## **License Restrictions Warranty/Consequential Damages Disclaimer**

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure, and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or de-compilation of this software, unless required by law for interoperability, is prohibited.

## **Warranty Disclaimer**

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

## **Restricted Rights Notice**

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

### **U.S. GOVERNMENT RIGHTS**

Oracle programs, including any operating system, integrated software, any programs installed on the hardware, documentation, and/or technical data delivered to U.S. Government end users are “commercial computer software” or “commercial technical data” pursuant to the applicable Federal

## **U.S. GOVERNMENT RIGHTS**

Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, documentation, and/or technical data shall be subject to license terms and restrictions as mentioned in Oracle License Agreement, and to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). No other rights are granted to the U.S. Government.

## **Hazardous Applications Notice**

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

## **Third Party Content, Products, and Services Disclaimer**

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third party content, products, or services.

## **Chapter 10: Pricing Management (Health Insurance Business)..... 855**

Prerequisites (Health Insurance Business).....	857
Pricing Methodologies and Pricing Variation Based on Parameters (Health Insurance Business)..	857
Parameter.....	863
Parameter (Used for Searching).....	863
Search Parameter.....	864
Searching for a Parameter.....	866
Defining a Parameter.....	867
Editing a Parameter.....	874
Deleting a Parameter.....	881
Copying a Parameter.....	882
Viewing the Parameter Details.....	889
Parameter (Used for Viewing).....	889
Parameter.....	890
Price Item (Health Insurance Business).....	893
Price Item (Used for Searching).....	894
Search Price Item.....	894
Searching for a Price Item or Price Item Bundle.....	897
Defining a Price Item or Price Item Bundle.....	898
Associating a Parameter with a Price Item or Price Item Bundle.....	905
Defining the Valid Predefined Parameter Values for a Price Item or Price Item Bundle.....	909
Associating a Price Item or Price Item Bundle with a Division.....	911
Associating an SQI with a Price Item or Price Item Bundle for a Division.....	914
Defining a Division-Specific Characteristic for a Price Item or Price Item Bundle.....	916
Defining the Accrual Type Criteria of a Price Item or Price Item Bundle for a Division.....	918
Associating a Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of a Division.....	920
Defining the Cost of a Price Item or Price Item Bundle for a Division.....	922
Defining the Average Price Floor and Ceil Values of a Price Item or Price Item Bundle for a Division.....	925
Defining a Characteristic for a Price Item or Price Item Bundle.....	928
Copying a Price Item or Price Item Bundle.....	930
Viewing the Price Item or Price Item Bundle Details.....	938
Price Item (Used for Viewing).....	939
Price Item.....	940
Parameters.....	942
Predefined Parameter Values for Price Item.....	943
Divisions.....	943
Division-Specific SQIs for Price Item.....	944
Division-Specific Characteristics for Price Item.....	944
Division-Specific Accrual Type Criteria for Price Item.....	945
Division-Specific Hierarchy for Price Item.....	945
Division-Specific Cost for Price Item.....	946
Division-Specific Average Price Floor and Ceil Values for Price Item.....	947
Price Item Relationship.....	948

Editing a Price Item or Price Item Bundle.....	950
Price List.....	958
Price List (Used for Searching).....	959
Search Price List.....	959
Price List Price Items.....	963
Searching for a Price List.....	964
Viewing Price Items Assigned to a Price List.....	965
Defining a Price List.....	965
Defining the Price List Hierarchy.....	968
Defining a Characteristic for a Price List.....	970
Associating a Price List with a Division.....	971
Defining Eligibility Criteria for a Price List.....	972
Copying a Price List.....	973
Viewing the Price List Details.....	975
Price List (Used for Viewing).....	976
Price List.....	976
Eligibility Criteria.....	978
Editing a Price List.....	980
Price List Price Item Pricing.....	982
Price List Price Items.....	982
Search Price Item or Price Item Pricing.....	985
Viewing Price Items Assigned to a Price List.....	992
Removing a Price Item from a Price List.....	992
Viewing a Price Item Pricing.....	993
Editing a Price Item Pricing of a Price List.....	995
Assigning a Price Item to a Price List.....	1001
Defining a Characteristic for a Price Item Pricing.....	1007
Defining a Parameter for a Price Item Pricing.....	1008
Defining TFM Information in a Price Item Pricing.....	1010
Price List Assignment.....	1011
Price List Assignments.....	1012
Price List Price Items.....	1014
Search Price List for Assignment.....	1016
Viewing Price Lists Assigned to an Account.....	1019
Viewing Price Lists Assigned to a Person.....	1020
Viewing Price Items Assigned to a Price List.....	1021
Assigning a Price List to an Account.....	1022
Assigning a Price List to a Person.....	1025
Defining a Characteristic for a Price List Assignment.....	1029
Editing the Price List Assignment Details of an Account.....	1031
Editing the Price List Assignment Details of a Person.....	1035
Price List Assignments.....	1039
Accounts where Price List is Assigned.....	1039
Persons to whom Price List is Assigned.....	1039
Viewing Accounts and Persons where Price List is Assigned.....	1040
Entities Eligible for Price List Assignment.....	1041
Eligible Accounts.....	1041
Eligible Persons.....	1043
Assigning a Price List to One or More Eligible Accounts.....	1044
Assigning a Price List to One or More Eligible Persons.....	1046
Defining a Characteristic for a Price List Assignment.....	1048
Rate Definition.....	1049
Rate Schedule Components.....	1050
Create/Edit Rate Definition.....	1051
Defining Tiering Setup of a Rate Component.....	1053
Editing Tiering Setup of a Rate Component.....	1054

Deleting Tiering Setup of a Rate Component.....	1054
Tiering Criterion.....	1055
Tiering Criterion List.....	1055
Edit Tiering Criterion.....	1056
Create Tiering Criterion.....	1056
Creating a Tiering Criterion.....	1057
Editing a Tiering Criterion.....	1058

## **Chapter 11: Division..... 1059**

Division.....	1060
Division - Main.....	1063
Division - Access Groups.....	1064
Division - Price Items.....	1064
Division - Price Lists.....	1065
Division - Languages.....	1065
Division - Invoice Currencies.....	1066
Division - Person Identifier Types.....	1066
Division - Algorithms.....	1067
Division - Characteristics.....	1067
Division - Bill Messages.....	1067
Division - Party Char Types.....	1068
Division - Bill Cycles.....	1068
Division - Account Identifier Types.....	1069
Division - Price Item Characteristics.....	1069
Searching for a Division.....	1070
Defining a Division.....	1071
Associating an Access Group with a Division.....	1075
Associating a Price Item or Price Item Bundle with a Division.....	1076
Associating a Price List with a Division.....	1078
Associating a Language with a Division.....	1079
Associating an Invoice Currency with a Division.....	1080
Associating a Person Identifier Type with a Division.....	1081
Associating an Algorithm with a Division.....	1082
Defining a Characteristic for a Division.....	1092
Associating a Bill Message with a Division.....	1093
Associating a Party Characteristic Type with a Division.....	1095
Associating a Bill Cycle with a Division.....	1096
Associating an Account Identifier Type with a Division.....	1097
Defining a Division-Specific Characteristic for a Price Item.....	1098
Associating a To Do Type and To Do Role with a Division.....	1100

## **Chapter 12: Approval Workflow..... 1103**

Most Commonly Used Terms.....	1105
Approval Workflow Process.....	1105
Prerequisites.....	1108
Approval Transaction.....	1109
Search Approval Transaction.....	1109
Approval Transaction Log.....	1114
Searching for an Approval Transaction.....	1115
Viewing the Log of an Approval Transaction.....	1116
Comparison: New versus Existing.....	1116
Approving an Approval Transaction.....	1117
Rejecting an Approval Transaction.....	1117
Canceling an Approval Transaction.....	1118

Modifying an Approval Transaction.....	1119
Withdrawing an Approval Transaction.....	1120
Resolving an Approval Transaction.....	1121
Approve Price Assignment.....	1121
Search.....	1121
List of Price Assignments.....	1125
Approve Price Assignment - Comparison: New versus Existing.....	1126
Approval Transaction Log.....	1128
Approving a Price Assignment for an Account.....	1129
Approving a Price Assignment for a Person.....	1130
Approving a Price Assignment for a Price List.....	1131
Rejecting a Price Assignment for an Account.....	1132
Rejecting a Price Assignment for a Person.....	1133
Rejecting a Price Assignment for a Price List.....	1135
Canceling a Price Assignment for an Account.....	1136
Canceling a Price Assignment for a Person.....	1138
Canceling a Price Assignment for a Price List.....	1139
Modify Price Assignment.....	1140
Search.....	1141
List of Price Assignments.....	1144
Modifying a Price Assignment for an Account.....	1146
Modifying a Price Assignment for a Person.....	1147
Modifying a Price Assignment for a Price List.....	1147
Withdrawing a Price Assignment for an Account.....	1148
Withdrawing a Price Assignment for a Person.....	1149
Withdrawing a Price Assignment for a Price List.....	1150
Viewing the Log of an Approval Transaction.....	1151
Resolve Price Assignment.....	1152
Search.....	1152
List of Price Assignments.....	1156
Resolving a Price Assignment for an Account.....	1157
Resolving a Price Assignment for a Person.....	1158
Resolving a Price Assignment for a Price List.....	1159
Withdrawing a Price Assignment for an Account.....	1160
Withdrawing a Price Assignment for a Person.....	1161
Withdrawing a Price Assignment for a Price List.....	1162
Viewing the Log of an Approval Transaction.....	1163
Approval Workflow Group (Used for Searching).....	1164
Search Approval Workflow Group.....	1164
Searching for an Approval Workflow Group.....	1165
Viewing the Approval Workflow Group Details.....	1165
Defining an Approval Workflow Group.....	1166
Adding a Business Object.....	1171
Defining a Group BO Relation.....	1173
Approval Workflow Group (Used for Viewing).....	1174
Approval Workflow Group.....	1174
Editing an Approval Workflow Group.....	1177
Deleting an Approval Workflow Group.....	1178
Editing a Business Object.....	1178
Deleting a Business Object.....	1180
Editing a Group BO Relation.....	1181
Deleting a Group BO Relation.....	1183
Approval Workflow Chain (Used for Searching).....	1184
Search Approval Workflow Chain.....	1184
Searching for an Approval Workflow Chain.....	1185
Viewing the Approval Workflow Chain Details.....	1185

Defining an Approval Workflow Chain.....	1185
Defining Approval Levels for an Approval Workflow Chain.....	1186
Approval Workflow Chain (Used for Viewing).....	1188
Approval Workflow Chain.....	1188
Editing an Approval Workflow Chain.....	1189
Deleting an Approval Workflow Chain.....	1190
Approval Workflow Criterion Type (Used for Searching).....	1190
Search Approval Workflow Criterion Type.....	1190
Searching for an Approval Workflow Criterion Type.....	1191
Viewing the Approval Workflow Criterion Type Details.....	1192
Defining an Approval Workflow Criterion Type.....	1192
Approval Workflow Criterion Type (Used for Viewing).....	1194
Approval Workflow Criterion Type.....	1194
Editing an Approval Workflow Criterion Type.....	1195
Deleting an Approval Workflow Criterion Type.....	1197
Approval Workflow Group Chain Linkage (Used for Searching).....	1197
Search Approval Workflow Group Chain Linkage.....	1198
Searching for an Approval Workflow Group Chain Linkage.....	1199
Viewing the Approval Workflow Group Chain Linkage Details.....	1199
Defining an Approval Workflow Group Chain Linkage.....	1200
Defining Group Chain Linkage Criteria for an Approval Workflow.....	1201
Defining a Field Approval Rule.....	1202
Approval Workflow Group Chain Linkage (Used for Viewing).....	1204
Approval Workflow Group Chain Linkage.....	1205
Editing an Approval Workflow Group Chain Linkage.....	1207
Deleting an Approval Workflow Group Chain Linkage.....	1208
Approval Workflow Setting (Used for Searching).....	1209
Search Approval Workflow Group.....	1209
Searching for an Approval Workflow Group.....	1210
Viewing the Approval Workflow Setting Details.....	1210
Defining Approval Workflow Group Settings.....	1211
Approval Workflow Setting (Used for Viewing).....	1213
Approval Workflow Group Settings.....	1213
Editing Approval Workflow Group Settings.....	1215
Deleting Approval Workflow Group Settings.....	1216
Regenerating Input and Display UI Maps.....	1216
Approval Workflow Reason (Used for Searching).....	1217
Approval Workflow Reason List.....	1217
Filtering the Approval Workflow Reasons.....	1217
Viewing the Approval Workflow Reason Details.....	1218
Defining an Approval Workflow Reason.....	1218
Approval Workflow Reason (Used for Viewing).....	1219
Approval Workflow Reason.....	1219
Editing an Approval Workflow Reason.....	1220
Deleting an Approval Workflow Reason.....	1221

## **Chapter 13: Rules Engine..... 1223**

Rule Type (Used for Searching).....	1225
Search Rule Type.....	1225
Searching for a Rule Type.....	1226
Defining a Rule Type.....	1227
Defining Input and Output Parameters for a Rule Type.....	1230
Associating a Characteristic Entity with a Rule Type.....	1232
Associating an Algorithm with a Rule Type.....	1233
Editing a Rule Type.....	1234

Deleting a Rule Type.....	1236
Copying a Rule Type.....	1237
Rule Type (Used for Viewing).....	1239
Rule Type.....	1239
Viewing the Rule Type Details.....	1242
Editing a Rule Type.....	1242
Rule.....	1245
Search Rule.....	1245
Searching for a Rule.....	1246
Viewing the Rule Details.....	1247
Defining a Rule.....	1247
Editing a Rule.....	1256
Deleting a Rule.....	1265
Copying a Rule.....	1266
Rule.....	1274
Rule Information.....	1274
Viewing the Rule Details.....	1277
Rule Check.....	1277
Rule Check.....	1279

## **Chapter 14: Alternate Sequential Bill Numbers.....1281**

Alternate Sequential Bill Number Generation Algorithms.....	1282
C1_ALTBLLSYS.....	1282
C1_ALTBLSYS1.....	1282
C1_ALTBLDV.....	1285
C1_ALTBLDIV1.....	1285
Enabling the Alternate Sequential Bill Numbers Feature.....	1288

## **Chapter 15: Transaction Feed Management..... 1291**

Prerequisites.....	1292
Transaction Rating Before Billing.....	1292
Transaction Aggregation.....	1301
Header Validation.....	1302
Transaction Validation and Initial Price Item Determination (Specific to Health Insurance Domain).....	1304
Price Item Pricing Verification.....	1317
Aggregation.....	1323
Clean Up.....	1327
Transaction Aggregation Batch Processing.....	1330
Transaction Disaggregation.....	1332
Transaction Disaggregation Batch Processing.....	1340
Reseeding (Specific to Health Insurance Domain).....	1341
Transaction Cancellation.....	1344
Transaction Cancellation Batch Processing.....	1347
Transaction Rollback.....	1348
Feed Status Transition.....	1350
Transaction Status Transition.....	1351
Transaction Leg Status Transition.....	1353
Transaction Data File.....	1363
Error List.....	1365
Alert Notification for Transaction Feed Management.....	1420
Feed Management Dashboard.....	1421
Search.....	1421
Division Level Information.....	1429

Transaction Level Information.....	1430
Transaction Leg Information.....	1431
Transaction Leg Service Quantity.....	1433
Transaction Leg Calculation Lines.....	1433
Transaction Leg Calc Line Characteristics.....	1435
Searching for a Transaction Feed.....	1435
Viewing Division Level Details of a Transaction Feed.....	1436
Viewing Transactions that Belong to a Division.....	1436
Viewing Legs of a Transaction.....	1437
Viewing the SQIs Calculated for a Transaction Leg.....	1437
Viewing the Calculation Lines of a Transaction Leg.....	1438
Viewing Characteristics of a Calculation Line.....	1438
Transaction Details.....	1439
Search.....	1439
Transaction Legs.....	1443
Transaction Error Messages.....	1447
Searching for a Transaction.....	1447
Viewing the Transaction Legs.....	1447
Viewing Error Messages.....	1448
Viewing the Transaction Details.....	1448
Adding a Transaction.....	1449
Copying a Transaction.....	1452
Transaction Source.....	1454
Search Transaction Source.....	1454
Searching for a Transaction Source.....	1455
Defining a Transaction Source.....	1456
Editing a Transaction Source.....	1457
Deleting a Transaction Source.....	1457
Copying a Transaction Source.....	1458
Transaction Record Type.....	1459
Search Transaction Record Type.....	1459
Searching for a Transaction Record Type.....	1460
Defining a Transaction Record Type.....	1461
Editing a Transaction Record Type.....	1467
Deleting a Transaction Record Type.....	1473
Copying a Transaction Record Type.....	1474
Transaction Aggregation Rule.....	1479
Transaction Aggregation Rules.....	1479
Defining Transaction Aggregation Rule for an SQL.....	1480
Editing Transaction Aggregation Rule of an SQL.....	1481
Deleting Transaction Aggregation Rule of an SQL.....	1482
Schedule.....	1483
Search Schedule.....	1483
Searching for a Schedule.....	1484
Viewing the Schedule Details.....	1484
Defining a Schedule.....	1485
Editing a Schedule.....	1486
Deleting a Schedule.....	1487
Disaggregation Request.....	1488
Search Disaggregation Request.....	1488
Searching for a Disaggregation Request.....	1494
Creating a Disaggregation Request for a Person.....	1495
Creating a Disaggregation Request for an Account.....	1501
Creating a Disaggregation Request for a Price item.....	1507
Creating a Disaggregation Request for a Price Assignment.....	1513
Creating a Disaggregation Request for a Billable Charge.....	1518

Creating a Reseeding Request for a Parent Accumulation Group (Specific to Health Insurance Domain).....	1522
Deleting a Disaggregation Request.....	1525

## **Chapter 16: Upload Validated Payment Data..... 1527**

Payment Upload Process.....	1528
Upload Payment Records in the Pre-Staging Area.....	1528
Move Payment Records to the Staging Area.....	1529
Create Payment Events and Payments.....	1529
Prerequisites.....	1530
CSV File Format.....	1531
Sample CSV.....	1533
Payment Data File Status Transition.....	1533
Payment Record Status Transition.....	1534
Error Messages.....	1536
Payment Upload.....	1542
Search Payment Data File.....	1543
Payment Data Records.....	1545
Payment Staging Records.....	1547
Payment Data File Log.....	1548
Searching for a Payment Data File.....	1548
Uploading a Payment Data File.....	1549
Replacing an Existing File.....	1550
Cancelling a Payment Data File.....	1552
Moving the Payment Records to the Staging Area.....	1552
Editing a Payment Staging Record.....	1553
Viewing the Records of a Payment Data File.....	1554
Viewing the Staging Records of a Payment Data Record.....	1554
Viewing the Log of a Payment Data File.....	1555
Viewing the Errors of a Payment Data Record.....	1555

## **Chapter 17: Freeze Payments on Notification..... 1557**

Freeze Payments on Notification Process.....	1559
Creating Automatic Payments and Refunds.....	1559
Generating a Flat File.....	1559
Uploading Response from Auto Clearing House (ACH).....	1559
Retry Automatic Payment.....	1560
Freezing or Canceling Automatic Payments.....	1561
Voiding Refund Requests and Canceling Refund Adjustments.....	1561
Generating To Do Entries.....	1562
Creating Tender Controls.....	1562
Prerequisites.....	1562
Automatic Payment or Refund Clearing Staging Record Status Transition.....	1563
EDI 824 File Format.....	1564
Sample EDI 824 File Format.....	1565
Automatic Payment and Refund Upload Reason.....	1566
Upload Reasons.....	1566
Defining an Upload Reason.....	1567
Editing an Upload Reason.....	1569
Deleting an Upload Reason.....	1572
Automatic Payment and Refund Clearing Staging.....	1572
Search Clearing Record.....	1573
Associated Clearing Staging Records.....	1575
Clearing Staging Upload Reasons.....	1576

Clearing Staging Characteristics.....	1577
Searching for a Clearing Record.....	1577
Viewing the Clearing Staging Records Associated to a Clearing Record.....	1578
Viewing the Upload Reason Specified in the Clearing Staging Record.....	1578
Viewing the Characteristics of the Clearing Staging Record.....	1579
Editing a Clearing Staging Record.....	1579
Defining a Characteristic for a Clearing Staging Record.....	1581
Deleting a Clearing Staging Record.....	1582

## **Chapter 18: Trial Billing.....1585**

Prerequisites.....	1587
Trial Bill (Used for Searching).....	1587
Search Trial Bill .....	1587
Searching for a Trial Bill.....	1589
Viewing the Trial Bill Details.....	1589
Trial Bill (Used for Viewing).....	1590
Trial Bill.....	1591
Trial Bill Segments.....	1592
Trial Bill Segment Calc Lines.....	1594
Trial Bill Segment SQ Details.....	1595
Trial Bill Segment Financial Details.....	1595
Policy Details.....	1596
Printing a Trial Bill in the PDF Format.....	1597
Viewing the Segments of a Trial Bill.....	1597
Filtering the Trial Bill Segments.....	1598
Viewing the Calc Lines of a Trial Bill Segment.....	1598
Viewing the SQ Details of a Trial Bill Segment.....	1599
Viewing the Financial Details of a Trial Bill Segment.....	1599
Viewing the Policy Details of a Trial Bill Segment.....	1600

## **Chapter 19: GL Account Validation..... 1603**

Static GL Account Validation.....	1604
Dynamic GL Account Validation.....	1604

## **Chapter 20: Upload Validated Adjustment Data..... 1605**

Prerequisites.....	1607
CSV File Format.....	1607
Adjustment Upload Request (Without Approval) Status Transition.....	1608
Adjustment Upload Request (With Approval) Status Transition.....	1609
Algorithms Used in C1-ADJUPLD.....	1610
Upload Request Type.....	1614
Upload Request Type List.....	1616
Upload Request Type.....	1617
Defining an Upload Request Type.....	1620
Defining a Characteristic for an Upload Request Type.....	1627
Editing an Upload Request Type.....	1628
Copying an Upload Request Type.....	1632
Mapping an Upload Request Type.....	1636
Deleting an Upload Request Type.....	1637
Viewing the Upload Request Type Details.....	1638
Adjustment Upload Request (Used for Searching).....	1639
Search Adjustment Upload Request.....	1639
Searching for an Adjustment Upload Request.....	1641

Uploading an Adjustment Data File.....	1641
Replacing an Adjustment Data File.....	1644
Viewing the Adjustment Upload Request Details.....	1647
Viewing All Records of an Adjustment Data File.....	1648
Adjustment Upload Request (Used for Viewing).....	1648
Adjustment Upload Request - Main.....	1649
Adjustment Upload Request.....	1649
Adjustment Data Records.....	1651
Adjustment Upload Request - Log.....	1652
Adjustment Upload Request Log.....	1652
Cancelling an Adjustment Data File.....	1653
Creating Adjustments for an Adjustment Data File.....	1654
Submitting an Adjustment Data File for Approval.....	1655
Approving an Adjustment Data File.....	1656
Rejecting an Adjustment Data File.....	1657
Viewing the Log of an Adjustment Upload Request.....	1658
Adding a Log Entry for an Adjustment Upload Request.....	1659

## **Chapter 21: Payment Request.....1661**

Prerequisites.....	1663
Payment Creation Request (Without Approval) Status Transition.....	1664
Payment Creation Request (With Approval) Status Transition.....	1665
Payment Transfer Request (Without Approval) Status Transition.....	1666
Payment Transfer Request (With Approval) Status Transition.....	1669
Algorithms Used in C1-PaymentRequest.....	1671
C1-PAYRQ-INF.....	1672
C1-PAYREQPOS.....	1673
C1-PAYREQVAL.....	1673
C1-PAY-DFT.....	1673
C1-PAYDFTEXT.....	1673
C1-PAY-PFA.....	1673
C1-PAYPFAEXT.....	1673
F1-TODOCOMPL.....	1673
C1-PAY-APP.....	1673
C1-PAY-DIST.....	1673
C1-PAY-MONT.....	1674
C1-PAYCREATE.....	1674
C1-FRZ-VALID.....	1674
C1-PAY-V-FRZ.....	1674
C1-PAY-FRZ.....	1674
C1-PAY-RJT.....	1674
C1-ISFREEZE.....	1674
Algorithms Used in C1-PaymentTransferRequest.....	1674
C1-PYTRDF.....	1676
C1-PAY-DFT.....	1676
C1-PAYDFTEXT.....	1676
C1-PYTR-MONT.....	1676
C1-PYTR-UPDT.....	1676
C1-PAY-PFA.....	1677
C1-PAYPFAEXT.....	1677
F1-TODOCOMPL.....	1677
C1-PAY-APP.....	1677
C1-PAY-DIST.....	1677
C1-PAY-MONT.....	1677
C1-PAYCREATE.....	1677

C1-FRZ-VALID.....	1677
C1-PAY-V-FRZ.....	1677
C1-PAY-FRZ.....	1677
C1-PAY-RJT.....	1678
C1-ISFREEZE.....	1678
Payment Request Type.....	1678
Payment Request Type List.....	1678
Payment Request Type.....	1679
Defining a Payment Request Type.....	1682
Defining a Characteristic for a Payment Request Type.....	1686
Editing a Payment Request Type.....	1687
Copying a Payment Request Type.....	1693
Deleting a Payment Request Type.....	1698
Viewing the Payment Request Type Details.....	1698
Payment Request (Used for Searching).....	1699
Search Payment Request.....	1699
Searching for a Payment Request.....	1702
Viewing the Payment Request Details.....	1703
Payment Request (Used for Viewing).....	1704
Payment Request - Main.....	1704
Payment Request.....	1704
Payment Details.....	1711
Payment Distribution.....	1711
Payment Request - Log.....	1714
Payment Request Log.....	1714
Creating a Payment Creation Request.....	1715
Defining a Characteristic for a Payment Tender.....	1724
Editing the Payment Amount.....	1724
Editing a Payment Creation Request.....	1727
Deleting a Payment Creation or Transfer Request.....	1734
Distributing the Tender or Payment Amount.....	1734
Distributing and Freezing the Tender or Payment Amount.....	1735
Redistributing the Tender or Payment Amount.....	1736
Editing the Payment Segment Amount.....	1737
Freezing Payments Created Through a Payment Request.....	1739
Submitting a Payment Creation or Transfer Request for Approval.....	1740
Approving a Payment Creation or Transfer Request.....	1741
Rejecting a Payment Creation or Transfer Request.....	1742
Discarding a Payment Creation or Transfer Request.....	1744
Viewing the Log of a Payment Creation or Transfer Request.....	1745
Adding a Log Entry for a Payment Creation or Transfer Request.....	1745
Payment Event Summary.....	1746
Search Payment Event.....	1747
Payments.....	1750
Payment Segments.....	1752
Searching for a Payment Event.....	1753
Creating a Payment Transfer Request.....	1753
Editing a Payment Transfer Request.....	1758
Cancelling a Payment Tender.....	1761
Deleting a Payment Event.....	1763
Viewing Payments Created Through a Payment Event.....	1763
Cancelling a Payment.....	1763
Deleting a Payment.....	1764
Creating a Refund Request for a Payment.....	1765
Viewing the Payment Segments of a Payment.....	1765
Updating the Transfer Amount in a Payment Transfer Request.....	1765

Updating the Tender Details in a Payment Transfer Request.....	1766
--	------

## **Chapter 22: Account Receivable Central..... 1769**

Single Offset.....	1770
Mass Offset.....	1770
Cross Currency Offset.....	1771
Hold.....	1772
Refund.....	1772
Write Off.....	1772
Dispute.....	1772
Account Receivable Central.....	1773
Search Bill .....	1773
Bill Information.....	1777
Offset Details.....	1777
Hold Details.....	1777
Garnishment Details.....	1778
Bill Line Items.....	1778
Searching for a Bill.....	1779
Viewing the Bill Details.....	1779

## **Chapter 23: Offset Request..... 1781**

Single Offset.....	1783
Mass Offset.....	1784
Cross Currency Offset.....	1787
Prerequisites.....	1789
Offset Request (Without Approval) Status Transition.....	1790
Offset Request (With Approval) Status Transition.....	1791
Bill Line Items Level Offset.....	1793
Internal Offsetting of Zero Balance Bill.....	1794
Algorithms Used in C1-OffsetRequest.....	1794
C1-OFFST-INF.....	1795
F1-TODOCOMPL.....	1796
C1-OFFSUBENT.....	1796
C1-OFFAPPENT.....	1796
C1-OFFAPPEXT.....	1796
C1-OFSAPRENT.....	1796
F1-AT-RQJ.....	1796
C1-OFST-DIST.....	1797
C1-UPD-HOLD.....	1798
C1-UPD-FUND.....	1798
C1-DFRUNAPLY.....	1798
C1-UNAPOFST.....	1798
C1-UPDT-FUND.....	1798
C1-WTBS-CRBL.....	1798
Additional Algorithms Used in Offset Request.....	1799
C1-OFST-AMT.....	1799
C1-WTBS-CRBL.....	1799
Offset Request Type.....	1800
Offset Request Type List.....	1800
Offset Request Type.....	1801
Defining an Offset Request Type.....	1804
Defining a Characteristic for an Offset Request Type.....	1810
Editing an Offset Request Type.....	1811
Deleting an Offset Request Type.....	1817

Copying an Offset Request Type.....	1817
Viewing the Offset Request Type Details.....	1824
Offset Request (Used for Searching).....	1824
Search Offset Request.....	1824
Searching for an Offset Request.....	1828
Creating an Offset Request.....	1829
Viewing the Offset Request Details.....	1831
Offset Request (Used for Viewing).....	1832
Offset Request - Main.....	1832
Offset Request.....	1832
Selected Bills.....	1835
Search Bill.....	1836
Offset Request Adjustments.....	1842
Offset Request - Log.....	1842
Offset Request Log.....	1842
Viewing the Debit and Credit Bills Added to an Offset Request.....	1843
Viewing the Adjustments Created Through an Offset Request.....	1843
Adding a Debit or Credit Bill to an Offset Request.....	1844
Editing an Offset Request.....	1845
Defining a Characteristic for an Offset Request.....	1847
Editing the Offset Amount of a Debit or Credit Bill.....	1848
Removing a Debit or Credit Bill from an Offset Request.....	1850
Deleting an Offset Request.....	1850
Submitting an Offset Request.....	1851
Approving an Offset Request.....	1853
Rejecting an Offset Request.....	1856
Unapplying an Offset Request.....	1857
Viewing the Log of an Offset Request.....	1858
Adding a Log Entry for an Offset Request.....	1859

## **Chapter 24: Funding Request..... 1861**

Prerequisites.....	1864
Funding Request (Without Approval) Status Transition.....	1864
Funding Request (With Approval) Status Transition.....	1865
Algorithms Used in C1-FundingReq.....	1866
C1-FUNDINFO.....	1867
C1-FUNDSUBMT.....	1868
C1-FUNDAPP.....	1868
C1-FUNDAPRVD.....	1868
F1-TODOCOMPL.....	1868
F1-AT-RQJ.....	1869
C1-FNDRESUBM.....	1869
C1-FUNDVAL.....	1869
C1-FUNDAPAY.....	1869
C1-FUNDADJCR.....	1869
C1-FUNDCANCL.....	1870
Funding Request Type.....	1870
Funding Request Type List.....	1871
Funding Request Type.....	1871
Defining a Funding Request Type.....	1874
Defining a Characteristic for a Funding Request Type.....	1882
Editing a Funding Request Type.....	1884
Deleting a Funding Request Type.....	1892
Copying a Funding Request Type.....	1892
Viewing the Funding Request Type Details.....	1900

Funding Request (Used for Searching).....	1900
Search Funding Request.....	1900
Searching for a Funding Request.....	1904
Creating a Funding Request.....	1905
Viewing the Funding Request Details.....	1905
Funding Request (Used for Viewing).....	1906
Funding Request - Main.....	1906
Funding Request.....	1906
Search Bill.....	1910
Funding Request - Bills.....	1915
Currency Statistics.....	1915
Selected Bills.....	1915
Funding Payment Details.....	1919
Funding Adjustments.....	1919
Funding Request - Log.....	1919
Funding Request Log.....	1920
Adding a Debit or Credit Bill to a Funding Request.....	1920
Deleting a Debit or Credit Bill from a Funding Request.....	1921
Excluding a Bill from a Funding Request.....	1922
Editing a Funding Request.....	1924
Defining a Characteristic for a Funding Request.....	1926
Deleting a Funding Request.....	1927
Cancelling a Funding Request.....	1928
Submitting a Funding Request.....	1928
Approving a Funding Request.....	1930
Rejecting a Funding Request.....	1932
Requesting to Resubmit a Funding Request.....	1934
Withdrawing a Funding Request.....	1935
Transferring the Funding Amount of a Credit Bill to a Garnishment Contract.....	1936
Viewing the Garnishment Details of a Credit Bill.....	1937
Viewing the Payments Created Through a Funding Request.....	1938
Viewing the Adjustments Created Through a Funding Request.....	1939
Viewing the Log of a Funding Request.....	1939
Adding a Log Entry for a Funding Request.....	1940

## **Chapter 25: Refund/Write Off Request..... 1943**

Prerequisites.....	1945
Refund Request (Without Approval) Status Transition.....	1945
Refund Request (With Approval) Status Transition.....	1946
Write Off Request (Without Approval) Status Transition.....	1947
Write Off Request (With Approval) Status Transition.....	1948
Account Level Refund/Write Off.....	1949
Refund/Write Off Adjustment at Bill Level.....	1951
Algorithms Used in C1-RefundReq.....	1952
Algorithms Used in C1-WORequest.....	1958
Refund/Write Off Request Type.....	1963
Refund/Write Off Request Type List.....	1968
Refund/Write Off Request Type.....	1969
Defining a Refund or Write Off Request Type.....	1972
Defining a Characteristic for a Refund or Write Off Request Type.....	1975
Editing a Refund or Write Off Request Type.....	1976
Copying a Refund or Write Off Request Type.....	1980
Deleting a Refund or Write Off Request Type.....	1984
Viewing the Refund or Write Off Request Type Details.....	1984
Refund/Write Off Request.....	1985

Search Refund/Write Off Request.....	1985
Searching for a Refund or Write Off Request.....	1990
Creating a Refund Request.....	1991
Creating a Write Off Request.....	1994
Viewing the Refund Request Details.....	1996
Viewing the Write Off Request Details.....	1997
Refund Request.....	1998
Refund Request - Main.....	1998
Refund Request.....	1999
Refund Details.....	2001
Bill Line Items.....	2002
Refund Request - Bills.....	2003
Search Bills.....	2003
Bill Line Items.....	2005
Refund Request - Payments.....	2006
Search Payment Event.....	2006
Payments.....	2007
Refund Request - Log.....	2008
Refund Request Log.....	2008
Creating a Refund Request.....	2009
Defining a Characteristic for a Refund Request.....	2012
Adding a Payment Event to the Refund Request.....	2013
Adding a Payment to the Refund Request.....	2014
Adding a Credit Bill to the Refund Request.....	2015
Adding a Credit Bill Line Item to the Refund Request.....	2016
Editing a Refund Request.....	2018
Editing the Refund Details.....	2020
Deleting a Refund Request.....	2022
Deleting a Bill from the Refund Request.....	2023
Deleting a Bill Line Item from the Refund Request.....	2023
Submitting a Refund Request.....	2024
Approving a Refund Request.....	2026
Rejecting a Refund Request.....	2029
Viewing the Log of a Refund Request.....	2030
Adding a Log Entry for a Refund Request.....	2031
Voiding a Refund Request.....	2032
Write Off Request.....	2033
Write Off Request - Main.....	2034
Write Off Request.....	2034
Write Off Details.....	2036
Bill Line Items.....	2037
Write Off Request - Bills.....	2038
Search Bills.....	2039
Bill Line Items.....	2040
Write Off Request - Log.....	2041
Write Off Request Log.....	2041
Creating a Write Off Request.....	2042
Defining a Characteristic for a Write Off Request.....	2044
Adding a Debit Bill to the Write Off Request.....	2045
Adding a Debit Bill Line Item to the Write Off Request.....	2046
Editing a Write Off Request.....	2048
Editing the Write Off Details.....	2050
Deleting a Write Off Request.....	2052
Deleting a Bill from the Write Off Request.....	2052
Deleting a Bill Line Item from the Write Off Request.....	2053
Submitting a Write Off Request.....	2053

Approving a Write Off Request.....	2055
Rejecting a Write Off Request.....	2057
Viewing the Log of a Write Off Request.....	2059
Adding a Log Entry for a Write Off Request.....	2060
Cancelling a Write Off Request.....	2061

## **Chapter 26: Hold Request..... 2063**

Hold Request (Without Approval) Status Transition.....	2065
Hold Request (With Approval) Status Transition.....	2065
Algorithms Used in C1-HoldRequest.....	2066
Prerequisites.....	2074
Approval Process for Hold Request Release.....	2075
Hold Refund.....	2076
Hold Mass Accounts Using Selection Criteria.....	2077
Hold Request Type.....	2077
Hold Request Type List.....	2077
Hold Request Type.....	2078
Defining a Hold Request Type.....	2081
Defining a Characteristic for a Hold Request Type.....	2083
Editing a Hold Request Type.....	2084
Deleting a Hold Request Type.....	2087
Copying a Hold Request Type.....	2088
Viewing the Hold Request Type Details.....	2090
Hold Request (Used for Searching).....	2091
Search Hold Request.....	2091
Searching for a Hold Request.....	2095
Creating a Hold Request.....	2096
Viewing the Hold Request Details.....	2099
Hold Request (Used for Viewing).....	2099
Hold Request - Main.....	2100
Hold Request.....	2100
Hold Entities.....	2103
Search Account.....	2105
Search Bill.....	2109
Search Person.....	2112
Hold Request - Log.....	2113
Hold Request Log.....	2113
Searching Persons.....	2114
Searching Accounts.....	2114
Searching Bills.....	2115
Adding Persons in a Hold Request.....	2116
Adding Accounts in a Hold Request.....	2116
Adding Bills in a Hold Request.....	2117
Defining an Entity for a Hold Request.....	2117
Defining a Process for a Hold Request.....	2119
Defining a Characteristic for a Hold Request.....	2120
Editing a Hold Request.....	2121
Editing Hold Request Entities.....	2124
Deleting Hold Request Entities.....	2125
Deleting a Hold Request.....	2125
Submitting a Hold Request.....	2126
Approving a Hold Request.....	2127
Releasing a Hold Request.....	2128
Rejecting a Hold Request.....	2129
Resubmitting a Hold Request.....	2131

Viewing the Log of a Hold Request.....	2131
Adding a Log Entry for a Hold Request.....	2132

## **Chapter 27: Delinquency Central..... 2135**

Prerequisites.....	2136
Delinquency Central (Used for Viewing).....	2136
Search Overdue Process.....	2136
Overdue Events.....	2142
Searching for an Overdue Process.....	2142
Viewing Events of an Overdue Process.....	2143
Viewing the Overdue Process Details.....	2143
Overdue Process Information for Account: {Account ID}.....	2144
Person Information.....	2144
Account Information.....	2144
Customer Contact Details.....	2145
Promise To Pay.....	2145
Hold Details.....	2146
Overdue Bills.....	2146
Payment Arrangement.....	2146
Search Bill.....	2147
Searching for a Bill.....	2148
Adding the Customer Contact Details.....	2149
Creating a Hold Request for an Overdue Process.....	2149
Creating a Payment Arrangement for an Overdue Process.....	2150
Defining a Promise To Pay for an Overdue Process.....	2150

## **Chapter 28: Upload Request..... 2153**

Prerequisites.....	2156
Upload Request (Without Approval) Status Transition.....	2157
Upload Request (With Approval) Status Transition.....	2158
Defer Upload Request Validation.....	2159
Algorithms Used in C1-BillCycleUpdateUplReq.....	2160
Algorithms Used in C1-ContractRiderUpdateUplReq.....	2168
Algorithms Used in C1-HoldUploadRequest.....	2177
Algorithms Used in C1-RefundUploadRequest.....	2186
Algorithms Used in C1-WriteOffUploadRequest.....	2193
Algorithms Used in C1-BillableChargeUploadRequest.....	2199
Algorithms Used in C1-ReinstatementUploadRequest.....	2206
Algorithms Used in C1-BillGrpSortUploadRequest.....	2215
C1-BLSRTUPLD.....	2216
C1-BLSRTDERV.....	2216
C1-BLSRTVALD.....	2216
FI-AT-RQJ.....	2217
C1-UPLSUBENT.....	2217
C1-DEFERUPLD.....	2217
C1-UPLAPPENT.....	2217
C1-UPLAPPEXT.....	2217
FI-TODOCOMPL.....	2217
C1-BLSRTPROC.....	2218
Algorithms Used in C1-BillLevelUploadRequest.....	2218
C1-BLVUPLDTL.....	2219
C1-BLVLDERIV.....	2219
C1-BLVLVALID.....	2219
FI-AT-RQJ.....	2220

C1-UPLSUBENT.....	2220
C1-DEFERUPLD.....	2220
C1-UPLAPPENT.....	2220
C1-UPLAPPEXT.....	2220
F1-TODOCOMPL.....	2221
C1-BLVVLVPRO.....	2221
CSV File Format for Account Bill Cycle Upload Request.....	2221
CSV File Format for Contract Rider Upload Request.....	2222
CSV File Format for Billable Charge Upload.....	2223
CSV File Format for Hold Upload Request.....	2226
CSV File Format for Refund Request Upload.....	2231
CSV File Format for Write Off Request Upload.....	2232
CSV File Format for Reinstatement Upload Request.....	2233
CSV File Format for Bill Group Sorting Upload Request.....	2234
CSV File Format for Bill Group Derivation and Pricing Parameters Upload Request.....	2235
Upload Request Type.....	2238
Upload Request Type List.....	2239
Upload Request Type.....	2240
Defining an Upload Request Type.....	2243
Defining a Characteristic for an Upload Request Type.....	2250
Editing an Upload Request Type.....	2251
Deleting an Upload Request Type.....	2255
Copying an Upload Request Type.....	2255
Mapping an Upload Request Type.....	2260
Viewing the Upload Request Type Details.....	2261
Upload Request (Used for Searching).....	2262
Search Upload Request.....	2262
Searching for an Upload Request.....	2264
Viewing the Upload Request Details.....	2265
Creating an Upload Request.....	2265
Defining a Characteristic for an Upload Request.....	2268
Upload Request (Used for Viewing).....	2269
Upload Request - Main.....	2269
Upload Request.....	2269
Data Records.....	2272
Upload Request - Log.....	2273
Upload Request Log.....	2273
Editing an Upload Request.....	2274
Deleting an Upload Request.....	2275
Validating an Upload Request.....	2276
Cancelling an Upload Request.....	2276
Submitting an Upload Request.....	2277
Approving an Upload Request.....	2280
Rejecting an Upload Request.....	2283
Viewing the Data Record Details.....	2285
Viewing the Log of an Upload Request.....	2286
Adding a Log Entry for an Upload Request.....	2286

## **Chapter 29: General Ledger (GL) Accounting Template..... 2289**

GL Accounting Template (Without Approval) Status Transition.....	2294
GL Accounting Template (With Approval) Status Transition.....	2294
Algorithms Used in C1- GLAT.....	2295
Prerequisites.....	2298
GL Accounting Template (Used for Searching).....	2299
Search GL Accounting Template.....	2299

GL Accounting Template Lines.....	2300
Searching for a GL Accounting Template.....	2301
Creating a GL Accounting Template.....	2302
Viewing the GL Accounting Template Details.....	2304
Viewing the GL Accounting Template Lines Details.....	2304
GL Accounting Template (Used for Viewing).....	2305
GL Accounting Template - Main.....	2305
GL Accounting Template.....	2305
GL Accounting Template - Log.....	2307
GL Accounting Template Log.....	2307
Editing a GL Accounting Template.....	2307
Deleting a GL Accounting Template.....	2309
Submitting a GL Accounting Template.....	2310
Approving a GL Accounting Template.....	2311
Rejecting a GL Accounting Template.....	2312
Deactivating a GL Accounting Template.....	2314
Viewing the Log of a GL Accounting Template.....	2315
Adding a Log Entry for a GL Accounting Template.....	2316

## **Chapter 30: Payment Agreement Request.....2317**

Payment Agreement Request (Without Approval) Status Transition.....	2320
Payment Agreement Request (With Approval) Status Transition.....	2320
Prerequisites.....	2321
Algorithms Used in C1-PaymentAgreementRequest.....	2322
C1-PA-INFO.....	2323
C1-PA-PRE.....	2323
C1-PA-SUBMIT.....	2323
C1-PA-APPENT.....	2323
C1-PA-APPEXT.....	2323
C1-PA-RESUB.....	2323
C1-MONTR.....	2323
C1-ACTENT.....	2323
Payment Agreement Request Type.....	2323
Payment Agreement Request Type List.....	2323
Payment Agreement Request Type.....	2324
Defining a Payment Agreement Request Type.....	2327
Defining a Characteristic for a Payment Agreement Request Type.....	2330
Editing a Payment Agreement Request Type.....	2331
Copying a Payment Agreement Request Type.....	2334
Deleting a Payment Agreement Request Type.....	2336
Viewing the Payment Agreement Request Type Details.....	2337
Payment Agreement Request (Used for Searching).....	2338
Search Payment Agreement Request.....	2338
Bill Details.....	2342
Searching for a Payment Agreement Request.....	2342
Creating a Payment Agreement Request.....	2343
Defining a Characteristic for a Payment Agreement Request.....	2344
Defining Payment Schedule for a Payment Agreement Request.....	2345
Viewing the Bills Added in the Payment Agreement Request.....	2346
Viewing the Payment Agreement Request Details.....	2346
Payment Agreement Request (Used for Viewing).....	2347
Payment Agreement Request - Main.....	2348
Payment Agreement Request.....	2348
Bill Details.....	2350
Payment Schedule.....	2351

Payment Agreement Request - Bills.....	2351
Search Bills.....	2351
Payment Agreement Request - Log.....	2353
Payment Agreement Request Log.....	2353
Editing a Payment Agreement Request.....	2353
Deleting a Payment Agreement Request.....	2356
Submitting a Payment Agreement Request.....	2357
Removing an Overdue Bill from a Payment Agreement Request.....	2358
Approving a Payment Agreement Request.....	2359
Rejecting a Payment Agreement Request.....	2360
Resubmitting a Payment Agreement Request.....	2362
Filtering Overdue Bills of an Account.....	2362
Adding an Overdue Bill in a Payment Agreement Request.....	2363
Viewing the Log of a Payment Agreement Request.....	2364
Adding a Log Entry for a Payment Agreement Request.....	2365

## **Chapter 31: Inbound Message.....2367**

Health Care Inbound Message.....	2368
Prerequisites.....	2374
Health Care Inbound Message Status Transition through User Interface.....	2376
Health Care Inbound Message Status Transition through a Batch Process.....	2377
Algorithms Used in C1-HCInboundMessage.....	2378
C1-AT-RQJ.....	2379
F1-AT-RQJ.....	2379
C1-HCINVAL.....	2379
C1-HCINPROC.....	2380
C1-TODORETRY.....	2380
C1-TDCRINMSG.....	2381
Health Care Inbound Message XML Format.....	2381
Health Care Inbound Message Schema.....	2443
Sample Health Care Inbound Message for Fully-Insured Group Customer Setup.....	2450
Sample Health Care Inbound Message for Self-Funded Customer Setup.....	2489
Sample Health Care Inbound Message for Pricing Rules.....	2514
Sample Health Care Inbound Message for Membership.....	2532
Health Product and Plan Inbound Message.....	2545
Prerequisites.....	2546
Health Product and Plan Inbound Message Status Transition through User Interface.....	2547
Health Product and Plan Inbound Message Status Transition through a Batch Process.....	2548
Algorithms Used in C1-HCProdHlthPlnInbound.....	2549
C1-AT-RQJ.....	2550
F1-AT-RQJ.....	2550
C1-HLTPRDVAL.....	2550
C1-HCPRPROC.....	2551
C1-TODORETRY.....	2552
C1-TDCRINMSG.....	2552
Health Product and Plan Inbound Message XML Format.....	2552
Health Product and Plan Inbound Message Schema.....	2575
Sample Health Product and Plan Inbound Message for Health Product Setup.....	2577
Sample Health Product and Plan Inbound Message for Health Plan Setup.....	2578
Sample Health Product and Plan Inbound Message for Health Plan Pricing Rules Setup.....	2579
Inbound Message Type.....	2584
Inbound Message Type List.....	2585
Inbound Message Type.....	2585
Viewing the Inbound Message Type Details.....	2588
Defining an Inbound Message Type.....	2588

Defining a Characteristic for an Inbound Message Type.....	2591
Editing an Inbound Message Type.....	2592
Copying an Inbound Message Type.....	2595
Deleting an Inbound Message Type.....	2598
Inbound Message (Used for Searching).....	2599
Search Inbound Message.....	2599
Searching for an Inbound Message.....	2603
Creating an Inbound Message.....	2604
C1-HCInboundMessage.....	2604
C1-HCProdHlthPlnInboundMessage (SOAP Based Service).....	2604
C1-HCProdHlthPlnInboundMes (REST Based Service).....	2605
Viewing the Inbound Message Details.....	2605
Inbound Message (Used for Viewing).....	2606
Inbound Message - Main.....	2606
Inbound Message.....	2606
Inbound Message - Message.....	2608
Inbound Message Content.....	2608
Inbound Message - Log.....	2609
Inbound Message Log.....	2609
Editing an Inbound Message.....	2610
Defining a Characteristic for an Inbound Message.....	2611
Deleting an Inbound Message.....	2612
Processing an Inbound Message.....	2613
Using the Retry Option for an Inbound Message.....	2615
Voiding an Inbound Message.....	2615
Viewing the Content of an Inbound Message.....	2616
Viewing the Log of an Inbound Message.....	2616
Adding a Log Entry for an Inbound Message.....	2617
Statement Construct Preference.....	2617
Searching for a Statement Construct Preference.....	2618
Viewing the Statement Construct Preference Details.....	2619
Defining a Statement Construct Preference.....	2619
Editing a Statement Construct Preference.....	2625
Copying a Statement Construct Preference.....	2630
Deleting a Statement Construct Preference.....	2636

## **Chapter 32: Upload Lockbox Payment and Remittance Advices..... 2637**

Prerequisites.....	2639
EDI 820 Flat File Description.....	2639
Sample EDI 820 Flat File.....	2642
Upload EDI 820 Files in ORMB.....	2642

## **Chapter 33: Deferred Revenue Recognition..... 2647**

Prerequisites.....	2649
Deferred Revenue Recognition Status Transition.....	2649
Algorithms Used in Deferred Revenue Recognition.....	2651
Deferred Revenue Recognition Template (Used for Searching).....	2661
Search Deferred Revenue Recognition Template.....	2661
Searching for a Deferred Revenue Recognition Template.....	2662
Defining a Deferred Revenue Recognition Template.....	2663
Associating Algorithms with a Deferred Revenue Recognition Template.....	2666
Associating Deferred Revenue Recognition Template With A Division.....	2667
Defining a Characteristic for a Deferred Revenue Recognition Template.....	2667
Viewing the Deferred Revenue Recognition Template Details.....	2668

Deferred Revenue Recognition Template (Used for Viewing).....	2669
Deferred Revenue Recognition Template.....	2669
Editing a Deferred Revenue Recognition Template.....	2672
Deleting a Deferred Revenue Recognition Template.....	2672
Viewing the Deferred Revenue Recognition Template Details.....	2673
Deferred Revenue Recognition (Used for Searching).....	2673
Search Deferred Revenue Recognition.....	2674
Searching for a Deferred Revenue Recognition.....	2678
Viewing the Deferred Revenue Recognition Details.....	2679
Deferred Revenue Recognition (Used for Viewing).....	2679
Deferred Revenue Recognition - Main.....	2680
Deferred Revenue Recognition.....	2680
Associated Deferred Revenue Recognitions.....	2682
Recognition Schedule.....	2683
Revenue Recognition Items.....	2683
Deferred Revenue Recognition - Log.....	2683
Deferred Revenue Recognition Log.....	2683
Editing a Deferred Revenue Recognition.....	2684
Creating the Deferred Revenue Recognition Schedule.....	2685
Defining a Characteristic for a Deferred Revenue Recognition.....	2685
Adding Related Deferred Revenue Recognitions.....	2686
Editing the Deferred Revenue Recognition Schedule Details.....	2687
Viewing the Log of a Deferred Revenue Recognition.....	2688
Adding a Log Entry for a Deferred Revenue Recognition.....	2689

## **Chapter 34: Reconciliation.....2691**

Pre-requisites.....	2694
Reconciliation Status Transition.....	2694
Pay Instruction Status Transition.....	2695
Discrepancy Report Status Transition.....	2697
EDI 820 File Format For Reconciliation.....	2697
Sample EDI 820 File Format.....	2699
Algorithms Used in C1-MemberReconType.....	2699
C1-REOCNPEP.....	2700
Algorithms Used in C1-MemberReconciliation.....	2700
C1-RECONINFO.....	2701
C1-MRECONVAL.....	2701
F1-AT-RQJ.....	2702
F1-TDCREATE.....	2702
C1-VALPAYINS.....	2702
F1-TODOCOMPL.....	2703
C1-MRECONVAL.....	2703
C1-MONPAYINS.....	2703
C1-TRNPAYRCN.....	2704
C1-RCOPNPYIN.....	2704
C1-RCNOPNMR.....	2705
C1-RCMONPNCN.....	2705
C1-CANPAYINS.....	2705
C1-CANRCNPAY.....	2705
C1-RCNCANLTD.....	2705
Algorithms Used in C1-PayInstruction.....	2706
C1-MPAYININF.....	2706
C1-PYINDRVAN.....	2707
C1-PIRECOCIL.....	2707
C1-PYICNADJ.....	2708

F1-AT-RQJ.....	2709
Algorithms Used in C1-MemberDiscReportType.....	2709
C1-DISCPEP.....	2709
Algorithms Used in C1-DiscrepancyReport.....	2709
F1-AT-RQJ.....	2710
C1-DISRINFO.....	2710
C1-VALNEWDIS.....	2710
C1-CRDSLNTM.....	2710

C1-VALCMPDIS.....	2711
Reconciliation Type.....	2711
Reconciliation Type List.....	2711
Reconciliation Type.....	2712
Defining a Reconciliation Type.....	2714
Defining a Characteristic for a Reconciliation Type.....	2715
Associating an Algorithm with a Reconciliation Type.....	2716
Editing a Reconciliation Type.....	2718
Deleting a Reconciliation Type.....	2719
Copying a Reconciliation Type.....	2720
Viewing the Reconciliation Type Details.....	2721
Reconciliation (Used for Searching).....	2722
Search Reconciliation.....	2722
Searching for a Reconciliation.....	2726
Viewing the Reconciliation Details.....	2727
Reconciliation (Used for Viewing).....	2727
Reconciliation - Main.....	2728
Reconciliation.....	2728
Reconciliation - Pay Instruction.....	2730
Pay Instructions.....	2731
Reconciliation - Log.....	2733
Reconciliation Log.....	2733
Editing a Reconciliation.....	2733
Defining a Characteristic for a Reconciliation.....	2734
Deleting a Reconciliation.....	2735
Submitting Pay Instructions for a Reconciliation.....	2736
Reconciling Pay Instructions.....	2736
Adding a Log Entry for a Reconciliation.....	2737
Viewing the Log of a Reconciliation.....	2737
Canceling a Reconciliation.....	2738
Searching for a Pay Instruction.....	2739
Viewing the Pay Instruction Details.....	2739
Pay Instruction.....	2740
Pay Instruction - Main.....	2740
Pay Instruction.....	2741
Reconciliation Adjustments.....	2742
Related Objects.....	2743
Pay Instruction - Log.....	2743
Pay Instruction Log.....	2743
Adding a Log Entry for a Pay Instruction.....	2744
Viewing the Log of a Pay Instruction.....	2745
Discrepancy Report Type.....	2745
Discrepancy Report Type List.....	2745
Discrepancy Report Type.....	2746
Defining a Discrepancy Report Type.....	2748
Defining a Characteristic for a Discrepancy Report Type.....	2749
Editing a Discrepancy Report Type.....	2750

Deleting a Discrepancy Report Type.....	2751
Copying a Discrepancy Report Type.....	2752
Viewing the Discrepancy Report Type Details.....	2753
Discrepancy Report (Used for Searching).....	2754
Search Discrepancy Report.....	2754
Searching for a Discrepancy Report.....	2757
Creating a Discrepancy Report.....	2758
Viewing the Discrepancy Report Details.....	2759
Discrepancy Report (Used for Viewing).....	2759
Discrepancy Report - Main.....	2760
Discrepancy Report.....	2760
Discrepancy Line Items.....	2761
Discrepancy Line Item Related Objects.....	2763
Discrepancy Line Items Characteristics Zone.....	2763
Discrepancy Report - Log.....	2763
Discrepancy Report Log.....	2763
Editing a Discrepancy Line Item.....	2764
Deleting a Discrepancy Report.....	2765
Finalizing a Discrepancy Report.....	2766
Adding a Log Entry for a Discrepancy Report.....	2766
Viewing the Log of a Discrepancy Report.....	2767
Member Reconciliation Preference.....	2767
Searching for a Member Reconciliation Preference.....	2768
Viewing the Member Reconciliation Preference Details.....	2768
Defining a Member Reconciliation Preference.....	2769
Editing a Member Reconciliation Preference.....	2775
Copying a Member Reconciliation Preference.....	2781

## **Chapter 35: Self-Funded Pricing..... 2789**

Prerequisites.....	2791
Approval Workflow for the Self-Funded Pricing Rules.....	2791
Line Item Extendable Lookup.....	2792
Extendable Lookup Search.....	2793
Searching for the Line Item Extendable Lookup.....	2794
Viewing the Values of the Line Item Extendable Lookup.....	2795
Extendable Lookup (Line Item).....	2795
Extendable Lookup Value List.....	2795
Extendable Lookup Value.....	2796
Defining a Line Item.....	2799
Associating a Line Item with a Pricing Rule Type Category.....	2802
Defining the Markup or Markdown Billing Information for the Line Items.....	2804
Defining Line Item Billing Information for the Line Items.....	2805
Defining the Claim Handling Fees Billing Information for the Line Items.....	2806
Editing a Line Item.....	2809
Copying a Line Item.....	2812
Deleting a Line Item.....	2815
Viewing the Line Item Details.....	2815
Claim Template Extendable Lookup.....	2816
Extendable Lookup Search.....	2817
Searching for the Claim Template Extendable Lookup.....	2818
Viewing the Values of the Claim Template Extendable Lookup.....	2818
Extendable Lookup (Claim Template).....	2819
Extendable Lookup Value List.....	2819
Extendable Lookup Value.....	2820

Defining a Claim Template.....	2824
Defining the Claim Handling Fees for Line Items in the Claim Template.....	2826
Defining the Default Markup or Markdown Values for Line Items in a Claim Template..	2829
Adding a Line Item in a Claim Template.....	2830
Editing a Claim Template.....	2833
Copying a Claim Template.....	2835
Deleting a Claim Template.....	2837
Viewing the Claim Template Details.....	2838
Rate Option Extendable Lookup.....	2838
Extendable Lookup Search.....	2839
Searching for the Rate Option Extendable Lookup.....	2840
Viewing the Values of the Rate Option Extendable Lookup.....	2840
Extendable Lookup (Rate Option).....	2841
Extendable Lookup Value List.....	2841
Extendable Lookup Value.....	2842
Defining a Rate Option.....	2844
Editing a Rate Option.....	2847
Copying a Rate Option.....	2850
Deleting a Rate Option.....	2853
Viewing the Rate Option Details.....	2854
Rate Type Extendable Lookup.....	2854
Extendable Lookup Search.....	2855
Searching for the Rate Type Extendable Lookup.....	2856
Viewing the Values of the Rate Type Extendable Lookup.....	2856
Extendable Lookup (Rate Type).....	2857
Extendable Lookup Value List.....	2857
Extendable Lookup Value.....	2858
Defining a Rate Type.....	2859
Editing a Rate Type.....	2861
Copying a Rate Type.....	2864
Deleting a Rate Type.....	2866
Viewing the Rate Type Details.....	2866
Pricing Group.....	2867
Viewing the Pricing Groups of a Bill Group.....	2867
Defining a Pricing Group for a Bill Group.....	2868
Editing a Pricing Group of a Bill Group.....	2871
Deleting a Pricing Group of a Bill Group.....	2874
Copying a Pricing Group of a Bill Group.....	2875
Pricing Rule Type.....	2878
Pricing Rule Type List.....	2879
Pricing Rule Type.....	2882
Claim Pricing.....	2891
Defining a Claim Pricing Rule Type.....	2893
Adding Related Pricing Rule Types in a Primary Pricing Rule Type.....	2896
Defining Transaction Field Mapping in a Primary Pricing Rule Type.....	2898
Associating Algorithms with a Pricing Rule Type.....	2906
Defining Additional Data for a Pricing Rule Type.....	2908
Adding Price Items in a Pricing Rule Type.....	2910
Adding a Price Item Parameter in a Pricing Rule Type.....	2914
Defining a Characteristic for a Pricing Rule Type.....	2916
Adding Claim Templates in a Claim Pricing Rule Type.....	2918
Adding the Claim-Specific Data in a Pricing Rule Type.....	2919
Adding Claim Handling Fees Indicator in a Claim Pricing Rule Type.....	2920
Editing a Claim Pricing Rule Type.....	2921
Deleting a Claim Pricing Rule Type.....	2924
Viewing the Claim Pricing Rule Type Details.....	2925

Defining a Claim Pricing Rule for a Parent Customer.....	2925
Defining the Claim Handling Fees For Line Items in a Claim Pricing Rule.....	2928
Defining the Markup or Markdown Values For Line Items in a Claim Pricing Rule.....	2929
Defining the Markup or Markdown Values for Line Items for Each Rule in a Claim Pricing Rule.....	2931
Defining the Line Items in a Claim Pricing Rule.....	2933
Defining a Characteristic for a Claim Pricing Rule.....	2936
Editing a Claim Pricing Rule of a Parent Customer.....	2937
Viewing a Claim Pricing Rule of a Parent Customer.....	2939
Deleting a Claim Pricing Rule of a Parent Customer.....	2940
Defining a Claim Pricing Rule for a Bill Group.....	2941
Defining a Claim Pricing Rule for a Bill Group Using a Pricing Group.....	2944
Editing a Claim Pricing Rule of a Bill Group.....	2947
Viewing a Claim Pricing Rule of a Bill Group.....	2949
Deleting a Claim Pricing Rule of a Bill Group.....	2950
Specific Stop-Loss (SSL) Pricing.....	2950
Defining a Specific Stop-Loss (SSL) Pricing Rule Type.....	2953
Adding the SSL-Specific Data in a Pricing Rule Type.....	2956
Editing a Specific Stop-Loss (SSL) Pricing Rule Type.....	2958
Deleting a Specific Stop-Loss (SSL) Pricing Rule Type.....	2961
Viewing the Specific Stop-Loss (SSL) Pricing Rule Type Details.....	2962
Defining a Specific Stop-Loss Pricing Rule for a Parent Customer.....	2962
Defining Accumulation Parameters in a Specific Stop-Loss Pricing Rule.....	2966
Defining Run-in Parameters in a Specific Stop-Loss Pricing Rule.....	2968
Defining Lasering and Exclusion Information in a Specific Stop-Loss Pricing Rule.....	2969
Defining a Characteristic for a Specific Stop-Loss Pricing Rule.....	2971
Editing a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2972
Viewing a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2974
Deleting a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2975
Defining a Specific Stop-Loss Pricing Rule for a Bill Group.....	2976
Defining Accumulation Criteria in a Specific Stop-Loss Pricing Rule.....	2979
Defining Claim Pricing Information in a Specific Stop Loss Pricing Rule.....	2982
Defining a Specific Stop-Loss Pricing Rule for a Bill Group Using a Pricing Group.....	2984
Editing a Specific Stop-Loss Pricing Rule of a Bill Group.....	2986
Viewing a Specific Stop-Loss Pricing Rule of a Bill Group.....	2988
Deleting a Specific Stop-Loss Pricing Rule of a Bill Group.....	2989
Aggregate Stop-Loss (ASL) Pricing.....	2990
Defining a Aggregate Stop-Loss (ASL) Pricing Rule Type.....	2992
Adding the ASL-Specific Data in a Pricing Rule Type.....	2995
Editing an Aggregate Stop-Loss (ASL) Pricing Rule Type.....	2998
Deleting an Aggregate Stop-Loss (ASL) Pricing Rule Type.....	3001
Viewing the Aggregate Stop-Loss (ASL) Pricing Rule Type Details.....	3001
Defining an Aggregate Stop-Loss Pricing Rule for a Parent Customer.....	3002
Defining Accumulation Parameters in an Aggregate Stop-Loss Pricing Rule.....	3005
Defining Run-in Parameters in an Aggregate Stop-Loss Pricing Rule.....	3009
Defining a Characteristic for an Aggregate Stop-Loss Pricing Rule.....	3010
Editing an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	3012
Viewing an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	3014
Deleting an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	3015
Defining an Aggregate Stop-Loss Pricing Rule for a Bill Group.....	3015
Defining Accumulation Criteria in an Aggregate Stop-Loss Pricing Rule.....	3018
Defining Claim Pricing Rules in an Aggregate Stop-Loss Pricing Rule.....	3022
Defining an Aggregate Stop-Loss Pricing Rule for a Bill Group Using a Pricing Group...	3024
Editing an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	3026
Viewing an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	3028
Deleting an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	3029

Retention Type Claim Based Pricing.....	3030
Defining a Retention Type Claim Based Pricing Rule Type.....	3031
Adding Claim Based Disposition Details in a Pricing Rule Type.....	3034
Editing a Retention Type Claim Based Pricing Rule Type.....	3035
Deleting a Retention Type Claim Based Pricing Rule Type.....	3038
Viewing the Retention Type Claim Based Pricing Rule Type Details.....	3038
Defining a Retention Type Claim Based Pricing Rule for a Parent Customer.....	3039
Defining a Characteristic for a Retention Type Claim Based Pricing Rule.....	3045
Editing a Retention Type Claim Based Pricing Rule of a Parent Customer.....	3046
Deleting a Retention Type Claim Based Pricing Rule of a Parent Customer.....	3053
Defining a Retention Type Claim Based Pricing Rule for a Bill Group.....	3053
Defining a Characteristic for a Retention Type Claim Based Pricing Rule.....	3056
Editing a Retention Type Claim Based Pricing Rule of a Bill Group.....	3057
Deleting a Retention Type Claim Based Pricing Rule of a Bill Group.....	3060
Defining a Retention Type Claim Based Pricing Rule for a Bill Group Using a Pricing Group.....	3061
Defining a Characteristic for a Retention Type Claim Based Pricing Rule for a Bill Group Using a Pricing Group.....	3064
Viewing a Retention Type Claim Based Pricing Rule of a Parent Customer.....	3065
Viewing a Retention Type Claim Based Pricing Rule of a Bill Group.....	3066
Retention Type Enrollment Based Pricing.....	3066
Defining a Retention Type Enrollment Based Pricing Rule Type.....	3068
Adding the Enrollment Specific Data in a Pricing Rule Type.....	3071
Editing a Retention Type Enrollment Based Pricing Rule Type.....	3072
Deleting a Retention Type Enrollment Based Pricing Rule Type.....	3074
Viewing the Retention Type Enrollment Based Pricing Rule Type Details.....	3075
Defining a Retention Type Enrollment Based Pricing Rule for a Parent Customer.....	3075
Defining a Characteristic for a Retention Type Enrollment Based Pricing Rule.....	3081
Editing a Retention Type Enrollment Based Pricing Rule of a Parent Customer.....	3082
Deleting a Retention Type Enrollment Based Pricing Rule of a Parent Customer.....	3085
Defining a Retention Type Enrollment Based Pricing Rule for a Bill Group.....	3086
Defining a Characteristic for a Retention Type Enrollment Based Pricing Rule.....	3089
Editing a Retention Type Enrollment Based Pricing Rule of a Bill Group.....	3090
Deleting a Retention Type Enrollment Based Pricing Rule of a Bill Group.....	3093
Defining a Retention Type Enrollment Based Pricing Rule for a Bill Group Using a Pricing Group.....	3094
Defining a Characteristic for a Retention Type Enrollment Based Pricing Rule for a Bill Group Using a Pricing Group.....	3097
Viewing a Retention Type Enrollment Based Pricing Rule of a Parent Customer.....	3099
Viewing a Retention Type Enrollment Based Pricing Rule of a Bill Group.....	3099
Flat Fee Pricing.....	3100
Defining a One-Time Flat Fee Pricing Rule Type.....	3102
Adding the One-Time Flat Fee Specific Data in a Pricing Rule Type.....	3105
Editing a One-Time Flat Fee Pricing Rule Type.....	3106
Deleting a One-Time Flat Fee Pricing Rule Type.....	3109
Viewing the One-Time Flat Fee Pricing Rule Type Details.....	3110
Defining a One-Time Flat Fee Pricing Rule for a Bill Group.....	3110
Defining a Characteristic for a One-Time Flat Fee Pricing Rule.....	3113
Editing a One-Time Flat Fee Pricing Rule of a Bill Group.....	3114
Viewing a One-Time Flat Fee Pricing Rule of a Bill Group.....	3116
Deleting a One-Time Flat Fee Pricing Rule of a Bill Group.....	3117
Defining a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	3117
Adding the Recurring Flat Fee Specific Data in a Pricing Rule Type.....	3121
Editing a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	3122
Deleting a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	3125
Viewing the Bill Period Based Recurring Flat Fee Pricing Rule Type Details.....	3126

Defining a Bill Period Based Recurring Flat Fee Pricing Rule for a Bill Group.....	3126
Defining a Characteristic for a Bill Period Based Recurring Flat Fee Pricing Rule.....	3129
Editing a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	3130
Viewing a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	3132
Deleting a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	3133
Defining a Frequency Based Recurring Flat Fee Pricing Rule Type.....	3133
Adding the Recurring Flat Fee Specific Data in a Pricing Rule Type.....	3136
Editing a Frequency Based Recurring Flat Fee Pricing Rule Type.....	3138
Deleting a Frequency Based Recurring Flat Fee Pricing Rule Type.....	3141
Viewing the Frequency Based Recurring Flat Fee Pricing Rule Type Details.....	3141
Defining a Frequency Based Recurring Flat Fee Pricing Rule for a Bill Group.....	3142
Defining a Characteristic for a Frequency Based Recurring Flat Fee Pricing Rule.....	3145
Editing a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	3146
Viewing a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	3148
Deleting a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	3148
Ancillary Pricing.....	3149
Defining an Ancillary Pricing Rule Type.....	3152
Adding a Related Pricing Rule Type in an Ancillary Pricing Rule Type.....	3157
Mapping the Transaction Field in an Ancillary Pricing Rule Type.....	3159
Associating an Algorithm with an Ancillary Pricing Rule Type.....	3163
Defining Additional Data in an Ancillary Pricing Rule Type.....	3166
Adding a Price Item in an Ancillary Pricing Rule Type.....	3170
Adding a Price Item Parameter in an Ancillary Pricing Rule Type.....	3173
Defining the Ancillary-Specific Data in an Ancillary Pricing Rule Type.....	3175
Defining Pricing Arrangements in an Ancillary Pricing Rule Type.....	3177
Defining a Characteristic for a Ancillary Pricing Rule Type.....	3178
Editing an Ancillary Pricing Rule Type.....	3179
Deleting an Ancillary Pricing Rule Type.....	3183
Viewing the Ancillary Pricing Rule Type Details.....	3184
Defining an Ancillary Pricing Rule for a Parent Customer.....	3184
Viewing an Ancillary Pricing Rule of a Parent Customer.....	3188
Defining a Characteristic for an Ancillary Pricing Rule.....	3189
Editing an Ancillary Pricing Rule of a Parent Customer.....	3190
Deleting an Ancillary Pricing Rule of a Parent Customer.....	3193
Defining an Ancillary Pricing Rule for a Bill Group.....	3194
Viewing an Ancillary Pricing Rule of a Bill Group.....	3197
Defining a Characteristic for an Ancillary Pricing Rule.....	3198
Editing an Ancillary Pricing Rule of a Bill Group.....	3200
Deleting an Ancillary Pricing Rule of a Bill Group.....	3203
Discount Pricing.....	3203
Types of Discount Arrangement.....	3204
Discount Share.....	3204
Discount Guarantee.....	3204
Defining a Discount Arrangement Pricing Rule Type.....	3204
Associating Algorithms with a Discount Arrangement Pricing Rule Type.....	3208
Defining Additional Data in a Discount Arrangement Pricing Rule Type.....	3212
Adding a Price Item in a Discount Arrangement Pricing Rule Type.....	3214
Adding a Price Item Parameter in a Discount Arrangement Pricing Rule Type.....	3218
Defining a Characteristic for a Discount Arrangement Pricing Rule Type.....	3219
Defining the Discount Specific Data in a Discount Arrangement Pricing Rule Type.....	3221
Editing a Discount Arrangement Pricing Rule Type.....	3224
Deleting a Discount Arrangement Pricing Rule Type.....	3227
Viewing the Discount Arrangement Pricing Rule Type Details.....	3227
Defining a Discount Arrangement Pricing Rule for a Parent Customer.....	3228
Adding the Discount Details in a Discount Arrangement Pricing Rule .....	3231
Defining the Discount Limits in a Discount Arrangement Pricing Rule.....	3232

Excluding a Network or Provider in a Discount Arrangement Pricing Rule.....	3234
Defining a Characteristic for a Discount Arrangement Pricing Rule.....	3235
Editing a Discount Arrangement Pricing Rule of a Parent Customer.....	3237
Deleting a Discount Arrangement Pricing Rule of a Parent Customer.....	3239
Viewing the Discount Arrangement Pricing Rule Details of a Parent Customer.....	3239
Write-Off Charges during Post Runout.....	3240
Level Funding Pricing.....	3240
Defining a Level Funded Pricing Rule Type.....	3244
Associating an Algorithm with a Level Funded Pricing Rule Type.....	3246
Defining Additional Data in a Level Funded Pricing Rule Type.....	3248
Adding a Price Item in a Level Funded Pricing Rule Type.....	3250
Adding a Price Item Parameter in a Level Funded Pricing Rule Type.....	3254
Defining a Characteristic for a Level Funded Pricing Rule Type.....	3255
Defining the Level Funded Specific Additional Data in a Level Funded Pricing Rule Type.....	3256
Editing a Level Funded Pricing Rule Type.....	3263
Deleting a Level Funded Pricing Rule Type.....	3265
Viewing the Level Funded Pricing Rule Type Details.....	3266
Defining a Level Funded Pricing Rule for a Parent Customer.....	3266
Editing a Level Funded Pricing Rule of a Parent Customer.....	3269
Deleting a Level Funded Pricing Rule of a Parent Customer.....	3272
Viewing the Details of a Level Funded Pricing Rule Defined for a Policy of a Parent Customer.....	3273
Defining Accumulation Parameters in a Level Funded Pricing Rule.....	3273
Defining the Final Settlement Rules in a Level Funded Pricing Rule.....	3275
Defining a Characteristic for a Level Funded Pricing Rule.....	3284
Defining a Level Funded Pricing Rule for a Bill Group.....	3285
Editing a Level Funded Pricing Rule of a Bill Group.....	3288
Defining Accumulation Criteria in a Level Funded Pricing Rule.....	3291
Defining Claim Pricing Information in a Level Funded Pricing Rule.....	3295
Defining Ancillary Pricing Information in a Level Funded Pricing Rule.....	3299
Defining Discount Arrangement Pricing Information in a Level Funded Pricing Rule.....	3303
Defining Retention Type Claim Based and/or Retention Type Enrollment Based Pricing Rule Information in a Level Funded Pricing Rule.....	3304
Defining a Characteristic for a Level Funded Pricing Rule.....	3305
Terminal Liability Reserve (Run Out) Level Funding Pricing.....	3307
Write-Off Charges during Post Runout.....	3308
Pricing Rule (Used for Viewing).....	3308
Claim.....	3309
Aggregate Stop-Loss.....	3313
Specific Stop-Loss.....	3319
Retention Type Claim Based.....	3326
Retention Type Enrollment Based.....	3327
Flat Fee.....	3329
Ancillary.....	3331
Discount Arrangement.....	3333
Level Funded.....	3336
Age Based Pricing Rule.....	3342
Tier Based Pricing Rule.....	3344
Additional Charge Pricing Rule.....	3346
Self-Funded Pricing Rule Versioning.....	3348

## **Chapter 36: Stop-Loss..... 3351**

Accumulation Data.....	3352
------------------------	------

**Chapter 37: Self-Funded Billing..... 3353**

Pre-requisites.....	3355
Bill Group Derivation and Pricing Parameters.....	3356
Related Pricing Rule Type Eligibility.....	3359
Price Item Eligibility.....	3360
Self-Funded Billing Process.....	3362
Transaction Aggregation.....	3362
Stop Loss Calculation.....	3367
Bill Generation.....	3367
Bill Group Derivation.....	3368
Account and Price Item Derivation (for the Claim Pricing Rule Type Category).....	3371
Account and Price Item Derivation (for the Specific Stop-Loss and Aggregate Stop-Loss Pricing Rule Type Categories).....	3376
Account and Price Item Derivation (for the Retention Type Claim Based Pricing Rule Type Category).....	3390
Account and Price Item Derivation (for the Retention Type Enrollment Based Pricing Rule Type Category).....	3403
Account and Price Item Derivation (for the Ancillary Pricing Rule Type Category).....	3415
Bill After Date Determination.....	3423
Advance Billing for Claim Fund Charge.....	3424
SSL Accumulation across Bill Groups.....	3425

**Chapter 38: Fully-Insured Pricing.....3427**

Age Based Pricing.....	3428
Defining an Age Based Pricing Rule Type.....	3431
Adding the Related Pricing Rule Types in an Age Based Pricing Rule Type.....	3434
Associating an Algorithm with an Age Based Pricing Rule Type.....	3435
Adding a Price Item in an Age Based Pricing Rule Type.....	3438
Adding a Price Item Parameter in an Age Based Pricing Rule Type.....	3442
Defining a Characteristic for an Age Based Pricing Rule Type.....	3443
Adding Elements for Audit in an Age Based Pricing Rule Type.....	3444
Defining an Age Based Specific Additional Data in an Age Based Pricing Rule Type.....	3445
Mapping Characteristic Attributes in an Age Based Pricing Rule Type.....	3446
Editing an Age Based Pricing Rule Type.....	3447
Deleting an Age Based Pricing Rule Type.....	3450
Viewing the Age Based Pricing Rule Type Details.....	3451
Tier Based Pricing.....	3451
Defining a Tier Based Pricing Rule Type.....	3454
Adding the Related Pricing Rule Types in a Tier Based Pricing Rule Type.....	3456
Associating an Algorithm with a Tier Based Pricing Rule Type.....	3458
Adding a Price Item in a Tier Based Pricing Rule Type.....	3460
Adding a Price Item Parameter in a Tier Based Pricing Rule Type.....	3464
Defining a Characteristic for a Tier Based Pricing Rule Type.....	3465
Adding Elements for Audit in a Tier Based Pricing Rule Type.....	3466
Editing a Tier Based Pricing Rule Type.....	3467
Deleting a Tier Based Pricing Rule Type.....	3470
Viewing the Tier Based Pricing Rule Type Details.....	3470
Pass-Through Billable Charge.....	3471
Defining a Pass-Through Billable Charge Pricing Rule Type.....	3472
Associating an Algorithm with a Pass-Through Billable Charge Pricing Rule Type.....	3474
Adding a Price Item in a Pass-Through Billable Charge Pricing Rule Type.....	3476
Adding a Price Item Parameter in a Pass-Through Billable Charge Pricing Rule Type.....	3480
Defining a Characteristic for a Pass-Through Billable Charge Pricing Rule Type.....	3481

Editing a Pass-Through Billable Charge Pricing Rule Type.....	3482
Deleting a Pass-Through Billable Charge Pricing Rule Type.....	3484
Viewing the Pass-Through Billable Charge Pricing Rule Type Details.....	3485
Administration Fee Pricing for COBRA Membership.....	3486
Defining an Additional Charge Pricing Rule Type.....	3487
Associating an Algorithm with an Additional Charge Pricing Rule Type.....	3490
Adding a Price Item in an Additional Charge Pricing Rule Type.....	3493
Adding a Price Item Parameter in an Additional Charge Pricing Rule Type.....	3496
Defining a Characteristic for an Additional Charge Pricing Rule Type.....	3497
Adding Elements for Audit in an Additional Charge Pricing Rule Type.....	3498
Editing an Additional Charge Pricing Rule Type.....	3500
Deleting an Additional Charge Pricing Rule Type.....	3502
Viewing the Additional Charge Pricing Rule Type Details.....	3503
Medicare Part D LIS and LEP Pricing.....	3503
Defining a Benefit Pricing Rule Type.....	3504
Associating Algorithms with a Benefit Pricing Rule Type.....	3506
Adding a Price Item in a Benefit Pricing Rule Type.....	3508
Adding a Price Item Parameter in a Benefit Pricing Rule Type.....	3511
Defining a Characteristic for a Benefit Pricing Rule Type.....	3512
Adding Elements for Audit in a Benefit Pricing Rule Type.....	3513
Editing a Benefit Pricing Rule Type.....	3514
Deleting a Benefit Pricing Rule Type.....	3516
Viewing the Benefit Pricing Rule Type Details.....	3517
Discount Charge Pricing for Retiree Membership.....	3518
Prerequisites.....	3519
Discount Charge Pricing Rule.....	3519
Defining a Discount Charge Pricing Rule Type.....	3521
Associating an Algorithm with a Discount Charge Pricing Rule Type.....	3524
Adding a Price Item in a Discount Charge Pricing Rule Type.....	3526
Adding a Price Item Parameter in a Discount Charge Pricing Rule Type.....	3530
Defining a Characteristic for a Discount Charge Pricing Rule Type.....	3531
Adding Elements for Audit in a Discount Charge Pricing Rule Type.....	3532
Editing a Discount Charge Pricing Rule Type.....	3534
Deleting a Discount Charge Pricing Rule Type.....	3536
Viewing the Discount Charge Pricing Rule Type Details.....	3537
Viewing the Discount Charge Pricing Rule Details.....	3538
Pricing Rule Inactivation.....	3539

## **Chapter 39: Fully-Insured Group Billing..... 3541**

Audit Framework for Fully-Insured Group Health Insurance Billing.....	3543
Age Based and Tier Based Pricing Rules Audit Process.....	3544
Membership Audit Process.....	3545
Person Audit Process.....	3551
Medicare Benefit Audit Process.....	3553
Bill Group Derivation and Pricing Parameters Audit Process.....	3553
Premium Proration Rules.....	3556
Age Monitoring.....	3558
State of Issue.....	3559
Membership Premium Calculation.....	3560
Bill Group Derivation for Membership.....	3565
Account and Price Item Derivation for Membership.....	3568
Bill Cycle and Bill Period Derivation.....	3568
Bill Period Timeline.....	3569
9/10 Billing (Skip Months).....	3570
Repricing.....	3570

Fully-Insured Group Billable Charge Creation.....	3571
Repricing Request.....	3573
Search Repricing Entity Detail Record.....	3574
Repricing Requests.....	3576
Timeline and Billable Charge Details.....	3577
Pricing Calculation Details.....	3578
Searching for a Repricing Entity Detail Record.....	3579
Viewing the Repricing Requests Created for a Repricing Entity Detail Record.....	3579
Viewing the Billable Charge Timeline Details of a Repricing Request.....	3580
Viewing the Pricing Calculation Details of a Timeline.....	3580
Membership Premium Calculation Through Inbound Web Service.....	3581
Prerequisites.....	3581
C1-MembershipRepricing Business Service.....	3583
C1-MembRepricing Business Service Schema.....	3584
Membership Premium Calculation Request and Response - Tags in XML Format.....	3588
Sample Individual Membership Creation Request and Response in XML Format.....	3616
Sample Group Membership Creation Request and Response in XML Format.....	3621
Sample Group Membership Read Request and Response in XML Format.....	3625
Sample Individual Membership Read Request and Response in XML Format.....	3630
Sample Member Person Creation Read Request and Response in XML Format.....	3634
Sample Individual Membership Premium Simulation Request and Response in XML Format.....	3638
Sample Group Membership Premium Simulation Request and Response in XML Format.....	3643
Sample Account Balance Read Request and Response in XML Format.....	3647

## **Chapter 40: Off-Process Request..... 3653**

Prerequisites.....	3656
Off-Process Request (Without Approval) Status Transition.....	3656
Off-Process Request (With Approval) Status Transition.....	3656
Algorithms Used in C1-OffProcessRequest.....	3657
Off-Process Request Type.....	3657
Off-Process Request Type List.....	3658
Off-Process Request Type.....	3658
Defining an Off-Process Request Type.....	3661
Adding the Accumulation Amendment Details in an Off-Process Request Type.....	3664
Defining a Characteristic for an Off-Process Request Type.....	3665
Editing an Off-Process Request Type.....	3666
Deleting an Off-Process Request Type.....	3669
Copying an Off-Process Request Type.....	3670
Viewing the Off-Process Request Type Details.....	3673
Off-Process Request (Used for Searching).....	3673
Search Off-Process Request.....	3673
Searching for an Off-Process Request.....	3676
Defining an Off-Process Request.....	3677
Viewing the Off-Process Request Details of an Off-Process Request.....	3678
Off-Process Request (Used for Viewing).....	3679
Off-Process Request - Main.....	3679
Off-Process Request.....	3680
Off-Process Request Details.....	3682
Off-Process Request Error Message.....	3683
Off-Process Request - Log.....	3684
Off-Process Request Log.....	3684
Viewing the Error Message of an Off-Process Request.....	3685
Adding the Off-Process Request Details in an Off-Process Request.....	3685

Defining a Characteristic for an Off-Process Request.....	3689
Editing an Off-Process Request.....	3690
Deleting an Off-Process Request.....	3691
Submitting an Off-Process Request.....	3691
Approving an Off-Process Request.....	3692
Rejecting an Off-Process Request.....	3693
Viewing the Log of an Off-Process Request.....	3695
Adding a Log Entry for an Off-Process Request.....	3696

Audit Event.....	3779
Audit Event - Log.....	3780
Audit Event Log.....	3780
Canceling an Audit Event.....	3781
Viewing the Log of an Audit Event.....	3782

## **Chapter 44: Invoice Request..... 3783**

Prerequisites.....	3786
Types of Invoice Request.....	3786
Manual Regular Bill Generation Invoice Request.....	3786
Manual Trial Bill Generation Invoice Request.....	3788
Automatic Regular Bill Generation Invoice Request.....	3788
Invoice Request Manual Trial Bill Generation (Without Approval) Status Transition.....	3790
Invoice Request Manual Regular Bill Generation (Without Approval) Status Transition.....	3794
Invoice Request Manual Regular Bill Generation (With Approval) Status Transition.....	3800
Invoice Request Automatic Regular Bill Generation (Without Approval) Status Transition.....	3805
Invoice Request Type.....	3808
Invoice Request Type List.....	3808
Invoice Request Type.....	3809
Defining an Invoice Request Type.....	3813
Defining a Characteristic for an Invoice Request Type.....	3818
Editing an Invoice Request Type.....	3819
Deleting an Invoice Request Type.....	3825
Copying an Invoice Request Type.....	3825
Viewing the Invoice Request Type Details.....	3831
Invoice Request (Used for Searching).....	3831
Search Invoice Request.....	3831
Searching for an Invoice Request.....	3836
Manually Creating an Invoice Request.....	3837
Viewing the Invoice Request Details.....	3839
Invoice Request (Used for Viewing).....	3839
Invoice Request - Main.....	3840

Invoice Request.....	3840
Invoice Request Details/Account List.....	3843
Excluded Accounts.....	3844
Invoice Request - Log.....	3845
Invoice Request Log.....	3845
Editing an Invoice Request.....	3846
Defining a Characteristic for an Invoice Request.....	3848
Deleting an Invoice Request.....	3849
Canceling an Invoice Request.....	3850
Submitting an Invoice Request.....	3850
Approving an Invoice Request.....	3852
Rejecting an Invoice Request.....	3853
Requesting to Resubmit an Invoice Request.....	3854
Viewing the Log of an Invoice Request.....	3856
Adding a Log Entry for an Invoice Request.....	3856

## **Chapter 45: Hold Request Creation, Modification, Release, and View**

### **Through Inbound Web Service..... 3859**

Prerequisites.....	3861
C1-CreateHoldRequest Business Service.....	3862
Hold Request Creation Request in the XML Format.....	3863
Hold Request Creation Response in the XML Format.....	3864
Hold Request Creation Request and Response - Tags in XML Format.....	3865
Hold Request Creation Request in the JSON Format.....	3870
Hold Request Creation Response in the JSON Format.....	3871
Hold Request Creation Request and Response - Attribute/Value Pairs in JSON Format.....	3872
Sample Hold Request Creation Request and Response in the XML Format.....	3876
Sample Hold Request Creation Request and Response in the JSON Format.....	3878
C1-GetHoldRequestHistory Business Service.....	3880
Hold Request View Request in the XML Format.....	3881
Hold Request View Response in the XML Format.....	3882
Hold Request View Request and Response - Tags in XML Format.....	3882
Hold Request View Request in the JSON Format.....	3885
Hold Request View Response in the JSON Format.....	3886
Hold Request View Request and Response - Attribute/Value Pairs in JSON Format.....	3887
Sample Hold Request View Request and Response in the XML Format.....	3890
Sample Hold Request View Request and Response in the JSON Format.....	3892
C1-ReleaseHoldRequest Business Service.....	3894
Hold Request Release Request in the XML Format.....	3894
Hold Request Release Response in the XML Format.....	3895
Hold Request Release Request and Response - Tags in XML Format.....	3895
Hold Request Release Request in the JSON Format.....	3897
Hold Request Release Response in the JSON Format.....	3898
Hold Request Release Request and Response - Tags in JSON Format.....	3898
Sample Hold Request Release Request and Response in the XML Format.....	3900
Sample Hold Request Release Request and Response in the JSON Format.....	3901
C1-UpdateHoldRequest Business Service.....	3902
Hold Request Update Request in the XML Format.....	3903
Hold Request Update Response in the XML Format.....	3904
Hold Request Update Request and Response - Tags in XML Format.....	3904
Hold Request Update Request in the JSON Format.....	3908
Hold Request Update Response in the JSON Format.....	3909
Hold Request Update Request and Response - Tags in JSON Format.....	3910
Sample Hold Request Update Request and Response in the XML Format.....	3914
Sample Hold Request Update Request and Response in the JSON Format.....	3916

**Chapter 46: Hold Direct Debit Instruction..... 3919**

Prerequisites.....	3921
Algorithms Used in C1-AutoPayRequest.....	3921
C1-APAYRQINF.....	3922
F1-TODOCOMPL.....	3922
C1-APAYSUB.....	3922
C1-APAYAPP.....	3922
C1-UPDAPAY.....	3922
C1-APAYAPRVD.....	3923
C1-APAYRESUB.....	3923
Auto Pay Request Status Transition without Approval.....	3923
Auto Pay Request Status Transition with Approval.....	3924
Auto Pay Request Type.....	3924
Auto Pay Request Type List.....	3925
Auto Pay Request Type.....	3925
Defining an Auto Pay Request Type.....	3928
Defining a Characteristic for an Auto Pay Request Type.....	3931
Editing an Auto Pay Request Type.....	3932
Copying an Auto Pay Request Type.....	3935
Deleting an Auto Pay Request Type.....	3938
Viewing the Auto Pay Request Type Details.....	3938
Auto Pay Request (Used for Searching).....	3939
Search Auto Pay Request.....	3939
Searching for an Auto Pay Request.....	3943
Creating an Auto Pay Request.....	3943
Viewing the Auto Pay Request Details.....	3944
Auto Pay Request (Used for Viewing).....	3945
Auto Pay Request - Main.....	3945
Auto Pay Request.....	3945
Auto Pay Details.....	3947
Auto Pay Request - Bills.....	3948
Search Bills.....	3948
Auto Pay Line Items.....	3950
Auto Pay Request - Log.....	3951
Auto Pay Request Log.....	3951
Defining a Characteristic for an Auto Pay Request.....	3951
Editing the Auto Pay Request Details.....	3953
Deleting an Auto Pay Request.....	3954
Submitting an Auto Pay Request.....	3954
Approving an Auto Pay Request.....	3955
Rejecting an Auto Pay Request.....	3956
Resubmitting an Auto Pay Request for Approval.....	3956
Searching for a Bill.....	3957
Adding an Auto Pay Line Item in an Auto Pay Request.....	3957
Deleting an Auto Pay Line Item from an Auto Pay Request.....	3958
Editing the Auto Pay Line Item Details in an Auto Pay Request.....	3959
Viewing the Log of an Auto Pay Request.....	3960
Adding a Log Entry for an Auto Pay Request.....	3961

**Chapter 47: Garbling Customer Information..... 3963**

<b>Chapter 48: Deleting Inactive Customer or Closed Account Information.....</b>	<b>3965</b>
<b>Chapter 49: Automatic Refund.....</b>	<b>3967</b>
<b>Chapter 50: Payment Distribution.....</b>	<b>3969</b>
Account Level Payment Distribution.....	3970
Statement Level Payment Distribution.....	3970
<b>Chapter 51: Mass Payment Transfer.....</b>	<b>3973</b>
Full Payment Transfer.....	3974
Partial Payment Transfer.....	3976
Mass Payment Transfer Process.....	3981
Defining a File Request Type for Payment Transfer.....	3981
Uploading a Payment Transfer File.....	3983
Transferring Payments.....	3983
CSV File Format for Mass Payment Transfer.....	3983
Sample CSV File for Mass Payment Transfer.....	3985
<b>Chapter 52: Reporting.....</b>	<b>3987</b>
Report Creation Using Apache FOP Framework.....	3988
Prerequisites.....	3988
PDF Generation Using Apache FOP.....	3988
Excel (XLS) Generation Using XSL Transformation.....	3988
Sample XML Format for FOP Reporting.....	3988
Sample XSL Format for FOP Reporting.....	3989
Create XSL Template for an FOP Report.....	3990
XSL Templates shipped with ORMB.....	3990
Create an Algorithm for an FOP Report.....	3993
Creating a Message for an FOP Report.....	3996
Calling the ORMB FOP Reporting API.....	3997
Setting Master Configuration for Email Notification.....	3997
Creating a Custom Algorithm for FOP Reports.....	3998
Configuring the Custom Algorithm from the User Interface.....	3999
Report Creation.....	4001
Report Search.....	4002
Searching for an FOP Report.....	4003
Defining an FOP Report.....	4003
Editing an FOP Report.....	4007
Deleting an FOP Report.....	4010
Viewing the FOP Report Details.....	4011
Report Audit.....	4011
Report Generation List.....	4012
Downloading an FOP Report.....	4012
Report Generation.....	4013
Generating an FOP Report.....	4013
FOP Reports.....	4014
Adjustment Detail Report.....	4014
Aggregate Stop-Loss Report.....	4015

Entity Hold Detail Report.....	4015
Invoice Aging Report.....	4015
Payment Detail Report for Fully-Insured Individual Business.....	4016
Payment Detail Report for Self-funded and Fully-Insured Group Business.....	4016
Payment Summary Report for Fully-Insured Individual Business.....	4017
Payment Summary Report for Self-funded and Fully-Insured Group Business.....	4017
Specific Stop-Loss Report.....	4018
To Do Report.....	4018
User Access Report.....	4018
Automatic Payment Response Report.....	4019
Binder Payment Report.....	4019
Quick Response Code Generation.....	4019

## **Chapter 53: Automatic Refund/Write Off..... 4021**

Refund/Write Off Business Rules.....	4022
Automatic Refund/Write Off on Terminating a Group Policy or Individual Membership.....	4022
Identify Refund/Write Off Eligibility (C1-RFWO1).....	4023
Automatic Creation of Refund/Write Off (C1-RFWO2).....	4024
Rollback Automatic Refund/Write Off on Reinstating a Group Policy or Individual Membership.....	4025
Automatic Refund/Write Off Preference.....	4027
Searching for an Automatic Refund/Write Off Preference.....	4027
Viewing the Automatic Refund/Write Off Preference Details.....	4028
Defining an Automatic Refund/Write Off Preference.....	4028
Editing an Automatic Refund/Write Off Preference.....	4037
Copying an Automatic Refund/Write Off Preference.....	4046
Deleting an Automatic Refund/Write Off Preference.....	4054
Refund/Write Off Instruction.....	4055
Search Refund/Write Off Instruction.....	4055
Searching for a Refund/Write off Instruction.....	4058

## **Appendix A: Most Commonly Used Tasks..... 4061**

Changing the Layout.....	4062
Adding a Column to the Zone.....	4062
Rearranging Columns in the Zone.....	4062
Removing a Column from the Zone.....	4062

## **Appendix B: Administration.....4065**

UI Maps.....	4066
Creating Display UI Map for an Approval Workflow Group.....	4066
Creating Input UI Map for an Approval Workflow Group.....	4067
Feature Configurations.....	4068
Setting the C1_ACCTINFO Feature Configuration.....	4068
Setting the C1-ASOBLLNG Feature Configuration.....	4070
Setting the C1_AXENTITY Feature Configuration.....	4092
Setting the C1-BILLADJSQ Feature Configuration.....	4096
Setting the C1_CMO Feature Configuration.....	4097
Setting the C1_DIVFUNCT Feature Configuration.....	4100
Setting the C1-EHRCONFIG Feature Configuration.....	4101
Setting the C1_EXCHRATE Feature Configuration.....	4102
Setting the C1_EXP_OVRD Feature Configuration.....	4103
Setting the C1_FINTRANOP Feature Configuration.....	4104
Setting the C1_FM Feature Configuration.....	4112

Setting the C1-OFFSETREQ Feature Configuration.....	4118
Setting the C1-PAYPORTAL Feature Configuration.....	4120
Setting the C1_PER_REL Feature Configuration.....	4122
Setting the C1_PERSTYPE Feature Configuration.....	4123
Setting the C1_PPARAM_FLG Feature Configuration.....	4124
Setting the C1_PR_REC Feature Configuration.....	4125
Setting the C1_PRASNORDR Feature Configuration.....	4126
Setting the C1_PRICING Feature Configuration.....	4127
Setting the C1-PYREQSRT Feature Configuration.....	4129
Setting the C1_RLENG Feature Configuration.....	4130
Setting the C1-TXNDMYID Feature Configuration.....	4131

Setting the C1_REFWO Feature Configuration.....	4134
Setting the C1-PAYFLUPLD Feature Configuration.....	4135
Setting the C1-CFS Feature Configuration.....	4137
Setting the C1-FLUPLD Feature Configuration.....	4138
Setting the C1-REPORTVW Feature Configuration.....	4143

# About this Document

---

This document lists and describes various features in Oracle Revenue Management and Billing which can be used in the health insurance domain. It describes all screens related to these features and explains how to perform various tasks through these screens.

## Intended Audience

---

This document is intended for the following audience:

- End-users
- System Administrators
- Consulting Team
- Implementation Team
- Development Team

## Organization of the Document

---

Each insurance feature is described in a separate chapter in this document. All screens related to the feature and tasks related to the screen are explained in each chapter. This document contains the following chapters:

Chapter Number	Chapter Name	Chapter Description
Chapter 1	Fully-Insured Group Customer Management	Explains how to create customers and accounts for billing the fully-insured group health plans.
Chapter 2	Self-Funded Customer Management	Explains how to create customers and accounts for billing the self-funded plans.
Chapter 3	Health Insurance Business Management	Describes how to setup the pricing and billing engines for the following three lines of health insurance business — <b>Fully-Insured Group Health Insurance, Self-Funded Group Health Insurance, and Individual Health Insurance.</b>
Chapter 4	Fully-Insured Group Health Insurance	Explains how to design the pricing and billing models for the fully-insured group health insurance business in ORMB. It also explains how to create policies, plans, and memberships for the fully-insured group health insurance.
Chapter 5	Self-Funded Group Health Insurance	Explains how to design the pricing and billing models for the self-funded group health insurance business in ORMB. It also explains how to create

Chapter Number	Chapter Name	Chapter Description
		policies for the self-funded group health insurance.
Chapter 6	Individual Health Insurance	Explains how to design the pricing and billing models for the individual health insurance business in ORMB. It also explains how to create health products, plans, and memberships for the individual health insurance.
Chapter 7	Customer Registration	Describes how to create a person, account, policy, and policy plan through a customer registration object.
Chapter 8	Customer 360° View	Explains how to view in-depth information about the person, account, or policy in the <b>Customer 360° View</b> screen. It explains how to create sort records for bill groups and derivation and pricing parameters for bill groups. It explains how to view the pricing rules of a parent customer and the pricing rules defined for a policy of a bill group. It also explains how to define, edit, and delete the different types of pricing rules of a parent customer and bill group. In addition, it explains how to view the detailed information about the bill.
Chapter 9	Health Product 360° View	Explains how to view in-depth information about the health product or health plan in the <b>Health Product 360° View</b> screen.
Chapter 10	Pricing Management (Health Insurance Business)	Explains the different concepts of the pricing model supported in the application. It explains how to define a parameter, price item, price list, and tiering criterion. It also explains how to define pricing for a price item, how to assign a price item to a price list, and how to assign a price list to a person or account.
Chapter 11	Division	Describes the different types of division. It also explains how to define a division.
Chapter 12	Approval Workflow	Describes the approval workflow process and explains how to perform various tasks involved in the process. It explains how to implement the approval workflow process for an entity, such as account, person, and so on. It explains how to

Chapter Number	Chapter Name	Chapter Description
		define an approval workflow group, approval workflow chain, approval workflow criterion type, approval workflow group chain linkage, approval workflow reasons, and approval workflow settings.
Chapter 13	Rules Engine	Describes how the rules engine function. It explains how to define, execute, and maintain business rules separately from the application code.
Chapter 14	Alternate Sequential Bill Numbers	Explains how to generate alternate sequential bill numbers which are either unique throughout the system or within the division.
Chapter 15	Transaction Feed Management	Describes the transaction feed management process and its sub-processes. It explains how to execute each sub-process. It also explains how to view the details of various transactions uploaded in the system. In addition, it explains how to create a transaction source, transaction record type, transaction aggregation rule, aggregation schedule, and disaggregation request.
Chapter 16	Upload Validated Payment Data	Explains how to upload and validate the payment records before you move them to the staging area. It also explains how to create payment events and payments using the validated payment records.
Chapter 17	Freeze Payments on Notification	Explains how the system freezes or cancels the automatic payments, voids the refund requests and cancels the refund adjustments when the review comments are received from the auto clearing house.
Chapter 18	Trial Billing	Explains how to generate trial bills before the actual bill is generated for an account. It also explains how to view the trial bills in the system.
Chapter 19	GL Account Validation	Explains how to enable the static or dynamic GL account validation feature.
Chapter 20	Upload Validated Adjustment Data	Explains how to validate and upload an adjustment data file and create adjustments through an adjustment upload request.

Chapter Number	Chapter Name	Chapter Description
Chapter 21	Payment Request	Explains how to create or transfer payments through a payment request.
Chapter 22	Account Receivable Central	Explains how to use the <b>Account Receivable Central</b> screen to search for a bill which you need to offset against another bill. It explains how to perform single, mass, and cross currency offset against one or more bills. It also enables you to create a hold request, refund request, write off request, and dispute request through this screen.
Chapter 23	Offset Request	Explains how to offset the bill's outstanding amount against one or more bills through an offset request. It explains how to create the offset request types and offset requests in the system.
Chapter 24	Funding Request	Describes how to change the automatic payment amount through the funding process. It explains how to create the funding request types and funding requests in the system.
Chapter 25	Refund/Write Off Request	Describes how to refund a payment or credit bill or bill line item and write off a debit bill or bill line item through a refund or write off request, respectively. It explains how to create the refund or write off request types and refund or write off requests in the system.
Chapter 26	Hold Request	Describes how to hold some processes and/or bills at the account or person level for a time period through a hold request. It explains how to create the hold request types and hold requests in the system.
Chapter 27	Delinquency Central	Explains how to track the overdue processes of a delinquent account through the <b>Delinquency Central</b> screen. It also explains how to create a hold request, payment arrangement, and promise to pay for a delinquent account from this screen.
Chapter 28	Upload Request	Explains how to do the following through an upload request: <ul style="list-style-type: none"> <li>• Update bill cycle of accounts</li> <li>• Update contract riders in contracts</li> </ul>

Chapter Number	Chapter Name	Chapter Description
		<ul style="list-style-type: none"> <li>• Create hold requests, refund requests, write off requests, or billable charges</li> <li>• Reinstate the policies</li> <li>• Create sort records for bill groups</li> <li>• Create derivation and pricing parameters for bill groups</li> </ul>
Chapter 29	General Ledger (GL) Accounting Template	Describes how to override the distribution code used for creating FT GL entries using the <b>GL Accounting Template</b> feature. It explains how to create the GL accounting templates for each process and sub processes combination.
Chapter 30	Payment Agreement Request	Describes how to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. It explains how to create the payment agreement request types and payment agreement requests in the system.
Chapter 31	Inbound Message	Explains how to create the customer and membership inbound messages through the web services. It explains the XML format in which the customer and membership data should be available while calling the respective web service. It also explains how to create the inbound message types and how to process the inbound messages in the system.
Chapter 32	Upload Lockbox Payment and Remittance Advices	Explains how to upload lockbox payment and remittance advices received in the <b>Electronic Data Exchange (EDI) 820</b> format. It also explains the format in which EDI 820 flat file should be uploaded in the system.
Chapter 33	Deferred Revenue Recognition	Describes how to recognize the deferred revenue in the system. It explains how to create a deferred revenue recognition template for each distribution code and contract type combination. It also explains how to generate the schedule for a deferred revenue recognition. In addition, it explains how to edit the deferred revenue recognition schedule.

Chapter Number	Chapter Name	Chapter Description
Chapter 34	Reconciliation	Describes how to reconcile pay instructions received from the external system against the bill segments based on the account identifier, policy number, plan number, member identifier, and coverage period combination. It explains the CSV and EDI 820 file formats in which you can upload the pay instructions. It also explains how to create reconciliation types, reconciliations, discrepancy report types, and discrepancy reports in the system.
Chapter 35	Self-Funded Pricing	Explains how to create the following in the system: <ul style="list-style-type: none"> <li>• Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, One-Time Flat Fees, Bill Period Based Recurring Flat Fees, Frequency Based Recurring Flat Fees, Ancillary, Discount, and Level-Funded pricing rule types</li> <li>• Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, Ancillary, and Level-Funded pricing rules for the parent customers and the policies of the bill groups</li> <li>• One-Time Flat Fees, Bill Period Based Recurring Flat Fees, and Frequency Based Recurring Flat Fees pricing rules for the policies of the bill groups</li> <li>• Discount pricing rules for the parent customers</li> </ul>
Chapter 36	Stop-Loss	Explains how to accumulate the specific stop-loss and aggregate stop-loss and create billable charges for them.
Chapter 37	Self-Funded Billing	Explains the billing process for the self-funded plans.
Chapter 38	Fully-Insured Pricing	Explains how to create the following in the system:

Chapter Number	Chapter Name	Chapter Description
		<ul style="list-style-type: none"> <li>• Age Based, Tier Based, and Pass-Through Billable Charge pricing rule types</li> <li>• Age Based and Tier Based pricing rules for the fully-insured group policy plans</li> </ul>
Chapter 39	Fully-Insured Group Billing	Explains how the system creates the fully-insured pass-through billable charges.
Chapter 40	Off-Process Request	Describes how to amend the agreed limits, funds, or calculated amounts of the accumulation products within the policy period through an off-process request. It explains how to create the off-process request types and off-process requests in the system.
Chapter 41	Individual Health Insurance Pricing	Explains how to define the pricing for different services offered in a health plan.
Chapter 42	Individual Health Insurance Billing	Explains how the system calculates premium for an individual using the fully-insured pricing and new born business rules.
Chapter 43	Entity Audit	Explains how to use the entity audit framework to track various actions, such as add, update, and delete for an entity.
Chapter 44	Invoice Request	Describes how to create adhoc regular and trial bills for an account through an invoice request. It explains how to create the invoice request types and invoice requests in the system.
Chapter 45	Hold Request Creation, Modification, Release, and View Through Inbound Web Service	Lists various business services using which you can create, edit, and release a hold request and view the details of a hold request.
Chapter 46	Hold Direct Debit Instruction	Describes how to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer. It explains how to create the auto pay request types and auto pay requests in the system.
Chapter 47	Garbling Customer Information	Explains how to garble the personal information of a customer, such as the customer name, address, email ID, social security number or any other identifier, birth date, gender, and so

Chapter Number	Chapter Name	Chapter Description
		on, on receiving the data erasure request from the customer.
Chapter 48	Deleting Inactive Customer or Closed Account Information	Explains how to delete all records of a person or account from the system.
Chapter 49	Automatic Refund Process	Explains how the automatic refunds are created in the system.
Chapter 50	Payment Distribution	Explains how the system distributes payments against the unpaid bills of the account or statement.
Chapter 51	Mass Payment Transfer	Explains how the system facilitates mass payment transfer using the <b>File Upload Interface</b> utility.
Chapter 52	FOP Reports	Lists various FOP reports using which you can extract data from the system in the PDF format.
Chapter 53	Automatic Refund/Write Off	Explains how to automatically refund/write off for an account when a fully-insured group policy or individual membership is terminated.
Appendix A	Most Commonly Used Tasks	Lists and describes some of the common tasks that you may perform while using the application.
Appendix B	Administration	Describes how to create UI maps and set various feature configurations in the system.

## Conventions

---

The following conventions are used across this document:

Convention	Meaning
<b>boldface</b>	Boldface indicates graphical user interface elements associated with an action, or terms defined in the text.
<i>italic</i>	Italic indicates a document or book title.
Monospace	Monospace indicates information that an end-user needs to enter in the application.

# Chapter 1

---

## Fully-Insured Group Customer Management

---

### Topics:

- [Fully-Insured Entities](#)

A fully-insured group health plan is the traditional way to structure an employer-sponsored health plan. In the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. The employer pays a premium to the insurance carrier. The premium rates are fixed for a year, based on the number of employees enrolled in the plan each month. The monthly premium changes during the year when the number of enrolled employees in the plan changes. The insurance carrier collects the premiums and pays the health insurance claims based on the coverage benefits outlined in the policy. The covered persons (i.e. employees and dependents) are responsible to pay any deductible amounts or co-payments required for covered services under the policy.

The system enables you to create customers and accounts for the fully-insured group health insurance business. This chapter explains how to create different entities involved in the fully-insured group health insurance business.

