| Submitter To Do Type | Indicates the To Do type for the submitter when the funding request type is resubmitted by the approver. |
| | Note: The Submitter To Do Type field appears when the Approval Required check box is selected. It has a link. On clicking the link, the To Do Type screen appears where you can view the details of the respective To Do type. |
| Submitter To Do Role | Indicates the To Do role for the submitter when the funding request type is resubmitted by the approver. |

| Field Name | Field Description |
|--|---|
| | <p>Note:</p> <p>The Submitter To Do Role field appears when the Approval Required check box is selected.</p> <p>It has a link. On clicking the link, the To Do Role screen appears where you can view the details of the respective To Do role.</p> |
| Currency Conversion Adjustment Algorithm | Indicates the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in credit) is different from the installation options currency. |
| Currency Conversion Payment Algorithm | Indicates the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in debit) is different from the installation options currency. |

- **Characteristics** - The **Characteristics** section lists the characteristics of the funding request type. It contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** - The **Record Actions** section contains the following buttons:

| Button Name | Button Description |
|-------------|---|
| Edit | Used to edit the details of the funding request type. |
| Delete | Used to delete the funding request type. |
| | <p>Note: You can delete a funding request type when you have not created a funding request using the funding request type.</p> |
| Duplicate | Used to create a new funding request type using an existing funding request type. |

- **Record Information** - The **Record Information** section contains the following fields:

| Field Name | Field Description |
|-----------------|---|
| Business Object | Indicates the business object using which the funding request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |
| | <p>Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.</p> |

By default, the **Funding Request Type** zone does not appear in the **Funding Request Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the funding request type in the **Funding Request Type List** zone.

Defining a Funding Request Type

Prerequisites

To define a funding request type, you should have:

- Funding request type business objects defined in the application
- Funding request business objects defined in the application
- Currencies defined in the application
- Funding adjustment types defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- A threshold range algorithm defined using the **C1-FDRTTR** algorithm type
- Required approval profiles defined in the application
- A To Do role assigned to the **C1-FNDSB** To Do type in the application
- Funding currency characteristic type defined in the application (where the characteristic entity is set to **Account**)
- A currency conversion algorithm defined for payments and adjustments using the **C1_CURALGPY** and **C1_CURALGAD** algorithm type, respectively

Procedure

To define a funding request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Funding Request Type**.
A sub-menu appears.
3. Click the **Add** option from the **Funding Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------------------|---|-----------------------|
| Funding Request Type Business Object | Used to indicate the business object using which you want to create the funding request type. | Yes |

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Funding Request Type** screen.

Note: The **Select Business Object** screen appears when there are multiple funding request type business objects defined in the application. If there is only one funding request type business object defined in the application, the **Funding Request Type** screen appears.

4. Select the required funding request type business object from the respective field.
5. Click **OK**.

The **Funding Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the funding request type.
- **Characteristics** - Used to define the characteristics for the funding request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------|--|-----------------------|
| Funding Request Type | Used to specify the funding request type. | Yes |
| Business Object | Indicates the business object using which you are defining the funding request type. | Not applicable |
| Description | Used to specify the description for the funding request type. | Yes |
| Funding Request Business Object | Used to indicate the business object using which you want to create the funding request. | Yes |
| Detailed Description | Used to specify additional information about the funding request type. | No |
| Status | Used to indicate the status of the funding request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |
| | Note: You cannot change the status of a funding request type to Inactive when the corresponding funding request is in a status other than Processed or Rejected . | |
| Funding Amount Currency | Used to indicate the currency in which the total debit and credit amount should be calculated in the funding request. The total debit and credit amount appears in the Statistics section of the Funding Request zone. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|-----------------------|
| | <p>Note:</p> <p>The list includes only those currencies which are defined in the system.</p> <p>If the currency specified in this field is different from the bill's currency, the system does currency conversion before calculating the total debit and credit amount in the funding request. The total debit amount is the sum of funding amount of all bills whose funding amount is in debit. However, the total credit amount is the sum of funding amount and garnishment amount of all bills whose funding amount is in credit. While calculating the total debit amount, the system uses the currency conversion algorithm attached to the Currency Conversion For Payments algorithm spot of the account's division. However, while calculating the total credit amount, the system uses the currency conversion algorithm attached to the Currency Conversion For Adjustments algorithm spot of the account's division.</p> | |
| Account Funding Currency Characteristic Type | Used to indicate the characteristic type. This characteristic should be defined on the account. This characteristic indicates that the funding amount of the account's bills should be converted in the specified currency. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Account Funding Currency Characteristic Type field. On clicking the Search icon, the Characteristic Type Search window appears.</p> <p>You must specify a characteristic type where the characteristic entity is set to Account.</p> <p>The converted amount appears in the Funding Currency Amount column of the Selected Bills zone in the Funding Request screen.</p> <p>If the funding amount is in debit, the system uses the currency conversion algorithm attached to the Currency Conversion For Payments algorithm spot of the account's division. However, if the funding amount is in credit, the system uses the currency conversion algorithm attached to the Currency Conversion For Adjustments algorithm spot of the account's division.</p> | |
| Default Funding Adjustment Type | <p>Used to indicate the adjustment type using which the A/P adjustment should be created against a credit bill on submitting the funding request.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Default Funding Adjustment Type field. On clicking the Search icon, the Adjustment Type Search window appears.</p> <p>In the Default Funding Adjustment Type field, you can only specify an adjustment type where the A/P Request Type Code field is set to REFUND.</p> | Yes |
| Default Garnishment Adjustment Type | Used to indicate the adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------|---|-----------------------|
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Default Garnishment Adjustment Type field. On clicking the Search icon, the Adjustment Type Search window appears.</p> <p>In the Default Garnishment Adjustment Type field, you can only specify an adjustment type where the A/P Request Type Code field is not set to REFUND.</p> | |
| Threshold Range Algorithm | <p>Used to attach an algorithm which helps to calculate the threshold range for a bill based on the number of payments made for the bill in the specified period.</p> <p>Note:</p> <p>You must specify an algorithm which is created using the C1-FDRTTR algorithm type in the Threshold Range Algorithm field.</p> <p>The Search (🔍) icon appears corresponding to the Threshold Range Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | No |
| Defer Processing Count | Used to indicate whether a funding request must be processed in the deferred mode (i.e. in the background) when the number of bills in the funding request exceeds the defer processing count. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|---|
| | <p>Note:</p> <p>You cannot specify a negative value in the Defer Processing Count field.</p> <p>Deferred mode means in the background when the Funding Request Periodic Monitor (C1-FNDRQ) batch is invoked. You can configure the Funding Request Periodic Monitor (C1-FNDRQ) batch such that it is executed at regular intervals. For more information about the Funding Request Periodic Monitor (C1-FNDRQ) batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of bills in a funding request does not exceed the defer processing count, the system will process the funding request in real time (i.e. immediately).</p> | |
| Approval Required | Used to indicate whether the approval is required before creating payments for debit bills and A/P adjustments for credit bills through the funding request. | No |
| Approval Profile | <p>Used to indicate the approval profile using which the system should determine the debit or credit hierarchy level from where the approval is required. The system considers the debit or credit hierarchy level where the funding amount of the debit or credit bill falls within the threshold limit.</p> <p>Note: This field appears when the Approval Required option is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required option is selected.</p> |
| Submitter To Do Type | <p>Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p>Note:</p> <p>You must specify the C1-FNDSB To Do type in the Submitter To Do Type field.</p> <p>The Search  icon appears corresponding to the Submitter To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>This field appears when the Approval Required option is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required option is selected.</p> |

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|---|
| Submitter To Do Role | Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the funding request or raises the request for resubmitting the funding request. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The list includes only those To Do roles which are associated to the specified submitter To Do type.</p> | <p>Note: This field is required when the Approval Required option is selected.</p> |
| Currency Conversion Adjustment Algorithm | Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in credit) is different from the installation options currency. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The Search (🔍) icon appears corresponding to the Currency Conversion Adjustment Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | <p>Note: This field is required when the Currency Conversion Required option is selected in the approval profile.</p> |
| Currency Conversion Payment Algorithm | Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in debit) is different from the installation options currency. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The Search (🔍) icon appears corresponding to the Currency Conversion Payment Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | <p>Note: This field is required when the Currency Conversion Required option is selected in the approval profile.</p> |

6. Enter the required details in the **Main** section.
7. Define characteristics for the funding request type, if required.
8. Click **Save**.

The funding request type is defined.

Defining a Characteristic for a Funding Request Type

Prerequisites

To define a characteristic for a funding request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Funding Request Type**)

Procedure

To define a characteristic for a funding request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a funding request type.

The **Characteristics** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|--|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Funding Request Type . | Note: This field is required when you are defining a characteristic for the funding request type. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, you can search for a predefined characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the funding request type. |

2. Enter the required details in the **Characteristics** section.

- If you want to define more than one characteristic for the funding request type, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the funding request type, click the **Delete (🗑)** icon corresponding to the characteristic.

Editing a Funding Request Type

Prerequisites

To edit a funding request type, you should have:

- Funding request business objects defined in the application
- Currencies defined in the application
- Funding adjustment types defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- A threshold range algorithm defined using the **C1-FDRTTR** algorithm type
- Required approval profiles defined in the application
- A To Do role assigned to the **C1-FNDSB** To Do type in the application
- Funding currency characteristic type defined in the application (where the characteristic entity is set to **Account**)
- A currency conversion algorithm defined for payments and adjustments using the **C1_CURALGPY** and **C1_CURALGAD** algorithm type, respectively

Procedure

To edit a funding request type:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **F** and then click **Funding Request Type**.
A sub-menu appears.
- Click the **Search** option from the **Funding Request Type** sub-menu.
The **Funding Request Type** screen appears.
- In the **Funding Request Type List** zone, click the **Edit (📎)** icon in the **Edit** column corresponding to the funding request type whose details you want to edit.

The **Funding Request Type** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the funding request type.
- Characteristics** - Used to define the characteristics for the funding request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------|--|-----------------------|
| Funding Request Type | Displays the funding request type. | Not applicable |
| Business Object | Indicates the business object using which you are defining the funding request type. | Not applicable |
| Description | Used to specify the description for the funding request type. | Yes |
| Funding Request Business Object | Used to indicate the business object using which you want to create the funding request. | Yes |
| Detailed Description | Used to specify additional information about the funding request type. | No |
| Status | Used to indicate the status of the funding request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |
| | Note: You cannot change the status of a funding request type to Inactive when the corresponding funding request is in a status other than Processed or Rejected . | |
| Funding Amount Currency | Used to indicate the currency in which the total debit and credit amount should be calculated in the funding request. The total debit and credit amount appears in the Statistics section of the Funding Request zone. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|-----------------------|
| | <p>Note:</p> <p>The list includes only those currencies which are defined in the system.</p> <p>If the currency specified in this field is different from the bill's currency, the system does currency conversion before calculating the total debit and credit amount in the funding request. The total debit amount is the sum of funding amount of all bills whose funding amount is in debit. However, the total credit amount is the sum of funding amount and garnishment amount of all bills whose funding amount is in credit. While calculating the total debit amount, the system uses the currency conversion algorithm attached to the Currency Conversion For Payments algorithm spot of the account's division. However, while calculating the total credit amount, the system uses the currency conversion algorithm attached to the Currency Conversion For Adjustments algorithm spot of the account's division.</p> | |
| Account Funding Currency Characteristic Type | Used to indicate the characteristic type. This characteristic should be defined on the account. This characteristic indicates that the funding amount of the account's bills should be converted in the specified currency. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Account Funding Currency Characteristic Type field. On clicking the Search icon, the Characteristic Type Search window appears.</p> <p>You must specify a characteristic type where the characteristic entity is set to Account.</p> <p>The converted amount appears in the Funding Currency Amount column of the Selected Bills zone in the Funding Request screen.</p> <p>If the funding amount is in debit, the system uses the currency conversion algorithm attached to the Currency Conversion For Payments algorithm spot of the account's division. However, if the funding amount is in credit, the system uses the currency conversion algorithm attached to the Currency Conversion For Adjustments algorithm spot of the account's division.</p> | |
| Default Funding Adjustment Type | <p>Used to indicate the adjustment type using which the A/P adjustment should be created against a credit bill on submitting the funding request.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Default Funding Adjustment Type field. On clicking the Search icon, the Adjustment Type Search window appears.</p> <p>In the Default Funding Adjustment Type field, you can only specify an adjustment type where the A/P Request Type Code field is set to REFUND.</p> | Yes |
| Default Garnishment Adjustment Type | Used to indicate the adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------|--|-----------------------|
| | <p>Note:</p> <p>The Search  icon appears corresponding to the Default Garnishment Adjustment Type field. On clicking the Search icon, the Adjustment Type Search window appears.</p> <p>In the Default Garnishment Adjustment Type field, you can only specify an adjustment type where the A/P Request Type Code field is not set to REFUND.</p> | |
| Threshold Range Algorithm | <p>Used to attach an algorithm which helps to calculate the threshold range for a bill based on the number of payments made for the bill in the specified period.</p> <p>Note:</p> <p>You must specify an algorithm which is created using the C1-FDRTTR algorithm type in the Threshold Range Algorithm field.</p> <p>The Search  icon appears corresponding to the Threshold Range Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | No |
| Defer Processing Count | Used to indicate whether a funding request must be processed in the deferred mode (i.e. in the background) when the number of bills in the funding request exceeds the defer processing count. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|---|
| | <p>Note:</p> <p>You cannot specify a negative value in the Defer Processing Count field.</p> <p>Deferred mode means in the background when the Funding Request Periodic Monitor (C1-FNDRQ) batch is invoked. You can configure the Funding Request Periodic Monitor (C1-FNDRQ) batch such that it is executed at regular intervals. For more information about the Funding Request Periodic Monitor (C1-FNDRQ) batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of bills in a funding request does not exceed the defer processing count, the system will process the funding request in real time (i.e. immediately).</p> | |
| Approval Required | Used to indicate whether the approval is required before creating payments for debit bills and A/P adjustments for credit bills through the funding request. | No |
| Approval Profile | <p>Used to indicate the approval profile using which the system should determine the debit or credit hierarchy level from where the approval is required. The system considers the debit or credit hierarchy level where the funding amount of the debit or credit bill falls within the threshold limit.</p> <p>Note: This field appears when the Approval Required option is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required option is selected.</p> |
| Submitter To Do Type | <p>Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p>Note:</p> <p>You must specify the C1-FNDSB To Do type in the Submitter To Do Type field.</p> <p>The Search  icon appears corresponding to the Submitter To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>This field appears when the Approval Required option is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required option is selected.</p> |

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|---|
| Submitter To Do Role | Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the funding request or raises the request for resubmitting the funding request. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The list includes only those To Do roles which are associated to the specified submitter To Do type.</p> | <p>Note: This field is required when the Approval Required option is selected.</p> |
| Currency Conversion Adjustment Algorithm | Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in credit) is different from the installation options currency. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The Search  icon appears corresponding to the Currency Conversion Adjustment Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | <p>Note: This field is required when the Currency Conversion Required option is selected in the approval profile.</p> |
| Currency Conversion Payment Algorithm | Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in debit) is different from the installation options currency. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The Search  icon appears corresponding to the Currency Conversion Payment Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | <p>Note: This field is required when the Currency Conversion Required option is selected in the approval profile.</p> |

Tip: Alternatively, you can edit the details of a funding request type by clicking the **Edit** button in the **Funding Request Type** zone.

5. Modify the details in the **Main** section, if required.

6. Define, edit, or remove characteristics of the funding request type, if required.
7. Click **Save**.

The changes made to the funding request type are saved.

Deleting a Funding Request Type

Procedure

To delete a funding request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Funding Request Type**.
A sub-menu appears.
3. Click the **Search** option from the **Funding Request Type** sub-menu.
The **Funding Request Type** screen appears.
4. In the **Funding Request Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the funding request type that you want to delete.

A message appears confirming whether you want to delete the funding request type.

Note: You can delete a funding request type when you have not created a funding request using the funding request type.

Tip: Alternatively, you can delete a funding request type by clicking the **Delete** button in the **Funding Request Type** zone.

5. Click **OK**.

The funding request type is deleted.

Copying a Funding Request Type

Instead of creating a funding request type from scratch, you can create a new funding request type using an existing funding request type. This is possible through copying a funding request type. On copying a funding request type, the details including the characteristics are copied to the new funding request type. You can then edit the details, if required.

Prerequisites

To copy a funding request type, you should have:

- Funding request type (whose copy you want to create) defined in the application
- Funding request business objects defined in the application
- Currencies defined in the application
- Funding adjustment types defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- A threshold range algorithm defined using the **C1-FDRTTR** algorithm type
- Required approval profiles defined in the application
- A To Do role assigned to the **C1-FNDSB** To Do type in the application
- Funding currency characteristic type defined in the application (where the characteristic entity is set to **Account**)
- A currency conversion algorithm defined for payments and adjustments using the **C1_CURALGPY** and **C1_CURALGAD** algorithm type, respectively

Procedure

To copy a funding request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Funding Request Type**.
A sub-menu appears.
3. Click the **Search** option from the **Funding Request Type** sub-menu.
The **Funding Request Type** screen appears.
4. In the **Funding Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the funding request type whose copy you want to create.

The **Funding Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the funding request type.
- **Characteristics** - Used to define the characteristics for the funding request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|-----------------------|
| Funding Request Type | Used to specify the funding request type. | Yes |
| Business Object | Indicates the business object using which you are defining the funding request type. | Not applicable |
| Description | Used to specify the description for the funding request type. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|-----------------------|
| Funding Request Business Object | Used to indicate the business object using which you want to create the funding request. | Yes |
| Detailed Description | Used to specify additional information about the funding request type. | No |
| Status | <p>Used to indicate the status of the funding request type. The valid values are:</p> <ul style="list-style-type: none"> • Active • Inactive <p>Note: You cannot change the status of a funding request type to Inactive when the corresponding funding request is in a status other than Processed or Rejected.</p> | Yes |
| Funding Amount Currency | <p>Used to indicate the currency in which the total debit and credit amount should be calculated in the funding request. The total debit and credit amount appears in the Statistics section of the Funding Request zone.</p> <p>Note: The list includes only those currencies which are defined in the system. If the currency specified in this field is different from the bill's currency, the system does currency conversion before calculating the total debit and credit amount in the funding request. The total debit amount is the sum of funding amount of all bills whose funding amount is in debit. However, the total credit amount is the sum of funding amount and garnishment amount of all bills whose funding amount is in credit. While calculating the total debit amount, the system uses the currency conversion algorithm attached to the Currency Conversion For Payments algorithm spot of the account's division. However, while calculating the total credit amount, the system uses the currency conversion algorithm attached to the Currency Conversion For Adjustments algorithm spot of the account's division.</p> | Yes |
| Account Funding Currency Characteristic Type | Used to indicate the characteristic type. This characteristic should be defined on the account. This characteristic indicates that the funding amount of the account's | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| | <p>bills should be converted in the specified currency.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Account Funding Currency Characteristic Type field. On clicking the Search icon, the Characteristic Type Search window appears.</p> <p>You must specify a characteristic type where the characteristic entity is set to Account.</p> <p>The converted amount appears in the Funding Currency Amount column of the Selected Bills zone in the Funding Request screen.</p> <p>If the funding amount is in debit, the system uses the currency conversion algorithm attached to the Currency Conversion For Payments algorithm spot of the account's division. However, if the funding amount is in credit, the system uses the currency conversion algorithm attached to the Currency Conversion For Adjustments algorithm spot of the account's division.</p> | |
| Default Funding Adjustment Type | <p>Used to indicate the adjustment type using which the A/P adjustment should be created against a credit bill on submitting the funding request.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Default Funding Adjustment Type field. On clicking the Search icon, the Adjustment Type Search window appears.</p> <p>In the Default Funding Adjustment Type field, you can only specify an adjustment type where the A/P Request Type Code field is set to REFUND.</p> | Yes |
| Default Garnishment Adjustment Type | Used to indicate the adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------|---|-----------------------|
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Default Garnishment Adjustment Type field. On clicking the Search icon, the Adjustment Type Search window appears.</p> <p>In the Default Garnishment Adjustment Type field, you can only specify an adjustment type where the A/P Request Type Code field is not set to REFUND.</p> | |
| Threshold Range Algorithm | <p>Used to attach an algorithm which helps to calculate the threshold range for a bill based on the number of payments made for the bill in the specified period.</p> <p>Note:</p> <p>You must specify an algorithm which is created using the C1-FDRTTR algorithm type in the Threshold Range Algorithm field.</p> <p>The Search (🔍) icon appears corresponding to the Threshold Range Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | No |
| Defer Processing Count | Used to indicate whether a funding request must be processed in the deferred mode (i.e. in the background) when the number of bills in the funding request exceeds the defer processing count. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|---|
| | <p>Note:</p> <p>You cannot specify a negative value in the Defer Processing Count field.</p> <p>Deferred mode means in the background when the Funding Request Periodic Monitor (C1-FNDRQ) batch is invoked. You can configure the Funding Request Periodic Monitor (C1-FNDRQ) batch such that it is executed at regular intervals. For more information about the Funding Request Periodic Monitor (C1-FNDRQ) batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of bills in a funding request does not exceed the defer processing count, the system will process the funding request in real time (i.e. immediately).</p> | |
| Approval Required | Used to indicate whether the approval is required before creating payments for debit bills and A/P adjustments for credit bills through the funding request. | No |
| Approval Profile | <p>Used to indicate the approval profile using which the system should determine the debit or credit hierarchy level from where the approval is required. The system considers the debit or credit hierarchy level where the funding amount of the debit or credit bill falls within the threshold limit.</p> <p>Note: This field appears when the Approval Required option is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required option is selected.</p> |
| Submitter To Do Type | <p>Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p>Note:</p> <p>You must specify the C1-FNDSB To Do type in the Submitter To Do Type field.</p> <p>The Search  icon appears corresponding to the Submitter To Do Type field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>This field appears when the Approval Required option is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required option is selected.</p> |

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|---|
| Submitter To Do Role | Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the funding request or raises the request for resubmitting the funding request. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The list includes only those To Do roles which are associated to the specified submitter To Do type.</p> | <p>Note: This field is required when the Approval Required option is selected.</p> |
| Currency Conversion Adjustment Algorithm | Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in credit) is different from the installation options currency. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The Search  icon appears corresponding to the Currency Conversion Adjustment Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | <p>Note: This field is required when the Currency Conversion Required option is selected in the approval profile.</p> |
| Currency Conversion Payment Algorithm | Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in debit) is different from the installation options currency. | Yes (Conditional) |
| | <p>Note:</p> <p>This field appears when the Approval Required option is selected.</p> <p>The Search  icon appears corresponding to the Currency Conversion Payment Algorithm field. On clicking the Search icon, the Algorithm Search window appears.</p> | <p>Note: This field is required when the Currency Conversion Required option is selected in the approval profile.</p> |

Tip: Alternatively, you can copy a funding request type by clicking the **Duplicate** button in the **Funding Request Type** zone.

5. Enter the required details in the **Main** section.

6. Define, edit, or remove characteristics of the funding request type, if required.
7. Click **Save**.

The new funding request type is defined.

Viewing the Funding Request Type Details

Procedure

To view the details of a funding request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Funding Request Type**.
A sub-menu appears.
3. Click the **Search** option from the **Funding Request Type** sub-menu.
The **Funding Request Type** screen appears.
4. In the **Funding Request Type List** zone, click the **Broadcast** () icon corresponding to the funding request type whose details you want to view.
The **Funding Request Type** zone appears.
5. View the details of the funding request type in the **Funding Request Type** zone.

Funding Request (Used for Searching)

The **Funding Request** screen allows you to search for a funding request using various search criteria. It also allows you to create a funding request. It contains the following zone:

- [Search Funding Request](#) on page 1755

Through this screen, you can navigate to the following screen:

- [Funding Request \(Used for Viewing\)](#) on page 1759

Search Funding Request

The **Search Funding Request** zone allows you to search for a funding request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|-----------------------|
| Search By | Used to indicate whether you want to search for a funding request using the funding request or bill details. The valid values are: <ul style="list-style-type: none"> • Request Details • Bill Details | Yes |
| | Note: By default, the Request Details option is selected. | |
| Created From | Used to search funding requests which are created from a particular date onwards. | No |
| | Note: This field appears when the Request Details option is selected from the Search By list. | |
| Status | Used to search funding requests with a particular status. The valid values are: <ul style="list-style-type: none"> • Approval In Progress • Deferred Processing • Draft • Processed • Rejected | No |
| | Note: This field appears when the Request Details option is selected from the Search By list. | |
| Created To | Used to search funding requests which are created till a particular date. | No |
| | Note: This field appears when the Request Details option is selected from the Search By list. | |
| User ID | Used to search funding requests which are created by a particular user. | No |
| | Note: This field appears when the Request Details option is selected from the Search By list. | |
| Funding Request Type | Used to search funding requests which are created using a particular funding request type. | No |
| | Note: This field appears when the Request Details option is selected from the Search By list. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------|--|-----------------------|
| Person Name | Used to search funding requests which includes bills of a particular person. | No |
| | Note: This field appears when the Request Details option is selected from the Search By list. | |
| Funding Request ID | Used to search a particular funding request. | No |
| | Note: This field appears when the Request Details option is selected from the Search By list. | |
| Creation Mode | Used to search funding requests which are created in a particular mode. The valid values are: <ul style="list-style-type: none"> • Automatic • Manual | No |
| | Note: This field appears when the Request Details option is selected from the Search By list. | |
| Bill ID | Used to search funding requests which include a particular bill. | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. The Search (🔍) icon appears corresponding to the Bill ID field. On clicking the Search icon, the Bill Search window appears. | |
| Bill Date From | Used to search funding requests which include bills that are created from a particular date onwards. | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. | |
| Alternate Bill ID | Used to search funding requests which include a particular bill. | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. | |
| Bill Date To | Used to search funding requests which include bills that are created till a particular date. | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. | |
| Division | Used to search funding requests which includes bills of accounts which belong to a particular division. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|-----------------------|
| | <p>Note:</p> <p>This field appears when the Bill Details option is selected from the Search By list.</p> <p>You can only view those divisions to which you have access in the Division list.</p> | |

Note: You must specify at least one search criterion while searching for a funding request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|-----------------------------|---|
| Create Date Time | Displays the date and time when the funding request is created. |
| Funding Request Information | <p>Displays information about the funding request.</p> <p>Note: It has a link. On clicking the link, the Funding Request screen appears where you can view the details of the respective funding request.</p> |
| Status | <p>Indicates the status of the funding request. The valid values are:</p> <ul style="list-style-type: none"> • Approval In Progress • Deferred Processing • Draft • Processed • Rejected |
| Total Debit Amount | Displays the total amount of the debit bills which are added in the funding request. |
| Total Credit Amount | Displays the total amount of the credit bills which are added in the funding request. |
| Created By | Indicates the user who has created the funding request. |
| Creation Mode | <p>Indicates how the funding request is created. The valid values are:</p> <ul style="list-style-type: none"> • Automatic • Manual |

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Funding Request

Prerequisites

To search for a funding request, you should have:

- Funding request types defined in the application

Procedure

To search for a funding request:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Funding Request**.
A sub-menu appears.
3. Click the **Search** option from the **Funding Request** sub-menu.
The **Funding Request** screen appears.
4. Enter the search criteria in the **Search Funding Request** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of funding requests that meet the search criteria appears in the **Search Results** section.

Creating a Funding Request

Prerequisites

To create a funding request, you should have:

- Funding request types defined in the application

Procedure

To create a funding request:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Funding Request**.
A sub-menu appears.
3. Click the **Add** option from the **Funding Request** sub-menu.

The **Add Funding Request** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|------------------------------|
| Funding Request Type | Used to indicate the funding request type using which you want to create the funding request. | Yes |

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Funding Request** screen.

4. Select the required funding request type from the respective field.
5. Click **OK**.

The funding request is created in the **Draft** status.

Viewing the Funding Request Details

Procedure

To view the details of a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to view.

The **Funding Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the details of the funding request in the **Funding Request** zone.
5. View the credit and/or debit bills added in the funding request in the **Selected Bills** zone.

Funding Request (Used for Viewing)

The **Funding Request** screen allows you to:

- Edit the details of a funding request
- Delete or cancel a funding request
- View the details of a funding request

- Submit a funding request for processing
- Approve or reject a funding request
- Request the submitter to resubmit a funding request for approval
- Withdraw a funding request
- View the log of a funding request
- Add a log entry for a funding request

It consists of the following tabs:

- [Funding Request - Main](#) on page 1760
- [Funding Request - Bills](#) on page 1767
- [Funding Request - Log](#) on page 1771

Funding Request - Main

The **Main** tab displays information about the funding request. It contains the following zones:

- [Funding Request](#) on page 1760
- [Search Bill](#) on page 1763

Funding Request

The **Funding Request** zone displays the details of the funding request. It contains the following sections:

- **Main** - Displays basic information about the funding request. It contains the following fields:

| Field Name | Field Description |
|-----------------------------|--|
| Funding Request Information | Displays information about the funding request. |
| Funding Request Type | Indicates the funding request type using which the funding request is created. Note: It has a link. On clicking the link, the Funding Request Type screen appears where you can view the details of the respective funding request type. |
| Status | Indicates the status of the funding request. The valid values are: <ul style="list-style-type: none"> • Approval In Progress • Deferred Processing • Draft • Processed • Rejected |
| Status Reason | Indicates the reason why the funding request is rejected. Note: This field appears when the funding request is in the Rejected status. It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the respective status reason. |
| Funding Adjustment Type | Indicates the adjustment type using which the A/P adjustment is created against a credit bill. |

| Field Name | Field Description |
|-----------------------------|--|
| | Note: It has a link. On clicking the link, the Adjustment Type screen appears where you can view the details of the respective adjustment type. |
| Garnishment Adjustment Type | Indicates the adjustment type using which the garnishment adjustment is created when the amount from the credit bill is transferred to the garnishment contract of the account. Note: It has a link. On clicking the link, the Adjustment Type screen appears where you can view the details of the respective adjustment type. |
| Comments | Displays additional information entered while rejecting the funding request. Note: This field appears when the funding request is in the Rejected status. |
| Creation Mode | Indicates whether the funding request is created automatically or manually. The valid values are: <ul style="list-style-type: none"> • Automatic • Manual |

- **Statistics** - Displays analytical information about the funding request. It contains the following fields:

| Field Name | Field Description |
|---------------------------------------|--|
| Total Records | Displays the total number of debit or credit bills which are added in the funding request. |
| Total Records Processed | Displays the total number of debit or credit bills for which payments or adjustments are successfully created in the system. |
| Total Records Excluded | Displays the total number of debit or credit bills which are excluded from the automatic funding request. |
| Total Records In Error | Displays the total number of debit or credit bills for which payments or adjustments was not successfully created in the system. |
| Total Payment Incoming Events Created | Displays the total number of payment events created against the debit bills in the funding request. |
| Total Adjustments Created | Displays the total number of adjustments created against the credit bills in the funding request. |
| Total Credit Funding Amount | Displays the sum of funding amount and garnishment amount of all bills whose funding amount is in credit. The sum total is calculated in the funding amount currency which is specified in the funding request type. Note: If the credit bill's currency is different from the funding amount currency, the system does the currency conversion before calculating the sum total. The system uses the currency conversion algorithm attached to the Currency Conversion For Adjustments algorithm spot of the account's division. |
| Total Debit Funding Amount | Displays the sum of funding amount of all bills whose funding amount is in debit. The sum total is calculated in the funding amount currency which is specified in the funding request type. |

| Field Name | Field Description |
|------------|---|
| | <p>Note: If the debit bill's currency is different from the funding amount currency, the system does the currency conversion before calculating the sum total. The system uses the currency conversion algorithm attached to the Currency Conversion For Payments algorithm spot of the account's division.</p> |

- **Record Actions** - This section contains the following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to edit the details of the funding request. |
| | Note: The Edit button appears when the funding request is in the Draft status. |
| Delete | Used to delete the funding request. |
| | Note: The Delete button appears when the funding request is in the Draft status. |
| Submit | Used to submit the funding request. |
| | Note: The Submit button appears when the funding request is in the Draft status. |
| Cancel | Used to cancel the funding request. |
| | Note: The Cancel button appears when the funding request is in the Draft status. |
| Approve | Used to approve the funding request. |
| | <p>Note: The Approve button appears when:</p> <ul style="list-style-type: none"> • The funding request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the funding request. |
| Reject | Used to reject the funding request. |
| | <p>Note: The Reject button appears when:</p> <ul style="list-style-type: none"> • The funding request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the funding request. |
| Re Submit | Used to request for resubmitting the funding request. |
| | <p>Note: The Re Submit button appears when:</p> <ul style="list-style-type: none"> • The funding request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the funding request. |
| Withdraw | Used to withdraw the funding request. |

| Button Name | Button Description |
|-------------|--|
| | <p>Note: The Withdraw button appears when:</p> <ul style="list-style-type: none"> The funding request is in the Approval In Progress status. A user with the submitter To Do role is viewing the funding request. |

- **Record Information** - This section contains the following fields:

| Field Name | Field Description |
|------------------|--|
| Business Object | <p>Indicates the business object using which the funding request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p>Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.</p> |
| Status Date/Time | Displays the date and time when the funding request status is updated |
| Create Date/Time | Displays the date and time when the funding request is created. |

- **Characteristics** - Lists the characteristics defined for the funding request. It contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Effective Date | Displays the date from when the characteristic is effective for the funding request. |
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

Search Bill

The **Search Bill** zone allows you to search for a bill using various search criteria. It appears when the funding request is in the **Draft** status and the creation mode is set to **Manual**. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------|--|-----------------------|
| Search By | Used to indicate whether you want to search for a bill using the person, account, or bill details. The valid values are: <ul style="list-style-type: none"> • Bill Details • Account Details • Person Details | Yes |
| | Note: By default, the Bill Details option is selected. | |
| Bill ID | Used to search a particular bill. | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. The Search (🔍) icon appears corresponding to the Bill ID field. On clicking the Search icon, the Bill Search window appears. | |
| Bill Date From | Used to search bills which are created from a particular date onwards. | Yes |
| | Note: This field appears when the Bill Details option is selected from the Search By list. By default, the current date appears in this field. | |
| Alternate Bill ID | Used to search a particular bill. | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. | |
| Bill Date To | Used to search bills which are created till a particular date. | Yes |
| | Note: This field appears when the Bill Details option is selected from the Search By list. By default, the current date appears in this field. | |
| Bill Balance | Used to indicate whether you want to search bills with debit or credit balance. The valid values are: <ul style="list-style-type: none"> • Credit • Debit | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------|---|--|
| Bill Due Date From | Used to search bills which are due from a particular date onwards. | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. | |
| Division | Used to search bills of accounts which belong to a particular division. | No |
| | Note: You can only view those divisions to which you have access in the Division list. This field appears when the Bill Details option is selected from the Search By list. | |
| Bill Due Date To | Used to search bills which are due till a particular date. | No |
| | Note: This field appears when the Bill Details option is selected from the Search By list. | |
| Account ID | Used to search bills of a particular account. | Yes (Conditional) |
| | Note: This field appears when the Account Details option is selected from the Search By list. | Note: This field is required when the Account Details option is selected from the Search By list. |
| Person ID | Used to search bills which belong to a particular person. | Yes (Conditional) |
| | Note: This field appears when the Person Details option is selected from the Search By list. | Note: This field is required when: <ul style="list-style-type: none"> • The Person Details option is selected from the Search By list. • The person name is not specified in the search criteria. |
| Person Name | Used to search bills which are created for accounts of a particular person. | Yes (Conditional) |
| | Note: This field appears when the Person Details option is selected from the Search By list. | Note: This field is required when: <ul style="list-style-type: none"> • The Person Details option is selected from the Search By list. • The person ID is not specified in the search criteria. |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Country | Used to search bills of persons who reside in a particular country. | No |
| | Note: This field appears when the Person Details option is selected from the Search By list. | |

Note: You must specify at least one search criterion while searching for a bill.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description | | | | | | |
|--------------------|---|--|-----------------------------|------------|--|-------------|--|
| Bill Information | Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. | | | | | | |
| | Note: It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill. | | | | | | |
| Due Date | Displays the date when the bill is due for payment. | | | | | | |
| Outstanding Amount | Displays the unpaid amount of the bill. | | | | | | |
| Hold Amount | Displays the amount of the bill which is kept on hold through a hold request. | | | | | | |
| Funding Amount | Displays the bill amount which can be used for the funding process. It is calculated in the following manner: | | | | | | |
| | <table border="1"> <thead> <tr> <th>Bill Type</th> <th>Funding Amount for the Bill</th> </tr> </thead> <tbody> <tr> <td>Debit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)</td> </tr> <tr> <td>Credit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)</td> </tr> </tbody> </table> | Bill Type | Funding Amount for the Bill | Debit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) | Credit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request) |
| | Bill Type | Funding Amount for the Bill | | | | | |
| | Debit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) | | | | | |
| Credit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request) | | | | | | |
| | | | | | | | |
| | | | | | | | |
| Person Name | Indicates the person to whom the bill belongs. In addition, this column has a context menu which helps in navigating to other screens in the application. | | | | | | |
| | Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person. | | | | | | |
| Bill ID | Displays the bill ID. | | | | | | |
| Defer Auto Pay | Indicates whether the Defer Auto Pay option is selected on the customer class of the account for which the bill is created. The valid values are: <ul style="list-style-type: none"> • N • Y | | | | | | |

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, this section contains the following button:

| Button Name | Button Description |
|-------------|--|
| Add | Used to add a bill to the funding request. |

A check box appears corresponding to each bill. On selecting the check box, you can add the bill to the funding request. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all bills listed in the respective page to the funding request.

Funding Request - Bills

The **Bills** tab lists the bills which are added in the funding request. It contains the following zones:

- [Currency Statistics](#) on page 1767
- [Selected Bills](#) on page 1768
- [Funding Payment Details](#) on page 1771

Note: This zone appears when the funding request is in the **Processed** status and the funding amount of the bill is in debit.

- [Funding Adjustments](#) on page 1771

Note: This zone appears when the funding request is in the **Processed** status and the funding amount of the bill is in credit.

Currency Statistics

A funding request might include bills in different currencies. The **Currency Statistics** zone lists the sum total of various amount of bills which are created in the same currency. It contains the following columns:

| Column Name | Column Description |
|-----------------------------|--|
| Currency Code | Indicates the currency in which the sum total is calculated. |
| | Note: Here, the system lists those currencies in which the bills added to the funding request are created. |
| Total Outstanding Amount | Displays the sum of outstanding amount of all bills which are created in the respective currency. |
| Total Hold Amount | Displays the sum of hold amount of all bills which are created in the respective currency. |
| Total Garnishment Amount | Displays the sum of garnishment amount of all bills which are created in the respective currency. |
| Total Debit Funding Amount | Displays the sum of funding amount (which is in debit) of all bills which are created in the respective currency. |
| Total Credit Funding Amount | Displays the sum of funding amount (which is in credit) of all bills which are created in the respective currency. |

Selected Bills

The **Selected Bills** zone lists the debit and credit bills which are added to the funding request. It contains the following columns:

| Column Name | Column Description | | | | | | |
|-----------------------------|---|-----------|-----------------------------|------------|--|-------------|--|
| Bill Date | Displays the date when the bill is created. | | | | | | |
| Person Identifier | Displays the primary identifier of the person for whom the bill is created. | | | | | | |
| Person Country | Indicates the country where the person is located. | | | | | | |
| Invoice Account Identifier | Displays the primary identifier of the account for which the bill is created. | | | | | | |
| Funding Amount | <p>Displays the bill amount which can be used for the funding process. It is calculated in the following manner:</p> <table border="1"> <thead> <tr> <th>Bill Type</th> <th>Funding Amount for the Bill</th> </tr> </thead> <tbody> <tr> <td>Debit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)</td> </tr> <tr> <td>Credit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)</td> </tr> </tbody> </table> <p>Note: The funding amount is calculated in the bill's currency.</p> | Bill Type | Funding Amount for the Bill | Debit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) | Credit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request) |
| Bill Type | Funding Amount for the Bill | | | | | | |
| Debit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) | | | | | | |
| Credit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request) | | | | | | |
| Currency Code | Indicates the currency in which the funding amount is calculated. | | | | | | |
| Hold Amount | Displays the amount of the bill which is kept on hold through a hold request. | | | | | | |
| Offset Amount | Displays the amount of the bill which is offset against another bill through an offset request. | | | | | | |
| Garnishment Amount | Displays the amount of the credit bill which is transferred to the garnishment contracts of the account through the funding request. | | | | | | |
| Original Outstanding Amount | Displays the original outstanding amount when the bill was added in the funding request. | | | | | | |
| Bill ID | <p>Displays the bill ID.</p> <p>Note: It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill.</p> | | | | | | |
| Open Bills | <p>Indicates whether there are any unpaid bills of the person. The valid values are:</p> <ul style="list-style-type: none"> • Y • N | | | | | | |
| Garnishment Contract | <p>Indicates whether the garnishment contract exists for the account. The valid values are:</p> <ul style="list-style-type: none"> • Y • N | | | | | | |

| Column Name | Column Description |
|-------------------------|--|
| | <p>Note:</p> <p>This column appears when the funding request is in the Draft status.</p> <p>The data appears in this column when a credit bill is added to the funding request.</p> <p>It has a link. On clicking the link, the Edit Garnishment Details screen appears where you can transfer the funding amount from the credit bill to one or more garnishment contracts of the account.</p> |
| Garnishment | <p>On clicking the View () icon, the View Garnishment Details screen appears where you can view the funding amount transferred to the different garnishment contracts of the account.</p> <p>Note:</p> <p>This column does not appear when the funding request is in the Draft status.</p> <p>The View () icon appears in this column when the funding request is in the Processed status.</p> |
| Record Status | <p>Indicates the status of the bill record in the funding request. The valid values are:</p> <ul style="list-style-type: none"> • Excluded • Invalid • Masked • Pending • Processed • Valid • Error |
| Threshold Range | Indicates the threshold range for a bill which is calculated based on the number of payments made for the bill in the specified period. |
| Person Name | Indicates the person whose bill is added in the funding request. |
| Bill Information | Displays the information about the bill. |
| Split Banking | Indicates whether the split automatic payment feature is used for the account. The valid values are: <ul style="list-style-type: none"> • Y • N |
| Funding Currency Amount | Displays the funding amount which is converted in the funding currency defined on the account. |

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, this section contains the following button:

| Button Name | Button Description |
|-------------|--|
| Delete | Used to delete a bill from the funding request. |
| | Note: The Delete button appears when the funding request is created manually and it is in the Draft status. |
| Edit | Used to exclude a debit or credit bill from the funding request. |
| | Note: The Edit button appears when the funding request is created automatically and it is in the Draft status. |
| Hold | Used to create a hold request for one or more bills. However, you cannot select more than 20 bills. On activating or releasing a hold request, the funding amount is automatically updated in the funding request. |
| | Note: The Hold button appears only when the funding request is in the Draft status. |
| Offset | Used to create an offset request for a bill. On processing or unapplying an offset request, the funding amount is automatically updated in the funding request. |
| | Note: The Offset button appears when the funding request is in the Draft status. |

A check box appears corresponding to each bill when the funding request is in the **Draft** status. On selecting the check box, you can delete the bill from the funding request. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to delete all bills listed in the respective page from the funding request.

On clicking the **Broadcast** () icon corresponding to a debit or credit bill, the **Funding Payment Details** or **Funding Adjustments** zone appears, respectively.

Note: The **Broadcast** icon does not appear when the funding request is in the **Draft** status.

You can filter the list using various search criteria (such as, **Bill ID**, **Alternate Bill ID**, **Record Status**, **Bill Balance**, **Funding Amount From**, **Person ID**, **Funding Amount To**, **Currency**, **Funding Amount Threshold Range**, and **Country**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Funding Payment Details

The **Funding Payment Details** zone lists the payment events which are created for a debit bill through the funding request. It appears when the funding request is in the **Processed** status. It contains the following columns:

| Column Name | Column Description |
|---------------------------|---|
| Payment Event Information | Displays information about the payment event. |
| | Note: It has a link. On clicking the link, the Payment Event screen appears where you can view the details of the respective payment event. |
| Payment Amount | Displays the amount for which automatic payment is created. |

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Funding Adjustments

The **Funding Adjustments** zone lists the funding and garnishment adjustments which are created for a credit bill through the funding request. It appears when the funding request is in the **Processed** status. It contains the following columns:

| Column Name | Column Description |
|------------------------|---|
| Adjustment Information | Displays information about the funding or garnishment adjustment. |
| | Note: It has a link. On clicking the link, the Adjustment screen appears where you can view the details of the respective adjustment. |
| Adjustment Amount | Displays the adjustment amount. |

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Funding Request - Log

The **Log** tab contains the following zone:

- [Funding Request Log](#) on page 1771

Funding Request Log

The **Funding Request Log** zone lists the complete trail of actions performed on the funding request. It contains the following columns:

| Column Name | Column Description |
|----------------|--|
| Date/Time | Displays the date and time when the action was performed on the funding request. |
| Details | Displays the details of the action performed on the funding request. |
| User | Indicates the user who has performed the action on the funding request. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is created when the action is performed on the funding request. |

| Column Name | Column Description |
|---------------|---|
| | Note: At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements. |
| Status Reason | Indicates the reason why the funding request was rejected by the approver. Note: The data appears in this column when the funding request is in the Rejected status. |

Note: You can manually add a log entry for the funding request by clicking the **Add Log Entry** link in the upper right corner of the **Funding Request Log** zone.

Adding a Debit or Credit Bill to a Funding Request

In a funding request, you can only add the debit or credit bills of the accounts for which the **Defer Auto Pay** option is selected on the respective customer class.

Procedure

To add a debit or credit bill to a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Enter the search criteria in the **Search Bill** zone.

Note:

The **Search Bill** zone appears when the funding request is in the **Draft** status.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of bills that meet the search criteria appears in the **Search Results** section.

6. Select the check box corresponding to a bill that you want to add to the funding request.
7. Click the **Add** button in the **Search Bill** zone.

A message appears indicating that the bill is added to the funding request.

Note: You can only add a debit or credit bill of an account for which the **Defer Auto Pay** option is selected on the respective customer class.

8. Click **OK**.

The bill is added to the funding request. The status of the bill record in the funding request is set to **Pending**.

Deleting a Debit or Credit Bill from a Funding Request

Procedure

To delete a debit or credit bill from a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, select the check box corresponding to a bill that you want to delete from the funding request.
5. Click the **Delete** button in the **Selected Bills** zone.

A message appears confirming whether you want to delete the bill from the funding request.

Note: The **Delete** button appears when the funding request is in the **Draft** status.

6. Click **OK**.

The debit or credit bill is deleted from the funding request.

Excluding a Bill from a Funding Request

If the funding request is manually created through the user interface, you add or delete bills from the funding request when it is in the **Draft** status. However, if the funding request is automatically created through a custom logic, the system allows you to exclude the required bills from the funding request when it is in the **Draft** status. In such case, the status of the record in the funding request is changed to **Excluded**. The excluded bills can then be included in some other funding request.

Prerequisites

To exclude a bill from a funding request, you should have:

- Values defined for the **CAN_RSN_CD_FLG** lookup field

Procedure

To exclude a bill from a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, select the check box corresponding to a bill that you want to exclude from the funding request.

5. Click the **Edit** button in the **Selected Bills** zone.

The **Edit Funding Request Details** screen appears. It contains the following field:

| Field Name | Field Description |
|-----------------------------|---|
| Funding Request Information | Displays the information about the funding request. |

In addition, this screen contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) | | | | | | |
|--------------------|--|-----------------------|-----------------------------|------------|--|-------------|--|----------------|
| Bill Information | Displays the information about the bill. | Not applicable | | | | | | |
| Garnishment Amount | Displays the funding amount which is transferred to the garnishment contracts of the account. | Not applicable | | | | | | |
| Funding Amount | Displays the bill amount which can be used for the funding process. It is calculated in the following manner: <table border="1" data-bbox="560 1619 1062 1923"> <thead> <tr> <th>Bill Type</th> <th>Funding Amount for the Bill</th> </tr> </thead> <tbody> <tr> <td>Debit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)</td> </tr> <tr> <td>Credit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold</td> </tr> </tbody> </table> | Bill Type | Funding Amount for the Bill | Debit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) | Credit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold | Not applicable |
| Bill Type | Funding Amount for the Bill | | | | | | | |
| Debit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) | | | | | | | |
| Credit Bill | Outstanding Bill Amount – Hold Amount (set on the bill in a hold | | | | | | | |

| Field Name | Field Description | | Mandatory (Yes or No) |
|---------------|--|---|---|
| | Bill Type | Funding Amount for the Bill | |
| | | request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request) | |
| Status | Used to indicate the status of the record in the funding request. The valid values are: <ul style="list-style-type: none"> Excluded Invalid Masked Pending Processed Valid | | Yes |
| Cancel Reason | Used to indicate the reason why you want to exclude the bill from the funding request. | | Yes (Conditional) |
| | Note: The list includes only those values which are defined in the CAN_RSN_CD_FLG lookup field. | | Note: This field is required when you want to exclude the bill from the funding request. |

Note: The **Edit** button appears when the creation mode of the funding request is set to **Automatic** and the funding request is in the **Draft** status.

- Select the **Excluded** option from the **Status** field.
- Select the required cancel reason from the respective field.
- Click **Save**.

The bill is excluded from the funding request. The status of the bill record in the funding request is set to **Excluded**.

Editing a Funding Request

Prerequisites

To edit a funding request, you should have:

- Funding adjustment types defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)

Procedure

To edit a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Click the **Edit** button in the **Funding Request** zone.

The **Edit Funding Request** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the funding request.
- **Characteristics** - Used to define the characteristics for the funding request.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------|---|--|
| Funding Request Information | Displays information about the funding request. | Not applicable |
| Funding Adjustment Type | Used to indicate the adjustment type using which the A/P adjustment should be created against a credit bill. Note: The Search (🔍) icon appears corresponding to the Funding Adjustment Type field. On clicking the Search icon, the Adjustment Type Search window appears. In the Funding Adjustment Type field, you can only specify an adjustment type where the A/P Request Type Code field is set to REFUND . | Yes (Conditional) Note: This field is required while creating an A/P adjustment against a credit bill. |
| Garnishment Adjustment Type | Used to indicate the adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account. Note: The Search (🔍) icon appears corresponding to the Garnishment Adjustment Type field. On clicking the Search icon, the Adjustment Type Search window appears. In the Garnishment Adjustment Type field, you can only specify an adjustment type where the A/P Request Type Code field is not set to REFUND . | Yes (Conditional) Note: This field is required while creating garnishment adjustments for a credit bill. |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Comments | Used to specify additional information about the funding request. | No |

Note: The **Edit** button appears when the funding request is in the **Draft** status.

4. Modify the details of the funding request, if required.
5. Define, edit, or remove characteristics of the funding request, if required.
6. Click **Save**.

The changes made to the funding request are saved.

Defining a Characteristic for a Funding Request

Prerequisites

To define a characteristic for a funding request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Funding Request**)

Procedure

To define a characteristic for a funding request:

1. Ensure that the **Characteristics** section is expanded when you are editing a funding request.

The **Characteristics** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|---|
| Effective Date | Used to specify the date from when the characteristic is effective for the funding request. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the funding request. |
| Characteristic Type | Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Funding Request . | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the funding request. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|--|
| | <p>Note:</p> <p>If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, you can search for a predefined characteristic value.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.</p> | <p>Note: This field is required when you are defining a characteristic for the funding request.</p> |

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the funding request, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the funding request, click the **Delete** (🗑️) icon corresponding to the characteristic.

Deleting a Funding Request

Procedure

To delete a funding request:

- Search for the funding request in the **Funding Request** screen.
- In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request that you want to delete.

The **Funding Request** screen appears.

- Click the **Delete** button in the **Funding Request** zone.

A message appears confirming whether you want to delete the funding request.

Note: The **Delete** button appears when the funding request is in the **Draft** status.

- Click **OK**.

The funding request is deleted.

Canceling a Funding Request

Prerequisites

To cancel a funding request, you should have:

- Reasons defined for the **Canceled** status of the **C1-FundingRequest** business object in the **Status Reason** screen

Procedure

To cancel a funding request:

- Search for the funding request in the **Funding Request** screen.
- In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request that you want to cancel.

The **Funding Request** screen appears.

- Click the **Cancel** button in the **Funding Request** zone.

The **Funding Request** window appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | Used to indicate the reason why you want to cancel the funding request. | Yes |
| | Note: The list includes only those reasons which are defined for the Canceled status of the C1-FundingRequest business object in the Status Reason screen. | |

Note: The **Cancel** button appears when the funding request is in the **Draft** status.

- Select the cancellation reason from the **Status Reason** list.
- Click **Save**.

The status of all records in the funding request is changed to **Excluded** and the status of the funding request is changed to **Canceled**. The excluded bills can then be included in some other funding request.

Submitting a Funding Request

Prerequisites

To submit a funding request, you should have:

- At least one debit or credit bill in the funding request
- Funding and garnishment adjustment types defined in the funding request
- Funding adjustment type defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment type defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)

Procedure

To submit a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request that you want to submit.

The **Funding Request** screen appears.

3. Click the **Submit** button in the **Funding Request** zone.

The system behaves in the following manner:

| If... | Then... | | | | | |
|--|---|---------|---------|---|---|--|
| The Approval Required option is selected in the funding request type using which the funding request is created | It calculates the sum of total debit and credit amount in the funding request. Depending on whether the sum total is debit or credit, it uses the debit or credit hierarchy in the approval profile (which is specified in the funding request type), respectively. Depending on the sum total amount, the system behaves in the following manner: | | | | | |
| | <table border="1"> <thead> <tr> <th data-bbox="883 1100 1170 1152">If...</th> <th data-bbox="1175 1100 1466 1152">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="883 1152 1170 1535"> The sum total is less than the minimum threshold amount in the approval hierarchy </td> <td data-bbox="1175 1152 1466 1535"> The system automatically approves the funding request and changes the status of the funding request to either Deferred Processing or Create Funding depending on whether the number of bills in the funding request exceeds the defer processing count. </td> </tr> </tbody> </table> | If... | Then... | The sum total is less than the minimum threshold amount in the approval hierarchy | The system automatically approves the funding request and changes the status of the funding request to either Deferred Processing or Create Funding depending on whether the number of bills in the funding request exceeds the defer processing count. | |
| | If... | Then... | | | | |
| The sum total is less than the minimum threshold amount in the approval hierarchy | The system automatically approves the funding request and changes the status of the funding request to either Deferred Processing or Create Funding depending on whether the number of bills in the funding request exceeds the defer processing count. | | | | | |
| The sum total is equal to or greater than the threshold amount specified at the first level in the approval hierarchy | The system changes the status of the funding request to Approval In Progress . It creates a To Do using the To Do type specified in the approval profile and assigns it to the users with the To Do role defined at the first level in the approval hierarchy. Approving a Funding Request

You can view the number of funding requests which are pending for approval in the **Funding Request** screen. The approver can review, and accordingly approve, reject, or ask the submitter to resubmit the funding request based on the observations.

Note: The system will not allow you to approve, reject or resubmit a funding request submitted by you.

Procedure

To approve a funding request:

1. Do either of the following:

| If you want to... | Then... |
|---|---|
| Approve a funding request through the Funding Request screen | <ol style="list-style-type: none"> 1. Search for the funding request in the Funding Request screen. 2. In the Search Results section, click the link in the Funding Request Information column corresponding to the funding request which you want to review. |
| Approve a funding request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-FNDAP in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the funding request that you want to review. |

The **Funding Request** screen appears.

