Displays information about the prospect account.	Yes
	<b>Note:</b> It has a link. On clicking the link, the details of the prospect account is accessible for editing in the <b>Main</b> , <b>Prospect Account Characteristics</b> , and <b>Prospect Account Identifiers</b> sections.	
Division	Indicates the division to which the prospect account is associated.	Not applicable
Set Up Date	Displays the date from when the prospect account is available for calculating the financial summary of the deal.	Not applicable

5. Click the link in the **Prospect Account Information** column corresponding to the account whose details you want to edit.

The details of the account is accessible for editing in the **Main**, **Prospect Account Characteristics**, and **Prospect Account Identifiers** sections.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person ID	Displays the prospect person to which the account is associated.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Person ID</b> field is in the read-only mode.	

Field Name	Field Description	Mandatory (Yes or No)
Prospect Account ID	Displays the account associated with the prospect person.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Account ID</b> field is in the read-only mode.	
Customer Class	Used to indicate the customer class to which the prospect account belongs.	Yes
Division	Indicates the division to which the prospect account is associated.	Not applicable
	<b>Note:</b> By default, the <b>Division</b> field is in the read-only mode.	
Set Up Date	Used to specify the date from when the prospect account is available for calculating the financial summary of the deal.	Yes
Invoice Currency	Used to indicate the currency in which you want the financial summary of the prospect account to be calculated for the deal.	Yes
Bill Cycle	Used to indicate the time interval in which you want to create the financial summary of the account for the deal.	No
Access Group	Indicates the users who can view or edit the details of the account.	Not applicable
	<b>Note:</b> By default, the <b>Access Group</b> field is in the read-only mode.	

6. Modify the required details in the **Main** section.
7. Define, edit, or remove characteristics of the **Prospect Account Characteristics** section, if required.
8. Add, edit, or remove identifier details from the **Prospect Account Identifiers** section, if required.
9. Click **Save**.  
The changes made to the prospect account are saved.

## Defining a Prospect Person

### Prerequisites

To define a prospect person, you should have:

- Divisions defined in the application
- Customer segments and customer tiers defined in the application
- Access groups defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Person**)
- Person identifier types defined in the application
- Relationship types defined in the application

### Procedure

To define a prospect person:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Prospect**.  
A sub-menu appears.
3. Click the **Add** option from the **Prospect** sub-menu.

The **Prospect Person** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the prospect person.
- **Prospect Person Address** - Used to define or edit the address of the prospect person.
- **Prospect Person Characteristics** - Used to define a list of characteristics for the prospect person.
- **Prospect Person Identifiers** - Used to associate identifiers with the prospect person.
- **Prospect Person Relationships** - Used to associate child persons with the prospect person.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person ID	Indicates the person identification value that is generated for the prospect person.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Person ID</b> field is in the read-only mode. The person identification value is created automatically when you click the <b>Save</b> button on the <b>Prospect Person</b> screen.	
Prospect Person Name	Used to specify the name for the prospect person.	Yes
Division	Used to indicate the division to which the prospect person is associated.	Yes
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Customer Segment	Used to indicate the business component to which you want to associate the prospect person.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field.	
Customer Tier	Used to indicate the customer tier.  <b>Note:</b> The list includes only those values which are present in the <b>CUST_TIER_FLG</b> lookup field.	No
Access Group	Used to indicate the users who can view and edit the details of the prospect person.	Yes
Email Address	Used to specify the email address of the prospect person.	No
Date Of Birth	Used to specify the date of birth of the prospect person.	No

4. Enter the required details in the **Main** section.
5. Define the address for the prospect person, if required.
6. Define characteristics for the prospect person, if required.
7. Associate identifiers with the prospect person, if required.
8. Associate child persons with the prospect person, if required.
9. Click **Save**.  
The prospect person is defined.

**Tip:** Alternatively, you can define a prospect by clicking the **Add** button available in the **Prospect** screen or by clicking the **Add New Prospect** button available in the **Deal Information - Deal** page.

**Note:** When you create a prospect person or account, the system, by default sets the status of the prospect person and account to **ACTIVE**. You can view the status of the prospect person and account through the inbound web service.

## Defining a Characteristic for a Prospect Person

### Prerequisites

To define a characteristic for a prospect person, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Person**)

### Procedure

To define a characteristic for a prospect person:

- Ensure that the **Prospect Person Characteristics** section is expanded when you are defining or editing a prospect person.

The **Prospect Person Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the prospect person.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for a prospect person.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Prospect Person</b> .	<b>Note:</b> This field is required while defining a characteristic for a prospect person.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required while defining a characteristic for a prospect person.</p>

- Enter the required details in the **Prospect Person Characteristics** section.
- If you want to define more than one characteristic for the prospect, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the prospect, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.  
The characteristic is defined for the prospect person.

## Defining an Account for a Prospect Person

### Prerequisites

To define an account for a prospect person, you should have:

- Customer classes defined in the application
- Bill cycles defined in the application
- Currencies defined in the application

- Characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Account identifier types defined in the application

### **Procedure**

To define an account for a prospect person:

1. Ensure that the **Prospect Account** screen is open when you are defining or editing a prospect person.

The **Prospect Account** screen contains the following sections:

- **Prospect Account List** - Lists the accounts which are defined for the prospect person.

**Note:** By default, the **Prospect Account List** section does not appear. It appears when you define an account for a prospect person.