## Parent Customer

The fully-insured employers must be defined as parent customers in the system. You can define a person as the parent customer by setting its person type to **Parent Customer**. You can create a parent customer through a customer registration object or a health care inbound message.

## Bill Groups

The system allows you to define one or more bill groups for a parent customer. The membership premium of the employees are billed to a bill group. Each bill group will handle the membership premium of employees based on the employee attributes, such as location, employment status, employment department, and so on. The system allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for a bill group. These parameters are used to derive the bill group against which the membership premium should be billed in the system. You can define a person as the bill group by setting its person type to **Bill Group**. The bill groups should be defined as the child persons of the parent customer (i.e. fully-insured employer) using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. You can create a bill group through a customer registration object or a health care inbound message.

### Related Topics

For more information on...	See...
Bill Group Derivation and Pricing Parameters	<a href="#">Bill Group Derivation and Pricing Parameters</a> on page 3356
How to setup the <b>C1-ASOBLLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLLNG Feature Configuration</a> on page 4070

## Bill Group's Account

The membership premium of employees are billed to the bill group's account. Therefore, every bill group should have at least one account in the system. You can create multiple accounts for a bill group. You can create an account for a bill group through a customer registration object or a health care inbound message.

Depending on the employer's preference, the charges for one or more membership and price item combinations can be billed on the same or different accounts of the bill group. The system enables you to create different types of accounts (such as, MEDCARE1 and MEDCARE2) for a bill group. You can specify the type of account by defining the **Invoice Type (C1INVTYP)** characteristic for the account.

**Note:** At present, we have not shipped any predefined values for the **Invoice Type (C1INVTYP)** characteristic type. You must define the predefined characteristic values as per the business requirements.

You can also set the priority for an account based on the invoice type while specifying the billing account information for a price item in a pricing rule type. For example,

Price Item	Priority	Invoice Type	Account
P1	10	MEDCARE1	A1
	20	MEDCARE2	A2
P2	10	MEDCARE2	A2
	20	MEDCARE1	A1

Now, when the effective pricing rule is derived for P1 on the policy plan, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE1** exists for the bill group. If so, it considers the account (A1) of the bill group for billing. However, if an account where the **Invoice Type (C1INVTYP)** characteristic

type is set to **MEDCARE1** does not exist for the bill group, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE2** exists for the bill group. If so, it considers the account (A2) of the bill group for billing. If an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE2** does not exist for the bill group, the status of the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **Error (E)**.

Similarly, when the effective pricing rule is derived for P2 on the policy plan, the system considers the account of the bill group which is available based on the priority. The system derives the billing account for only those price items for which the effective pricing rule is derived.

The system searches the account of the bill group based on the priority when the **Invoice Type Characteristic Type** option type of the **C1-ASOBLNG** feature configuration is set to **C1INVTYP**.

### Related Topics

For more information on...	See...
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 4070

## Fully-Insured Group Policy

You can create a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group**. You can create a fully-insured group policy through a customer registration object or a health care inbound message. If the fully-insured group policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

However, if the fully-insured group policy information is given for a parent customer in a health care inbound message, the system does the following:

- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

**Note:** At present, the **Fully-Insured Individual** policy category is not yet supported in the system.

## Policy Plans

A fully-insured group policy may cover various plans for medical, dental, or disability benefits. You can subscribe a person for one or more policy plans within or across policies. The system creates one membership for each person who is subscribed to the policy plan. You can then add dependent members in each membership whenever required.

While creating a policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received in an inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can only associate a pricing rule type where the pricing rule type category is set to **Age Based**, **Tier Based**, or **Pass-Through Billable Charge**. If you associate an age based pricing rule type with the policy plan, the system creates the SQI based billable charge whenever the membership premium is calculated for eligible members. If you associate a tier based pricing rule type with the policy plan, the system creates the SQI based billable charge whenever the premium is calculated for membership. However, if you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information, the system directly creates the SQI based billable charge for the

pre-calculated premium and does not refer the pass-through billable charge pricing rule type which is associated with the policy plan.

## Price Items

Each service offered in the fully-insured group health plan should be defined as a price item in the system. You can define a price item from the user interface. You must add the price item in a pricing rule type. The system then enables you to create a pricing rule for a price item using the respective pricing rule type.

## Pricing Rule Types

You can create a pricing rule using the respective pricing rule type. The system enables you to create pricing rule types of the following categories for the fully-insured group health plan through a health care inbound message:

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Age Based	Age Based	AGE_BASED
Tier Based	Tier Based	TIER_BASED
Pass-Through Billable Charge	Pass-Through Billable Charge	FI_PASSTBC

**Note:** You cannot define a pricing rule using a pricing rule type where the pricing rule type category is set to **Pass-Through Billable Charge**.

## Pricing Rules

The fully-insured group health plan may offer various services to the employer, such as medical insurance, dental insurance, vision care, life insurance, short-term and long-term disability benefits, and so on. Oracle Revenue Management and Billing enables you to define pricing rules for various services offered in the fully-insured group health plan. The below table lists the pricing rules which you can define for the following services offered in the fully-insured group health plan:

Service	Pricing Rule	Created for....
Medical Insurance, Dental Insurance, Vision Care, Life Insurance, Short-Term and Long-Term Disability Benefits, etc.	Age Based	Fully-Insured Group Policy Plan
	Tier Based	Fully-Insured Group Policy Plan

You can create the above mentioned pricing rules for the fully-insured group policy plans through a health care inbound message and not from the user interface. The system creates a price assignment for each pricing rule. In the age based pricing rules, you can define different premium fee for employees who belong different age band. You can also offer different premium fee for the employees with the same age band, but with the different set of attributes. The system also enables you to charge additional fee for the eligible member based on certain modifiers. For example, you can charge additional fee when the eligible member is alcoholic and/or consumes tobacco. However, in the tier based pricing rules, you can define different premium fee for employees who belong to different membership tier, such as Employee (E), Employee + Spouse (ES), Employee + Spouse + Children (F), and so on.

The system searches for the pricing rule of a price item (i.e. service) on the policy plan to which the membership belongs. If the effective pricing rule for a price item is not available on the policy plan, the system does not consider the respective price item for billing.

## Price Assignments

The system creates a price assignment for each fully-insured pricing rule. If different premium fee is defined for employees with different set of employee attributes, then the system creates a separate price component for each set of employee attributes. If the modifiers are used in the age based pricing rule, the system creates a price component for each modifier. In the price component, the age band or tier band parameter, the employee attributes, and modifiers are

used to define the pricing eligibility criteria. Once the age based or tier based pricing rule is defined for a policy plan, the system creates a price item pricing and price list, and then assigns the price item pricing to the price list.

# Chapter 2

---

## Self-Funded Customer Management

---

### Topics:

- [Self-Funded Entities](#)

Self-funded health insurance, also known as Administrative Services Only (ASO), is a self insurance arrangement whereby an employer provides health or disability benefits to employees using the company's own funds. In self-funded health plan, employers operate their own health plan. However, in the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. Employers choose to self-insure because it allows them to save the profit margin that an insurance company adds to its premium for a fully-insured group health plan. However, self-insuring exposes the company to much larger risk in the event that more claims than expected must be paid.

Oracle Revenue Management and Billing (ORMB) supports the following types of self-funding approach:

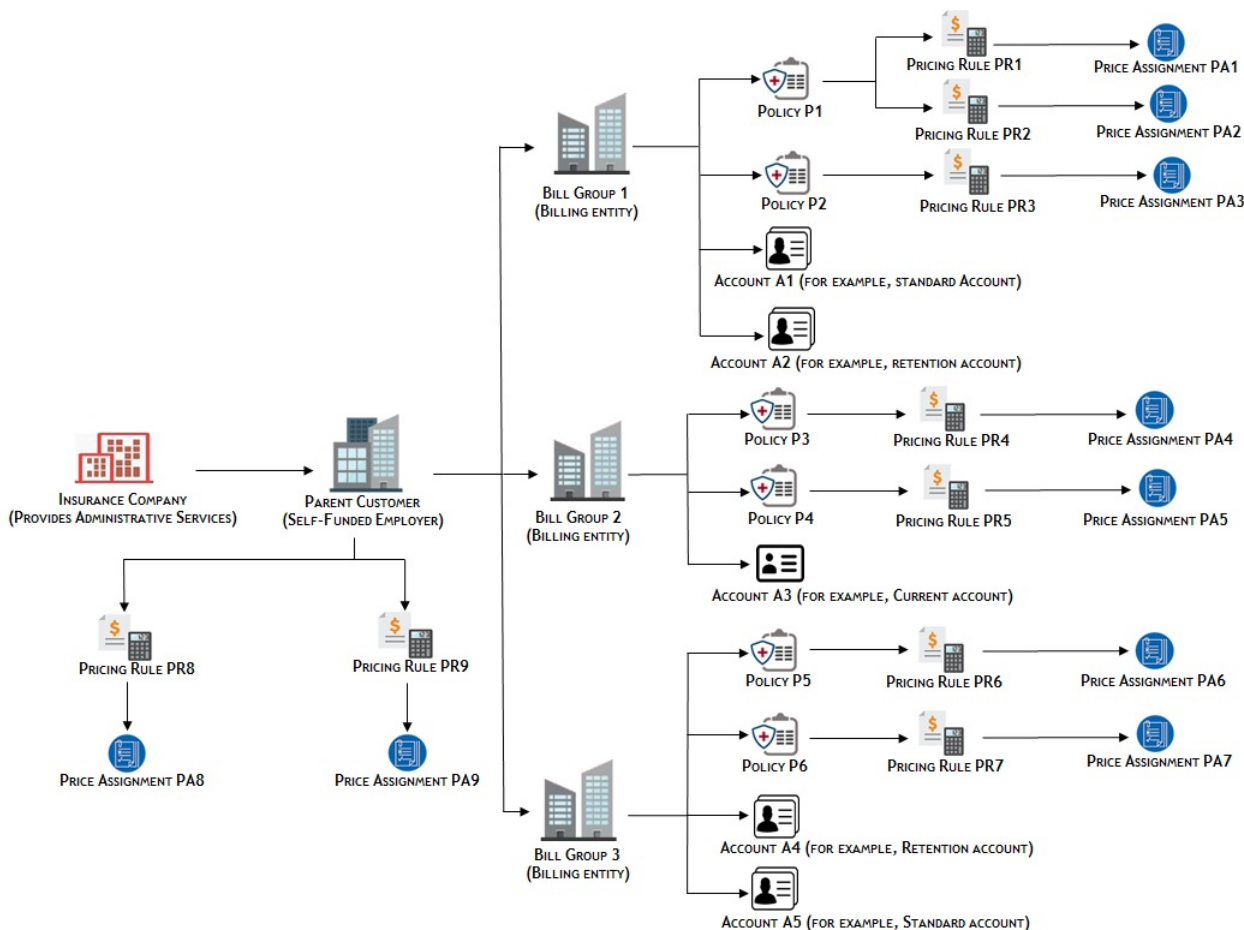

- **Fully Self-Funded** - In the fully self-funded approach, the employer retains all the risk and bears the claim costs irrespective of any limit.
- **Partially Self-Funded** - In the partially self-funded approach, the employer purchases reinsurance or stop loss coverage to pass the risk to insurance company.

The system enables you to create customers and accounts for the self-funded health insurance business. This chapter explains how to create different entities involved in the self-funded health insurance business.

For more information on...	See...
Self-Funded Entities	<a href="#">Self-Funded Entities</a> on page 74

## Self-Funded Entities

The following figure graphically represents the different entities involved in the self-funded health insurance business:

For more information on...	See...
<b>Parent Customer</b>	<a href="#">Parent Customer</a> on page 74

<b>Self-Funded Policy</b>	<a href="#">Self-Funded Policy</a> on page 76
<b>Price Items</b>	<a href="#">Price Items</a> on page 76
<b>Pricing Rule Types</b>	<a href="#">Pricing Rule Types</a> on page 76
<b>Pricing Rules</b>	<a href="#">Pricing Rules</a> on page 77
<b>Price Assignments</b>	<a href="#">Price Assignments</a> on page 78

### Parent Customer

The self-funded employers must be defined as parent customers in the system. You can define a person as the parent customer by setting its person type to **Parent Customer**. You can create a parent customer through a customer registration object or a health care inbound message.

## Bill Groups

The system allows you to define one or more bill groups for a parent customer. The claim, enrollment, and ancillary transactions of the employees are billed to a bill group. Each bill group will handle the claim, enrollment, and ancillary transactions of employees based on the employee attributes, such as location, employment status, employment department, and so on. The system allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for a bill group. These parameters are used to derive the bill group against which the claim, enrollment, and ancillary charges should be billed in the system. The derived bill group is also used for billing the claim based fees, specific stop-loss credits, aggregate stop-loss credits, discount, and level funding charges.

You can define a person as the bill group by setting its person type to **Bill Group**. The bill groups should be defined as the child persons of the parent customer (i.e. self-funded employer) using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. You can create a bill group through a customer registration object or a health care inbound message.

### Related Topics

For more information on...	See...
Bill Group Derivation and Pricing Parameters	<a href="#">Bill Group Derivation and Pricing Parameters</a> on page 3356
How to setup the <b>C1-ASOBLLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLLNG Feature Configuration</a> on page 4070

## Bill Group's Account

The claim charges, specific stop-loss credits, aggregate stop-loss credits, claim based fees, enrollment based fees, ancillary charges, discount, and level funding charges are billed to the bill group's account. Therefore, every bill group should have at least one account in the system. You can create multiple accounts for a bill group. You can create an account for a bill group through a customer registration object or a health care inbound message.

Depending on the employer's preference, the claim charges, specific stop-loss credits, aggregate stop-loss credits, claim based fees, enrollment based fees, ancillary charges, discount, and level funding charges can be billed on the same or different accounts of the bill group. The system enables you to create different types of accounts (such as, standard and retention) for a bill group. You can specify the type of account by defining the **Invoice Type (CIINVTYP)** characteristic for the account.

**Note:** At present, we have not shipped any predefined values for the **Invoice Type (CIINVTYP)** characteristic type. You must define the predefined characteristic values as per the business requirements.

You can also set the priority for an account based on the invoice type while specifying the billing account information for a price item in a pricing rule type. For example,

Price Item	Priority	Invoice Type	Account
P1	10	Standard	A1
	20	Retention	A2
P2	10	Retention	A2
	20	Standard	A1

Now, when a claim transaction is mapped to P1, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Standard** exists for the bill group. If so, it considers the standard account (A1) of the bill group for billing. However, if an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Standard** does not exist for the bill group, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Retention** exists for the bill group. If so, it considers the retention account (A2) of the bill group for billing. If an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Retention** does not exist for the bill group, the status of the transaction is changed to **Error**.

Similarly, when a claim transaction is mapped to P2, the system considers the account of the bill group which is available based on the priority. The system derives the billing account for only those price items for which the effective pricing rule is derived.

The system searches the account of the bill group based on the priority when the **Invoice Type Characteristic Type** option type of the **C1-ASOBLNG** feature configuration is set to **C1INVTYP**.

### Related Topics

For more information on...	See...
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 4070

## Self-Funded Policy

You can create a self-funded policy using a policy type where the policy category is set to **Self-Funded**. You can create a self-funded policy through a customer registration object or a health care inbound message. If the self-funded policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

## Price Items

Each service offered in the self-funded plan should be defined as a price item in the system. You must add the price item in a pricing rule type. The system then enables you to create a pricing rule for a price item using the respective pricing rule type.

You can define a price item and associate the required parameters with the price item from the user interface. You can use the price item parameters for defining multi parameter based pricing or for aggregating the transactions.

## Pricing Rule Types

You can create a pricing rule using the respective pricing rule type. The system enables you to create pricing rule types of the following categories for the self-funded plan from the user interface:

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Claim	Claim	CLAIM
Retention Type Claim Based	Retention Type Claim Based	RETCLMBSD
Discount Share	Discount Arrangement	DISSHARE
Discount Guarantee	Discount Arrangement	DISGUAR
One-Time Flat Fees	Flat Fees	ONETIMEFLATFEES
Bill Period Based Recurring Flat Fees	Flat Fees	RECFLATFEES_BP
Frequency Based Recurring Flat Fees	Flat Fees	RECFLATFEES_FREQ

<b>Pricing Rule Type</b>	<b>Pricing Rule Type Category</b>	<b>Sample Shipped with the Product</b>
Retention Type Enrollment Based	Retention Type Enrollment Based	RETENRLBSD
Ancillary	Ancillary	ANCILLARY
Specific Stop-Loss	Specific Stop-Loss	SSL
Aggregate Stop-Loss	Aggregate Stop-Loss	ASL
Enrollment Based Premium	Level Funded	LVLENRLPRE
Flat Rate Based Premium	Level Funded	LVLFLATPRE

## Pricing Rules

The self-funded plan may offer various services to the employer, such as claim administration, reinsurance or stop-loss, discount or level funding arrangement, and so on. Oracle Revenue Management and Billing enables you to define pricing rules for various services offered in the self-funded plan. The below table lists the pricing rules which you can define for the following services offered in the self-funded plan:

<b>Service</b>	<b>Pricing Rule</b>	<b>Created for...</b>
Claim Administration	Claim	Parent Customer
Claim Administration	Claim	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Retention Type Claim Based	Parent Customer
Claim Administration	Retention Type Claim Based	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Discount Share	Parent Customer
Claim Administration	Discount Guarantee	Parent Customer
Claim Administration	One-Time Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Bill Period Based Recurring Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Frequency Based Recurring Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Enrollment	Retention Type Enrollment Based	Parent Customer
Enrollment	Retention Type Enrollment Based	Bill Group's Policy where the Parent Customer is the Policy Holder
Ancillary, such as Laboratory, Radiology, Pharmacy, Physical Therapy, or Preventive Care	Ancillary	Parent Customer
Ancillary, such as Laboratory, Radiology, Pharmacy, Physical Therapy, or Preventive Care	Ancillary	Bill Group's Policy where the Parent Customer is the Policy Holder
Stop-Loss	Specific Stop-Loss	Parent Customer
Stop-Loss	Specific Stop-Loss	Bill Group's Policy where the Parent Customer is the Policy Holder
Stop-Loss	Aggregate Stop-Loss	Parent Customer

Service	Pricing Rule	Created for....
Stop-Loss	Aggregate Stop-Loss	Bill Group's Policy where the Parent Customer is the Policy Holder
Level Funding Arrangement	Enrollment Based Premium	Parent Customer
Level Funding Arrangement	Enrollment Based Premium	Bill Group's Policy where the Parent Customer is the Policy Holder
Level Funding Arrangement	Flat Rate Based Premium	Parent Customer
Level Funding Arrangement	Flat Rate Based Premium	Bill Group's Policy where the Parent Customer is the Policy Holder

You can create the above mentioned self-funded pricing rules for a parent customer or for the policy of the bill group from the user interface and not through a health care inbound message.

The system creates a price assignment for each pricing rule. In case of the retention type claim and enrollment based pricing rules, the system creates multiple price assignments when different claim based or enrollment based fee is offered for employees with different set of employee attributes.

The system first searches for the pricing rule of a price item (i.e. service) at the bill group level. If the effective pricing rule for a price item is available at the bill group level, the system uses it for deriving the price assignment. However, if the effective pricing rule for a price item is not available at the bill group level, the system searches for the pricing rule of a price item at the parent customer level. If the effective pricing rule for a price item is available at the parent customer level, the system uses it for deriving the price assignment. However, if the effective pricing rule for a price item is not available at the bill group or parent customer level, the system does not consider the respective price item for billing.

## Price Assignments

The system creates a price assignment for each self-funded pricing rule. In case of the retention type claim and enrollment based pricing rules, the system creates multiple price assignments when different claim based or enrollment based fee is offered for employees with different set of employee attributes.

The system automatically creates a price assignment whenever you create a self-funded pricing rule. The system creates the price assignment in a price list and assigns the price list to the parent customer or bill group. The system creates multiple price assignments when you define a pricing rule for a policy of a bill group using a pricing group.

## Health Insurance Business Management

---

### Topics:

- [Policy Type](#)
- [Policy Person Role](#)
- [Contract Relationship Type](#)
- [Source System Extendable Lookup](#)
- [Extendable Lookup \(Source System\)](#)
- [Membership Identifier Type](#)
- [Pricing Parameters](#)
- [Geographic Rating Area](#)
- [Member Relationship Pricing Parameter](#)
- [Subscription Tier Pricing Parameter](#)
- [Medicare Benefits](#)
- [Geographic Rating Area Preference](#)
- [Member Relationship and Subscription Tier Preference](#)

Health insurance is a type of insurance coverage that typically pays for medical, surgical, prescription drug and sometimes dental expenses incurred by the insured. Health insurance can reimburse the insured for expenses incurred from illness or injury, or pay the care provider directly. It is often included in employer benefit packages as a means of enticing quality employees, with premiums partially covered by the employer but often also deducted from employee paychecks.

Oracle Revenue Management and Billing has extended its pricing and billing engines to meet the requirements of the following three lines of health insurance business:

- [Fully-Insured Group Health Insurance](#) on page 289
- [Self-Funded Group Health Insurance](#) on page 451
- [Individual Health Insurance](#) on page 503

To use the pricing and billing engines for the above three lines of health insurance business, you need to set the respective prerequisites:

Line of Business	Prerequisites
Fully-Insured Group Health Insurance	Refer to the <a href="#">Pre-requisites</a> on page 291 section.
Self-Funded Group Health Insurance	Refer to the <a href="#">Pre-requisites</a> on page 453 section.
Individual Health Insurance	Refer to the <a href="#">Pre-requisites</a> section.

## Policy Type

Oracle Revenue Management and Billing enables you to define a policy type using which you can create a policy. The policy type helps the system to determine:

- **Policy Category** - The category implies the line of business in the health insurance domain for which the policy should be created using the policy type. The valid values are:
  - Fully-Insured Group
  - Fully-Insured Individual
  - Self-Funded

**Note:** At present, the **Fully-Insured Individual** policy category is not supported in the system.

- **Policy Business Object** - The business object using which the policy should be created in the system. You can specify the **C1-POLICY** or **C1-ASOPolicy** business object depending on whether you want to create the policy type for the fully-insured group or self-funded health insurance business.

The **Policy Type** screen allows you to define, edit, copy, and delete a policy type. It contains the following zones:

- [Policy Type List](#) on page 80
- [Policy Type](#) on page 81

### Policy Type List

The **Policy Type List** zone lists the policy types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Policy Type	Displays the policy type.
Description	Displays the description of the policy type.
Policy Category	Indicates the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>• Self-Funded</li> <li>• Fully-Insured Group</li> <li>• Fully-Insured Individual</li> </ul>
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Policy Type</b> screen appears where you can edit the details of the policy type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Policy Type</b> screen appears where you can define a new policy type using an existing policy type.
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can delete the policy type. <p><b>Note:</b> You can delete a policy type when a policy is not created using the policy type.</p>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to a policy type, the **Policy Type** zone appears with the details of the respective policy type.

You can filter the list using the **Policy Category** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## **Policy Type**

The **Policy Type** zone displays the details of the policy type. It contains the following sections:

- **Main** - Displays basic information about the policy type. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>
Policy Type	Displays the policy type.
Policy Business Object	Indicates the business object using which the policy should be created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Description	Displays the description of the policy type.
Status	Indicates the status of the policy type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Policy Category	Indicates the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>• Self-Funded</li> <li>• Fully-Insured Group</li> <li>• Fully-Insured Individual</li> </ul>
Detailed Description	Displays additional information about the policy type.

- **Characteristics** - Lists the characteristics defined for the policy type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the policy type.
Delete	Used to delete the policy type. <b>Note:</b> You can delete a policy type when a policy is not created using the policy type.
Duplicate	Used to create a new policy type using an existing policy type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the policy type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Policy Type** zone does not appear in the **Policy Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the policy type in the **Policy Type List** zone.

## Defining a Policy Type

### **Prerequisites**

To define a policy type, you should have:

- Required policy business object defined in the application

**Note:** The **C1-POLICY** and **C1-ASOPolicy** business objects are shipped with the product. You can use the **C1-POLICY** business object to create a fully-insured group policy and the **C1-ASOPolicy** business object to create a self-funded policy.

**Procedure**

To define a policy type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Policy Type** sub-menu.

The **Policy Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the policy type.
- **Characteristics** - Used to define the characteristics for the policy type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to specify the policy type.	Yes
Business Object	Indicates the business object using which you are defining the policy type.	Not applicable
Policy Business Object	Used to indicate the business object using which you want to create a policy.	Yes
Description	Used to specify the description for the policy type.	Yes
Status	Used to indicate the status of the policy type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Policy Category	Used to indicate the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>• Fully-Insured Group</li> <li>• Fully-Insured Individual</li> <li>• Self-Funded</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> At present, the <b>Fully-Insured Individual</b> policy category is not supported in the system. </div>	Yes
Detailed Description	Used to specify additional information about the policy type.	No

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy Type** screen.

4. Enter the required details in the **Main** section.

**Note:** If you want to create a policy type for the fully-insured group health insurance business, select the **C1-POLICY** business object from the **Policy Business Object** list and the **Fully-Insured Group** option from the **Policy Category** list. However, if you want to create a policy type for the self-funded health insurance business, select the **C1-ASOPolicy** business object from the **Policy Business Object** list and the **Self-Funded** option from the **Policy Category** list.

5. Define the characteristics for the policy type, if required.

6. Click **Save**.

The policy type is defined.

## **Defining a Characteristic for a Policy Type**

### **Prerequisites**

To define a characteristic for a policy type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy Type**).

### **Procedure**

To define a characteristic for a policy type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a policy type.

The **Characteristics** section contains the following fields in a grid:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to the <b>Policy Type</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the policy type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the policy type.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the policy type, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the policy type, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Copying a Policy Type

Instead of creating a policy type from scratch, you can create a new policy type using an existing policy type. This is possible through copying a policy type. On copying a policy type, the details including the characteristics are copied to the new policy type. You can then edit the details, if required.

### Prerequisites

To copy a policy type, you should have:

- Policy type (whose copy you want to create) defined in the application
- Required policy business object defined in the application

**Note:** The **C1-POLICY** and **C1-ASOPolicy** business objects are shipped with the product. You can use the **C1-POLICY** business object to create a fully-insured group policy and the **C1-ASOPolicy** business object to create a self-funded policy.

### Procedure

To copy a policy type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Policy Type** sub-menu.  
The **Policy Type** screen appears.
4. In the **Policy Type List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the policy type whose copy you want to create.

The **Policy Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the policy type.
- **Characteristics** - Used to define the characteristics for the policy type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to specify the policy type.	Yes
Business Object	Indicates the business object using which you are defining the policy type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Policy Business Object	Used to indicate the business object using which you want to create a policy.	Yes
Description	Used to specify the description for the policy type.	Yes
Status	Used to indicate the status of the policy type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Policy Category	Used to indicate the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>Fully-Insured Group</li> <li>Fully-Insured Individual</li> <li>Self-Funded</li> </ul>	Yes
	<b>Note:</b> At present, the <b>Fully-Insured Individual</b> policy category is not supported in the system.	
Detailed Description	Used to specify additional information about the policy type.	No

**Tip:** Alternatively, you can copy a policy type by clicking the **Duplicate** button in the **Policy Type** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove characteristics of the policy type, if required.
- Click **Save**.

The new policy type is defined.

## Deleting a Policy Type

### Procedure

To delete a policy type:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **P** and then click **Policy Type**.

A sub-menu appears.

- Click the **Search** option from the **Policy Type** sub-menu.

The **Policy Type** screen appears.

- In the **Policy Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the policy type that you want to delete.

A message appears confirming whether you want to delete the policy type.

**Note:** You can delete a policy type when a policy is not created using the policy type.

**Tip:** Alternatively, you can delete a policy type by clicking the **Delete** button in the **Policy Type** zone.

- Click **OK**.

The policy type is deleted.

## Policy Person Role

Oracle Revenue Management and Billing enables you to specify the role of a person while associating the person to a policy. This helps to indicate whether the person is a policy holder, broker, underwriter, and so on in a policy. The **Policy Person Role** screen allows you to define, edit, and delete a policy person role. It contains the following zone:

- [Policy Person Role List](#) on page 90

### Policy Person Role List

The **Policy Person Role List** zone lists the roles which you can assign to a person in a policy. It contains the following columns:

Column Name	Column Description
Policy Person Role	Displays the policy person role.
Description	Displays the description of the policy person role.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Policy Person Role</b> screen appears where you can edit the details of the policy person role.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the policy person role.  <b>Note:</b> You can delete a policy person role when it is not used while associating a person with a policy.

You can define a new policy person role by clicking the **Add** link in the upper-right corner of this zone.

You can filter the list using various search criteria (such as **Policy Person Role** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper-right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

## Contract Relationship Type

Oracle Revenue Management and Billing enables you to define various relationship types using which you can relate main subscriber and other dependent persons in a membership. The **Contract Relationship Type** screen allows you to define, edit, and delete such relationship types. It also allows you to filter the contract relationship types using various search criteria.

## Filtering the Contract Relationship Types

### Prerequisites

To filter the contract relationship types, you should have:

- Contract relationship types defined in the application

### Procedure

To filter the contract relationship types:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Contract Relationship Type**.  
The **Contract Relationship Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Used to search a particular contract relationship type.	Yes

- Enter the search criteria in the **Relationship Type** field.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

The search results are filtered based on the specified criteria.

### **Related Topics**

## **Defining a Contract Relationship Type**

### **Procedure**

To define a contract relationship type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **C** and then click **Contract Relationship Type**.

The **Contract Relationship Type** screen appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Used to specify the contract relationship type.	Yes
Description	Used to specify the description for the contract relationship type.	Yes

- Enter the required details in the **Contract Relationship Type** screen.
- If you want to define more than one contract relationship type, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove a contract relationship type, click the **Delete (🗑)** icon corresponding to the contract relationship type.

- Click **Save**.

The contract relationship type is defined.

## Source System Extendable Lookup

Oracle Revenue Management and Billing enables you to track the external system from where the fully-insured group or self-funded policies are received for billing. Each external system must be defined in the system using the **Source System (C1-SourceSystemLookup)** extendable lookup.

The **Extendable Lookup Query** screen allows you to search for an extendable lookup. It contains the following zone:

- [Extendable Lookup Search](#) on page 95

### Extendable Lookup Search

The **Extendable Lookup Search** zone allows you to search for an extendable lookup. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Used to search a particular extendable lookup business object.	No
Description	Used to search extendable lookups with a particular description.	No

**Note:** You must specify at least one search criterion while searching for an extendable lookup.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Business Object	Displays the extendable lookup business object.
Description	Displays the description of the extendable lookup business object.
	<b>Note:</b> It has a link. On clicking the link, the <b>Extendable Lookup</b> screen appears where you can view the details of the respective extendable lookup.

### Related Topics

## Searching for the Source System Extendable Lookup

### Procedure

To search for the **Source System** extendable lookup:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **E** and then click **Extendable Lookup**.  
The **Extendable Lookup Query** screen appears.
3. In the **Extendable Lookup Search** zone, enter **C1-SourceSystemLookup** in the **Business Object** field.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

The **Source System** extendable lookup business object appears in the **Search Results** section.

## Extendable Lookup (Source System)

The **Extendable Lookup** screen allows you to view the values of the **Source System (C1-SourceSystemLookup)** extendable lookup. It also allows you to define, edit, copy, and delete a source system. It contains the following zones:

- [Extendable Lookup Value List](#) on page 97
- [Extendable Lookup Value](#) on page 98

### Extendable Lookup Value List

The **Extendable Lookup Value List** zone lists the values which are already defined for the **Source System** extendable lookup. It contains the following columns:

Column Name	Column Description
Value	Displays the source system.
Description	Displays the description of the source system.
Owner	Indicates who has created the source system. The valid values are: <ul style="list-style-type: none"> <li>• Framework</li> <li>• Base</li> <li>• Customer Modification</li> </ul>
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Extendable Lookup</b> screen appears where you can edit the details of the source system.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Extendable Lookup</b> screen appears where you can define a new source system using an existing source system.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the source system. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> You can delete a source system when it is not yet used in the system.</p> </div>
Detailed Description	Displays additional information about the source system.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation buttons, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to a source system, the **Extendable Lookup Value** zone appears with the details of the respective source system.

You can filter the list using various search criteria (such as, **Value** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

**Extendable Lookup Value**

The **Extendable Lookup Value** zone displays the details of the source system. It contains the following sections:

- **Main** – Displays basic information about the source system. It contains the following fields:

Field Name	Field Description
Source System	Displays the source system.
Description	Displays the description of the source system.
Override Description	Displays the overridden description of the source system.
Detailed Description	Displays additional information about the source system.
Status	Indicates the status of the source system. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the source system.
Delete	Used to delete the source system.  <b>Note:</b> You can delete a source system when it is not yet used in the system.
Duplicate	Used to create a source system using an existing source system.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the extendable lookup business object using which the source system is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.

Field Name	Field Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Owner	Indicates who has created the source system. The valid values are: <ul style="list-style-type: none"> <li>• Framework</li> <li>• Base</li> <li>• Customer Modification</li> </ul>

By default, the **Extendable Lookup Value** zone does not appear in the **Extendable Lookup** screen. It appears when you click the **Broadcast** (  ) icon corresponding to the source system in the **Extendable Lookup Value List** zone.

## Defining a Source System

### Procedure

To define a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. Click the **Add** button in the **Page Title** area of the **Extendable Lookup** screen.

The **Extendable Lookup** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to specify the external system from where the policies are received for billing.	Yes
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> By default, the value is set to <b>Active</b> .	

- Enter the required details in the **Main** section.
- Click **Save**.

The source system is added in the **C1-SourceSystemLookup** extendable lookup.

## Editing a Source System

### Procedure

To edit a source system:

- Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
- In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

- In the **Extendable Lookup Value List** zone, click the **Edit**  icon in the **Edit** column corresponding to the source system whose details you want to edit.

The **Extendable Lookup** screen appears. It contains the following section:

- Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Displays the source system.	Not applicable
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

**Tip:** Alternatively, you can edit the details of a source system by clicking the **Edit** button in the **Extendable Lookup Value** zone.

- Modify the required details in the **Main** section.
- Click **Save**.

The changes made to the source system are saved.

### **Related Topics**

## Copying a Source System

Instead of creating a source system from scratch, you can create a new source system using an existing source system. This is possible through copying a source system. On copying a source system, the details of the source system are copied to the new source system. You can then edit the details, if required.

### **Prerequisites**

To copy a source system, you should have:

- Source system (whose copy you want to create) defined in the application

### **Procedure**

To copy a source system:

- Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
- In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

- In the **Extendable Lookup Value List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the source system whose copy you want to create.

The **Extendable Lookup** screen appears. It contains the following section:

- Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to specify the external system from where the policies are received for billing.	Yes
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

**Tip:** Alternatively, you can copy a source system by clicking the **Duplicate** button in the **Extendable Lookup Value** zone.

- Enter the required details in the **Main** section.
- Click **Save**.

The new source system is added in the **C1-SourceSystemLookup** extendable lookup.

## Deleting a Source System

### Procedure

To delete a source system:

- Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
- In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.  
The **Extendable Lookup** screen appears.
- In the **Extendable Lookup Value List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the source system that you want to delete.

A message appears confirming whether you want to delete the source system.

**Note:** You can delete a source system when it is not yet used in the system.

**Tip:** Alternatively, you can delete a source system by clicking the **Delete** button in the **Extendable Lookup Value** zone.

4. Click **OK**.

The source system is deleted from the **C1-SourceSystemLookup** extendable lookup.

## Viewing the Source System Details

### Procedure

To view the details of a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. In the **Extendable Lookup Value List** zone, click the **Broadcast** (📡) icon corresponding to the source system whose details you want to view.

The **Extendable Lookup Value** zone appears.

4. View the details of the source system in the **Extendable Lookup Value** zone.

## Membership Identifier Type

Oracle Revenue Management and Billing enables you to define an identifier for the group and individual memberships using a membership identifier type. The **Membership Identifier Type** screen allows you to create, edit, delete, and copy a membership identifier type. It contains the following zones:

- [Membership Identifier Type List](#) on page 104

- [Membership Identifier Type](#) on page 105

When you create or edit a group or individual membership through a health care inbound message or through the membership repricing inbound web service, you can define various identifiers (for example, beneficiary ID, exchange subscriber ID, and so on) associated with the membership using the membership identifier type.

## Defining a Membership Identifier Type

### Prerequisites

To define a membership identifier type, you should have:

- Validation algorithm defined in the application (in case you want to use it)

**Note:** No validation algorithm type for membership identifier type is shipped with the product. However, the **Membership Identifier Type - Validation** algorithm entity is available in the application. You can create the required custom validation algorithms for the **Membership Identifier Type - Validation** algorithm entity.

### Procedure

To define a membership identifier type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Membership Identifier Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Membership Identifier Type** sub-menu.

The **Membership Identifier Type** screen appears. It contains the following section:

- **Main** - Used to specify the basic details of the membership identifier type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Identifier Type	Used to specify the membership identifier type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the membership identifier type.	Yes
Validation Algorithm	Used to indicate the algorithm using which you want to validate the value of the membership identifier type. It is triggered when you define an identifier for a membership using the membership identifier type.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Validation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	No
Detailed Description	Used to specify additional information about the membership identifier type.	No

**Tip:** Alternatively, you can access the **Membership Identifier Type** screen by clicking the **Add** button in the **Page Title** area of the **Membership Identifier Type** screen.

- Enter the required details in the **Main** section.
- Click **Save**.

The membership identifier type is defined.

## **Pricing Parameters**

---

Oracle Revenue Management and Billing enables you to create new set of pricing parameters, such as, Geographic Rating Area, Member Relationship, and Subscription Tier for a fully-insured group customer.

To create a geographic rating area pricing parameter the ORMB system uses the policy plan and geographical details (of a member person) to retrieve the appropriate rating area. This rating area is further used to obtain the rate information defined on the pricing rule that is eventually based on a particular geographical rating area. To create a member relationship pricing parameter, the ORMB system retrieves the appropriate member relationship through the post processing algorithm and stamps the retrieved member relationship on the member person belonging to a particular membership. However, to create a subscription tier pricing parameter, the ORMB system retrieves the subscription tier information through the post processing algorithm and stamps the tier information on the desired membership.

For more information on how to setup the **Pricing Parameters** feature, see [Prerequisites](#) on page 111

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
<b>Geographic Rating Area</b>	<a href="#">Geographic Rating Area</a> on page 114
<b>Member Relationship Pricing Parameter</b>	<a href="#">Member Relationship Pricing Parameter</a> on page 130
<b>Subscription Tier Pricing Parameter</b>	<a href="#">Subscription Tier Pricing Parameter</a> on page 146

## **Prerequisites**

The following table lists the prerequisites for the pricing parameters feature:

<b>If you want to...</b>	<b>Then...</b>
Create a geographic rating area parameter	You need to do the following:

If you want to...	Then...
	<ul style="list-style-type: none"> <li>• Ensure that the upstream system contains the geographic rating area details in <b>CSV</b> file.</li> <li>• Ensure that the <b>CSV</b> file is available at the desired path on the server, before the file upload batch is triggered.</li> <li>• Set the <b>C1-GeoRatingArea</b> business object validation soft parameter (<b>Include Plan Value Details</b>) to either include or exclude plan details (<b>Y/N</b>) before the file is uploaded.</li> <li>• Include the <b>C1GEORATINGARCSVUPLD</b> file request type for file upload purposes.</li> <li>• Ensure that <b>C1_GEO_RATING_AREA</b> and <b>C1_GEO_RATING_AREA_REL_OBJ</b> tables are populated before any memberships are created in the system for derivation purposes.</li> <li>• Configure the pricing parameter with the geographic rating area on the pricing rule.</li> <li>• Define the required <b>Address Source (C1-ADSRC)</b> and <b>Address Type (C1-ADTYP)</b> characteristic types in the system. Values for these characteristics can be defined either on the policy or plan characteristics level. The address source and address type can also be defined on the state of issue of the policy or plan.</li> <li>• Define the parent policy role in the <b>C1-ASOBLNG</b> feature configuration.</li> <li>• Define the following billing preferences in the <b>Field Mapping</b> screen: <ul style="list-style-type: none"> <li>• Default Address Source</li> <li>• Default Address Type</li> <li>• Use Plan Details</li> <li>• Address Source Value for Policy Holder</li> <li>• Address Source Value for Main Subscriber</li> <li>• Geographic Rating Area Characteristic Type</li> <li>• Address Source Characteristic Type</li> <li>• Address Type Characteristic Type</li> </ul> </li> <li>• Define the default value for <b>Geographic Rating Area Characteristic Type</b> in the <b>Premium Billing Preference</b> screen.</li> </ul>
Create a member role parameter	<p>You need to do the following:</p> <ul style="list-style-type: none"> <li>• Define the pricing parameter with the member role.</li> <li>• The <b>Admin</b> user must define different types of member role structures for step or party, where all the member roles must be defined in the <b>Member</b></li> </ul>

## Geographic Rating Area

Oracle Revenue Management and Billing enables you to use the geographic rating area as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different geographic rating area.

The system enables you to add and edit a geographic rating area from the user interface. You can also add or edit a set of geographic rating areas at once using the **File Upload Interface** utility. However, note that while editing a geographic rating area, you can only change the end date to a far future date and the status from **Active** to **Inactive**.

While maintaining a geographic rating area in the system, you can also list the policy plans available in the geographic rating area. You can add the policy plan information for a geographic rating area from the user interface or through the **File Upload Interface** utility. But, you cannot edit the policy plan information of a geographic rating area through the **File Upload Interface** utility.

You can upload the geographic rating areas from the CSV file using the **C1GEORATINGARCSVUPLD** file request type through the **File Transformation and Upload (C1-FTRAN)** batch.

**Note:** You need to set the **Include Plan Or Product Details** parameter in the **C1-GEORAVALD** algorithm to Y or N. If the value for this parameter is set to Y, the system identifies the record using the State, Zip From, Zip Plus4 From, Zip To, Zip Plus4 To, Start Date, Policy Number, Plan Number, and Source System combination. However, if the value for this parameter is set to N, the system identifies the record using the State, Zip From, Zip Plus4 From, Zip To, Zip Plus4 To, and Start Date combination.

Once you define a geographic rating area, the system can derive the geographic rating area for a membership using the **Address Source** and **Address Type** characteristic types. The system supports two address sources named **Policy Holder** and **Main Subscriber** and three address types named **Person Mailing**, **Person Seasonal**, and **Account Override**.

On adding a membership to a policy plan, the system first derives the characteristic types from the **Address Source Characteristic Type** and **Address Type Characteristic Type** attributes of a geographic rating area preference. The system considers the geographic rating area preference which is specified in the **Rating Area Field Mapping for Group** option type of the **C1-ASOBLNG** feature configuration. Then, the system searches for these characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy
4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, the system derives the default address source and address type from the geographic rating area preference.

**Note:** By default, the **Address Source (C1-ADSRC)** and **Address Type (C1-ADTYP)** characteristic types are shipped with the product. You need to set these characteristic types in the respective attribute of the geographic rating area preference.

If the address source is set to **Policy Holder**, the system fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration. The system then derives the person who is associated with the policy using the parent customer policy person role. Once the address source and address type are derived, the system fetches the state and zip code from the address type of the address source. For example, if the address source is set to **Policy Holder** and address type is set to **Person Mailing**, the system fetches the state and zip code from the policy holder's mailing address. Once the state and zip code are fetched from the address, the system checks whether the zip code is a 9-digit code. If not, the system appends zeros to make it a 9-digit zip code. The system then derives the value of the **Use Plan Details** attribute from the geographic rating area preference. If the attribute is set to **Y**, the system then derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination. However, if the attribute is set to **N**, the system then derives a geographic rating area for the state and zip code combination. If the system could not derive the geographic rating area, the system derives the default geographic rating area from the geographic rating area preference. Once the geographic rating area is derived, the system stores the geographic rating area for the membership. The characteristic type specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference is used to store geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

The geographic rating area of the membership must be changed when the address of the policy holder or main subscriber is updated. Therefore, when an address of a person is change, the system identifies the following:

- Memberships of policies where the person is the policy holder
- Memberships where the person is the main customer

For each membership, the system searches for the **Address Source** and **Address Type** characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy
4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, the system derives the default address source and address type from the geographic rating area preference. If the address source is set to **Policy Holder**, the system fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration. The system then derives the person who is associated with the policy using the parent customer policy person role.

Once the address source and address type are derived, the system fetches the state and zip code from the address type of the address source. The system then derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination or for the state and zip code combination depending on the value defined for the **Use Plan Details** attribute. If the system could not derive the geographic rating area, the system derives the default geographic rating area from the geographic rating area preference. If the geographic rating area is different, the system creates a new characteristic to store the geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

To use the geographic rating area as a pricing parameter, you need to define the Geographic Rating Area parameter where:

- **Value Type** is to **Adhoc**
- **Source Entity** is set to **Membership**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference

- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Geographic Rating Area parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on geographic rating area to which the membership belongs.

A new screen named **Geographic Rating Area** is introduced in this release. It enables you to add, edit, and inactivate a geographic rating area.

## Prerequisites

To create a geographic rating area pricing parameter, you need to do the following:

- Ensure that the upstream system contains the geographic rating area details in **CSV** file.
- Ensure that the **CSV** file is available at the desired path on the server, before the file upload batch is triggered.
- Set the **C1-GeoRatingArea** business object validation soft parameter (**Include Plan Value Details**) to either include or exclude plan details (**Y/N**) before the file is uploaded.
- Include the **C1GEORATINGARCSVUPLD** file request type for file upload purposes.
- Ensure that **C1\_GEO\_RATING\_AREA** and **C1\_GEO\_RATING\_AREA\_REL\_OBJ** tables are populated before any memberships are created in the system for derivation purposes.
- Configure the pricing parameter with the geographic rating area on the pricing rule.
- Define the required **Address Source (C1-ADSRC)** and **Address Type (C1-ADTYP)** characteristic types in the system. Values for these characteristics can be defined either on the policy or plan characteristics level. The address source and address type can also be defined on the state of issue of the policy or plan.
- Define the parent policy role in the **C1-ASOBLLNG** feature configuration.
- Define the following billing preferences in the **Field Mapping** screen:
  - Default Address Source
  - Default Address Type
  - Use Plan Details
  - Address Source Value for Policy Holder
  - Address Source Value for Main Subscriber
  - Geographic Rating Area Characteristic Type
  - Address Source Characteristic Type
  - Address Type Characteristic Type
- Define the default value for **Geographic Rating Area Characteristic Type** in the **Field Mapping** screen.
- Define the required health plan in the system.

## Uploading a Geographic Rating Area File in the CSV Format

To upload a geographic rating area file in the CSV format using the **File Upload Interface** utility, you need to do the following:

- Define a file request type for uploading geographic rating area in the CSV format. To define a file request type:
  1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
  2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
  3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
  4. Enter the file request type and description in the respective fields.
  5. Select the **Data Transformation Required** option.  
The **File Format** field is enabled.
  6. Select the **Comma Separated Values** option from the **File Format** list.
  7. Select the Upload and Process File Simultaneously option.
  8. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
  9. In the **Services** section, enter the required sequence number.
  10. Select the **Business Object** option from the **Service Type** list.
  11. Enter the **C1-GeoRatingArea** business object or custom price item business object in the **Service Name** field.
  12. Select the **Add** or **Update** option from the **Operation** list depending on whether you want to create new geographic rating area details or edit the existing geographic rating area details using the file request type.
  13. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes
Default Value	Used to specify the default value for the field.	No

**14. Click Save.**

The file request type is defined for uploading the geographic rating area in the CSV format.

**CSV File Format for Uploading Geographic Rating Areas**

Before uploading a geographic rating area file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following data:

Data	Description	Mandatory (Yes or No)
GEO_RATING_AREA	Used to specify the geographic rating area.	Yes
STATE	Used to specify the state code which belongs to the geographical rating area.	Yes
ZIP_FROM	Used to specify the zip code from where the geographic rating area begins.	Yes
ZIP_PLUS4_FROM	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes
ZIP_TO	Used to specify the zip code till where the geographic rating area ends.	Yes
ZIP_PLUS4_TO	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes
START_DT	Used to specify the date from when the geographic rating area is effective.	Yes
END_DT	Used to specify the date till when the geographic rating area is effective.	Yes
PLAN_NBR	Used to specify the plan number belonging to a particular geographical rating area.	No

Data	Description	Mandatory (Yes or No)
HEALTH_PLAN_CD	Used to specify the health plan belonging to a particular geographical rating area.	No
POLICY_NBR	Used to specify the policy number belonging to a particular geographical rating area.	No
SOURCE_SYSTEM	Used to specify the source system from where the policy is originated.	No
STATUS	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

### Sample CSV Format for Uploading Geographic Rating Areas

The CSV format must contain the following field transformation details that are used for uploading the geographic rating area information in the system:

Sequence	Field Name	Map Field XPath
1	GEO_RATING_AREA	C1-GeoRatingArea/ geoRatingArea
2	STATE	C1-GeoRatingArea/state
3	ZIP_FROM	C1-GeoRatingArea/zipFrom
4	ZIP_PLUS4_FROM	C1-GeoRatingArea/ zipPlus4From
5	ZIP_TO	C1-GeoRatingArea/zipTo
6	ZIP_PLUS4_TO	C1-GeoRatingArea/zipPlus4To
7	START_DT	C1-GeoRatingArea/startDate
8	END_DT	C1-GeoRatingArea/endDate

Sequence	Field Name	Map Field XPath
9	PLAN_NBR	C1-GeoRatingArea/0/ geoRatingAreaRelatedObject/ planNumber
10	HEALTH_PLAN_CD	C1-GeoRatingArea/0/ geoRatingAreaRelatedObject/ healthPlanCode
11	POLICY_NBR	C1-GeoRatingArea/0/ geoRatingAreaRelatedObject/ policyNumber
12	SOURCE_SYSTEM_CD	C1-GeoRatingArea/0/ geoRatingAreaRelatedObject/ sourceSystem
13	STATUS	C1-GeoRatingArea/boStatus