2. Review the details in the **Funding Request** screen.
3. If the information in the funding request is accurate, then click the **Approve** button in the **Funding Request** zone.

The system behaves in the following manner:

| If... | Then... |
|---|---|
| The sum total of the debit and credit amount is equal to or greater than the threshold amount specified at the next level in the approval hierarchy | The system changes the status of the funding request to Approval In Progress . It creates a To Do using the To Do type specified in the approval profile and assigns it to the users with the To Do role defined at the next level in the approval hierarchy. In addition, it creates a log entry for the funding request when the To Do is created. |

| If... | Then... |
|---|--|
| <p>The sum total of the debit and credit amount is less than the threshold amount specified at the next level in the approval hierarchy</p> | <p>The system changes the status of the funding request to either Deferred Processing or Create Funding depending on whether the number of bills in the funding request exceeds the defer processing count.</p> <p>Once the Funding Request Periodic Monitor (C1-FNDRQ) batch is executed, it checks whether there are any funding requests in the Deferred Processing status. If so, it changes the status of the funding request to Create Funding.</p> <p>Once the status of a funding request is changed to Create Funding, the system creates the A/P adjustment against a bill when the funding amount of the bill is in credit. It also creates non A/P adjustments using the garnishment adjustment type when the funding amount of a credit bill is transferred to the garnishment contracts of the account. However, if the funding amount of a bill is in debit, the funding amount is stamped as the automatic payment amount against the bill in the CI_BILL_ACH table. Then, on executing the Create Automatic Payments and Refunds (APAYCRET) batch, the system creates automatic payment and payment event for such bill.</p> <p>Note: The funding and garnishment adjustments are created in the Frozen status.</p> |

Note: The **Approve** button appears when:

- The funding request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the funding request.

Rejecting a Funding Request

Prerequisites

To reject a funding request, you should have:

- Reasons defined for the **Rejected** status of the **C1-FundingRequest** business object in the **Status Reason** screen

Note: The system will not allow you to approve, reject or resubmit a funding request submitted by you.

Procedure

To reject a funding request:

1. Do either of the following:

| If you want to... | Then... |
|--|---|
| Reject a funding request through the Funding Request screen | <ol style="list-style-type: none"> 1. Search for the funding request in the Funding Request screen. 2. In the Search Results section, click the link in the Funding Request Information column corresponding to the funding request which you want to review. |
| Reject a funding request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-FNDAP in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the funding request that you want to review. |

The **Funding Request** screen appears.

2. Review the details in the **Funding Request** screen.
3. If the information in the funding request is incorrect, then click the **Reject** button in the **Funding Request** zone.

The **Reject Funding Request** window appears. It contains following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | <p>Used to indicate the reason why you want to reject the funding request.</p> <p>Note: The list includes only those reasons which are defined for the Rejected status of the C1-FundingRequest business object in the Status Reason screen.</p> | Yes |
| Comments | Used to specify additional information while rejecting the funding request. | No |

Note: The **Reject** button appears when:

- The funding request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the funding request.

4. Select the rejection reason from the **Status Reason** list.

5. Click **Save**.

The status of the funding request is changed to **Rejected**.

Requesting to Resubmit a Funding Request

Procedure

To request for resubmitting a funding request:

1. Do either of the following:

| If you want to... | Then... |
|--|--|
| Request for resubmitting a funding request through the Funding Request screen | <ol style="list-style-type: none"> 1. Search for the funding request in the Funding Request screen. 2. In the Search Results section, click the link in the Funding Request Information column corresponding to the funding request which you want to review. |
| Request for resubmitting a funding request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-FNDAP in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. |

| If you want to... | Then... |
|-------------------|---|
| | <ol style="list-style-type: none"> 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the funding request that you want to review. |

The **Funding Request** screen appears.

2. Review the details in the **Funding Request** screen.
3. If the information in the funding request is incomplete and you want the submitter to make the required changes and resubmit it, click the **Re Submit** button in the **Funding Request** zone.

The **Resubmit Funding Request** window appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Comments | Used to specify the changes which the submitter should make in the funding request before resubmitting it for approval. | Yes |

Note: The **Re Submit** button appears when:

- The funding request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the funding request.

4. Enter the comments in the respective field and then click **Save**.

A To Do is created using the submitter To Do type and assigned to all users with a submitter To Do role specified in the funding request type. In addition, the status of the funding request is changed to **Draft**.

Withdrawing a Funding Request

Prerequisites

To withdraw a funding request, you should have:

- Submitter To Do role (which is specified in the funding request type) associated with the **C1-FNDAP** To Do type

Procedure

To withdraw a funding request:

1. Search for the funding request in the **Funding Request** screen.

2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request that you want to withdraw.

The **Funding Request** screen appears.

3. If you want to make some changes in the funding request which is already sent for approval, click the **Withdraw** button in the **Funding Request** zone.

The status of the funding request is changed to **Draft**. The submitter can then make the required changes and resubmit the funding request for approval. The To Do for approver is automatically closed when the submitter withdraws the funding request. Note that the To Do for approver is automatically closed when the submitter To Do role is associated with the To Do type specified in the approval profile.

Note: The **Withdraw** button appears when:

- The funding request is in the **Approval In Progress** status.
- A user with the submitter To Do role is viewing the funding request.

Transferring the Funding Amount of a Credit Bill to a Garnishment Contract

Prerequisites

To transfer the funding amount of a credit bill to a garnishment contract, you should have:

- At least one garnishment contract on the account

Note: The garnishment contract is a contract which is created using a contract type where the **Special Role Flag** field is set to **Garnishment**.

Procedure

To transfer the funding amount of a credit bill to a garnishment contract:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, click the link on the value **Y** in the **Garnishment Contract** column corresponding to a credit bill whose funding amount you want to transfer to a garnishment contract of the account.

The **Edit Garnishment Details** screen appears. It contains the following field:

| Field Name | Field Description |
|------------------|---|
| Bill Information | Indicates the credit bill whose funding amount you want to transfer to a garnishment contract of the account. |

In addition, this screen contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|-----------------------|
| Garnishment Contract | Used to indicate the garnishment contract of the account. | Yes |
| Garnishment Amount | Used to specify the amount that you want to transfer to the garnishment contract. | Yes |

- Enter the required details in the **Edit Garnishment Details** screen.
- If you want to transfer the funding amount of the credit bill to more than one garnishment contract of the account, click the **Add (+)** icon and then repeat step 5.

Note: However, if you want to remove a garnishment record from the funding request, click the **Delete** (🗑️) icon corresponding to the garnishment record.

- Click **Save**.

The changes made to the funding request are saved.

Viewing the Garnishment Details of a Credit Bill

Procedure

To view the garnishment details of a credit bill:

- Search for the funding request in the **Funding Request** screen.
- In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to view.

The **Funding Request** screen appears.

- Click the **Bills** tab.

The **Bills** tab appears.

- In the **Selected Bills** zone, click the **Broadcast** (📡) icon in the **Garnishment** column corresponding to the credit bill whose garnishment details you want to view.

The **View Garnishment Details** screen appears. It contains the following field:

| Field Name | Field Description |
|------------|--|
| Bill Info | Indicates the credit bill whose garnishment details you are viewing. |

In addition, this screen contains the following columns:

| Column Name | Column Description |
|----------------------|---|
| Garnishment Contract | Indicates the garnishment contract of the account against which amount from the credit bill is transferred. |
| Garnishment Amount | Displays the amount which is transferred to the garnishment contract. |

Note:

The **Garnishment** column does not appear when the funding request is in the **Draft** status.

The **View** () icon appears in the **Garnishment** column only when the funding request is in the **Processed** status.

Viewing the Payments Created Through a Funding Request**Procedure**

To view the payments created through a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to view.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, click the **Broadcast** () icon corresponding to a debit bill whose payment details you want to view.

The **Funding Payments Details** zone appears.

Note: The **Broadcast** () icon appears when the funding request is in the **Processed** status.

5. View the payments created for the debit bill through the funding request in the **Funding Payments Details** zone.

Note: The data appears in the **Funding Payments Details** zone when the **Create Automatic Payments and Refunds (APAYCRET)** batch is executed to create the automatic payment and payment event for the debit bill. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Viewing the Adjustments Created Through a Funding Request

Procedure

To view the adjustments created through a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to view.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, click the **Broadcast** () icon corresponding to a credit bill whose adjustment details you want to view.

The **Funding Adjustments** zone appears.

Note: The **Broadcast** () icon appears when the funding request is in the **Processed** status.

5. View the A/P adjustments and garnishment adjustments (if any) created for the credit bill through the funding request in the **Funding Adjustments** zone.

Adding a Log Entry for a Funding Request**Procedure**

To add a log entry for a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose log you want to edit.

The **Funding Request** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Funding Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|--|-----------------------|
| Request Information | Displays information about the funding request. | Not applicable |
| Log Details | Used to specify additional comments for the funding request. | Yes |

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **Funding Request Log** zone.

Chapter 25

Refund/Write Off Request

Topics:

- [Prerequisites](#)
- [Refund Request \(Without Approval\) Status Transition](#)
- [Refund Request \(With Approval\) Status Transition](#)
- [Write Off Request \(Without Approval\) Status Transition](#)
- [Write Off Request \(With Approval\) Status Transition](#)
- [Account Level Refund/Write Off](#)
- [Refund/Write Off Adjustment at Bill Level](#)
- [Algorithms Used in C1-RefundReq](#)
- [Algorithms Used in C1-WORequest](#)
- [Refund/Write Off Request Type](#)
- [Refund/Write Off Request](#)
- [Refund Request](#)
- [Write Off Request](#)

Oracle Revenue Management and Billing allows you to refund and write off amount to the account. If the amount received from the payor account is matched against the suspense or excess credit contract, the system facilitates you to refund the amount to the payor. In addition, you can refund the amount of a credit bill line item, such as credit bill segment or adjustment, if required. To refund the amount to the account holder, you need to create refund adjustments through a refund request. While creating a refund request, you need to specify the refund request type using which you want to create the refund request. It is the refund request type which helps the system to determine:

- Whether the refund request must be approved before creating refund adjustments in the system
- Approval profile using which the refund request must be approved
- Whether multi-level or single-level approval is required while creating refund adjustments in the system
- Tolerance limit for refund (i.e. minimum refund amount)
- Adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount
- Default adjustment type using which refund adjustments must be created

The system allows you to create refund adjustments only using those adjustment types where A/P request type is defined. Once the refund adjustments are created, the A/P Extract process will extract the information and accordingly refund the amount to the payor. During the refund request process, a refund request goes through various statuses in its lifecycle. For more information about the refund request statuses, see [Refund Request \(Without Approval\) Status Transition](#) on page 1795 and [Refund Request \(With Approval\) Status Transition](#) on page 1796.

Note that the lifecycle of a refund request is driven by the business object using which the refund request is created. A refund request business object named **C1-RefundReq** is shipped with the product. The refund request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-RefundReq** business object.

Similarly, the system facilitates you to write off the amount to the account through a write off request. While creating a write off request, you need to specify the write off request type using which you want to create the write off request. It is the write off request type which helps the system to determine:

- Whether the write off request must be approved before creating write off adjustments in the system
- Approval profile using which the write off request must be approved

- Whether multi-level or single-level approval is required while creating write off adjustments in the system
- Default adjustment type using which write off adjustments must be created

The system allows you to create write off adjustments only using those adjustment types where A/P request type is not defined. During the write off request process, a write off request goes through various statuses in its lifecycle. For more information about the write off request statuses, see [Write Off Request \(Without Approval\) Status Transition](#) on page 1797 and [Write Off Request \(With Approval\) Status Transition](#) on page 1798.

Note that the lifecycle of a write off request is driven by the business object using which the write off request is created. A write off request business object named **C1-WORequest** is shipped with the product. The write off request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-WORequest** business object.

For more information on how to setup the refund and write off request processes, see [Prerequisites](#) on page 1795.

Prerequisites

To setup the refund request process, you need to do the following:

- Define the required adjustment types (for creating refund adjustments) where A/P request type is defined
- Define the required adjustment types (for creating write up adjustments) where A/P request type is not defined
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request Type**
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request**
- Define voided and rejected status reasons for the **C1-RefundReq** business object
- Assign the **C1-REFRQ** To Do type to a To Do role whose users must receive To Do generated while submitting a refund request for approval
- Define the required approval profiles with the credit hierarchy and **C1-REFRQ** To Do type
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options — Framework** screen
- Define the required refund request types in the system

To setup the write off request process, you need to do the following:

- Define the required adjustment types (for creating write off adjustments) where A/P request type is not defined
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request Type**
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request**
- Define cancelled and rejected status reasons for the **C1-WOREquest** business object
- Assign the **C1-WOREQ** To Do type to a To Do role whose users must receive To Do generated while submitting a write off request for approval
- Define the required approval profiles with the debit hierarchy and **C1-WOREQ** To Do type
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options — Framework** screen
- Define the required write off request types in the system

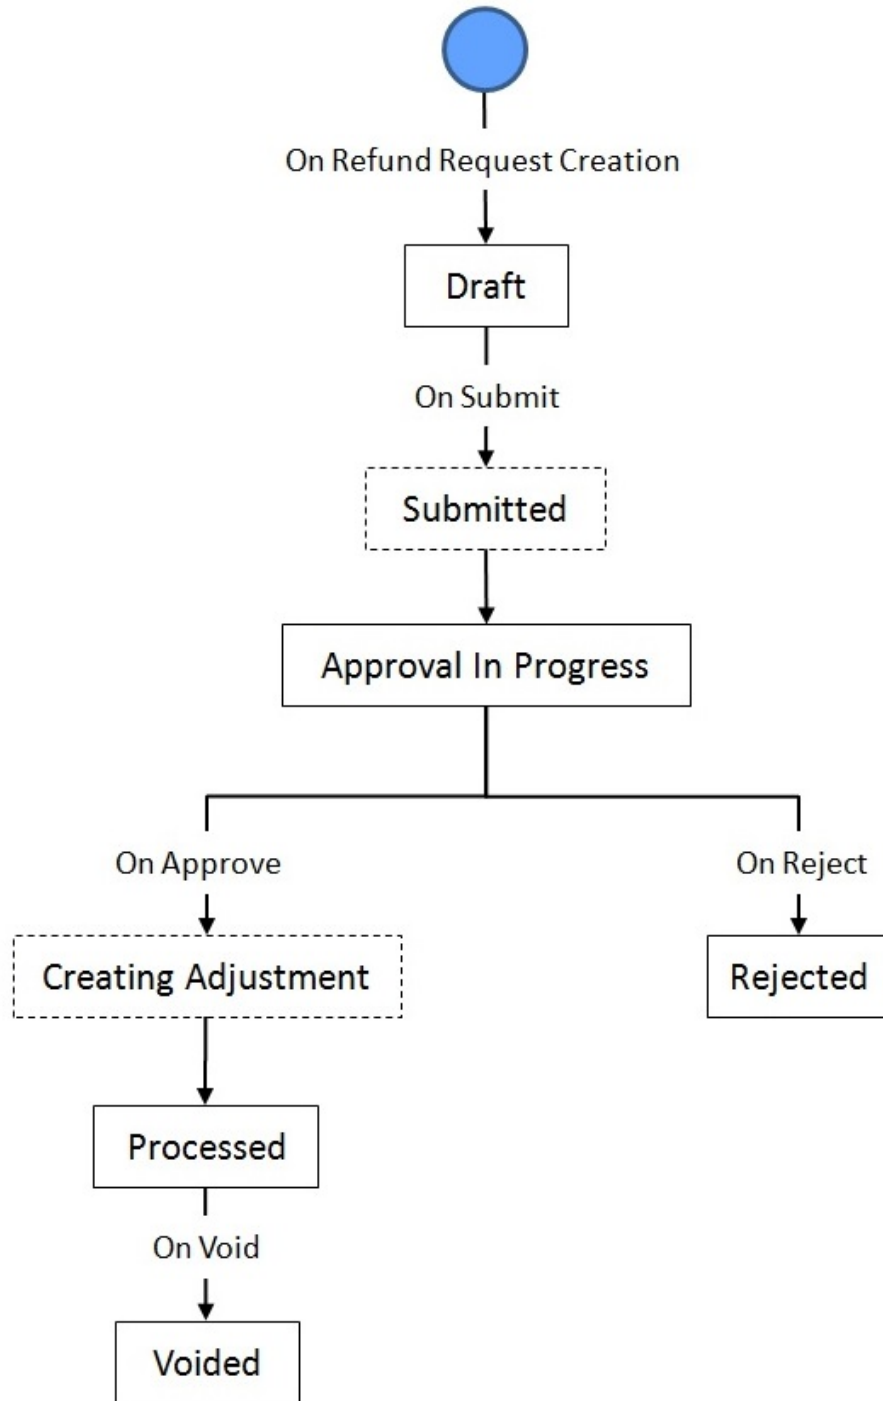

Refund Request (Without Approval) Status Transition

Write Off Request (With Approval) Status Transition

The following figure graphically indicates how a write off request moves from one status to another when approval workflow is on:

Account Level Refund/Write Off

Oracle Revenue Management and Billing enables you to create a refund/write off request at the account level. A new field named **Adjustment Level** is available while defining a refund/write off request. It allows you to control how the refund/write off adjustment should be created for the refund/write off request. It supports the following values:

- **Account** – Used when you want to create the refund/write off request at the account level. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the health insurance domain.
- **Bill** – Used when you want to create the refund/write off request for a bill. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the financial services domain.
- **Segment** – Used when you want to create the refund/write off request for a bill, bill segment, adjustment, or payment of an account. Here, the refund/write off adjustment is created against the bill segment, adjustment, or payment segment, respectively. If you select this option, the system behaves in the traditional manner.

If you do not specify the value for the **Adjustment Level** field, the system considers the value defined in the **Default Adjustment Level** option type of the **C1_REFWO** feature configuration. If you select the **Account** option from the **Adjustment Level** list, the system checks the account balance while creating the refund/write off request. If the account balance is zero, the system throws an appropriate error message and does not allow you to create the refund/write off request at the account level. However, if the account balance is in credit, the system allows you to create a refund request for the account. Similarly, if the account balance is in debit, the system allows you to create a write off request for the account.

While creating a refund/write off request at the account level, the system, by default, sets the total refund/write off amount to the account balance. You cannot edit the refund/write off amount. Even, the post processing algorithms cannot update the refund/write off amount in the refund/write off request.

Note: The **Bills** and **Payments and Adjustments** tabs do not appear in the **Refund Request** and **Write Off Request** screens when the refund/write off request is created at the account level.

Before creating the refund/write off request at the account level, you need to do the following:

- Attach the **C1-NTACBAL** algorithm to the **Netting Account Balance** system event in the **Algorithms** tab of the **Installation Options – Framework** screen
- Set the netting contract type on the respective refund/write off request type

The system invokes the **C1-NTACBAL** algorithm while processing the refund/write off request where the adjustment level is set to **Account**. The **C1-NTACBAL** algorithm creates transfer adjustments on the netting contract of the account. The transfer adjustment creation process slightly varies depending on the adjustment level that is selected while defining a refund/write off request.

If the adjustment level is set to **Account**, the system checks whether a netting contract created using the netting contract type (specified in the refund/write off request type) exists for the account. If so, the system considers the unmatched financial transactions of the account and then creates a transfer adjustment against each of them on the netting contract. However, if the netting contract does not exist for the account, then the system does the following:

1. Creates a netting contract using the netting contract type specified in the refund/write off request type
2. Considers the unmatched financial transactions of the account and then creates a transfer adjustment against each of them on the netting contract

You can opt to exclude unmatched financial transactions of contracts created using a particular contract type by setting the **Excluded Contract types for netting** option type of the **C1_CMO** feature configuration. You can exclude multiple contract types by defining the **Excluded Contract types for netting** option type multiple times (with unique sequence number) in the feature configuration. This option type is considered only when the adjustment level is set to **Account**.

On submitting or approving a refund/write off request at the account level, the system validates whether the refund/write off amount matches the current account balance. If the refund/write off amount does not match the current account balance, the system does not allow you to process the refund/write off request. However, if the refund/write off amount matches the current account balance, the system creates the transfer adjustments and refund/write off adjustment on the netting contract of the account.

On voiding a refund request where the adjustment level is set to **Account**, the system cancels the transfer adjustments and refund adjustment on the netting contract of the account. And, on canceling a write off request where the adjustment level is set to **Account**, the system cancels the transfer adjustments and write off adjustment on the netting contract of the account.

Refund/Write Off Adjustment at Bill Level

Until now, you were able to create the refund/write off request for a bill or bill line item (i.e. bill segment or adjustment) of an account. On processing the refund/write off request, the system used to create refund/write off adjustment against the bill line item irrespective of whether the refund/write off is done at the bill or bill line item level. There was a requirement wherein the system should allow to create the refund/write off adjustment against the bill and not against the bill line items when the refund/write off is done at the bill level.

Now, Oracle Revenue Management and Billing enables you to create a refund/write off adjustment at the bill level. A new field named **Adjustment Level** is available while defining a refund/write off request. It allows you to control how the refund/write off adjustment should be created for the refund/write off request. It supports the following values:

- **Account** – Used when you want to create the refund/write off request at the account level. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the health insurance domain.
- **Bill** - Used when you want to create the refund/write off request for a bill. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the financial services domain.
- **Segment** - Used when you want to create the refund/write off request for a bill, bill segment, adjustment, or payment of an account. Here, the refund/write off adjustment is created against the bill segment, adjustment, or payment segment, respectively. If you select this option, the system behaves in the traditional manner.

By default, the adjustment level is set to **Segment**. If you select the **Bill** option from the **Adjustment Level** list, the system checks the account balance while creating the refund/write off request. If the account balance is zero, the system throws an appropriate error message and does not allow you to create the refund/write off request for the account. However, if the account balance is in credit, the system allows you to create a refund request for the account. Similarly, if the account balance is in debit, the system allows you to create a write off request for the account.

Note: The **Payments and Adjustments** tab does not appear in the **Refund Request** screen when the adjustment level is set to **Bill** in the refund request.

Before creating the refund/write off request where the adjustment level is set to **Bill**, you need to do the following:

- Attach the **C1-NTACBAL** algorithm to the **Netting Account Balance** system event in the **Algorithms** tab of the **Installation Options – Framework** screen
- Set the netting contract type on the respective refund/write off request type

The system invokes the **C1-NTACBAL** algorithm while processing the refund/write off request where the adjustment level is set to **Bill**. The **C1-NTACBAL** algorithm creates transfer adjustments on the netting contract of the account. The transfer adjustment creation process slightly varies depending on the adjustment level that is selected while defining a refund/write off request.

If the adjustment level is set to **Bill**, then the system checks whether a netting contract created using the netting contract type (specified in the refund/write off request type) exists for the account and its contract balance is equal to zero. If both the conditions are met, the system considers the unpaid bill segments and adjustments of the bill and then creates a transfer adjustment against each of them on the netting contract. However, if the netting contract does not exist for the account, then the system does the following:

1. Creates a netting contract using the netting contract type specified in the refund/write off request type
2. Considers the unpaid bill segments and adjustments of the bill and then creates a transfer adjustment against each of them on the netting contract

And, if the netting contract exists for the account, but its contract balance is not equal to zero, the system throws an appropriate error message on the user interface.

On voiding a refund request where the adjustment level is set to **Bill**, the system cancels the transfer adjustments and refund adjustment on the netting contract of the account. And, on canceling a write off request where the adjustment level is set to **Bill**, the system cancels the transfer adjustments and write off adjustment on the netting contract of the account.

Algorithms Used in C1-RefundReq

The following table lists the algorithms which are attached to the **C1-RefundReq** business object:

| System Event | Algorithm | Algorithm Type | Description |
|-----------------|--------------|----------------|---|
| Information | C1-REFREQINF | C1-REFREQINF | <p>This algorithm generates the refund and write off request information string which appears throughout the application. It concatenates the following fields:</p> <ul style="list-style-type: none"> Refund or Write Off Request Type Description Refund or Write Off Request Status Description Refund or Write Off Request ID |
| Post-Processing | C1-REFWOPOSP | C1-REFWOPOSP | <p>This algorithm recalculates and updates the total refund amount in the Refund Request zone when you change the refund amount against an entity while editing a refund request.</p> |
| Validation | C1-REFUNDVAL | C1-REFUNDVAL | <p>This algorithm validates the following for each entity that you have selected in the refund request:</p> <ul style="list-style-type: none"> The mandatory data, such as refund amount and adjustment type, is specified. The refund amount is not less than zero. The refund amount is not greater than the entity amount. The refund amount is not greater than the eligible refund amount. The partial refund is not done at the payment event or bill level. |

The following table lists the algorithms which are used in the lifecycle of the **C1-RefundReq** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|--------|--------------|------------|----------------|---|
| Draft | Enter | C1-REF-DFT | C1-REF-DFT | <p>This algorithm fetches the account's main customer's name and address and displays in the Refund Request zone. In addition, when you refund the payments from the Payment Event Summary screen, this algorithm does the following:</p> <ul style="list-style-type: none"> The total eligible refund amount is calculated and accordingly displayed in the Refund Request screen. The default refund adjustment type specified in the refund |

| Status | System Event | Algorithm | Algorithm Type | Description |
|----------------------|--------------|--------------|----------------|--|
| | | | | <p>request type is fetched and displayed against the selected payment event or payments.</p> <ul style="list-style-type: none"> On selecting a payment event for refund, if all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the Refund Details zone. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the Refund Details zone. |
| Submitted | Enter | C1-REFUNDSUB | C1-REFUNDSUB | <p>This algorithm checks the following:</p> <ul style="list-style-type: none"> Whether the approval is required for the refund request. If the approval is required for a refund request, the status of the refund request is changed to Approval In Progress. However, if the approval is not required for a refund request, the status of the refund request is changed to Creating Adjustment. At least one entity, such as payment event, payment, or credit bill line item (such as credit bill segment or adjustment) is selected in the refund request. Refund/Write Off Request Type

Oracle Revenue Management and Billing allows you to define:

- **Refund Request Type** — It is used to create a refund request. You can define multiple refund request types in the system. A refund request type helps the system to determine:
 - Whether the refund request must be approved before creating refund adjustments in the system
 - Approval profile using which the refund request must be approved
 - Whether multi-level or single-level approval is required while creating refund adjustments in the system
 - Tolerance limit for refund (i.e. minimum refund amount)
 - Adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount
 - Default adjustment type using which refund adjustments must be created
- **Write Off Request Type** — It is used to create a write off request. You can define multiple write off request types in the system. A write off request type helps the system to determine:
 - Whether the write off request must be approved before creating write off adjustments in the system
 - Approval profile using which the write off request must be approved
 - Whether multi-level or single-level approval is required while creating write off adjustments in the system
 - Default adjustment type using which write off adjustments must be created

While defining a refund or write off request type where approval workflow is required, you need to select the **Approval Required** check box. If the **Approval Required** check box is selected, the refund or write off request (which is created using the refund or write off request type) is sent for approval before creating the refund or write off adjustments.

However, if the **Approval Required** check box is not selected, the refund or write off adjustments are created immediately on submitting a refund or write off request. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. You can define a debit and credit hierarchy in the approval profile using the threshold amount. The debit approval hierarchy is used for approving write off request and credit approval hierarchy is used for approving refund request. Therefore, while defining an approval profile for refund, you need to define credit hierarchy and set the To Do Type to **C1-REFRQ**. However, while defining an approval profile for write off, you need to define debit hierarchy and set the To Do Type to **C1-WOREQ**.

You can define an approval hierarchy where users with different To Do role at each level can approve or reject the refund or write off request. For example, you can define an approval profile called A1 with two levels of approval. At the first level, a user with the *Manager* To Do role will approve or reject the refund or write off request, and at the second level, a user with the *Senior Manager* To Do role will approve or reject the refund or write off request. On submitting a refund or write off request where approval is required, a notification in the form of To Do is sent to all users with the To Do role defined at the first level in the hierarchy. Once the request is approved at the first level, a notification is sent to all users with the To Do role defined at the next level in the hierarchy. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the refund or write off request, the refund or write off adjustments are created. However, if an approver at any level in the hierarchy rejects the request, the refund or write off adjustments are not created.

The approval hierarchy is controlled by the threshold amount. For example, you define an approval profile called A1 with two levels of approval — *First Level* (Threshold Amount: 300, To Do Role: *Manager*) and *Second Level* (Threshold Amount: 500, To Do Role: *Senior Manager*). Now, if the total refund or write off amount is equal to 300 or less than 500, then the approval is required only from the first level in the hierarchy and not from the second level in the hierarchy. However, if the total refund or write off amount is equal to or greater than 500, then the approval is required from the first level and then from the second level in the hierarchy. But, if the total refund or write off amount is less than 300, then the approval is not required from any levels in the hierarchy. The system will automatically approve the refund or write off request and create the refund or write off adjustments.

The system supports both single-level and multi-level approval process while approving refund or write off request. If the **Hierarchical Approval** check box is selected while defining a refund or write off request type, the approval hierarchy defined in the approval profile is followed based on the threshold limit. However, if the **Hierarchical Approval** check box is not selected while defining a refund or write off request type, the approval is required only from the approval level where the total refund or write off amount falls within the threshold limit. Let us understand this with the help of some examples.

Example 1

| Refund Request Type | Approval Profile | Approval Hierarchy | Hierarchical Approval | | | | | | | | |
|---------------------|------------------|---|-----------------------|------------|-------|----------------|-------|---------|--------|----------------|-----|
| R1 | Refund Analyst | <p>Credit Hierarchy</p> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$500</td> <td>Senior Analyst</td> </tr> <tr> <td>\$750</td> <td>Manager</td> </tr> <tr> <td>\$1500</td> <td>Senior Manager</td> </tr> </tbody> </table> | Threshold Amount | To Do Role | \$500 | Senior Analyst | \$750 | Manager | \$1500 | Senior Manager | Yes |
| Threshold Amount | To Do Role | | | | | | | | | | |
| \$500 | Senior Analyst | | | | | | | | | | |
| \$750 | Manager | | | | | | | | | | |
| \$1500 | Senior Manager | | | | | | | | | | |
| R2 | Refund Analyst | <p>Credit Hierarchy</p> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$500</td> <td>Senior Analyst</td> </tr> <tr> <td>\$750</td> <td>Manager</td> </tr> <tr> <td>\$1500</td> <td>Senior Manager</td> </tr> </tbody> </table> | Threshold Amount | To Do Role | \$500 | Senior Analyst | \$750 | Manager | \$1500 | Senior Manager | No |
| Threshold Amount | To Do Role | | | | | | | | | | |
| \$500 | Senior Analyst | | | | | | | | | | |
| \$750 | Manager | | | | | | | | | | |
| \$1500 | Senior Manager | | | | | | | | | | |

The following table indicates how the system will behave in different refund scenarios:

| Refund Request | Refund Request Type | Total Refund Amount (\$) | Comments |
|----------------|---------------------|--------------------------|--|
| RR1 | R1 | 200 | This refund request is automatically approved by the system because the total refund amount is less than \$500. |
| RR2 | R1 | 750 | The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> 1. Users with the Senior Analyst To Do role 2. Users with the Manager To Do role This is because the total refund amount is either equal to \$750 or less than \$1500 and hierarchical approval is required. |
| RR3 | R1 | 2000 | The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> 1. Users with the Senior Analyst To Do role 2. Users with the Manager To Do role 3. Users with the Senior Manager To Do role This is because the total refund amount is greater than \$1500 and hierarchical approval is required. |
| RR4 | R2 | 200 | This refund request is automatically approved by the system because the total refund amount is less than \$500. |
| RR5 | R2 | 750 | The To Do is sent for approval to users with the Manager To Do role. This is because the total refund amount is either equal to \$750 or less than \$1500 and hierarchical approval is not required. |
| RR6 | R2 | 2000 | The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total refund amount is greater than \$1500 and hierarchical approval is not required. |

Example 2

| Write Off Request Type | Approval Profile | Approval Hierarchy | Hierarchical Approval | | | | | | | | |
|------------------------|-------------------|--|-----------------------|------------|-------|----------------|-------|---------|-------|----------------|-----|
| W1 | Write Off Analyst | Debit Hierarchy <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$100</td> <td>Senior Analyst</td> </tr> <tr> <td>\$200</td> <td>Manager</td> </tr> <tr> <td>\$300</td> <td>Senior Manager</td> </tr> </tbody> </table> | Threshold Amount | To Do Role | \$100 | Senior Analyst | \$200 | Manager | \$300 | Senior Manager | Yes |
| Threshold Amount | To Do Role | | | | | | | | | | |
| \$100 | Senior Analyst | | | | | | | | | | |
| \$200 | Manager | | | | | | | | | | |
| \$300 | Senior Manager | | | | | | | | | | |

| Write Off Request Type | Approval Profile | Approval Hierarchy | Hierarchical Approval | | | | | | | | |
|------------------------|-------------------|--|-----------------------|------------|-------|----------------|-------|---------|-------|----------------|----|
| W2 | Write Off Analyst | <u>Debit Hierarchy</u> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$100</td> <td>Senior Analyst</td> </tr> <tr> <td>\$200</td> <td>Manager</td> </tr> <tr> <td>\$300</td> <td>Senior Manager</td> </tr> </tbody> </table> | Threshold Amount | To Do Role | \$100 | Senior Analyst | \$200 | Manager | \$300 | Senior Manager | No |
| Threshold Amount | To Do Role | | | | | | | | | | |
| \$100 | Senior Analyst | | | | | | | | | | |
| \$200 | Manager | | | | | | | | | | |
| \$300 | Senior Manager | | | | | | | | | | |

The following table indicates how the system will behave in different write off scenarios:

| Write Off Request | Write Off Request Type | Total Write Off Amount (\$) | Comments |
|-------------------|------------------------|-----------------------------|--|
| WO1 | W1 | 90 | This write off request is automatically approved by the system because the total write off amount is less than \$100. |
| WO2 | W1 | 250 | <p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> 1. Users with the Senior Analyst To Do role 2. Users with the Manager To Do role <p>This is because the total write off amount is either equal to \$200 or less than \$300 and hierarchical approval is required.</p> |
| WO3 | W1 | 500 | <p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> 1. Users with the Senior Analyst To Do role 2. Users with the Manager To Do role 3. Users with the Senior Manager To Do role <p>This is because the total write off amount is greater than \$300 and hierarchical approval is required.</p> |
| WO4 | W2 | 90 | This write off request is automatically approved by the system because the total write off amount is less than \$100. |
| WO5 | W2 | 250 | The To Do is sent for approval to users with the Manager To Do role. This is because the total write off amount is either equal to \$200 or less than \$300 and hierarchical approval is not required. |
| WO6 | W2 | 500 | The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total write off amount is greater than \$300 and hierarchical approval is not required. |

The **Refund/Write Off Request Type** screen allows you to define, edit, delete, and copy a refund and write off request type. This screen consists of the following zones:

- [Refund/Write Off Request Type List](#) on page 1812

- [Refund/Write Off Request Type](#) on page 1812

Refund/Write Off Request Type List

The **Refund/Write Off Request Type List** zone lists refund and write off request types that are already defined in the system. It contains the following columns:

| Column Name | Column Description |
|-------------------------------|--|
| Refund/Write Off Request Type | Displays the refund or write off request type. |
| Description | Displays the description of the refund or write off request type. |
| Edit | On clicking the Edit (✎) icon, the Refund/Write Off Request Type screen appears where you can edit the details of the refund and write off request type. |
| Duplicate | On clicking the Duplicate (📄) icon, the Refund/Write Off Request Type screen appears where you can define a refund and write off request type using an existing refund and write off request type. |
| Delete | On clicking the Delete (🗑) icon, you can delete the refund or write off request type. Note: You can delete a refund or write off request type when you have not created a refund or write off request using the refund or write off request type. |

On clicking the **Broadcast** (📡) icon corresponding to refund or write off request type, the **Refund/Write Off Request Type** zone appears with the details of the respective refund or write off request type.

Refund/Write Off Request Type

The **Refund/Write Off Request Type** zone displays the details of the refund or write off request type. This zone consists of the following sections:

- **Main** — This section provides basic information about the refund or write off request type. It contains the following fields:

| Field Name | Field Description |
|--|--|
| Refund/Write Off Request Type | Displays the refund or write off request type. |
| Refund/Write Off Request Business Object | Indicates the business object that will be used to create the refund or write off request. |

| Field Name | Field Description |
|--------------------------|---|
| | Note: It has a link. On clicking the link, the Business Object screen appears with the details of the respective business object. |
| Description | Displays the description of the refund or write off request type. |
| Detailed Description | Displays additional information about the refund or write off request type. |
| Status | Indicates the status of the refund or write off request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive |
| Action | Indicates whether the request type is created for refund or write off. The valid values are: <ul style="list-style-type: none"> • Refund • Write Off |
| Minimum Refund Amount | Displays the minimum refund amount. Note: This field appears when the Action field is set to Refund . |
| Write Up Adjustment Type | Indicates the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount. Note: This field appears when the Action field is set to Refund . |
| Approval Required | Indicates whether approval is required while creating the refund or write off adjustments using the refund or write off request type. |
| Approval Profile | Indicates the approval profile which must be used to define approval hierarchy for the refund or write off request type. Note: This field appears when the Approval Required check box is selected. It has a link. On clicking the link, the Approval Profile screen appears with the details of the respective approval profile. |
| Hierarchical Approval | Indicates whether multi-level or single approval is required while creating the refund or write off adjustments using the refund or write off request type. Note: This field appears when the Approval Required check box is selected. |
| Adjustment Type | Indicates the adjustment type using which the refund or write off adjustments must be created. |

| Field Name | Field Description |
|------------|---|
| | Note: It has a link. On clicking the link, the Adjustment Type screen appears with the details of the respective adjustment type. |

- **Characteristics** — This section lists the characteristics of the refund or write off request type. It contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** — This section contains the following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to edit the details of the refund or write off request type. |
| Delete | Used to delete the refund or write off request type. Note: You can delete a refund or write off request type when you have not created a refund or write off request using the refund or write off request type. |
| Duplicate | Used to create a new refund or write off request type using an existing refund or write off request type. |

- **Record Information** — This section contains the following fields:

| Field Name | Field Description |
|-----------------|--|
| Business Object | Indicates the business object using which the refund or write off request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |

By default, the **Refund/Write Off Request Type** zone does not appear in the **Refund/Write Off Request Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the refund or write off request type in the **Refund/Write Off Request Type List** zone.

Defining a Refund or Write Off Request Type

Prerequisites

To define a refund or write off request type, you should have:

- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

Procedure

To define a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.
A sub-menu appears.
3. Click the **Add** option from the **Refund/Write Off Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---|---|-----------------------|
| Refund/Write Off Request Type Business Object | Used to indicate the business object that you want to use to create the refund or write off request type. | Yes |

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request Type** screen.

Note: The **Select Business Object** screen appears when there are multiple refund and write off request type business objects defined in the application. If there is only one refund and write off request type business object defined in the application, the **Refund/Write Off Request Type** screen appears.

4. Select the required refund and write off request type business object from the respective field.
5. Click **OK**.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define the characteristics for the refund or write off request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|-----------------------|
| Refund/Write Off Request Type | Used to specify the refund or write off request type. | Yes |
| Business Object | Indicates the refund and write off request type business object used while defining the refund or write off request type. | Not applicable |
| Refund/Write Off Request Business Object | Used to indicate the business object that you want to use while creating the refund or write off request. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------|---|-----------------------|
| Description | Used to specify the description for the refund or write off request type. | Yes |
| Detailed Description | Used to specify additional information about the refund or write off request type. | No |
| Status | <p>Used to indicate the status of the refund or write off request type. The valid values are:</p> <ul style="list-style-type: none"> • Active • Inactive <p>Note: You cannot change the status of a refund or write off request type to Inactive if there are refund or write off requests which are created using the refund or write off request type and are currently in the Draft or Approval In Progress status.</p> | Yes |
| Action | <p>Used to indicate whether the request type is created for refund or write off. The valid values are:</p> <ul style="list-style-type: none"> • Refund • Write Off | Yes |
| Minimum Refund Amount | <p>Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment.</p> <p>Note: This field appears when the Action field is set to Refund.</p> | Yes |
| Write Up Adjustment Type | Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------|---|---|
| | <p>Note:</p> <p>This field appears when the Action field is set to Refund.</p> <p>You can create write up adjustments only using those adjustment types where A/P request type is not defined.</p> | |
| Approval Required | Used to indicate whether approval is required while creating the refund or write off adjustments using the refund or write off request type. | No |
| Approval Profile | Used to indicate the approval profile which must be used to define approval hierarchy for the refund or write off request type. | Yes (Conditional) |
| | <p>Note: This field appears when the Approval Required check box is selected.</p> | <p>Note: This field is required when the Approval Required check box is selected.</p> |
| Hierarchical Approval | Used to indicate whether multi-level or single-level approval is required while creating the refund or write off adjustments using the refund or write off request type. | No |
| | <p>Note: This field appears only when the Approval Required check box is selected.</p> | |
| Refund Adjustment Type | <p>Used to indicate the adjustment type using which the refund adjustments must be created. This default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request.</p> <p>Note:</p> <p>This field appears when the Action field is set to Refund.</p> <p>The list includes only those adjustment types where A/P request type is defined.</p> | Yes |
| Write Off Adjustment Type | Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| | change the adjustment type, if required, while editing a write off request. | |
| | <p>Note:</p> <p>This field appears when the Action field is set to Write Off.</p> <p>You can create write off adjustments only using those adjustment types where A/P request type is not defined.</p> | |

- Enter the required details depending on whether you want to define refund or write off request type.

Note: You can search for an adjustment type by clicking the **Search** (🔍) icon corresponding to the respective field.

- Define characteristics for the refund or write off request type, if required.
- Click **Save**.

The refund or write off request type is defined.

Defining a Characteristic for a Refund or Write Off Request Type

Prerequisites

To define a characteristic for a refund or write off request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request Type**)

Procedure

To define a characteristic for a refund or write off request type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a refund or write off request type.

The **Characteristics** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|---|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | <p>Note: The list includes only those characteristic types where the characteristic entity is set to Refund Write Off Request Type.</p> | <p>Note: This field is required when you are defining a characteristic for the refund or write off request type.</p> |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|--|
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the refund or write off request type. |

- Enter the required details in the **Characteristics** section.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the refund or write off request type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the refund or write off request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

Editing a Refund or Write Off Request Type

Prerequisites

To edit a refund or write off request type, you should have:

- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

Procedure

To edit a refund or write off request type:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.
A sub-menu appears.
- Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.
The **Refund/Write Off Request Type** screen appears.
- In the **Refund/Write Off Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the refund or write off request type whose details you want to edit.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define the characteristics for the refund or write off request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--|--|-----------------------|
| Refund/Write Off Request Type | Displays the refund or write off request type. | Not applicable |
| Business Object | Indicates the refund and write off request type business object used while defining the refund or write off request type. | Not applicable |
| Refund/Write Off Request Business Object | Used to indicate the business object that you want to use while creating the refund or write off request. | Yes |
| Description | Used to specify the description for the refund or write off request type. | Yes |
| Detailed Description | Used to specify additional information about the refund or write off request type. | No |
| Status | <p>Used to indicate the status of the refund or write off request type. The valid values are:</p> <ul style="list-style-type: none"> • Active • Inactive <p>Note: You cannot change the status of a refund or write off request type to Inactive if there are refund or write off requests which are created using the refund or write off request type and are currently in the Draft or Approval In Progress status.</p> | Yes |

Copying a Refund or Write Off Request Type

Instead of creating a refund or write off request type from scratch, you can create a new refund or write off request type using an existing refund or write off request type. This is possible through copying a refund or write off request type.

On copying a refund or write off request type, the details including the characteristics are copied to the new refund or write off request type. You can then edit the details, if required.

Prerequisites

To copy a refund or write off request type, you should have:

- Refund or Write Off request type (whose copy you want to create) defined in the application
- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

Procedure

To copy a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.

A sub-menu appears.

3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.

The **Refund/Write Off Request Type** screen appears.

4. In the **Refund/Write Off Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the refund or write off request type whose copy you want to create.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define the characteristics for the refund or write off request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|------------------------------|
| Refund/Write Off Request Type | Used to specify the refund or write off request type. | Yes |
| Business Object | Indicates the refund and write off request type business object used while defining the refund or write off request type. | Not applicable |
| Refund/Write Off Request Business Object | Used to indicate the business object that you want to use while creating the refund or write off request. | Yes |
| Description | Used to specify the description for the refund or write off request type. | Yes |
| Detailed Description | Used to specify additional information about the refund or write off request type. | No |
| Status | Used to indicate the status of the refund or write off request type. The valid values are: <ul style="list-style-type: none"> • Active | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------|---|-----------------------|
| | <ul style="list-style-type: none"> Inactive <p>Note: You cannot change the status of a refund or write off request type to Inactive if there are refund or write off requests which are created using the refund or write off request type and are currently in the Draft or Approval In Progress status.</p> | |
| Action | <p>Used to indicate whether the request type is created for refund or write off. The valid values are:</p> <ul style="list-style-type: none"> Refund Write Off | Yes |
| Minimum Refund Amount | <p>Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment.</p> <p>Note: This field appears when the Action field is set to Refund.</p> | Yes |
| Write Up Adjustment Type | <p>Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount.</p> <p>Note: This field appears when the Action field is set to Refund. You can create write up adjustments only using those adjustment types where A/P request type is not defined.</p> | Yes |
| Approval Required | Used to indicate whether approval is required while creating the refund or write off adjustments using the refund or write off request type. | No |
| Approval Profile | Used to indicate the approval profile which must be used to define approval hierarchy for the refund or write off request type. | Yes (Conditional) |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------|---|--|
| | Note: This field appears when the Approval Required check box is selected. | Note: This field is required when the Approval Required check box is selected. |
| Hierarchical Approval | Used to indicate whether multi-level or single-level approval is required while creating the refund or write off adjustments using the refund or write off request type. Note: This field appears only when the Approval Required check box is selected. | No |
| Refund Adjustment Type | Used to indicate the adjustment type using which the refund adjustments must be created. This default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request. Note: This field appears when the Action field is set to Refund . The list includes only those adjustment types where A/P request type is defined. | Yes |
| Write Off Adjustment Type | Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then change the adjustment type, if required, while editing a write off request. Note: This field appears when the Action field is set to Write Off . You can create write off adjustments only using those adjustment types where A/P request type is not defined. | Yes |

Tip: Alternatively, you can click the **Duplicate** button in the **Refund/Write Off Request Type** zone to create a copy of the refund or write off request type.

5. Enter the required details in the **Main** section.

Note: You can search for an adjustment type by clicking the **Search** (🔍) icon corresponding to the respective field.

6. Define, edit, or remove characteristics of the refund or write off request type, if required.
7. Click **Save**.

The new refund or write off request type is defined.

Deleting a Refund or Write Off Request Type

Procedure

To delete a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.
A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.
The **Refund/Write Off Request Type** screen appears.
4. In the **Refund/Write Off Request Type List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the refund or write off request type that you want to delete.
A message appears confirming whether you want to delete the refund or write off request type.

Note: You can delete a refund or write off request type when you have not defined a refund or write off request using the refund or write off request type.

Tip: Alternatively, you can click the **Delete** button in the **Refund/Write Off Request Type** zone to delete the refund or write off request type.

5. Click **OK**.

The refund or write off request type is deleted.

Searching for a Refund or Write Off Request

Prerequisites

To search for a refund or write off request, you should have:

- Refund or Write Off request types defined in the application

Procedure

To search for a refund or write off request:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Accounting and Receivable** and then click **Refund/Write Off Request**.

A sub-menu appears.

- Click the **Search** option from the **Refund/Write Off Request** sub-menu.

The **Refund/Write Off Request** screen appears.

- Enter the search criteria in the **Search Refund/Write Off Request** zone depending on whether you want to search for a refund or write off request.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of refund or write off requests that meet the search criteria appears in the **Search Results** section.

Creating a Refund Request

Prerequisites

To create a refund request, you should have:

- Refund request types defined in the application

Procedure

To create a refund request:

- Do either of the following:

| If you want to... | Then... |
|---|---|
| Define a refund request from the Account Receivable Central screen | <ol style="list-style-type: none"> Click the Main link in the Application toolbar. A list appears. From the Main menu, select Accounting and Receivable and then click Account Receivable Central. Search for the bill in the Account Receivable Central screen. In the Search Results section, select the required bill and then click Refund. |
| | Note: Only one bill at a time is allowed to select for Refund Request from the Account Receivable Central screen. |

| If you want to... | Then... |
|--|--|
| Define a refund request from the Refund Request screen | <ol style="list-style-type: none"> 1. Click the Main link in the Application toolbar. A list appears. 2. From the Main menu, select Accounting and Receivable and then click Refund/Write Off Request. A sub-menu appears. 3. Click the Add option from the Refund/Write Off Request sub-menu. |
| Define a refund request from the Payment Event Summary screen | <ol style="list-style-type: none"> 1. Click the Main link in the Application toolbar. A list appears. 2. From the Main menu, select Payments and then click Payment Event Summary. 3. Search for the payment event (whose payments you want to refund) in the Payment Event Summary screen. 4. In the Search Results section, click the Broadcast (📡) icon corresponding to the payment event whose payments you want to view. The Payments zone appears. 5. Select the check box corresponding to the payments that you want to refund. 6. Click the Refund button in the Payments zone. |

The **Select Request Type** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------|---|-----------------------|
| Action | <p>Displays the type of request (refund or write off) to be created.</p> <p>Note: This field is pre-populated if the refund request is created from the Account Receivable Central screen. This field is editable if the refund request is created from the Refund/Write Off Request screen.</p> | Not applicable |
| Refund/Write Off Request Type | <p>Used to indicate the request type using which you want to create the refund or write off request.</p> <p>Note: The refund request types are listed when you set the Action field to Refund and the write off request types are listed when you set the Action field to Write Off.</p> | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Account | Used to indicate the account for which you want to create the refund or write off request. | Yes |
| | <p>Note:</p> <p>This field is pre-populated if the refund request is created from the Account Receivable Central screen.</p> <p>This field is editable if the refund request is created from the Refund/Write Off Request screen.</p> <p>You can search for an account by clicking the Search (🔍) icon corresponding to the respective field.</p> | |

Tip:

Alternatively, you can access the **Select Request Type** screen:

- By clicking the **Add** button in the **Page Title** area of **Refund/Write Off Request** screen.
- By selecting the payment which you want to refund in the **Payment Event Summary** screen and then clicking the **Refund** button. Note that the system will allow you to refund only those payments which are in the **Frozen** status and matched against the suspense or excess credit contract.

2. Select the required refund request type from the respective field.

3. Click **Save**.

The refund request is defined and the status of the refund request is set to **Draft**. The **Refund Request** screen appears where you can view the details of the refund request. It contains the following tabs:

Note: The refund request can be created only for bill with outstanding amount lesser than zero.

- **Main** – Displays information about the refund request. It contains the following zones:
 - **Refund Request** – Displays the details of the refund request.
 - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
 - **Payments** – Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
 - **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
 - **Log** – Lists the complete trail of actions performed on the refund request.
4. Add payment events, payments, or credit bill line items that you want to refund.
 5. Edit the refund amount of each entity, if required.
 6. Define characteristics for the refund request, if required.
 7. Override the address if you want to sent the refund to an address other than the account’s main customer address.

Refund Request

Once you create a refund request, the **Refund Request** screen allows you to:

- Edit and delete a refund request
- View the details of a refund request
- Submit a refund request for approval
- Approve or reject a refund request
- View the log of a refund request
- Add a log entry for a refund request
- Void a refund request

This screen consists of the following tabs:

- **Main** – Displays information about the refund request. It contains the following zones:
 - **Refund Request** – Displays the details of the refund request.
 - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
 - **Bill Line Items** — Displays the details of the bill which must be refunded.

Note: This zone appears when you click the Broadcast () icon corresponding to the entity type as **Bill** in the **Refund Details** zone.

- **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. It contains the following zones:
 - **Search Bills** — Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
 - **Bill Line Items** — Lists the debit and credit bill segments and adjustments of the bill.

This tab appears when the refund request is in the **Draft** status.

- **Payments** — Used to search payment events or individual payments that you want to refund. It contains the following zones:
 - **Search Payment Event** — Lists the payment events which are created for the account. You can filter the payment events using various search criteria.
 - **Payments** — Lists all payments created through the payment event.

This tab appears when the refund request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the refund request.

Refund Request - Main

The **Main** tab displays information about the refund request. It contains the following zones:

- [Refund Request](#) on page 1840
- [Refund Details](#) on page 1842
- [Bill Line Items](#) on page 1843

Refund Request

The **Refund Request** zone displays the details of the refund request. This zone contains the following sections:

- **Main** — This section provides basic information about the refund request. It contains the following fields:

| Field Name | Field Description |
|----------------------------|---|
| Refund Request Information | Displays information about the refund request. |
| Refund Request Type | Indicates the refund request type using which the refund request is created. |
| | Note: It has a link. On clicking the link, the Refund/Write Off Request Type screen appears where you can view the details of the refund request type. |
| Status | Indicates the status of the refund request. The valid values are: <ul style="list-style-type: none"> • Draft • Approval In Progress • Rejected • Processed • Voided |
| Status Reason | Indicates the reason why the refund request is rejected or voided. |
| | Note: This field appears when the refund request is in the Rejected or Voided status. It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the rejected or voided reason. |
| Account Information | Indicates the account for which the refund request is created. |
| | Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account. |
| Person Name | Indicates the person for whom the refund request is created. |
| Override Address | Indicates whether the account's mailing address is overridden. |
| Address 1 | Displays the house number and apartment name. |
| Address 2 | Displays the street name. |
| Address 3 | Indicates the landmark, if available. |
| Address 4 | Displays the village, town, or city name. |
| City | Displays the city name. |
| State | Displays the state name. |
| Country | Displays the country name. |
| Postal | Displays the postal or zip code. |
| Comments | Displays additional information about the refund request. |
| Total Refund Amount | Displays the total refund amount. |

- **Characteristics** — Lists the characteristics defined for the refund request. It contains the following fields:

| Field Name | Field Description |
|----------------------|--|
| Effective Date | Indicates the date from when the characteristic is effective for the refund request. |
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** — This section contains the following buttons:

| Button Name | Button Description |
|-------------|---|
| Edit | Used to edit the details of the refund request. |
| | Note: The Edit button appears when the refund request is in the Draft status. |
| Delete | Used to delete the refund request. |
| | Note: The Delete button appears when the refund request is in the Draft status. |
| Submit | Used to submit the refund request for approval. |
| | Note: The Submit button appears when the refund request is in the Draft status. |
| Approve | Used to approve the refund request. |
| | Note: The Approve button appears when: <ul style="list-style-type: none"> • The refund request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the refund request. |
| Reject | Used to reject the refund request. |
| | Note: The Reject button appears when: <ul style="list-style-type: none"> • The refund request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the refund request. |
| Void | Used to void the refund request. |
| | Note: The Void button appears when the refund request is in the Processed status. |

- **Record Information** — This section contains the following fields:

| Field Name | Field Description |
|-----------------|---|
| Business Object | Indicates the business object using which the refund request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |

| Field Name | Field Description |
|------------------|---|
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Status Date/Time | Displays the date and time when the refund request status is updated |
| Create Date/Time | Displays the date and time when the refund request is created. |

Refund Details

The **Refund Details** zone lists the payment events, payments, and credit bill line items (such as bill segments and adjustments) that you have added to the refund request. This zone contains the following columns:

| Column Name | Column Description |
|------------------------|---|
| Entity ID | Displays the entity ID. |
| Entity Type | Indicates whether the entity is a payment event, payment, bill, bill segment, or an adjustment. |
| Currency | Indicates the currency in which the entity was created. |
| Entity Amount | Displays the entity amount. |
| Refund Amount | Displays the amount that must be refunded. Note: By default, the amount which is eligible for refund appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount. |
| Contract Information | Displays additional information about the contract against which the bill segment or adjustment is created or against which the payment is matched. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract. |
| Adjustment Type | Indicates the adjustment type using which the refund adjustment must be created. Note: By default, the adjustment type specified in the refund request type appears in this column. You can change the adjustment type, if required, by editing the refund request. |
| Adjustment Information | Displays information about the refund adjustment. Note: It has a link. On clicking the link, the Adjustment screen appears where you can view the details of the respective adjustment. The data appears in this column when the status of the refund request is Processed . The information string appears when an algorithm of the C1-ADI-INFO algorithm type is attached to the Adjustment Information system event in the Algorithms tab of the Installation Options — Framework screen. |

Note: On clicking the Broadcast () icon corresponding to the entity type as **Bill**, the **Bill Line Items** zone appears with the details of the respective bill.