- **Main** - Used to specify basic details about the prospect account.
- **Prospect Account Characteristics** - Used to define a list of characteristics for the prospect account.
- **Prospect Account Identifiers** - Used to associate identifiers with the prospect account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person ID	Indicates the prospect person for whom you want to define the account.	Not applicable
Prospect Account ID	Indicates the account identification value that is generated for the prospect person.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Account ID</b> field is in the read-only mode. The account identification value is created automatically when you click the <b>Save</b> button on the <b>Prospect Account</b> screen.	
Customer Class	Used to indicate the customer class to which the account is associated.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining an account for a prospect person.
Division	Indicates the division to which the prospect person is associated for whom you want to define the account.	Not applicable
Set Up Date	Used to specify the date from when the prospect account is available for calculating the financial summary of the deal.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining an account for a prospect person.
Invoice Currency	Used to indicate the currency in which you want the financial summary of the prospect account to be calculated for the deal.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining an account for a prospect person.

Field Name	Field Description	Mandatory (Yes or No)
Bill Cycle	Used to indicate the time interval in which you want to create the financial summary of the account for the deal.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining an account for a prospect person.
Access Group	Indicates the users who can view and edit the details of the prospect account.	Not applicable
	<b>Note:</b> By default, the <b>Access Group</b> field is in the read-only mode.	

2. Enter the required details in the **Main** section.
3. Define characteristics for the prospect account, if required.
4. Associate identifiers with the prospect account, if required.
5. Click **Save**.

The account is defined for the prospect person.

## Defining a Characteristic for a Prospect Account

### Prerequisites

To define a characteristic for a prospect account, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

### Procedure

To define a characteristic for a prospect account:

1. Ensure that the **Prospect Account Characteristics** section is expanded when you are defining or editing a prospect account.

The **Prospect Account Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the prospect account.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for a prospect account.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Account</b> .	<b>Note:</b> This field is required while defining a characteristic for a prospect account.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining a characteristic for a prospect account.

- Enter the required details in the **Prospect Account Characteristics** section.
- If you want to define more than one characteristic for the prospect account, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the prospect account, click the **Delete** (🗑) icon corresponding to the characteristic.

- Click **Save**.  
The characteristic is defined for the prospect account.

## Deal Dashboard

The **Deal Dashboard** screen allows you to define a deal. It also enables you to do the following:

- View the metrics of the deals created by the user through a tiles chart, bar chart, or line chart
- View the details of a tile from the metrics in a pie chart
- View the To Do's assigned to the user
- Compare two deals versions

The **Deal Dashboard** screen contains the following zones:

- [Deal Metrics](#) on page 2574
- [Deal Statistics](#) on page 2574
- [Deal To Do](#) on page 2574

- [Search Deal](#) on page 2575
- [Deal Versions](#) on page 2587
- [Deal Comparison](#) on page 2588

## Deal Metrics

The **Deal Metrics** zone enables you to view the following information through a tiles chart:

- Number of deals created by the user
- Number of deals in the **Pending for Approval** status
- Number of deals yet to be finalized
- Number of deals yet to be accepted by the customer
- Number of deals accepted by the customer
- Number of deals rejected by the customer

In addition, you can view the above information through a bar and line chart by toggling the **Tiles/Chart** switch available in the **Deal Metrics** zone.

The bar chart indicates the number of deals in different statuses for an existing customer, existing account, and prospect. Whereas, the line chart indicates the deal revenue from an existing customer, existing account, and prospect.

**Note:** By default, the above information is shown for the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the information using various criteria (such as, **Period From**, **Period To**, **Division**, **Customer Tier**, and **Customer Segment**) available in the **Deal Metrics** zone.

## Deal Statistics

The **Deal Statistics** zone allows you to view information through a pie chart about a particular tile from the tiles chart available in the **Deal Metrics** zone. On clicking a tile in the tiles chart, the pie chart graphically represents the number of deals in percentage of an existing customer, existing account, and prospect in the respective status.

## Deal To Do

The **Deal To Do** zone lists all the To Do's generated for the approving the deal. It contains the following columns:

Column name	Column Description
To Do	On clicking the <b>To Do</b> icon (📌), the <b>To Do Entry</b> screen appears where you can view the details of the respective To Do assigned to the user.
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,) for which the To Do is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can perform the required action.

**Note:** By default, the system lists the To Do's that are created in the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the list using various criteria (such as, **To Do Type**, **Priority**, **Start Date**, and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On specifying the relationship manager, the description of the relationship manager appears corresponding to the <b>Relationship Manager</b> field.  This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	
Account ID	Used to search deal which is created for a particular account.	No
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	
Person Name	Used to search deals which are created for accounts of persons having a particular name.	No
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	
Account Identifier Type	Used to search deals which are created for accounts using a particular identifier type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier type for searching deals created for accounts.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter account identifier type as a search criteria, you have to select the account identifier.
Characteristic	Used to search for a deal by specifying the deal characteristics. The valid values are: <ul style="list-style-type: none"> <li>• Bill ID</li> <li>• Contracted Deal</li> <li>• Deal Information</li> <li>• Deal To Do Type</li> <li>• Selection Type</li> </ul>	No
	<b>Note:</b> At a time, you can specify maximum five characteristics while searching for a deal. This field appears when the <b>Deal Characteristics</b> option is selected from the <b>Search By</b> list.	
Value	Used to search for a deal by specifying the value of the characteristic selected from the <b>Characteristic</b> list.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when you select a characteristic from the <b>Characteristic</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Value</b> field when you select the <b>Bill ID</b> or the <b>Deal Information</b> option from the <b>Characteristic</b> list. On clicking the <b>Search</b> icon, the <b>Bill Search</b> or the <b>Deal Information</b> window appears where you can search for the respective characteristic value.</p> <p>If you select the <b>Selection Type</b> option from the <b>Characteristic</b> list, the following options appear in the <b>Value</b> list:</p> <ul style="list-style-type: none"> <li>• Mandatory</li> <li>• Optional</li> <li>• Standard</li> </ul> <p>If you select the <b>Contracted Deal</b> or the <b>Deal To Do Type</b> option from the <b>Characteristic</b> list, the following options appear in the <b>Value</b> list:</p> <ul style="list-style-type: none"> <li>• No</li> <li>• Yes</li> </ul>	