**Sample CSV**

```

**Geographic Rating Area (Used for Searching)**

The **Geographic Rating Area** screen allows you to search for a geographic rating area using various search criteria. It also allows you to create a geographic rating area. This screen consists of the following zone:

- [Search Geographic Rating Area](#) on page 120

**Search Geographic Rating Area**

The **Search Geographic Rating Area** zone allows you to search for geographic rating area using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a geographic rating area detail record using the geographic rating area details or through policy or plan details. The valid values are: <ul style="list-style-type: none"> <li>• Geographic Rating Area Details</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Policy or Plan Details</li> <li>Health Plan Details</li> </ul> <p><b>Note:</b> By default, the <b>Geographic Rating Area Details</b> option is selected.</p>	
State Code	<p>Used to search the geographic rating area details belonging to a particular state code.</p> <p><b>Note:</b> You must specify a state code which is already defined in the system.</p>	No
Geographic Rating Area	Used to search the geographic rating area details based on a geographic rating area.	No
Zip Code From	Used to search the geographic rating area details which are effective from a particular zip code.	No
Zip Code To	Used to search the geographic rating area details which are effective till a particular zip code.	No
Start Date	<p>Used to search the geographic rating area details which are effective from a particular date.</p> <p><b>Note:</b> The geographic rating area start date cannot be later than the geographic rating area end date.</p>	No
End Date	<p>Used to search the geographic rating area details which are effective till a particular date.</p> <p><b>Note:</b> The geographic rating area end date cannot be earlier than the geographic rating area start date</p>	No
Status	<p>Used to search the geographic rating area details based on a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	No
Policy Number	Used to search the geographic rating area details with a particular policy number.	No

Field Name	Field Description	Mandatory (Yes or No)
Plan Number	Used to search the geographic rating area details with a particular plan number.	No
Health Plan	Used to search the geographic rating area details which are associated with a health plan.  <div style="border: 1px solid black; padding: 5px; background-color: #f2f2f2;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Health Plan Search</b> window appears.</p> <p>This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.</p> </div>	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Geographic Rating Area	Displays the geographic rating area.
State Code	Displays the state code to which the geographic rating area belongs.
Zip Code From	Displays the zip code from where the geographic rating area is effective.
Zip Code Plus 4 From	Displays the zip code plus four additional digits which identify from where the geographic rating area is effective.
Zip Code To	Displays the zip code till where the geographic rating area is effective.
Zip Code Plus 4 To	Displays the zip code plus four additional digits which identify till where the geographic rating area is effective.
Start Date	Displays the date from when the geographic rating area is effective.
End Date	Displays the date till when the geographic rating area is effective.
Status	Indicates the status of the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **State Code**, **Geographic Rating Area**, **Zip Code From**, **Zip Code To**, **Start Date**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters (🔍) icon in the upper right corner of this zone.

How to define a geographic rating area	<a href="#">Defining a Geographic Rating Area</a> on page 125

**Geographic Rating Area**

The **Geographic Rating Area** zone displays the details of the geographic rating area. It contains the following sections:

- **Main** - Displays basic information about the geographic rating area. It contains the following fields:

Field Name	Field Description
Geographic Rating Area	Displays information about the geographic rating area.
State Code	Displays the state code to which the geographic rating area belongs.
Zip Code From	Displays the zip code from where the geographic rating area is effective.
Zip Code Plus 4 From	Displays the zip code plus four additional digits which identify from where the geographic rating area is effective.
Zip Code To	Displays the zip code till where the geographic rating area is effective.
Zip Code Plus 4 To	Displays the zip code plus four additional digits which identify till where the geographic rating area is effective.
Start Date	Displays the date from when the geographic rating area is effective.
End Date	Displays the date till when the geographic rating area is effective.
Status	Displays the status of the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>

- **Plan Details** - Lists the plan information of the geographic rating area. It contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number which is associated with the geographic rating area.
Plan Number	Displays the plan number of the policy.
Health Plan	Indicates the health plan to which the geographic rating area is associated.  <b>Note:</b> The data in this column appears only when the geographic rating area is specified for fully-insured individual.
Source System	Displays the name of the external system from where the policy is originated.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the geographic rating area.  <b>Note:</b> The <b>Edit</b> button appears when the geographic rating area is in the <b>Active</b> status.
Inactive	Used to change the status of the geographic rating area.  <b>Note:</b> The <b>Inactive</b> button appears when the geographic rating area is in the <b>Active</b> status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the geographic rating area is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the geographic rating area status is updated.
Creation Date/Time	Displays the date and time when the geographic rating area is created.

### Related Topics

For more information on...	See...

### Searching for a Geographic Rating Area

## Prerequisites

To search for a geographic rating area, you should have:

- Geographic rating area defined in the application.
- Policy and plan defined in the application.

## Procedure

To search for a geographic rating area:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **G** and then click **Geographic Rating Area**.  
The **Geographic Rating Area** screen appears.
3. Enter the search criteria in the **Search Geographic Rating Area** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of geographic rating area that meet the search criteria appears in the **Search Results** section.

## **Defining a Geographic Rating Area**

### Procedure

To define a geographic rating area

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **G** and then click **Geographic Rating Area**.  
The **Geographic Rating Area** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Geographic Rating Area** screen.  
The **Geographic Rating Area** screen appears. It contains the following sections:
  - **Main** - Used to specify basic details about the geographic rating area.
  - **Plan Details** - Used to specify the plan details for the geographic rating area.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Geographic Rating Area	Used to specify the geographic rating area.	Yes
State Code	Used to specify the state code which belongs to the geographical rating area.	Yes
	<b>Note:</b> You must specify a state code which is already defined in the system.	
Zip Code From	Used to specify the zip code from where the geographic rating area begins.	Yes
Zip Code Plus 4 From	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes
Zip Code To	Used to specify the zip code till where the geographic rating area ends.	Yes
Zip Code Plus 4 To	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes
Start Date	Used to specify the date from when the geographic rating area is effective.	Yes
	<b>Note:</b> The geographic rating area start date cannot be later than the geographic rating area end date.	
End Date	Used to specify the date till when the geographic rating area is effective.	No
	<b>Note:</b> The geographic rating area end date cannot be earlier than the geographic rating area start date	
Status	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot assign an <b>Inactive</b> status to the geographic rating area record while you are defining a geographic rating area.	

4. Enter the required details in the **Main** section.
5. Add the plan details for the geographic rating area, if required.
6. Click **Save**.

The geographic rating area is defined in the **Active** status.

How to add the plan details for a geographic rating area	<a href="#">Adding the Plan Details for a Geographic Rating Area</a> on page 127

## Adding the Plan Details for a Geographic Rating Area

### Prerequisites

To add plan details for a geographic rating area, you should have:

- Policy and plan defined in the application.
- Source system defined in the application.
- Health plan defined in the application.

### Procedure

To add plan details for a geographic rating area:

1. Ensure that the **Plan Details** section is expanded when you are defining or editing the geographic rating area information.

**Note:** If you want to use the geographic rating area for a fully-insured group, you need to specify policy number, plan number, and source system fields. You can specify the health plan only when you want to use the geographic rating area for a fully-insured individual membership.

The **Plan Details** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Policy Number	Used to specify the policy number which is associated with the geographic rating area.	No
Plan Number	Used to specify the plan number of the policy.	No
Health Plan	Used to specify the health plan which is associated with the geographic rating area.  <b>Note:</b> You need to specify the health plan, if you want to use the geographic rating area for a fully-insured individual membership.	No
Source System	Used to specify the name of the external system from where the policy is originated.	No

2. Enter the required details in the **Plan Details** section.
3. If you want to define more than one plan information for the geographic rating area, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a plan information from the geographic rating area, click the **Delete** (🗑️) icon corresponding to the policy number column.

### **Editing a Geographic Rating Area**

#### Procedure

To edit a geographic rating area

1. Search for the geographic rating area in the **Geographic Rating Area** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the geographic rating area column whose details you want to view. The **Geographic Rating Area** zone appears.
3. Click the **Edit** button in the **Geographic Rating Area** screen.

The **Geographic Rating Area** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the geographic rating area.
- **Plan Details** - Used to specify the plan details for the geographic rating area.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Geographic Rating Area	Used to specify the geographic rating area.	Yes
State Code	Used to specify the state code which belongs to the geographical rating area. <b>Note:</b> You must specify a state code which is already defined in the system.	Yes
Zip Code From	Used to specify the zip code from where the geographic rating area begins.	Yes
Zip Code Plus 4 From	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes
Zip Code To	Used to specify the zip code till where the geographic rating area ends.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Zip Code Plus 4 To	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes
Start Date	Used to specify the date from when the geographic rating area is effective.	Yes
	<b>Note:</b> The geographic rating area start date cannot be later than the geographic rating area end date.	
End Date	Used to specify the date till when the geographic rating area is effective.	No
	<b>Note:</b> The geographic rating area end date cannot be earlier than the geographic rating area start date	
Status	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot assign an <b>Inactive</b> status to the geographic rating area record while you are defining a geographic rating area.	

4. Modify the geographic rating area details, if required.
5. Define, edit, or remove plan details for the geographic rating area, if required.
6. Click **Save**.

The changes made to the geographic rating area are saved.

### **Related Topics**

### **Inactivating a Geographic Rating Area**

#### **Procedure**

To inactivate a geographic rating area:

1. Search for the geographic rating area in the **Geographic Rating Area** screen.

2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the geographic rating area column whose details you want to view.  
The **Geographic Rating Area** zone appears.
3. Click the **Inactive** button in the **Geographic Rating Area** zone.  
The status of the geographic rating area is changed to **Inactive**.

**Note:** The **Inactive** button appears when the geographic rating area is in the **Active** status.

## Member Relationship Pricing Parameter

Oracle Revenue Management and Billing enables you to use the member relationship (i.e. how a member is related to the main subscriber of the membership) as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different member relationship.

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, the system automatically derives member relationship for each member person of the membership from a member relationship structure. You can define a member relationship structure through a characteristic on the policy plan. While defining a member relationship structure for a policy plan, you must use the characteristic type specified in the **Member Relationship Structure Characteristic Type** attribute of a member relationship and subscription tier preference. The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLLNG** feature configuration.

The system enables you to define two types of member relationship structure:

- **Step Member Relationship Structure** - A step member relationship structure helps the system to determine how each member person is related to the main subscriber of the membership. You can specify a list of member relationships in a step member relationship structure. A member relationship is derived for a member person depending on the following:
  - Whether the member person is a self, spouse, or dependent
  - Number of spouses, dependents, and young adults in the membership

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self, spouse, or dependent while deriving the member relationship. In a step member relationship structure, a spouse is never considered as a dependent. Only children are considered as dependents.

For example, you can create a step member relationship structure named STEPEX1 as shown below:

Member Relationship	Self	Number of Spouses	Number of Dependents	Number of Young Adults
Self	1	0	0	0
Spouse 1	1	1	0	0
Spouse 2	1	2	0	0
Child 1	1	1	1	0
Young Adult 1	1	1	0	1
CD1 and YA1	1	1	1	1
Child 2	1	1	2	0
Young Adult 2	1	1	0	2
CD2 and YA2	1	1	2	2
Additional Dependent	1	3	3	3

**Note:** You can only define one member relationship in a step member relationship structure where the sum of self, number of spouses, number of dependents, and number of young adults exceeds the maximum member count specified in the step member relationship structure.

In addition, you can create a relationship matrix in the STEPEX1 member relationship structure as shown below:

Relation	Relationship Type	Relationship
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Spouse
Spouse	Spouse	Spouse

- **Party Member Relationship Structure** - A party member relationship structure helps the system to determine how each member person is related to the main subscriber of the membership. You can specify a list of member relationships in a party member relationship structure. A member relationship is derived for a member person depending on the following:
  - Whether the member person is a self or dependent

- Number of dependents in the membership

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self or dependent while deriving the member relationship. In a party member relationship structure, a spouse is always considered as a dependent. Also, children are not categorized as young adults.

For example, you can create a party member relationship structure named PARTYEX1 as shown below:

Member Relationship	Self	Number of Spouses	Number of Dependents	Number of Young Adults
Self	1	0	0	0
Dependent 1	1	0	1	0
Dependent 2	1	0	2	0
Dependent 3	1	0	3	0
Additional Dependents	1	0	9	0

**Note:** You can only define one member relationship in a party member relationship structure where the sum of self and number of dependents exceeds the maximum member count specified in the party member relationship structure.

In addition, you can create a relationship matrix in the PARTYEX1 member relationship structure as shown below:

Relation	Relationship Type	Relationship
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Dependent
Spouse	Spouse	Dependent

Once the member relationship structure is derived from the policy plan, the system determines the member relationship for each member person in the membership. While determining the member relationship for a member person, the system derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- Member Relationship Derivation Date
- New Born Gift Days
- New Born Gift Days Applicability
- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

The system then derives these characteristics from the policy plan. If the **Member Relationship Derivation Date** characteristic type is set to **Enrollment Date**, the system derives the member relationship for each member person of the membership in order of the member start date. However, if the Member Relationship Derivation Date

characteristic type is set to Date of Birth, the system derives the member relationship for each member person of the membership in order of the date of birth. For example, if a membership with the following member persons is added to a policy plan:

Member Start Date	Member End Date	Person Name	Main Subscriber	Relationship Type	Member	Date of Birth
1-Jan-18	31-Dec-20	Mark	Yes	Self	Yes	15-Jan-68
1-Jan-18	31-Dec-20	Nancy	No	Wife	Yes	20-Apr-72
1-Jan-18	31-Dec-20	Roger	No	Child	Yes	15-May-01
1-Jan-18	31-Dec-20	Tom	No	Child	Yes	16-May-04

Now, if the following characteristics are defined on the policy plan:

- Member Relationship Structure - STEPEX1
- Member Relationship Derivation Date – Date of Birth
- Age Calculation Date Basis – Enrollment Date
- Maximum Number of Dependents – 3
- Max Number of Dependents Order Priority - YOUNGEST

The system will consider the STEPEX1 member relationship structure and derives the member relationship for each member person as shown below:

Member Person	Effective Date	Characteristic Type	Characteristic Value
Mark	1-Jan-18	Member Relationship	Self
Nancy	1-Jan-18	Member Relationship	Spouse 1
Tom	1-Jan-18	Member Relationship	Child 1
Roger	1-Jan-18	Member Relationship	Child 2

Note that the member relationship of Tom is derived before Roger because he is youngest of all dependents. Now, assume if one more member person named Harry with the date of birth as 05-11-08 and relationship type as Child is added to the membership on 05-Jan-18, then the system derives the member relationship for each member person of the membership as shown below:

Effective Date	Member	Member Person Characteristics	Value
1-Jan-18	Mark	Member Relationship	Self
1-Jan-18	Nancy	Member Relationship	Spouse 1
5-Jan-18	Harry	Member Relationship	Child 1
5-Jan-18	Tom	Member Relationship	Child 2
5-Jan-18	Roger	Member Relationship	Additional Dependent

The member relationship for Harry, Tom, and Roger is derived in the order of their age which is calculated from the enrollment date. Because the member relationship derived for Tom and Roger is different, the system creates a new characteristic to store the member relationship for Tom and Roger. Here, the effective date of the characteristics is set to the new member person's start date.

If a new born is added to the membership, the effective date of the new born's member relationship characteristic is calculated considering the gift days if applicable. If a member person is end dated, the system derives the

member relationship of all other member persons once again. If the member relationship for a member person is different, the system creates a new characteristic to store the member relationship for the member person. The effective date of the new characteristic is set to member person's end date + 1. However, if a member person is inactivated, the system derives the member relationship of all other member persons once again. If the member relationship for a member person is different, the system updates the existing member relationship characteristic of the member person.

To use the member relationship as a pricing parameter, you need to define the Member Relationship parameter where:

- **Value Type** is to **Adhoc**
- **Source Entity** is set to **Membership Person**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Member Relationship Characteristic Type** attribute of the member relationship and subscription tier preference
- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Member Relationship parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on the member relationship.

A new screen named **Member Relationship/Subscription Tier Structure** is introduced in this release. It enables you to add, edit, copy, and delete the member relationship and subscription tier structures.

## Prerequisites

To create a member relationship pricing parameter, you need to do the following:

- Define the pricing parameter with the member relationship.
- The **Admin** user must define different types of member relationship structures for step or party, where all the member relationships must be defined in the **Member Relationship/Subscription Tier Structure** screen. These member relationships must also exist in the **C1-ASOBLNG** feature configuration.
- Define the required characteristic types, such as, **Member Relationship Structure (C1-MRLST)**, **Member Relationship - Derivation Date Basis (C1-MRDDDB)**, and **Age Calculation Date Basis (C1-AGCAL)** on the policy plan.
- Define the following set of characteristics while adding the characteristics for the policy plan and also when the premium billing preferences are defined:
  - Max Age of Dependent
  - Max Number of Dependents
  - Order Priority
  - Young Adult Max Age Limit
  - Young Adult Inclusion Applicability
- The above characteristic types along with the **Member Relationship (C1-MEMRL)** characteristic type would be stamped on the member person, must be specified in the **Field Mapping** screen.

## Member Relationship/Subscription Tier Structure (Used for Searching)

The **Member Relationship/Subscription Tier Structure** screen allows you to search for a member relationship/subscription tier using various search criteria. It also allows you to create a member relationship/subscription tier. Through this screen, you can navigate to the following screen. It contains the following zone:

This screen consists of the following zone:

- [Member Relationship/Subscription Tier Structure List](#) on page 135
- [Member Relationship/Subscription Tier Structure](#) on page 136

### Member Relationship/Subscription Tier Structure List

The **Member Relationship/Subscription Tier Structure List** zone displays the member relationship or subscription tier structure information. It contains the following columns:

Column Name	Column Description
Structure	Used to specify the structure code for the structure.
Description	Used to specify the description for the structure.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Member Relationship/Subscription Tier Structure</b> screen appears where you can edit the structural details of the member relationship or subscription tier.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Member Relationship/Subscription Tier Structure</b> screen appears where you can define a new member relationship or subscription tier using an existing member relationship or subscription tier.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the member relationship or subscription tier structure.

#### Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Structure** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters () icon in the upper right corner of this zone.

<b>For more information on...</b>	<b>See...</b>
How to define a member relationship/subscription tier structure	<a href="#">Defining a Subscription Tier Structure</a> on page 153

### Member Relationship/Subscription Tier Structure

The **Member Relationship/Subscription Tier Structure** zone displays the details of the member relationship or subscription tier structure. It contains the following sections:

- **Main** - Displays basic information about the member relationship or subscription tier structure. It contains the following fields:

Field Name	Field Description
Structure	Displays the type of structure.
Description	Displays the description of the structure.
Detailed Description	Displays additional information about the structure.
Maximum Member Count	Displays the maximum count of the members allowed in the structure.

- **Member Relationship/Subscription Tier Criteria** - Lists the criteria details of the member relationship or subscription tier. It contains the following columns:

Column Name	Column Description
Member Relationship/Subscription Tier	Displays the criteria code for the member relationship or subscription tier.
Self	Displays the main subscriber who meets the member relationship or subscription tier criteria. <b>Note:</b> The total count in the <b>Self</b> column cannot exceed more than one.
Number of Spouses	Displays the total number of spouses in the membership who meet the member person relationship criteria.
Number of Dependents	Displays the total number of dependents in the membership who meet the member person relationship criteria.
Number of Young Adults	Displays the total number of young adults in the membership who meet the member person relationship criteria.

- **Relationship Matrix** - Lists the relationship matrix details defined for the member relationship or subscription tier structure. It contains the following columns:

Column Name	Column Description
Relation	Indicates an entity defined in the relationship matrix.
Relationship Type	Indicates how a member person is associated with the main subscriber using a relationship type.
Relationship	Indicates how a member person is associated with the relationship type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the structural details of the member relationship or subscription tier.
Delete	Used to delete the member relationship or subscription tier structure.
Duplicate	Used to create a new member relationship or subscription tier structure using an existing structure.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the member relationship or subscription tier structure is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Defining a Member Relationship Structure

### Procedure

To define a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
A sub-menu appears.
3. Click the **Add** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.  <b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	No

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.  <b>Note:</b> You must specify a unique code name for the member relationship/subscription criteria.	No
Self	Used to specify the main subscriber for the member relationship.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Young Adults	Used to specify the total number of young adults in	No

Field Name	Field Description	Mandatory (Yes or No)
	the membership who meet the member relationship criteria.	
	<b>Note:</b> The value for this field must be a positive integer.	

**Note:** You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify the relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Member Relationship/Subscription Tier Structure** screen.

4. Enter the required details in the **Main** section.
5. Define a criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

9. Click **Save**.

The member relationship structure is defined.

## Editing a Member Relationship Structure

### Procedure

To edit a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
The **Member Relationship/Subscription Tier Structure** screen appears.
3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Edit**  icon in the **Edit** column corresponding to the member relationship structure whose details you want to edit.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Displays the member relationship structure name.	Not applicable
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to define a criteria for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	<b>Note:</b> You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the member relationship.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria. <b>Note:</b> The value for this field must be a positive integer.	No
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria. <b>Note:</b> The value for this field must be a positive integer.	No
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the member relationship criteria. <b>Note:</b> The value for this field must be a positive integer.	No

**Note:**

You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to define a relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can edit the details of a member relationship structure by clicking the **Edit** button in the **Member Relationship/Subscription Tier Structure** zone.

4. Modify the details in the **Main** section.
5. Define, edit, or remove the criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the member relationship structure, click the **Delete (🗑)** icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define, edit, or remove the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete (🗑)** icon corresponding to the **Relation** field.

9. Click **Save**.

The changes made to the member relationship structure are saved.

### **Copying a Member Relationship Structure**

#### **Procedure**

To copy a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
The **Member Relationship/Subscription Tier Structure** screen appears.
3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Duplicate (📄)** icon in the **Duplicate** column corresponding to the member relationship structure whose copy you want to create.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.  <b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	No

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.  <b>Note:</b> You must specify a unique code name for the member relationship/subscription criteria.	No
Self	Used to specify the main subscriber for the member relationship.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Young Adults	Used to specify the total number of young adults in	No

Field Name	Field Description	Mandatory (Yes or No)
	the membership who meet the member relationship criteria.	
	<b>Note:</b> The value for this field must be a positive integer.	

**Note:**

You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify the relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can copy a member relationship structure by clicking the **Duplicate** button in the **Member Relationship/Subscription Tier Structure** zone.

4. Enter the required details in the **Main** section.
5. Define, edit, or remove a criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define, edit, or remove the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

9. Click **Save**.

The new member relationship structure is created.

**Deleting a Member Relationship Structure****Procedure**

To delete a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
A sub-menu appears.
3. Click the **Search** option from the **Member Relationship/Subscription Tier Structure** sub-menu.  
The **Member Relationship/Subscription Tier Structure** screen appears.
4. In the **Member Relationship/Subscription Tier Structure List** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the member relationship structure that you want to delete.  
A message appears confirming whether you want to delete the member relationship structure.

**Tip:** Alternatively, you can click the **Delete** button in the **Member Relationship/Subscription Tier Structure** zone to delete the member relationship structure.

5. Click **OK**.  
The member relationship structure is deleted.

**Viewing the Member Relationship Structure Details****Procedure**

To view the details of the member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.

A sub-menu appears.

3. Click the **Search** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears.

4. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Broadcast** (  ) icon corresponding to the structure column whose details you want to view.

The **Member Relationship/Subscription Tier Structure** zone appears.

5. View the details of the member relationship structure in the **Member Relationship/Subscription Tier Structure** zone.

## Subscription Tier Pricing Parameter

Oracle Revenue Management and Billing enables you to use the subscription tier as a pricing parameter while defining the tier based pricing rules. This feature facilitates you to offer different rates for a price item based on different subscription tier.

On creating the bill period timelines, the system executes the **Derive Subscription Tier for Membership (C1-DERSUBTR)** algorithm attached to the **Account and Price Item Derivation Post-Processing** system event in the respective tier based pricing rule type. This algorithm determines the subscription tier of the membership for each bill period timeline. While determining the subscription tier for a membership, the system derives subscription tier for the membership from a subscription tier structure. Note that while deriving the subscription tier of a membership for a bill period timeline, the system refers the proration rules defined on the respective policy plan and accordingly derives the subscription tier for the membership. The system invokes the **C1-DERSUBTR** algorithm in the **C1-REPC1** batch.

You can define a subscription tier structure through a characteristic on the policy plan. While defining a subscription tier structure for a policy plan, you must use the characteristic type specified in the **Subscription Tier Structure Characteristic Type** attribute of a member relationship and subscription tier preference. The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLLNG** feature configuration.

A subscription tier structure helps the system to determine the subscription tier to which the membership belongs. You can specify a list of subscription tiers in a subscription tier structure. A subscription tier is derived for a membership depending on the following:

- Whether the member person is a self, spouse, or dependent
- Number of spouses, dependents, and young adults in the membership in the respective bill period timeline

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self, spouse, or dependent while deriving the subscription tier. In a subscription tier structure, a spouse is never considered as a dependent. Only children are considered as dependents.

For example, you can create a subscription tier structure named **STEX1** as shown below:

<b>Subscription Tier</b>	<b>Self</b>	<b>Number of Spouses</b>	<b>Number of Dependents</b>	<b>Number of Young Adults</b>
<b>E</b>	1	0	0	0
<b>ES</b>	1	1	0	0
<b>ESC1</b>	1	1	1	0
<b>ESC2</b>	1	1	2	0
<b>EC1</b>	1	0	1	0
<b>EC2</b>	1	0	2	0
<b>EC3</b>	1	0	3	0
<b>F</b>	1	9	9	9

**Note:** You can only define one subscription tier in a subscription tier structure where the sum of self, number of spouses, number of dependents, and number of young adults exceeds the maximum member count specified in the subscription tier structure.

In addition, you can create a relationship matrix in the STEX1 subscription tier structure as shown below:

<b>Relation</b>	<b>Relationship Type</b>	<b>Relationship</b>
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Spouse
Spouse	Spouse	Spouse

Once the subscription tier structure is derived from the policy plan, the system determines the subscription tier of the membership for the bill period timeline. While determining the subscription tier of a membership for the bill period timeline, the system derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- New Born Gift Days
- New Born Gift Days Applicability
- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

The system then derives these characteristics from the policy plan. For example, if a membership with the following member persons is added to a policy plan:

Member Start Date	Member End Date	Person Name	Main Subscriber	Relationship Type	Member	Date of Birth
1-Jan-20	31-Dec-20	Mark	Yes	Self	Yes	15-Jan-68
1-Jan-20	31-Dec-20	Nancy	No	Wife	Yes	20-Apr-72
1-Jan-20	31-Dec-20	Roger	No	Child	Yes	15-May-01
1-Jan-20	31-Dec-20	Tom	No	Child	Yes	16-May-04

Now, if the following characteristics are defined on the policy plan:

- Subscription Tier Structure - STEX1
- Age Calculation Date Basis – Enrollment Date
- Maximum Number of Dependents – 3
- Max Number of Dependents Order Priority - ELDEST
- Max Age Limit for Max Dependent Count – 21
- New Born Gift Days - 30
- New Born Gift Days Applicability - Y
- Young Adult Max Age Limit - 25
- Young Adult Max Age Limit Applicability - Y

The system considers the STEX1 subscription tier structure and derives the subscription tier of the membership for each bill period timeline as shown below:

Bill Period Timeline	Characteristic Type	Characteristic Value
1-Jan-20 to 31-Jan-20	Subscription Tier	ESC2
1-Feb-20 to 29-Feb-20	Subscription Tier	ESC2
1-Mar-20 to 31-Mar-20	Subscription Tier	ESC2
1-Apr-20 to 30-Apr-20	Subscription Tier	ESC2
1-May-20 to 31-May-20	Subscription Tier	ESC2
1-Jun-20 to 30-Jun-20	Subscription Tier	ESC2
1-Jul-20 to 31-Jul-20	Subscription Tier	ESC2
1-Aug-20 to 31-Aug-20	Subscription Tier	ESC2
1-Sep-20 to 30-Sep-20	Subscription Tier	ESC2
1-Oct-20 to 31-Oct-20	Subscription Tier	ESC2
1-Nov-20 to 30-Nov-20	Subscription Tier	ESC2
1-Dec-20 to 31-Dec-20	Subscription Tier	ESC2

Because the characteristic value is same across all bill period timelines, the system will create one subscription tier characteristic with the effective date as 01-Jan-2020. Now, assume if one more member person named Harry with the

date of birth as 05-11-08 and relationship type as Child is added to the membership on 05-Mar-20, then the system derives the subscription tier of the membership for each bill period timeline as shown below:

Bill Period Timeline	Characteristic Type	Characteristic Value
5-Mar-20 to 31-Mar-20	Subscription Tier	F
1-Apr-20 to 30-Apr-20	Subscription Tier	F
1-May-20 to 31-May-20	Subscription Tier	F
1-Jun-20 to 30-Jun-20	Subscription Tier	F
1-Jul-20 to 31-Jul-20	Subscription Tier	F
1-Aug-20 to 31-Aug-20	Subscription Tier	F
1-Sep-20 to 30-Sep-20	Subscription Tier	F
1-Oct-20 to 31-Oct-20	Subscription Tier	F
1-Nov-20 to 30-Nov-20	Subscription Tier	F
1-Dec-20 to 31-Dec-20	Subscription Tier	F

In this case, the system will have two subscription tier characteristics for the membership – one with the effective date as 01-Jan-2020 where the characteristic value is set to **ESC2** and another with the effective date as 05-Mar-2020 where the characteristic value is set to **F**.

If a new born is added to the membership, the effective date of the new subscription tier characteristic is calculated considering the gift days if applicable. If a member person is end dated, the system derives the subscription tier of the membership once again. If the subscription tier for the membership is different, the system creates a new characteristic to store the subscription tier for the membership. The effective date of the new characteristic is set according to the proration rule defined for the termination event. If a member person is inactivated, the system derives the subscription tier of the membership once again. In this case, if the subscription tier for the membership is different, the system updates the existing subscription tier characteristic of the membership.

To use the subscription tier as a pricing parameter, you need to define the Subscription Tier parameter where:

- **Value Type** is to **Adhoc**
- **Source Entity** is set to **Membership**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Subscription Tier Characteristic Type** attribute of the member relationship and subscription tier preference
- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Subscription Tier parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on the subscription tier.

A new screen named **Member Relationship/Subscription Tier Structure** is introduced in this release. It enables you to add, edit, copy, and delete the member relationship and subscription tier structures.

## Prerequisites

To create a subscription tier pricing parameter, you need to do the following:

- Define the pricing parameter with the subscription tier.

- The **Admin** user must define different types of subscription tiers, where all the tiers must be defined in the **Member Relationship/Subscription Tier Structure** screen. These subscription tiers must also exist in the **C1-ASOBLLNG** feature configuration.
- Define the required characteristic types, such as, **Subscription Tier Structure (C1-STRST)** and **Age Calculation Date Basis (C1-AGCAL)** on the policy plan.
- Define the following set of characteristics while adding the characteristics for the policy plan and also when the premium billing preferences are defined:
  - Max Age of Dependent
  - Max Number of Dependents
  - Order Priority
  - Young Adult Max Age Limit
  - Young Adult Inclusion Applicability
- The above characteristic types along with the **Subscription (C1-SUBST)** characteristic type would be stamped on member person, must be specified in the **Field Mapping** screen.

## Member Relationship/Subscription Tier Structure (Used for Searching)

The **Member Relationship/Subscription Tier Structure** screen allows you to search for a member relationship/subscription tier using various search criteria. It also allows you to create a member relationship/subscription tier. Through this screen, you can navigate to the following screen. It contains the following zone:

This screen consists of the following zone:

- [Member Relationship/Subscription Tier Structure List](#) on page 135
- [Member Relationship/Subscription Tier Structure](#) on page 136

### Member Relationship/Subscription Tier Structure List

The **Member Relationship/Subscription Tier Structure List** zone displays the member relationship or subscription tier structure information. It contains the following columns:

Column Name	Column Description
Structure	Used to specify the structure code for the structure.
Description	Used to specify the description for the structure.
Edit	On clicking the <b>Edit</b>  icon, the <b>Member Relationship/Subscription Tier Structure</b> screen appears where you can edit the structural details of the member relationship or subscription tier.

Column Name	Column Description
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Member Relationship/Subscription Tier Structure</b> screen appears where you can define a new member relationship or subscription tier using an existing member relationship or subscription tier.
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can delete the member relationship or subscription tier structure.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Structure** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters (🔍) icon in the upper right corner of this zone.

**Related Topics**

How to view the details of a member relationship/subscription tier structure	<a href="#">Viewing the Subscription Tier Structure Details</a> on page 161
How to define a member relationship/subscription tier structure	<a href="#">Defining a Subscription Tier Structure</a> on page 153

**Member Relationship/Subscription Tier Structure**

The **Member Relationship/Subscription Tier Structure** zone displays the details of the member relationship or subscription tier structure. It contains the following sections:

- **Main** - Displays basic information about the member relationship or subscription tier structure. It contains the following fields:

Field Name	Field Description
Structure	Displays the type of structure.
Description	Displays the description of the structure.
Detailed Description	Displays additional information about the structure.
Maximum Member Count	Displays the maximum count of the members allowed in the structure.

- **Member Relationship/Subscription Tier Criteria** - Lists the criteria details of the member relationship or subscription tier. It contains the following columns:

Column Name	Column Description
Member Relationship/Subscription Tier	Displays the criteria code for the member relationship or subscription tier.
Self	Displays the main subscriber who meets the member relationship or subscription tier criteria.

Column Name	Column Description
	<b>Note:</b> The total count in the <b>Self</b> column cannot exceed more than one.
Number of Spouses	Displays the total number of spouses in the membership who meet the member person relationship criteria.
Number of Dependents	Displays the total number of dependents in the membership who meet the member person relationship criteria.
Number of Young Adults	Displays the total number of young adults in the membership who meet the member person relationship criteria.

- **Relationship Matrix** - Lists the relationship matrix details defined for the member relationship or subscription tier structure. It contains the following columns:

Column Name	Column Description
Relation	Indicates an entity defined in the relationship matrix.
Relationship Type	Indicates how a member person is associated with the main subscriber using a relationship type.
Relationship	Indicates how a member person is associated with the relationship type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the structural details of the member relationship or subscription tier.
Delete	Used to delete the member relationship or subscription tier structure.
Duplicate	Used to create a new member relationship or subscription tier structure using an existing structure.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the member relationship or subscription tier structure is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Defining a Subscription Tier Structure

### Procedure

To define a subscription tier structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
A sub-menu appears.
3. Click the **Add** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Yes
	<b>Note:</b> You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify a criteria for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify a unique code name for the subscription tier criteria.	
Self	Used to specify the main subscriber for the subscription tier. <b>Note:</b> The value for this field must be a positive integer.	No
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria. <b>Note:</b> The value for this field must be a positive integer.	No
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria. <b>Note:</b> The value for this field must be a positive integer.	No
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria. <b>Note:</b> The value for this field must be a positive integer.	No

**Note:** You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify the relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Member Relationship/Subscription Tier Structure** screen.

4. Enter the required details in the **Main** section.
5. Define a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define a relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

9. Click **Save**.

The subscription tier structure is defined.

### **Editing a Subscription Tier Structure**

#### **Procedure**

To edit a subscription tier structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
The **Member Relationship/Subscription Tier Structure** screen appears.
3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the subscription tier structure whose details you want to edit.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Displays the subscription tier structure name.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify a criteria for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/ Subscription Tier	Used to specify a code name for the criteria.	No
	<b>Note:</b> You must specify a unique code name for the criteria.	
Self	Used to specify the main subscriber for the subscription tier.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	

**Note:**

You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify a relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix.	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can edit the details of a member relationship structure by clicking the **Edit** button in the **Member Relationship/Subscription Tier Structure** zone.

4. Modify the details in the **Main** section.
5. Define, edit, or remove a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the subscription tier structure, click the **Delete (🗑)** icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define, edit, or remove a relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete (🗑)** icon corresponding to the **Relation** field.

9. Click **Save**.

The changes made to the subscription tier structure are saved.

## Copying a Subscription Tier Structure

### Procedure

To copy a subscription tier structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.

The **Member Relationship/Subscription Tier Structure** screen appears.

3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the subscription tier structure whose copy you want to create.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Not applicable
	<b>Note:</b> You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the subscription tier. <b>Note:</b> The value for this field must be a positive integer.	No
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria. <b>Note:</b> The value for this field must be a positive integer.	No
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria. <b>Note:</b> The value for this field must be a positive integer.	No
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria. <b>Note:</b> The value for this field must be a positive integer.	No

**Note:**  
You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify the relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No

Field Name	Field Description	Mandatory (Yes or No)
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can copy a member relationship structure by clicking the **Duplicate** button in the **Member Relationship/Subscription Tier Structure** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.
- If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the subscription tier structure, click the **Delete (🗑)** icon corresponding to the **Member Relationship/Subscription Tier** field.

- Define, edit, or remove the relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.
- If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete (🗑)** icon corresponding to the **Relation** field.

- Click **Save**.

The new subscription tier structure is created.

### Deleting a Subscription Tier Structure

#### Procedure

To delete a subscription tier structure:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
A sub-menu appears.
- Click the **Search** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears.

- In the **Member Relationship/Subscription Tier Structure List** section, click the **Delete** () icon in the **Delete** column corresponding to the subscription tier structure that you want to delete.

A message appears confirming whether you want to delete the subscription tier structure.

**Tip:** Alternatively, you can click the **Delete** button in the **Member Relationship/Subscription Tier Structure** zone to delete the subscription tier structure.

- Click **OK**.

The subscription tier structure is deleted.

### **Viewing the Subscription Tier Structure Details**

#### Procedure

To view the details of the subscription tier structure:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
A sub-menu appears.
- Click the **Search** option from the **Member Relationship/Subscription Tier Structure** sub-menu.  
The **Member Relationship/Subscription Tier Structure** screen appears.
- In the **Member Relationship/Subscription Tier Structure List** zone, click the **Broadcast** () icon corresponding to the structure column whose details you want to view.  
The **Member Relationship/Subscription Tier Structure** zone appears.
- View the details of the subscription tier structure in the **Member Relationship/Subscription Tier Structure** zone.

## Medicare Benefits

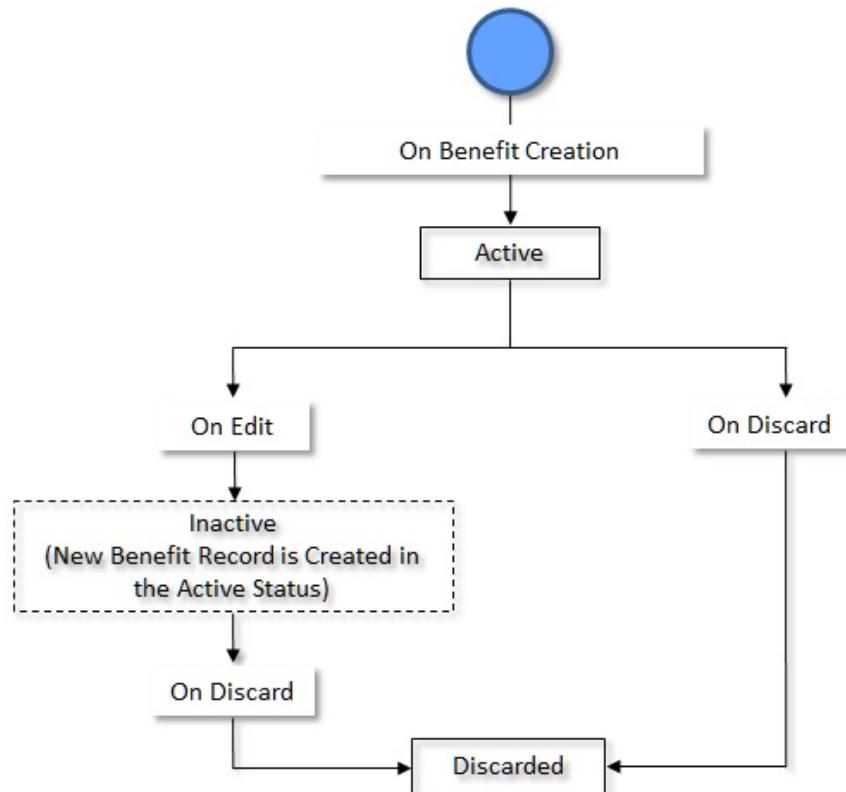

Oracle Revenue Management and Billing enables you to maintain the Medicare benefits (such as, Part A, Part B, Part D, Part D LIS, and Part D LEP) of a member person. The system enables you to define and edit the Medicare benefits from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While defining a Medicare benefit of a member person for Part A, Part B, and Part D, you need to specify a Medicare plan benefit package (i.e. 800 series plan) which is applicable for the Medicare benefit. The system enables you to define and edit a Medicare plan benefit package through the **Field Mapping** screen. You can use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. While defining a Medicare benefit of a member person for Part D LIS and Part D LEP, you need to specify the benefit amount (i.e. subsidy or penalty amount).

While editing a Medicare benefit of a member person from the user interface, you can only edit the characteristics of the Medicare benefit. However, while editing a Medicare benefit of a member person through a health care inbound message or through the membership repricing inbound web service, you can edit the end date, benefit amount, and characteristics of the Medicare benefit. On editing a Medicare benefit, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

The system enables you to discard an active or inactive Medicare benefit from the user interface by clicking the **Discard** button.

### Benefit Status Transition

The following figure graphically indicates how a Medicare benefit moves from one status to another in its lifecycle:

## Algorithms Used in C1-Benefits

The following table lists the algorithms which are attached to the **C1-Benefits** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-FIAUDEV	C1-FIAUDEV	Refer to <a href="#">C1-FIAUDEV</a> on page 163.
Validation	C1-BENVAL	C1-BENVAL	<a href="#">C1-BENVAL</a> on page 164

### C1-FIAUDEV

If this algorithm is attached to the **Audit** system event of the **C1-Membership**, **C1-Benefits**, and **C1\_PERSON\_BO** business objects, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event whenever a membership is added to a policy plan, member person is added to a membership, and a Medicare benefit is defined for a member person. It also creates the audit event whenever the membership, member person, and Medicare benefit details are updated. However, note that the audit events are created in the update scenario when the element listed for auditing in the age based, tier based, or benefit pricing rule type is updated. The system considers only those pricing rule types whose pricing rules are effective during the respective entity (i.e. membership, member person, or Medicare benefit whichever is updated) date range.

It creates one or more audit events in the **Pending** status. The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1\_AUDIT\_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the **C1\_AUDIT\_EVENT** table.

#### Note:

The system creates an audit event whenever the membership start and end dates and member person's start and end dates are changed in the system irrespective of whether these fields are listed for auditing or not in the age based or tier based pricing rule types.

Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event.

For each audit event, this algorithm derives the memberships on the policy plans which are impacted and the pricing rule types whose pricing rules are defined on the respective policy plans. A repricing entity detail record is then created for each membership, pricing rule type, and effective date combination in the **CI\_REPRC\_ENTITY\_DTL** table. The status of the repricing entity detail record is set to **P**. Once the repricing entity detail records are created successfully, the status of the audit event is changed to **Complete**.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

## C1-BENVAL

This algorithm validates a benefit. It checks the following:

- Whether the benefit end date is not earlier than the benefit start date.
- Whether the membership and member person are specified while defining a Medicare benefit.
- Whether the benefit amount is specified while defining a Medicare benefit of a member person for Part D LIS and Part D LEP.
- Whether the Medicare plan benefit package is specified while defining a Medicare benefit of a member person for Part A, Part B, and Part D.

While editing a Medicare benefit, this algorithm only allows you to edit the following information:

- Benefit Amount
- Benefit End Date
- Benefit Status
- Benefit Characteristics

## Benefit Sub Type

Oracle Revenue Management and Billing allows you to define a benefit at the membership level for an individual membership where the system assumes the following:

- There will be only one member person in the Medicare membership who will avail the Medicare benefit.
- The other benefits would be availed by all the member persons of an individual membership.

The **Benefit Sub Type** screen enables you to create, edit, delete, and copy a benefit sub type. It contains the following zones:

- [Benefit Sub Type List](#) on page 165
- [Benefit Sub Type](#) on page 166

### Benefit Sub Type List

The **Benefit Sub Type List** zone lists the benefit sub types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Benefit Sub Type	Displays the benefit sub type.
Description	Displays the description of the benefit sub type.
Status	Indicates the status of the benefit sub type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Value Type	Indicates the type of value that you want to store in the benefit sub type. The valid values are: <ul style="list-style-type: none"> <li>Flat</li> <li>NA</li> </ul>
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Benefit Sub Type</b> screen appears where you can edit the details of the benefit sub type. <p><b>Note:</b> The <b>Edit</b> icon appears only when the benefit sub type is not yet used.</p>
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Benefit Sub Type</b> screen appears where you can define a benefit sub type using an existing benefit sub type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete a benefit sub type.

You can filter the list using various search criteria (such as **Benefit Sub Type**, **Status**, **Description**, **Value Type**, **Reconciliation Required**, **Price**, and **Validate**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filter** () icon in the upper right corner of this zone.

On clicking the **Broadcast** () icon corresponding to the benefit sub type, the **Benefit Sub Type** zone appears with the details of the respective benefit sub type.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Benefit Sub Type

The **Benefit Sub Type** zone displays the details of the benefit sub type. It contains the following sections:

- **Main** - Displays the basic information about the benefit sub type. It contains the following fields:

Field Name	Field Description
Benefit Sub Type	Displays the benefit sub type.
Description	Displays the description of the benefit sub type.
Status	Indicates the status of the benefit sub type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> By default the <b>Status</b> option is selected.</p>
Value Type	Indicates whether the benefit amount should be a flat or calculated amount. The valid values are: <ul style="list-style-type: none"> <li>• Flat</li> <li>• Not applicable</li> </ul>
Externally Priced	Indicates whether the benefit amount is calculated in the enrollment system. <p><b>Note:</b> This field appears when <b>Flat</b> option is selected from the <b>Value Type</b> list.</p>
Charge Negatively	Indicates whether you want to create a negative charge for the benefit amount. <p><b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is not selected.</p>
Benefit SQI	Indicates the SQI using which you want to create an SQI based billable charge for the benefit. <p><b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is not selected.</p>
Charge Benefit Sponsor	Indicates whether you want to create a reverse charge for the benefit sponsor. The reverse charge can then be used by the health insurance payer for reconciliation.

Field Name	Field Description
	<b>Note:</b> This field appears when <b>Flat</b> option is selected from the <b>Value Type</b> list and
Validate External Price	Indicates that you want to validate whether the externally calculated benefit amount is within the threshold range.  <b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is selected.
Validate Price Item	Indicates the price item that you have chosen to validate for the externally calculated benefit amount.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.  This field appears when the <b>Validate External Price</b> check box is selected.
Benefit Sponsor Account	Indicates the account of the sponsor on which you want to create the reverse charge.  <b>Note:</b> This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.
Benefit Sponsor Price Item	Indicates the price item using which you want to create the reverse charge.  <b>Note:</b> This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.
Benefit Sponsor SQI	Indicates the SQI using which you want to create the SQI based billable charge for the reverse charge.  <b>Note:</b> If you do not specify the value, the system will derive the SQI from the <b>Proration SQI</b> option type of the <b>C1-ASOBLLNG</b> feature configuration.  This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.

- **Characteristics** - Lists the characteristics defined for the benefit sub type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the benefit sub type. <b>Note:</b> The <b>Edit</b> button appears only when the benefit sub type is not yet used.
Delete	Used to delete the benefit sub type.
Duplicate	Used to create a new benefit sub type using an existing benefit sub type.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the benefit sub type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Benefit Sub Type** zone does not appear in the **Benefit Sub Type** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to a benefit sub type in the **Benefit Sub Type List** zone.

## Defining a Benefit Sub Type

### Prerequisites

To define a benefit sub type, you should have:

- Values defined in the **BENEFIT\_SUB\_TYPE\_FLG**, **FIELD\_STATUS\_FLG**, and **VALUE\_TYPE\_FLG** lookup type.
- Values defined for the **Proration SQI** option type in the **C1-ASOBLLNG** feature configuration.
- Benefit sub type business object defined in the application.

### Procedure

To define a benefit sub type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **B** and then click **Benefit Sub Type**.

A sub-menu appears.

3. Click the **Add** option from the **Benefit Sub Type** sub-menu.

The **Benefit Sub Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the benefit sub type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sub Type	Used to specify the benefit sub type.	Yes
Description	Used to specify the description for the benefit sub type.	Yes
Status	Used to indicate the status of the benefit sub type. <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> You cannot change the status of a benefit sub type to <b>Inactive</b> when the corresponding benefit is in <b>Active</b> status.         </div>	Yes
Value Type	Used to indicate whether the benefit amount should be a flat or calculated amount. The valid values are: <ul style="list-style-type: none"> <li>• Flat</li> <li>• Not Applicable</li> </ul>	Yes
Externally Priced	Used to indicate whether the benefit amount is calculated in the enrollment system. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears when <b>Flat</b> option is selected from the <b>Value Type</b> list.         </div>	No
Charge Negatively	Used to indicate whether you want to create a negative charge for the benefit amount. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is not selected.         </div>	No
Benefit SQI	Used to indicate the SQI using which you want to create an SQI based billable charge for the benefit.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is not selected.</p>	
Charge Benefit Sponsor	<p>Used to indicate whether you want to create a reverse charge for the benefit sponsor. The reverse charge can then be used by the health insurance payer for reconciliation.</p> <p><b>Note:</b> This field appears when <b>Flat</b> option is selected from the <b>Value Type</b> list and</p>	No
Validate External Price	<p>Used to indicate that you want to validate whether the externally calculated benefit amount is within the threshold range.</p> <p><b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is selected.</p>	No
Validate Price Item	<p>Used to indicate the price item that you want to validate for the externally calculated benefit amount.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Validate Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears.</p> <p>This field appears when the <b>Validate External Price</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Validate External Price</b> check box is selected.</p>
Benefit Sponsor Account	<p>Used to indicate the account of the sponsor on which you want to create the reverse charge.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Charge Benefit Sponsor</b> check box is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Benefit Sponsor Account</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	
Benefit Sponsor Price Item	<p>Used to indicate the price item using which you want to create the reverse charge.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Benefit Sponsor Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	No
Benefit Sponsor SQI	<p>Used to indicate the SQI using which you want to create the SQI based billable charge for the reverse charge.</p> <p><b>Note:</b></p> <p>If you do not specify the value, the system will derive the SQI from the <b>Proration SQI</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	No

**Tip:** Alternatively, you can access the **Benefit Sub Type** screen by clicking the **Add** button in the **Page Title** area of the **Benefit Sub Type** screen.

4. Enter the required details in the **Main** section.
5. Click **Save**.

The benefit sub type is defined.

How to define a characteristic for a benefit sub type	<a href="#">Defining a Characteristic for a Benefit Sub Type</a> on page 172

## Defining a Characteristic for a Benefit Sub Type

To define a characteristic for an benefit sub type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Benefit Sub Type**)

### Procedure

To define a characteristic for a benefit sub type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a benefit sub type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Benefit Sub Type</b> .	<b>Note:</b> This field is required when you are defining the characteristics for a benefit sub type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining the characteristics for a benefit sub type.

2. Enter the required characteristic in the **Characteristics** section.
3. If you want to define more than one characteristic for the benefit sub type, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the benefit sub type, click the **Delete (🗑)** icon corresponding to the characteristic

4. Click **Save**.

The characteristic is defined for the benefit sub type.

## Editing a Benefit Sub Type

### Prerequisites

To edit a benefit sub type, you should have:

- Values defined in the **BENEFIT\_SUB\_TYPE\_FLG**, **FIELD\_STATUS\_FLG**, and **VALUE\_TYPE\_FLG** lookup type.
- Values defined for the **Proration SQI** option type in the **C1-ASOBLLNG** feature configuration.
- Benefit sub type business object defined in the application.

### **Procedure**

To edit a benefit sub type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **B** and then click **Benefit Sub Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Benefit Sub Type** sub-menu.  
The **Benefit Sub Type** screen appears.
4. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the benefit sub type whose details you want to edit.

**Note:** The Edit icon appears only when a benefit is not defined using the benefit sub type.

The **Benefit Sub Type** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the benefit sub type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sub Type	Displays the benefit sub type.	Not applicable
Description	Used to specify the description for the benefit sub type.	Yes
Status	Used to indicate the status of the benefit sub type. <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> You can not change the status to a benefit sub type to <b>Inactive</b> when the corresponding benefit is in <b>Active</b> status.</p>	Yes
Value Type	Used to indicate whether the benefit amount should be a flat or calculated amount. The valid values are: <ul style="list-style-type: none"> <li>• Flat</li> <li>• Not Applicable</li> </ul>	Yes
Externally Priced	Used to indicate whether the benefit amount is calculated in the enrollment system.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when <b>Flat</b> option is selected from the <b>Value Type</b> list.	
Charge Negatively	Used to indicate whether you want to create a negative charge for the benefit amount.  <b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is not selected.	No
Benefit SQI	Used to indicate the SQI using which you want to create an SQI based billable charge for the benefit.  <b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is not selected.	No
Charge Benefit Sponsor	Used to indicate whether you want to create a reverse charge for the benefit sponsor. The reverse charge can then be used by the health insurance payer for reconciliation.  <b>Note:</b> This field appears when <b>Flat</b> option is selected from the <b>Value Type</b> list and	No
Validate External Price	Used to indicate that you want to validate whether the externally calculated benefit amount is within the threshold range.  <b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is selected.	No
Validate Price Item	Used to indicate the price item that you want to validate for the externally calculated benefit amount.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Validate External Price</b> check box is selected.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Validate Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears.</p> <p>This field appears when the <b>Validate External Price</b> check box is selected.</p>	
Benefit Sponsor Account	<p>Used to indicate the account of the sponsor on which you want to create the reverse charge.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Benefit Sponsor Account</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Charge Benefit Sponsor</b> check box is selected.</p>
Benefit Sponsor Price Item	<p>Used to indicate the price item using which you want to create the reverse charge.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Benefit Sponsor Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	No
Benefit Sponsor SQI	Used to indicate the SQI using which you want to create the SQI based billable charge for the reverse charge.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If you do not specify the value, the system will derive the SQI from the <b>Proration SQI</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	

**Tip:** Alternatively, you can edit the details of a benefit sub type by clicking the **Edit** button in the **Benefit Sub Type** zone.

5. Modify the required details in the **Main** section, if required.
6. Define, edit, or remove characteristics of the benefit sub type, if required
7. Click **Save**.

The changes made to the benefit sub type are saved.

### **Copying a Benefit Sub Type**

Instead of creating a benefit sub type from scratch, you can create a new benefit sub type using an existing benefit sub type. This is possible through copying a benefit sub type. On copying a benefit sub type, the details are copied to the new benefit sub type. You can then edit the details, if required.

### Prerequisites

To define a benefit sub type, you should have:

- Values defined in the **BENEFIT\_SUB\_TYPE\_FLG**, **FIELD\_STATUS\_FLG**, and **VALUE\_TYPE\_FLG** lookup type.
- Values defined for the **Proration SQI** option type in the **C1-ASOBLNG** feature configuration.
- Benefit sub type business object defined in the application.

### Procedure

To copy a benefit sub type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **B** and then click **Benefit Sub Type**.

A sub-menu appears.

- Click the **Search** option from the **Benefit Sub Type** sub-menu.

The **Benefit Sub Type** screen appears.

- In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the benefit sub type whose details you want to edit.

The **Benefit Sub Type** screen appears. It contains the following sections:

- Main** - Used to specify the basic details about the benefit sub type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Benefit Sub Type	Used to specify the benefit sub type.	Yes
Description	Used to specify the description for the benefit sub type.	Yes
Status	Used to indicate the status of the benefit sub type. <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> You cannot change the status of a benefit sub type to <b>Inactive</b> when the corresponding benefit is in <b>Active</b> status.         </div>	Yes
Value Type	Used to indicate whether the benefit amount should be a flat or calculated amount. The valid values are: <ul style="list-style-type: none"> <li>Flat</li> <li>Not Applicable</li> </ul>	Yes
Externally Priced	Used to indicate whether the benefit amount is calculated in the enrollment system. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears when <b>Flat</b> option is selected from the <b>Value Type</b> list.         </div>	No
Charge Negatively	Used to indicate whether you want to create a negative charge for the benefit amount. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is not selected.         </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Benefit SQI	Used to indicate the SQI using which you want to create an SQI based billable charge for the benefit.	No
	<b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is not selected.	
Charge Benefit Sponsor	Used to indicate whether you want to create a reverse charge for the benefit sponsor. The reverse charge can then be used by the health insurance payer for reconciliation.	No
	<b>Note:</b> This field appears when <b>Flat</b> option is selected from the <b>Value Type</b> list and	
Validate External Price	Used to indicate that you want to validate whether the externally calculated benefit amount is within the threshold range.	No
	<b>Note:</b> This field appears when the <b>Flat</b> option is selected from the <b>Value Type</b> list and the <b>Externally Priced</b> check box is selected.	
Validate Price Item	Used to indicate the price item that you want to validate for the externally calculated benefit amount.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Validate Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears. This field appears when the <b>Validate External Price</b> check box is selected.	<b>Note:</b> This field is required when the <b>Validate External Price</b> check box is selected.
Benefit Sponsor Account	Used to indicate the account of the sponsor on which you want to create the reverse charge.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Benefit Sponsor Account</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	<p><b>Note:</b> This field is required when the <b>Charge Benefit Sponsor</b> check box is selected.</p>
Benefit Sponsor Price Item	<p>Used to indicate the price item using which you want to create the reverse charge.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Benefit Sponsor Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Search</b> window appears.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	No
Benefit Sponsor SQI	<p>Used to indicate the SQI using which you want to create the SQI based billable charge for the reverse charge.</p> <p><b>Note:</b></p> <p>If you do not specify the value, the system will derive the SQI from the <b>Proration SQI</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</p> <p>This field appears when the <b>Charge Benefit Sponsor</b> check box is selected.</p>	No

**Tip:** Alternatively, you can copy a benefit sub type by clicking the **Duplicate** button in the **Benefit Sub Type** zone.

5. Define, edit or remove the required details in the **Main** section, if required.
6. Click **Save**.

The new benefit sub type is saved.

## Deleting a Benefit Sub Type

### Procedure

To delete a benefit sub type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **B** and then click **Benefit Sub Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Benefit Sub Type** sub-menu.  
The **Benefit Sub Type** screen appears.
4. In the **Benefit Sub Type List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the benefit sub type that you want to delete.  
A message appears confirming whether you want to delete the benefit sub type.
5. Click **OK**.  
The benefit sub type is deleted.

**Note:** You can delete a benefit sub type only when a benefit is not defined using the benefit sub type.

**Tip:** Alternatively, you can delete a benefit sub type by clicking the **Delete** button in the **Benefit Sub Type** zone.

## Benefit (Used for Searching)

The **Benefit** screen allows you to search for a Medicare benefit using various search criteria. It also allows you to create a Medicare benefit. It contains the following zone:

- [Search Benefit](#) on page 181

### Search Benefit

The **Search Benefit** zone allows you to search for a benefit using various search criteria. It contains the following two sections:

- Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a Medicare benefit using the benefit, policy, or person details. The valid values are: <ul style="list-style-type: none"> <li>Benefit Details</li> <li>Policy Details</li> <li>Person Details</li> </ul> <p><b>Note:</b> By default, the <b>Benefit Details</b> option is selected.</p>	Yes
Benefit ID	Used to search a particular Medicare benefit. <p><b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p>	No
Membership ID	Used to search Medicare benefits of the member persons who belong to a particular membership.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Membership ID</b> field. On clicking the <b>Search</b> icon, the <b>Membership Search</b> window appears.</p>	
Start Date	<p>Used to search Medicare benefits which are availed from a particular date onwards.</p> <p><b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p>	No
End Date	<p>Used to search Medicare benefits which are availed till a particular date.</p> <p><b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p>	No
Status	<p>Used to search Medicare benefits with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Discarded</li> <li>• Inactive</li> </ul> <p><b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p>	No
Benefit Type	<p>Used to search benefits of a particular type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p> <p>At present, the <b>Commercial</b> benefit type is not supported. The implementation team can build the custom logic based on the business requirements.</p>	
Benefit Sub Type	<p>Used to search a particular type of Medicare benefits.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p> <p>The list includes only those benefit types which are defined through the <b>Benefit Sub Type</b> screen.</p>	No
Benefit Source	<p>Used to search Medicare benefits which are received from a particular source. The valid values are:</p> <ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul> <p><b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p>	No
Policy ID	<p>Used to search Medicare benefits which are availed under a particular fully-insured group policy.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Policy Details</b> option is selected from the <b>Search By</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Policy ID</b> field. On clicking the <b>Search</b> icon, the <b>Policy Search</b> window appears.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Policy Plan ID	Used to search Medicare benefits which are availed under a particular fully-insured group policy plan.	No
	<p><b>Note:</b></p> <p>This field appears when the <b>Policy Details</b> option is selected from the <b>Search By</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Policy Plan ID</b> field. On clicking the <b>Search</b> icon, the <b>Policy Plan Search</b> window appears.</p>	
Membership Beneficiary ID	Used to search Medicare benefits which are availed by a particular Medicare beneficiary (i.e. member person).	No
	<p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	
Person Name	Used to search Medicare benefits which are availed by a particular person.	No
	<p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)
	<p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	
Person Identifier	Used to search Medicare benefits which are availed by a particular person.	Yes (Conditional)
	<p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	
Relationship Type	Used to search Medicare benefits of member persons who are related to a main subscriber using a particular relationship type.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.	

**Note:** You must specify at least one search criterion while searching for a Medicare benefit.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Benefit Information	Displays information about the Medicare benefit. <b>Note:</b> It has a link. On clicking the link, the <b>Benefit</b> screen appears where you can view the details of the respective benefit.
Membership Information	Indicates the membership whose member person has availed the Medicare benefit. <b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Member Person Information	Indicates the member person who has availed the Medicare benefit. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in application. <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective member person.
Status	Indicates the status of the Medicare benefit. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Discarded</li> <li>• Inactive</li> </ul>
Benefit Source	Indicates the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul>
Benefit Type	Indicates the type of benefit. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>
Benefit Sub Type	Indicates the type of Medicare benefit.

Column Name	Column Description
Benefit Amount	Displays the low income subsidy or late enrollment penalty amount for Medicare Part D.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for a Medicare Benefit

### Prerequisites

To search for a Medicare benefit, you should have:

- Values defined for the **BENEFIT\_TYPE\_FLG**, **BENEFIT\_SUB\_TYPE\_FLG**, and **BENEFIT\_SRC\_FLG** lookup fields in the application.

### Procedure

To search for a Medicare benefit:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Benefit**.  
The **Benefit** screen appears.
3. Enter the search criteria in the **Search Benefit** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of Medicare benefits that meet the search criteria appears in the **Search Results** section.

## Defining a Medicare Benefit

### Prerequisites

To define a Medicare benefit, you should have:

- Required membership defined in the application

- Required member person added to the membership in the application
- Values defined for the **BENEFIT\_TYPE\_FLG**, **BENEFIT\_SUB\_TYPE\_FLG**, and **BENEFIT\_SRC\_FLG** lookup fields in the application
- Required Medicare plan benefit packages defined in the application

### **Procedure**

To define a Medicare benefit:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Benefit**.  
A sub-menu appears.
3. Click the **Add** option from the **Benefit** sub-menu.

The **Benefit** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the Medicare benefit.
- **Characteristics** - Used to define the characteristics for the Medicare benefit.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Membership ID	Used to indicate the membership whose member person has availed the Medicare benefit.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Membership ID</b> field. On clicking the <b>Search</b> icon, the <b>Membership Search</b> window appears.  On specifying the membership ID, the information about the membership appears corresponding to the <b>Membership ID</b> field.	Yes
Benefit Source	Used to indicate the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul> <b>Note:</b> The list includes only those benefit sources which are defined in the <b>BENEFIT_SRC_FLG</b> lookup field.	Yes
Benefit Type	Used to indicate the type of benefit. The valid value is:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Medicare Affiliated</li> </ul> <p><b>Note:</b> The list includes only those benefit types which are defined in the <b>BENEFIT_TYPE_FLG</b> lookup field.</p>	
Benefit Sub Type	<p>Used to indicate the type of Medicare benefit.</p> <p><b>Note:</b> The list includes only those benefit types which are defined through the <b>Benefit Sub Type</b> screen.</p>	Yes
Medicare Plan Benefit Package	<p>Used to indicate the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit.</p> <p><b>Note:</b> This field appears when the benefit sub type is set to <b>Part A-Inpatient Hospital Coverage, Part B-Outpatient Medical Coverage, or Part D-Medicare Prescription Drug Coverage.</b></p>	Yes (Conditional)
Start Date	<p>Used to specify the date from when the member person has availed the Medicare benefit.</p> <p><b>Note:</b> The start date of the Medicare benefit cannot be earlier than the member person start date or later than the member person end date. The Medicare benefit start date cannot be later than the Medicare benefit end date.</p>	Yes
End Date	Used to specify the date till when the member person has availed the Medicare benefit.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The end date of the Medicare benefit cannot be earlier than the member person start date or later than the member person end date.</p> <p>The Medicare benefit end date cannot be earlier than the Medicare benefit start date.</p>	
Benefit Amount	<p>Used to specify the low income subsidy or late enrollment penalty amount for Medicare Part D.</p> <p><b>Note:</b> This field appears when the benefit sub type is set to <b>Late Enrollment Penalty</b> or <b>Low Income Subsidy</b>.</p>	No

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Benefit** screen.

4. Enter the required details in the **Main** section.
5. Define characteristics for the Medicare benefit, if required.
6. Click **Save**.

The Medicare benefit is defined for the member person in the **Active** status.

**Note:** You cannot define more than one Medicare benefit for the same membership, member person, benefit source, benefit type, and benefit sub type combination.

### **Defining a Characteristic for a Medicare Benefit**

#### **Prerequisites**

To define a characteristic for a Medicare benefit, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Benefits**)

#### **Procedure**

To define a characteristic for a Medicare benefit:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a Medicare benefit.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the Medicare benefit.	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for the Medicare benefit.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Benefits</b> .	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for the Medicare benefit.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for a predefined characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for the Medicare benefit.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the Medicare benefit, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic of the Medicare benefit, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the Medicare benefit.

**Benefit (Used for Viewing)**

Once you create a Medicare benefit, the **Benefit** screen allows you to:

- View the details of the Medicare benefit
- Edit the details of the Medicare benefit
- Discard the Medicare benefit
- View the log of the Medicare benefit
- Add a log entry for the Medicare benefit

It consists of the following tabs:

- [Benefit - Main](#) on page 191
- [Benefit - Log](#) on page 193

**Benefit - Main**

The **Main** tab displays information about the Medicare benefit. It contains the following zones:

- [Benefit](#) on page 191
- [Benefit Characteristics](#) on page 193

**Benefit**

The **Benefit** zone displays the details of the Medicare benefit. It contains the following sections:

- **Main** - Displays basic information about the Medicare benefit. It contains the following fields:

Field Name	Field Description
Benefit Information	Displays information about the Medicare benefit.
Membership Information	Indicates the membership whose member person has availed the Medicare benefit.

Field Name	Field Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Benefit Source	Indicates the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> <li>Centers for Medicare and Medicaid Services</li> <li>State</li> </ul>
Benefit Type	Indicates the type of benefit. The valid value is: <ul style="list-style-type: none"> <li>Medicare Affiliated</li> </ul>
Benefit Sub Type	Indicates the type of Medicare benefit.
Medicare Plan Benefit Package	Indicates the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit. <p><b>Note:</b> This field appears when the benefit sub type is set to <b>Part A-Inpatient Hospital Coverage</b>, <b>Part B-Outpatient Medical Coverage</b>, or <b>Part D-Medicare Prescription Drug Coverage</b>.</p>
Start Date	Displays the date from when the member person has availed the Medicare benefit.
End Date	Displays the date till when the member person has availed the Medicare benefit.
Status	Indicates the status of the Medicare benefit. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Discarded</li> <li>Inactive</li> </ul>
Benefit Amount	Displays the low income subsidy or late enrollment penalty amount for Medicare Part D. <p><b>Note:</b> This field appears when the benefit sub type is set to <b>Late Enrollment Penalty</b> or <b>Low Income Subsidy</b>.</p>

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the Medicare benefit. <p><b>Note:</b> The <b>Edit</b> button appears when the Medicare benefit is in the <b>Active</b> status.</p>
Discard	Used to discard a Medicare benefit.

Button Name	Button Description
	<b>Note:</b> The <b>Discard</b> button appears when the benefit is in the <b>Active</b> or <b>Inactive</b> status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the Medicare benefit is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the Medicare benefit status is updated.
Create Date/Time	Displays the date and time when the Medicare benefit is created.

### Related Topics

For more information on...	See...
How to edit a Medicare benefit	<a href="#">Editing a Medicare Benefit</a> on page 194
How to discard a Medicare benefit	<a href="#">Discarding a Medicare Benefit</a> on page 196

### Benefit Characteristics

The **Benefit Characteristics** zone lists the characteristics of the Medicare benefit. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the Medicare benefit.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.  <b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

### Benefit - Log

The **Log** tab contains the following zone:

- [Benefit Log](#) on page 193

### Benefit Log

The **Benefit Log** zone lists the complete trail of actions performed on the Medicare benefit. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the Medicare benefit.
Details	Displays the details about the action performed on the Medicare benefit.
User	Indicates the user who has performed the action on the Medicare benefit.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the Medicare benefit.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the Medicare benefit is changed.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the Medicare benefit by clicking the **Add Log Entry** link in the upper right corner of the **Benefit Log** zone.

### **Related Topics**

### **Editing a Medicare Benefit**

You can only edit the characteristics of a Medicare benefit from the user interface. On editing a Medicare benefit of a member person, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

### **Procedure**

To edit a Medicare benefit:

1. Search for the Medicare benefit in the **Benefit** screen.
2. In the **Search Results** section, click the link in the **Benefit Information** column corresponding to the Medicare benefit whose details you want to edit.  
The **Benefit** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Benefit** zone.

The **Benefit** screen appears. It contains the following sections:

- **Main** - Displays basic details of the Medicare benefit.
- **Characteristics** - Used to define the characteristics for the Medicare benefit.

The **Main** section contains the following fields:

Field Name	Field Description
Benefit Information	Displays information about the Medicare benefit.
Membership Information	Indicates the membership whose member person has availed the Medicare benefit.
Benefit Source	Indicates the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul>
Benefit Type	Indicates the type of benefit. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>
Benefit Sub Type	Indicates the type of Medicare benefit.  <b>Note:</b> The list includes only those benefit types which are defined through the <b>Benefit Sub Type</b> screen.
Medicare Plan Benefit Package	Indicates the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit.  <b>Note:</b> This field appears when the benefit sub type is set to <b>Part A-Inpatient Hospital Coverage</b> , <b>Part B-Outpatient Medical Coverage</b> , or <b>Part D-Medicare Prescription Drug Coverage</b> .
Start Date	Displays the date from when the member person has availed the Medicare benefit.
End Date	Displays the date till when the member person has availed the Medicare benefit.  <b>Note:</b> The system enables you to edit the end date of a Medicare benefit through a health care inbound message or through the membership repricing inbound web service.
Benefit Amount	Displays the low income subsidy or late enrollment penalty amount for Medicare Part D.

Field Name	Field Description
	<p><b>Note:</b></p> <p>This field appears when the benefit sub type is set to <b>Late Enrollment Penalty</b> or <b>Low Income Subsidy</b>.</p> <p>The system enables you to edit the amount of a Medicare benefit through a health care inbound message or through the membership repricing inbound web service.</p>

**Note:** The **Edit** button appears when the Medicare benefit is in the **Active** status.

- Define, edit, or remove characteristics of the Medicare benefit, if required.
- Click **Save**.

The changes made to the Medicare benefit are saved.

### **Discarding a Medicare Benefit**

#### **Procedure**

To discard a Medicare benefit:

- Search for the Medicare benefit in the **Benefit** screen.
- In the **Search Results** section, click the link in the **Benefit Information** column corresponding to the Medicare benefit that you want to discard.

The **Benefit** screen appears.

- Ensure that the **Main** tab is selected.
- Click the **Discard** button in the **Benefit** zone.

The status of the Medicare benefit is changed to **Discarded**.

**Note:** The **Discard** button appears when the Medicare benefit is in the **Active** or **Inactive** status.

## Medicare Preference

The Medicare preference enables you to set the attributes which are used while creating charges for Medicare Part D Low Income Subsidy (LIS) and Late Enrollment Penalty (LEP). While deriving the LIS and LEP details, the system uses the following attributes from the medicare preference:

- Late Enrollment Penalty
- Low Income Subsidy
- Medicare Prescription Drug Coverage

For more information about these attributes, see [Defining a Medicare Preference](#) on page 199.

The system considers the medicare preference which is specified in the **Medicare** option type of the **C1-ASOBLLNG** feature configuration. You can define, edit, delete, and copy a medicare preference through the **Field Mapping** screen.

## Searching for a Medicare Preference

### Prerequisites

To search for a medicare preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

### Procedure

To search for a medicare preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
4. Select the **Medicare** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of medicare preferences that meet the search criteria appears in the **Search Results** section.

## Viewing the Medicare Preference Details

### Procedure

To view the details of a medicare preference:

1. Search for the medicare preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the medicare preference whose details you want to view. The **Field Mapping** zone appears.
3. View the details of the medicare preference in the **Field Mapping** zone.

## Defining a Medicare Preference

### Prerequisites

To define a medicare preference, you should have:

- Values defined in the **MAP\_ENTITY\_FLG** lookup field
- Value defined for the **Medicare** option type in the **C1-ASOBLLNG** feature configuration.

### Procedure

To define a medicare preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the billing preference. The valid values are: <ul style="list-style-type: none"> <li>• Field Mapping</li> <li>• Medicare Plan Benefit Package</li> <li>• Membership Status Reason Mapping</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

4. Select the **Field Mapping** option from the **Field Mapping Business Object** list.
5. Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the billing preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the billing preference.	Yes
Description	Used to specify the description for the billing preference.	Yes
Detailed Description	Used to specify additional information about the billing preference.	No
Status	Used to indicate the status of the billing preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> <li>• Billing</li> <li>• Binder Payment</li> <li>• Geographic Rating Area</li> <li>• Individual Membership</li> <li>• Medicare</li> <li>• Medicare Plan Benefit</li> <li>• Member Reconciliation</li> <li>• Member Relationship and Subscription Tier</li> <li>• Membership Status Reason</li> <li>• Statement Construct</li> </ul>	Yes

- **Preference Settings** - Used to set the attributes in the billing preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the medicare preference. The valid values are:	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)								
	<ul style="list-style-type: none"> <li>• <b>Late Enrollment Penalty</b> - Used when you want to indicate the benefit sub type for LEP in the medicare preference.</li> <li>• <b>Low Income Subsidy</b> - Used when you want to indicate the benefit sub type for LIS in the medicare preference.</li> <li>• <b>Medicare Prescription Drug Coverage</b> - Used when you want to indicate the benefit sub type for Medicare Part D in the medicare preference.</li> </ul>	<p><b>Note:</b> This field is required while setting an attribute in the medicare preference.</p>

If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No				

**Note:** While defining a medicare preference, you must set at least one attribute in the billing preference.

- Select the **Medicare** option from the **Preference Category** list.
- Enter the required details in the **Main** section.
- Select the required attribute and value from the respective fields.
- If you want to set more than one attribute in the medicare preference, click the **Add (+)** icon and then repeat step 8.

**Note:** However, if you want to remove an attribute from the medicare preference, click the **Delete (🗑)** icon corresponding to the attribute.

- Click **Save**.

The medicare preference is defined.

## Editing a Medicare Preference

### Prerequisites

To edit a medicare preference, you should have:

- Values defined in the **MAP\_ENTITY\_FLG** lookup field
- Value defined for the **Medicare** option type in the **C1-ASOBLLNG** feature configuration.

### Procedure

To edit a medicare preference:

- Search for the medicare preference in the **Field Mapping** screen.
- In the **Search Results** section, click the **Edit (🖋)** icon in the **Edit** column corresponding to the medicare preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the medicare preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the medicare preference.	Not applicable
Description	Used to specify the description for the medicare preference.	Yes
Detailed Description	Used to specify additional information about the medicare preference.	No
Status	Used to indicate the status of the medicare preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> <li>• Medicare</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the medicare preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the medicare preference. The valid values are: <ul style="list-style-type: none"> <li>• <b>Late Enrollment Penalty</b> - Used when you want to indicate the benefit sub type for LEP in the medicare preference.</li> <li>• <b>Low Income Subsidy</b> - Used when you want to indicate the benefit sub type for LIS in the medicare preference.</li> <li>• <b>Medicare Prescription Drug Coverage</b> - Used when you want to indicate the benefit sub type for Medicare Part D in the medicare preference.</li> </ul>	Yes (Conditional)

If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No								

**Tip:** Alternatively, you can edit the details of a medicare preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the medicare preference, if required.

**Note:** You must set at least one attribute in a medicare preference.

5. Click **Save**.

The changes made to the medicare preference are saved.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
How to search for a medicare preference	<a href="#">Searching for a Medicare Preference</a> on page 198

### **Copying a Medicare Preference**

Instead of creating a medicare preference from scratch, you can create a new medicare preference using an existing medicare preference. This is possible through copying a medicare preference. On copying a medicare preference, the details including the attributes are copied to the new medicare preference. You can then edit the details, if required.

### **Prerequisites**

To copy a medicare preference, you should have:

- Medicare preference (whose copy you want to create) defined in the application
- Values defined in the **MAP\_ENTITY\_FLG** lookup field
- Value defined for the **Medicare** option type in the **C1-ASOBLNG** feature configuration.

### **Procedure**

To copy a medicare preference:

1. Search for the medicare preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the medicare preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the medicare preference. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Preference	Used to specify the medicare preference.	Yes
Description	Used to specify the description for the medicare preference.	Yes
Detailed Description	Used to specify additional information about the medicare preference.	No
Status	Used to indicate the status of the medicare preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Used to indicate the category to which the preference belongs. The valid values are:	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Medicare</li> </ul>	

- Preference Settings** - Used to set the attributes in the medicare preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)						
Attribute	Used to indicate the attribute which you want to set in the medicare preference. The valid values are: <ul style="list-style-type: none"> <li> <b>Late Enrollment Penalty</b> - Used when you want to indicate the benefit sub type for LEP in the medicare preference.             </li> <li> <b>Low Income Subsidy</b> - Used when you want to indicate the benefit sub type for LIS in the medicare preference.             </li> <li> <b>Medicare Prescription Drug Coverage</b> - Used when you want to indicate the benefit sub type for Medicare Part D in the medicare preference.             </li> </ul>	Yes (Conditional) <b>Note:</b> This field is required while setting an attribute in the medicare preference.						
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the billing preference: <table border="1" data-bbox="732 1299 1089 1915"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then, this field is...</th> </tr> </thead> <tbody> <tr> <td>Late Enrollment Penalty</td> <td>Used to specify the benefit sub type for which the member person incurs the late enrollment penalty.</td> </tr> <tr> <td>Low Income Subsidy</td> <td>Used to specify the benefit sub type for which the</td> </tr> </tbody> </table>	If the attribute is set to... ### **Deleting a Medicare Preference**

#### **Procedure**

To delete a medicare preference:

1. Search for the medicare preference in the **Field Mapping** screen.

- In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the medicare preference that you want to delete.

A message appears confirming whether you want to delete the medicare preference.

**Tip:** Alternatively, you can delete a medicare preference by clicking the **Delete** button in the **Field Mapping** zone.

- Click **OK**.

The medicare preference is deleted.

## Medicare Plan Benefit Package

You can define an Employer Group Waiver Plan (EGWP) (i.e. 800 series plan) as a Medicare plan benefit package in the system. While defining a Medicare benefit of a member person for Medicare Part A, Part B, and Part D, you need to indicate the Medicare plan benefit package which is applicable for the Medicare benefit. You can then use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. In this way, the system enables you to offer different pricing for different EGWPs (i.e. 800 series plans).

The system enables you to define, edit, delete, and copy a Medicare plan benefit package through the **Field Mapping** screen.

### Searching for a Medicare Plan Benefit Package

#### Prerequisites

To search for a Medicare plan benefit package, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

#### Procedure

To search for a Medicare plan benefit package:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
- Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
- Select the **Medicare Plan Benefit** option from the **Preference Category** list.
- Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of Medicare plan benefit packages that meet the search criteria appears in the **Search Results** section.

## Viewing the Medicare Plan Benefit Package Details

### Procedure

To view the details of a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the Medicare plan benefit package whose details you want to view.  
The **Field Mapping** zone appears.
3. View the details of the Medicare plan benefit package in the **Field Mapping** zone.

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Used to specify the Medicare plan benefit package (i.e. 800 series plan).	Yes
Description	Used to specify the description for the Medicare plan benefit package.	Yes

6. Enter the required details in the **Main** section.

7. Click **Save**.

The Medicare plan benefit package is defined.

## Editing a Medicare Plan Benefit Package

### Procedure

To edit a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the Medicare plan benefit package whose details you want to edit.

The **Medicare Plan Benefit Package** screen appears. It contains the following section:

- **Main** - Used to specify basic details of the Medicare plan benefit package. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Displays the Medicare plan benefit package (i.e. 800 series plan).	Not applicable
Description	Used to specify the description for the Medicare plan benefit package.	Yes

**Tip:** Alternatively, you can edit the details of a Medicare plan benefit package by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.

4. Click **Save**.

The changes made to the Medicare plan benefit package are saved.

## Copying a Medicare Plan Benefit Package

Instead of creating a Medicare plan benefit package from scratch, you can create a new Medicare plan benefit package using an existing Medicare plan benefit package. This is possible through copying a Medicare plan benefit package. On copying a Medicare plan benefit package, the details are copied to the new Medicare plan benefit package. You can then edit the details, if required.

**Prerequisites**

To copy a Medicare plan benefit package, you should have:

- Medicare plan benefit package (whose copy you want to create) defined in the application

**Procedure**

To copy a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the Medicare plan benefit package whose copy you want to create.

The **Medicare Plan Benefit Package** screen appears. It contains the following section:

- **Main** - Used to specify basic details of the Medicare plan benefit package. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Used to specify the Medicare plan benefit package (i.e. 800 series plan).	Yes
Description	Used to specify the description for the Medicare plan benefit package.	Yes

**Tip:** Alternatively, you can copy a Medicare plan benefit package by clicking the **Duplicate** button in the **Field Mapping** zone.

3. Enter the required details in the **Main** section.
4. Click **Save**.

The new Medicare plan benefit package is defined.

How to search for a Medicare plan benefit package	<a href="#">Searching for a Medicare Plan Benefit Package</a> on page 208

**Deleting a Medicare Plan Benefit Package****Procedure**

To delete a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the Medicare plan benefit package that you want to delete.

A message appears confirming whether you want to delete the Medicare plan benefit package.

**Tip:** Alternatively, you can delete a Medicare plan benefit package by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The Medicare plan benefit package is deleted.

## Geographic Rating Area Preference

Oracle Revenue Management and Billing enables you to use the geographic rating area as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different geographic rating area.

Once you define a geographic rating area, the system can derive the geographic rating area for a membership. While deriving the geographic rating area for a membership, the system uses the following attributes from the geographic rating area preference:

- Address Source Characteristic Type
- Address Type Characteristic Type
- Default Address Source
- Default Address Type
- Default Geographic Rating Area
- Geographic Rating Area Characteristic Type
- Use Plan Details

For more information about these attributes, see [Defining a Geographic Rating Area Preference](#) on page 213.

The system considers the geographic rating area preference which is specified in the **Rating Area Field Mapping for Group** option type of the **C1-ASOBLLNG** feature configuration. You can define, edit, delete, and copy a geographic rating area preference through the **Field Mapping** screen.

### Related Topics

For more information on...	See...
How to setup the C1-ASOBLLNG feature configuration	<a href="#">Setting the C1-ASOBLLNG Feature Configuration</a> on page 4070

## Searching for a Geographic Rating Area Preference

### Prerequisites

To search for a geographic rating area preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

### Procedure

To search for a geographic rating area preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.

4. Select the **Geographic Rating Area** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of geographic rating area preferences that meet the search criteria appears in the **Search Results** section.

## Viewing the Geographic Rating Area Preference Details

### Procedure

To view the details of a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the geographic rating area preference whose details you want to view. The **Field Mapping** zone appears.
3. View the details of the geographic rating area preference in the **Field Mapping** zone.

### Related Topics

How to search for a geographic rating area preference	<a href="#">Searching for a Geographic Rating Area Preference</a> on page 212

## Defining a Geographic Rating Area Preference

### Prerequisites

To define a geographic rating area preference, you should have:

- Values defined in the **ADDRESS\_SRC\_FLG**, **ADDRESS\_TYPE\_FLG**, and **MAP\_ENTITY\_FLG** lookup fields
- Geographic rating areas defined in the application

### Procedure

To define a geographic rating area preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.  
The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>Field Mapping</li> <li>Medicare Plan Benefit Package</li> <li>Membership Status Reason Mapping</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Field Mapping** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the geographic rating area preference.	Yes
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

- Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> <li>Billing</li> <li>Binder Payment</li> <li>Geographic Rating Area</li> <li>Individual Membership</li> <li>Medicare</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• Medicare Plan Benefit</li> <li>• Member Reconciliation</li> <li>• Member Relationship and Subscription Tier</li> <li>• Membership Status Reason</li> <li>• Statement Construct</li> </ul>	

- **Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the geographic rating area preference. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Address Source Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> <li>• <b>Address Type Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> <li>• <b>Default Address Source</b> - Used when the address source characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> </li> <li>• <b>Default Address Type</b> - Used when the address type characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> </ul> </li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting an attribute in the geographic rating area preference.</p>

Field Name	Field Description	Mandatory (Yes or No)				
	<ul style="list-style-type: none"> <li>• Policy</li> <li>• State where the Policy is Issued</li> <li>• <b>Default Geographic Rating Area</b> - Used when the system is unable to derive the geographic rating area for the following combination:                             <ul style="list-style-type: none"> <li>• State and zip code (this combination is considered when the <b>Use Plan Details</b> attribute is set to <b>No</b>)</li> <li>• State, zip code, policy number, plan number, and source system (this combination is considered when the <b>Use Plan Details</b> attribute is set to <b>Yes</b>)</li> </ul> </li> <li>• <b>Geographic Rating Area Characteristic Type</b> - Used when the system stores the geographic rating area for a membership.</li> <li>• <b>Use Plan Details</b> - Used to indicate whether the policy number, plan number, and source system should be considered while deriving the geographic rating area for a membership.</li> </ul>

If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No

**Note:** While defining a geographic rating area preference, you must set at least one attribute in the geographic rating area preference.

6. Select the **Geographic Rating Area** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the geographic rating area preference, click the **Add (+)** icon and then repeat step 8.

**Note:** However, if you want to remove an attribute from the geographic rating area preference, click the **Delete (🗑)** icon corresponding to the attribute.

10. Click **Save**.

The geographic rating area preference is defined.

## Editing a Geographic Rating Area Preference

### Prerequisites

To edit a geographic rating area preference, you should have:

- Values defined in the **ADDRESS\_SRC\_FLG**, **ADDRESS\_TYPE\_FLG**, and **MAP\_ENTITY\_FLG** lookup fields
- Geographic rating areas defined in the application

### Procedure

To edit a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the geographical rating area preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the geographic rating area preference.	Not applicable
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> <li>• Geographic Rating Area</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>• <b>Address Source Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> <li>• <b>Address Type Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> </ul>	Yes (Conditional)  <b>Note:</b> This field is required while setting an attribute in the geographic rating area preference.

**Tip:** Alternatively, you can edit the details of a geographic rating area preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the geographic rating area preference, if required.

**Note:** You must set at least one attribute in a geographic rating area preference.

5. Click **Save**.

The changes made to the geographic rating area preference are saved.

How to search for a geographic rating area preference	<a href="#">Searching for a Geographic Rating Area Preference</a> on page 212

## Copying a Geographic Rating Area Preference

Instead of creating a geographic rating area preference from scratch, you can create a new geographic rating area preference using an existing geographic rating area preference. This is possible through copying a geographic rating area preference. On copying a geographic rating area preference, the details including the attributes are copied to the new geographic rating area preference. You can then edit the details, if required.

### Prerequisites

To copy a geographic rating area preference, you should have:

- Geographic rating area preference (whose copy you want to create) defined in the application
- Values defined in the **ADDRESS\_SRC\_FLG**, **ADDRESS\_TYPE\_FLG**, and **MAP\_ENTITY\_FLG** lookup fields
- Geographic rating areas defined in the application

### Procedure

To copy a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate** () icon in the **Duplicate** column corresponding to the geographical rating area preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the geographic rating area preference.	Yes
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is:	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Geographic Rating Area</li> </ul>	

- Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.	

**Note:** While defining a geographic rating area preference, you must set at least one attribute in the geographic rating area preference.

**Tip:** Alternatively, you can copy a geographic rating area preference by clicking the **Duplicate** button in the **Field Mapping** zone.

3. Enter the required details in the **Main** section.
4. Define, edit, or remove the attribute from the geographic rating area preference, if required.
5. Click **Save**.

The new geographic rating area preference is defined.

How to search for a geographic rating area preference	<a href="#">Searching for a Geographic Rating Area Preference</a> on page 212

## Deleting a Geographic Rating Area Preference

### **Procedure**

To delete a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the geographic rating area preference that you want to delete.

A message appears confirming whether you want to delete the geographic rating area preference.

**Tip:** Alternatively, you can delete a geographic rating area preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The geographic rating area preference is deleted.

## Member Relationship and Subscription Tier Preference

---

Oracle Revenue Management and Billing enables you to use the member relationship (i.e. how a member is related to the main subscriber of the membership) as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different member relationship.

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, the system automatically derives the member relationship for each member person of the membership from a member relationship structure. While deriving the member relationship for a member person, the system uses the following attributes from the member relationship and subscription tier preference:

- Age Calculation Date Basis Characteristic Type
- Max Age Limit for Max Dependent Count Characteristic Type
- Max Number of Dependents Order Priority Characteristic Type
- Member Relationship Characteristic Type
- Maximum Number of Dependents Characteristic Type
- Member Relationship Derivation Date Characteristic Type
- Member Relationship Structure Characteristic Type
- New Born Gift Days Characteristic Type
- New Born Gift Days Applicability Characteristic Type
- Young Adult Max Age Limit Characteristic Type
- Young Adult Max Age Limit Applicability Characteristic Type

For more information about these attributes, see [Defining a Member Relationship and Subscription Tier Preference](#) on page 242.

Similarly, the system enables you to use the membership subscription tier as a pricing parameter while defining the tier based pricing rules. This feature facilitates you to offer different rates for a price item based on different membership subscription tier.

While determining the subscription tier for a membership, the system derives the subscription tier for the membership from a subscription tier structure. While deriving the subscription tier for a membership, the system uses the following attributes from the member relationship and subscription tier preference:

- Age Calculation Date Basis Characteristic Type
- Max Age Limit for Max Dependent Count Characteristic Type
- Max Number of Dependents Order Priority Characteristic Type
- Maximum Number of Dependents Characteristic Type
- New Born Gift Days Characteristic Type
- New Born Gift Days Applicability Characteristic Type
- Subscription Tier Structure Characteristic Type
- Subscription Tier Characteristic Type
- Young Adult Max Age Limit Characteristic Type
- Young Adult Max Age Limit Applicability Characteristic Type

For more information about these attributes, see [Defining a Member Relationship and Subscription Tier Preference](#) on page 242.

The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLLNG** feature configuration. You can define, edit, delete, and copy a member relationship and subscription tier preference through the **Field Mapping** screen.

## Searching for a Member Relationship and Subscription Tier Preference

### Prerequisites

To search for a member relationship and subscription tier preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

### Procedure

To search for a member relationship and subscription tier preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
4. Select the **Member Relationship and Subscription Tier Preferences** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.  
A list of member relationship and subscription tier preferences that meet the search criteria appears in the **Search Results** section.

## Viewing the Member Relationship and Subscription Tier Preference Details

### Procedure

To view the details of a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** () icon corresponding to the member relationship and subscription tier preference whose details you want to view.  
The **Field Mapping** zone appears.
3. View the details of the member relationship and subscription tier preference in the **Field Mapping** zone.

**Defining a Member Relationship and Subscription Tier Preference****Prerequisites**

To define a member relationship and subscription tier preference, you should have:

- Required characteristic types defined in the application
- Values defined in the **MAP\_ENTITY\_FLG** lookup field

**Procedure**

To define a member relationship and subscription tier preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>• Field Mapping</li> <li>• Medicare Plan Benefit Package</li> <li>• Membership Status Reason Mapping</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

4. Select the **Field Mapping** option from the **Field Mapping Business Object** list.
5. Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the member relationship and subscription tier preference.	Yes
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> <li>Billing</li> <li>Binder Payment</li> <li>Geographic Rating Area</li> <li>Individual Membership</li> <li>Medicare</li> <li>Medicare Plan Benefit</li> <li>Member Reconciliation</li> <li>Member Relationship and Subscription Tier</li> <li>Membership Status Reason</li> <li>Statement Construct</li> </ul>	Yes

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are:	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>Age Calculation Date Basis Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Age Limit for Max Dependent Count Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Number of Dependents Order Priority Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>	<p><b>Note:</b> This field is required while setting an attribute in the member relationship and subscription tier preference.</p>
	<ul style="list-style-type: none"> <li>• <b>Member Relationship Characteristic Type</b> - Used when the system stores the member relationship for a member person.</li> <li>• <b>Maximum Number of Dependents Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Member Relationship Derivation Date Characteristic Type</b> - Used when the system derives the member relationship for a member person.</li> <li>• <b>Member Relationship Structure Characteristic Type</b> - Used when the system derives the member relationship for a member person.</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>New Born Gift Days Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>New Born Gift Days Applicability Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Subscription Tier Structure Characteristic Type</b> - Used when the system derives the subscription tier for a membership.</li> <li>• <b>Subscription Tier Characteristic Type</b> - Used when the system stores the subscription tier for a membership.</li> <li>• <b>Young Adult Max Age Limit Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Young Adult Max Age Limit Applicability Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>	
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the member relationship and subscription tier preference:	Yes (Conditional)  <b>Note:</b> This field is required while setting an attribute in the member relationship and subscription tier preference.

Field Name	Field Description		Mandatory (Yes or No)
	<p><b>If the attribute is set to...</b></p>	<p><b>Then, this field is...</b></p>	
	<p>Age Calculation Date Basis Characteristic Type</p>	<p>Used to specify the characteristic type that indicates how the member person's age should be calculated. The system supports the following characteristic values:</p> <ul style="list-style-type: none"> <li>• Member Enrollment Date</li> <li>• Member Enrollment Nearest Age</li> <li>• Plan Start Date</li> <li>• Policy Renewal Start Date</li> </ul> <p>This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to</p>

		<p><b>Note:</b> The <b>C1-MRDDDB</b> characteristic type is shipped with the product.</p>	
	<p>Member Relationship Structure Characteristic Type</p>	<p>Used to specify the characteristic type that indicates the member relationship structure which should be considered while deriving the member relationship for a member person. This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p> <p><b>Note:</b> The <b>C1-MRLST</b> characteristic type is shipped with the product.</p>	

Field Name	Field Description		Mandatory (Yes or No)
	<p>New Born Gift Days Characteristic Type</p>	<p>Used to specify the characteristic type that indicates the number of days you want to offer as gift days from the new born child's birth date. This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>NOOFGIFT</b> characteristic type is shipped with the product. Here, you must define the required predefined characteristic values.</p> </div>	
	<p>New Born Gift Days Applicability Characteristic Type</p>	<p>Used to specify the characteristic type that indicates whether you</p>	

Field Name	Field Description		Mandatory (Yes or No)
		<p>want to offer gift days in case of a new born. The system supports the following two characteristic values — <b>Y</b> and <b>N</b>. This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p> <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> The <b>NEWBORNA</b> characteristic type is shipped with the product.</p> </div>	
	Subscription Tier Structure Characteristic Type	Used to specify the characteristic type that indicates the subscription tier structure which should be considered while deriving the subscription tier for a membership.	

Field Name	Field Description		Mandatory (Yes or No)
		<p>This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>C1-STRST</b> characteristic type is shipped with the product.</p> </div>	
	<p>Subscription Tier Characteristic Type</p>	<p>Used to specify the characteristic type where you can store the subscription tier for a membership. This type of characteristic is defined for the membership. Here, you must specify a characteristic type where the characteristic entity is set to <b>Membership</b>.</p>	

Field Name	Field Description		Mandatory (Yes or No)
		<p><b>Note:</b> The <b>C1-SUBST</b> characteristic type is shipped with the product.</p>	
	<p>Young Adult Max Age Limit Characteristic Type</p>	<p>Used to specify the characteristic type that indicates the maximum age limit for young adults which are eligible for premium calculation. This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p>	
		<p><b>Note:</b> The <b>YADULTAG</b> characteristic type is shipped with the product. Here, you must define the required predefined characteristic values.</p>	

Field Name	Field Description		Mandatory (Yes or No)
	Young Adult Max Age Limit Applicability Characteristic Type	Used to specify the characteristic type that indicates whether you want to consider the young adults during the premium calculation. The system supports the following two characteristic values — <b>Y</b> and <b>N</b> .	
		This type of characteristic can be defined for the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b> .	
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> </ul>		No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.	

**Note:** While defining a member relationship and subscription tier preference, you must set at least one attribute in the member relationship and subscription tier preference.

6. Select the **Member Relationship and Subscription Tier Preferences** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the member relationship and subscription tier preference, click the **Add (+)** icon and then repeat step 8.

**Note:** However, if you want to remove an attribute from the member relationship and subscription tier preference, click the **Delete (🗑)** icon corresponding to the attribute.

10. Click **Save**.

The member relationship and subscription tier preference is defined.

## Editing a Member Relationship and Subscription Tier Preference

### Prerequisites

To edit a member relationship and subscription tier preference, you should have:

- Required characteristic types defined in the application
- Values defined in the **MAP\_ENTITY\_FLG** lookup field

### Procedure

To edit a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit (✎)** icon in the **Edit** column corresponding to the member relationship and subscription tier preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the member relationship and subscription tier preference.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> <li>• Member Relationship and Subscription Tier</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>• <b>Age Calculation Date Basis Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Age Limit for Max Dependent Count Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Number of Dependents Order Priority Characteristic Type</b> - Used when the system derives the member relationship for a member</li> </ul>	Yes (Conditional)

	<p>characteristic values — <b>Y</b> and <b>N</b>. This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p>	
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> </ul> <p><b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No

**Tip:** Alternatively, you can edit the details of a member relationship and subscription tier preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the member relationship and subscription tier preference, if required.

**Note:** You must set at least one attribute in a member relationship and subscription tier preference.

5. Click **Save**.

The changes made to the member relationship and subscription tier preference are saved.

## Copying a Member Relationship and Subscription Tier Preference

Instead of creating a member relationship and subscription tier preference from scratch, you can create a new member relationship and subscription tier preference using an existing member relationship and subscription tier preference. This is possible through copying a member relationship and subscription tier preference. On copying a member relationship and subscription tier preference, the details including the attributes are copied to the new member relationship and subscription tier preference. You can then edit the details, if required.

### Prerequisites

To copy a member relationship and subscription tier preference, you should have:

- Member relationship and subscription tier preference (whose copy you want to create) defined in the application
- Required characteristic types defined in the application
- Values defined in the **MAP\_ENTITY\_FLG** lookup field

### Procedure

To copy a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the member relationship and subscription tier preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the member relationship and subscription tier preference.	Yes
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is:	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Member Relationship and Subscription Tier</li> </ul>	

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Age Calculation Date Basis Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Age Limit for Max Dependent Count Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Number of Dependents Order Priority Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Member Relationship Characteristic Type</b> - Used when the system stores the member relationship for a member person.</li> <li>• <b>Maximum Number of Dependents Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting an attribute in the member relationship and subscription tier preference.</p>

This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)		
	<table border="1"> <tr> <td></td> <td>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</td> </tr> </table>		Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b> .	
	Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b> .			
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>Account</li> <li>Billable Charge</li> </ul> <p><b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No		

**Note:** While defining a member relationship and subscription tier preference, you must set at least one attribute in the member relationship and subscription tier preference.

**Tip:** Alternatively, you can copy a member relationship and subscription tier preference by clicking the **Duplicate** button in the **Field Mapping** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove the attribute from the member relationship and subscription tier preference, if required.
- Click **Save**.

The new member relationship and subscription tier preference is defined.

### **Related Topics**

For more information on...	See...
How to search for a member relationship and subscription tier preference	<a href="#">Searching for a Member Relationship and Subscription Tier Preference</a> on page 241

## **Deleting a Member Relationship and Subscription Tier Preference**

### **Procedure**

To delete a member relationship and subscription tier preference:

- Search for the member relationship and subscription tier preference in the **Field Mapping** screen.

2. In the **Search Results** section, click the **Delete** () icon in the **Delete** column corresponding to the member relationship and subscription tier preference that you want to delete.

A message appears confirming whether you want to delete the member relationship and subscription tier preference.

**Tip:** Alternatively, you can delete a member relationship and subscription tier preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The member relationship and subscription tier preference is deleted.

Group insurance health plans provide coverage to a group of members, usually comprised of company employees or members of an organization. Among all types of group insurance health plans, the fully-insured plan is one of the traditional ways to structure an employer-sponsored health plan. It is also commonly known as fully-insured employee health insurance.

In the fully-insured group health plan, the employer contracts an insurance company to cover the employees and their dependents. The employer pays a premium to the insurance carrier. The premium rates are fixed for a year based on the number of employees which are enrolled in the plan. The monthly premium changes during the year when the number of enrolled employees change in the plan. The insurance carrier collects the premium from the employer and pays the health insurance claims to the employees based on the coverage benefits outlined in the policy. The covered persons (i.e. employees and dependents) are responsible to pay any deductible amounts or co-payments required for covered services under the policy.

Oracle Revenue Management and Billing (ORMB) provides specialized methodologies for calculating premium for the employees and their dependents and then bill the total premium to the employer (known as the parent customer in ORMB) or to its logical designed billing entities (known as the bill groups in ORMB). The system enables you to offer different rates for a covered service depending on the following:

- Age of the employee or dependent
- How dependent person is related to the main subscriber
- Membership subscription tier
- Geographic rating area
- Membership or member person attributes

Oracle Revenue Management and Billing (ORMB) enables you to use the pricing methodologies and the billing engine for the fully-insured group health insurance business. To design the pricing and billing models for the fully-insured group health insurance business, you need to create the following entities in ORMB:

- Parent Customer
- Bill Groups
- Bill Group's Account
- Fully-Insured Group Policy
- Policy Plans
- Price Items (for each covered service in the policy)

- Pricing Rule Types
- Pricing Rules

## Pre-requisites

---

To set the billing system for a fully-insured group customer, you need to do the following:

- Define the required policy types in the system.
- Define the required policy person roles in the system.
- Define the values for the **C1-SourceSystemLookup** extendable lookup.
- Define the required characteristic types where the characteristic entity is set to **Policy Type**.
- Define the required characteristic types where the characteristic entity is set to **Policy**.
- Define the status reasons for the **Terminated** status of the **C1-POLICY** business object in the **Status Reason** screen.
- Define the status reasons for the **Reinstated** status of the **C1-POLICY** business object in the **Status Reason** screen.
- Define the required price items in the system.
- Define the required age based, tier based, pass-through billable charge, additional charge, and/or benefit pricing rule types.
- Define the required characteristic types where the characteristic entity is set to **Policy Plan**.
- Define the required contract relationship types in the system.
- Define the required characteristic types where the characteristic entity is set to **Membership**.
- Define the required characteristic types where the characteristic entity is set to **Membership Person**.
- Define the required characteristic types where the characteristic entity is set to **Benefits**.
- Define the required contracts (which you want to associate with a membership) in the system.
- Define the values for the **BILL\_TO\_TYPE\_FLG**, **BENEFIT\_TYPE\_FLG**, **BENEFIT\_SUB\_TYPE\_FLG**, and **BENEFIT\_SRC\_FLG** lookup fields
- Define the required parameter values in the following algorithm which is attached to the **C1-POLICY** business object:
  - C1-POLBOVAL
- Define the required parameter values in the following algorithms which are used in the lifecycle of the **C1-POLICY** business object:
  - C1-EVCSTSTAT
  - C1-PLCYTRMRQ
  - C1-POLCYTERM
  - C1-DELTRMLTR
  - C1-PLCYREIRQ
  - C1-POLCYREIN
  - C1-CCPOLRE1
- Define a predefined characteristic type named **Active Employee Coverage Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing

You must set the characteristic entity of the **Active Employee Coverage Billing Arrangement** characteristic type to **Person**.

- Define a predefined characteristic type named **Benefit Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing

You must set the characteristic entity of the **Benefit Billing Arrangement** characteristic type to **Person, Policy, and Policy Plan**.

- Define a predefined characteristic type named **COBRA Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing
TPA	TPA Billing

You must set the characteristic entity of the **COBRA Billing Arrangement** characteristic type to **Person, Policy, and Policy Plan**.

- Define the required person relationship types and account relationship types in the system.
- Define the required geographic rating areas in the system.
- Define the required member relationship/subscription tier structures in the system.
- Define the required geographic rating area preference and member relationship and subscription tier preference through the **Field Mapping** screen.
- Define the required Medicare plan benefit packages in the system.
- Set the values for the following option types in the **C1-PERSTYPE** feature configuration:
  - Bill Group Person Type
  - Parent Person Type
  - TPA Person Type
- Set the values for the following option types in the **C1-ASOBLNG** feature configuration:
  - Membership ID Characteristic for Billable Charge
  - Parent Customer Policy Person Role
  - Bill Group Policy Person Role
  - Membership Inactive Status
  - Membership Person Inactive Status
  - Rating Area Field Mapping for Group

- Relation Structure Code Field Mapping
- Billing Arrangement
- Benefit Billing Arrangement
- Cobra Billing Arrangement
- TPA Person Relationship Type
- TPA Account Relationship Type
- TPA Policy Person Role

## Fully-Insured Group Policy

You can create a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. The policy type indicates the business object using which the fully-insured group policy should be created in the system.

**Note:** At present, the **Fully-Insured Individual** policy category is not yet supported in the system.

As per the fully-insured group health insurance business, the system enables you to create a fully-insured group policy for the following:

- A parent customer (where a bill group is not associated)
- A bill group (where the parent customer is the policy holder)

You can create or edit a fully-insured group policy from the **Policy** screen. In addition, you can create or edit a fully-insured group policy through a customer registration object or a health care inbound message. If the fully-insured group policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration

However, if the fully-insured group policy information is given for a parent customer in a health care inbound message, the system does the following:

- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration

A fully-insured group policy encapsulates the following information:

- **Policy Persons** – While creating a fully-insured group policy, you need to associate the person who is the main customer of the policy. While associating a person with a fully-insured group policy, you need to specify the policy person role which indicates the role of the person in the policy. For example, whether the person associated with the policy is the policy holder, broker, or underwriter. You can associate multiple persons with a fully-insured group policy using the same or different policy person role. However, at a time, only one person can be the main customer of the policy.
- **Policy Plans** – You can define different types of plans in a fully-insured group policy. For more information, refer to [Types of Policy Plan](#) on page 330.
- **Memberships** – You can define different types of memberships for a fully-insured group policy plan. For more information, refer to [Types of Membership](#) on page 331.
- **Member Persons** – While adding a person to a membership, you need to specify whether the person is the main subscriber of the membership, whether the person is financially responsible for the membership, and how the person is related to the main subscriber. At a time, only one person can be the main subscriber of the membership. You cannot remove a member person, who is the main subscriber, from the membership. You can inactivate a member person whenever required. If you inactivate a member person who is the main subscriber, the system automatically inactivates the membership and all other member persons which are included in the membership.
- **Membership Contracts** – You can associate one or more contracts with a membership. At present, the system uses the contract created for a policy plan on the accounts of the parent customer or bill group for billing the respective membership premium. The system does not use the membership contracts for billing the membership premium.
- **Policy Plan Contracts** – The system creates or updates contracts of a policy plan when you do either of the following:
  - Create or Edit a Policy Plan from the User Interface or through an Inbound Message
  - Create or Edit an Account from the User Interface or through an Inbound Message

The system uses the contract created for a policy plan on the accounts of the parent customer or bill group for billing the respective membership premium. For more information, refer to [Single Contract Creation Across Fully-Insured Group Policies and Plans](#) on page 296 and [Policy Plan Specific Contract Creation](#) on page 316.

On defining a fully-insured group policy, the status of the policy is set to **Pending**. You can then edit, delete or activate a policy. Once a fully-insured group policy is activated, you can terminate, reinstate, or renew the policy whenever required.

## Fully-Insured Group Policy Activation

You can activate a fully-insured group policy by clicking the **Activate** button in the **Policy** screen. On activating a fully-insured group policy, the status of the policy is set to **In Force/Active**.

**Note:** If a fully-insured group policy is created through a customer registration object or a health care inbound message, the status of the policy is directly set to **In Force/Active**

Once a fully-insured group policy is activated, you can terminate, reinstate, or renew the policy whenever required.

## Fully-Insured Group Policy Termination

The system enables you to terminate a fully-insured group policy whenever required. There are two ways in which you can terminate a fully-insured group policy:

- **Initiate Policy Termination Process** – In this method, you can initiate the policy termination process from the user interface. To initiate the termination process, you need to specify the termination date and termination reason. On initiating the termination process, the status of the policy is changed to **Pending Termination**. In addition, the system creates an outbound message which request for confirmation whether the policy should be terminated. This outbound message can be sent to the policy processing system via custom mechanism. On receiving confirmation from the policy processing system through a health care inbound message, the system changes the status of the policy to **Terminated**.
- **Terminate Policy** – In this method, you can directly terminate a fully-insured group policy. To terminate a fully-insured group policy, you need to specify the termination reason. You can directly terminate the policy from the user interface or through a health care inbound message. On clicking the **Terminate** button, the system will terminate the fully-insured group policy on the system date. However, when you terminate a fully-insured group policy through a health care inbound message, the policy is terminated when the health care inbound message is processed in the system. On terminating a fully-insured group policy, the status of the policy is changed to **Terminated**.

Once the status of the policy is changed to **Terminated**, the system sets the end date of the following entities to the termination date when the respective condition is met:

- Policy (when the termination date is not earlier than the policy start date or later than the policy end date)
- Policy Person (when the termination date falls within the date range in which the person is associated with the policy)

**Note:** The system does not consider those persons associated with policy whose start date is later than the termination date or whose end date is earlier than the termination date.

- Policy Plan (when the termination date falls within the date range of the policy plan)

**Note:** The system does not consider those policy plans whose start date is later than the termination date or whose end date is earlier than the termination date.

- Membership (when the termination date falls within the date range of the membership)

**Note:** The system does not consider those memberships whose start date is later than the termination date or whose end date is earlier than the termination date.

- Member Person (when the termination date falls within the date range in which the person is associated with the membership)

**Note:** The system does not consider those member persons whose start date is later than the termination date or whose end date is earlier than the termination date.

- Contracts Associated with the Membership (when the termination date falls within the date range of the contract)

**Note:** The system does not consider those contracts whose start date is later than the termination date or whose end date is earlier than the termination date.

The system also changes the status of all memberships to **Terminated** irrespective of whether it is effective on the termination date or not. On terminating a membership, the system creates an audit event for the membership. For each audit event, the system identifies the policy plan to which the membership belongs and the active pricing rules defined on the policy plan. It then identifies the pricing rule types using which these active pricing rules are created in the system. An entry for each membership, pricing rule type, and effective date combination is created in the **Pending (P)** status in the **CI\_REPRC\_ENTITY\_DTL** table. For more information, see [Audit Framework for Fully-Insured Group Health Insurance Billing](#) on page 3543.

## Fully-Insured Group Policy Reinstatement

The system enables you to reinstate the terminated policy whenever required. There are two ways in which you can reinstate a fully-insured group policy:

- **Initiate Policy Reinstatement Process** – In this method, you can initiate the policy reinstatement process from the user interface. To initiate the reinstatement process, you need to specify the reinstatement reason. On initiating the reinstatement process, the status of the policy is changed to **Pending Reinstatement**. In addition, the system creates an outbound message which request for confirmation whether the policy should be reinstated. This outbound message can be sent to the policy processing system via custom mechanism. On receiving confirmation from the policy processing system through a health care inbound message, the system changes the status of the policy to **Reinstated**.
- **Reinstate Policy** – In this method, you can directly reinstate a fully-insured group policy. To reinstate a fully-insured group policy, you need to specify the reinstatement reason. You can directly reinstate the policy from the user interface or through a health care inbound message. On clicking the **Reinstate** button, the system will reinstate the fully-insured group policy on the system date. However, when you reinstate a fully-insured group policy through a health care inbound message, the policy is reinstated when the health care inbound message is processed in the system. On reinstating a fully-insured group policy, the status of the policy is changed to **Reinstated**.

Once the status of the policy is changed to **Reinstated**, the system updates the end date of the following entities to the respective original end date:

- Policy
- Policy Person
- Policy Plan
- Membership
- Member Person
- Contracts Associated with the Membership

**Note:**

The system stores the original end date of the above listed entities when you define or edit a policy, policy plan, or membership.

Here, the assumption is that the pass-through billable charges information for the membership will be sent again through an inbound message along with the reinstatement reason. And, therefore the exiting billable charges will not be extended.

Finally, the system automatically transitions the fully-insured group policy from **Reinstated** to **In Force/Active**.

## Fully-Insured Group Policy Renewal

You can renew a fully-insured group policy only through a health care inbound message and not from the user interface. If you want to renew a fully-insured group policy, you must sent the renewal date along with the new policy end date through a health care inbound message. On processing the health care inbound message, the fully-insured group policy is renewed. The renewal date is stamped on the fully-insured group policy. The policy end date is extended as mentioned in the health care inbound message. The policy plan and membership information for the renewed period must be sent in the subsequent health care inbound messages.

**Note:** You can renew a fully-insured group policy when it is in the **In Force/Active** status.

## Single Contract Creation Across Fully-Insured Group Policies and Plans

The system automatically creates a contract for a fully-insured group policy plan on the parent customer and/or bill group accounts. The system creates or updates contracts of a policy plan when you do either of the following:

- **Create or Edit a Policy Plan from the User Interface or through an Inbound Message** – The system creates a contract in either of the following ways:
  - If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.

- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create five contracts - C1 using CT1, C2 using CT2, C3 using CT3, C4 using CT4, and C5 using CT5. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with different price items, and if these price items are added on different pricing rule types, and if these pricing rule types are associated with different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

#### **Example 1 — Contract Creation for a Parent Customer**

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one contract using each contract type on each account of the parent customer and bill groups. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with two plans – PP1 and PP2 - is created for PC1 (where none of the bill groups are associated)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