In addition to above columns, this screen contains following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to edit the details of bill line items. |
| Delete | Used to delete the bill line items. |

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

| Column Name | Column Description |
|------------------------|---|
| Bill ID | Displays the bill ID. |
| Entity ID | Displays the bill segment or adjustment ID. |
| Entity Type | Indicates whether the entity is a bill, bill segment or an adjustment. |
| Currency | Displays the currency in which the entity was created. |
| Entity Amount | Displays the bill segment or adjustment amount. |
| Request Amount | Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded. Note: If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero. |
| Contract Information | Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract. |
| Adjustment Type | Indicates the adjustment type using which the refund adjustment must be created. Note: It has a link. On clicking the link, the Adjustment Type screen appears where you can view the details of the respective adjustment type. |
| Adjustment Information | Displays information about the refund adjustment. |

By default, the **Bill Line Items** zone does not appear in the **Main** tab. It appears only when you click the **Broadcast** () icon corresponding to the bill in the **Refund Details** zone.

Refund Request - Bills

The **Bills** tab allows you to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. It contains the following zones:

- [Search Bills](#) on page 1844
- [Bill Line Items](#) on page 1845

Search Bills

The **Search Bills** zone lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|--|-----------------------|
| Search By | Used to indicate whether you want to search for a bill using bill or bill and price item details. The valid values are: <ul style="list-style-type: none"> • Bill Details • Bill and Price Item Details | Yes |
| | Note: By default, the Bill Details option is selected. | |
| Bill ID | Used to search a particular bill. | No |
| Bill Date From | Used to search bills which are created from a particular date onwards. | No |
| To | Used to search bills which are created till a particular date. | No |
| Price Item | Used to search bills which are created for a particular price item. | No |
| | Note: This field appears when you select Bill and Price Item Details option from the Search By list. You can search for a price item by clicking the search (🔍) icon corresponding to the field. | |

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|------------------|--|
| Bill ID | Displays the bill ID. |
| Bill Information | Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Bill screen appears with the details of the respective bill. |

| Column Name | Column Description |
|-------------|---------------------------------|
| Amount | Displays the total bill amount. |

If you want to refund a bill with credit balance and all credit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All credit bill segments and adjustments of the bill are added in the **Refund Details** zone on the **Main** tab. However, if you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

Note: If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

| Column Name | Column Description |
|----------------------|---|
| Entity ID | Displays the bill segment or adjustment ID. |
| Entity Type | Indicates whether the entity is a bill segment or an adjustment. |
| Entity Information | Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application. Note: It has a link. If the entity is a bill segment, the Bill Segment screen appears where you can view the details of the respective bill segment on clicking the link. However, if the entity is an adjustment, the Adjustment screen appears with the details of the respective adjustment on clicking the link. |
| Entity Amount | Displays the bill segment or adjustment amount. |
| Eligible Amount | Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded. Note: If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero. |
| Amount Refunded | Displays the amount which is already refunded to the account. |
| Contract Information | Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract. |

You can select one or more credit bill segments or adjustments and click the **Add** button in this zone to add selected credit bill segments or adjustments to the refund request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** (📡) icon corresponding to the bill in the **Search Bills** zone.

| MICR ID | Used to search payment events which include payments made with a particular MICR code. | No |

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|---------------------------|---|
| Payment Event Information | Displays additional information about the payment event. |
| | Note: It has a link. On clicking the link, the Payment Event screen appears where you can view the details of the respective payment event. |
| Payment Date | Displays the date when the payments were created. |
| Tender Amount | Displays the tender amount. |
| Payment Event ID | Displays the payment event ID. |

If you want to refund all payments of a payment event, you need to select the check box corresponding to the payment event and then click the **Add** button in the **Search Results** section. If all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details** zone on the **Main** tab. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

Note: If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

Payments

The **Payments** zone lists only those payments which are created through the payment event and are currently in the **Frozen** status. This zone contains the following columns:

| Column Name | Column Description |
|---------------------------|---|
| Payment ID | Displays the payment ID. |
| | Note: It has a link. On clicking the link, the Payment screen appears where you can view the details of the respective payment. |
| Payee Account Information | Displays additional information about the account for which the payment was made. |
| | Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account. |
| Payment Amount | Displays the payment amount. |
| Payment Currency | Indicates the currency in which the payment was made. |
| Payment Status | Indicates the status of the payment. |
| Match Type | Indicates the match type using which the payment was matched. |
| Match Value | Indicates the entity (such as bill, contract, and so on) against which the payment was matched. |
| Amount Refunded | Displays the amount which is already refunded to the payor account. |

You can select one or more payments and click the **Add** button in this zone to add selected payments to the refund request.

By default, the **Payments** zone does not appear in the **Payments** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the payment event in the **Search Payment Event** zone.

Refund Request - Log

The **Log** tab contains the following zone:

- [Refund Request Log](#) on page 1848

Refund Request Log

The **Refund Request Log** zone lists the complete trail of actions performed on the refund request. This zone contains the following columns:

| Column Name | Column Description |
|----------------|---|
| Date/Time | Displays the date and time when the action was performed on the refund request. |
| Details | Displays the details about the action performed on the refund request. |
| User | Indicates the user who has performed the action on the refund request. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the refund request. |
| Status Reason | Displays the status reason of action performed on the refund request. |

Note: You can manually add a log entry for the refund request by clicking the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.

The **Add Request Log** window appears. Enter **Log Details** and click **Save**. The refund request log is added.

Creating a Refund Request

Prerequisites

To create a refund request, you should have:

- Refund request types defined in the application

Procedure

To create a refund request:

1. Do either of the following:

| If you want to... | Then... |
|---|--|
| Define a refund request from the Account Receivable Central screen | <ol style="list-style-type: none"> 1. Click the Main link in the Application toolbar. A list appears. 2. From the Main menu, select Accounting and Receivable and then click Account Receivable Central. 3. Search for the bill in the Account Receivable Central screen. 4. In the Search Results section, select the required bill and then click Refund. <p>Note: Only one bill at a time is allowed to select for Refund Request from the Account Receivable Central screen.</p> |
| Define a refund request from the Refund Request screen | <ol style="list-style-type: none"> 1. Click the Main link in the Application toolbar. A list appears. 2. From the Main menu, select Accounting and Receivable and then click Refund/Write Off Request. A sub-menu appears. 3. Click the Add option from the Refund/Write Off Request sub-menu. |
| Define a refund request from the Payment Event Summary screen | <ol style="list-style-type: none"> 1. Click the Main link in the Application toolbar. A list appears. 2. From the Main menu, select Payments and then click Payment Event Summary. 3. Search for the payment event (whose payments you want to refund) in the Payment Event Summary screen. 4. In the Search Results section, click the Broadcast (📡) icon corresponding to the payment event whose payments you want to view. The Payments zone appears. 5. Select the check box corresponding to the payments that you want to refund. 6. Click the Refund button in the Payments zone. |

The **Select Request Type** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Action | Displays the type of request (refund or write off) to be created. | Not applicable |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------|---|-----------------------|
| | <p>Note:</p> <p>This field is pre-populated if the refund request is created from the Account Receivable Central screen.</p> <p>This field is editable if the refund request is created from the Refund/Write Off Request screen.</p> | |
| Refund/Write Off Request Type | <p>Used to indicate the request type using which you want to create the refund or write off request.</p> <p>Note: The refund request types are listed when you set the Action field to Refund and the write off request types are listed when you set the Action field to Write Off.</p> | Yes |
| Account | <p>Used to indicate the account for which you want to create the refund or write off request.</p> <p>Note:</p> <p>This field is pre-populated if the refund request is created from the Account Receivable Central screen.</p> <p>This field is editable if the refund request is created from the Refund/Write Off Request screen.</p> <p>You can search for an account by clicking the Search (🔍) icon corresponding to the respective field.</p> | Yes |

Tip:

Alternatively, you can access the **Select Request Type** screen:

- By clicking the **Add** button in the **Page Title** area of **Refund/Write Off Request** screen.
- By selecting the payment which you want to refund in the **Payment Event Summary** screen and then clicking the **Refund** button. Note that the system will allow you to refund only those payments which are in the **Frozen** status and matched against the suspense or excess credit contract.

2. Select the required refund request type from the respective field.
3. Click **Save**.

The refund request is defined and the status of the refund request is set to **Draft**. The **Refund Request** screen appears where you can view the details of the refund request. It contains the following tabs:

Note: The refund request can be created only for bill with outstanding amount lesser than zero.

- **Main** – Displays information about the refund request. It contains the following zones:
 - **Refund Request** – Displays the details of the refund request.
 - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.

- **Payments** – Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
 - **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
 - **Log** – Lists the complete trail of actions performed on the refund request.
4. Add payment events, payments, or credit bill line items that you want to refund.
 5. Edit the refund amount of each entity, if required.
 6. Define characteristics for the refund request, if required.
 7. Override the address if you want to sent the refund to an address other than the account’s main customer address.

Defining a Characteristic for a Refund Request

Prerequisites

To define a characteristic for a refund request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request**)

Procedure

To define a characteristic for a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose details you want to edit.

The **Refund Request** screen appears.

3. Click the **Edit** button in the **Refund Request** zone.

The **Edit Refund Request** screen appears.

Note: The **Edit** button appears only when the refund request is in the **Draft** status.

4. Ensure that the **Characteristics** section is expanded when you are editing the refund request.

The **Characteristics** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|--|
| Effective Date | Used to specify the date from when the characteristic is effective for the refund request. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the refund request. |
| Characteristic Type | Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Refund Write Off Request . | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the refund request. |
| Characteristic Value | Used to specify the value for the characteristic type. Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the refund request. |

5. Enter the required details in the **Characteristics** section.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the refund request, click the **Add** (+) icon and then repeat step 5.

Note: However, if you want to remove a characteristic from the refund request, click the **Delete** (🗑️) icon corresponding to the characteristic.

Adding a Payment Event to the Refund Request

Prerequisites

To add a payment event to the refund request, you should have:

- Payments made by the account for which you need to create the refund request

Procedure

To add a payment event to the refund request:

1. Click the **Payments** tab in the **Refund Request** screen.

The **Payments** tab appears.

2. Filter the payment events, if required, in the **Search Payment Event** zone.

Note: You can only refund payments, which are matched against suspense or excess credit contracts, to the payor account. Therefore, you can only view payment events which includes payments matched against suspense or excess credit contracts. If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

3. Select the check box corresponding to the payment event, whose payments you want to refund, in the **Search Results** section.

Note: You can add more than one payment event to the refund request at the same time.

4. Click **Add**.

A message appears indicating that the selected payment events are added to the refund request.

5. Click **OK**.

Note that the entity is added in the **Refund Details** zone on the **Main** tab.

Note:

You can only refund payments which are in the **Frozen** status.

If all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details** zone. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

Adding a Credit Bill to the Refund Request

You can refund the credit bills to the account.

Prerequisites

To add a credit bill to the refund request, you should have:

- Completed bills for the account with one or more credit line items

Procedure

To add a credit bill to the refund request:

1. Click the **Bills** tab in the **Refund Request** screen.

The **Bills** tab appears.

2. Filter the bills, if required, in the **Search Bills** zone.

Note: If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

3. Do either of the following:

| If... | Then... |
|--|---|
| A bill has all credit line items and you want to add the credit bill to the refund request | <ol style="list-style-type: none"> 1. In the Search Bills zone, select the bills that you want to refund. 2. Click the Add button available at the upper left corner of the Search Bills zone. |
| | Note: Default adjustment type selected in the write off request type should be non A/P. |

| If... | Then... |
|--|---|
| A bill has credit balance and one or more debit line items and you want to add the credit bill to the refund request | <ol style="list-style-type: none"> 1. In the Search Bills zone, select the bills that you want to refund. 2. Click the Add button available at the upper left corner of the Search Bills zone. <p>Note: Default adjustment type selected in the write off request type should be non A/P.</p> |

4. Click **Add**.

A message appears indicating that the selected bills are added to the refund request.

Note: If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

5. Click **OK**.

Note that all the credit bill segments or adjustments of the bills are added in the **Refund Details** zone on the **Main** tab.

Note:

Irrespective of whether you select a credit bill, or credit bill segments or adjustments, the credit bill segments or adjustments are added in the **Refund Details** zone. The credit bill is not added to the **Refund Details** zone.

The system will not allow you to add a debit line item to the **Refund Details** zone.

Adding a Credit Bill Line Item to the Refund Request

You can refund the credit bill line items, such as bill segments and adjustments, to the account. While adding a credit bill line item to the refund request, you can either:

- Directly add all credit line items of a bill to the refund request by adding the bill which has all bill segments and adjustments in credit
- Individually add a credit bill segment or adjustment of a bill (with one or more credit line items) to the refund request

Prerequisites

To add a credit bill line item to the refund request, you should have:

- Completed bills for the account with one or more credit line items

Procedure

To add a credit bill line item to the refund request:

1. Click the **Bills** tab in the **Refund Request** screen.

The **Bills** tab appears.

- Filter the bills, if required, in the **Search Bills** zone.

Note: If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

- Do either of the following:

| If... | Then... |
|---|--|
| A bill has all credit line items and you want to add a particular credit bill line item to the refund request | <ol style="list-style-type: none"> In the Search Bills zone, click the Broadcast (📡) icon corresponding to the bill whose line items you want to view. The Bill Line Items zone appears. Select the check box corresponding to the credit bill segment or adjustment that you want to refund. |
| A bill has credit balance and one or more debit line items | <ol style="list-style-type: none"> In the Search Bills zone, click the Broadcast (📡) icon corresponding to the bill whose line items you want to view. The Bill Line Items zone appears. Select the check box corresponding to the credit bill segment or adjustment that you want to refund. |
| A bill has debit balance and one or more credit line items | <ol style="list-style-type: none"> In the Search Bills zone, click the Broadcast (📡) icon corresponding to the bill whose line items you want to view. The Bill Line Items zone appears. Select the check box corresponding to the credit bill segment or adjustment that you want to refund. |

- Click **Add**.

A message appears indicating that the selected bill segments or adjustments are added to the refund request.

Note: If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

- Click **OK**.

Note that the credit bill segments or adjustments are added in the **Refund Details** zone on the **Main** tab.

Note:

Irrespective of whether you select a credit bill, or credit bill segments or adjustments, the credit bill segments or adjustments are added in the **Refund Details** zone. The credit bill is not added to the **Refund Details** zone.

The system will not allow you to add a debit line item to the **Refund Details** zone.

Editing the Refund Details

Prerequisites

To edit the refund details, you should have:

- Adjustment types with A/P request type defined in the application

Procedure

To edit the refund details:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose bill line item details you want to edit.

The **Refund Request** screen appears. You can edit the bill line items by either of the following ways:

| If... | Then |
|--|--|
| Select the bill whose details you want to edit in the Refund Details zone and click the Edit button available in the upper left corner of this zone. | The Edit Request Details screen appears. |
| In the Refund Details zone, click the Broadcast (📡) icon corresponding to the bill whose line items details you want to edit. | The Bill Line Items zone appears. Note: This zone appears when the Entity Type is Bill . |

| If... | Then |
|-------|---|
| | <p>1. Select the bill line item whose details you want to edit in the Bill Line Items zone and click the Edit button available in the upper left corner of this zone.</p> <p>The Edit Request Details screen appears.</p> |

Note: A bill line item from the refund request can be edited when the refund request is in the **Draft** status.

The **Edit Request Details** screen contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|-----------------------|
| Request ID | Displays the refund request ID. | Not applicable |
| Account Information | Displays additional information about the account. | Not applicable |
| Adjustment Type | <p>Indicates the adjustment type of the refund request type.</p> <p>You can search for an adjustment type by clicking the Search(🔍) icon corresponding to the field.</p> | No |

In addition to these fields, this screen contains following columns:

| Column Name | Column Description |
|-----------------|--|
| Entity Type | <p>Indicates the entity type. The valid values are</p> <ul style="list-style-type: none"> • Adjustments • Bill • Bill Segment • Payment Event • Payment |
| Entity ID | Displays the entity ID. |
| Entity Amount | Displays the entity amount. |
| Currency | Displays the currency in which the entity was created. |
| Request Amount | Displays the amount that must be refunded. |
| Adjustment Type | <p>Indicates the adjustment type using which the refund adjustment must be created.</p> <p>Note:</p> <p>You can search for an account by clicking the Search(🔍) icon corresponding to the field.</p> |
| Bill ID | Displays the bill ID. |

In addition to the above columns, the screen has following button:

| Button Name | Button Description |
|-------------|--|
| Override | Used to override an adjustment type of the refund request. |

Note:

In the **Bill Line Items** zone, click the **Broadcast** () icon corresponding to the bill line item which you want to delete

Pagination is used to display limited number of records in the **Search Results** section. By default, 10 records are displayed in the **Search Results** section. You can change the number of records displayed per page, if required.

You can use the navigation buttons, such as **First** () , **Previous** () , **Next** () , and **Last** () to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

The values appear in the **Page Limit** list when you define values for the **PAGE_NUMBER** lookup field.

3. Modify the details of the bill line items.
4. Click **Save**.

The changes made to the refund bill line items are saved.

Procedure

To delete a bill line item from the refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose bill line items you want to delete.

The **Refund Request** screen appears.

3. In the **Refund Details** zone, click the **Broadcast** () icon corresponding to the bill whose line items details you want to delete.

The **Bill Line Items** zone appears.

4. In the **Bill Line Items** zone, select the bill line items which you want to delete and click the **Delete** button available in the upper left corner of this zone.

A message appears confirming whether you want to delete the bill line items from the refund request.

Note:

You can delete a bill line item from the refund request when the request is in the **Draft** status.

5. Click **OK**.

The selected bill line items gets deleted from the refund request.

Submitting a Refund Request

Prerequisites

To submit a refund request, you should have:

- Payment events, payments, or credit bill line items added in the refund request

Procedure

To submit a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request that you want to submit.

The **Refund Request** screen appears.

3. Click the **Submit** button in the **Refund Request** zone.

The system behaves in the following manner:

| If... | Then... |
|---|--|
| The Approval Required and Hierarchical Approval check boxes are selected in the refund request type using which the refund request is created | A To Do of the C1-REFRQ To Do type is created and sent to the approver at the first level in the approval hierarchy, and the status of the refund request is changed to Approval In Progress . |
| The Approval Required check box is selected, but the Hierarchical Approval check box is not selected in the refund request type using which the refund request is created | A To Do of the C1-REFRQ To Do type is created and sent to the approver at the hierarchy level where the total refund amount falls within the threshold limit. In addition, the status of the refund request is changed to Approval In Progress . |
| The Approval Required check box is not selected in the refund request type using which the refund request is created | The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to Processed . |

Approving a Refund Request

You can view the number of refund requests which are pending for approval in the **Refund/Write Off Request** screen. The approver can review, and accordingly approve or reject the refund request based on the observations.

Note: The system will not allow you to approve or reject a refund request submitted by you.

Procedure

To approve a refund request:

1. Do either of the following:

| If you want to... | Then... |
|---|--|
| Approve a refund request through the Refund/Write Off Request screen | <ol style="list-style-type: none"> 1. Search for the refund request in the Refund/Write Off Request screen. 2. In the Search Results section, click the link in the Refund/Write Off Request Information column corresponding to the refund request which you want to review. |

| If you want to... | Then... |
|--|--|
| Approve a refund request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-REFRQ in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the refund request that you want to review. |

The **Refund Request** screen appears.

2. Review the refund request details.
3. Click the **Approve** button in the **Refund Request** zone.

The system behaves in the following manner:

| If... | Then |
|--|--|
| The Hierarchical Approval check box is selected in the refund request type using which the refund request is created and the total refund amount is greater than the threshold amount specified at the next level in the approval hierarchy | A To Do of the C1-REFRQ To Do type is created and sent to the approver at the next level in the approval hierarchy, and the status of the refund request remains as Approval In Progress . |
| The Hierarchical Approval check box is selected in the refund request type using which the refund request is created and the total refund amount is less than the threshold amount specified at the next level in the approval hierarchy | The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to Processed . |

Rejecting a Refund Request

Prerequisites

To reject a refund request, you should have:

- Rejection reasons defined in the application

Note:

While rejecting a refund request, you need to specify the reason why you want to reject the refund request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-RefundReq** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a refund request submitted by you.

Procedure

To reject a refund request:

1. Do either of the following:

| If you want to... | Then... |
|--|--|
| Reject a refund request through the Refund/Write Off Request screen | <ol style="list-style-type: none"> 1. Search for the refund request in the Refund/Write Off Request screen. 2. In the Search Results section, click the link in the Refund/Write Off Request Information column corresponding to the refund request which you want to review. |
| Reject a refund request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-REFRQ in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the refund request that you want to review. |

The **Refund Request** screen appears.

- Review the refund request details.
- Click the **Reject** button in the **Refund Request** zone.

The **Reject Refund Request** window appears. It contains following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | Used to indicate the reason why you want to reject the refund request. | Yes |
| Comments | Used to specify additional information while rejecting the refund request. | No |

Note: The **Reject** button appears when:

- The refund request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the refund request.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

The status of the refund request is changed to **Rejected**.

Viewing the Log of a Refund Request

Procedure

To view the log of a refund request:

- Search for the refund request in the **Refund/Write Off Request** screen.
- In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose log you want to view.

The **Refund Request** screen appears. It consists of the following tabs:

- Main** – Displays information about the refund request. It contains the following zones:
 - Refund Request** – Displays the details of the refund request.
 - Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
 - Bill Line Items** — Displays the details of the bill which must be refunded.

Note:

This zone appears when you click the Broadcast () icon corresponding to the entity type as **Bill** in the **Refund Details** zone.

- **Payments** — Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
 - **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
 - **Log** – Lists the complete trail of actions performed on the refund request.
3. Click the **Log** tab.
 4. View the log of the refund request in the **Refund Request Log** zone.

Note: You can manually add a log entry for the refund request by clicking the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.

Adding a Log Entry for a Refund Request

Procedure

To add a log entry for a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose log you want to edit.

The **Refund Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the refund request. It contains the following zones:
 - **Refund Request** – Displays the details of the refund request.
 - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
 - **Payments** — Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
 - **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
 - **Log** – Lists the complete trail of actions performed on the refund request.
3. Click the **Log** tab.
The **Log** tab appears.
 4. Click the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|--|-----------------------|
| Request Information | Displays information about the refund request. | Not applicable |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------|---|-----------------------|
| Log Details | Used to specify additional comments for the refund request. | Yes |

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Refund Request Log** zone.

Voiding a Refund Request

There might be situations when incorrect refund request is processed in the system. In such case, the system provides you with an ability to void or cancel the refund request. However, note that you can void a refund request when the refund request is in the **Processed** status.

Prerequisites

To void a refund request, you should have:

- Void reasons defined in the application

Note: While voiding a refund request, you need to specify the reason why you want to void the refund request. You can select the appropriate void reason when you have defined the reasons for the **Voided** status of the **C1-RefundReq** business object in the **Status Reason** screen.

Procedure

To void a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request that you want to void.

The **Refund Request** screen appears.

3. Click the **Void** button in the **Refund Request** zone.

The **Void Reason** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | Used to indicate the reason why you want to void the refund request. | Yes |
| Comments | Used to specify additional information while voiding the refund request. | No |

Note: The **Void** button appears when the refund request is in the **Processed** status.

4. Select the void reason from the **Status Reason** list.

5. Click **Save**.

The status of the refund request is changed to **Voided**.

Note: The **C1-REFVOID** algorithm cancels all the frozen adjustments created for the refund request which is in the **Processed** state.

Write Off Request

Once you create a write off request, the **Write Off Request** screen allows you to:

- Edit and delete a write off request
- View the details of a write off request
- Submit a write off request for approval
- Approve or reject a write off request
- View the log of a write off request
- Add a log entry for a write off request
- Cancel a write off request

This screen consists of the following tabs:

- **Main** – Displays information about the write off request. It contains the following zones:
 - **Write Off Request** – Displays the details of the write off request.
 - **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
 - **Bill Line Items** — Displays the details of the bill which must be written off.

Note:

This zone appears when you click the Broadcast () icon corresponding to the entity type as **Bill** in the **Write Off Details** zone.

- **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. It contains the following zones:
 - **Search Bills** — Lists completed bills of the account which are either with debit balance or have one or more debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
 - **Bill Line Items** — Lists the debit and credit bill segments and adjustments of the bill.

This tab appears when the write off request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the write off request.

Write Off Request - Main

The **Main** tab displays information about the write off request. It contains the following zones:

- [Write Off Request](#) on page 1873
- [Write Off Details](#) on page 1875
- [Bill Line Items](#) on page 1876

Write Off Request

The **Write Off Request** zone displays the details of the write off request. This zone contains the following sections:

- **Main** — This section provides basic information about the write off request. It contains the following fields:

| Field Name | Field Description |
|-------------------------------|---|
| Write Off Request Information | Displays information about the write off request. |
| Write Off Request Type | Indicates the write off request type using which the write off request is created. Note: It has a link. On clicking the link, the Refund/Write Off Request Type screen appears where you can view the details of the write off request type. |
| Status | Indicates the status of the write off request. The valid values are: <ul style="list-style-type: none"> • Draft • Approval In Progress • Rejected • Processed • Cancelled |
| Status Reason | Indicates the reason why the write off request is rejected or cancelled. Note: This field appears when the write off request is in the Rejected or Cancelled status. It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the rejected or cancelled reason. |
| Account Information | Indicates the account for which the write off request is created. Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account. |
| Comments | Displays additional information about the write off request. |
| Total Write Off Amount | Displays the total write off amount. |

- **Characteristics** — Lists the characteristics defined for the write off request. It contains the following fields:

| Field Name | Field Description |
|----------------------|---|
| Effective Date | Indicates the date from when the characteristic is effective for the write off request. |
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** — This section contains the following buttons:

| Button Name | Button Description |
|-------------|---|
| Edit | Used to edit the details of the write off request. |
| | Note: The Edit button appears when the write off request is in the Draft status. |
| Delete | Used to delete the write off request. |
| | Note: The Delete button appears when the write off request is in the Draft status. |
| Submit | Used to submit the write off request for approval. |
| | Note: The Submit button appears when the write off request is in the Draft status. |
| Approve | Used to approve the write off request. |
| | Note: The Approve button appears when: <ul style="list-style-type: none"> • The write off request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the write off request. |
| Reject | Used to reject the write off request. |
| | Note: The Reject button appears when: <ul style="list-style-type: none"> • The write off request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the write off request. |
| Cancel | Used to cancel the write off request. |
| | Note: The Cancel button appears when the write off request is in the Processed status. |

- **Record Information** — This section contains the following fields:

| Field Name | Field Description |
|-----------------|--|
| Business Object | Indicates the business object using which the write off request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |

| Field Name | Field Description |
|------------------|---|
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Status Date/Time | Displays the date and time when the write off request status is updated |
| Create Date/Time | Displays the date and time when the write off request is created. |

Write Off Details

The **Write Off Details** zone lists the debit bill line items (such as bill segments and adjustments) that you have added to the write off request. This zone contains the following columns:

| Column Name | Column Description |
|------------------------|---|
| Entity ID | Displays the entity ID. |
| Entity Type | Indicates whether the entity is a bill, bill segment or an adjustment. |
| Currency | Indicates the currency in which the entity was created. |
| Entity Amount | Displays the entity amount. |
| Write Off Amount | Displays the amount that must be written off. Note: By default, the amount which is eligible for write off appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount. |
| Contract Information | Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract. |
| Adjustment Type | Indicates the adjustment type using which the write off adjustment must be created. Note: By default, the adjustment type specified in the write off request type appears in this column. You can change the adjustment type, if required, by editing the write off request. |
| Adjustment Information | Displays information about the write off adjustment. Note: It has a link. On clicking the link, the Adjustment screen appears where you can view the details of the respective adjustment. The data appears in this column when the status of the write off request is Processed . The information string appears when an algorithm of the C1-ADI-INFO algorithm type is attached to the Adjustment Information system event in the Algorithms tab of the Installation Options — Framework screen. |

Note:

On clicking the **Broadcast** () icon corresponding to the entity type as **Bill**, the **Bill Line Items** zone appears with the details of the respective bill.

In addition to above columns, this screen contains following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to edit the details of bill line items. |
| Delete | Used to delete the bill line items. |

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

| Column Name | Column Description |
|------------------------|---|
| Bill ID | Displays the bill ID. |
| Entity ID | Displays the bill segment or adjustment ID. |
| Entity Type | Indicates whether the entity is a bill, bill segment or an adjustment. |
| Currency | Displays the currency in which the entity was created. |
| Entity Amount | Displays the bill segment or adjustment amount. |
| Request Amount | Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded. Note: If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero. |
| Contract Information | Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract. |
| Adjustment Type | Indicates the adjustment type using which the refund adjustment must be created. Note: It has a link. On clicking the link, the Adjustment Type screen appears where you can view the details of the respective adjustment type. |
| Adjustment Information | Displays information about the refund adjustment. |

By default, the **Bill Line Items** zone does not appear in the **Main** tab. It appears only when you click the **Broadcast** () icon corresponding to the bill in the **Write Off Details** zone.

Related Topics

|--|---|
| How to add a debit bill line item to the write off request | Adding a Debit Bill Line Item to the Write Off Request on page 1884 |

Write Off Request - Bills

The **Bills** tab allows you to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. It contains the following zones:

- [Search Bills](#) on page 1877
- [Bill Line Items](#) on page 1878

Search Bills

The **Search Bills** zone lists completed bills of the account which are either with debit balance or have one or more debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|--|-----------------------|
| Search By | Used to indicate that you want to search for a bill using the bill details. The valid values are: <ul style="list-style-type: none"> • Bill Details • Bill and Price Item Details | Yes |
| | Note: By default, the Bill Details option is selected. | |
| Bill ID | Used to search a particular bill. | No |
| Bill Date From | Used to search bills which are created from a particular date onwards. | No |
| To | Used to search bills which are created till a particular date. | No |
| Price Item | Used to search bills which are created for a particular price item. | No |
| | Note: This field appears when you select Bill and Price Item Details option from the Search By list. You can search for a price item by clicking the search (🔍) icon corresponding to the field. | |

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|------------------|--|
| Bill ID | Displays the bill ID. |
| Bill Information | Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Bill screen appears with the details of the respective bill. |
| Amount | Displays the total bill amount. |

If you want to write off a bill with debit balance and all debit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All debit bill segments and adjustments of the bill are added in the **Write Off Details** zone on the **Main** tab. However, if you select a bill (with debit balance) which contains one or more credit line items or if you select a bill (with credit balance) which contains one or more debit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

Note: If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

| Column Name | Column Description |
|----------------------|---|
| Entity ID | Displays the bill segment or adjustment ID. |
| Entity Type | Indicates whether the entity is a bill segment or an adjustment. |
| Entity Information | Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application. Note: It has a link. If the entity is a bill segment, the Bill Segment screen appears where you can view the details of the respective bill segment on clicking the link. However, if the entity is an adjustment, the Adjustment screen appears with the details of the respective adjustment on clicking the link. |
| Entity Amount | Displays the bill segment or adjustment amount. |
| Eligible Amount | Displays the bill segment or adjustment amount which is eligible for write off. In other words, it means entity amount minus amount written off. Note: If the bill segment or adjustment has credit balance, the eligible amount for write off would be zero. |
| Amount Written Off | Displays the amount which is already written off to the account. |
| Contract Information | Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract. |

You can select one or more debit bill segments or adjustments and click the **Add** button in this zone to add selected debit bill segments or adjustments to the write off request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** (📡) icon corresponding to the bill in the **Search Bills** zone.

Write Off Request - Log

The **Log** tab contains the following zone:

- [Write Off Request Log](#) on page 1879

Write Off Request Log

The **Write Off Request Log** zone lists the complete trail of actions performed on the write off request. This zone contains the following columns:

| Column Name | Column Description |
|----------------|--|
| Date/Time | Displays the date and time when the action was performed on the write off request. |
| Details | Displays the details about the action performed on the write off request. |
| User | Indicates the user who has performed the action on the write off request. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the write off request. |
| Status Reason | Displays the status reason of action performed on the write off request. |

Note: You can manually add a log entry for the write off request by clicking the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

The **Add Request Log** window appears. Enter **Log Details** and click **Save**. The write off request log is added.

Creating a Write Off Request

Prerequisites

To create a write off request, you should have:

- Write off request types defined in the application

Procedure

To create a write off request:

1. Do either of the following:

| If you want to... | Then... |
|--|---|
| Define a write off request from the Account Receivable Central screen | <ol style="list-style-type: none"> 1. Click the Main link in the Application toolbar. A list appears. 2. From the Main menu, select Accounting and Receivable and then click Account Receivable Central. 3. Search for the bill in the Account Receivable Central screen. 4. In the Search Results section, select the required bill and then click Write Off. <p>Note: Only one bill at a time is allowed to select for Write Off Request from the Account Receivable Central screen.</p> |
| Define a write off request from the Write Off Request screen | <ol style="list-style-type: none"> 1. Click the Main link in the Application toolbar. A list appears. 2. From the Main menu, select Accounting and Receivable and then click Refund/Write Off Request. A sub-menu appears. 3. Click the Add option from the Refund/Write Off Request sub-menu. |

The **Select Request Type** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------|---|-----------------------|
| Action | <p>Displays the type of request (refund or write off) to be created.</p> <p>Note: This field is pre-populated if the write off request is created from the Account Receivable Central screen. This field is editable if the write off request is created from the Refund/Write Off Request screen.</p> | Yes |
| Refund/Write Off Request Type | Used to indicate the request type using which you want to create the refund or write off request. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|-----------------------|
| | Note: The refund request types are listed when you set the Action field to Refund and the write off request types are listed when you set the Action field to Write Off . | |
| Account | Used to indicate the account for which you want to create the refund or write off request. Note: This field is pre-populated if the write off request is created from the Account Receivable Central screen. This field is editable if the write off request is created from the Refund/Write Off Request screen. You can search for an account by clicking the Search (🔍) icon corresponding to the respective field. | Yes |

Tip: Alternatively, you can access the **Select Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request** screen.

2. Select the required write off request type and account from the respective fields.
3. Click **Save**.

The write off request is defined and the status of the write off request is set to **Draft**. The **Write Off Request** screen appears with the details of the write off request. It contains the following tabs:

Note: The write off request can be created only for bill with outstanding amount greater than zero.

- **Main** – Displays information about the write off request. It contains the following zones:
 - **Write Off Request** – Displays the details of the write off request.
 - **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
 - **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
 - **Log** – Lists the complete trail of actions performed on the write off request.
4. Add debit bill line items that you want to write off.
 5. Edit the write off amount of each entity, if required.
 6. Define characteristics for the write off request, if required.

Defining a Characteristic for a Write Off Request

Prerequisites

To define a characteristic for a write off request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request**)

Procedure

To define a characteristic for a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose details you want to edit.

The **Write Off Request** screen appears.

3. Click the **Edit** button in the **Write Off Request** zone.

The **Edit Write Off Request** screen appears.

Note: The **Edit** button appears only when the write off request is in the **Draft** status.

4. Ensure that the **Characteristics** section is expanded when you are editing the write off request.

The **Characteristics** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|--|
| Effective Date | Used to specify the date from when the characteristic is effective for the write off request. | Yes (Conditional) Note: This field is required when you are defining a characteristic for the write off request. |
| Characteristic Type | Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Refund Write Off Request . | Yes (Conditional) Note: This field is required when you are defining a characteristic for the write off request. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) Note: This field is required when you are defining a characteristic for the write off request. |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|-----------------------|
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | |

5. Enter the required details in the **Characteristics** section.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the write off request, click the **Add** (+) icon and then repeat step 5.

Note: However, if you want to remove a characteristic from the write off request, click the **Delete** (🗑️) icon corresponding to the characteristic.

Adding a Debit Bill to the Write Off Request

Prerequisites

To add a debit bill to the write off request, you should have:

- Completed bills for the account with one or more debit line items

Procedure

To add a debit bill to the write off request:

- Click the **Bills** tab in the **Write Off Request** screen.
The **Bills** tab appears.
- Filter the bills, if required, in the **Search Bills** zone.

Note: If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

- Do either of the following:

| If... | Then... |
|---|--|
| A bill has all debit line items and you want to add the debit bill to the write off request | <ol style="list-style-type: none"> In the Search Bills zone, select the bills that you want to write off. Click the Add button available at the upper left corner of the Search Bills zone. |

| If... | Then... |
|--|--|
| | Note: Default adjustment type selected in the write off request type should be non A/P. |
| A bill has debit balance and one or more credit line items and you want to add the debit bill to the write off request | <ol style="list-style-type: none"> 1. In the Search Bills zone, select the bills that you want to write off. 2. Click the Add button available at the upper left corner of the Search Bills zone. |
| | Note: Default adjustment type selected in the write off request type should be non A/P. |

4. Click **Add**.

A message appears indicating that the selected bills are added to the write off request.

Note: If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

5. Click **OK**.

Note that the debit bill segments or adjustments are added in the **Write Off Details** zone on the **Main** tab.

Note:

Irrespective of whether you select a debit bill, or debit bill segments or adjustments, the debit bill segments or adjustments are added in the **Write Off Details** zone. The debit bill is not added to the **Write Off Details** zone.

The system will not allow you to add a credit line item to the **Write Off Details** zone.

Adding a Debit Bill Line Item to the Write Off Request

You can write off the debit bill line items, such as bill segments and adjustments, of the account. While adding a debit bill line item to the write off request, you can either:

- Directly add all debit line items of a bill to the write off request by adding the bill which has all bill segments and adjustments in debit
- Individually add a debit bill segment or adjustment of a bill (with one or more debit line items) to the write off request

Prerequisites

To add a debit bill line item to the write off request, you should have:

- Completed bills for the account with one or more debit line items

Procedure

To add a debit bill line item to the write off request:

1. Click the **Bills** tab in the **Write Off Request** screen.

The **Bills** tab appears.

2. Filter the bills, if required, in the **Search Bills** zone.

Note: If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

3. Do any of the following:

| If... | Then... |
|--|--|
| A bill has all debit line items and you want to add a particular debit bill line item to the write off request | <ol style="list-style-type: none"> 1. In the Search Bills zone, click the Broadcast (📡) icon corresponding to the bill whose line items you want to view. The Bill Line Items zone appears. 2. Select the check box corresponding to the debit bill segment or adjustment that you want to write off. |
| A bill has debit balance and one or more credit line items | <ol style="list-style-type: none"> 1. In the Search Bills zone, click the Broadcast (📡) icon corresponding to the bill whose line items you want to view. The Bill Line Items zone appears. 2. Select the check box corresponding to the debit bill segment or adjustment that you want to write off. |
| A bill has credit balance and one or more debit line items | <ol style="list-style-type: none"> 1. In the Search Bills zone, click the Broadcast (📡) icon corresponding to the bill whose line items you want to view. The Bill Line Items zone appears. 2. Select the check box corresponding to the debit bill segment or adjustment that you want to write off. |

4. Click **Add**.

A message appears indicating that the selected bill segments or adjustments are added to the write off request.

Note: If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

5. Click **OK**.

Note that the debit bill segments or adjustments are added in the **Write Off Details** zone on the **Main** tab.

Note:

Irrespective of whether you select a debit bill, or debit bill segments or adjustments, the debit bill segments or adjustments are added in the **Write Off Details** zone. The debit bill is not added to the **Write Off Details** zone.

The system will not allow you to add a credit line item to the **Write Off Details** zone.

Editing a Write Off Request**Prerequisites**

To edit a write off request, you should have:

- Adjustment types without A/P request type defined in the application

Procedure

To edit a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose details you want to edit.

The **Write Off Request** screen appears.

3. Click the **Edit** button in the **Write Off Request** zone.

The **Edit Write Off Request** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------|---|-----------------------|
| Write Off Request Information | Displays information about the write off request. | Not applicable |
| Account Information | Indicates the account for which the write off request is created. | Not applicable |
| Comments | Used to specify additional information about the write off request. | No |

In addition, this screen contains the following two sections:

- **Characteristics** — Used to define the characteristics for the write off request. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|---|---|
| Effective Date | Used to specify the date from when the characteristic is effective for the write off request. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the write off request. |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|---|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Refund Write Off Request . | Note: This field is required when you are defining a characteristic for the write off request. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the write off request. |

4. Modify the details of the write off request, if required.
5. Define, edit, or remove characteristics of the write off request, if required.
6. Click **Save**.

The changes made to the write off request are saved.

Editing the Write Off Details

Prerequisites

To edit the write off details, you should have:

- Adjustment types with A/P request type defined in the application

Procedure

To edit the write off details:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose bill line item details you want to edit.

The **Write Off Request** screen appears. You can edit the bill line items of the write off request by using either of the following ways:

| If... | Then... |
|--|---|
| Select the bill whose details you want to edit in the Write Off Details zone and click the Edit button available in the upper left corner of this zone. | The Edit Request Details screen appears. |
| In the Write Off Details zone, click the Broadcast () icon corresponding to the bill whose line items details you want to edit. | <p>The Bill Line Items zone appears.</p> <p>Note: This zone appears when the Entity Type is Bill.</p> <p>1. Select the bill line item whose details you want to edit in the Bill Line Items zone and click the Edit button available in the upper left corner of this zone.</p> <p>The Edit Request Details screen appears.</p> |

Note: A bill line item from the write off request can be edited when the write off request is in the **Draft** status.

The **Edit Request Details** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|-----------------------|
| Request ID | Displays the write off request ID. | Not applicable |
| Account Information | Displays additional information about the account. | Not applicable |
| Adjustment Type | <p>Indicates the adjustment type of the write off request type.</p> <p>You can search for an adjustment type by clicking the Search () icon corresponding to the field.</p> | No |

In addition to these fields, this screen contains following columns:

| Column Name | Column Description |
|-----------------|--|
| Entity Type | <p>Indicates the entity type. The valid values are</p> <ul style="list-style-type: none"> • Adjustments • Bill • Bill Segment • Payment Event • Payment |
| Entity ID | Displays the entity ID. |
| Entity Amount | Displays the entity amount. |
| Currency | Displays the currency in which the entity was created. |
| Request Amount | Displays the amount that must be write off. |
| Adjustment Type | Indicates the adjustment type using which the write off adjustment must be created. |

| Column Name | Column Description |
|-------------|---|
| | <p>Note:</p> <p>You can search for an account by clicking the Search (🔍) icon corresponding to the field.</p> |
| Bill ID | Displays the bill ID. |

In addition to the above columns, the screen has following button:

| Button Name | Button Description |
|-------------|---|
| Override | Used to override an adjustment type of the write off request. |

Note:

Pagination is used to display limited number of records in the **Search Results** section. By default, 10 records are displayed in the **Search Results** section. You can change the number of records displayed per page, if required.

You can use the navigation buttons, such as **First** (<<), **Previous** (<), **Next** (>), and **Last** (>>) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

The values appear in the **Page Limit** list when you define values for the **PAGE_NUMBER** lookup field.

3. Modify the details of the bill line items.
4. Click **Save**.

The changes made to the write off bill line items are saved.

Approving a Write Off Request

You can view the number of write off requests which are pending for approval in the **Refund/Write Off Request** screen. The approver can review, and accordingly approve or reject the write off request based on the observations.

Note: The system will not allow you to approve or reject a write off request submitted by you.

Procedure

To approve a write off request:

1. Do either of the following:

| If you want to... | Then... |
|--|---|
| Approve a write off request through the Refund/Write Off Request screen | <ol style="list-style-type: none"> 1. Search for the write off request in the Refund/Write Off Request screen. 2. In the Search Results section, click the link in the Refund/Write Off Request Information column corresponding to the write off request which you want to review. |
| Approve a write off request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-WOREQ in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the write off request that you want to review. |

The **Write Off Request** screen appears.

2. Review the write off request details.
3. Click the **Approve** button in the **Write Off Request** zone.

The system behaves in the following manner:

| If... | Then... |
|---|---|
| The Hierarchical Approval check box is selected in the write off request type using which the write off request is created and the total write off amount is greater than the threshold amount specified at the next level in the approval hierarchy | A To Do of the C1-WOREQ To Do type is created and sent to the approver at the next level in the approval hierarchy, and the status of the write off request remains as Approval In Progress . |

| If... | Then... |
|---|---|
| <p>The Hierarchical Approval check box is selected in the write off request type using which the write off request is created and the total write off amount is less than the threshold amount specified at the next level in the approval hierarchy</p> | <p>The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to Processed.</p> <p>Note: The write off adjustments are created in the Frozen status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to Open. However, if the entire eligible amount is written off, the corresponding match event status is set to Balanced.</p> |
| <p>The Hierarchical Approval check box is not selected in the write off request type using which the write off request is created</p> | <p>The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to Processed.</p> <p>Note: The write off adjustments are created in the Frozen status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to Open. However, if the entire eligible amount is written off, the corresponding match event status is set to Balanced.</p> |

Note: The **Approve** button appears when:

- The write off request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the write off request.

Rejecting a Write Off Request

Prerequisites

To reject a write off request, you should have:

- Rejection reasons defined in the application

Note:

While rejecting a write off request, you need to specify the reason why you want to reject the write off request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-WORequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a write off request submitted by you.

Procedure

To reject a write off request:

1. Do either of the following:

| If you want to... | Then... |
|---|---|
| Reject a write off request through the Refund/Write Off Request screen | <ol style="list-style-type: none"> 1. Search for the write off request in the Refund/Write Off Request screen. 2. In the Search Results section, click the link in the Refund/Write Off Request Information column corresponding to the write off request which you want to review. |
| Reject a write off request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-WOREQ in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the write off request that you want to review. |

The **Write Off Request** screen appears.

2. Review the write off request details.

- Click the **Reject** button in the **Write Off Request** zone.

The **Reject Write Off Request** window appears. It contains following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|---|-----------------------|
| Status Reason | Used to indicate the reason why you want to reject the write off request. | Yes |
| Comments | Used to specify additional information while rejecting the write off request. | No |

Note: The **Reject** button appears when:

- The write off request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the write off request.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

The status of the write off request is changed to **Rejected**.

Viewing the Log of a Write Off Request

Procedure

To view the log of a write off request:

- Search for the write off request in the **Refund/Write Off Request** screen.
- In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose log you want to view.

The **Write Off Request** screen appears. It consists of the following tabs:

- Main** – Displays information about the write off request. It contains the following zones:
 - Write Off Request** – Displays the details of the write off request.
 - Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
 - Bill Line Items** — Displays the details of the bill which must be written off.

Note:

This zone appears when you click the Broadcast () icon corresponding to the entity type as **Bill** in the **Write Off Details** zone.

- **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
 - **Log** – Lists the complete trail of actions performed on the write off request.
3. Click the **Log** tab
 4. View the log of the write off request in the **Write Off Request Log** zone.

Note: You can manually add a log entry for the write off request by clicking the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

Adding a Log Entry for a Write Off Request

Procedure

To add a log entry for a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose log you want to edit.

The **Write Off Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the write off request. It contains the following zones:
 - **Write Off Request** – Displays the details of the write off request.
 - **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
 - **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
 - **Log** – Lists the complete trail of actions performed on the write off request.
3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|--|-----------------------|
| Request Information | Displays information about the write off request. | Not applicable |
| Log Details | Used to specify additional comments for the write off request. | Yes |

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Write Off Request Log** zone.

Canceling a Write Off Request

There might be situations when incorrect write off request is processed in the system. In such case, the system provides you with an ability to cancel the write off request. However, note that you can cancel a write off request when the write off request is in the **Processed** status.

Prerequisites

To cancel a write off request, you should have:

- Cancel reasons defined in the application

Note: While cancelling a write off request, you need to specify the reason why you want to cancel the write off request. You can select the appropriate cancel reason when you have defined the reasons for the **Cancelled** status of the **C1-WORequest** business object in the **Status Reason** screen.

Procedure

To cancel a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request that you want to cancel.

The **Write Off Request** screen appears.

3. Click the **Cancel** button in the **Write Off Request** zone.

The **Cancel Reason** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | Used to indicate the reason why you want to cancel the write off request. | Yes |
| Comments | Used to specify additional information while cancelling the write off request. | No |

Note: The **Cancel** button appears when the write off request is in the **Processed** status.

4. Select the cancel reason from the **Status Reason** list.
5. Click **Save**.

The status of the write off request is changed to **Cancelled**.

Note: The **C1-WOCANCEL** algorithm cancels all the frozen adjustments created for the write off request which is in the **Processed** state.

- [Hold Request \(Used for Searching\)](#)
- [Hold Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing allows you to hold the amount for Person, Account or Bills. Hold is a way to prevent certain types of activities from taking place for a customer over a given period of time. The activities that need to be on Hold vary according to the reason for hold, such as due to a climate disaster the collection activity remains on Hold until disaster period is over.

Hold Request is a object which contains list of processes to be kept on hold for certain entities such as account, person, and bill for certain period of time. The hold period is defined as the duration between Hold Request Start Date and End Date. Each Hold Request contains an entity and processes on hold. There could exists multiple hold requests for an entity for different hold reasons and processes.

Following are the hold request entities:

- **Person:** If the person is on hold then all entities linked to that person where the person is financially responsible, such as accounts and its bills will be on hold.
- **Account:** If the account is on hold then all the bills of that account will be on hold.
- **Bill:** A bill will be on complete or partial hold.

In Hold Request, following mentioned processes can be on hold:

- **Auto Pay** — If the auto payment process is on hold then, then auto pay for the bills of the account added in hold request will be on hold till the request is released. However, you can do the manual payments. On activation of the hold request, **Defer Auto Pay Date** field (in Account screen) is populated with some future date. If billing process is on hold then auto payment process would also go on hold.
- **Bill Generation** — If the bill generation process is on hold then, then new bills will not be created for the account added in hold request till request is released. On activation of the hold request, **Bill After** date field (in Account screen) is populated with either hold request end date or some future date until that date billing is kept on hold. Whenever hold request is released for billing process then **Bill After** date field will be populated as system date.

Note: During the tenure of a hold request if customer does not require pending bills to be used for bill generation, bill in pending for accounts under hold are identified during activation of hold request which can be deleted by execution of the **C1-DELBI** batch . For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*

- **Overdue** — If the overdue process is on hold then bills associated with accounts in the hold request will be on hold for overdue process. It means existing overdue will be cancelled. New overdue process will get created once hold request is released. On activation of the hold request, **Postpone Credit Review** field (in Account screen) is populated with either hold request end date or some future date. When hold request is released, **Postpone Credit Review** field would be set as system date. If the overdue process is on hold then request for policy termination due to non payment will be on hold.
- **Funding** — A list of bills identified for a full bill amount or a partial bill amount will be kept on hold for a funding process.

Note:

For Funding process, Person, Bill, and Account entities can be put on hold. However, for processes like Auto pay, Bill Generation, and Overdue, only Account entity can be put on hold.

Processes and Entities start dates and end dates are expected to be within the limit of Hold Request Start Date and End Date.

You need to specify the hold request type while creating a hold request. Hold request type helps the system to determine:

- Whether to allow the partial hold for bill or not
- Whether hold request must be approved by the approver before keeping entities and processes on hold

It is possible for a given entity, such as a person or account, to be affected by hold request with differing periods or at differing levels. For example, if there is a hold request added for a person manually and another hold request is there due to some other reason for an account belongs to the person who is already on hold. The system assumes that both hold requests are in effect for the account and that the period of accounts starts from the start of the earlier hold request record (for the account) until the later of the two release dates.

During the hold request process, a hold request goes through various statuses in its lifecycle. For more information about the hold request statuses, see [Hold Request \(Without Approval\) Status Transition](#) on page 1903 and [Hold Request \(With Approval\) Status Transition](#) on page 1903

Note that the lifecycle of a hold request is driven by the business object using which the hold request is created. A hold request business object named **C1-HoldRequest** is shipped with the product. The hold request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-HoldRequest** business object. In addition, you can configure the search feature by setting **Fkref** feature configuration for each entity, such as person, account and bill.

For more information on how to setup the hold request processes, see [Prerequisites](#) on page 1909.