- **Search Results** - On clicking the **Search** button, a list of deals appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal.</p> <p>The link appears in the <b>Search Results</b> section only for deals which have a single version. For deals having multiple versions, the link appears in the <b>Deal Versions</b> zone.</p>
Customer Information	Displays the concatenated string of information about the main person for whom the deal is created in the system.

Column Name	Column Description
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Customer 360° Information</b> or the <b>Prospect Person</b> screen appears where you can view the details of the respective person.</p> <p>The <b>Customer 360° Information</b> screen appears when you select the <b>Account</b> or <b>Customer</b> option from the <b>Deal Entity</b> list in the <b>Search Criteria</b> while searching for a deal. Whereas, the <b>Prospect Person</b> screen appears when you select the <b>Prospect</b> option from the <b>Deal Entity</b> list in the <b>Search Criteria</b> while searching for a deal.</p>
Deal Entity	<p>Indicates the entity for which the deal is created in the system. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Prospect</li> </ul>
Start Date	Displays the date from when the deal is effective for the deal entity.
End Date	Displays the date till when the deal is effective for the deal entity.
Status	<p>Indicates the current status of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Applied/Processed</li> <li>• Approved</li> <li>• Closed</li> <li>• Customer Accepted</li> <li>• Discarded</li> <li>• Draft</li> <li>• Error</li> <li>• Finalized</li> <li>• Fully Orchestrated</li> <li>• Hierarchy Creation Deferred</li> <li>• Inactive</li> <li>• Partially Orchestrated</li> <li>• Pending for Approval</li> <li>• Pending for Review</li> <li>• Pending Simulation</li> <li>• Pending for Orchestration</li> <li>• Ready for Approval</li> <li>• Rejected</li> <li>• Simulated</li> <li>• Simulation Deferred</li> </ul>
Created By	Displays the user who has created the deal in the system.
View Approval Workflow	On clicking the <b>View Approval Workflow</b> (🔍) icon, the <b>Deal Approval Workflow</b> screen appears where you can view the details of the approval workflow of the respective deal.

Column Name	Column Description
	<p><b>Note:</b> The <b>Approval Workflow</b> icon appears when a deal or its deal versions are in the <b>Approved</b> status or higher.</p>
Finalize Deal	<p>On clicking the <b>Finalize Deal</b> (  ) icon, a message appears confirming whether you want to finalize the deal.</p> <p><b>Note:</b></p> <p>The <b>Finalize Deal</b> icon appears when a deal or its deal versions are in the <b>Approved</b> status or higher.</p> <p>The <b>Finalize Deal</b> (  ) icon does not appear if the deal is in the <b>Inactive</b> status.</p>
Ageing For Acceptance (In Days)	<p>Indicates the number of days between finalizing the deal by the relationship manager and the deal acceptance day by the relationship manager on receiving confirmation from the customer.</p> <p><b>Note:</b> The number of days appears in the <b>Ageing For Acceptance (In Days)</b> column when a deal or its deal versions are in the <b>Finalized</b> status.</p>
Accept Deal	<p>On clicking the <b>Accept Deal</b> (  ) icon, the <b>Deal Acceptance</b> screen appears where you can accept the deal after receiving confirmation from the customer.</p> <p><b>Note:</b></p> <p>On clicking the <b>Save</b> button on the <b>Deal Acceptance</b> screen, the deal is accepted in the system.</p> <p>The <b>Accept Deal</b> icon appears when a deal or its deal versions are in the <b>Finalized</b> status.</p> <p>The <b>Accept Deal</b> (  ) icon does not appear if the deal is in the <b>Inactive</b> status.</p>
Reject Deal	<p>On clicking the <b>Reject Deal</b> (  ) icon, the <b>Deal Rejection</b> screen appears where you can reject the deal after receiving confirmation from the customer.</p> <p><b>Note:</b></p> <p>On clicking the <b>Save</b> button on the <b>Deal Rejection</b> screen, the deal is rejected in the system.</p> <p>The <b>Reject Deal</b> icon appears when a deal or its deal versions are in the <b>Finalized</b> status.</p> <p>The <b>Reject Deal</b> (  ) icon does not appear if the deal is in the <b>Inactive</b> status.</p>
Apply Back	<p>On clicking the <b>Apply Back</b> (  ) icon, a message appears confirming whether you want to fully orchestrate the deal.</p>