The following table indicates the distinct contracts that would be created across policy plans on the A1, A2, A3, and A4 accounts in the above stated scenario:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI5	CT4	A1C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A1C6	PP2 (03-01-2019)	03-01-2019
A2	PP1	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A2C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PI4		CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019	
	PP2	PRT2	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

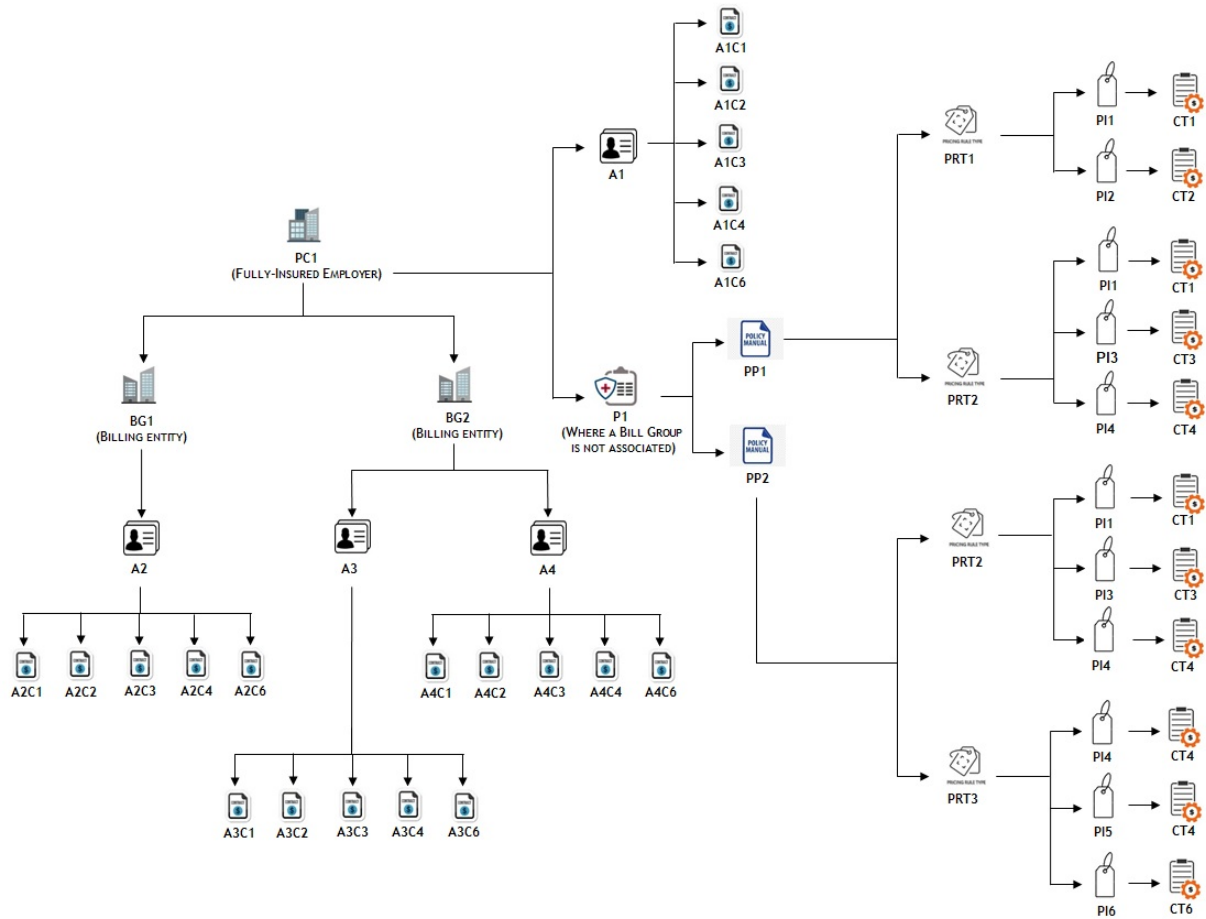

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A2C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))

			PI5	CT4	A4C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A4C6	PP2 (03-01-2019)	03-01-2019

The following figure graphically illustrates the example 1:

**Example 2 — Contract Creation for a Bill Group**

If a policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one contract using each contract type on each account of the parent customer and the bill group. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with three plans – PP1, PP2, and PP3 – is created for BG1 (where PC1 is the policy holder)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PP3 (with the start date as 06-01-2019) is associated with PRT1
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

The following table indicates the distinct contracts that would be created across policy plans on the A1 and A2 accounts in the above stated scenario:

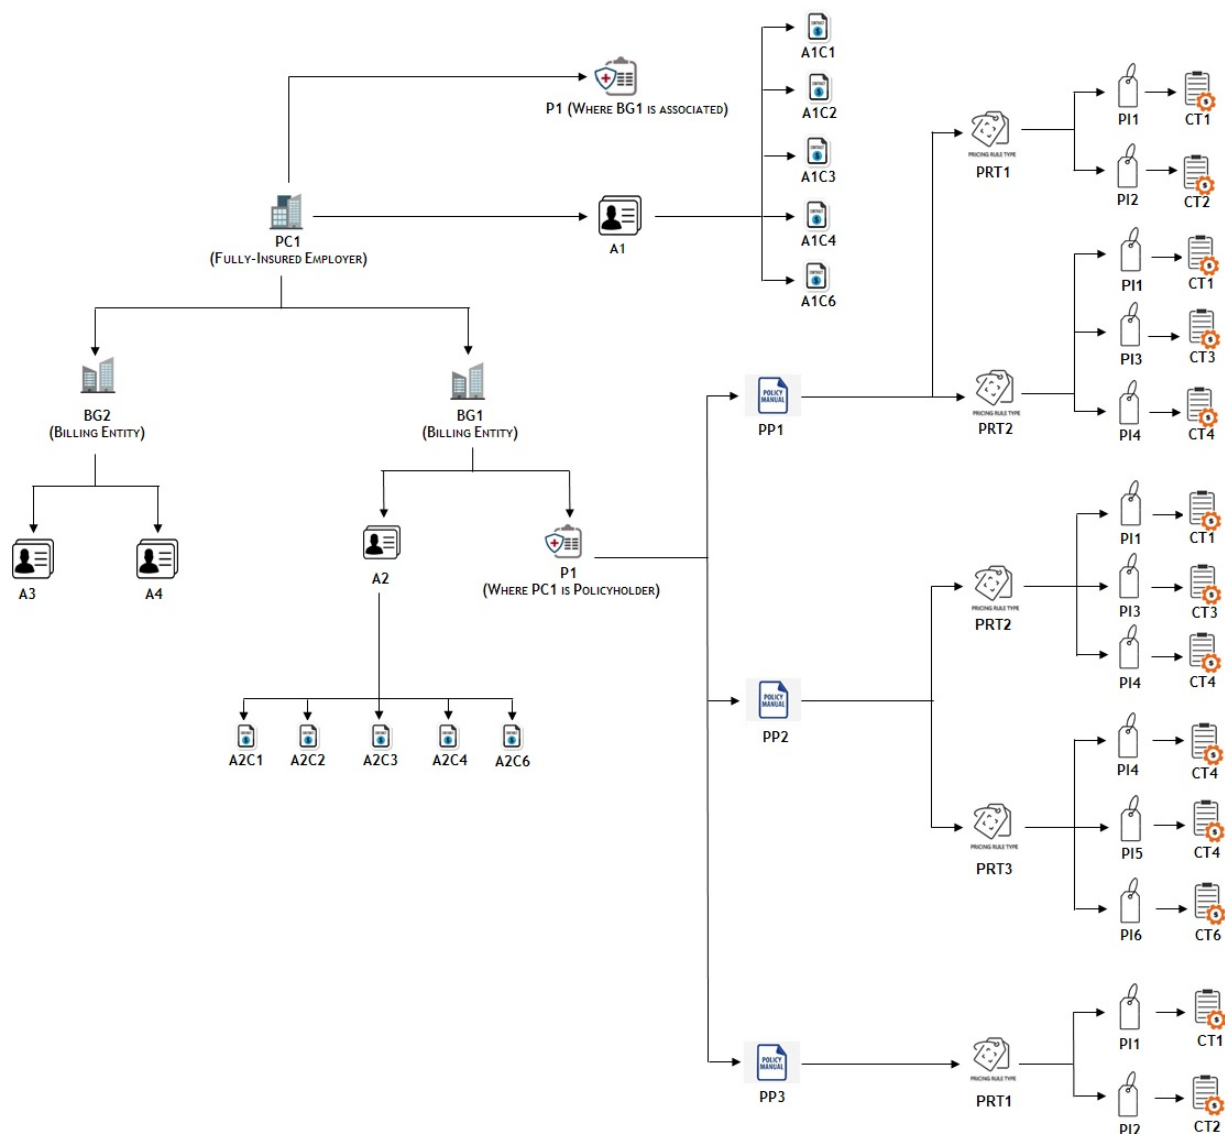

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019
		PRT2	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT2	PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
		PRT3	PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A1C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A1C6	PP2 (03-01-2019)	03-01-2019
	PP3	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019
	A2	PP1	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)
PI2				CT2	A2C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)	
		PRT2	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019	
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019	
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019	
	PP2	PRT2	PRT2	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
				PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
				PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019	

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI5	CT4	A2C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A2C6	PP2 (03-01-2019)	03-01-2019
	PP3	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A2C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019

The following figure graphically illustrates the example 2:

**Note:**

The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

- **Create or Edit an Account from the User Interface or through an Inbound Message** – The system creates a contract when either of the following condition is met:
  - The main customer of the account is a parent customer and holds a policy (where a bill group is not associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
  - The main customer of the account is a parent customer and holds a policy (where a bill group is associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
  - The main customer of the account is a bill group and holds a policy (where the parent customer is the policy holder) which is created using the policy type where the policy category is set to **Fully-Insured Group**.

The system creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create five contracts - C1 using CT1, C2 using CT2, C3 using CT3, C4 using CT4, and C5 using CT5. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with different price items, and if these price items are added on different pricing rule types, and if these pricing rule types are associated with different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

### Example 3 — Contract Creation for an Account of a Parent Customer

If you create an account for a parent customer who holds policies (where a bill group may or may not be associated), the system will create one contract using each contract type for all parent customer's policies on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P1 (where a bill group is not associated) and a policy named P2 (where BG1 is associated)
- BG1 has one policy named P2 where PC1 is the policy holder
- An account named A1 is added for PC1
- P1 has two plans – PP1 and PP2
- P2 has two plans – PP11 and PP12
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 06-01-2019) is associated with PRT2, PRT3, and PRT4
- PP11 (with the start date as 05-01-2019) is associated with PRT111 and PRT112
- PP12 (with the start date as 09-01-2019) is associated with PRT113 and PRT114
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI4
- PRT3 contains two price items – PI1 and PI5
- PRT4 contains two price items – PI6 and PI7

- PRT111 contains two price items – PI11 and PI12
- PRT112 contains two price items – PI1 and PI5
- PRT113 contains two price items – PI13 and PI14
- PRT114 contains two price items – PI7 and PI15
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI7 is associated with the CT7 contract type, PI11 is associated with the CT11 contract type, PI12 is associated with the CT12 contract type, PI13 is associated with the CT13 contract type, PI14 is associated with the CT14 contract type, and PI15 is associated with the CT15 contract type

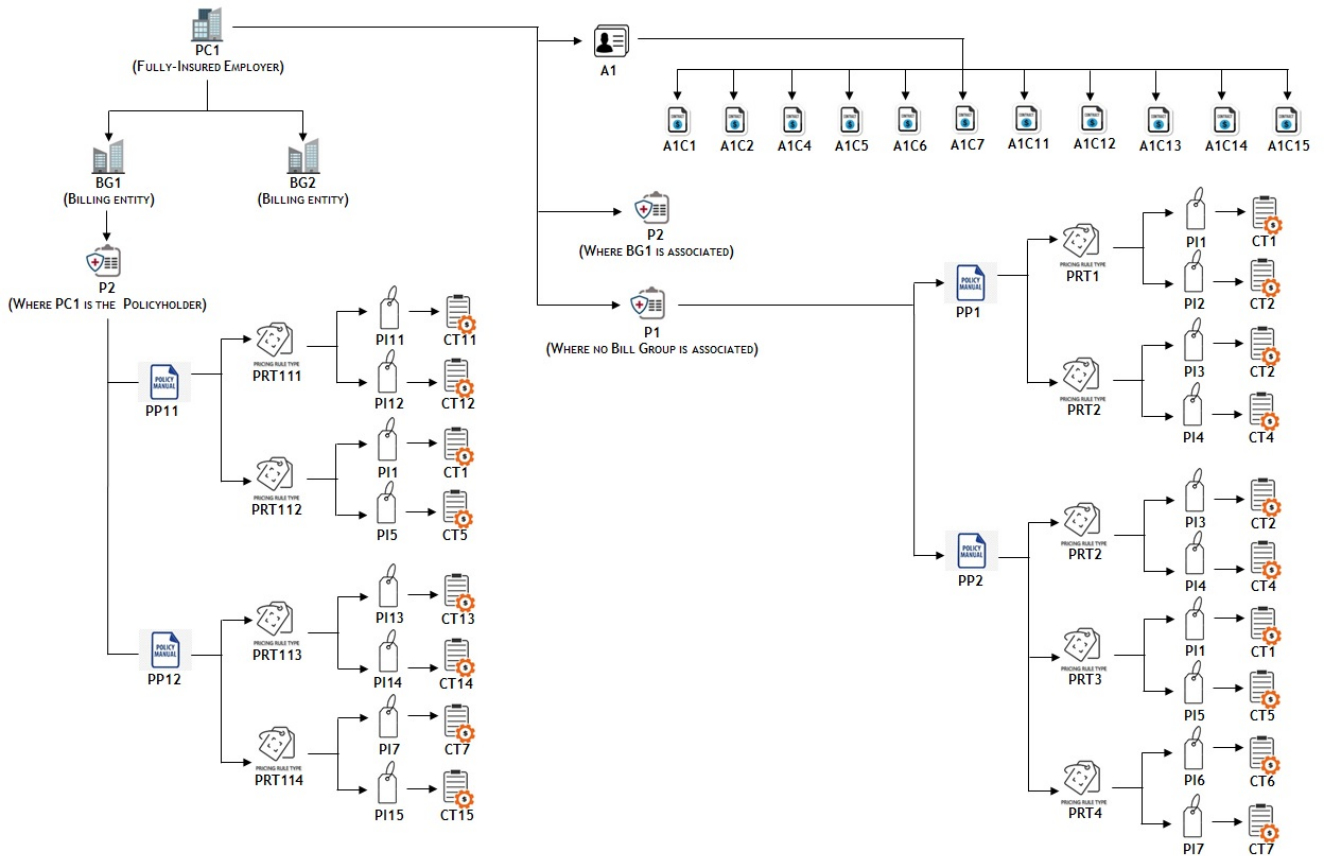

The following table indicates the distinct contracts that would be created across policy plans on the A1 account in the above stated scenario:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	P1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019
				PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
			PRT2	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
				PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
		PP2	PRT2	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
				PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
			PRT3	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019
				PI5	CT5	A1C5	PP2 (06-01-2019) and PP11 (05-01-2019)	05-01-2019
			PRT4	PI6	CT6	A1C6	PP2 (06-01-2019)	06-01-2019
				PI7	CT7	A1C7	PP2 (06-01-2019) and PP12 (09-01-2019)	06-01-2019
	P2	PP11	PRT111	PI11	CT11	A1C11	PP11 (05-01-2019)	05-01-2019
				PI12	CT12	A1C12	PP11 (05-01-2019)	05-01-2019
			PRT112	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019
				PI5	CT5	A1C5	PP2 (06-01-2019) and PP11 (05-01-2019)	05-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
		PP12	PRT113	PI13	CT13	A1C13	PP12 (09-01-2019)	09-01-2019
				PI14	CT14	A1C14	PP12 (09-01-2019)	09-01-2019
		PP2	PRT114	PI7	CT7	A1C7	PP2 (06-01-2019) and PP12 (09-01-2019)	06-01-2019
				PI15	CT15	A1C15	PP12 (09-01-2019)	09-01-2019

The following figure graphically illustrates the example 3:

Example 4 — Contract Creation for an Account of a Bill Group

If you create an account for a bill group who holds policies and its parent customer holds policies (where a bill group may or may not be associated), the system will create one contract using each contract type for the bill group's policies and parent customer's policies (where a bill group is not associated) on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P2 (where a bill group is not associated) and a policy named P1 (where BG2 is associated)
- BG2 has one policy named P1 where PC1 is the policy holder
- An account named A1 is added for BG2
- P1 has two plans – PP11 and PP12
- P2 has two plans – PP1 and PP2
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 04-01-2019) is associated with PRT3 and PRT4
- PP11 (with the start date as 07-01-2019) is associated with PRT11 and PRT12
- PP12 (with the start date as 11-01-2019) is associated with PRT13 and PRT14
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI2
- PRT3 contains two price items – PI3 and PI4
- PRT4 contains two price items – PI5 and PI6
- PRT11 contains two price items – PI111 and PI112
- PRT12 contains two price items – PI1 and PI6
- PRT13 contains two price items – PI113 and PI114
- PRT14 contains two price items – PI115 and PI5
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI111 is associated with the CT111 contract type, PI112 is associated with the CT112 contract type, PI113 is associated with the CT113 contract type, and PI114 and PI115 is associated with the CT114 contract type

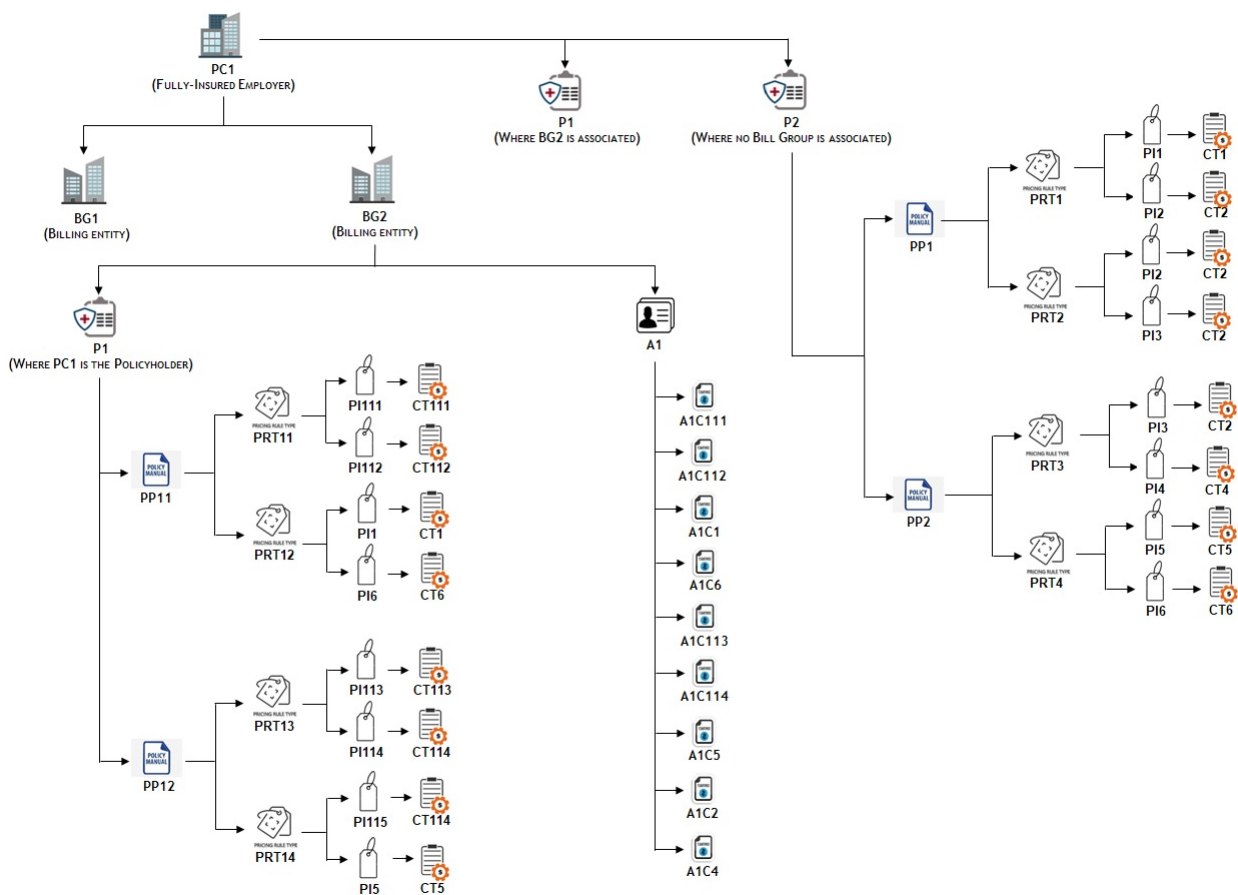

The following table indicates the distinct contracts that would be created across policy plans on the A1 account in the above stated scenario:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	P1	PP11	PRT11	PI111	CT111	A1C111	PP11 (07-01-2019)	07-01-2019
				PI112	CT112	A1C112	PP11 (07-01-2019)	07-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)	
			PRT12	PI1	CT1	A1C1	PP1 (01-01-2019) and PP11 (07-01-2019)	01-01-2019	
				PI6	CT6	A1C6	PP2 (04-01-2019) and PP11 (07-01-2019)	04-01-2019	
		PP12	PRT13	PI113	CT113	A1C113	PP12 (11-01-2019)	11-01-2019	
				PI114	CT114	A1C114	PP12 (11-01-2019)	11-01-2019	
			PRT14	PI115	CT114	A1C114	PP12 (11-01-2019)	11-01-2019	
				PI5	CT5	A1C5	PP2 (04-01-2019) and PP12 (11-01-2019)	04-01-2019	
		P2	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019) and PP11 (07-01-2019)	01-01-2019
					PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
				PRT2	PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
					PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (04-01-2019)	01-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)	
		PP2	PRT3	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (04-01-2019)	01-01-2019	
					PI4	CT4	A1C4	PP2 (04-01-2019)	04-01-2019
				PRT4	PI5	CT5	A1C5	PP2 (04-01-2019) and PP12 (11-01-2019)	04-01-2019
						PI6	CT6	A1C6	PP2 (04-01-2019) and PP11 (07-01-2019)

The following figure graphically illustrates the example 4:

**Note:**

The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

## Policy Plan Specific Contract Creation

In the [Single Contract Creation Across Fully-Insured Group Policies and Plans](#) on page 296 section, we have seen how the system creates one contract across fully-insured group policies and plans on the parent customer and/or bill group accounts. Alternatively, the system enables you to create a plan-specific contract (i.e. a contract using a contract type for each plan) on the parent customer and/or bill group accounts. You can opt for the plan-specific contract creation feature when you want to implement plan-specific business rules. For example, different payment priorities for your medical and dental plans. Under such conditions, you can create different contract types for different plans, say Medical and Dental and enable creation of different contracts using these contract types for billing different plans.

You can configure the plan-specific contract creation feature for the fully-insured group health insurance business by setting the following option types in the **C1-ASOBLNG** feature configuration:

- **Plan ID Characteristic Type** – Used to specify the characteristic type where you want to store the plan for which the contract is created. During the plan-specific contract creation, this characteristic is defined on the contract. Here, you must specify a characteristic type where the characteristic entity is set to **Contract**.
- **Plan Based Contract Creation Eligibility** – Used to indicate whether the system should create plan-specific contract on the account. The valid value is **Yes**.

Alternatively, you can also configure the plan-specific contract creation feature for specific persons (i.e. main customers of the policy) based on the business requirement. This is possible by setting the following option types in the **C1-ASOBLLNG** feature configuration:

- **Plan Based Contract Characteristic Type** – Used to specify the characteristic type which helps the system to determine whether plan-specific contracts should be created on the account. This characteristic must be defined on the person for whom you want to create plan-specific contracts on the accounts. Here, you must specify a characteristic type where the characteristic entity is set to **Person**.
- **Plan Based Contract Characteristic Value** – Used to specify the characteristic value which indicates that the system should create plan-specific contracts on the accounts.
- **Plan ID Characteristic Type** – Used to specify the characteristic type where you want to store the plan for which the contract is created. During the plan-specific contract creation, this characteristic is defined on the contract. Here, you must specify a characteristic type where the characteristic entity is set to **Contract**.

Here, the system creates or updates contracts of a policy plan when you do either of the following:

- **Create or Edit a Policy Plan from the User Interface or through an Inbound Message** – The system creates a contract in either of the following ways:
  - If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
  - If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create six contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, C3PP1 using CT3 for PP1, C4PP2 using CT4 for PP2, and C5PP2 using CT5 for PP2. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create four contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, and C2PP2 using CT2 for PP2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date. The characteristic type, which is specified in the **Plan ID Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration, is defined for each contract. It stores the plan ID which indicates the plan for which the contract is created.

#### **Example 1 — Plan-Specific Contract Creation for a Parent Customer**

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one plan-specific contract using each contract type on each account of the parent customer and bill groups. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts

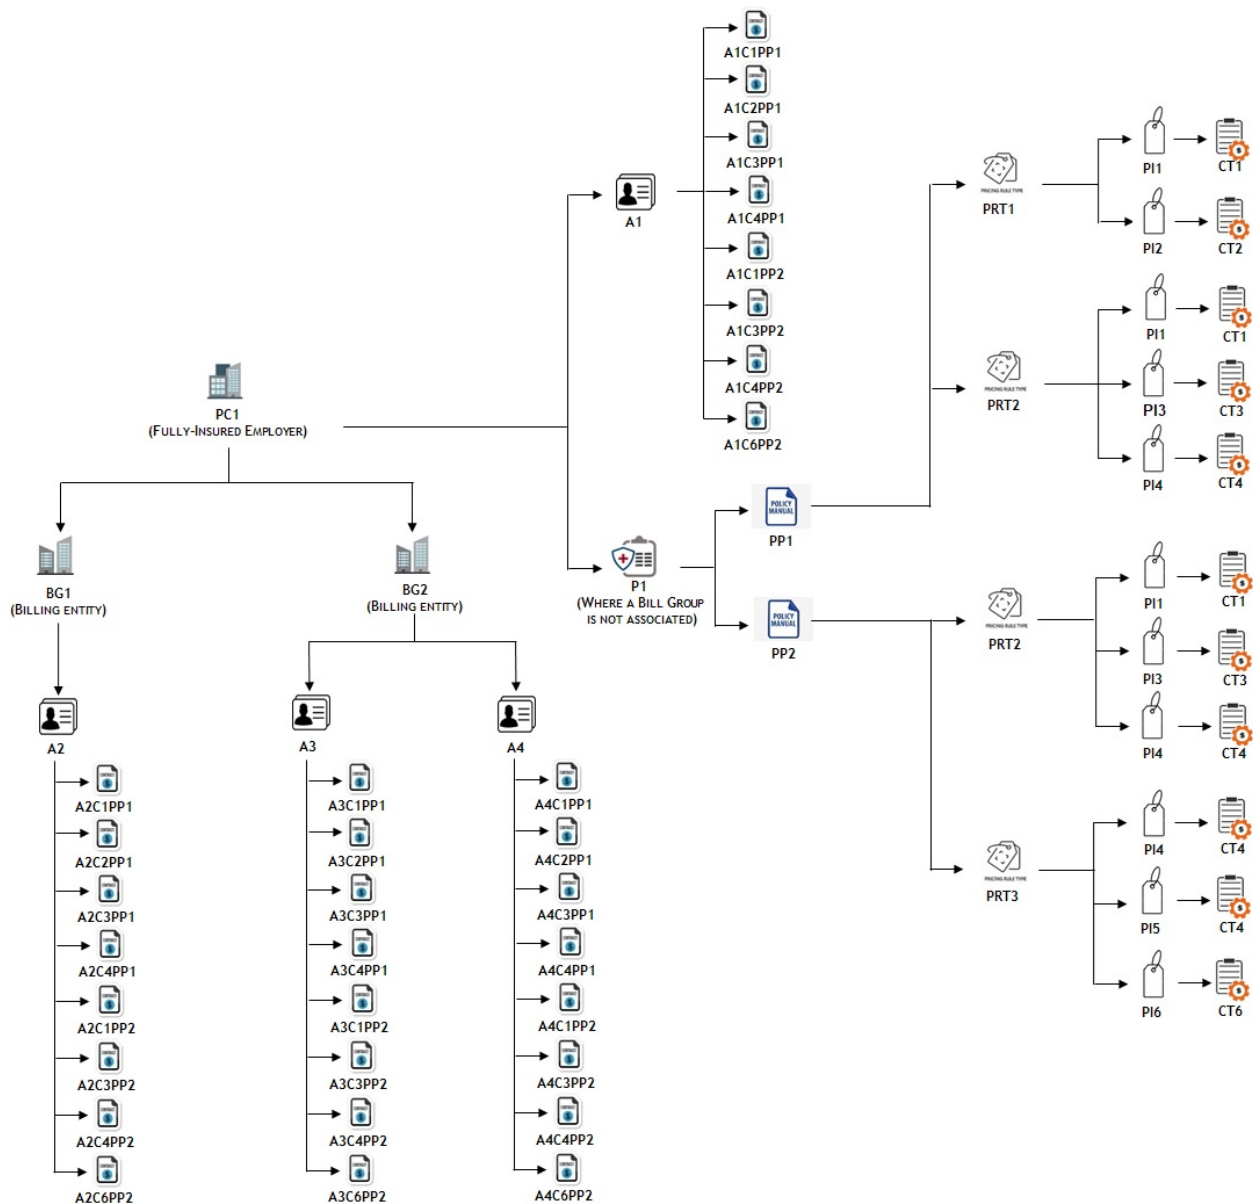

- A policy named P1 with two plans – PP1 and PP2 - is created for PC1 (where none of the bill groups are associated)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

The following table indicates the distinct plan-specific contracts that would be created on the A1, A2, A3, and A4 accounts in the above stated scenario:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
			PI2	CT2	A1C2PP1	01-01-2019
		PRT2	PI1	CT1	A1C1PP1	01-01-2019
			PI3	CT3	A1C3PP1	01-01-2019

			PI6	CT6	A4C6PP2	03-01-2019

The following figure graphically illustrates the example 1:

### Example 2 — Plan-Specific Contract Creation for a Bill Group

If the policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one plan-specific contract using each contract type on each account of the parent customer and the bill group. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with three plans – PP1, PP2, and PP3 – is created for BG1 (where PC1 is the policy holder)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PP3 (with the start date as 06-01-2019) is associated with PRT1

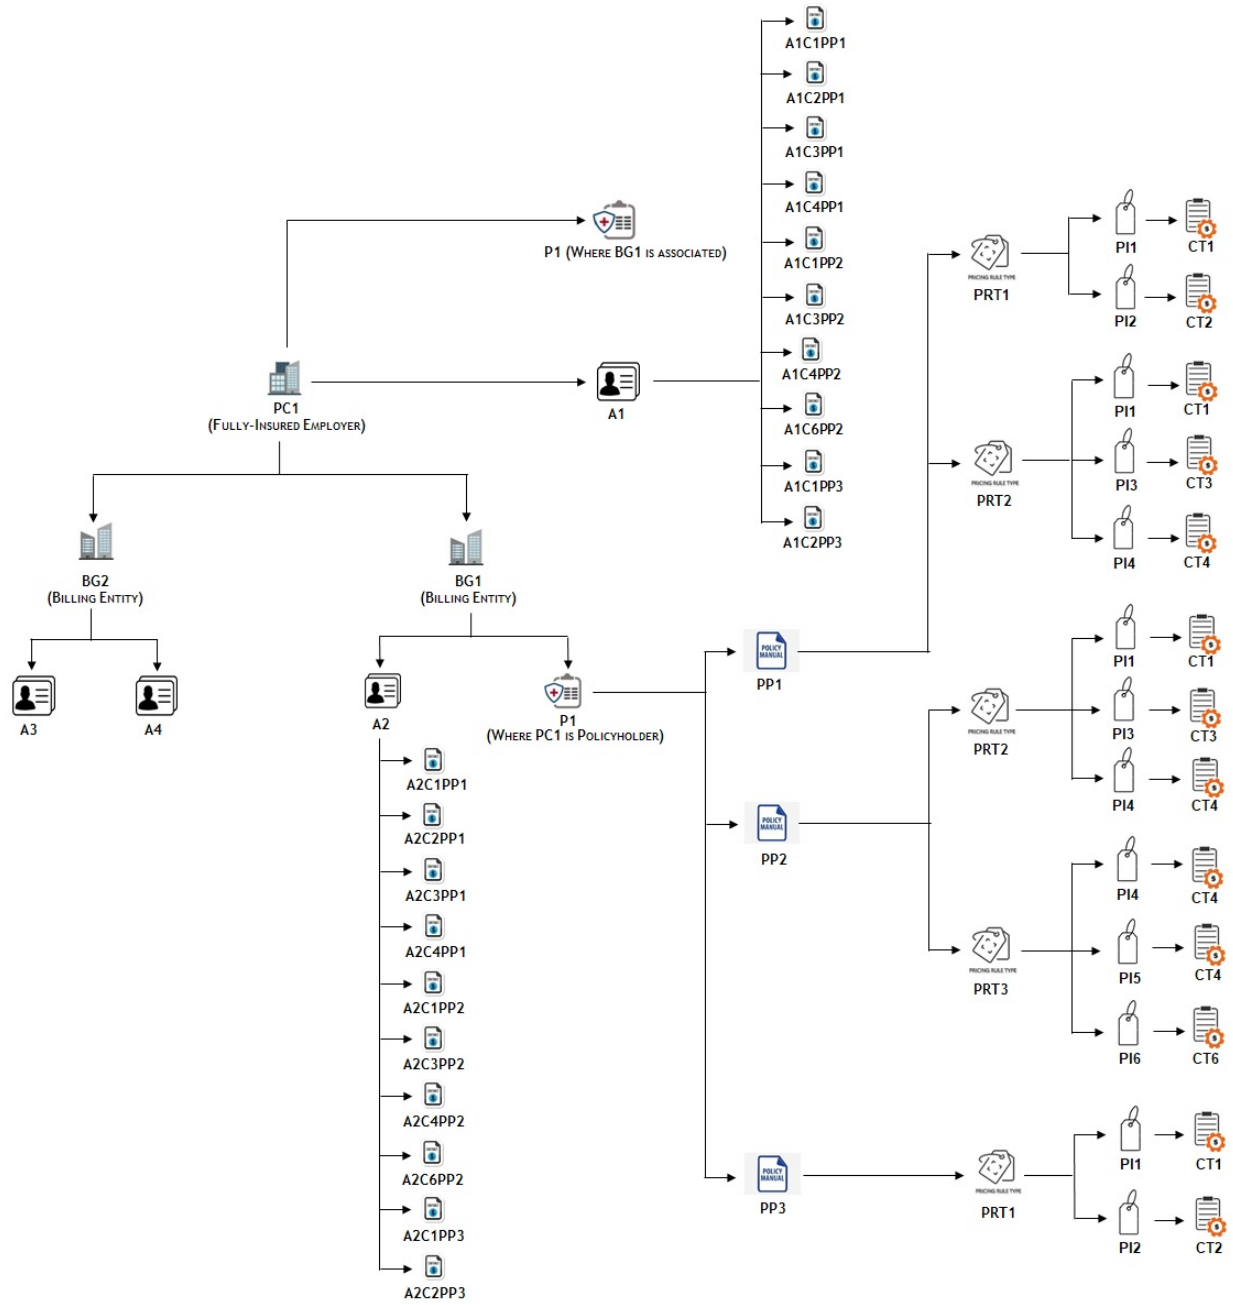

- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

The following table indicates the distinct plan-specific contracts that would be created on the A1 and A2 accounts in the above stated scenario:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
			PI2	CT2	A1C2PP1	01-01-2019
		PRT2	PI1	CT1	A1C1PP1	01-01-2019
			PI3	CT3	A1C3PP1	01-01-2019
			PI4	CT4	A1C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A1C1PP2

		PRT2	PI1	CT1	A2C1PP1	01-01-2019
			PI3	CT3	A2C3PP1	01-01-2019
			PI4	CT4	A2C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A2C1PP2
	PI3			CT3	A2C3PP2	03-01-2019
	PI4			CT4	A2C4PP2	03-01-2019

<b>Account</b>	<b>Plan</b>	<b>Pricing Rule Type</b>	<b>Price Item</b>	<b>Contract Type</b>	<b>Contract</b>	<b>Contract Start Date</b>
		PRT3	PI4	CT4	A2C4PP2	03-01-2019
			PI5	CT4	A2C4PP2	03-01-2019
			PI6	CT6	A2C6PP2	03-01-2019
	PP3	PRT1	PI1	CT1	A2C1PP3	06-01-2019
			PI2	CT2	A2C2PP3	06-01-2019

The following figure graphically illustrates the example 2:

**Note:** The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

- **Create or Edit an Account from the User Interface or through an Inbound Message** – The system creates a contract when either of the following condition is met:
  - The main customer of the account is a parent customer and holds a policy (where a bill group is not associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
  - The main customer of the account is a parent customer and holds a policy (where a bill group is associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
  - The main customer of the account is a bill group and holds a policy (where the parent customer is the policy holder) which is created using the policy type where the policy category is set to **Fully-Insured Group**.

The system creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create six contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, C3PP1 using CT3 for PP1, C4PP2 using CT4 for PP2, and C5PP2 using CT5 for PP2. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create four contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, and C2PP2 using CT2 for PP2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date. The characteristic type, which is specified in the **Plan ID Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration, is defined for each contract. It stores the plan ID which indicates the plan for which the contract is created.

### Example 3 — Plan-Specific Contract Creation for an Account of a Parent Customer

If you create an account for a parent customer who holds policies (where a bill group may or may not be associated), the system will create one plan-specific contract using each contract type for all parent customer's policies on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P1 (where a bill group is not associated) and a policy named P2 (where BG1 is associated)
- BG1 has one policy named P2 where PC1 is the policy holder
- An account named A1 is added for PC1
- P1 has two plans – PP1 and PP2
- P2 has two plans – PP11 and PP12
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 06-01-2019) is associated with PRT2, PRT3, and PRT4
- PP11 (with the start date as 05-01-2019) is associated with PRT111 and PRT112
- PP12 (with the start date as 09-01-2019) is associated with PRT113 and PRT114
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI4
- PRT3 contains two price items – PI1 and PI5

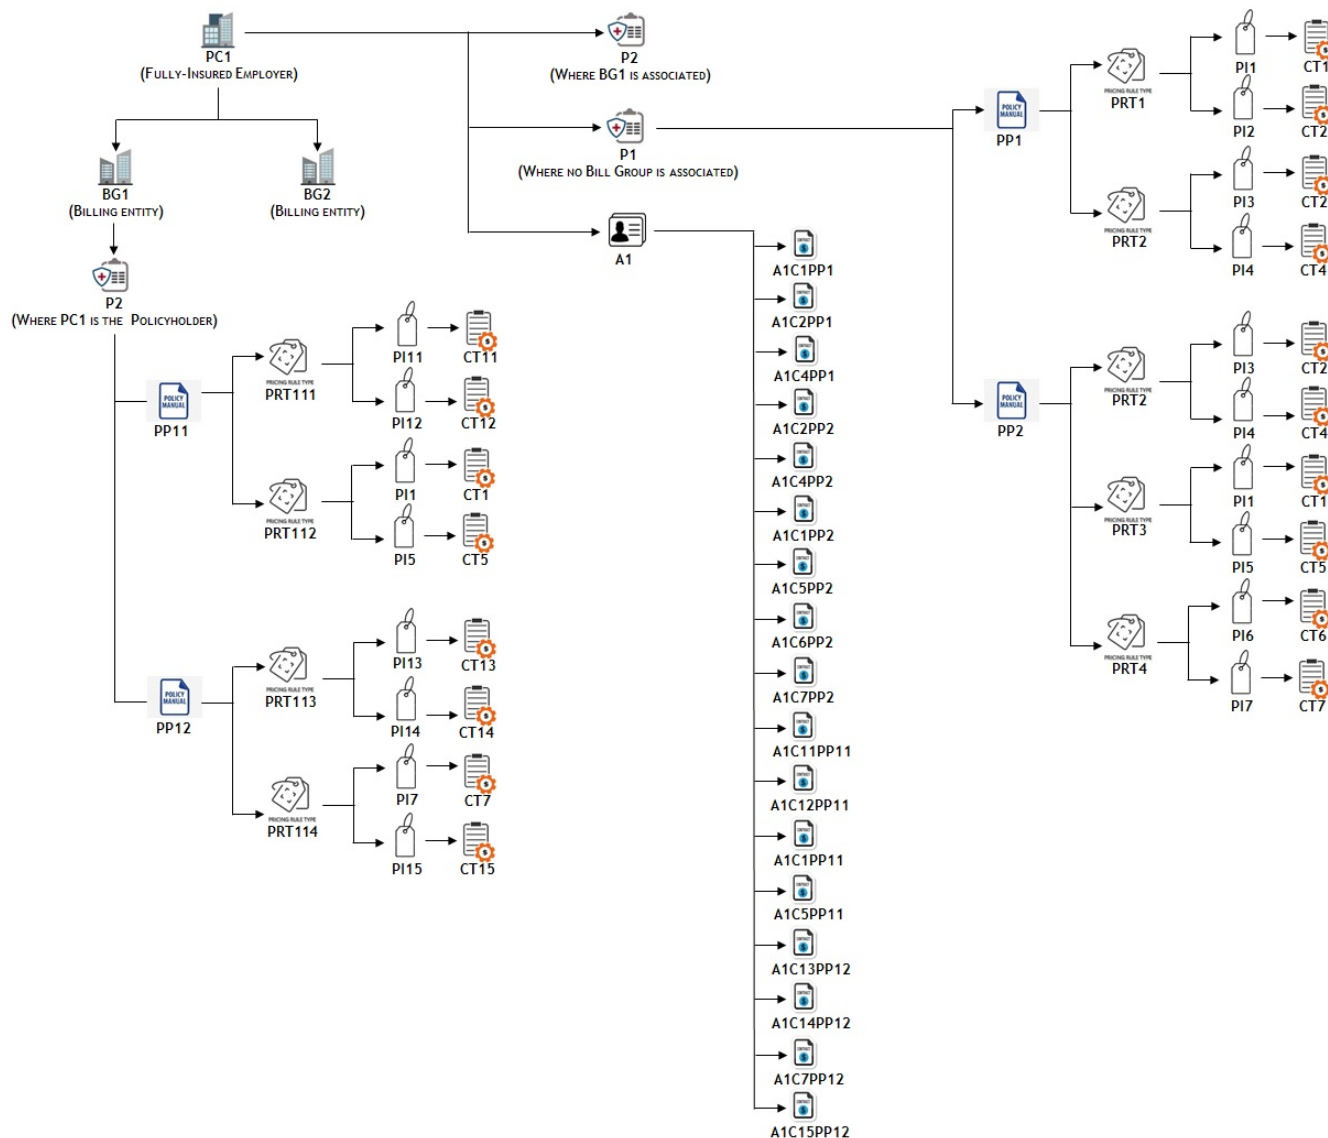

- PRT4 contains two price items – PI6 and PI7
- PRT111 contains two price items – PI11 and PI12
- PRT112 contains two price items – PI1 and PI5
- PRT113 contains two price items – PI13 and PI14
- PRT114 contains two price items – PI7 and PI15
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI7 is associated with the CT7 contract type, PI11 is associated with the CT11 contract type, PI12 is associated with the CT12 contract type, PI13 is associated with the CT13 contract type, PI14 is associated with the CT14 contract type, and PI15 is associated with the CT15 contract type

The following table indicates the distinct plan-specific contracts that would be created on the A1 account in the above stated scenario:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	P1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
				PI2	CT2	A1C2PP1	01-01-2019
			PRT2	PI3	CT2	A1C2PP1	01-01-2019
				PI4	CT4	A1C4PP1	01-01-2019
		PP2	PRT2	PI3	CT2	A1C2PP2	06-01-2019
				PI4	CT4	A1C4PP2	06-01-2019
			PRT3	PI1	CT1	A1C1PP2	06-01-2019
				PI5	CT5	A1C5PP2	06-01-2019
			PRT4	PI6	CT6	A1C6PP2	06-01-2019
				PI7	CT7	A1C7PP2	06-01-2019
	P2	PP11	PRT111	PI11	CT11	A1C11PP11	05-01-2019
				PI12	CT12	A1C12PP11	05-01-2019
			PRT112	PI1	CT1	A1C1PP11	05-01-2019
				PI5	CT5	A1C5PP11	05-01-2019
		PP12	PRT113	PI13	CT13	A1C13PP12	09-01-2019
				PI14	CT14	A1C14PP12	09-01-2019
PRT114			PI7	CT7	A1C7PP12	09-01-2019	
			PI15	CT15	A1C15PP12	09-01-2019	

The following figure graphically illustrates the example 3:

#### Example 4 — Plan-Specific Contract Creation for an Account of a Bill Group

If you create an account for a bill group who holds policies and its parent customer holds policies (where a bill group may or may not be associated), the system will create one plan-specific contract using each contract type for the bill group's policies and parent customer's policies (where a bill group is not associated) on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P2 (where a bill group is not associated) and a policy named P1 (where BG2 is associated)
- BG2 has one policy named P1 where PC1 is the policy holder
- An account named A1 is added for BG2
- P1 has two plans – PP11 and PP12
- P2 has two plans – PP1 and PP2

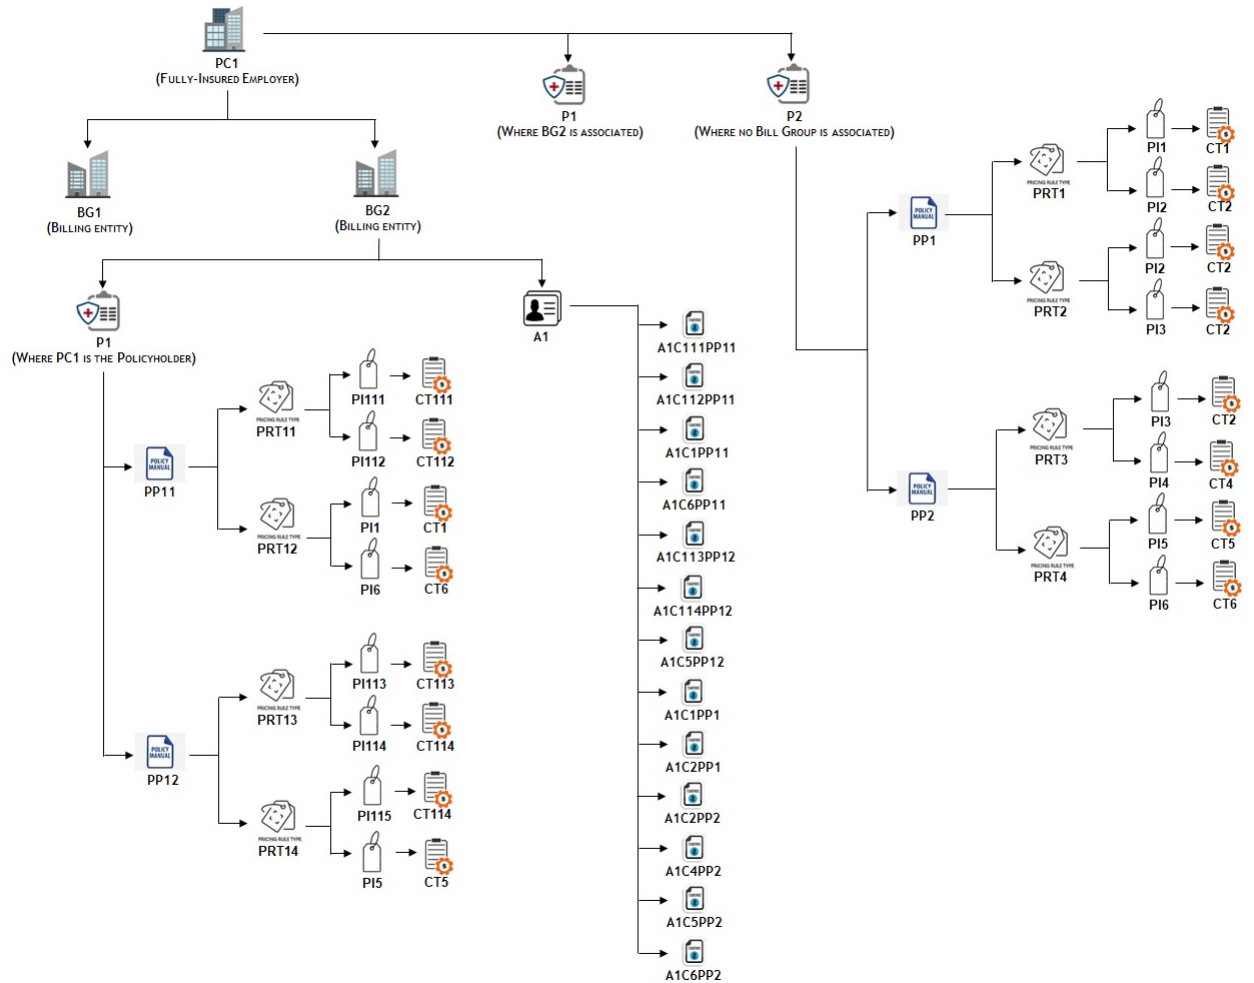

- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 04-01-2019) is associated with PRT3 and PRT4
- PP11 (with the start date as 07-01-2019) is associated with PRT11 and PRT12
- PP12 (with the start date as 11-01-2019) is associated with PRT13 and PRT14
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI2
- PRT3 contains two price items – PI3 and PI4
- PRT4 contains two price items – PI5 and PI6
- PRT11 contains two price items – PI111 and PI112
- PRT12 contains two price items – PI1 and PI6
- PRT13 contains two price items – PI113 and PI114
- PRT14 contains two price items – PI115 and PI5
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI111 is associated with the CT111 contract type, PI112 is associated with the CT112 contract type, PI113 is associated with the CT113 contract type, and PI114 and PI115 is associated with the CT114 contract type

The following table indicates the distinct plan-specific contracts that would be created on the A1 account in the above stated scenario:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date	
A1	P1	PP11	PRT11	PI111	CT111	A1C111PP11	07-01-2019	
				PI112	CT112	A1C112PP11	07-01-2019	
			PRT12	PI1	CT1	A1C1PP11	07-01-2019	
				PI6	CT6	A1C6PP11	07-01-2019	
		PP12	PRT13	PI113	CT113	A1C113PP12	11-01-2019	
				PI114	CT114	A1C114PP12	11-01-2019	
			PRT14	PI115	CT114	A1C114PP12	11-01-2019	
				PI5	CT5	A1C5PP12	11-01-2019	
		P2	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
					PI2	CT2	A1C2PP1	01-01-2019

				PI3	CT2	A1C2PP1	01-01-2019	
PP2	PRT3		PI3	CT2	A1C2PP2	04-01-2019		

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
				PI4	CT4	A1C4PP2	04-01-2019
			PRT4	PI5	CT5	A1C5PP2	04-01-2019
				PI6	CT6	A1C6PP2	04-01-2019

The following figure graphically illustrates the example 4:

**Note:** The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

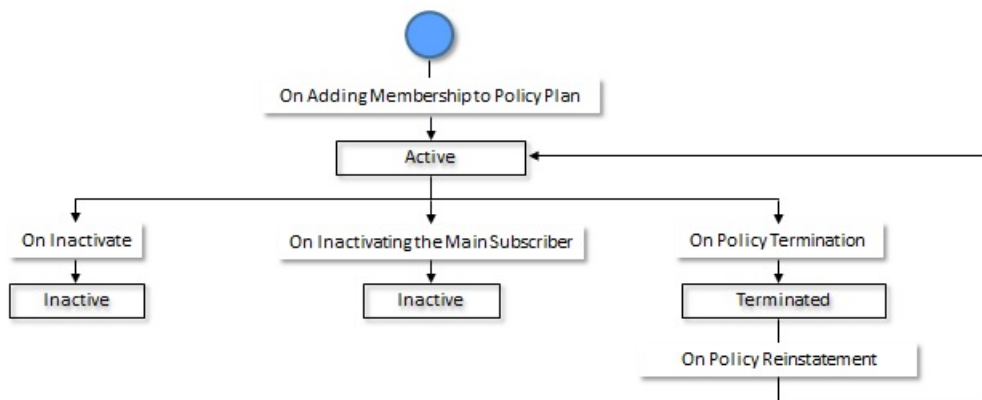

## Fully-Insured Group Policy Status Transition

The following figure graphically indicates how a fully-insured group policy moves from one status to another in its lifecycle:

## Membership Status Transition

The following figure graphically indicates how a membership moves from one status to another in its lifecycle:

## Types of Policy Plan

---

Oracle Revenue Management and Billing enables you to create different types of plan for a fully-insured group policy:

- [Commercial Plans](#) on page 330
- [Medicare Affiliated Plans](#) on page 331

### Commercial Plans

A commercial plan is a health insurance plan which is offered and administered by non-governmental entities (i.e. insurance companies). It can cover medical or dental expenses and disability income for the insured. Two of the most popular types of commercial health insurance plans are:

- **Preferred Provider Organization (PPO)** - A Preferred Provider Organization (PPO) is a medical care arrangement in which medical professionals and facilities provide services to subscribed clients at reduced rates.
- **Health Maintenance Organization (HMO)** - A Health Maintenance Organization (HMO) is an insurance structure that provides coverage through a network of physicians at a fixed annual fee.

A commercial health insurance plan can be offered to the individual or group customers. Usually, the insurance companies design special commercial health plans for fully-insured group customers and provide cost-effective health coverage for the employees and their family members (at an additional cost).

The system enables you to create and edit a policy plan from the user interface or through a health care inbound message. While creating a Commercial policy plan, you must set the benefit type to **Commercial**. While defining a Commercial policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received through a health care inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can associate the age based, tier based, pass-through billable charge, and/or additional charge pricing rule types with a Commercial policy plan. If you associate an age based pricing rule type with the policy plan, the system calculates the active employee coverage or COBRA membership premium for eligible members using the age based pricing rule type. If you associate a tier based pricing rule type with the policy plan, the system calculates the active employee coverage or COBRA membership premium using the tier based pricing rule type. The active employee coverage and COBRA membership premium are then charged through the SQI based billable charges. In case of an active employee coverage membership, the charge is billed to the bill group of the fully-insured group customer. However, in case of a COBRA membership, the charge is billed to either of the following depending on the billing arrangement which is defined for the COBRA membership:

- Bill Group of the Fully-Insured Group Customer
- TPA Person
- Financially Responsible Member Person

If you associate an additional charge pricing rule type (which is a related pricing rule type) with the policy plan, the system derives the flat or percentage based administration fee for the COBRA membership using the additional charge pricing rule type. This administration fee is charged along with the COBRA membership premium through an SQI based billable charge

If you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information of a health care inbound message, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer to the pass-through billable charge pricing rule type which is associated with the policy plan.

The system enables you to prorate the membership premium using the proration rules defined for the fully-insured group policy plan. A proration rule indicates how you want to prorate the membership premium on various events, such as enrollment, termination, etc. For more information, refer to [Premium Proration Rules](#) on page 3556.

## Medicare Affiliated Plans

A Group Medicare Advantage plan, also known as Employer Group Waiver Plan (EGWP), is a type of Medicare Advantage plan offered by some employers to their retired or retiring employees. It may offer more benefits than traditional Medicare Advantage plans. EGWP are provided by private insurance companies who manage fully-insured large group customer's retiree Medicare benefits. The different parts of Medicare that EGWPs cover are:

- **Part A** - Medicare Part A insurance is the portion that pays for hospital costs, such as inpatient hospital care or rehabilitation facility care related to illness or injury.
- **Part B** - Medicare Part B is the Medicare portion that pays for doctor visits and related medical costs, including emergency care when you are not admitted.
- **Part D** - Medicare Part D is the prescription drug coverage portion of Medicare. Most prescription drug coverage plans involve different "tiers" of medications where you may pay little to no costs for generic medications and a greater portion of costs for name-brand medicines.

The system enables you to create and edit a policy plan from the user interface or through a health care inbound message. While creating a Medicare Affiliated policy plan, you must set the benefit type to **Medicare Affiliated**. While defining a Medicare Affiliated policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received through a health care inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can associate the age based, tier based, pass-through billable charge, and/or benefit pricing rule types with a Medicare Affiliated policy plan. If you associate an age based pricing rule type with the policy plan, the system calculates the Medicare premium for Part A, Part B, and/or Part D for eligible members using the age based pricing rule type. If you associate a tier based pricing rule type with the policy plan, the system calculates the Medicare membership premium for Part A, Part B, and Part D using the tier based pricing rule type. This membership premium is then charged through the SQI based billable charge. The charge is billed to either of the following depending on the billing arrangement which is defined for the Medicare membership:

- Bill Group of the Fully-Insured Group Customer
- Financially Responsible Member Person

The system considers the low income subsidy (LIS) and late enrollment penalty (LEP) while calculating the Medicare Part D premium. If you associate a benefit pricing rule type with the policy plan, the system determines the price items through which LIS and LEP should be charged.

If you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information of a health care inbound message, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer to the pass-through billable charge pricing rule type which is associated with the policy plan.

The system enables you to prorate the Medicare premium using the proration rules defined for the fully-insured group policy plan. A proration rule indicates how you want to prorate the membership premium on various events, such as enrollment, termination, etc. For more information, refer to [Premium Proration Rules](#) on page 3556.

## Types of Membership

---

Oracle Revenue Management and Billing enables you to create different types of membership for a fully-insured group policy plan:

- [Active Employee Coverage Membership](#) on page 332

- [Medicare Membership](#) on page 333
- [COBRA Membership](#) on page 335
- [Retiree Membership](#) on page 337

## Active Employee Coverage Membership

Oracle Revenue Management and Billing enables you to maintain an active employee coverage membership for the group insurance health plans and charge age based or tier based premium for the active employee coverage membership. An active employee coverage membership includes the employee or member of the organization who is covered under the group health insurance plan. Here, the covered employee or member is known as the main subscriber of the membership.

If the health insurance coverage is extended to the immediate family and/or other dependents of group members for an extra cost, the active employee coverage membership may include dependents who are related to the main subscriber. The system enables you to define various relationship types using which you can relate main subscriber and other dependent persons in a membership. You can define and edit relationship types through the **Contract Relationship Type** screen. The dependents can be members or non-members in an active employee coverage membership. The system calculates age based premium for both eligible members and non-members in an active employee coverage membership. If you select the **Skip Non-Members** option in the age based pricing rule type, the system will only consider the eligible members and not non-members of the active employee coverage membership during age based premium calculation.

The system enables you to create and edit an active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating an active employee coverage membership, you must not set the membership type of the membership (i.e. leave the **Membership Type** field blank). Ideally, you must define an active employee coverage membership on a Commercial policy plan. However, at present, the system does not validate whether an active employee coverage membership is defined only on a Commercial policy plan and not on a Medicare Affiliated policy plan.

You can create an active employee coverage membership when you specify the main subscriber of the membership. Ideally, the main subscriber and dependent persons should exist as persons in the system before creating the active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. The system enables you to create the main subscriber, dependent persons, and active employee coverage membership through the same health care inbound message or through the same membership repricing request. In such case, the system will first create the person records for the main subscriber and dependent persons and then create the active employee coverage membership.

On creating an active employee coverage membership, the status of the membership and main subscriber is set to **Active**. On adding a dependent person to a membership, the status of the dependent person is set to **Active**. You can inactivate an active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating the main subscriber of an active employee coverage membership, the system automatically inactivates the membership and all other member persons which are included in the membership. The status of the active employee coverage membership, main subscriber, and other member persons (if any) is set to **Inactive**. In addition, the system does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set

to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

You can also inactivate a member person, who is not the main subscriber of an active employee coverage membership, from the user interface, through a health care inbound message, or through the membership repricing inbound web service. On inactivating the member person, the status of the member person is set to **Inactive**.

On terminating a fully-insured group policy, the status of all active employee coverage memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all active employee coverage memberships on the respective policy plans is set to **Active**.

The system requires the following information to create charges for an active employee coverage membership:

- Whom to bill the active employee coverage membership charges
- Age based or tier based pricing rules using which the premium should be calculated for the active employee coverage membership
- Respective age based or tier based pricing rule type associated with the respective policy plan

The system supports the following billing arrangements for an active employee coverage membership:

- **Group Billing** – Here, an active employee coverage membership is billed to a bill group which is derived for the active employee coverage membership.
- **Direct Billing** – Here, an active employee coverage membership is billed to the member who is financially responsible for the active employee coverage membership.

You can indicate the billing arrangement for the active employee coverage memberships by defining a characteristic on the bill group or parent customer. The system searches for the characteristic which is specified in the **Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Bill Group
2. Parent Customer

**Note:** If the billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the active employee coverage membership premium to the bill group.

The system requires the bill group and its account to bill the active employee coverage memberships when the billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the active employee coverage membership when the billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the active employee coverage membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

## Medicare Membership

Oracle Revenue Management and Billing enables you to maintain an employer sponsored group medicare membership (800 series plans) for a fully-insured large group customer and create age based or tier based premium charges for the Medicare Part A, Part B, and Part D. A Medicare beneficiary may qualify for a low income subsidy (LIS) for Medicare Part D or may incur late enrollment penalty (LEP) for Medicare Part D. In such case, the system enables you to consider the low income subsidy (LIS) and late enrollment penalty (LEP) while calculating the Medicare Part D premium.

The system enables you to create and edit a Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating a Medicare membership, you must set the membership type to **Medicare**. Ideally, you must define a Medicare membership on a Medicare Affiliated policy

plan. However, at present, the system does not validate whether a Medicare membership is defined only on a Medicare Affiliated policy plan and not on a Commercial policy plan.

You can create a Medicare membership when you specify the main subscriber of the membership. A Medicare membership should have only one member person who is covered for Medicare and who is financially responsible for the membership. Ideally, the main subscriber should exist as a person in the system before creating the Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. The system enables you to create the main subscriber and Medicare membership through the same health care inbound message or through the same membership repricing request. In such case, the system will first create the person record for the main subscriber and then create the Medicare membership.

On creating a Medicare membership, the status of the membership and main subscriber is set to **Active**. You can inactivate a Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating a Medicare membership, the system does the following:

- Set the status of the membership and main subscriber to **Inactive**
- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

On terminating a fully-insured group policy, the status of all Medicare memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all Medicare memberships on the respective policy plans is set to **Active**.

The system enables you to maintain the Medicare benefits (such as, Part A, Part B, Part D, Part D LIS, and Part D LEP) of a member person through the **Benefit** screen. The system enables you to define and edit the Medicare benefits from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While defining a Medicare benefit of a member person for Part A, Part B, and Part D, you need to specify a Medicare plan benefit package (i.e. 800 series plan) which is applicable for the Medicare benefit. The system enables you to define and edit a Medicare plan benefit package through the **Field Mapping** screen. You can use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. While defining a Medicare benefit of a member person for Part D LIS and Part D LEP, you need to specify the benefit amount (i.e. subsidy or penalty amount).

While editing a Medicare benefit of a member person from the user interface, you can only edit the characteristics of the Medicare benefit. However, while editing a Medicare benefit of a member person through a health care inbound message or through the membership repricing inbound web service, you can edit the end date, benefit amount, and characteristics of the Medicare benefit. On editing a Medicare benefit, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

The system enables you to discard an active or inactive Medicare benefit from the user interface by clicking the **Discard** button. You can also discard an active or inactive Medicare benefit through a health care inbound message or through the membership repricing inbound web service by changing its status to **Discarded**.

The system requires the following information to create charges for a Medicare membership:

- Whom to bill the Medicare membership (i.e. billing arrangement details)

- Age based or tier based pricing rules using which the premium should be calculated for the Medicare Part A, Part B, and Part D.
- Respective age based, tier based, and benefit pricing rule types associated with the respective policy plan

The system supports the following billing arrangements for a Medicare membership:

- **Group Billing** – Here, a Medicare benefit is billed to a bill group which is derived for the Medicare membership.
- **Direct Billing** – Here, a Medicare benefit is billed to a member person who is financially responsible for the Medicare membership.

You can indicate the billing arrangement for the Medicare memberships by defining a characteristic on the policy plan, policy, or parent customer. The system searches for the characteristic which is specified in the **Benefit Billing Arrangement** option type of the **C1-ASOBLLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

**Note:** If the benefit billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the Medicare membership premium to the bill group.

The system requires the bill group and its account to bill the Medicare memberships when the benefit billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the Medicare membership when the benefit billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the Medicare membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

## COBRA Membership

Oracle Revenue Management and Billing enables you to maintain a COBRA membership and charge age based or tier based premium and administration fee for the COBRA membership. In COBRA membership, an employer provides temporary continuation of group health coverage in certain situations where it would otherwise be terminated. This may include situations, such as:

- Death of the covered employee
- Reduction in the hours or termination of the covered employee's employment
- Covered employee becoming entitled for Medicare
- Divorce or legal separation from the covered employee
- A dependent child ceasing to be a dependent in an active employee coverage membership

The system enables you to create and edit a COBRA membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating a COBRA membership, you must set the membership type to **COBRA**. Ideally, you must define a COBRA membership on a Commercial policy plan. However, at present, the system does not validate whether a COBRA membership is defined only on a Commercial policy plan and not on a Medicare Affiliated policy plan.

Through a health care inbound message, the system must receive the end date of the active employee coverage membership along with the details of the COBRA membership. You can create a COBRA membership when you specify the main subscriber of the membership. Here, the main subscriber can be an employee or member of the organization or a family member who is covered through the COBRA membership. In a COBRA membership, you need to specify

the member person who is financially responsible for the COBRA membership. Note that, at a time, only one member person can be financially responsible for the COBRA membership.

On creating a COBRA membership, the status of the membership and main subscriber is set to **Active**. On adding a dependent person to a membership, the status of the dependent person is set to **Active**. You can inactivate a COBRA membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating the main subscriber of a COBRA membership, the system automatically inactivates the membership and all other member persons which are included in the membership. The status of the COBRA membership, main subscriber, and other member persons (if any) is set to **Inactive**. In addition, the system does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

You can also inactivate a member person, who is not the main subscriber of a COBRA membership, from the user interface, through a health care inbound message, or through the membership repricing inbound web service. On inactivating a member person, the status of the member person is set to **Inactive**.

On terminating a fully-insured group policy, the status of all COBRA memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all COBRA memberships on the respective policy plans is set to **Active**.

The system requires the following information to create charges for a COBRA membership:

- Whom to bill the COBRA membership (i.e. billing arrangement details)
- Age based or tier based pricing rules using which the premium should be calculated for the COBRA membership
- Respective age based or tier based pricing rule type associated with the respective policy plan
- Additional charge pricing rule using which the administration fee should be calculated for the COBRA membership
- Respective additional charge pricing rule type associated with the respective policy plan

The system supports the following billing arrangements for a COBRA membership:

- **Group Billing** – Here, a COBRA membership is billed to a bill group which is derived for the COBRA membership.
- **TPA Billing** – Here, a COBRA membership is billed to the third party administrator (i.e. TPA person).
- **Direct Billing** – Here, a COBRA membership is billed to the member who is financially responsible for the COBRA membership.

You can indicate the billing arrangement for the COBRA memberships by defining a characteristic on the policy plan, policy, or parent customer. The system searches for the characteristic which is specified in the **Cobra Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy

### 3. Parent Customer

**Note:** If the Cobra billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the COBRA membership premium to the bill group.

The system requires the bill group and its account to bill the COBRA memberships when the COBRA billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the third party administrator (i.e. TPA person) and its account to bill the COBRA memberships when the COBRA billing arrangement is set to **TPA Billing**. You can create a third party administrator (i.e. TPA person) and its accounts through a health care inbound message. While sending the details of a TPA person through an inbound message, you must specify the parent of the TPA person and its account details. The system associates the parent customer with the TPA person using the relationship type which is specified in the **TPA Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. If the person type specified in the health care inbound message matches the person type specified in the **TPA Person Type** option type of the **C1-PERSTYPE** feature configuration, the system creates or updates the TPA person and its account through a customer registration object. However, if the person type specified in the health care inbound message does not match the person type specified in the **TPA Person Type** option type of the **C1-PERSTYPE** feature configuration, the system creates or updates the TPA person and its accounts directly and not through a customer registration object.

The system associates the TPA person with the TPA account using the relationship type which is specified in the **TPA Account Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. On creating an account for a TPA person, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the COBRA membership when the COBRA billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the COBRA membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

## Retiree Membership

An employer may offer a retirement health plan coverage to its retired employees through a fully-insured group policy or an individual can independently opt for a government sponsored retirement health plan coverage. Oracle Revenue Management and Billing enables you to maintain a retiree membership for both the fully-insured group and individual business. The system enables you to maintain a flat or percentage based contribution of employer or sponsor for a retiree membership.

The system enables you to create and edit a retiree membership through a health care inbound message or through membership repricing inbound web service. While creating a retiree membership, the membership type must be set to **Retiree**. The system requires the following information to create charges for a retiree membership:

- Whom to bill the premium for the retiree membership (i.e. retiree billing arrangement details)
- Whom to bill the employer or sponsor contribution (i.e. sponsor billing arrangement details)
- Age based or tier based pricing rule using which the premium should be calculated for the retiree membership
- Discount charge pricing rule using which the employer or sponsor contribution should be calculated for the retiree membership

In case of the fully-insured individual business, the premium for a retiree membership is billed to the member who is financially responsible for the retiree membership. However, in case of the fully-insured group business, the system supports the following billing arrangements for the retiree membership:

- **Group Billing** – Here, the premium is billed to a bill group which is derived for the retiree membership.
- **TPA Billing** – Here, the premium is billed to the third party administrator (i.e. TPA person).
- **Direct Billing** – Here, the premium is billed to the member who is financially responsible for the retiree membership.

You can indicate the billing arrangement for a retiree membership in the fully-insured group business by defining a characteristic on the policy plan, policy, or parent customer. The system searches for the characteristic which is specified in the **Retiree Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

The system enables you to maintain a flat or percentage based contribution of employer or sponsor through a discount charge pricing rule. A field named **Sponsored** is available in the **Price Items** section while defining or editing a discount charge pricing rule type. If the **Sponsored** option is selected for a price item, the system creates and bills the charge for the price item as per the sponsor billing arrangement. The system searches for the characteristic which is specified in the **Sponsors Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

In the fully-insured group and individual business, the system supports the following sponsor billing arrangements for the retiree membership:

- **Group Billing** – Here, the system creates a negative charge for the employer or sponsor contribution against the beneficiary account and a positive charge for the employer or sponsor contribution against the sponsor account.
- **TPA Billing** – Here, the system creates a negative charge for the employer or sponsor contribution against the beneficiary account and a positive charge for the employer or sponsor contribution against the sponsor account.
- **Direct Billing** – Here, the system creates a memo only charge for the employer or sponsor contribution against the beneficiary account. A bill message code is derived from the **Retiree Bill Message Code** option type of the **C1-ASOBLNG** feature configuration and stamped against the beneficiary account.

In case of the group and TPA billing, the system derives the characteristic types which are specified in the **Sponsor Account Identifier Type Char Type** and **Sponsor Account Identifier Value Char Type** option types of the **C1-ASOBLNG** feature configuration. The system then checks whether these characteristics are defined on any of the following entity in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

If these characteristics are defined on any of the above entity, the system derives the sponsor account for the bill group. The system then bills the employer or sponsor contribution charges to the sponsor account.

However, if the **Sponsored** option is not selected for a price item in a discount charge pricing rule type, the system creates and bills the charge for the price item as per the retiree billing arrangement.

## Algorithms Used in C1-POLICY

The following table lists the algorithms which are attached to the **C1-POLICY** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-READEVNT	C1-READEVNT	Refer to <a href="#">C1-READEVNT</a> on page 340.
Validation	C1-POLBOVAL	C1-POLBOVAL	Refer to <a href="#">C1-POLBOVAL</a> on page 340.

The following table lists the algorithms which are used in the lifecycle of the **C1-POLICY** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Pending	Monitor	C1-TRNDFLSYS	C1-TRNDFLSYS	Refer to <a href="#">C1-TRNDFLSYS</a> on page 341.
Activate	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1796.
In Force/Active	Enter	C1-EVCSTSTAT	C1-EVCSTSTAT	Refer to <a href="#">C1-EVCSTSTAT</a> on page 341.
Pending Termination	Enter	C1-PLCYTRMRQ	C1-PLCYTRMRQ	Refer to <a href="#">C1-PLCYTRMRQ</a> on page 341.
Terminated	Enter	C1-POLCYTERM	C1-POLCYTERM	Refer to <a href="#">C1-POLCYTERM</a> on page 342.
	Enter	C1-DELTRMLTR	C1-CRTCUSCNT	Refer to <a href="#">C1-DELTRMLTR</a> on page 342.
	Enter	C1-EVCSTSTAT	C1-EVCSTSTAT	Refer to <a href="#">C1-EVCSTSTAT</a> on page 341.
Pending Reinstatement	Enter	C1-PLCYREIRQ	C1-PLCYREIRQ	Refer to <a href="#">C1-PLCYREIRQ</a> on page 343.
Reinstated	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1796.
	Enter	C1-POLCYREIN	C1-POLCYREIN	Refer to <a href="#">C1-POLCYREIN</a> on page 343.
	Enter	C1-CCPOLRE1	C1-CRTCUSCNT	Refer to <a href="#">C1-CCPOLRE1</a> on page 344.
Renewed	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1796.
Pending Cancellation	-	-	-	-
Canceled	-	-	-	-

## C1-REAUDEVNT

If this algorithm is attached to the **Audit** system event of a business object, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event while:

- Defining an entity when the **Add Action** option is selected in the audit event type.
- Editing an entity when the **Update All** option is selected in the audit event type or when the updated element is listed in the **Audit Elements for Entity Update** section.
- Deleting an entity when the **Delete Action** option is selected in the audit event type.

The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1\_AUDIT\_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the **C1\_AUDIT\_EVENT** table. Note that if the entity has a start date, then the effective date is set to the entity's start date. But, if the entity does not have a start date, then the effective date is set to the system date.

**Note:** Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event

At present, this algorithm is designed to work with the business objects of the following maintenance objects:

- C1-POLICY
- C1-ASOPolicy
- C1-Membership
- C1-PolicyPlan
- C1\_PERSON\_BO
- C1-PricingRuleTierBased
- C1-PricingRuleAgeBased

In case, you want to create audit event for any other maintenance objects, you need to create a custom algorithm type.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

## C1-POLBOVAL

This algorithm validates a fully-insured group policy throughout its lifecycle. It checks the following:

- Whether the policy end date is not earlier than the policy start date.
- Whether the policy person end date is not earlier than the policy person start date.
- Whether the policy person start date is not earlier than the policy start date or later than policy end date.
- Whether the policy person end date is not earlier than the policy start date or later than policy end date.

**Note:** The above validation is done when the policy is transition to the status which is not specified in the **Skip Status for Policy Person End Date Validation** parameter. For example, if you set the **Skip Status for Policy Person End Date Validation** parameter to **TERMINATED**, the system will not perform the above validation when the status of the policy is changed to **Terminated**.

- Whether the person who is the main customer is associated with the policy.
- Whether the policy person role is specified while associating a person with the policy.

It contains the following parameter:

- **Skip Status for Policy Person End Date Validation** – Used to specify the policy status in which you do not want to validate the policy person end date. You can specify comma-separated values for this parameter.

## C1-TRNDFLSYS

This algorithm checks whether the fully-insured group policy is created from the user interface or through an inbound message. If a fully-insured group policy is created through an inbound message, the system will automatically transition the fully-insured group policy to the default next status specified in its lifecycle.

## F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

**Note:** At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-EVCSTSTAT

This algorithm updates the **Customer Status** characteristic of the main customer of the policy. This characteristic indicates whether the customer is active or inactive. If the customer owns at least one active policy, the customer status is set to **Active**. However, if the customer does not own any active policy, the customer status is set to **Inactive**.

It is invoked while activating or terminating a fully-insured group policy. It contains the following parameters:

- **Customer Status Characteristic Type** – Used to specify the characteristic type whose value should be updated whenever the policy is activated or terminated. You must specify a characteristic type where the characteristic entity is set to **Person**.
- **Active Customer Status Characteristic Value** – Used to specify the characteristic value which should be used when the main customer owns at least one active policy.
- **Inactive Customer Status Characteristic Value** – Used to specify the characteristic value which should be used when the main customer does not own any active policy (in other words, when all policies of the main customer are terminated).
- **Policy Active Status** – Used to specify the status in which at least one policy should exist to indicate that the main customer is active.

All the above parameters are mandatory.

## C1-PLCYTRMRQ

This algorithm creates an outbound message using the outbound message type whenever you initiate the policy termination process from the user interface. While creating the outbound message, the system identifies the account using the characteristic type specified in the **Main Customer Characteristic Type** parameter. The system checks whether this characteristic type is set to the main customer's ID on any account. If so, the system considers the account and then fetches the value of the account identifier type specified in the **Account Identifier Type** parameter.

In addition, it stores the details of the outbound message (which is created) in the log of the policy. It contains the following parameters:

- **Outbound Message Type** – Used to specify the outbound message type using which you want to create the outbound message. You must specify an outbound message type which is already defined in the system.
- **Source System** – Used to specify the source system that you want to use in the outbound message. You must specify a source system which is already defined in the **C1-SourceSystemLookup** extendable lookup.
- **Account Identifier Type** – Used to specify the account identifier type whose value you want to use in the outbound message. You must specify an account identifier type which is already defined in the system.
- **Main Customer Characteristic Type** – Used to specify the characteristic type using which you want to identify the account of the main customer. You must specify a characteristic type where the characteristic entity is set to **Person**.

All the above parameters are mandatory.

## C1-POLCYTERM

This algorithm sets the end date of the following entities to the termination date when the respective condition is met:

- Policy (when the termination date is not earlier than the policy start date or later than the policy end date)
- Policy Person (when the termination date falls within the date range in which the person is associated with the policy)
- Policy Plan (when the termination date falls within the date range of the policy plan)
- Membership (when the termination date falls within the date range of the membership)
- Member Person (when the termination date falls within the date range in which the person is added to the membership)
- Contracts Associated with the Membership (when the termination date falls within the date range of the contract)

It contains the following parameters:

- **Membership Old Status** – Used to specify the status from which you want to transition the membership when the policy is terminated.
- **Membership New Status** – Used to specify the status to which you want to transition the membership when the policy is terminated.

## C1-DELTRMLTR

This algorithm creates a customer contact whenever the policy is transition to the status where it is attached. For example, if this algorithm is attached to the **TERMINATED** status, it creates a customer contact whenever the policy is terminated. You can create a customer contact while terminating a policy. Optionally, you can configure the algorithm such that a customer contact is created when a particular status reason is specified while terminating a policy.

Once a customer contact is created, the policy for which the customer contact is created is stored as a characteristic on the customer contact. In addition, the customer contact which is created for the policy is stored as a characteristic in the log of the policy.

It contains the following parameters:

- **Check Policy Status Reason** – Used when you want to create a customer contact when the policy is terminated for a particular reason. The valid values are:

- **Y** – Used to indicate that the system should create a customer contact when a particular status reason is specified while terminating a policy.
- **N** – Used to indicate that the system should create a customer contact while terminating a policy irrespective of the status reason.
- **Policy Status Reason Codes** – Used to specify the status reason defined for the **TERMINATED** status. You can specify comma-separated values for this parameter.
- **Customer Contact Class** – Used to specify the customer contact class using which you want to create the customer contact. This field is mandatory.
- **Customer Contact Type** – Used to specify the customer contact type using which you want to create the customer contact. This field is mandatory.
- **Consolidate Customer Contact** – Used to indicate whether the system should update the existing customer contact or create a new customer contact for the main customer of the policy. The valid values are:
  - **Y** – If this parameter is set to **Y**, the system checks whether a customer contact is already created for the main customer of the policy on the system date. If so, the system does not create a new customer contact. Instead, it updates the existing customer contact of the main customer of the policy. However, if the customer contact is not already created on the system date, the system creates a new customer contact for the main customer of the policy.
  - **N** – If this parameter is set to **N**, the system creates a new customer contact for the main customer of the policy and does not update the existing customer contact, if any.

**Note:** If you do not specify the value for this parameter, by default, it is set to **N**.

- **Policy ID Characteristic Type** – Used to specify the characteristic type which you want to define for the customer contact. This characteristic indicates the policy for which the customer contact is created. You must specify a characteristic type where the characteristic entity is set to **Customer Contact**. This field is mandatory.
- **Customer Contact Characteristic Type** – Used to specify the characteristic type which you want to use in the log of the policy. This characteristic indicates the customer contact which is created for the policy. You must specify a characteristic type where the characteristic entity is set to **Policy**. This field is mandatory.
- **Status To Skip Process** – Used when you do not want to create the customer contact when the policy is transition to a particular status. You can specify comma-separated values for this parameter.

## C1-PLCYREIRQ

This algorithm creates an outbound message using the outbound message type whenever you initiate the policy reinstatement process from the user interface. In addition, it stores the details of the outbound message (which is created) in the log of the policy.

It contains the following parameters:

- **Outbound Message Type** – Used to specify the outbound message type using which you want to create the outbound message. You must specify an outbound message type which is already defined in the system.
- **Source System** – Used to specify the source system that you want to use in the outbound message. You must specify a source system which is already defined in the **C1-SourceSystemLookup** extendable lookup.

All the above parameters are mandatory.

## C1-POLCYREIN

This algorithm updates the end date of the following entities to the respective original end date:

- Policy
- Policy Person

- Policy Plan
- Membership
- Member Person
- Contracts Associated with the Membership

**Note:** The system stores the original end date of the above listed entities when you define or edit a policy, policy plan, or membership.

Here, the assumption is that the pass-through billable charges information for the membership will be sent again through an inbound message along with the reinstatement reason. And, therefore the exiting billable charges will not be extended.

It contains the following parameters:

- **Membership Old Status** – Used to specify the status from which you want to transition the membership when the policy is reinstated.
- **Membership New Status** - Used to specify the status to which you want to transition the membership when the policy is reinstated. This field is mandatory.

## C1-CCPOLRE1

This algorithm creates a customer contact whenever the policy is transition to the status where it is attached. For example, if this algorithm is attached to the **REINSTATE** status, it creates a customer contact whenever the policy is reinstated. You can create a customer contact while reinstating a policy. Optionally, you can configure the algorithm such that a customer contact is created when a particular status reason is specified while reinstating a policy.

Once a customer contact is created, the policy for which the customer contact is created is stored as a characteristic on the customer contact. In addition, the customer contact which is created for the policy is stored as a characteristic in the log of the policy.

It contains the following parameters:

- **Check Policy Status Reason** – Used when you want to create a customer contact when the policy is reinstated for a particular reason. The valid values are:
  - **Y** – Used to indicate that the system should create a customer contact when a particular status reason is specified while reinstating a policy.
  - **N** – Used to indicate that the system should create a customer contact while reinstating a policy irrespective of the status reason.
- **Policy Status Reason Codes** – Used to specify the status reason defined for the **REINSTATE** status. You can specify comma-separated values for this parameter.
- **Customer Contact Class** – Used to specify the customer contact class using which you want to create the customer contact. This field is mandatory.
- **Customer Contact Type** – Used to specify the customer contact type using which you want to create the customer contact. This field is mandatory.
- **Consolidate Customer Contact** – Used to indicate whether the system should update the existing customer contact or create a new customer contact for the main customer of the policy. The valid values are:
  - **Y** – If this parameter is set to **Y**, the system checks whether a customer contact is already created for the main customer of the policy on the system date. If so, the system does not create a new customer contact. Instead, it updates the existing customer contact of the main customer of the policy. However, if the customer contact is not already created on the system date, the system creates a new customer contact for the main customer of the policy.
  - **N** – If this parameter is set to **N**, the system creates a new customer contact for the main customer of the policy and does not update the existing customer contact, if any.

**Note:** If you do not specify the value for this parameter, by default, it is set to N.

- **Policy ID Characteristic Type** – Used to specify the characteristic type which you want to define for the customer contact. This characteristic indicates the policy for which the customer contact is created. You must specify a characteristic type where the characteristic entity is set to **Customer Contact**. This field is mandatory.
- **Customer Contact Characteristic Type** – Used to specify the characteristic type which you want to use in the log of the policy. This characteristic indicates the customer contact which is created for the policy. You must specify a characteristic type where the characteristic entity is set to **Policy**. This field is mandatory.
- **Status To Skip Process** – Used when you do not want to create the customer contact when the policy is transition to a particular status. You can specify comma-separated values for this parameter.

## Algorithms Used in C1-PolicyPlan

The following table lists the algorithms which are attached to the **C1-PolicyPlan** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-PPCONCRE	C1-PPCONCRE	Refer to <a href="#">C1-PPCONCRE</a> on page 345.
Validation	C1-VALPPBO	C1-VALPPBO	Refer to <a href="#">C1-VALPPBO</a> on page 346.

### C1-PPCONCRE

This algorithm is invoked when you create or edit a policy plan from the user interface or through an inbound message. It creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates a contract using a distinct contract type which is associated with each price item.

Let us assume that PRT1 is associated with the policy plan and it contains three price items – P1, P2, and P3. Now, if the P1 is associated with the CT1 contract type, P2 is associated with the CT2 contract type, and P3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the P1 and P3 are associated with the CT1 contract type and P2 is associated with the CT2 contract type, the system will create two distinct contracts - C1 using CT1 and C2 using CT2.

If multiple pricing rule types are associated with the policy plan and each pricing rule type contains multiple price items, it creates a contract using a distinct contract type which is associated with each price item on each pricing rule type.

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one contract using each contract type on each account of the parent customer and bill groups. If a policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one contract using each contract type on each account of the parent customer and the bill group.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with the same or different price items on the same or different pricing rule types of different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

**Note:**

The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

If the same contract type is associated with the same or different price items on the same or different pricing rule types of different plans on different policies, the contract start date is set to the start date of the earliest plan across policies.

**C1-VALPPBO**

This algorithm validates a policy plan. It checks the following:

- Whether the policy plan end date is not earlier than the policy plan start date.
- Whether the policy plan start date is not earlier than the policy start date or later than policy end date.
- Whether the policy plan end date is not earlier than the policy start date or later than policy end date.
- Whether the price item or at least one pricing rule type is associated with the policy plan.

**Algorithms Used in C1-Membership**

The following table lists the algorithms which are attached to the **C1-Membership** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-FIAUDEV	C1-FIAUDEV	Refer to <a href="#">C1-FIAUDEV</a> on page 163.
Post-Processing	C1-RTAREAMEM	C1-RTAREAMEM	Refer to <a href="#">C1-RTAREAMEM</a> on page 347
Post-Processing	C1-MEMRLSUBT	C1-MEMRLSUBT	Refer to <a href="#">C1-MEMRLSUBT</a> on page 348
Post-Processing	C1-MPCONCREA	C1-MPCONCREA	Refer to <a href="#">C1-MPCONCREA</a> on page 349
Pre-Processing	C1-MEMSTPRE	C1-MEMSTPRE	Refer to <a href="#">C1-MEMSTPRE</a> on page 350.
Validation	C1-VALMEMBO	C1-VALMEMBO	Refer to <a href="#">C1-VALMEMBO</a> on page 350.

The following table lists the algorithms which are used in the lifecycle of the **C1-Membership** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Active	-	-	-	-
Inactive	Enter	C1-MEMINACT	C1-MEMINACT	Refer to <a href="#">C1-MEMINACT</a> on page 350.
Terminated	-	-	-	-

**C1-FIAUDEV**

If this algorithm is attached to the **Audit** system event of the **C1-Membership**, **C1-Benefits**, and **C1\_PERSON\_BO** business objects, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event whenever a membership is added to a policy plan, member person is added to a membership, and a Medicare benefit is defined for a member person. It also creates the audit event whenever the membership, member person, and Medicare benefit details are updated. However, note that the audit events are created in the update scenario when the element listed for auditing in the age based, tier based, or benefit pricing rule type is updated. The system considers only those pricing rule types whose pricing rules are effective during the respective entity (i.e. membership, member person, or Medicare benefit whichever is updated) date range.

It creates one or more audit events in the **Pending** status. The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1\_AUDIT\_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the **C1\_AUDIT\_EVENT** table.

**Note:**

The system creates an audit event whenever the membership start and end dates and member person's start and end dates are changed in the system irrespective of whether these fields are listed for auditing or not in the age based or tier based pricing rule types.

Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event.

For each audit event, this algorithm derives the memberships on the policy plans which are impacted and the pricing rule types whose pricing rules are defined on the respective policy plans. A repricing entity detail record is then created for each membership, pricing rule type, and effective date combination in the **CI\_REPRC\_ENTITY\_DTL** table. The status of the repricing entity detail record is set to **P**. Once the repricing entity detail records are created successfully, the status of the audit event is changed to **Complete**.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

**C1-RTAREAMEM**

This algorithm derives the geographic rating area for a membership using the **Address Source** and **Address Type** characteristic types. It supports two address sources named **Policy Holder** and **Main Subscriber** and three address types named **Person Mailing**, **Person Seasonal**, and **Account Override**.

On adding a membership to a policy plan, this algorithm derives the characteristic types from the **Address Source Characteristic Type** and **Address Type Characteristic Type** attributes of a geographic rating area preference. This algorithm considers the geographic rating area preference which is specified in the **Rating Area Field Mapping for Group** option type of the **C1-ASOBLNG** feature configuration. Then, it searches for these characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy
4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, this algorithm derives the default address source and address type from the geographic rating area preference. If the address source is set to **Policy Holder**, this algorithm fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration. It then derives the person who is associated with the policy using the parent customer policy person role. Once the address source and address type are derived, this algorithm fetches the state and zip code from the address type of the address source. For example, if the address source is set to **Policy Holder** and address type is set to **Person Mailing**, this algorithm fetches the state and zip code from the policy holder's mailing address. Once the state and zip code are fetched from the address, this algorithm checks whether the zip code is a 9-digit code. If not, it appends zeros to make it a 9-digit zip code. It then derives the value of the **Use Plan Details** attribute from the geographic rating area preference. If the attribute is set to **Y**, this algorithm derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination. However, if the attribute is set to **N**, this algorithm derives a geographic rating area for the state and zip code combination. If the geographic rating area is not derived for the specified combination, this algorithm derives the default geographic rating area from the geographic rating area preference. Once the geographic rating area is derived, this algorithm stores the geographic rating area for the membership. The characteristic type specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference is used to store geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

## C1-MEMRLSUBT

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, this algorithm derives the member relationship for each member person of the membership from a member relationship structure. It considers the member relationship structure which is defined as a characteristic for the policy plan. While deriving the member relationship structure of the policy plan, it considers the characteristic which is defined using a characteristic type specified in the **Member Relationship Structure Characteristic Type** attribute of a member relationship and subscription tier preference. It considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLNG** feature configuration.

The member relationship structure helps to determine how each member person is related to the main subscriber of the membership. A member relationship is derived for a member person depending on the following:

- Whether the member person is a self, spouse, or dependent
- Number of spouses, dependents, and young adults in the membership

While determining the member relationship for a member person, this algorithm derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- Member Relationship Derivation Date

- New Born Gift Days
- New Born Gift Days Applicability
- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

It then derives these characteristics from the policy plan. Based on these characteristics defined for the policy plan, it derives the member relationship for each member person from the member relationship structure. If the **Member Relationship Derivation Date** characteristic type is set to **Enrollment Date**, this algorithm derives the member relationship for each member person of the membership in order of the member start date. However, if the **Member Relationship Derivation Date** characteristic type is set to **Date of Birth**, this algorithm derives the member relationship for each member person of the membership in order of the date of birth.

Once the member relationship is derived for a member person, this algorithm stores the member relationship for the member person. The characteristic type specified in the **Member Relationship Characteristic Type** attribute of the member relationship and subscription tier preference is used to store member relationship for the member person. On adding a membership to a policy plan or on adding a member person to a membership, the effective date of the member relationship characteristic is set to the member person's start date. If a new born is added to the membership, the effective date of the new born's member relationship characteristic is calculated considering the gift days if applicable.

If a member person is end dated, this algorithm derives the member relationship of all other member persons once again. If the member relationship for a member person is different, it creates a new characteristic to store the member relationship for the member person. The effective date of the new characteristic is set to the member person's end date + 1. For example, if the end date of a member person is set to 06-30-2021, then the effective date of the new characteristic for the remaining member persons is set to 07-01-2021. Similarly, if a member person is inactivated, this algorithm derives the member relationship of all other member persons once again. In this case, if the member relationship for a member person is different, it updates the existing member relationship characteristic of the member person and does not create a new member relationship characteristic for the member person.

## C1-MPCONCREA

This algorithm is invoked when the following conditions are met:

- A member person who is financially responsible for the membership is added to the membership
- One or more accounts already exist for the member person in the system

If the above conditions are met, this algorithm derives the membership in which the member person is added. It then derives the policy plan to which the membership belongs. It creates contracts for each account of the member person in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates a contract using a distinct contract type which is associated with each price item.

Let us assume that PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, this algorithm will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, this algorithm will create two distinct contracts - C1 using CT1 and C2 using CT2.

If multiple pricing rule types are associated with the policy plan and each pricing rule type contains multiple price items, it creates a contract using a distinct contract type which is associated with each price item on each pricing rule type.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

**Note:**

The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

**C1-MEMSTPRE**

Once the status of the main subscriber is changed to **Inactive**, this algorithm changes the status of the membership to the value specified in the **Membership Inactive Status** option type of the **C1-ASOBLLNG** feature configuration. In addition, it does not allow you to add a member person in the **Inactive** status to a membership.

**C1-VALMEMBO**

This algorithm validates a membership. It checks the following:

- Whether the membership end date is not earlier than the membership start date.
- Whether the membership start date is not earlier than the policy plan start date or later than policy plan end date.
- Whether the membership end date is not earlier than the policy plan start date or later than policy plan end date.
- Whether the policy plan for which you want to define the membership is specified.
- Whether the person who is the main subscriber is added to the membership.
- Whether the relationship type is specified while adding a person to the membership.

**C1-MEMINACT**

This algorithm changes the status of the member person to the value specified in the **Membership Person Inactive Status** option type of the **C1-ASOBLLNG** feature configuration. It also does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

**Late Setup Notification**

Oracle Revenue Management and Billing enables you to create a To Do notification when the details to include a member person in a group or individual membership is received in ORMB beyond the late setup threshold days from the member person start date. This notification can help the billing analyst to take appropriate actions, such as giving premium waiver to the member person if required.

To enable this feature, you need to set the following option types in the **C1-ASOBLLNG** feature configuration:

- **Monitor Late Setup** – Used to indicate whether you want to enable the late setup notification feature. The valid values are – **Y** and **N**. By default, the value is set to **N**.
- **Late Setup Threshold in Days** – Used to indicate the number of threshold days for late setup notification. This option type is required when the **Monitor Late Setup** option type is set to **Y**. The value must be greater than zero.

For example, if the system receives the information to add a member person with the start date as **01-15-2021** to an individual membership on **02-15-2021** and the late setup threshold days in the **C1-ASOBLNG** feature configuration is set to **15**. In this case, the number of days between the member person start date and member person creation date is greater than late setup threshold days, and therefore a To Do is created using the To Do type which is specified in the **C1-LATESET** algorithm attached to the group or individual membership business object, respectively.

To implement this business requirement, the system stores the member person creation date (which was not done in the previous releases) while adding a member person to a group or individual membership. A new batch named **C1-LSUB** is introduced in this release. It derives the creation date for all member persons in the existing group and individual memberships and stamps it against the corresponding record in the **CRE\_DTTM** column of the **CI\_MEMBERSHIP\_PER** table. This batch must be executed only once after upgrading to Oracle Revenue Management and Billing Version 3.1.0.0.0. For more information, refer to *Oracle Revenue Management and Billing Version 3.1.0.0.0 Upgrade Guide*.

## Policy (Used for Searching)

The **Policy** screen allows you to search for a policy using various search criteria. It also allows you to define a policy. It contains the following zone:

- [Search Policy](#) on page 351

Through this screen, you can navigate to the following screen:

- [Policy \(Used for Viewing\)](#) on page 364

## Search Policy

The **Search Policy** zone allows you to search for a policy using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for a policy using the policy or person details. The valid values are:</p> <ul style="list-style-type: none"> <li>• Policy Date/Policy Type/Status</li> <li>• Source System/Policy Number/Description</li> <li>• Person Name/Person Identifier</li> <li>• Policy Characteristics</li> </ul> <p><b>Note:</b> By default, the <b>Policy Date/Policy Type/Status</b> option is selected.</p>	Yes
Policy Type	Used to search policies which are created using a particular policy type.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.</p>	
Start Date	<p>Used to search policies which are effective from a particular date.</p> <p><b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.</p>	No
Status	<p>Used to search policies with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul> <p><b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.</p>	No
End Date	<p>Used to search policies which are effective till a particular date.</p> <p><b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.</p>	No
Source System	<p>Used to search policies which originated from a particular external system.</p> <p><b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Policy Number	Used to search a policy with a particular policy number.	No
	<b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.	
Description	Used to search policies with a particular description.	No
	<b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.	
Person Name	Used to search policies to which a particular person is associated.	No
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search policies to which a person is associated.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Characteristic Type	Used to search policies for which a particular characteristic type is defined.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Policy Characteristics</b> option is selected from the <b>Search By</b> list.  The list includes only those characteristic types where the characteristic entity is set to <b>Policy</b> .	<b>Note:</b> This field is required when you are searching for a policy using a characteristic.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to search policies with a particular characteristic value.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This field appears when the characteristic type is selected.</p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required when you are searching for a policy using a characteristic.</p>

**Note:** You must specify at least one search criterion while searching for a policy.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	Displays additional information about the policy.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Source System	Indicates the external system from where the policy is originated.
Description	Displays the description of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Status	<p>Indicates the status of the policy. If the policy is created using the <b>C1-POLICY</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Pending Cancellation</li> <li>• Canceled</li> <li>• Pending Reinstatement</li> </ul>

Column Name	Column Description						
	<ul style="list-style-type: none"> <li>• Reinstated</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> <p>However, if the policy is created using the <b>C1-ASOPolicy</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>						
Main Customer	<p>This column displays different data depending on whether you search for a policy using the policy or person details. The following table describes this column:</p> <table border="1" data-bbox="889 772 1464 1745"> <thead> <tr> <th data-bbox="889 772 1175 856">If you search for a policy using...</th> <th data-bbox="1179 772 1464 856">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="889 861 1175 1423">                     The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option                 </td> <td data-bbox="1179 861 1464 1423">                     The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.                     <div data-bbox="1179 1199 1464 1409" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.                     </div> </td> </tr> <tr> <td data-bbox="889 1428 1175 1745">                     The <b>Person Name/Person Identifier</b> option                 </td> <td data-bbox="1179 1428 1464 1745">                     The <b>Main Customer</b> column indicates whether the person is the main customer of the policy. ## Searching for a Policy

### Prerequisites

To search for a policy, you should have:

- Policy types and person identifier types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### Procedure

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Policy**.  
A sub-menu appears.
3. Click the **Search** option from the **Policy** sub-menu.  
The **Policy** screen appears.
4. Enter the search criteria in the **Search Policy** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 5. Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

## Viewing the Policy Details

### Procedure

To view the details of a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to view.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the details of the policy in the **Policy** zone.

## Defining a Policy

Oracle Revenue Management and Billing enables you to define a policy for the fully-insured and self-funded health insurance business. You can define a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. However, you can define a self-funded policy using a policy type where the policy category is set to **Self-Funded**.

**Note:** At present, the **Fully-Insured Individual** policy category is not supported in the system.

### Prerequisites

To define a policy, you should have:

- Policy types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Note:** This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT\_ADM\_OPT\_FLG** lookup field

**Note:** This prerequisite is applicable when you want to define a self-funded policy.

### **Procedure**

To define a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Policy**.  
A sub-menu appears.
3. Click the **Add** option from the **Policy** sub-menu.

The **Select Policy Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to indicate the policy type using which you want to create a policy.  <b>Note:</b> If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to <b>Self-Funded</b> .	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy** screen.

4. Select the required policy type from the respective field.
5. Click **OK**.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the external system from where the policy is originated.	Yes
	<b>Note:</b> This field appears when you are defining a policy using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	
Start Date	Used to specify the date from when the policy is effective.	Yes
	<b>Note:</b> The policy start date cannot be later than the policy end date.	
End Date	Used to specify the date till when the policy is effective.	Yes
	<b>Note:</b> The policy end date cannot be earlier than the policy start date.	
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No
	<p><b>Note:</b></p> <p>The runout end date cannot be earlier than or equal to the policy end date.</p> <p>This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	
Advance Level Funding Eligibility	<p>Indicates whether the self-funded policy is eligible for advance billing feature of level funding.</p> <p><b>Note:</b></p> <p>This is a read-only field. By default, the value is set to <b>No</b>. You can edit the advance level funding eligibility only through a health care inbound message.</p> <p>This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	Not applicable

- Enter the required details in the **Main** section.
- Associate the required persons with the policy.

**Note:** While defining a policy, you must associate a person who is the main customer of the policy.

- Define the characteristics for the policy, if required.
- Click **Save**.

The policy is defined and its status is set to **Pending**.

How to associate a person with a policy	<a href="#">Associating a Person with a Policy</a> on page 360
How to define a characteristic for a policy	<a href="#">Defining a Characteristic for a Policy</a> on page 362

## Associating a Person with a Policy

### Prerequisites

To associate a person with a policy, you should have:

- Required persons defined in the application
- Required policy person roles defined in the application

### **Procedure**

To associate a person with a policy:

1. Ensure that the **Persons** section is expanded when you are defining or editing a policy.

The **Persons** section contains the following fields in a grid:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Person	Used to indicate the person that you want to associate with the policy.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.  On specifying the person ID, the person name appears corresponding to the <b>Person</b> field.	Yes
Sequence	Used to specify the sequence number for the associated person.	Yes
Policy Person Role	Used to indicate the role of a person in the policy.	Yes
Main Customer	Used to indicate whether the person is the main customer of the policy.  <b>Note:</b> At a time, only one person can be the main customer of the policy.	Yes (Conditional)  <b>Note:</b> You must select this option while associating a person who is the main customer of the policy.
Start Date	Used to specify the date from when the person is associated with the policy.  <b>Note:</b> The start date cannot be later than the end date.  The start date cannot be earlier than the policy start date and later than the policy end date.	Yes
End Date	Used to specify the date till when the person is associated with the policy.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the policy start date and later than the policy end date. This validation is done when the policy is transition to the status which is not specified in the <b>Skip Status for Policy Person End Date Validation</b> parameter of the <b>C1-POLBOVAL</b> algorithm. For example, if you set the <b>Skip Status for Policy Person End Date Validation</b> parameter of the <b>C1-POLBOVAL</b> algorithm to <b>TERMINATED</b>, the system will not perform this validation when the status of the policy is changed to <b>Terminated</b>.</p>	

2. Enter the required details in the **Persons** section.

**Note:** While associating the persons with a policy, you must always ensure that one person is the main customer of the policy.

3. If you want to associate more than one person with the policy, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to dissociate a person from the policy, click the **Delete (🗑)** icon corresponding to the person.

4. Click **Save**.

The persons are associated with the policy.

## **Defining a Characteristic for a Policy**

### **Prerequisites**

To define a characteristic for a policy, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### **Procedure**

To define a characteristic for a policy:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a policy.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the policy.	Yes (Conditional)
	<b>Note:</b> The effective date cannot be earlier than the policy start date and later than the policy end date.	<b>Note:</b> This field is required when you are defining a characteristic for the policy.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Policy</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the policy.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<b>Note:</b> This field is required when you are defining a characteristic for the policy.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the policy, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the policy, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the policy.

## Policy (Used for Viewing)

---

The **Policy** screen allows you to:

- View the details of a fully-insured group or self-funded policy
- Edit the details of a fully-insured group or self-funded policy
- Activate a fully-insured group or self-funded policy
- Add or edit plans in a fully-insured group policy
- Add memberships to a fully-insured group policy plan
- Initiate the termination process for a fully-insured group policy
- Terminate a fully-insured group policy
- Initiate the cancellation process for a fully-insured group policy
- Cancel a fully-insured group policy
- Initiate the reinstatement process for a fully-insured group policy
- Reinstatement a fully-insured group policy
- View the log of a fully-insured group or self-funded policy
- Add a log entry for a fully-insured group or self-funded policy

It consists of the following tabs:

- [Policy - Main](#) on page 364
- [Policy - Plan](#) on page 372
- [Policy - Log](#) on page 375

### Policy - Main

The **Main** tab displays information about the policy. It contains the following zones:

- [Policy](#) on page 364
- [Policy Characteristics](#) on page 372

### Policy

The **Policy** zone displays the details of the fully-insured group or self-funded policy. It contains the following sections:

- **Main** - Displays basic information about the policy. It contains the following fields:

Field Name	Field Description
Base Policy Information	Displays information about the base policy.
	<b>Note:</b> This field appears when you are viewing the details of a renewed policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .
Policy Information	Displays information about the policy.
Policy Type	Indicates the policy type using which the policy is created.

Field Name	Field Description
	<p><b>Note:</b> It has a link. On clicking the link, the <b>Policy Type</b> screen appears where you can view the details of the respective policy type.</p>
Status	<p>Indicates the status of the policy. If the policy is created using the <b>C1-POLICY</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Pending Cancellation</li> <li>• Canceled</li> <li>• Pending Reinstatement</li> <li>• Reinstated</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> <p>However, if the policy is created using the <b>C1-ASOPolicy</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>
Status Reason	<p>Indicates the reason why the policy is terminated.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective termination reason.</p> <p>This field appears when you are viewing the details of a terminated or reinstated policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b>.</p>
Policy Number	Displays the policy number.
Description	Displays the description of the policy.
Source System	Indicates the external system from where the policy is originated.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Renewal Date	Displays the date when the policy is renewed.

Field Name	Field Description																					
	<p><b>Note:</b> This field appears when you are viewing the details of a policy which is renewed.</p>																					
<p>Paid Through Date</p>	<p>Indicates the term end date of the last fully or partially paid term. The system considers the term to be fully paid when the threshold limit is met.</p> <p><b>Note:</b> This field appears when the following conditions are met:</p> <ul style="list-style-type: none"> <li>• When you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b>.</li> <li>• When the paid through date is calculated at the policy level.</li> </ul> <p>The paid through date is calculated while freezing or canceling a payment or adjustment depending on whether the required algorithm is attached to the respective system event:</p> <table border="1" data-bbox="889 957 1463 1339"> <thead> <tr> <th>Entity</th> <th>System Event</th> <th>Algorithm</th> </tr> </thead> <tbody> <tr> <td>Customer Class</td> <td>Payment Freeze</td> <td>C1-PSPTDCAL</td> </tr> <tr> <td>Customer Class</td> <td>Payment Cancellation</td> <td>C1-PXPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Freeze</td> <td>C1-ADPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Cancellation</td> <td>C1-AXPTDCAL</td> </tr> </tbody> </table> <p>The following table indicates when the paid through date is calculated at the policy and/or membership level:</p> <table border="1" data-bbox="889 1476 1463 1921"> <thead> <tr> <th>If the Paid Through Date Calculation Level parameter is set to...</th> <th>If the following characteristics are defined for the billable charge or adjustment...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>P</td> <td>C1-POLID</td> <td>Paid through date is calculated at the policy level</td> </tr> </tbody> </table>	Entity	System Event	Algorithm	Customer Class	Payment Freeze	C1-PSPTDCAL	Customer Class	Payment Cancellation	C1-PXPTDCAL	Adjustment Type	Adjustment Freeze	C1-ADPTDCAL	Adjustment Type	Adjustment Cancellation	C1-AXPTDCAL	If the Paid Through Date Calculation Level parameter is set to... 	M	C1-MPID	Paid through date is calculated at the membership level
	M	C1-POLID and C1-MPID	Paid through date is calculated at the membership level
	P, M	C1-POLID	Paid through date is calculated at the policy level
	P, M	C1-MPID	Paid through date is calculated at both the policy and membership levels

Field Name	Field Description		
	<p><b>If the Paid Through Date Calculation Level parameter is set to...</b></p>	<p><b>If the following characteristics are defined for the billable charge or adjustment...</b></p>	<p><b>Then...</b></p>
	P, M	C1-POLID and C1-MPID	Paid through date is calculated at both the policy and membership levels
Runout End Date	<p>Displays the date when the runout period of the self-funded policy ends.</p> <p><b>Note:</b> This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p>		
Runout Administration Fees	<p>Indicates whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <p><b>Note:</b> This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p>		
Advance Level Funding Eligibility	<p>Indicates whether the self-funded policy is eligible for advance billing feature of level funding.</p> <p><b>Note:</b> This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p>		

- **Persons** - Lists the persons which are associated with the policy. It contains the following columns:

Column Name	Column Description
Person Information	<p>Indicates the person who is associated with the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p>

Column Name	Column Description
Sequence	Displays the sequence number of the associated person.
Policy Person Role	Indicates the role of the person in the policy.
Main Customer	Indicates whether the person is the main customer of the policy.
Start Date	Displays the date from when the person is associated with the policy.
End Date	Displays the date till when the person is associated with the policy.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description						
Edit	<p>Used to edit the details of the fully-insured group or self-funded policy.</p> <p><b>Note:</b> The <b>Edit</b> button appears only when a policy of the respective category is in either of the following status:</p> <table border="1"> <thead> <tr> <th>Policy Category</th> <th>Status</th> </tr> </thead> <tbody> <tr> <td>Fully-Insured Group or Fully-Insured Individual</td> <td> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> </td> </tr> <tr> <td>Self-Funded</td> <td> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul> </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>	Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>
Policy Category	Status						
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>						
Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>						
Activate	Used to activate the fully-insured group or self-funded policy.						

Button Name	Button Description						
	<p><b>Note:</b></p> <p>The <b>Activate</b> button appears when a policy of the respective category is in either of the following status:</p> <table border="1" data-bbox="889 344 1463 606"> <thead> <tr> <th data-bbox="889 344 1175 396">Policy Category</th> <th data-bbox="1180 344 1463 396">Status</th> </tr> </thead> <tbody> <tr> <td data-bbox="889 396 1175 541">Fully-Insured Group or Fully-Insured Individual</td> <td data-bbox="1180 396 1463 541"> <ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul> </td> </tr> <tr> <td data-bbox="889 541 1175 606">Self-Funded</td> <td data-bbox="1180 541 1463 606"> <ul style="list-style-type: none"> <li>• Pending</li> </ul> </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>	Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>
Policy Category	Status						
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>						
Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>						
Initiate Cancellation	<p>Used to initiate the cancellation process for the fully-insured group policy.</p> <p><b>Note:</b> The <b>Initiate Cancellation</b> button appears when the fully-insured group policy is in the <b>In Force/Active</b> status.</p>						
Cancel	<p>Used to cancel the fully-insured group policy.</p> <p><b>Note:</b> The <b>Cancel</b> button appears when the fully-insured group policy is in the <b>Pending Cancellation</b> status.</p>						
Initiate Termination	<p>Used to initiate the termination process for the fully-insured group policy.</p> <p><b>Note:</b> The <b>Initiate Termination</b> button appears when the fully-insured group policy is in the <b>In Force/Active</b> status.</p>						
Terminate	<p>Used to terminate the fully-insured group policy.</p> <p><b>Note:</b> The <b>Terminate</b> button appears when the fully-insured group policy is in the <b>In Force/Active, Pending Reinstatement, or Pending Termination</b> status.</p>						
Initiate Reinstatement	<p>Used to initiate the reinstatement process for the terminated policy.</p> <p><b>Note:</b> The <b>Initiate Reinstatement</b> button appears when the fully-insured group policy is in the <b>Terminated</b> status.</p>						
Reinstate	<p>Used to reinstate the terminated policy.</p> <p><b>Note:</b> The <b>Reinstate</b> button appears when the fully-insured group policy is in the <b>Pending Reinstatement or Terminated</b> status.</p>						

Button Name	Button Description
Runout	Used to transition the self-funded policy to the <b>Runout</b> status.  <b>Note:</b> The <b>Runout</b> button appears when the self-funded policy is in the <b>In Force/Active</b> status. You cannot transition a self-funded policy to the <b>Runout</b> status when: <ul style="list-style-type: none"> <li>• The self-funded policy is renewed.</li> <li>• The runout end date is not specified.</li> <li>• The policy end date is earlier than the system date.</li> </ul>

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the policy is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the policy status is updated.
Create Date/Time	Displays the date and time when the policy is created.

- **Termination Information** - Displays the termination details of the fully-insured group policy. It appears when the policy is in the **Pending Termination** status. It contains the following fields:

Field Name	Field Description
Terminate Date	Displays the date when you want to terminate the policy.
Terminate Reason	Indicates the reason why the termination process is initiated for the policy.  <b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective termination reason.

- **Reinstate Information** - Displays the reinstatement details of the terminated policy. It appears when the policy is in the **Pending Reinstatement** status. It contains the following fields:

Field Name	Field Description
Reinstate Reason	Indicates the reason why you want to reinstate the fully-insured group policy.

Field Name	Field Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective reinstatement reason.

### Policy Characteristics

The **Policy Characteristics** zone lists the characteristics of the fully-insured group or self-funded policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

### Policy - Plan

The **Plan** tab lists the plans defined for the policy and memberships defined for each policy plan. It contains the following zones:

- [Plans](#) on page 373
- [Memberships](#) on page 374

## Plans

The **Plans** zone lists the plans which are defined in the policy. It contains the following columns:

Column Name	Column Description
Plan Information	Displays information about the policy plan. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Price Item Information	Indicates the price item to which the policy plan is directly associated.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Edit	On clicking the <b>Edit</b>  icon, the <b>Plan</b> screen appears where you can edit the details of the policy plan.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new policy plan by clicking the **Add** link in the upper-right corner of this zone. On clicking the **Broadcast**  icon corresponding to a policy plan, the **Memberships** zone appears.

**Note:** Ideally, you define plans in a policy which is created using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**.

You can filter the list using various search criteria (such as, **Price Item**, **Plan Number**, and **Effective From**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper-right corner of this zone.

## Memberships

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership. <b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Terminated</li> </ul>
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> <li>• Retiree</li> </ul>
Benefits	On clicking the <b>Benefits</b> (  ) icon, the <b>Benefit</b> screen appears where you can view the Medicare benefits of the member persons who belong to the membership. <b>Note:</b> The <b>Benefits</b> icon appears when a Medicare benefit is defined for a member person who belongs to the membership.
Membership ID	Displays the membership ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062

## Activating a Policy

### Procedure

To activate a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to activate.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Activate** button in the **Policy** zone.

The status of the policy is changed to **In Force/Active**.

#### **Note:**

The **Activate** button appears only when a policy of the respective category is in either of the following status:

<b>Policy Category</b>	<b>Status</b>
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>
Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>

## Editing a Policy

### Prerequisites

To edit a policy, you should have:

- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Note:** This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT\_ADM\_OPT\_FLG** lookup field

**Note:** This prerequisite is applicable when you want to define a self-funded policy.

### Procedure

To edit a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Policy** zone.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Displays information about the policy.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined.	Not applicable
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>	Not applicable
	<b>Note:</b> This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .	
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	<b>Note:</b> This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	
Start Date	Used to specify the date from when the policy is effective.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The policy start date cannot be later than the policy end date.</p> <p>You cannot change the start date of a self-funded policy when it is in the <b>In Force/Active, Runout, or Post Runout</b> status.</p>	
End Date	<p>Used to specify the date till when the policy is effective.</p> <p><b>Note:</b></p> <p>The policy end date cannot be earlier than the policy start date.</p> <p>You cannot change the end date when the self-funded policy is in the <b>Runout</b> status.</p> <p>You cannot set the end date of a self-funded policy to a date which is later than or equal to the start date of a pricing rule which is defined for the <b>Runout</b> status.</p> <p>You cannot change the end date when the policy is renewed.</p>	Yes
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p> <p>The runout end date cannot be earlier than or equal to the policy end date.</p> <p>The runout end date cannot be earlier than or equal to the system date when the policy is in the <b>Runout</b> status.</p> <p>You cannot remove the runout end date when the policy is in the <b>Runout</b> or <b>Post Runout</b> status.</p> <p>You cannot set the runout end date to a date which is later than or equal to the start date of a pricing rule which is defined for the <b>Post Runout</b> status.</p> <p>You cannot set the runout end date to a date which is earlier than the end date of a pricing rule which is defined for the <b>Runout</b> status.</p>	
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <p><b>Note:</b></p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	No

**Note:**

The **Edit** button appears when a policy of the respective category is in either of the following status:

Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>
Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>

5. Modify the required details in the **Main** section.
6. Associate the persons with the policy, if required.

**Note:** While editing a policy, you must ensure that one person is associated as the main customer of the policy.

7. Define, edit, or remove characteristics of the policy, if required.
8. Click **Save**.

The changes made to the policy are saved.

## Initiating the Termination Process for a Fully-Insured Group Policy

### Prerequisites

To initiate the termination process for a fully-insured group policy, you should have:

- Reasons defined for the **Terminated** status of the **C1-POLICY** business object in the **Status Reason** screen

### Procedure

To initiate the termination process for a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to initiate the termination process.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Initiate Termination** button in the **Policy** zone.

The **Termination Information** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Terminate Reason	Used to indicate the reason why you want to initiate the termination process for the fully-insured group policy.	Yes
Terminate Date	Used to specify the date when you want to terminate the policy.	Yes
	<b>Note:</b> The terminate date cannot be earlier than the policy start date or later than the policy end date.	

**Note:** The **Initiate Termination** button appears when the fully-insured group policy is in the **In Force/Active** status.

5. Enter the required details in the **Termination Information** window.
6. Click **Save**.

The status of the fully-insured group policy is changed to **Pending Termination**.

### **Related Topics**

## **Terminating a Fully-Insured Group Policy**

### **Prerequisites**

To terminate a fully-insured group policy, you should have:

- Reasons defined for the **Terminated** status of the **C1-POLICY** business object in the **Status Reason** screen

### **Procedure**

To terminate a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to terminate.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Terminate** button in the **Policy** zone.

The **Status Reason** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to terminate the fully-insured group policy.	Yes

**Note:** The **Terminate** button appears when the fully-insured group policy is in the **In Force/Active, Pending Reinstatement**, or **Pending Termination** status.

- Select the terminate reason from the respective field.
- Click **Save**.

The status of the policy is changed to **Terminated**.

**Note:** You cannot terminate a fully-insured group policy which is in the **Pending Termination** status when the terminate date is earlier than the system date.

## Initiating the Reinstatement Process for a Fully-Insured Group Policy

### Prerequisites

To initiate the reinstatement process for a fully-insured group policy, you should have:

- Reasons defined for the **Reinstated** status of the **C1-POLICY** business object in the **Status Reason** screen

### Procedure

To initiate the reinstatement process for a fully-insured group policy:

- Search for the fully-insured group policy in the **Policy** screen.
- In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to initiate the reinstatement process.

The **Policy** screen appears.

- Ensure that the **Main** tab is selected.
- Click the **Initiate Reinstatement** button in the **Policy** zone.

The **Reinstatement Information** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Reinstatement Reason	Used to indicate the reason why you want to initiate the reinstatement process for the fully-insured group policy.	Yes

**Note:** The **Initiate Reinstatement** button appears when the fully-insured group policy is in the **Terminated** status.

5. Select the reinstate reason from the respective field.
6. Click **Save**.

The status of the fully-insured group policy is changed to **Pending Reinstatement**.

## Reinstating a Fully-Insured Group Policy

### Prerequisites

To reinstate a fully-insured group policy, you should have:

- Reasons defined for the **Reinstated** status of the **C1-POLICY** business object in the **Status Reason** screen

### Procedure

To reinstate a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to reinstate.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Reinstate** button in the **Policy** zone.

The **Status Reason** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reinstate the fully-insured group policy.	Yes

**Note:** The **Reinstate** button appears when the fully-insured group policy is in the **Pending Reinstatement** or **Terminated** status.

5. Select the reinstatement reason from the respective field.
6. Click **Save**.

The status of the policy is changed to **Reinstated**.

## Defining a Plan for a Fully-Insured Group Policy

### Prerequisites

To define a plan for a fully-insured group policy, you should have:

- Policy plan business objects defined in the application
- Price items defined in the application

### Procedure

To define a plan for a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to define a plan.

The **Policy** screen appears.

3. Click the **Plan** tab.

The **Plan** tab appears.

4. Click the **Add** link in the upper right corner of the **Plans** zone.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Plan Business Object	Used to indicate the business object using which you want to create a plan for a fully-insured group policy.	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** link in the upper right corner of the **Policy Plan** zone in the **Policy Plan** screen.

**Note:** The **Select Business Object** screen appears when there are multiple policy plan business objects defined in the application. If there is only one policy plan business object defined in the application, the **Plan** screen appears.

5. Select the required policy plan business object from the respective field.
6. Click **OK**.

The **Policy Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the policy plan.
- **Proration Rules** - Used to define the proration rules for the policy plan.
- **Characteristics** - Used to define the characteristics for the policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Indicates the fully-insured group policy for which you want to create the policy plan.	Not applicable
Price Item	Used to indicate the price item which you want to directly associate with the policy plan.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.  On specifying the price item, the description of the price item appears corresponding to the <b>Price Item</b> field.	Yes (Conditional)  <b>Note:</b> You must either specify the price item or associate at least one pricing rule type with the policy plan.
Plan Number	Used to specify the plan number.	Yes
Plan Name	Used to specify the description for the policy plan.	No
Benefit Type	Used to indicate the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Medicare Affiliated</li> </ul>	
Start Date	<p>Used to specify the date from when the policy plan is effective.</p> <p><b>Note:</b> The policy plan start date cannot be earlier than the policy start date and later than the policy end date. The policy plan start date cannot be later than the policy plan end date.</p>	Yes
End Date	<p>Used to specify the date till when the policy plan is effective.</p> <p><b>Note:</b> The policy plan end date cannot be earlier than the policy start date and later than the policy end date. The policy plan end date cannot be earlier than the policy plan start date.</p>	No

- Enter the required details in the **Main** section.
- Associate the pricing rule types with the fully-insured group policy plan, if required.

**Note:** You must associate at least one pricing rule type with the policy plan when the price item is not specified in the fully-insured group policy plan.

- Define the proration rules for the fully-insured group policy plan, if required.
- Define the characteristics for the fully-insured group policy plan, if required.
- Click **Save**.

The plan is defined for the fully-insured group policy.

## Defining a Proration Rule for a Fully-Insured Group Policy Plan

### Procedure

To define a proration rule for a fully-insured group policy plan:

1. Ensure that the **Proration Rules** section is expanded when you are defining or editing a fully-insured group policy plan.

The **Proration Rules** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the proration rule is effective for the policy plan.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The system considers the latest proration rule and not the effective proration rule while prorating the membership premium.</p> <p>The effective date cannot be earlier than the plan start date and later than the plan end date.</p>	<p><b>Note:</b> This field is required when you are defining a proration rule for the policy plan.</p>
Proration Event Type	Used to indicate the event when you want to prorate the membership premium. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>• <b>Enrollment</b> – Used when you want to prorate the membership premium on enrolling a member person.</li> <li>• <b>Termination</b> - Used when you want to prorate the membership premium on terminating a member person.</li> <li>• <b>New Born</b> - Used when you want to prorate the membership premium on enrolling a new born.</li> <li>• <b>Same Month Enrollment and Termination</b> - Used when you want to prorate the membership premium on enrolling and terminating a member person in the same month.</li> </ul>	<p><b>Note:</b> This field is required when you are defining a proration rule for the policy plan.</p>

Field Name	Field Description	Mandatory (Yes or No)
Proration Type	<p>Used to indicate how you want to prorate the membership premium. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Daily</b> – Used when you want to prorate the membership premium from the day the proration event has occurred.</li> <li>• <b>Mid-Month</b> – Used when you want to prorate the membership premium based on the proration date. The system calculates the proration date using the following formula:  <math display="block">\text{Bill Period Start Date} + \text{Specified Number of Days}</math> <p>For example, if the bill period start date is 1<sup>st</sup> of every month and number of days is 15, then the proration date would be 15<sup>th</sup> of every month. If a member person is enrolled to the membership on or before the proration date, the system will charge the premium for the member person. However, if a member person is enrolled to the membership after the proration date, the system will not charge the premium for the member person. And, if a member person is terminated from the membership on or after the proration date, the system will charge the premium for the member person. However, if a member person is terminated from the membership before the proration date, the system will not charge the premium for the member person.</p> </li> <li>• <b>Full Month</b> – Used when the premium for a member person should be charged when the member person is enrolled or terminated on the coverage start date or coverage end</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are defining a proration rule for the policy plan.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<p>date, respectively. If a member person is enrolled or terminated within the coverage period, the system will not charge the premium for the member person.</p>	
	<ul style="list-style-type: none"> <li>• <b>Waiver</b> – Used when the premium for a member person should be waived off completely for the month when the member person is enrolled or terminated from the membership.</li> <li>• <b>Coverage Days</b> – Used when you want to prorate the premium for a member person based on the coverage days. If a member person is covered in the membership for a period less than the specified number of days, the system will not charge the premium for the member person. However, if a member person is covered in the membership for a period equal to or more than the specified number of days, the system will charge the premium for the member person.</li> </ul> <div data-bbox="748 1262 1073 1430" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You can use this proration type when the proration event is set to <b>Same Month Enrollment and Termination.</b></p> </div>	
	<ul style="list-style-type: none"> <li>• <b>Enrollment</b> – Used when you want to prorate the premium for a member person using the proration type of the enrollment event.</li> </ul> <div data-bbox="748 1650 1073 1818" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You can use this proration type when the proration event is set to <b>Same Month Enrollment and Termination.</b></p> </div> <ul style="list-style-type: none"> <li>• <b>Termination</b> – Used when you want to prorate the premium for a member</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)
	person using the proration type of the termination event. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> You can use this proration type only when the proration event is set to <b>Same Month Enrollment and Termination</b>.         </div>	
Number of Days	Used to specify the number of days to determine the cutoff date.	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> This field is required when the proration type is set to <b>Mid-Month</b> or <b>Coverage Days</b>.         </div>

2. Enter the required details in the **Proration Rules** section.
3. If you want to define more than one proration rule for the fully-insured group policy plan, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a proration rule of the fully-insured group policy plan, click the **Delete** (🗑️) icon corresponding to the proration rule.

4. Click **Save**.

The proration rules are defined for the fully-insured group policy plan.

## Associating a Pricing Rule Type with a Fully-Insured Group Policy Plan

You can define a pricing rule using a pricing rule type for a fully-insured group policy plan when the pricing rule type is associated with the fully-insured group policy plan. You can associate a pricing rule type with a fully-insured group policy plan either from the user interface or through a health care inbound message.

#### Prerequisites

To associate a pricing rule type with a fully-insured group policy plan, you should have:

- Pricing rule types defined in the application (where the pricing rule type category is set to **Age Based**, **Tier Based**, or **Pass-Through Billable Charge**)

#### Procedure

To associate a pricing rule type with a fully-insured group policy plan:

1. Ensure that the **Pricing Rule Types** section is expanded when you are defining or editing a fully-insured group policy plan.

The **Pricing Rule Types** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Pricing Rule Type	Used to indicate the pricing rule type that you want to associate with the fully-insured group policy plan.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Pricing Rule Type Search</b> window appears.</p> <p>On specifying the pricing rule type, the description of the pricing rule type appears corresponding to the <b>Pricing Rule Type</b> field.</p> <p>Here, you can only specify a pricing rule type where the pricing rule type category is set to <b>Age Based</b>, <b>Tier Based</b>, or <b>Pass-Through Billable Charge</b>.</p>	<p><b>Note:</b> You must either specify the price item or associate at least one pricing rule type with the policy plan.</p>

- Enter the required details in the **Pricing Rule Types** section.
- If you want to associate more than one pricing rule type with the fully-insured group policy plan, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to dissociate a pricing rule type from the fully-insured group policy plan, click the **Delete** (🗑️) icon corresponding to the pricing rule type.

- Click **Save**.

The pricing rule types are associated with the fully-insured group policy plan.

## Defining a Characteristic for a Fully-Insured Group Policy Plan

### Prerequisites

To define a characteristic for a fully-insured group policy plan, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**).

### Procedure

To define a characteristic for a fully-insured group policy plan:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a fully-insured group policy plan.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the fully-insured group policy plan.	Yes (Conditional)
	<b>Note:</b> The effective date cannot be earlier than the policy plan start date and later than the policy plan end date.	<b>Note:</b> This field is required when you are defining a characteristic for the fully-insured group policy plan.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Policy Plan</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the fully-insured group policy plan.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<b>Note:</b> This field is required when you are defining a characteristic for the fully-insured group policy plan.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the fully-insured group policy plan, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the fully-insured group policy plan, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the fully-insured group policy plan.

## Editing a Plan of a Fully-Insured Group Policy

### Prerequisites

To edit a plan of a fully-insured group policy, you should have:

- Price items defined in the application

### Procedure

To edit a plan of a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

3. Click the **Plan** tab.

The **Plan** tab appears.

4. In the **Plans** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the policy plan whose details you want to edit.

The **Policy Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the fully-insured group policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the fully-insured group policy plan.
- **Proration Rules** - Used to define the proration rules for the fully-insured group policy plan.
- **Characteristics** - Used to define the characteristics for the fully-insured group policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Plan Information	Displays information about the fully-insured group policy plan.	Not applicable
Policy Information	Indicates the fully-insured group policy for which the policy plan is created.	Not applicable
Price Item	Used to indicate the price item which you want to directly associate with the fully-insured group policy plan.	Yes (Conditional)
		<b>Note:</b> You must either specify the price item or associate at least one pricing rule type with the policy plan.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.</p> <p>On specifying the price item, the description of the price item appears corresponding to the <b>Price Item</b> field.</p>	
Plan Number	Used to specify the plan number.	Yes
Plan Name	Used to specify the description for the fully-insured group policy plan.	No
Benefit Type	<p>Used to indicate the type of health insurance plan. The valid values are:</p> <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>	No
Start Date	<p>Used to specify the date from when the fully-insured group policy plan is effective.</p> <p><b>Note:</b></p> <p>The fully-insured group policy plan start date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The fully-insured group policy plan start date cannot be later than the policy plan end date.</p>	Yes
End Date	<p>Used to specify the date till when the fully-insured group policy plan is effective.</p> <p><b>Note:</b></p> <p>The fully-insured group policy plan end date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The fully-insured group policy plan end date cannot be earlier than the policy plan start date.</p>	No

**Tip:** Alternatively, you can edit the details of a fully-insured group policy plan by clicking the **Edit** button in the **Policy Plan** zone of the **Policy Plan** screen.

5. Modify the required details in the **Main** section.
6. Associate the pricing rule types with the fully-insured group policy plan, if required.

**Note:** You must associate at least one pricing rule type with the policy plan when the price item is not specified in the fully-insured group policy plan.

7. Define, edit, or remove the proration rules of the fully-insured group policy plan, if required.
8. Define, edit, or remove characteristics of the fully-insured group policy plan, if required.
9. Click **Save**.

The changes made to the fully-insured group policy plan are saved.

How to add a log entry for a policy	<a href="#">Adding a Log Entry for a Policy</a> on page 399

## Adding a Log Entry for a Policy

### Procedure

To add a log entry for a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to add a log entry.

The **Policy** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Policy Log** zone.

The **Add Policy Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Displays information about the policy.	Not applicable
Log Details	Used to specify additional comments for the policy.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Policy Log** zone.

## Policy Plan (Used for Viewing)

The **Policy Plan** screen allows you to:

- View the details of a fully-insured group policy plan
- View the characteristics of a fully-insured group policy plan
- Add and edit a fully-insured group policy plan
- Add a membership to a fully-insured group policy plan

It contains the following zones:

- [Policy Plan](#) on page 400
- [Plan Characteristics](#) on page 402
- [Memberships](#) on page 374

## Policy Plan

The **Policy Plan** zone displays the details of the policy plan. It contains the following sections:

- **Main** - Displays the basic information about the policy plan. It contains the following fields:

Field Name	Field Description
Plan Information	Displays information about the policy plan.
Policy Information	Displays information about the policy. <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Price Item Information	Indicates the price item to which the policy plan is directly associated. <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul> <b>Note:</b> This field appears when the benefit type is set to <b>COBRA</b> or <b>Medicare Affiliated</b> .
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.

- **Pricing Rule Types** - Lists the pricing rule types which are associated with the policy plan. It contains the following column:

Column Name	Column Description
Pricing Rule Type	Indicates the pricing rule type which is associated with the policy plan. <b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the respective pricing rule type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the policy plan.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the policy plan is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Proration Rules** - Lists the proration rules defined for the policy plan. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the proration rule is effective for the policy plan.
Proration Event Type	Indicates the event when the membership premium should be prorated. The valid values are: <ul style="list-style-type: none"> <li>• Enrollment</li> <li>• Termination</li> <li>• New Born</li> <li>• Same Month Enrollment and Termination</li> </ul>
Proration Type	Indicates how the membership premium should be prorated. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Mid-Month</li> <li>• Full Month</li> <li>• Waiver</li> <li>• Coverage Days</li> <li>• Enrollment</li> <li>• Termination</li> </ul>
Number of Days	Displays the number of days using which the cutoff date is calculated.
	<b>Note:</b> The data appears in this column when the proration type is set to <b>Mid-Month</b> or <b>Coverage Days</b> .
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"> <li>Retiree</li> </ul>

You can define a new policy plan by clicking the **Add** link in the upper right corner of this zone.

## Plan Characteristics

The **Plan Characteristics** zone lists the characteristics of the fully-insured group policy plan. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy plan.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden.

You can view the **Filter** area by clicking the **Filters** (Y) icon in the upper right corner of this zone.

## Memberships

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership.
	<b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> <li>Active</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"> <li>Inactive</li> <li>Terminated</li> </ul>
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> <li>COBRA</li> <li>Medicare</li> <li>Retiree</li> </ul>
Benefits	On clicking the <b>Benefits</b> (🔗) icon, the <b>Benefit</b> screen appears where you can view the Medicare benefits of the member persons who belong to the membership.  <b>Note:</b> The <b>Benefits</b> icon appears when a Medicare benefit is defined for a member person who belongs to the membership.
Membership ID	Displays the membership ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062

How to search for a membership	<a href="#">Searching for a Membership</a> on page 411
How to view the details of a membership	<a href="#">Viewing the Membership Details</a> on page 412

## Searching for a Membership

### Prerequisites

To search for a membership, you should have:

- Membership types, membership identifier, and membership identifier types defined in the application
- Health plan defined in the application

**Note:** You must define a health plan only when you want to search individual memberships.

- Benefit types and benefit sub types defined in the application
- Person, person identifier, and person identifier types defined in the application
- Price item, policy, and policy plan defined in the application
- Contract relationship types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Membership**)

### **Procedure**

To search for a membership:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Membership**.  
A sub-menu appears.
3. Click the **Search** option from the **Membership** sub-menu  
The **Membership** screen appears.
4. Enter the search criteria in the **Search Membership** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of memberships that meet the search criteria appears in the **Search Results** section.

<b>Membership</b> screen	<a href="#">Membership (Used for Searching)</a> on page 403
<b>Search Membership</b> zone	<a href="#">Search Membership</a> on page 403

## **Viewing the Membership Details**

### **Procedure**

To view the details of a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to view.  
The **Membership** screen appears.
3. Ensure that the **Main** tab is selected.
4. View the details of the membership in the **Membership** zone.

## Defining a Membership for a Fully-Insured Group Policy Plan

### Prerequisites

To define a membership for a fully-insured group policy plan, you should have:

- Plans defined in the policy
- Persons defined in the application
- Contract relationship types defined in the application

### Procedure

To define a membership for a fully-insured group policy plan:

1. Do either of the following:

<b>If you want to...</b>	<b>Then...</b>
Define a membership for a fully-insured group policy plan from the <b>Policy</b> screen	<ol style="list-style-type: none"> <li>1. Search for the fully-insured group policy in the <b>Policy</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Policy Information</b> column corresponding to the policy whose details you want to edit.  The <b>Policy</b> screen appears.</li> <li>3. Click the <b>Plan</b> tab.  The <b>Plan</b> tab appears.</li> <li>4. In the <b>Plans</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the policy plan for which you want to define a membership.  The <b>Memberships</b> zone appears.</li> <li>5. Click the <b>Add</b> link in the upper right corner of the <b>Memberships</b> zone.</li> </ol>
Define a membership for a fully-insured group policy plan from the <b>Membership</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar.  A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Customer Management</b> and then click <b>Membership</b>.  A sub menu appears.</li> <li>3. Click the <b>Add</b> option from the <b>Membership</b> sub-menu.</li> </ol>

The **Membership** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the membership.
- **Characteristics** - Used to define the characteristics for the membership.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Plan ID	<p>Used to indicate the policy plan for which you want to define the membership.</p> <p><b>Note:</b></p> <p>The <b>Search</b>(🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Policy Plan Search</b> window appears.</p> <p>On specifying the policy plan, the description of the policy plan appears corresponding to the <b>Plan</b> field.</p> <p>If you navigate to the <b>Membership</b> screen from the <b>Policy</b> screen, the data automatically appears in this field. You can change the plan, if required.</p>	Yes
Start Date	<p>Used to specify the date from when the membership is effective for a fully-insured group policy plan.</p> <p><b>Note:</b></p> <p>The membership start date cannot be later than the membership end date.</p> <p>The membership start date cannot be earlier than the policy plan start date or later than policy plan end date.</p>	Yes
End Date	Used to specify the date till when the membership is effective for a fully-insured group policy plan.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The membership end date cannot be earlier than the membership start date.</p> <p>The membership end date cannot be earlier than the policy plan start date or later than policy plan end date.</p>	
Membership Type	<p>Used to indicate the type of membership. The valid values are:</p> <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul> <p><b>Note:</b> If you want to define an active employee coverage membership, you must leave this field blank.</p>	No
Main Subscriber	<p>Used to indicate the person who is the main subscriber of the membership.</p> <p><b>Note:</b></p> <p>The <b>Search</b>() icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p> <p>On specifying the person, the description of the person appears corresponding to the <b>Main Subscriber</b> field.</p>	Yes
Relationship Type	Used to indicate how the main subscriber is related to the membership.	Yes
External Membership ID	<p>Used to specify the external membership ID.</p> <p><b>Note:</b> Here, you need to specify a membership ID which is maintained in the external source system.</p>	No

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Membership** screen.

2. Enter the required details in the **Main** section.

3. Define characteristics for the membership, if required.
4. Click **Save**.

The membership is defined for the fully-insured group policy plan. The status of the membership and the main subscriber is set to **Active**.

## Defining a Characteristic for a Membership

### Prerequisites

To define a characteristic for a membership, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Membership**)

### Procedure

To define a characteristic for a membership:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a membership.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the membership.	Yes (Conditional)
	<b>Note:</b> The effective date cannot be earlier than the membership start date and later than the membership end date.	<b>Note:</b> This field is required when you are defining a characteristic for the membership.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Membership</b>	<b>Note:</b> This field is required when you are defining a characteristic for the membership.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required when you are defining a characteristic for the membership.</p>

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the membership, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the membership, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the membership.

## **Membership (Used for Viewing)**

The **Membership** screen allows you to:

- View the details of a membership
- Edit the details of a membership
- Inactivate a membership
- Inactivate a member person
- Add or remove a person from a membership
- View the other plans of the main subscriber
- Associate or disassociate a contract from a membership
- View the billable charges created for a membership

- View the bill segments generated for a membership billable charge
- View the timeline details of a membership billable charge
- Viewing the pricing calculation details of a timeline
- View the log of a membership
- Add a log entry for a membership

It consists of the following tabs:

- [Membership - Main](#) on page 418
- [Membership - Contracts and Charges](#) on page 424
- [Membership - Log](#) on page 431

## Membership - Main

The **Main** tab displays information about the membership. It also lists the persons which are included in the membership and other plans (within or across policies) where the main subscriber is associated. It contains the following zones:

- [Membership](#) on page 418
- [Membership Characteristics](#) on page 421
- [Member Persons](#) on page 421
- [Member Person Characteristics](#) on page 423
- [Other Plans of Main Subscriber](#) on page 423

## Membership

The **Membership** zone displays the details of the membership. It contains the following sections:

- **Main** - Displays basic information about the membership. It contains the following fields:

Field Name	Field Description
Membership Information	Displays information about the membership.
Policy Information	Displays information about the policy. <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the policy.
Plan Information	Indicates the policy plan for which the membership is defined. <b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Terminated</li> </ul>

<b>Field Name</b>	<b>Field Description</b>
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"><li>• COBRA</li><li>• Medicare</li></ul>
External Membership ID	Displays the corresponding membership ID which is maintained in the external source system.
Paid Through Date	Indicates the term end date of the last fully or partially paid term. The system considers the term to be fully paid when the threshold limit is met.

Field Name	Field Description																		
	<p><b>Note:</b></p> <p>This field appears when the paid through date is calculated at the membership level.</p> <p>The paid through date is calculated while freezing or canceling a payment or adjustment depending on whether the required algorithm is attached to the respective system event:</p> <table border="1" data-bbox="889 489 1464 865"> <thead> <tr> <th>Entity</th> <th>System Event</th> <th>Algorithm</th> </tr> </thead> <tbody> <tr> <td>Customer Class</td> <td>Payment Freeze</td> <td>C1-PSPTDCAL</td> </tr> <tr> <td>Customer Class</td> <td>Payment Cancellation</td> <td>C1-PXPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Freeze</td> <td>C1-ADPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Cancellation</td> <td>C1-AXPTDCAL</td> </tr> </tbody> </table>	Entity	System Event	Algorithm	Customer Class	Payment Freeze	C1-PSPTDCAL	Customer Class	Payment Cancellation	C1-PXPTDCAL	Adjustment Type	Adjustment Freeze	C1-ADPTDCAL	Adjustment Type	Adjustment Cancellation	C1-AXPTDCAL

M	C1-MPID	Paid through date is calculated at																	

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the membership.
Inactivate	Used to inactivate the membership.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the membership is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the membership status is updated
Create Date/Time	Displays the date and time when the membership is created.

### Membership Characteristics

The **Membership Characteristics** zone lists the characteristics of the membership. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the membership.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.  <b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

### Member Persons

The **Member Persons** zone lists the persons who are added to the membership. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the person is added to the membership.
End Date	Displays the date till when the person is added to the membership.
Person Information	Indicates the person who is added to the membership. In addition, it has the context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Relationship Type	Indicates how the person is related to the main subscriber.
Main Subscriber	Indicates whether the person is the main subscriber of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Financially Responsible	Indicates whether the person is financially responsible for the membership. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Status	Indicates the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Member	Indicates whether the person is a member or a non-member in the membership. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
External Medicare Beneficiary ID	Displays the Medicare beneficiary identifier of the person who has availed the Medicare benefit.
Date of Birth	Displays the date when the person was born.
Edit	On clicking the <b>Edit</b>  icon, the <b>Member Person</b> screen appears where you can edit the membership details of the person.

**Note:**

By default, the member persons which are in the **Active** status are listed in the **Member Persons** zone.

You can add a person to the membership by clicking the **Add Person** link in the upper right corner of this zone.

On clicking the **Broadcast**  icon corresponding to a member person, the **Member Person Characteristics** zone appears where you can view the characteristics of the respective member person.

You can filter the list using the **Status** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

### **Member Person Characteristics**

The **Member Person Characteristics** zone lists the characteristics of the member person who is added to the membership. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Effective Date	Displays the date from when the characteristic is effective for the member person.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

By default, the **Member Person Characteristics** zone does not appear in the **Main** tab. It appears when you click the **Broadcast** (  ) icon corresponding to the member person in the **Member Persons** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

### **Other Plans of Main Subscriber**

The **Other Plans of Main Subscriber** zone lists the additional memberships of the main subscriber. These memberships may belong to different plans within or across the policies. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Start Date	Displays the date from when the main subscriber is added to the membership.
End Date	Displays the date till when the main subscriber is added to the membership.
Plan Number	Indicates the fully-insured group policy plan for which the membership is created.

Column Name	Column Description
Price Item	Indicates the price item to which the policy plan is associated.
Membership Information	Displays information about the membership.
	<b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Last Billed Coverage	Indicates the last bill segment generated for the membership which is in the <b>Frozen</b> status. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment.

## **Membership - Contracts and Charges**

The **Contracts and Charges** tab lists the following:

- Contracts associated with the membership
- Billable charges created for the membership
- Bill segments generated for each billable charge
- Timeline generated for each billable charge
- Premium calculated for each eligible member person when an age based pricing is used during the membership premium calculation
- Premium calculated for the membership when a tier based pricing is used during the membership premium calculation

It contains the following zones:

- [Membership Contracts](#) on page 424
- [Billable Charges](#) on page 426
- [Bill Segment Details](#) on page 427
- [Billable Charge Timeline Details](#) on page 428
- [Pricing Calculation Details](#) on page 429

### **Membership Contracts**

The **Membership Contracts** zone lists the contracts which are associated with the membership. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the contract is associated with the membership.
End Date	Displays the date till when the contract is associated with the membership.
Bill To	Indicates the entity against whom the corresponding charges are billed. The valid values are: <ul style="list-style-type: none"> <li>• Federal</li> <li>• State</li> <li>• Group</li> <li>• Individual</li> </ul>
Contract ID	Displays the contract ID.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Account Information	Indicates the account for which the contract is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can disassociate the contract from the membership.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Associate Contract with Membership</b> screen appears where you can edit the contract association details of the membership.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can associate a contract with the membership by clicking the **Add Contract** link in the upper-right corner of this zone.

You can filter the list using the **Bill To** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper-right corner of this zone.

### Billable Charges

The **Billable Charges** zone lists the one-time or recurring billable charges which are created for the membership. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the billable charge.
End Date	Displays the end date of the billable charge.
Bill Period	Indicates the intervals at which the recurring bill segments must be created for the billable charge.
Price Item Information	Indicates the price item for which the billable charge is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Account ID	Indicates the account for which the billable charge is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Contract ID	Indicates the contract against which the billable charge is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Billable Charge Information	Displays information about the billable charge.  <b>Note:</b> It has a link. On clicking the link, the <b>Billable Charge</b> screen appears where you can view the details of the respective billable charge.