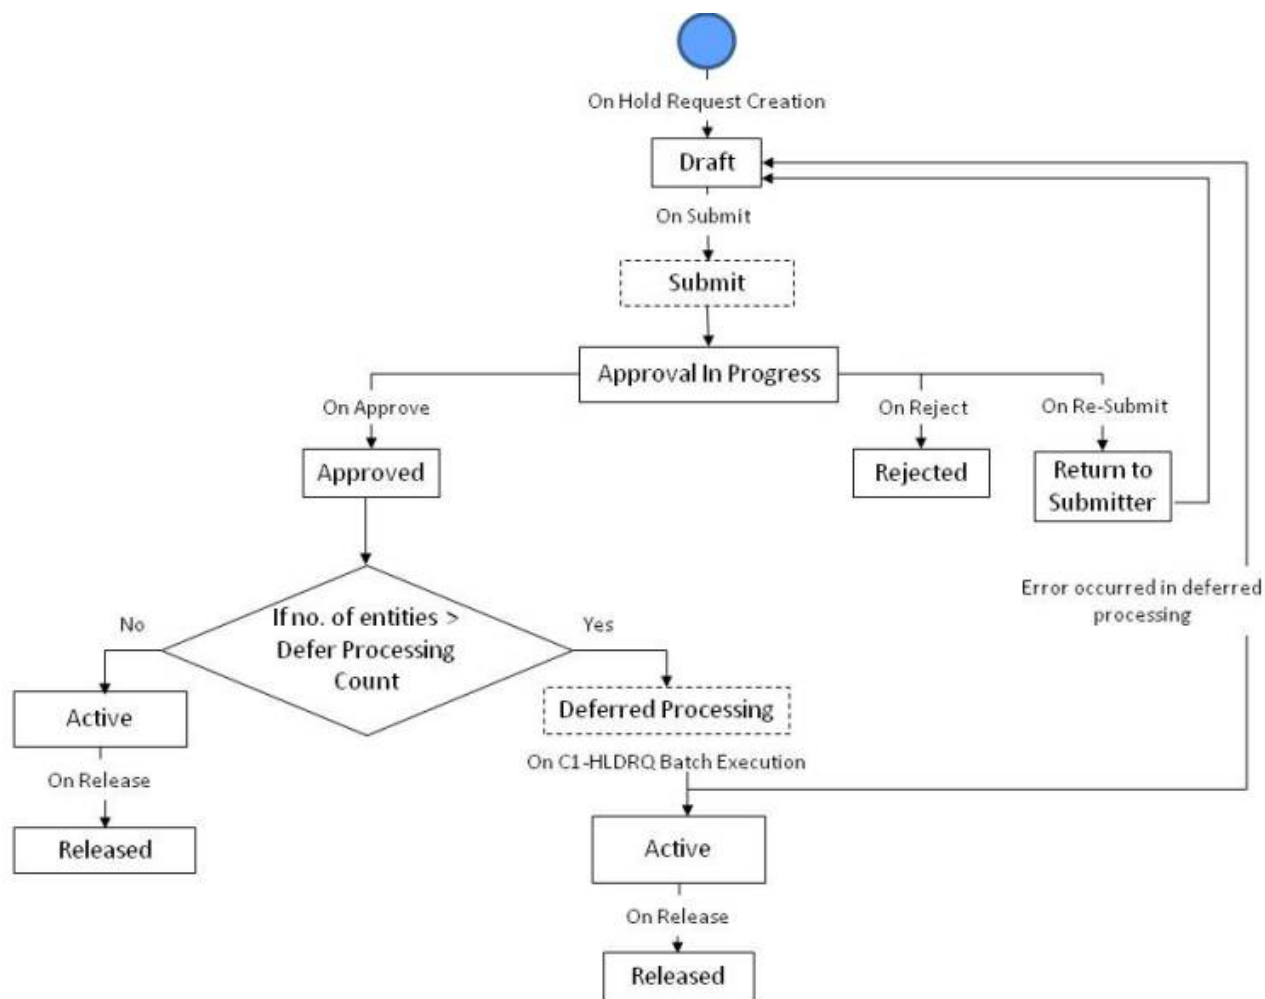

Hold Request (Without Approval) Status Transition

The following figure graphically indicates how a hold request moves from one status to another when approval workflow is off:

Hold Request (With Approval) Status Transition

The following figure graphically indicates how a hold request moves from one status to another when approval workflow is on:

Algorithms Used in C1-HoldRequest

The following table lists the algorithms which are attached to the **C1-HoldRequest** business object:

| System Event | Algorithm | Algorithm Type | Description |
|--------------|-------------|----------------|---|
| Information | C1-HOLD-INF | C1-HOLD-INF | This algorithm generates hold request information string which appears throughout the application. This algorithm concatenates the following fields: <ul style="list-style-type: none"> • Hold Request Type • Status • Entity • Hold Request ID |
| Validation | C1-HLDVALDN | C1-HLDVALDN | This algorithm validates following during different statuses: For Draft status, it checks the following: |

| System Event | Algorithm | Algorithm Type | Description |
|--------------|-----------|----------------|---|
| | | | <ul style="list-style-type: none"> • At least one Process is present in the request. Entity selection is optional • No duplicate entity and process is allowed in a single request. • Same entity cannot be placed on hold with the same Hold Reason in multiple Hold Requests. • Request start date is earlier than or equal to process and entity start date. • Request End Date is later than or equal to process and entity end date. • At least one process start date is earlier than or equal to any entity start date. • At least one process end date is later than or equal to any entity end date. • For Bill and Person entity, Bill Generation, Overdue, and Auto Pay processes cannot be selected as the hold processes in a hold request. • For Bill entity, it checks if hold amount is less than or equal to bill outstanding amount • For Bill entity, to add a new bill to the request, the selected bill should be with a non-zero outstanding amount. • Each Entities start date should lie within at least one process start date and end date in a request. <p>For Active state following are some additional validations:</p> <ul style="list-style-type: none"> • Hold Process or Entities cannot be deleted. • Hold Request or Entity or Process Start Date cannot be modified. • Hold Reason cannot be modified • Hold Request or Process or Entity End Date can be updated as either equal or greater than system date. • Process can be added with start date as system date. • Entity cannot be added in hold request. • If entity or process end date is in past then it cannot be updated. |

The following table lists the algorithms which are used in the lifecycle of the **C1-HoldRequest** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|--------|--------------|--------------|----------------|---|
| Draft | Enter | C1-HLDARCTRN | C1-HLDARCTRN | This algorithm transitions the request to active status when the request is created from Account Receivable Central and Delinquency Control . |
| Draft | Exit | F1-TODOCOMPL | F1-TODOCOMPL | This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for primary key of the current business object, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed. |
| Submit | Enter | C1-HOLDSUBMT | C1-HOLDSUBMT | This algorithm checks the following: <ul style="list-style-type: none"> Whether the approval is required for the hold request. If the approval is required for a hold request, the status of the hold request is changed to Approval In Progress. However, if the approval is not required for a hold request, the status of the hold request is changed to Active or Deferred Processing depending on the Defer Processing Count specified in the hold request type. |
| Active | Enter | C1-HOLDACTV | C1-HOLDACTV | This algorithm is invoked on Active button and validates following: <ul style="list-style-type: none"> Entities Start Date is on or after Hold Request Start Date Entities End Date is on or before Hold Request End Date For an Entity Bill, Hold Amount is not more than bill outstanding amount or Bill outstanding amount is not equal to zero. Updates and processes entities start date to system date. It updates following mentioned date to minimum of Entity End Date or Process End Date: <ul style="list-style-type: none"> Bill After Date - For Bill Generation Process. |

| Status | System Event | Algorithm | Algorithm Type | Description |
|----------------------|--------------|--------------|----------------|--|
| | | | | <ul style="list-style-type: none"> Postpone Credit review Date Until- For Overdue Process. Defer Auto Pay Date - For Auto pay process. Parameter-Alert Type-Using this Alert Type alerts are shown in the dashboard. A alert will have hyperlink which will enable user to navigate to Alerts tab on account. Start Dates and End Dates of Alert types are maintained based on the Hold Requests associated with the account. <p>Note: If entity end date is empty, process end date will be considered. If process end date and entity is empty, Hold Request End Date will be considered.</p> |
| Deferred Processing | Monitor | F1-AT-RQJ | F1-AT-RQJ | This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Only one of the soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm. |
| Approval In Progress | Enter | C1-HOLDAPP | C1-HOLDAPP | This algorithm creates To Do based on 'Approval To Do Type configured in Hold Request Type. |
| Approval In Progress | Exit | F1-TODOCOMPL | F1-TODOCOMPL | This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed. |

| Status | System Event | Algorithm | Algorithm Type | Description |
|---------------------|--------------|--------------|----------------|--|
| Approved | Enter | C1-HOLDAPRVD | C1-HOLDAPRVD | This algorithm is triggered when the approver clicks the Approve button. It checks whether the approval is required from users at the next level in the approval profile hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the hold request is changed to Approval In Progress . If further approval is not required, the status of the hold request is changed to Active or Deferred Processing depending on the Defer Processing Count specified in the hold request type. |
| Return to Submitter | Enter | C1-HLDRESUBM | C1-HLDRESUBM | This algorithm is triggered when the approver clicks the Re Submit button. A To Do is created and sent to the submitter. It transitions the status of the hold request from Approval In Progress to Draft . The submitter can make required changes to the request details and submit it again. The To Do Type and To Do Role for submitter is specified in hold request type. |
| Rejected | - | - | - | - |
| Released | Enter | C1-RELENTITY | C1-RELENTITY | This algorithm is invoked on Release button and updates following date to system date for all entities in the Hold Request: <ul style="list-style-type: none"> • Bill After Date - For Bill Generation Process • Postpone Credit review Date Until- For Overdue Process • Defer Auto Pay Date - For Auto pay process • Parameter-Alert Type-Using this Alert Type alerts are shown in the dashboard. A alert will have hyperlink which will enable user to navigate to Alerts tab on account • Start Dates and End Dates of Alert types are maintained based on the Hold Requests associated with the account. |

| Status | System Event | Algorithm | Algorithm Type | Description |
|----------|--------------|------------|----------------|---|
| Released | Enter | C1-RLSHOLD | C1-RLSHOLD | <p>This algorithm is invoked on click of Release button in hold request and updates the following:</p> <ul style="list-style-type: none"> • Hold Request End Date is updated to System Date • Processes End Date is updated to System Date • Entities End Date is updated to System Date • Hold request status is changed to Released after Hold Release Reason is accepted. |

Prerequisites

To setup the hold request process, you need to do the following:

- Define the release status reasons for the **C1-HoldRequest** business object
- Define the required hold reasons in the system
- Define rejected status reasons for the **C1-HoldRequest** business object
- Assign the **C1-HLDAP** To Do type to a To Do role whose users must receive To Do generated while submitting a hold request for approval
- Assign the **C1-HOLSB** To Do type to a To Do role whose users must receive To Do generated while resubmitting a hold request
- Define the required hold request types in the system
- Define the required characteristic types where the characteristic entity is set to **Hold Request**
- Define the required characteristic types where the characteristic entity is set to **Hold Request Type**
- Set the batch control type of the **Hold Request Periodic Monitor (C1-HLDRQ)** and **Hold Request Monitor (C1-HLMON)** batches to Timed and define the following attributes:
 - Time Interval
 - Timer Active
 - User ID
 - Batch Language
 - Email Address

Note: For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*

Approval Process for Hold Request Release

Earlier, you were able to configure the approval process for activating a hold request. Now, you can configure the approval process for activating and/or releasing a hold request. To introduce this feature, the following changes are made in the system:

- The **Approval Required**, **Approval To Do Type**, and **Approval To Do Role** fields in the **Hold Request Type** screen are renamed to **Activation Approval**, **Activation Approval To Do Type**, and **Activation Approval To Do Role**, respectively.
- The **Release Approval**, **Release Approval To Do Type**, and **Release Approval To Do Role** fields are newly added in the **Hold Request Type** screen.
- The description of the **APPRPROGRESS** status in the **C1-HoldRequest** business object is changed to **Activation Approval In Progress**.
- The following new statuses are introduced in the **C1-HoldRequest** business object:
 - Release Approval in Progress
 - Release Request Approved
 - Return Release Request to Submitter

If you want to configure the approval process for hold request activation, you need to set the following fields in the respective hold request type - **Activation Approval**, **Activation Approval To Do Type**, and **Activation Approval To Do Role**. However, if you want to configure the approval process for hold request release, you need to set the following fields in the respective hold request type - **Release Approval**, **Release Approval To Do Type**, and **Release Approval To Do Role**. You can set the same or different approval configuration for hold request activation and release.

On clicking the **Release** button, the system does the following:

| If... | Then... |
|---|--|
| <p>The Release Approval option is selected in the respective hold request type</p> | <p>A To Do is created using the To Do type specified in the Release Approval To Do Type field and sent to the approver having a To Do role specified in the Release Approval To Do Role field. The status of the hold request is then changed to Release Approval in Progress.</p> <p>The approver can review, and accordingly approve or resubmit the hold request based on the observations. On clicking the Approve button, the system updates the hold entity, hold process, and hold request end dates and then changes the status of the hold request to Released.</p> <p>Note: If the hold request is created for an account, the system also updates the following dates - Bill After Date, Postpone Credit Review Until, Defer Auto Pay Date, and Hold Request Until.</p> <p>However, on clicking the Resubmit button, the system enables you to enter the reason why you want to reject the hold release request. Once you specify the reason, the system changes the status of the hold request to Active. In addition, a To Do is created using the To Do type specified in the Submitter To Do Type field and sent to the approver having a To Do role specified in the Submitter To Do Role field.</p> |
| <p>The Release Approval option is not selected in the respective hold request type</p> | <p>The system then changes the hold entity, hold process, and hold request end dates. Finally, the status of the hold request is changed to Released.</p> <p>Note: If the hold request is created for an account, the system also updates the following dates - Bill After Date, Postpone Credit Review Until, Defer Auto Pay Date, and Hold Request Until.</p> |

Hold Refund

Until now, you were able to hold the bill generation, auto pay, funding, and overdue process for an account through a hold request. Now, in addition, the system enables you to hold the refund process for an account through a hold request. If the refund process is kept on hold for an account, the system does not process the refund requests (if any) created for the account. However, the system does not stop you from creating A/P adjustments for an account from the **Adjustment** screen when the refund process is kept on hold for the account.

While adding the refund process in a hold request, you need to specify the date range for which you want to hold the refund process for the accounts. The system enables you to add the refund process in a hold request from the user interface or through the upload request feature. If you want to create a hold request for an account through the upload request feature, you need to specify the following details in the CSV file:

- Whether you want to hold the refund process for the accounts (the valid values are Y or N)
- Hold refund start date (required if the hold refund is set to Y)
- Hold refund end date

On activating a hold request, the system stamps the hold refund until date corresponding to each account in the hold request. The hold refund until date is set to the hold entity end date or refund process end date whichever is earlier. This means that the system will allow to process the refund request of the account only after hold refund until date. If the number of accounts in a hold request is less than the defer processing count specified in the respective hold request type, the system stamps the hold refund until date immediately for each account in the hold request. In addition, the system changes the status of the refund request (if any) for respective accounts to **Hold**.

However, if the number of accounts in a hold request is equal to or greater than the defer processing count specified in the respective hold request type, the system stamps the hold refund until date for each account in the hold request when the **C1-HLMON** batch is executed. In addition, the **C1-HLMON** batch changes the status of the refund request (if any) for respective accounts to **Hold**.

When you manually release a hold request from the user interface, the system sets the hold request, hold entities, and hold processes end dates (which are later than or equal to the system date) to the system date and then changes the status of the hold request to **Released**. In addition, if the number of accounts in a hold request is less than the defer processing count specified in the respective hold request type, the system immediately sets the hold refund until date (which is later than or equal to the system date) to the system date for the account in the hold request. In addition, the system immediately changes the status of the refund request (if any) for respective accounts from **Hold** to its previous status.

However, if the number of accounts in a hold request is equal to or greater than the defer processing count specified in the respective hold request type, the system sets the hold refund until date (which is later than or equal to the system date) to the system date for the account in the hold request when the **C1-HLMON** batch is executed. In addition, the **C1-HLMON** batch changes the status of the refund request (if any) for respective accounts from **Hold** to its previous status.

Hold Mass Accounts Using Selection Criteria

Until now, you were able to add multiple accounts in a hold request by specifying their respective account ID. Now, this feature is extended wherein you can specify a selection criteria to derive the list of accounts which you want to add in a hold request. A new option named **Use Selection Criteria** is available when you set the entity to **Account** while creating a hold request. On selecting the **Use Selection Criteria** option, the **Hold Entities** section is removed from the **Hold Request** screen. Instead, a new section named **Account Selection Criteria** appears in the **Hold Request** screen. This section enables you to specify the criteria for deriving accounts using the account, person, policy, or individual membership details. You can specify the criteria for deriving accounts using the policy or individual membership details only when the **Environment Type** option type of a feature configuration which is created using the **General System Configuration** feature type is set to **H**.

A new status named **Entity Derivation Pending** is added in the lifecycle of the **C1-HoldRequest** business object. While saving a hold request with account selection criteria, the system creates the hold request in the **Entity Derivation**

Pending status. However, while saving a hold request without account selection criteria, the system creates the hold request in the **Draft** status.

A new batch named **C1-HLDET** is introduced in this release. It checks whether there are any hold requests in the **Entity Derivation Pending** status. The system considers those hold requests whose start date is earlier than or equal to batch business date. If there are is a hold request in the **Entity Derivation Pending** status, the batch derives the accounts for the hold request and then changes the status of the hold request from **Entity Derivation Pending** to **Draft**.

You can then add more accounts (if required) manually from the user interface. You can also edit or delete the accounts derived through the criteria from the hold request.

Hold Request Type

Oracle Revenue Management and Billing allows you to define a hold request type using which you can create a hold request.

The **Hold Request Type** screen allows you to define, edit, copy, and delete a hold request type. This screen consists of the following zones:

- [Hold Request Type List](#) on page 1912
- [Hold Request Type](#) on page 1913

Hold Request Type List

The **Hold Request Type List** zone lists hold request types that are already defined in the system. It contains the following columns:

| Column Name | Column Description |
|-------------------|--|
| Hold Request Type | Displays the hold request type. |
| Description | Displays the description of the hold request type. |
| Edit | On clicking the Edit (✎) icon, the Hold Request Type screen appears where you can edit the details of the hold request type. |
| Duplicate | On clicking the Duplicate (📄) icon, the Hold Request Type screen appears where you can define a hold request type using an existing hold request type. |
| Delete | On clicking the Delete (🗑) icon, you can delete the hold request type. Note: You can delete a hold request type when you have not created a hold request using the hold request type. |

On clicking the **Broadcast** (📡) icon corresponding to the hold request type, the **Hold Request Type** zone appears with the details of the respective hold request type.

Hold Request Type

The **Hold Request Type** zone displays the details of the hold request type. This zone consists of the following sections:

- **Main** — This section provides basic information about the hold request type. It contains the following fields:

| Field Name | Field Description |
|------------------------------|--|
| Hold Request Type | Displays the hold request type. |
| Description | Displays the description of the hold request type. |
| Hold Request Business Object | Indicates the business object that will be used to create the hold request. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Detailed Description | Displays additional information about the hold request type. |
| Status | Indicates the status of the hold request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive |
| Allow Partial Hold for Bill | Indicates whether the partial hold amount is allowed for a bill. |
| Defer Processing Count | Displays the number of entities to determine if the hold request will be processed in deferred mode. Note: If the number of entities is less than the Defer Processing Count , the hold request will be processed in real time (i.e. immediately). |
| Approval Required | Indicates whether approval is required while creating the hold request using hold request type. |
| Approval To Do Type | Indicates that To Do of the specified To Do type must be created when you submit the hold request for approval. Note: This field appears when the Approval Required check box is selected. It has a link. On clicking the link, the To Do Type screen appears with the details of the respective To Do type. |
| Approval To Do Role | Indicates that users with the specified To Do role can only approve the hold request submitted for approval. |

| Field Name | Field Description |
|----------------------|--|
| | <p>Note:</p> <p>This field appears when the Approval Required check box is selected.</p> <p>It has a link. On clicking the link, the To Do Role screen appears where you can view the details of the respective To Do role.</p> |
| Submitter To Do Type | <p>Indicates the To Do type of the submitter.</p> <p>Note: It has a link. On clicking the link, the To Do Type screen appears where you can view the details of the respective To Do type.</p> |
| Submitter To Do Role | <p>Indicates the To Do role of the submitter.</p> <p>Note: It has a link. On clicking the link, the To Do Role screen appears where you can view the details of the respective To Do role.</p> |

- **Hold Processes** — This section displays the list of processes to be kept on hold for the hold request type.
- **Characteristics** — This section lists the characteristics of the hold request type. It contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** — This section contains the following buttons:

| Button Name | Button Description |
|-------------|---|
| Edit | Used to edit the details of the hold request type. |
| Delete | <p>Used to delete the hold request type.</p> <p>Note: You can delete a hold request type when you have not created a hold request using the hold request type.</p> |
| Duplicate | Used to create a new hold request type using an existing hold request type. |

- **Record Information** — This section contains the following fields:

| Field Name | Field Description |
|-----------------|--|
| Business Object | <p>Indicates the business object using which the hold request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p>Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.</p> |

By default, the **Hold Request Type** zone does not appear in the **Hold Request Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the hold request type in the **Hold Request Type List** zone.

Defining a Hold Request Type

Prerequisites

To define a hold request type, you should have:

- Hold request business objects defined in the application

Procedure

To define a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
A sub-menu appears.
3. Click the **Add** option from the **Hold Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------------|--|-----------------------|
| Hold Request Type Business Object | Used to indicate the business object that you want to use to create the hold request type. | Yes |

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Hold Request Type** screen.

Note: The **Select Business Object** screen appears when there are multiple hold request type business objects defined in the application. If there is only one hold request type business object defined in the application, the **Hold Request Type** screen appears.

4. Select the required hold request type business object from the respective field.
5. Click **OK**.

The **Hold Request Type** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the hold request type.
- **Hold Processes** — Used to define the processes to hold for the hold request type.
- **Characteristics** — Used to define the characteristics for the hold request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------|--|-----------------------|
| Hold Request Type | Used to specify the hold request type. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------------|--|---|
| Business Object | Indicates the hold request type business object used while defining the hold request type. | Not applicable |
| Description | Used to specify the description for the hold request type. | Yes |
| Hold Request Business Object | Used to indicate the business object that you want to use while creating the hold request. | Yes |
| Detailed Description | Used to specify additional information about the hold request type. | No |
| Status | <p>Used to indicate the status of the hold request type. The valid values are:</p> <ul style="list-style-type: none"> Active Inactive <p>Note: You cannot change the status of a hold request type to Inactive if there are hold requests which are created using the hold request type and are currently in the Draft or Approval In Progress status.</p> | Yes |
| Allow Partial Hold for Bill | Used to indicate whether the partial hold amount will be accepted for a bill. | Yes |
| Defer Processing Count | <p>Used to indicate the number of entities to determine if the hold request will be processed in deferred mode.</p> <p>Note: If the number of entities is less than the Defer Processing Count, the hold request will be processed in real time (i.e. immediately). Defer processing count should be a numerical value without decimal points.</p> | No |
| Approval Required | Used to indicate whether approval is required while creating the hold request using hold request type. | No |
| Approval To Do Type | <p>Used to indicate that To Do of the specified To Do type must be created when you submit the hold request for approval.</p> <p>Note: This field appears when the Approval Required check box is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required check box is selected</p> |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|---|
| Approval To Do Role | Used to indicate that users with the specified To Do role can only approve the hold request submitted for approval. | Yes (Conditional) |
| | Note: This field appears when the Approval Required check box is selected. | Note: This field is required when the Approval Required check box is selected |
| Submitter To Do Type | Used to indicate the To Do type for the submitter. | No |
| Submitter To Do Role | Used to indicate the To Do role for the submitter. | No |

Note:

Deferred mode means in the background when the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is invoked. You can configure the **Hold Request Periodic Monitor (C1-HLDRQ)** batch such that it is executed at regular intervals. When the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is invoked, the system checks whether there are any hold requests in the **Deferred** status. If there is an hold request in the **Deferred** status, then its status is changed to **Active**.

- Enter the required details.

Note: You can search for **To Do Type** by clicking the **Search** (🔍) icon corresponding to the respective field.

- Define processes to hold for the hold request type.

Note:

At least one hold process needs to be selected for defining a hold request type.

- Define characteristics for the hold request type, if required.
- Click **Save**.

The hold request type is defined.

| How to define a characteristic for a hold request type | Defining a Characteristic for a Hold Request Type on page 1917 |

Defining a Characteristic for a Hold Request Type**Prerequisites**

To define a characteristic for a hold request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Hold Request Type**)

Procedure

To define a characteristic for a hold request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a hold request type.

The **Characteristics** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|---|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Hold Request Type . | Note: This field is required when you are defining a characteristic for the hold request type. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the hold request type. |

2. Enter the required details.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the hold request type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the hold request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

Editing a Hold Request Type**Prerequisites**

To edit a hold request type, you should have:

- Hold request business objects defined in the application

Procedure

To edit a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
A sub-menu appears.
3. Click the **Search** option from the **Hold Request Type** sub-menu.
The **Hold Request Type** screen appears.
4. In the **Hold Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the hold request type whose details you want to edit.

The **Hold Request Type** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the hold request type.
- **Hold Processes** — Used to define the processes to hold for the hold request type.
- **Characteristics** — Used to define the characteristics for the hold request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------------|--|-----------------------|
| Hold Request Type | Displays the hold request type. | Not applicable |
| Business Object | Indicates the hold request type business object used while defining the hold request type. | Not applicable |
| Description | Used to specify the description for the hold request type. | Yes |
| Hold Request Business Object | Used to indicate the business object that you want to use while creating the hold request. | Yes |
| Detailed Description | Used to specify additional information about the hold request type. | No |
| Status | Used to indicate the status of the hold request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p>Note: You cannot change the status of a hold request type to Inactive if there are hold requests which are created using the hold request type and are currently in the Draft or Approval In Progress status.</p> </div> | Yes |
| Allow Partial Hold for Bill | Used to indicate whether the partial hold amount will be accepted for a bill. | Yes |
| Defer Processing Count | Used to indicate the number of entities to determine if the hold request will be processed in deferred mode. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|---|
| | <p>Note:</p> <p>If the number of entities is less than the Defer Processing Count, the hold request will be processed in real time (i.e. immediately).</p> <p>Defer processing count should be a numerical value without decimal points.</p> | |
| Approval Required | Used to indicate whether approval is required while creating the hold request using hold request type. | No |

Deleting a Hold Request Type

Procedure

To delete a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
A sub-menu appears.
3. Click the **Search** option from the **Hold Request Type** sub-menu.
The **Hold Request Type** screen appears.
4. In the **Hold Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the hold request type that you want to delete.
A message appears confirming whether you want to delete the hold request type.

Note: You can delete a hold request type when you have not defined a hold request using the hold request type.

Tip: Alternatively, you can click the **Delete** button in the **Hold Request Type** zone to delete the hold request type.

5. Click **OK**.
The hold request type is deleted.

Copying a Hold Request Type

Instead of creating a hold request type from scratch, you can create a new hold request type using an existing hold request type. This is possible through copying a hold request type. On copying a hold request type, the details including the characteristics are copied to the new hold request type. You can then edit the details, if required.

Prerequisites

To copy a hold request type, you should have:

- Hold request type (whose copy you want to create) defined in the application
- Hold request business objects defined in the application

Procedure

To copy a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
A sub-menu appears.
3. Click the **Search** option from the **Hold Request Type** sub-menu.
The **Hold Request Type** screen appears.
4. In the **Hold Request Type List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the hold request type whose copy you want to create.

The **Hold Request Type** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the hold request type.
- **Hold Processes** — Used to define the processes to hold for the hold request type.
- **Characteristics** — Used to define the characteristics for the hold request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------------|---|-----------------------|
| Hold Request Type | Used to specify the hold request type. | Yes |
| Business Object | Indicates the hold request type business object used while defining the hold request type. | Not applicable |
| Description | Used to specify the description for the hold request type. | Yes |
| Hold Request Business Object | Used to indicate the business object that you want to use while creating the hold request. | Yes |
| Detailed Description | Used to specify additional information about the hold request type. | No |
| Status | Used to indicate the status of the hold request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |
| | Note: You cannot change the status of a hold request type to Inactive if there are hold requests which are created using the hold request type and are currently in the Draft or Approval In Progress status. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------|---|---|
| Allow Partial Hold for Bill | Used to indicate whether the partial hold amount will be accepted for a bill. | Yes |
| Defer Processing Count | <p>used to indicate the number of bills to determine if the hold request will be processed in deferred mode.</p> <p>Note: Deferred mode means in the background when the Hold Request Periodic Monitor (C1-HLDRQ) batch is invoked. You can configure the Hold Request Periodic Monitor (C1-HLDRQ) batch such that it is executed at regular intervals. When the Hold Request Periodic Monitor (C1-HLDRQ) batch is invoked, the system checks whether there are any hold requests in the Deferred status. If there is an hold request in the Deferred status, then its status is changed to Active.</p> <p>If the number of bills is less than the Defer Processing Count, the hold request will be processed in real time (i.e. immediately).</p> <p>Defer processing count should be a numerical value without decimal points.</p> | No |
| Approval Required | Used to indicate whether approval is required while creating the hold request using hold request type. | No |
| Approval To Do Type | <p>Used to indicate that To Do of the specified To Do type must be created when you submit the hold request for approval.</p> <p>Note: This field appears when the Approval Required check box is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required check box is selected</p> |
| Approval To Do Role | <p>Used to indicate that users with the specified To Do role can only approve the hold request submitted for approval.</p> <p>Note: This field appears when the Approval Required check box is selected.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required check box is selected</p> |
| Submitter To Do Type | Used to indicate the To Do type for the submitter. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|-----------------------|
| Submitter To Do Role | Used to indicate the To Do role for the submitter. | No |

Tip: Alternatively, you can click the **Duplicate** button in the **Hold Request Type** zone to create a copy of the hold request type.

- Enter the required details.
- Define, edit or remove processes from the hold request type, if required.
- Define, edit, or remove characteristics of the hold request type, if required.
- Click **Save**.

The new hold request type is defined.

Hold Request (Used for Searching)

The **Hold Request** screen allows you to search for a hold request using various search criteria. It also allows you to create a hold request. Through this screen, you can navigate to the following screen:

- [Hold Request \(Used for Viewing\)](#) on page 1932

This screen consists of the following zone:

- [Search Hold Request](#) on page 1925

Search Hold Request

The **Search Hold Request** zone allows you to search for hold requests using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------|---|-----------------------|
| Search By | Used to indicate whether you want to search for a hold request using request or bill details. The valid values are: <ul style="list-style-type: none"> • Request Details • Bill Details | Yes |
| | Note: By default, the Request Details option is selected. | |
| Hold Request Type | Used to search hold requests which are created using a particular hold request type. | No |
| | Note: This field appears when you select the Request Details option from the Search By list. | |
| Entity | Used to search hold request with a particular entity. The valid values are: <ul style="list-style-type: none"> • Account • Person • Bill | No |
| | Note: This field appears when you select the Request Details option from the Search By list. | |
| Hold Process | Used to search hold requests which are created using a particular hold process. | No |
| | Note: This field appears when you select the Request Details option from the Search By list. | |
| User ID | Used to search hold requests which are created by a particular user. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------|--|-----------------------|
| | Note: This field appears when you select the Request Details option from the Search By list. | |
| Hold Reason | Used to search hold requests which are created using a particular hold reason. Note: This field appears when you select the Request Details option from the Search By list. | No |
| Start Date | Used to search hold requests which are created from a particular date onwards. Note: This field appears when you select the Request Details option from the Search By list. | No |
| Status | Used to search hold requests with a particular status. The valid values are: <ul style="list-style-type: none"> • Active • Draft • Released • Approval In Progress • Deferred Processing • Rejected Note: This field appears when you select the Request Details option from the Search By list. | No |
| End Date | Used to search hold requests which are created till a particular date. Note: This field appears when you select the Request Details option from the Search By list. | No |
| Account ID | Used to search hold requests which are created for a particular account. Note: This field appears when you select the Request Details option from the Search By list. You can search for an account by clicking the Search  icon corresponding to the field. | No |
| Hold Request ID | Used to search a particular hold request. Note: This field appears when you select the Request Details option from the Search By list. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|---|-----------------------|
| Person ID | Used to search hold requests which are created for a particular person. | No |
| | <p>Note:</p> <p>This field appears when you select the Request Details option from the Search By list.</p> <p>You can search for a person by clicking the Search (🔍) icon corresponding to the field.</p> | |
| Bill ID | Used to search hold requests which includes bill segments or adjustments of a particular bill. | No |
| | <p>Note:</p> <p>This field appears only when you select the Bill Details option from the Search By list.</p> <p>You can search for a bill by clicking the Search (🔍) icon corresponding to the field.</p> | |
| Bill Date From | Used to search hold requests which includes bill segments or adjustments of bills which are created from a particular date onwards. | No |
| | <p>Note: This field appears when you select the Bill Details option from the Search By list.</p> | |
| To | Used to search hold requests which includes bill segments or adjustments of bills which are created till a particular date. | No |
| | <p>Note: This field appears when you select the Bill Details option from the Search By list.</p> | |

Note: You must specify at least one search criterion while searching for a hold request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|--------------------------|--|
| Create Date/Time | Displays the date and time when the hold request is created. |
| Hold Request Information | Displays information about the hold request. |
| | <p>Note: It has a link. On clicking the link, the Hold Request screen appears where you can view the details of the respective hold request.</p> |
| Status | Indicates the status of the hold request. The valid values are: <ul style="list-style-type: none"> • Active • Draft |

| Column Name | Column Description |
|----------------|---|
| | <ul style="list-style-type: none"> Released Approval In Progress Deferred Processing Rejected |
| Start Date | Displays the date when the hold request is created. |
| End Date | Displays the date when the hold request is released. |
| Hold Processes | Displays the hold processes using which hold request is created. |
| Hold Reason | Displays the hold reason for the hold request. |
| Created By | Indicates the user who has created the hold request. |

Searching for a Hold Request

Prerequisites

To search for a hold request, you should have:

- Hold request types defined in the application

Procedure

To search for a hold request:

- Click the **Menu** link in the **Application** toolbar.
A list appears.
- From the **Main** menu, select **Accounting and Receivable** and then click **Hold Request**.
A sub-menu appears.
- Click the **Search** option from the **Hold Request** sub-menu.
The **Hold Request** screen appears.
- Enter the search criteria in the **Search Hold Request** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of hold requests that meet the search criteria appears in the **Search Results** section.

Creating a Hold Request

Prerequisites

To create a hold request, you should have:

- Hold request types defined in the application.
- Hold request reasons defined in the application.
- Hold request entities defined in the application.
- Hold request processes defined in the application.

Procedure

To create a hold request:

1. Do either of the following:

| If you want to... | Then... |
|---|--|
| Define a hold request from the Account Receivable Central screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select Accounting and Receivable and then click Account Receivable Central. The Account Receivable Central screen appears. 3. Search for the bill in the Account Receivable Central screen. 4. In the Search Results section, select the required bill and then click Hold. <p>Note: Bills are selected to be on hold from Account Receivable Central. Only one bill at a time is allowed to select for Hold Request from Account Receivable Central</p> |
| Define a hold request from the Delinquency Central screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select Delinquency Management and then click Delinquency Central. The Delinquency Central screen appears. 3. Search for the overdue process in the Delinquency Central screen. |

| If you want to... | Then... |
|---|---|
| | <p>4. In the Search Results section, select the required overdue process and then click Create Hold Request.</p> <p>Note: Accounts are selected to be on hold from Delinquency Central screen Only one account at a time is allowed to select for Hold Request from Delinquency Central screen.</p> |
| Define a hold request from the Hold Request screen | <p>1. Click the Menu link in the Application toolbar. A list appears.</p> <p>2. From the Main menu, select Accounting and Receivable and then click Hold Request. A sub-menu appears.</p> <p>3. Click the Add option from the Hold Request sub-menu.</p> |

The **Add Hold Request** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------|--|-----------------------|
| Hold Request Type | Used to indicate the request type using which you want to create the hold request. | Yes |

Tip: Alternatively, you can access the **Add Hold Request** screen by clicking the **Add** button in the **Page Title** area of the **Hold Request** screen.

2. Select the required hold request type from the respective field.
3. Click **OK**.

The **Hold Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the hold request. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------|--|-----------------------|
| Hold Request Type | Indicates the hold request type using which you want to create the hold request. | Not applicable |
| Start Date | Used to specify the date from when the hold request is effective. | Yes |
| | <p>Note: The hold request start date cannot be later than the hold request end date. By default, system date appears in this field.</p> | |
| End Date | Used to specify the date till when the hold request is effective. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------|---|-----------------------|
| | Note: The hold request end date cannot be earlier than the hold request start date. | |
| Hold Reason | Used to indicate the reason why you want to hold the entity. | Yes |
| Entity | Used to indicate the type of the entity for which you want to create the hold request. The valid values are: <ul style="list-style-type: none"> Account Bill Person Note: If a bill is kept on hold using the Account Receivable Central screen, then this field displays Bill as an entity and the Hold Entities section displays information about the bill. | Yes |
| Comments | Used to specify additional information about the hold request. | No |

- Enter the required details in the **Hold Request** screen.
- Define entities for the hold request, if required.
- Define processes for the hold request.
- Define characteristics for the hold request, if required.
- Click **Save**.

The hold request is created in the **Draft** status.

Note: It is recommended that user should set the **C1-HLMON** batch every time the hold request is generated. Otherwise, alert would be shown in the dashboard which may not give the proper representation of active hold requests.

Viewing the Hold Request Details

Procedure

To view the details of a hold request:

- Search for the hold request in the **Hold Request** screen.

- In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request whose details you want to view.

The **Hold Request** screen appears. It consists of the following tabs:

- Main** – Displays information about the hold request. It contains the following zones:
 - Hold Request** – Displays the details of the hold request.
 - Hold Entities** – Lists the entities, such as person, accounts, or bills that are on hold request.
 - Search Account** – Searches the accounts to be put on hold.

Note: This zone appears when hold request is for **Account** and its status is **Draft**.

- Search Bill** – Searches the bills to be put on hold.

Note: This zone appears when hold request is for **Bill** and its status is **Draft**.

- Search Person** – Searches the persons to be put on hold.

Note: This zone appears when hold request is for **Person** and its status is **Draft**.

- Log** – Lists the complete trail of actions performed on the hold request.

- View the details of the hold request in the **Hold Request** zone.
- View the hold request entities (such as person, accounts, or bills) in the **Hold Entities** zone.

Hold Request (Used for Viewing)

Once you create a hold request, the **Hold Request** screen allows you to:

- Add entities in a hold request
- Add processes in a hold request
- Edit the details of a hold request
- Edit the hold amount against each entity. This is valid for only bill.
- Delete a hold request
- View the details of a hold request
- Submit a hold request for approval
- Approve or reject a hold request
- Resubmit a hold request for approval
- Activate and Release a hold request
- Search for an account, bill, and person in a hold request
- Edit the end dates of all the entities in a hold request

- Delete all the entities in a hold request
- View the log of a hold request
- Add a log entry for a hold request

This screen consists of the following tabs:

- **Main** – Displays information about the hold request. It contains the following zones:
 - **Hold Request** – Displays the details of the hold request.
 - **Hold Entities** – Lists the entities, such as person, accounts, or bills that are on hold request.
 - **Search Account** – Searches the accounts to be put on hold.

Note: This zone appears when hold request is for an **Account** and its status is **Draft**.

- **Search Bill** – Searches the bills to be put on hold.

Note: This zone appears when hold request is for **Bill** and its status is **Draft**.

- **Search Person** – Searches the persons to be put on hold.

Note: This zone appears when hold request is for **Person** and its status is **Draft**.

- **Log** – Lists complete trail of actions performed on the hold request. This tab contains the following zone:
 - **Hold Request Log** – Displays the actions performed on the hold request.

Hold Request - Main

The **Main** tab on the **Hold Request** contains the following zones:

- [Hold Request](#) on page 1933
- [Hold Entities](#) on page 1935
- [Search Account](#) on page 1937

Note: This zone appears when the hold request for an **Account** is in the **Draft** status.

- [Search Bill](#) on page 1941

Note: This zone appears when hold request for a **Bill** is in the **Draft** status.

- [Search Person](#) on page 1943

Note: This zone appears when hold request is for a **Person** is in the **Draft** status.

Hold Request

The **Hold Request** zone displays the details of the hold request. This zone contains the following sections:

- **Main** - This section provides basic information about the hold request. It contains the following fields:

| Field Name | Field Description |
|--------------------------|--|
| Hold Request Information | Displays information about the hold request. |
| Hold Request Type | Indicates the hold request type using which the hold request is created. |
| | Note: It has a link. On clicking the link, the Hold Request Type screen appears where you can view the details of the hold request type. |

| Field Name | Field Description |
|---------------|---|
| Status | Indicates the status of the hold request. |
| Status Reason | Indicates the reason why the hold request is rejected or released. Note: This field appears when the hold request is in Rejected or Released status. It has a link. On clicking the link, the Status Reason screen appears where you can view the details of the respective status reason. |
| Start Date | Displays the date from when the hold request is effective. |
| End Date | Displays the date till when the hold request is effective. |
| Hold Reason | Indicates the reason for creating the hold request. |
| Entity | Indicates the entity for which the hold request is created. |
| Comments | Displays additional information about the hold request. Note: This field appears if comments are provided while defining or editing a hold request. |

- **Hold Processes** - Lists the processes which are kept on hold in the hold request. It contains the following columns:

| Column Name | Column Description |
|--------------|--|
| Hold Process | Indicates the process which is kept on hold. |
| Start Date | Displays the date from when the hold process is effective. |
| End Date | Displays the date till when the hold process is effective. |

- **Record Actions** - This section contains the following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to edit the details of the hold request. Note: The Edit button appears when the hold request is in the Draft or Active status. |
| Delete | Used to delete the hold request. Note: The Delete button appears when the hold request is in the Draft status. |
| Submit | Used to activate the hold request. Note: The Submit button appears when the hold request is in the Draft status. |
| Re Submit | Used to re-submit the hold request. Note: The Re Submit button appears when the hold request is in the Approval In Progress status. |
| Approve | Used to approve the hold request. |

| Button Name | Button Description |
|-------------|---|
| | Note: The Approve button appears when the hold request is in the Approval In Progress status. |
| Reject | Used to reject the hold request. Note: The Reject button appears when the hold request is in the Approval In Progress status. |
| Release | Used to release the hold request. Note: The Release button appears when the hold request is in the Active status. |

- **Record Information** - This section contains the following fields:

| Field Name | Field Description |
|------------------|--|
| Business Object | Indicates the business object using which the hold request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Status Date/Time | Displays the date and time when the hold request status is updated. |
| Create Date/Time | Displays the date and time when the hold request is created. |

- **Characteristics** - Lists the characteristics defined for the hold request. It contains the following columns:

| Column Name | Column Description |
|----------------------|---|
| Effective Date | Indicates the date from when the characteristic is effective. |
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

Hold Entities

The **Hold Entities** zone lists the entities which are added to the hold request. It contains the following columns:

| Column Name | Column Description |
|---------------------|---|
| Person Information | Indicates information about the person who is added to the hold request. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person. |
| Account Information | Indicates information about the account which is added to the hold request. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account. |

| Column Name | Column Description |
|------------------------------|--|
| Bill Information | Indicates information about the bill which is added to the hold request. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill. |
| Entity ID | Indicates the entity for which the hold request is created. |
| Start Date | Displays the date from when the entity is effective for the hold request. |
| End Date | Displays the date till when the entity is effective for the hold request. Note: When the status of the hold request is changed to released, the system updates the end date with the date when the hold request is released, ensuring that the new date resides within the start and end date of the hold request. |
| Hold Amount | Displays the amount of the bill which is kept on hold through a hold request. Note: This column appears only when Bill is defined as an entity. |
| Bill After Date | Displays the date after which bills can be generated. Note: This column appears only when Account is defined as an entity. |
| Postpone Credit Review Until | Displays the date till when overdue process is to be on hold. Note: This column appears only when Account is defined as an entity. |
| Defer Auto Pay Date | Displays the date from when auto pay process is to be put on deferred mode. Note: This column appears only when Account is defined as an entity. |
| Hierarchy | Indicates whether the entity is associated with the entity hierarchy relationship. Note: This column appears only when Person is defined as an entity. |

In addition to above columns, this screen contains following buttons:

| Button Name | Button Description |
|-------------|---|
| Edit | Used to edit the end date of hold entities. |
| Delete | Used to delete the hold entities. |

Note:

A check box appears corresponding to each hold entity. To update the end date of a hold entity, select the check box corresponding to the hold entity and click the **Edit** button. You can also select multiple hold entities at the same time. In addition, you can select the check box corresponding to the column header. This allows you to update the end date of all the hold entities listed in the respective page.

You can also edit all the hold entities by clicking the **Edit All** link available in the upper right corner of this zone.

To delete a hold entity, select the check box corresponding to the hold entity and click the **Delete** button. You can also select multiple hold entities at the same time. In addition, you can select the check box corresponding to the column header. This allows you to delete all the hold entities listed in the respective page.

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Entity ID** search criteria available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Search Account

The **Search Account** zone allows you to search for accounts using various search criteria. It also allows you to add the accounts in a hold request. It contains the following two sections:

- **Search Criteria** - This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Search By | Used to indicate whether you want to search for an account using the account or policy details. The valid values are: <ul style="list-style-type: none"> • Account Details • Policy Details | Not applicable |
| | Note: By default, the Account Details option is selected. | |
| Account ID | Used to search a particular account. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|--|---|
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Account ID field. On clicking the Search icon, the Account Search window appears.</p> <p>On specifying the account, the description of the account appears corresponding to the Account ID field.</p> <p>This field appears when you select the Account Details option from the Search By list.</p> | |
| Division | <p>Used to search accounts which belong to a particular division.</p> <p>Note: This field appears when you select the Account Details option from the Search By list.</p> | No |
| Address Source | <p>Used to indicate the address source of the account.</p> <p>Note:</p> <p>The list includes only those values which are defined in the BILL_ADDR_SRCE_FLG lookup field.</p> <p>This field appears when you select the Account Details option from the Search By list.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required if you are searching for accounts using the state, country, or postal as a search criteria.</p> |
| Bill Cycle | <p>Used to indicate the bill cycle of the account.</p> <p>Note: This field appears when you select the Account Details option from the Search By list.</p> | No |
| State | <p>Used to specify the state name.</p> <p>Note: This field appears when you either select the Account Details or Policy Details option from the Search By list.</p> | No |
| Customer Class | <p>Used to indicate the customer class to which the account belongs.</p> <p>Note: This field appears when you select the Account Details option from the Search By list.</p> | No |
| County | <p>Used to specify the county name.</p> <p>Note: This field appears when you either select the Account Details or Policy Details option from the Search By list.</p> | No |
| Postal | <p>Used to specify the postal or zip code.</p> <p>Note: This field appears when you either select the Account Details or Policy Details option from the Search By list.</p> | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------|---|--|
| Price Item | Used to search a particular price item. | No |
| | <p>Note:</p> <p>You can search for a price item by clicking the Search  icon corresponding to the field. On clicking the Search icon, the Price Item Search window appears.</p> <p>This field appears when you select the Policy Details option from the Search By list.</p> | |
| Policy Plan Number | Used to search accounts which belong to a particular policy plan number. | No |
| | <p>Note: This field appears when you select the Policy Details option from the Search By list.</p> | |
| Policy Type | Used to search accounts which belong to a particular policy type. | Yes (Conditional) |
| | <p>Note:</p> <p>The list includes only those policy types where the policy category is set to Fully-Insured Group, Fully-Insured Individual or Self-Funded.</p> <p>This field appears when you select the Policy Details option from the Search By list.</p> | <p>Note: This field is required if you are searching for accounts using the state, country, or postal as a search criteria.</p> |
| Source System | Used to search accounts which were created in a particular external system. | Yes (Conditional) |
| | <p>Note:</p> <p>The list includes only those values which are defined in the C1-SourceSystemLookup extendable lookup.</p> <p>This field appears when you select the Policy Details option from the Search By list.</p> | <p>Note: This field is required if you are searching for accounts using the state, country, or postal as a search criteria.</p> |
| Policy Number | Used to search accounts with a particular policy number. | No |
| | <p>Note: This field appears when you select the Policy Details option from the Search By list.</p> | |
| Start Date | Used to search accounts which are associated with the policies effective from a particular date. | No |
| | <p>Note: This field appears when you select the Policy Details option from the Search By list.</p> | |
| End Date | Used to search accounts which are associated with the policies effective till a particular date. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|-----------------------|
| | Note: This field appears when you select the Policy Details option from the Search By list. | |
| Status | Used to search accounts which are associated with a particular policy status. Note: This field appears when you select the Policy Details option from the Search By list. | No |
| Characteristic Type | Used to search accounts which are associated with the policies belonging to a particular characteristic type. Note: This field appears when you select the Policy Details option from the Search By list. | No |

Note:

You must specify at least one search criterion while searching for an account. One more search criterion is required when you are searching for an account using the division and/or customer class. Similarly, one more search criterion is required when you are searching for an account (associated with the policies) using the policy type and/or source system.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria.

The **Search Results** section contains the following columns:

| Column Name | Column Description |
|---------------------|--|
| Account Information | Displays additional information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account. |
| Country | Displays the country name. |
| State | Displays the state where the county is located. |
| County | Displays the county name. |
| Postal | Displays the postal or zip code. |
| Customer Class | Indicates the customer class to which the account belongs. |
| Division | Indicates the division to which the account belongs. |
| Entity ID | Displays the entity ID. |

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, this section contains the following button:

| Button Name | Button Description |
|-------------|---|
| Add | Used to add an account to the hold request. |

A check box appears corresponding to each account. On selecting the check box, you can add the account to the hold request. You can also select multiple accounts at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the accounts listed in the respective page to the hold request.

Search Bill

The **Search Bill** zone allows you to search for the bills using various search criteria. It also allows you to add the bills in a hold request. It contains the following two sections:

- **Search Criteria** - This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------|---|--|
| Search By | Used to indicate whether you want to search for a bill using the bill details. | Not applicable |
| | Note: By default, the Bill Details option is selected. | |
| Bill ID | Used to search a particular bill. | No |
| | Note: The Search (🔍) icon appears corresponding to the Bill ID field. On clicking the Search icon, the Bill Search window appears. On specifying the bill, the description of the bill appears corresponding to the Bill ID field. | |
| Alternate Bill ID | Used to search a particular bill using the alternate bill ID. | No |
| Address Source | Used to indicate the address source of the bill. | Yes (Conditional) |
| | Note: The list includes only those values which are defined in the BILL_ADDR_SRCE_FLG lookup field. | |
| | | Note: This field is required if you are searching for bills using the state, country, or postal as a search criteria. |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|---|--|
| Bill Date From | Used to search bills which are created from a particular date onwards. | Yes (Conditional) Note: This field is required if you have specified the value in the To field. |
| | Note: By default, the current date appears in this field. | |
| State | Used to specify the state name. | No |
| To | Used to search bills which are created till a particular date. | Yes (Conditional) Note: This field is required if you have specified the value in the Bill Date From field. |
| | Note: By default, the current date appears in this field. | |
| County | Used to indicate the county name. | No |
| Show All Bills | Used to search all those bills where the bill amount is greater than or equal to zero. | No |
| | Note: If this field is not selected, the system displays only those bills where the amount is greater than zero. | |
| Postal | Used to indicate the postal or zip code. | No |

Note:

You must specify at least one search criterion while searching for a bill.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|---------------------|---|
| Bill Information | Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill. |
| Account Information | Displays additional information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective account. |

| Column Name | Column Description |
|-------------|---|
| Country | Displays the country name. |
| State | Displays the state where the county is located. |
| County | Displays the county name. |
| Postal | Displays the postal or zip code. |
| Entity ID | Displays the entity ID. |

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, this section contains the following button:

| Button Name | Button Description |
|-------------|---|
| Add | Used to add a bill to the hold request. |

A check box appears corresponding to each bill. On selecting the check box, you can add the bill to the hold request. You can also select multiple accounts at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the bills listed in the respective page to the hold request.

Defining an Entity for a Hold Request

Prerequisites

To define an entity for a hold request, you should have:

- Values defined for the values **HOLD_ENTITY_LVL_FLG** flag.

Procedure

To define an entity for a hold request:

1. Ensure that the **Hold Entities** section is expanded when you are defining or editing the hold request.

The **Hold Entities** section contains the following columns in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|--|-----------------------|
| Hold Entity ID | Used to specify the hold entity ID. Note: You can search for an entity ID by clicking the search (🔍) icon corresponding to the field <ul style="list-style-type: none"> • If the hold entity is selected as an account, you must specify the account ID in this field. • If the hold entity is selected as bill, you must specify the bill ID in this field. • If the hold entity is selected as person, you must specify the person ID in this field | Yes |
| Start Date | Used to specify the date from when you want to hold the entity. Note: By default, system date appears in this field The hold entity start date must be between the hold request start and end dates and between at least one process's start and end dates. The hold entity start date cannot be later than the hold entity end date. | Yes |
| End Date | Used to specify the date till when you want to hold the entity. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------|--|-----------------------|
| | <p>Note:</p> <p>The hold entity end date must be between hold request start and end dates and between the process's start and end dates.</p> <p>The hold entity end date cannot be earlier than the hold entity start date.</p> | |
| Hold Amount | <p>Displays the amount which is kept on hold.</p> <p>Note: This column appears when the hold entity is Bill.</p> | Not applicable |
| Hierarchy | <p>Used to associate the hold entity with the entity hierarchy relationship.</p> <p>Note: This field appears only when you select the Person option from the Entity list.</p> | No |

- Enter the required details in the **Hold Entities** section.
- If you want to define more than one entity for the hold request, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove an entity from the hold request, click the **Delete (🗑)** icon corresponding to the hold entity.

Editing a Hold Request

Procedure

To edit a hold request:

- Search for the hold request in the **Hold Request** screen.
- In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request whose details you want to edit.
The **Hold Request** screen appears.
- Click the **Edit** button in the **Hold Request** zone.

Note: The **Edit** button appears when the hold request is in the **Draft** or **Active** status.

The **Hold Request** screen appears. It contains the following sections:

- Main** — Used to specify basic details about the hold request. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------|---|-----------------------|
| Hold Request Information | Displays information about the hold request. | Not applicable |
| Hold Request Type | Displays the hold request type using which the hold request is created. | Not applicable |
| Start Date | Used to specify the date till when you want to hold the entity. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------|--|--|
| | <p>Note:</p> <p>The hold entity end date must be between hold request start and end dates and between the process's start and end dates.</p> <p>The hold entity end date cannot be earlier than the hold entity start date.</p> | |
| End Date | <p>Used to specify the date till when the hold request is effective.</p> <p>Note: The hold request end date cannot be earlier than the hold request start date.</p> | Yes |
| Hold Reason | <p>Used to indicate the reason why you want to hold the entity.</p> <p>Note: The hold reason must exist in the HOLD_REASON_FLG lookup field and its status must be Active.</p> | <p>Yes</p> <p>Note: This field cannot be edited if hold request is in Active status.</p> |
| Entity | Displays the hold entity. | Not applicable |
| Comments | Used to specify the additional information about hold request. | No |

- **Hold Processes** — Used to specify the processes on hold in the hold request. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------|---|-----------------------|
| Hold Process | Used to indicate the process that needs to be kept on hold. | Yes |
| Start Date | <p>Used to specify the date from when process is to be on hold for the hold request.</p> <p>Note:</p> <p>This field is not editable when hold request is in Active status.</p> <p>The hold process start date must be between the hold request start and end dates.</p> | Yes |
| End Date | Used to specify the date till when the hold process is to be on hold. | No |

- **Characteristics** — Used to define the characteristics for the hold request. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|--|
| Effective Date | Used to specify the date from when the characteristic is effective for the hold request. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the hold request. |
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Hold Request . | Note: This field is required when you are defining a characteristic for the hold request. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the hold request. |

- Modify the details of the hold request, if required.

Note:

If you want to specify more than one hold processes, click the **Add** (+) icon corresponding to the process and then specify the details.

However, if you want to remove a hold process from the hold request, click the **Delete** (🗑️) icon corresponding to the process.

- Define, edit, or remove characteristics of the hold request, if required.
- Click **Save**.

The changes made to the hold request are saved.

Submitting a Hold Request

Prerequisites

To submit a hold request, you should have:

- Hold Request Types, Hold Processes and Hold Entities defined in the request.

Procedure

To submit a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request that you want to submit.

The **Hold Request** screen appears.

3. Click the **Submit** button in the **Hold Request** zone.

The system behaves in the following manner:

| If... | Then |
|--|--|
| The Approval Required check box is selected in the hold request type using which the hold request is created. | A To Do of the C1-HLDAP To Do type is created and sent to the approver and the status of the hold request is changed to Approval In Progress . |
| The Approval Required check box is not selected in the hold request type using which the hold request is created. | The hold request is created using the specified hold request types and the status of the hold request is changed to Active or Deferred Processing as specified in the hold request type. |

Note:

The **Submit** button appears when the hold request is in the **Draft** status.

Once the request is activated, the **Release** button appears in the **Record Actions** section.

If hold request start date is in past and its status is draft then, on activation of the hold request, the start date is changed to the system date.

For Active hold request, **C1-DELBI** batch will delete all pending bill segments and bills under account for bill generation process.

For more information about the **Delete Pending Bill segments and Bills (C1-DELBI) batch**, refer to Oracle Revenue Management and Billing Batch Guide.

Rejecting a Hold Request

Prerequisites

To reject a hold request, you should have:

- Rejection reasons defined in the application

Note:

While rejecting a hold request, you need to specify the reason why you want to reject the hold request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-HoldRequest** business object in the **Status Reason** screen.

The system will not allow you to approve, reject or resubmit a hold request submitted by you.