Column Name	Column Description
	<p><b>Note:</b></p> <p>The <b>Apply Back</b> icon appears when a deal or its deal versions are in the <b>Customer Accepted</b> status.</p> <p>The <b>Apply Back</b> (  ) icon does not appear if the deal is in the <b>Inactive</b> status.</p>
Print Deal	On clicking the <b>Print</b> (  ) icon, the <b>Deal Extraction</b> screen appears where you can filter the options as per your requirement and extract the deal information in the PDF or Excel format.
Review Deal	<p>On clicking the <b>Review Deal</b> (  ) icon, the <b>Deal Review</b> screen appears where you can add details about the deal at regular intervals for monitoring the deal.</p> <p><b>Note:</b> You can review a deal when it is in the <b>Pending for Review</b> status.</p>
Profitability Details	<p>On clicking the <b>Profitability Details</b> (  ) icon, the <b>Deal Profitability</b> screen appears where you can view the deal level, division level, and price item level profitability details about the deal.</p> <p><b>Note:</b></p> <p>You can view the profitability details of a deal when it is in the <b>Simulated</b> status.</p> <p>Also, the <b>Profitability Details</b> (  ) icon appears in the <b>Profitability Details</b> column corresponding to a deal in the <b>Search Results</b> section when a single version of the deal is created in the system. For multiple deal versions, the <b>Profitability Details</b> (  ) icon appears in the <b>Profitability Details</b> column corresponding to a deal version in the <b>Deal Versions</b> zone.</p>

**Note:**

By default, the **Search Results** section lists all the deals which are created by the user for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

On clicking the **Broadcast** (  ) icon corresponding to a deal, the **Deal Versions** zone appears where you can view a list of deal versions created for the respective deal.

Also, you can select two deal versions for comparison by clicking the check box corresponding to the deals in the **Search Results** section or the **Deal Versions** zone.

On clicking the **Add to Compare** link after selecting two deal versions, the **Deal Comparison** zone appears where you can compare the deal versions.

**Note:** At a time, you can select only two deal versions for comparison.

**Deal Versions**

The **Deal Versions** zone allows you to view a list of deal versions created for a particular deal. It contains the following columns:

Column Name	Column Description
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal version.
Status	Indicates the current status of the deal version.
Creation Date	Displays the date when the deal version is created in the system.
Created By	Displays the user who has created the deal version in the system.
Proposed Revenue	Displays the revenue generated from the deal version.
Print Deal	On clicking the <b>Print</b> (🖨) icon, the <b>Deal Extraction</b> screen appears where you can select the options as per your requirement and extract the deal version information in the PDF or Excel format for printing.
Profitability Details	On clicking the <b>Profitability Details</b> icon, the <b>Deal Profitability</b> screen appears where you can view the deal level, division level, and price item level profitability details about the deal version.

Column Name	Column Description
	<b>Note:</b> You can view the profitability details of a deal version when it is in the <b>Simulated</b> status.

By default, the **Deal Versions** zone does not appear in the **Deal Dashboard** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a deal in the **Search Results** section of the **Search Deals** zone.

Also, you can select two deal versions for comparison by clicking the check box corresponding to the deal versions in the **Deal Versions** zone.

## Deal Comparison

The **Deal Comparison** zone lists the deal versions which you have selected for comparison. It contains the following columns:

Column Name	Column Description
Deal Information	Displays the concatenated string of information about the deal for which the deal version is created in the system separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal version.
Customer Information	Displays the concatenated string of information about the main person for whom the deal is created in the system.
	<b>Note:</b> It has a link. On clicking the link, the <b>Customer 360° Information</b> or the <b>Prospect Person</b> screen appears where you can view the details of the respective person. The <b>Customer 360° Information</b> screen appears when you select the deal version of a deal having the entity type as <b>Account</b> or <b>Customer</b> . Whereas, the <b>Prospect Person</b> screen appears when you select the deal version of a deal having the entity type as <b>Account</b> .
Deal version	Displays the concatenated string of information about the deal version.
Deal Status	Indicates the current status of the deal for which the deal version is created.
Deal Revenue	Displays the revenue generated from the deal version.
Deal Creator ID	Displays the user who has created the deal in the system.

By default, the **Deal Comparison** zone does not appear in the **Deal Dashboard** screen. It appears when you select a deal or a deal version from the **Search Results** section or the **Deal Versions** zone respectively and click the **Add to Compare** link.

You can delete a deal version from the comparison list by clicking the **Delete** (🗑) icon corresponding to the respective deal version.

On clicking the **Compare** link, the **Deal Compare** screen appears with the comparison results.

**Note:**

At a time, you can select only two deal versions for comparison.

You cannot compare a deal version which is in the **Draft**, **Pending Simulation** or **Discarded** status.

You cannot compare a deal version of a deal which is in the **Draft**, **Pending Simulation** or **Discarded** status.

You cannot compare two deal versions having different currency codes.

## **Searching for a Deal**

### **Prerequisites**

To search for a deal, you should have:

- Divisions defined in the application
- Deals or deal versions defined in the application
- Deals or deal versions associated with the division to which the user belongs
- Deal types defined in the application
- Deal entities defined in the application
- Customer segments and customer tiers defined in the application
- Person identifier types and person identifiers defined in the application
- Account identifier types and account identifiers defined in the application

### **Procedure**

To search for a deal:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
3. Enter the search criteria in the **Search Deal** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

A list of deals that meet the search criteria appears in the **Search Results** section.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Search Results** section lists all the deals which are created by the user for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.

You must specify at least one search criterion while searching for a deal. One more search criterion is required when you are searching for a deal using the deal entity or customer tier.

You must specify one more search criterion when you are searching for a deal using the division with the **Deal Details** option selected from the **Search By** list.