Amount	Displays the billable charge amount.
Status	Indicates the status of the billable charge. The valid values are: <ul style="list-style-type: none"> <li>• Billable</li> <li>• Cancelled</li> </ul>
Last Billed Coverage	Indicates the last bill segment generated for the billable charge which is in the <b>Frozen</b> status. In addition, a context

Column Name	Column Description
	menu appears corresponding to this column which helps in navigating to other screens in application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to a billable charge, the **Bill Segment Details** and **Billable Charge Timeline Details** zones appear.

**Note:** On clicking the **Broadcast** (📡) icon, the **Billable Charge Timeline Details** zone appears when the timeline details are available for the respective billable charge.

You can filter the list using various search criteria (such as, **Price Item, Start Date, Contract ID, End Date** and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### Billable Charge Timeline Details

The **Billable Charge Timeline Details** zone lists the timelines which are derived during the membership premium calculation. It appears when the timeline details are available for the billable charge. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the timeline.
End Date	Displays the end date of the timeline.
Amount	Displays the premium amount calculated for the timeline.
Pricing Rule Information	<p>Indicates the pricing rule using which the premium amount is calculated.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule</b> screen appears where you can view the details of the respective pricing rule.</p>
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the respective pricing rule type.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Billable Charge Timeline Details** zone does not appear in the **Contracts and Charges** tab of the **Membership** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a billable charge in the **Billable Charges** zone.

On clicking the **Broadcast** (📡) icon corresponding to a timeline, the **Pricing Calculation Details** zone appears.

You can filter the list using various search criteria (such as, **Start Date** and **End Date**) available in the **Filter** area.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### **Pricing Calculation Details**

The **Pricing Calculation Details** zone indicates how the amount is calculated for the timeline. If the age based pricing is used during the membership premium calculation, this zone lists the premium calculated for each eligible member of the membership. It also displays the base fee and modifier fee which are applicable for each eligible member. However, if the tier based pricing is used during the membership premium calculation, this zone lists the premium calculated at the membership level. It contains the following columns:

Column Name	Column Description
Entity Information	If the age based pricing is used during the membership premium calculation, this column indicates the eligible member for whom the premium amount is calculated. However, if the tier based pricing is used during the membership premium calculation, this column indicates the main subscriber of the membership.
Description on Bill	Displays the description of the rate component for which the price component is created in the age based or tier based pricing.
Pricing Parameter	Indicates the pricing eligibility criteria which is satisfied while deriving the base fee.
Amount	Displays the base fee or applicable modifier fee.

Column Name	Column Description
Proration Factor	Indicates the proration factor which is derived using the proration rules defined for the fully-insured group policy plan.
	<b>Note:</b> The data appears in this column when the proration rule for the respective event is defined for the fully-insured group policy plan.
Distributed Amount	Displays the premium amount which is calculated for the non-skip billing periods.
	<b>Note:</b> The data appears in this column when the <b>9/10 Billing (Skip Months)</b> feature is enabled for the account.  If the age based pricing is used during the membership premium calculation, this column displays the distributed amount for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the distributed amount for the membership.
No. of Billing Periods	Indicates the number of the non-skip billing periods of the account.
	<b>Note:</b> The data appears in this column when the <b>9/10 Billing (Skip Months)</b> feature is enabled for the account.
Total Contract Period Amount	Displays the premium which should be paid for the entire contract period (in other words, total premium for the skip and non-skip billing periods).
	<b>Note:</b> The data appears in this column when the <b>9/10 Billing (Skip Months)</b> feature is enabled for the account.  If the age based pricing is used during the membership premium calculation, this column displays the total contract period amount for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the total contract period amount for the membership.
Total Amount	If the age based pricing is used during the membership premium calculation, this column displays the sum total of the base fee and modifier fee (if any) for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the base fee applicable for the membership.

By default, the **Pricing Calculation Details** zone does not appear in the **Contracts and Charges** tab of the **Membership** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a timeline in the **Billable Charge Timeline Details** zone.

**Membership - Log**

The **Log** tab contains the following zone:

- [Membership Log](#) on page 431

**Membership Log**

The **Membership Log** zone lists the complete trail of actions performed on the membership. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the membership.
Details	Displays the details about the action performed on the membership.
User	Indicates the user who has performed the action on the membership.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the membership.
	<b>Note:</b> It contains a link. On clicking the link, the screen appears where you can view the details of the respective related object.
Status Reason	Indicates the reason why the status of the membership is changed.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the membership by clicking the **Add Log Entry** link in the upper right corner of the **Membership Log** zone.

**Editing a Membership of a Fully-Insured Group Policy Plan**

**Procedure**

To edit a membership of a fully-insured group policy plan:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to edit.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Membership** zone.

The **Membership** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the membership.
- **Characteristics** - Used to define the characteristics for the membership.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Displays information about the membership.	Not applicable
Plan Information	Indicates the policy plan for which the membership is defined.	Not applicable
Start Date	Used to specify the date from when the membership is effective for a fully-insured group policy plan.  <b>Note:</b> The membership start date cannot be later than the membership end date. The membership start date cannot be earlier than the policy plan start date or later than policy plan end date.	Yes
End Date	Used to specify the date till when the membership is effective for a fully-insured group policy plan.  <b>Note:</b> The membership end date cannot be earlier than the membership start date. The membership end date cannot be earlier than the policy plan start date or later than policy plan end date.	Yes
Membership Type	Used to indicate the type of membership. The valid values are:	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul>	
External Membership ID	<p>Used to specify the external membership ID.</p> <p><b>Note:</b> Here, you need to specify a membership ID which is maintained in the external source system.</p>	No

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the membership, if required.
7. Click **Save**.

The changes made to the membership are saved.

## Adding a Person to a Membership

The system enables you to add a member person to a membership when the membership is in the **Active** status. However, you can only add a member person in the **Active** status and not in the **Inactive** status.

### Prerequisites

To add a person to a membership, you should have:

- Required persons defined in the application
- Contract relationship types defined in the application

### Procedure

To add a person to a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership to which you want to add a person.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Add Person** link in the upper right corner of the **Member Persons** zone.

The **Member Person** screen appears. It contains the following sections:

- **Main** - Used to specify the basic membership details of the person.

- **Characteristics** - Used to define the characteristics for the member person.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Indicates the membership to which you want to add a person.	Not applicable
Person ID	Used to indicate the person whom you want to add to the membership.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	Yes
Relationship Type	Used to indicate how the person is related to the main subscriber.  <b>Note:</b> The list includes only those contract relationship types which are already defined in the system.	Yes
Financially Responsible	Used to indicate whether the person is financially responsible for the membership.	No
Main Subscriber	Used to indicate whether the person is the main subscriber of the membership.	No
Member	Used to indicate whether the person is a member or a non-member in the membership.	No
Start Date	Used to specify the date from when you want to add the person to the membership.  <b>Note:</b> The member person start date cannot be later than the member person end date. The member person start date cannot be earlier than the membership start date or later than the membership end date.	Yes
End Date	Used to specify the date till when you want to add the person to the membership.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The member person end date cannot be earlier than the member person start date.</p> <p>The member person end date cannot be earlier than the membership start date or later than the membership end date.</p>	
External Medicare Beneficiary ID	Used to specify the Medicare beneficiary identifier of the person who has availed the Medicare benefit.	No
Member Person Status	<p>Used to indicate the status of the person in the membership. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> By default, the <b>Active</b> option is selected.</p>	Yes

5. Enter the required details in the **Main** section.
6. Define the characteristics for the member person, if required.
7. Click **Save**.

The person is added to the membership.

## **Defining a Characteristic for a Member Person**

### **Prerequisites**

To define a characteristic for a member person, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Membership Person**)

### **Procedure**

To define a characteristic for a member person:

1. Ensure that the **Characteristics** section is expanded when you are adding a person to a membership or editing the membership details of a person.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to indicate the date from when the characteristic is effective for the member person.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the member person.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Membership Person</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the member person.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the member person.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the member person, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the member person, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the member person.

## Inactivating a Membership

There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

### Procedure

To inactivate a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership that you want to inactivate.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Inactivate** button in the **Membership** zone.

The status of the membership is changed to **Inactive**.

### Related Topics

For more information on...	See...
How to search for a membership	<a href="#">Searching for a Membership</a> on page 411
<b>Membership</b> screen	<a href="#">Membership (Used for Viewing)</a> on page 417
<b>Membership</b> zone	<a href="#">Membership</a> on page 418

## Inactivating a Member Person

The system enables you to inactivate a member person of a membership. If the member person is the main subscriber, the system automatically inactivates the membership and all other member persons which are included in the membership. It also does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

### Procedure

To inactivate a member person of a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to edit.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. In the **Member Persons** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the member person whom you want to inactivate.

The **Add/Edit Member Person** screen appears.

5. Select the **Inactive** option from the **Membership Person Status** list.

The status of the member person is changed to **Inactive**.

## **Editing the Membership Details of a Person**

### **Prerequisites**

To edit the membership details of a person, you should have:

- Contract relationship types defined in the application

### **Procedure**

To edit the membership details of a person:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to edit.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. In the **Member Persons** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the member person whose details you want to edit.

The **Member Person** screen appears. It contains the following sections:

- **Main** - Used to specify the basic membership details of the person.
- **Characteristics** - Used to define the characteristics for the member person.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Membership Information	Indicates the membership to which the person is added.	Not applicable
Person ID	Indicates the person who is added to the membership.	Not applicable
Relationship Type	Used to indicate how the person is related to the main subscriber.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> The list includes only those contract relationship types which are already defined in the system.</p>	
Financially Responsible	Used to indicate whether the person is financially responsible for the membership.	No
Main Subscriber	Used to indicate whether the person is the main subscriber of the membership.	No
Member	Used to indicate whether the person is a member or a non-member in the membership.	No
Start Date	<p>Used to specify the date from when you want to add the person to the membership.</p> <p><b>Note:</b> The member person start date cannot be later than the member person end date. The member person start date cannot be earlier than the membership start date or later than the membership end date.</p>	Yes
End Date	<p>Used to specify the date till when you want to add the person to the membership.</p> <p><b>Note:</b> The member person end date cannot be earlier than the member person start date. The member person end date cannot be earlier than the membership start date or later than the membership end date.</p>	No
External Medicare Beneficiary ID	Used to specify the Medicare beneficiary identifier of the person who has availed the Medicare benefit.	No
Member Person Status	<p>Used to indicate the status of the person in the membership. The valid values are:</p> <ul style="list-style-type: none"> <li>Active</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Inactive</li> </ul> <p><b>Note:</b></p> <p>If you inactivate a member person who is the main subscriber, the system automatically inactivates the membership and all other member persons which are included in the membership.</p> <p>You cannot change the status of the member person to <b>Active</b> when the membership is in the <b>Inactive</b> status.</p>	

- Modify the required details in the **Main** section.
- Define, edit, or remove the characteristics from the member person, if required.
- Click **Save**.

The changes made to the membership details of the person are saved.

## Removing a Person from a Membership

### **Procedure**

To remove a person from a membership:

- Search for the membership in the **Membership** screen.
- In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership from which you want to remove a person.  
The **Membership** screen appears.
- Ensure that the **Main** tab is selected.
- In the **Member Persons** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the person that you want to remove from the membership.

A message appears confirming whether you want to remove the person from the membership.

**Note:** You cannot remove the member person who is the main subscriber of the membership.

- Click **OK**.

The person is removed from the membership.

## Associating a Contract with a Membership

### Prerequisites

To associate a contract with a membership, you should have:

- Contracts defined in the application
- Values defined for the **BILL\_TO\_TYPE\_FLG** lookup field

### Procedure

To associate a contract with a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership to which you want to associate a contract.

The **Membership** screen appears.

3. Click the **Contracts and Charges** tab.

The **Contracts and Charges** tab appears.

4. Click the **Add Contract** link in the upper right corner of the **Membership Contracts** zone.

The **Associate Contract with Membership** screen appears. It contains the following section:

- **Main** - Used to associate a contract with the membership. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Indicates the membership to which you want to associate a contract.	Not applicable
Contract ID	Used to indicate the contract that you want to associate with the membership.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract ID</b> field. On clicking the <b>Search</b> icon, the <b>Contract Search</b> window appears.	Yes
Bill To	Used to indicate the entity against whom the corresponding charges should be billed. The valid values are:  • Federal	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• State</li> <li>• Group</li> <li>• Individual</li> </ul> <p><b>Note:</b> You cannot associate multiple contracts with the membership using the same bill to option. For example, you cannot associate C1 and C2 with M1 by selecting the <b>Group</b> option from the <b>Bill To</b> field.</p>	
Start Date	<p>Used to specify the date from when you want to associate the contract with the membership.</p> <p><b>Note:</b> The start date cannot be later than end date. The start date cannot be earlier than the membership start date or later than the membership end date.</p>	Yes
End Date	<p>Used to specify the date till when you want to associate the contract with the membership.</p> <p><b>Note:</b> The end date cannot be earlier than the start date. The end date cannot be earlier than the membership start date or later than the membership end date.</p>	No

5. Enter the required details in the **Main** section.

6. Click **Save**.

The contract is associated with the membership.

- [Policy \(Used for Viewing\)](#)

Self-funded group health insurance, also known as Administrative Services Only (ASO), is a self insurance arrangement whereby an employer provides health or disability benefits to employees using the company's own funds. A self-insured employer will set up a special trust fund to earmark money (corporate and employee contributions) to pay incurred claims. It is also commonly known as self-funded employee health insurance.

In the self-funded group health plan, employers operate their own health plan. However, in the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. Employers choose to self-insure because it allows them to save the profit margin that an insurance company adds to its premium for a fully-insured group health plan. However, self-insuring exposes the company to much larger risk when more claims than expected must be paid.

Oracle Revenue Management and Billing (ORMB) supports the following types of self-funding approach:

- **Fully Self-Funded** - In the fully self-funded approach, the employer retains all the risk and bears the claim costs irrespective of any limit.
- **Partially Self-Funded** - In the partially self-funded approach, the employer purchases reinsurance or stop loss coverage to pass the risk to insurance company.

Oracle Revenue Management and Billing (ORMB) provides specialized methodologies for calculating claim amount with or without markups, enrollment fees, claim fees, specific stop-loss credits, aggregate stop-loss credits, non-recurring or recurring flat fees for covered services, network discounts, and fixed or enrollment based premium funds. Once the charges are calculated, the system bills the amount to the employer (known as the parent customer in ORMB) or to its logical designed billing entities (known as the bill groups in ORMB).

Oracle Revenue Management and Billing (ORMB) enables you to use the pricing methodologies and the billing engine for the self-funded group health insurance business. To design the pricing and billing models for the self-funded group health insurance business, you need to create the following entities in ORMB:

- Parent Customer
- Bill Groups
- Bill Group's Account
- Self-Funded Policy
- Price Items (for each covered service in the policy)

- Pricing Rule Types
- Pricing Rules

## Pre-requisites

---

To set the billing system for a self-funded group customer, you need to do the following:

- Define the required policy types in the system.
- Define the required policy person roles in the system.
- Define the values for the **RUNOUT\_ADM\_OPT\_FLG** lookup field.
- Define the required characteristic types where the characteristic entity is set to **Policy Type**.
- Define the required characteristic types where the characteristic entity is set to **Policy**.
- Define the required parameter values in the following algorithm which is attached to the **C1-ASOPolicy** business object:
  - C1-ASOBOPOSP
- Define the required parameter values in the following algorithm which is used in the lifecycle of the **C1-ASOPolicy** business object:
  - C1-ASOPOLMOA
- Set the values for the following option types in the **C1-ASOBLLNG** feature configuration:
  - Parent Customer Policy Person Role
  - Bill Group Policy Person Role
- Set the values for the following option types in the **C1-PERSTYPE** feature configuration:
  - Bill Group Person Type
  - Parent Person Type
- Set the batch control type of the **Policy Periodic Monitor (C1-POLPR)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

How to setup the <b>C1-ASOBLLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLLNG Feature Configuration</a> on page 4070

## Self-Funded Policy

---

You can create a self-funded policy using a policy type where the policy category is set to **Self-Funded**. The policy type indicates the business object using which the self-funded policy should be created in the system.

As per the self-funded health insurance business, the system enables you to create a self-funded policy for a bill group where the parent customer is the policy holder. You can create or edit a self-funded policy from the **Policy** screen. In addition, you can create or edit a self-funded policy through a customer registration object or a health care inbound

message. If the self-funded policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

A self-funded policy encapsulates the following information:

- **Policy Persons** – While creating a self-funded policy, you need to associate the person who is the main customer of the policy. While associating a person with a self-funded policy, you need to specify the policy person role which indicates the role of the person in the policy. For example, whether the person associated with the policy is the policy holder, broker, or underwriter. You can associate multiple persons with a self-funded policy using the same or different policy person role. However, at a time, only one person can be the main customer of the policy.
- **Policy Contracts** – The system creates a contract for a self-funded policy when the policy is created either from the user interface or through an inbound message. For more information, refer to [Self-Funded Policy Contract Creation](#) on page 457.

On defining a self-funded policy, the status of the policy is set to **Pending**. You can then edit, delete or activate a policy. Once a self-funded policy is activated, you can renew the policy whenever required.

**Note:** If a self-funded policy is created through a customer registration object or a health care inbound message, the status of the policy is set to **Pending**.

In a self-funded policy, you can specify the policy period as well as the runout period. Here, the policy period means the period between the policy start and end dates when the policy is active. And, the runout period means the period between the runout start and end dates when the policy is no more active. Note that the system sets the runout start date to the policy end date + 1 Day when you specify the runout end date.

The system enables you to create a self-funded policy for the following contract types which are used in the self-funded health insurance business:

Contract Type	Policy (Example)	Policy Period (i.e. Period when Policy will be in the Active Status)	Runout Period (i.e. Period when Policy will be in the Runout Status)	Comments
<b>12/12</b> (Claims Incurred and Paid During the Policy Period)	P1	01-01-2019 to 12-31-2019	-	Here, you will not specify the runout end date for the self-funded policy (i.e. P1).
<b>12/15</b> (Claims Incurred During the Policy Period and Paid During the Policy and Runout Periods)	P2	01-01-2019 to 12-31-2019	01-01-2020 to 03-31-2020	Here, the runout period is derived when you set the runout end date of the self-funded policy (i.e. P2) to 03-31-2020.
<b>12/18</b> (Claims Incurred During the Policy Period and Paid During the Policy and Runout Periods)	P3	01-01-2019 to 12-31-2019	01-01-2020 to 06-30-2020	Here, the runout period is derived when you set the runout end date of the self-funded policy (i.e. P3) to 06-30-2020.

Contract Type	Policy (Example)	Policy Period (i.e. Period when Policy will be in the Active Status)	Runout Period (i.e. Period when Policy will be in the Runout Status)	Comments
<b>15/12</b> (Claims Incurred Three Months Prior to the Policy Start Date and During the Policy Period and Paid During the Policy Period)	P4	01-01-2019 to 12-31-2019	-	Here, you will not specify the runout end date for the self-funded policy (i.e. P4).

The system enables you to offer different pricing for different policy periods, such as active, runout, and post runout.

## Self-Funded Policy Activation

A self-funded policy can be activated manually from the user interface or through the **Policy Periodic Monitor (C1-POLPR)** batch. You can activate a self-funded policy by clicking the **Activate** button in the **Policy** screen. On clicking the **Activate** button, the system checks whether the To Do created for the **Pending** status is completed. If the To Do created for the **Pending** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **Pending** to **In Force/Active**.

**Note:** The status of the policy is not changed from **Pending** to **In Force/Active** until the system date is later than or equal to the policy start date.

On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **Pending** status and the policy start date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Pending Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the start date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Pending Status** parameter is completed, it changes the status of the self-funded policy from **Pending** to **In Force/Active**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Active** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss
- Retention Type Claim Based
- Retention Type Enrollment Based
- Ancillary
- Flat Fees
- Level Funded

## Transition of Self-Funded Policy to Runout Status

A self-funded policy can be transitioned to the **Runout** status from the user interface or through the **Policy Periodic Monitor (C1-POLPR)** batch. You can transition a self-funded policy to the **Runout** status by clicking the **Runout** button in the **Policy** screen. On clicking the **Runout** button, the system checks whether the To Do created for the **In**

**Force/Active** status is completed. If the To Do created for the **In Force/Active** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **In Force/Active** to **Runout**.

**Note:** The status of the policy is not changed from **In Force/Active** to **Runout** when either of the following condition is met:

- The runout end date is not specified.
- The system date is earlier than or equal to the policy end date.
- The policy is renewed.

On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **In Force/Active** status and the policy end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Active Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Active Status** parameter is completed, it changes the status of the self-funded policy from **In Force/Active** to **Runout**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Runout** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss
- Retention Type Claim Based
- Ancillary
- Flat Fees
- Level Funded

## Transition of Self-Funded Policy to Post Runout Status

A self-funded policy can be transitioned to the **Post Runout** status only through the **Policy Periodic Monitor (C1-POLPR)** batch. On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **Runout** status and the runout end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Runout Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the runout end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Runout Status** parameter is completed, it changes the status of the self-funded policy from **Runout** to **Post Runout**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Post Runout** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss
- Retention Type Claim Based
- Ancillary

## Self-Funded Policy Renewal

You can renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy only when it is in the **In Force/Active** status and which is not yet renewed. You can renew a self-funded policy only from the user interface and not through a health care inbound message.

On renewing a self-funded policy, a new policy is created in the **Pending** status. The renewal date is stamped in the base policy. The information from the base policy is copied to the renewed policy. The start date of the renewed policy is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.

While renewing a self-funded policy, you cannot disassociate persons (from the renewed policy) who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration.

While renewing a self-funded policy, the system enables you to copy the following pricing rules of the base policy and thereby create new pricing rules for the renewed policy:

- Claim
- Retention Type Claim Based
- Retention Type Enrollment Based
- Recurring Flat Fees
- Ancillary

While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively. If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.

Once a policy is renewed, you cannot edit the base policy's end date or manually change the status of the base policy to **Runout**. The system automatically changes the status of the base policy to **Runout** when the status of the latest renewed policy is changed to **Runout**.

## Self-Funded Policy Contract Creation

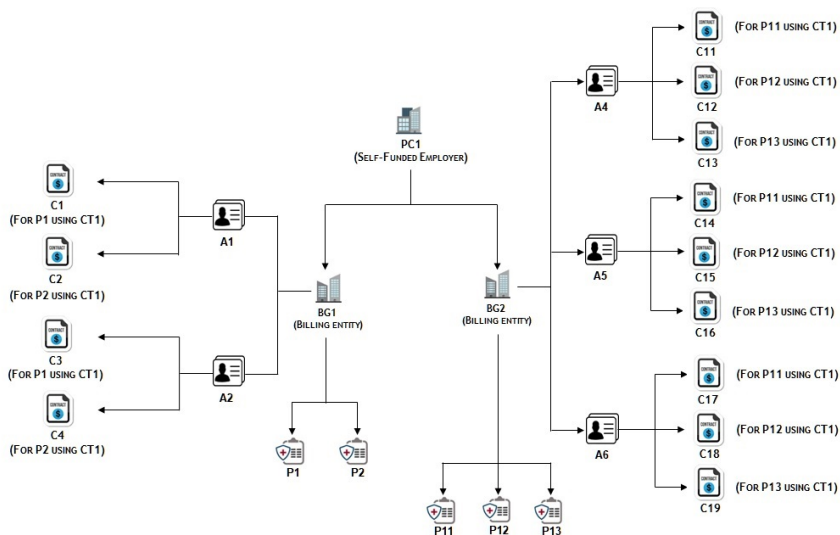

The system automatically creates contracts when a self-funded policy is created either from the user interface or through a health care inbound message. It creates a contract for a self-funded policy on each account of the bill group. It creates a contract using the contract type which is specified in the **Contract Type** parameter of an algorithm which is created using the **C1-ASOBOPOSP** algorithm type. Let us assume that the **Contract Type** parameter in the **C1-ASOBOPOSP** algorithm is set to CT1. Now, when you create the self-funded policies named P1 and P2 for BG1 and P11, P12, and P13 for BG2 through a health care inbound message, the system will create a set of contracts on the respective accounts as mentioned below.

The following table indicates the number of contracts that are created for a self-funded policy on each account of a bill group:

Bill Group	Account	Contract
BG1	A1	C1 (for P1 using the CT1 contract type)
		C2 (for P2 using the CT1 contract type)
	A2	C3 (for P1 using the CT1 contract type)
		C4 (for P2 using the CT1 contract type)

Bill Group	Account	Contract
BG2	A4	C11 (for P11 using the CT1 contract type)
		C12 (for P12 using the CT1 contract type)
		C13 (for P13 using the CT1 contract type)
	A5	C14 (for P11 using the CT1 contract type)
		C15 (for P12 using the CT1 contract type)
		C16 (for P13 using the CT1 contract type)
	A6	C17 (for P11 using the CT1 contract type)
		C18 (for P12 using the CT1 contract type)
		C19 (for P13 using the CT1 contract type)

The following figure graphically represents the above example:

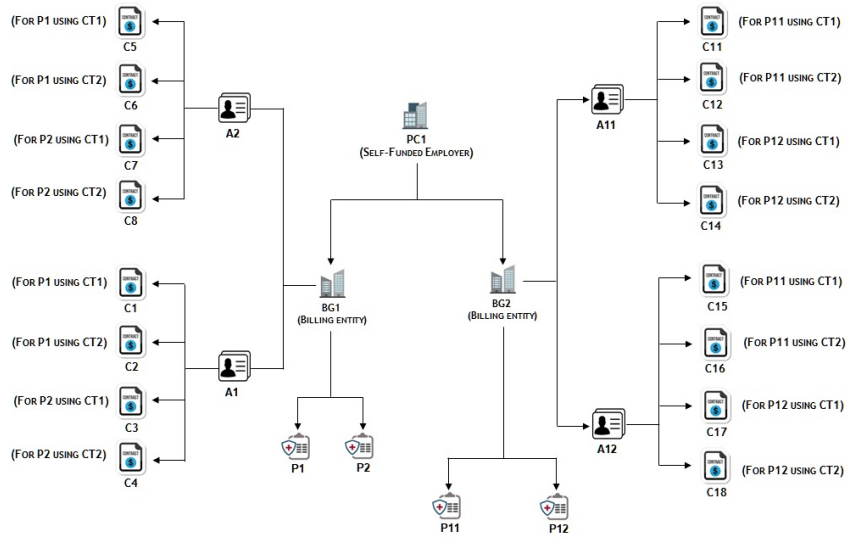

You can also specify comma-separated values for the **Contract Type** parameter. The system will then create a contract using each contract type for each self-funded policy on each account of the bill group. Let us assume that the **Contract Type** parameter in the **C1-ASOBOPOSP** algorithm is set to CT1 , CT2. Now, when you create the self-funded policies named P1 and P2 for BG1 and P11 and P12 for BG2 through a health care inbound message, the system will create a set of contracts on the respective accounts as mentioned below.

The following table indicates the number of contracts that are created for a self-funded policy on each account of a bill group:

Bill Group	Account	Contract
BG1	A1	C1 (for P1 using the CT1 contract type)
		C2 (for P1 using the CT2 contract type)
		C3 (for P2 using the CT1 contract type)
		C4 (for P2 using the CT2 contract type)
	A2	C5 (for P1 using the CT1 contract type)
		C6 (for P1 using the CT2 contract type)
		C7 (for P2 using the CT1 contract type)
		C8 (for P2 using the CT2 contract type)
BG2	A11	C11 (for P11 using the CT1 contract type)
		C12 (for P11 using the CT2 contract type)
		C13 (for P12 using the CT1 contract type)
		C14 (for P12 using the CT2 contract type)
	A12	C15 (for P11 using the CT1 contract type)
		C16 (for P11 using the CT2 contract type)
		C18 (for P12 using the CT1 contract type)
		C19 (for P12 using the CT2 contract type)

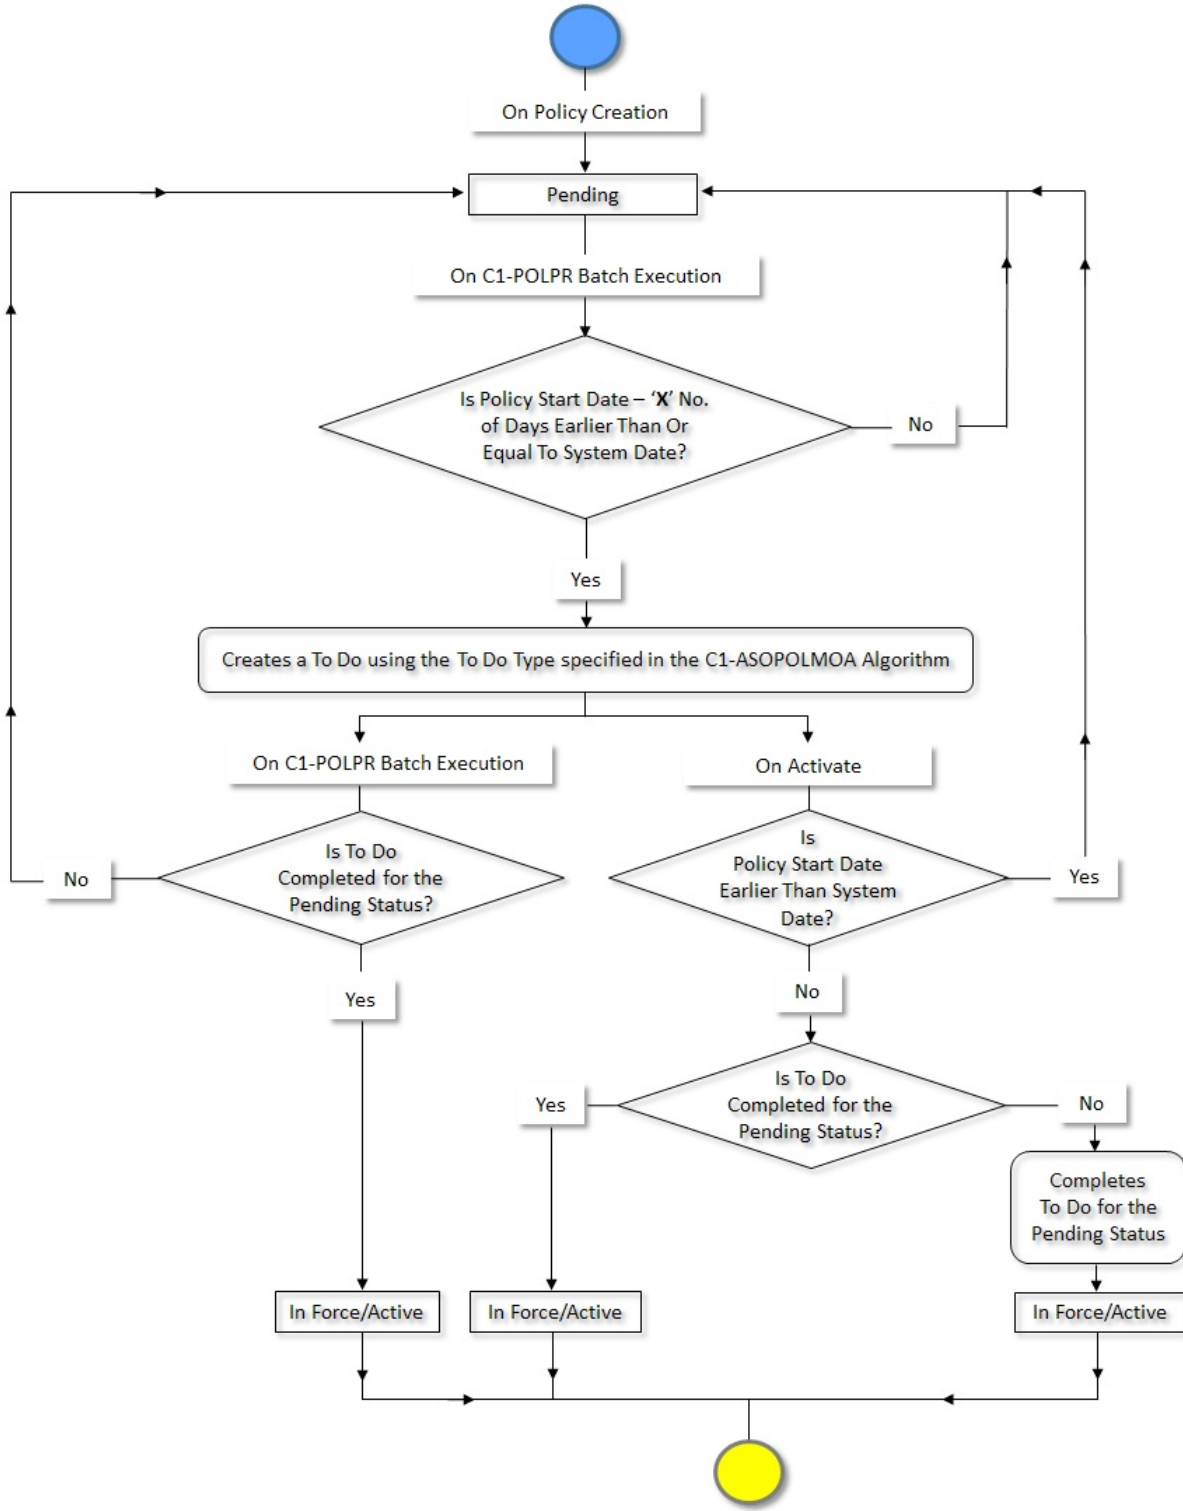

The following figure graphically represents the above example:

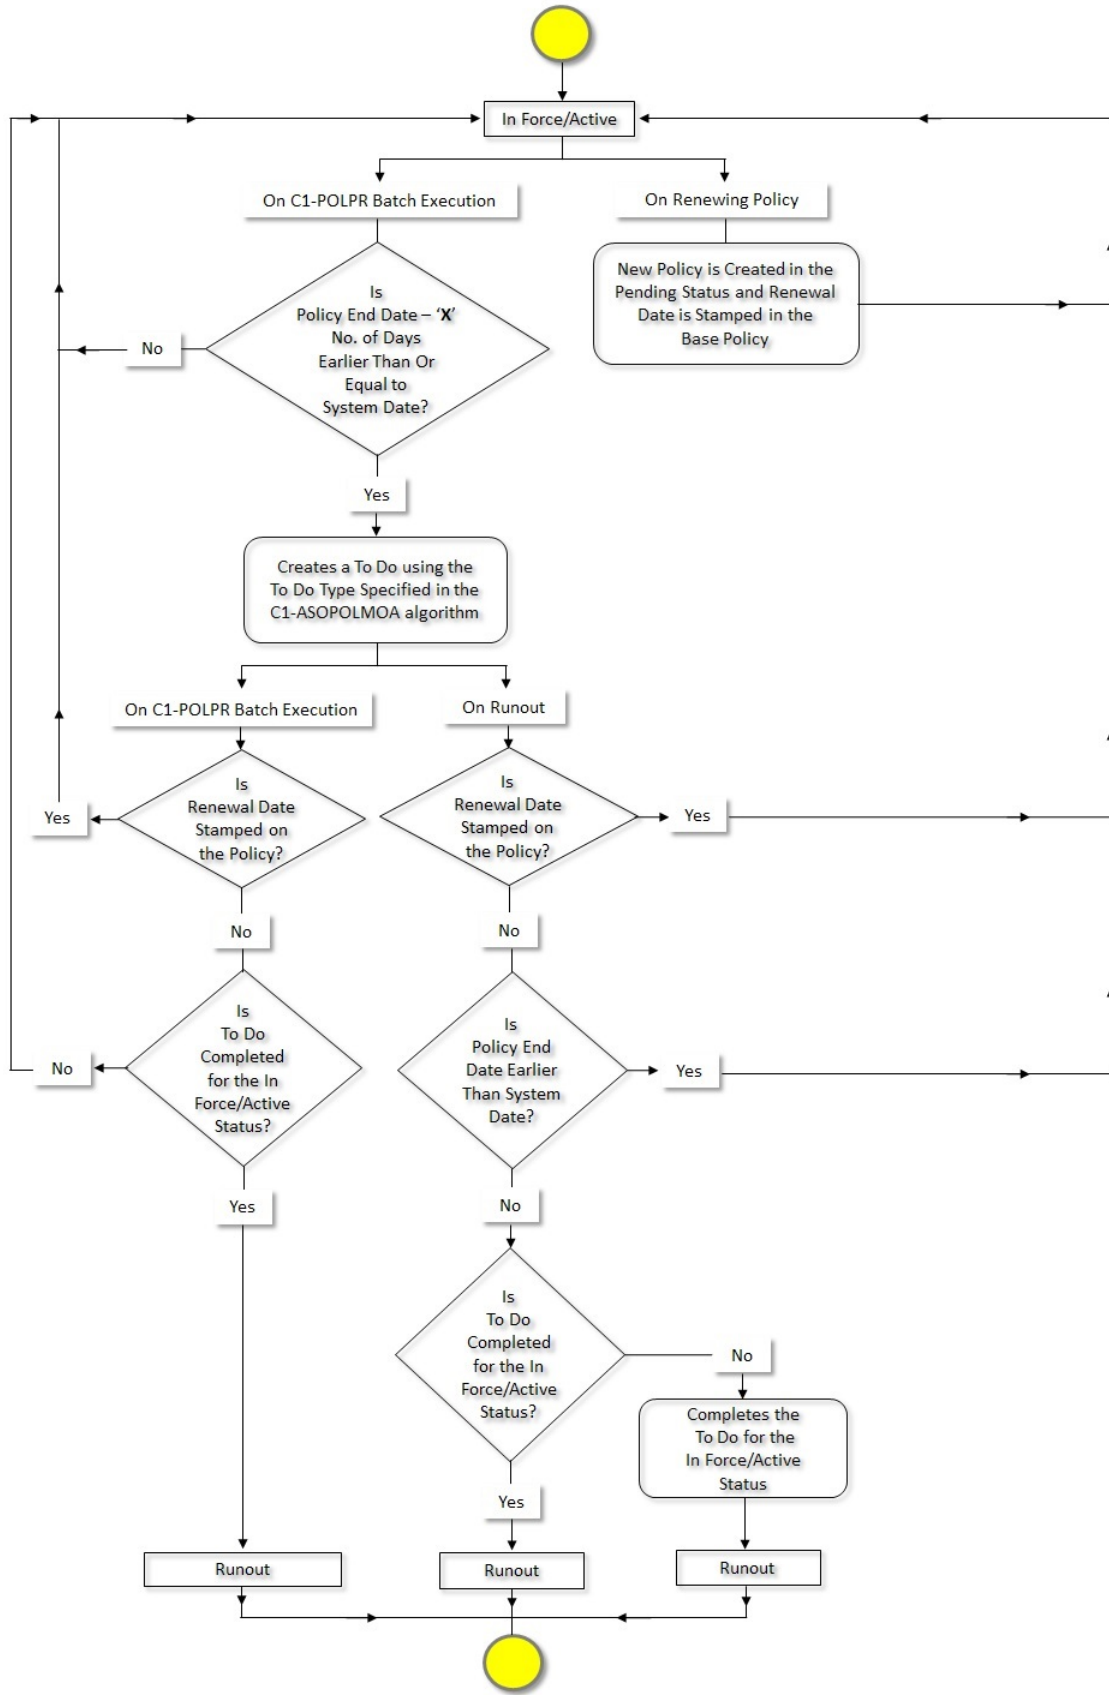

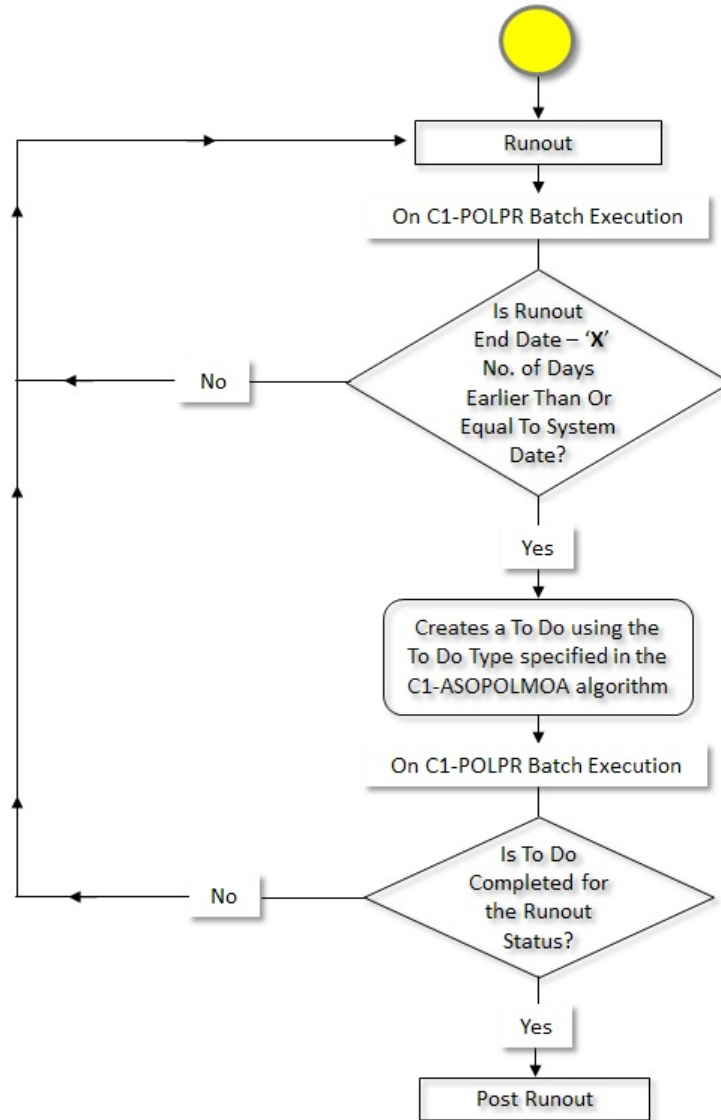

## Self-Funded Policy Status Transition

The following figure graphically indicates how a self-funded policy moves from one status to another in its lifecycle:

## Algorithms Used in C1-ASOPolicy

The following table lists the algorithms which are attached to the **C1-ASOPolicy** business object:

System Event	Algorithm	Algorithm Type	Description
Validation	C1-ASOPOLVAL	C1-ASOPOLVAL	Refer to <a href="#">C1-ASOPOLVAL</a> on page 464.
Post-Processing	C1-ASOBOPOSP	C1-ASOPOLPOS	Refer to <a href="#">C1-ASOBOPOSP</a> on page 465.

System Event	Algorithm	Algorithm Type	Description
	C1-ASOPRUCPY	C1-ASOPRUCPY	Refer to <a href="#">C1-ASOPRUCPY</a> on page 465.

The following table lists the algorithms which are used in the lifecycle of the **C1-ASOPolicy** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Pending	Monitor	C1-ASOPOLMOA	C1-ASOPOLMOA	Refer to <a href="#">C1-ASOPOLMOA</a> on page 465.
	Enter	C1-ASOPOLREN	C1-ASOPOLREN	Refer to <a href="#">C1-ASOPOLREN</a> on page 466.
	Exit	C1-ASOPCKTD	C1-ASOPCKTD	Refer to <a href="#">C1-ASOPCKTD</a> on page 466.
In Force/Active	Monitor	C1-ASOPOLMOA	C1-ASOPOLMOA	Refer to <a href="#">C1-ASOPOLMOA</a> on page 465.
	Exit	C1-ASOPCKTD	C1-ASOPCKTD	Refer to <a href="#">C1-ASOPCKTD</a> on page 466.
Runout	Monitor	C1-ASOPOLMOA	C1-ASOPOLMOA	Refer to <a href="#">C1-ASOPOLMOA</a> on page 465.
	Exit	C1-ASOPCKTD	C1-ASOPCKTD	Refer to <a href="#">C1-ASOPCKTD</a> on page 466.
Post Runout	-	-	-	-

## C1-ASOPOLVAL

This algorithm validates a self-funded policy throughout its lifecycle. It checks the following:

- The policy end date is not earlier than the policy start date.
- The runout end date is later than the policy end date.
- The runout end date is later than the system date while editing the policy which is in the **Runout** status.
- The runout end date is not removed when the policy is in the **Runout** or **Post Runout** status.
- The policy end date is not modified when the policy is in the **Runout** status.
- The policy end date is not set to a date which is later than or equal to the start date of a pricing rule which is defined for the **Runout** status.
- The runout end date is not set to a date which is later than or equal to the start date of a pricing rule which is defined for the **Post Runout** status.

- The runout end date is not set to a date which is earlier than the end date of a pricing rule which is defined for the **Runout** status.
- The policy is not edited when it is in the **Post Runout** status.
- The policy start date is not modified when the policy is in the **In Force/Active, Runout, or Post Runout** status.
- The policy person end date is not earlier than the policy person start date.
- The policy person role is specified while associating a person with the policy.
- One of the policy persons is set as the main customer of the policy.
- The policy end date is not changed when the policy is renewed.

## C1-ASOBOPOSP

This algorithm is invoked when you create a self-funded policy either from the user interface or through an inbound message. It creates a contract of the specified contract type for the self-funded policy on each account of the bill group. For example, if you create a self-funded policy named P1 for a bill group who has two accounts - A1 and A2, the system will create two contracts for P1 - one on the A1 account and another on the A2 account.

It contains the following parameter:

- **Contract Type** - Used to indicate the contract type whose contract you want to create for the self-funded policy on each account of the bill group. You can also specify comma-separated values for this parameter. It will then create a contract of each contract type for the self-funded policy on each account of the bill group.

## C1-ASOPRUCPY

This algorithm is invoked when the **Copy Pricing Rules** option is selected while renewing a self-funded policy. It copies the following pricing rules of the base policy and creates new pricing rules for the renewed policy:

- Claim
- Retention Type Claim Based
- Retention Type Enrollment Based
- Recurring Flat Fees
- Ancillary

While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively. If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.

## C1-ASOPOLMOA

This algorithm is invoked when the **Policy Periodic Monitor (C1-POLPR)** batch is executed. It does the following:

- If the self-funded policy is in the **Pending** status and the policy start date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Pending Status** parameter.
- If the start date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Pending Status** parameter is completed, it changes the status of the self-funded policy from **Pending** to **In Force/Active**.
- If the self-funded policy is in the **In Force/Active** status and the policy end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Active Status** parameter.

- If the end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Active Status** parameter is completed, it changes the status of the self-funded policy from **In Force/Active** to **Runout**.
- If the self-funded policy is in the **Runout** status and the runout end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Runout Status** parameter.
- If the runout end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Runout Status** parameter is completed, it changes the status of the self-funded policy from **Runout** to **Post Runout**.

It contains the following parameters:

- **To Do Type for Pending Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the policy start date.
- **To Do Type for Active Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the policy end date.
- **To Do Type for Runout Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the runout end date.
- **X Days** - Used to specify the number of days prior to which you want to create a To Do for the self-funded policy.

All these parameters are mandatory.

## C1-ASOPOLREN

This algorithm is invoked when you renew a self-funded policy. Once the new policy is created in the **Pending** status, it stamps the renewal date on the base policy.

## C1-ASOPCKTD

This algorithm is invoked when you click the **Activate** and **Runout** buttons in the **Policy** screen. On clicking the **Activate** button, it checks whether the To Do created for the **Pending** status is completed. If the To Do created for the **Pending** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **Pending** to **In Force/Active**.

Similarly, on clicking the **Runout** button, it checks whether the To Do created for the **In Force/Active** status is completed. If the To Do created for the **In Force/Active** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **In Force/Active** to **Runout**.

It also validates the following:

- The status of the policy is not changed from **Pending** to **In Force/Active** until the system date is later than or equal to the policy start date.
- The status of the policy is not changed from **In Force/Active** to **Runout** when the runout end date is not specified.
- The status of the policy is not changed from **In Force/Active** to **Runout** until the system date is later than the policy end date.
- The status of the policy is not changed to **Runout** if it is renewed.

In addition, it also changes the status of the base policies to **Runout** when the status of the latest renewed policy is changed to **Runout**.

## Policy (Used for Searching)

---

The **Policy** screen allows you to search for a policy using various search criteria. It also allows you to define a policy. It contains the following zone:

- [Search Policy](#) on page 351

Through this screen, you can navigate to the following screen:

- [Policy \(Used for Viewing\)](#) on page 364

## Search Policy

The **Search Policy** zone allows you to search for a policy using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for a policy using the policy or person details. The valid values are:</p> <ul style="list-style-type: none"> <li>• Policy Date/Policy Type/Status</li> <li>• Source System/Policy Number/Description</li> <li>• Person Name/Person Identifier</li> <li>• Policy Characteristics</li> </ul> <p><b>Note:</b> By default, the <b>Policy Date/Policy Type/Status</b> option is selected.</p>	Yes
Policy Type	<p>Used to search policies which are created using a particular policy type.</p> <p><b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.</p>	No
Start Date	<p>Used to search policies which are effective from a particular date.</p> <p><b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.</p>	No
Status	<p>Used to search policies with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul> <p><b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.</p>	
End Date	<p>Used to search policies which are effective till a particular date.</p> <p><b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.</p>	No
Source System	<p>Used to search policies which originated from a particular external system.</p> <p><b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.</p>	No
Policy Number	<p>Used to search a policy with a particular policy number.</p> <p><b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.</p>	No
Description	<p>Used to search policies with a particular description.</p> <p><b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.</p>	No
Person Name	<p>Used to search policies to which a particular person is associated.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	
Person Identifier Type	Used to indicate the person identifier type.  <b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search policies to which a person is associated.  <b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Characteristic Type	Used to search policies for which a particular characteristic type is defined.  <b>Note:</b> This field appears when the <b>Policy Characteristics</b> option is selected from the <b>Search By</b> list.  The list includes only those characteristic types where the characteristic entity is set to <b>Policy</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are searching for a policy using a characteristic.
Characteristic Value	Used to search policies with a particular characteristic value.	Yes (Conditional)  <b>Note:</b> This field is required when you are searching for a policy using a characteristic.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when the characteristic type is selected.</p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	

**Note:** You must specify at least one search criterion while searching for a policy.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	<p>Displays additional information about the policy.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.</p>
Source System	Indicates the external system from where the policy is originated.
Description	Displays the description of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Status	<p>Indicates the status of the policy. If the policy is created using the <b>C1-POLICY</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Pending Cancellation</li> <li>• Canceled</li> <li>• Pending Reinstatement</li> <li>• Reinstated</li> <li>• Pending Termination</li> </ul>

Column Name	Column Description						
	<ul style="list-style-type: none"> <li>Terminated</li> </ul> <p>However, if the policy is created using the <b>C1-ASOPolicy</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>Pending</li> <li>In Force/Active</li> <li>Runout</li> <li>Post Runout</li> </ul>						
Main Customer	<p>This column displays different data depending on whether you search for a policy using the policy or person details. The following table describes this column:</p> <table border="1" data-bbox="889 678 1464 1650"> <thead> <tr> <th data-bbox="889 678 1175 762">If you search for a policy using...</th> <th data-bbox="1179 678 1464 762">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="889 766 1175 1329"> <p>The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option</p> </td> <td data-bbox="1179 766 1464 1329"> <p>The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="1179 1104 1464 1314" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> </div> </td> </tr> <tr> <td data-bbox="889 1333 1175 1650"> <p>The <b>Person Name/Person Identifier</b> option</p> </td> <td data-bbox="1179 1333 1464 1650"> <p>The <b>Main Customer</b> column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul> </td> </tr> </tbody> </table>	If you search for a policy using...	Then...	<p>The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option</p>	<p>The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. ## Searching for a Policy

### Prerequisites

To search for a policy, you should have:

- Policy types and person identifier types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### Procedure

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Policy**.  
A sub-menu appears.
3. Click the **Search** option from the **Policy** sub-menu.  
The **Policy** screen appears.
4. Enter the search criteria in the **Search Policy** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 5. Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

## Viewing the Policy Details

### Procedure

To view the details of a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to view.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the details of the policy in the **Policy** zone.

## Defining a Policy

Oracle Revenue Management and Billing enables you to define a policy for the fully-insured and self-funded health insurance business. You can define a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. However, you can define a self-funded policy using a policy type where the policy category is set to **Self-Funded**.

**Note:** At present, the **Fully-Insured Individual** policy category is not supported in the system.

### Prerequisites

To define a policy, you should have:

- Policy types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Note:** This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT\_ADM\_OPT\_FLG** lookup field

**Note:** This prerequisite is applicable when you want to define a self-funded policy.

### **Procedure**

To define a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Policy**.  
A sub-menu appears.
3. Click the **Add** option from the **Policy** sub-menu.

The **Select Policy Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to indicate the policy type using which you want to create a policy.  <b>Note:</b> If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to <b>Self-Funded</b> .	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy** screen.

4. Select the required policy type from the respective field.
5. Click **OK**.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the external system from where the policy is originated.	Yes
	<b>Note:</b> This field appears when you are defining a policy using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	
Start Date	Used to specify the date from when the policy is effective.	Yes
	<b>Note:</b> The policy start date cannot be later than the policy end date.	
End Date	Used to specify the date till when the policy is effective.	Yes
	<b>Note:</b> The policy end date cannot be earlier than the policy start date.	
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No
	<b>Note:</b> The runout end date cannot be earlier than or equal to the policy end date.  This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b> .	
Runout Administration Fees	Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	
Advance Level Funding Eligibility	<p>Indicates whether the self-funded policy is eligible for advance billing feature of level funding.</p> <p><b>Note:</b></p> <p>This is a read-only field. By default, the value is set to <b>No</b>. You can edit the advance level funding eligibility only through a health care inbound message.</p> <p>This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	Not applicable

6. Enter the required details in the **Main** section.
7. Associate the required persons with the policy.

**Note:** While defining a policy, you must associate a person who is the main customer of the policy.

8. Define the characteristics for the policy, if required.
9. Click **Save**.

The policy is defined and its status is set to **Pending**.

How to define a characteristic for a policy	<a href="#">Defining a Characteristic for a Policy</a> on page 362

## Associating a Person with a Policy

### Prerequisites

To associate a person with a policy, you should have:

- Required persons defined in the application
- Required policy person roles defined in the application

### **Procedure**

To associate a person with a policy:

1. Ensure that the **Persons** section is expanded when you are defining or editing a policy.

The **Persons** section contains the following fields in a grid:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Person	Used to indicate the person that you want to associate with the policy.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.  On specifying the person ID, the person name appears corresponding to the <b>Person</b> field.	Yes
Sequence	Used to specify the sequence number for the associated person.	Yes
Policy Person Role	Used to indicate the role of a person in the policy.	Yes
Main Customer	Used to indicate whether the person is the main customer of the policy.  <b>Note:</b> At a time, only one person can be the main customer of the policy.	Yes (Conditional)  <b>Note:</b> You must select this option while associating a person who is the main customer of the policy.
Start Date	Used to specify the date from when the person is associated with the policy.  <b>Note:</b> The start date cannot be later than the end date.  The start date cannot be earlier than the policy start date and later than the policy end date.	Yes
End Date	Used to specify the date till when the person is associated with the policy.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the policy start date and later than the policy end date. This validation is done when the policy is transition to the status which is not specified in the <b>Skip Status for Policy Person End Date Validation</b> parameter of the <b>C1-POLBOVAL</b> algorithm. For example, if you set the <b>Skip Status for Policy Person End Date Validation</b> parameter of the <b>C1-POLBOVAL</b> algorithm to <b>TERMINATED</b>, the system will not perform this validation when the status of the policy is changed to <b>Terminated</b>.</p>	

2. Enter the required details in the **Persons** section.

**Note:** While associating the persons with a policy, you must always ensure that one person is the main customer of the policy.

3. If you want to associate more than one person with the policy, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to dissociate a person from the policy, click the **Delete (🗑)** icon corresponding to the person.

4. Click **Save**.

The persons are associated with the policy.

## **Defining a Characteristic for a Policy**

### **Prerequisites**

To define a characteristic for a policy, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### **Procedure**

To define a characteristic for a policy:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a policy.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the policy.	Yes (Conditional)
	<b>Note:</b> The effective date cannot be earlier than the policy start date and later than the policy end date.	<b>Note:</b> This field is required when you are defining a characteristic for the policy.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Policy</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the policy.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<b>Note:</b> This field is required when you are defining a characteristic for the policy.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the policy, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the policy, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the policy.

## Policy (Used for Viewing)

---

The **Policy** screen allows you to:

- View the details of a fully-insured group or self-funded policy
- Edit the details of a fully-insured group or self-funded policy
- Activate a fully-insured group or self-funded policy
- Add or edit plans in a fully-insured group policy
- Add memberships to a fully-insured group policy plan
- Initiate the termination process for a fully-insured group policy
- Terminate a fully-insured group policy
- Initiate the cancellation process for a fully-insured group policy
- Cancel a fully-insured group policy
- Initiate the reinstatement process for a fully-insured group policy
- Reinstatement a fully-insured group policy
- View the log of a fully-insured group or self-funded policy
- Add a log entry for a fully-insured group or self-funded policy

It consists of the following tabs:

- [Policy - Main](#) on page 364
- [Policy - Plan](#) on page 372
- [Policy - Log](#) on page 375

### Policy - Main

The **Main** tab displays information about the policy. It contains the following zones:

- [Policy](#) on page 364
- [Policy Characteristics](#) on page 372

### Policy

The **Policy** zone displays the details of the fully-insured group or self-funded policy. It contains the following sections:

- **Main** - Displays basic information about the policy. It contains the following fields:

Field Name	Field Description
Base Policy Information	Displays information about the base policy.
	<b>Note:</b> This field appears when you are viewing the details of a renewed policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .
Policy Information	Displays information about the policy.
Policy Type	Indicates the policy type using which the policy is created.

Field Name	Field Description
	<p><b>Note:</b> It has a link. On clicking the link, the <b>Policy Type</b> screen appears where you can view the details of the respective policy type.</p>
Status	<p>Indicates the status of the policy. If the policy is created using the <b>C1-POLICY</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Pending Cancellation</li> <li>• Canceled</li> <li>• Pending Reinstatement</li> <li>• Reinstated</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> <p>However, if the policy is created using the <b>C1-ASOPolicy</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>
Status Reason	<p>Indicates the reason why the policy is terminated.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective termination reason.</p> <p>This field appears when you are viewing the details of a terminated or reinstated policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b>.</p>
Policy Number	Displays the policy number.
Description	Displays the description of the policy.
Source System	Indicates the external system from where the policy is originated.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Renewal Date	Displays the date when the policy is renewed.

Field Name	Field Description																					
	<p><b>Note:</b> This field appears when you are viewing the details of a policy which is renewed.</p>																					
Paid Through Date	<p>Indicates the term end date of the last fully or partially paid term. The system considers the term to be fully paid when the threshold limit is met.</p> <p><b>Note:</b> This field appears when the following conditions are met:</p> <ul style="list-style-type: none"> <li>• When you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b>.</li> <li>• When the paid through date is calculated at the policy level.</li> </ul> <p>The paid through date is calculated while freezing or canceling a payment or adjustment depending on whether the required algorithm is attached to the respective system event:</p> <table border="1" data-bbox="889 957 1463 1339"> <thead> <tr> <th>Entity</th> <th>System Event</th> <th>Algorithm</th> </tr> </thead> <tbody> <tr> <td>Customer Class</td> <td>Payment Freeze</td> <td>C1-PSPTDCAL</td> </tr> <tr> <td>Customer Class</td> <td>Payment Cancellation</td> <td>C1-PXPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Freeze</td> <td>C1-ADPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Cancellation</td> <td>C1-AXPTDCAL</td> </tr> </tbody> </table> <p>The following table indicates when the paid through date is calculated at the policy and/or membership level:</p> <table border="1" data-bbox="889 1476 1463 1921"> <thead> <tr> <th>If the Paid Through Date Calculation Level parameter is set to...</th> <th>If the following characteristics are defined for the billable charge or adjustment...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>P</td> <td>C1-POLID</td> <td>Paid through date is calculated at the policy level</td> </tr> </tbody> </table>	Entity	System Event	Algorithm	Customer Class	Payment Freeze	C1-PSPTDCAL	Customer Class	Payment Cancellation	C1-PXPTDCAL	Adjustment Type	Adjustment Freeze	C1-ADPTDCAL	Adjustment Type	Adjustment Cancellation	C1-AXPTDCAL	If the Paid Through Date Calculation Level parameter is set to... Button Name	Button Description						
	<p><b>Note:</b></p> <p>The <b>Activate</b> button appears when a policy of the respective category is in either of the following status:</p> <table border="1" data-bbox="889 344 1461 606"> <thead> <tr> <th data-bbox="896 352 1175 394">Policy Category</th> <th data-bbox="1182 352 1455 394">Status</th> </tr> </thead> <tbody> <tr> <td data-bbox="896 403 1175 537">Fully-Insured Group or Fully-Insured Individual</td> <td data-bbox="1182 403 1455 537"> <ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul> </td> </tr> <tr> <td data-bbox="896 546 1175 596">Self-Funded</td> <td data-bbox="1182 546 1455 596"> <ul style="list-style-type: none"> <li>• Pending</li> </ul> </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>	Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>
Policy Category	Status						
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>						
Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>						
Initiate Cancellation	<p>Used to initiate the cancellation process for the fully-insured group policy.</p> <p><b>Note:</b> The <b>Initiate Cancellation</b> button appears when the fully-insured group policy is in the <b>In Force/Active</b> status.</p>						
Cancel	<p>Used to cancel the fully-insured group policy.</p> <p><b>Note:</b> The <b>Cancel</b> button appears when the fully-insured group policy is in the <b>Pending Cancellation</b> status.</p>						
Initiate Termination	<p>Used to initiate the termination process for the fully-insured group policy.</p> <p><b>Note:</b> The <b>Initiate Termination</b> button appears when the fully-insured group policy is in the <b>In Force/Active</b> status.</p>						
Terminate	<p>Used to terminate the fully-insured group policy.</p> <p><b>Note:</b> The <b>Terminate</b> button appears when the fully-insured group policy is in the <b>In Force/Active, Pending Reinstatement, or Pending Termination</b> status.</p>						
Initiate Reinstatement	<p>Used to initiate the reinstatement process for the terminated policy.</p> <p><b>Note:</b> The <b>Initiate Reinstatement</b> button appears when the fully-insured group policy is in the <b>Terminated</b> status.</p>						
Reinstate	<p>Used to reinstate the terminated policy.</p> <p><b>Note:</b> The <b>Reinstate</b> button appears when the fully-insured group policy is in the <b>Pending Reinstatement or Terminated</b> status.</p>						

Button Name	Button Description
Runout	Used to transition the self-funded policy to the <b>Runout</b> status.  <b>Note:</b> The <b>Runout</b> button appears when the self-funded policy is in the <b>In Force/Active</b> status. You cannot transition a self-funded policy to the <b>Runout</b> status when: <ul style="list-style-type: none"> <li>• The self-funded policy is renewed.</li> <li>• The runout end date is not specified.</li> <li>• The policy end date is earlier than the system date.</li> </ul>

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the policy is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the policy status is updated.
Create Date/Time	Displays the date and time when the policy is created.

- **Termination Information** - Displays the termination details of the fully-insured group policy. It appears when the policy is in the **Pending Termination** status. It contains the following fields:

Field Name	Field Description
Terminate Date	Displays the date when you want to terminate the policy.
Terminate Reason	Indicates the reason why the termination process is initiated for the policy.  <b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective termination reason.

- **Reinstate Information** - Displays the reinstatement details of the terminated policy. It appears when the policy is in the **Pending Reinstatement** status. It contains the following fields:

Field Name	Field Description
Reinstate Reason	Indicates the reason why you want to reinstate the fully-insured group policy.

Field Name	Field Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective reinstatement reason.

### Policy Characteristics

The **Policy Characteristics** zone lists the characteristics of the fully-insured group or self-funded policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### Policy - Plan

The **Plan** tab lists the plans defined for the policy and memberships defined for each policy plan. It contains the following zones:

- [Plans](#) on page 373
- [Memberships](#) on page 374

### Plans

The **Plans** zone lists the plans which are defined in the policy. It contains the following columns:

Column Name	Column Description
Plan Information	Displays information about the policy plan. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Price Item Information	Indicates the price item to which the policy plan is directly associated.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Plan</b> screen appears where you can edit the details of the policy plan.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new policy plan by clicking the **Add** link in the upper-right corner of this zone. On clicking the **Broadcast** (📡) icon corresponding to a policy plan, the **Memberships** zone appears.

**Note:** Ideally, you define plans in a policy which is created using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**.

You can filter the list using various search criteria (such as, **Price Item**, **Plan Number**, and **Effective From**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper-right corner of this zone.

## Memberships

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership.  <b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Terminated</li> </ul>
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> <li>• Retiree</li> </ul>
Benefits	On clicking the <b>Benefits</b> (  ) icon, the <b>Benefit</b> screen appears where you can view the Medicare benefits of the member persons who belong to the membership.  <b>Note:</b> The <b>Benefits</b> icon appears when a Medicare benefit is defined for a member person who belongs to the membership.
Membership ID	Displays the membership ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062

## Activating a Policy

### Procedure

To activate a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to activate.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Activate** button in the **Policy** zone.

The status of the policy is changed to **In Force/Active**.

#### **Note:**

The **Activate** button appears only when a policy of the respective category is in either of the following status:

Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>
Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>

## Editing a Policy

### Prerequisites

To edit a policy, you should have:

- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Note:** This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT\_ADM\_OPT\_FLG** lookup field

**Note:** This prerequisite is applicable when you want to define a self-funded policy.

### Procedure

To edit a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Policy** zone.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Displays information about the policy.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined.	Not applicable
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>	Not applicable
	<b>Note:</b> This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .	
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	<b>Note:</b> This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	
Start Date	Used to specify the date from when the policy is effective.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The policy start date cannot be later than the policy end date.</p> <p>You cannot change the start date of a self-funded policy when it is in the <b>In Force/Active, Runout, or Post Runout</b> status.</p>	
End Date	<p>Used to specify the date till when the policy is effective.</p> <p><b>Note:</b></p> <p>The policy end date cannot be earlier than the policy start date.</p> <p>You cannot change the end date when the self-funded policy is in the <b>Runout</b> status.</p> <p>You cannot set the end date of a self-funded policy to a date which is later than or equal to the start date of a pricing rule which is defined for the <b>Runout</b> status.</p> <p>You cannot change the end date when the policy is renewed.</p>	Yes
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p> <p>The runout end date cannot be earlier than or equal to the policy end date.</p> <p>The runout end date cannot be earlier than or equal to the system date when the policy is in the <b>Runout</b> status.</p> <p>You cannot remove the runout end date when the policy is in the <b>Runout</b> or <b>Post Runout</b> status.</p> <p>You cannot set the runout end date to a date which is later than or equal to the start date of a pricing rule which is defined for the <b>Post Runout</b> status.</p> <p>You cannot set the runout end date to a date which is earlier than the end date of a pricing rule which is defined for the <b>Runout</b> status.</p>	
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <p><b>Note:</b></p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	No

**Note:**

The **Edit** button appears when a policy of the respective category is in either of the following status:

Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>
Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>

5. Modify the required details in the **Main** section.
6. Associate the persons with the policy, if required.

**Note:** While editing a policy, you must ensure that one person is associated as the main customer of the policy.

7. Define, edit, or remove characteristics of the policy, if required.
8. Click **Save**.

The changes made to the policy are saved.

**Manually Changing the Status of a Self-Funded Policy to Runout****Prerequisites**

To manually change the status of a self-funded policy to **Runout**, you should have:

- Runout end date specified in the self-funded policy.

**Procedure**

To manually change the status of a self-funded policy to **Runout**:

1. Search for the self-funded policy in the **Policy** screen.

- In the **Search Results** section, click the link in the **Policy Information** column corresponding to the self-funded policy whose status you want to change.

The **Policy** screen appears.

- Ensure that the **Main** tab is selected.
- Click the **Runout** button in the **Policy** zone.

The status of the self-funded policy is changed to **Runout**.

**Note:**

The **Runout** button appears when the self-funded policy is in the **In Force/Active** status.

You cannot transition a self-funded policy to the **Runout** status when:

- The self-funded policy is renewed.
- The runout end date is not specified.
- The policy end date is earlier than the system date.

**Related Topics**

For more information on...	See...
How to search for a self-funded policy	<a href="#">Searching for a Policy</a> on page 356

## Renewing a Self-Funded Policy of a Bill Group

Oracle Revenue Management and Billing enables you to renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy when it is in the **In Force/Active** status and is not yet renewed. For more information, see [Self-Funded Policy Renewal](#) on page 456.

**Procedure**

To renew a self-funded policy of a bill group:

- Search for the bill group who is associated with the self-funded policy (which you want to renew) in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** () icon corresponding to the bill group whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Click the **Pricing Information** tab.

The **Pricing Information** tab appears.

- In the **Bill Group Self-Funded Policy Information** zone, click the **Renew** () icon in the **Renew** column corresponding to the self-funded policy which you want to renew.

The **Policy** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the renewed policy.
- Persons** - Used to associate or disassociate persons from the renewed policy.

**Note:** You cannot disassociate persons who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration.

- **Characteristics** - Used to define the characteristics for the renewed policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Base Policy Information	Indicates the policy which you want to renew.	Not applicable
Policy Type	Indicates the policy type using which the base policy is created.	Not applicable
Policy Number	Used to specify the policy number of the renewed policy.	Yes
Description	Used to specify the description for the renewed policy.	Yes
Start Date	<p>Used to specify the date from when the renewed policy is effective.</p> <p><b>Note:</b> By default, the start date is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than or equal to the base policy's end date.</p>	Yes
End Date	<p>Used to specify the date till when the renewed policy is effective.</p> <p><b>Note:</b> The end date cannot be earlier than the start date.</p>	Yes
Runout End Date	<p>Used to specify the date when the runout period of the renewed policy ends.</p> <p><b>Note:</b> The runout end date cannot be earlier than or equal to the renewed policy's end date.</p>	No
Runout Administration Fees	Used to indicate whether the administration fees must be charged when the claim transaction	No

Field Name	Field Description	Mandatory (Yes or No)
	<p>for the policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <p><b>Note:</b> At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p>	
Copy Pricing Rules	<p>Used to indicate whether you want to copy the pricing rules of the base policy to the renewed policy. If you select the <b>Copy Pricing Rules</b> option, the system copies the following pricing rules of the base policy:</p> <ul style="list-style-type: none"> <li>• Claim</li> <li>• Retention Type Claim Based</li> <li>• Retention Type Enrollment Based</li> <li>• Recurring Flat Fees</li> <li>• Ancillary</li> </ul> <p><b>Note:</b></p> <p>While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively.</p> <p>If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.</p>	No
Copy Advance Level Funding Eligibility	Used to indicate whether you want to copy the advance level funding eligibility value of the base policy to the renewed policy.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If the <b>Copy Advance Level Funding Eligibility</b> option is set to <b>Y</b> in the base policy, the system activates the renewed self-funded policy on the policy renewal even if the renewed policy's start date is later than the system date.</p> <p>This field appears only when you want to renew a self-funded policy.</p>	

**Note:** The **Renew** icon appears when the policy is in the **In Force/Active** status and it is not yet renewed.

5. Enter the required details in the **Main** section.
6. Associate or disassociate persons from the renewed policy, if required.
7. Define, edit, or remove characteristics of the renewed policy, if required.
8. Click **Save**.

The renewed policy is created in the **Pending** status. The renewal date is stamped corresponding to the base policy in the **Bill Group Self-Funded Policy Information** zone.

## Adding a Log Entry for a Policy

### Procedure

To add a log entry for a policy:

- Search for the policy in the **Policy** screen.
- In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to add a log entry.

The **Policy** screen appears.

- Click the **Log** tab.

The **Log** tab appears.

- Click the **Add Log Entry** link in the upper right corner of the **Policy Log** zone.

The **Add Policy Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Displays information about the policy.	Not applicable
Log Details	Used to specify additional comments for the policy.	Yes

- Enter the comments in the **Log Details** field.
- Click **Save**.

The log entry is added in the **Policy Log** zone.

## Individual Health Insurance

---

### Topics:

- [Individual Membership](#)
- [Individual Membership Termination](#)
- [Individual Membership Renewal](#)
- [Automatic Contract Creation for Individual Membership](#)
- [Rate Guarantee for Individual Membership](#)
- [Late Setup Notification](#)
- [Young Adult Coverage in an Individual Membership](#)
- [Individual Membership Preference](#)
- [Binder Payment for Individual Membership](#)
- [Membership Status Reason Preference](#)

Individual health insurance is a coverage that an individual purchase on its own, on an individual or family basis, as opposed to obtaining through an employer. An individual can buy a generic, Medicare, Medicaid, or CHIP health insurance plan from a health insurance payer or from an insurance exchange.

A health insurance payer and insurance exchange sells different plans from the health products to an individual. A health product is a discrete package of health insurance coverage benefits that are offered using a particular product network type (such as health maintenance organization, preferred provider organization, exclusive provider organization, point of service, or indemnity) within a service area.

A health product can include multiple health benefit plans which may cover medical expenses, hospitalization, doctor and hospital visits, prescription drugs, wellness care, etc. A health benefit plan can be a primary or add-on plan. A primary health benefit plan is a standalone plan, which is sold directly. For example, Medical Insurance is a primary health insurance plan.

An add-on plan is also known as supplemental plan. An add-on plan can be an ancillary or rider plan. An add-on plan is not a standalone plan and hence it is not sold directly. For example, the Dental, Vision, Accidental Death, Disability, Critical Illness, Long-Term Care, and Life Insurance plans can be sold as add-on health insurance plans.

Oracle Revenue Management and Billing enables you to create and edit the following entities for a fully-insured individual business:

- Health Products
- Health Plans
- Individual Memberships
- Member Persons
- Medicare or Other Benefits
- Accounts
- Contracts
- Price Items (offered as services)
- Pricing Rule Types
- Pricing Rules
- Price Assignments
- Billable Charges

Two new business objects named **C1-HealthcareProduct** and **C1-HealthPlan** are introduced in this release. The **C1-HealthcareProduct** business object

enables you to create a health product. You can define and edit a health product through a health product and plan inbound message. While defining a health product, you need to specify the following details – product type, product sub type, product category, product LOB, product LOB category, start date, end date, status, etc. A health product can be a bundled or non-bundled product. A bundled product means it includes one or more health products. You can define characteristics for a health product. A health product should be associated with a division (i.e. service area). You can associate a health product to one or more divisions and one division can have one or more health products.

The **C1-HealthPlan** business object enables you to create a health plan for a health product. You can define and edit a health plan through a health product and plan inbound message. While defining a health plan, you need to specify the following details – health product, start date, end date, status, etc. In addition, you need to indicate whether the health plan is a charitable plan, standard plan, grandfather plan, qualified from exchange, ancillary plan, rider plan, add-on plan, etc. You can define characteristics for a health plan.

A health product can have one or more health plans. On inactivating a health product, the system will not automatically inactivate the respective health plans. An individual can subscribe for one or more health plans. The system creates an individual membership for each subscribed health plan. An individual membership can have one or more member persons. One member person in an individual membership must be the main subscriber. You can add one or more dependent persons in the individual membership. One member person in an individual membership should be financially responsible for the individual membership. For more information, see the [Individual Membership](#) on page 505 section.

If an individual subscribe for an add-on health plan along with a primary health plan, the system enables you to indirectly link a primary health plan with an add-on health plan by associating the primary individual membership with the add-on individual membership. At present, you can associate only one add-on individual membership with the primary individual membership. The system creates the billable charges for both primary and add-on individual memberships independently.

On terminating the primary individual membership, the system provides a facility to automatically terminate the individual membership on the add-on health plan. For more information, see the [Individual Membership Termination](#) on page 507 section. However, on canceling, reinstating, or renewing a primary individual membership, the system does not automatically cancel, reinstate, or renew the individual membership on the add-on health plan. To cancel, reinstate, or renew an individual membership on the add-on health plan, the system must receive the required information for the individual membership from the enrollment system.

## Individual Membership

Oracle Revenue Management and Billing enables you to create and edit individual memberships from the user interface and through a health care inbound message or membership repricing inbound web service. Note that the user interface for adding and editing individual memberships is not yet well-designed and should only be used by the presales and sales teams for learning and demo purposes and not by the customers.

A new business object for individual membership named **C1-IndMembership** is introduced in this release. While creating an individual membership through a health care inbound message, you need to specify the following details:

- **Health Plan** - Used to indicate the health plan for which the main subscriber has enrolled.
- **Member Person Status** - Used to indicate the main subscriber or dependent person's status.
- **Status Reason** - Used to indicate the reason why you want to change the status of the main subscriber or dependent person.
- **Auto Renew** - Used to indicate whether the individual membership should be automatically renewed.
- **Contract Period** - Used to indicate the period (in months) for which the individual membership should be automatically renewed.
- **Membership Renewal Date** - Used to indicate the date when the individual membership should be renewed. It is required for manual renewal of the individual membership. In case of automatic renewal, the membership renewal date is calculated by the system.
- **Associated Membership Details** - Used to associate the individual membership with another individual membership which is created for the add-on health insurance plan.
- **Member Identifiers** - Used to specify one or more identifiers for the individual membership.
- **Exchange Details** - Used to indicate whether the individual membership is purchased from the exchange. If the individual membership is purchased from the exchange, you need to specify the exchange ID.
- **Binder Payment Details** - Used to indicate whether the binder payment is required for the individual membership. If so, you need to specify the following details:
  - Grace Days
  - Binder Liability Amount (if required)
  - Threshold Percentage (if required)
  - Hold Billing

For more information about the binder payments, see the [Binder Payment for Individual Membership](#) on page 521 section.

**Note:** On creating an individual membership for a health plan, the membership category is set to **INDV**. However, on creating a group membership for a policy plan, the membership category is set to **GRUP**.

The following table lists the statuses introduced in the lifecycle of the **C1-IndMembership** business object:

Individual Membership Status	Description
Draft	An individual membership is created in the <b>Draft</b> status and then transitioned to either the <b>Pending Effectuation</b> or <b>Active</b> status as mentioned in the health care inbound message or membership repricing incoming message.
Pending Effectuation	If the main subscriber status is set to <b>Pending Effectuation</b> , the system sets the status of the individual membership to <b>Pending Effectuation</b> . The system

Individual Membership Status	Description
	<p>determines the individual membership status reason using the membership status reason preference which is specified in the <b>Status Reason Mapping</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</p> <p>The system monitors whether the binder payments (if required) are received for the individual membership in the <b>Pending Effectuation</b> status. If the binder payments are received, the status of the individual membership is not automatically transitioned to <b>Active</b>. The status of the individual membership is changed from <b>Pending Effectuation</b> to <b>Active</b> only when the main subscriber status update information is received through a health care inbound message or membership repricing inbound web service.</p>
Active	<p>If the main subscriber status is set to <b>Active</b>, the system sets the status of the individual membership to <b>Active</b>. The system determines the individual membership status reason using the membership status reason preference which is specified in the <b>Status Reason Mapping</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</p> <p>If the binder payments are not required for the individual membership, you can directly set the status of main subscriber to <b>Active</b>. In addition, if you want to reinstate the individual membership, you must set the status of main subscriber to <b>Active</b>. The system will then change the status of the individual membership from <b>Terminated</b> to <b>Active</b>. In case of reinstatement of the individual membership, the status of the dependent persons is not changed automatically from <b>Inactive</b> to <b>Active</b> unless the dependent person status update information is received through a health care inbound message or membership repricing inbound web service.</p>
Terminated	<p>If the main subscriber status is set to <b>Inactive</b>, the system sets the status of the individual membership to <b>Terminated</b>. The system determines the individual membership status reason using the membership status reason preference which is specified in the <b>Status Reason Mapping</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</p> <p>Once the status of the individual membership is set to <b>Terminated</b>, the system automatically changes the status of the dependent persons to <b>Inactive</b>. Note that while inactivating the dependent persons, the system only considers the dependent persons who are in the <b>Active</b> status. The system determines the dependent person status reason using the membership status reason preference. The system also updates the end date of the individual membership, main subscriber, and dependent persons. For more information, see the <a href="#">Individual Membership Termination</a> on page 507 section.</p>

Individual Membership Status	Description
Canceled	<p>If the main subscriber status is set to <b>Canceled</b>, the system sets the status of the individual membership to <b>Canceled</b>. The system determines the individual membership status reason using the membership status reason preference which is specified in the <b>Status Reason Mapping</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</p> <p>Once the status of the individual membership is set to <b>Canceled</b>, the system automatically changes the status of the dependent persons to <b>Canceled</b>. The system determines the dependent person status reason using the membership status reason preference.</p> <p>The system will also cancel the billable charges and bill segment (if any) created for the individual membership or financially responsible member person account.</p>

The system also enables you to change the status of a dependent person in the individual membership through a health care inbound message or membership repricing inbound web service. On changing the status of a member person to **Pending Effectuated** or **Active**, the system considers the member person during premium calculation.

On changing the status of the individual membership and member person, the system creates an audit event to trigger the repricing feature. The **C1-IndMembership** business object is configured for the entity audit framework. However, the repricing is triggered only when an active audit event type for the **C1-IndMembership** business object is created in the system.

The system creates appropriate log entries during the individual membership and member person status transition. You can view the status transition logs of individual membership in the **Log** tab of the **Membership (Used for Viewing)** screen. A new zone named **Member Person Log** is introduced in the **Main** tab of the **Membership (Used for Viewing)** screen. It enables you to view the log entries generated on the member person status transition.

You can define individual membership status reasons through the **Status Reason** screen. A new lookup field named **MEMB\_PERS\_STAT\_RSN\_FLG** is introduced in this release. Here, you can add the status reasons for the member person.

## Individual Membership Termination

To terminate an individual membership, you need to change the status of the main subscriber to **Inactive** through a health care inbound message or membership repricing inbound web service. Along with the main subscriber status, you need to specify the status reason and end date for the main subscriber. If the end date is earlier than or equal to the inbound processing date, the system updates the status, status reason, and end date of the main subscriber and then changes the status of the individual membership to **Terminated**. The system determines the individual membership status reason using the membership status reason preference which is specified in the **Status Reason Mapping** option type of the **C1-ASOBLNG** feature configuration.

Once the status of the individual membership is set to **Terminated**, the system automatically changes the status of the dependent persons to **Inactive**. Note that while inactivating the dependent persons, the system only considers the dependent persons who are in the **Active** status. The system determines the dependent person status reason using the membership status reason preference.

If the main subscriber end date is later than the inbound processing date, the system creates a record in the **CI\_MEMBERSHIP\_PROCESS** table with the **Pending** status. The system stores the following information in the record:

- Membership ID
- Member Person ID

- Whether the member person is a main subscriber
- Processing date (it is set to future dated end date of the member person)
- Required action (is set to **Terminate**)

A new batch named **C1-MEPRC** is introduced in this release. On the **C1-MEPRC** batch execution, the system checks whether there are any records in the **CI\_MEMBERSHIP\_PROCESS** table with the **Pending** status. If so, the system checks whether the processing date of the record is earlier than or equal to the system date. If so, the system determines the required action to be taken for the individual membership from the record. If the **MEMB\_PROCESS\_FLG** column of the record is set to **Terminate** and the **MAIN\_CUST\_SW** column is set to **N**, the system changes the status of the dependent person to **Inactive** and updates the end date of the dependent person.

However, if the **MEMB\_PROCESS\_FLG** column of the record is set to **Terminate** and the **MAIN\_CUST\_SW** column is set to **Y**, the system updates the status and end date of the main subscriber and then changes the status of the individual membership to **Terminated**. Once the status of the individual membership is set to **Terminated**, the system automatically changes the status of the dependent persons to **Inactive**. The system also updates the end date of the individual membership and dependent persons.

The system enables you to configure whether the individual membership on the add-on health insurance plan should be automatically terminated when the primary individual membership is terminated. If the **Cascade Associate Membership** parameter in the **C1-MEMSTSUP** algorithm is set to **Y**, the system changes the status of the associated individual membership to **Terminated**. Once the status of the associated individual membership is set to **Terminated**, the system automatically changes the status of its main subscriber and dependent persons to **Inactive**. The system also updates the end date of the associated individual membership, its main subscriber and its dependent persons.

Once the required action is completed for the record in the **CI\_MEMBERSHIP\_PROCESS** table, the system changes the status of the record to **Complete**. However, if the system receives a reinstatement request for an individual membership before processing the termination request, the system changes the status of the record in the **CI\_MEMBERSHIP\_PROCESS** table to **Canceled**.

## Individual Membership Renewal

---

Oracle Revenue Management and Billing enables you to renew an individual membership in the following two ways:

- Manually
- Automatically

While creating or editing an individual membership through a health care inbound message or membership repricing inbound web service, you must set the **Auto Renew** option for the individual membership to either **Y** or **N**.

If the **Auto Renew** option for an individual membership is set to **N**, you need to specify the following details in a health care inbound message or membership repricing incoming message:

- Membership renewal date
- Status, status reason, and end date of the main subscriber
- Status, status reason, and end date of the dependent person

The enrollment system can send the renewal information either during the enrollment period or after the enrollment period. Irrespective of when the renewal information is received, the membership renewal date must be set to the membership end date + 1. For example, if the enrollment period is from 01-01-2021 to 12-31-2021, then the system must receive the membership renewal date as 01-01-2022. On renewing an individual membership, the dependent person in the individual membership is not automatically activated unless the activation information is received for the dependent person from the enrollment system. The associated membership for an add-on health insurance plan is not automatically renewed unless the renewal information is received for the respective membership from the enrollment system.

If the **Auto Renew** option for an individual membership is set to **Y**, you need to specify the contract period for which the individual membership should be automatically renewed. The system then creates a record in the **CI\_MEMBERSHIP\_PROCESS** table with the **Pending** status. The system stores the following information in the record:

- Membership ID
- Main Subscriber ID
- Whether the member person is a main subscriber
- Processing date (it is set to the membership end date)
- Required action (is set to **Renew**)

On the **C1-MEPRC** batch execution, the system checks whether there are any records in the **CI\_MEMBERSHIP\_PROCESS** table with the **Pending** status. If so, the system checks whether the processing date of the record is earlier than or equal to the system date. If so, the system determines the required action to be taken for the individual membership from the record. If the **MEMB\_PROCESS\_FLG** column of the record is set to **Renew** and the **MAIN\_CUST\_SW** column is set to **Y**, the system calculates the renewal date and new end date for the individual membership.

The renewal date for the individual membership is set to membership end date + 1. For example, if the enrollment period is from 01-01-2021 to 12-31-2021, the system sets the renewal date to 01-01-2022 (i.e. 12-31-2021 + 1). The new membership end date is calculated using the renewal date and contract period. For example, if the renewal date is 01-01-2022 and contract period is 12 months, the system sets the end date of membership, main subscriber, and dependent persons to 12-31-2022. The associated membership for an add-on health insurance plan is not automatically renewed during the individual membership renewal.

The automatic renewal request for an individual membership must be received during the enrollment period. If the automatic renewal request for an individual membership is received after the enrollment period, the system will not renew the individual membership automatically.

Once the membership end date is changed, the system will trigger the repricing feature and accordingly create or extend the billable charge for the renewed period.

## Automatic Contract Creation for Individual Membership

---

Oracle Revenue Management and Billing automatically creates contracts for each account of the financially responsible member person when:

- Person is added to an individual membership
- Account is added for a financially responsible member person
- Health plan is added or edited in the system

In the former two scenarios, the system derives the individual membership where the person is financially responsible for the membership. Once the individual membership is derived, the system derives the health plan for which the individual membership is enrolled.

Once the health plan is derived, the system checks whether the pricing rule types are associated with the health plan. If a pricing rule type is associated with the health plan and the pricing rule type contains one or more price items, it creates a contract using a distinct contract type which is associated with each price item. Let us assume that PRT1 is associated with the health plan and it contains three price items - PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two distinct contracts - C1 using CT1 and C2 using CT2.

If multiple pricing rule types are associated with the health plan and each pricing rule type contains multiple price items, it creates a contract using a distinct contract type which is associated with each price item of each pricing rule type.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective individual membership. If the same contract type is associated with the same or different price items on the same or different pricing rule types of different health plans, the contract start date is set to the start date of the earliest health plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

**Note:**

The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

## Rate Guarantee for Individual Membership

At times, the insurance carriers provide rate guarantee health plans to a fully-insured individual wherein the insurance rate does not change for the rate guarantee period (i.e. lock-in period). Oracle Revenue Management and Billing enables you to configure guaranteed rate for one or more health insurance services offered to an individual person. Unless, there are some qualifying life events (QLE), the system will calculate the premium on the same rate for the next coverage period until the rate guarantee period is over.

The system enables you to maintain the rate guarantee details for each individual membership through a health care inbound message or through membership repricing inbound web service. It enables you to capture the following details:

- **Rate Guarantee Start Date** – Used to specify the date from when the rate guarantee is available for the individual membership.
- **Rate Guarantee End Date** – Used to specify the date till when the rate guarantee is available for the individual membership.
- **Rate Guarantee Status** – Used to indicate the status of the rate guarantee period. The valid values are - **Active** and **Inactive**.

You can send the rate guarantee details for an individual membership during enrollment (i.e. on membership creation), during coverage period, or during membership renewal. While sending the rate guarantee details of an individual membership, ensure that the active rate guarantee records do not have overlapping date range.

The system enables you to define the rate guarantee business rules. If the rate guarantee details are not specified for an individual membership during enrollment, the system derives the rate guarantee details for the individual membership through a rate guarantee business rule. The rate guarantee business rule indicates the following:

- **Rate Guarantee Applicability** – Used to indicate whether the rate guarantee is available for the individual membership.
- **Rate Guarantee Period** – Used to derive the rate guarantee start and end dates. The system sets the rate guarantee start date to the membership start date and the rate guarantee end date to the rate guarantee start date + rate guarantee period.

There might be situations wherein the rate guarantee details are received for an individual membership later during the coverage period or during membership renewal through a health care inbound message. In such scenarios, the system will then give precedence to the rate guarantee details which are received through a health care inbound message and will not derive the rate guarantee details from the rate guarantee business rule which is stamped against the individual membership.

A new column named **Rate Guarantee** is available in the **Price Items** section while defining or editing an age based or tier based pricing rule type. While creating a charge for an individual membership, the system checks whether the **Rate Guarantee** option is selected for the price item in the respective pricing rule type and whether the billable charge timeline falls within the rate guarantee period. If so, the system derives the rate guarantee pricing rule for the price items where the **Rate Guarantee** option is selected.

The system stores the pricing rule which is effective for such price items on the rate guarantee start date as the rate guarantee pricing rule. Until the rate guarantee period is over, the system considers the rate guarantee pricing rule for the individual membership during premium calculation. This ensures that the same rate is charged for a health insurance service even when the rate has increased for the health insurance service in the system.

The Entity Audit framework is configured for the Rate Guarantee feature. The system will create audit events when the rate guarantee records are added or updated for an individual membership.

## Late Setup Notification

---

Oracle Revenue Management and Billing enables you to create a To Do notification when the details to include a member person in a group or individual membership is received in ORMB beyond the late setup threshold days from the member person start date. This notification can help the billing analyst to take appropriate actions, such as giving premium waiver to the member person if required.

To enable this feature, you need to set the following option types in the **C1-ASOBLLNG** feature configuration:

- **Monitor Late Setup** – Used to indicate whether you want to enable the late setup notification feature. The valid values are – **Y** and **N**. By default, the value is set to **N**.
- **Late Setup Threshold in Days** – Used to indicate the number of threshold days for late setup notification. This option type is required when the **Monitor Late Setup** option type is set to **Y**. The value must be greater than zero.

For example, if the system receives the information to add a member person with the start date as **01-15-2021** to an individual membership on **02-15-2021** and the late setup threshold days in the **C1-ASOBLLNG** feature configuration is set to **15**. In this case, the number of days between the member person start date and member person creation date is greater than late setup threshold days, and therefore a To Do is created using the To Do type which is specified in the **C1-LATESET** algorithm attached to the group or individual membership business object, respectively.

To implement this business requirement, the system stores the member person creation date (which was not done in the previous releases) while adding a member person to a group or individual membership. A new batch named **C1-LSUB** is introduced in this release. It derives the creation date for all member persons in the existing group and individual memberships and stamps it against the corresponding record in the **CRE\_DTTM** column of the **CI\_MEMBERSHIP\_PER** table. This batch must be executed only once after upgrading to Oracle Revenue Management and Billing Version 3.1.0.0.0. For more information, refer to *Oracle Revenue Management and Billing Version 3.1.0.0.0 Upgrade Guide*.

## Young Adult Coverage in an Individual Membership

---

Oracle Revenue Management and Billing enables you to calculate premium for the young adults who are covered in an individual membership. While creating or editing an individual membership, or while adding, editing, or inactivating a member person in an individual membership through a health care inbound message or through membership repricing inbound web service, the system derives the fully-insured pricing business rule for the individual membership. The system enables you to define the following young adult related output parameters in the fully-insured pricing business rules:

- **Young Adult Applicability** - Used to indicate whether you want to consider the young adults during the premium calculation. The valid values are - **Yes** and **No**.
- **Young Adult Max Age Limit** - Used to indicate the maximum age limit for young adults who are eligible for premium calculation. This output parameter is mandatory when the **Young Adult Applicability** parameter is set to **Yes**.

While deriving member relationship for each member person of the individual membership from a member relationship structure, the system considers the following information from the fully-insured pricing business rule of the individual membership:

- Young Adult Applicability
- Young Adult Max Age Limit

Similarly, while deriving subscription tier for the individual membership from a subscription tier structure, the system considers the following information from the fully-insured pricing business rule of the individual membership:

- Young Adult Applicability

- Young Adult Max Age Limit

Thus, while calculating the premium for an individual membership using an age based or tier based pricing rule, the system considers the young adult for the premium calculation based on the above two parameters set in the fully-insured pricing business rule.

## Individual Membership Preference

---

The Individual Membership Preference enables you to set the attributes which are used during the creation of an individual membership. While deriving the details for an individual membership, the system uses the following attributes from the individual membership preference:

- Health Plan Characteristics

You can define, edit, delete, and copy an individual membership preference through the **Field Mapping** screen.

### Searching for an Individual Membership Preference

#### Prerequisites

To search for an individual membership preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

#### Procedure

To search for an individual membership preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
4. Select the **Individual Membership** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of individual membership preferences that meet the search criteria appears in the **Search Results** section.

### Viewing the Individual Membership Preference Details

#### Procedure

To view the details of an individual membership preference:

1. Search for the individual membership preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the individual membership preference whose details you want to view.

The **Field Mapping** zone appears.

- View the details of the individual membership preference in the **Field Mapping** zone.

### Related Topics

For more information on...	See...
How to search for an individual membership preference	<a href="#">Searching for an Individual Membership Preference</a> on page 512

## Defining an Individual Membership Preference

### Prerequisites

To define an individual membership preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** and **FIELD\_NAME\_FLG** lookup fields
- Required characteristic type defined for the health plan in the application.

### Procedure

To define an individual membership preference:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
- Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the billing preference. The valid values are: <ul style="list-style-type: none"> <li>Field Mapping</li> <li>Medicare Plan Benefit Package</li> <li>Membership Status Reason Mapping</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Field Mapping** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- Main** - Used to specify basic details of the billing preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the individual membership preference.	Yes
Description	Used to specify the description for the individual membership preference.	Yes
Detailed Description	Used to specify additional information about the individual membership preference.	No
Status	Used to indicate the status of the billing preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> <li>Billing</li> <li>Binder Payment</li> <li>Geographic Rating Area</li> <li>Individual Membership</li> <li>Medicare</li> <li>Medicare Plan Benefit</li> <li>Member Reconciliation</li> <li>Member Relationship and Subscription Tier</li> <li>Membership Status Reason</li> <li>Statement Construct</li> </ul>	Yes

- **Preference Settings** - Used to set the attributes in the individual membership preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the individual membership preference. The valid values are: <ul style="list-style-type: none"> <li><b>Health Plan Characteristics</b> - Used when you want to derive</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while setting an attribute in the individual membership preference.

Field Name	Field Description	Mandatory (Yes or No)				
	the health plan ID for an individual membership.					
Value	<p>Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the billing preference:</p> <table border="1" data-bbox="732 472 1084 1919"> <thead> <tr> <th data-bbox="732 472 911 583">If the attribute is set to...</th> <th data-bbox="911 472 1084 583">Then, this field is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="732 583 911 1919">Health Plan Characteristics</td> <td data-bbox="911 583 1084 1919"> <p>Used to specify the characteristic type which indicates the plan ID of the health plan. This characteristic type is defined for a health plan. The system uses this plan ID to create a health plan specific contract. The system then uses this characteristic type to determine the account of the financial responsible person for whom the billable charges should be generated.</p> </td> </tr> </tbody> </table>	If the attribute is set to...	Then, this field is...	Health Plan Characteristics	<p>Used to specify the characteristic type which indicates the plan ID of the health plan. This characteristic type is defined for a health plan. The system uses this plan ID to create a health plan specific contract. The system then uses this characteristic type to determine the account of the financial responsible person for whom the billable charges should be generated.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting an attribute in the individual membership preference.</p>
If the attribute is set to...	Then, this field is...					
Health Plan Characteristics	<p>Used to specify the characteristic type which indicates the plan ID of the health plan. This characteristic type is defined for a health plan. The system uses this plan ID to create a health plan specific contract. The system then uses this characteristic type to determine the account of the financial responsible person for whom the billable charges should be generated.</p>					
<p><b>Note:</b> The list includes only those characteristics which are already defined in the system.</p>						

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>Account</li> <li>Billable Charge</li> </ul>	No
	<p><b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	

**Note:** While defining an individual membership preference, you must set at least one attribute in the individual membership preference.

6. Select the **Individual Membership** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the individual membership preference, click the **Add (+)** icon and then repeat step 8.

**Note:** However, if you want to remove an attribute from the individual membership preference, click the **Delete** (🗑️) icon corresponding to the attribute.

10. Click **Save**.

The individual membership preference is defined.

## Editing an Individual Membership Preference

### Prerequisites

To edit an individual membership preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** and **FIELD\_NAME\_FLG** lookup fields
- Required characteristic type defined for the health plan in the application.

### Procedure

To edit an individual membership preference:

1. Search for an individual membership preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the individual membership preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the individual membership preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the individual membership preference.	Not applicable
Description	Used to specify the description for the individual membership preference.	Yes
Detailed Description	Used to specify additional information about the individual membership preference.	No
Status	Used to indicate the status of the individual membership preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> <li>Individual Membership</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the individual membership preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)				
Attribute	Used to indicate the attribute which you want to set in the individual membership preference. The valid values are: <ul style="list-style-type: none"> <li><b>Health Plan Characteristics</b> - Used when you want to derive the additional information of a health plan for an individual membership.</li> </ul>	Yes (Conditional)  <b>Note:</b> This field is required while setting an attribute in the individual membership preference.				
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the individual membership preference: <table border="1" data-bbox="732 1629 1089 1875"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then, this field is...</th> </tr> </thead> <tbody> <tr> <td>Health Plan Characteristics</td> <td>Used to specify the health plan characteristics.</td> </tr> </tbody> </table>	If the attribute is set to...	Then, this field is...	Health Plan Characteristics	Used to specify the health plan characteristics.	Yes (Conditional)  <b>Note:</b> This field is required while setting an attribute in the individual membership preference.
If the attribute is set to...	Then, this field is...					
Health Plan Characteristics	Used to specify the health plan characteristics.					

Field Name	Field Description		Mandatory (Yes or No)
	<b>If the attribute is set to...</b>	<b>Then, this field is...</b>	
		<b>Note:</b> The list includes only those characteristics which are already defined in the system.	
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> </ul>		No
	<b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.		

**Note:** Alternatively, you can edit the details of an individual membership by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the individual membership, if required.

**Note:** You must set at least one attribute in an individual membership preference.

5. Click **Save**.

The changes made to the individual membership are saved.

For more information on...	See...
How to search for an individual membership preference	<a href="#">Searching for an Individual Membership Preference</a> on page 512

## **Copying an Individual Membership Preference**

Instead of creating an individual membership preference from scratch, you can create a new individual membership preference using an existing individual membership preference. This is possible through copying an individual membership preference. On copying an individual membership preference, the details including the attributes are copied to the new individual membership preference. You can then edit the details, if required.

### **Prerequisites**

To copy an individual membership preference, you should have:

- Individual membership preference (whose copy you want to create) defined in the application
- Values defined in the **FIELD\_CAT\_FLG** and **FIELD\_NAME\_FLG** lookup fields
- Required characteristic type defined for the health plan in the application.

### **Procedure**

To copy an individual membership preference:

1. Search for the individual membership preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the individual membership preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the individual membership preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the individual membership preference.	Yes
Description	Used to specify the description for the individual membership preference.	Yes
Detailed Description	Used to specify additional information about the individual membership preference.	No
Status	Used to indicate the status of the billing preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> <li>• Individual Membership</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the individual membership preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the individual membership preference. The valid values are: <ul style="list-style-type: none"> <li>• <b>Health Plan Characteristics</b> - Used when you want to derive the additional information</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while setting an attribute in the individual membership preference.

Field Name	Field Description	Mandatory (Yes or No)				
	of a health plan for an individual membership.					
Value	<p>Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the billing preference:</p> <table border="1"> <thead> <tr> <th>If the attribute is set to...</th> <th>Then, this field is...</th> </tr> </thead> <tbody> <tr> <td>Health Plan Characteristics</td> <td>Used to specify the health plan characteristics.</td> </tr> </tbody> </table> <p><b>Note:</b> The list includes only those characteristics which are already defined in the system.</p>	If the attribute is set to...	Then, this field is...	Health Plan Characteristics	Used to specify the health plan characteristics.	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting an attribute in the individual membership preference.</p>
If the attribute is set to...	Then, this field is...					
Health Plan Characteristics	Used to specify the health plan characteristics.					
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>Account</li> <li>Billable Charge</li> </ul> <p><b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No				

**Note:** While defining an individual membership preference, you must set at least one attribute in the individual membership preference.

- Enter the required details in the **Main** section.
- Define, edit, or remove the attribute from the individual membership preference, if required.
- Click **Save**.

The new individual membership preference is defined.

## Deleting an Individual Membership Preference

### Procedure

To delete an individual membership preference:

1. Search for the individual membership preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the individual membership preference that you want to delete.

A message appears confirming whether you want to delete the individual membership preference.

**Tip:** Alternatively, you can delete an individual membership preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The individual membership preference is deleted.

## Binder Payment for Individual Membership

On enrolling for an individual health insurance plan, the financial responsible member person needs to pay first month's premium often called as binder payment to complete the enrollment process. The individual membership enrollment is effectuated when the binder payment is received. The binder payment should be received by the billing system and not by the enrollment system. The binder payment is not required during individual membership renewal and reinstatement.

Few health insurance payers send bills to collect the binder payment, whereas few do not send bills to collect the binder payment. In other words, the bill generation process for individual membership is kept on hold by some health insurance payers until the binder payment is received.

Oracle Revenue Management and Billing enables you to create binder payments for an individual membership. For more information on how to create a binder payment, see the [Binder Payment Creation](#) on page 529 section. While creating an individual membership through a health care inbound message or through a membership repricing inbound web service, you must set the **Binder Payment Applicability** option for the individual membership to either **Y** or **N**. You can set the **Binder Payment Applicability** option to **Y** only when the following conditions are met:

- Individual membership status is set to the value specified in the **Membership Status Code for Pending Effectuation** attribute of the binder payment preference.
- Membership status reason is set to the value specified in the **Membership Status Reason when Awaiting Binder Payment** attribute of the binder payment preference.

The system considers the binder payment preference which is specified in the **Binder Payment Field Mapping** option type of the **C1-ASOBLNG** feature configuration.

If the **Binder Payment Applicability** option is set to **Y** for an individual membership, it means that the system should monitor whether the binder payment is received before activating the individual membership. On receiving the binder payment for the individual membership, the system only changes the membership and its member persons' status reason

and not the membership and its member person's status. The membership and its member persons' status is changed only when the system receives the main subscriber's status update information from the enrollment system through a health care inbound message. However, if the **Binder Payment Applicability** option is set to **N** for an individual membership, it means that binder payment is not required for activating the individual membership. For more information about the binder payment monitor process, see the *Binder Payment Monitoring* on page 529 section.

If the **Binder Payment Applicability** option is set to **Y** for an individual membership, you need to specify the following binder payment details through a health care inbound message:

- **Grace Days** – Used to calculate the grace date for the individual membership.
- **Binder Liability Amount** – Used to specify the binder liability amount. This data is required when the **Consider Binder Liability Amount** attribute is set to **Y** in the binder payment preference.
- **Threshold Percentage** – Used to specify the threshold percentage using which the threshold amount should be calculated.
- **Hold Billing** – Used to indicate whether you want to hold the bill generation process for the individual membership until the binder payment is received.

The system facilitates you to validate binder payment against the threshold amount. If the **Consider Binder Liability Amount** attribute is set to **Y** in the binder payment preference, the system calculates the threshold amount for the binder payment using the binder liability amount and threshold percentage. For example, if the binder liability amount is set to 50 and threshold percentage is set to 20, the system sets the threshold amount to 10 (i.e.  $(50*20)/100$ ). The system can receive one or more binder payments for an individual membership. If the **Consider Binder Liability Amount** attribute is set to **Y**, the system must receive the binder payments whose sum is equal to or greater than the threshold amount. However, if the **Consider Binder Liability Amount** attribute is set to **N**, the system does not calculate the threshold amount for the binder payment. In such case, the system must receive a binder payment with the amount greater than zero.

On editing the binder liability amount and threshold percentage for an individual membership, the system recalculates the threshold amount for the binder payment. On creating a billable charge for an individual membership where the **Hold Billing** option is set to **Y**, the system will set the bill after date in the billable charge to a far future date (i.e. 12-31-2099).

## Prerequisites

To setup the binder payment process, you need to do the following:

- Define the binder payment identification characteristic type for the payment in the system.
- Define the required status reason for the membership in the system.
- Define the required configurations for the following binder payment fields in the system.
  - Binder Payment Applicability
  - Hold Billing
  - Threshold Percentage
  - Grace Days
- Define the binder payment field mapping preference in the system.
- Values defined for binder payment in the **FIELD\_CAT\_FLG** lookup field
- Set the values for the following option types in the **C1-ASOBLNG** feature configuration:
  - Binder Payment Field Mapping
- Attach an algorithm of the **C1-THRSHDAMT** algorithm type to the **Post-Processing** system event of the **C1-IndMembership** business object.
- Attach an algorithm of the **C1-BNDRH** algorithm type to the **Enter** system event of the **C1-IndMembership** business object where the status is **Active**.

- Attach an algorithm of the **C1-FICRETBC** algorithm type to the **Billable Charge Creation Post Processing** system event of the **Fully Insured Age Based** and **Fully Insured Tier Based** pricing rule type.
- Attach an algorithm of the **C1-BNFTODO** algorithm type and attach it as a soft parameter in the **C1-BPMNT** batch.
- Define the values in the parameter of the **C1-CCPYTSADS** algorithm.
- Lockbox tender types defined in the **C1\_LBX\_TENDER\_TYPE** lookup field.
- Lockbox record type, lockbox reference identification qualifier, and lockbox remittance identification types defined in the **C1\_LBX\_820\_RECORD\_TYPE**, **C1\_LBX\_REF\_IDQ\_LKP**, and **C1\_LBX\_RMR\_ID\_TYPE** lookup fields respectively.

## Algorithms Used in Binder Payment

The following table lists the algorithms which are used in the binder payment:

Algorithm	Algorithm Type	Description
C1-THRSHDAMT	C1-THRSHDAMT	Refer to <a href="#">C1-THRSHDAMT</a> on page 528
C1-BNDRH	C1-BNDRH	Refer to <a href="#">C1-BNDRH</a> on page 523
C1-FICRETBC	C1-FICRETBC	Refer to <a href="#">C1-FICRETBC</a> on page 527
C1-CCPYTSADS	C1-CCPYTSADS	Refer to <a href="#">C1-CCPYTSADS</a> on page 525
C1-BNFTODO	C1-BNFTODO	Refer to <a href="#">C1-BNFTODO</a> on page 524

### C1-BNDRH

This algorithm is invoked during the membership activation process. It checks whether the binder payment is received for the membership. If the binder payment is received, the membership status is changed from **Pending Effectuation** to **Active**.

**Note:** At present, this algorithm is invoked only during the membership enrollment and not for membership reinstatement, where the membership status is changed from **Terminated** to **Active**.

This algorithm is invoked using the following scenario:

If...	Then...
The membership is in the <b>Active</b> status and the binder payment attributes like the <b>Consider Binder Liability Amount Flag</b> is configured as N along with the <b>Membership Status Reason when Binder Payment Received</b> is configured as <b>Binder Payment Received</b> in the <b>Field Mapping</b> screen	<p>The system checks whether the hold billing switch in the <b>CI_MEMBERSHIP</b> table contains any value. If any value exists, the system releases the billable charges which are kept on hold for the membership. In addition, the system performs the following operations:</p> <ul style="list-style-type: none"> <li>• Retrieves the account (of the financial responsible person) for the membership.</li> <li>• Retrieves the non-binder payment contracts for the accounts from the <b>CI_SA</b> table.</li> <li>• Retrieves the billable charges present on the non-binder payment contracts where the membership ID is stamped as a characteristic.</li> </ul>

If...	Then...
	<ul style="list-style-type: none"> <li>Checks whether the bill after date of each billable charge contains a future date. If the bill after date contains a future date then it is changed to the system date minus one.</li> </ul>

**C1-BNFTODO**

This algorithm is invoked from the **C1-BNDMNTR** binder payment monitoring batch, specifically for creating a To Do. This algorithm considers the following scenarios:

Scenario	System Behavior
The binder payment is received within the grace days	The algorithm creates a To Do and updates either the membership or corresponding member's status reason to <b>Binder Payment Received</b> .
The binder payment is not received within the grace days	The algorithm creates a To Do and updates either the membership or corresponding member's status reason to <b>Binder Payment not Received</b> .
The <b>Consider Binder Liability Amount Flag</b> attribute is set to <b>Y</b> and the binder payment amount is received.	The algorithm retrieves the value of the <b>To Do Type for Binder Payment Received</b> attribute from the <b>Field Mapping</b> screen and creates the To Do with the message, <b>Binder Payment of Amount [%1] Received for Membership with Binder Payment Identifier [%2] and Health Plan [%3]</b>
The <b>Consider Binder Liability Amount Flag</b> attribute is set to <b>N</b> and at least a single binder payment is received.	The algorithm retrieves the value of the <b>To Do Type for Binder Payment Received</b> attribute from the <b>Field Mapping</b> screen and creates the To Do with the message, <b>Binder Payment of Amount [%1] Received for Membership with Binder Payment Identifier [%2] and Health Plan [%3]</b>
The <b>Consider Binder Liability Amount Flag</b> attribute is set to <b>Y</b> and the binder payment is not received.	The algorithm retrieves the value of the <b>To Do Type for Binder Payment Not Received</b> attribute from the <b>Field Mapping</b> screen and creates the To Do with the message, <b>Binder Payment of expected amount [%1] not received for Membership with Binder Payment Identifier [%2] and Health Plan [%3]</b>
The <b>Consider Binder Liability Amount Flag</b> attribute is set to <b>N</b> and not even a single binder payment is received.	The algorithm retrieves the value of the <b>To Do Type for Binder Payment Not Received</b> attribute from the <b>Field Mapping</b> screen and creates the To Do with the message, <b>Binder Payment is not received for Membership with Binder Payment Identifier [%1] and Health Plan [%2]</b>

**Note:**

- [%1] refers to the total payment amount, comprising of all the payments made till date.
- [%2] refers to the binder payment identifier.
- [%3] refers to the specific health plan.

The **Consider Binder Liability Amount Flag** attribute is configured in the **Field Mapping** screen whereas the **To Do Creation** process happens when the **C1-BNFTODO** algorithm is attached as a soft parameter on the **C1-BNDMNTR** batch.

**C1-CCPYTSADS**

This algorithm is invoked when it is attached to the **Payment Tender Staging Distribution** system event of the customer class to which the account belongs. In addition, it checks whether the payment received is the first payment for the account. If the payment happens to be the first payment for the account, the payment is applied against the binder contract, which is created using the contract type specified in the payment distribution algorithm of the **Binder Payment** match type.

This algorithm introduces the following new parameters which are used for individual binder payment functionality:

- **Check Binder Payment For Individual** - Used when you want to transfer the payment to the binder contract. The valid values are:
  - Y
  - N
- **Membership Status Reason** - Used to notify the status reason of the binder payment for the membership. The valid value is:
  - **Awaiting Binder Payment**
- **Exchange Assigned Subscriber Number Characteristic** - Used while creating payment staging characteristic.
- **Exchange Assigned Subscriber Number Id Type** - Used when you want to identify the membership from the membership identifier (**CI\_MEMBERSHIP\_IDENTIFIER**) table.

This algorithm considers the following scenarios:

If...	Then...
The <b>Check Promise To Pay</b> parameter is set to <b>Y</b>	The algorithm checks whether there is an active promise to pay for the account. If an active promise to pay exists, the payment is applied against the contract which is created using the contract type specified in the payment distribution algorithm of the <b>On Account</b> match type.
The <b>Check Payment Agreement Request</b> parameter is set to <b>Y</b>	The algorithm checks whether there is an active payment agreement request for the account. If an active payment agreement exists, the payment is applied against the contract which is created using the contract type specified in the payment distribution algorithm of the <b>On Account</b> match type.
The <b>Check Promise To Pay</b> and <b>Check Payment Agreement Request</b> parameters are set to <b>N</b>	The payment is applied to the account's unpaid bills in the order of the due date. If the payment amount is greater than the sum total of the account's billed balance plus the overpayment threshold amount, the entire payment amount is applied against the excess credit contract of the account.

If...	Then...
The payment amount is greater than the account's billed balance, but less than the sum total of the account's billed balance plus the overpayment threshold amount	The payment is first applied against the unpaid bills of the account and the overpayment amount is then applied against the excess credit contract of the account.
The <b>Check Binder Payment for Individual</b> parameter is set to <b>Y</b>	The algorithm retrieves the membership by using the binder payment identification value which is received in the payment characteristics from the <b>EDI 820</b> file.
The <b>Membership Status Code for Pending Effectuation</b> attribute is set to <b>Pending Effectuation</b> and the <b>Membership Status Reason Hold / Awaiting Binder Payment</b> attribute is set to <b>Awaiting Binder Payment</b> in the <b>Field Mapping</b> screen	<p>The algorithm performs the following steps:</p> <ol style="list-style-type: none"> <li>1. Retrieves the <b>Binder Contract Type</b> attribute and its value from the <b>Field Mapping</b> screen.</li> <li>2. If the contract information is not found in the <b>Binder Contract Type</b> attribute then a new contract Id of the type <b>Binder Contract</b> is created on the account. If the contract information is found, the contract Id of the account is retrieved using the <b>Binder Contract Type</b> attribute.</li> <li>3. Creates a payment staging record using the <b>Binder Payment Match Type</b> soft parameter and the value as the binder contract Id of the account, retrieved using the <b>Binder Contract Type</b> attribute.</li> <li>4. Stores the binder payment identification value as a characteristic on the payment.</li> </ol>
If the <b>Membership Status Code for Pending Effectuation</b> attribute is not <b>Pending Effectuation</b> and the <b>Membership Status Reason Hold / Awaiting Binder Payment</b> attribute is not <b>Awaiting Binder Payment</b> in the <b>Field Mapping</b> screen	<p>The algorithm performs the following steps:</p> <ol style="list-style-type: none"> <li>1. The payment is applied against the bill.</li> <li>2. The binder payment identification value is added as a characteristic on the payment when the payment is received from the <b>EDI 820</b> file against the bill Id.</li> <li>3. The already existing soft parameters related to binder payment are removed and the binder related parameters are retrieved from the <b>Field Mapping</b> screen.</li> </ol>

It contains the following parameters:

- **Check Binder Payment** - Used when you want to check whether the payment is the first payment for the account and the tender used for the payment is not an automatic payment. The valid values are:
  - **Y**
  - **N**
- **Check Promise To Pay** - Used when you want to check whether there is an active promise to pay for the account. The valid values are:
  - **Y**
  - **N**
- **Check Payment Agreement Request** - Used when you want to check whether there is an active payment agreement request for the account. The valid values are:

- Y
- N
- **Overpayment Threshold Amount** - Used to specify the overpayment threshold amount.
- **Bill Match Type** - Used to specify the match type using which you want to apply the payment against the unpaid bills of the account.
- **Binder Payment Match Type** - Used to specify the match type using which you want to apply the first non-automatic payment against the contract of the account.
- **On Account Match Type** - Used to specify the match type using which you want to apply the payment against the contract of the account.
- **Payment Review Reason Characteristic Type** - Used to specify the characteristic type which you want to use to store the payment reason.
- **Payment Review Reason for Active Promise To Pay** - Used to specify the characteristic value that must be specified when there is an active promise to pay for the account.
- **Payment Review Reason for Active Payment Agreement Request** - Used to specify the characteristic value that must be specified when there is an active payment agreement request for the account.
- **Payment Review Reason for Overpayment** - Used to specify the characteristic value that must be specified when the payment amount is greater than the sum total of account's billed balance plus overpayment threshold amount.
- **Excess Credit Contract Type** - Used to specify the contract type using which the excess credit contract should be created if it does not exist for the account.

## C1-FICRETBC

### Prerequisites

- Define the values for the option types **CTME (Characteristic Type For Membership Id)** and **PRSQ (Proration SQI)** in the **C1-ASOBLLNG** feature configuration.
- Define the price item which is passed (as a billable charge data) through a health care inbound message.
- Define the pass-through billable charge pricing rule type on the policy plan.

This algorithm is invoked to create SQI (Service Quantity Identifier) based billable charges for fully-insured services. This algorithm creates the following set of SQI based billable charges:

- **Pre-calculated Premium Amount** - SQI based billable charges which are created for pre-calculated premium amount received through a healthcare inbound message.
- **Calculated Premium Amount** - Price items for which the SQI based billable charges are created using the pricing rules defined on the policy plan level.

This algorithm also performs the following operations:

- Creation of the new billable charges.
- Cancellation of the existing billable charges.
- End Date modification of the existing billable charges.

This algorithm is invoked in the following scenarios:

If...	Then...
A billable charge exists for a specific date range where the <b>Billable Charge Status</b> field is set to <b>Billable</b> option which is yet to be processed with the same start date, price item, and membership information	The algorithm modifies only the end date information of that specific billable charge.

If...	Then...
The membership is in the <b>Pending Effectuation</b> status and the status reason is <b>Awaiting Binder Payment</b> , where the status reason is mapped with the attribute value of the <b>Membership Status Reason Hold / Awaiting Binder Payment</b> attribute field in <b>Field Mapping</b> screen	The algorithm retrieves the values of the binder payment applicability and hold billing switch from the <b>CI_MEMBERSHIP</b> table. If the binder payment applicability and the hold billing switch is set to <b>Y</b> , the algorithm updates the bill after date information on the billable charge to <b>31-Dec-2099</b> .
The billable charge for a particular price item and membership appear in the proposed date range and either of them have a different start date or amount	The algorithm cancels the billable charge.

**Note:**

Billable charges which are created or updated for calculated charges, are updated accordingly in the **PriceCalculationDetail** entity in the **CI\_PRCE\_CALC** table. Further, those billable charge entries are marked as **Completed**. The Pricing rule type corresponding to the price item (during the processing of the inbound billable charge information) is fetched from the **PricingRuleTypePriceitem** entity in the **C1\_PRC\_RULE\_TYPE\_PRICEITEM** table on the first found basis.

The inbound billable charge information is processed as per the latest billable charge data. Once the inbound message is invoked, the algorithm assumes the following conditions:

- The billable charge line characteristics are not available.
- Every billable charge line has the same currency code.

In the case of modification or cancellation of the existing billable charges, its corresponding bill segments go through the following conditions:

- If the billable charge end date is updated, the algorithm checks for all the bill segments where the date range exceeds the billable charge end date. If the date range exceeds the billable charge end date, then only those billable charges are either canceled or deleted based on the status of the bill segment.
- If the billable charge is canceled, then all the bill segments within that billable charge are either canceled or deleted based on the status of the bill segment.

Finally, the billable charges are stamped with the following information:

- Price Item
- SQI (derived from the **C1-ASOBLLNG** feature configuration)
- Pass-through billable charge entries in the **MEMO ONLY** state.
- Aggregated amount is stamped as service quantity.
- Additional information, if any...

It contains the following parameter:

- **Bill To Type Flag** - This flag is used when the **Contract ID** is added in the **MEMBERSHIP\_SA** table.

**C1-THRSHDAMT**

This algorithm is invoked when the membership is in the **Pending Effectuation** status and the status reason is **Awaiting Binder Payment**, as per the binder payment preference configuration done in the **Field Mapping** screen. It monitors or checks the memberships from whom the binder payment is yet to be received.

This algorithm's behavior is shown as follows:

Scenario	System Behavior
If the <b>BINDER_PAY_APPL_SW</b> field (also known as the <b>Binder Payment Applicability</b> flag) from the <b>CI_MEMBERSHIP</b> table is set to <b>Y</b>	The algorithm retrieves the <b>BINDER_LIABILITY_AMT</b> from the <b>CI_MEMBERSHIP</b> table.
If the <b>Consider Binder Liability Amount Flag</b> is set to <b>Y</b> , and the <b>Binder Liability Amount</b> is blank or the <b>Binder Liability Amount</b> is less than zero	The algorithm generates an error, <b>Binder Liability Amount can't be blank or less than zero if the Consider Liability Amount is Y.</b>
If the <b>BINDER_LIABILITY_AMT</b> field from the <b>CI_MEMBERSHIP</b> table is not blank and greater than zero	<p>The algorithm calculates the threshold amount using the following formula,</p> $\text{CI\_MEMBERSHIP.THRESHOLD\_AMT} = \frac{\text{CI\_MEMBERSHIP.BINDER\_LIABILITY\_AMT}}{(\text{CI\_MEMBERSHIP.BINDER\_PAY\_THRES} \%)}$ <p>For example, Let's assume that the binder liability amount is \$100 and binder payment threshold percentage is 90%. The algorithm uses the above formula to derive the threshold amount which is <math>\\$100 * 90\% = 90</math>. The calculated threshold amount is added in the <b>CI_MEMBERSHIP.THRESHOLD_AMT</b> field for the membership which is in <b>Pending Effectuation</b> status where the status reason is <b>Awaiting Binder Payment</b>.</p>

**Note:** The threshold amount is updated whenever the binder liability amount or binder threshold percentage value changes for the membership which is in the **Pending Effectuation** status.

## Binder Payment Creation

Oracle Revenue Management and Billing considers a payment as a binder payment when a characteristic is defined for the payment using the characteristic type specified in the **Binder Payment Identification Characteristics Type** attribute of the binder payment preference. The system considers the binder payment preference which is specified in the **Binder Payment Field Mapping** option type of the **C1-ASOBLNG** feature configuration. This type of characteristic must be defined when the binder payment is created. It stores the membership identifier to indicate the individual membership for which the binder payment is received.

You can create a binder payment through the following features or interfaces:

- Payment Web Service
- Payment Upload
- Payment Upload Staging
- Payment Request
- Payment Event
- EDI 820 File Upload

While creating a payment through any of the above mechanism except the latter one, you need to ensure that the binder payment identification characteristic is defined for the payment. However, in case of EDI 820 File Upload, the system will extract the data stored in the NM1 tag and store it in the payment characteristics staging table. This is done when the **C1-PUPSG** batch is executed.

You can view the binder payments received for the membership or financial responsible member person's account through the **Payment Event Summary** and **Customer 360° Information** screens.

## Binder Payment Monitoring

A new batch named **C1-BPMNT** is introduced to monitor the binder payments for the individual memberships. It checks whether there are any individual memberships where:

- Individual membership status is set to the value specified in the **Membership Status Code for Pending Effectuation** attribute of the binder payment preference.
- Membership status reason is set to the value specified in the **Membership Status Reason when Awaiting Binder Payment** attribute of the binder payment preference.

**Note:** The batch considers the binder payment preference which is specified in the **Binder Payment Field Mapping** option type of the **C1-ASOBLLNG** feature configuration.

If so, the batch checks whether the **Binder Payment Applicability** option is set to **Y** for the individual membership. If so, the system calculates grace date using the membership start date and grace days. If the grace date is equal to or earlier than system date, the batch derives the account for the individual membership. While deriving the account for the individual membership, the system checks whether the characteristic types specified in the **Account Identifier Type Char Type** and **Account Identifier Value Char Type** option types of the **C1-ASOBLLNG** feature configuration are defined for the individual membership. If so, the system derives the account using these characteristics defined for the individual membership. If these characteristics are not defined for the individual membership, the system derives the account of financially responsible member person. The system checks whether a payment with the binder payment identification characteristic exists against any contract of the account. If so, the system derives the value from the **Binder Payment Identification ID Type** attribute of the binder payment preference. The system then checks whether the binder payments are received for the individual membership using the values from the following:

- Binder Payment Identification Characteristic
- Binder Payment Identification ID Type attribute of the binder payment preference

If the binder payments are received for the individual membership, the system does the following:

If the Consider Binder Liability Amount set to...	Then...
Y	<p>The system validates whether the sum of binder payments is equal to or greater than the threshold amount. If so, the system does the following:</p> <ul style="list-style-type: none"> <li>• Creates a To Do using the To Do type which is specified in the <b>To Do Type for Binder Payment Received</b> attribute of the binder payment preference.</li> <li>• Updates the membership status reason to the value specified in the <b>Membership Status Reason when Binder Payment Received</b> attribute of the binder payment preference.</li> <li>• Updates the member person status reason using the membership status reason preference which is specified in the <b>Status Reason Mapping</b> option type of the <b>C1-ASOBLLNG</b> feature configuration.</li> <li>• Changes the bill after date of the billable charges when the <b>Hold Billing</b> option for the individual membership is set to <b>Y</b>.</li> </ul>
N	<p>The system does not validate the binder payment against the threshold amount. If the binder payment amount is greater than zero, the system does the following:</p> <ul style="list-style-type: none"> <li>• Creates a To Do using the To Do type which is specified in the <b>To Do Type for Binder</b></li> </ul>

If the Consider Binder Liability Amount set to...	Then...
	<p data-bbox="922 205 1471 268"><b>Payment Received</b> attribute of the binder payment preference.</p> <ul data-bbox="885 283 1471 556" style="list-style-type: none"> <li data-bbox="885 283 1471 409">• Updates the membership status reason to the value specified in the <b>Membership Status Reason when Binder Payment Received</b> attribute of the binder payment preference.</li> <li data-bbox="885 424 1471 556">• Updates the member person status reason using the membership status reason preference which is specified in the <b>Status Reason Mapping</b> option type of the <b>C1-ASOBLLNG</b> feature configuration.</li> </ul> <p data-bbox="857 577 1471 766"><b>Note:</b> In this case, the system does not update the bill after date of the billable charges when the <b>Hold Billing</b> option for the individual membership is set to <b>Y</b>. The system updates the bill after date of the billable charges when the status of the individual membership is changed to <b>Active</b> through a health care inbound message.</p>

If the grace date is later than the system date, the batch does the following irrespective of whether the **Consider Binder Liability Amount** attribute is set to **Y** or **N**:

- Creates a To Do using the To Do type which is specified in the **To Do Type for Binder Payment Not Received** attribute of the binder payment preference.
- Updates the membership status reason to the value specified in the **Membership Status Reason when Binder Payment Not Received** attribute of the binder payment preference.
- Updates the member person status reason using the membership status reason preference which is specified in the **Status Reason Mapping** option type of the **C1-ASOBLLNG** feature configuration.

## Binder Payment Preference

The Binder Payment Preference enables you to set the attributes which are used during binder payment creation and monitoring. While deriving the binder payment details for a membership, the system uses the following attributes from the binder payment preference:

- Binder Contract Type
- Binder Payment Identification Characteristics Type
- Binder Payment Identification ID Type
- Consider Binder Liability Amount
- Membership Status Code for Active
- Membership Status Code for Pending Effectuation
- Membership Status Reason on Activating Membership
- Membership Status Reason when Awaiting Binder Payment
- Membership Status Reason when Binder Payment Not Received
- Membership Status Reason when Binder Payment Received
- To Do Type for Binder Payment Not Received
- To Do Type for Binder Payment Received

For more information about these attributes, see [Defining a Binder Payment Preference](#) on page 533.

The system considers the binder payment preference which is specified in the **Binder Payment Field Mapping** option type of the **C1-ASOBLNG** feature configuration. You can define, edit, delete, and copy a binder payment preference through the **Field Mapping** screen.

## Searching for a Binder Payment Preference

### Prerequisites

To search for a binder payment preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

### Procedure

To search for a binder payment preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
4. Select the **Binder Payment** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of binder payment preferences that meet the search criteria appears in the **Search Results** section.

## Viewing the Binder Payment Preference Details

### Procedure

To view the details of a binder payment preference:

1. Search for the binder payment preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the binder payment preference whose details you want to view.  
The **Field Mapping** zone appears.
3. View the details of the binder payment preference in the **Field Mapping** zone.

## Defining a Binder Payment Preference

### Prerequisites

To define a binder payment preference, you should have:

- Values defined for the **Binder Payment Field Mapping** option type in the **C1-ASOBLLNG** feature configuration.
- Values defined in the **FIELD\_CAT\_FLG** lookup field

### Procedure

To define a binder payment preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create a binder payment preference. The valid values are: <ul style="list-style-type: none"> <li>• Field Mapping</li> <li>• Medicare Plan Benefit Package</li> <li>• Membership Status Reason Mapping</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

4. Select the **Field Mapping** option from the **Field Mapping Business Object** list.
5. Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the binder payment preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the binder payment preference.	Yes
Description	Used to specify the description for the binder payment preference.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the binder payment preference.	No
Status	Used to indicate the status of the binder payment preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> <li>Billing</li> <li>Binder Payment</li> <li>Geographic Rating Area</li> <li>Individual Membership</li> <li>Medicare</li> <li>Medicare Plan Benefit</li> <li>Member Reconciliation</li> <li>Member Relationship and Subscription Tier</li> <li>Member Status Reason Preferences</li> <li>Statement Construct</li> </ul>	Yes
	<b>Note:</b> You must select <b>Binder Payment</b> option as the preference category while creating a binder payment preference.	

- **Preference Settings** - Used to set the attributes in the binder payment preference.

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the binder payment preference. The valid values are: <ul style="list-style-type: none"> <li><b>Binder Contract Type</b> - Used when you want to identify the binder contract in the binder payment preference.</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while defining the settings for a binder payment preference.

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>Consider Binder Liability Amount Flag</b> - Used when you want to set the consider binder liability amount flag once the binder payment is received in the binder payment preference.</li> <li>• <b>Binder Payment Identification Characteristics Type</b> - Used when you want to identify the membership for whom the payment is received in the binder payment preference.</li> <li>• <b>Binder Payment Identification ID Type</b> - Used when you want to identify the membership type in the binder payment preference.</li> <li>• <b>Membership Status Code for Active</b> - Used when you want to define the status code when the membership is in the <b>Active</b> status in the binder payment preference.</li> <li>• <b>Membership Status Code for Pending Effectuation</b> - Used when you want to define the status code when the membership is in the <b>Pending Effectuation</b> status in the binder payment preference.</li> <li>• <b>Membership Status Reason on Activating Membership</b> - Used when you want to define the status reason code once the binder payment is received and the membership status is changed to <b>Active</b> for the binder payment preference.</li> </ul>	