Procedure

To reject a hold request:

- Do either of the following:

| If you want to | Then |
|--|--|
| Reject a hold request through the Hold Request screen | <ol style="list-style-type: none"> Search for the hold request in the Hold Request screen. In the Search Results section, click the link in the Hold Request Information column |

| If you want to | Then |
|---|--|
| | corresponding to the hold request which you want to review. |
| Reject a hold request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-HLDAP in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the hold request that you want to review. |

The **Hold Request** screen appears.

2. Review the hold request details.
3. Click the **Reject** button in the **Hold Request** zone.

The **Reject Hold Request** window appears. It contains following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | Used to indicate the reason why you want to reject the hold request. | Yes |
| Comments | Used to specify additional information while rejecting the hold request. | No |

Note: The **Reject** button appears when:

- The hold request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the hold request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the hold request is changed to **Rejected**.

| Hold Request screen | Hold Request (Used for Searching) on page 1925 |
| Hold Request zone | Hold Request on page 1933 |

Resubmitting a Hold Request

Prerequisites

To resubmit a hold request, you should have:

- Entities added in the hold request which is submitted for approval.

While resubmitting, To Do will be sent to the submitter of the request using the submitter To Do Role mapped on the hold request type and the request will be moved to Draft status. The submitter can do necessary changes and re submit the request. Log will be maintained when the approver sends the request back to submitter.

Procedure

To resubmit a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request that you want to resubmit.

The **Hold Request** screen appears.

3. Click the **Re Submit** button in the **Hold Request** zone.

The **Resubmit Hold Request** screen appears.

Note: The **Re Submit** button appears when the hold request is in the **Approval In Progress** status.

A To Do of the **C1-HOLSB** To Do type is created and sent to the request submitter using the submitter TO DO Role and the status of the hold request is changed to **Draft**.

4. Enter the comments in the respective field and click **Save**.

Viewing the Log of a Hold Request

Procedure

To view the log of a hold request:

1. Search for the hold request in the **Hold Request** screen.

- In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *hold* request whose log you want to view.

The **Hold Request** screen appears. It consists of the following tabs:

- Main** – Displays information about the hold request. It contains the following zones:

- Hold Request** – Displays the details of the hold request.
- Hold Entities** – Lists the hold entities records of the hold request.
- Search Account** – Searches the accounts to be put on hold.

Note: This zone appears when hold request is for **Account** and its status is **Draft**.

- Search Bill** – Searches the bills to be put on hold.

Note: This zone appears when hold request is for **Bill** and its status is **Draft**.

- Search Person** – Searches the persons to be put on hold.

Note: This zone appears when hold request is for **Person** and its status is **Draft**.

- Log** – Lists the complete trail of actions performed on the hold request. This tab contains the following zone:

- Hold Request Log** – Displays the trail of actions performed on the particular hold request.

- Click the **Log** tab.

The **Hold Request Log** zone in the **Log** tab contains the following columns:

| Column Name | Column Description |
|----------------|---|
| Date/Time | Displays the date and time when the action was performed on the hold request. |
| Details | Displays the details about the action performed on the hold request. |
| User | Indicates the user who has performed the action on the hold request. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the hold request. |
| Status Reason | Indicates the reason why the hold request was rejected or voided. |

Note: You can manually add a log entry for the hold request by clicking the **Add Log Entry** link in the upper right corner of the **Hold Request Log** zone.

Adding a Log Entry for a Hold Request

Procedure

To add a log entry for a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request whose log you want to edit.

The **Hold Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the hold request. It contains the following zones:

- **Hold Request** – Displays the details of the hold request.
- **Hold Entities** – Lists the hold entities records of the hold request.
- **Search Account** – Searches the accounts to be put on hold.

Note: This zone appears when hold request is for **Account** and its status is **Draft**.

- **Search Bill** – Searches the bills to be put on hold.

Note: This zone appears when hold request is for **Bill** and its status is **Draft**.

- **Search Person** – Searches the persons to be put on hold.

Note: This zone appears when hold request is for **Person** and its status is **Draft**.

- **Log** – Lists the complete trail of actions performed on the hold request. This tab contains the following zone:
 - **Hold Request Log** – Displays the trail of actions performed on the particular hold request.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Hold Request Log** zone.

The **Add Hold Request Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------|---|-----------------------|
| Hold Request Information | Displays information about the hold request. | Not applicable |
| Log Details | Used to specify additional comments for the hold request. | Yes |

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **Hold Request Log** zone.

Chapter 27

Delinquency Central

Topics:

- [Prerequisites](#)
- [Delinquency Central \(Used for Viewing\)](#)
- [Overdue Process Information for Account: {Account ID}](#)

Oracle Revenue Management and Billing provides a complete overview of the overdue bills belonging to the delinquent accounts of a particular person using the **Delinquency Central**. User can review the overdue bills and perform following actions from the delinquency central:

- Initiate customer contact
- Initiate hold on overdue process
- Create payment arrangement for an account
- Create promise to pay for person's account

The Delinquency Central assists you in identifying all the overdue processes, overdue bills & delinquent accounts using an overdue monitoring process.

For more information on how to setup the delinquency central, see [Prerequisites](#) on page 1966.

Related Topics

| Delinquency Central screen | Delinquency Central (Used for Viewing) on page 1966 |
| Overdue Process Information for Account: {Account ID} | Overdue Process Information for Account: {Account ID} on page 1973 |

Prerequisites

To setup delinquency central, you need to do the following:

- Define the required characteristic types where the characteristic entity is set to overdue event.
- Define the overdue event type and overdue process template in the system.
- Promise To Pay type defined in the application.
- Customer contact type defined in the application.
- Hold request type defined in the application.

Delinquency Central (Used for Viewing)

The **Delinquency Central** screen allows you to:

- Search for an overdue process
- View the details of an overdue process
- View the details of an overdue event
- Create customer contact
- Create a hold request for an overdue process
- Create a payment arrangement for an account
- Create a promise to pay for a person's account
- Create a payment agreement request for an account

This screen consists of the following zones:

- [Search Overdue Process](#) on page 1966
- [Overdue Events](#) on page 1971

Search Overdue Process

The **Search Overdue Process** zone allows you to search for overdue processes using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|-----------------------|
| Search By | Used to indicate whether you want to search for overdue processes using person, account, bill or overdue process. The valid values are: <ul style="list-style-type: none"> • Person • Account • Bill • Overdue Process | No |
| | Note: By default, the Person option is selected. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------|---|-----------------------|
| Person ID | Used to search for overdue processes which belong to a particular person. | No |
| | Note: This field appears when you select the Person option from the Search By list. | |
| Person Identifier Type | Used to search for overdue processes with a particular person identifier type. | Yes (Conditional) |
| | Note: This field appears when you select the Person option from the Search By list. | |
| Person Identifier | Used to search for overdue processes with a specific value of the person identifier type. | Yes |
| | Note: This field appears when you select the Person option from the Search By list. | |
| Account ID | Used to search for overdue processes created for a particular account. | No |
| | Note: This field appears when you select the Account option from the Search By list. | |
| Account Identifier Type | Used to search for overdue processes with a particular account identifier type. | Yes (Conditional) |
| | Note: This field appears when you select the Account option from the Search By list. | |
| Account Identifier | Used to search for overdue processes with a particular account identifier. | Yes |
| | Note: This field appears when you select the Account option from the Search By list. | |
| Bill ID | Used to search for overdue processes with a particular bill. | No |
| | Note: This field appears when you select the Bill option from the Search By list. | |
| Alternate Bill ID | Used to search for overdue processes using an alternate bill ID. | No |
| | Note: This field appears when you select the Bill option from the Search By list. | |
| Characteristic Type / Value | Used to search for overdue processes with a particular characteristic type and its value. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------|---|-----------------------|
| | Note: This field appears when you select the Bill option from the Search By list. | |
| Overdue Process Template | Used to search for overdue processes with a particular overdue process template. Note: This field appears when you select the Overdue Process option from the Search By list. | No |
| Start Date | Used to search for overdue processes with a particular start date. Note: This field appears when you select the Overdue Process option from the Search By list. | Yes |
| End Date | Used to search overdue process with a particular end date. Note: This field appears when you select the Overdue Process option from the Search By list. | Yes |
| Status | Used to search for overdue processes with a particular status. The valid values are: <ul style="list-style-type: none"> • Active • Inactive Note: This field appears when you select the Overdue Process option from the Search By list. | No |
| On Hold | Used to search for overdue processes that are on hold. Note: This field appears when you select the Overdue Process option from the Search By list. | No |
| Overdue Amount From | Used to search for overdue processes with a particular lower limit of the overdue amount. Note: This field appears when you select the Overdue Process option from the Search By list. | No |
| To | Used to search for overdue processes with a particular higher limit of the overdue amount. Note: This field appears when you select the Overdue Process option from the Search By list. | No |
| Characteristic Type / Value | Used to search for overdue processes with a particular characteristic type and value. Note: This field appears when you select the Overdue Process option from the Search By list. | No |

- In addition to above search parameters, the screen consists of following fields in the **Person Details** or **Account Details** section:

| Column Name | Column Description |
|------------------------------------|---|
| Main Customer | Displays the name of the main customer to whom the account belongs. |
| | Note: This field appears when you select the Account option from the Search By list. |
| Person Name | Displays the name of the person to whom the account belongs. |
| | Note: This field appears when you select the Person option from the Search By list. |
| Person Identifier Type | Displays the person identifier type. |
| | Note: This field appears when you select the Person or Account option from the Search By list. |
| Person Identifier | Displays the value of the person identifier type. |
| | Note: This field appears when you select the Person or Account option from the Search By list. |
| Account Identifier Type | Displays the account identifier type. |
| | Note: This field appears when you select the Account option from the Search By list. |
| Account Identifier | Displays the value of the account identifier type. |
| | Note: This field appears when you select the Account option from the Search By list. |
| Overdue | Displays whether the person account(s)/bill(s) are overdue. The valid values are: <ul style="list-style-type: none"> • Yes • No |
| | Note: This field appears when you select the Person or Account option from the Search By list. |
| Number of Active Overdue processes | Displays the number of overdue processes linked to the person's account that are in active status. |
| | Note: This field appears when you select the Person or Account option from the Search By list. |
| Number of Hold(s) on Account(s) | Displays the number of hold requests on the particular account. |
| Number of Overdue Bills | Displays the total number of bills that are overdue. |
| | Note: This field appears when you select the Person or Account option from the Search By list. |

| Column Name | Column Description |
|---|---|
| Total Overdue Amount | Displays the total overdue amount for an account. |
| Last Payment Date | Displays date of the last payment made by the person. Note: This field appears when you select the Person or Account option from the Search By list. |
| Last Payment Amount | Displays the amount last paid by the person. Note: This field appears when you select the Person or Account option from the Search By list. |
| Number Of Payment Arrangements | Displays the number of payment arrangements for the person's account. Note: This field appears when you select the Person or Account option from the Search By list. |
| Total Number of Overdue Process on Hold | Displays the total number of overdue process that are on hold. Note: This field appears when you select the Person or Account option from the Search By list. |
| Number of Promise To Pay | Displays the number of promise to pay belonging to the person. Note: This field appears when you select the Person or Account option from the Search By list. |
| Number of Broken Promise To Pay | Displays the total number of promise to pay that are broken. Note: This field appears when you select the Person or Account option from the Search By list. |

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|--------------------------|--|
| Overdue Process | Display additional information about the overdue process. Note: It has a link. On clicking the link, the Overdue Process screen appears where you can view the details of the overdue process. |
| Overdue Process Template | Displays the template that was used to create overdue process's events. |
| Account Information | Display additional information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Account screen appears with the details of the account. |
| Person Information | Display additional information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application. |

| Column Name | Column Description |
|-------------------------|--|
| | Note: It has a link. On clicking the link, the Person screen appears with the details of the person. |
| Overdue Amount | Displays the overdue amount under that overdue process. |
| On Hold | Displays whether the overdue process is on hold. |
| Overdue Process Details | On clicking the View () icon, the Overdue Process Details screen appears where you can view details of the overdue process. |

On clicking the **Broadcast** () icon corresponding to the overdue process, the **Overdue Events** zone appears with the details of the respective overdue process.

Searching for an Overdue Process

Prerequisites

To search for an overdue process, you should have:

- Overdue process defined in the application.

Procedure

To search for an overdue process:

1. Click the **Menu** link in the **Application** toolbar
2. From the **Main** menu, select **Delinquency Management** and then click **Delinquency Central**.
The **Delinquency Central** screen appears.
3. Enter the search criteria in the **Search Overdue Process** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of overdue processes that meet the search criteria appear in the **Search Results** section.

Person Information

The **Person Information** zone displays details of the person whose account is linked to the overdue process. This zone contains following columns:

| Column Name | Column Description |
|--------------|---|
| Person Name | Displays the name of the person whose account is linked to the overdue process. |
| Phone Number | Displays the phone number of the person. |
| Address | Displays the address of the person. |

Account Information

The **Account Information** zone displays the details of the account that is linked with the overdue process. This zone contains following columns:

| Column Name | Column Description |
|-------------------------|--|
| Account ID | Displays the account ID. |
| Account Identifier Type | Displays the account identifier type. |
| Account Identifier | Displays the value of the account identifier type. |
| Last Payment Date | Displays the date of the last payment made from the account that is linked with the overdue process. |
| Last Payment Amount | Displays the amount last paid from the account. |

Customer Contact Details

The **Customer Contact Details** zone displays the contact details of the customer whose account is linked with the overdue process. This zone contains following columns:

| Column Name | Column Description |
|------------------------------|--|
| Contact Date/Time | Displays the date and time when the customer was contacted. |
| Customer Contact Information | Displays additional information about the customer contact. Note: It has a link. On clicking the link, the Customer Contact screen appears where you can view the details of the respective customer contact. |
| Preferred Contact Method | Displays the preferred method of contacting the customer. |
| Comments | Displays the comments that are placed against each customer. |

Promise To Pay

The **Promise To Pay** zone displays promise to pay created for an account which is linked to the overdue process. This zone contains following columns:

| Column Name | Column Description |
|----------------------------|--|
| Promise To Pay Information | Displays additional information of promise to pay. Note: It has a link. On clicking the link, the Promise To Pay screen appears where you can view the details of promise to pay. |
| Scheduled Amount | Displays the amount to be paid on the Scheduled Date . |
| Scheduled Date | Displays the date when the payment is expected as per promise to pay. |

| Column Name | Column Description |
|-------------|--|
| Status | Displays the status of promise to pay. |
| Created By | Displays the user ID who has created the promise to pay. |

Hold Details

The **Hold Details** zone displays the details of the person whose account is linked to the overdue process. This zone contains the following columns:

| Column Name | Column Description |
|--------------------------|---|
| Hold Request Information | Displays additional information about the hold request. |
| | Note: It has a link. On clicking the link, the Hold Request screen appears where you can view the details of the hold request. |
| Status | Displays the status of the hold request. |
| Entity | Displays the hold request entity. |
| Entity Information | Displays the information about the entity on hold. |
| | Note: It has a link. On clicking the link, the Account, Bill or Person screen appears, where you can view details of the respective account, bill or person. |
| Start Date | Displays the date when the hold request is created. |
| End Date | Displays the end date of the hold request. |

Overdue Bills

The **Overdue Bills** zone displays details of the overdue bills. This zone contains following columns:

| Column Name | Column Description |
|----------------------|---|
| Bill Information | Displays additional information about the bill. |
| | Note: It has a link. On clicking the link, the Bill screen appears where you can view the details of the respective bill. |
| Original Bill Amount | Displays the bill amount when the bill was generated. |
| Due Date | Displays the due date of the bill. |
| Overdue Amount | Displays the amount that is overdue in the bill. |
| Days Past Due | Displays the number of days past after the bill date. |

Payment Arrangement

The **Payment Arrangement** zone displays the details of the payment arrangement that is created for an account linked to the overdue process. This zone contains following columns:

| Column Name | Column Description |
|----------------------|--|
| Contract Information | Displays the payment arrangement contract information . In addition, this column has a context menu which helps in navigating to other screens in the application. |

| Column Name | Column Description |
|------------------------|---|
| | Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract. |
| Payoff Balance | Displays the total amount that is paid against the payment arrangement contract. |
| Arrange Amount | Displays the amount that is paid in installments as per the payment arrangement contract. |
| Number of Installments | Displays the number of installments used to calculate the Arrange Amount . |

Search Bill

The **Search Bill** zone allows you to search for a bill. This zone contains the following fields:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------|--|-----------------------|
| Person Name | Used to specify the name of the person for whom the bill is generated. | No |
| Person ID | Used to specify the person ID. | No |
| Bills of Persons in Hierarchy | Used to indicate whether you want to search for a bills generated against a person's hierarchy. | No |
| Bill Cycle | Used to indicate bills where a particular bill cycle is defined. | No |
| Bill Currency | Used to indicate the bill currency. | No |
| Billing Method | Used to indicate the billing method. The valid values are: <ul style="list-style-type: none"> • Ad-Hoc Billing • Regular Billing | No |
| Bill ID | Used to specify the bill ID. | No |

Procedure

To create a payment arrangement for an overdue process:

1. Search for the overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the **Overdue Process Information** column for whom you want to create a payment arrangement for an overdue process.
3. Click the **Create Payment Arrangement** button.

The **Payment Arrangement** screen appears. It contains the following tabs:

- **Main**
- **History**

4. Enter the required details in the **Payment Arrangement** screen.
5. Click the **Save** button in the **Page Title** area of the **Payment Arrangement** screen.

A payment arrangement is created with the respective payment arrangement contract.

Note: The **Payment Arrangement** screen appears with the details of the payment arrangement.

Defining a Promise To Pay for an Overdue Process

Procedure

To create a promise to pay for an overdue process:

1. Search for the overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the **Overdue Process Information** column for whom you want to define a promise to pay for an overdue process.
3. Click the **Create Promise To Pay** button.

A message appears confirming that the promise to pay will be created for the account for which the overdue process is initiated.

4. Click **OK**.
- The **Promise To Pay** screen appears.
5. Enter the required details in the **Promise To Pay** screen.
6. Click the **Save** button in the **Page Title** area of the **Promise To Pay** screen.

A promise to pay is created with the scheduled payment details.

- [CSV File Format for Contract Rider Upload Request](#)
- [CSV File Format for Billable Charge Upload](#)
- [CSV File Format for Hold Upload Request](#)

Oracle Revenue Management and Billing provides a generic upload feature which enables you to upload various types of data. The system enables you to upload data for the following using the **Upload Request** feature:

- Billable Charge (Adhoc and Regular)
- Hold Request
- Refund Request
- Write Off Request
- Policy Reinstatement
- Bill Group Sort ID
- Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

It also enables you to update the following information:

- Contract rider of a contract
- Bill cycle of an account

While uploading data for the above supported entities, you need to specify the upload request type using which you want to upload the file. It is the upload request type which helps the system to determine:

- Whether the file must be approved by the approver before creating or updating the entities
- Which business object must be used for creating the upload request
- Which business object must be used for creating or updating entities through an upload request
- Which foreign key reference must be used for generating information string for the entity
- A set of fields using which you can search records uploaded through an upload request

You can upload a data file in the CSV format. You cannot upload data for more than one entity type through the same CSV file. For example, you cannot upload data for billable charges and hold requests using a single CSV file. An upload request of the specified upload request type is created when the file is successfully uploaded in the system. You can track a file through an upload request.

Once an upload request is created, the status of the upload request is set to **Draft**. The status of each record uploaded through an upload request is set to **Pending**. However, if the mandatory data is not available or data required for deriving

- [CSV File Format for Refund Request Upload](#)
- [CSV File Format for Write Off Request Upload](#)
- [CSV File Format for Reinstatement Upload Request](#)
- [CSV File Format for Bill Group Sorting Upload Request](#)
- [CSV File Format for Bill Group Derivation and Pricing Parameters Upload Request](#)
- [Upload Request Type](#)
- [Upload Request \(Used for Searching\)](#)
- [Upload Request \(Used for Viewing\)](#)

mandatory data is incorrect in the record, the status of record is set to **Invalid**. You can then edit, delete, or validate the upload request. During the validation process, the system and custom validations (if any) are executed. The status of each record is changed to **Valid** or **Invalid** depending on whether the record was validated successfully or not.

Once the upload request is validated, you can either cancel or submit the upload request for further processing. On submitting an upload request, the system checks whether the number of valid records in the uploaded file exceed the online record process limit defined in the Defer Upload Request algorithm. If the number of valid records in the uploaded file does not exceed the online record process limit, the system creates or updates the entities in the real time (i.e. immediately). However, if the number of valid records in the uploaded file exceeds the online record process limit, the system creates or updates the entities in the deferred mode (i.e. when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is invoked).

You can optionally configure the system to use the approval workflow process for an upload request. If the **Approval Required** flag is set to **Yes** in an upload request type, then on submitting the respective upload request, the approval workflow process creates a To Do for the approver to review the upload request. Once the approver approves the upload request, the system checks whether the number of valid records in the uploaded file exceed the online record process limit defined in the Defer Upload Request algorithm. If the number of valid records in the uploaded file does not exceed the online record process limit, the system creates or updates the entities in the real time (i.e. immediately). However, if the number of valid records in the uploaded file exceeds the online record process limit, the system creates or updates the entities in the deferred mode (i.e. when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is invoked. However, if the approver rejects the upload request, the status of the upload request is set to **Rejected**.

During the upload process, an upload request goes through various statuses in its lifecycle. Note that the lifecycle of an upload request is driven by the business object using which the upload request is created. In this release, we have shipped the following upload request business objects:

- Update Bill Cycle Upload Request (C1-BillCycleUpdateUplReq)
- Billable Charge Upload Request (C1-BillableChargeUploadRequest)
- Update Contract Rider Upload Request (C1-ContractRiderUpdateUplReq)
- Hold Request Upload Request (C1-HoldUploadRequest)
- Refund Request Upload Request (C1-RefundUploadRequest)
- Write Off Request Upload Request (C1-WriteOffUploadRequest)
- Reinstatement Upload Request (C1-ReinstatementUploadRequest)
- Bill Group Sorting Upload Request (C1-BillGrpSortUploadRequest)
- Bill Group Derivation and Pricing Parameters Upload Request(C1-BillLevelUploadRequest)

During the upload request process, an upload request creation goes through various statuses in its lifecycle. For more information about the upload request statuses, see [Upload Request \(Without Approval\) Status Transition](#) on page 1985 and [Upload Request \(With Approval\) Status Transition](#) on page 1986.

Note: The lifecycle of an upload request creation is driven by the respective business object using which the request is created. The upload request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the upload request process, see [Prerequisites](#) on page 1984.

Prerequisites

To setup the upload request process, you need to do the following:

- Define the required upload request types in the system.
- Define the required characteristic types where the characteristic entity is set to **Upload Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Upload Request**.
- Define the values for the following parameters in the **C1-REN-VALID** algorithm:
 - Policy Status after Processing Reinstatement Upload Request
 - Policy Reinstatement Status for Reason Verification
- Define the value for the **Online Record Process Limit** parameter in the **C1-DEFERUPLD** algorithm.
- Define the value for the **Policy Status after Processing Reinstatement Upload Request** parameter in the **C1-REN-PROC** algorithm.
- Assign the **C1-BCUUR** To Do type to a To Do role whose users must receive the To Do for approving a bill cycle update upload request.
- Assign the **C1-CRUUR** To Do type to a To Do role whose users must receive the To Do for approving a contract rider update upload request.
- Assign the **C1-HLDUR** To Do type to a To Do role whose users must receive the To Do for approving a hold upload request.
- Assign the **C1-REFUR** To Do type to a To Do role whose users must receive the To Do for approving a refund upload request.
- Assign the **C1-WOUR** To Do type to a To Do role whose users must receive the To Do for approving a write off upload request.
- Assign the **C1-BCUR** To Do type to a To Do role whose users must receive the To Do for approving a billable charge upload request.
- Assign the **C1-RPUR** To Do type to a To Do role whose users must receive the To Do for approving a reinstatement upload request.
- Create a To Do type named **C1-BGSRT** using the following information:
 - **Navigation Option** - c1upldrqTabMenu
 - **Sort Keys** - Define the following sort keys for the To Do type:

| Sort Key | Use as Default | Sort Order |
|-------------------|----------------|------------|
| Upload Request ID | Yes | Descending |

- **Drill Keys** - Define the following drill keys for the To Do type:

| Table Name | Field Name |
|---------------|-------------------|
| C1_UPLOAD_REQ | Upload Request ID |

- Assign the **C1-BGSRT** To Do type to a To Do role whose users must receive the To Do for approving a bill group sorting upload request.
- Create a To Do type named **C1-BGDVP** using the following information:
 - **Navigation Option** - c1upldrqTabMenu

- **Sort Keys** - Define the following sort keys for the To Do type:

| Sort Key | Use as Default | Sort Order |
|-------------------|----------------|------------|
| Upload Request ID | Yes | Descending |

- **Drill Keys** - Define the following drill keys for the To Do type:

| Table Name | Field Name |
|---------------|-------------------|
| C1_UPLOAD_REQ | Upload Request ID |

- Assign the **C1-BGDVP** To Do type to a To Do role whose users must receive the To Do for approving a bill group derivation and pricing parameters upload request.
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
 - Time Interval
 - Timer Active
 - User ID
 - Batch Language
 - Email Address

Upload Request (Without Approval) Status Transition

The following figure graphically indicates how an upload request moves from one status to another when the approval workflow is off:

Upload Request (With Approval) Status Transition

The following figure graphically indicates how an upload request moves from one status to another when the approval workflow is on:

Defer Upload Request Validation

Until now, the system enabled you to upload data for the following using the **Upload Request** feature:

- Billable Charge (Adhoc and Regular)

- Hold Request
- Refund Request
- Write Off Request
- Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

The system faced performance issues while validating a CSV file uploaded through the Upload Request feature when the CSV file had voluminous records. Therefore, now the system has introduced defer processing mechanism while validating a CSV file. The defer processing mechanism for the validation process is introduced for the following business objects:

- C1-BillableChargeUploadRequest
- C1-HoldUploadRequest
- C1-RefundUploadRequest
- C1-WriteOffUploadRequest
- C1-BillLevelUploadRequest

Two new statuses named **Validating** and **Deferred Validation** are added in the lifecycle of the above business objects. Now, when you click the **Validate** button, the system changes the status of the upload request to **Validating**. The system then invokes the **C1-DEFERVALD** algorithm which is attached to the **Validating** status. It checks whether the total number of records in the upload request exceeds the online record validate limit defined in the **C1-DEFERVALD** algorithm. If the total number of records in the upload request does not exceed the online record validate limit, all records in the upload request are validated immediately and its record status is changed to **Valid** or **Invalid** depending on whether it is successfully validated or not. Finally, the status of the upload request is changed to **Validated**.

However, if the total number of records in the upload request exceeds the online record validate limit, the status of the upload request is changed to **Deferred Validation**. On executing the **C1-UPLRQ** batch, the system checks whether there are any upload requests in the **Deferred Validation** status. If there is an upload request in the **Deferred Validation** status, all records in the upload request are validated in the deferred mode and its record status is changed to **Valid** or **Invalid** depending on whether it is successfully validated or not. Finally, the status of the upload request is changed to **Validated**.

Algorithms Used in C1-BillCycleUpdateUplReq

The following table lists the algorithms which are used in the lifecycle of the **C1-BillCycleUpdateUplReq** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|--------|--------------|--------------|----------------|--|
| Draft | Enter | C1-BCU-DERIV | C1-BCU-DERIV | <p>This algorithm reads the data in the BO_DATA_AREA column of the C1_UPL_REQUEST table and accordingly inserts the records in the C1_UPLOAD_REQ_DTLS table. In addition, the status of each record in the C1_UPLOAD_REQ_DTLS table is set to Pending.</p> <p>It derives the account ID using the account identifier type and account identifier combination whenever the account ID is not specified in the record. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS</p> |

| Status | System Event | Algorithm | Algorithm Type | Description |
|-----------|--------------|--------------|----------------|---|
| | | | | table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to Invalid . |
| Validated | Enter | C1-BCU-VALID | C1-BCU-VALID | <p>This algorithm is invoked when the user clicks the Validate button. It validates the records which are in the Pending status. It checks whether the account ID and bill cycle specified in the record are valid. If the account ID and bill cycle are valid and if the bill cycle is associated with the division to which the account belongs, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to Valid.</p> <p>If the account ID is invalid, it derives the account ID using the account identifier type and account identifier combination and updates the record accordingly. In addition, it changes the status of the record in the C1_UPLOAD_REQ_DTLS table to Valid. However, if the system could not derive the account ID using the account identifier type and account identifier combination, or if the bill cycle is invalid, or if the bill cycle is not associated with the division to which the account belongs, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to Invalid.</p> <p>It also checks whether there are two or more records with the same account ID. If so, it validates and changes the status of one record to Valid and the status of the remaining records is changed to Invalid.</p> |
| Submitted | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | <p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> • Next Status • Next Transition Condition <p>At a time, you can specify value for either the Next Status or Next</p> |

| Status | System Event | Algorithm | Algorithm Type | Description |
|----------------------|--------------|--------------|----------------|--|
| | | | | Transition Condition parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle. |
| Submitted | Enter | C1-UPLSUBENT | C1-UPLSUBENT | This algorithm is invoked when the user clicks the Submit button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to Approval In Progress . However, if the approval is not required for an upload request, the status of the upload request remains in the Submitted status. |
| Submitted | Enter | C1-DEFERUPLD | C1-DEFERUPLD | This algorithm is invoked when the status of the upload request is changed to Submitted or Approved . It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to Processing . However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to Deferred Processing . It contains the following parameter: <ul style="list-style-type: none"> • Online Record Process Limit <ul style="list-style-type: none"> – Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately). |
| Approval In Progress | Enter | C1-UPLAPPENT | C1-UPLAPPENT | This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type. |
| Approval In Progress | Exit | C1-UPLAPPEXT | C1-UPLAPPEXT | This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does |

| Status | System Event | Algorithm | Algorithm Type | Description |
|----------------------|--------------|--------------|----------------|---|
| | | | | not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request. |
| Approval In Progress | Exit | F1-TODOCOMPL | F1-TODOCOMPL | This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the Exclude To Do Entries From Auto Completion characteristic is defined for the business object, then the system does not automatically complete the respective To Do entry. |
| Approved | Enter | C1-DEFERUPLD | C1-DEFERUPLD | This algorithm is invoked when the status of the upload request is changed to Submitted or Approved . It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to Processing . However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to Deferred Processing . It contains the following parameter: <ul style="list-style-type: none"> • Online Record Process Limit – Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately). |
| Approved | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters: <ul style="list-style-type: none"> • Next Status • Next Transition Condition At a time, you can specify value for either the Next Status or Next Transition Condition parameter. If |

| Status | System Event | Algorithm | Algorithm Type | Description |
|---------------------|--------------|-------------|----------------|--|
| | | | | you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle. |
| Deferred Processing | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | <p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> • Next Status • Next Transition Condition <p>At a time, you can specify value for either the Next Status or Next Transition Condition parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p> |
| Processing | Enter | C1-BCU-PROC | C1-BCU-PROC | <p>This algorithm fetches a list of records which are in the Valid status. For each valid record, the system reads the account ID and bill cycle, and updates the bill cycle information of the account using the entity business object defined in the upload request type. If the record is successfully processed, the status of the record is changed to Processed. However, if the record could not be processed successfully due to any reason, the status of the record is changed to Error. Finally, the status of the upload request is changed to Processed.</p> |
| Processing | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | <p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> • Next Status • Next Transition Condition <p>At a time, you can specify value for either the Next Status or Next Transition Condition parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p> |

Algorithms Used in C1-ContractRiderUpdateUpReq

The following table lists the algorithms which are used in the lifecycle of the **C1-ContractRiderUpdateUpReq** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|-----------|--------------|-------------|----------------|---|
| Draft | Enter | C1-CR-DERIV | C1-CR-DERIV | <p>This algorithm reads the data in the BO_DATA_AREA column of the C1_UPL_REQUEST table and accordingly inserts the records in the C1_UPLOAD_REQ_DTLS table. In addition, the status of each record in the C1_UPLOAD_REQ_DTLS table is set to Pending.</p> <p>It derives the account ID using the account identifier type and account identifier combination whenever the account ID is not specified in the record. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to Invalid.</p> |
| Validated | Enter | C1-CR-VALID | C1-CR-VALID | <p>This algorithm is invoked when the user clicks the Validate button. It validates the records which are in the Pending status. It checks whether the account ID, contract ID, contract type, and bill factor specified in the record are valid. If the account ID, contract ID, contract type, and bill factor are valid, if the specified contract belongs to the account, and if the Contract Rider Applicability flag on the bill factor is set to Y, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to Valid.</p> <p>If the account ID is invalid, it derives the account ID using the account identifier type and account identifier combination and updates the record accordingly. In addition, it changes the status of the record in the C1_UPLOAD_REQ_DTLS table to Valid. However, if the system could not derive the account</p> |

| Status | System Event | Algorithm | Algorithm Type | Description |
|-----------|--------------|--------------|----------------|--|
| | | | | <p>ID using the account identifier type and account identifier combination, or if the bill factor is invalid, or if the specified contract does not belong to the account, or if the Contract Rider Applicability flag on the bill factor is set to N, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to Invalid.</p> <p>It also checks whether there are two or more records with the same account ID and contract type combination. If so, it validates and changes the status of one record to Valid and the status of the remaining records is changed to Invalid.</p> |
| Submitted | Enter | C1-UPLSUBENT | C1-UPLSUBENT | <p>This algorithm is invoked when the user clicks the Submit button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to Approval In Progress. However, if the approval is not required for an upload request, the status of the upload request remains in the Submitted status.</p> |

C1-BLSRTUPLD

This algorithm reads the data in the **BO_DATA_AREA** column of the **C1_UPL_REQUEST** table and accordingly inserts the records in the **C1_UPLOAD_REQ_DTLS** table. In addition, the status of each record in the **C1_UPLOAD_REQ_DTLS** table is set to **Pending**.

C1-BLSRTDERV

This algorithm reads the data in the **BO_DATA_AREA** column of the **C1_UPLOAD_REQ_DTLS** table and then derives the bill group (person) ID using the bill group (person) identifier type and bill group (person) identifier combination whenever the bill group ID is not specified in the record. Once the bill group ID is derived, the corresponding record is updated in the **C1_UPLOAD_REQ_DTLS** table. If the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination, the status of the record in the **C1_UPLOAD_REQ_DTLS** table is changed to **Invalid**.

C1-BLSRTVALD

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It checks the following:

- The parent customer's person type is set to **Parent Customer** in the system.

- All mandatory information is available in the bill group sort record.
- The end date is not earlier than the start date and the start date is not later than the end date.
- Either the bill group (person) identifier type and bill group (person) identifier or the bill group (person) ID is available in the bill group sort record.
- The bill group identifier type is available when the bill group identifier is specified and vice versa.
- A bill group with the specified bill group ID exists in the system.
- The bill group is the child person of the parent customer.
- The bill group's person type is set to **Bill Group** in the system.
- The relationship between the bill group and parent customer is effective on the system date.
- The bill group is related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration.
- A duplicate record with the bill group ID and sort ID combination does not exist in the **C1_BILL_LVL** table.
- A duplicate record with the bill group ID and sort ID combination does not exist in the **C1_UPLOAD_REQ_DTLS** table.

If the above mentioned validations are successful, the status of the record in the **C1_UPLOAD_REQ_DTLS** table is changed to **Valid**. However, if any of the above validation fails, the status of the record in the **C1_UPLOAD_REQ_DTLS** table is changed to **Invalid**.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for an upload request, the status of the upload request remains in the **Submitted** status.

C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** – Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).

C1-UPLAPPENT

This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type.

C1-UPLAPPEXT

This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

F1-TODOCOMPL

This algorithm type completes the To Do entries that are linked to an object when the object exits the given status.

It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

C1-BLSRTPROC

This algorithm fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the bill group (person) ID and sort ID, it creates one bill group sort record using the entity business object defined in the upload request type. If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Algorithms Used in C1-BillLevelUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-BillLevelUploadRequest** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|-------------------|--------------|--------------|----------------|---|
| Draft | Enter | C1-BLVUPLDTL | C1-BLVUPLDTL | Refer to C1-BLVUPLDTL on page 2021. |

| Processing | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | Refer to F1-AT-RQJ on page 1659. |
| Processing | Enter | C1-BLVLVLPPO | C1-BLVLVLPPO | Refer to C1-BLVLVLPPO on page 2023. |
| Processed | — | — | — | — |

C1-BLVUPLDTL

This algorithm reads the data in the **BO_DATA_AREA** column of the **C1_UPL_REQUEST** table and accordingly inserts the records in the **C1_UPLOAD_REQ_DTLS** table. In addition, the status of each record in the **C1_UPLOAD_REQ_DTLS** table is set to **Pending**.

C1-BLVLDERIV

This algorithm reads the data in the **BO_DATA_AREA** column of the **C1_UPLOAD_REQ_DTLS** table and then derives the bill group (person) ID using the bill group (person) identifier type and bill group (person) identifier combination whenever the bill group ID is not specified in the record. Once the bill group ID is derived, the corresponding record is updated in the **C1_UPLOAD_REQ_DTLS** table. If the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination, the status of the record in the **C1_UPLOAD_REQ_DTLS** table is changed to **Invalid**.

C1-BLVLVALID

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It checks the following:

- The parent customer's person type is set to **Parent Customer** in the system.
- All mandatory information is available in the bill group derivation and pricing parameters record.
- Either the bill group (person) identifier type and bill group (person) identifier or the bill group (person) ID is available in the bill group derivation and pricing parameters record.
- The bill group identifier type is available when the bill group identifier is specified and vice versa.
- The number of characters specified in each field does not exceed the maximum field length.
- A bill group with the specified bill group ID exists in the system.
- The bill group is the child person of the parent customer.
- The bill group's person type is set to **Bill Group** in the system.
- The relationship between the bill group and parent customer is effective on the system date.
- The bill group is related to the parent customer using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration.

- A duplicate record with the source system, parameter 1, parameter 2, parameter 3, parameter 4, and effective date combination does not exist in the **C1_BILL_LVL** table.
- A duplicate record with the source system, parameter 1, parameter 2, parameter 3, parameter 4, and effective date combination does not exist in the **C1_UPLOAD_REQ_DTLS** table.
- The source system exists in the extendable lookup which is specified in the **Source System Extendable Lookup** parameter.
- The bill group sort record with the bill group ID and sort ID combination already exists in the system.
- The effective date specified in the record is within the date range of the effective bill group sort record.

If the above mentioned validations are successful, the status of the record in the **C1_UPLOAD_REQ_DTLS** table is changed to **Valid**. However, if any of the above validation fails, the status of the record in the **C1_UPLOAD_REQ_DTLS** table is changed to **Invalid**.

It contains the following parameter:

- **Source System Extendable Lookup** – Used to specify the source system extendable lookup business object. The bill group derivation and pricing parameters records should contain the source system which is already defined in this extendable lookup.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for an upload request, the status of the upload request remains in the **Submitted** status.

C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** – Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).

C1-UPLAPPENT

This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type.

C1-UPLAPPEXT

This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

F1-TODOCOMPL

This algorithm type completes the To Do entries that are linked to an object when the object exits the given status.

It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

C1-BLVLVLPRO

This algorithm fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the source system, parameter 1, parameter 2, parameter 3, parameter 4, and effective date, it creates one bill group derivation and pricing parameters record using the entity business object defined in the upload request type. If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

CSV File Format for Account Bill Cycle Upload Request

Before uploading the account bill cycle file, you need to ensure that the CSV file contains the following columns:

| Column Name | Description | Mandatory (Yes or No) |
|-------------------------|---|---|
| Account Identifier Type | Used to specify the account identifier type. | Yes (Conditional) Note: This data is required when the account ID is not specified. |
| Account Identifier | Used to specify the identifier of the account whose bill cycle you want to update. | Yes (Conditional) Note: This data is required when the account ID is not specified. |
| Account ID | Used to indicate the account whose bill cycle you want to update. Note: If you do not specify the account ID, the system derives the account ID using the account identifier type and account identifier combination. | No |
| Bill Cycle | Used to specify the bill cycle. Note: You must specify a valid bill cycle which is associated with the division to which the account belongs. | Yes |

CSV File Format for Contract Rider Upload Request

Before uploading a contract rider file, you need to ensure that the CSV file contains the following columns:

| Column Name | Description | Mandatory (Yes or No) |
|-------------------------|--|--|
| Account Identifier Type | Used to specify the account identifier type. | Yes (Conditional) Note: This data is required when the account ID and contract ID are not specified. |
| Account Identifier | Used to specify the identifier of the account whose contract you want to update. | Yes (Conditional) Note: This data is required when the account ID and contract ID are not specified. |
| Account ID | Used to indicate the account whose contract you want to update. | Yes (Conditional) Note: This data is required when the account identifier type, account identifier, and contract ID are not specified. |
| Contract Type | Used to indicate the type of the contract whose details you want to update. Note: You must specify a contract type which already exists in the system. | Yes (Conditional) Note: This data is required when the contract ID is not specified. |
| Contract ID | Used to indicate the contract whose contract rider information you want to update. Note: If you do not specify the contract ID, the system derives the active contract using the account ID and contract type combination. | No |
| Start Date | Used to specify the date from when the bill factor is effective for the contract. Note: The start date cannot be later than the end date. | Yes |
| End Date | Used to specify the date till when the bill factor is effective for the contract. Note: The end date cannot be earlier than the start date. | No |
| Bill Factor | Used to specify the bill factor. | Yes |

| Column Name | Description | Mandatory (Yes or No) |
|-------------|---|-----------------------|
| | Note: You must specify a valid bill factor where the Contract Rider Applicability flag is set to Y . | |

CSV File Format for Billable Charge Upload

Before uploading a billable charge file, you need to ensure that the CSV file contains the following columns:

| Column Name | Description | Mandatory (Yes or No) |
|-------------------------|---|---|
| Account Identifier Type | Used to specify the account identifier type. | Yes (Conditional) Note: This data is required when the Account ID is not specified. |
| Account Identifier | Used to specify the account identifier of the account for which you want to create the billable charge. | Yes (Conditional) Note: This data is required when the Account ID is not specified. |
| Account ID | Used to specify the account for which you want to create the billable charge. | Yes (Conditional) Note: This data is required when the Account Identifier Type and Account Identifier is not specified. |
| Contract ID | Used to specify the contract against which you want to create the billable charge. | Yes (Conditional) Note: This data is required when you want to create the billable charge against a specific contract on the account. If this data is not specified then billable charge is created against a contract with highest priority. |
| Start Date | Used to specify the start date of billable charge. | Yes |
| End Date | Used to specify the end date of billable charge. | Yes |
| Charge Type | Used to specify the charge type for which you want to create a billable charge. | No |
| Description On Bill | Used to specify description for a billable charge. | Yes |
| Recurring Flag | Used to indicate whether recurring bill segments must be created at the intervals defined in the bill period or at the set policy invoice frequency. The valid values are: <ul style="list-style-type: none"> BP | Yes (Conditional) Note: This data is required if Frequency or Bill Period is specified. |

| Column Name | Description | Mandatory (Yes or No) |
|---|--|--|
| | <ul style="list-style-type: none"> FR | |
| Frequency | Used to specify the invoice frequency at which the recurring bill segments must be created. | Yes (Conditional) Note: This data is required if Recurring Flag is FR. |
| Bill Period | Used to specify the bill period that you want to use for specifying the intervals at which the recurring bill segments must be created. | Yes (Conditional) Note: This data is required if Recurring Flag is BP. |
| Bill After | Used to specify the date after which the bill must be generated for the billable charge. | No |
| Adhoc Bill | Used to indicate whether the billable charge should be considered during adhoc or regular billing. | No |
| Description on Bill1, Description on Bill2,, Description on Bill5 | Used to specify description for the billable charge lines. | Yes (Conditional) Note: This data is required when the charge amount is specified. |
| Currency1, Currency2,, Currency5 | Used to specify the currency in which the amount is charged. Note: If you specify a currency other than the account's invoice currency, the system will do the currency conversion if the appropriate exchange rate is available in the system. | Yes (Conditional) Note: This data is required when the charge amount is specified. |
| Amount1, Amount2,, Amount5 | Used to specify the charge amount. | Yes (Conditional) Note: This data is required when the description on bill or currency is specified. |
| Show On Bill1, Show on Bill2,, Show On Bill5 | Used to indicate whether the charge should appear on the person's printed bill or not. The valid values are: <ul style="list-style-type: none"> true false Note: By default, the value will be set to true if the column does not contain any value. | No |
| Summary1, Summary2,, Summary5 | Used to indicate whether the charge should be included in the summary line or not. The valid value are: <ul style="list-style-type: none"> true false Note: By default, the value will be set to true if the column does not contain any value. | No |

| Column Name | Description | Mandatory (Yes or No) |
|---|---|---|
| Memo Only1, Memo Only2,, Memo Only5 | Used to indicate whether the charge should be included in the bill amount or not. The valid values are: <ul style="list-style-type: none"> true false | No |
| | Note: By default, the value will be set to false if the column does not contain any value. | |
| GL Distribution Code1, GL Distribution Code2,, GL distribution Code5 | Used to specify the distribution code which indicates the GL account associated with the charge. | Yes (Conditional) |
| | | Note: This data is required when false is specified in the Memo Only column corresponding to the bill line description. |
| Price Item | Used to specify the price item code. | Yes (Conditional) |
| | | Note: This data is required when Variance Parameter or, Price Item Parameter and Price Item Parameter Value is specified. |
| Variance Parameter | Used to indicate the variance that must be used along with the price item for determining the price item pricing. | Yes (Conditional) |
| | | Note: This data is required when Price Item is specified and Price Item Parameter and Price Item Parameter Value are not specified. |
| Price Item Parameter1, Price Item Parameter2,, Price Item Parameter15 | Used to indicate the price item parameter that must be used along with the price item for determining the price item pricing. | Yes (Conditional) |
| | Note: If the data in these columns will be used for price item parameter mapping, you must not use the equal to (=) and tilde (~) symbols in these columns. | Note: This data is required when Price Item is specified and Variance Parameter is not specified. |
| Price Item Parameter Value1, Price Item Parameter Value2,, Price Item Parameter Value15 | Used to specify the parameter value. | Yes (Conditional) |
| | Note: If the data in these columns will be used for price item parameter mapping, you must not use the equal to (=) and tilde (~) symbols in these columns. | Note: This data is required when Price Item is specified and Variance Parameter is not specified. |
| SQI1, SQI2,, SQI5 | Used to indicate the service quantity identifier that must be used for calculating the price item charges. | Yes (Conditional) |
| | | Note: This data is required when the service quantity is specified. |

| Column Name | Description | Mandatory (Yes or No) |
|---|---|--|
| SQI Value1, SQI Value2,, SQI Value5 | Used to specify the number of units of the service quantity. | Yes (Conditional) Note: This data is required when the SQI is specified. |
| Effective Date1, Effective Date2,, Effective Date20 | Used to indicate the effective date of the characteristics. | Yes (Conditional) Note: This data is required when Char Type or Char Val is specified. |
| Char Type1, Char Type2,, Char Type20 | Used to indicate the characteristic that must be defined for the billable charge. | Yes (Conditional) Note: This data is required when Effective Date or Char Val is specified. |
| Char Value1, Char Value2,, Char Value20 | Used to specify the value of the characteristic type. | Yes (Conditional) Note: This data is required when Effective Date or Char Type is specified. |

CSV File Format for Hold Upload Request

Before uploading a hold request file, you need to ensure that the CSV file contains the following columns:

| Column Name | Description | Mandatory (Yes or No) |
|-------------------|---|-----------------------|
| Hold Request Type | Used to specify the hold request type. Note: You must specify a valid hold request type which is in the Active status. | Yes |
| Start Date | Used to specify the date from when the hold request is effective. Note: The hold request start date cannot be later than the hold request end date. | Yes |
| End Date | Used to specify the date till when the hold request is effective. Note: The hold request end date cannot be earlier than the hold request start date. | Yes |
| Hold Reason | Used to indicate the reason why you want to hold the entity. Note: The hold reason must exist in the HOLD_REASON_FLG lookup field and its status must be Active . | Yes |

| Column Name | Description | Mandatory (Yes or No) |
|-------------------------|---|---|
| Hold Entity | Used to indicate the type of the entity for which you want to create the hold request. The valid values are: <ul style="list-style-type: none"> • ACCT • BILL • PERS | Yes |
| Account Identifier Type | Used to specify the account identifier type. | Yes (Conditional) Note: This data is required when the hold entity is ACCT and the entity ID is not specified. |
| Account Identifier | Used to specify the identifier of the account for which you want to create the hold request. | Yes (Conditional) Note: This data is required when the hold entity is ACCT and the entity ID is not specified. |
| Person Identifier Type | Used to specify the person identifier type. | Yes (Conditional) Note: This data is required when the hold entity is PERS and the entity ID is not specified. |
| Person Identifier | Used to specify the identifier of the person for which you want to create the hold request. | Yes (Conditional) Note: This data is required when the hold entity is PERS and the entity ID is not specified. |
| Hold Entity ID | Used to specify the entity ID. Note: If the hold entity is ACCT , you must specify the account ID in this field. If the hold entity is PERS , you must specify the person ID in this field. And, if the hold entity is BILL , you must specify the bill ID in this field. If you do not specify the account ID, the system derives the account ID using the account identifier type and account identifier combination. Similarly, if you do not specify the person ID, the system derives the person ID using the person identifier type and person identifier combination. | Yes (Conditional) Note: This data is required when the hold entity is BILL . |
| Comments | Used to specify additional information about the hold request. | No |
| Hold Entity Start Date | Used to specify the date from when you want to hold the entity. | Yes |

| Column Name | Description | Mandatory (Yes or No) |
|-------------------------|---|---|
| | <p>Note:</p> <p>The hold entity start date must be between the hold request start and end dates and between at least one process's start and end dates.</p> <p>The hold entity start date cannot be later than the hold entity end date.</p> | |
| Hold Entity End Date | <p>Used to specify the date till when you want to hold the entity.</p> <p>Note:</p> <p>The hold entity end date must be between hold request start and end dates and between the process's start and end dates.</p> <p>The hold entity end date cannot be earlier than the hold entity start date.</p> | No |
| Hold Funding | <p>Used to indicate whether you want to hold the funding process for the entity. The valid values are:</p> <ul style="list-style-type: none"> • Y • N <p>Note: You can hold the funding process when the hold entity is PERS or BILL.</p> | No |
| Hold Funding Start Date | <p>Used to specify the date from when you want to hold the funding process.</p> <p>Note:</p> <p>The hold funding start date must be between the hold request start and end dates.</p> <p>The hold funding start date cannot be later than the hold funding end date.</p> | Yes (Conditional) |
| | | Note: This data is required when the funding process must be kept on hold. |
| Hold Funding End Date | <p>Used to specify the date till when you want to hold the funding process.</p> <p>Note:</p> <p>The hold funding end date must be between the hold request start and end dates.</p> <p>The hold funding end date cannot be earlier than the hold funding start date.</p> | No |
| Hold Overdue | <p>Used to indicate whether you want to hold the overdue process for the entity. The valid values are:</p> <ul style="list-style-type: none"> • Y | No |

| Column Name | Description | Mandatory (Yes or No) |
|---------------------------------|---|---|
| | <ul style="list-style-type: none"> N | |
| Hold Overdue Start Date | <p>Used to specify the date from when you want to hold the overdue process.</p> <p>Note:</p> <p>The hold overdue start date must be between the hold request start and end dates.</p> <p>The hold overdue start date cannot be later than the hold overdue end date.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required when the overdue process must be kept on hold.</p> |
| Hold Overdue End Date | <p>Used to specify the date till when you want to hold the overdue process.</p> <p>Note:</p> <p>The hold overdue end date must be between the hold request start and end dates.</p> <p>The hold overdue end date cannot be earlier than the hold overdue start date.</p> | No |
| Hold Bill Generation | <p>Used to indicate whether you want to hold the bill generation process for the entity. The valid values are:</p> <ul style="list-style-type: none"> Y N | No |
| Hold Bill Generation Start Date | <p>Used to specify the date from when you want to hold the bill generation process.</p> <p>Note:</p> <p>The hold bill generation start date must be between the hold request start and end dates.</p> <p>The hold bill generation start date cannot be later than the hold bill generation end date.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required when the bill generation process must be kept on hold.</p> |
| Hold Bill Generation End Date | <p>Used to specify the date till when you want to hold the bill generation process.</p> <p>Note:</p> <p>The hold bill generation end date must be between the hold request start and end dates.</p> <p>The hold bill generation end date cannot be earlier than the hold bill generation start date.</p> | No |
| Hold Auto Pay | <p>Used to indicate whether you want to hold the automatic payment process for the entity. The valid values are:</p> <ul style="list-style-type: none"> Y | No |

| Column Name | Description | Mandatory (Yes or No) |
|--|---|---|
| | <ul style="list-style-type: none"> N | |
| Hold Autopay Start Date | <p>Used to specify the date from when you want to hold the automatic payment process.</p> <p>Note: The hold autopay start date must be between the hold request start and end dates. The hold autopay start date cannot be later than the hold autopay end date.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required when the automatic payment process must be kept on hold.</p> |
| Hold Autopay End Date | <p>Used to specify the date till when you want to hold the automatic payment process.</p> <p>Note: The hold autopay end date must be between the hold request start and end dates. The hold autopay end date cannot be earlier than the hold autopay start date.</p> | No |
| Effective Date1, Effective Date2,, Effective Date5 | Used to specify the date from when the characteristic is effective for the hold request. | <p>Yes (Conditional)</p> <p>Note: This data is required when the characteristic type or characteristic value is specified.</p> |
| Char Type1, Char Type2,, Char Type5 | <p>Used to indicate the characteristic that must be defined for the hold request.</p> <p>Note: You must specify a characteristic type where the characteristic entity is set to Hold Request.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required when the effective date or characteristic value is specified.</p> |
| Char Val1, Char Val2,, Char Val5 | Used to specify the value for the characteristic type. | <p>Yes (Conditional)</p> <p>Note: This data is required when the effective date or characteristic type is specified.</p> |

CSV File Format for Refund Request Upload

Before uploading a refund request file, you need to ensure that the CSV file contains the following columns:

| Column Name | Description | Mandatory (Yes or No) |
|---------------------|--|-----------------------|
| Refund Request Type | Used to specify the refund request type. | Yes |

| Column Name | Description | Mandatory (Yes or No) |
|--|--|--|
| Account Identifier Type | Used to specify the account identifier type. | Yes (Conditional) Note: This data is required when the Account ID is not specified. |
| Account Identifier | Used to specify the account identifier of the account for which you want to create the refund request. | Yes (Conditional) Note: This data is required when the Account ID is not specified. |
| Account ID | Used to specify the account for which you want to create the refund request. | Yes (Conditional) Note: This data is required when the Account Identifier Type and Account Identifier are not specified. |
| Entity Type | Used to specify the entity type. | Yes |
| Entity ID | Used to specify the entity ID. | Yes |
| Adjustment Type | Used to specify the adjustment type using which the refund adjustments are created. | No |
| Refund Amount | Used to specify the amount that you want to refund. | Yes |
| Comments | Used to specify the comments which are added on the refund request. | No |
| Effective Date1, Effective Date2,, Effective Date5 | Used to indicate the effective date of the characteristics. | Yes (Conditional) Note: This data is required when Char Type or Char Val is specified. |
| Char Type1, Char Type2,, Char Type5 | Used to indicate the characteristic that must be defined for the refund request. | Yes (Conditional) Note: This data is required when Effective Date or Char Val is specified. |
| Char Val1, Char Val2,, Char Val5 | Used to specify the value of the characteristic type. | Yes (Conditional) Note: This data is required when Effective Date or Char Type is specified. |

CSV File Format for Write Off Request Upload

Before uploading a write off request file, you need to ensure that the CSV file contains the following columns:

| Column Name | Description | Mandatory (Yes or No) |
|--|---|--|
| Write Off Request Type | Used to specify the write off request type. | Yes |
| Account Identifier Type | Used to specify the account identifier type. | Yes (Conditional) Note: This data is required when the Account ID is not specified. |
| Account Identifier | Used to specify the account identifier of the account for which you want to create the write off request. | Yes (Conditional) Note: This data is required when the Account ID is not specified. |
| Account ID | Used to specify the account for which you want to create the write off request. | Yes (Conditional) Note: This data is required when the Account Identifier Type and Account Identifier are not specified. |
| Entity Type | Used to specify the entity type. | Yes |
| Entity ID | Used to specify the entity ID. | Yes |
| Adjustment Type | Used to specify the adjustment type using which the write off adjustments are created. | No |
| Write Off Amount | Used to specify the amount that you want to write off. | Yes |
| Comments | Used to specify the comments which are added on the write off request. | No |
| Effective Date1, Effective Date2,, Effective Date5 | Used to indicate the effective date of the characteristics. | Yes (Conditional) Note: This data is required when Char Type or Char Val is specified. |
| Char Type1, Char Type2,, Char Type5 | Used to indicate the characteristic that must be defined for the write off request. | Yes (Conditional) Note: This data is required when Effective Date or Char Val is specified. |
| Char Val1, Char Val2,, Char Val5 | Used to specify the value of the characteristic type. | Yes (Conditional) Note: This data is required when Effective Date or Char Type is specified. |

CSV File Format for Reinstatement Upload Request

Before uploading a policy reinstatement file, you need to ensure that the CSV file contains the following columns:

| Column Name | Description | Mandatory (Yes or No) |
|----------------------|--|---|
| Policy ID | Used to indicate the policy which you want to reinstate. | No |
| | Note: If you do not specify the policy ID, the system derives the policy ID using the source system and policy number combination. | |
| Source System | Used to indicate the external system from where the policy is originated. | Yes (Conditional) |
| | | Note: This data is required when the policy ID is not specified. |
| Policy Number | Used to indicate the policy number. | Yes (Conditional) |
| | | Note: This data is required when the policy ID is not specified. |
| Reinstatement Reason | Used to indicate the reason why you want to reinstate the policy. | Yes |
| | Note: You must specify a reason which is defined for the status specified in the Policy Reinstatement Status for Reason Verification parameter of the C1-REN-VALID algorithm. | |

CSV File Format for Bill Group Sorting Upload Request

Before uploading a bill group sorting file, you need to ensure that the CSV file contains the following values in the specified order separated by a comma:

| Sr. No. | Value | Description | Mandatory (Yes or No) |
|---------|----------------------------|---|---|
| 1 | Bill Group ID | Used to indicate the bill group (i.e. person) for whom you want to define the sort ID. | Yes (Conditional) |
| | | Note: You must specify an effective child person of the parent customer for whom you are creating the bill group sorting upload request. In addition, note that you must specify a child person whose person type is set to Bill Group and who is related to the parent customer using a relationship type which is specified in the Person Relationship Type option type of the C1-ASOBLLNG feature configuration. | Note: This data is required when the bill group (i.e. person) identifier type and bill group (i.e. person) identifier are not specified. |
| 2 | Bill Group Identifier Type | Used to specify the bill group (i.e. person) identifier type. | Yes (Conditional) |
| | | | Note: This data is required when the bill group (i.e. person) ID is not specified. |

| Sr. No. | Value | Description | Mandatory (Yes or No) |
|---------|-----------------------|---|---|
| 3 | Bill Group Identifier | Used to specify identifier of the bill group (i.e. person) for whom you want to define the sort ID. | Yes (Conditional) |
| | | | Note: This data is required when the bill group (i.e. person) ID is not specified. |
| 4 | Sort ID | Used to specify the sort ID. | Yes |
| 5 | Description | Used to specify the description for the sort ID. | Yes |
| 6 | Start Date | Used to specify the date from when the sort ID is effective for the bill group. | Yes |
| | | Note: The start date cannot be later than the end date. | |
| 7 | End Date | Used to specify the date till when the sort ID is effective for the bill group. | No |
| | | Note: The end date cannot be earlier than the start date. | |

CSV File Format for Bill Group Derivation and Pricing Parameters Upload Request

Before uploading a bill group derivation and pricing parameters file, you need to ensure that the CSV file contains the following values in the specified order separated by a comma:

| Sr. No. | Value | Description | Mandatory (Yes or No) |
|---------|---------------|--|-----------------------|
| 1 | Source System | Used to indicate the source system from where the claim and enrollment transactions are received. | Yes |
| | | Note: You must specify a source system which already exists in the extendable lookup which is specified in the Source System Extendable Lookup parameter of the C1-BLVLVALID algorithm. | |
| 2 | Parameter 1 | Used to specify the employee attribute based on which you want to derive the bill group. | Yes |
| | | Note: You must not specify the ampersand (&) character in the parameter 1. | |
| 3 | Parameter 2 | Used to specify the employee attribute based on which you want to derive the bill group. | No |
| | | Note: You must not specify the ampersand (&) character in the parameter 2. | |
| 4 | Parameter 3 | Used to specify the employee attribute based on which you want to derive the bill group. | No |

| Sr. No. | Value | Description | Mandatory (Yes or No) |
|---------|----------------------------|--|--|
| | | Note: You must not specify the ampersand (&) character in the parameter 3. | |
| 5 | Parameter 4 | Used to specify the employee attribute based on which you want to derive the bill group. Note: You must not specify the ampersand (&) character in the parameter 4. | No |
| 6 | Effective Date | Used to specify the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination. Note: The effective date must be within the date range of the sort ID defined for the bill group. | Yes |
| 7 | Bill Group ID | Used to indicate the bill group (i.e. person) for whom you want to define the derivation and pricing parameters. Note: You must specify an effective child person of the parent customer for whom you are creating the bill group derivation and pricing parameters upload request. In addition, note that you must specify a child person whose person type is set to Bill Group and who is related to the parent customer using a relationship type which is specified in the Person Relationship Type option type of the C1-ASOBLNG feature configuration. | Yes (Conditional) Note: This data is required when the bill group (i.e. person) identifier type and bill group (i.e. person) identifier are not specified. |
| 8 | Bill Group Identifier Type | Used to specify the bill group (i.e. person) identifier type. | Yes (Conditional) Note: This data is required when the bill group (i.e. person) ID is not specified. |
| 9 | Bill Group Identifier | Used to specify identifier of the bill group (i.e. person) for whom you want to define the derivation and pricing parameters. | Yes (Conditional) Note: This data is required when the bill group (i.e. person) ID is not specified. |
| 10 | Sort ID | Used to indicate the sort ID of the bill group for which you want to define the derivation and pricing parameters. | Yes |

Upload Request Type

Oracle Revenue Management and Billing allows you to define an upload request type using which you can upload a file. An upload request of the specified upload request type is created on uploading the file. It is the upload request type which helps the system to understand how to process the file. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.