## Finalizing a Deal

**Procedure**

To finalize a deal:

1. Do either of the following:

If you want to...	Then...
<b>Finalize a deal from the Deal Dashboard screen</b>	<ol style="list-style-type: none"><li>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li><li>b. In the <b>Search Results</b> section, click the <b>Finalize</b> (✅) icon in the <b>Finalize Deal</b> column corresponding to the deal which you want to finalize.</li></ol>
<b>Finalize a deal from the Deal Information screen</b>	<ol style="list-style-type: none"><li>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li><li>b. In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to finalize.  The <b>Deal Information</b> screen appears.</li><li>c. In the <b>Simulation Details</b> zone, click the <b>Finalize Deal</b> button.</li></ol>

A message appears confirming whether you want to finalize the deal.

2. Click **OK**.  
The deal is finalized.

**Note:**

You can finalize a deal when it is in the **Approved** status.

After finalizing a deal, the status of the deal changes to **Finalized**.

## Extracting a Deal in the PDF or Excel Format

**Procedure**

To extract a deal in the pdf or excel format:

1. Do either of the following:

If you want to...	Then...
<b>Extract a deal in the PDF or Excel format from the Deal Dashboard screen</b>	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the <b>Print</b> (🖨) icon in the <b>Print Deal</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p>

If you want to...	Then...
	<b>Note:</b> If the deal has multiple versions, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal version in the <b>Deal Versions</b> zone.
<b>Extract a deal in the PDF or Excel format from the Deal Information screen</b>	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p> <div> <b>Note:</b> If you want to extract the deal version in the pdf of excel format, click the link in the <b>Deal Version Information</b> column corresponding to the deal version from the <b>Deal Versions</b> zone. </div> <p>The <b>Deal Information</b> screen appears.</p> <p>c. In the <b>Simulation Details</b> zone, click the <b>Print Deal</b> button.</p>
<b>Extract a deal in the PDF or Excel format from the Deal Approver Dashboard screen</b>	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Approver Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p>

The **Deal Extraction** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Extract Format	Used to specify the format in which you want to extract the deal information. The valid values are: <ul style="list-style-type: none"> <li>Excel</li> <li>PDF</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while extracting a deal in the pdf or excel format.
Extract Type	Used to indicate the type of deal information that you want to extract for publishing. The valid values are: <ul style="list-style-type: none"> <li><b>External</b> - Used to extract deal information which is published to the customer for approval. It contains the following details: <ol style="list-style-type: none"> <li>Extraction information i.e. the extraction date-time and the user who has done the extraction.</li> <li>Details of the filters selected for extraction.</li> <li>Deal details such as the deal creator user ID, deal creation date and time, deal ID, deal type, prospect/customer, currency, deal status etc.</li> <li>Customer hierarchy, accounts and price item details as per the filter option selected in the <b>Deal Extraction</b> screen.</li> </ol> </li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while extracting a deal in the pdf or excel format.

Field Name	Field Description	Mandatory (Yes or No)
	<p>e. Price item details such as the original price with assignment level, commitments, negotiated price with assignment level, approval status, etc.</p> <p>f. Terms and conditions.</p> <p><b>Note:</b></p> <p>The <b>External</b> extract type controls the extraction of certain data which may or may not be published to the customer.</p> <p>You can select the <b>External</b> option from the <b>Extract Type</b> list when the deal is in the <b>Finalized, Customer Accepted, Rejected, Fully Orchestrated, Pending for Review, or Closed</b> status.</p>	
	<ul style="list-style-type: none"> <li>• <b>Internal</b> - Used to extract deal information which is published for internal reviews and validations. It contains the following details: <ul style="list-style-type: none"> <li>a. Deal summary details and Division summary details with the applicable cost, profitability, revenue and other calculations.</li> <li>b. Price item details such as the cost and revenue details etc.</li> <li>c. Extract Filter	<p>Used to indicate the price item information that you want to extract in the pdf or excel format. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Additional Filter Criteria</li> <li>• All</li> <li>• Customer</li> <li>• Division</li> <li>• Only Hierarchy</li> <li>• Price Assignment Level</li> <li>• Price Item</li> <li>• Price Item Group</li> </ul>	Yes (Conditional)
		<p><b>Note:</b> This field is required while extracting a deal in the pdf or excel format.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those values which are present in the <b>DEAL_EXTRACT_FILTER_FLG</b> lookup field.	