	<ul style="list-style-type: none"> <li>• <b>Membership Status Reason Hold/Awaiting Binder Payment</b> - Used when you want to define the status reason code</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)				
	<p>as <b>Hold/Awaiting Binder Payment</b> when the binder payment is not yet received for the membership in the binder payment preference.</p> <ul style="list-style-type: none"> <li>• <b>Membership Status Reason when Binder Payment Not Received</b> - Used when you want to define the status reason code as <b>Binder Payment Not Received</b> when the binder payment is not received for the membership in the binder payment preference.</li> <li>• <b>Membership Status Reason when Binder Payment Received</b> - Used when you want to define the status reason code as <b>Binder Payment Received</b> when the binder payment is received for the membership in the binder payment preference.</li> <li>• <b>To Do Type for Binder Payment Not Received</b> - Used when you want to specify a To Do type when the binder payment is not received for the membership in the binder payment preference.</li> <li>• <b>To Do Type for Binder Payment Received</b> - Used when you want to specify a To Do type when the binder payment is received for the membership in the binder payment preference.</li> </ul>

If the value is...	Then...								
Yes (Y)	The system considers binder liability amount to calculate the threshold amount.								
No (N)	The system does not calculate the threshold amount.								
	<p>Binder Payment Identification ID Type</p>	<p>The list includes only those binder payment identification ID types which are already defined in the system.</p>							
<p>Entity Type</p>	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> </ul>		<p>No</p>						

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Billable Charge</li> </ul>	
	<p><b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	

**Note:** While defining a binder payment preference, you must set at least one attribute in the binder payment preference.

6. Select the **Binder Payment** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the binder payment preference, click the **Add (+)** icon and then repeat step 8.

**Note:** However, if you want to remove an attribute from the binder payment preference, click the **Delete** (🗑️) icon corresponding to the attribute.

10. Click **Save**.

The binder payment preference is defined.

## Editing a Binder Payment Preference

### Prerequisites

To edit a binder payment preference, you should have:

- Values defined for **Binder Payment Field Mapping** option type in the **C1-ASOBLNG** feature configuration.
- Values defined in the **FIELD\_CAT\_FLG** lookup field

### Procedure

To edit a binder payment preference:

1. Search for the binder payment preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the binder payment preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the binder payment preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the binder payment preference.	Not applicable
Description	Used to specify the description for the binder payment preference.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the preference.	No
Status	Used to indicate the status of the binder payment preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Preference Category	Indicates the feature for which the preference is designed. The valid value is: <ul style="list-style-type: none"> <li>Binder Payment</li> </ul>	Not applicable

- **Preference Settings** - Used to define the settings for the member reconciliation preference.

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the binder payment preference. The valid values are: <ul style="list-style-type: none"> <li>• <b>Binder Contract Type</b> - Used when you want to identify the binder contract in the binder payment preference.</li> <li>• <b>Consider Binder Liability Amount Flag</b> - Used when you want to set the consider binder liability amount flag once the binder payment is received in the binder payment preference.</li> <li>• <b>Binder Payment Identification Characteristics Type</b> - Used when you want to identify the membership for whom the payment is received in the binder payment preference.</li> <li>• <b>Binder Payment Identification ID Type</b> - Used when you want to identify the membership type in the binder payment preference.</li> <li>• <b>Membership Status Code for Active</b> - Used when you want to define the</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while editing the settings for a binder payment preference.

Field Name	Field Description	Mandatory (Yes or No)
	<p>status code when the membership is in the <b>Active</b> status in the binder payment preference.</p> <ul style="list-style-type: none"> <li>• <b>Membership Status Code for Pending Effectuation</b> - Used when you want to define the status code when the membership is in the <b>Pending Effectuation</b> status in the binder payment preference.</li> <li>• <b>Membership Status Reason on Activating Membership</b> - Used when you want to define the status reason code once the binder payment is received and the membership status is changed to <b>Active</b> for the binder payment preference.</li> <li>• <b>Membership Status Reason Hold/Awaiting Binder Payment</b> - Used when you want to define the status reason code as <b>Hold/Awaiting Binder Payment</b> when the binder payment is not yet received for the membership in the binder payment preference.</li> </ul>	
	<ul style="list-style-type: none"> <li>• <b>Membership Status Reason when Binder Payment Not Received</b> - Used when you want to define the status reason code as <b>Binder Payment Not Received</b> when the binder payment is not received for the membership in the binder payment preference.</li> <li>• <b>Membership Status Reason when Binder Payment Received</b> - Used when you want to define the status reason code as <b>Binder Payment Received</b> when the binder payment is received for the</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)				
	<p>membership in the binder payment preference.</p> <ul style="list-style-type: none"> <li>• <b>To Do Type for Binder Payment Not Received</b> - Used when you want to specify a To Do type when the binder payment is not received for the membership in the binder payment preference.</li> <li>• <b>To Do Type for Binder Payment Received</b> - Used when you want to specify a To Do type when the binder payment is received for the membership in the binder payment preference.</li> </ul>					
Value	<p>Used to specify the attribute value. The list varies depending on the attribute you want to set in the binder payment preference:</p> <table border="1" data-bbox="732 947 1084 1316"> <thead> <tr> <th data-bbox="732 947 911 1062">If the attribute is set to...</th> <th data-bbox="911 947 1084 1062">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="732 1062 911 1316">Consider Binder Liability Amount Flag</td> <td data-bbox="911 1062 1084 1316"> <p>The list includes the following values:</p> <ul style="list-style-type: none"> <li>• Yes (Y)</li> <li>• No (N)</li> </ul> </td> </tr> </tbody> </table>	If the attribute is set to...	Then...	Consider Binder Liability Amount Flag	<p>The list includes the following values:</p> <ul style="list-style-type: none"> <li>• Yes (Y)</li> <li>• No (N)</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while editing the settings for a binder payment preference.</p>
If the attribute is set to...	Then...					
Consider Binder Liability Amount Flag	<p>The list includes the following values:</p> <ul style="list-style-type: none"> <li>• Yes (Y)</li> <li>• No (N)</li> </ul>					

Field Name	Field Description		Mandatory (Yes or No)

		<p><b>Note:</b></p> <table border="1"> <thead> <tr> <th data-bbox="915 380 997 520">If the value is...</th> <th data-bbox="997 380 1078 520">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="915 520 997 890">Yes (Y)</td> <td data-bbox="997 520 1078 890">The system considers binder liability amount to calculate the threshold amount.</td> </tr> <tr> <td data-bbox="915 890 997 1192">No (N)</td> <td data-bbox="997 890 1078 1192">The system does not calculate the threshold amount.</td> </tr> </tbody> </table>	If the value is...	Then...	Yes (Y)	The system considers binder liability amount to calculate the threshold amount.	No (N)	The system does not calculate the threshold amount.	
If the value is...	Then...								
Yes (Y)	The system considers binder liability amount to calculate the threshold amount.								
No (N)	The system does not calculate the threshold amount.								
	<p>Binder Payment Identification ID Type</p>	<p>The list includes only those binder payment identification ID types which are already defined in the system.</p>							
<p>Entity Type</p>	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> </ul>		<p>No</p>						

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.	

**Tip:** Alternatively, you can edit the details of a binder payment preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the binder payment preference, if required.

**Note:** You must set at least one attribute in a binder payment preference.

5. Click **Save**.

The changes made to the binder payment preference are saved.

### **Related Topics**

For more information on...	See...
How to search for a binder payment preference	<a href="#">Searching for a Binder Payment Preference</a> on page 532

### **Copying a Binder Payment Preference**

Instead of creating a binder payment preference from scratch, you can create a new binder payment preference using an existing binder payment preference. This is possible through copying a binder payment preference. On copying a binder payment preference, the details including the attributes are copied to the new binder payment preference. You can then edit the details, if required.

#### **Prerequisites**

To copy a binder payment preference, you should have:

- Binder Payment preference (whose copy you want to create) defined in the application
- Values defined for **Binder Payment Field Mapping** option type in the **C1-ASOBLNG** feature configuration.
- Values defined in the **FIELD\_CAT\_FLG** lookup field

#### **Procedure**

To copy a binder payment preference:

1. Search for the binder payment preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the binder payment preference whose copy you want to create.
3. Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the binder payment preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the binder payment preference.	Yes
Description	Used to specify the description for the binder payment preference.	Yes
Detailed Description	Used to specify additional information about the binder payment preference.	No
Status	Used to indicate the status of the binder payment preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Preference Category	Indicates the feature for which the preference is designed. The valid values is: <ul style="list-style-type: none"> <li>Binder Payment</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the binder payment preference.

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the binder payment preference. The valid values are: <ul style="list-style-type: none"> <li>• <b>Binder Contract Type</b> - Used when you want to identify the binder contract in the binder payment preference.</li> <li>• <b>Consider Binder Liability Amount Flag</b> - Used when you want to set the consider binder liability amount flag once the binder payment is received in the binder payment preference.</li> <li>• <b>Binder Payment Identification Characteristics Type</b> - Used when you want to identify the membership for whom the payment is received in the binder payment preference.</li> <li>• <b>Binder Payment Identification ID Type</b> -</li> </ul>	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; background-color: #f2f2f2;"> <b>Note:</b> This field is required while defining the settings for a binder payment preference. </div>

Field Name	Field Description	Mandatory (Yes or No)
	<p>Used when you want to identify the membership type in the binder payment preference.</p> <ul style="list-style-type: none"> <li>• <b>Membership Status Code for Active</b> - Used when you want to define the status code when the membership is in the <b>Active</b> status in the binder payment preference.</li> <li>• <b>Membership Status Code for Pending Effectuation</b> - Used when you want to define the status code when the membership is in the <b>Pending Effectuation</b> status in the binder payment preference.</li> <li>• <b>Membership Status Reason on Activating Membership</b> - Used when you want to define the status reason code once the binder payment is received and the membership status is changed to <b>Active</b> for the binder payment preference.</li> <li>• <b>Membership Status Reason Hold/Awaiting Binder Payment</b> - Used when you want to define the status reason code as <b>Hold/Awaiting Binder Payment</b> when the binder payment is not yet received for the membership in the binder payment preference.</li> </ul>	
	<ul style="list-style-type: none"> <li>• <b>Membership Status Reason when Binder Payment Not Received</b> - Used when you want to define the status reason code as <b>Binder Payment Not Received</b> when the binder payment is not received for the membership in the binder payment preference.</li> <li>• <b>Membership Status Reason when Binder</b></li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)				
	<p><b>Payment Received</b> - Used when you want to define the status reason code as <b>Binder Payment Received</b> when the binder payment is received for the membership in the binder payment preference.</p> <ul style="list-style-type: none"> <li>• <b>To Do Type for Binder Payment Not Received</b> - Used when you want to specify a To Do type when the binder payment is not received for the membership in the binder payment preference.</li> <li>• <b>To Do Type for Binder Payment Received</b> - Used when you want to specify a To Do type when the binder payment is received for the membership in the binder payment preference.</li> </ul>					
Value	<p>Used to specify the attribute value. The list varies depending on the attribute you want to set in the binder payment preference:</p> <table border="1" data-bbox="732 1140 1084 1516"> <thead> <tr> <th data-bbox="732 1140 911 1255">If the attribute is set to...</th> <th data-bbox="911 1140 1084 1255">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="732 1255 911 1516">Consider Binder Liability Amount Flag</td> <td data-bbox="911 1255 1084 1516">                     The list includes the following values:                     <ul style="list-style-type: none"> <li>• Yes (Y)</li> <li>• No (N)</li> </ul> </td> </tr> </tbody> </table>	If the attribute is set to...	Then...	Consider Binder Liability Amount Flag	The list includes the following values: <ul style="list-style-type: none"> <li>• Yes (Y)</li> <li>• No (N)</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while defining the settings for a binder payment preference.</p>
If the attribute is set to...	Then...					
Consider Binder Liability Amount Flag	The list includes the following values: <ul style="list-style-type: none"> <li>• Yes (Y)</li> <li>• No (N)</li> </ul>					

Field Name	Field Description		Mandatory (Yes or No)						
	<p><b>If the attribute is set to...</b></p>	<p><b>Then...</b></p>							
		<p><b>Note:</b></p> <table border="1"> <thead> <tr> <th data-bbox="922 380 997 520">If the value is...</th> <th data-bbox="997 380 1084 520">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="922 520 997 890">Yes (Y)</td> <td data-bbox="997 520 1084 890">The system considers binder liability amount to calculate the threshold amount.</td> </tr> <tr> <td data-bbox="922 890 997 1192">No (N)</td> <td data-bbox="997 890 1084 1192">The system does not calculate the threshold amount.</td> </tr> </tbody> </table>	If the value is...	Then...	Yes (Y)	The system considers binder liability amount to calculate the threshold amount.	No (N)	The system does not calculate the threshold amount.	
If the value is...	Then...								
Yes (Y)	The system considers binder liability amount to calculate the threshold amount.								
No (N)	The system does not calculate the threshold amount.								
	<p>Binder Payment Identification ID Type</p>	<p>The list includes only those binder payment identification ID types which are already defined in the system.</p>							
<p>Entity Type</p>	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> <li>• Membership</li> <li>• Payment</li> </ul>		<p>No</p>						

**Note:** While defining a binder payment preference, you must set at least one attribute in the binder payment preference.

**Tip:** Alternatively, you can copy a binder payment preference by clicking the **Duplicate** button in the **Field Mapping** zone.

4. Enter the required details in the **Main** section.
5. Define, edit, or remove the attribute from the binder payment preference, if required.
6. Click **Save**.

The new binder payment preference is created.

### **Related Topics**

How to search for a binder payment preference	<a href="#">Searching for a Binder Payment Preference</a> on page 532

## **Deleting a Binder Payment Preference**

### **Procedure**

To delete a binder payment preference:

1. Search for the binder payment preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the binder payment preference that you want to delete.

A message appears confirming whether you want to delete the binder payment preference.

**Tip:** Alternatively, you can delete a binder payment preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The binder payment preference is deleted.

How to search for a binder payment preference	<a href="#">Searching for a Binder Payment Preference</a> on page 532

## **Membership Status Reason Preference**

The Membership Status Reason preference enables you to map a member person status and status reason with an individual membership status reason. This mapping is used during:

- **Membership Status Transition** - When the member person status and status reason are received through a health care inbound message or membership repricing inbound web service
- **Member Person Status Transition** - When the binder payment is monitored for the individual membership

The system enables you to define, edit, delete, and copy a membership status reason preference through the **Field Mapping** screen. You can derive the member person status and member person status reason mapping attributes from the values specified in the **MEMBER\_PER\_STATUS\_FLG** and **MEMB\_PERS\_STAT\_RSN\_FLG** lookup fields, where as the mapping attributes of the membership status reason can be derived from the **Status Reason** screen.

The system determines the individual membership status reason using the membership status reason preference which is specified in the **Status Reason Mapping** option type of the **C1-ASOBLLNG** feature configuration.

## Searching for a Membership Status Reason Preference

### Prerequisites

To search for a membership status reason preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

### Procedure

To search for a membership status reason preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
4. Select the **Membership Status Reason** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of membership status reason preferences that meet the search criteria appears in the **Search Results** section.

## Viewing the Membership Status Reason Preference Details

### Procedure

To view the details of a membership status reason preference:

1. Search for the membership status reason preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the membership status reason whose details you want to view.  
The **Field Mapping** zone appears.
3. View the details of the membership status reason in the **Field Mapping** zone.

## Defining a Membership Status Reason Preference

### Prerequisites

To define a membership status reason preference, you should have:

- Values defined in the **MEMBER\_PER\_STATUS\_FLG** and **MEMB\_PERS\_STAT\_RSN\_FLG** lookup field
- Membership status reason defined in the application.

### **Procedure**

To define a membership status reason preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the billing preference. The valid values are: <ul style="list-style-type: none"> <li>• Field Mapping</li> <li>• Medicare Plan Benefit Package</li> <li>• Membership Status Reason Mapping</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

4. Select the **Membership Status Reason Mapping** option from the **Field Mapping Business Object** list.
5. Click **OK**.

The **Membership Status Reason Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the membership status reason preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the membership status reason preference.	Yes
Description	Used to specify the description for the membership status reason preference.	Yes

- **Status Reason Mapping** - Used to create the mappings in the membership status reason preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status	Used to indicate the status of the person in the membership. The valid values are:	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• Active</li> <li>• Canceled</li> <li>• Inactive</li> <li>• Pending Effectuation</li> </ul> <p><b>Note:</b> This list includes only those statuses which are defined in the <b>MEMBER_PER_STATUS_FLG</b> lookup field.</p>	<p><b>Note:</b> This field is required while creating a mapping in the membership status reason preference.</p>
Member Person Status Reason	<p>Used to indicate the reason why the status of the member person is changed. The valid values are:</p> <ul style="list-style-type: none"> <li>• Awaiting Binder Payment</li> <li>• Binder Payment Not Received</li> <li>• Binder Payment Received</li> <li>• Binder payment notification send to upstream</li> <li>• Member is added by mistake</li> <li>• Employee Left organization</li> <li>• New Enrollment</li> <li>• Membership is re-instated</li> <li>• Spouse legally separated</li> <li>• Membership is Terminated</li> </ul> <p><b>Note:</b> This list includes only those status reasons which are defined in the <b>MEMB_PERS_STAT_RSN_FLG</b> lookup field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while creating a mapping in the membership status reason preference.</p>
Membership Status Reason	<p>Used to indicate the reason why the status of the membership is changed.</p> <p><b>Note:</b> You must specify a membership status reason which is already defined in the system.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while creating a mapping in the membership status reason preference.</p>

**Note:** While defining a membership status reason preference, you must create at least one mapping in the membership status reason preference.

6. Enter the required details in the **Main** section.
7. Select the required status reason mapping from the respective fields.
8. If you want to set more than one status reason mapping in the membership status reason preference, click the **Add (+)** icon and then repeat step 8.

**Note:** However, if you want to remove a status reason mapping from the membership status reason preference, click the **Delete (🗑)** icon corresponding to the status reason mapping.

9. Click **Save**.

The membership status reason preference is defined.

## Editing a Membership Status Reason Preference

### Prerequisites

To edit a membership status reason preference, you should have:

- Values defined in the **MEMBER\_PER\_STATUS\_FLG** and **MEMB\_PERS\_STAT\_RSN\_FLG** lookup field
- Membership status reason defined in the application.

### Procedure

To edit a membership status reason preference:

1. Search for the membership status reason preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit (📎)** icon in the **Edit** column corresponding to the membership status reason preference whose details you want to edit.

The **Membership Status Reason Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the membership status reason preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the membership status reason preference.	Not applicable
Description	Used to specify the description for the membership status reason preference.	Yes

- **Status Reason Mapping** - Used to create or edit the mappings in the membership status reason preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status	Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Canceled</li> <li>• Inactive</li> <li>• Pending Effectuation</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while editing a mapping in the membership status reason preference.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This list includes only those statuses which are defined in the <b>MEMBER_PER_STATUS_FLG</b> lookup field.</p>	
Member Person Status Reason	<p>Used to indicate the reason why the status of the member person is changed. The valid values are:</p> <ul style="list-style-type: none"> <li>• Awaiting Binder Payment</li> <li>• Binder Payment Not Received</li> <li>• Binder Payment Received</li> <li>• Binder payment notification send to upstream</li> <li>• Member is added by mistake</li> <li>• Employee Left organization</li> <li>• New Enrollment</li> <li>• Membership is re-instated</li> <li>• Spouse legally separated</li> <li>• Membership is Terminated</li> </ul> <p><b>Note:</b> This list includes only those status reasons which are defined in the <b>MEMB_PERS_STAT_RSN_FLG</b> lookup field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while editing a mapping in the membership status reason preference.</p>
Membership Status Reason	<p>Used to indicate the reason why the status of the membership is changed.</p> <p><b>Note:</b> You must specify a membership status reason which is already defined in the system.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while editing a mapping in the membership status reason preference.</p>

**Tip:** Alternatively, you can edit the details of a membership status reason preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the status reason mapping from the membership status reason preference, if required.

**Note:** You must create at least one status reason mapping in a membership status reason preference.

5. Click **Save**.

The changes made to the membership status reason preference are saved.

## Copying a Membership Status Reason Preference

Instead of creating a membership status reason preference from scratch, you can create a new membership status reason preference using an existing membership status reason preference. This is possible through copying a membership status reason preference. On copying a membership status reason preference, the details including the attributes are copied to the new membership status reason preference. You can then edit the details, if required.

### Prerequisites

To copy a membership status reason preference, you should have:

- Membership status reason preference (whose copy you want to create) defined in the application
- Values defined in the **MEMBER\_PER\_STATUS\_FLG** and **MEMB\_PERS\_STAT\_RSN\_FLG** lookup field
- Membership status reason defined in the application.

### Procedure

To copy a membership status reason preference:

1. Search for the membership status reason preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the membership status reason preference whose copy you want to create.

The **Membership Status Reason Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the membership status reason preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the membership status reason preference.	Yes
Description	Used to specify the description for the membership status reason preference.	Yes

- **Status Reason Mapping** - Used to create the mappings in the membership status reason preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status	Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Canceled</li> <li>• Inactive</li> <li>• Pending Effectuation</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while creating a mapping in the membership status reason preference.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This list includes only those statuses which are defined in the <b>MEMBER_PER_STATUS_FLG</b> lookup field.</p>	
Member Person Status Reason	<p>Used to indicate the reason why the status of the member person is changed. The valid values are:</p> <ul style="list-style-type: none"> <li>• Awaiting Binder Payment</li> <li>• Binder Payment Not Received</li> <li>• Binder Payment Received</li> <li>• Binder payment notification send to upstream</li> <li>• Member is added by mistake</li> <li>• Employee Left organization</li> <li>• New Enrollment</li> <li>• Membership is re-instated</li> <li>• Spouse legally separated</li> <li>• Membership is Terminated</li> </ul> <p><b>Note:</b> This list includes only those status reasons which are defined in the <b>MEMB_PERS_STAT_RSN_FLG</b> lookup field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while creating a mapping in the membership status reason preference.</p>
Membership Status Reason	<p>Used to indicate the reason why the status of the membership is changed.</p> <p><b>Note:</b> You must specify a membership status reason which is already defined in the system.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while creating a mapping in the membership status reason preference.</p>

**Note:** While defining a membership status reason preference, you must create at least one mapping in the membership status reason preference.

3. Enter the required details in the **Main** section.
4. Define, edit, or remove the mapping from the membership status reason preference, if required.
5. Click **Save**.

The new membership status reason preference is defined.

**Deleting a Membership Status Reason Preference****Procedure**

To delete a membership status reason preference:

1. Search for the membership status reason in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the membership status reason preference that you want to delete.

A message appears confirming whether you want to delete the membership status reason preference.

**Tip:** Alternatively, you can delete a membership status reason preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The membership status reason preference is deleted.

# Chapter 7

---

## Customer Registration

---

### Topics:

- [Customer Registration \(Without Approval\) Status Transition](#)
- [Customer Registration \(With Approval\) Status Transition](#)
- [Customer Registration Template](#)
- [Customer Registration Type](#)
- [Customer Registration \(Used for Searching\)](#)
- [Customer Registration \(Used for Viewing\)](#)

Until now, you were able to create person, account, policy, and policy plan from the different screens. Now, ORMB provides the ability to create a person, multiple accounts for the person, multiple policies for the person, and multiple policy plans for the policy from the same user interface. A new object named **Customer Registration** is introduced in this release. Through a customer registration object, you can create person, accounts, policies, and policy plans at the same time from the same interface. Before creating a customer registration object, you need to create the following:

- Customer Registration Template
- Customer Registration Type

While creating a customer registration object, you need to specify the following:

- A customer registration type using which the customer registration object should be created
- A source system from the customer information is received
- A type of person that you want to create through the customer registration object

Once you specify the above details, the **Customer Registration** screen appears with a set of pages and sections which are added in the respective person template. The default values for the fields, characteristic types, identifier types, and phone types are shown as specified in the person template. In addition, the field values, characteristic types, characteristic values, identifier types, identifier values, phone types, and phone numbers are disabled as specified in the person template. On the Accounts page, you can view one row for each account template which is added in the customer registration type. You can then edit the row and thereby create an account for the person. You can create multiple accounts for the person using the same or different template.

### Note:

You cannot create sort records and derivation and pricing parameters for the bill group from the **Customer Registration** screen. You can only create these from the **Customer 360° Information** screen or using the health care inbound message.

The system creates effective dated address using the address business object which is specified in the customer registration type. By default, the account override address is effective from the date when the customer registration object is created in the system.

On the **Policies** page, you can view one row for each policy template which is added in the customer registration type. You can then edit the row and thereby

create a policy for the person. You can create multiple policies for the person using the same or different template. On clicking the **Add** icon corresponding to the policy row, you can view one row for each policy plan template which is added in the customer registration type. You can then edit the row and thereby create a policy plan for the policy.

On clicking the **View/Edit** icon or the **Add New Account** button in the **Accounts** page, the **Customer Registration - Add Account** screen appears with a set of pages and sections which are added in the respective account template. The default values for the fields, characteristic types, and identifier types are shown as specified in the account template. In addition, the field values, characteristic types, characteristic values, identifier types, and identifier values are disabled as specified in the account template.

On clicking the **View/Edit** icon or the **Add New Policy** button in the **Policies** page, you need to specify a policy type. The policy type indicates the category to which the policy belongs (i.e. whether it is Self Funded, Fully-Insured Group, or Fully-Insured Individual) and the policy business object using which the policy should be created. Once you specify a policy type, the **Policy** screen appears with a set of sections which are added in the respective policy template. The default values for the fields and characteristic types are shown as specified in the policy template. In addition, the field values, characteristic types, and characteristic values are disabled as specified in the policy template. You can create one or more policies for the person using the same or different policy type.

On clicking the **View/Edit** icon or the **Add New Plan** button corresponding to a policy plan row in the **Policies** page, the **Plan** screen appears with a set of sections which are added in the respective policy plan template. The default values for the fields and characteristic types are shown as specified in the policy plan template. In addition, the field values, characteristic types, and characteristic values are disabled as specified in the policy plan template.

You can save the person, account, policy, and policy plan details as and when you are entering the data by clicking the **Save as Draft** button. On clicking the **Save as Draft** button, the system creates a customer registration object in the Draft status. The status of the policies which are created through the customer registration object is set to Pending. Once the person, account, policy, and policy plan details are specified, you can click the **Validate and Save** button. The system then validates the information. You can edit, delete, or submit a customer registration object when it is in the **Draft** status. On submitting a customer registration object, the person, accounts, policies, and policy plans are created in the system. Finally, the status of the customer registration object is changed to the following depending on the type of person:

Person Type	Status
Parent Customer	Parent Customer Approved
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

You can optionally configure the approval process for the customer registration. If the **Approval Required** option is selected in the customer registration type, the status of the customer registration object is changed to **Approval In Progress** on submitting it. A To Do using the approval To Do type is created and assigned to the users with the approval To Do role. The approver can

then review the customer registration object and accordingly approve, reject, or request the submitter to resubmit the customer registration object for approval. On approving a customer registration object, the person, accounts, policies, and policy plans are created in the system. Finally, the status of the customer registration object is changed to the following depending on the type of person:

Person Type	Status
Parent Customer	Parent Customer Approved
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

If the approver rejects a customer registration object due to some reason, the status of the customer registration object is changed to **Rejected**. However, if the approver requests the submitter to resubmit a customer registration object for approval after making the required changes, the status of the customer registration object is changed to **Draft**. The submitter can then make the required changes and resubmit the customer registration object for approval.

The system provides the following two options while defining a customer registration type:

- Manual Billing Hierarchy and Pricing**- Used when you want to inform the user to create the billing hierarchy and pricing for the parent customer manually. In other words, you want the user to create the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters. If this option is selected, a To Do is created using the **Billing Hierarchy and Pricing To Do** type and assigned to the users with the **Billing Hierarchy and Pricing To Do** role. This feature can be used only for customer registration objects where the person type is set to **Parent Customer**. Once the billing hierarchy and pricing is created for the parent customer, the user must complete the corresponding To Do which is created using the **Billing Hierarchy and Pricing To Do** type. On executing the **Customer Registration Monitor (C1-CUSRG)** batch, the system considers all customer registration objects which are in the **Parent Customer Approved** or **Pending Pricing Correction** status. It checks whether the corresponding To Do (if any) created using the **Billing Hierarchy and Pricing To Do** type is completed. If so, it changes the status of the customer registration object to the following depending on whether the **Final Approval Required** option is selected:

Final Approval Required (Yes or No)	Status
Yes	Pending Final Approval
No	Complete

- Final Approval Required**- Used to indicate whether the final approval is required once the approver at the first level approves the customer registration object. Ideally, the final approval is required when the **Manual Billing Hierarchy and Pricing** option is selected. This ensures that the information related to the following entities is created and verified before the customer registration object moves to the **Complete** status:
  - Bill Group

- Bill Group's Accounts
- Bill Group's Sorting Records
- Bill Group's Derivation and Pricing Parameters
- Pricing Rules for the Policy Plans

If this option is selected, a To Do is created using the **Final Approval To Do** type and assigned to the users with the **Final Approval To Do** role. This feature can be used only for customer registration objects where the person type is set to **Parent Customer**. Once the user with the **Final Approval To Do** role approves the customer registration object, the status of the customer registration object is changed to **Complete**.

If the approver requests the submitter to resubmit a customer registration object for approval, the status of the customer registration object is changed to **Pending Pricing Correction**.

**Note:** The system enables you to create maximum 10 accounts and 5 policies for a person and maximum 10 policy plans for a policy through a customer registration object from the user interface.

Once the status of a customer registration object is changed to **Complete** or **Bill Group Approved**, the system changes the status of the policies created through the customer registration object to **In Force/Active**. In addition, the status of the pricing rules which are created for such policies' policy plans is set to **Active**.

You can also create a customer registration object using the **File Upload Interface** utility through an inbound message. On creating an inbound message using the **File Upload Interface** utility, the status of the inbound message is set to **Pending**. Once the inbound message is processed, a customer registration object is created in the following status depending on the person type:

Person Type	Status
Parent Customer	Complete
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

**Note:** The above status transition is mentioned based on the assumption that the data uploaded through the **File Upload Interface** utility will be pre-approved and does not require any approval in the system.

At present, only the XML format is supported for creating a customer registration object using the File Upload Interface utility through an inbound message. To implement the Customer Registration feature, the following new screens are introduced in this release:

- Customer Registration Template
- Customer Registration Type
- Customer Registration

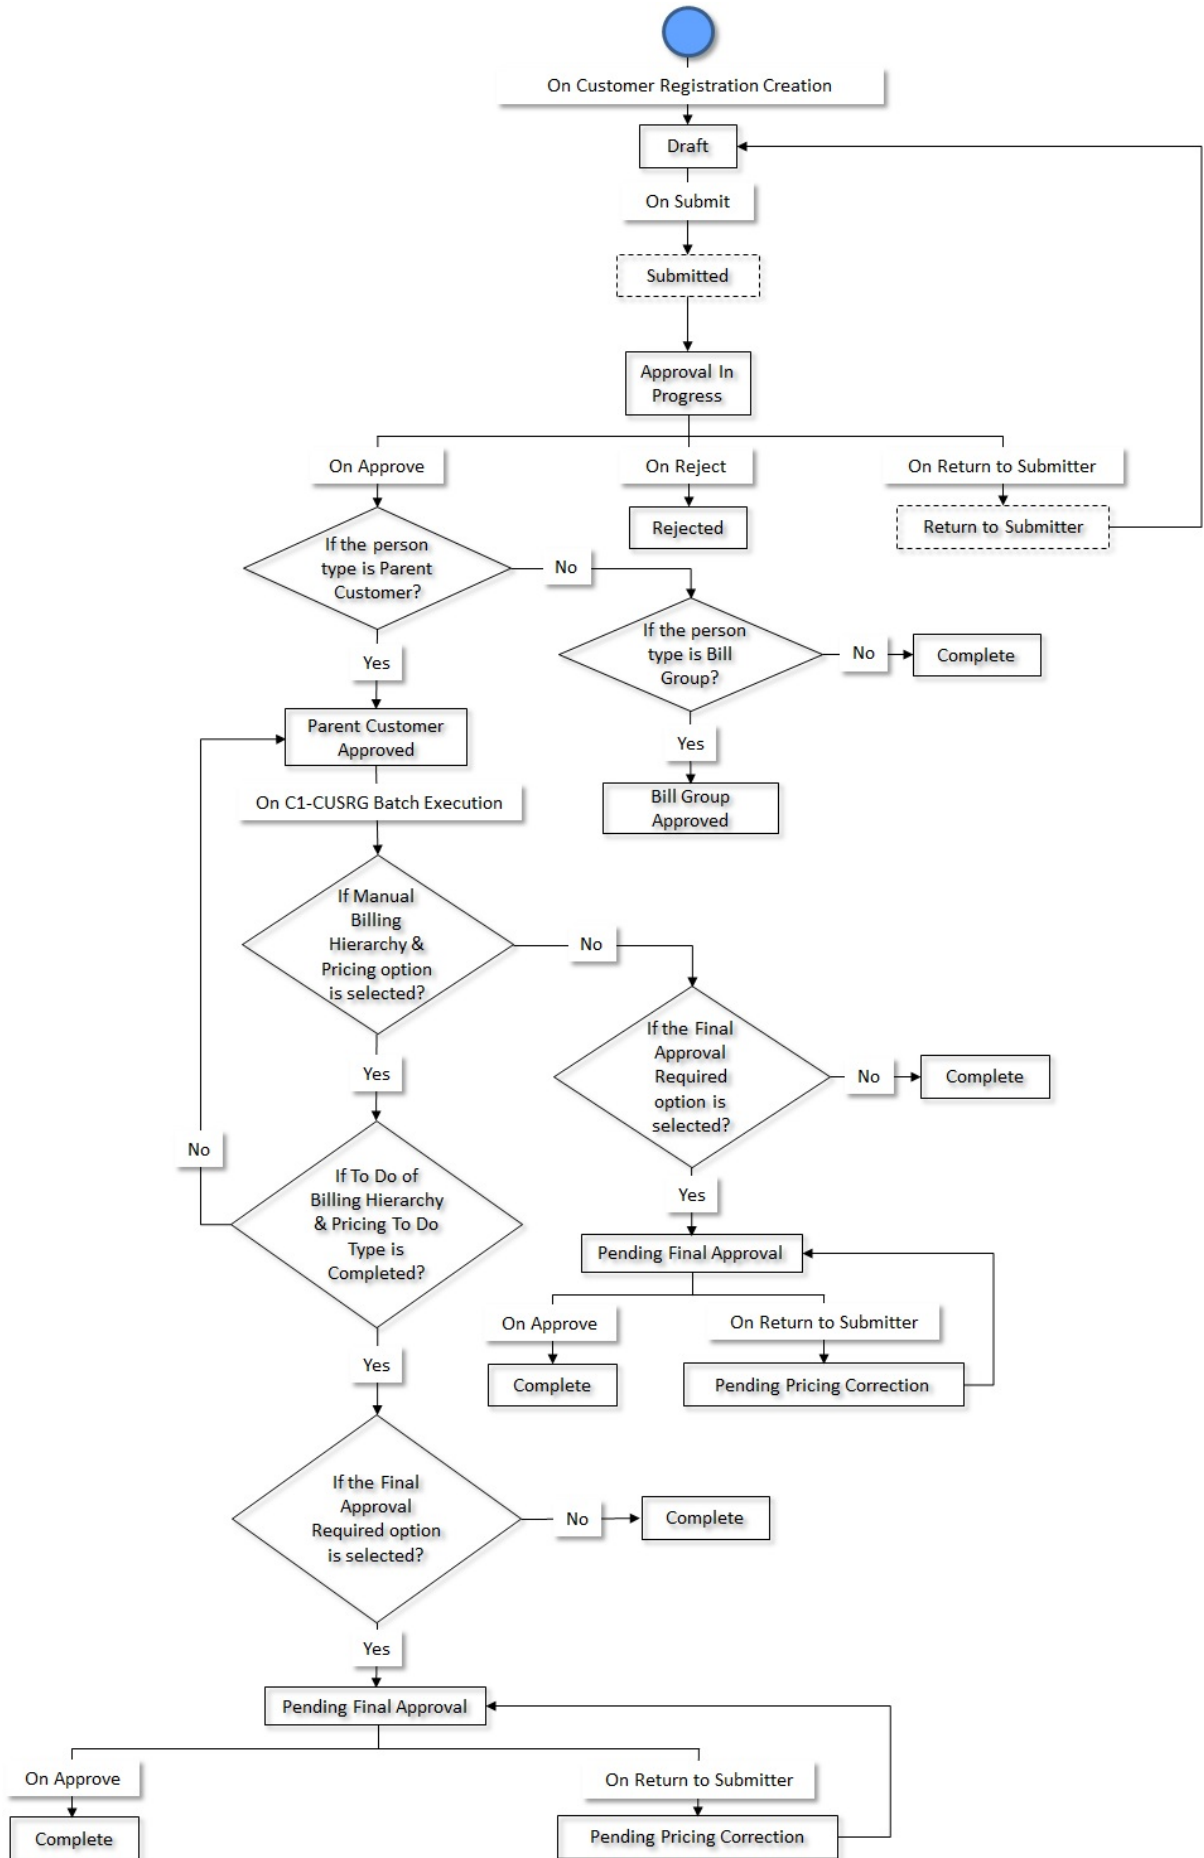

## Customer Registration (Without Approval) Status Transition

The following figure graphically indicates how a customer registration object moves from one status to another when the approval process is not configured in the customer registration type:

## Customer Registration (With Approval) Status Transition

The following figure graphically indicates how a customer registration object moves from one status to another when the approval process is configured in the customer registration type:

## Customer Registration Template

A customer registration template encapsulates the following information:

- List of pages that should appear when you create a person, account, policy, or policy plan using the respective customer registration template
- List of sections that should appear in each page
- Field or characteristic attributes, such as:
  - Default value for a field or characteristic type
  - Default value for a person or account identifier type or phone type
  - Primary identifier type for a person or account
  - Mandatory field in each section
  - Enable or disable the field value, identifier type, identifier value, characteristic type, characteristic value, phone type, or phone number

You can create multiple customer registration templates for person, account, policy and policy plan. Depending on whether you are creating a customer registration template for person, account, policy or policy plan, you can include the following pages and define field or characteristic attributes for the following sections:

Template Category	Template Page	Template Section
Person	Main	Person Main
		Person Names
		Person Identifiers
		Person Phones
	Contact Information	Person Address
		Person Email
	Accounts	-
	Person Hierarchy	Person Hierarchy – Main
		Person Hierarchy – Characteristics
	Person Characteristics	Person Characteristics
	Policies	Policies
		Parent Policies
	Registration Characteristics	Customer Registration Characteristics
Account	Main	Account Information

Template Category	Template Page	Template Section
		Account Identifiers
	Auto Pay	Account Autopay
	Persons	Main
		Account Address Override Information
		Bill Routing
Account Characteristics	Account Characteristics	
Policy	Policy – Main	Policy Main
		Policy Persons
		Policy Characteristics
Policy Plan	Plan	Plan - Main
		Plan - Characteristics

## Search Customer Registration Template

The **Search Customer Registration Template** zone allows you to search for a customer registration template using various search criteria. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for customer registration templates using the banking template or the healthcare template details. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Banking Template</b> - Used to indicate whether you want to search for customer registration templates created using the <b>C1-CustomerRegistrationTmplBK</b> business object.</li> <li>• <b>Healthcare Template</b> - Used to indicate whether you want to search for customer registration templates created using the <b>C1-CustomerRegistrationTmplHC</b> business object.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> By default, the <b>Banking Template</b> option is selected.	
Template	Used to search for a particular template.	No
Description	Used to search for customer registration templates having a particular description.	No
Template Category	Used to search for customer registration templates which belong to a particular category. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>	No
	<b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> options appear when you select the <b>Healthcare Template</b> option from the <b>Search By</b> list.	

**Note:** You must specify at least one search criterion while searching for a customer registration template.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Template	Displays the customer registration template.
Description	Displays the description of the customer registration template.
Template Category	Displays the category to which the customer registration template belongs. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Customer Registration Template</b> screen appears where you can edit the details of the customer registration template.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Customer Registration Template</b> screen appears where you can define a new customer registration template using an existing customer registration template.

Column Name	Column Description
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can delete the customer registration template.
	<b>Note:</b> You can delete a customer registration template when a customer registration is not yet defined using the customer registration template.

On clicking the **Broadcast** (📡) icon corresponding to a customer registration template, the **Customer Registration Template** zone appears with the details of the respective customer registration template.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Customer Registration Template

The **Customer Registration Template** zone displays the details of the customer registration template. It also allows you to edit, copy, and delete the customer registration template. It contains the following sections

- **Main** - Displays the basic information about the customer registration template. It contains the following fields:

Field Name	Field Description
Template	Displays the customer registration template.
Template Category	Indicates the category for which the customer registration template is created in the system. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul> <p><b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> template categories appear when the customer registration template is created using the <b>C1-CustomerRegistrationTmplHC</b> business object.</p>
Description	Displays the description of the customer registration template.
Detailed Description	Displays additional information about the customer registration template.

- **Template Pages** - The **Template Pages** section lists the template pages, template sections added for a particular template category in a customer registration template. It contains the following columns:

Column Name	Column Description
Template Page	Indicates the template page which is added for the template category.
Template Section	Indicates the template section which is defined for the template page.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration template.
Delete	Used to delete the customer registration template.
	<b>Note:</b> You can delete a customer registration template when a customer registration is not yet created using the customer registration template.
Duplicate	Used to create a new customer registration template using an existing customer registration template.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the customer registration template is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Customer Registration Template** zone does not appear in the **Customer Registration Template** screen. It appears when you click the **Broadcast** () icon corresponding to the customer registration template in the **Search Customer Registration Template** zone.

## Searching for a Customer Registration Template

### Prerequisites

To search for a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Customer registration templates defined in the application
- Customer registration templates associated with the template categories

### Procedure

To search for a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Template**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Template** sub-menu.  
The **Customer Registration Template** screen appears.
4. Enter the search criteria in the **Search Customer Registration Template** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of customer registration templates that meet the search criteria appears in the **Search Results** section.

## Viewing the Customer Registration Template Details

### Procedure

To view the details of a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Broadcast** () icon corresponding to the customer registration template whose details you want to view.

The **Customer Registration Template** zone appears.

- View the details of the customer registration template in the **Customer Registration Template** zone.

## Defining a Customer Registration Template

### Prerequisites

To define a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Template categories defined in the application
- Template pages and sections defined in the application

### Procedure

To define a customer registration template:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **C** and then click **Customer Registration Template**.  
A sub-menu appears.
- Click the **Add** option from the **Customer Registration Template** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Template Business Object	Used to indicate the business object using which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> <li><b>Customer Registration Template - Banking</b> - Used to indicate that you want to define a customer registration template using the <b>C1-CustomerRegistrationTmplBK</b> business object.</li> <li><b>Customer Registration Template - Health Care</b> - Used to indicate that you want to define a customer registration template using the <b>C1-</b></li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>CustomerRegistrationTmplHC</b> business object.	

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Template** screen.

4. Select the required customer registration template business object from the respective field.
5. Click **OK**.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the selected business object. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration template.
- **Template Pages** - Used to add template pages and its related sections for the customer registration template.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the customer registration template.	Yes
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>	Yes
	<b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> options appear when you are defining a customer registration template using the <b>C1-CustomerRegistrationTmplHC</b> business object.	
Business Object	Indicates the business object using which you want to define the customer registration template.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

6. Enter the required details in the **Main** section.
7. Add the template pages and template sections for the customer registration template in the **Template Pages** section.

8. Set the field attributes for the template sections in the **Template Pages** section.
9. Click **Save**.

The customer registration template is defined.

## Adding the Pages and Sections in a Customer Registration Template

### Prerequisites

To add a page and its related sections in a customer registration template, you should have:

- Template categories defined in the application
- Template pages and sections defined in the application

### Procedure

To define a customer registration template:

1. Ensure that the **Template Pages** section is expanded when you are defining, editing, or copying a customer registration template.

The **Template Pages** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template Page	Used to indicate the page which you want to add in a customer registration template for a particular template category.	Yes (Conditional) <b>Note:</b> This field is required while adding pages and sections in a customer registration template.
Template Section	Used to indicate the section and its field attributes which you want to define for a particular page in a customer registration template.	Yes (Conditional) <b>Note:</b> This field is required while adding pages and sections in a customer registration template.

Field Name	Field Description	Mandatory (Yes or No)						
	<p><b>Note:</b> On clicking the <b>Add</b> (⊕) icon, the following columns appear:</p> <table border="1"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Template Section</td> <td>Used to indicate the section for a particular page.</td> </tr> <tr> <td>Field Attributes</td> <td>Used to define the field attributes of a section.</td> </tr> </tbody> </table> <p><b>Note:</b> On clicking the <b>Add</b> (⊕) icon, you can define the field attributes for the section.</p>	Column Name	Column Description	Template Section	Used to indicate the section for a particular page.	Field Attributes	Used to define the field attributes of a section.	
Column Name	Column Description							
Template Section	Used to indicate the section for a particular page.							
Field Attributes	Used to define the field attributes of a section.							

The following table lists the various pages and sections that you can include in a customer registration template:

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
Account	Auto Pay	No	Account Autopay	No
	Account Characteristics	No	Account Characteristics	No

Template Category	Template Pages		Template Sections		
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)	
	Credit Ratings	No	Credit Rating	No	
	<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This template page appears when you are defining, editing, or copying a customer registration template which is created using the <b>C1-Customer Registration TmplBK</b> business object.</p> </div>				
	Main	Yes	Account Identifiers	Yes	
			Account Information	Yes	
	Persons	Yes	Account Address Override Information	No	
			Bill Routing	Yes	
			Main	Yes	
	Person	Accounts	No	-	-
		Contact Information	No	Person Address	No
				Person Email	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
	Deal Information	No	Deal-Main	No
	<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This template page appears when you are defining, editing, or copying a customer registration template which is created using the <b>C1-Customer Registration TmplBK</b> business object.</p> </div>			
	Main	Yes	Person Identifiers	Yes
			Person Main	Yes
			Person Names	Yes
			Person Phones	No
	Person Characteristics	No	Person Characteristics	No
	Person Hierarchy	No	Person Hierarchy-Characteristics	No
			Person Hierarchy-Main	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
	Policies	No	Parent Policy	No
	<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This template page appears only when you are defining, editing, or copying a customer registration template which is created using the <b>C1-Customer Registration TmplHC</b> business object.</p> </div>		Policies	No
	Registration Characteristics	No	Customer Registration Characteristics	No
Policy	Policy-Main	Yes	Policy Characteristics	No
			Policy-Main	Yes
			Policy Persons	No
<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This template category appears only when you are defining, editing, or copying a customer registration template which is created using the <b>C1-CustomerRegistration TmplHC</b> business object.</p> </div>				

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
Policy Plan	Plan	Yes	Plan-Characteristics	No
<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This template category appears when you are defining, editing, or copying a customer registration template which is created using the <b>C1-CustomerRegistration TmplHC</b> business object.</p> </div>			Plan-Main	Yes

2. Enter the required details in the **Template Pages** section.
3. Set the field attributes for the template section, if required.
4. If you want to add more than one page or section for the customer registration template, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a page or section from the customer registration template, click the **Delete (🗑)** icon corresponding to the page or section.

5. Click **Save**.

The pages and sections are added in the customer registration template.

**Note:**

You can add all the template pages available for a particular template category by clicking the **Select All** check box in the upper left corner of the **Template Pages** section.

You cannot edit or delete a template page or section if a customer registration is already defined using the customer registration template.

## Setting the Field Attributes for a Template Section

### Prerequisites

To set the field attributes for a template section, you should have:

- Template pages and sections associated with the template category
- Fields for the sections defined in the application

### Procedure

To set the field attributes for a template section:

1. Ensure that the **Template Pages** section is expanded when you are defining, editing, or copying a customer registration template.

The **Template Pages** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template Page	Used to indicate the page which you want to add in a customer registration template for a particular template category.	Yes (Conditional) <b>Note:</b> This field is required while adding pages and sections in a customer registration template.
Template Section	Used to indicate the section and its field attributes which you want to define for a particular page in a customer registration template.	Yes (Conditional) <b>Note:</b> This field is required while adding pages and sections in a customer registration template.

Field Name	Field Description	Mandatory (Yes or No)						
	<p><b>Note:</b> On clicking the <b>Add</b> (⊕) icon, the following columns appear:</p> <table border="1"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Template Section</td> <td>Used to indicate the section for a particular page.</td> </tr> <tr> <td>Field Attributes</td> <td>Used to define the field attributes of a section.</td> </tr> </tbody> </table> <p><b>Note:</b> On clicking the <b>Add</b> (⊕) icon, you can define the field attributes for the section.</p>	Column Name	Column Description	Template Section	Used to indicate the section for a particular page.	Field Attributes	Used to define the field attributes of a section.	
Column Name	Column Description							
Template Section	Used to indicate the section for a particular page.							
Field Attributes	Used to define the field attributes of a section.							

2. Select the template page and template section from the respective columns.
3. Click the **Add** (⊕) icon in the **Field Attributes** column corresponding to the template section whose field attributes you want to set.

It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence of the field attribute.	Yes (Conditional)
		<b>Note:</b> This field is required while setting the field attributes for a template section.
Field	Used to indicate the field for which you want to set attributes.	Yes (Conditional)
		<b>Note:</b> This field is required while setting the field attributes for a template section.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Field Search</b> window appears.</p> <p>On specifying the field, the description of the field appears corresponding to the field.</p>	
Default Field Value	<p>Used to indicate the default value for the field in the template section.</p> <p><b>Note:</b></p> <p>On specifying a field, the <b>Search</b> (🔍) icon appears corresponding to the <b>Default Field Value</b> field. On clicking the <b>Search</b> icon, a window appears depending on the field that you have selected.</p> <p>On specifying the default field value, the description of the default field value appears corresponding to the default field value.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Required	<p>Used to indicate whether the field is mandatory in the template section.</p> <p><b>Note:</b> By default, the check box in the <b>Required</b> column is disabled. It is enabled when you specify the field in the <b>Field</b> column.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Disable Field Value	<p>Used to indicate whether the field is disabled in the template section.</p> <p><b>Note:</b> By default, the check box in the <b>Disable Field Value</b> column is disabled. It is enabled when you specify the field in the <b>Field</b> column.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>

Disable Characteristic Type	<p>Used to indicate whether the characteristic type is disabled in the template section.</p> <p><b>Note:</b> By default, the check box in the <b>Disable Characteristic Type</b> column is disabled. It is enabled when you specify the characteristic type in the <b>Characteristic Type</b> column.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Disable Characteristic Value	<p>Used to indicate whether the characteristic is disabled in the template section.</p> <p><b>Note:</b> By default, the check box in the <b>Disable Characteristic Value</b> column is disabled. It is enabled when you specify the characteristic value in the <b>Characteristic Value</b> column.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>

4. Enter the required details in the **Template Pages** section.
5. If you want to set more than one field attribute for the template section, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a field attribute from the template section, click the **Delete** (🗑️) icon corresponding to the field.

6. Click **Save**.

The field attributes are set for the template section.

**Editing a Customer Registration Template****Prerequisites**

To edit a customer registration template, you should have:

- Template categories defined in the application
- Template pages and sections defined in the application

**Procedure**

To edit a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the customer registration template whose details you want to edit.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the business object using which the customer registration template is defined. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration template.
- **Template Pages** - Used to add template pages and its related sections for the customer registration template.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Displays the customer registration template.	Not applicable
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> options appear when you are defining a customer registration template using the <b>C1-CustomerRegistrationTmplHC</b> business object.	
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

**Tip:** Alternatively, you can edit the details of a customer registration template by clicking the **Edit** button in the **Customer Registration Template** zone.

3. Modify the details in the **Main** section, if required.
4. Add, edit, or remove the template pages and template sections from the customer registration template, if required.
5. Add, edit, or remove the field attributes from the template section, if required.
6. Click **Save**.

The changes made to the customer registration template are saved.

**Note:** You can edit a customer registration template only when a customer registration it is not yet defined using the customer registration template.

## **Copying a Customer Registration Template**

Instead of creating a customer registration template from scratch, you can create a new customer registration template using an existing customer registration template. This is possible through copying a customer registration template. On copying a customer registration template, the details including the template pages, template sections, and field attributes for the template sections are copied to the new customer registration template. You can then edit the details, if required.

**Prerequisites**

To copy a customer registration template, you should have:

- Customer registration template (whose copy you want to create) defined in the application
- Template categories defined in the application
- Template pages and sections defined in the application

**Procedure**

To copy a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the customer registration template whose copy you want to create.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the business object using which the customer registration template whose copy you want to create is defined. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration template.
- **Template Pages** - Used to add template pages and its related sections for the customer registration template.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the customer registration template.	Yes
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>	Yes
	<b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> options appear when you are defining a customer registration template using the <b>C1-CustomerRegistrationTmplHC</b> business object.	
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the customer registration template.	No

**Tip:** Alternatively, you can copy a customer registration template by clicking the **Duplicate** button in the **Customer Registration Template** zone.

- Enter the required details in the **Main** section.
- Add, edit, or remove the template pages and template sections from the customer registration template, if required.
- Add, edit, or remove the field attributes from the template section, if required.
- Click **Save**.

The new customer registration template is defined.

## Deleting a Customer Registration Template

### Procedure

To delete a Customer Registration Template:

- Search for the customer registration template in the **Customer Registration Template** screen.
- In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the customer registration template that you want to delete.

A message appears confirming whether you want to delete the customer registration template.

- Click **OK**.

The customer registration template is deleted.

**Note:** You can delete a customer registration template when a customer registration is not yet created using the customer registration template.

**Tip:** Alternatively, you can delete a customer registration template by clicking the **Delete** button in the **Customer Registration Template** zone.

## Customer Registration Type

A customer registration type encapsulates the following information:

- Users with a particular access group can only create a customer registration object using the customer registration type
- Whether the customer registration type can be used to create a customer registration object from the user interface, through the inbound message, or through the **File Upload Interface** utility
- Whether the approval is required when you create, edit, or delete a customer registration object
- Whether the final level approval is required once the approver at the first level approves the customer registration object
- Whether a To Do should be created indicating that the users have to manually create the billing hierarchy and pricing for the parent customer.
- The business objects using which the person, account, policy plan, membership, and address should be created when a customer registration object is created using the customer registration type
- A customer registration template which indicates the pages and sections that should appear when you are creating a customer registration object using the customer registration type. You can specify one customer registration template for person and one or more customer registration templates for account, policy, and policy plan.
- Information, such as person names, person identifiers, person phones, person characteristics, person addresses, person hierarchy, accounts, account identifiers, account characteristics, account auto pay information, account persons, account bill routing information, policies, policy plans, policy characteristics, or policy plan characteristics, which should be copied when you create a copy of a customer registration object which is created using the customer registration type.

## Customer Registration Type List

The **Customer Registration Type List** zone lists the customer registration types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Customer Registration Type	Displays the customer registration type.
Description	Displays the description of the customer registration type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Customer Registration Type</b> screen appears where you can edit the details of the customer registration type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Customer Registration Type</b> screen appears where you can define a new customer registration type using an existing customer registration type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the customer registration type.  <b>Note:</b> You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.

You can filter the list using various search criteria (such as, **Customer Registration Type** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to a customer registration type, the **Customer Registration Type** zone appears with the details of the respective customer registration type.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Customer Registration Type

The **Customer Registration Type** zone displays the details of the customer registration type. It contains the following sections:

- **Main** - Displays the basic information about the customer registration type. It contains the following fields:

Field Name	Field Description
Customer Registration Type	Displays the customer registration type.
Description	Displays the description of the customer registration type.

Field Name	Field Description
Customer Registration Business Object	<p>Indicates the business object using which the customer registration is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Customer Registration - Banking</b> - Indicates customer registration is created using the <b>C1-CustomerRegistrationBanking</b> business object.</li> <li>• <b>Customer Registration - Health Care</b> - Indicates customer registration is created using the <b>C1-CustomerRegistrationHC</b> business object.</li> </ul> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Detailed Description	Displays additional information about the customer registration type.
Status	<p>Indicates the status of the customer registration type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> You cannot change the status of a customer registration type to <b>Inactive</b> when the corresponding customer registration is in a status other than <b>Processed</b> or <b>Rejected</b>.</p>
Access Group	<p>Displays the user group that can access the customer registration created using the customer registration type.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Access Group</b> screen appears where you can view the details of the respective access group.</p>
Registration Source	<p>Indicates the source through which the customer registration is created using the customer registration type. The valid values are:</p> <ul style="list-style-type: none"> <li>• File Upload</li> <li>• Inbound Message</li> <li>• Manual</li> </ul>

- **Additional Data** - Displays additional information about the customer registration type. It contains the following fields:

Field Name	Field Description
Approval Required	Indicates whether approval is required while creating the customer registration using the customer registration type.
Approval To Do Type	<p data-bbox="889 323 1468 434">Indicates that the To Do entry of the specified To Do type is created when you submit the customer registration for approval.</p> <p data-bbox="889 445 1468 699"><b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p>
Approval To Do Role	<p data-bbox="889 720 1468 831">Indicates that users with the specified To Do role can only approve, reject, or resubmit the customer registration for approval.</p> <p data-bbox="889 842 1468 1096"><b>Note:</b> This field appears when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.</p>
Submitter To Do Type	<p data-bbox="889 1117 1468 1228">Indicates the To Do entry of the specified To Do type is created when the customer registration is resubmitted by the approver.</p> <p data-bbox="889 1239 1468 1415"><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>
Submitter To Do Role	<p data-bbox="889 1436 1468 1547">Indicates the users with the specified To Do role for whom the To Do task is created when the customer registration is resubmitted by the approver.</p> <p data-bbox="889 1558 1468 1734"><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>
Final Approval Required	Indicates whether the final approval is required once the approver at the first level approves the customer registration.

Field Name	Field Description
	<p><b>Note:</b></p> <p>This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The final approval is required when the <b>Manual Billing Hierarchy and Pricing</b> option check box is selected.</p>
Final Approval To Do Type	<p>Indicates that the To Do entry of the specified To Do type is created when you submit the customer registration for final approval.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p> <p>This field appears when the <b>Final Approval Required</b> check box is selected.</p>
Final Approval To Do Role	<p>Indicates that users with the specified To Do role can only approve or resubmit the customer registration for final approval.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p> <p>This field appears when the <b>Final Approval Required</b> check box is selected.</p>
Manual Billing Hierarchy and Pricing	<p>Indicates whether the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters are created manually by the user while defining the customer registration.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>This feature is used only for customer registration objects where the person type is set to <b>Parent Customer</b>.</p>
Billing Hierarchy and Pricing To Do Type	<p>Indicates the To Do entry of the specified To Do type is created for the user to define or edit the</p>

Field Name	Field Description
	<p>billing hierarchy and pricing for the parent customer manually.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type. This field appears when the <b>Manual Billing Hierarchy and Pricing</b> check box is selected.</p>
Billing Hierarchy and Pricing To Do Role	<p>Indicates users with the specified To Do role can only define or edit the billing hierarchy and pricing for the parent customer manually.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role. This field appears when the <b>Manual Billing Hierarchy and Pricing</b> check box is selected.</p>
Person Business Object	<p>Indicates the business object using which the person is created while defining the customer registration.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Account Business Object	<p>Indicates the business object using which the account is created while defining the customer registration.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Policy Plan Business Object	<p>Indicates the business object using which the policy plan is created while defining the customer registration.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object. This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.</p>
Benefits Business Object	<p>Indicates the business object using which the benefit is created while defining the customer registration.</p>

Field Name	Field Description
	<p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Membership Business Object	<p>Indicates the business object using which the membership is created while defining the customer registration.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p> <p>This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.</p>
Address Business Object	<p>Indicates the business object using which the address is created while defining the customer registration.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Statement Construct Business Object	<p>Indicates the business object using which the statement construct is created while defining the customer registration.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>

- **Characteristics** - Lists the characteristics defined for the customer registration type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Customer Registration Templates** - Lists the templates that are associated with the customer registration type for creating a customer registration. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence of the customer registration template.
Template Category	<p>Indicates the category to which the customer registration template belongs. The valid values are:</p> <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"> <li>Policy</li> <li>Policy Plan</li> </ul> <p><b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> template categories appear when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.</p>
Template	<p>Displays the customer registration template associated with the customer registration type.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Customer Registration Template</b> screen appears where you can view the details of the respective customer registration template.</p>

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration type.
Delete	<p>Used to delete the customer registration type.</p> <p><b>Note:</b> You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.</p>
Duplicate	Used to create a new customer registration type using an existing customer registration type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	<p>Indicates the business object using which the customer registration type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>

- **Copy Customer Registration Details** - Enables you to specify the type of information you want to copy while defining a customer registration using an existing customer registration. It contains the following fields:

Column Name	Column Description
Person Names	Indicates whether you want to copy the person details while copying a customer registration.

Column Name	Column Description
Accounts	Indicates whether you want to copy the account details while copying a customer registration.
Person Identifiers	Indicates whether you want to copy the person identifier details while copying a customer registration.
Account Identifiers	Indicates whether you want to copy the account identifier details while copying a customer registration.
Person Phones	Indicates whether you want to copy the phone details of the person while copying a customer registration.
Account Characteristics	Indicates whether you want to copy the characteristic details of the account while copying a customer registration.
Person Characteristics	Indicates whether you want to copy the characteristic details of the person while copying a customer registration.
Account Auto Pay Information	Indicates whether you want to copy the automatic payment details of the account while copying a customer registration.
Person Addresses	Indicates whether you want to copy the address details of the person while copying a customer registration.
Account Persons	Indicates whether you want to copy the details of the persons related to the account while copying a customer registration.
Person Hierarchy	Indicates whether you want to copy the person hierarchy details while copying a customer registration.
Account Override Address	Indicates whether you want to copy the account override address details while copying a customer registration.
Bill Routing Information	Indicates whether you want to copy the bill routing details of the account while copying a customer registration.
Credit Rating History	Indicates whether you want to copy the credit rating history details while copying a customer registration.
Policies	Indicates whether you want to copy the policy details while copying a customer registration.  <b>Note:</b> This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.
Policy Plans	Indicates whether you want to copy the policy plan details while copying a customer registration.

Column Name	Column Description
	<b>Note:</b> This field appears only when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.
Policy Characteristics	Indicates whether you want to copy the policy characteristic details while copying a customer registration.  <b>Note:</b> This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.
Policy Plan Characteristics	Indicates whether you want to copy the policy plan characteristic details while copying a customer registration.  <b>Note:</b> This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.

By default, the **Customer Registration Type** zone does not appear in the **Customer Registration Type** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a customer registration type in the **Customer Registration Type List** zone.

## Searching for a Customer Registration Type

### Prerequisites

To search for a customer registration type, you should have:

- Customer registration types defined in the application

### Procedure

To search for a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Type** sub-menu.

The **Customer Registration Type** screen appears with a list of customer registration types in the **Customer Registration Type List** zone.

- Click the **Filters** (🔍) icon in the title bar of the **Customer Registration Type List** zone.

It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to search for a particular customer registration type.	No
Description	Used to search for customer registration types having a particular description.	No

- Enter the search criteria in the **Customer Registration Type List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of customer registration types that meet the search criteria appears in the **Search Results** section.

## **Defining a Customer Registration Type**

### **Prerequisites**

To define a customer registration type, you should have:

- Customer registration type business objects defined in the application
- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

**Note:** The policy plan and membership business objects are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

**Note:** The billing hierarchy and pricing To Do types and To Do roles are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

### **Procedure**

To define a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.

A sub-menu appears.

3. Click the **Add** option from the **Customer Registration Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type Business Object	Used to indicate the business object using which you want to create the customer registration type. The valid values are: <ul style="list-style-type: none"> <li>• Customer Registration Type - Banking</li> <li>• Customer Registration Type - Healthcare</li> </ul>	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Type** screen.

**Note:** The **Select Business Object** screen appears when there are multiple customer registration type business objects defined in the application. If there is only one customer registration type business object defined in the application, the **Customer Registration Type** screen appears.

4. Select the required customer registration business object from the respective field.
5. Click **OK**.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p> </div>	Yes
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> <li>• File Upload</li> <li>• Inbound Message</li> <li>• Manual</li> </ul>	Yes

6. Enter the required details in the **Main** section.
7. Define additional information about the customer registration type in the **Additional Data** section.

8. Define a list of characteristics for the customer registration type in the **Characteristics** section.
9. Associate customer registration templates with the customer registration type in the **Customer Registration Templates** section
10. Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section.
11. Click **Save**.

The customer registration type is defined.

## Defining Additional Data for a Customer Registration Type

### Prerequisites

To define additional data for a customer registration type, you should have:

- Person, account, policy plan, membership, and address business objects defined in the application

**Note:** The policy plan and membership business objects are required when you are defining, editing, or copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

**Note:** The billing hierarchy and pricing To Do types and To Do roles are required when you are defining, editing, or copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

### Procedure

To define additional data for a customer registration type:

1. Ensure that the **Additional Data** section is expanded when you are defining, editing, or copying a customer registration type.

The **Additional Data** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required while creating the customer registration using the customer registration type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		<p><b>Note:</b> This field is required for approving the customer registration which is created using the customer registration type.</p>
Approval To Do Type	<p>Used to indicate the To Do entry of the specified To Do type is created when you submit the customer registration for approval.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for approving the customer registration which is created using the customer registration type.</p>
Approval To Do Role	<p>Used to indicate the users with the specified To Do role can approve, reject, or resubmit the customer registration for approval.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for approving the customer registration which is created using the customer registration type.</p>
Submitter To Do Type	<p>Used to indicate the To Do entry of the specified To Do type is created when the customer registration is resubmitted by the approver.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for resubmitting the customer registration for approval.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p>	
Submitter To Do Role	Used to indicate the users with the specified To Do role for whom the To Do task is created when the customer registration is resubmitted by the approver.	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for resubmitting the customer registration for approval.</p>
Final Approval Required	<p>Used to indicate whether final approval is required once the approver at the first level approves the customer registration.</p> <p><b>Note:</b></p> <p>This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The final approval is required when the <b>Manual Billing Hierarchy and Pricing</b> option check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for approving the customer registration which is created using the customer registration type.</p>
Final Approval To Do Type	Used to indicate the To Do entry of the specified To Do type is created when you submit the customer registration for final approval.	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for final approval of the customer registration.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Final Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Final Approval To Do Type</b> field.</p> <p>This field appears when the <b>Final Approval Required</b> check box is selected.</p>	
Final Approval To Do Role	<p>Used to indicate the users with the specified To Do role can only approve or resubmit the customer registration for final approval.</p> <p><b>Note:</b> This field appears when the <b>Final Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for final approval of the customer registration.</p>
Manual Billing Hierarchy and Pricing	<p>Used to indicate whether the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters are created manually by the user while defining the customer registration.</p> <p><b>Note:</b></p> <p>The <b>Manual Billing Hierarchy and Pricing</b> option can be used only for customer registrations where the person type is set to <b>Parent Customer</b>.</p> <p>This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for creating the billing hierarchy and pricing for the parent customer manually.</p>
Billing Hierarchy and Pricing To Do Type	Used to indicate the To Do entry of the specified To Do type is created for the user to define or edit the	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p>billing hierarchy and pricing for the parent customer manually.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Billing Hierarchy and Pricing To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Billing Hierarchy and Pricing To Do Type</b> field.</p> <p>This field appears when the <b>Manual Billing Hierarchy and Pricing</b> check box is selected.</p>	<p><b>Note:</b> This field is required for creating the billing hierarchy and pricing for the parent customer manually.</p>
Billing Hierarchy and Pricing To Do Role	<p>Used to indicate the users with the specified To Do role can only define or edit the billing hierarchy and pricing for the parent customer manually.</p> <p><b>Note:</b> This field appears when the <b>Manual Billing Hierarchy and Pricing</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for creating the billing hierarchy and pricing for the parent customer manually.</p>
Person Business Object	Used to indicate the business object using which the customer registration for a person is created using the customer registration type.	Yes
Account Business Object	Used to indicate the business object using which the customer registration for an account is created using the customer registration type.	Yes
Policy Plan Business Object	Used to indicate the business object using which the customer registration for a policy plan is created using the customer registration type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p>	
Membership Business Object	<p>Used to indicate the business object using which the customer registration for a membership is created using the customer registration type.</p> <p><b>Note:</b> The <b>Membership Business Object</b> is required for creating customer registrations through an <b>Inbound Message</b>.</p> <p>This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p>	Yes
Benefits Business Object	Used to indicate the business object using which the customer registration for a benefit is created using the customer registration type.	No
Address Business Object	Used to indicate the business object using which the customer registration for an address is created using the customer registration type.	Yes
Statement Construct Business Object	Used to indicate the business object using which the customer registration for a statement construct is created using the customer registration type.	Yes

2. Enter the required details in the **Additional Data** section.

3. Click **Save**.

The additional data for the customer registration type is defined.

## Defining a Characteristic for a Customer Registration Type

### Prerequisites

To define a characteristic for a customer registration type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration Type**)

### Procedure

To define a characteristic for a customer registration type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a customer registration type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Customer Registration Type</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the customer registration type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the customer registration type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the customer registration type, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the customer registration type, click the **Delete** (🗑️) icon corresponding to the characteristic.

#### 4. Click **Save**.

The characteristic is defined for the customer registration type.

## Associating a Customer Registration Template with a Customer Registration Type

### Prerequisites

To associate a customer registration template with a customer registration type, you should have:

- Template categories defined in the application
- Customer registration templates associated to the template categories

### Procedure

To associate a customer registration template with a customer registration type:

1. Ensure that the **Customer Registration Templates** section is expanded when you are defining, editing, or copying a customer registration type.

The **Customer Registration Templates** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence for the customer registration template.	Yes (Conditional) <b>Note:</b> This field is required when you are associating a customer registration template with a customer registration type.
Template Category	Used to indicate the category to which the customer registration template belongs. The valid values are: <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you are associating a customer registration template with a customer registration type.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Policy</b> and <b>Policy Plan</b> template categories appear when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>You can associate only one person template category and multiple account, policy, and policy plan template categories with the customer registration type.</p>	
Template	<p>Used to specify the customer registration template which you want to associate with the customer registration type.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Template</b> field. On clicking the <b>Search</b> icon, the <b>Customer Registration Template Search</b> window appears.</p> <p>On specifying the template, the description of the template appears corresponding to the <b>Template</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are associating a customer registration template with a customer registration type.</p>

2. Enter the required details in the **Customer Registration Templates** section.
3. If you want to define more than one template for the customer registration type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a template from the customer registration type, click the **Delete** (🗑️) icon corresponding to the customer registration template.

4. Click **Save**.

The customer registration template is associated with the customer registration type.

## Setting Attributes to Define a Customer Registration Using the Existing Customer Registration

### Prerequisites

To set an attribute for defining a customer registration using the existing customer registration, you should have:

- **Person** attributes defined in the application
- **Account** attributes defined in the application
- **Policy** attributes defined in the application

**Note:** The **Policy** attributes are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- **Policy Plan** attributes defined in the application

**Note:** The **Policy Plan** attributes are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

### Procedure

To set an attribute for defining a customer registration using the existing customer registration:

1. Ensure that the **Copy Customer Registration Details** section is expanded when you are defining, editing, or copying a customer registration type.

The **Copy Customer Registration Details** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Names	Used to indicate whether you want to copy the person details while copying a customer registration.	No
Accounts	Used to indicate whether you want to copy the account details while copying a customer registration.	No
Person Identifiers	Used to indicate whether you want to copy the person identifier details while copying a customer registration.	No
Account Identifiers	Used to indicate whether you want to copy the account identifier details while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Person Phones	Used to indicate whether you want to copy the phone details of the person while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
Account Characteristics	Used to indicate whether you want to copy the characteristic details of the account while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Person Characteristics	Used to indicate whether you want to copy the characteristic details of the person while copying a customer registration.	No
Account Auto pay Information	Used to indicate whether you want to copy the automatic payment details of the account while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Person Addresses	Used to indicate whether you want to copy the address details of the person while copying a customer registration.	No
Account Persons	Used to indicate whether you want to copy the details of the persons related to the account while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Person Hierarchy	Used to indicate whether you want to copy the person hierarchy details while copying a customer registration.	No
Account Override Address	Used to indicate whether you want to copy the account override address details while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.</p>	
Bill Routing Information	<p>Used to indicate whether you want to copy the bill routing details of the account while copying a customer registration.</p> <p><b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.</p>	No
Credit Rating History	<p>Used to indicate whether you want to copy the credit rating history details while copying a customer registration.</p> <p><b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.</p>	No
Policies	<p>Used to indicate whether you want to copy the policy details while copying a customer registration.</p> <p><b>Note:</b> This field appears only when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p>	No
Policy Plans	Used to indicate whether you want to copy the policy plan details while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The check box of this field is enabled only when the <b>Policies</b> check box is selected in the <b>Copy Customer Registration Details</b> section.</p>	
Policy Characteristics	<p>Used to indicate whether you want to copy the policy characteristic details while copying a customer registration.</p> <p><b>Note:</b></p> <p>This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The check box of this field is enabled only when the <b>Policies</b> check box is selected in the <b>Copy Customer Registration Details</b> section.</p>	No
Policy Plan Characteristics	<p>Used to indicate whether you want to copy the policy plan characteristic details while copying a customer registration.</p> <p><b>Note:</b></p> <p>This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The check box of this field is enabled when the <b>Policy Plans</b> check box is selected in the <b>Copy Customer Registration Details</b> section.</p>	No

2. Select the required attributes in the **Copy Customer Registration Details** section.
3. Click **Save**.

The attributes are set for defining a customer registration using the existing customer registration.

## Editing a Customer Registration Type

### Prerequisites

To edit a customer registration type, you should have:

- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

**Note:** The policy plan and membership business objects are required when you are editing a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

**Note:** The billing hierarchy and pricing To Do types and To Do roles are required when you are editing a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

### Procedure

To edit a customer registration type:

1. Search for the customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the customer registration type whose details you want to edit.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.

- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Displays the customer registration type.	Not applicable
Business Object	Indicates the business object using which the customer registration type is created in the system.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p> </div>	Yes
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> <li>• File Upload</li> <li>• Inbound Message</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Manual</li> </ul>	

**Tip:** Alternatively, you can edit the details of a customer registration type by clicking the **Edit** button in the **Customer Registration Type** zone.

3. Modify the required details in the **Main** section, if required.
4. Modify additional information about the customer registration type in the **Additional Data** section, if required.
5. Define, edit, or remove characteristics of the customer registration type in the **Characteristics** section, if required.
6. Associate or disassociate customer registration templates from the customer registration type in the **Customer Registration Templates** section, if required.
7. Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section, if required.
8. Click **Save**.

The changes made to the customer registration type are saved.

## **Copying a Customer Registration Type**

Instead of creating a customer registration type from scratch, you can create a new customer registration type using an existing customer registration type. This is possible through copying a customer registration type. On copying a customer registration type, the details including the additional data, characteristics, customer registration templates, and attributes set to define a customer registration from the existing customer registration are copied to the new customer registration type. You can then edit the details, if required.

### **Prerequisites**

To copy a customer registration type, you should have:

- Customer registration type (whose copy you want to create) defined in the application
- Customer registration business objects defined in the application

- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

**Note:** The policy plan and membership business objects are required when you are copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

**Note:** The billing hierarchy and pricing To Do types and To Do roles are required when you are copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

### **Procedure**

To copy a customer registration type:

1. Search for a customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the customer registration type whose copy you want to create.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p> </div>	Yes
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> <li>File Upload</li> <li>Inbound Message</li> <li>Manual</li> </ul>	Yes

**Tip:** Alternatively, you can copy a customer registration type by clicking the **Duplicate** button in the **Customer Registration Type** zone.

- Enter the required details in the **Main** section.
- Enter additional information about the customer registration type in the **Additional Data** section.
- Define, edit, or remove characteristics of the customer registration type in the **Characteristics** section.
- Associate or disassociate customer registration templates from the customer registration type in the **Customer Registration Templates** section.
- Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section.
- Click **Save**.

The new customer registration type is defined.

How to search for a customer registration	<a href="#">Searching for a Customer Registration</a> on page 631
<b>Customer Registration</b> screen	<a href="#">Customer Registration (Used for Searching)</a> on page 620

## Searching for a Customer Registration

### Prerequisites

To search for a customer registration, you should have:

- Customer registration business objects defined in the application
- Customer registration statuses and customer registration types defined in the application
- Divisions associated with the access group to which the user belongs
- Person types and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Inbound message statuses, inbound message types, and source systems defined in the application.
- File statuses and file request types defined in the application.

### Procedure

To search for a customer registration:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Customer Registration**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration** sub-menu.  
The **Customer Registration** screen appears.
4. Enter the search criteria in the **Search Customer Registration** zone.

**Note:**

You must specify at least one search criterion while searching for a customer registration object. One more search criterion is required when you are searching for a customer registration using the division and/or person type.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

You must specify the division when you are searching for a customer registration of a person using the city.

You must specify division and/or any other criteria in the second group when you are searching for a customer registration using the person type.

If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the customer registration using the person ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **Search Customer Registration** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of customer registrations that meet the search criteria appears in the **Search Results** section.

## Defining a Customer Registration

### Prerequisites

To define a customer registration, you should have:

- Customer registration types, source systems, and person types defined in the application
- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Relationship types defined in the application
- Policy types and policy person roles defined in the application.

**Note:** These prerequisites are required when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

### Procedure

To define a customer registration:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Customer Registration**.  
A sub-menu appears.
3. Click the **Add** option from the **Customer Registration** sub-menu.

The **Add Customer Registration** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to indicate the customer registration type using which you want to define the customer registration.	Yes
Source System	Used to indicate the external system from where the customer registration information is received.	No
Person Type	Used to indicate the type of person for whom you want to define the customer registration.	Yes

**Tip:** Alternatively, you can access the **Add Customer Registration** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration** screen.

4. Select the required **Customer Registration Type** from the respective field.

5. Select the required **Source System** from the respective field, if required.
6. Select the required **Person Type** from the respective field.
7. Click **OK**.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Policies** - Used to specify the policy details of the person.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable

## **Adding an Account for a Person**

### **Prerequisites**

To add the account for a person, you should have:

- Customer class, divisions, currencies, account categories, access groups, accrual cycles, and bill cycles defined in the application

- Account identifier types defined in the application
- Auto pay source codes, auto pay methods, and auto pay route types defined in the application
- Account relationship types defined in the application
- Address sources, bill formats, and bill route types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

### **Procedure**

To add an account for a person:

1. Ensure that the **Accounts** section is expanded in the **Accounts** page when you are adding, editing, or removing an account of a person.

The **Accounts** section contains the following columns:

<b>Column Name</b>	<b>Column Description</b>	<b>Mandatory (Yes or No)</b>
Sequence No.	Displays the sequence number of the account.	Not applicable
Template	Displays the account template using which the account is added for the person.	Not applicable
Customer Class	Indicates the customer class to which the account belongs.	Not applicable
Division	Indicates the division to which the account belongs.	Not applicable
Primary Identifier Type	Indicates the primary identifier type using which the account is added for the person.	Not applicable
Identifier Value	Displays the value of the primary identifier type.	Not applicable
Account Information	Displays the concatenated string of information about the account that is added for the person.	Not applicable
View / Edit	On clicking the <b>View / Edit</b>  icon, you can view or edit the details of the account.	Not applicable

**Note:** No information appears in the above columns if an account is not yet added for the person.

2. Click the **Add New Account** button in the **Accounts** section.

The **Customer Registration - Add Account** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the account.
- **Auto Pay** - Used to add the automatic payment details of the account.
- **Persons** - Used to associate a person to the account.
- **Account Characteristics** - Used to define a list of characteristics for the account.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the account.

- **Account Identifiers** - Used to add the identifier details for the account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	Used to indicate the customer class to which the account belongs.	Yes
Division	Used to indicate the division to which the account belongs.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes
Set Up Date	Used to specify the date from when the account is configured for the person.  <b>Note:</b> By default, the current date appears in this field.	Yes
Invoice Currency	Used to indicate the currency which you want to use for generating the invoice of the account.  <b>Note:</b> The list includes only those currencies which are defined in the system.	Yes
Account Category	Used to indicate the category to which the account belongs. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Account</li> <li>• Settlement Account</li> <li>• Usage Account</li> </ul> <b>Note:</b> The list includes only those values which are present in the <b>ACCT_USAGE_FLG</b> lookup field.	Yes
Access Group	Used to indicate the user group that can access the account for the person.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p>	
Exclude Accrual	<p>Used to indicate whether the account is eligible for accrual.</p> <p><b>Note:</b> By default, the account is eligible for accrual if the division to which the account belongs is eligible for accrual. If you do not want the account to be eligible for accrual, you must select the <b>Exclude Accrual</b> check box. On selecting the <b>Exclude Accrual</b> check box, the <b>Accrual Cycle</b> field is disabled.</p>	No
Accrual Cycle	<p>Used to indicate the accrual cycle of the account in the division.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Accrual Cycle</b> field. On clicking the <b>Search</b> icon, the <b>Accrual Cycle Search for Cust Reg</b> window appears.</p> <p>On specifying the accrual cycle, the description of the accrual cycle appears corresponding to the <b>Accrual Cycle</b> field.</p> <p>This field is disabled when you click the <b>Exclude Accrual</b> check box.</p>	No
Product	Used to indicate the product for which the account is enrolled.	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while enrolling an account for a product.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Search Product</b> window appears.</p>	
Eligible for Repricing	<p>Used to indicate whether the account is eligible for repricing when the account attributes (defined as parameters in the system) are changed.</p> <p><b>Note:</b></p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p>	No
Bill Cycle	Used to indicate the bill cycle for the account.	No
Bill Lead Days	<p>Used to specify the number of days which is used to derive the cut-off date for advance billing.</p> <p><b>Note:</b> In case you don't want to bill the account in advance, you must specify <b>0</b> in this field.</p>	Yes
Comments	Used to specify additional information about the account.	No

3. Enter the required details in the **Main** section.
4. Add, edit, or remove the identifier details of the account in the **Account Identifiers** section.
5. Add, edit, or remove the automatic payment details of the account in the **Auto Pay** page, if required.
6. Associate or disassociate persons from the account in the **Persons** page, if required.
7. Define, edit, or remove characteristics of the account in the **Account Characteristics** page, if required.
8. Add, edit, or remove the credit rating details of the account in the **Credit Ratings** page, if required.
9. Click **Validate and Save**.

The account is added for the person.

## Adding the Identifier Details of an Account

### Prerequisites

To add the identifier details of an account, you should have:

- Account identifier types defined in the application.

### Procedure

To add the identifier details of an account:

1. Ensure that the **Account Identifiers** section is expanded in the **Customer Registration - Add Account** screen when you are adding or editing the account of a person.

The **Account Identifiers** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Primary ID	Used to indicate whether the account identifier is primary or not.	Yes
Account Identifier Type	Used to indicate the identifier type for the account.	Yes (Conditional) <b>Note:</b> This field is required while adding an account identifier.
Primary Account Identifier	Used to specify the primary account identifier for the account identifier type.	Yes (Conditional) <b>Note:</b> This field is required while adding an account identifier.

**Note:** You must specify at least one primary identifier while adding an account for a person.

2. Enter the required details in the **Account Identifiers** section.
3. If you want to add more than one account identifier for the account, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove an account identifier from the account, click the **Delete (🗑)** icon corresponding to the account identifier type.

4. Click **Validate and Save**.

The identifier details are added for the account.

## Adding the Automatic Payment Details of an Account

### Prerequisites

To add the automatic payment details of an account, you should have:

- Auto pay source codes, auto pay methods, and auto pay route types defined in the application

### Procedure

To add the automatic payment details of an account:

1. Ensure that the **Auto Pay** page is expanded in the **Customer Registration - Add Account** screen when you are adding or editing the account of a person.

The **Auto Pay** page contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Defer Auto Pay Date	Used to indicate the date till when you want to hold the automatic payment process of the account.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Rule Based Auto Pay	Used to indicate whether the automatic payment is rule based.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Start Date	Used to indicate the date from when the automatic payment is effective for the account. <b>Note:</b> The start date cannot be later than the end date.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
End Date	Used to indicate the date till when the automatic payment is effective for the account. <b>Note:</b> The end date cannot be earlier than the start date.	No

Field Name	Field Description	Mandatory (Yes or No)
Percentage	Used to specify the contribution of payment amount in percentage within multiple <b>Auto Pay IDs</b> (i.e for <b>Auto Pay Source Codes</b> ) having the same priority.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Priority	Used to specify the order in which the automatic payment option is considered for the effective date range.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Auto Pay Source Code	Used to indicate the financial institution that receives the automatic payment request. <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Auto Pay Source Code</b> field. On clicking the <b>Search</b> icon, the <b>Auto Pay Source Search</b> window appears. On specifying the auto pay source code, the description of the auto pay source code appears corresponding to the <b>Auto Pay Source Code</b> field.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Auto Pay Method	Used to indicate the method using which you want the system to process the automatic payment for the account. The valid values are: <ul style="list-style-type: none"> <li>• Direct Debit</li> <li>• Payment Advice</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Auto Pay Route Type	Used to indicate when and how the automatic payment request of the account is routed to the financial institution. <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Auto Pay Route Type</b> field. On clicking the <b>Search</b> icon, the <b>Auto Pay Route Type Search</b> window appears. On specifying the auto pay route type, the description of the auto pay route type appears corresponding to the <b>Auto Pay Route Type</b> field.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account

Field Name	Field Description	Mandatory (Yes or No)
Account Number	Used to specify the account number for which you want to add the automatic payment details.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Expires On	Used to specify the month and year of expiry for the automatic payment of the account.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Name	Used to specify the account name for which you want to add the automatic payment details.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Maximum Withdrawal Amount	Used to specify the maximum amount which can be withdrawn from the account through the automatic payment method.	Yes (Conditional) <b>Note:</b> This field is required while adding the automatic payment details of the account
Comments	Used to specify additional information about the automatic payment for the account.	No

- Enter the required details in the **Auto Pay** page.
- If you want to add more than one automatic payment details of the account, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove an automatic payment detail from the account, click the **Delete (🗑)** icon.

- Click **Validate and Save**.

The automatic payment details are added for the account.

## Defining a Characteristic for an Account

### Prerequisites

To define a characteristic for an account, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

### Procedure

To define a characteristic for an account:

1. Ensure that the **Characteristics** section is expanded in the **Account Characteristics** page when you are adding or editing the account of a person.

The **Characteristics** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the account.	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for an account.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Account</b> .	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for an account.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for an account.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the account, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the account, click the **Delete (🗑)** icon corresponding to the characteristic.

4. Click **Validate and Save**.

The characteristic is defined for the account.

## **Defining a Policy**

### **Prerequisites**

To define a policy, you should have:

- Policy types defined in the application.
- Source systems defined in the application.
- Policy person roles defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### **Procedure**

To define a policy:

1. Ensure that the **Policies & Plans** section is expanded in the **Policies** page when you are defining, editing, or removing a policy from the person.

The **Policies & Plans** section contains the following columns:

<b>Column Name</b>	<b>Column Description</b>	<b>Mandatory (Yes or No)</b>
Sequence No.	Displays the sequence number of the policy.	Not applicable
Template	Indicates the policy template using which the policy is defined for the person.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined for the person.	Not applicable
Policy Number	Displays the policy number.	Not applicable

Column Name	Column Description	Mandatory (Yes or No)
View / Edit	On clicking the <b>View / Edit</b> (✎) icon, you can view or edit the details of the policy.	Not applicable
Policy Plans	On clicking the <b>Add</b> (+) icon, you can add policy plans for the policy.	Not applicable

**Note:** No information appears in the above columns if a policy is not yet defined for the person.

- Click the **Add New Policy** button in the **Policies & Plans** section.

The **Select Policy Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to indicate the policy type using which you want to define a policy.  <b>Note:</b> If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to <b>Self-Funded</b> .	Yes

- Select the required policy type from the **Policy Type** field.
- Click **OK**.

The **Policy** screen appears. It contains the following sections:

- Main** - Used to specify the basic details about the policy.
- Persons** - Used to associate persons with the policy.
- Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field is enabled when you are defining a policy using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	
Start Date	Used to specify the date from when the policy is effective.  <b>Note:</b> The policy start date cannot be later than the policy end date.	Yes
End Date	Used to specify the date till when the policy is effective.  <b>Note:</b> The policy end date cannot be earlier than the policy start date.	Yes
Policy Person Role	Used to indicate the role of the person for whom you are defining the policy.	Yes

**Note:** The **Policies** page appears when you are defining, editing, or copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

5. Enter the required details in the **Main** section.
6. Define characteristics for the policy in the **Characteristics** section, if required.
7. Associate persons to the policy in the **Persons** section, if required.
8. Click **Validate and Save**.

The policy is defined for the person.

## Adding a Plan in a Policy

### Prerequisites

To add a plan in a policy, you should have:

- Policy plan templates defined in the application.
- Policy plan business objects defined in the application.
- Pricing rule types defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**)

### Procedure

To add a plan in a policy:

1. Ensure that the **Policies & Plans** section is expanded in the **Policies** page when you are adding, editing, or removing a policy plan from a policy.
2. Click the **Add**  icon in the **Policy Plans** column corresponding to the policy in which you want to add a policy plan.

The following columns appear in the **Policies & Plans** section:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the policy plan.	Not applicable
Template	Indicates the policy plan template using which the policy plan is added in the policy.	Not applicable
Plan Number	Displays the policy plan number.	Not applicable
Price Item	Displays the price item that is associated with the policy plan.	Not applicable
View / Edit	On clicking the <b>View / Edit</b>  icon, you can view or edit the details of the policy plan.	Not applicable

**Note:** No information appears in the above columns if a plan is not yet added in the policy.

3. Click the **Add New Plan** button in the **Policies & Plans** section.

The **Select Policy Plan Template** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to indicate the template using which you want to define the policy plan for the policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> By default, the <b>Policy Plan - Healthcare</b> option is selected.	
Business Object	Used to indicate the business object using which you want to define the policy plan for the policy.  <b>Note:</b> By default, the <b>Policy Plan</b> option is selected.	Yes

4. Select the required template and business object from the respective fields.
5. Click **OK**.

The **Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the policy plan.
- **Characteristics** - Used to define the characteristics for the policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item which you want to directly associate with the policy plan.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.  On the specifying the price item, the concatenated string of information about the price item appears corresponding to the <b>Price Item</b> field separated by a comma (,).	Yes
Plan Number	Used to specify the policy plan number.	Yes
Plan Name	Used to specify the description for the policy plan.	No
Start Date	Used to specify the date from when the policy plan is effective for the policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The policy plan start date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan start date cannot be later than the policy plan end date.</p>	
End Date	<p>Used to specify the date till when the policy plan is effective for the policy.</p> <p><b>Note:</b></p> <p>The policy plan end date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan end date cannot be earlier than the policy plan start date.</p>	No

6. Enter the required details in the **Main** section.
7. Associate the pricing rule types with the policy plan in the **Pricing Rule Types** section, if required.
8. Define the characteristics for the policy plan in the **Characteristics** section, if required.
9. Click **Validate and Save**.

The policy plan is added in the policy.

## **Associating a Pricing Rule Type with a Policy Plan**

### **Prerequisites**

To associate a pricing rule type with a policy plan, you should have:

- Pricing rule types defined in the application.

**Procedure**

To associate a pricing rule type with a policy plan:

1. Ensure that the **Pricing Rule Types** section is expanded in the **Plan** screen when you are adding or editing a policy plan of a policy.

The **Pricing Rule Types** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Pricing Rule Type	Used to indicate the pricing rule type that you want to associate with the policy plan.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Pricing Rule Type</b> field. On clicking the <b>Search</b> icon, the <b>Pricing Rule Type Search</b> window appears.</p> <p>On specifying the pricing rule type, the description of the pricing rule type appears corresponding to the <b>Pricing Rule Type</b> field.</p>	<p><b>Note:</b> This field is required while associating a pricing rule type with the policy plan.</p>

2. Enter the required details in the **Pricing Rule Types** section.
3. If you want to associate more than one pricing rule type with the policy plan, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a pricing rule type from the policy plan, click the **Delete** (🗑️) icon corresponding to the pricing rule type.

4. Click **Validate and Save**.

The pricing rule type is associated with the policy plan.

**Defining a Characteristic for a Policy Plan****Prerequisites**

To define a characteristic for a policy plan, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**)

### **Procedure**

To define a characteristic for a policy plan:

1. Ensure that the **Characteristics** section is expanded in the **Plan** screen when you are adding or editing a policy plan of a policy.

The **Characteristics** section contains the following columns:

<b>Column Name</b>	<b>Column Description</b>	<b>Mandatory (Yes or No)</b>
Effective Date	Used to specify the date from when the characteristic is effective for the policy plan.	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for the policy plan.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Customer Registration</b> .	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for the policy plan.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for the policy plan.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the policy plan, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the policy plan, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Validate and Save**.

The characteristic is defined for the policy plan.

## Defining a Characteristic for a Customer Registration

### Prerequisites

To define a characteristic for a customer registration, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)

### Procedure

To define a characteristic for a customer registration:

1. Ensure that the **Characteristics** section is expanded in the **Registration Characteristics** page when you are defining, editing, or copying a customer registration.

The **Characteristics** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the customer registration.	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for a customer registration.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Customer Registration</b> .	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for a customer registration.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional) <b>Note:</b> This field is required while defining a characteristic for a customer registration.

Column Name	Column Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the customer registration, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the customer registration, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Validate and Save**.

The characteristic is defined for the customer registration.

## Editing the Account Details of a Person

### Prerequisites

To edit the account details of a person, you should have:

- Customer class, divisions, currencies, access groups, accrual cycles, and bill cycles defined in the application
- Account identifier types defined in the application
- Auto pay source codes, auto pay methods, and auto pay route types defined in the application
- Account relationship types defined in the application
- Address sources, bill formats, and bill route types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

### Procedure

To edit the account details of a person:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose account details you want to edit.

The **Main** tab appears in the **Customer Registration** screen.

- Click the **Edit** button in the **Customer Registration** zone.

The **Main** page appears in the **Customer Registration** screen.

- Ensure that the **Accounts** section is expanded in the **Accounts** page.
- Click the **Edit**() icon in the **View / Edit** column corresponding to the account whose details you want to edit.

The **Customer Registration - Add Account** screen appears. It contains the following pages:

- Main** - Used to specify basic information about the account.
- Auto Pay** - Used to add the automatic payment details of the account.
- Persons** - Used to associate a person to the account.
- Account Characteristics** - Used to define a list of characteristics for the account.

The **Main** page contains the following sections:

- Main** - Used to specify basic details about the account.
- Account Identifiers** - Used to add the identifier details for the account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	Used to indicate the customer class to which the account belongs.	Yes
Division	Used to indicate the division to which the account belongs.	Yes
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Set Up Date	Displays the date from when the account is configured for the person.	Not applicable
Invoice Currency	Used to indicate the currency which you want to use for generating the invoice of the account.	Yes
	<b>Note:</b> The list includes only those currencies which are defined in the system.	
Account Category	Displays the category to which the account belongs. The valid values are: <ul style="list-style-type: none"> <li>Invoice Account</li> <li>Settlement Account</li> <li>Usage Account</li> </ul>	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> The list includes only those values which are present in the <b>ACCT_USAGE_FLG</b> lookup field.</p>	
Access Group	<p>Used to indicate the user group that can access the account for the person.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears. On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p>	Yes
Exclude Accrual	<p>Used to indicate whether the account is eligible for accrual.</p> <p><b>Note:</b> By default, the account is eligible for accrual if the division to which the account belongs is eligible for accrual. If you do not want the account to be eligible for accrual, you must select the <b>Exclude Accrual</b> check box. On selecting the <b>Exclude Accrual</b> check box, the <b>Accrual Cycle</b> field is disabled.</p>	No
Accrual Cycle	Used to indicate the accrual cycle of the account in the division.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Accrual Cycle</b> field. On clicking the <b>Search</b> icon, the <b>Accrual Cycle Search for Cust Reg</b> window appears.</p> <p>On specifying the accrual cycle, the description of the accrual cycle appears corresponding to the <b>Accrual Cycle</b> field.</p> <p>This field is disabled when you click the <b>Exclude Accrual</b> check box.</p>	
Product	<p>Used to indicate the product for which the account is enrolled.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Search Product</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while enrolling an account for a product.</p>
Eligible for Repricing	<p>Used to indicate whether the account is eligible for repricing when the account attributes (defined as parameters in the system) are changed.</p> <p><b>Note:</b></p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p>	No
Bill Cycle	Used to indicate the bill cycle for the account.	No
Bill Lead Days	Used to specify the number of days which is used to derive the cut-off date for advance billing.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> In case you don't want to bill the account in advance, you must specify <b>0</b> in this field.	
Comments	Used to specify additional information about the account.	No

6. Modify the required details of the account in the **Main** page.
7. Add, edit, or remove the identifier details of the account in the **Account Identifiers** section.
8. Add, edit, or remove the automatic payment details of the account in the **Auto Pay** page, if required.
9. Associate or disassociate persons from the account in the **Persons** page, if required.
10. Define, edit, or remove characteristics of the account in the **Account Characteristics** page, if required.
11. Add, edit, or remove the credit rating details of the account in the **Credit Ratings** page, if required.
12. Click **Validate and Save**.

The changes made to the account are saved.

## **Copying a Customer Registration**

Instead of creating a customer registration from scratch, you can create a new customer registration using an existing customer registration. This is possible through copying a customer registration. On copying a customer registration, the details including the characteristics are copied to the new customer registration. You can then edit the details, if required.

### **Prerequisites**

To copy a customer registration, you should have:

- Customer registration (whose copy you want to create) defined in the application
- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application

- Characteristic Types defined in the application
- Relationship types defined in the application
- Policy types and policy person roles defined in the application.

**Note:** These prerequisites are required when you are copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

### **Procedure**

To copy a customer registration:

1. Search for the customer registration in the **Customer Registration** screen.
2. Click the **Copy**  icon in the **Copy** column corresponding to the customer registration whose copy you want to create.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Policies** - Used to specify the policy details of the person.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	No
Division	Used to indicate the division to which the person belongs.	Not applicable
Person Since Date	Used to specify the date from when the person is the main customer.	No

Field Name	Field Description	Mandatory (Yes or No)
Customer Segment	Used to indicate the customer segment to which the person belongs.	No
	<b>Note:</b> This field appears when you are defining a customer registration using the <b>C1-CustomerRegistrationBanking</b> business object.	
Customer Tier	Used to indicate the customer tier of the customer segment to which the person belongs.	No
	<b>Note:</b> This field appears when you are defining a customer registration using the <b>C1-CustomerRegistrationBanking</b> business object.	
Access Group	Used to indicate the user group that can access the customer registration.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.	

3. Enter the required details in the **Main** section.
4. Add or remove the names of the person in the **Person Names** section.
5. Add or remove the phone details for the person in the **Person Phones** section.
6. Add, edit, or remove the identifier details for the person in the **Person IDs** section.
7. Define, edit, or remove the addresses of the person in the **Contact** page, if required.
8. Define, edit, or remove characteristics of the person in the **Person Characteristics** page, if required.
9. Define, edit, or remove the person to person relationship for the person in the **Hierarchy** page, if required.
10. Add, edit, or remove the account details of the person in the **Accounts** page, if required.
11. Add, edit, or remove the policy details of the person in the **Policies** page, if required.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

12. Define, edit, or remove characteristics of the customer registration in the **Registration Characteristics** page, if required.
13. Click **Validate and Save**.

The new customer registration is defined.

## Editing the Policy Details

### Prerequisites

To edit the policy details, you should have:

- Source systems defined in the application.
- Policy person roles defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### Procedure

To edit the policy details:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose policy details you want to edit.

The **Main** tab appears in the **Customer Registration** screen.

3. Click the **Edit** button in the **Customer Registration** zone.

The **Main** page appears in the **Customer Registration** screen.

4. Ensure that the **Policies & Plans** section is expanded in the **Policies** page.

5. Click the **Edit**() icon in the **View / Edit** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.

- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which the policy is defined in the system.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.  <b>Note:</b> This field is enabled when you are defining a policy using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	Yes
Start Date	Used to specify the date from when the policy is effective.  <b>Note:</b> The policy start date cannot be later than the policy end date.	Yes
End Date	Used to specify the date till when the policy is effective.  <b>Note:</b> The policy end date cannot be earlier than the policy start date.	Yes
Policy Person Role	Used to indicate the role of the person for whom you are defining the policy.	Yes

**Note:** The **Policies** page appears when you are defining, editing, or copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

6. Modify the required details in the **Main** section.
7. Define, edit, or remove characteristics of the policy in the **Characteristics** section, if required.
8. Associate or disassociate persons from the policy in the **Persons** section, if required.
9. Click **Validate and Save**.

The changes made to the policy are saved.

## Editing the Policy Plan Details

### Prerequisites

To edit the policy plan details, you should have:

- Pricing rule types defined in the application.

- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**)

### Procedure

To edit the policy plan details:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose policy plan details you want to edit.

The **Main** page appears in the **Customer Registration** screen.

3. Ensure that the **Policies & Plans** section is expanded in the **Policies** page.
4. Click the **Add**  icon in the **Policy Plans** column corresponding to the policy whose plan details you want to edit.

The following columns appear in the **Policies & Plans** section:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the policy plan.	Not applicable
Template	Indicates the policy plan template using which the policy is added in the policy.	Not applicable
Plan Number	Displays the policy plan number.	Not applicable
Price Item	Displays the price item that is associated with the policy plan.	Not applicable
View / Edit	On clicking the <b>View / Edit</b>  icon, you can view or edit the details of the policy plan.	Not applicable

**Note:** No information appears in the above columns if a plan is not yet added in the policy.

5. Click the **Edit**  icon in the **View / Edit** column corresponding to the policy plan whose details you want to edit.

The **Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the policy plan.
- **Characteristics** - Used to define the characteristics for the policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item which you want to directly associate with the policy plan.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.</p> <p>On the specifying the price item, the concatenated string of information about the price item appears corresponding to the <b>Price Item</b> field separated by a comma (,).</p>	
Plan Number	Used to specify the policy plan number.	Yes
Plan Name	Used to specify the description for the policy plan.	No
Start Date	<p>Used to specify the date from when the policy plan is effective for the policy.</p> <p><b>Note:</b></p> <p>The policy plan start date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan start date cannot be later than the policy plan end date.</p>	Yes
End Date	<p>Used to specify the date till when the policy plan is effective for the policy.</p> <p><b>Note:</b></p> <p>The policy plan end date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan end date cannot be earlier than the policy plan start date.</p>	No

6. Modify the required details in the **Main** section.
7. Associate or disassociate pricing rule types from the policy plan in the **Pricing Rule Types** section, if required.
8. Define, edit, or remove characteristics of the policy plan in the **Characteristics** section, if required.
9. Click **Validate and Save**.

The changes made to the policy plan are saved.

## **Editing the Customer Registration Details**

### **Prerequisites**

To define a customer registration, you should have:

- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Relationship types defined in the application
- Policy types and policy person roles defined in the application.

**Note:** These prerequisites are required when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

### **Procedure**

To edit a customer registration:

1. Search for the customer registration in the **Customer Registration** screen.

- In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose details you want to edit.

The **Main** tab appears in the **Customer Registration** screen.

- Click the **Edit** button in the **Customer Registration** zone.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Policies** - Used to specify the policy details of the person.

**Note:** This page appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	Yes
Division	Used to indicate the division to which the person belongs.  <b>Note:</b> You can view only those divisions to which you have access in the <b>Division</b> list.	Yes
Person Since Date	Used to specify the date from when the person is the main customer.	Yes
Customer Segment	Used to indicate the customer segment to which the person belongs.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This field appears when you are editing a customer registration which is created using the <b>C1-CustomerRegistrationBanking</b> business object.</p>	
Customer Tier	<p>Used to indicate the customer tier of the customer segment to which the person belongs.</p> <p><b>Note:</b> This field appears when you are editing a customer registration which is created using the <b>C1-CustomerRegistrationBanking</b> business object.</p>	Yes
Access Group	<p>Used to indicate the user group that can access the customer registration.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p>	Yes

4. Modify the required details in the **Main** section.
5. Add, edit, or remove the names of the person in the **Person Names** section.
6. Add, edit, or remove the phone details of the person in the **Person Phones** section.
7. Add or remove the identifier details of the person in the **Person IDs** section.
8. Define, edit, or remove the address of the person in the **Contact** page, if required.
9. Define, edit, or remove characteristics of the person in the **Person Characteristics** page, if required.
10. Define, edit, or remove the person to person relationship for the person in the **Hierarchy** page, if required.
11. Add, edit, or remove the account details of the person in the **Accounts** page, if required.
12. Add, edit, or remove the policy details of the person in the **Policies** page, if required.

**Note:** This page appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

13. Define, edit, or remove characteristics of the customer registration in the **Registration Characteristics** page, if required.
14. Click **Validate and Save**.

The changes made to the customer registration are saved.

## Approving a Customer Registration

You can view the number of customer registrations which are pending for an approval in the **Customer Registration** screen. The approver can review, and accordingly approve, reject, or ask the submitter to resubmit the customer registration based on the observations.

**Note:** The system will not allow you to approve, reject or resubmit a customer registration submitted by you.

### Procedure

To approve a customer registration:

1. Do either of the following:

If you want to...	Then...
Approve a customer registration through the <b>Customer Registration</b> screen	<ol style="list-style-type: none"> <li>1. Search for the customer registration in the <b>Customer Registration</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Customer Registration ID</b> column corresponding to the customer registration which you want to review.</li> </ol>
Approve a customer registration from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-CustomerRegistration</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</li> <li>5. Click <b>Search</b>. The <b>To Do Type Search</b> screen appears.</li> </ol>

The **Customer Registration** screen appears.

2. Review the details in the **Customer Registration** screen.
3. If the information in the customer registration is accurate, then click the **Approve** button in the **Customer Registration** zone.

**Note:** The **Approve** button appears when:

- The status of customer registration is in the **Approval In Progress**.
- A user with the approval To Do role is reviewing the customer registration.

## Rejecting a Customer Registration

### Prerequisites

To reject a customer registration, you should have:

- Reasons defined for the **Rejected** status of the **C1-CustomerRegistration** business object in the **Status Reason** screen

**Note:** The system will not allow you to approve, reject or resubmit a customer registration submitted by you.

### Procedure

To reject a customer registration:

- Do either of the following:

If you want to...	Then...
Reject a customer registration through the <b>Customer Registration</b> screen	<ol style="list-style-type: none"> <li>Search for the customer registration in the <b>Customer Registration</b> screen.</li> <li>In the <b>Search Results</b> section, click the link in the <b>Customer Registration Information</b> column corresponding to the customer registration which you want to review.</li> </ol>
Reject a customer registration from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>Enter <b>C1-CustomerRegistration</b> in the <b>To Do Type</b> field.</li> <li>Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>Click the link in the <b>Message</b> column corresponding to the To Do of the customer registration that you want to review.</li> </ol>

The **Customer Registration** screen appears.

- Review the details in the **Customer Registration** screen.
- If the information in the customer registration is incorrect, then click the **Reject** button in the **Customer Registration** zone.

The **Reject Customer Registration** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the customer registration.  <b>Note:</b> The list includes only those reasons which are defined for the <b>Rejected</b> status of the <b>C1-CustomerRegistration</b> business object in the <b>Status Reason</b> screen.	Yes
Comments	Used to specify additional information while rejecting the customer registration.	No

**Note:** The **Reject** button appears when:

- The customer registration is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the customer registration.

- Select the reason for rejection of the customer registration from the **Status Reason** field.
- Click **Save**.

The status of the customer registration is changed to **Rejected**.

## Requesting to Resubmit a Customer Registration for Approval

### Procedure

To initiate a resubmission request for a customer registration:

- Do either of the following:

If you want to...	Then...
Request the submitter to resubmit a customer registration through the <b>Customer Registration</b> screen	<ol style="list-style-type: none"> <li>Search for the customer registration in the <b>Customer Registration</b> screen.</li> <li>In the <b>Search Results</b> section, click the link in the <b>Customer Registration ID</b> column</li> </ol>

If you want to...	Then...
	corresponding to the customer registration which you want to review.
Request the submitter to resubmit a customer registration from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-CustomerRegistration</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the customer registration that you want to review.</li> </ol>

The **Customer Registration** screen appears.

2. Review the details in the **Customer Registration** screen.
3. If the information in the customer registration is incomplete and you want the submitter to make the required changes and resubmit the customer registration for approval, then click the **Re Submit** button in the **Customer Registration** zone.

The **Resubmit Customer Registration** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes which the submitter should make in the customer registration before resubmitting it for approval.	Yes

**Note:** The **Re Submit** button appears when:

- The customer registration is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the customer registration.

4. Enter the comments in the respective field and then click **Save**.

A To Do is created using the submitter To Do type and assigned to all users with a submitter To Do role specified in the customer registration type. In addition, the status of the customer registration is changed to **Draft**.

## Customer 360° View

---

### Topics:

- [Prerequisites](#)
- [Customer 360° View](#)
- [Customer 360° Information](#)
- [Bill Information](#)

Oracle Revenue Management and Billing provides a new screen named **Customer 360° View** which enables you to quickly view in-depth information about the person. This screen can be used to view the 360° information of a person who is associated with the fully-insured group or self-funded policy. It provides the following information:

- Basic details, characteristics, child persons, person hierarchy, person billing hierarchy, and the customer contacts of the person.
- Customer registration objects through which the bill groups are created for a parent customer.
- List of accounts to which the parent customer and its bill groups are associated.
- Basic details, characteristics, administrative contracts, automatic payment options, billing and adjustment summary, financial and collections summary, and unpaid bills of the person's account.
- Consolidated view of the transactions (such as, billing, payment, payment cancellation, adjustment, adjustment cancellation, automatic payments sent to the auto clearing house for review, refund, write off, excess credit, and reconciliation) which are carried out for the person's account.
- List of policies to which the parent customer or bill group is associated. The system lists those policies where the policy category is set to **Self-Funded** and **Fully Insured Group**.
- Basic details, related persons, and policy plans in the person's policy.
- Basic and in-depth details of the pricing rules which are defined for a parent customer who is associated with the fully-insured group or self-funded policy.
- Basic and in-depth details of the pricing rules which are defined for a self-funded policy of a bill group.
- Basic details of the pricing groups which are defined for a bill group who is associated with the self-funded policy.
- Basic and in-depth details of the pricing rules which are defined for a fully-insured group policy.
- Basic and in-depth details of the pricing rules which are defined for a fully-insured group policy plan.
- Basic and in-depth details of the pricing rules which are defined for the states where the fully-insured group policy and its plans and memberships are issued.

- Basic details of the approval transactions which are created while defining, editing, and deleting the pricing rules for the self-funded or fully-insured group business.
- Basic details of the bill, adjustments which are swept onto the bill, activities (such as, payment, offset, refund, write off, or transfer) through which the bill is settled, high-level summary and details of the bill segments which are included in the bill, active hold requests due to which the bill is kept on hold, offset requests through which the bill is offset against another bill, and refund and write off requests through which the bill or its bill segment is either refunded or written off.

In other words, this feature allows you to drill-down to see or act on all current and historical revenue management and billing details. This allows you to professionally and efficiently handle customer inquiries and complaints at the first point of contact, raising your customer service from previously unattainable levels and reducing the associated time and cost.

## Prerequisites

To setup the **Customer 360° View** feature, you need to do the following:

- Define the required divisions, customer classes, person types, person identifier types, account identifier types, policy types, and policy person roles in the system
- Define values for the **C1-SourceSystemLookup** extendable lookup
- Define the required characteristic types where the characteristic entity is set to **Person**
- Define the required characteristic types where the characteristic entity is set to **Account**
- Define the required characteristic types where the characteristic entity is set to **Policy**
- Define values for the **Administrative Contract Type** and **On Account Contract Type** option types in the **C1\_CMO** feature configuration

**Note:** This prerequisite is not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

- Define values for **Premium Amount SQI** and **Coverage End Date SQI** option types in the **C1-BILLADJSQ** feature configuration

**Note:** This prerequisite is not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

- Define value for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a person, account, or policy. The valid values are: <ul style="list-style-type: none"> <li>• Policy</li> <li>• Person</li> <li>• Account</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Policy</b> option is selected.	