The **Adjustment Upload Request Type (C1-AdjRequestType)** business object is used for the maintenance of upload request types for uploading CSV data. Configurations like upload file size, approval workflow can be configured using this object. If you are going to upload adjustment data files using an upload request type, you need to specify the match types (using which the adjustments must be created) in the upload request type. At present, the following two match types are shipped with the product:

- Contract
- Contract Type

You can also define custom match types, if required. You must use the **ADJ_MATCH_TYPE** lookup field to add a new match type. You need to attach an algorithm to each match type to determine the contract against which the adjustment must be created. At present, the following algorithm types and sample algorithms are shipped with the product:

| Match Type | Algorithm Type | Sample Algorithm | Algorithm Description |
|---------------|----------------|------------------|--|
| Contract | C1-MTCIALG | C1-MTCIALG | This algorithm fetches contract ID for each adjustment record where the match type is set to Contract (CONT) . |
| Contract Type | C1-MTCTALG | C1-MTCTALG | This algorithm fetches contract ID based on the contract type and account ID for each adjustment record where the match type is set to Contract Type (CNTY) . If there are multiple active contracts of the specified contract type on the account, the contract ID with the latest start date will be fetched. |

The **Upload Request Type (C1-UplRequestType)** business object will be used for the maintenance of upload request types for uploading CSV data. Configurations like upload file size, approval workflow can be configured using this object. The system enables you to upload data for the following using the **Upload Request** feature:

- Billable Charge (Adhoc and Regular)
- Hold Request
- Refund Request
- Write Off Request
- Policy Reinstatement
- Bill Group Sort ID
- Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

It also enables you to update the following information:

- Contract rider of a contract
- Bill cycle of an account

It is the upload request type which helps the system to determine:

- Whether the file must be approved by the approver before creating or updating the entities
- Which business object must be used for creating the upload request

- Which business object must be used for creating or updating entities through an upload request
- Which foreign key reference must be used for generating information string for the entity
- A set of fields using which you can search records uploaded through an upload request

You can also define custom algorithm types and algorithms, if required. The **Upload Request Type** screen allows you to define, edit, copy, and delete an upload request type. This screen consists of the following zones:

- [Upload Request Type List](#) on page 1497
- [Upload Request Type](#) on page 1498

Upload Request Type List

The **Upload Request Type List** zone lists upload request types that are already defined in the system. It contains the following columns:

| Column Name | Column Description |
|---------------------|---|
| Upload Request Type | Displays the upload request type. |
| Description | Displays the description of the upload request type. |
| Edit | On clicking the Edit (✎) icon, the Upload Request Type screen appears where you can edit the details of the upload request type. |
| Duplicate | On clicking the Duplicate (📄) icon, the Upload Request Type screen appears where you can define an upload request type using an existing upload request type. |
| Delete | On clicking the Delete (🗑️) icon, you can delete the upload request type. |
| | Note: You can delete an upload request type when you have not uploaded a file (i.e. created an upload request) using the upload request type. |
| Mapping | On clicking the Mapping (🔗) icon, the mapping screen appears where you can map the columns of CSV file with the upload request type. |

On clicking the **Broadcast** (📡) icon corresponding to an upload request type, the **Upload Request Type** zone appears with the details of the respective upload request type.

Upload Request Type

The **Upload Request Type** zone displays the details of the upload request type. This zone contains the following sections:

- **Main** – This section provides basic information about the upload request type. It contains the following fields:

| Field Name | Field Description |
|--------------------------------|---|
| Upload Request Type | Displays the upload request type. |
| Upload Request Business Object | Indicates the business object that will be used to create the upload request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Description | Displays the description of the upload request type. |
| Detailed Description | Displays additional information about the upload request type. |
| Status | Indicates the status of the upload request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive |
| File Size (KB) | Displays the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. Note: This field appears when you create upload request type using Adjustment Upload Request Type business object. |
| Defer Algorithm | Indicates the algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit. If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode. |

| Field Name | Field Description |
|---------------------|---|
| | <p>Note:</p> <p>This field appears when you create upload request type using Adjustment Upload Request Type business object.</p> <p>It has a link. On clicking the link, the Algorithm screen appears where you can view the details of the respective algorithm.</p> <p>In Upload Request Type, online and deferred mode is used for processing the file if approval is not required. The defer algorithm is invoked if the number of records to be processed on the respective business object is more than the count specified on the algorithm then the status for number of records is changed from Validated to Deferred Processing else the status is changed to Processed.</p> |
| Approval Required | Indicates whether approval is required for a file which is uploaded using the upload request type. |
| Approval To Do Type | <p>Indicates that the To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <p>Note:</p> <p>This field appears when the Approval Required check box is selected.</p> <p>It has a link. On clicking the link, the To Do Type screen appears with the details of the respective To Do type.</p> |
| Approval To Do Role | <p>Indicates that users with the specified To Do role can only approve or reject the upload request submitted for approval.</p> <p>Note:</p> <p>This field appears when the Approval Required check box is selected.</p> <p>On selecting the To Do Type, the To Do Roles configured on the To Do Type is populated.</p> <p>It has a link. On clicking the link, the To Do Role screen appears with the details of the respective To Do role.</p> |
| FK Reference | <p>Indicates the foreign key reference which specifies the created upload request type.</p> <p>Note:</p> <p>This field appears when you create upload request type using Upload Request Type business object.</p> <p>It has a link. On clicking the link, the Foreign Key Reference screen appears with the details of the respective foreign key.</p> |

In addition, this section has the following columns:

| Column Name | Column Description |
|-------------|--|
| Match Type | Indicates the match type using which the adjustments must be created when you upload a file using the upload request type. The valid values are: |

| Column Name | Column Description |
|-------------|--|
| | <ul style="list-style-type: none"> Contract Contract Type |
| | Note: The Match Type column is displayed for Adjustment Upload Request Business Object. |
| Algorithm | Indicates the algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created. |
| | Note: It has a link. On clicking the link, the Algorithm screen appears with the details of the respective algorithm. The Algorithm column is displayed for Adjustment Upload Request Business Object. |

- **Characteristics** – This section lists the characteristics of the upload request type. It contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** – This section contains the following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to edit the details of the upload request type. |
| Delete | Used to delete the upload request type. |
| | Note: You can delete an upload request type when you have not uploaded a file (i.e. created an upload request) using the upload request type. |
| Duplicate | Used to create a new upload request type using an existing upload request type. |

- **Record Information** – This section contains the following fields:

| Field Name | Field Description |
|-----------------|--|
| Business Object | Indicates the business object using which the upload request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |

By default, the **Upload Request Type** zone does not appear in the **Upload Request Type** screen. It appears when you click the **Broadcast** () icon corresponding to an upload request type in the **Upload Request Type List** zone.

Defining an Upload Request Type

Prerequisites

To define an upload request type, you should have:

- Upload request business objects defined in the application
- Defer algorithm for adjustment is defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the **Contract** match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do while submitting an adjustment upload request for approval
- **C1-BCUUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill cycle update upload request for approval
- **C1-CRUUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a contract rider update upload request for approval
- **C1-HLDUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a hold upload request for approval
- **C1-REFUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a refund upload request for approval
- **C1-WOUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a write off upload request for approval
- **C1-BCUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a billable charge upload request for approval
- **C1-RPUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a reinstatement upload request for approval
- **C1-BGSRT** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill group sorting upload request for approval
- **C1-BGDVP** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill group derivation and pricing parameters upload request for approval

Procedure

To define an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
A sub-menu appears.
3. Click the **Add** option from the **Upload Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| Upload Request Type Business Object | Used to indicate the business object that you want to use to create the upload request type. | Yes |

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Upload Request Type** screen.

Note: The **Select Business Object** screen appears when there are multiple upload request type business objects defined in the application. If there is only one upload request type business object defined in the application, the **Upload Request Type** screen appears.

4. Select the required upload request type business object from the respective field.
5. Click **OK**.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define the characteristics for the upload request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| Upload Request Type | Used to specify the upload request type. | Yes |
| Upload Request Type Business Object | Indicates the upload request type business object used while defining the upload request type. | Not applicable |
| Upload Request Business Object | Used to indicate the business object that you want to use while creating the upload request. | Yes |
| Description | Used to specify the description for the upload request type. | Yes |
| Detailed Description | Used to specify additional information about the upload request type. | No |
| Status | Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |
| File Size (KB) | Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------|---|-----------------------|
| | <p>Note: This field appears when Adjustment Upload Request Type business object is selected.</p> | |
| Defer Algorithm | <p>Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <p>Note:</p> <p>Deferred mode means in the background when the Upload Request Periodic Monitor (C1-UPLRQ) batch is invoked. You can configure the Upload Request Periodic Monitor (C1-UPLRQ) batch such that it is executed at regular intervals. When the Upload Request Periodic Monitor (C1-UPLRQ) batch is invoked, the system checks whether there are any upload requests in the Deferred status. If there is an upload request in the Deferred status, the system creates the entities (for example, adjustments).</p> <p>This field appears when Adjustment Upload Request Type business object is selected.</p> <p>In Upload Request Type, online and deferred mode is used for processing the file if approval is not required. The defer algorithm is invoked if the number of records to be processed on the respective business object is more than the count specified on the algorithm then the status for number of records is changed from Validated to Deferred Processing else the status is changed to Processed.</p> <p>Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Algorithm Search window appears.</p> | Yes |
| Entity Business Object | Used to indicate for creating Business Object of the entity using the upload request type. | No |

| Field Name | Field Description | Mandatory (Yes or No) | | | | | | | | | | | | | | | | | | | | | | |
|--|--|--|------------|------------|----------|-------------------|----------|-----------------|---------|-----------------------|----------|--------------|----------|----------------|----------|-------------------|---------|----------------------|---------|--------------------|----------|--|----------|--|
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Business Object Search window appears.</p> <p>This field appears when Upload Request Type business object is selected.</p> | | | | | | | | | | | | | | | | | | | | | | | |
| Approval Required | Used to indicate whether approval is required for a file which is uploaded using the upload request type. | No | | | | | | | | | | | | | | | | | | | | | | |
| Approval To Do Type | <p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the To Do Type Search window appears.</p> <p>The following table lists the To Do type using which the To Do must be generated for the different upload requests:</p> <table border="1"> <thead> <tr> <th>Upload Request</th> <th>To Do Type</th> </tr> </thead> <tbody> <tr> <td>Adjustment</td> <td>C1-ADJUP</td> </tr> <tr> <td>Bill Cycle Update</td> <td>C1-BCUUR</td> </tr> <tr> <td>Billable Charge</td> <td>C1-BCUR</td> </tr> <tr> <td>Contract Rider Update</td> <td>C1-CRUUR</td> </tr> <tr> <td>Hold Request</td> <td>C1-HLDUR</td> </tr> <tr> <td>Refund Request</td> <td>C1-REFUR</td> </tr> <tr> <td>Write Off Request</td> <td>C1-WOUR</td> </tr> <tr> <td>Policy Reinstatement</td> <td>C1-RPUR</td> </tr> <tr> <td>Bill Group Sorting</td> <td>C1-BGSRT</td> </tr> <tr> <td>Bill Group Derivation and Pricing Parameters</td> <td>C1-BGDVP</td> </tr> </tbody> </table> | Upload Request | To Do Type | Adjustment | C1-ADJUP | Bill Cycle Update | C1-BCUUR | Billable Charge | C1-BCUR | Contract Rider Update | C1-CRUUR | Hold Request | C1-HLDUR | Refund Request | C1-REFUR | Write Off Request | C1-WOUR | Policy Reinstatement | C1-RPUR | Bill Group Sorting | C1-BGSRT | Bill Group Derivation and Pricing Parameters | C1-BGDVP | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required check box is selected.</p> |
| Upload Request | To Do Type | | | | | | | | | | | | | | | | | | | | | | | |
| Adjustment | C1-ADJUP | | | | | | | | | | | | | | | | | | | | | | | |
| Bill Cycle Update | C1-BCUUR | | | | | | | | | | | | | | | | | | | | | | | |
| Billable Charge | C1-BCUR | | | | | | | | | | | | | | | | | | | | | | | |
| Contract Rider Update | C1-CRUUR | | | | | | | | | | | | | | | | | | | | | | | |
| Hold Request | C1-HLDUR | | | | | | | | | | | | | | | | | | | | | | | |
| Refund Request | C1-REFUR | | | | | | | | | | | | | | | | | | | | | | | |
| Write Off Request | C1-WOUR | | | | | | | | | | | | | | | | | | | | | | | |
| Policy Reinstatement | C1-RPUR | | | | | | | | | | | | | | | | | | | | | | | |
| Bill Group Sorting | C1-BGSRT | | | | | | | | | | | | | | | | | | | | | | | |
| Bill Group Derivation and Pricing Parameters | C1-BGDVP | | | | | | | | | | | | | | | | | | | | | | | |
| Approval To Do Role | Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval. | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required check box is selected.</p> | | | | | | | | | | | | | | | | | | | | | | |
| FK Reference | Used to indicate the FK Reference code to display the entity information. | No | | | | | | | | | | | | | | | | | | | | | | |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Foreign Key Search window appears.</p> <p>This field appears when Upload Request Type business object is selected.</p> | |

In addition, this section contains the following fields in the grid:

Note: This field appears when **Adjustment Upload Request Type** business object is selected.

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|--|
| Match Type | <p>Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are:</p> <ul style="list-style-type: none"> • Contract • Contract Type | <p>Yes (Conditional)</p> <p>Note: This field is required when you select the Adjustment Upload Request option from the Upload Request Business Object list.</p> |
| Algorithm | <p>Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.</p> <p>Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Algorithm Search window appears.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when you select the match type from the respective field.</p> |

6. Enter the required details.

Note:

You can search for an algorithm by clicking the **Search** (🔍) icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add** (+) icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete** (🗑️) icon corresponding to the match type.

7. Define characteristics for the upload request type, if required.

8. Click **Save**.

The upload request type is defined.

Defining a Characteristic for an Upload Request Type

Prerequisites

To define a characteristic for an upload request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Upload Request Type)

Procedure

To define a characteristic for an upload request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an upload request type.

The **Characteristics** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|---|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Upload Request Type. | Note: This field is required when you are defining a characteristic for the upload request type. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the upload request type. |

2. Enter the required details.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the upload request type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the upload request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

Editing an Upload Request Type

Prerequisites

To edit an upload request type, you should have:

- Upload request business objects defined in the application
- Defer algorithm for adjustment is defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the Contract match type
- Algorithm defined using the **C1-MTCTALG** algorithm type when you want to create adjustment using the Contract Type match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do entries generated while submitting an adjustment upload request for approval
- **C1-UPLAPPENT** To Do type assigned to a To Do role whose users must receive To Do generated while submitting an upload request for approval

Procedure

To edit an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Edit**  icon in the **Edit** column corresponding to the upload request type whose details you want to edit.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define the characteristics for the upload request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| Upload Request Type | Displays the upload request type. | Not applicable |
| Upload Request Type Business Object | Indicates the upload request type business object used while defining the upload request type. | Not applicable |
| Upload Request Business Object | Used to specify the business object that you want to use while creating the upload request. | Yes |
| Description | Used to specify the description for the upload request type. | Yes |
| Detailed Description | Used to specify additional information about the upload request type. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------|--|-----------------------|
| Status | Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes |
| File Size (KB) | Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. <p>Note: This field appears when the business object is Adjustment Upload Request Type.</p> | Yes |
| Defer Algorithm | Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode. <p>Note:</p> <p>Deferred mode means in the background when the Upload Request Periodic Monitor (C1-UPLRQ) batch is invoked. You can configure the Upload Request Periodic Monitor (C1-UPLRQ) batch such that it is executed at regular intervals. When the Upload Request Periodic Monitor (C1-UPLRQ) batch is invoked, the system checks whether there are any upload requests in the Deferred status. If there is an upload request in the Deferred status, the system creates the entities (for example, adjustments).</p> <p>This field appears when the business object is Adjustment Upload Request Type.</p> | Yes |
| Entity Business Object | Used to indicate for creating Business Object of the entity using the upload request type. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|---|
| | Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Business Object Search window appears. | |
| Approval Required | Used to indicate whether approval is required for a file which is uploaded using the upload request type. | No |
| Approval To Do Type | Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval. Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the To Do Type Search window appears. | Yes (Conditional) Note: This field is required when the Approval Required check box is selected. |
| Approval To Do Role | Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval. | Yes (Conditional) Note: This field is required when the Approval Required check box is selected. |
| FK Reference | Used to indicate the FK Reference code to display the entity information. Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Foreign Key Search window appears. This field appears when the business object is Upload Request Type . | No |

In addition, this section contains the following fields in the grid:

Note: The below section appears when the business object is **Adjustment Upload Request Type**.

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|---|
| Match Type | Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> Contract Contract Type | Yes (Conditional) Note: This field is required when you select the Adjustment Upload Request option from the Upload Request Business Object list. |
| Algorithm | Used to attach an algorithm that will be triggered when you upload an adjustment data file. This | Yes (Conditional) |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|---|
| | algorithm determines the contract against which the adjustment must be created. | Note: This field is required when you select the match type from the respective field. |

Tip: Alternatively, you can click the **Edit** button in the **Upload Request Type** zone to edit the details of the upload request type.

4. Modify the required details.

Note:

You can search for an algorithm by clicking the **Search** (🔍) icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add** (+) icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete** (🗑️) icon corresponding to the match type.

5. Define, edit, or remove characteristics of the upload request type, if required.

6. Click **Save**.

The changes made to the upload request type are saved.

Deleting an Upload Request Type

Procedure

To delete an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the upload request type that you want to delete.

A message appears confirming whether you want to delete the upload request type.

Note: You can delete an upload request type when you have not uploaded a file (i.e. created an upload request) using the upload request type.

Tip: Alternatively, you can click the **Delete** button in the **Upload Request Type** zone to delete the upload request type.

4. Click **OK**.

The upload request type is deleted.

Copying an Upload Request Type

Instead of creating an upload request type from scratch, you can create a new upload request type using an existing upload request type. This is possible through copying an upload request type. On copying an upload request type, the details including the match types (only for adjustments) and characteristics are copied to the new upload request type. You can then edit the details, if required.

Prerequisites

To copy an upload request type, you should have:

- Upload request type (whose copy you want to create) defined in the application
- Upload request business objects defined in the application
- Defer algorithm defined using the **C1-UPLDEFEV** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the Contract match type
- Algorithm defined using the **C1-MTCTALG** algorithm type when you want to create adjustment using the Contract Type match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do entries generated while submitting an upload request for approval
- **C1-UPLAPPENT** To Do type assigned to a To Do role whose users must receive To Do generated while submitting an upload request for approval

Procedure

To copy an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the upload request type whose copy you want to create.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define the characteristics for the upload request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|---|-----------------------|
| Upload Request Type | Used to specify the upload request type. | Yes |
| Upload Request Type Business Object | Indicates the upload request type business object used while defining the upload request type (whose copy you want to create). | Not applicable |
| Upload Request Business Object | Used to specify the business object that you want to use while creating the upload request. | Yes |
| Description | Used to specify the description for the upload request type. | Yes |
| Detailed Description | Used to specify additional information about the upload request type. | No |
| Status | Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |
| File Size (KB) | Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. | Yes |
| | Note: This field appears when the business object is Adjustment Upload Request Type . | |
| Defer Algorithm | Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------|--|--|
| | <p>Note:</p> <p>Deferred mode means in the background when the Upload Request Periodic Monitor (C1-UPLRQ) batch is invoked. You can configure the Upload Request Periodic Monitor (C1-UPLRQ) batch such that it is executed at regular intervals. When the Upload Request Periodic Monitor (C1-UPLRQ) batch is invoked, the system checks whether there are any upload requests in the Deferred status. If there is an upload request in the Deferred status, the system creates the entities (for example, adjustments).</p> <p>This field appears when the business object is Adjustment Upload Request Type.</p> | |
| Entity Business Object | <p>Used to indicate to create the copy of Business Object of the entity using the upload request type.</p> <p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Business Object Search window appears.</p> <p>This field appears when the business object is Upload Request Type.</p> | No |
| Approval Required | Used to indicate whether approval is required for a file which is uploaded using the upload request type. | No |
| Approval To Do Type | <p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <p>Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the To Do Type Search window appears.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required check box is selected.</p> |
| Approval To Do Role | Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval. | <p>Yes (Conditional)</p> <p>Note: This field is required when the Approval Required check box is selected.</p> |
| FK Reference | Used to indicate the FK Reference code to display the entity information. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|-----------------------|
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Foreign Key Search window appears.</p> <p>This field appears when the business object is Upload Request Type.</p> | |

In addition, this section contains the following fields in the grid:

Note: The below section appears when the business object is **Adjustment Upload Request Type**.

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|---|
| Match Type | Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> Contract Contract Type | Yes (Conditional) <p>Note: This field is required when you select the Adjustment Upload Request option from the Upload Request Business Object list.</p> |
| Algorithm | Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created. | Yes (Conditional) <p>Note: This field is required when you select the match type from the respective field.</p> |

Tip: Alternatively, you can click the **Duplicate** button in the **Upload Request Type** zone to create a copy of the upload request type.

4. Enter the required details.

Note:

You can search for an algorithm by clicking the **Search** (🔍) icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add** (+) icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete** (🗑️) icon corresponding to the match type.

5. Define, edit, or remove characteristics of the upload request type, if required.

6. Click **Save**.

The new upload request type is defined.

Mapping an Upload Request Type

Prerequisites

To map an upload request type, you should have:

- Upload request type (whose columns you want to map with the CSV file) defined in the application
- Upload request business objects defined in the application

Note: Once an upload request type is used for creating an upload request, then mapping for the same cannot be edited. Duplicating the upload request type will not duplicate the mapping data. You have to add the mapping details manually after duplicating an upload request type.

Procedure

To map an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Mapping** (🔗) icon in the **Mapping** column corresponding to the upload request type whose columns you want to map with the CSV file.

The **Upload Request Type Mapping** screen appears. It contains the following field:

Note: The **Mapping** icon is applicable only for upload request type created using **Upload Request Type (C1-UplRequestType)** business object, and it is not applicable for upload request type created using **Adjustment Upload Request Type (C1-AdjRequestType)** business object.

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|------------------------------------|-----------------------|
| Upload Request Type | Indicates the upload request type. | Not applicable |

The **Upload Request Type Mapping** screen also contains the following columns:

| Column Name | Column Description | Mandatory (Yes or No) |
|-------------------|--|--|
| CSV Column Header | Used to specify the rows correspond to the columns in CSV file. | Yes (Conditional) Note: This column is required when you search the Data Records zone in the Upload Request screen. |
| Use for Searching | Used to indicate whether the defined CSV Column Header is searchable or not. Note: Upto 10 rows can be selected as searchable rows. | Yes (Conditional) Note: This column is required to be selected to be shown in the Data Records zone in the Upload Request screen |

| Column Name | Column Description | Mandatory (Yes or No) |
|-----------------|---|--|
| Sequence Number | Used to specify the sequence of the searchable fields. | Yes (Conditional) |
| | Note: Searchable rows should have sequence less than or equal to 10. | Note: This column is required to be selected to be shown sequentially in the Data Records zone in the Upload Request screen |

- Enter the required details.

Note: If you want to add more than one column names mapped to the upload request type, click the **Add (+)** icon and then specify the details. However, if you want to remove a column name mapped to the upload request type, click the **Delete (🗑)** icon corresponding to the column header.

- Click **Save**.

The columns are mapped to the CSV files for upload request type.

Upload Request (Used for Searching)

The **Upload Request** screen allows you to upload, validate and process the transaction data. Through this screen, you can navigate to the following screen:

- [Upload Request \(Used for Viewing\)](#) on page 2065

This screen consists of the following zone:

- [Search Upload Request](#) on page 2059

Search Upload Request

The **Search Upload Request** zone allows you to search for a upload request using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|-----------------------|
| Search By | Used to indicate whether you want to search for an upload request using Request Details . | Yes |
| Upload Date From | Used to search upload requests which are created from a particular date. | No |
| To | Used to search upload requests which are created till a particular date. | No |
| Status | Used to search upload requests with a particular status. The valid values are: <ul style="list-style-type: none"> • Approval In Progress • Canceled • Deferred Processing • Draft • Processed • Rejected • Validated | No |
| Upload Request Type | Used to search upload requests which are created using a particular upload request type. | No |
| User ID | Used to search upload requests which are created by a particular user. | No |
| Upload Request ID | Used to search a particular upload request. | No |
| File Name | Used to search a particular file name. | No |

Note: You must specify at least one search criterion while searching for an upload request.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|-----------------------------|--|
| Upload Date | Displays the date and time when the upload request was created in the system. |
| Payment Request Information | Displays information about the upload request. |
| | Note: It has a link. On clicking the link, the Upload Request screen appears where you can view the details of the respective upload request. |
| Status | Indicates the status of the upload request. The valid values are: <ul style="list-style-type: none"> • Approval In Progress • Canceled • Deferred Processing • Draft • Processed • Rejected • Validated |
| Upload Request Type | Displays the upload request type using which the upload request is created. |
| Entity Business Object | Displays the business object code of the entity. |
| File Name | Displays the uploaded file name. |
| Total Records | Displays the total number of records in the uploaded csv file. |
| Created By | Indicates the user who has created the upload request. |

Searching for an Upload Request

Prerequisites

To search for an upload request, you should have:

- Upload request types defined in the application

Procedure

To search for an upload request:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Tools** and then click **Upload Request**.
A sub-menu appears.

- Click the **Search** option from the **Upload Request** sub-menu.

The **Upload Request** screen appears.

- Enter the search criteria in the **Search Upload Request** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of upload requests that meet the search criteria appears in the **Search Results** section.

Viewing the Upload Request Details

Procedure

To view the details of an upload request:

- Search for the upload request in the **Upload Request** screen.
- In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose details you want to view.

The **Upload Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following two zones:
 - **Upload Request** – Displays the details of the upload request.
 - **Data Records** – Lists the details of data records uploaded in the csv file.
 - **Log** – This tab lists the complete trail of actions performed on the upload request.
- View the details of the upload request in the **Upload Request** zone.
 - View the data records in the csv file of the upload request in the **Data Records** zone.

Creating an Upload Request

Prerequisites

To create an upload request, you should have:

- Upload request types defined in the application

Procedure

To create an upload request:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Tools** and then click **Upload Request**.
A sub-menu appears.
3. Click the **Add** option from the **Upload Request** sub-menu.

The **Select Upload Request Type** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|-----------------------|
| Upload Request Type | Used to indicate the upload request type using which you want to create the upload request. Note: The following upload request types are shipped with the product: <ul style="list-style-type: none"> • ADJ_UPL_REQ_TYPE_APVL • ADJ_UPL_REQ_TYPE_WO_APVL • BC_UPL_REQ_TYPE • BILL_CYCLE_UPD_UPL_REQ_TYPE • BILL_LVL_UPL_REQ_TYPE • BILL_SRT_UPL_REQ_TYPE • HOLD_UPL_REQ_TYPE • REFUND_UPL_REQ_TYPE • REIN_UPL_REQ_TYPE • SA_RIDER_UPD_UPL_REQ_TYPE • WO_UPL_REQ_TYPE | Yes |

Tip: Alternatively, you can access the **Select Upload Request Type** screen by clicking the **Upload** button in the **Page Title** area of the **Upload Request** screen.

Note: The **Select Upload Request Type** screen appears when there are multiple upload request types defined in the application. If there is only one upload request type defined in the application, the **{XXX} Upload Request** screen appears.

4. Select the required upload request type from the respective field.
5. Click **OK**.

The {XXX} **Upload Request** screen appears. Here, {XXX} changes depending on the upload request type that you have selected. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define the characteristics for the upload request.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------|--|-----------------------|
| Upload Request Type | Indicates the upload request type using which the upload request will be created. | Not applicable |
| Parent Customer | <p>Used to indicate the person for whom you want to create the bill group sorting or bill group derivation and pricing parameters upload request.</p> <p>Note: This field appears when you are creating an upload request using an upload request type where the upload request business object is set to C1-BillGrpSortUploadRequest or C1-BillLevelUploadRequest.</p> <p>The system allows you to create a bill group sorting or bill group derivation and pricing parameters upload request for a person whose person type is set to Parent Customer.</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Person Search window appears.</p> | Yes |
| File Name | <p>Used to specify the name and path of the file that you want to upload.</p> <p>Note: You can also click the Browse button corresponding to this field to browse to the location where the file is available in the system.</p> | Yes |
| Replace Existing File | Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again. | No |
| Comments | Used to specify additional information about the upload request. | No |

6. Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

7. Browse to the location where the file that you want to upload is available in the system.
8. Click **Open**.

The file name along with the path appears in the **File Name** field.

9. Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.
10. Define characteristics for the upload request, if required.
11. Click **Save**.

A message appears indicating the number of records which are successfully uploaded. Then, an upload request is created in the **Draft** status. If the required identifier (such as account ID, person ID, policy ID, or bill group ID) is available in the record, the status of the record is set to **Pending**. However, if the required identifier could not be derived from the system, the status of the record is set to **Invalid**.

Defining a Characteristic for an Upload Request

Prerequisites

To define a characteristic for an upload request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Upload Request**)

Procedure

To define a characteristic for an upload request:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an upload request.

The **Characteristics** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|---|
| Effective Date | Used to specify the date from when the characteristic is effective for the upload request. | Yes (Conditional) Note: This field is required when you are defining a characteristic for the upload request. |
| Characteristic Type | Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Upload Request . | Yes (Conditional) Note: This field is required when you are defining a characteristic for the upload request. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) Note: This field is required when you are defining a characteristic for the upload request. |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|-----------------------|
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | |

2. Enter the required details in the **Characteristics** section.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the upload request, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the upload request, click the **Delete** (🗑️) icon corresponding to the characteristic.

Upload Request (Used for Viewing)

Once you create an upload request, the **Upload Request** screen allows you to:

- Edit the details of an upload request
- Delete an upload request
- View the details of an upload request
- Validate an upload request
- Cancel an upload request
- Submit an upload request
- Approve or reject an upload request
- View the data uploaded to a request
- View the log of an upload request
- Add a log entry for an upload request

This screen consists of the following tabs:

- **Main** – This tab contains the following two zones:
 - **Upload Request** – Displays the details of the upload request.
 - **Data Records** – Lists the data records of the upload request.
- **Log** – This tab lists the complete trail of actions performed on the upload request.

Upload Request - Main

The **Main** tab contains the following zones:

- [Upload Request](#) on page 2066
- [Data Records](#) on page 2068

Upload Request

The **Upload Request** zone displays the details of the upload request. This zone contains the following sections:

- **Main** – This section provides basic information about the upload request. It contains the following fields:

| Field Name | Field Description |
|----------------------------|---|
| Upload Request Information | Displays information about the upload request. |
| Upload Request Type | Indicates the upload request type using which the upload request is created. Note: It has a link. On clicking the link, the Upload Request Type screen appears where you can view the details of the upload request type. |
| Status | Indicates the status of the payment request. The valid values are: <ul style="list-style-type: none"> • Approval In Progress • Approved • Cancelled • Deferred Processing • Draft • Processed • Rejected • Submitted • Validated |
| File Name | Displays name of the uploaded file. |

- **Statistics** – This section lists the statistics of records in the upload request. It contains the following fields:

| Field Name | Field Description |
|-------------------|---|
| Total Records | Displays total number of records in CSV file. |
| Valid Records | Displays the count of valid data records. |
| Error Records | Displays the count of data records in error status. |
| Pending Records | Displays the count of data records pending after successful derivation. |
| Invalid Records | Displays the count of data records after unsuccessful derivation. |
| Processed Records | Displays the count of data records after processing. |

- **Characteristics** – This section lists the characteristics of the upload request. It contains the following columns:

| Column Name | Column Description |
|----------------|--|
| Effective Date | Indicates the date from when the characteristic is effective for the upload request. |

| Column Name | Column Description |
|----------------------|--|
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** – This section contains the following buttons:

| Column Name | Column Description |
|-------------|---|
| Edit | Used to edit the details of the upload request. |
| | Note: The Edit button appears when the upload request is in the Draft or Validated status. |
| Delete | Used to delete the upload request. |
| | Note: The Delete button appears when the upload request is in the Draft status. |
| Validate | Used to validate the upload request. |
| | Note: The Validate button appears when the upload request is in the Draft status. |
| Cancel | Used to cancel the upload request. |
| | Note: The Cancel button appears when the upload request is in the Validated status. |
| Submit | Used to submit the upload request for approval. |
| | Note: The Submit button appears when: <ul style="list-style-type: none"> • The upload request is in the Validated status. • The Approval Required check box is selected in the upload request type using which the upload request is created. |
| Approve | Used to approve the upload request. |
| | Note: The Approve button appears when: <ul style="list-style-type: none"> • The upload request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the upload request. |
| Reject | Used to reject the upload request. |
| | Note: The Reject button appears when: <ul style="list-style-type: none"> • The upload request is in the Approval In Progress status. • A user with the approval To Do role is reviewing the upload request. |

- **Record Information** – This section contains the following fields:

| Field Name | Field Description |
|-----------------|---|
| Business Object | Indicates the business object using which the upload request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |

| Field Name | Field Description |
|------------------|---|
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Status Date/Time | Displays the date and time when the upload request status is updated |
| Create Date/Time | Displays the date and time when the upload request is created. |

Data Records

The **Data Records** zone lists the data records of the upload request. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|-----------------------|
| Search Criteria 1, Search Criteria 2,,Search Criteria 10 | Used to search for data from the CSV file with respect to the field. | No |
| | Note: We have used generic field labels here. However, these labels will change depending on the mapping defined in the respective upload request type. | |
| Record Status | Used to indicate whether you want to search data records for an upload request. The valid values are: <ul style="list-style-type: none"> • Error • Invalid • Pending • Processed • Valid | No |

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|---|---|
| View | On clicking the View () icon, the Data Record Details window appears where you can view the details of the data records. |
| Search Result 1, Search Result 2,, Search Result 10 | Displays data from the CSV file. |

| Column Name | Column Description |
|--|--|
| Note: We have used generic field labels here. However, these labels will change depending on the mapping defined in the respective upload request type. | |
| Record Status | Indicates the status of the data record. The valid values are: <ul style="list-style-type: none"> • Error • Invalid • Pending • Processed • Valid |
| Message(s) | Displays message for the data record respective to it's status. |
| Entity ID | Displays entity ID of the upload request. <p>Note: The entity ID is displayed only for data records with Processed status.</p> |
| Entity Information | Displays entity information for the FK Reference selected in Upload Request Type screen. <p>Note: The entity information is displayed only for data records with Processed status.</p> |

Note: By default the **Search Results** section displays data records for all the statuses though data is not added or selected to any of the fields and are searched through the **Search Criteria** section.

Editing an Upload Request

Procedure

To edit an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose details you want to edit.

The **Upload Request** screen appears.

3. Click the **Edit** button in the **Upload Request** zone.

Note: The **Edit** button appears when the upload request is in the **Draft** or **Validated** status.

The entity **Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|-----------------------|
| Upload Request Type | Displays the upload request type using which the upload request is created. | Not applicable |
| File Name | Displays name of the uploaded CSV file. | Not applicable |
| Comments | Used to indicate the comments for upload request. | No |

- **Characteristics** – Used to define the characteristics for the upload request. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|--|--|
| Effective Date | Used to specify the date from when the characteristic is effective for the upload request. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the upload request. |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|--|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Upload Request . | Note: This field is required when you are defining a characteristic for the Upload request. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the Upload request. |

4. Modify the details of the upload request, if required.
5. Define, edit, or remove characteristics of the upload request, if required.
6. Click **Save**.

The changes made to the upload request are saved.

Canceling an Upload Request

Prerequisites

To cancel an upload request, you should have:

- Cancellation reasons defined in the application

Note: While cancelling an upload request, you need to specify the reason why you want to cancel the upload request. You can select the appropriate cancellation reason when you have defined the reasons for the **Canceled** status of the **C1-UplRequestType** business object in the **Status Reason** screen.

Procedure

To cancel an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to cancel.

The **Upload Request** screen appears.

3. Click the **Cancel** button in the **Upload Request** zone.

The **Cancel Reason** window appears. It contains following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|---|-----------------------|
| Cancel Reason | Used to indicate the reason why you want to cancel the upload request. | Yes |
| Comments | Used to specify additional information while cancelling the upload request. | No |

Note: The **Cancel** button appears when the upload request is in the **Validated** status.

4. Select the cancellation reason from the **Cancel Reason** list.
5. Click **Save**.

The status of the upload request is changed to **Canceled**.

Approving an Upload Request

You can view the number of upload requests which are pending for approval in the **Upload Request** screen. The approver can review, and accordingly approve or reject the upload request based on the observations.

Note: The system will not allow you to approve or reject an upload request submitted by you.

Procedure

To approve an upload request:

1. Do either of the following:

| If you want to... | Then... |
|---|--|
| Approve a upload request through the Upload Request screen | <ol style="list-style-type: none"> 1. Search for the upload request in the Upload Request screen. 2. In the Search Results section, click the link in the Upload Request Information column corresponding to the upload request which you want to review. |
| Approve a upload request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. |

| If you want to... | Then... |
|-------------------|--|
| | <ol style="list-style-type: none"> 3. Enter the required To Do type in the respective field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the upload request that you want to review. |

The **Upload Request** screen appears.

2. Review the upload request details.
3. Click the **Approve** button in the **Upload Request** zone.

The system behaves in the following manner:

| If... | Then... | | | | | | | | | | | | | | | | |

Rejecting an Upload Request

Prerequisites

To reject an upload request, you should have:

- Rejection reasons defined in the application

Note:

While rejecting an upload request, you need to specify the reason why you want to reject the upload request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-UplRequestType** business object in the **Status Reason** screen.

The system will not allow you to approve or reject an upload request submitted by you.

Procedure

To reject an upload request:

1. Do either of the following:

| If you want to | Then |
|---|--|
| Reject an upload request through the Upload Request screen | <ol style="list-style-type: none"> 1. Search for the upload request in the Upload Request screen. 2. In the Search Results section, click the link in the Upload Request Information column corresponding to the upload request which you want to review. |
| Reject an upload request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. |

| If you want to | Then |
|----------------|---|
| | <ol style="list-style-type: none"> 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter the required To Do type in the respective field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the upload request that you want to review. |

The **Upload Request** screen appears.

2. Review the upload request details.
3. Click the **Reject** button in the **Upload Request** zone.

The **Reject Upload Request** window appears. It contains following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | Used to indicate the reason why you want to reject the upload request. | Yes |
| Comments | Used to specify additional information while rejecting the upload request. | No |

Note: The **Reject** button appears when:

- The upload request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the upload request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the upload request is changed to **Rejected**.

Viewing the Data Record Details

Procedure

To view the details of a data record:

1. Search for the data record in the **Data Records** zone in the **Upload Request** screen.
2. In the **Search Results** section, click the **View** () icon in the **View** column corresponding to the data record whose details you want to view.

The **Data Record Details** window appears. It contains the following fields:

| Field Name | Field Description |
|-------------------|--|
| Sr. No. | Displays the sequential number of data. |
| CSV Column Header | Displays name of the column in uploaded CSV file. |
| CSV Column Value | Displays value in the column in uploaded CSV file. |

3. View the details of the data record in the **Data Record Details** window.

Viewing the Log of an Upload Request

Procedure

To view the log of an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose log you want to view.

The **Upload Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the upload request. It contains the following zones:
 - **Upload Request** – Displays the details of the upload request.
 - **Data Records** – Lists the data records of the upload request.
 - **Log** – Lists the complete trail of actions performed on the upload request. This tab contains the following zone:
 - **Upload Request Log** – Displays the trail of actions performed on the particular upload request.
3. Click the **Log** tab.

The **Upload Request Log** zone in the **Log** tab contains the following columns:

| Column Name | Column Description |
|-------------|---|
| Date/Time | Displays the date and time when the action was performed on the upload request. |

| Column Name | Column Description |
|----------------|---|
| Details | Displays the details about the action performed on the upload request. |
| User | Indicates the user who has performed the action on the upload request. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the upload request. |
| Status Reason | Indicates the reason why the upload request was rejected. |

Note: You can manually add a log entry for the upload request by clicking the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

Adding a Log Entry for an Upload Request

Procedure

To add a log entry for an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose log you want to edit.

The **Upload Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the upload request. It contains the following zones:
 - **Upload Request** – Displays the details of the upload request.
 - **Data Records** – Lists the data records of the upload request.
- **Log** – Lists the complete trail of actions performed on the upload request. This tab contains the following zone:
 - **Upload Request Log** – Displays the trail of actions performed on the particular upload request.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

The **Add Upload Request Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------------|---|-----------------------|
| Upload Request Information | Displays information about the upload request. | Not applicable |
| Log Details | Used to specify additional comments for the upload request. | Yes |

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **Upload Request Log** zone.

Chapter 29

General Ledger (GL) Accounting Template

Topics:

- [GL Accounting Template \(Without Approval\) Status Transition](#)
- [GL Accounting Template \(With Approval\) Status Transition](#)
- [Algorithms Used in C1- GLAT](#)
- [Prerequisites](#)
- [GL Accounting Template \(Used for Searching\)](#)
- [GL Accounting Template \(Used for Viewing\)](#)

Oracle Revenue Management and Billing until now created FT GL entries while generating the financial transactions for adjustments, payments, and bill segments. The FT GL entries were created using the distribution codes from the adjustment type, rate component, billable charge pass through line, or contract type depending on the type of financial transaction. Now, the system enables you to override the distribution code used for creating FT GL entries using the GL Accounting Template feature.

The system allows you to define a GL Accounting template for each process and sub processes combination for a date range. Based on the parameters defined in the **FT Generation** algorithms, the system either uses the standard process or GL Accounting Template for FT GL creation. The GL Accounting template for the specified process and sub processes combination which is effective on the accounting date is used for FT GL creation.

There should be at least one debit and credit lines in the GL Accounting template. You can define maximum 10 lines in the GL Accounting template. Each line should contain the following information:

- Whether the line should be used to create a debit FT GL entry or credit FT GL entry
- Conditional algorithm (created using the **C1-GLATLC** algorithm type) to indicate whether the line should be used to create the FT GL entry or not
- Distribution code to indicate the GL Account against which the FT GL entry should be created
- User defined amount, such as Amount 01, Amount 02, or Amount 03

The line with the Amount 01 user defined amount is used to create balancing FT GL entry against the contract type. The line with the Amount 02, Amount 03, ..., and Amount 10 user defined amount is used to create FT GL entries for bill segment calculation lines, non-calculated adjustments, adjustment calculation lines, or payments. In case of bill segments and calculated adjustments, the lines with the Amount 02, Amount 03, ..., Amount 10 user defined amount are mapped to calculation line amounts based on the rate component sequence.

You can optionally configure the system to use the approval workflow process while activating or deactivating the GL Accounting templates. If you want to enable the approval workflow process, you need to define algorithms using the following algorithm types:

- C1-GLATAPPEN
- C1-GLATSUB

If the **Approval Required (Y or N)** parameter in an algorithm created using the **C1-GLATSUB** algorithm type is set to **Y**, then on submitting or deactivating the GL Accounting template, the approval workflow process creates a To Do

for the approver to review the GL Accounting template. Once the approver approves a GL Accounting template, the status of the GL Accounting template is set to **Active** or **Inactive**.

We are supporting the following process and sub processes combinations while creating the GL Accounting template:

| Process | BS | AD | PS |
|---------------|---------------|-----------------|---------------|
| Sub Process 1 | Contract Type | Adjustment Type | Bank Account |
| Sub Process 2 | Division | Contract Type | Contract Type |
| Sub Process 3 | Rate Schedule | Division | Division |
| Sub Process 4 | - | - | - |
| Sub Process 5 | - | - | - |

For example, you can define the following the GL Accounting templates using the above supported process and sub processes combinations:

| GL Accounting Template | Process | Sub Process 1 | Sub Process 2 | Sub Process 3 |
|------------------------|---------|---------------|---------------|---------------|
| GLAT1 | BS | CT1 | D1 | RS1 |
| GLAT2 | BS | CT2 | D1 | RS1 |
| GLAT3 | BS | CT3 | D2 | RS2 |
| GLAT4 | PS | BA1 | CT1 | D1 |
| GLAT5 | PS | BA2 | CT2 | D2 |
| GLAT6 | AD | AT1 | CT1 | D1 |
| GLAT7 | AD | AT1 | CT2 | D2 |

While creating the GL Accounting template for BS and AD processes, you need to ensure that the line with the Amount 1 user defined amount is a debit line. However, while creating the GL Accounting template for PS process, you need to ensure that the line with the Amount 1 user defined amount is a credit line.

Based on the customer requirements, you can define GL Accounting template for various custom process and sub processes combinations.

The **Create Additional FT GL Entries** parameter is added in the **Assign GL Account to Financial Transaction (C1-GLASN)** and **Assign GL Account to Financial Transaction (GLASSGN2)** batches. If you set this parameter to **Y**, the **C1-GLCE** algorithm is invoked. Based on the parameters defined in the algorithm, the system checks whether there is a GL Accounting template which is effective on the accounting date for the specified process and sub processes combination. If the effective GL Accounting template is available, the system creates additional FT GL entries for the financial transactions. If the financial transaction's currency is different from the division's base currency, the algorithm will create FT GL extension for the respective financial transaction.

Two new parameters are added in the **ADJT-NM**, **ADJT-AC**, **ADJT-TA**, **ADJT-TC**, **ADJT-AD**, **ADJT-GL**, **PSEG-NM**, **PSEG-AC**, **PSEG-CA**, **BSBF-BA**, **BSBF-LO** algorithm types:

- **Use GL Accounting Template (Y or N)** - Indicates whether the FT GL entries should be created using the lines in the GL Accounting template. The valid values are **Y** and **N**.
- **Show the GL Accounting Template Error When Header Record Not Found (Y or N)** - Indicates whether you want to show error message when the effective GL Accounting template is not available for the process and sub processes combination. If you set the value of this parameter to **N**, the algorithm uses the standard process for FT GL creation when the effective GL Accounting template is not available.

The following table explains how the algorithms created using the following algorithm types create FT GL entries:

| Algorithm Type | Use GL Accounting Template (Y or N) | Calculated Adjustment Distribution Code Source (AT - Adjustment Type, CL - Calc Lines) | Algorithm Behaviour |
|--|-------------------------------------|--|--|
| ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL | N | CL | Creates FT GL for the adjustment calculation line using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type. |
| ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL | Y | CL | Creates debit and credit FT GL entries using the lines in the GL Accounting template. |
| ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL | N | AT | Creates FT GL for the adjustment using the distribution code on the respective adjustment type and the balancing FT GL using the distribution code on contract type. |
| ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL | Y | AT | Creates debit and credit FT GL entries using the lines in the GL Accounting template. |

If the **Use GL Accounting Template (Y or N)** parameter is set to **N** in the algorithms created using the **PSEG-NM**, **PSEG-AC**, and **PSEG-CA** algorithm types, the system creates FT GL for the payment segment using the distribution code on the respective payment segment type and the balancing FT GL using the distribution code on contract type. However, if the **Use GL Accounting Template (Y or N)** parameter is set to **Y**, the system creates debit and credit FT GL entries using the lines in the GL Accounting template.

If the **Use GL Accounting Template (Y or N)** parameter is set to **N** in the algorithms created using the **BSBF-BA** and **BSBF-LO** algorithm types, the system behaves in the following manner:

| If the bill segment is... | Then, the system... |
|---|--|
| Created from a billable charge with SQI and/or price item details | Creates FT GL for the bill segment calculation line using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type. |
| Created from a pass through billable charge | Creates FT GL for the pass through line using the distribution code on the respective pass through line and the balancing FT GL using the distribution code on contract type. |
| Created from a billable charge with pass through charges, SQI, and price item details | Creates... <ul style="list-style-type: none"> • FT GL for the bill segment calculation line using the distribution code on the respective rate component • FT GL for the pass through line using the distribution code on the respective pass through line • Balancing FT GL using the distribution code on contract type |
| A post processing bill segment | Creates FT GL for the post processing FT using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type. |

However, if the **Use GL Accounting Template (Y or N)** parameter is set to **Y** in the algorithms created using the **BSBF-BA** and **BSBF-LO** algorithm types, the system behaves in the following manner:

| If the bill segment is... | Then, the system... |
|---|--|
| Created from a billable charge with SQI and/or price item details | Creates debit and credit FT GL entries using the lines in the GL Accounting template. |
| Created from a pass through billable charge | Does not use the GL Accounting template. It creates FT GL for the pass through line using the distribution code on the respective pass through line and the balancing FT GL using the distribution code on contract type. |
| Created from a billable charge with pass through charges, SQI, and price item details | Creates... <ul style="list-style-type: none"> • FT GL for bill segment calculation line using the lines in the GL Accounting template. • FT GL for the pass through line using the distribution code |

| If the bill segment is... | Then, the system... |
|--------------------------------|--|
| | on the respective pass through line. <ul style="list-style-type: none"><li data-bbox="1096 281 1471 342">• Balancing FT GL using the line in the GL Accounting template. |
| A post processing bill segment | Creates debit and credit FT GL entries using the lines in the GL Accounting template. |

GL Accounting Template (Without Approval) Status Transition

The following figure graphically indicates how a GL accounting template moves from one status to another when the Approval Required (Y or N) parameter in the C1-GLATSUB algorithm is set to N.