In addition, the **Deal Extraction** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the persons or prospects account for which you want to extract the price item pricing details.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Prospect Account Search</b> window appears where you can search for the respective account.  This field appears when you select the <b>Account</b> option from the <b>Extract Filter</b> list.	<b>Note:</b> This field is required while extracting the proposed price item pricing details of an account.
Price Item	Used to specify the price item for which you want to extract the pricing details.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears where you can search for the respective price item.  This field appears when you select the <b>Account</b> , <b>Customer</b> , and <b>Price Item</b> options from the <b>Extract Filter</b> list.	
Price Item Group Code	Used to specify the root level hierarchy entity for which you want to extract the price item pricing details.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Hierarchy Entity Search</b> window appears where you can search for the respective root level hierarchy entity.  This field appears when you select the <b>Account</b> , <b>Customer</b> , and <b>Price Item Group</b> options from the <b>Extract Filter</b> list.	
Proposed Price Assignment Level	Used to extract the proposed price item pricing details for a particular assignment level.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The list includes only those values which are present in the <b>PA_LVL_FLG</b> lookup field.</p> <p>This field appears when you select the <b>Account, Customer, Price Assignment Level, Price Item,</b> and <b>Price Item Group</b> options from the <b>Extract Filter</b> list.</p> <p>This field is disabled when you select the <b>Show Price Assignment for Child Entities</b> field check box.</p>	
Show Price Assignment for Child Entities	<p>Used to indicate whether you want to extract the proposed price item price assignment details of the non-root level hierarchy entity.</p> <p><b>Note:</b> This field appears when you select the <b>Account, Customer, Price Assignment Level, Price Item,</b> and <b>Price Item Group</b> options from the <b>Extract Filter</b> list.</p>	No
Current Approval User ID	<p>Used to extract the details of the proposed price item pricing which is approved by a particular user.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the respective root user.</p> <p>This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.</p> <p>This field is disabled when you specify the <b>Price Item Manager To Do Role</b> or <b>Price Approval Status</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while extracting the proposed price item pricing details approved by a particular user.</p>
Price Item Manager To Do Role	<p>Used to extract the details of the proposed price item pricing which is assigned using a particular price item manager To Do role.</p> <p><b>Note:</b></p> <p>This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.</p> <p>This field is disabled when you specify the <b>Current Approval User ID</b> or <b>Price Approval Status</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while extracting the proposed price item pricing details assigned to a particular price item manager To Do role.</p>
Price Approval Status	Used to extract the details of the proposed price item pricing which are in a particular status. The valid values are:	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Approved</li> <li>Approved-Existing</li> <li>Approved-Recommended</li> <li>Error</li> <li>Initial</li> <li>Unapproved</li> </ul>	<b>Note:</b> This field is required while extracting the details of the proposed price item pricing in a particular status.
	<b>Note:</b> This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list. This field is disabled when you specify the <b>Current Approval User ID</b> or <b>Price Item Manager To Do Role</b> .	
Person ID	Used to extract the details of the proposed price items pricing of a particular person.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Prospect Person Search</b> window appears where you can search for the respective person. This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.	<b>Note:</b> This field is required while extracting the details of the proposed price item pricing of a particular person.
Division	Used to extract the details of the proposed price items pricing from a particular division.	Yes (Conditional)
	<b>Note:</b> This field appears when you select the <b>Customer</b> option from the <b>Extract Filter</b> list.	<b>Note:</b> This field is required while extracting the details of the proposed price item pricing from a particular division.

2. Enter the required details in the **Deal Extraction** screen.

3. Click **Extract**.

The deal is extracted in the pdf or excel format.

**Note:** You cannot extract a deal which is in the **Discarded** status.

## Comparing Two Deal Versions

### Procedure

To compare two deal versions:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the deal whose deal version you want to compare.  
The **Deal Versions** zone appears.
3. Select the check box corresponding to the deal version that you want to compare.

**Note:** Select the check box corresponding to the deal in the **Search Results** section of the **Search Deal** zone if only one deal version is created for the deal.

4. Click the **Add to Compare** link available in the **Deal Versions** zone.  
The **Deal Comparison** zone appears enlisting the selected deal version.

**Note:** Click the **Add to Compare** link available in the **Search Deal** zone if you are selecting a deal from the **Search Results** section of the **Search Deal** zone for comparison.

5. Repeat steps 1 to 4 for selecting the other deal version which you want to use for comparison.
6. Click the **Compare** link available in the **Deal Comparison** zone.  
The **Deal Compare** screen appears.
7. View the comparison report of the selected deals or deal versions in the **Deal Compare** screen.

**Note:** You can compare two deals or deal versions when they are in the **Simulated** status and are defined using the same currency.

## Defining a Deal

### Prerequisites

To define a deal, you should have:

- Entities (i.e. customers, accounts, and prospects) defined in the application
- Deal identifiers defined in the application
- Deal types defined in the application
- Currencies defined in the application
- Values defined for **Review Frequency**, **Deal Frequency**, and **Usage Period** in the **REVIEW\_FREQUENCY\_FLG**, **FREQUENCY\_FLG**, and **USAGE\_PRIOD\_FLG** lookup fields respectively
- Terms and conditions defined in the application
- Products defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Deal**)
- Approval workflow reasons configured in the system.

### Procedure

To define a deal:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
3. In the **Deal Dashboard** screen, click the **Create Deal** button.

The **Deal Information - Deal** page appears. It contains the following zones:

- [Search Entity](#) on page 2630
- [Deal](#) on page 2636

**Note:** By default, the **Deal** zone does not appear in the **Deal Information - Deal** page. It appears when you click the **Broadcast** (📡) icon corresponding to an entity (i.e. customer, account, or prospect) in the **Search Results** section of the **Search Entity** zone.

4. Search for the entity (i.e. customer, account, or prospect person) in the **Search Entity** zone for which you want to define a deal.
5. Click the **Broadcast** (📡) icon corresponding to the entity (i.e. customer, account, or prospect) in the **Search Results** section for which you want to define a deal.