Policy Type	Used to search policies which are created using a particular policy type.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Source System	Used to search policies which were created in a particular external system.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Policy Number	Used to search a policy with a particular policy number.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Policy ID	Used to search a particular policy.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Policy Person Role	Used to search policies where a person is assigned a particular person role.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Person Name	Used to search a particular person using its primary or secondary name. If you specify the person name while searching for an account, the system searches all	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p>accounts where the person is the main customer. However, if you specify the person name while searching for a policy, the system searches all policies where the person is the main customer.</p> <p><b>Note:</b> This field appears when:</p> <ul style="list-style-type: none"> <li>• The <b>Policy</b> or <b>Person</b> option is selected from the <b>Search By</b> list.</li> <li>• The <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</li> </ul>	<p><b>Note:</b> This field is required when you are searching for a policy using the policy person role.</p>
Status	<p>Used to search policies with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>	No
Start Date	<p>Used to search policies which are effective from a particular date.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search policies which are effective till a particular date.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.	
Characteristic Type	Used to search persons, accounts, or policies with a particular type of characteristic.	No
	<b>Note:</b> This field appears when the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.	
Characteristic Value	Used to search persons, accounts, or policies with a particular characteristic.	Yes (Conditional)
	<b>Note:</b> This field appears when you are searching for a person, account, or policy using the characteristic type. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> If you specify the characteristic type as a search criteria, you have to enter the characteristics value.
Division	Used to search persons or accounts which belong to a particular division.	No
	<b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list.	
Customer Class	Used to search accounts or persons' whose accounts belong to a particular customer class.	No
	<b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list.	
Person ID	Used to search a particular person.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.	
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for a person. <b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.	Yes (Conditional) <b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search a person with a particular identifier. <b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.	Yes (Conditional) <b>Note:</b> If you specify the person identifier type as a search criteria, you have to enter the person identifier.
Person Type	Used to search persons of a particular type. The valid values are: <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul> <b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.	No
Address	Used to search persons with a particular address or accounts' whose main customer has a particular address. <b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.	No
City	Used to search persons who belong to a particular city or accounts'	No

Field Name	Field Description	Mandatory (Yes or No)
	<p>whose main customer belongs to a particular city.</p> <p><b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	
Skip Months	<p>Used to search accounts for which the skip months are defined through a billing preference.</p> <p><b>Note:</b> You can set the billing preference for an account through a characteristic type which is specified in the <b>Bill Cycle Rule Code</b> option type of the <b>C1-ASOBLNG</b> feature configuration. The system enables you to define, edit, delete, and copy a billing preference through the <b>Field Mapping</b> screen. For more information, see <a href="#">Defining a Billing Preference</a>.</p> <p>This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No
Phone Number	<p>Used to search a person with a particular phone number or accounts' whose main customer has a particular phone number.</p> <p><b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No
Account ID	<p>Used to search a particular account.</p> <p><b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier Type	Used to indicate the account identifier type based on which you want to search for an account.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to search an account with a particular identifier.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the account identifier type as a search criteria, you have to enter the account identifier.

**Note:**

You must specify at least one search criterion while searching for a person, account, or policy. One more search criterion is required when you are searching for a person or account using the division and/or customer class. Similarly, one more search criterion is required when you are searching for a policy using the policy type and/or source system.

If you have specified any other search criterion along with the person ID, account ID, or policy ID, the system ignores the additional search criterion and searches using the person ID, account ID, or policy ID, respectively.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Information	Displays information about the policy.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.  This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.
Main Customer	Indicates the main customer of the policy or account.
	<b>Note:</b> This column appears when the <b>Policy</b> or <b>Account</b> option is selected from the <b>Search By</b> list.
Source System	Displays the name of the external system in which the policy was created.
	<b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.
Policy Number	Displays the policy number.

Column Name	Column Description
	<b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.
Start Date	Displays the date from when the policy is effective. <b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.
End Date	Displays the date till when the policy is effective. <b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul> <b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.
Person Information	Displays information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person. This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.
Person Name	Displays the name of the person. <b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.
Person Type	Indicates the type of the person. The valid values are: <ul style="list-style-type: none"> <li>• Business</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Primary Person Identifier Type	<p>Indicates the primary identifier type associated with the person.</p> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Primary Person Identifier	<p>Displays the primary person identifier.</p> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Account Information	<p>Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account. This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Division	<p>Indicates the division to which the account belongs.</p> <p><b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Customer Class	<p>Indicates the customer class to which the account belongs.</p> <p><b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Primary Account Identifier Type	<p>Indicates the primary identifier type associated with the account.</p> <p><b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Primary Account Identifier	<p>Displays the primary account identifier.</p>

Column Name	Column Description
	<b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.
Current Balance	Displays the total amount of funds in the account. <b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.
Also Known As	Displays the non-primary names of the person separated by semi-colon (;). <b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.

**Note:**

You can view the 360° information of the person, account, or policy by clicking the **View** () icon corresponding to the record in the **Search Results** section.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

**Searching for a Person****Prerequisites**

To search for a person, you should have:

- Divisions, customer classes, person types, and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Person**)

**Procedure**

To search for a person:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Customer Management** and then click **Customer 360° View**.  
The **Customer 360° View** screen appears.

3. Select the **Person** option from the **Search By** list to indicate that you want to search for a person.
4. Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for a person. One more search criterion is required when you are searching for a person using the division and/or customer class.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

You must specify division and/or customer class when you are searching for a person using the city.

You must specify division, customer class, or any other criteria in the second group when you are searching for a person using the person type.

If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the person using the person ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of persons that meet the search criteria appears in the **Search Results** section.

**Searching for an Account****Prerequisites**

To search for an account, you should have:

- Divisions, customer classes, and account identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

**Procedure**

To search for an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Customer Management** and then click **Customer 360° View**.

The **Customer 360° View** screen appears.

3. Select the **Account** option from the **Search By** list to indicate that you want to search for an account.
4. Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for an account. One more search criterion is required when you are searching for an account using the division and/or customer class.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the fourth criteria group) and account identifier (in the third criteria group), the system searches using the account identifier instead of the person name.

You must specify division and/or customer class when you are searching for an account using the city.

If you have specified any other search criterion along with the account ID, the system ignores the additional search criterion and searches for the account using the account ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of accounts that meet the search criteria appears in the **Search Results** section.

## **Searching for a Policy**

### **Prerequisites**

To search for a policy, you should have:

- Policy types and policy person roles defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### **Procedure**

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Customer Management** and then click **Customer 360° View**.

The **Customer 360° View** screen appears.

3. Select the **Policy** option from the **Search By** list to indicate that you want to search for a policy.
4. Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for a policy. One more search criterion is required when you are searching for a policy using the policy type and/or source system.

If you have specified any other search criterion along with the policy ID, the system ignores the additional search criterion and searches for the policy using the policy ID.

You must specify the person name when you are searching for a policy using the policy person role.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

## Viewing the 360° Information of a Person

### Prerequisites

To view the 360° information of a person, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLLNG** feature configuration

### Procedure

To view the 360° information of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen. It contains the following zones:

- [Person Information](#) on page 742
- [Person Characteristics](#) on page 744
- [Child Persons](#) on page 744
- [Person Hierarchy](#) on page 745

**Note:** The **Person Hierarchy** zone does not appear when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Person Billing Hierarchy](#) on page 746

**Note:** The **Person Billing Hierarchy** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Derivation and Pricing Parameters](#) on page 748

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Sorting](#) on page 750

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Customer Contacts](#) on page 752
- [Bill Groups Created Via Customer Registration](#) on page 752

**Note:** The **Bill Groups Created Via Customer Registration** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

3. View the basic details of the person in the **Person Information** zone.
4. View the characteristics of the person in the **Person Characteristics** zone.
5. View the child persons included in the person's hierarchy in the **Child Persons** zone.
6. View the accounts and policies where the person is the main customer and memberships where the person is the main subscriber in the **Person Hierarchy** zone.
7. View the parent customer's accounts and policies and its bill groups' accounts and policies in the **Person Billing Hierarchy** zone.
8. View the derivation and pricing parameters defined for the bill group and sort ID combinations in the **Bill Group Derivation and Pricing Parameters** zone.
9. View the sort IDs defined for the bill groups in the **Bill Group Sorting** zone.
10. View how and when the person was contacted in the **Customer Contacts** zone.
11. View the customer registration objects through which the bill groups are created for the parent customer in the **Bill Groups Created Via Customer Registration** zone.
12. If required, you can view the details of the account to which the person is associated in the **Account** tab.

**Note:**

If you are viewing the 360° information of a parent customer, the following zones appears in the **Account** tab when you click the **Broadcast** (  ) icon corresponding to the account in the *Account List* on page 754 zone:

- [Account Information](#) on page 755
- [Auto Pay Details](#) on page 759
- [Account Characteristics](#) on page 758
- [Account Financial and Collections Summary](#) on page 759
- [Open Bills](#) on page 761
- [Billed Vs Paid](#) on page 763
- [Timeline](#) on page 766
- [Trial Bills](#) on page 769

13. If required, you can view the details of the policy to which the person is associated in the **Policy** tab.

14. If required, you can view the pricing information of the parent customer or its bill groups in the **Pricing Information** tab.

**Viewing the 360° Information of an Account****Prerequisites**

To view the 360° information of an account, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLLNG** feature configuration
- Values defined for the **Administrative Contract Type** and **On Account Contract Type** option types in the **C1\_CMO** feature configuration
- Values defined for the **Premium Amount SQI** and **Coverage End Date SQI** option types in the **C1-BILLADJSQ** feature configuration

**Note:** The latter two prerequisites are not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

### **Procedure**

To view the 360° information of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.

The **Account** tab appears in the **Customer 360° Information** screen. It contains the following zones:

- [Account List](#) on page 754

**Note:** The **Account List** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Account Information](#) on page 755
- [Auto Pay Details](#) on page 759
- [Account Characteristics](#) on page 758
- [Administrative Contracts](#) on page 758

**Note:** The **Administrative Contracts** zone appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**.

- [Account Financial and Collections Summary](#) on page 759
- [Billing and Adjustment Summary](#) on page 760

**Note:** The **Billing and Adjustment Summary** zone appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**.

- [Open Bills](#) on page 761
  - [Billed Vs Paid](#) on page 763
  - [Timeline](#) on page 766
  - [Trial Bills](#) on page 769
3. View the accounts of the parent customer and its bill groups in the **Account List** zone.
  4. View the basic details of the account in the **Account Information** zone.
  5. View the automatic payment options defined for the account in the **Auto Pay Details** zone.
  6. View the characteristics of the account in the **Account Characteristics** zone.
  7. View the account's contracts which should be monitored closely for various administrative reasons in the **Administrative Contracts** zone.
  8. View the financial and collection details of the account in the **Account Financial and Collections Summary** zone.
  9. View the billing and adjustment summary of the account in the **Billing and Adjustment Summary** zone.
  10. View the unpaid bills of the account in the **Open Bills** zone.
  11. View various transactions of the account, such as bills, payments, adjustments, reconciliations, and so on, in the **Billed Vs Paid** zone.

12. View the number of customer contacts, bills, and payments created for the account in a particular month in the **Timeline** zone.
13. View the trial bills which are created for the account in the **Trial Bills** zone.

## Viewing the Pricing Information of a Parent Customer

### Prerequisites

To view the pricing information of a parent customer, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLLNG** feature configuration

### Procedure

To view the pricing information of a parent customer:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears. It contains the following zones:

- [Parent Customer Pricing Rules](#) on page 776

**Note:** The **Parent Customer Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rule Summary](#) on page 779

**Note:** The **Bill Group Self-Funded Policy Pricing Rule Summary** zone appears when you are viewing 360° information of a parent customer who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Information](#) on page 781

**Note:** The **Bill Group Self-Funded Policy Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rules](#) on page 783

**Note:** The **Bill Group Self-Funded Policy Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Fully-Insured Pricing Rules](#) on page 788

**Note:** The **Fully-Insured Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group policy.

- [Pricing Rule Summary](#) on page 790

**Note:** The **Pricing Rule Summary** zone appears when you are viewing 360° information of a parent customer who is associated with the fully-insured group policy.

## Viewing the Pricing Information of a Bill Group

### Prerequisites

To view the pricing information of a bill group, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration

## Procedure

To view the pricing information of a bill group:

1. Search for a person whose person type is set to **Bill Group** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears. It contains the following zones:

- [Parent Customer Pricing Rules](#) on page 776

**Note:** The **Parent Customer Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Parent Customer Pricing Rule Summary](#) on page 780

**Note:** The **Parent Customer Pricing Rule Summary** zone appears when you are viewing 360° information of a bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Information](#) on page 781

**Note:** The **Bill Group Self-Funded Policy Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rules](#) on page 783

**Note:** The **Bill Group Self-Funded Policy Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Pricing Groups](#) on page 787

**Note:** The **Bill Group Pricing Groups** zone appears when you are viewing 360° information of a bill group who is associated with the self-funded policy.

- [Fully-Insured Pricing Rules](#) on page 788

**Note:** The **Fully-Insured Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group policy.

- [Pricing Rule Approval Transactions](#) on page 790

**Note:** The **Pricing Rule Approval Transactions** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group or self-funded policy.

4. Do either of the following:

If you are viewing 360° information of...	Then...
A bill group who is associated with a self-funded policy	<ol style="list-style-type: none"> <li>1. View the pricing rules which are defined for the parent customer in the <b>Parent Customer Pricing Rules</b> zone.</li> <li>2. View the information about the parent customer and its pricing rules in a tree structure in the <b>Parent Customer Pricing Rule Summary</b> zone.</li> </ol>

If you are viewing 360° information of...	Then...
	<ol style="list-style-type: none"> <li>3. View the details of the policies to which the bill group is associated in the <b>Bill Group Self-Funded Policy Information</b> zone.</li> <li>4. View the details of the pricing rules which are defined for a policy of the bill group in the <b>Bill Group Self-Funded Policy Pricing Rules</b> zone.</li> <li>5. View the details of the pricing groups which are defined for the bill group in the <b>Bill Group Pricing Groups</b> zone.</li> <li>6. View the approval transactions which are created while defining, editing, or deleting the pricing rules of the bill group in the <b>Pricing Rule Approval Transactions</b> zone.</li> </ol>
A bill group who is associated with a fully-insured group policy	<ol style="list-style-type: none"> <li>1. View the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue) in the <b>Fully-Insured Pricing Rules</b> zone.</li> <li>2. ### Person Information

The **Person Information** zone displays the details of the person. It contains the following sections:

- **Main** - Displays the basic information about the person. It contains the following fields:

Field Name	Field Description
Person Information	<p>Displays information about the person. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the person.</p>
Person Type	<p>Indicates the type of the person. The valid values are:</p> <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul>
Date of Birth	<p>Displays the date when the person was born.</p> <p><b>Note:</b> This field appears when the respective data is available for the person.</p>

- **Person Names** - Lists the primary and non-primary names of the person. It contains the following columns:

Column Name	Column Description
Name Type	Indicates the type of the name.
Person Name	Displays the name of the person.

- **Person Identifiers** - Lists various types of identification associated with the person. It contains the following columns:

Column Name	Column Description
Person Identifier Type	Indicates the person identifier type.
Person Identifier	Displays the value of the person identifier type.

- **Contact Information** - Displays the contact details of the person. It contains the following fields:

Field Name	Field Description
Country	Indicates the country where the person is located.
Address 1	Displays the first line of the person's address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the person's address. It may contain details, such as street name.
Address 3	Displays the third line of the person's address. It may contain the landmark details.
Address 4	Displays the fourth line of the person's address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the person resides within the city limit or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
City	Displays the city where the person is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the person is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.
Email ID	Displays the e-mail ID of the person.

**Note:** The above mentioned fields appear in the **Contact Information** section when the respective data is available for the person.

- **Phone Details** – Lists the phone details of the person. It contains the following columns:

Column Name	Column Description
Phone Type	Indicates the type of the phone number.
Phone Number	Displays the phone number of the person.

Column Name	Column Description
Extension	Displays the telephone extension number (if any).

### Person Characteristics

The **Person Characteristics** zone lists the characteristics of the person. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the person.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> or <b>Foreign Key Value</b> .

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### Child Persons

The **Child Persons** zone lists the child persons included in the person's hierarchy. It contains the following columns:

Column Name	Column Description
Child Person Information	Displays information about the child person.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the child person.
Relationship Type	Indicates how the child person is related to the parent person.
Start Date	Displays the date from when the child person is related to the parent person.
End Date	Displays the date till when the child person is related to the parent person.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the 360° information of a child person by clicking the **View** (🔗) icon corresponding to the child person in this zone.

You can create a new child person through the **Customer Registration** feature by clicking the **Add** link in the upper right corner of this zone. While adding a child person to a parent person, the child person is related to the parent person using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration.

You can filter the list using the **Person Relationship Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### **Bill Group Derivation and Pricing Parameters**

An employer may have different bill groups. Each bill group will handle the claim and enrollment transactions of employees based on the employee attributes, such as location, employment status, employment department, and so on.

Oracle Revenue Management and Billing allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for the bill group and sort ID combination. These parameters are used to derive the bill group against which the claim and enrollment transactions should be billed in the system. For example, if you want bill group 1 to handle claim and enrollment transactions of employees who reside in the western location of city and belong to grade A and whose transactions are received from the X system, you need to define the derivation and pricing parameters for bill group 1 where the source system is set to X, parameter 1 is set to Western, and parameter 2 is set to Grade A. Similarly, if you want bill group 2 to handle claim and enrollment transactions of employees who reside in the eastern location of city and belong to grade A and whose transactions are received from the X system, you need to define the derivation and pricing parameters for bill group 2 where the source system is set to X, parameter 1 is set to Eastern, and parameter 2 is set to Grade A.

**Note:** In the above examples, the bill group is derived based on the specified attributes when the source system, parameter 1, and parameter 2 are mapped to the appropriate transaction fields in the pricing rule type using which the pricing rules are defined for the bill group.

You can also define criteria for a rule in a pricing group using the parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4. If a pricing rule is defined for a bill group using a pricing group, you can define more than one price in the pricing rule which is offered based on the attributes of the employees.

The derivation and pricing parameters for the bill group and sort ID combination are effective from a particular date. However, the effective date must fall within the date range defined for the sort ID of the bill group.

The **Bill Group Derivation and Pricing Parameters** zone lists the derivation and pricing parameters defined for all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

You can define and edit the derivation and pricing parameters for a bill group (who is effective child person of the parent customer) and sort ID combination through this zone. You can also upload the derivation and pricing parameters for one or more bill group and sort ID combinations at the same time using the **Upload Request** feature. You can upload the derivation and pricing parameters for a bill group and sort ID combination either from this zone or from the **Upload Request** screen. While creating an upload request for the derivation and pricing parameters, you need to specify the parent customer whose bill groups' derivation and pricing parameters you want to upload. Once the upload request is processed, the derivation and pricing parameters are defined for the bill group and sort ID combination in the system.

This zone contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the parent customer's bill group for whom the derivation and pricing parameters are defined. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective bill group (i.e. person).
Bill Group ID	Displays the bill group ID (i.e. person ID).
Source System	Indicates the source system from where the claim and enrollment transactions are received.
Parameter 1	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 2	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 3	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 4	Indicates the employee attribute based on which you want to derive the bill group.
Sort ID	Indicates the sort ID of the bill group.
Effective Date	Displays the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.
Status	Indicates the status of the derivation and pricing parameters defined for the bill group and sort ID combination. The valid values are:

Column Name	Column Description
	<ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>

In addition, it contains the following buttons:

Button Name	Button Description
Edit	Used to edit the derivation and pricing parameters of a bill group and sort ID combination.

If you want to edit the derivation and pricing parameters of all bill group and sort ID combinations, you need to select the check box corresponding to the column header in this zone, and then click the **Edit** button. However, if you want to edit the derivation and pricing parameters of one or more bill group and sort ID combination, you need to select the check box corresponding to the bill group and sort ID combination, and then click the **Edit** button.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

If you select the check box corresponding to the column header in this zone, the system considers only those records which are present on the respective page for editing.

You can define the derivation and pricing parameters for a bill group (who is effective child person of the parent customer) and sort ID combination by clicking the **Add** link in the upper right corner of this zone. You can also upload the derivation and pricing parameters for one or more bill group (who is effective child person of the parent customer) and sort ID combinations by clicking the **Upload** link in the upper right corner of this zone.

You can filter the list using various search criteria (such as, **Parameter 1, Parameter 2, Parameter 3, Parameter 4, Bill Group ID, Sort ID, Status, and Bill Group Name**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

**Bill Group Sorting**

Oracle Revenue Management and Billing allows you to define unique sort IDs for a bill group in a given date range. In future, the sort ID will be used to club transactions based on certain parameters and present them in the bill in the ascending or descending order. It may also be used to sort data while generating various reports.

The **Bill Group Sorting** zone lists the sort IDs defined for all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

You can define, edit, and delete a sort ID of a bill group (who is effective child person of the parent customer) through this zone. You can also upload a set of sort IDs for one or more bill groups (who are effective child persons of the parent customer) at the same time using the **Upload Request** feature. You can upload the sort IDs for bill groups either from this zone or from the **Upload Request** screen. While creating an upload request for bill group sort IDs, you need to specify the parent customer whose bill groups' sort IDs you want to upload. Once the upload request is processed, the sort ID is defined for the respective bill group in the system.

This zone contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the parent customer's bill group for whom the sort ID is defined. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective bill group (i.e. person).
Bill Group ID	Displays the bill group ID (i.e. person ID).
Sort ID	Displays the sort ID.
Description	Displays the description of the sort ID.
Start Date	Displays the date from when the sort ID is effective for the bill group.
End Date	Displays the date till when the sort ID is effective for the bill group.

In addition, it contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of a bill group's sort ID.
Delete	Used to delete a bill group's sort ID.  <b>Note:</b> You can delete a bill group's sort ID when the derivation and pricing parameters are not yet defined for the bill group and sort ID combination.

If you want to edit or delete all sort IDs of effective bill groups, you need to select the check box corresponding to the column header in this zone, and then accordingly click the **Edit** or **Delete** button. However, if you want to edit or delete one or more sort IDs of effective bill groups, you need to select the check box corresponding to the bill group and sort ID combination, and then accordingly click the **Edit** or **Delete** button.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

If you select the check box corresponding to the column header in this zone, the system considers only those records which are present on the respective page for editing or deleting.

You can define a sort ID for a bill group (who is effective child person of the parent customer) by clicking the **Add** link in the upper right corner of this zone. You can also upload a set of sort IDs for one or more bill groups (who are effective child persons of the parent customer) by clicking the **Upload** link in the upper right corner of this zone.

You can filter the list using the **Bill Group Name** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

**Customer Contacts**

The **Customer Contacts** zone displays information about how and when the person was contacted. It contains the following columns:

Column Name	Column Description
Contact Date	Displays the date when the person was contacted.
Customer Contact Information	Displays information about the customer contact. <b>Note:</b> It has a link. On clicking the link, the <b>Customer Contact</b> screen appears where you can view the details of the customer contact.
Contact Type	Indicates how the person was contacted.
Comments	Displays additional information about the customer contact.

You can filter the list using various search criteria (such as, **On or Before Contact Date**, **Contact Class**, **Contact Type**, and **Show Open Contacts Only**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

**Bill Groups Created Via Customer Registration**

The **Bill Groups Created Via Customer Registration** zone lists the customer registration objects through which the parent customer's bill groups are created in the system. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**. It contains the following columns:

Column Name	Column Description
Customer Registration Information	Indicates the customer registration object through which the bill group is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Customer Registration</b> screen appears where you can view the details of the respective customer registration object.
Person Name	Displays the name of the bill group.
Person Relationship Type	Indicates how the bill group is related to the parent customer.
Status	Indicates the status of the customer registration object. The valid value is: <ul style="list-style-type: none"> <li>Bill Group Approved</li> </ul>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Person Relationship Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Customer 360° Information - Account

The following table provides information about the **Account** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded or fully-insured group policy	The <b>Account</b> tab displays the following: <ul style="list-style-type: none"> <li>List of the parent customer's and bill groups' accounts. Note that the system lists the accounts of all effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</li> <li>Basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the parent customer's or bill group's account.</li> </ul>
A bill group who is associated with the fully-insured group or self-funded policy	The <b>Account</b> tab displays the basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the bill group's account.  <b>Note:</b> If the bill group has multiple accounts, the system, by default, picks and displays the details of any one of its account.

If you are viewing the 360° information of...	Then...
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	<p>The <b>Account</b> tab displays the basic details, characteristics, automatic payment options, administrative contracts, financial and collections summary, billing and adjustment summary, and unpaid bills of the person's account.</p> <p><b>Note:</b> If the person has multiple accounts, the system, by default, picks and displays the details of any one of its account.</p>

It contains the following zones:

- [Account List](#) on page 754

**Note:** The **Account List** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

### Account List

The **Account List** zone lists the accounts of the parent customer and its bill groups. Note that the system lists the accounts of all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**. It contains the following columns:

Column Name	Column Description
Person Name	Indicates the person who is linked to the account.
Account Information	Displays information about the account. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Person Type	Indicates the type of the person. The valid values are: <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul>
Person's Mailing Address	Displays the mailing address of the person.
Person ID	Displays the person ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to an account, the following zones appear in the **Account** tab:

- Account Information
- Auto Pay Details
- Account Financial and Collections Summary
- Account Characteristics
- Open Bills
- Billed Vs Paid
- Timeline

You can filter the list using various search criteria (such as, **Person Name**, **Account ID**, **Person Type**, and **Include Ended Child Person's Accounts**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

### **Account Information**

The **Account Information** zone displays the details of the account. It contains the following sections:

- **Main** – Displays the basic information about the account. It contains the following fields:

Field Name	Field Description
Account Information	Displays information about the account. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Management Group	Indicates the account management group to which the account belongs.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Account Management Group</b> screen appears where you can view the details of the respective account management group.</p> <p>This field appears when the respective data is available for the account.</p>

- **Contact Information** – Displays the contact details of the account’s main customer. It contains the following fields:

Field Name	Field Description
Address Source	Indicates which address should be used to route the account’s bills and/or quotes via the postal service.
Country	Indicates the country where the main customer is located.
Address 1	Displays the first line of the main customer’s address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the main customer’s address. It may contain details, such as street name.
Address 3	Displays the third line of the main customer’s address. It may contain the landmark details.
Address 4	Displays the fourth line of the main customer’s address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the main customer resides within the city limit or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> </ul>

Field Name	Field Description
	<ul style="list-style-type: none"> <li>No</li> </ul>
City	Displays the city where the main customer is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the main customer is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.

**Note:** The above mentioned fields except **Address Source** appear in the **Contact Information** section when the address source of the main customer is set to **Account Override** and the respective data is available for the account.

- **Account Identifiers** – Lists various types of identification associated with the account. It contains the following columns:

Column Name	Column Description
Account Identifier Type	Indicates the account identifier type.
Account Identifier	Displays the value of the account identifier type.

- **Billing** – Displays the billing information of the account. It contains the following fields:

Field Name	Field Description
Bill Cycle	<p>Indicates the bill cycle of the account.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill Cycle</b> screen appears where you can view the details of the respective bill cycle. This field appears when the respective data is available for the account.</p>
Bill After Date	<p>Displays the date when the billing should be resumed for the account.</p> <p><b>Note:</b> This field appears when the respective data is available for the account.</p>
Skip Months	Indicates the months separated by comma for which billing should be skipped for the account.

Field Name	Field Description
	<p><b>Note:</b> The system derives the skip months for an account using the billing preference. You can set the billing preference for an account through a characteristic type which is specified in the <b>Bill Cycle Rule Code</b> option type of the <b>C1-ASOBLNG</b> feature configuration. The system enables you to define, edit, delete, and copy a billing preference through the <b>Field Mapping</b> screen. For more information, see <a href="#">Defining a Billing Preference</a>.</p>

### Account Characteristics

The **Account Characteristics** zone lists the characteristics of the account. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the account.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	<p>Displays the description of the characteristic value.</p> <p><b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> or <b>Foreign Key Value</b>.</p>

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

### Administrative Contracts

The **Administrative Contracts** zone lists the account's contracts which should be monitored closely for various administrative reasons. It appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**. It contains the following columns:

Column Name	Column Description
Contract ID	<p>Displays the contract ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.</p>
Contract Type	Indicates the type of the contract.
Currency	Indicates the currency in which the contract balance is maintained.
Current Balance	Displays the current balance on the contract.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The data appears in this zone when you have defined the value for the **Administrative Contract Type** option type in the **C1\_CMO** feature configuration.

**Related Topics**

For more information on...	See...
How to setup the <b>C1_CMO</b> feature configuration	<a href="#">Setting the C1_CMO Feature Configuration</a> on page 4097

**Auto Pay Details**

The **Auto Pay Details** zone lists the automatic payment options defined for the account. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the automatic payment option is effective.
End Date	Displays the date till when the automatic payment option is effective.
Auto Pay Source Code	Indicates the source of funds used to make the automatic payment. For example, debit or credit card.
Last Four Digits of Card	Displays the last four digits of the debit or credit card. <b>Note:</b> The data appears in this column when the external type of the auto pay source code's tender type is set to <b>Credit Card Withdrawal</b> .
Percentage	Indicates the percentage of automatic payment that must be made through the automatic payment option.
Priority	Indicates the order in which the automatic payment option should be considered for the effective date range.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

**Account Financial and Collections Summary**

The **Account Financial and Collections Summary** zone displays the financial and collection details of the account. It contains the following fields:

Field Name	Field Description
Collection Class	Indicates the collection class to which the account belongs.
Current Credit Rating	Indicates the account's credit rating which is effective on the current date.

Field Name	Field Description
Last Credit Review Date	Displays the date when the account's debt was last reviewed.
Last Payment Date	Displays the date when the last payment was made for the account. <b>Note:</b> The system considers the last payment which is in the <b>Frozen</b> status.
Last Payment Amount	Displays the amount of the last payment. <b>Note:</b> The system considers the last payment which is in the <b>Frozen</b> status.
Current Balance	Displays the current balance of the account.
Payoff Balance	Displays the payoff balance of the account.
Account on Hold	Indicates whether the account is on hold or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Promise to Pay	Indicates whether any promise to pay is scheduled for the account on the current or future date. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Payment Arrangement	Indicates whether any payment arrangement exists for the account. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Payment Agreement	Indicates whether any active payment agreement request exists for the account. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

### Billing and Adjustment Summary

The **Billing and Adjustment Summary** zone displays the billing and adjustment summary of the account. It appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**. It contains the following sections:

- **Quote Billed Balance** – Displays information about the account's billed balance. It contains the following fields:

Field Name	Field Description
Past Due Billed Balance	Displays the sum of open financial transactions of the account that are listed on a bill with a past due date.
Future Due Billed Balance	Displays the sum of open financial transactions of the account that are listed on a bill with a future due date.

Field Name	Field Description
Quote Billed Balance	Displays the sum of past due billed balance and future due billed balance.

- **Future Adjustments and Retroactivity** – Displays information about the account’s future adjustments and retro activities. It contains the following fields:

Field Name	Field Description
Future Adjustments	Displays the sum of adjustment financial transactions of the account which are swept onto the next bill.
Future Retro Terms (Credits)	Displays the sum of canceled bill segment financial transactions of the account which are presented on the next bill.
Future Retro Adds (Debits)	Displays the sum of membership premium billable charges which are not yet billed to the account.  <b>Note:</b> The data appears in this field when the values are defined for the <b>Premium Amount SQI</b> and <b>Coverage End Date SQI</b> option types in the <b>C1-BILLADJSQ</b> feature configuration.
Future Balance with Adjustments & Debits/Credits	Displays the sum of quote billed balance, future adjustments, future retro terms (credits), and future retro adds (debits).

### **Open Bills**

The **Open Bills** zone lists the unpaid bills of the account. By default, the bills where the unpaid amount is greater than zero are listed in this zone. It contains the following columns:

Column Name	Column Description
Bill Date	Displays the date when the bill was generated.

Column Name	Column Description										
	<p><b>Note:</b></p> <p>The data in this column is presented in a different color depending on the age bucket in which the bill's days past due falls. The following table lists the color used for presentation in various age buckets:</p> <table border="1"> <thead> <tr> <th>Age Bucket</th> <th>Color</th> </tr> </thead> <tbody> <tr> <td>Age 0 to 30 DPD</td> <td>Black</td> </tr> <tr> <td>Age 31 to 60 DPD</td> <td>Green</td> </tr> <tr> <td>Age 61 to 90 DPD</td> <td>Orange</td> </tr> <tr> <td>Age &gt; 90 DPD</td> <td>Red</td> </tr> </tbody> </table>	Age Bucket	Color	Age 0 to 30 DPD	Black	Age 31 to 60 DPD	Green	Age 61 to 90 DPD	Orange	Age > 90 DPD	Red
Age Bucket	Color										
Age 0 to 30 DPD	Black										
Age 31 to 60 DPD	Green										
Age 61 to 90 DPD	Orange										
Age > 90 DPD	Red										
Bill ID	<p>Displays the bill ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p>										
Due Date	Displays the date when the bill is due for payment.										
Bill Amount	Displays the bill amount.										
Bill Status	<p>Indicates the status of the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• Complete</li> </ul>										
Unpaid Amount	Displays the unpaid amount of the bill.										
Age Bucket	<p>Indicates the age bucket in which the bill's days past due falls. The valid values are:</p> <ul style="list-style-type: none"> <li>• Age 0 to 30 DPD</li> <li>• Age 31 to 60 DPD</li> <li>• Age 61 to 90 DPD</li> <li>• Age &gt; 90 DPD</li> </ul>										
Days Past Due	Displays the number of days past after the due date.										
Overdue Process Information	<p>Indicates the overdue process which is initiated for the bill and is currently in the <b>Active</b> status. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Overdue Process</b> screen appears where you can view the details of the respective overdue process.</p>										
Payment Agreement Request Information	Indicates the active payment agreement request in which the bill is included.										

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Payment Agreement Request</b> screen appears where you can view the details of the respective payment agreement request.

You can view additional information about the bill by clicking the **View** () icon corresponding to the bill in the **Open Bills** zone.

You can filter the list using various search criteria (such as, **On or Before Bill Date** and **Show All Bills**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

**Note:** If you select the **Show All Bills** option, the system lists all bills where the unpaid amount is greater than or equal to zero.

### Billed Vs Paid

The **Billed Vs Paid** zone lists the following transactions of the account:

- Bills which are created for the account

**Note:** The system lists the bills which are created for the account either manually from the user interface or automatically through the batches. It also lists the bills which are created for the account through a manual or automatic invoice request.

- Any excess credit which is made for the account
- Payments which are created or canceled for the account
- Adjustments which are created or canceled for the account
- Refund or Write Off adjustments which are created or canceled for the account
- Payment transfer to the reconciliation contract of the account
- Payment transfer from the reconciliation contract to the payor account's contract
- Reconciliations through which the account's bill segments are reconciled
- Automatic payments sent to the auto clearing house for review before freezing them

**Note:** The excess credit information for the account appears when you have defined the value for the **On Account Contract Type** option type in the **C1\_CMO** feature configuration. Accordingly, the excess credit information (if any) on the respective contracts is listed in this zone.

It contains the following columns:

Column Name	Column Description
Due Date	Displays the date when the bill is due for payment.
	<b>Note:</b> The data appears in this column when the transaction type is set to <b>Bill</b> .

Column Name	Column Description																						
Bill ID	<p>Displays the bill ID.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p> <p>The data appears in this column when the transaction type is set to <b>Bill</b>.</p>																						
Transaction Date	<p>The following table indicates the date that appears depending on the type of the transaction:</p> <table border="1" data-bbox="857 596 1463 1724"> <thead> <tr> <th data-bbox="865 604 1159 678">If the transaction type is...</th> <th data-bbox="1162 604 1455 678">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="865 682 1159 756">Bill</td> <td data-bbox="1162 682 1455 756">Date when the bill is generated for the account</td> </tr> <tr> <td data-bbox="865 760 1159 833">Payment</td> <td data-bbox="1162 760 1455 833">Date when the payment is made for the account</td> </tr> <tr> <td data-bbox="865 837 1159 911">Adjustment</td> <td data-bbox="1162 837 1455 911">Date when the adjustment is created for the account</td> </tr> <tr> <td data-bbox="865 915 1159 989">Payment Cancellation</td> <td data-bbox="1162 915 1455 989">Date when the payment is canceled for the account</td> </tr> <tr> <td data-bbox="865 993 1159 1066">Adjustment Cancellation</td> <td data-bbox="1162 993 1455 1066">Date when the adjustment is canceled for the account</td> </tr> <tr> <td data-bbox="865 1071 1159 1220">Excess Credit (overpayment)</td> <td data-bbox="1162 1071 1455 1220">Date when the excess credit is made for the account</td> </tr> <tr> <td data-bbox="865 1224 1159 1373">Reconciliation Contract</td> <td data-bbox="1162 1224 1455 1373">Date when the payment is transferred to the reconciliation contract of the account</td> </tr> <tr> <td data-bbox="865 1377 1159 1526">Reconciliation Contract - Returned</td> <td data-bbox="1162 1377 1455 1526">Date when the payment made to the reconciliation contract of the account is canceled</td> </tr> <tr> <td data-bbox="865 1530 1159 1638">Payment Transfer</td> <td data-bbox="1162 1530 1455 1638">Date when the pay instruction for the account is reconciled</td> </tr> <tr> <td data-bbox="865 1642 1159 1715">Payment Transfer Cancellation</td> <td data-bbox="1162 1642 1455 1715">Date when the reconciliation is canceled</td> </tr> </tbody> </table> <p><b>Note:</b> The data does not appear in this column for automatic payments which are sent to the auto clearing house for review.</p>	If the transaction type is...	Then...	Bill	Date when the bill is generated for the account	Payment	Date when the payment is made for the account	Adjustment	Date when the adjustment is created for the account	Payment Cancellation	Date when the payment is canceled for the account	Adjustment Cancellation	Date when the adjustment is canceled for the account	Excess Credit (overpayment)	Date when the excess credit is made for the account	Reconciliation Contract	Date when the payment is transferred to the reconciliation contract of the account	Reconciliation Contract - Returned	Date when the payment made to the reconciliation contract of the account is canceled	Payment Transfer	Date when the pay instruction for the account is reconciled	Payment Transfer Cancellation	Date when the reconciliation is canceled
If the transaction type is...	Then...																						
Bill	Date when the bill is generated for the account																						
Payment	Date when the payment is made for the account																						
Adjustment	Date when the adjustment is created for the account																						
Payment Cancellation	Date when the payment is canceled for the account																						
Adjustment Cancellation	Date when the adjustment is canceled for the account																						
Excess Credit (overpayment)	Date when the excess credit is made for the account																						
Reconciliation Contract	Date when the payment is transferred to the reconciliation contract of the account																						
Reconciliation Contract - Returned	Date when the payment made to the reconciliation contract of the account is canceled																						
Payment Transfer	Date when the pay instruction for the account is reconciled																						
Payment Transfer Cancellation	Date when the reconciliation is canceled																						
Transaction Type	Indicates the type of the transaction. The valid values are:																						

Column Name	Column Description
	<ul style="list-style-type: none"> <li>• Bill</li> <li>• Payment</li> <li>• Adjustment</li> <li>• Payment Cancellation</li> <li>• Adjustment Cancellation</li> <li>• Excess Credit (overpayment)</li> <li>• Reconciliation Contract</li> <li>• Reconciliation Contract - Returned</li> <li>• Payment Transfer</li> <li>• Payment Transfer Cancellation</li> </ul>
Transaction Description	<p>Displays the description of the transaction.</p> <p><b>Note:</b> The data appears in this column when the transaction type is set to <b>Adjustment, Adjustment Cancellation, Reconciliation Contract - Returned, Payment Transfer, and Payment Transfer Cancellation</b>. In addition, the data appears in this column when the automatic payments are sent to the auto clearing house for review before freezing them. The transaction description for such payments is set to <b>Pending Payment</b>.</p>
Transaction Amount	Displays the transaction amount.
Unpaid Amount	<p>Displays the unpaid amount of the bill.</p> <p><b>Note:</b> The data appears in this column when the transaction type is set to <b>Bill</b>.</p>
Payment Date	<p>Displays the date when the payment is created or canceled for the account.</p> <p><b>Note:</b> The data appears in this column when the transaction type is set to <b>Payment, Payment Cancellation, or Excess Credit (overpayment)</b>.</p>
Tender Type	Indicates the type of tender through which the payment was made.
Check Number/External Reference ID	Displays the check number or external reference ID.
Transaction ID	<p>Displays the payment, adjustment, or reconciliation ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Payment, Adjustment, or Reconciliation</b> screen appears where you can view the details of the respective transaction.</p>

The **View**  icon appears corresponding to a bill in this zone. On clicking the **View**  icon corresponding to a bill, the **Bill Information** screen appears where you can view the details of the respective bill.

You can filter the list using the **On or Before Due Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

How to setup the <b>CI_CMO</b> feature configuration	<a href="#">Setting the CI_CMO Feature Configuration</a> on page 4097

### Timeline

The **Timeline** zone displays the following information in a graphical form:

- Number of customer contacts which are created for the account's main customer in a particular month
- Number of bills which are created for the account in a particular month
- Number of payments which are created for the account in a particular month

It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Month	Used to indicate the month till when you want to display the above stated information.	Yes
	<b>Note:</b> By default, the current month appears in this field.	
Year	Used to indicate the year till when you want to display the above stated information.	Yes
	<b>Note:</b> By default, the current year appears in this field.	

Depending on the month and year specified in the above fields, the data for the respective month and previous 11 months is presented in the grid. For example, if the Month and Year is set to April 2017, then the data for the May 2016, Jun 2016, Jul 2016, Aug 2016, Sep 2016, Oct 2016, Nov 2016, Dec 2016, Jan 2017, Feb 2017, Mar 2017, and Apr 2017 appears in the grid. To view the data for a different period, you must accordingly change the month and year and then click **Search** (  ) icon.

You can use the **Previous 12 Months** (  ), **Previous Month** (  ), **Go To Today** (  ), **Next Month** (  ), and **Next 12 Months** (  ) icons to change the values specified in the above mentioned fields.

The following table indicates the data and the manner in which the data is presented in the grid:

Row Name	Row Description
Customer Contacts	A small icon appears for each customer contact which is created for the account's main customer in the respective month. For example, if two customer contacts are created for the main customer in the month of Jan 2017 and one customer contact is created in the month of Feb 2017,

Row Name	Row Description										
	<p>then two icons appear in the Jan 2017 column and one icon appear in the Feb 2017 column. A text indicating the day of the month when the customer contact was created appears on the icon. The following table indicates the color in which the icon appears depending on the condition which is satisfied:</p> <table border="1" data-bbox="857 415 1461 630"> <thead> <tr> <th data-bbox="857 415 1161 527">If the contact action on the customer contact type is...</th> <th data-bbox="1161 415 1461 527">Then the icon appears in...</th> </tr> </thead> <tbody> <tr> <td data-bbox="857 527 1161 577">Set to <b>Send Letter</b></td> <td data-bbox="1161 527 1461 577">Red</td> </tr> <tr> <td data-bbox="857 577 1161 630">Set to <b>Action Algorithm</b></td> <td data-bbox="1161 577 1461 630">Yellow</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding customer contact information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Customer Contact</b> screen appears where you can view the details of the respective customer contact.</p> <p><b>Note:</b> You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the <b>C1-TL-CC-EVT</b> algorithm.</p>	If the contact action on the customer contact type is...	Then the icon appears in...	Set to <b>Send Letter</b>	Red	Set to <b>Action Algorithm</b>	Yellow				
If the contact action on the customer contact type is...	Then the icon appears in...										
Set to <b>Send Letter</b>	Red										
Set to <b>Action Algorithm</b>	Yellow										
Bills	<p>A small icon appears for each bill which is created for the account in the respective month. For example, if three bills are created for the account in the month of Jan 2017, two bills are created in the month of Feb 2017, and one bill is created in the month of Apr 2017, then three icons appear in the Jan 2017 column, two icons appear in the Feb 2017 column, and one icon appears in the Apr 2017 column. A text indicating the day of the month when the bill was due appears on the icon. You can either display the day of the due date or bill date on the icon depending on the requirement. The following table indicates the color in which the icon appears depending on the condition which is satisfied:</p> <table border="1" data-bbox="857 1434 1461 1749"> <thead> <tr> <th data-bbox="857 1434 1161 1516">If the bill is...</th> <th data-bbox="1161 1434 1461 1516">Then the icon appears in...</th> </tr> </thead> <tbody> <tr> <td data-bbox="857 1516 1161 1566">Fully Matched</td> <td data-bbox="1161 1516 1461 1566">Green</td> </tr> <tr> <td data-bbox="857 1566 1161 1617">Unmatched</td> <td data-bbox="1161 1566 1461 1617">Red</td> </tr> <tr> <td data-bbox="857 1617 1161 1667">Credit Note</td> <td data-bbox="1161 1617 1461 1667">Blue</td> </tr> <tr> <td data-bbox="857 1667 1161 1749">Scheduled for billing in the next bill cycle</td> <td data-bbox="1161 1667 1461 1749">Black</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding bill information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p>	If the bill is...	Then the icon appears in...	Fully Matched	Green	Unmatched	Red	Credit Note	Blue	Scheduled for billing in the next bill cycle	Black
If the bill is...	Then the icon appears in...										
Fully Matched	Green										
Unmatched	Red										
Credit Note	Blue										
Scheduled for billing in the next bill cycle	Black										

Row Name	Row Description												
	<p><b>Note:</b></p> <p>If you want to display the day of the due date on the icon, you must set the <b>Date To Use (D-Due Date, B-Bill Date)</b> parameter in the <b>C1-TL-OI-EVT</b> algorithm to <b>D</b>. However, if you want to display the day of the bill date on the icon, you must set the <b>Date To Use (D-Due Date, B-Bill Date)</b> parameter in the <b>C1-TL-OI-EVT</b> algorithm to <b>B</b>.</p> <p>You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the <b>C1-TL-OI-EVT</b> algorithm.</p>												
Payments	<p>A small icon appears for each payment which is created for the account in the respective month. For example, if one payment is created for the account in the month of Aug 2016, three payments are created in the month of Dec 2016, and four payments are created in the month of Mar 2017, then one icon appears in the Aug 2016 column, three icons appear in the Dec 2016 column, and four icons appear in the Mar 2017 column. A text indicating the day of the month when the payment was created appears on the icon. The following table indicates the color in which the icon appears depending on the status of the payment:</p> <table border="1" data-bbox="857 1052 1463 1352"> <thead> <tr> <th>Status</th> <th>Color</th> </tr> </thead> <tbody> <tr> <td>Frozen</td> <td>Green</td> </tr> <tr> <td>Canceled</td> <td>Red</td> </tr> <tr> <td>Freezable</td> <td>Blue</td> </tr> <tr> <td>Error</td> <td>Red</td> </tr> <tr> <td>Incomplete</td> <td>Yellow</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding payment information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Payment</b> screen appears where you can view the details of the respective payment.</p> <p><b>Note:</b> You can change the color in which the text appears on the icon and the color in which the icon appears in the different status through the <b>C1-TL-PY-EVT</b> algorithm.</p>	Status	Color	Frozen	Green	Canceled	Red	Freezable	Blue	Error	Red	Incomplete	Yellow
Status	Color												
Frozen	Green												
Canceled	Red												
Freezable	Blue												
Error	Red												
Incomplete	Yellow												

### Hold Details

The **Hold Details** zone lists the active hold requests due to which the bills of the respective account are kept on hold. It contains the following columns:

Column Name	Column Description
Hold Request Information	Displays information about the hold request.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Hold Request</b> screen appears where you can view the details of the respective hold request.
Status	Indicates the status of the hold request. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Approval in Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Rejected</li> <li>• Released</li> </ul>
Entity	Indicates the type of the entity for which the hold request is created in the system. The valid value is: <ul style="list-style-type: none"> <li>• Account</li> </ul>
Hold Reason	Displays the reason for which the hold request is created for the account.
Hold Process	Indicates the process that is kept on hold for the account.
Start Date	Displays the date from when the hold request is effective for the account.
End Date	Displays the date till when the hold request is effective for the account.

### Trial Bills

The **Trial Bills** zone lists the trial bills which are created for the account. It contains the following columns:

Column Name	Column Description
Creation Date	Displays the date when the trial bill is created.
Trial Bill Information	Displays information about the trial bill. <p><b>Note:</b> It has a link. On clicking the link, the <b>Trial Bill</b> screen appears where you can view the details of the respective trial bill.</p>
Current Charges	Displays the trial bill amount.

### Customer 360° Information - Policy

The following table provides information about the **Policy** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	The <b>Policy</b> tab displays the following: <ul style="list-style-type: none"> <li>• List of self-funded policies to which the parent customer's bill groups are associated.</li> </ul>

If you are viewing the 360° information of...	Then...
	<div data-bbox="915 212 1469 317" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.</p> </div> <ul style="list-style-type: none"> <li>Basic details and policy persons of a self-funded policy where the parent customer is the policy holder.</li> </ul>
A parent customer who is associated with the fully-insured group policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of fully-insured group policies to which the parent customer or its bill groups are associated.</li> </ul> <div data-bbox="915 604 1469 709" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.</p> </div> <ul style="list-style-type: none"> <li>Basic details, policy persons, and policy plans of a fully-insured group policy to which the parent customer or its bill group is associated.</li> </ul>
A bill group who is associated with the self-funded policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of self-funded policies to which the bill group is associated.</li> <li>Basic details and policy persons of a self-funded policy.</li> </ul>
A bill group who is associated with the fully-insured group policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of fully-insured group policies to which the bill group is associated.</li> <li>Basic details, policy persons, and policy plans of a fully-insured group policy.</li> </ul>
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of fully-insured group or self-funded policies to which the person is associated.</li> <li>Basic details, policy persons, and policy plans of a self-funded or fully-insured group policy.</li> </ul>

It contains the following zones:

- [Policy List](#) on page 771

**Note:** The **Policy List** zone appears when there is more than one policy associated with the person.

- [Policy Information](#) on page 772
- [Policy Persons](#) on page 773
- [Policy Plans](#) on page 773

**Note:** The **Policy Plans** zone appears when you are viewing the 360° information of a person who is associated with the fully-insured group policy.

**Related Topics**

For more information on...	See...
How to view the 360° information of a policy	<a href="#">Viewing the 360° Information of a Policy</a> on page 733

**Policy List**

If you are viewing 360° information of a parent customer, the **Policy List** zone lists the policies to which the parent customer and its bill groups are associated. Note that the system lists the policies of all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration.

**Note:** The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.

If you are viewing 360° information of a bill group, the **Policy List** zone lists the policies to which the bill group is associated. If you are viewing 360° information of a person who is neither a parent customer nor a bill group, the **Policy List** zone lists the policies to which the person is associated. This zone appears when there is more than one policy associated with the person. It contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	Displays information about the policy. <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Policy Type	Indicates the type of the policy.
Status	Indicates the status of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to a policy, the following zones appear in the **Policy** tab:

- Policy Information
- Policy Persons
- Policy Plans

You can filter the list using various search criteria (such as, **Policy Number**, **Start Date**, **Policy Type**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Policy Information

The **Policy Information** zone displays the details of the policy. It contains the following sections:

- **Main** – Displays the basic information about the policy. It contains the following fields:

Field Name	Field Description
Policy Information	<p>Displays information about the policy.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.</p>
Source System	Displays the name of the external system in which the policy is created.
Policy Number	Displays the policy number.
Status	Indicates the status of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Runout End Date	<p>Displays the date when the runout period of the policy ends.</p> <p><b>Note:</b> This field appears when you are viewing the 360° information of a person who is associated with a self-funded policy.</p>
Runout Administration Fees	<p>Indicates whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <p><b>Note:</b></p> <p>This field appears when you are viewing the 360° information of a person who is associated with a self-funded policy.</p> <p>At present, this field is used only for the information purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p>

- **Characteristics** – Lists the characteristics defined for the policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

### Policy Persons

The **Policy Persons** zone lists the persons associated with the policy. It contains the following columns:

Column Name	Column Description
Person Name	Indicates the person who is associated with the policy.
Policy Person Role	Indicates the role of the person with respect to the policy.
Start Date	Displays the date from when the person is associated with the policy.
End Date	Displays the date till when the person is associated with the policy.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the 360° information of a policy person by clicking the **View** () icon corresponding to the person in the **Policy Persons** zone.

### Policy Plans

The **Policy Plans** zone lists the plans defined in the policy. It appears when you are viewing the 360° information of a person who is associated with the fully-insured group policy. It contains the following columns:

Column Name	Column Description
Policy Plan Information	Displays information about the policy plan. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Plan Name	Indicates the plan to which the policy belongs.
Benefit Type	Indicates the benefit type of the policy plan. The valid values are: <ul style="list-style-type: none"> <li>Commercial</li> <li>Medicare Affiliated</li> </ul>
No. of Subscribers	Indicates the number of main subscribers in the policy plan.

Column Name	Column Description
No. of Members	Indicates the number of members in the policy plan.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Plan Start Date** and **Plan End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Customer 360° Information - Pricing Information

The following table provides information about the **Pricing Information** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	<p>The <b>Pricing Information</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Basic details of the pricing rules which are defined for the parent customer.</li> <li>• Summarized tree view listing each bill group of the parent customer and the bill groups' self-funded policies and pricing rules.</li> <li>• Basic details of the self-funded policies which are associated with each bill group of the parent customer.</li> <li>• Basic details of the pricing rules which are defined for the self-funded policies of each bill group.</li> <li>• Basic details of the active pricing groups which are defined for each bill group.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.</li> </ul>
A bill group who is associated with the self-funded policy	<p>The <b>Pricing Information</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Summarized tree view listing the parent customer and pricing rules which are defined for the parent customer.</li> <li>• Basic details of the self-funded policies which are associated with the bill group.</li> <li>• Basic details of the pricing rules which are defined for the self-funded policies of the bill group.</li> <li>• Basic details of the active pricing groups which are defined for the bill group.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.</li> </ul>
A parent customer who is associated with the fully-insured group policy	<p>The <b>Pricing Information</b> tab displays the following:</p>

If you are viewing the 360° information of...	Then...
	<ul style="list-style-type: none"> <li>• Basic details of the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue).</li> <li>• Summarized tree view listing the pricing rules which are defined for the parent customer, fully-insured group policies, and policy plans.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules for different entities.</li> </ul>
A bill group who is associated with the fully-insured group policy	<p>The <b>Pricing Information</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Basic details of the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue).</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules for different entities.</li> </ul>
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	No data appears in the <b>Pricing Information</b> tab.

It contains the following zones:

- [Parent Customer Pricing Rules](#) on page 776

**Note:** The **Parent Customer Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rule Summary](#) on page 779

**Note:** The **Bill Group Self-Funded Policy Pricing Rule Summary** zone appears when you are viewing 360° information of a parent customer who is associated with the self-funded policy.

- [Parent Customer Pricing Rule Summary](#) on page 780

### Bill Group Pricing Groups

The **Bill Group Pricing Groups** zone lists the pricing groups which are defined for the bill group. By default, the active pricing groups are listed in this zone. It appears when you are viewing 360° information of a bill group who is associated with the self-funded policy. It contains the following columns:

Column Name	Column Description
Pricing Group	Indicates the pricing group which is created for the bill group.
Status	Indicates the status of the pricing group. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Pricing Group</b> screen appears where you can edit the details of the pricing group.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the pricing group. <p><b>Note:</b> You can delete a pricing group when it is not yet used while defining a pricing rule for the bill group.</p>
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Pricing Group</b> screen appears where you can define a new pricing group using an existing pricing group.
Associated Price Items	Indicates the price items whose pricing is defined using the pricing group.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Group Pricing Groups** zone does not appear in the **Pricing** tab of the **Customer 360° Information** screen. It appears when you click the **Broadcast** () icon corresponding to a bill group in the **Bill Group Self-Funded Policy Information** zone.

You can define a new pricing group for the bill group by clicking the **Add** link in the upper right corner of this zone.

You can filter the list using the **Show All** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

**Note:** If you select the **Yes** option from the **Show All** list, the system lists both the active and inactive pricing groups in the **Bill Group Pricing Groups** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

### **Fully-Insured Pricing Rules**

The **Fully-Insured Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group policy. If you are viewing the 360° information of a parent customer, the **Fully-Insured Pricing Rules** zone lists:

- Age based or tier based pricing rules defined for the parent customer's or its bill groups' fully-insured group policy plans
- Additional charge pricing rules defined for the parent customer
- Additional charge pricing rules defined for the fully-insured group policies and policy plans of the parent customer and its bill groups
- Additional charge pricing rules defined for the states where the fully-insured group policy, its policy plans, and memberships are issued

However, if you are viewing the 360° information of a bill group, the **Fully-Insured Pricing Rules** zone lists:

- Age based or tier based pricing rules defined for the bill group's fully-insured group policy plans
- Additional charge pricing rules defined for the parent customer
- Additional charge pricing rules defined for the fully-insured group policies and policy plans of the parent customer and the bill group
- Additional charge pricing rules defined for the states where the fully-insured group policy, its policy plans, and memberships are issued

It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the respective pricing rule type.
Pricing Rule Information	Displays information about the pricing rule.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule</b> screen appears where you can view the details of the respective pricing rule.
Price Item Information	Indicates the price item for which the pricing rule is created. <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Pricing Level	Indicates the level at which the pricing rule is defined. The valid values are: <ul style="list-style-type: none"> <li>• Parent Customer</li> <li>• Plan</li> <li>• Policy</li> <li>• State</li> </ul>
Entity Information	Indicates the fully-insured group policy, policy plan, parent customer, or state for which the pricing rule is defined.
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Price List Information	Indicates the price list that contains the price item pricing which is created through the pricing rule. <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Price Item**, **Start Date**, **Pricing Rule Type**, **End Date**, **Status**, and **Pricing Level**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

### Pricing Rule Summary

The **Pricing Rule Summary** zone lists the following in a tree structure:

- Information string of the parent customer
- Information string of the pricing rule defined for the parent customer
- Information string of each fully-insured group policy where the parent customer is associated
- Information string of the pricing rule defined for the fully-insured group policy of the parent customer
- Information string of each plan defined for the fully-insured group policy of the parent customer
- Information string of the pricing rule defined for the fully-insured group policy plans

It appears when you are viewing 360° information of a parent customer who is associated with the fully-insured group policy. It contains the following column:

Column Name	Column Description
Hierarchy	Displays information about the parent customer, fully-insured group policies, policy plans, and pricing rules in a tree structure.

### Pricing Rule Approval Transactions

The **Pricing Rule Approval Transactions** zone lists the following information:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.
A bill group who is associated with the self-funded policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.
A parent customer who is associated with the fully-insured group policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of different entities (such as parent customer, fully-insured group policy, policy plans, and state of issue).
A bill group who is associated with the fully-insured group policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of different entities (such as parent customer, fully-insured group policy, policy plans, and state of issue).

It contains the following columns:

Column Name	Column Description
Submitted On	Displays the date and time when the approval transaction is created by the submitter.
Approval Transaction ID	Displays the approval transaction ID.  <b>Note:</b> It has a link. On clicking the link, the <b>Comparison: New versus Existing</b> screen appears where you can review and accordingly approve, reject, or revert the changes.
Pricing Level	Indicates whether the approval transaction is created for a pricing rule which is defined at the parent customer or bill group level. The valid values are: <ul style="list-style-type: none"> <li>• Parent Customer</li> <li>• Bill Group</li> </ul>
Person Name	Indicates the person for whom the pricing rule is created.
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.
Price Item Information	Indicates the price item for which the pricing rule is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Approval Status	Indicates the status of the approval transaction. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Deleted</li> <li>• Inprocess</li> <li>• Pending</li> <li>• Rejected</li> </ul>
Action	Indicates the type of action performed by the submitter on the pricing rule. The valid values are: <ul style="list-style-type: none"> <li>• Add</li> <li>• Update</li> <li>• Delete</li> </ul>
Submitted By	Indicates the user who has performed the action on the pricing rule.

Column Name	Column Description
Assigned To	Indicates the user to whom the approval transaction is manually assigned for review.
Approved/Rejected By	Indicates the user who has approved or rejected the approval transaction.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Status**, **Assigned To**, and **Price Item**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Defining a Sort ID for a Bill Group

### Prerequisites

To define a sort ID for a bill group, you should have:

- Effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration

### Procedure

To define a sort ID for a bill group:

- Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- Click the **Add** link in the upper right corner of the **Bill Group Sorting** zone.

The **Bill Group Sorting** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' sort IDs you want to define.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Group Information	Used to indicate the bill group for whom you want to define the sort ID.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The values appear in this list when there are effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> parameter of the <b>C1-ASOBLNG</b> feature configuration.	
Description	Used to specify the description for the sort ID.	Yes
Sort ID	Used to specify the sort ID.	Yes
Start Date	Used to specify the date from when the sort ID is effective for the bill group.	Yes
	<b>Note:</b> The start date cannot be later than the end date.	
End Date	Used to specify the date till when the sort ID is effective for the bill group.	No
	<b>Note:</b> The end date cannot be earlier than the start date.	

- Enter the required details in the grid.
- If you want to define more than one sort ID for a bill group, click the **Add**  icon and then repeat step 5.

**Note:** However, if you want to remove a sort ID of a bill group, click the **Delete**  icon corresponding to the bill group and sort ID combination.

- Click **Save**.

A sort ID is defined for the bill group.

## **Editing a Sort ID of a Bill Group**

**Procedure**

To edit a sort ID of a bill group:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. In the **Bill Group Sorting** zone, select the check box corresponding to the bill group and sort ID combination whose details you want to edit.

**Note:** If you want to edit all sort IDs of effective bill groups, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for editing.

5. Click **Edit**.

The **Bill Group Sorting** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' sort IDs you want to edit.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Group Information	Indicates the bill group whose sort ID you want to edit.	Not applicable
Description	Used to specify the description for the sort ID.	Yes
Sort ID	Displays the sort ID.	Not applicable
Start Date	Used to specify the date from when the sort ID is effective for the bill group.  <b>Note:</b> The start date cannot be later than the end date.  The start date cannot be later than the effective date specified in the derivation and pricing parameters which are defined for the bill group and sort ID combination.	Yes

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to specify the date till when the sort ID is effective for the bill group.	No
	<p><b>Note:</b></p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the effective date specified in the derivation and pricing parameters which are defined for the bill group and sort ID combination.</p>	

6. Modify the details of a bill group's sort ID, if required.
7. Click **Save**.

The changes made to the bill group's sort ID are saved.

## Deleting a Sort ID of a Bill Group

### Procedure

To delete a sort ID of a bill group:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. In the **Bill Group Sorting** zone, select the check box corresponding to the bill group and sort ID combination that you want to delete.

**Note:** If you want to delete all sort IDs of effective bill groups, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for deleting.

5. Click **Delete**.

A message appears confirming whether you want to delete the bill group's sort ID.

**Note:** You can delete a bill group's sort ID when the derivation and pricing parameters are not yet defined for the bill group and sort ID combination.

6. Click **OK**.

The bill group's sort ID is deleted.

## Creating a Bill Group Sorting Upload Request

**Procedure**

To create a bill group sorting upload request:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Upload** link in the upper right corner of the **Bill Group Sorting** zone.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.	Yes
	<b>Note:</b> The list includes only those upload request types where the upload request business object with the <b>Upload Type</b> option type set to <b>BG</b> is selected.	

**Note:** The **Select Upload Request Type** screen appears when there are multiple upload request types where the upload request business object with the **Upload Type** option type set to **BG** is selected. If there is only one such upload request type defined in the application, the **Bill Group Sorting Upload Request** screen appears.

5. Select the required upload request type from the respective field.

6. Click **OK**.

The **Bill Group Sorting Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define the characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the bill group sorting upload request will be created.	Not applicable
Parent Customer	Used to indicate the person for whom you want to create the bill group sorting upload request.  <b>Note:</b> By default, the parent customer's ID appears in this field. You can change the person, if required.  The system allows you to create a bill group sorting upload request for a person whose person type is set to <b>Parent Customer</b> .  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	Yes
File Name	Used to specify the name and path of the file that you want to upload.  <b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the file is available in the system.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

7. Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

8. Browse to the location where the file that you want to upload is available in the system.
9. Click **Open**.

The file name along with the path appears in the **File Name** field.

10. Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.
11. Define characteristics for the upload request, if required.
12. Click **Save**.

A message appears indicating the number of records which are successfully uploaded. Then, a bill group sorting upload request is created in the **Draft** status. If the bill group ID is available in the record, the status of the record is set to **Pending**. However, if the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination when the bill group ID is not specified in the record, the status of the record is set to **Invalid**.

## Defining the Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

### Prerequisites

To define the derivation and pricing parameters for a bill group and sort ID combination, you should have:

- Effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration
- Sort ID defined for the bill group
- Values defined for the **C1-SourceSystemLookup** extendable lookup

### Procedure

To define the derivation and pricing parameters for a bill group and sort ID combination:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Add** link in the upper right corner of the **Bill Group Derivation and Pricing Parameters** zone.  
The **Bill Group Derivation and Pricing Parameters** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' derivation and pricing parameters you want to define.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the source system from where the claim and enrollment transactions are received.	Yes
Parameter 1	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	Yes
Parameter 2	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	No
Parameter 3	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	No
Parameter 4	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	No
Effective Date	Used to specify the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.  <b>Note:</b> The effective date must be within the date range of the sort ID defined for the bill group.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Status	Indicates the status of the derivation and pricing parameters for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Not applicable
	<b>Note:</b> By default, the value is set to <b>Active</b> .	
Bill Group Information	Used to indicate the bill group for whom you want to define the derivation and pricing parameters.	Yes
	<b>Note:</b> The values appear in this list when there are effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> parameter of the <b>C1-ASOBLNG</b> feature configuration.	
Sort ID	Used to indicate the sort ID of the bill group for which you want to define the derivation and pricing parameters.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Sort ID Search</b> window appears.	

- Enter the required details in the grid.
- If you want to define the derivation and pricing parameters for more than one bill group and sort ID combination, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove the derivation and pricing parameters of a bill group and sort ID combination, click the **Delete** (🗑️) icon corresponding to the bill group and sort ID combination.

- Click **Save**.

The derivation and pricing parameters are defined for the bill group and sort ID combination.

## Editing the Derivation and Pricing Parameters of a Bill Group and Sort ID Combination

### Procedure

To edit the derivation and pricing parameters of a bill group and sort ID combination:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. In the **Bill Group Derivation and Pricing Parameters** zone, select the check box corresponding to the bill group and sort ID combination whose details you want to edit.

**Note:** If you want to edit the derivation and pricing parameters of all bill group and sort ID combinations, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for editing.

5. Click **Edit**.

The **Bill Group Derivation and Pricing Parameters** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' derivation and pricing parameters you want to edit.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Indicates the source system from where the claim and enrollment transactions are received.	Not applicable
Parameter 1	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 2	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 3	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Parameter 4	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Effective Date	Displays the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.	Not applicable
Status	Used to indicate the status of the derivation and pricing parameters for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Bill Group Information	Indicates the bill group for whom the derivation and pricing parameters are defined.	Not applicable
Sort ID	Indicates the sort ID of the bill group for which the derivation and pricing parameters are defined.	Not applicable

- If required, you can inactivate the derivation and pricing parameters of a bill group and sort ID combination.
- Click **Save**.

The changes made to the derivation and pricing parameters of a bill group and sort ID combination are saved.

## **Creating a Bill Group Derivation and Pricing Parameters Upload Request**

### **Procedure**

To create a bill group derivation and pricing parameters upload request:

- Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- Click the **Upload** link in the upper right corner of the **Bill Group Derivation and Pricing Parameters** zone.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.	Yes
	<b>Note:</b> The list includes only those upload request types where the upload request business object with the <b>Upload Type</b> option type set to <b>BL</b> is selected.	

**Note:** The **Select Upload Request Type** screen appears when there are multiple upload request types where the upload request business object with the **Upload Type** option type set to **BL** is selected. If there is only one such upload request type defined in the application, the **Bill Group Derivation and Pricing Parameters Upload Request** screen appears.

- Select the required upload request type from the respective field.
- Click **OK**.

The **Bill Group Derivation and Pricing Parameters Upload Request** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the upload request.
- Characteristics** – Used to define the characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the bill group derivation and pricing parameters upload request will be created.	Not applicable
Parent Customer	Used to indicate the person for whom you want to create the bill group derivation and pricing parameters upload request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>By default, the parent customer's ID appears in this field. You can change the person, if required.</p> <p>The system allows you to create a bill group derivation and pricing parameters upload request for a person whose person type is set to <b>Parent Customer</b>.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p>	
File Name	<p>Used to specify the name and path of the file that you want to upload.</p> <p><b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the file is available in the system.</p>	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

- Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

- Browse to the location where the file that you want to upload is available in the system.

- Click **Open**.

The file name along with the path appears in the **File Name** field.

- Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.

- Define characteristics for the upload request, if required.

- Click **Save**.

A message appears indicating the number of records which are successfully uploaded. Then, a bill group derivation and pricing parameters upload request is created in the **Draft** status. If the bill group ID is available in the record, the status of the record is set to **Pending**. However, if the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination when the bill group ID is not specified in the record, the status of the record is set to **Invalid**.

## Renewing a Self-Funded Policy of a Bill Group

Oracle Revenue Management and Billing enables you to renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy when it is in the **In Force/Active** status and is not yet renewed. For more information, see [Self-Funded Policy Renewal](#) on page 456.

### Procedure

To renew a self-funded policy of a bill group:

1. Search for the bill group who is associated with the self-funded policy (which you want to renew) in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the bill group whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears.

4. In the **Bill Group Self-Funded Policy Information** zone, click the **Renew** () icon in the **Renew** column corresponding to the self-funded policy which you want to renew.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the renewed policy.
- **Persons** - Used to associate or disassociate persons from the renewed policy.

**Note:** You cannot disassociate persons who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration.

- **Characteristics** - Used to define the characteristics for the renewed policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Base Policy Information	Indicates the policy which you want to renew.	Not applicable
Policy Type	Indicates the policy type using which the base policy is created.	Not applicable
Policy Number	Used to specify the policy number of the renewed policy.	Yes
Description	Used to specify the description for the renewed policy.	Yes
Start Date	Used to specify the date from when the renewed policy is effective.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>By default, the start date is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than or equal to the base policy's end date.</p>	
End Date	<p>Used to specify the date till when the renewed policy is effective.</p> <p><b>Note:</b> The end date cannot be earlier than the start date.</p>	Yes
Runout End Date	<p>Used to specify the date when the runout period of the renewed policy ends.</p> <p><b>Note:</b> The runout end date cannot be earlier than or equal to the renewed policy's end date.</p>	No
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <p><b>Note:</b> At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p>	No
Copy Pricing Rules	<p>Used to indicate whether you want to copy the pricing rules of the base policy to the renewed policy. If you select the <b>Copy Pricing Rules</b> option, the system copies the following pricing rules of the base policy:</p>	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• Claim</li> <li>• Retention Type Claim Based</li> <li>• Retention Type Enrollment Based</li> <li>• Recurring Flat Fees</li> <li>• Ancillary</li> </ul> <p><b>Note:</b> While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively.</p> <p>If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.</p>	
Copy Advance Level Funding Eligibility	<p>Used to indicate whether you want to copy the advance level funding eligibility value of the base policy to the renewed policy.</p> <p><b>Note:</b> If the <b>Copy Advance Level Funding Eligibility</b> option is set to <b>Y</b> in the base policy, the system activates the renewed self-funded policy on the policy renewal even if the renewed policy's start date is later than the system date.</p> <p>This field appears only when you want to renew a self-funded policy.</p>	No

**Note:** The **Renew** icon appears when the policy is in the **In Force/Active** status and it is not yet renewed.

5. Enter the required details in the **Main** section.
6. Associate or disassociate persons from the renewed policy, if required.
7. Define, edit, or remove characteristics of the renewed policy, if required.
8. Click **Save**.

The renewed policy is created in the **Pending** status. The renewal date is stamped corresponding to the base policy in the **Bill Group Self-Funded Policy Information** zone.

## Viewing the Bill Details

### Procedure

To view the details of a bill:

1. Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.  
The **Account** tab appears in the **Customer 360° Information** screen.
3. In the **Open Bills** zone, click the **View** () icon corresponding to the bill whose details you want to view.  
The **Bill Information** screen appears.
4. View the basic details of the bill in the **Bill Information** zone.
5. View the adjustments which are swept onto the bill in the **Adjustments** zone.
6. View the activities, such as payment, transfer, offset, refund, or write off through which the bill is settled, in the **Settlement Activities** zone.
7. View the bill segment information, which is summarized based on the date range and price item combination, in the **Bill Segment Summary** zone.
8. View the details of the bill segments in the **Bill Segment Details** zone.
9. View the SQ details of the bill segment in the **SQ Details** zone.
10. View the calculation lines of the bill segment in the **Bill Segment Calculation Lines** zone.
11. View the transactions whose charges are billed through the bill segment in the **Transaction Details** zone.
12. View the calculation lines of all transaction legs (which are rated before billing) in the **Transaction Leg Calculation Lines** zone.
13. View the active hold requests due to which the bill is kept on hold in the **Hold Details** zone.
14. View the offset requests through which the bill is offset against another bill in the **Offset Details** zone.
15. View the refund and write off requests through which the bill or its bill segment is either refunded or written off in the **Refund and Write Off Details** zone.

## Viewing the Pricing Rules Defined for a Fully-Insured Group Policy Plan

### Procedure

To view the pricing rules defined for a fully-insured group policy plan:

1. Search for the fully-insured group policy in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the policy whose details you want to view.

The **Policy** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears.

**Note:**

By default, the **Fully-Insured Pricing Rules** zone lists the pricing rules which are defined for the following entities:

- Parent customer of the fully-insured group policy
- Fully-insured group policy
- Fully-insured group policy plans
- States where the fully-insured group policy and its policy plans and memberships are issued

4. Select the **Plan** option from the **Pricing Level** list in the **Fully-Insured Pricing Rules** zone.
5. Click **Search**.

The pricing rules (if any) defined for the policy plans of the fully-insured group policy are listed in the **Fully-Insured Pricing Rules** zone.

## Bill Information

The **Bill Information** screen allows you to view:

- Basic details of the bill
- Adjustments which are swept onto the bill
- Activities, such as payment, offset, refund, write off, or transfer through which the bill is settled

- High-level summary and details of the bill segments which are included in the bill
- Active hold requests due to which the bill is kept on hold
- Offset requests through which the bill is offset against another bill
- Refund and write off requests through which the bill or its bill segment is either refunded or written off

It contains the following zones:

- [Bill Information](#) on page 815
- [Adjustments](#) on page 816
- [Settlement Activities](#) on page 816
- [Bill Segment Summary](#) on page 817
- [Bill Segment Details](#) on page 817
- [SQ Details](#) on page 819
- [Bill Segment Calculation Lines](#) on page 819
- [Transaction Details](#) on page 820
- [Transaction Leg Calculation Lines](#) on page 821
- [Hold Details](#) on page 768
- [Offset Details](#) on page 823
- [Refund and Write Off Details](#) on page 823

## Bill Information

The **Bill Information** zone displays the details of the bill. It contains the following section:

- **Main** - Displays the basic information about the bill. It contains the following fields:

Field Name	Field Description
Bill Information	<p>Displays information about the bill. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p>
Alternate Bill ID	<p>Displays the alternate bill ID.</p> <p><b>Note:</b> This field appears only when the respective data is available for the bill.</p>
Account Information	<p>Indicates the account for which the bill is generated. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>

## Adjustments

The **Adjustments** zone lists the adjustments which are swept onto the bill. It contains the following columns:

Column Name	Column Description
Adjustment Information	Displays information about the adjustment.
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.
Contract Information	Indicates the contract against which the adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

## Settlement Activities

You may settle a bill or its bill segment by making a payment, offsetting, refunding, writing off, or by reconciling against pay instructions. The **Settlement Activities** zone lists the activities related to the bill or its bill segment settlement. It contains the following columns:

Column Name	Column Description
Activity Date	Displays the date when the settlement activity was performed in the system.
Activity Type	Indicates the type of the settlement activity. The valid values are: <ul style="list-style-type: none"> <li>• Payment</li> <li>• Offset</li> <li>• Refund</li> <li>• Write Off</li> <li>• Transfer</li> </ul>
Amount	Indicates the amount settled through the activity.
Related Object Information	Displays additional information about the settlement activity.
Related Object ID	Indicates the payment, offset request, refund request, write off request, or reconciliation adjustment which is created during settlement.
	<b>Note:</b> It has a link. On clicking the link, the <b>Payment, Offset Request, Refund Request, Write Off Request, or Adjustment</b> screen appears where you can view the details of the respective activity.

## Bill Segment Summary

The system groups the bill segments with the same date range and price item combination and then provides the summarized information for each combination in the **Bill Segment Summary** zone. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segments.
End Date	Displays the end date of the bill segments.
Policy Number	Indicates the policy for which the bill segments are generated.
Price Item Description	Indicates the price item for which the bill segments are generated.
Amount	Displays the sum of the bill segment amount.
Unpaid Amount	Displays the sum of the unpaid amount of the bill segments.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Bill Segment Details

The **Bill Segment Details** zone displays the details of the bill segments which are included in the bill. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segment.
End Date	Displays the end date of the bill segment.
Policy Number	Indicates the policy for which the bill segment is generated.
Price Item Description	Displays the description of the price item.
Price Item	Indicates the price item for which the bill segment is generated.
Status	Indicates the status of the bill segment. The valid values are: <ul style="list-style-type: none"> <li>• Incomplete</li> <li>• Error</li> <li>• Freezable</li> <li>• Pending Cancel</li> <li>• Frozen</li> <li>• Canceled</li> </ul>
Amount	Displays the bill segment amount.
Billable Charge ID	Indicates the billable charge for which the bill segment is generated.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Billable Charge</b> screen appears where you can view the details of the respective billable charge.
Unpaid Amount	Displays the unpaid amount of the bill segment.
Price Item Parameters	Displays the concatenated string consisting of a list of parameters and their values based on which the price item pricing is defined.
External Membership ID	Indicates the membership for which the bill segment is generated.
Member's Primary Identifier	Displays the concatenated string consisting of member's primary identifier type and its value which are separated by a colon (:).
Member Name	Indicates the member for whom the bill segment is generated.
Plan Information	Indicates the plan to which the membership belongs. <b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Auto Pay ID	Indicates the auto pay instruction through the automatic payment is created for the bill segment. <b>Note:</b> It has a link. On clicking the link, the <b>Auto Pay Instruction</b> screen appears where you can view the details of the respective auto pay instruction.
Bill Segment ID	Displays the bill segment ID. <b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **View** () icon corresponding to a bill segment, the **Bill Segment** screen appears where you can view the additional details of the respective bill segment.

On clicking the **Broadcast** () icon corresponding to a bill segment, the **SQ Details**, **Bill Segment Calculation Lines**, and **Transaction Details** zones appear.

**Note:**

The **SQ Details** zone appears when the bill segment is generated for an SQI based billable charge.

The **Transaction Details** zone appears only when the bill segment is generated for a billable charge which is created through the transaction aggregation process.

You can filter the list using various search criteria (such as, **Start Date** and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

## **SQ Details**

The **SQ Details** zone lists the service quantity identifiers (SQIs) used in the bill segment calculation. It appears when the bill segment is generated for an SQI based billable charge. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
SQI	Indicates the service quantity identifier.
Billed Service Quantity	Displays the service quantity used by the rates engine for calculation. This amount differs from the initial service quantity when the rate's SQ rules manipulate the service quantity.

By default, the **SQ Details** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a bill segment in the **Bill Segment Details** zone.

## **Bill Segment Calculation Lines**

The **Bill Segment Calculation Lines** zone lists the calculation lines of the bill segment. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Header Sequence	Indicates the sequence in which the calculation line is generated.
Sequence	Ideally, the sequence would be 1 unless multiple versions of the rate were effective during the bill period. If there is more than one effective rate version, there will be a separate set of calculation lines for each version applied. The lines that apply to the first part of the bill period would have a Sequence of 1, the lines for the next part of the bill period would have a Sequence of 2 and so on.
Description on Bill	Displays the summarized information about the charge that will be printed on the bill.
Amount	Displays the charge amount.
Distribution Code	Displays the distribution code which indicates the GL account to which the charge must be posted.

Column Name	Column Description
Service Quantity	Indicates the service quantity which is used for calculation.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Segment Calculation Lines** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a bill segment in the **Bill Segment Details** zone.

## Transaction Details

The **Transaction Details** zone lists the transactions whose charges are billed through the bill segment. It contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears where you can view the details of the respective transaction.
Transaction Date	Displays the date and time when the transaction was performed.
Transaction Volume	Displays the transaction volume.
Transaction Amount	Displays the transaction amount.
Transaction Currency	Displays the currency in which the transaction was performed.
Transaction Source	Displays the transaction source from where the transaction was received.
Transaction Record Type	Displays the record type of the transaction.
Initial Price Item	Indicates the price item to which the transaction is mapped.
Rule	Indicates the rule which was met while determining initial price item for the transaction. <b>Note:</b> It has a link. On clicking the link, the <b>Rule</b> screen appears where you can view the details of the respective rule.
Transaction Information	Displays information about the transaction. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears where you can view the details of the respective transaction.

By default, the **Transaction Details** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a bill segment in the **Bill Segment Details** zone.

On clicking the **Broadcast** (📢) icon corresponding to a transaction, the **Transaction Leg Calculation Lines** zone appears with the details of the respective transaction.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
How to view the calculation lines of all legs of a transaction	<a href="#">Viewing the Calculation Lines of All Legs of a Transaction</a> on page 826

## **Transaction Leg Calculation Lines**

The **Transaction Leg Calculation Lines** zone lists the calculation lines of all legs of the transaction which are rated before billing. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Transaction Calculation ID	Displays the transaction calculation ID.
Sequence	Indicates the sequence in which the calculation line was created. It is the sequence of the rate component which is used in the rate schedule.
Price Component ID	Indicates the price component which is used during calculation.
Rate	Indicates the rate which is used for the calculation.
SQI	Indicates the service quantity identifier (SQI) which is used in the calculation.
Billable Service Quantity	Indicates the service quantities used by the rates engine for calculation.
Calculated Amount	Displays the calculated charge amount which is rounded off (i.e. amount in precision). For example, 100. This amount appears in the invoice currency.
Precise Calculated Amount	Displays the calculated charge amount which is not rounded off (i.e. amount with precision and scale). For example, 98.67. This amount appears in the invoice currency.
Exempt Amount	Displays the amount of the calculated charge that the person does not have to pay due to tax exemption.
Base Amount	Displays the total amount derived from the cross-referenced line(s) that the current line then used to calculate the charge amount.
Pricing Amount	Displays the calculated charge amount which is not rounded off (i.e. amount with precision and scale). For example, 98.67. This amount appears in the pricing currency.
Exchange Rate	Indicates the exchange rate which is used when the invoice currency is different from the pricing currency.
Print	Indicates whether information about the calculation line must be printed on the person's bill. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"> <li>N</li> </ul>
Description on Bill	Displays the summarized information about the charge that will be printed on the bill.
Distribution Code	Displays the distribution code which indicates the GL account to which the charge must be posted.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Aggregation Parameter Group ID	Indicates the aggregation parameter group using which the transaction legs are aggregated during calculation.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Transaction Leg Calculation Lines** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a transaction in the **Transaction Details** zone.

## Hold Details

The **Hold Details** zone lists the active hold requests due to which the bills of the respective account are kept on hold. It contains the following columns:

Column Name	Column Description
Hold Request Information	Displays information about the hold request.  <b>Note:</b> It has a link. On clicking the link, the <b>Hold Request</b> screen appears where you can view the details of the respective hold request.
Status	Indicates the status of the hold request. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Approval in Progress</li> <li>Deferred Processing</li> <li>Draft</li> <li>Rejected</li> <li>Released</li> </ul>
Entity	Indicates the type of the entity for which the hold request is created in the system. The valid value is: <ul style="list-style-type: none"> <li>Account</li> </ul>
Hold Reason	Displays the reason for which the hold request is created for the account.
Hold Process	Indicates the process that is kept on hold for the account.
Start Date	Displays the date from when the hold request is effective for the account.

Column Name	Column Description
End Date	Displays the date till when the hold request is effective for the account.

## Offset Details

The **Offset Details** zone lists the offset requests through which the bill is offset against another bill. It contains the following columns:

Column Name	Column Description
Offset Request Information	Displays information about the offset request. <b>Note:</b> It has a link. On clicking the link, the <b>Offset Request</b> screen appears where you can view the details of the respective offset request.
Offset Amount	Indicates the bill amount which is offset against another bill.
Creation Mode	Indicates the mode in which the offset request is created. The valid values are: <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Refund and Write Off Details

The **Refund and Write Off Details** zone lists the refund and write off requests through which the bill or its bill segment is either refunded or written off. It contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the refund or write off request is created.
Refund/Write Off Request Information	Displays information about the refund or write off request. <b>Note:</b> It has a link. On clicking the link, the <b>Refund Request</b> or <b>Write Off Request</b> screen appears depending on whether the request is created for refund or write off.
Refund/Write Off Amount	Displays the total refund or write off amount.
Status	Indicates the status of the refund or write off request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Cancelled</li> <li>• Deferred Processing</li> <li>• Draft</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"> <li>• Processed</li> <li>• Rejected</li> <li>• Voided</li> </ul>
Action	Indicates whether the request is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>
Account Information	Indicates the account for which the refund or write off request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Created By	Indicates the user who has created the refund or write off request.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Action** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Viewing the SQ Details of a Bill Segment

### Procedure

To view the SQ details of a bill segment:

1. Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the account whose details you want to view.

The **Account** tab appears in the **Customer 360° Information** screen.

3. In the **Open Bills** zone, click the **View** (🔗) icon corresponding to the bill whose details you want to view.

The **Bill Information** screen appears.

4. In the **Bill Segment Details** zone, click the **Broadcast** (📡) icon corresponding to the bill segment whose details you want to view.

The **SQ Details**, **Bill Segment Calculation Lines**, and **Transaction Details** zones appear.

### Note:

The **SQ Details** zone appears when the bill segment is generated for an SQI based billable charge.

The **Transaction Details** zone appears when the bill segment is generated for a billable charge which is created through the transaction aggregation process.

- View the SQ details of the bill segment in the **SQ Details** zone.

# Chapter 9

---

## Health Product 360° View

---

### Topics:

- [Prerequisites](#)
- [Health Product 360° View \(Used for Searching\)](#)
- [Health Product 360° Information \(Used for Viewing\)](#)
- [Health Plan 360° Information \(Used for Viewing\)](#)

Until now, you were able to add and edit the health products and health plans through a health product and plan inbound message. But, you were not able to view the details of a health product and health plan from the user interface. Now, Oracle Revenue Management and Billing provides the ability to view the details of a health product and health plan from the user interface. A new screen named **Health Product 360° View** is introduced in this release. It enables you to search for a health product or health plan using the respective details. You can navigate to the **Health Product 360° View** screen from the **Pricing Management** menu. Through the **Health Product 360° View** screen, you can navigate to the following new screens:

- **Health Product 360° Information** – Enables you to view the details of the health product including its characteristics and health plans.
- **Health Plan 360° Information** – Enables you to view the details of the health plan including its characteristics and pricing rules.

## Prerequisites

To setup the **Health Product 360° View** feature, you need to do the following:

- Define the required characteristic types where the characteristic entity is set to **Health Product**
- Define the required characteristic types where the characteristic entity is set to **Health Plan**
- Define the values for the **PRODUCT\_HC\_CAT\_FLG** lookup field
- Define the values for the **PRODUCT\_LOB\_FLG** lookup field
- Define the values for the **PRODUCT\_TYPE\_FLG** lookup field
- Define the values for the **PRODUCT\_LOB\_CAT\_FLG** lookup field
- Define the values for the **PRODUCT\_SUB\_TYPE\_FLG** lookup field

## Health Product 360° View (Used for Searching)

The **Health Product 360° View** screen allows you to search for a health product and health plan using various search criteria. It contains the following zone:

- [360° Search](#) on page 830

Through this screen, you can navigate to the following screen:

- [Health Product 360° Information \(Used for Viewing\)](#) on page 848

## 360° Search

The **360° Search** zone allows you to search for a health product and health plan using various search criteria. It contains the following section:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a health product or a health plan. The valid values are: <ul style="list-style-type: none"> <li>• Health Product Details</li> <li>• Health Plan Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Health Product Details</b> option is selected.	

Field Name	Field Description	Mandatory (Yes or No)						
Description	<p>You can use this field for the following search parameters:</p> <table border="1" data-bbox="691 296 1060 1583"> <thead> <tr> <th data-bbox="691 296 878 443">If the field is used for...</th> <th data-bbox="878 296 1060 443">Then the purpose of Description is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="691 443 878 1045">Health Product Details</td> <td data-bbox="878 443 1060 1045"> <p>Used to search health products which are created using a particular description.</p> <div data-bbox="883 688 1055 1031" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.</p> </div> </td> </tr> <tr> <td data-bbox="691 1045 878 1583">Health Plan Details</td> <td data-bbox="878 1045 1060 1583"> <p>Used to search health plans which are created using a particular description.</p> <div data-bbox="883 1268 1055 1577" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.</p> </div> </td> </tr> </tbody> </table>	If the field is used for... 	If the field is used for...	Then the purpose of Characteristic Value is...	
		<p><b>Note:</b></p> <p>This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	
Health Plan	<p>Used to search health plans with a particular name.</p> <p><b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.</p>	No	
Add On Plan	<p>Used to search health plans which are defined as an add-on health plan.</p> <p><b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.</p>	No	
Ancillary Benefits	<p>Used to search health plans which provide ancillary benefits.</p> <p><b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.</p>	No	

Field Name	Field Description	Mandatory (Yes or No)
Charitable Plan	Used to search health plans which provide subsidized health insurance coverage.	No
	<b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.	
Grandfather Plan	Used to search health plans which are defined as grandfathered health plan.	No
	<b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.	
Rider Benefits	Used to search health plans which provide rider benefits.	No
	<b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.	
ACA Qualified	Used to search health plans which provide Affordable Care Act (ACA) qualified health insurance coverage.	No
	<b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.	
Product Sub Type	Used to search health plans with medical accounts that are linked to the health product.	No
	<b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.	
Product Category	Used to search health plans which are associated with a particular product category.	No
	<b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.	
Product LOB	Used to search health plans which are associated with a particular product's line of business.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.	
Status	Used to search health plans with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.	

**Note:** You must specify at least one search criterion while searching for a health product or health plan.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description						
Health Product	Displays information about the health product. <b>Note:</b> It has a link. On clicking the link, the <b>Health Product 360° Information</b> screen appears where you can view the details of the respective health product. This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.						
Description	Displays information based on the following search parameter:						
	<table border="1"> <thead> <tr> <th>If the search is performed for...</th> <th>Then the purpose of Description is...</th> </tr> </thead> <tbody> <tr> <td>Health Product Details</td> <td>Displays the description of the health product.                              <b>Note:</b> This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.                         </td> </tr> <tr> <td>Health Plan Details</td> <td>Displays the description of the health plan.</td> </tr> </tbody> </table>	If the search is performed for...	Then the purpose of Description is...	Health Product Details	Displays the description of the health product. <b>Note:</b> This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.	Health Plan Details	Displays the description of the health plan.
	If the search is performed for...	Then the purpose of Description is...					
Health Product Details	Displays the description of the health product. <b>Note:</b> This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.						
Health Plan Details	Displays the description of the health plan.						

Column Name	Column Description	
	<b>If the search is performed for...</b>	<b>Then the purpose of Description is...</b>  <b>Note:</b> This column appears when the <b>Health Plan Details</b> option is selected from the <b>Search By</b> list.
Product Type	Indicates how the health product can be classified based on the provider network.  <b>Note:</b> This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.	
Product Healthcare Category	Indicates the health care category to which the health product belongs.  <b>Note:</b> This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.	
Product LOB	Indicates the line of business to which the health product belongs.  <b>Note:</b> It has a link. On clicking the link, the <b>Health Product 360° Information</b> screen appears where you can view the details of the respective health product. This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.	
Product LOB Category	Indicates the product line of business category.  <b>Note:</b> This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.	
Status	Indicates the status of the health product. The valid legends are: <ul style="list-style-type: none"> <li>•  - Indicates the status of the health product as <b>Active</b>.</li> <li>•  - Indicates the status of the health product as <b>Inactive</b>.</li> </ul> <b>Note:</b> This column appears when the <b>Health Product Details</b> option is selected from the <b>Search By</b> list.	
Health Plan	Displays information about the health plan.	

Column Name	Column Description						
	<p><b>Note:</b></p> <p>It has a link. How to search for a health product	<a href="#">Searching for a Health Product</a> on page 845
How to search for a health plan	<a href="#">Searching for a Health Plan</a> on page 846
How to view the 360° information of a health product	<a href="#">Viewing the Details of a Health Product</a> on page 847
How to view the 360° information of a health plan	<a href="#">Viewing the Details of a Health Plan</a> on page 848

## Searching for a Health Product

### Prerequisites

To search for a health product, you should have:

- Values defined for the **PRODUCT\_TYPE\_FLG** lookup.
- Values defined for the **PRODUCT\_HC\_CAT\_FLG** lookup.

- Values defined for the **PRODUCT\_LOB\_FLG** lookup.
- Characteristic types defined in the application (where the characteristic entity is set to **Health Product**)

### **Procedure**

To search for a health product:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Pricing Management** and then click **Health Product 360° View**.  
The **Health Product 360° View** screen appears.
3. Select the **Health Product Details** option from the **Search By** list to indicate that you want to search for a health product.
4. Enter the required search criteria in the **360° Search** zone.

#### **Note:**

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

You must specify at least one search criterion while searching for a health product.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of health products that meet the search criteria appears in the **Search Results** section.

## **Searching for a Health Plan**

### **Prerequisites**

To search for a health plan, you should have:

- Values defined for the **PRODUCT\_SUB\_TYPE\_FLG** lookup.
- Values defined for the **PRODUCT\_HC\_CAT\_FLG** lookup.
- Values defined for the **PRODUCT\_LOB\_FLG** lookup.
- Characteristic types defined in the application (where the characteristic entity is set to **Health Plan**)

### **Procedure**

To search for a health plan:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, click **Pricing Management** and then click **Health Product 360° View..**

The **Health Product 360° View** screen appears.

- Select the **Health Plan Details** option from the **Search By** list to indicate that you want to search for a health plan.
- Enter the required search criteria in the **360° Search** zone.

**Note:**

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

You must specify at least one search criterion while searching for a health plan.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- Click **Search**.

A list of health plans that meet the search criteria appears in the **Search Results** section.

## Viewing the Details of a Health Product

**Procedure**

To view the details of a health product:

- Search for the health product in the **Health Product 360° View** screen.
- In the **Search Results** section, click the link in the **Health Product** column whose *details* you want to view.  
The **Health Product 360° Information** screen appears.
- View the details of the health product in the **Product Information** zone.

How to view 360° information of the health product	<a href="#">Viewing the Details of a Health Product</a> on page 847

## Product Information

The **Product Information** zone displays the details of the health product. It contains the following fields:

Field Name	Field Description
Health Product	Displays information about the health product. In addition, a legend appears corresponding to this field which indicates the status of the health product.

Field Name	Field Description
	<b>Note:</b> <ul style="list-style-type: none"> <li>● - Indicates that the health product is <b>Active</b>.</li> <li>● - Indicates that the health product is <b>Inactive</b>.</li> </ul>
Product Health Category	Indicates the health care category to which the health product belongs.
Product Type	Indicates how the health product can be classified based on the provider network.
Product Sub Type	Indicates the type of medical accounts that are linked to the health product.
Start Date	Displays the date from when the health product is effective.
End Date	Displays the date till when the health product is effective.
Product LOB	Indicates the line of business to which the health product belongs.
Product LOB Category	Indicates the line of business category to which the health product belongs.
Product Administration	Displays the name of the agency which administers the health product.
Bundled Product Flag	Indicates whether the health product is a bundled product.
Bundled Products	Displays the health products which are included in the bundled product.

## Product Characteristics

The **Product Characteristics** zone lists the characteristics of the health product. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the health product.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.  <b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

## Health Plans

The **Health Plans** zone displays the details of the health plan. It contains the following columns:

Column Name	Column Description
Health Plan	<p>Displays information about the health plan.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Health Plan 360° Information</b> screen appears where you can view the details of the health plan.</p>
Description	Displays the description of the health plan.
Add-On Plan	Indicates whether the health plan is an add-on health plan.
Start Date	Displays the date from when the health plan is effective.
End Date	Displays the date till when the health plan is effective.
Status	<p>Indicates the status of the health plan. The valid legends are:</p> <ul style="list-style-type: none"> <li>● - Indicates the status of the health product as <b>Active</b>.</li> <li>● - Indicates the status of the health product as <b>Inactive</b>.</li> </ul>

You can filter the list using various search criteria (such as **Plan Description** and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

## Health Plan 360° Information (Used for Viewing)

The **Health Product 360° Information** screen allows you to:

- View the details of the health product and health plan.
- View the characteristics of the health plan.
- View the pricing rules associated with the health plan.

It contains the following zones:

- [Plan Information](#) on page 851
- [Product Information](#) on page 848
- [Plan Characteristics](#) on page 852
- [Pricing Rules](#) on page 852

### Related Topics

## Plan Information

The **Plan Information** zone displays the details of the health plan. It contains the following fields:

Field Name	Field Description
Health Plan	<p>Displays information about the health plan. In addition, a legend appears corresponding to this field which indicates the status of the health plan.</p> <p><b>Note:</b></p> <ul style="list-style-type: none"> <li>● - Indicates that the health plan is <b>Active</b>.</li> <li>● - Indicates that the health plan is <b>Inactive</b>.</li> </ul>
Add-On Plan	indicate whether the health plan is an add-on health plan.
Start date	Displays the date from when the health plan is effective.
End Date	Displays the date till when the health plan is effective.
Charitable Plan	Indicates whether the health plan provides subsidized health insurance coverage.
Standard Plan	Indicates the standard plan in the health plan.
ACA Qualified	Indicates whether the health plan provides standard health insurance coverage.
Grandfather Plan	Indicates whether the health plan is a grandfathered health plan.
Ancillary Benefits	Indicates whether the health plan provides ancillary benefits.
Rider Benefits	Indicates whether the health plan provides rider benefits.

## Product Information

The **Product Information** zone displays the details of the health product. It contains the following fields:

Field Name	Field Description
Health Product	<p>Displays information about the health product. In addition, a legend appears corresponding to this field which indicates the status of the health product.</p> <p><b>Note:</b></p> <ul style="list-style-type: none"> <li>● - Indicates that the health product is <b>Active</b>.</li> <li>● - Indicates that the health product is <b>Inactive</b>.</li> </ul>
Product Health Category	Indicates the health care category to which the health product belongs.
Product Type	Indicates how the health product can be classified based on the provider network.

Field Name	Field Description
Product Sub Type	Indicates the type of medical accounts that are linked to the health product.
Start Date	Displays the date from when the health product is effective.
End Date	Displays the date till when the health product is effective.
Product LOB	Indicates the line of business to which the health product belongs.
Product LOB Category	Indicates the line of business category to which the health product belongs.
Product Administration	Displays the name of the agency which administers the health product.
Bundled Product Flag	Indicates whether the health product is a bundled product.
Bundled Products	Displays the health products which are included in the bundled product.

## Plan Characteristics

The **Plan Characteristics** zone lists the characteristics of the health plan. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the health plan.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

### Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

## Pricing Rules

The **Pricing Rules** zone lists the pricing rules of the health plan. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays the price item or price item bundle code.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Pricing Rule Type Information	Displays the pricing rule type using which the pricing rule is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the pricing rule type.
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Eligibility Parameters	On Clicking the <b>Eligibility Parameters</b> (●) icon, the <b>Eligibility Parameters</b> screen appears where you can view the eligible parameters of the pricing rule.
Rate Information	On Clicking the <b>Rate Information</b> (📄) icon, the <b>Rate Information</b> screen appears where you can view the rate information details of a pricing rule.
Status	Indicates the status of the pricing rule. The valid legends are: <ul style="list-style-type: none"> <li>● - Indicates that the pricing rule is <b>Active</b>.</li> <li>● - Indicates that the pricing rule is <b>Inactive</b>.</li> </ul>

**Note:**

You can view the 360° information of the pricing rule, by clicking the **View** (🔗) icon corresponding to the record in the **Pricing Rule** zone.

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Status**, **Price Item**, **Start Date**, **End Date** and **Pricing Information**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Pricing Management (Health Insurance Business)

---

### Topics:

- [Prerequisites \(Health Insurance Business\)](#)
- [Pricing Methodologies and Pricing Variation Based on Parameters \(Health Insurance Business\)](#)
- [Parameter](#)
- [Price Item \(Health Insurance Business\)](#)
- [Price List](#)
- [Rate Definition](#)
- [Tiering Criterion](#)

Oracle Revenue Management and Billing allows you to define prices for premiums, various fees, credits, discounts, and taxes that are defined as price items. Price for the price item may vary based on various attributes, which are defined as parameters in the system. Parameter values are derived either from transaction attributes (for example, for calculating claim based fees for a self-funded customer, pricing may vary based on claim transaction's health coverage class) or based on a field or characteristic of entities (for example, for calculating premium, pricing may vary based on member person's characteristic; whether a smoker or non-smoker). The system also supports deriving the pricing parameter through an algorithm, thereby enabling the custom derivation based on requirements.

Based on the line of business and the type of charge, you can define standard pricing which is common for multiple customers (for example, pricing defined for a health plan is applicable for all the subscribers subscribing to the health plan) or customer-specific pricing (for example, for fully-insured group customer, the pricing is specific to the group and you can define the policy plan level pricing in the system to achieve this. For more information about the fully-insured pricing, see [Fully-Insured Pricing](#) on page 3427.

The system enables you to define pricing at various levels in a customer hierarchy (for example, for a self-funded group customer, the pricing can be defined at the bill group level as well as at the parent customer level). If pricing is defined at multiple levels for a customer, the precedence is given to the pricing based on the level while searching for the pricing. For example, if pricing is defined for a price item at the bill group level as well as the parent customer level, the bill group level pricing takes precedence over the parent customer level pricing. Also, the parent customer level pricing is inherited by all the bill groups.

The pricing is triggered based on the transactions to calculate various charges or credit amounts eligible for a transaction. For example, for a self-funded customer, claim amounts with additional fees and markups, claim based fees, stop loss is calculated for claim transactions, enrollment based retention fees are calculated based on enrollment transactions, and ancillary fees are calculated based on ancillary transactions. For more information about the self-funded pricing, see [Self-Funded Pricing](#) on page 2789.

**Transaction Based Pricing** is invoked using the **Transaction Feed Management** module which processes different types of transactions (for example, claim, capitation, ancillary, enrollment, etc.) using the configurable validation and mapping rules to invoke the eligible pricing rules. For more information about the transaction feed management, see [Transaction Feed Management](#) on page 1291.

Pricing can also be triggered **based on qualifying life events** (for example, premium is calculated when a new membership is added, or a new member

is added to an existing membership, or every time the plan pricing is revised, etc.). The entity audit framework enables you to define various events for which pricing should be revised. For example, **addition of a new membership, addition of a new member, updates to the plan pricing, or the membership attributes which you want to monitor for premium change, etc.** The system enables you to define the algorithms to price the eligible events by invoking pricing rules. For more information about the entity audit framework, see [Entity Audit](#) on page 3747.

## Prerequisites (Health Insurance Business)

---

To setup the pricing management feature, you need to do the following:

- Define the required SQIs and divisions in the system.
- Define the required parameters in the system.
- Define the tiering setup for rate components in the system.
- Define the required price items in the system.

## Pricing Methodologies and Pricing Variation Based on Parameters (Health Insurance Business)

---

The specialized pricing methodologies are required for pricing the fully-insured and self-funded customers. Therefore, an out of box pricing solution is provided to the fully-insured and self-funded customers through distinct pricing rule types.

### Fully-Insured Pricing

#### Age Banded Premium Pricing

Age banded premium pricing is one of the methodologies for premium calculation. In this methodology, Premium calculation is done **by determining the premium of each member separately mainly based on the age band in which the member falls, and then aggregating** these to derive the overall premium amount for a membership.

Apart from member's age, premium of age banded plans can vary based upon **different parameters; be it member's attribute or plan level attribute or LOB specific attributes**. For example, pricing can vary by different population segment characteristics such as Employee Type (Retiree, COBRA and Active) and/or by different regions, Employee Status (Permanent/contractual) etc. Age-banded pricing may also vary by different modifiers such as Tobacco usage, Gender etc.

ORMB provides Out of Box Pricing Rule Type 'Age Banded'. Using the same you can define pricing rule to define age-banded plan pricing. Pricing variation can be defined based on the pricing eligibility parameters where the source can be defined as Membership characteristics or Member characteristics or Plan characteristics. User can set **base fee** for set of parameters and can also set the **percentage or flat amount to be added over the base fee for each modifiers**.

Age-banded premium calculation algorithm which is configured in Age-banded pricing rule type process the premium pricing for each membership, derive the premium amount for each member and then aggregates the amount to derive the overall premium amount for a membership. **Maximum number of eligible dependents and the order of selection of the dependents like oldest first or youngest first is also configurable at Plan or State level.**

#### Age Banded Example:

Demo Corporation has a fully-insured group policy for the employees and its monthly premium is calculated through an age based pricing rule.

The following table lists the base premium for different age groups and locations or rating areas defined in an age based pricing rule:

Age Band	Location/Rating Area	Base Premium
Up to 15 Years	North California	\$200
	South California	\$210
16 to 18 Years	North California	\$210

Age Band	Location/Rating Area	Base Premium
	South California	\$220
18 to 40 Years	North California	\$220
	South California	\$240
40 to 60 Years	North California	\$250
	South California	\$260
60+ Years	North California	\$280
	South California	\$290

On Top of the base premium, additional 2% premium will be charged if the member is smoker

State of California is configured with the following pricing rules :

Max. No of Eligible Dependents = 2

Order of Dependent Selection = Oldest first

New Born Gift Days = 30

Proration Rule Defined for the account : Mid Month i.e. Member joining before 15<sup>th</sup> will be charged the premium for the entire month

Example 1:

North California Based Employee John Doe, a 45 years old smoker who enrolled himself with his spouse Mary Doe (Age 40) and daughter Elsa Doe aged 13, son Bob Doe aged 10 and daughter Laura Doe aged 8.

The following table illustrates how the premium is calculated for different members using an age based pricing rule:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
	Smoker	\$5
Mary Doe	Base Premium	\$250
Elsa Doe	Base Premium	\$200
Bob Doe	Base Premium	\$200
Total Premium		\$905

Example 2 :

North California Based Employee John Doe a California based Employee is enrolled in to the plan along with his spouse Mary Doe, John enrolls his new born daughter Laura born on 3<sup>rd</sup> of July on 20<sup>th</sup> of July.

The following table illustrates how the premium is calculated for different members prior to new born enrollment using an age based pricing rule:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250

Member	Reason	Premium Contribution
Total Premium		\$500

With the new enrollment in the month of July, The premium for July and the following months will be recalculated, As the state of California has New Born Gift days = 30 days, the premium will be calculated as follows:

For the Month of July:

The following table illustrates how the premium is calculated and waived off for the new born using an age based pricing rule:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250
Laura Doe	Base Premium	\$200
	New Born Waiver	-\$200
Total Premium		\$500

For Month of August:

The following table illustrates how the premium is calculated for different members including the new born using an age based pricing rule:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250
Laura Doe	Base Premium	\$200
Total Premium		\$700

### Tiered Premium Pricing

Tiered based premium pricing is another methodology for premium calculation. In this methodology, Premium calculation is done by determining the **subscription tier** level for the membership directly to derive the premium amount for that membership.

Standard tier based pricing structure contains different tiers such as Employee only (E), Employee+ Spouse (ES), Family (F), Employee + Children (EC). A member can subscribe his/her dependents to a plan and fall into one of the tier. Tier-based premium varies based upon **membership tier level and different parameters**; parameters can be member's attribute or Plan level attribute or LOB specific attributes. For example, for a particular tier, pricing can vary by different population segment characteristics such as Employee Type (Retiree, COBRA and Active) and/or by different regions, Employee Status (Permanent/contractual) etc.

Like age-based pricing, tier-based pricing can be defined using pricing rule with tier-based pricing rule type You can set premium fee for set of parameters and tier level. Tier-based premium calculation algorithm which is configured in tier-based pricing rule type process the premium pricing for each membership based on the applicable rate for the parameters and tier value for that membership which is defined as membership characteristic.

### Tier Based Pricing Example

The following table lists the premium for different customer tiers and locations or rating areas defined in a tier based pricing rule:

Tier	Location/Rating Area	Premium
Employee Only	N. California	\$200
	S. California	\$210
Employee + Spouse	N. California	\$300
	S. California	\$310
Family	N. California	\$450
	S. California	\$500

Example : North California Based Employee John Doe, a 45 years old smoker who enrolled himself with his spouse Mary Doe (Age 40) and daughter Elsa Doe aged 13 the premium charged will be \$450 per month.

### State Level Configurations

Various state specific rules are defined in ORMB using state specific characteristics e.g. Gift Days to provide no additional premium when New Born is enrolled into the plan or various rules such as maximum dependents to be covered etc. The state and state characteristics can be defined state specific parameters. These parameters which define business rules may have overridden values at Plan or Membership levels. ORMB pricing calculation always checks for the parameters at membership and plan level first, if not found then the state level parameters are considered for the price calculations.

### Premium Holiday and Proration

ORMB provides several options for correctly handling of proration; when a rate changes in middle of a billing period or when new Membership is added or terminated during the bill period. Configurable Proration Rule allows to define various options such as; mid-month proration where full premium is applicable if the membership starts before mid-coverage or proration based on covered days etc.

A configuration option can be set to handle special cases where proration is not to be applied even during a long or short bill period (e.g. when a flat charge is to be applied in full; even though the billing period is half of the standard period).

ORMB allows configuring or uploading the period for which premium holiday or waive off of premium needs to be given to the membership, based on which the premium is waived off, the rate configurations allow you to provide these details on the bill lines providing the required transparency to the customer.

### Self-funded Pricing

ORMB provides you with a complete solution in terms of pricing, billing and revenue management to support ASO plans and also to provide risk coverage of offering self-funded plans through the stop loss or re-insurance services.

### Claim Amount Processing

ORMB provides capability to calculate the final claim amount to be charged to the customer by summing up all the claim line items configured as billable for the customer. It also provides a facility to mark up or markdown these line items amounts as per customer specific pricing. You can also define the capping amounts per claim.

In order to support new '**Payments Integrity model**' ORMB enables you to define **the additional fees i.e. recovery fees / savings amounts** to be calculated as **flat or percentage based** on the claim charges and charge the same to the customers along with **Max / Min capping amounts**

ORMB allows you to define pricing rules, having different pricing strategy based on policy status e.g. **during the active policy period various chargeable items** like consumer driven health insurance charges, traditional health insurance charges, **are charged to the customer** whereas during **post runout period** the **entire claim amount will be written off**.

To enable easy configurations ORMB provides you a capability to define **claim templates** and with definition of multiple add-on fees and its usage with default pricing. Using a file upload utility or other custom process the claim transactions can be uploaded to ORMB.