GL Accounting Template (With Approval) Status Transition

The following figure graphically indicates how a GL accounting template moves from one status to another when the Approval Required (Y or N) parameter in the C1-GLATSUB algorithm is set to Y.

Algorithms Used in C1- GLAT

The following table lists the algorithms which are attached to the **C1-GLAT** business object:

| System Event | Algorithm | Algorithm Type | Description |
|--------------|-------------|----------------|---|
| Information | C1-GLAT-INF | C1-GLAT-INF | This algorithm generates the GLAT information string which appears throughout the application. This algorithm concatenates the following fields: <ul style="list-style-type: none"> GLAT Description GLAT Status Description GLAT ID |

The following table lists the algorithms which are used in the lifecycle of the **C1-GLAT** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|-----------------------------------|--------------|--------------|----------------|---|
| Draft | Exit | F1-TODOCOMPL | F1-TODOCOMPL | This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed. |
| Submitted | Enter | C1-GLATSUB | C1-GLATSUB | This algorithm checks the following: <ul style="list-style-type: none"> If soft parameter value is set to Y then approval workflow will be triggered. |
| Approval in Progress | Enter | C1-GLATAPPEN | C1-GLATAPPEN | This algorithm creates the To Do based on the Approval To Do Type configured in algorithm. |
| Approval in Progress | Exit | C1-GLATAPPEX | C1-GLATAPPEX | This algorithm checks whether an approver is associated with the approval To Do Role specified in the C1-GLATAAPEN Algorithm. It does not allow the submitter to approve or reject the GLAT request. |
| Approval in Progress | Exit | F1-TODOCOMPL | F1-TODOCOMPL | This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed. |
| Active | - | - | - | - |
| Deactivation Submitted | Enter | C1-GLATSUB | C1-GLATSUB | This algorithm checks the following: <ul style="list-style-type: none"> If soft parameter value is set to Y then approval workflow will be triggered. |
| Deactivation Approval In Progress | Enter | C1-GLATAPPEN | C1-GLATAPPEN | This algorithm creates the To Do based on the Approval To Do Type configured in algorithm. |
| Deactivation Approval In Progress | Exit | C1-GLATAPPEX | C1-GLATAPPEX | This algorithm checks whether an approver is associated with the approval To Do Role specified in |

| Status | System Event | Algorithm | Algorithm Type | Description |
|-----------------------------------|--------------|--------------|----------------|---|
| | | | | the C1-GLATAAPEN Algorithm. It does not allow the submitter to approve or reject the GLAT request. |
| Deactivation Approval In Progress | Exit | F1-TODOCOMPL | F1-TODOCOMPL | This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed. |
| Rejected | Exit | F1-TODOCOMPL | F1-TODOCOMPL | This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed. |
| Inactive | - | - | - | - |

Prerequisites

To setup the GL Accounting Template, you need to do the following:

- Define rejected status reasons for the **C1-GLAT** business object
- Define deactivated status reasons for the **C1-GLAT** business object
- Assign the **C1-GLAT** To Do type to a To Do role whose users must receive To Do generated while submitting a template for approval
- Define the required algorithms, for approval and To Do type role and configurations

GL Accounting Template (Used for Searching)

The **GL Accounting Template** screen allows you to search for a template using various search criteria. It also allows you to create template. Through this screen, you can navigate to the following screen:

- [GL Accounting Template \(Used for Viewing\)](#) on page 2099

This screen consists of the following zones:

- [Search GL Accounting Template](#) on page 2094
- [GL Accounting Template Lines](#) on page 2095

Search GL Accounting Template

The **Search GL Accounting Template** zone allows you to search for GL accounting templates using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|-----------------------|
| Template ID | Used to search a particular template. | No |
| Description | Used to specify the description of a template. | No |
| Status | Used to indicate the status of the template. The valid values are: <ul style="list-style-type: none"> • Draft • Approval In Progress • Deactivation Approval In Progress • Active • Inactive • Rejected | No |
| Process | Used to search a particular process. | No |
| Sub Process 1 | Used to search a particular Sub Process 1. | No |
| Sub Process 2 | Used to search a particular Sub Process 2. | No |
| Sub Process 3 | Used to search a particular Sub Process 3. | No |
| Sub Process 4 | Used to search a particular Sub Process 4. | No |
| Sub Process 5 | Used to search a particular Sub Process 5. | No |
| Effective Start Date | Used to search templates which are effective from a particular date. | No |
| Effective End Date | Used to search templates which are effective till a particular date. | No |

Note: You must specify at least one search criterion while searching for a template.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|--|---|
| Process | Displays the process. |
| GL Accounting Template Request Information | Displays information about the template. <p>Note: It has a link. On clicking the link, the GL Accounting Template screen appears where you can view the details of the respective template.</p> |
| Description | Displays the description of process. |
| Sub Process 1 | Displays the Sub Process 1. |
| Sub Process 2 | Displays the Sub Process 2. |

| Column Name | Column Description |
|----------------------|--|
| Sub Process 3 | Displays the Sub Process 3. |
| Sub Process 4 | Displays the Sub Process 4. |
| Sub Process 5 | Displays the Sub Process 5. |
| Effective Start Date | Displays the date from when the template is effective. |
| Effective End Date | Displays the date till when the template is effective. |
| Status | Displays the status of template. |

GL Accounting Template Lines

The **GL Accounting Template Lines** zone displays the details of the template lines. This zone contains the following columns:

| Column Name | Column Description |
|---------------------------|---|
| Credit/Debit | Displays whether the template lines are of credit or debit. |
| Conditional Algorithm | Displays the algorithm that specified that template line is valid or not. |
| Distribution Code | Displays the distribution code which indicates the template associated with the charge. |
| User Defined Amount Field | Displays the amount to be used in a template line. |

Note: By default, the **GL Accounting Template Lines** zone does not appear in the **GL Accounting Template** screen. It appears when you click the **Broadcast** (📢) icon corresponding to the template in the **Search Results** section.

Searching for a GL Accounting Template

Procedure

To search for a GL Accounting template:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **G** and then click **GL Accounting Template**.
The **GL Accounting Template** screen appears.
3. Enter the search criteria in the **Search GL Accounting Template** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
A list of templates that meet the search criteria appears in the **Search Results** section.

Creating a GL Accounting Template

Prerequisites

To create a GL Accounting template, you should have:

- Conditional Algorithms and Distribution codes defined in the application.

Procedure

To create a GL Accounting template:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **G** and then click **GL Accounting Template**.
The **GL Accounting Template** screen appears.
3. Click the **Add** button in the **Page Title** area of the **GL Accounting Template** screen.

The **GL Accounting Template** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the template. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Process | Used to specify a particular process. | Yes |
| Description | Used to indicate the description of a process. | Yes |
| Sub Process 1 | Used to specify a Sub Process 1. | Yes (Conditional) |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|--|
| | | Note: This field is required if Process is Bill Segment or Payment Segment or Adjustments |
| Sub Process 2 | Used to specify a Sub Process 2. | Yes (Conditional) Note: This field is required if Process is Bill Segment or Payment Segment or Adjustments |
| Sub Process 3 | Used to specify a Sub Process 3. | Yes (Conditional) Note: This field is required if Process is Bill Segment or Payment Segment or Adjustments. |
| Sub Process 4 | Used to specify a Sub Process 4. | No |
| Sub Process 5 | Used to specify a Sub Process 5. | No |
| Effective Start Date | Used to specify date for a template which is effective from a particular date. | Yes |
| Effective End Date | Used to specify date for a template which is effective till a particular date. | No |

- **GL Accounting Template Lines** —Used to specify the template lines in a GL accounting template. This section contains the following columns:

| Column Name | Column Description | Mandatory (Yes or No) |
|---------------------------|---|-----------------------|
| Sequence No | Used to specify the sequence number. | Yes |
| Credit/Debit | Used to indicate whether template lines are of credit or debit. | Yes |
| Conditional Algorithm | Used to specify the algorithm which specifies that template line is valid or not. | No |
| Distribution Code | Used to indicate the distribution code which indicates the template associated with the charge. | Yes |
| User Defined Amount Field | Used to indicate the amount to be used in a template line. | Yes |

4. Enter the required details

Note:

You can search for a conditional algorithm and distribution code by clicking the **search** (🔍) icon corresponding to the respective field.

At least one credit and one debit line is required while defining a template.

System will not allow to add a template having same set of process, sub processes and effective date. If there is a template already created and its status is Inactive, then only template can be created with same set of process, sub processes and effective date.

Each conditional line must have unique User Defined Amount Field value.

5. Add template lines for a template defined.

6. Click **Save**.

The GL Accounting template is created and the status of the template is set to **Draft**. The **GL Accounting Template** screen appears with the details of template.

Viewing the GL Accounting Template Details**Procedure**

To view the details of a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose details you want to view.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
 - **GL Accounting Template** – Displays the details of the template.
- **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
 - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

3. View the details of the template in the **GL Accounting Template** zone.

Viewing the GL Accounting Template Lines Details

Procedure

To view the details of a GL Accounting Template Lines:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the template in the **Search Results** section.

The **GL Accounting Template Lines** zone appears in the **GL Accounting Template** screen.

3. View the details of the template lines in the **GL Accounting Template Lines** zone.

GL Accounting Template (Used for Viewing)

Once you create a template, the **GL Accounting Template** screen allows you to:

- View the details of a template
- Edit the details of a template
- Delete a template
- Submit a template for approval
- Approve or reject a template
- Deactivate a template

This screen consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
 - **GL Accounting Template** – Displays the details of the template.
- **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
 - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

GL Accounting Template - Main

The **Main** tab on the **GL Accounting Template** contains the following zone:

[GL Accounting Template](#) on page 2099

GL Accounting Template

The **GL Accounting Template** zone displays the details of the template. This zone contains the following sections:

- **Main** – This section provides basic information about the GL Accounting template. It contains the following fields:

| Field Name | Field Description |
|------------------------------------|--|
| GL Accounting Template Information | Displays information about the template |
| Status | Indicates the status of the template. |
| Process | Displays the process. |
| Description | Displays the description of the process. |
| Sub Process 1 | Displays the Sub Process 1. |
| Sub Process 2 | Displays the Sub Process 2. |
| Sub Process 3 | Displays the Sub Process 3. |
| Sub Process 4 | Displays the Sub Process 4. |
| Sub Process 5 | Displays the Sub Process 5. |
| Effective Start Date | Displays the date from when the template is effective. |
| Effective End Date | Displays the date till when the template is effective. |

- **GL Accounting Template Lines** – Lists the GL Accounting template lines. It contains the following columns:

| Column Name | Column Description |
|---------------------------|---|
| Sequence No | Displays the sequence number. |
| Credit/Debit | Displays whether the template lines are of credit or debit. |
| Conditional Algorithm | Displays the algorithm that specified that template line is valid or not. |
| Distribution Code | Displays the distribution code which indicates the template associated with the charge. |
| User Defined Amount Field | Displays the amount to be used in a template line. |

- **Record Actions** – This section contains the following buttons:

| Button Name | Button Description |
|-------------|---|
| Edit | Used to edit the details of the template. |
| | Note: The Edit button appears when the template is in the Draft or Rejected status. |
| Delete | Used to delete the template. |
| | Note: The Delete button appears when the template is in the Draft or Rejected status. |
| Submit | Used to activate the template. |
| | Note: The Submit button appears when the template is in the Draft or Rejected status. |
| Approve | Used to approve the template. |

| Button Name | Button Description |
|-------------|---|
| | Note: the Approve button appears when the template is in the Approval In Progress or Deactivation Approval In Progress status. |
| Reject | Used to reject the template. Note: the Reject button appears when the template is in the Approval In Progress or Deactivation Approval In Progress status. |
| Deactivate | Used to deactivate the active template. Note: The Deactivate button appears when the template is in the Active status. |

- **Record Information** – This section contains the following fields:

| Field Name | Field Description |
|-----------------|--|
| Business Object | Indicates the business object using which the template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |

GL Accounting Template - Log

The **Log** tab on the **GL Accounting Template** screen contains the following zone:

[GL Accounting Template Log](#) on page 2101

GL Accounting Template Log

The **GL Accounting Template Log** zone on the **GL Accounting Template** screen lists the complete trail of actions performed on the GL Accounting template. This zone contains the following columns:

| Column Name | Column Description |
|----------------|---|
| Date/Time | Displays the date and time when the action was performed on the template. |
| Details | Displays the details about the action performed on the template. |
| User | Indicates the user who has performed the action on the template. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the template. |
| Status Reason | Displays the status reason of action performed on the template. |

Note: You can manually add a log entry for the template by clicking the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

The **Add GL Accounting Template Log** window appears. Enter **Log Details** and click **Save**. The GL Accounting Template log is added.

Editing a GL Accounting Template

Procedure

To edit a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose details you want to edit.

The **GL Accounting Template** screen for editing appears.

3. Click the **Edit** button in the **GL Accounting Template** zone.

Note: The **Edit** button appears when the template is in the **Draft** or **Rejected** status.

The **GL Accounting Template** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the template. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|--|
| Process | Used to specify a particular process. | Yes |
| Description | Used to indicate the description of a process. | Yes |
| Sub Process 1 | Used to specify a Sub Process 1. | Yes (Conditional) Note: This field is required if Process is Bill Segment or Payment Segment or Adjustments |
| Sub Process 2 | Used to specify a Sub Process 2. | Yes (Conditional) Note: This field is required if Process is Bill Segment or Payment Segment or Adjustments |
| Sub Process 3 | Used to specify a Sub Process 3. | Yes (Conditional) Note: This field is required if Process is Bill Segment or Payment Segment or Adjustments. |
| Sub Process 4 | Used to specify a Sub Process 4. | No |
| Sub Process 5 | Used to specify a Sub Process 5. | No |
| Effective Start Date | Used to specify date for a template which is effective from a particular date. | Yes |
| Effective End Date | Used to specify date for a template which is effective till a particular date. | No |

- **GL Accounting Template Lines** — Used to specify the template lines in a GL accounting template. This section contains the following columns:

| Column Name | Column Description | Mandatory (Yes or No) |
|---------------------------|---|-----------------------|
| Sequence No | Used to specify the sequence number. | Yes |
| Credit/Debit | Used to indicate whether template lines are of credit or debit. | Yes |
| Conditional Algorithm | Used to specify the algorithm which specifies that template line is valid or not. | No |
| Distribution Code | Used to indicate the distribution code which indicates the template associated with the charge. | Yes |
| User Defined Amount Field | Used to indicate the amount to be used in a template line. | Yes |

Note:

If you want to specify more than one template lines, click the **Add (+)** icon corresponding to the sequence No and then specify the details.

However, if you want to remove a template line from the template, click the **Delete (🗑)** icon corresponding to the sequence No.

You can search for a conditional algorithm and distribution code by clicking the **search (🔍)** icon corresponding to the respective field.

At least one credit and one debit line is required while defining a template.

4. Modify the details of the template, if required.
5. Click **Save**.

The changes made to the GL Accounting template are saved.

Deleting a GL Accounting Template

Procedure

To delete a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to delete.

The **GL Accounting Template** screen appears.

3. Click the **Delete** button in the **GL Accounting Template** zone.

A message appears confirming whether you want to delete the template.

Note: The **Delete** button appears when the template is in the **Draft** or **Rejected** status.

4. Click **OK**.

The GL Accounting template is deleted.

Note:

You can delete a template when its status is **Draft**.

Submitting a GL Accounting Template

Prerequisites

To submit a GL Accounting Template, you should have:

- Process and GL Accounting template lines defined in the template.

Procedure

To submit a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to submit.

The **GL Accounting Template** screen appears.

3. Click the **Submit** button in the **GL Accounting Template** zone.

The system behaves in the following manner:

| If... | Then... |
|--|---|
| Approval Required Flag is set to Yes in the C1-GLATSUB algorithm. | A To Do of the C1-GLAT To Do type is created and sent to the approver and the status of the template is changed to Approval In Progress . |
| Approval Required Flag is set to No in the C1-GLATSUB algorithm. | The template is created using the specified process and the status of the template is changed to Active . |

Note:

The **Submit** button appears when the template is in the **Draft** or **Rejected** status.

Approving a GL Accounting Template

You can view the number of GL Accounting templates which are pending for approval in the **GL Accounting Template** screen. The approver can review, and accordingly approve or reject the template based on the observations.

Note: The system will not allow you to approve or reject a template submitted by you.

Procedure

To approve a template:

1. Do either of the following:

| If you want to... | Then... |
|---|---|
| Approve a GL Accounting Template through the GL Accounting template screen | <ol style="list-style-type: none"> 1. Search for the template in the GL Accounting template screen. 2. In the Search Results section, click the link in the GL Accounting Template Information column corresponding to the template which you want to review. |
| Approve a GL Accounting Template from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter C1-GLAT in the To Do Type field. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. |

| If you want to... | Then... |
|-------------------|--|
| | 6. Click the link in the Message column corresponding to the To Do of the GL Accounting template that you want to review. |

The **GL Accounting Template** screen appears.

- Review the template details.
- Click the **Approve** button in the **GL Accounting Template** zone.

The system behaves in the following manner:

| If you are... | Then... |
|------------------------------------|--|
| Approving a GL Accounting template | The status of the template is changed to Active as specified in the GL Accounting template. |

Note: The **Approve** button appears when the template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.

Rejecting a GL Accounting Template

Prerequisites

To reject a GL Accounting template, you should have:

- Rejection reasons defined in the application

Note:

While rejecting a GL Accounting template, you need to specify the reason why you want to reject the template. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-GLAT** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a template submitted by you.

Procedure

To reject a GL Accounting template

- Do either of the following:

| If you want to | Then |
|--|---|
| Reject a GL Accounting template through the GL Accounting Template screen | 1. Search for the template in the GL Accounting Template screen. |

| If you want to | Then |
|---|---|
| | <ol style="list-style-type: none"> In the Search Results section, click the link in the GL Accounting Template Information column corresponding to the template which you want to review. |
| Reject a GL Accounting template from the To Do List screen | <ol style="list-style-type: none"> Click the Menu link in the Application toolbar. A list appears. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. Enter C1-GLAT in the To Do Type field. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. Select the Open option from the Filter by list to view all unassigned To Dos. Click the link in the Message column corresponding to the To Do of the template that you want to review. |

The **GL Accounting Template** screen appears.

- Review the template details.
- Click the **Reject** button in the **GL Accounting Template** zone.

The **Reject GLAT Request** window appears. It contains following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | Used to indicate the reason why you want to reject the template | Yes |
| Comments | Used to specify additional information while rejecting the template. | No |

Note: The **Reject** button appears when:

- The template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.
- A user with the approval To Do role is reviewing the template.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

The status of the template is changed to **Rejected**.

Deactivating a GL Accounting Template

Prerequisites

To deactivate a GL Accounting template, you should have:

- Deactivation reasons defined in the application.

Note:

While deactivating a GL Accounting template, you need to specify the reason why you want to deactivate the template. You can select the appropriate deactivation reason when you have defined the reasons for the deactivation status of the **C1-GLAT** business object in the **Status Reason** screen.

Procedure

To deactivate a GL Accounting template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to deactivate.

The **GL Accounting Template** screen appears.

3. Click the **Deactivate** button in the **GL Accounting Template** zone.

Note: The **Deactivate** button appears when the template is in the **Active** status.

The **Deactivate GLAT Request** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|---|-----------------------|
| Status Reason | Used to indicate the reason for deactivating a template | Yes |
| Comments | Used to specify the additional comments for the deactivation of template. | No |

4. Click **OK**.

The GL Accounting template status is changed to **Deactivation Approval In Progress**.

Viewing the Log of a GL Accounting Template

Procedure

To view the log of a GL Accounting template:

1. Search for the template in the **GL Accounting template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose log you want to view.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
 - **GL Accounting Template** – Displays the details of the template.
 - **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
 - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.
- 3. Click the **Log** tab.

The **GL Accounting Template Log** zone in the **Log** tab contains the following columns:

| Column Name | Column Description |
|----------------|---|
| Date/Time | Displays the date and time when the action was performed on the template. |
| Details | Displays the details about the action performed on the template. |
| User | Indicates the user who has performed the action on the template. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the template. |
| Status Reason | Indicates the reason why the template was rejected or voided. |

Note: You can manually add a log entry for the template by clicking the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

Adding a Log Entry for a GL Accounting Template

Procedure

To add a log entry for a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose log you want to edit.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
 - **GL Accounting Template** – Displays the details of the template.
- **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
 - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

The **Add GL Accounting Template Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------------------|---|-----------------------|
| GL Accounting Template Information | Displays information about the template. | Not applicable |
| Log Details | Used to specify additional comments for the template. | Yes |

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **GL Accounting Template Log** zone.

Chapter 30

Payment Agreement Request

Topics:

- [Payment Agreement Request \(Without Approval\) Status Transition](#)
- [Payment Agreement Request \(With Approval\) Status Transition](#)
- [Prerequisites](#)
- [Algorithms Used in C1-PaymentAgreementRequest](#)
- [Payment Agreement Request Type](#)
- [Payment Agreement Request \(Used for Searching\)](#)
- [Payment Agreement Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing provides the ability to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. Let us understand this with the help of an example. The following bills of the account A1 are unpaid:

- B1 (Bill Amount – 100\$, Unpaid Amount - 75\$)
- B2 (Bill Amount – 250\$, Unpaid Amount – 125\$)
- B3 (Bill Amount – 150\$, Unpaid Amount – 150\$)

Through a payment agreement request, you can schedule payments for these three bills in various installments. For example, you can schedule the following payments for the account A1:

| Schedule Date | Schedule Amount |
|---------------|-----------------|
| 01-Jan-2017 | 100 |
| 15-Jan-2017 | 100 |
| 01-Feb-2017 | 100 |
| 15-Feb-2017 | 50 |

While creating a payment agreement request, you need to specify the payment agreement request type using which you want to create the payment agreement request. It is the payment agreement request type which helps the system to determine:

- The business object using which the payment agreement request should be created
- Whether the approval is required for the payment agreement request

You can only add completed bills of the account which are unpaid in a payment agreement request. Once a payment agreement request is created for an account, the status of the payment agreement request is set to **Draft**. You can then edit or delete the payment agreement request, if required. Once you add the unpaid bills of the account, you can submit the payment agreement request. On submitting a payment agreement request, the status of the payment agreement request is set to **Active**.

You can optionally configure the system to use the approval workflow process for a payment agreement request. If the **Approval Required** flag is set to **Yes** in a payment agreement request type, then on submitting the respective payment agreement request, the approval workflow process creates a To Do for the approver to review the payment agreement request. Once the approver approves the payment agreement request, the status of the payment agreement request is set to **Active**. The approver can approve, reject, or resubmit the payment

agreement request. When the payment agreement request is resubmitted to the submitter, the status of the payment agreement request is set to **Draft**.

Even if the approval workflow is configured for a payment agreement request type, you can skip the approval workflow for a payment agreement request. The system enables you to skip the approval workflow for a payment agreement request until you exceed the maximum limit defined in the **C1-PASUBMIT** algorithm. You can define the following parameters in the **C1-PA-SUBMIT** algorithm:

- Number of days to consider in past to check whether any payment agreement request with a particular status exist in the specified duration (for example, 365)
- Maximum number of payment agreement requests which can be activated without approval (for example, 1)
- Status in which payment agreement request should exist in the specified duration (for example, Broken Promise)

In the above example, on clicking the **Submit** button, the system will check how many payment agreement requests for the account in the last 365 days exist in the **Broken Promise** status. If the system finds one or more than one payment agreement requests in the **Broken Promise** status in the last 365 days, the approval workflow process creates a To Do for the approver to review the payment agreement request. However, if the system does not find any payment agreement request in the **Broken Promise** status in the last 365 days, the payment agreement request is not sent for approval and the status of the payment agreement request is directly changed to **Active**.

When the **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch is invoked, the system checks whether there are any payment agreement requests in the **Active** status. If there is a payment agreement request in the **Active** status, the system checks whether the total unpaid amount of the bills is equal to zero and whether each bill is fully matched. If so, the status of the payment agreement request is changed to **Kept Promise**. However, if the total unpaid amount of the bills is not equal to zero, the system checks whether the current date is later than the schedule date and does not fall within the grace period. If so, the system checks whether total unpaid amount is greater than the total future schedule amount. If so, the status of the payment agreement request is changed to **Broken Promise**. However, if the current date is earlier than the schedule date or falls within the grace period, or the total unpaid amount is less than the total future schedule amount, the status of payment agreement request remains in **Active**. The system enables you to edit a payment agreement request which is in the **Active** status.

While defining a payment agreement request, you need to specify the payment method through which the payment will be done and whether the payment will be done through the payor or third party payor account. If the **Auto Pay** flag is set to **Yes** for a payment method, you need to also specify the automatic payment option using which the automatic payment should be created on the schedule date. One more batch named **Generate Auto Pay for Payment Agreement (C1-APPAB)** is introduced in this release. When the **Generate Auto Pay for Payment Agreement (C1-APPAB)** batch is invoked, the system checks whether there are any payment agreement requests in the **Active** status. If so, whether the account for which the payment agreement request is created is eligible for automatic payment and the defer auto pay date (if any) defined for the account is earlier than the batch business date. If so, the system checks whether the extract date of the unpaid bill (with the earliest due date) is earlier than the schedule date.

If so, the system creates the automatic payment for the unpaid bill on the schedule date. However, if the account is not eligible for automatic payment, or the defer auto pay date is equal to or later than batch business date, or the extract date is equal to or later than the schedule date, the automatic payment is not generated for the account.

During the payment agreement request process, a payment agreement request creation goes through various statuses in its lifecycle. For more information about the payment agreement request statuses, see [Payment Agreement Request \(Without Approval\) Status Transition](#) on page 2114 and [Payment Agreement Request \(With Approval\) Status Transition](#) on page 2114. If the payment agreement request type is without approval then payment agreement status will automatically move from draft to active. The approval configuration algorithm **C1-PA-APPEXT** decides whether the request will be sent for approval or not. If the payment agreement request type is with approval then payment agreement will be sent for approval depending on:

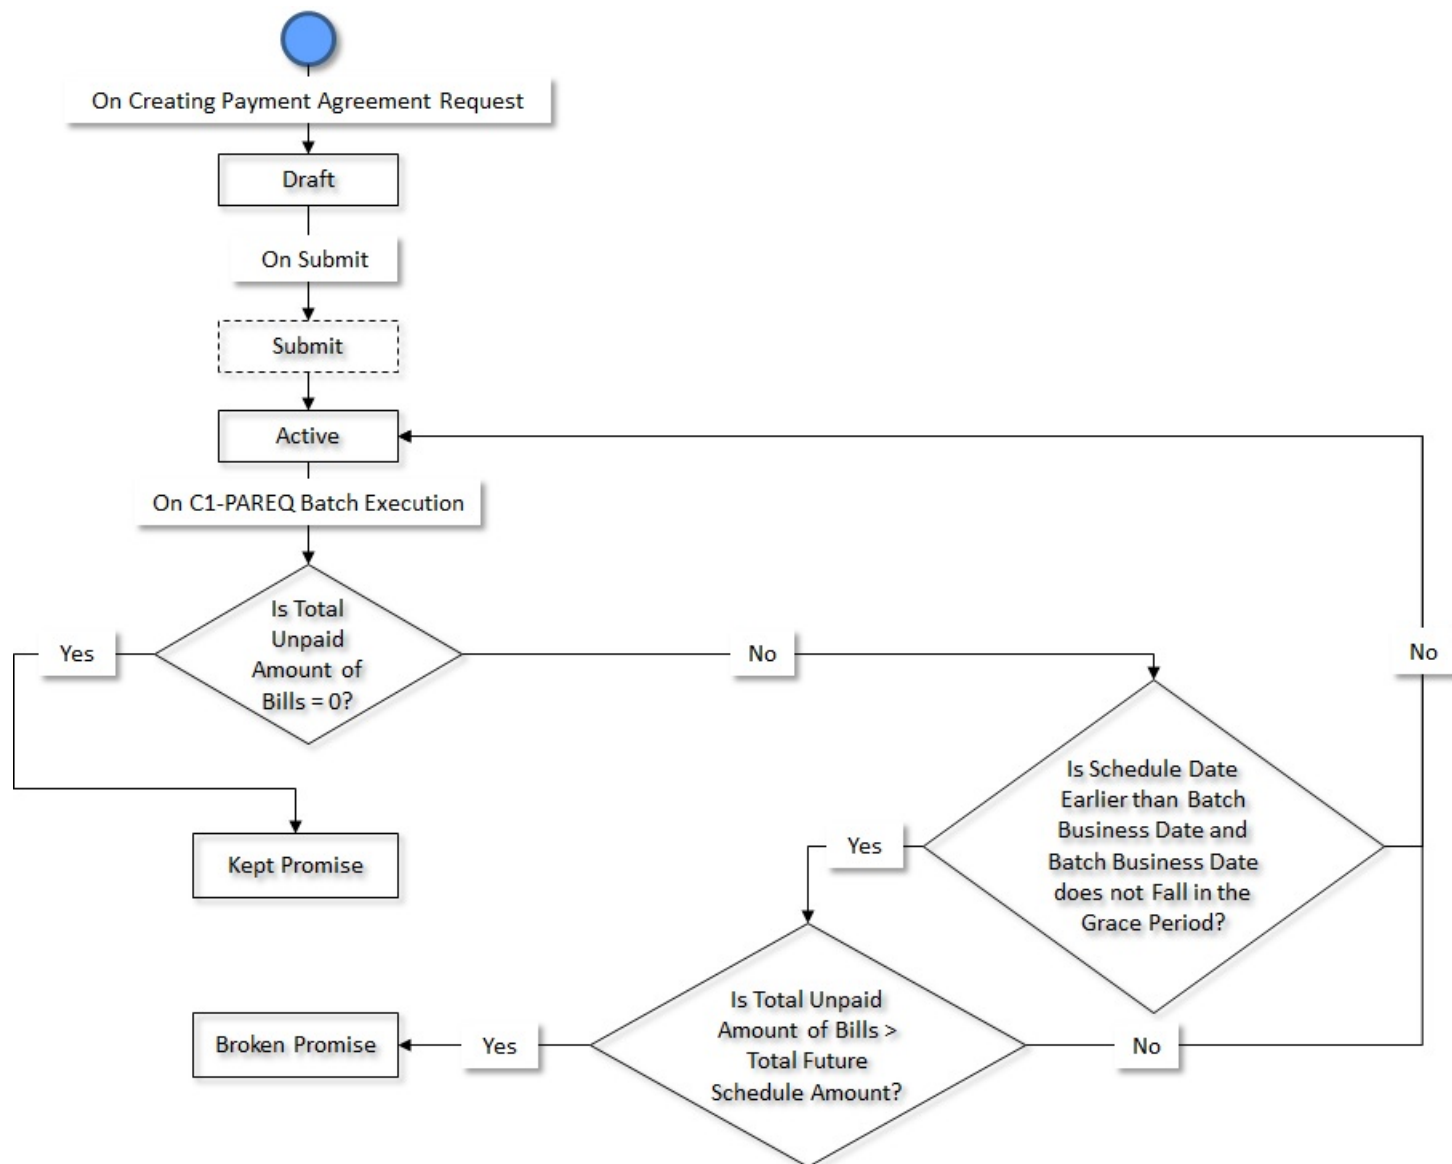

- The number of days checked for approval workflow
- Payment agreement statuses (active, broken, kept) to be considered
- The maximum number of payment agreements allowed

Note: The lifecycle of a payment agreement request creation is driven by the respective business object using which the request is created. The payment agreement request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the payment agreement request process, see [Prerequisites](#) on page 2115.

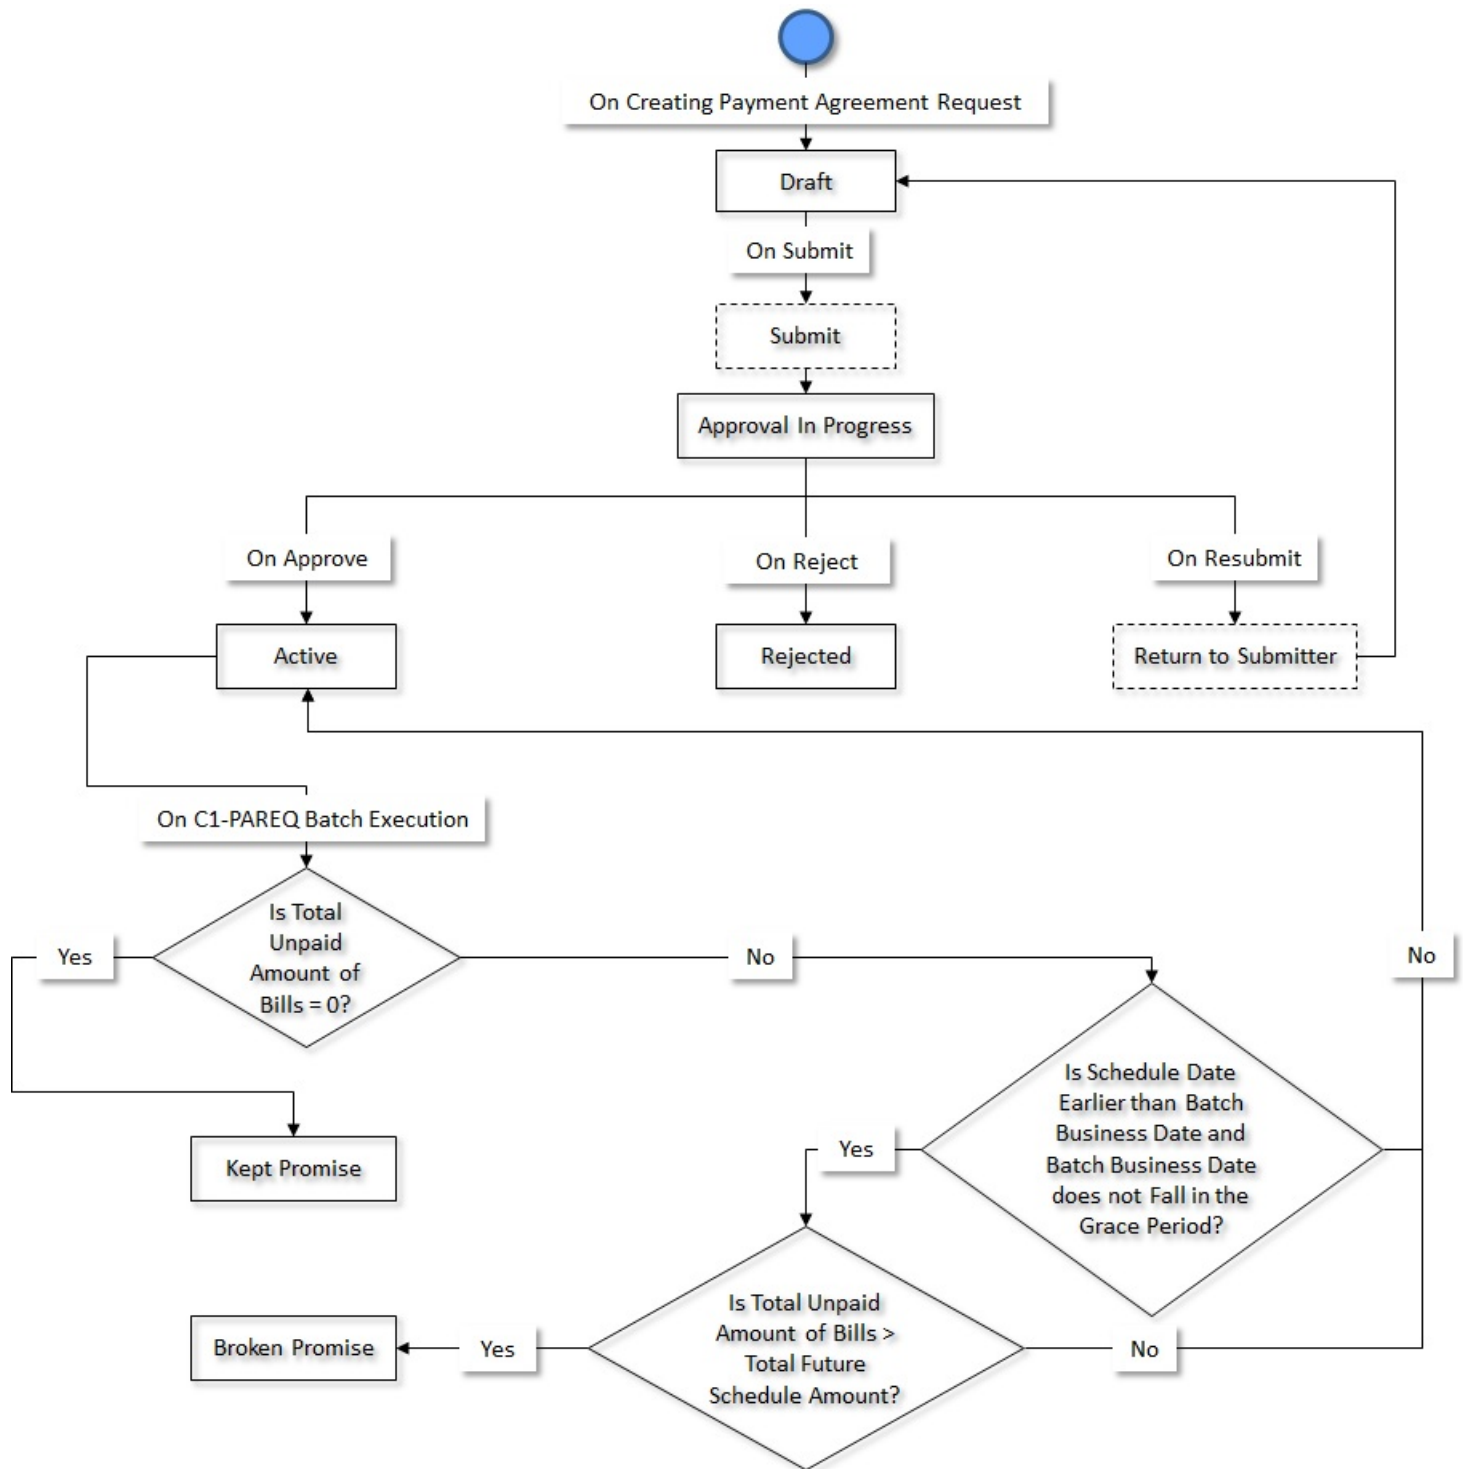

Payment Agreement Request (Without Approval) Status Transition

The following figure graphically indicates how a payment agreement request moves from one status to another when approval workflow is off:

Payment Agreement Request (With Approval) Status Transition

The following figure graphically indicates how a payment agreement request moves from one status to another when approval workflow is on:

Prerequisites

To setup the payment agreement request process, you need to do the following:

- Define the required payment agreement request types in the system
- Define the required characteristic types where the characteristic entity is set to **Payment Agreement Request**

- Define the required characteristic types where the characteristic entity is set to **Payment Agreement Request Type**
- Define the required pay methods for **Payment Agreement Request**
- Define the required third party payors for **Payment Agreement Request**
- Create an algorithm using the **C1-PA-INFO** algorithm type if you want to create Payment Agreement Requests using the payment agreement request information.
- Define the kept promise status reason for the **C1-PaymentAgreementRequest** business object
- Define the broken promise status reason for the **C1-PaymentAgreementRequest** business object
- Defined rejected status reason for the **C1-PaymentAgreementRequest** business object
- Assign the **C1-PAREQ** To Do type to a To Do role whose users must receive To Do generated while submitting or resubmitting a payment agreement request for approval
- The **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch process to monitor the payment agreement request and move the request to next stage

Algorithms Used in C1-PaymentAgreementRequest

The following table lists the algorithms which are attached to the **C1-PaymentAgreementRequest** business object:

| System Event | Algorithm | Algorithm Type | Description |
|----------------|------------|----------------|--|
| Information | C1-PA-INFO | C1-PA-INFO | Refer to C1-PA-INFO on page 2116 |
| Pre-Processing | C1-PA-PRE | C1-PA-PRE | Refer to C1-PA-PRE on page 2117 |
| Validation | C1-PA-VAL | C1-PA-VAL | Refer to C1-PA-PRE on page 2117 |

The following table lists the algorithms which are used in the lifecycle of the **C1-PaymentAgreementRequest** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|---------------------|--------------|--------------|----------------|--|
| Submit | Enter | C1-PA-SUBMIT | C1-PA-SUBMIT | Refer to C1-PA-SUBMIT on page 2117 |
| Approval Progress | In Enter | C1-PA-APPENT | C1-PA-APPENT | Refer to C1-PA-APPENT on page 2117 |
| Approval Progress | In Exit | C1-PA-APPEXT | C1-PA-APPEXT | Refer to C1-PA-APPEXT on page 2117 |
| Return to Submitter | Enter | C1-PA-RESUB | C1-PA-RESUB | Refer to C1-PA-RESUB on page 2117 |
| Active | Monitor | C1-PA-MONTR | C1-PA-MONTR | Refer to C1-MONTR on page 2117 |
| Active | Enter | C1-PA-ACTENT | C1-PA-ACTENT | Refer to C1-ACTENT on page 2117 |

C1-PA-INFO

This algorithm generates the payment agreement request information string which appears throughout the application. This algorithm concatenates the following fields:

- Payment Agreement Request Type Description

- Payment Agreement Request Status Description
- Payment Agreement Request ID

C1-PA-PRE

This Algorithm is used to avoid the concurrency issue for payment agreement.

C1-PA-SUBMIT

This Algorithm is used to validate payment agreement request.

C1-PA-APPENT

This algorithm creates **To Do** based on the **Approval To Do Type** configured in Payment Agreement Request Type.

C1-PA-APPEXT

This algorithm checks whether an approver is associated with the approval **To Do Role** specified in the **Payment Agreement Request Type**. It does not allow the submitter to approve or reject the payment agreement request.

C1-PA-RESUB

This algorithm is invoked on **Re-Submit** button. It moves the status of Payment Agreement Request into **Draft**. A 'To Do' will be generated for the user as submitter whose **To Do Type** and **To Do Role** are fetched from Payment Agreement Request Type.

C1-MONTR

This algorithm is invoked from the **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch. It changes the status of the payment request from **Active** to **KP** (Kept Promise) or **BP** (Broken Promise) based on payment received.

C1-ACTENT

This algorithm will validate Payment Agreement Request before activation.

Payment Agreement Request Type

Oracle Revenue Management and Billing allows you to define, edit, copy and delete a payment agreement request type using which you can pay current unpaid debt bills in multiple installments whose payment amount is greater than zero. A payment agreement provide flexibility in payment of installment amount and schedule of payment.

The **C1-PaymentAgreementRequest** business object is created for payment agreement maintenance.

The **Payment Agreement Request Type** screen consists of the following zones:

- [Payment Agreement Request Type List](#) on page 2117
- [Payment Agreement Request Type](#) on page 2118

Payment Agreement Request Type List

The **Payment Agreement Request Type List** zone lists payment agreement request types that are already defined in the system. It contains the following columns:

| Column Name | Column Description |
|--------------------------------|--|
| Payment Agreement Request Type | Displays the payment agreement request type. |

| Column Name | Column Description |
|-------------|--|
| Description | Displays the description of the payment agreement request type. |
| Edit | On clicking the Edit (✎) icon, the Payment Agreement Request Type screen appears where you can edit the details of the payment agreement request type. |
| Duplicate | On clicking the Duplicate (📄) icon, the Payment Agreement Request Type screen appears where you can define a payment agreement request type using an existing payment agreement request type. |
| Delete | On clicking the Delete (🗑) icon, you can delete the payment agreement request type. Note: You can delete a payment agreement request type when you have not created a payment agreement request using the payment agreement request type. |

On clicking the **Broadcast** (📡) icon corresponding to a payment agreement request type, the **Payment Agreement Request Type** zone appears with the details of the respective payment agreement request type.

Payment Agreement Request Type

The **Payment Agreement Request Type** zone displays the details of the payment agreement request type. This zone contains the following sections:

- **Main** – This section provides basic information about the payment agreement request type. It contains the following fields:

| Field Name | Field Description |
|---|--|
| Payment Agreement Request Type | Displays the payment agreement request type. |
| Description | Displays the description of the payment agreement request type. |
| Payment Agreement Request Business Object | Indicates the business object that will be used to create the payment agreement request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Detailed Description | Displays additional information about the payment agreement request type. |

| Field Name | Field Description |
|---------------------------------|--|
| Status | <p>Indicates the status of the payment agreement request type. The valid values are:</p> <ul style="list-style-type: none"> • Active • Inactive |
| Status Change Notification Type | <p>Indicates the notification type on the status change of payment agreement request type. The valid values are:</p> <ul style="list-style-type: none"> • Alert • To Do • Both |
| Approval Required | <p>Indicates whether approval is required while creating payment agreement request using the payment agreement request type.</p> |
| Approval To Do Type | <p>Indicates that the To Do entry of the specified To Do type must be created when you submit the payment agreement request for approval.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Note:</p> <p>This field appears when the Approval Required check box is selected.</p> <p>It has a link. On clicking the link, the To Do Type screen appears with the details of the respective To Do type.</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the To Do Type Search window appears.</p> </div> |
| Approval To Do Role | <p>Indicates that users with the specified To Do role can only approve or reject the payment agreement request submitted for approval.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Note:</p> <p>This field appears when the Approval Required check box is selected.</p> <p>It has a link. On clicking the link, the To Do Role screen appears with the details of the respective To Do role.</p> </div> |
| Submitter To Do Type | <p>Indicates the To Do type for the submitter when the payment agreement request type is resubmitted by the approver.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Note:</p> <p>This field appears when the Approval Required check box is selected.</p> <p>It has a link. On clicking the link, the To Do Type screen appears with the details of the respective To Do type.</p> <p>The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the To Do Type Search window appears.</p> </div> |
| Submitter To Do Role | <p>Indicates the To Do role of the submitter when the payment agreement request type is resubmitted by the approver.</p> |

| Field Name | Field Description |
|------------|--|
| | <p>Note:</p> <p>This field appears when the Approval Required check box is selected.</p> <p>It has a link. On clicking the link, the To Do Role screen appears with the details of the respective To Do role.</p> |

- **Characteristics** – This section lists the characteristics of the payment agreement request type. It contains the following columns:

| Column Name | Column Description | Mandatory (Yes Or No) |
|----------------------|--|-----------------------|
| Characteristic Type | Indicates the characteristic type. | No |
| Characteristic Value | Displays the value of the characteristic type. | No |

- **Record Actions** – This section contains the following buttons:

| Button Name | Button Description |
|-------------|---|
| Edit | Used to edit the details of the payment agreement request type. |
| Delete | Used to delete the payment agreement request type. |
| | <p>Note: You can delete a payment agreement request type when you have not created a payment agreement request using the payment agreement request type.</p> |
| Duplicate | Used to create a new payment agreement request type using an existing payment agreement request type. |

- **Record Information** – This section contains the following fields:

| Field Name | Field Description |
|-----------------|---|
| Business Object | Indicates the business object using which the payment agreement request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |
| | <p>Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.</p> |

By default, the **Payment Agreement Request Type** zone does not appear in the **Payment Agreement Request Type** screen. It appears when you click the **Broadcast** () icon corresponding to a payment agreement request type in the **Payment Agreement Request Type List** zone.

Defining a Payment Agreement Request Type

Prerequisites

To define a payment agreement request type, you should have:

- Payment agreement request business objects defined in the application
- The Payment Agreement Request Information algorithm is defined using the **C1-PA-INFO** algorithm type
- **C1-PAREQ** To Do Type assigned to a To Do role whose users must receive To Do generated while submitting a payment agreement request for approval.

Procedure

To define a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.
A sub-menu appears.
3. Click the **Add** option from the **Payment Agreement Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|--|---|-----------------------|
| Payment Agreement Request Type Business Object | Used to indicate the business object that you want to use to create the payment agreement request type. | Yes |

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Payment Agreement Request Type** screen.

Note: The **Select Business Object** screen appears when there are multiple payment agreement request type business objects defined in the application. If there is only one payment agreement request type business object defined in the application, the **Payment Agreement Request Type** screen appears.

4. Select the required payment agreement request type business object from the respective field.
5. Click **OK**.

The **Payment Agreement Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the payment agreement request type.
- **Characteristics** – Used to define the characteristics for the payment agreement request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---|---|--|
| Payment Agreement Request Type | Used to specify the payment agreement request type. | Yes |
| Business Object | Indicates the payment agreement request type business object used while defining the payment agreement request type. | Not applicable |
| Description | Used to specify the description for the payment agreement request type. | Yes |
| Payment Agreement Request Business Object | Used to indicate the business object that you want to use while creating the payment agreement request. | Yes |
| Detailed Description | Used to specify additional information about the payment agreement request type. | No |
| Status | Used to indicate the status of the payment agreement request type. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes |
| Status Change Notification Type | Used to indicate the notification type on the status change of payment agreement request type. The valid values are: <ul style="list-style-type: none"> Alert To Do Both | No |
| Approval Required | Used to indicate whether approval is required for creating payment agreement request using the payment agreement request type. | No |
| Approval To Do Type | Used to indicate that To Do of the specified To Do type must be created when you submit the payment agreement request for approval. <p>Note: This field appears when the Approval Required check box is selected.</p> | Yes (Conditional) <p>Note: This field is required when the Approval Required option is selected.</p> |
| Approval To Do Role | Used to indicate that users with the specified To Do role can only approve the payment agreement request submitted for approval. <p>Note: This field appears when the Approval Required check box is selected.</p> | Yes (Conditional) <p>Note: This field is required when the Approval Required option is selected.</p> <p>The list will include only those To Do roles which are associated with the To Do type specified in the Approval To Do Type field.</p> |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|--|
| Submitter To Do Type | Used to indicate the To Do type for the submitter when the payment agreement request is resubmitted by the approver. | Yes (Conditional) |
| | Note: This field appears when the Approval Required check box is selected. | Note: This field is required when the Approval Required option is selected. |
| Submitter To Do Role | Used to indicate the To Do role for the submitter when the payment agreement request is resubmitted by the approver. | Yes (Conditional) |
| | Note: This field appears when the Approval Required check box is selected. | Note: This field is required when the Approval Required option is selected. The list will include only those To Do roles which are associated with the To Do type specified in the Submitter To Do Type field. |

6. Enter the required details.
7. Define characteristics for the payment agreement request type, if required.
8. Click **Save**.

The payment agreement request type is defined.

Defining a Characteristic for a Payment Agreement Request Type

Prerequisites

To define a characteristic for a payment agreement request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Payment Agreement Request Type)

Procedure

To define a characteristic for a payment agreement request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a payment agreement request type.

The **Characteristics** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|--|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Payment Agreement Request Type. | Note: This field is required when you are defining a characteristic for the payment agreement request type. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the payment agreement request type. |

- Enter the required details.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the payment agreement request type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the payment agreement request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

Copying a Payment Agreement Request Type

Instead of creating a payment agreement request type from scratch, you can create a new payment agreement request type using an existing payment agreement request type. This is possible through copying a payment agreement request type. On copying a payment agreement request type, the details including the characteristics are copied to the new payment agreement request type. You can then edit the details, if required.

Prerequisites

To copy a payment agreement request type, you should have:

- Payment agreement request type (whose copy you want to create) defined in the application
- Payment agreement request business objects defined in the application
- The Payment Agreement Request Information algorithm is defined using the **C1-PA-INFO** algorithm type
- **C1-PAREQ** To Do Type assigned to a To Do role whose users must receive To Do generated while submitting a payment agreement request for approval

Procedure

To copy a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.

A sub-menu appears.

3. Click the **Search** option from the **Payment Agreement Request Type** sub-menu.

The **Payment Agreement Request Type** screen appears.

4. In the **Payment Agreement Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the payment agreement request type whose copy you want to create.

The **Payment Agreement Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the payment agreement request type.
- **Characteristics** – Used to define the characteristics for the payment agreement request type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---|--|-----------------------|
| Payment Agreement Request Type | Used to specify the payment agreement request type. | Yes |
| Business Object | Indicates the payment agreement request type business object used while defining the payment agreement request type (whose copy you want to create). | Not applicable |
| Description | Used to specify the description for the payment agreement request type. | Yes |
| Payment Agreement Request Business Object | Used to specify the business object that you want to use while creating the payment agreement request. | Yes |
| Detailed Description | Used to specify additional information about the payment agreement request type. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------|---|---|
| Status | Used to indicate the status of the payment agreement request type. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes |

Bill Details

The **Bill Details** zone lists unpaid debt bill details. You will not find any records in this zone if the payment agreement request list does not have any unpaid bills assigned to it. This zone contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Bill Information | Indicates the bill against which the payment agreement request is created. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Bill screen appears with the details of the respective bill. |
| Original Bill Amount | Displays the bill amount when the bill was generated. |
| Current Bill Balance | Displays the outstanding amount. |
| Due Date | Displays the due date of the bill. |

By default, the **Bill Details** zone does not appear in the **Payment Agreement Request** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the payment agreement request in the **Search Payment Agreement Request** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 4010.

Searching for a Payment Agreement Request

Prerequisites

To search for a payment agreement request, you should have:

- Payment agreement request types defined in the application

Procedure

To search for a payment agreement request:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Delinquency Management** and then click **Payment Agreement Request**.
A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request** sub-menu.
The **Payment Agreement Request** screen appears.
4. Enter the search criteria in the **Search Payment Agreement Request** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of payment agreement requests that meet the search criteria appears in the **Search Results** section.

Defining Payment Schedule for a Payment Agreement Request

Prerequisites

To define payment schedule for a payment agreement request:

- Scheduled date, sum of installments for overdue or unpaid bills defined in the application for which the payment is scheduled is set to **Payment Agreement Request**

Procedure

To define payment schedule for a Payment Agreement Request:

- Ensure that the **Payment Schedule** section is expanded when you are editing, submitting, approving, rejecting or resubmitting a payment agreement.

The **Payment Schedule** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------|--|---|
| Schedule Date | Used to indicate the date schedule for the payment. | Yes (Conditional) |
| | | Note: This field is required when you are defining a payment schedule for the payment agreement request. |
| Schedule Amount | Used to indicate the amount scheduled for overdue or unpaid bills to be paid in installments. Note: This field appears when you select a Schedule Date for the payment schedule. | Yes (Conditional) |
| | | Note: This field is required when you select a Schedule Date for the payment schedule. |
| Auto Pay ID | Used to indicate the auto pay id of the payor. Note: This field appears when you select auto pay method option for Pay Method . The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Auto Pay ID Search window appears. | No |
| | | |

2. Enter the required details.

Note: If you select a auto pay method option for **Pay Method**, the **Search** (🔍) icon appears corresponding to the **Auto Pay ID** field. On clicking the **Search** icon, you can search for a **Payor Account ID**.