The **Deal** zone appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal.
- **Product** - Used to associate reference products which you want the accounts of the deal entity to be enrolled.
- **Characteristics** - Used to define the characteristics for the deal.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Entity Information	Displays information about the entity (i.e. the customer, account, or prospect person) for which you want to define a deal.	Not applicable
Deal ID	Displays the deal ID.	Not applicable
	<b>Note:</b> The deal ID is generated automatically when you click the <b>Save</b> button in the <b>Deal</b> zone.	
Contracted Deal	Used to indicate that the change in the price item pricing from the price list does not affect the price item pricing offered in the deal created for an existing customer, account, or prospect.	No
Copy Template	Used to indicate the deal template which you want to use for creating the deal.	No
	<b>Note:</b> The <b>Search</b> (Q) icon appears corresponding to the <b>Copy Template</b> field. On clicking the <b>Search</b> icon, the <b>Copy From</b> window appears where you can select the respective details from the template.	
Deal Entity	Indicates the entity (i.e. the customer, account, or prospect person) for which you want to create a deal. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Customer</li> <li>Prospect</li> </ul>	Not applicable
	<b>Note:</b> This field cannot be edited.  The list includes only those values which are present in the <b>DEAL_ENTITY_TYPE_FLG</b> lookup field.	
Status	Indicates the current status of the deal.	Not applicable
	<b>Note:</b> This field cannot be edited.  The value of this field is automatically populated when you click the <b>Save</b> button in the <b>Deal</b> zone.  The list includes only those values which are present in the <b>DEAL_STATUS</b> lookup field.	
Customer Segment	Indicates the business component to which the entity (i.e. the customer, account, or prospect person) belongs.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field cannot be edited.</p> <p>The value of this field is set to the value that is specified in the <b>Person</b> screen.</p> <p>The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field.</p>	
Customer Tier	<p>Indicates the customer tier to which the entity (i.e. the customer, account, or prospect person) belongs.</p> <p><b>Note:</b></p> <p>This field cannot be edited.</p> <p>The value of this field is set to the value that is specified in the <b>Person</b> screen.</p> <p>The list includes only those values which are present in the <b>CUST_TIER_FLG</b> lookup field.</p>	Not applicable
Access Group	<p>Indicates the user group that can view and edit the details of the entity (i.e. the customer, account, or prospect person).</p> <p><b>Note:</b> The value of this field is set to the value that is specified in the <b>Person</b> screen.</p>	Not applicable
Division	<p>Indicates the division to which the entity (i.e. the customer, account, or prospect person) is associated.</p> <p><b>Note:</b></p> <p>This field cannot be edited.</p> <p>The value of this field is set to the value that is specified in the <b>Person</b> screen.</p>	Not applicable
Deal Identifier	<p>Used to specify the primary identifier using which you want to create a deal in the system.</p> <p><b>Note:</b></p> <p>You should ensure that every deal has a unique deal identifier.</p> <p>An error message appears when you save a deal with a deal identifier which is already used while creating a deal.</p>	Yes
Deal Type	Used to indicate the deal type using which you want to create a deal in the system.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Type</b> field. On clicking the <b>Search</b> icon, the <b>Deal Type Search</b> window appears.</p> <p>On specifying the deal type, the description of the deal type appears corresponding to the <b>Deal Type</b> field.</p> <p>The <b>Deal Type Search</b> window lists only those deal types having the <b>Division</b>, <b>Customer Segment</b>, and <b>Customer Tier</b> combination which best fits with the <b>Division</b>, <b>Customer Segment</b>, and <b>Customer Tier</b> combination as specified in the <b>Person</b> screen of the entity (i.e. the customer, account, or prospect person).</p>	
Deal Currency	<p>Used to specify the currency in which you want to calculate the deal or division specific financial summary and profitability of the deal.</p> <p><b>Note:</b> The list includes only those currencies which are already defined in the system.</p>	Yes
Simulation Type	<p>Used to indicate the simulation type using which you want to analyze the cost, revenue, and profitability of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>Account</li> <li>Customer</li> <li>Deal</li> </ul>	Yes
Include Hierarchy	<p>Used to indicate whether you want to include the child persons, grandchild persons, and their accounts as well as the prospect persons and prospect accounts in the customer hierarchy while creating a deal.</p> <p><b>Note:</b></p> <p>This option appears only when the <b>Deal Entity</b> is set to <b>Customer</b> and the <b>Simulation Type</b> is set to <b>Customer</b>.</p> <p>By default, the <b>Include Hierarchy</b> check box is selected when you are defining a deal.</p>	No
Start Date	<p>Used to specify the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).</p> <p><b>Note:</b> This date is also used as the <b>Effective Start Date</b> for the proposed price list assignment and <b>Start Date</b> for proposed product enrollment.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Selection Date	Used to specify the date from when the price lists, pricing assignments, and product enrollments are effective for simulation.	Yes
End Date	Used to specify the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).	No
Review Frequency	Used to indicate the timely monitoring of the deal usage as per the commitments made by the customer.	No
	<b>Note:</b> The list includes only those values which are present in the <b>REVIEW_FREQUENCY_FLG</b> lookup field.	
Deal Frequency	Used to indicate the duration in which you want to simulate the deal for calculating the financial summary and profitability of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.	
Usage Period	Used to indicate the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>USAGE_PERIOD_FLG</b> lookup field.	
Deal Description	Used to specify the description for the deal.	No
Deal Version Description	Used to specify the description for the deal version.	No
Skip Reference	Used to indicate whether you want to use a deal which is already created in the system as a reference for copying the pricing and commitments in the deal or not.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> If you select the check box corresponding to the <b>Skip Reference</b> field, the system will direct you to the <b>Pricing/Commitments</b> page to define the price lists, price assignments, and product enrollments for the deal.	
Skip Questionnaire	Used to indicate whether you want to derive references for the deal using the questions of the questionnaire template associated with the deal type which is used for creating the deal.  <b>Note:</b> The system considers the questionnaire template specified in the deal type only when it is effective on the deal start date.	No