Claim transactions contain information about the membership and details of various claim line items such as **ASO service provider charges, fee for network access, fee for non-network access, fee for collection services provided by external vendor, fee for hospital audit performed by external vendor**, and so on.

ORMB allows the ASO service provider to bill employers for claim amount and various additional fees based on the pricing defined. Claim pricing rules can be defined at the parent customer and bill group levels. Claim pricing rule enables you to define whether a particular claim line item should be billable to the customer or should be written off. Eligibility for billing can be defined based on rules using the transaction attributes.

### **Retention fee – Claim based**

**Retention fee is based upon claim amount either the percentage of claim or flat amount per claim** transaction can also be calculated. ORMB provides you an ability to select the Claim line items eligible for claim based fees calculations. Claim based fees pricing can **vary based on either membership attributes or based on the claim transaction attributes** e.g. different claim based fees can be charged for claim with health coverage class as ‘Medical’ than that of the ‘Dental’

### **Retention fee – Enrollment based**

In order to calculate fees / premium amount / various limits (e.g. ASL Limit based on the enrollments), ORMB provides out of box pricing rule type – retention fee – enrollment based. Enrollment based pricing rules can be defined at both customer or bill group level where, enrollment fees are defined as per member or per subscriber charges where **pricing variation can be provided based on parameters e.g. coverage tier or health coverage class(HCC) etc.** It also calculates the retention fee based upon enrollment count.

### **Flat and Recurring Fees**

Ad-hoc one time fees (e.g. one time admin fees), recurring premium fees / charges e.g. charge the stop loss premium can be defined in ORMB using the flat and recurring fees pricing rule type. These types of charges are independent of no. of enrollments or claims and are charged as a flat fee per month over a period of time. ORMB provides flexibility to set up pricing rules for charging flat / one time fees or flat recurring fees with configurable recurring frequencies e.g. claim funds.

### **Ancillary fees**

Ancillary service charges are basically an adjustments charge which are either pre-calculated charges which need to be included into the bill or to be calculated based on the utilization of the ancillary services Ancillary pricing rule can be defined at the parent customer and bill group levels. The ancillary in ORMB enables you to create an ancillary charge in either of the following ways:

- As **pass through charge without markup or markdown** (i.e. flat charge)
- As **pass through charge** where ORMB adds a **flat or percentage based markup or markdown** to charge the customer
- Or by creating a **rate based charge** using the rate defined in the ancillary pricing and the service quantity specified in the ancillary transaction. You can also apply markup or markdown to a rate based charge

### **Specific Stop Loss (SSL)**

SSL is the form of excess risk coverage that provides protection for the **employer against a high claim on any one individual**. ORMB provides a pricing rule type – specific stop loss to support SSL calculations. SSL pricing rules are defined at two levels – parent level defines all the accumulation specific details which are common for all the bill groups and bill group – policy level pricing to define the limits and also **information about which charges are to be re-insured against SSL**. ORMB provides **complete flexibility** to define the **accumulation criteria** e.g. you can choose to calculate SSL only on the medical claims, out of network claim, etc. based on configurations. Ability to calculate and invoice the specific stop loss based on per subscriber or per member basis with a **facility to laser or excludes the subscribers / members**. ORMB’s flexible accumulation criteria definitions allow you to define SSL pricing for various types of policies -12/12 or 15/12 or 12/15 with ease. With ORMB you can choose the settlement frequency for the SSL

ORMB enables you to setup **SSL retrospectively** or **allow pricing updates by reprocessing**

### **Aggregated Stop Loss (ASL)**

ORMB enables you to provide a **ceiling on the dollar amount of eligible expenses** that an employer would pay, **in total for all members or subscribers**, during a contract period. **ASL limit** can be configured as **either flat limit or based on the PSPM (Per subscriber per month) basis or enrollment based**. Similar to SSL, ASL pricing rules **enables to define eligibility rules for the transactions and claim line items** for the calculations of ASL. With ORMB you can choose the settlement frequency for the ASL. ORMB enables you to setup **ASL retrospectively or allow pricing updates by reprocessing**

#### Discount Arrangements Fees

ORMB discount arrangement pricing rule type enables to calculate and bill the discounts using two different methods – i.e: **discount share Fees** where discount amount to be charged to customer is calculated as percentage of the total discount savings amount per claim and **discount guarantee Fees** where discount amount calculated based **on discount savings amount and guaranteed percentage of the covered amount**.

Pricing Rule type allows you to define maximum discount amount that can be charged per claim transaction and/or allow to configure the **minimum and maximum discount limit on the contract level**. It also allows defining the **rule based eligibility criteria to apply discount** and exclude few transactions based upon the parameters.

#### Level Funding Arrangements

ORMB level funding pricing rule type allows defining the required setup for monthly contribution mechanism which can be a **fixed monthly amount** or amount based upon enrollment **count**. ORMB enables you to collect the funds during **active policy period** to settle not only the claims and other fees during active period but also to take care of the **terminal liability** or the **claims and other fees during runout period**. ORMB also provides configurable setup to define the charges to be considered for settlement with specific criteria. ORMB enables to setup pricing rules for level funding products where the **claims, ancillary, retention based fees, discounts** can be settled against the level funded amounts.

ORMB has two variations of level funding based on the method to calculate premium fund. The portal enables you to define whether the price items included in the claim, retention type claim based, retention type enrollment based, ancillary, and discount pricing rule types are eligible for level funding. If the price items are eligible for level funding, you can then include them in the level funding pricing rule type indicating that the charges for these price items will not be included in the respective billable charge (for example, claim billable charge), but it would be settled against the funds billable charge. While adjusting such charges against the funds billable charge, there might be some **surplus or deficit** in funds at the time of settlement which is ideally at the end of year. In such case, the system enables to configure whether **a flat amount or percentage of surplus should be retained** by the ASO provider or whether a flat amount or percentage of deficit is offered as a discount to the self-funded employer. It allows you for different settlement options – **Close out – where the final settlement is done**. In case the customer is continuing for the next cycle with the payer you can provide an option to **Roll Forward the surplus funds to the next years funds**.

#### Level Funding Arrangements

ORMB level funding pricing rule type allows defining the required setup for monthly contribution mechanism which can be a **fixed monthly amount** or amount based upon enrollment **count**. ORMB enables you to collect the funds during **active policy period** to settle not only the claims and other fees during active period but also to take care of the **terminal liability** or the **claims and other fees during runout period**. ORMB also provides configurable setup to define the charges to be considered for settlement with specific criteria. ORMB enables to setup pricing rules for level funding products where the **claims, ancillary, retention based fees, discounts** can be settled against the level funded amounts.

ORMB has two variations of level funding based on the method to calculate premium fund. The portal enables you to define whether the price items included in the claim, retention type claim based, retention type enrollment based, ancillary, and discount pricing rule types are eligible for level funding. If the price items are eligible for level funding, you can then include them in the level funding pricing rule type indicating that the charges for these price items will not be included in the respective billable charge (for example, claim billable charge), but it would be settled against the funds billable charge. While adjusting such charges against the funds billable charge, there might be some **surplus or deficit** in funds at the time of settlement which is ideally at the end of year. In such case, the system enables to configure whether **a flat amount or percentage of surplus should be retained** by the ASO provider or whether a flat amount or percentage of deficit is offered as a discount to the self-funded employer. It allows you for different settlement options – **Close out – where the final settlement is done**. In case the customer is continuing for the next cycle with the payer you can provide an option to **Roll Forward the surplus funds to the next years funds**.

## Parameter

The pricing for a price item may differ depending upon various transaction, person, account, or product attributes. Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. In addition, you can define the pricing, price list, and product eligibility criteria using one or more parameters.

Each parameter must be mapped to the following:

- **Source Entity** - Indicates the entity from where the parameter value is derived. A source entity can be account, person, product, transaction, service quantity identifier, or an algorithm.
- **Source Type** - Indicates the type of source from where the parameter value is derived. A source type can be field, characteristic, usage amount, or usage counter.
- **Source Type Code** - Indicates the source (such as, field, characteristic, usage amount, usage counter, SQL, or algorithm) from where the parameter value is derived.

The system allows you to define the following types of parameters:

- **Adhoc** - Used to store an adhoc value.
- **Predefined** - Used to store a predefined value. For example, you can create a parameter named **Country** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
AUT	Austria
AUS	Australia
CAN	Canada
CHN	China

In such case, while defining the pricing for a price item using the **Country** parameter, you can use any one of the above mentioned parameter values.

Another example, you can create a parameter named **Health Coverage Class** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
MEDICAL	Medical
DENTAL	Dental
VISION	Vision

In such case, while defining the pricing for a price item using the **Health Coverage Class** parameter, you can use any one of the above mentioned parameter values.

- **Reference** - Used to store a value which is already present in a table. For example, you can create a parameter named **Country** where the value type is set to **Reference** and the reference entity is set to **CI\_COUNTRY\_L** (i.e. where the description of all countries is stored). In such case, while defining the pricing for a price item using the **Country** parameter, you can specify a country which is present in the **CI\_COUNTRY\_L** table in the parameter value.

### Parameter (Used for Searching)

The **Parameter** screen allows you to define, view, edit, delete and copy a parameter. It contains the following zone:

- [Search Parameter](#) on page 864

## Search Parameter

The **Search Parameter** zone allows you to search for a parameter using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search a particular parameter.	No
Value Type	Used to search parameters in which a particular type of value is stored. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>	No
Source Entity	Used to search parameters whose value is derived from a particular entity. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Health Plan</li> <li>• Health Product</li> <li>• Membership</li> <li>• Membership Person</li> <li>• Person</li> <li>• Policy Plan</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>	No
Source Type	Used to search parameters whose value is derived from a particular type of source. The valid values are: <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul>	No
Description	Used to search parameters having a particular description.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Parameter	Displays the parameter.
Description	Displays the description of the parameter.
Value Type	Indicates the type of value that you want to store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>
Source Entity	Indicates the entity from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Health Plan</li> <li>• Health Product</li> <li>• Membership</li> <li>• Membership Person</li> <li>• Person</li> <li>• Policy Plan</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>
Source Type	Indicates the type of source from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul>
View	On clicking the <b>View</b> (  ) icon corresponding to a parameter, the <b>Parameter</b> screen appears where you can view the details of the respective parameter.
Edit	On clicking the <b>Edit</b> (  ) icon corresponding to a parameter, the <b>Parameter</b> screen appears where you can edit the details of the parameter.
Delete	On clicking the <b>Delete</b> (  ) icon corresponding to a parameter, you can delete the parameter.

Column Name	Column Description
	<p><b>Note:</b></p> <p>You can delete a parameter when the following conditions are met:</p> <ul style="list-style-type: none"> <li>• It is not yet associated to any price item or price item bundle.</li> <li>• It is not yet used while defining the pricing, price list, or pricing eligibility criteria.</li> </ul>
Copy	<p>On clicking the <b>Copy</b> () icon corresponding to a parameter, the <b>Parameter</b> screen appears where you can define a new parameter using an existing parameter.</p>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### **Searching for a Parameter**

#### **Procedure**

To search for a parameter:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Parameter**.  
The **Parameter** screen appears.
3. Enter the search criteria in the **Search Parameter** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of parameters that meet the search criteria appears in the **Search Results** section.

## Defining a Parameter

### Prerequisites

To define a parameter, you should have:

- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

### Note:

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

### Procedure

To define a parameter:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Parameter**.  
The **Parameter** screen appears.
3. Click the **Add** button available in the **Page Title** area of the **Parameter** screen.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter.	Yes
	<b>Note:</b> You cannot specify any special character except underscore (_) in the parameter name.	
Source Entity	Used to indicate the entity from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Health Plan</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Health Product</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Membership</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Membership Person</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Person</li> <li>• Policy Plan</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Product</li> </ul> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul style="list-style-type: none"> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define the predefined values for the parameter. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Values	Used to specify the value for the parameter.	Yes (Conditional)
	<b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	<b>Note:</b> This field is required while defining the predefined parameter values.
Description	Used to specify the description for the parameter value.	Yes (Conditional)
		<b>Note:</b> This field is required while defining the predefined parameter values.

**Note:**

The **Parameter Values** section appears only when the **Predefined** option is selected from the **Value Type** list.

At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add (+)** icon and then specify the details.

However, if you want to remove a predefined value of the parameter, click the **Delete (🗑)** icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where you want to use the parameter in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)
Price Item	Used to indicate whether the parameter is associated with a price item or price item bundle. If the parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.	Yes (Conditional)
	<b>Note:</b> This option does not appear when the <b>Algorithm</b> , <b>Health Product</b> , or the <b>Service Quantity Identifier</b> option is selected from the <b>Source Entity</b> list.	<b>Note:</b> This option is required while associating the parameter with a price item.
Pricing Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing eligibility criteria.	Yes (Conditional)

Option Name	Option Description	Mandatory (Yes or No)
	<p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> This option is required while defining a pricing eligibility criteria using the parameter.</p>
Pricing Rule Eligibility Criteria	<p>Used to indicate whether the parameter is used for defining a rule based pricing eligibility criteria.</p> <p><b>Note:</b> This option appears only when the <b>Membership</b> or the <b>Membership Person</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This option is required while using the parameter for defining a rule based pricing eligibility criteria.</p>
Business Rule Eligibility Criteria	<p>Used to indicate whether the parameter is used for defining a rule based business eligibility criteria.</p> <p><b>Note:</b> This option appears only when the <b>Health Plan, Health Product, Membership,</b> or the <b>Membership Person</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This option is required while using the parameter for defining a rule based business eligibility criteria.</p>
Price List Eligibility Criteria	<p>Used to indicate whether the parameter is used for defining the price list eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Health Product</b> or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This option is required while defining a price list eligibility criteria using the parameter.</p>
Product Eligibility Criteria	<p>Used to indicate whether the parameter is used for defining the product eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Algorithm, Health Product, Service Quantity Identifier,</b> or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This option is required while defining a product eligibility criteria using the parameter.</p>

Option Name	Option Description	Mandatory (Yes or No)
Rule Eligibility Criteria	Used to indicate whether the parameter is used while defining the parameter based rule type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Health Product</b>, <b>Product</b>, <b>Service Quantity Identifier</b>, or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> This option is required while defining a parameter based rule type.</p>

**Note:** You must select at least one option in the **Parameter Usage** section.

4. Enter the required details in the **Parameter** screen.
5. Click **Save**.

The parameter is defined.

**Note:** If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

### **Editing a Parameter**

#### Prerequisites

To edit a parameter, you should have:

- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

#### **Note:**

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

#### Procedure

To edit a parameter:

1. Search for the parameter in the **Parameter** screen.

2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the parameter whose details you want to edit.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	<p>Displays the parameter.</p> <p><b>Note:</b> You cannot specify any special character except underscore ( _ ) in the parameter name.</p>	Not applicable
Source Entity	<p>Used to indicate the entity from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Health Plan</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Health Product</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Membership</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Membership Person</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Person</li> <li>• Policy Plan</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Product</li> </ul> <p><b>Note:</b> This option is not applicable for the health insurance business.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>	
Description	Used to specify the description for the parameter.	Yes
Source Type	<p>Used to indicate the type of source from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul> <p><b>Note:</b></p> <p>This field appears when the <b>Account, Person, Benefit, Health Plan, Health Product, Membership, Membership Person, Person, Policy Plan, Product</b>, or <b>State</b> option is selected from the <b>Source Entity</b> list.</p> <p>The <b>Usage Amount</b> and <b>Usage Counter</b> options do not appear in the <b>Source Type</b> list when the <b>Benefit, Health Plan, Health Product, Membership, Membership Person, Policy Plan, Product</b>, or <b>State</b> option is selected from the <b>Source Entity</b> list.</p>	Yes
Value Type	<p>Displays the type of value that you want to store in the parameter. The valid values are:</p> <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>	Not applicable
Source Type Code	Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value is derived.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Validation Algorithm	<p>Used to indicate the algorithm using which you want to validate the adhoc parameter value.</p> <p><b>Note:</b> This field appears when the <b>Adhoc</b> option is selected from the <b>Value Type</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Validation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for the required algorithm.</p>	No
Reference Entity	<p>Used to indicate the table whose primary key (column) you want to set as the reference entity.</p> <p><b>Note:</b> This field appears only when the <b>Reference</b> option is selected from the <b>Value Type</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Reference Entity</b> field. On clicking the <b>Search</b> icon, the <b>Reference Table Search</b> window appears where you can search for the required table.</p> <p>You can only specify a language table, where the <b>DESCR</b> column is available, in the <b>Reference Entity</b> field.</p>	Yes
Field Name	<p>Indicates the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.</p> <p><b>Note:</b> This field appears when the <b>Reference</b> option is selected from the <b>Value Type</b> list.</p>	Not applicable

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define the predefined values for the parameter. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Values	Used to specify the value for the parameter.	Yes (Conditional)
	<b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	<b>Note:</b> This field is required while defining the predefined parameter values.
Description	Used to specify the description for the parameter value.	Yes (Conditional)
		<b>Note:</b> This field is required while defining the predefined parameter values.

**Note:**

The **Parameter Values** section appears only when the **Predefined** option is selected from the **Value Type** list.

At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add (+)** icon and then specify the details.

However, if you want to remove a predefined value of the parameter, click the **Delete (🗑)** icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where you want to use the parameter in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)
Price Item	Used to indicate whether the parameter is associated with a price item or price item bundle. If the parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.	Yes (Conditional)
	<b>Note:</b> This option does not appear when the <b>Algorithm</b> , <b>Health Product</b> , or the <b>Service Quantity Identifier</b> option is selected from the <b>Source Entity</b> list.	<b>Note:</b> This option is required while associating the parameter with a price item.
Pricing Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing eligibility criteria.	Yes (Conditional)

Option Name	Option Description	Mandatory (Yes or No)
	<p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> This option is required while defining a pricing eligibility criteria using the parameter.</p>
Pricing Rule Eligibility Criteria	<p>Used to indicate whether the parameter is used for defining a rule based pricing eligibility criteria.</p> <p><b>Note:</b> This option appears only when the <b>Membership</b> or the <b>Membership Person</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This option is required while using the parameter for defining a rule based pricing eligibility criteria.</p>
Business Rule Eligibility Criteria	<p>Used to indicate whether the parameter is used for defining a rule based business eligibility criteria.</p> <p><b>Note:</b> This option appears only when the <b>Health Plan, Health Product, Membership,</b> or the <b>Membership Person</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This option is required while using the parameter for defining a rule based business eligibility criteria.</p>
Price List Eligibility Criteria	<p>Used to indicate whether the parameter is used for defining the price list eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Health Product</b> or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This option is required while defining a price list eligibility criteria using the parameter.</p>
Product Eligibility Criteria	<p>Used to indicate whether the parameter is used for defining the product eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Algorithm, Health Product, Service Quantity Identifier,</b> or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This option is required while defining a product eligibility criteria using the parameter.</p>

Option Name	Option Description	Mandatory (Yes or No)
Rule Eligibility Criteria	Used to indicate whether the parameter can be used while defining the parameter based rule type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Health Product</b>, <b>Product</b>, <b>Service Quantity Identifier</b>, or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> This option is required while defining a parameter based rule type.</p>

**Note:** You must select at least one option in the **Parameter Usage** section.

3. Modify the required details in the **Parameter** screen.
4. Click **Save**.

The changes made to the parameter are saved.

### Deleting a Parameter

#### Procedure

To delete a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the parameter that you want to delete.

A message appears confirming whether you want to delete the parameter.

3. Click **OK**.

The parameter is deleted.

**Note:**

You can delete a parameter only when:

- It is not yet associated to any price item or price item bundle.
- It is not yet used while defining the pricing, business rule, price list, product eligibility, or rule eligibility criteria.

### Copying a Parameter

Instead of creating a parameter from scratch, you can define a new parameter using an existing parameter. This is possible through copying a parameter. When you copy a parameter, the predefined values, validation algorithm, and reference entity (depending upon the value type) are copied along with the parameter usage details. You can then edit the details, if required.

**Note:** You cannot change the value type that is stored in the new parameter (which is created using an existing parameter).

### Prerequisites

To copy a parameter, you should have:

- Parameter (whose copy you want to create) defined in the application
- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

### Note:

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

### Procedure

To copy a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the parameter whose copy you want to create.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter.	Yes
	<b>Note:</b> You cannot specify any special character except underscore (_) in the parameter name.	
Source Entity	Used to indicate the entity from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> </ul>	Yes

Option Name	Option Description	Mandatory (Yes or No)
Rule Eligibility Criteria	Used to indicate whether the parameter can be used while defining the parameter based rule type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Health Product</b>, <b>Product</b>, <b>Service Quantity Identifier</b>, or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> This option is required while defining a parameter based rule type.</p>

**Note:** You must select at least one option in the **Parameter Usage** section.

- Enter the required details in the **Parameter** screen.
- Click **Save**.

The new parameter is defined.

**Note:** If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

### Viewing the Parameter Details

#### Procedure

To view the details of a parameter:

- Search for the parameter in the **Parameter** screen.
- In the **Search Results** section, click the **View** () icon in the **View** column corresponding to the parameter whose details you want to view.

The **Parameter** screen appears.

- View the details of the parameter in the **Parameter** zone.

## Parameter (Used for Viewing)

The **Parameter** screen allows you to view the details of a parameter. It contains the following zone:

- [Parameter](#) on page 890

### Parameter

The **Parameter** zone displays the details of the parameter. It contains the following sections:

- **Main** – Displays basic information about the parameter. It contains the following fields:

Field Name	Field Description
Parameter	Displays the parameter name.
Description	Displays the description of the parameter.
Value Type	Indicates the type of value that you want to store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>
Validation Algorithm	Indicates the algorithm using which you want to validate the adhoc parameter value. <p><b>Note:</b> This field appears when the <b>Adhoc</b> option is selected from the <b>Value Type</b> list. It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</p>
Referenced Table	Indicates the table whose primary key (i.e. column) is used to validate the parameter value. <p><b>Note:</b> This field appears when the <b>Reference</b> option is selected from the <b>Value Type</b> list. It has a link. On clicking the link, the <b>Table</b> screen appears where you can view the details of the respective table.</p>
Source Entity	Indicates the entity from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Health Plan</li> </ul> <p><b>Note:</b> This option is not applicable for the banking business.</p> <ul style="list-style-type: none"> <li>• Health Product</li> </ul>

Field Name	Field Description
	<p data-bbox="948 212 1463 281"><b>Note:</b> This option is not applicable for the banking business.</p> <ul data-bbox="919 306 1089 331" style="list-style-type: none"> <li data-bbox="919 306 1089 331">• Membership</li> </ul> <p data-bbox="948 359 1463 428"><b>Note:</b> This option is not applicable for the banking business.</p> <ul data-bbox="919 453 1170 478" style="list-style-type: none"> <li data-bbox="919 453 1170 478">• Membership Person</li> </ul> <p data-bbox="948 506 1463 575"><b>Note:</b> This option is not applicable for the banking business.</p> <ul data-bbox="919 600 1073 674" style="list-style-type: none"> <li data-bbox="919 600 1024 625">• Person</li> <li data-bbox="919 646 1073 674">• Policy Plan</li> </ul> <p data-bbox="948 701 1463 770"><b>Note:</b> This option is not applicable for the banking business.</p> <ul data-bbox="919 795 1040 821" style="list-style-type: none"> <li data-bbox="919 795 1040 821">• Product</li> </ul> <p data-bbox="948 848 1463 917"><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul data-bbox="919 942 1243 1066" style="list-style-type: none"> <li data-bbox="919 942 1243 968">• Service Quantity Identifier</li> <li data-bbox="919 989 1008 1014">• State</li> <li data-bbox="919 1035 1081 1060">• Transaction</li> </ul>
Source Type	<p data-bbox="889 1115 1463 1184">Indicates the type of source from where the parameter value is derived. The valid values are:</p> <ul data-bbox="919 1199 1114 1367" style="list-style-type: none"> <li data-bbox="919 1199 1114 1224">• Characteristic</li> <li data-bbox="919 1245 1008 1270">• Field</li> <li data-bbox="919 1291 1114 1316">• Usage Amount</li> <li data-bbox="919 1337 1114 1362">• Usage Counter</li> </ul> <p data-bbox="889 1394 1463 1745"><b>Note:</b> This field appears when the <b>Account, Person, Benefit, Health Plan, Health Product, Membership, Membership Person, Person, Policy Plan, Product,</b> or <b>State</b> option is selected from the <b>Source Entity</b> list. The <b>Usage Amount</b> and <b>Usage Counter</b> options do not appear in the <b>Source Type</b> list when the <b>Benefit, Health Plan, Health Product, Membership, Membership Person, Policy Plan, Product,</b> or <b>State</b> option is selected from the <b>Source Entity</b> list.</p>
Source Type Code	Indicates the source, such as field, characteristic, usage amount, usage counter, SQL, or algorithm, from where the parameter value is derived.

Field Name	Field Description
	<b>Note:</b> This field does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.

- **Parameter Values** - Lists the predefined values of the parameter. It contains the following columns:

Column Name	Column Description
Parameter Value	Displays the value of the parameter.
Description	Displays the description of the parameter value.

**Note:** The **Parameter Values** section appears when the **Predefined** option is selected from the **Value Type** list.

- **Parameter Usage** – Indicates where you can use the parameter in the system. It contains the following options:

Option Name	Option Description
Price Item	<p>Indicates whether the parameter is associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.</p> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option does not appear in the <b>Parameter Usage</b> section:</p> <p><b>Note:</b> This option does not appear when the <b>Algorithm</b>, <b>Health Product</b>, or the <b>Service Quantity Identifier</b> option is selected from the <b>Source Entity</b> list.</p>
Pricing Eligibility Criteria	<p>Indicates whether the parameter is used for defining the pricing eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>
Pricing Rule Eligibility Criteria	<p>Indicates whether the parameter is used for defining a rule based pricing eligibility criteria.</p> <p><b>Note:</b> This option appears only when the <b>Membership</b> or the <b>Membership Person</b> option is selected from the <b>Source Entity</b> list.</p>
Business Rule Eligibility Criteria	<p>Indicates whether the parameter is used for defining a rule based business eligibility criteria.</p> <p><b>Note:</b> This option appears only when the <b>Health Plan</b>, <b>Health Product</b>, <b>Membership</b>, or the <b>Membership Person</b> option is selected from the <b>Source Entity</b> list.</p>

Option Name	Option Description
Price List Eligibility Criteria	Indicates whether the parameter is used for defining the price list eligibility criteria.
	<b>Note:</b> This option does not appear when the <b>Health Product</b> or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.
Product Eligibility Criteria	Indicates whether the parameter is used for defining the product eligibility criteria.
	<b>Note:</b> This option does not appear when the <b>Algorithm</b> , <b>Health Product</b> , <b>Service Quantity Identifier</b> , or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.
Rule Eligibility Criteria	Indicates whether the parameter is used while defining the parameter based rule type.
	<b>Note:</b> This option does not appear when the <b>Health Product</b> , <b>Product</b> , <b>Service Quantity Identifier</b> , or the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.

## Price Item (Health Insurance Business)

The various charges that are to be charged to the customer (for example, premium or optional administration fees to a fully-insured group customer and claim based fees or enrollment based fees to a self-funded customer) are defined as price items in the system. Similarly, various charges credited to the customer are also defined as price items. Stop-loss arrangements for a self-funded customer (for example, specific stop-loss that is calculated and credited to customer) is represented using a price item in the system.

Once you define a price item, you can also define the pricing for the price item at various levels using pricing rules based on the requirements. For a fully-insured group customer, the pricing is defined at the policy plan level. Whereas, for a self-funded customer, the pricing can be defined either at the bill group policy level or at the parent customer level. For more information about the fully-insured pricing, see [Fully-Insured Pricing](#) on page 3427. And, for more information about the self-funded pricing, see [Self-Funded Pricing](#) on page 2789.

The system enables you to create price items which can be used for pricing and billing. It means that pricing can be defined for the price item and charges can be created against it in the system. The system enables you to create the following type of price items:

- **Fees Based Price Items** - The fees based services would include services on which fees is charged to the customers either annually or at regular intervals (for example, for the administrative services offered to the self-funded customer, the admin fees will be charged). You can create fees based price items which can be used for pricing and billing in the system.

You need to associate a contract type with a price item. The system allows you to create a charge (i.e. billable charge) for a price item on an account when a contract of the contract type which is associated with the price item is already present on the account.

You can create price items which can be assigned to any price list except global price list or which can assigned to only global price lists. For more information about global price list, see [Price List](#) on page 958.

You can associate one or more parameters where the parameter usage is set to **Price Item** with a price item. These parameters can then be used for:

- Aggregating transactions which are mapped to the price item
- Defining multi parameter based pricing for the price item

If the parameter usage is set to **Aggregation** while associating a parameter with a price item, the parameter is only used for aggregating transactions which are mapped to the price item. However, if the parameter usage is set to **Pricing** while associating a parameter with a price item, the parameter is used for aggregating transactions as well as for defining multi parameter based pricing for the price item.

You can associate a price item to one or more divisions. In addition, you can do the following when a price item is associated to a division:

- Associate the Service Quantity Identifiers (SQIs) with the Price Item for the Division
- Define the Division-Specific Characteristics for the Price Item

## Price Item (Used for Searching)

The **Price Item** screen allows you to search for a price item or price item bundle using various search criteria. It also allows you to create and copy a price item or price item bundle. It contains the following zone:

- [Search Price Item](#) on page 894

Through this screen, you can navigate to the following screens:

- [Price Item \(Used for Viewing\)](#) on page 939
- [Price Item Relationship](#)
- [Price Item Assignments](#)

### Search Price Item

The **Search Price Item** zone allows you to search for a price item or price item bundle using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price item or price item bundle using the price item details. The valid value is: <ul style="list-style-type: none"> <li>• Price Item Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Price Item Details</b> option is selected.	

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to search a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No
Division	Used to search price items or price item bundles which are associated with a particular division.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price Item Usage	Used to search price items or price item bundles which is available for pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul> <b>Note:</b> By default, the <b>Pricing and Billing</b> option is selected.	No
Bundle	Used to indicate whether you want to search a price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price Item Type	Used to search a particular type of price items or price item bundles. The valid values are: <ul style="list-style-type: none"> <li>• Fees</li> <li>• Rate</li> </ul> <b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list.	No

**Note:** You must specify at least one search criterion while searching for a price item or price item bundle.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item Information	<p>Displays information about the price item or price item bundle.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.</p>
Bundle Type	<p>Indicates the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are:</p> <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <p>However, if the price item bundle is available for pricing and its price item type is set to <b>Fees</b>, the valid value is:</p> <ul style="list-style-type: none"> <li>• Regular</li> </ul>
Price Item Type	<p>Indicates the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul>
Price Item Usage	<p>Indicates whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul>
Duplicate	<p>On clicking the <b>Duplicate</b> () icon, the <b>Price Item</b> screen appears where you can create a new price item or price item bundle using an existing price item or price item bundle.</p>
Price Item Assigned To	<p>On clicking the <b>View</b> () icon in the <b>Price Item Assigned To</b> column, the <b>Price Item Assignments</b> screen appears where you can view the persons, accounts, and active price lists to which the price item or price item bundle is assigned.</p>
Price Item Relationship	<p>On clicking the <b>View</b> () icon in the <b>Price Item Relationship</b> column, the <b>Price Item Relationship</b> screen appears where you can view the list of the price items and price item bundles associated with the parent price item or added to the price item bundle.</p>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### **Searching for a Price Item or Price Item Bundle**

#### **Prerequisites**

To search for a price item or price item bundle, you should have:

- Divisions defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

#### **Procedure**

To search for a price item or price item bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.  
A sub-menu appears.
3. Click the **Search** option from the **Price Item** sub-menu.  
The **Price Item** screen appears.
4. Enter the search criteria in the **Search Price Item** zone depending on whether you want to search for a price item or price item bundle.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of price items or price item bundles that meet the search criteria appears in the **Search Results** section.

## Defining a Price Item or Price Item Bundle

### Prerequisites

To define a price item or price item bundle, you should have:

- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1\_PRICING** feature configuration

### Procedure

To define a price item or price item bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.  
A sub-menu appears.
3. Click the **Add** option from the **Price Item** sub-menu.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

#### **Note:**

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1\_PPARM\_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
  - Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
  - Define the accrual type criteria of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

- Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

**Note:** This step is not applicable for the health insurance business.

- Define the cost of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

- Define the average price floor and ceil limits of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

- Define the negotiability floor and ceil values of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

- Define the division-specific characteristics for the price item or price item bundle
- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Pricing</b> - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system.</li> </ul> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul style="list-style-type: none"> <li>• <b>Pricing and Billing</b> - Used when you want to define pricing and create charges for the price item or price item bundle in the system.</li> </ul> <p><b>Note:</b> By default, the <b>Pricing and Billing</b> option is selected.</p>	Yes
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Rate</b> - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items.</li> </ul> <p><b>Note:</b> This option is not applicable for the health insurance business.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>Fees</b> - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list. By default, the <b>Fees</b> option is selected. You cannot create a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to <b>Fees</b>. Therefore, this field does not appear when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> </div>	
Bundle	<p>Used to indicate whether you want to create a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> By default, the <b>No</b> option is selected. This field is not applicable for the health insurance business.</p> </div>	Yes
Bundle Type	<p>Used to indicate the type of the price item bundle. If the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list, the valid values are:</p> <ul style="list-style-type: none"> <li>• <i>Regular Bundle</i></li> <li>• <i>Phantom Bundle</i></li> <li>• <i>Ratio Bundle</i></li> </ul>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required when you are creating a price item bundle.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
	<p>However, if the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Fees</b> option is selected from the <b>Price Item Type</b> list, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b>.</p> <p><b>Note:</b> This field appears when the <b>Yes</b> option is selected from the <b>Bundle</b> list. This field is enabled when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Yes</b> option is selected from the <b>Bundle</b> list. You cannot define a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list. This field is not applicable for the health insurance business.</p>	
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> By default, the <b>No</b> option is selected.</p>	Yes
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p> <p><b>Note:</b> This field appears when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list. The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the <b>Send Price Items for Approval</b> button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item Manager To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Price Item Manager To Do Type</b> field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p> <p><b>Note:</b></p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	Yes (Conditional)
Average Price Floor and Ceil Type	<p>Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:</p> <ul style="list-style-type: none"> <li>• <b>Absolute Value Range</b> - Used when you want to</li> </ul>	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p>define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$.</p> <ul style="list-style-type: none"> <li>• <b>Spread Amount</b> - Used when you want to define the average floor and ceil limits based on the spread amount.</li> <li>• <b>Spread Percentage</b> – Used when you want to define the average floor and ceil limits based on the spread percentage.</li> </ul> <p><b>Note:</b></p> <ul style="list-style-type: none"> <li>• Incase of <b>Spread Amount</b> and <b>Spread Percentage</b> options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived.</li> <li>• This field is not applicable for the health insurance business.</li> </ul>	
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal management module.	No
Variable Price	Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>If the <b>Variable Price</b> option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.</p> <p>However, if the <b>Variable Price</b> option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.</p>	

**Tip:** Alternatively, you can access the **Price Item** screen by clicking the **Add** button in the **Page Title** area of the **Price Item** screen.

4. Enter the required details in the **Main** section.
5. Associate the parameters with the price item or price item bundle, if required.

**Note:** For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.

6. Associate the price item or price item bundle with the required divisions.
7. Associate the SQIs with the price item or price item bundle for the required divisions.
8. Define the accrual type criteria of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

9. Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the required divisions.

**Note:** This step is not applicable for the health insurance business.

10. Define the cost of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

11. Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

12. Define the negotiability floor and ceil values of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

13. Define the division-specific characteristics for the price item or price item bundle. if required.

14. Define the characteristics for the price item or price item bundle, if required.

15. Click **Save**.

The price item is defined.

**Note:** While creating a price item or price item bundle which is available for pricing, the contract type specified in the **Default Contract Type** option type of the **C1\_PRICING** feature configuration is automatically associated to the price item or price item bundle.

### **Associating a Parameter with a Price Item or Price Item Bundle**

You can define multi parameter based pricing for a price item or price item bundle when the parameters using which you want to define the price item pricing are associated with the respective price item or price item bundle during the pricing date range. Let us understand this with the help of an example from the financial institution domain.

The following table illustrates how a financial institution can offer different price for a price item based on the return codes:

Service	Price Item	Parameter	Parameter Value	Price
SEPA Direct Debit Return	SEPADDR	Return Code (RTURNCD)	AC01	0.1\$
			AC04	0.2\$
			AC06	0.3\$
			AG01	0.10\$

In such case, you need to first define a predefined parameter named Return Code where the parameter usage is set to **Price Item**). In the Return Code parameter, you must specify the above listed return codes (i.e. AC01, AC04, AC06, and AG01) as the predefined values. Then, in order to define multi parameter based pricing for the SEPADDR price item using the Return Code parameter, you must associate the Return Code parameter with the SEPADDR price item using the following specifications:

Parameter	Display Order	Mandatory (Yes or No)	Optional Priority
Return Code	10	Yes	-

Let us understand this with the help of another example from the health insurance domain.

The following table illustrates how a self-funded customer can be charged different admin fee for the services based on health coverage class and network type:

Service	Price Item	Health Coverage Class	Network Type	Fees
Claim Based Fees	CLBDFS	Medical	In	\$100
		Medical	Out	\$150
		Dental	In	\$50
		Dental	Out	\$75

In such case, you need to first define two predefined parameters named Health Coverage Class and Network Type where the parameter usage is set to **Price Item**). In the Health Coverage Class parameter, you must specify the above listed values (i.e. Medical and Dental) as the predefined values. And, in the Network Type parameter, you must specify the above listed values (i.e. In and Out) as the predefined values. Then, in order to define parameter based pricing for the CLBDFS price item using the Health Coverage Class and Network Type parameters, you must associate these parameters with the CLBDFS price item using the following specifications:

Parameter	Display Order	Mandatory (Yes or No)	Optional Priority
Health Coverage Class	10	Yes	-
Network Type	20	Yes	-

### **Prerequisites**

To associate a parameter with a price item or price item bundle, you should have:

- Parameters defined in the application (where the parameter usage is set to **Price Item**)

### **Procedure**

To associate a parameter with a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Parameters** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the parameter is associated with the price item or price item bundle.	Yes
Effective End Date	Used to specify the date till when the parameter is associated with the price item or price item bundle.	No
Parameter	<p>Used to indicate the parameter that you want to associate with the price item or price item bundle.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> <p>In the <b>Parameter Search</b> window, the system allows you to search only those parameters where the parameter usage is set to <b>Price Item</b>.</p> <p>If you select a predefined parameter, the <b>Add</b> (➕) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Add</b> icon, a grid appears where you can specify a list of predefined parameter values which are valid for the price item or price item bundle while defining its pricing. If you do not list any predefined parameter value in this grid, the system enables you to specify any predefined value of the parameter while defining the pricing for the price item or price item bundle.</p>	Yes
Business Label	Used to specify a business label for the parameter. If you specify the business label for a parameter, the business label appears throughout the application instead of the parameter name.	No
Display Order	Used to indicate the order in which the parameter and its value should appear in the pricing	Yes

Field Name	Field Description	Mandatory (Yes or No)
	parameter information string across the application.	
Parameter Usage	Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• <b>Aggregation</b> – Used when you want to use the parameter for aggregating transactions.</li> <li>• <b>Pricing</b> – Used when you want to use the parameter for aggregating transactions as well as for defining the price item pricing.</li> </ul>	Yes
Mandatory	Used to indicate whether the parameter is mandatory while defining the price item pricing.	No
Priority	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> This field is disabled when the <b>Mandatory</b> option is selected.	<b>Note:</b> This field is required when the <b>Mandatory</b> option is not selected.

**Note:**

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1\_PPARM\_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

2. Enter the required details in the **Parameters** section.
3. If you want to associate more than one parameter with the price item or price item bundle, click the **Add (+)** icon and then repeat step 2.

**Note:**

However, if you want to remove a parameter from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the parameter. You can edit the parameter details and remove a parameter from the price item or price item bundle when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which is used for aggregation, whenever required. However, you can add a parameter which is used for pricing when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

4. For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.

## 5. Click **Save**.

The parameters are associated with the price item or price item bundle.

**Note:** By default, the priority of all parameters which are mandatory is set to 0.

<b>For more information on...</b>	<b>See...</b>
How to define a price item or price item bundle	<a href="#">Defining a Price Item or Price Item Bundle</a> on page 898
How to edit a price item or price item bundle	<a href="#">Editing a Price Item or Price Item Bundle</a> on page 950
How to copy a price item or price item bundle	<a href="#">Copying a Price Item or Price Item Bundle</a> on page 930
How to define the valid predefined parameter values for a price item or price item bundle	<a href="#">Defining the Valid Predefined Parameter Values for a Price Item or Price Item Bundle</a> on page 909

### **Defining the Valid Predefined Parameter Values for a Price Item or Price Item Bundle**

A predefined parameter may have hundreds of values defined in the system. But, there might be situations when only certain predefined parameter values are applicable for a price item or price item bundle while defining its pricing. In such case, you can define a set of valid predefined parameter values for a price item or price item bundle. For example, the Return Code parameter has the following predefined parameter values:

<b>Parameter Value</b>	<b>Description</b>
AC01	Account Identifier Incorrect (i.e. invalid IBAN)
AC04	Account Closed
AC06	Account Blocked
AG01	Direct Debit Forbidden for Regulatory Reasons
AG02	Operation/Transaction Code Incorrect
AM04	Insufficient Funds
AM05	Duplicate Collection
MD01	Unauthorized Transaction
MD06	Disputed Authorized Transaction

If only the MD01 and MD06 predefined parameter values are applicable for the SEPA Debit Refund (SEPADRF) price item, you can define MD01 and MD06 as the valid predefined parameter values for the SEPADRF price item. In such case, the system will allow you to define the pricing for the SEPADRF price item only using the MD01 or MD06 parameter value. However, if all the above listed predefined parameter values are applicable for the SEPA Direct Debit Return (SEPADDR) price item, you must not define the valid predefined parameter values for the SEPADDR price item. In such case, the system will allow you to define the pricing for the SEPADDR price item using any of the above listed parameter value.

Another example, the Health Coverage Class parameter has the following predefined parameter values:

<b>Parameter Value</b>	<b>Description</b>
MEDICAL	Medical
DENTAL	Dental
VISION	Vision

If only the MEDICAL and DENTAL predefined parameter values are applicable for the Claim Based Fees (CLBDFS) price item, you can define MEDICAL and DENTAL as the valid predefined parameter values for the CLBDFS price item. In such case, the system will allow you to define the pricing for the CLBDFS price item only using the MEDICAL or DENTAL parameter value. However, if all the above listed predefined parameter values are applicable for the Claim Based Fees (CLBDFS) price item, you must not define the valid predefined parameter values for the CLBDFS price item. In such case, the system will allow you to define the pricing for the CLBDFS price item using any of the above listed parameter value.

### **Prerequisites**

To define the valid predefined parameter values for a price item or price item bundle, you should have:

- Predefined values defined for the parameter which is associated with the price item or price item bundle
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### **Procedure**

To define the valid predefined parameter values for a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Parameters** section appears.

2. Click the **Add**  icon in the **Parameter** column corresponding to the predefined parameter which is associated with the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Parameter Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Parameter Value Search</b> window appears.</p> <p>On specifying the valid predefined parameter value for a price item or price item bundle, the description of the predefined parameter value appears corresponding to the <b>Parameter Value</b> field.</p>	<p><b>Note:</b> This field is required when you are defining the valid predefined parameter values for the price item or price item bundle.</p>

3. Enter a predefined parameter value which is valid for the price item or price item bundle while defining its pricing.
4. If you want to define more than one valid predefined parameter value for the price item or price item bundle, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a valid predefined parameter value from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the parameter value. You can remove a valid predefined parameter value from the price item or price item bundle when the parameter value is not yet used for defining the price item pricing.

5. Click **Save**.

The valid predefined parameter values are defined for the price item or price item bundle.

How to associate a parameter with a price item or price item bundle	<a href="#">Associating a Parameter with a Price Item or Price Item Bundle</a> on page 905

**Associating a Price Item or Price Item Bundle with a Division**

You can assign a price item or price item bundle to a person or account when the price item or price item bundle is associated with the division to which the person or account belongs. Let us understand this with the help of an example from the financial institution domain.

The following table illustrates how a price item can be associated with one or more divisions in the financial institution domain:

Price Item	Division
SEPA Direct Debit Return (SEPADDR)	001-AL
	002-CA
	003-FL
	004-IN
Stop Payment (STPPMT)	002-CA
	003-FL
	004-IN

In such case, you can assign the SEPADDR price item to any person or account which belongs to the 001-AL, 002-CA, 003-FL, or 004-IN division. However, you can assign the STPPMT price item to any person or account which belongs to the 002-CA, 003-FL, or 004-IN division.

Let us understand this with the help of an example from the health insurance domain.

The following table illustrates how a price item can be associated with one or more divisions in the health insurance domain:

Price Item	Division
Claim Based Fees (CLBDFS)	002-CA
	003-FL
	004-IN

In such case, you can charge the CLBDFS price item to any person or account which belongs to the 002-CA, 003-FL, or 004-IN division.

**Prerequisites**

To associate a price item or price item bundle with a division, you should have:

- Divisions defined in the application
- Divisions associated with the access group to which the user (i.e. who is performing this action) belongs

**Procedure**

To associate a price item or price item bundle with a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQIs	On clicking the <b>Add</b> (⊕) icon, you can associate an SQI with the price item or price item bundle for the division.	Not applicable
Division Characteristics	On clicking the <b>Add</b> (⊕) icon, you can define a division-specific characteristic for the price item or price item bundle.	Not applicable
Accrual Type Criteria	On clicking the <b>Add</b> (⊕) icon, you can define the accrual type criteria of the price item or price item bundle for the division.  <b>Note:</b> This feature is not applicable for the health insurance business.	Not applicable
Entity Hierarchy	On clicking the <b>Add</b> (⊕) icon, you can associate the price item or price item bundle with a hierarchy entity of an entity hierarchy relationship for the division.  <b>Note:</b> This feature is not applicable for the health insurance business.	Not applicable
Costs	On clicking the <b>Add</b> (⊕) icon, you can define the cost of the price item or price item bundle for the division.  <b>Note:</b> This feature is not applicable for the health insurance business.	Not applicable
Average Price Floor and Ceil Limits	On clicking the <b>Add</b> (⊕) icon, you can define the average price floor and ceil limits of the price item or price item bundle for the division.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This feature is not applicable for the health insurance business.	
Negotiability	On clicking the <b>Add</b> (+) icon, you can define the negotiability floor and ceil limits of the price item or price item bundle for the division.  <b>Note:</b> This feature is not applicable for the health insurance business.	No
Division	Used to indicate the division to which you want to associate the price item or price item bundle.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes (Conditional)  <b>Note:</b> This field is required while associating the price item or price item bundle with a division.

- Select the division from the respective field.
- If you want to associate the price item or price item bundle with more than one division, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove the price item or price item bundle from a division, click the **Delete** (🗑️) icon corresponding to the division. You cannot remove the price item or price item bundle from a division when it is assigned to a person or account which belongs to the division.

- Associate the SQIs with the price item or price item bundle for the required divisions.
- Define the accrual type criteria of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

- Associate the price item or price item bundle with a hierarchy entity of an entity hierarchy relationship for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

- Define the cost of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

- Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

- Define the rate negotiability floor and ceil limits of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

- Define the division-specific characteristics for the price item or price item bundle. if required.

- Click **Save**.

The price item or price item bundle is associated with the divisions.

**Tip:** Alternatively, you can associate a price item or price item bundle with a division using the **Division** screen. For more information, see [Associating a Price Item or Price Item Bundle with a Division](#) on page 1076.

### Associating an SQI with a Price Item or Price Item Bundle for a Division

In the transaction aggregation process, an SQI based billable charge is created for a price item or price item bundle (to which a transaction is mapped) when:

- The SQIs are associated with the price item or price item bundle for the division to which the account (i.e. for which the billable charge is created) belongs.
- The transaction aggregation rules are defined for such SQIs in the system.

Let us assume that the A1 account belongs to the 201-NJ division and the A2 account belongs to the 209-CA division.

The following table illustrates how you can define division-specific SQIs for a price item in the financial institution domain:

Price Item	Division	Service Quantity Identifiers (SQIs)
Stop Payments (STPY)	201-NJ	Number of Transactions (NBRTXN)
		Transaction Volume (TXNVOL)
		Transaction Amount (TXNAMT)
	209-CA	Number of Transactions (NBRTXN)

Price Item	Division	Service Quantity Identifiers (SQIs)
		Transaction Amount (TXNAMT)

Now, when an SQI based billable charge is created for the A1 account through the transaction aggregation process, the system calculates the following SQIs using the respective transaction aggregation rule:

- Number of Transactions (NBRTXN)
- Transaction Volume (TXNVOL)
- Transaction Amount (TXNAMT)

And, when an SQI based billable charge is created for the A2 account through the transaction aggregation process, the system calculates the following SQIs using the respective transaction aggregation rule:

- Number of Transactions (NBRTXN)
- Transaction Amount (TXNAMT)

Another example, you can calculate the enrollment based fees for a self-funded customer based on Per Subscriber Per Month or Per Member Per Month for the 201-NJ and 209-CA divisions. Therefore, you need to associate two SQIs — Subscriber Count and Member Count with the Enrollment Based Fees (ERBDFS) price item.

The following table illustrates how you can define division-specific SQIs for a price item in the health insurance domain:

Price Item	Division	Service Quantity Identifiers (SQIs)
Enrollment Based Fees (ERBDFS)	201-NJ	Subscriber Count (SUBCNT)
		Member Count (MEMCNT)
	209-CA	Subscriber Count (SUBCNT)
		Member Count (MEMCNT)

### **Prerequisites**

To associate an SQI with a price item or price item bundle for a division, you should have:

- Service Quantity Identifiers (SQIs) defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### **Procedure**

To associate an SQI with a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **SQIs** column corresponding to the division for which you want to associate SQIs with the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQI	Used to indicate the SQI that you want to associate with the price item or price item bundle for the division.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>SQI</b> field. On clicking the <b>Search</b> icon, the <b>Service Quantity Identifier Search</b> window appears.</p> <p>On specifying the SQI, the description of the SQI appears corresponding to the <b>SQI</b> field.</p>	<p><b>Note:</b> This field is required while associating an SQI with the price item or price item bundle for the division.</p>

- Enter the required details in the **SQIs** grid.
- If you want to associate more than one SQI with the price item or price item bundle for the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove an SQI from the price item or price item bundle for the division, click the **Delete** (🗑️) icon corresponding to the SQI. You cannot remove an SQI from the price item or price item bundle for the division when an SQI based billable charge is created using the SQI.

- Click **Save**.

The SQIs are associated with the price item or price item bundle for the division.

## **Defining a Division-Specific Characteristic for a Price Item or Price Item Bundle**

### Prerequisites

To define a division-specific characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Division/Price Item Combination**)
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### Procedure

To define a division-specific characteristic for a price item or price item bundle:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add** () icon in the **Division Characteristics** column corresponding to the division for which you want to define division-specific price item or price item bundle characteristics.

The following fields appear in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the price item or price item bundle characteristic is effective for the division.	Yes (Conditional) <b>Note:</b> This field is required while defining a division-specific characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Division/Price Item Combination</b> .	Yes (Conditional) <b>Note:</b> This field is required while defining a division-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (  ) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required while defining a division-specific characteristic for the price item or price item bundle.

3. Enter the required details in the **Divisions** section.
4. If you want to define more than one division-specific characteristic for the price item or price item bundle, click the **Add** () icon and then repeat step 3.

**Note:** However, if you want to remove a division-specific characteristic from the price item or price item bundle, click the **Delete** () icon corresponding to the characteristic.

5. Click **Save**.

The division-specific characteristics are defined for the price item or price item bundle.

**Defining the Accrual Type Criteria of a Price Item or Price Item Bundle for a Division**

**Note:** This topic is not applicable for the health insurance business.

The accrual type criteria of a price item or price item bundle is referred when the accrual is calculated for an account using an accrual type where the **Price Item Accrual Criteria Required** option is selected. The system behaves in the following manner when the **Price Item Accrual Criteria Required** option is selected in the accrual type:

If the accrual type criteria of a price item or price item bundle is set to...	Then...
Actual	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> <li>The price item is not excluded in the accrual type.</li> <li>The accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Actual</b>.</li> </ul>
Historical	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> <li>The price item is not excluded in the accrual type.</li> <li>The accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Historical</b>.</li> </ul>
Not Applicable	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> <li>The price item is not excluded in the accrual type</li> <li>The accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Actual</b> or <b>Historical</b>.</li> </ul>

The system enables you to define accrual type criteria of a price item or price item bundle for each division. For example, you can maintain different accrual type criteria of the Stop Payments (STPY) price item for each division as shown below:

The following table illustrates how you can define different accrual type criteria for a price item in each division:

Price Item	Division	Accrual Type Criteria
Stop Payments (STPY)	201-NJ	Actual

Price Item	Division	Accrual Type Criteria
	209-CA	Historical
	210-FL	Not Applicable
	215-OX	Actual
	220-AL	Historical
	223-NJ	Not Applicable

### Prerequisites

To define the accrual type criteria of a price item or price item bundle for a division, you should have:

- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### Procedure

To define the accrual type criteria of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Accrual Type Criteria** column corresponding to the division for which you want to define accrual type criteria of the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	Used to indicate whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: <ul style="list-style-type: none"> <li>• <b>Actual</b> - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to <b>Actual</b>.</li> <li>• <b>Historical</b> - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to <b>Historical</b>.</li> <li>• <b>Not Applicable</b> - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in</li> </ul>	Yes (Conditional)  <b>Note:</b> This field is required while defining the accrual type criteria of the price item or price item bundle for the division.

Field Name	Field Description	Mandatory (Yes or No)
	the accrual type is set to <b>Actual</b> or <b>Historical</b> .	
	<b>Note:</b> By default, the <b>Not Applicable</b> option is selected.	

3. Select the accrual type criteria from the respective field.
4. Click **Save**.

The accrual type criteria of the price item or price item bundle is defined for the division.

### **Associating a Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of a Division**

**Note:** This topic is not applicable for the health insurance business.

Once you design the structure of an entity hierarchy relationship, you can associate a price item or price item bundle with a hierarchy entity at any level in the entity hierarchy relationship. You can associate a price item or price item bundle with a hierarchy entity only from the **Price Item** screen. The system enables you to define division-specific hierarchy for a price item or price item bundle. Therefore, while associating a price item or price item bundle with a hierarchy entity, you can select a hierarchy entity from any entity hierarchy relationship which is created for the division. However, the system checks whether the association date range is within the entity hierarchy relationship date range.

For example, you can associate the ACH Transfer (ACHTRN) price item with the Payments hierarchy entity in the Cash Management entity hierarchy relationship as shown below:

Cash Management

Payments

ACH Transfer

Associating a price item or price item bundle with a hierarchy entity does not have any impact on the billing module. At present, the price item hierarchy is only displayed in the Deal Modelling and Simulation module.

### **Prerequisites**

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division, you should have:

- Entity hierarchy relationships defined for the required divisions
- Hierarchy entities included at the required levels in the entity hierarchy relationship
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### **Procedure**

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Entity Hierarchy** column corresponding to the division for which you want to define price item or price item bundle hierarchy.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy	Used to indicate the entity hierarchy relationship in which you want to include the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Hierarchy</b> field. On clicking the <b>Search</b> icon, the <b>Hierarchy Search</b> window appears.	<b>Note:</b> This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
Parent Entity	Used to indicate the hierarchy entity to which you want to associate the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> The list appears when the entity hierarchy relationship is specified in the <b>Hierarchy</b> field. It contains the hierarchy entities which are included at the root and subsequent levels in the entity hierarchy relationship.	<b>Note:</b> This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
Start Date	Used to specify the date from when the price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship.	Yes (Conditional)
	<b>Note:</b> The start date cannot be later than the end date. The start date cannot be earlier than the entity hierarchy relationship start date.	<b>Note:</b> This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
End Date	Used to specify the date till when the price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be later than the entity hierarchy relationship end date.</p>	

- Enter the required details in the **Entity Hierarchy** grid.
- If you want to associate the price item or price item bundle to more than one hierarchy entity in the same or different entity hierarchy relationship, click the **Add (+)** icon and then repeat step 3.

<p><b>Note:</b></p> <p>You cannot associate the price item or price item bundle to multiple hierarchy entities in the same or different entity hierarchy relationship for the same or overlapping date range.</p> <p>However, if you want to disassociate the price item or price item bundle from a hierarchy entity of an entity hierarchy relationship, click the <b>Delete (X)</b> icon corresponding to the hierarchy and parent entity combination.</p>
---

- Click **Save**.

The price item or price item bundle is associated with a hierarchy entity in an entity hierarchy relationship of the division.

### Defining the Cost of a Price Item or Price Item Bundle for a Division

**Note:** This topic is not applicable for the health insurance business.

Oracle Revenue Management and Billing enables you to maintain the different types of fixed and variable costs of a price item or price item bundle for each division. The system uses the fixed and variable cost information while calculating the cost of a price item or price item bundle in a deal. It considers the cost which is defined for the division to which the account or person belongs. It derives the fixed and/or variable cost which is effective on the deal start date.

The system enables you to maintain the following types of costs in different currencies:

- Additional Fixed Cost
- Additional Variable Cost
- Fixed Third Party Cost
- Fixed Internal Cost

- Variable Internal Cost
- Variable Third Party Cost

While calculating the cost of a price item or price item bundle in a deal, the system converts the cost in the deal currency when the cost currency is different from the deal currency. As the name implies, the fixed cost is an expense that does not change with the increase or decrease in the price item volume or commitments. Therefore, the total fixed cost is equal to the sum of fixed cost which is effective on the deal start date for the division. However, the variable cost is an expense that change with the increase or decrease in the price item volume or commitments. Therefore, the total variable cost is equal to the sum of multiplication of variable cost (which is effective on the deal start date for the division) and price item volume or commitments.

Let us understand this with the help of an example:

The following table illustrates how you can define division-specific costs for a price item:

Price Item	Division	Cost Type	Cost Amount
PI1	201-NJ	Fixed Third Party Cost	\$5
		Fixed Internal Cost	\$3
		Additional Fixed Cost	\$1
		Variable Third Party Cost	\$0.1
		Variable Internal Cost	\$0.65
		Additional Variable Cost	\$0.5

If a deal is created for a person who belongs to the 201-NJ division and if the PI1 price item is assigned to the person in the deal and if the original volume and proposed commitment of the PI1 price item in the deal is set to 100 and 200, respectively, the system calculates the cost of the PI1 price item in the following manner:

The following table illustrates how the original and proposed cost is calculated for a price item in a deal:

Original Cost	
Total Fixed Cost	$\$5 + \$3 + \$1 = \$9$
Total Variable Cost	$(100 * \$0.1) + (100 * \$0.65) + (100 * \$0.5) = \$10 + \$65 + \$50 = \$125$
Total Cost	$\$9 + \$125 = \$134$
Proposed Cost	
Total Fixed Cost	$\$5 + \$3 + \$1 = \$9$
Total Variable Cost	$(200 * \$0.1) + (200 * \$0.65) + (200 * \$0.5) = \$20 + \$130 + \$100 = \$250$
Total Cost	$\$9 + \$250 = \$259$

Here, the assumption is the deal and cost currency is same (i.e. USD). The system then uses the total original and proposed costs for calculating the original and proposed profitability of the deal.

### **Prerequisites**

To define the cost of a price item or price item bundle for a division, you should have:

- Currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### **Procedure**

To define the cost of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Costs** column corresponding to the division for which you want to define the costs of the price item or price item bundle.

The following fields appear in a grid:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Effective Date	Used to specify the date from when the cost of the price item or price item bundle is effective for the division.	Yes (Conditional) <b>Note:</b> This field is required while defining the cost of the price item or price item bundle for the division.
Cost Type	Used to indicate the type of cost incurred in the division for the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Additional Fixed Cost</li> <li>• Additional Variable Cost</li> <li>• Fixed Third Party Cost</li> <li>• Fixed Internal Cost</li> <li>• Variable Internal Cost</li> <li>• Variable Third Party Cost</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required while defining the cost of the price item or price item bundle for the division.
Cost Value	Used to specify the cost amount.	Yes (Conditional) <b>Note:</b> This field is required while defining the cost of the price item or price item bundle for the division.
Cost Currency	Used to specify the currency in which you want to define the cost. The system does currency conversion when the cost currency is different from the deal currency. <b>Note:</b> The list includes only those currencies which are already defined in the system.	Yes (Conditional) <b>Note:</b> This field is required while defining the cost of the price item or price item bundle for the division.

3. Enter the required details in the **Costs** grid.

- If you want to define more than one cost of the price item or price item bundle for the division, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove the cost of the price item or price item bundle from the division, click the **Delete (🗑)** icon corresponding to the cost.

- Click **Save**.

The cost of the price item or price item bundle is defined for the division.

### **Defining the Average Price Floor and Ceil Values of a Price Item or Price Item Bundle for a Division**

**Note:** This topic is not applicable for the health insurance business.

Oracle Revenue Management and Billing enables you to define the average price floor and ceil limits of a price item or price item bundle for each division. Before you define the average price floor and ceil limits, you need to specify the floor and ceiling type for the price item or price item bundle. At present, the system supports the following floor and ceiling types for a price item or price item bundle:

- Absolute Value Range

Once the floor and ceiling type of a price item or price item bundle is set to **Absolute Value Range**, you can define the average price floor and ceil limits of the price item or price item bundle for the required divisions. The system enables you to define different average price floor and ceil limits for different To Do roles. The system uses the average price floor and ceil limits while approving the average price of the price item or price item bundle in a deal. The deal creator or an approver at any level in the division or deal approval hierarchy can approve the average price of a price item or price item bundle when the average price is within the floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the average price of the P1 price item in a deal is \$25 and the floor and ceil limits of the deal creator's To Do role is set to \$10-\$15, then the deal creator cannot approve the average price of the P1 price item in the deal.

If the average price floor and ceil limits is not defined for the deal creator's or approver's To Do role, the status of the price item or price item bundle in the deal is changed to **Error**. If the average price floor and ceil limits is defined for the deal creator's or approver's To Do role, but the average price of the price item or price item bundle is not within the floor and ceil limits, the status of the price item or price item bundle in the deal is changed to **Pending for Approval**. However, if the average price floor and ceil limits is defined for the deal creator's or approver's To Do role and the average price of the price item or price item bundle is within the floor and ceil limits, the status of the price item or price item bundle in the deal is changed to **Approved**.

Here, you can also define the average price floor and ceil limits for the price item manager's To Do role. Note that the price item manager can approve the average price of the price item or price item bundle in a deal when the average price of the price item or price item bundle is within the floor and ceil limits of the price item manager's To Do role.

- Spread Amount

Once the average price floor and ceil type of a price item or price item bundle is set to **Spread Amount**, the system calculates the average price floor and ceil limits based on the average price and spread amount. The system calculates the average price of the price item or price item bundle. The system searches for the eligible price list in the price

assignments assigned to the To Do roles. If a flat pricing is defined in the price assignment, then the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread amount specified for the relationship manager's To Do role in the price item. Using the spread amount and average price, the system calculates the average price floor and ceil limit values. The deal creator or an approver at any level in the division or deal approval hierarchy can approve the average price of a price item or price item bundle when the average price is within the floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the spread amount set by you is 10 and the system calculated average price of the P1 price item in a deal is \$25 then the system sets the floor and ceil limits of the deal creator's To Do role to \$15-\$35. In this case the deal creator can approve the average price of the P1 price item in the deal.

The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

- Spread Percentage

Once the average price floor and ceil type of a price item is set to the **Spread Percentage**, the system calculates the average price floor and ceil limits based on the average price and spread percentage. The system calculates the average price of the price item or price item bundle. The system searches for the eligible price list in the price assignments assigned to the To Do roles. If a flat pricing is defined in the price assignment, then the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread parentage specified for the relationship manager's To Do role in the price item. Using the spread percentage and average price, the system calculates the average price floor and ceil values. The deal creator or an approver at any level in the division or approver system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the spread percentage set by you is 10 and the system calculated average price of the P1 price item in a deal is \$50 then the system sets the floor and ceil limits of the deal creator's To Do role to \$45-\$55. In this case the deal creator can approve the average price of the P1 price item in the deal.

The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

### **Prerequisites**

To define the average price floor and ceil limits of a price item or price item bundle for a division, you should have:

- To Do roles and currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### **Procedure**

To define the average price floor and ceil limits of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Average Price Floor and Ceil Limits** column corresponding to the division for which you want to define the average price floor and ceil limits of the price item or price item bundle.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Role	Used to indicate that users with the specified To Do role can approve the average price of the price item or price item bundle in a deal when it is within the specified floor and ceil limits.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>To Do Role Search</b> window appears.</p> <p>On specifying the To Do role, the description of the To Do role appears corresponding to the <b>To Do Role</b> field.</p>	<p><b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Floor Value	Used to specify the floor (i.e. lower) limit for the To Do role. The users who belong to the To Do role cannot approve the average price of the price item or price item bundle when it is below the floor limit.	Yes (Conditional)
	<p><b>Note:</b> The floor value cannot be greater than the ceil value.</p>	<p><b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Ceil Value	Used to specify the ceil (i.e. upper) limit for the To Do role. The users who belong to the To Do role cannot approve the average price of the price item or price item bundle when it is above the ceil limit.	Yes (Conditional)
	<p><b>Note:</b> The ceil value cannot be lower than the floor value.</p>	<p><b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Spread Amount	Used to specify the spread amount specified while defining a price item or price item bundle or assigned to a To Do role.	Yes (Conditional)
	<p><b>Note:</b> This column appears when you select the <b>Spread Amount</b> option from the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.</p>	<p><b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Spread Percentage	Used to specify the spread percentage specified while defining	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	a price item or price item bundle or assigned to a To Do role.  <b>Note:</b> This column appears only when you select the <b>Spread Percentage</b> option from the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.	<b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.
Floor and Ceil Currency	Used to indicate the currency in which you want to define the floor and ceil limits. The system does the currency conversion when the pricing currency is different from the floor and ceil currency.  <b>Note:</b> The list includes only those currencies which are already defined in the system.	Yes (Conditional)  <b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.

- Enter the required details in the **Average Price Floor and Ceil Limits** grid.
- If you want to define the average price floor and ceil limits for more than one To Do role, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove the average price floor and ceil limits of a To Do role from the division, click the **Delete (🗑)** icon corresponding to the To Do role.

- Click **Save**.

The average price floor and ceil limits of the price item or price item bundle are defined for the division.

## Defining a Characteristic for a Price Item or Price Item Bundle

### Prerequisites

To define a characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

### Procedure

To define a characteristic for a price item or price item bundle:

1. Click the **Price Item Characteristics** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Price Item Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price Item</b> .	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the price item or price item bundle.

2. Enter the required details in the **Price Item Characteristics** section.
3. If you want to define more than one characteristic for the price item or price item bundle, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the price item or price item bundle.

How to define a price item or price item bundle	<a href="#">Defining a Price Item or Price Item Bundle</a> on page 898

For more information on...	See...
How to edit a price item or price item bundle	<a href="#">Editing a Price Item or Price Item Bundle</a> on page 950
How to copy a price item or price item bundle	<a href="#">Copying a Price Item or Price Item Bundle</a> on page 930

## Copying a Price Item or Price Item Bundle

Instead of creating a price item or price item bundle from scratch, you can create a new price item or price item bundle using an existing price item or price item bundle. This is possible through copying a price item or price item bundle. On copying a price item or price item bundle, the details including the following are copied to the new price item or price item bundle:

- Parameters and Divisions associated with the price item or price item bundle
- SQIs associated with the price item or price item bundle for the divisions
- Division-specific characteristics of the price item or price item bundle
- Accrual type criteria of the price item or price item bundle for the divisions
- Hierarchy entity to which the price item or price item bundle is associated in the divisions
- Cost of the price item or price item bundle for the divisions
- Average price floor and ceil limits of the price item or price item bundle for the divisions
- Negotiability floor and ceil values of the price item or price item bundle for the required divisions

You can then edit the details, if required.

### Prerequisites

To copy a price item or price item bundle, you should have:

- Price item or price item bundle (whose copy you want to create) defined in the application
- Price item or price item bundle (whose copy you want to create) associated with the division to which the user (i.e. who is performing this action) belongs
- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1\_PRICING** feature configuration

### Procedure

To copy a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the price item or price item bundle whose copy you want to create.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

**Note:**

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1\_PPARM\_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
  - Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
  - Define the accrual type criteria of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

  - Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

**Note:** This step is not applicable for the health insurance business.

  - Define the cost of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

  - Define the average price floor and ceil limits of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

  - Define the negotiability floor and ceil values of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

  - Define the division-specific characteristics for the price item or price item bundle
- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• <b>Pricing</b> - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p data-bbox="751 212 1068 310"><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul data-bbox="719 331 1068 489" style="list-style-type: none"> <li>• <b>Pricing and Billing</b> - Used when you want to define pricing and create charges for the price item or price item bundle in the system.</li> </ul>	
Price Item Type	<p data-bbox="691 537 1068 625">Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul data-bbox="719 646 1068 867" style="list-style-type: none"> <li>• <b>Rate</b> - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items.</li> </ul> <p data-bbox="751 898 1068 997"><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul data-bbox="719 1018 1068 1203" style="list-style-type: none"> <li>• <b>Fees</b> - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item.</li> </ul> <p data-bbox="691 1234 1068 1371"><b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list.</p> <p data-bbox="691 1392 1068 1549">You cannot create a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list.</p> <p data-bbox="691 1570 1068 1822">The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to <b>Fees</b>. Therefore, this field does not appear when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle	<p>Used to indicate whether you want to create a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> This field is not applicable for the health insurance business.</p>	Yes
Bundle Type	<p>Used to indicate the type of the price item bundle. If the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list, the valid values are:</p> <ul style="list-style-type: none"> <li>• <i>Regular Bundle</i></li> <li>• <i>Phantom Bundle</i></li> <li>• <i>Ratio Bundle</i></li> </ul> <p>However, if the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Fees</b> option is selected from the <b>Price Item Type</b> list, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b>.</p> <p><b>Note:</b> This field appears when the <b>Yes</b> option is selected from the <b>Bundle</b> list. This field is enabled when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Yes</b> option is selected from the <b>Bundle</b> list. You cannot define a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list. This field is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are creating a price item bundle.</p>
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>No</li> </ul>	
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p> <p><b>Note:</b> This field appears when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p>	Yes
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the <b>Send Price Items for Approval</b> button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item Manager To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Price Item Manager To Do Type</b> field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p>	Yes (Conditional)
		<p><b>Note:</b> This field is required when the price item manager To Do type is specified for the price item or price item bundle.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	
Floor and Ceiling Type	<p>Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:</p> <ul style="list-style-type: none"> <li>• <b>Absolute Value Range</b> - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$.</li> <li>• <b>Spread Amount</b> - Used when you want to define the average floor and ceil limits based on the spread amount.</li> <li>• <b>Spread Percentage</b> – Used when you want to define the average floor and ceil limits based on the spread percentage.</li> </ul> <p><b>Note:</b></p> <ul style="list-style-type: none"> <li>• In case of <b>Spread Amount</b> and <b>Spread Percentage</b> options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived.</li> <li>• This field is not applicable for the health insurance business.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.</p>

Field Name	Field Description	Mandatory (Yes or No)
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal management module.	No
Variable Price	<p>Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module.</p> <p><b>Note:</b></p> <p>If the <b>Variable Price</b> option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.</p> <p>However, if the <b>Variable Price</b> option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.</p>	No

3. Enter the required details in the **Main** section.
4. Associate, edit, or disassociate parameters from the price item or price item bundle, if required.
 

**Note:** For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.
5. Associate or disassociate the price item or price item bundle from the required divisions.
6. Associate or disassociate the SQIs from the price item or price item bundle for the required divisions.
7. Define, edit, or remove the accrual type criteria of the price item or price item bundle from the required divisions.
 

**Note:** This step is not applicable for the health insurance business.
8. Associate or disassociate the price item or price item bundle from a hierarchy entity in an entity hierarchy relationship of the required divisions.
 

**Note:** This step is not applicable for the health insurance business.
9. Define, edit, or remove the cost of the price item or price item bundle from the required divisions.
 

**Note:** This step is not applicable for the health insurance business.
10. Define, edit, or remove the average price floor and ceil limits of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

11. Define, edit or remove the negotiability floor and ceil values of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

12. Define, edit, or remove the division-specific characteristics from the price item or price item bundle. if required.
13. Define, edit, or remove characteristics of the price item or price item bundle, if required.
14. Click **Save**.

The new price item is defined.

**Note:**

While creating a price item or price item bundle which is available for pricing, the contract type specified in the **Default Contract Type** option type of the **C1\_PRICING** feature configuration is automatically associated to the price item or price item bundle.

The system allows you to add a price item to the new price item bundle when:

- Price item and price item bundle (whose copy you are creating) are associated to the same contract type.
- Price item is associated with the division to which the price item bundle (whose copy you are creating) is associated.
- Another price item bundle with the same price item, relationship type, and date range combination does not exist in the system.

## Viewing the Price Item or Price Item Bundle Details

### Procedure

To view the details of a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price item or price item bundle whose details you want to view.

The **Price Item** screen appears. It contains the following zones:

- [Price Item](#) on page 940
  - [Price Item Characteristics](#)
  - [Parameters](#) on page 942
  - [Predefined Parameter Values for Price Item](#) on page 943
  - [Divisions](#) on page 943
  - [Division-Specific SQIs for Price Item](#) on page 944
  - [Division-Specific Characteristics for Price Item](#) on page 944
  - [Division-Specific Accrual Type Criteria for Price Item](#) on page 945
  - [Division-Specific Hierarchy for Price Item](#) on page 945
  - [Division-Specific Cost for Price Item](#) on page 946
  - [Division-Specific Average Price Floor and Ceil Values for Price Item](#) on page 947
  - [Division-Specific Negotiability Floor and Ceil Values for Price Item](#)
  - [Price Item Relationship](#) on page 948
3. View the basic details of the price item or price item bundle in the **Price Item** zone.
  4. View the characteristics of the price item or price item bundle in the **Price Item Characteristics** zone.
  5. View the parameters associated with the price item or price item bundle in the **Parameters** zone.
  6. View the valid predefined parameter values of the price item or price item bundle in the **Predefined Parameter Values for Price Item** zone.
  7. View the divisions to which the price item or price item bundle is associated in the **Divisions** zone.
  8. View the SQIs associated with the price item or price item bundle for a division in the **Division-Specific SQIs for Price Item** zone.
  9. View the division-specific characteristics of the price item or price item bundle in the **Division-Specific Characteristics for Price Item** zone.
  10. View the accrual type criteria of the price item or price item bundle for a division in the **Division-Specific Accrual Type Criteria for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

11. View the hierarchy entity to which the price item or price item bundle is associated in a division in the **Division-Specific Hierarchy for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

12. View the cost of the price item or price item bundle for a division in the **Division-Specific Cost for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

13. View the average price floor and ceil limits of the price item or price item bundle for a division in the **Division-Specific Floor and Ceil Values for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

14. View the negotiability floor and ceil values of the price item or price item bundle for a division in the **Division-Specific Negotiability Floor and Ceil Values for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

15. View the price items or price item bundles related to the parent price item or price item bundle in the **Price Item Relationship** zone.

**Note:** This step is not applicable for the health insurance business.

## Price Item

The **Price Item** zone displays the details of the price item or price item bundle. It contains the following sections:

- **Main** – Displays basic information about the price item or price item bundle. It contains the following fields:

Field Name	Field Description
Price Item	Displays the price item or price item bundle.
Description	Displays the description of the price item or price item bundle.
Price Item Usage	Indicates whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul>
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul>
	<b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list.
Bundle	Indicates whether the price item is a bundle. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Bundle Type	Indicates the type of the price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul>
	<b>Note:</b> This field appears when the <b>Yes</b> option is selected from the <b>Bundle</b> list.
Global Price List	Indicates whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Contract Type	Displays the contract type to which the price item or price item bundle is associated.
Price Item Manager To Do Type	Indicates the To Do type using which a To Do should be created when the deal creator or approver requests

Field Name	Field Description
	<p>the price item manager (i.e. clicks the <b>Send Price Items for Approval</b> button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>
Price Item Manager To Do Role	<p>Indicates that users with the specified To Do role can approve the average price of the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits of the To Do role.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>
Average Price Floor and Ceil Type	<p>Indicates the manner in which you want to define the average price floor and ceil limits of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Absolute Value Range</li> <li>• Spread Amount</li> <li>• Spread Percentage</li> </ul>
Sort Sequence	<p>Displays the sequence in which the price item appears in the price item hierarchy of the deal management module.</p>
Variable Price	<p>Indicates whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module.</p> <p><b>Note:</b></p> <p>If the <b>Variable Price</b> option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.</p> <p>However, if the <b>Variable Price</b> option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.</p>

- **Record Actions** – The **Record Actions** section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price item or price item bundle.

- **Record Information** – The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item or price item bundle is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

### **Parameters**

The **Parameters** zone lists the parameters which are associated with the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the parameter is associated with the price item or price item bundle.
Effective End Date	Displays the date till when the parameter is associated with the price item or price item bundle.
Parameter	Indicates the parameter which is associated with the price item or price item bundle.  <b>Note:</b> It has a link. On clicking the link, the <b>Parameter</b> screen appears where you can view the details of the respective parameter.
Business Label	Displays the business label of the parameter.
Display Order	Indicates the order in which the parameter and its value should appear in the pricing parameter information string across the application.
Parameter Usage	Indicates whether you can use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Aggregation</li> <li>• Pricing</li> </ul>

Column Name	Column Description
Mandatory	Indicates whether the parameter is mandatory while defining the price item pricing.
Priority	Indicates the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.

On clicking the **Broadcast** (📡) icon corresponding to a parameter, the **Predefined Parameter Values for Price Item** zone appears where you can view the valid predefined parameter values of the price item or price item bundle.

#### Divisions

The **Divisions** zone lists the divisions to which the price item or price item bundle is associated. It contains the following column:

Column Name	Column Description
Division	Indicates the division to which the price item or price item bundle is associated.  <b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the respective division.

On clicking the **Broadcast** (📡) icon corresponding to a division, the **Division-Specific SQIs for Price Item, Division-Specific Characteristics for Price Item, Division-Specific Accrual Type Criteria for Price Item, Division-Specific**

### Hierarchy for Price Item, Division-Specific Cost for Price Item, Division-Specific Average Price Floor and Ceil Values for Price Item and Division-Specific Negotiability Floor and Ceil Values for Price Item zones appear.

You can filter the list using the **Division** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

#### Division-Specific Characteristics for Price Item

The **Division-Specific Characteristics for Price Item** zone lists the characteristics of the price item or price item bundle which are defined for the division. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the price item or price item bundle characteristic is effective for the division.
Characteristic Type	Indicates the characteristic type.  <b>Note:</b> It has a link. On clicking the link, the <b>Characteristic Type</b> screen appears where you can view the details of the respective characteristic type.
Characteristic Value	Displays the value of the characteristic type.

By default, the **Division-Specific Characteristics for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a division in the **Divisions** zone.

#### **Related Topics**

#### **Division-Specific Accrual Type Criteria for Price Item**

**Note:** This topic is not applicable for the health insurance business.

The **Division-Specific Accrual Type Criteria for Price Item** zone lists the accrual type criteria of the price item or price item bundle which is defined for the division. It contains the following column:

Column Name	Column Description
Accrual Type Criteria	Indicates whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: <ul style="list-style-type: none"> <li>• Actual</li> <li>• Historical</li> <li>• Not Applicable</li> </ul>

By default, the **Division-Specific Accrual Type Criteria for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a division in the **Divisions** zone.

#### **Related Topics**

For more information on...	See...
<b>Price Item</b> screen	<a href="#">Price Item (Used for Viewing)</a> on page 939

#### **Division-Specific Hierarchy for Price Item**

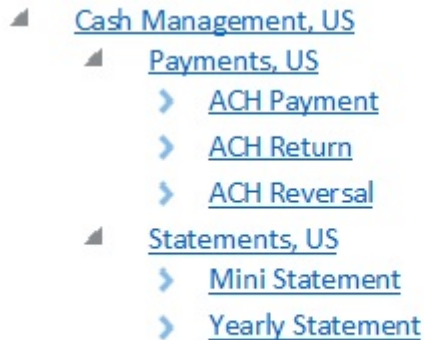

**Note:** This topic is not applicable for the health insurance business.

The **Division-Specific Hierarchy for Price Item** zone lists the following in a tree structure:

- Information string of the hierarchy entity at the first level in the entity hierarchy relationship

- Information string of the hierarchy entities at the subsequent levels in the entity hierarchy relationship
- Information string of the price items which are associated with the hierarchy entities at different levels in the entity hierarchy relationship

For example,

Here, the Cash Management, US (at the first level), Payments, US (at the second level), and Statements, US (at the second level) are the hierarchy entity nodes. And, the ACH Payment, ACH Return, ACH Reversal, Mini Statement, and Yearly Statement are the price item nodes.

Each node in the tree has a link. If you click the link on the hierarchy entity node, the **Hierarchy Entity** screen appears where you can view the details of the respective hierarchy entity. However, if you click the link on the price item node, the **Price Item** screen appears where you can view the details of the respective price item.

It contains the following field:

Field Name	Field Description
Hierarchy	Displays the entity hierarchy relationship code.

In addition, it contains the following buttons:

Button Name	Button Description
Expand All	Used to expand all nodes at once in the entity hierarchy relationship.
Collapse All	Used to collapse all nodes at once in the entity hierarchy relationship.

By default, the **Division-Specific Hierarchy for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📢) icon corresponding to a division in the **Divisions** zone.

### **Related Topics**

For more information on...	See...
<b>Price Item</b> screen	<a href="#">Price Item (Used for Viewing)</a> on page 939

### **Division-Specific Cost for Price Item**

**Note:** This topic is not applicable for the health insurance business.

The **Division-Specific Cost for Price Item** zone lists the costs of the price item or price item bundle which is defined for the division. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the cost of the price item or price item bundle is effective for the division.
Cost Type	Indicates the type of cost incurred in the division for the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Additional Fixed Cost</li> <li>• Additional Variable Cost</li> <li>• Fixed Third Party Cost</li> <li>• Fixed Internal Cost</li> <li>• Variable Internal Cost</li> <li>• Variable Third Party Cost</li> </ul>
Cost Value	Displays the cost amount.
Cost Currency	Indicates the currency in which the cost is specified.  <b>Note:</b> It has a link. On clicking the link, the <b>Currency</b> screen appears where you can view the details of the respective currency.

By default, the **Division-Specific Cost for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a division in the **Divisions** zone.

#### **Division-Specific Average Price Floor and Ceil Values for Price Item**

**Note:** This topic is not applicable for the health insurance business.

The **Division-Specific Average Price Floor and Ceil Values for Price Item** zone lists the average price floor and ceil limits of the price item or price item bundle which are defined for the division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates that users with the specified To Do role can approve the average price of the price item or price item bundle in a deal when it is within the specified floor and ceil limits.  <b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.
Floor Value	Displays the floor (i.e. lower) limit of the To Do role.

Column Name	Column Description
	<b>Note:</b> This column appears when the <b>Absolute Value Range</b> option is selected for the <b>Average Price Floor and Ceil Limits</b> list for a price item or price item bundle.
Ceil Value	Displays the ceil (i.e. upper) limit of the To Do role. <b>Note:</b> This column appears when the <b>Absolute Value Range</b> option is selected for the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.
Floor and Ceil Currency	Indicates the currency in which the average price floor and ceil limits are defined for the price item or price item bundle. <b>Note:</b> It has a link. On clicking the link, the <b>Currency</b> screen appears where you can view the details of the respective currency.
Spread Amount	Indicates the spread amount specified while defining a price item or price item bundle or assigned to a To Do role. <b>Note:</b> This column appears when the <b>Spread Amount</b> option is selected for the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.
Spread Percentage	Indicates the spread percentage specified while defining a price item or price item bundle or assigned to a To Do role. <b>Note:</b> This column appears when the <b>Spread Percentage</b> option is selected for the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.

By default, the **Division-Specific Average Price Floor and Ceil Values for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** () icon corresponding to a division in the **Divisions** zone.

#### **Price Item Relationship**

**Note:** This topic is not applicable for the health insurance business.

The **Price Item Relationship** zone lists the price items or price item bundles which are associated with the parent price item or added to the price item bundle. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.
Effective Start Date	Displays the date from when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Effective End Date	Displays the date till when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Relationship Type	Indicates how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Bundle</li> <li>• Child Price Item</li> <li>• Custom</li> <li>• Denominator</li> <li>• Numerator</li> <li>• Other</li> <li>• Price Item</li> <li>• Product Group</li> <li>• Service</li> <li>• Service Group</li> </ul>
Bundle Type	Indicates the type of the price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <p><b>Note:</b> The data appears in this column when the associated price item is a bundle.</p>
Price Item Parameters	Displays the parameters and their values based on which you want to determine pricing for the price item or price item bundle.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Price Item**, **Description**, **Effective Start Date**, and **Relationship Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

You can associate or disassociate a price item or price item bundle from a parent price item and add or remove a price item or price item bundle from a price item bundle by clicking the **Add/Edit** link in the upper right corner of this zone.

### **Editing a Price Item or Price Item Bundle**

#### Prerequisites

To edit a price item or price item bundle, you should have:

- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1\_PRICING** feature configuration

#### Procedure

To edit a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price item or price item bundle whose details you want to edit.

The **Price Item** screen appears.

3. Click the **Edit** button in the **Price Item** zone.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

#### **Note:**

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1\_PPARM\_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
  - Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
  - Define the accrual type criteria of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

- Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

**Note:** This step is not applicable for the health insurance business.

- Define the cost of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

- Define the average price floor and ceil limits of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

- Define the negotiability floor and ceil values of the price item or price item bundle for a division

**Note:** This step is not applicable for the health insurance business.

- Define the division-specific characteristics for the price item or price item bundle
- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Displays the price item or price item bundle.	Not applicable
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Pricing</b> - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system.</li> </ul> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul style="list-style-type: none"> <li>• <b>Pricing and Billing</b> - Used when you want to define pricing and create charges for the price item or price item bundle in the system.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> You can change the price item usage of a price item or price item bundle from <b>Pricing</b> to <b>Pricing and Billing</b>. But, you cannot change the price item usage of a price item or price item bundle from <b>Pricing and Billing</b> to <b>Pricing</b>.</p>	
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Rate</b> - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items.</li> </ul> <div data-bbox="748 856 1073 968" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> <li>• <b>Fees</b> - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item.</li> </ul> <div data-bbox="686 1192 1073 1816" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list. You cannot create a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to <b>Fees</b>. Therefore, this field does not appear when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle	<p>Used to indicate whether you want to create a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> This field is not applicable for the health insurance business.</p>	Yes
Bundle Type	<p>Used to indicate the type of the price item bundle. If the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list, the valid values are:</p> <ul style="list-style-type: none"> <li>• <i>Regular Bundle</i></li> <li>• <i>Phantom Bundle</i></li> <li>• <i>Ratio Bundle</i></li> </ul> <p>However, if the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Fees</b> option is selected from the <b>Price Item Type</b> list, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b>.</p> <p><b>Note:</b> This field appears when the <b>Yes</b> option is selected from the <b>Bundle</b> list. This field is enabled when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Yes</b> option is selected from the <b>Bundle</b> list. You cannot define a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list. This field is not applicable for the health insurance business.</p>	Yes (Conditional)  <b>Note:</b> This field is required when you are creating a price item bundle.
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>No</li> </ul>	
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p> <p><b>Note:</b> This field appears when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p>	Yes
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the <b>Send Price Items for Approval</b> button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item Manager To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Price Item Manager To Do Type</b> field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the price item manager To Do type is specified for the price item or price item bundle.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	
Average Price Floor and Ceil Type	<p>Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:</p> <ul style="list-style-type: none"> <li>• <b>Absolute Value Range</b> - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$.</li> <li>• <b>Spread Amount</b> - Used when you want to define the average floor and ceil limits based on the spread amount.</li> <li>• <b>Spread Percentage</b> – Used when you want to define the average floor and ceil limits based on the spread percentage.</li> </ul> <p><b>Note:</b></p> <ul style="list-style-type: none"> <li>• In case of <b>Spread Amount</b> and <b>Spread Percentage</b> options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived.</li> <li>• This field is not applicable for the health insurance business.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.</p>

Field Name	Field Description	Mandatory (Yes or No)
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal management module.	No
Variable Price	<p>Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module.</p> <p><b>Note:</b></p> <p>If the <b>Variable Price</b> option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.</p> <p>However, if the <b>Variable Price</b> option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.</p>	No

- Modify the required details in the **Main** section.
- Associate, edit, or disassociate parameters from the price item or price item bundle, if required.

**Note:**

You can edit the parameter details and remove a parameter from the price item or price item bundle when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which is used for aggregation, whenever required. However, you can add a parameter which is used for pricing when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.

- Associate or disassociate the price item or price item bundle from the divisions, if required.

**Note:** If the price item or price item bundle is associated to a division to which you do not have access, then the corresponding row in the **Divisions** section is grayed out.

- Associate or disassociate the SQIs from the price item or price item bundle for the required divisions.
- Define, edit, or remove the accrual type criteria of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

9. Associate or disassociate the price item or price item bundle from a hierarchy entity in an entity hierarchy relationship of the required divisions.

**Note:** This step is not applicable for the health insurance business.

10. Define, edit, or remove the cost of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

11. Define, edit, or remove the average price floor and ceil limits of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

12. Define, edit or remove the rate negotiability floor and ceil values of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

13. Define, edit, or remove the division-specific characteristics from the price item or price item bundle. if required.

14. Define, edit, or remove characteristics of the price item or price item bundle, if required.

15. Click **Save**.

The changes made to the price item or price item bundle are saved.

## Price List

---

A price list allows you to define standard prices for a group of price items. In other words, a price list is a rate card for price items or services which are offered to the accounts or persons. You can create more than one price list. For example, you can create a price list for large, medium-sized, and small customers. You can also create a set of price lists for different regions. You can define two types of price lists — **Standard** and **Promotional**. You can also set eligibility criteria for the price list with effective start date, end date, and description. At present, there is no functionality associated with the price list type. The implementation team can use the price list type to define the custom logic as per the business requirements.

A price list and price item pricing within the price list are effective for a particular duration. You can define multiple pricing for the same price item and variance parameter or product parameters combination within a price list when the price item pricing date range is different. You can assign the same price item in multiple price lists and define different pricing for the price item in each price list based on the business requirements.

The system enables you to specify the duration for which the price list is available for assignment to an account or a person. However, note that at present, the availability start and end dates are not used in the product while assigning a price list to an account or a person. If required, the implementation team can build the custom logic using the availability start and end dates in the product.

Once you create a price list, you have to assign price items to the price list and define pricing for each price item assigned to the price list. The price lists are then assigned to accounts or persons to indicate the prices that will be charged for various price items or services offered to them. You can assign multiple price lists to an account or a person for an overlapping date range. But, you need to specify the priority or order for the price list in which the pricing from the price list should be considered. You can also assign the same price list to multiple accounts or persons.

You can define whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, you can define whether the account or person can inherit price item pricing from the price list hierarchy.

The system allows you to create the following:

- **Default Price List** – You can create a price list and set it as a default price list for a particular division. To define a default price list for a division, you need to set the value for the **Default Price List ID** parameter in the price assignment search algorithm which is attached to the division. If the effective price item pricing is not available at any level in the customer hierarchy, the system checks whether the default price list is specified in the price assignment search algorithm. If the default price list is specified in the algorithm, the system checks whether effective price item pricing is available in the default price list and accordingly uses the price item pricing. You can have the same price list as a the default price list for multiple divisions.
- **Global Price List** – You can create one global price list in the system. It is used when the price item pricing is not available at any level in the customer hierarchy and in the default price list associated with the division. You can assign only those price items in the global price list whose the **Global Price List** option is set to **Yes**. The global price list is used while searching an effective price item pricing when the **Global Price List** parameter in the price assignment search algorithm (attached to the division) is set to **Y**. Finally, if the effective price item pricing is not available in the default and/or global price list, an error message occurs indicating that the effective price item pricing is not available in the system.

- **Template Price List** – You can define a template price list and assign template price item pricing to a template price list. You cannot assign template price list to an account or a person. You can only create a copy of a template price item pricing which is assigned to a template price list. Once you create a copy of the template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

## Price List (Used for Searching)

The **Price List** screen allows you to search for a price list using various search criteria. It also allows you to define a price list. It contains the following zones:

- [Search Price List](#) on page 959
- [Price List Price Items](#) on page 963
- [Price Item Pricing](#)
- [Price Assignment Tree](#)

Through this screen, you can navigate to the following screens:

- [Price List Price Item Pricing](#) on page 982
- [Price List Assignments](#) on page 1039
- [Entities Eligible for Price List Assignment](#) on page 1041
- [Price Item Pricing \(Used for Viewing\)](#)

## Search Price List

The **Search Price List** zone allows you to search for a price list using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price list using the price list details. The valid value is: <ul style="list-style-type: none"> <li>• Price List Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Price List Details</b> option is selected.	
Price List ID	Used to search a particular price list.	No
Price List Description	Used to search price lists with a particular description.	No
Effective Start Date	Used to search price lists which are effective from a particular date onwards.	No
Effective End Date	Used to search price lists which are effective till a particular date.	No
Price List Type	Used to search price lists which belong to a particular type. The valid values are: <ul style="list-style-type: none"> <li>• Promotional</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Standard</li> </ul> <p><b>Note:</b> By default, the <b>Standard</b> option is selected.</p>	
Global Price List	<p>Used to indicate whether you want to search global price lists. The valid values are:</p> <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	No
Availability Start Date	<p>Used to search price lists which are available for assignment to an account or a person from a particular date.</p> <p><b>Note:</b> This field appears when you click the <b>Advanced Search</b> link in the top right corner of this zone.</p>	No
Availability End Date	<p>Used to search price lists which are available for assignment to an account or a person till a particular date.</p> <p><b>Note:</b> This field appears when you click the <b>Advanced Search</b> link in the top right corner of this zone.</p>	No
Status	<p>Used to search price lists with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> <li>Proposed</li> <li>Template</li> </ul> <p><b>Note:</b> This field appears when you click the <b>Advanced Search</b> link in the top right corner of this zone.</p>	No
Division	<p>Used to search price lists which are associated with a particular division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List	Used to search price lists which inherit pricing from a particular parent price list.	No
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears where you can search for the respective parent price list.</p> <p>This field appears when you click the <b>Advanced Search</b> link in the top right corner of this zone.</p>	
Parent Price List Effective Date	Used to search price lists that inherit pricing from a particular parent price list which is effective from a particular date onwards.	No
	<p><b>Note:</b> This field appears when you click the <b>Advanced Search</b> link in the top right corner of this zone.</p>	

**Note:** You must specify at least one search criterion while searching for a price list.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	Displays the concatenated string of information about the price list separated by a comma (,).
	<p><b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.</p>
Status	<p>Indicates the current status of the price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Template</li> </ul>
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.

Column Name	Column Description
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Price List</b> screen appears where you can create a new price list using an existing price list.
Price List Pricing	On clicking the <b>View</b> (  ) icon in the <b>Price List Pricing</b> column, the <b>Price List Price Item Pricing</b> screen appears where you can view and edit a list of price items pricing information assigned to the price list.
Price List Assigned To	On clicking the <b>View</b> (  ) icon in the <b>Price List Assigned To</b> column, the <b>Price List Assignments</b> screen appears where you can view the details of the persons and accounts to which the price list is assigned.
Eligible Accounts/Persons	On clicking the <b>View</b> (  ) icon in the <b>Eligible Accounts/Persons</b> column, the <b>Entities Eligible for Price List Assignment</b> screen appears where you can search for a list of eligible accounts and persons to which you want to assign the price list in a particular division.

**Note:**

However, when you search for a price list by specifying the date (which can be current, past or future date) in the **Parent Price List Effective Date** field, the system retrieves the price lists that meet the search criteria along with the details of the parent price list that is effective on that date.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

On clicking the **Broadcast** () icon corresponding to the **Price List Information** field, the **Price List Price Items** zone appears where you can view a list of price items to which the price list is assigned.

### Price List Price Items

The **Price List Price Items** zone lists price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	<p>Displays the concatenated string consisting of pricing information and pricing ID which are separated by a comma (,) for the price list.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the pricing information of the respective price list.</p>
Price Item	Displays the price item or price item bundle.
Pricing Parameters	<p>Used to specify multiple parameters based on which you want to determine the pricing utilization.</p> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARAM_FLG)</b> feature configuration is set to <b>True</b>.</p>
Pricing Status	<p>Displays the status of pricing for the price item. The valid values are:</p> <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Rate Info	<p>Displays the rate of the price item.</p> <p><b>Note:</b></p> <p>If the price assignment has only one price component, you can view the rate defined in the pricing directly through the <b>Rate Info</b> column.</p> <p>However, if the price assignment has more than one price components, then the <b>Rate Info</b> column contains a string indicating the tiering type and pricing currency. It also contains “...” which indicates that for more information about the pricing you should navigate to the <b>Price Item Pricing</b> screen.</p>
Start Date	Displays the date from when the price item pricing is effective for the price list.
End Date	Displays the date till when the price item pricing is effective for the price list.

Column Name	Column Description
Price Assignment Type	<p>Indicates the type of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <p><b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p>
Duplicate	<p>On clicking the <b>Duplicate</b> (📄) icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.</p>

By default, the **Price List Price Items** zone does not appear in the **Price List** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the price list in the **Search Price List** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the **Pricing Information** field, the **Price Item Pricing** and **Pricing Structure** zones appear where you can view the details about the price item pricing and its structure.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4062.

## **Searching for a Price List**

### **Prerequisites**

To search for a price list, you should have:

- Divisions defined in the application
- Price list associated with the division to which the user belongs

### **Procedure**

To search for a price list:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.  
A sub-menu appears.
3. Click the **Search** option from the **Price List** sub-menu.  
The **Price List** screen appears.
4. Enter the search criteria in the **Search Price List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of price lists that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### Viewing Price Items Assigned to a Price List

#### Prerequisites

To view price items assigned to a price list, you should have:

- An algorithm defined using the **C1-PLPINFO** algorithm type and attached to **Pricelist Products Assignment Information** system event in the **Algorithms** tab of the **Installation Options – Framework** screen

#### Procedure

To view price items assigned to a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Broadcast** () icon corresponding to the price list whose price items details you want to view.  
The **Price List Price Items** zone appears.
3. View the price items that are assigned to the price list in the **Price List Price Items** zone.

### Related Topics

### Defining a Price List

## Procedure

To define a price list:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.  
A sub-menu appears.
3. Click the **Add** option from the **Price List** sub-menu.

The **Price List** screen appears. It consists the following sections:

- **Main** - Used to specify basic details about the price list.
- **Hierarchy** - Used to associate the price list with one or more parent price lists for a particular duration.
- **Divisions** - Used to associate the price list with one or more divisions.
- **Eligibility** - Used to define eligibility criteria for the price list.
- **Characteristics** - Used to define the characteristics for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective.	Yes
	<b>Note:</b> By default, the current date appears in this field.	
Effective End Date	Used to specify the date till when the price list is effective.	No
	<b>Note:</b> The effective end date cannot be earlier than the effective start date.	
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Standard</b> option is selected.	
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Availability Start Date	<p>Used to the specify the date from when the price list is available for assignment to an account or a person.</p> <p><b>Note:</b> At present, the availability start date is not used in the price item while assigning a price list to an account or a person. It is available for future use.</p>	No
Availability End Date	<p>Used to the specify the date till when the price list is available for assignment to an account or a person.</p> <p><b>Note:</b> The availability end date cannot be earlier than the availability start date. At present, the availability end date is not used in the price item while assigning a price list to an account or a person. It is available for future use.</p>	No
Available for Deal Pricing	Used to indicate whether the price list is available for deal pricing or not.	No
Standard for Deal Pricing	Used to indicate whether the price list is applicable for defining costs or floor and ceil limits or commitments at the time of deal pricing.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No
Status	<p>Used to indicate the status of the price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Active</b> - Used to indicate that the price list is used for billing.</li> <li>• <b>Inactive</b> - Used to indicate that the price list is no longer used for billing.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>Proposed</b> - Used to indicate that the price list is used for quotations.</li> <li>• <b>Template</b> - Used to indicate that the price list is a template price list.</li> </ul>	
	<p><b>Note:</b> By default, the <b>Active</b> option is selected.</p>	

**Tip:** Alternatively, you can access the **Price List** screen by clicking the **Add** button in the **Page Title** area of the **Price List** screen.

4. Enter the required details in the **Main** section.

**Note:** By default the **Main** section is displayed.

5. Click the **Show All** link from the **Section** to view all the sections and define or associate the following:

- Associate the price list with one or more parent price list, if required.
- Associate price list with one or more divisions, if required.
- Define eligibility criteria for the price list, if required.
- Define characteristics for the price list, if required.

6. Click **Save**.

**Note:** The price list ID is generated automatically when the price list is created.

### Defining the Price List Hierarchy

Oracle Revenue Management and Billing allows you to define the price list hierarchy. It helps you to inherit the price item pricing from the parent price list if the price item pricing is not available in the price list (assigned to the account, person, or parent person). And, if the price item pricing is not available in the parent price list, the system will search for the price item pricing in the parent's parent price list (i.e. in the grandparent price list) and continue till it reaches the last level in the hierarchy.

In other words, when you define the price list hierarchy and assign the price list to an account or a person, the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. However, if the price item pricing is available on both the assigned and parent price lists, the system derives the price item pricing from the assigned price list.

You can define multiple parent price lists for a price list. But, only one parent price list is effective for a particular duration. Two or more price lists can have the same parent price list.

### **Procedure**

To define the price list hierarchy:

1. Click the **Hierarchy** or **Show All** link from the **Section** in the **Price List** screen when you are defining, editing, or copying a price list.

The **Hierarchy** section appears. It contains the following fields in a grid:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Parent Price List Effective From Date	Used to specify the date from when the price list inherits pricing from the parent price list.	Yes (Conditional) <b>Note:</b> This field is required when you are associating the price list with a parent price list.
Parent Price List Effective To Date	Used to specify the date till when the price list inherits pricing from the parent price list. <b>Note:</b> The parent price list effective to date cannot be earlier than the parent price list effective from date and later than price list effective end date.	No
Parent Price List	Used to specify the parent price list ID to which you want to associate the price list. <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears. On specifying the parent price list, the description of the parent price list appears corresponding to the <b>Parent Price List</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are associating the price list with a parent price list.

2. Enter the required details in the **Hierarchy** section.

**Note:** You can search for a price list by clicking the **Search** (🔍) icon corresponding to the **Parent Price List** field.

3. If you want to associate the price list with more than one parent price list, click the **Add** (+) icon corresponding to the parent price list and then repeat step 2.

**Note:**

You can associate a price list with multiple parent price lists. But, only one parent price list is effective for a particular duration. Also, while associating a price list with a parent price list, you can only specify a price list which is effective during the specified duration.

If you want to remove a parent price list from the price list hierarchy, click the **Delete** (🗑️) icon corresponding to the parent price list.

**4. Click Save.**

The price list is associated with the parent price lists.

**Defining a Characteristic for a Price List****Prerequisites**

To define a characteristic for a price list, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List**)

**Procedure**

To define a characteristics for a price list:

1. Click the **Characteristics** or **Show All** link from the **Section** in the **Price List** window when you are defining, editing, or copying a price list.

The **Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price List</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list.

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the price list, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price list, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price list.

### **Associating a Price List with a Division**

You can assign a price list only to those accounts or persons which belong to the division to which the price list is associated. Therefore, you need to associate the price list with appropriate divisions.

#### **Prerequisites**

To associate a price list with a division, you should have:

- Divisions defined in the application

#### **Procedure**

To associate a price list with a division:

- Click the **Divisions** or **Show All** link from the **Section** in the **Price List** window when you are defining, editing, or copying a price list.

The **Divisions** section appears. It contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the price list.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	

- Select the required division from the list.
- If you want to associate the price list with more than one division, click the **Add (+)** icon corresponding to the division and then repeat step 2.

**Note:** However, if you want to remove the price list from a division, click the **Delete (🗑)** icon corresponding to the division.

- Click **Save**.  
The price list is associated with the divisions.

**Tip:** Alternatively, you can associate a price list with a division using the **Division** screen.

## Defining Eligibility Criteria for a Price List

### Prerequisites

To define eligibility criteria for a price list, you should have:

- The **Price List Eligibility Criteria** check box selected in the **Parameter Usage** section while defining the parameter

### Procedure

To define eligibility criteria for a price list:

- Click the **Eligibility** or **Show All** link from the **Section** in the **Price List** screen when you are defining, editing, or copying a price list.

The **Eligibility** section appears. It contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Criteria	On clicking the <b>Add (+)</b> icon, you can associate eligibility criteria of parameters for the price list.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining an eligibility criteria for the price list.

Column Name	Column Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the criteria is effective for the price list.	Yes (Conditional) <b>Note:</b> This field is required when you are defining an eligibility criteria for the price list.
Effective End Date	Used to specify the date till when the criteria is effective for the price list.	No
Description	Used to specify the description for the criteria type.	Yes

- Enter the required details in the **Eligibility** section.
- If you want to define more than one eligibility criteria for the price list, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove the eligibility criteria, click the **Delete (🗑)** icon corresponding to the criteria.

- Associate eligibility criteria of parameter for the price list, if required.
- If you want to define more than one eligibility criteria of parameter for the price item, click the **Add (+)** icon corresponding to the parameter.

**Note:** However, if you want to remove the eligibility criteria of parameter for the price item, click the **Delete (🗑)** icon corresponding to the parameter.

- Click **Save**.

The eligibility criteria are defined for the price list.

### **Related Topics**

For more information on...	See...
How to create a price list	<a href="#">Defining a Price List</a> on page 965

How to associate eligibility criteria of parameter for a price list	<a href="#">Associating Eligibility Criteria of Parameters for a Price List</a>

### **Copying a Price List**

Instead of creating a price list from scratch, you can create a new price list using an existing price list. This is possible through copying a price list. On copying a price list, the details including the pricing parameters, divisions, characteristics, eligibility criteria, and the assigned price items are copied to the new price list. You can then edit the details, if required.

### **Prerequisites**

To copy a price list, you should have:

- Price list (whose copy you want to create) defined in the application
- Price list (whose copy you want to create) associated with the division to which the user belongs

### **Procedure**

To copy a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Copy**  icon in the **Copy** column corresponding to the price list using which you want to define a new price list.

The **Price List** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price list.
- **Hierarchy** – Used to define parent price list for the price list for a particular duration.
- **Divisions** – Used to associate price list with one or more divisions.
- **Eligibility Criteria** – Used to define eligibility criteria for price list.
- **Characteristics** – Used to define the characteristics (which are applicable across divisions) for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective	Yes
Effective End Date	Used to specify the date till when the price list is effective.	No
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>	Yes
Global Price List	Used to Indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Availability Start Date	Used to specify the date from when the price list is available for assignment to an account or a person.	Yes
Availability End date	Used to specify the date till when the price list is available for assignment to an account or a person.	No
Available for Deal Pricing	Used to indicate whether the price list is available for deal pricing or not.	No
Standard for Deal Pricing	Used to indicate whether the price list is applicable for defining costs or floor and ceil limits or	No

Field Name	Field Description	Mandatory (Yes or No)
	commitments at the time of deal pricing.	
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	Yes
Status	Used to indicate the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> <li>• Template</li> </ul>	Yes
Copy Pricing	Used to indicate whether you want to copy the pricing information to the price list. The valid values are: <ul style="list-style-type: none"> <li>• All</li> <li>• None</li> </ul>	Yes (Conditional)

3. Enter the required details in the **Main** section.
4. Add, edit, or remove the parent price list details, if required.
5. Associate or disassociate the price list from the required divisions.
6. Define, edit, or remove the price list eligibility criteria and parameter eligibility criteria for price list in the, if required.
7. Define, edit, or remove characteristics of the price list, if required.
8. Click **Save**.

The new price list is defined.

**Note:** The price list ID is generated automatically when the price list is defined.

## Price List (Used for Viewing)

The **Price List** screen allows you to view the details of a price list. It also allows you to edit a price list. It contains the following zones:

- **Price List** - Displays the basic details of the price list.
- **Eligibility Criteria** - Displays the eligibility criteria for the price list.
- **Price List Price Items** - Displays the price items that are assigned to the price list.
- **Price Item Pricing**
  - Displays the price item pricing for price items that are assigned to the price list.
- **Pricing Structure**
  - Displays the structure of the price item pricing for price item that are assigned to the price list.

### Price List

The **Price List** zone displays the details of the price list. It contains the following sections:

- **Main** - Displays basic information about the price list. It contains the following fields:

Field Name	Field Description
Price List ID	Displays the price list ID.
Price List Description	Displays the description for the price list.
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Price List Type	Indicates the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>
Global Price List	Indicates whether the price list is a global price list. The valid values are:

Field Name	Field Description
	<ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