In addition, the **Deal** zone contains the following buttons:

Button Name	Button Description
Save as Template	Used to save the deal as a template for defining other deals in the system.  By default, the <b>Save as Template</b> button does not appear in the <b>Deal</b> zone. It appears only when the <b>Change</b> access mode is provided for the <b>C1-DEALTEMPLATE</b> application service to a user group. Users who belong to such user group can only view the <b>Save as Template</b> button in the <b>Deal</b> zone while creating a deal. If the user belongs to the user group which does not have the <b>Change</b> access mode provided for the <b>C1-DEALTEMPLATE</b> application service, the <b>Save as Template</b> button is disabled while creating a deal.  <b>Note:</b> On clicking the <b>Save as Template</b> button, the system, by default, sets the <b>Template Deal</b> field to <b>Y</b> while saving the deal information.
Save	Used to save the deal in the system.  <b>Note:</b> On clicking the <b>Save</b> button, the system sets the <b>Template Deal</b> field to <b>N</b> while saving the deal information.
Next	Used to navigate to the next page.

6. Enter the required details in the **Main** section.
7. Associate terms and conditions with the deal, if required.
8. Recommend products to which the accounts in the customer hierarchy can be enrolled, if required.
9. Define characteristics for the deal, if required.
10. Click the **Save** button.  
The deal is defined.

## Creating a Deal using a Deal Template

### Prerequisites

To create a deal using a deal template, you should have:

- Deal templates defined in the application
- Deal identifiers defined in the application
- Deal types defined in the application
- Currencies defined in the application
- Values defined for **Review Frequency**, **Deal Frequency**, and **Usage Period** in the **REVIEW\_FREQUENCY\_FLG**, **FREQUENCY\_FLG**, and **USAGE\_PRIOD\_FLG** lookup fields respectively
- Terms and conditions defined in the application
- Products defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Deal**)

### Procedure

To create a deal from a deal template:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
3. In the **Deal Dashboard** screen, click the **Create Deal** button.

The **Deal Information - Deal** page appears. It contains the following zones:

- [Search Entity](#) on page 2630
- [Deal](#) on page 2636

**Note:** By default, the **Deal** zone does not appear in the **Deal Information - Deal** page. It appears when you click the **Broadcast** (📡) icon corresponding to an entity (i.e. customer, account, or prospect) in the **Search Results** section of the **Search Entity** zone.

4. Search for the entity (i.e. customer, account, or prospect person) in the **Search Entity** zone for which you want to define a deal.
5. Click the **Broadcast** (📡) icon corresponding to the entity (i.e. customer, account, or prospect) in the **Search Results** section for which you want to define a deal.

The **Deal** zone appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal.
- **Terms and Conditions** - Used to associate terms and conditions with the deal.
- **Product** - Used to associate reference products which you want the accounts of the deal entity to be enrolled.
- **Characteristics** - Used to define the characteristics for the deal.

**Note:** For more information about the fields available in the **Main** section, refer the [Defining a Deal](#) on page 2605 topic.

6. Click the **Search** (🔍) icon corresponding to the **Copy Template** field.

The **Copy From** window appears which contains a list of deal templates that you can use for creating the deal. The **Copy From** window contains the following columns:

Column Name	Column Description
Basic Details	Used to indicate that you want to copy only the basic details of the deal template for creating the deal.
Pricing	Used to indicate that you want to copy only the price item pricing details of the deal template for creating the deal.
Usage	Used to indicate that you want to copy only the SQI details of the price items from the deal template for creating the deal.
Deal Information	Displays the concatenated string of information about the deal template separated by a comma (,).

7. Select the required option and/or options from the **Copy From** window.
8. Click **OK**.  
The deal template data corresponding to the selected option and/or options from the **Copy From** window is copied to the new deal.
9. Modify the details in the **Main** section, if required.
10. Associate terms and conditions with the deal, if required.
11. Recommend products to which the accounts in the customer hierarchy can be enrolled, if required.
12. Define characteristics for the deal, if required.
13. Click the **Save** button.  
The deal is created using the deal template.

	<b>Note:</b> This field appears when you select the <b>Product</b> option from the <b>Filter Type</b> list.	
Price Item	Used to specify the price item whose revenue or the average price you want to compare.	No

## Comparing Cost, Revenue, and Profitability of Two Deal Versions

### Procedure

To compare cost, revenue, and profitability of two deal versions:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the deal whose deal version you want to compare.  
The **Deal Versions** zone appears.
3. Select the check box corresponding to the deal version that you want to compare.

**Note:** Select the check box corresponding to the deal in the **Search Results** section of the **Search Deal** zone if only one deal version is created for the deal.

4. Click the **Add to Compare** link available in the **Deal Versions** zone.  
The **Deal Comparison** zone appears enlisting the selected deal version.

**Note:** Click the **Add to Compare** link available in the **Search Deal** zone if you are selecting a deal from the **Search Results** section of the **Search Deal** zone for comparison.

5. Repeat steps 1 to 4 for selecting the other deal version which you want to use for comparison.
6. Click the **Compare** link available in the **Deal Comparison** zone.  
The **Deal Compare** screen appears.
7. View the cost, revenue, and profitability comparison of two deals or deal versions in the **Summary Report** section.

**Note:** You can compare two deals or deal versions when they are in the **Simulated** status and are defined using the same currency.