3. If you want to define more than one payment schedule for the payment agreement request, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a payment schedule from the payment agreement request, click the **Delete** (🗑️) icon corresponding to the payment schedule.

Removing an Overdue Bill from a Payment Agreement Request**Prerequisites**

To remove an overdue bill from a payment agreement request, you should have:

- Bill details should be available to be removed from payment agreement request

Procedure

To delete a bill detail from payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen which is in **Draft** status.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose details you want to view.

By default, the **Main** tab of the **Payment Agreement Request** screen appears.

3. List of bill details are displayed in the **Bill Details** zone.
4. Select the check box corresponding to the bill which you want to delete from the payment agreement request.

You can delete more than one bill from the payment agreement request at the same time.

5. Click **Delete**.

A message appears indicating that selected bills have been successfully deleted from the payment agreement request.

6. Click **OK**.

Note that the bill is added in the **Search Bills** zone in the **Bills** tab.

Note: Bills in **Active** status cannot be deleted.

Approving a Payment Agreement Request

You can view the number of payment agreement requests which are pending for approval in the **Payment Agreement Request** screen. The approver can review, and accordingly approve or reject the payment agreement request based on the observations.

Note: The system will not allow you to approve or reject a payment agreement request submitted by you.

Procedure

To approve a payment agreement request:

1. Do either of the following:

| If you want to | Then |
|---|---|
| Approve a payment agreement request through the Payment Agreement Request screen | <ol style="list-style-type: none"> 1. Search for the payment agreement request in the Payment Agreement Request screen. 2. In the Search Results section, click the link in the Payment Agreement Request Information column corresponding to the payment agreement request which you want to review. |
| Approve a payment agreement request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter the to do type C1-PAREQ in the To Do Type field for the entity payment agreement request. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the payment agreement request that you want to review. |

The **Payment Agreement Request** screen appears.

2. Review the payment agreement request details.
3. Click the **Approve** button in the **Payment Agreement Request** zone.

The system behaves in the following manner:

| If you are... | Then |
|---------------------------------------|---|
| Approving a payment agreement request | The status of the payment agreement request is changed to Approval In Progress as specified in the payment agreement request type. |

Note: The **Approve** button appears when:

- The payment agreement request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the payment agreement request.

Rejecting a Payment Agreement Request

Prerequisites

To reject a payment agreement request, you should have:

- Rejection reasons defined in the application

Note:

While rejecting a payment agreement request, you need to specify the reason why you want to reject the payment agreement request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-PaymentAgreementRequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a payment agreement request submitted by you.

Procedure

To reject a payment agreement request:

1. Do either of the following:

| If you want to | Then |
|--|--|
| Reject a payment agreement request through the Payment Agreement Request screen | <ol style="list-style-type: none"> 1. Search for the payment agreement request in the Payment Agreement Request screen. 2. In the Search Results section, click the link in the Payment Agreement Request Information column corresponding to the payment request which you want to review. |

| If you want to | Then |
|--|---|
| Reject a payment agreement request from the To Do List screen | <ol style="list-style-type: none"> 1. Click the Menu link in the Application toolbar. A list appears. 2. From the Main menu, select To Do and then click To Do List. The To Do Type for User Search window appears. 3. Enter the to do type C1-PAREQ in the To Do Type field for the entity payment agreement request. 4. Click the Search button corresponding to the To Do Type field. The To Do List screen appears. 5. Select the Open option from the Filter by list to view all unassigned To Dos. 6. Click the link in the Message column corresponding to the To Do of the payment agreement request that you want to review. |

The **Payment Agreement Request** screen appears.

2. Review the payment agreement request details.
3. Click the **Reject** button in the **Payment Agreement Request** zone.

The **Reject Payment Request** window appears. It contains following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|---|-----------------------|
| Status Reason | Used to indicate the reason why you want to reject the payment agreement request. | Yes |
| Comments | Used to specify additional information while rejecting the payment agreement request. | No |

Note: The **Reject** button appears when:

- The payment agreement request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the payment agreement request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the payment agreement request is changed to **Rejected**.

Resubmitting a Payment Agreement Request

Prerequisites

To resubmit a payment agreement request, you should have:

- Entities added in the payment agreement request which is submitted for approval.

Procedure

To resubmit a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request that you want to resubmit.

The **Payment Agreement Request** screen appears.

3. Click the **Resubmit** button in the **Payment Agreement Request** zone.

The **Resubmit Payment Agreement Request** screen appears.

Note: The **Resubmit** button appears when the payment agreement request is in the **Approval In Progress** status.

A To Do of the **C1-PAREQ** To Do type is created and sent to the request submitter using the submitter TO DO Role and the status of the payment agreement request is changed to **Draft**.

4. Enter the comments in the respective field and click **Save**.

Note: While resubmitting, To Do will be sent to the submitter of the request using the submitter To Do Role mapped on the payment agreement request type and the request will be moved to Draft status. The submitter can do necessary changes and re submit the request. Log will be maintained when the approver sends the request back to submitter.

Filtering Overdue Bills of an Account

The **Search Bills** zone lists bills that are overdue for an account. You will not find any records in this zone if the payment agreement request does not have overdue bills in the account. This zone contains the following fields as search criteria:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Search By | Used to indicate whether you want to search for a payment agreement request using bill details. | Yes |
| | Note: By default, the Bill Details option is selected. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------|--|-----------------------|
| Bill ID | Used to search for a particular bill. | No |
| | Note: The Search (🔍) icon appears corresponding to the field. On clicking the Search icon, the Bill Search window appears. | |
| Bill Date From | Used to search bills which are created from a particular date onwards. | No |
| To | Used to search bills which are created till a particular date. | No |

By default, the **Search Bills** zone appears in the **Bills** tab of **Payment Agreement Request** screen. By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (🔼) icon in the upper right corner of this zone.

By default, the search results section displays the following columns:

| Column Name | Column Description |
|-----------------------------|--|
| Bill ID | Displays the bill ID. |
| Bill Information | Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Bill screen appears with the details of the respective bill. |
| Unpaid Amount | Displays the amount which is eligible for payment agreement request against the bill. |
| Overdue Process Information | Displays the overdue process information for the bill. |

Adding an Overdue Bill in a Payment Agreement Request

Prerequisites

To add an overdue bill in a payment agreement request, you should have:

- Overdue bills should be available for accounts to add in payment agreement request

Procedure

To add an overdue bill in a payment agreement request:

Note: A bill with outstanding amount greater than zero which is not part of an overdue process will be allowed to be added in a payment agreement request. While a bill with negative outstanding amount will not be allowed to be added in a payment agreement request.

1. Search for the payment agreement request in the **Payment Agreement Request** screen which is in **Draft** or **Active** status.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose details you want to view.
The **Payment Agreement Request** screen appears.
3. Click the **Bills** tab.
The **Bills** tab appears.
4. Enter the search criteria in the **Search Bills** zone.
In the **Search Results** section, list of bills meeting the search criteria are displayed.
5. Select the check box corresponding to the bill which you want to add to the payment agreement request from the **Search Results** section.
You can add more than one bill to the payment agreement request at the same time.
6. Click **Add**.
A message appears indicating that selected bills have been successfully added to the payment agreement request.
7. Click **OK**.
Note that the bill is added in the **Bill Details** zone in the **Main** tab.

Viewing the Log of a Payment Agreement Request

Procedure

To view the log of a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose log you want to view.

The **Payment Agreement Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following three zones:
 - **Payment Agreement Request** – Displays the details of the payment agreement request.
 - **Bill Details** – Lists the bill details of the payment agreement request.
 - **Payment Schedule** – Lists the payment schedule details of the bills for the payment agreement request.
- **Bills** – This tab lists the unpaid bill amount details for the same account.

Note: This tab will be displayed when the payment agreement is in **Draft** status.

- **Log** – This tab lists the complete trail of actions performed on the payment agreement request.

3. Click the **Log** tab.

The **Payment Agreement Request Log** zone in the **Log** tab contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Date/Time | Displays the date and time when the action was performed on the payment agreement request. |
| Details | Displays the details about the action performed on the payment agreement request. |
| User | Indicates the user who has performed the action on the payment agreement request. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the payment agreement request. |
| Status Reason | Indicates the reason why the payment agreement request was rejected. |
| Old Payment Schedule | Displays the details of old payment schedule. |

Note: You can manually add a log entry for the payment agreement request by clicking the **Add Log Entry** link in the upper right corner of the **Payment Agreement Request Log** zone.

Adding a Log Entry for a Payment Agreement Request

Procedure

To add a log entry for a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose log you want to edit.

The **Payment Agreement Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following three zones:
 - **Payment Agreement Request** – Displays the details of the payment agreement request.
 - **Bill Details** – Lists the bill details of the payment agreement request.
 - **Payment Schedule** – Lists the payment schedule details of the bills for the payment agreement request.
- **Bills** – This tab lists the unpaid bill amount details for the same account.

Note: This tab will be displayed when the payment agreement is in **Draft** status.

- **Log** – This tab lists the complete trail of actions performed on the payment agreement request.

3. Click the **Log** tab.

The **Log** tab appears.

- Click the **Add Log Entry** link in the upper right corner of the **Payment Agreement Request Log** zone.

The **Add Payment Agreement Request Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------------|--|-----------------------|
| Payment Agreement Request Information | Displays information about the payment agreement request. | Not applicable |
| Log Details | Used to specify additional comments for the payment agreement request. | Yes |

- Enter the comments in the **Log Details** field.
- Click **Save**.

The log entry is added in the **Payment Agreement Request Log** zone.

Chapter 31

Inbound Message

Topics:

- [Health Care Inbound Message](#)
- [Health Product and Plan Inbound Message](#)
- [Inbound Message Type](#)
- [Inbound Message \(Used for Searching\)](#)
- [Inbound Message \(Used for Viewing\)](#)
- [Statement Construct Preference](#)

Oracle Revenue Management and Billing enables you to create the following inbound messages through the respective inbound web services:

| Inbound Message | Inbound Web Service |
|--|--|
| Health Care Inbound Message on page 2160 | C1-HCInboundMessage on page 2484 |

Once an inbound message is created, you can submit the inbound message for validation and processing from the user interface or through a batch process. The following table lists the batches which validate and process the respective inbound message at regular intervals:

| Inbound Message | Batch Control Name |
|-----------------------------|---|
| Health Care Inbound Message | Health Care Inbound Message Periodic Monitor (C1-HCINB) |

For more information about the batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

Health Care Inbound Message

On calling the **C1-HCInboundMessage** web service, you can create a health care inbound message using a health care inbound message type. You can create a health care inbound message type using the **Health Care Inbound Message Type (C1-HCInboundMsgType)** business object. The health care inbound message type helps the system to determine:

- **Inbound Message Business Object** - The business object using which the health care inbound message should be created in the system. You must specify the **Health Care Inbound Message (C1-HCInboundMessage)** business object in the health care inbound message type.
- **Customer Registration Type** - The health care inbound message creates the person, account, policy, and policy plan through a customer registration object. The system creates the customer registration object using the customer registration type specified in the health care inbound message type. The customer registration type helps the system to determine:
 - **Customer Registration Business Object** - The business object using which the customer registration object should be created in the system. You must specify the **Customer Registration - Health Care (C1-CustomerRegistrationHC)** business object in the customer registration type.
 - **Person Business Object** - The business object using which the person should be created in the system. You must specify the **Person BO (C1_PERSON_BO)** business object in the customer registration type.
 - **Account Business Object** - The business object using which the account should be created in the system. You must specify the **Account BO (C1-AccountBO)** business object in the customer registration type.
 - **Policy Plan Business Object** - The business object using which the policy plan should be created in the system. You must specify the **Policy Plan (C1-PolicyPlan)** business object in the customer registration type.
 - **Membership Business Object** - The business object using which the membership should be created in the system. You must specify the **Membership (C1-Membership)** business object in the customer registration type.
 - **Address Business Object** - The business object using which the effective dated address should be created in the system. You must specify the **Address (C1-Address)** business object in the customer registration type.

While creating a health care inbound message type for the fully-insured group health insurance business, you must use a customer registration type where the **Approval Required**, **Final Approval Required**, and **Manual Billing Hierarchy and Pricing** options are not selected. However, while creating a health care inbound message type for the self-funded health insurance business, you must use a customer registration type where the **Final Approval Required** and **Manual Billing Hierarchy and Pricing** options are selected, but the **Approval Required** option is not selected.

The following table lists the various activities that you can perform for the respective combination through the **C1-HCInboundMessage** web service:

| Person Type | Policy Category | Enables you to: |
|-----------------|---------------------|---|
| Parent Customer | Self-Funded | <ul style="list-style-type: none"> • Create or edit a parent customer • Create or edit a bill group of the parent customer • Create the derivation and pricing parameters for the bill group • Create or edit the accounts of a bill group • Create or edit the policies of a bill group |
| | Fully-Insured Group | <ul style="list-style-type: none"> • Create or edit a parent customer • Create or edit a bill group of the parent customer |

| Person Type | Policy Category | Enables you to: |
|-----------------------|---------------------|---|
| | | <ul style="list-style-type: none"> • Create the derivation and pricing parameters for the bill group • Create or edit the accounts of the parent customer and bill group • Create or edit the policies of the parent customer and bill group • Create or edit the plans of the policies • Associate one or more pricing rule types with a policy plan • Create or edit the pricing rules of the policy plans • Terminate, reinstate, or renew policies of the parent customer and bill group |
| Bill Group | Self-Funded | <ul style="list-style-type: none"> • Create or edit a bill group • Create the derivation and pricing parameters for the bill group • Create or edit the accounts of the bill group • Create or edit the policies of the bill group |
| | Fully-Insured Group | <ul style="list-style-type: none"> • Create or edit a bill group • Create the derivation and pricing parameters for the bill group • Create or edit the accounts of the bill group • Create or edit the policies of the bill group • Create or edit the plans of the policies • Associate one or more pricing rule types with a policy plan • Create or edit the pricing rules of the policy plans • Terminate, reinstate, or renew policies of the bill group |
| Any Other Person Type | - | <ul style="list-style-type: none"> • Create or edit a person • Credit or edit the accounts of the person • Create or edit the memberships of the policy plans • Add or remove members from a membership • Create or edit the one-time or recurring pass-through billable charges for a membership • Create or edit the benefits charges for a membership |

The following table describes how the system behaves when the respective entity information is given in a health care inbound message:

| Entity | System Behavior |
|---------|---|
| Person | <p>The system uses the C1-PERSTYPE feature configuration to decide whether the person type specified in the health care inbound message represents Parent Customer or Bill Group. If the person type specified in the health care inbound message matches the person type specified in the Bill Group Person Type or Parent Person Type option type of the C1-PERSTYPE feature configuration, the system creates or updates the person, account, policy, policy plan, and address through a customer registration object. Note that the memberships, pass-through billable charges, and pricing rules are created directly and not via customer registration object. However, if the person type specified in the health care inbound message does not match the person type specified in the Bill Group Person Type or Parent Person Type option type, the system creates or updates the person and its other entities directly and not through a customer registration object. In this case, the system only refers the customer registration type for the business objects using which the person, account, policy plan, membership, and address should be created or updated in the system.</p> <p>If the related person information is given for a bill group and the person type of the related person is Parent Customer, then the bill group is related to the parent customer using the person relationship type which is specified in the Person Relationship Type option type of the C1-ASOBLNG feature configuration.</p> <p>If the derivation and pricing parameters are specified for a bill group, the system automatically creates one sort record for the bill group. Here, the sort ID is set to the bill group ID. The start and end dates of the sort record are set to the bill group and parent customer's relationship start and end dates. Once the sort record is created, the system creates the derivation and pricing parameters for the bill group and sort ID combination.</p> <p>Note: The system supports the Add and Update operations for all entities except the derivation and pricing parameters for the bill group. Through the health care inbound message, each time, the system creates a new derivation and pricing parameters record for the bill group and does not update the existing derivation and pricing parameters record of the bill group.</p> |
| Account | <p>While creating an account, the system defines the Invoice Type characteristic for the account. It stores the account type given in the account information in the characteristic type which is specified in the Invoice Type Characteristic Type option type of the C1-ASOBLNG feature configuration.</p> |
| Policy | <p>If the fully-insured group policy information is given for a bill group, the system does the following:</p> <ul style="list-style-type: none"> • Associates the bill group with the policy using the policy person role which is specified in the Bill Group Policy Person Role option type of the C1-ASOBLNG feature configuration • Associates the parent customer with the policy using the policy person role which is specified in the Parent Customer Policy Person Role option type of the C1-ASOBLNG feature configuration <p>However, if the fully-insured group policy information is given for a parent customer, the system does the following:</p> <ul style="list-style-type: none"> • Associates the parent customer with the policy using the policy person role which is specified in the Parent Customer Policy Person Role option type of the C1-ASOBLNG feature configuration <p>If the self-funded policy information is given for a bill group, the system does the following:</p> |

| Entity | System Behavior |
|-------------------|---|
| | <ul style="list-style-type: none"> • Associates the bill group with the policy using the policy person role which is specified in the Bill Group Policy Person Role option type of the C1-ASOBLLNG feature configuration • Associates the parent customer with the policy using the policy person role which is specified in the Parent Customer Policy Person Role option type of the C1-ASOBLLNG feature configuration <p>On renewing a fully-insured group policy, the system removes the end date from the policy and stamps the renewal date against the policy.</p> <p>Note: You can renew a policy where the policy category is set to Self-Funded from the user interface and not through a health care inbound message. However, you can renew a policy where the policy category is set to Fully-Insured Group through a health care inbound message and not from the user interface.</p> <p>On terminating a fully-insured group policy, the system updates the end date of the following entities with the termination date:</p> <ul style="list-style-type: none"> • Policy • Policy Person • Policy Plan • Membership • Membership Person • Pricing Rule <p>However, before updating the end dates, the system stores the original end date in the ORG_END_DT column of the respective table for all the above entities. The status of the policy is changed to the status which is specified in the Policy Termination Status option type of the C1-ASOBLLNG feature configuration.</p> <p>On reinstating a fully-insured group policy, the system updates the end date of the above entities with the original end date. In addition, the status of the policy is changed to the status which is specified in the Policy Reinstatement Status option type of the C1-ASOBLLNG feature configuration.</p> <p>Note: The Policy entity is applicable only for Self-Funded Group Health Insurance and Fully-Insured Group Health Insurance businesses.</p> |
| Policy Plan | <p>While creating a policy plan, the system requires either the price item or at least one pricing rule type. The system allows you to associate only those pricing rule types where the category is set to Age Based, Tier Based, or Pass-Through Billable Charge.</p> <p>Note: The Policy Plan entity is applicable only for Self-Funded Group Health Insurance and Fully-Insured Group Health Insurance businesses.</p> |
| Pricing Rule Type | <p>The system does not allow you to create or update a pricing rule type through a health care inbound message.</p> <p>Note: The Pricing Rule Type entity is applicable for Self-Funded Group Health Insurance, Fully-Insured Group Health Insurance and Individual Health Insurance businesses.</p> |

| Entity | System Behavior |
|------------------------------|---|
| Pricing Rule | <p>The system allows you to define and edit the age-based and tier-based pricing rules of the policy plan. Note that the system supports the Replace operation and not the Update operation when you are editing these pricing rules through a health care inbound message.</p> <p>Note:</p> <p>You can define and edit the age-based and tier-based pricing rules through a health care inbound message and not from the user interface.</p> <p>You can create the following pricing rules from the user interface and not through a health care inbound message:</p> <ul style="list-style-type: none"> • Claim • Specific Stop-Loss • Aggregate Stop-Loss • Retention Type Claim Based • Retention Type Enrollment Based • One-Time Flat Fees • Recurring Flat Fees • Ancillary • Discount Arrangement • Level Funded <p>Note: The Pricing Rule entity is applicable for Self-Funded Group Health Insurance, Fully-Insured Group Health Insurance, and Individual Health Insurance businesses.</p> |
| Pass-Through Billable Charge | <p>If the price item, account identifier type, and account identifier are given in the billable charge information, the system directly creates an SQI based billable charge when you process the health care inbound message. But, if only the price item is given in the billable charge information, the system checks whether the price item is included in any pricing rule type where the pricing rule type category is set to Pass-Through Billable Charge. If so, the system checks whether the pass-through billable charge pricing rule type is associated with the policy plan to which the membership belongs (for which the billable charge information is received). If so, the system creates an SQI based billable charge using the respective pass-through billable charge pricing rule type.</p> <p>Note: The Pass-Through Billable Charge entity is applicable only for Fully-Insured Group Health Insurance and Individual Health Insurance business.</p> |

The following table recommends the sequence in which the respective entities should be created for the different line of business through a separate healthcare inbound message.

| Line of Business | Sequence | Entity |
|--------------------------------------|----------|---|
| Fully-Insured Group Health Insurance | 1 | Parent Customer (along with policy details) |
| | 2 | Bill Groups (along with policy details) |

| Line of Business | Sequence | Entity |
|------------------------------------|----------|--|
| | 3 | Pricing Rules |
| | 4 | Member Persons (along with policy details) |
| Individual Health Insurance | 1 | Member Person (along with health product, health plan, and pricing rule details) |
| Self-Funded Group Health Insurance | 1 | Parent Customer (along with policy details) |
| | 2 | Bill Groups (along with policy details) |
| | 3 | Pricing Rules |
| | 4 | Member Persons (along with policy details) |

The following table lists the details which you need to provide either in full or partial while editing the entity information through a health care inbound message.

| Entity | Information | Tag Name | In case of edit, you need to provide details in... |
|---------|-----------------------|-----------------------|--|
| Person | Person Name | <personName> | All the tags within the <personName> tag |
| | Identifiers | <identifiers> | All the tags within the <identifiers> tag |
| | Address | <address> | The following tags within the <address> tag: <ul style="list-style-type: none"> • <addressEffDate> • <addressType> |
| | Phones | <phones> | All the tags within the <phones> tag |
| | Related Persons | <relatedPersons> | All the tags within the <relatedPersons> tag |
| | Characteristics | <characteristics> | The following tags within the <characteristics> tag: <ul style="list-style-type: none"> • <characteristicType> • <effectiveDate> |
| | Bill Level Parameters | <billLevelParameters> | The following tag within the <billLevelParameters> tag: <ul style="list-style-type: none"> • <sequence> |
| Account | Identifiers | <identifiers> | All the tags within the <identifiers> tag |

| Entity | Action | You need to provide the details in the following tags... |
|--------|--------|--|
| | | <pre><membershipPersonStatus></membershipPersonStatus> <membershipPersonstatusReason></membershipPersonstatusReason> </memberData></pre> |

On calling the **C1-HCInboundMessage** web service, a health care inbound message is created in the **Pending** status. When the **Health Care Inbound Message Periodic Monitor (C1-HCINB)** batch is executed, the system checks whether there are any health care inbound messages in the **Pending** status. If there is a health care inbound message in the **Pending** status, the system validates the inbound message. If the health care inbound message is successfully validated, it is processed further and the entities are either created or updated in the system based on the available information.

Alternatively, the system enables you to submit the health care inbound messages for validation and processing from the user interface. On submitting a health care inbound message, the system validates the health care inbound message. If a health care inbound message is successfully validated, it is processed further and the required entities are created or updated in the system based on the available information.

If the person type is **Parent Customer**, the customer registration object is created in the **Complete** status. However, if the person type is **Bill Group**, the customer registration object is created in the **Bill Group Approved** status. The policies are created in the **In Force/Active** status and the pricing rules are created in the **Active** status. Finally, the status of the health care inbound message is changed to **Processed**.

Note: The above status transition is mentioned for a customer registration object based on the assumption that the data sent through the health care inbound message will be pre-approved and does not require any approval in the system.

If any error occurs while validating or processing a health care inbound message, the status of the health care inbound message is changed to **Rejected**. The system enables you to either reprocess or void a rejected health care inbound message. The system can reprocess a health care inbound message when its status is changed to **Pending**. Using the **Retry** option, you can change the status of the health care inbound message from **Rejected** to **Pending**. The **Health Care Inbound Message Periodic Monitor (C1-HCINB)** batch will then reconsider and reprocess the health care inbound message.

You can also configure the system such that the batch can automatically retry to process the rejected health care inbound messages. However, it will attempt to retry when the **Maximum Retry** parameter in the **Retry for To Dos (C1-TODORETRY)** algorithm is set to a value greater than zero. Also, the maximum number of times the batch can attempt to retry and reprocess a health care inbound message depends on the value defined in the **Maximum Retry** parameter.

At present, if a customer registration object is created through a health care inbound message, you cannot edit the customer registration object from the user interface. You can only edit such customer registration objects through a health care inbound message.

| How to setup the C1-PERSTYPE feature configuration | Setting the C1_PERSTYPE Feature Configuration on page 4061 |

Prerequisites

To use the health care inbound message feature, you need to do the following:

- Define the required customer registration types in the system.

Note: The health care inbound message creates the person, account, policy, and policy plan through a customer registration object. The system creates the customer registration object using the customer registration type specified in the health care inbound message type. While creating a health care inbound message type for the fully-insured group health insurance business, you must use a customer registration type where the **Approval Required**, **Final Approval Required**, and **Manual Billing Hierarchy and Pricing** options are not selected. However, while creating a health care inbound message type for the self-funded health insurance business, you must use a customer registration type where the **Final Approval Required** and **Manual Billing Hierarchy and Pricing** options are selected, but the **Approval Required** option is not selected.

- Define the required health care inbound message types in the system.
- Define the required characteristic types where the characteristic entity is set to **Inbound Message Type**.
- Define the required characteristic types where the characteristic entity is set to **Inbound Message**.
- Define the values for the required parameters in the **C1-HCINVAL**, **C1-HCINPROC**, **C1-TODORETRY**, and **C1-TDCRINMSG** algorithms.
- Define the values for the **C1-SourceSystemLookup** and **C1-ExtLookRetTypeRateOpt** extendable lookups.
- Define the values for the **HOUSE_TYPE**, **PER_OR_BUS_FLG**, **NAME_TYPE_FLG**, **ADDRESS_TYPE_FLG**, **BILL_ADDR_SRCE_FLG**, **BILL_FORMAT_FLG**, and **RUNOUT_ADM_OPT_FLG** lookup fields.
- Set the values for the following option types in the **C1-ASOBLLNG** feature configuration:
 - Person Relationship Type
 - Bill Group Policy Person Role
 - Parent Customer Policy Person Role
 - Invoice Type Characteristic Type
 - Policy Termination Status
 - Policy Reinstatement Status
 - Default Rate Option – Flat
 - Default Rate Option – Percentage
 - Age Based Parameter
 - Membership Inactive Status
 - Member Person Inactive Status
- Set the values for the following option types in the **C1-PERSTYPE** feature configuration:
 - Bill Group Person Type
 - Parent Person Type
- Define the required person identifier types, account identifier types, person relationship types, characteristic types, phone types, customer classes, bill cycles, collection classes, divisions, bill route types, charge types, currencies, bill periods, invoice frequencies, distribution codes, auto pay route types, auto pay sources, account relationship types, policy types, policy person roles and contract relationship types in the application.
- Define the values for the **C1_INVOICE_DAY_BILL_PERIOD_FLG** lookup field.

Note: Each lookup field value should be mapped to a valid bill period which exists in the system. You must then define this lookup field value as a predefined value for the **C1OFFRST** characteristic type. The system will then use the bill period configured for the respective invoice day when the **C1OFFRST** characteristic is defined for the account.

- Define the required predefined values for the **C1OFFRST** characteristic type.

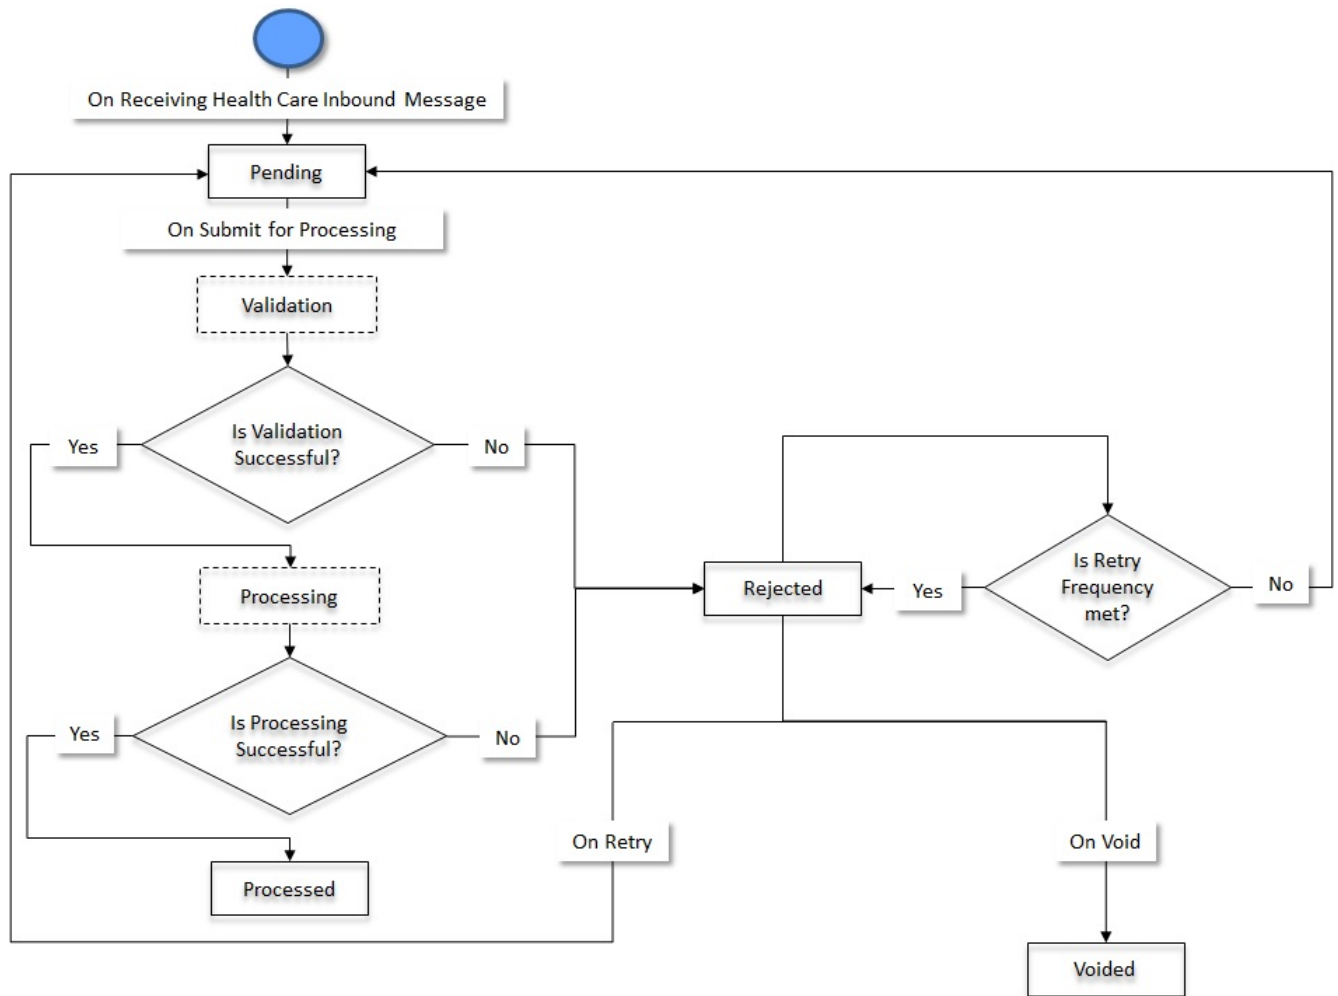

- Set the batch control type of the **Health Care Inbound Message Periodic Monitor (C1-HCINB)** batch to **Timed** and define the following attributes:
 - Time Interval
 - Timer Active
 - User ID
 - Batch Language
 - Email Address
- Define the required status reasons for the status to which a policy must be transitioned on policy termination.
- Define the required status reasons for the status to which a policy must be transitioned on policy reinstatement.
- Define the bill cancel reasons which you want to use when the premium bill segment is canceled during the policy or membership termination.
- Define the required exchange rates in the system.
- Define the required access groups in the system.
- Attach a currency conversion algorithm to the **Currency Conversion For Bill Segments** algorithm spot of the required divisions.

Health Care Inbound Message Status Transition through User Interface

The following figure graphically indicates how a health care inbound message moves from one status to another when it is validated and processed through the user interface:

Health Care Inbound Message Status Transition through a Batch Process

The following figure graphically indicates how a health care inbound message moves from one status to another when it is validated and processed through the **Health Care Inbound Message Periodic Monitor (C1-HCINB)** batch:

Algorithms Used in C1-HCInboundMessage

The following table lists the algorithms which are used in the lifecycle of the **C1-HCInboundMessage** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|------------|--------------|-------------|----------------|--|
| Pending | Monitor | C1-AT-RQJ | C1-GEN-BOMNJ | Refer to C1-AT-RQJ on page 2173. |
| Validation | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | Refer to F1-AT-RQJ on page 1659. |
| | Enter | C1-HCINVAL | C1-HCINVAL | Refer to C1-HCINVAL on page 2173. |
| Processing | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | Refer to F1-AT-RQJ on page 1659. |
| | Enter | C1-HCINPROC | C1-HCINPROC | Refer to C1-HCINPROC on page 2174. |

| Status | System Event | Algorithm | Algorithm Type | Description |
|-----------|--------------|--------------|----------------|---|
| Rejected | Monitor | C1-TODORETRY | C1-TODORETRY | Refer to C1-TODORETRY on page 2174. |
| | Enter | C1-TDCRINMSG | F1-TDCREATE | Refer to C1-TDCRINMSG on page 2175. |
| Processed | - | - | - | - |
| Voided | - | - | - | - |

C1-AT-RQJ

This algorithm is invoked when the status of the customer or membership inbound message is changed to **Pending**. If the **isRetried** flag in the inbound message is set to **true**, it resets the flag to **false**.

It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

Note: At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-HCINVAL

Health Care Inbound Message - Validation

This algorithm is invoked when you execute the **Health Care Inbound Message Periodic Monitor (C1-HCINB)** batch or click the **Submit for Processing** button in the **Inbound Message** screen. It validates the health care inbound message which is in the **Pending** status. It checks the following:

- Whether the details of the parent customer are given in the bill group information.
- Whether the primary identifier is specified for the parent customer and bill group.
- Whether multiple primary identifiers are not specified for the parent customer and bill group.
- Whether the expiration year and month are specified in the account's auto pay details when the **Expiration Date Required** option is selected for the tender type which is specified in the auto pay source.
- Whether the expiration year is not earlier than 1755.
- Whether the expiration month lies between 1 and 12.

If the validation fails due to any reason, the status of the health care inbound message is changed to **Rejected**. In addition, the appropriate log entry is added which you can view in the **Inbound Message Log** zone.

It contains the following parameters:

- **Next Status** - Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** - Used when you want to override the default next transition condition specified in the lifecycle.

Note: At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-HCINPROC

This algorithm is invoked once a health care inbound message is successfully validated. It processes the health care inbound message and creates or updates the parent customers, bill groups (including derivation and pricing parameters for the bill group), accounts, self-funded or fully-insured group policies, policy plans, memberships, member persons, pass-through billable charges, and pricing rules. In addition, it allows you to terminate, reinstate, and renew a fully-insured group policy.

If the person type specified in the health care inbound message matches the person type specified in the **Bill Group Person Type** or **Parent Person Type** option type of the **C1-PERSTYPE** feature configuration, the system creates or updates the person, account, policy, policy plan, and address through a customer registration object. The memberships, pass-through billable charges, and pricing rules are created directly and not via customer registration object. However, if the person type specified in the health care inbound message does not match the person type specified in the **Bill Group Person Type** or **Parent Person Type** option type of the **C1-PERSTYPE** feature configuration, the system creates or updates the person and its other entities directly and not through a customer registration object. In this case, the system only refers the customer registration type for the business objects using which the person, account, policy plan, membership, and address should be created or updated in the system.

If the processing fails due to any reason, the status of the health care inbound message is changed to **Rejected**. In addition, the appropriate log entry is added which you can view in the **Inbound Message Log** zone.

It contains the following parameters:

- **Next Status** - Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** - Used when you want to override the default next transition condition specified in the lifecycle.

Note: At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-TODORETRY

This algorithm is invoked when the status of the customer or membership inbound message is changed to **Rejected**. It checks whether the maximum retry attempts are met. If the retry attempt is less than or equal to the value defined in the **Maximum Retry** parameter, the status of the inbound message is changed to **Pending**. However, if the retry attempt is greater than the value defined in the **Maximum Retry** parameter, the status of the inbound message remains as **Rejected**.

Note: This algorithm is invoked when the customer or membership inbound message is validated and processed through the batch process.

It contains the following parameters:

- **Maximum Retry** – Used to specify the maximum number of times the inbound message can be revalidated and reprocessed on failure.
- **Maximum Retry Element Name** – This parameter is not used at the moment.

If you do not specify any value for the **Maximum Retry** parameter, the system uses the value defined in the **To Do Maximum Retries** status option (which is defined in the lifecycle of the **C1-CustomerInboundMessage** and **C1-MemberInboundMessage** business object) to check whether the maximum retry attempts are met. If the value is not specified for the **To Do Maximum Retries** status option, the system does not allow revalidating and reprocessing an inbound message, and the status of the inbound message remains as **Rejected**.

C1-TDCRINMSG

This algorithm is invoked when the status of the customer or membership inbound message is changed to **Rejected**. It creates a To Do using the specified To Do type and assigns it to users with the specified To Do role.

It contains the following parameters:

- **To Do Type** - Used to specify the type of notification that you want to generate when the inbound message validation or processing fails.
- **To Do Role** - Used to specify the To Do role to indicate the users to whom you want to send the notification when the inbound message validation or processing fails.

The rest of the parameters, such as **To Do Type Element Name**, **To Do Role Element Name**, **Message Category**, **Message Number**, **Characteristic Type For Log Entry**, **To Do Sort Keys Retriever Script**, **Discard Cancel Terminate Reason Element**, **Discard Cancel Terminate Reason**, **Retry Frequency**, and **Retry Frequency Element Name**, are not used at the moment.

Health Care Inbound Message XML Format

Note: We recommend you to refer the Health Care Inbound Message schema in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the schema.

Before calling the **C1-HCInboundMessage** inbound web service, you need to ensure that the health care inbound message contains the following tags:

| Tag Name | Tag Description | Mandatory (Yes or No) | | | | | | |
|-------------------------------|--|-------------------------------|---|--------|---|------------|---|-----|
| schema | Used to specify the tags of a health care inbound message. | Yes | | | | | | |
| bo | Used to indicate the business object using which the health care inbound message should be created in the system. The valid value is: <ul style="list-style-type: none"> • C1-HCInboundMessage | Yes | | | | | | |
| messageType | <p>You can use this tag within the following tags:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 30%;">If this tag is used within...</th> <th>Then the purpose of the messageType tag is...</th> </tr> </thead> <tbody> <tr> <td>schema</td> <td>Indicates the health care inbound message type using which the health care inbound message is created in the system. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;">Note: The system refers the value from within the headerData tag.</div> </td> </tr> <tr> <td>headerData</td> <td>Used to specify the health care inbound message type using which the health care inbound message should be created in the system.</td> </tr> </tbody> </table> | If this tag is used within... | Then the purpose of the messageType tag is... | schema | Indicates the health care inbound message type using which the health care inbound message is created in the system. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;">Note: The system refers the value from within the headerData tag.</div> | headerData | Used to specify the health care inbound message type using which the health care inbound message should be created in the system. | Yes |
| If this tag is used within... | Then the purpose of the messageType tag is... | | | | | | | |
| schema | Indicates the health care inbound message type using which the health care inbound message is created in the system. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;">Note: The system refers the value from within the headerData tag.</div> | | | | | | | |
| headerData | Used to specify the health care inbound message type using which the health care inbound message should be created in the system. | | | | | | | |

| personStatementConstruct | Used to specify a characteristic for the person. | | | | | |
| billLevelParameters | Used to specify the derivation and pricing parameters for the bill group. | No | | | | |
| billLevelInfo1 | Used to specify the employee attribute based on which you want to derive the bill group. | Yes (Conditional) | | | | |
| | Note: You must not specify the ampersand (&) character in the value. | Note: This data is required while defining the derivation and pricing parameters for a bill group. | | | | |
| billLevelInfo2 | Used to specify the employee attribute based on which you want to derive the bill group. | No | | | | |
| | Note: You must not specify the ampersand (&) character in the value. | | | | | |
| billLevelInfo3 | Used to specify the employee attribute based on which you want to derive the bill group. | No | | | | |
| | Note: You must not specify the ampersand (&) character in the value. | | | | | |
| billLevelInfo4 | Used to specify the employee attribute based on which you want to derive the bill group. | No | | | | |
| | Note: You must not specify the ampersand (&) character in the value. | | | | | |
| memberData | Used to specify basic information about the membership. | Yes (Conditional) | | | | |
| | Note: This tag is applicable only for the Self-Funded Group Health Insurance, Fully-Insured Group Health Insurance, and Individual Health Insurance businesses. | Note: This data is required while defining or editing the membership details of a person. | | | | |
| memberId | Used to specify the external membership ID. | No | | | | |
| | Note: Here, you need to specify a membership ID which is maintained in the external source system. | | | | | |
| memberRelationship | Used to indicate how the main subscriber is related to the membership. | Yes (Conditional) | | | | |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|---------------------------------|---|--|
| | | Note: This data is required while defining or editing the membership details of a person. |
| membershipPersonStatus | Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes |
| membershipPersonStatusReason | Used to indicate the reason why you want to change the status of the member person. | Yes |
| autoRenew | Used to indicate whether the individual membership should be automatically renewed. <p>Note: This tag is applicable only for the Individual Health Insurance business.</p> | No |
| associatedMemberIdentifierType | Used to indicate the associated membership identifier type. <p>Note: This tag is applicable only for the Individual Health Insurance business.</p> | Yes (Conditional) <p>Note: This field is required when the associated membership identifier is specified.</p> |
| associatedMemberIdentifierValue | Used to specify the value for associated membership identifier type. <p>Note: This tag is applicable only for the Individual Health Insurance business.</p> | Yes (Conditional) <p>Note: This field is required when the associated membership identifier type is specified.</p> |
| exchangeFlag | Used to indicate whether the individual membership is purchased from the exchange. <ul style="list-style-type: none"> Off On <p>Note: This tag is applicable only for the Individual Health Insurance business.</p> | Yes (Conditional) <p>Note: This field is required when you have purchased the individual membership from an exchange.</p> |
| exchangeId | Used to specify the exchange from where the individual membership is purchased. <p>Note: This tag is applicable only for the Individual Health Insurance business.</p> | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|------------------------|--|---|
| | | Note: This field is required when you have purchased the individual membership from an exchange. |
| binderLiabilityAmount | Used to specify the binder liability amount. | Yes (Conditional) |
| | Note: This tag is applicable only for the Individual Health Insurance business. | Note: This field is required when the Consider Binder Liability Amount attribute is set to Y in the binder payment preference. |
| binderPayApplicability | Used to indicate that the system should monitor whether the binder payment is received before activating the individual membership. The valid values are: <ul style="list-style-type: none"> • Y • N | Yes |
| | Note: This tag is applicable only for the Individual Health Insurance business. | |
| binderPayGraceDays | Used to specify the days which are used to calculate the grace date for the individual membership. | No |
| | Note: This tag is applicable only for the Individual Health Insurance business. | |
| binderPayThreshold | Used to specify the threshold percentage using which the threshold amount should be calculated. | No |
| | Note: This tag is applicable only for the Individual Health Insurance business. | |
| holdBilling | Used to indicate whether you want to hold the bill generation process for the individual membership until the binder payment is received. The valid values are: <ul style="list-style-type: none"> • Y • N | Yes |
| | Note: This tag is applicable only for the Individual Health Insurance business. | |
| membershipRenewalDate | Used to indicate the date when the individual membership should be renewed. | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|---------------------------|---|---|
| | <p>Note:</p> <p>Renewal date is required for manual renewal of the individual membership. In case of automatic renewal, the membership renewal date is calculated by the system.</p> <p>This tag is applicable only for the Individual Health Insurance business.</p> | <p>Note: This field is required when you manually want to renew the individual membership.</p> |
| contractPeriod | <p>Used to indicate the period (in months) for which the individual membership should be automatically renewed.</p> <p>Note: This tag is applicable only for the Individual Health Insurance business.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required if you have entered the membership renewal date.</p> |
| membershipIdentifier | <p>Used to specify one or more identifiers for the individual membership.</p> <p>Note: This tag and all the tags within this parent tag are applicable only for the Individual Health Insurance business.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing the individual membership details of a person.</p> |
| membershipIdentifierType | <p>Used to indicate the membership identifier type.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the membership identifier is specified.</p> |
| membershipIdentifierValue | <p>Used to specify the value for the membership identifier type.</p> | <p>Yes (Conditional)</p> <p>Note: This field is required when the membership identifier type is specified.</p> |
| isMemberSw | <p>Used to indicate whether the person is a member or a non-member in the membership. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No | No |
| isFinanciallyResponsible | <p>Used to indicate whether the person is financially responsible for the membership. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No | No |
| membershipType | <p>You can use this tag within the following tags:</p> | No |

| | Note: This tag is applicable only for the Self-Funded Group Health Insurance and Fully-Insured Group Health Insurance businesses. | | | | | |
| healthPlanCode | Used to indicate the health plan for which the main subscriber has enrolled. Note: This tag is applicable only for the Individual Health Insurance business. | Yes | | | | |
| membershipRateGuarantee | Used to specify information about the rate guarantee. Note: This tag and all the tags within this parent tag are applicable only for the Individual Health Insurance business. | No | | | | |
| membershipRateGuaranteeList | Used to specify rate guarantee details for each individual membership. | No | | | | |
| rateGuaranteeStartDate | Used to specify the date from when the rate guarantee is available for the individual membership. | Yes (Conditional) | | | | |
| | | Note: This data is required while defining or editing the respective information. | | | | |
| rateGuaranteeEndDate | Used to specify the date till when the rate guarantee is available for the individual membership. | Yes (Conditional) | | | | |
| | | Note: This data is required while defining or editing the respective information. | | | | |
| rateGuaranteeStatus | Used to indicate the status of the rate guarantee period. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes (Conditional) | | | | |
| | | Note: This data is required while defining or editing the respective information. | | | | |
| membershipPersonCharacteristics | Used to specify a list of characteristics for the member person. | No | | | | |
| benefitData | Used to specify information about the membership benefit. Note: This tag and all the tags within this parent tag are applicable only for the Fully-Insured Group Health Insurance and Individual Health Insurance businesses. | Yes (Conditional) | | | | |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|----------------------|--|---|
| | | Note: This data is required while defining or editing a membership benefit. |
| benefitDataList | Used to specify the details of a membership benefit. | Yes (Conditional) Note: This data is required while defining or editing a membership benefit. |
| benefitStatus | <p>Used to indicate the status of the membership benefit. The valid values are:</p> <ul style="list-style-type: none"> • ACTIVE • DISCARD <p>Note: While defining a membership benefit, by default, the status is set to Active. On editing a membership benefit, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to Inactive and the status of the new benefit record is set to Active. You can discard an active or inactive membership benefit whenever required.</p> | Yes (Conditional) Note: This data is required while defining or editing a benefit. |
| benefitSourceFlag | <p>Used to indicate the source (i.e. health insurance exchange) from where the benefit is received for the membership. The valid values are:</p> <ul style="list-style-type: none"> • CMS • ST <p>Note: You can only specify a value which is defined in the BENEFIT_SRC_FLG lookup field.</p> | No |
| benefitSubTypeFlag | <p>Used to indicate whether the membership benefit is a Medicare Part A, Part B, or Part D benefit, Medicare Part D LIS, Medicare Part D LEP, APTC benefit, or any other membership benefit.</p> <p>Note: You can only specify a benefit sub type which is already defined in the system.</p> | No |
| planBenefitPackageId | <p>Used to indicate the Medicare plan benefit package (i.e. 800 series plan) which is applicable for the membership benefit.</p> <p>Note: You can only specify a Medicare plan benefit package which is already defined in the system.</p> | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) | | | | |
|-------------------------------|--|--|---|--------------------|---|-------------------|
| | | Note: This data is required while creating the Medicare Part A, Part B, or Part D membership benefit. | | | | |
| benefitAmount | Used to specify the pass-through amount for the availed membership benefit. | Yes (Conditional) Note: This data is required while creating the Medicare Part D LIS, Medicare Part D LEP, APTC, or other membership benefits. | | | | |
| billableChargeData | Used to specify the details for a billable charge. Ideally, this piece of information should be specified in the main subscriber details and not in the member person details. Note: This tag and all the tags within this parent tag are applicable only for the Fully-Insured Group Health Insurance and Individual Health Insurance businesses. | Yes (Conditional) Note: This data is required while defining or editing a billable charge of a membership. | | | | |
| accountIdType | Used to specify the account identifier type. Note: You must specify an account identifier type which is already defined in the system. | Yes (Conditional) Note: This data is required when the accountIdValue tag contains the account identifier. | | | | |
| accountIdValue | Used to indicate the account for which you want to create the billable charge. | Yes (Conditional) Note: This data is required when the accountIdType tag contains the account identifier type. | | | | |
| chargeType | Used to indicate the type of billable charge that you want to create. Note: You must specify a charge type which is already defined in the system. | No | | | | |
| priceItemCode | You can use this tag within the following tags: <table border="1" data-bbox="483 1774 1201 1932"> <thead> <tr> <th>If this tag is used within...</th> <th>Then the purpose of the priceItemCode tag is...</th> </tr> </thead> <tbody> <tr> <td>billableChargeData</td> <td>Used to indicate the price item for which you want to create the billable charge.</td> </tr> </tbody> </table> | If this tag is used within... | Then the purpose of the priceItemCode tag is... | billableChargeData | Used to indicate the price item for which you want to create the billable charge. | Yes (Conditional) |
| If this tag is used within... | Then the purpose of the priceItemCode tag is... | | | | | |
| billableChargeData | Used to indicate the price item for which you want to create the billable charge. | | | | | |

| Tag Name | Tag Description | | Mandatory (Yes or No) |
|---------------------|--|---|---|
| | If this tag is used within... | Then the purpose of the priceItemCode tag is... | Note: This data is required while defining or editing a billable charge of a membership. |
| | planData | Used to indicate the price item which you want to associate with the policy plan. | |
| description | You can use this tag within the following tags: | | Yes (Conditional) |
| | If this tag is used within... | Then the purpose of the description tag is... | Note: This data is required while defining the respective information. |
| | billableChargeData | Used to specify the description for the billable charge. | |
| | policyData | Used to specify the description for the policy. | |
| recurringMethod | Used to indicate whether recurring bill segments must be created for the billable charge at the specified intervals. The valid values are: <ul style="list-style-type: none"> • BP - Used when you want to create recurring bill segments at the intervals defined in the bill period. • FR - Used when you want to create recurring bill segments at the set invoice frequency. | | No |
| billPeriod | Used to indicate the bill period using which you want to determine the intervals at which the recurring bill segments must be created. | | Yes (Conditional) |
| | Note: You must specify a bill period which is already defined in the system. | | Note: This data is required when the recurringMethod tag contains BP . |
| frequency | Used to indicate the invoice frequency at which the recurring bill segments must be created. | | Yes (Conditional) |
| | Note: You must specify an invoice frequency which is already defined in the system. | | Note: This data is required when the recurringMethod tag contains FR . |
| billAfterDt | Used to specify the date after which the bill must be generated for the billable charge. | | No |
| | Note: You must specify the date in the YYYY-MM-DD format. | | |
| billableChargeLines | Used to specify the details for a pass through line in the billable charge. | | Yes |
| descriptionOnBill | Used to specify the information about the pass through line that should appear on the bill. | | Yes |
| currencyCode | Used to indicate the currency in which you want to charge the amount. | | Yes |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|-------------------|---|--|
| | <p>Note:</p> <p>You must specify a currency which is already defined in the system.</p> <p>If you specify a currency other than the account's invoice currency, the system will do the currency conversion if the appropriate exchange rate is available in the system.</p> | |
| chargeAmount | Used to specify the charge amount. | Yes |
| showOnBillSw | <p>Used to indicate whether the charge should appear on the person's printed bill. The valid values are:</p> <ul style="list-style-type: none"> • True • False <p>Note: If you do not specify the value, by default, it is set to True.</p> | No |
| appearInSummarySw | <p>Used to indicate whether the charge should be included in the summary line. The valid values are:</p> <ul style="list-style-type: none"> • true • false <p>Note: If you do not specify the value, by default, it is set to false.</p> | No |
| distributionCode | <p>Used to specify the distribution code which indicates the GL account associated with the charge.</p> <p>Note: You must specify a distribution code which is already defined in the system.</p> | No |
| accountData | Used to specify the account details of a person. | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing an account.</p> |
| accountType | <p>Used to indicate the type of account. This information is stored as a characteristic for the account.</p> <p>Note:</p> <p>The value is stored in the characteristic type which is specified in the Invoice Type Characteristic Type option type of the C1-ASOBLLNG feature configuration.</p> <p>You must specify a value which is already defined in the predefined characteristic type.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing an account.</p> |
| customerClass | Used to indicate the customer class to which the account belongs. | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) | | | | | | |
|-------------------------------|--|--|---|------------|---|-------------|--|--|
| | Note: You must specify a customer class which is already defined in the system. | Note: This data is required while defining an account. | | | | | | |
| billCycle | Used to indicate the bill cycle for the account. Note: You must specify a bill cycle which is already defined in the system. | No | | | | | | |
| billLeadDays | Used to indicate whether you want to bill the account in advance. Here, you need to specify the number of days which is used to derive the cut-off date for advance billing. If you do not want to bill the account in advance, you must specify the value as zero(0). Note: If you do not specify the value, by default, it is set to zero(0). | No | | | | | | |
| currency | Used to indicate the currency in which you want to bill the account. Note: You must specify a currency which is already defined in the system. | Yes (Conditional) Note: This data is required while defining an account. | | | | | | |
| dragDays | You can use this tag within the following tags: <table border="1" data-bbox="483 1024 1201 1812"> <thead> <tr> <th>If this tag is used within...</th> <th>Then the purpose of the description tag is...</th> </tr> </thead> <tbody> <tr> <td>personData</td> <td>Used to specify additional grace days (if any) offered at the person level. | Tag Name | Tag Description | | Mandatory (Yes or No) |
|----------|-------------------------------|---|-----------------------|
| | If this tag is used within... | Then the purpose of the billRouteType tag is... | |
| | | <p>tolerance limit) to determine whether a collection process (such as delinquency process) should be initiated for the person. A new collection method named Self-Control Delinquency is available while defining a collection class. It is used to create a distinct or separate delinquency process for the persons who belong to the collection class. If you want to evaluate the debt of the person's accounts, its child persons, and the child persons' accounts while monitoring the person's delinquency, you must set the collection method of their respective collection class to Parental Delinquency. If you set the collection method of the collection class for any of the person's account, any of its child person, or child persons' accounts to Self-Control Delinquency, the system does not consider the debt of the respective entity while monitoring the delinquency of the parent person.</p> <div data-bbox="716 1037 1198 1419" style="border: 1px solid black; padding: 5px;"> <p>Note:</p> <p>If you do not want to initiate delinquency process for a child person or an account, ensure that the person or account belongs to a collection class where the collection method is set to Not Eligible for Collection.</p> <p>If the collection class is not defined for a person, the system skips the person while monitoring the delinquency.</p> </div> | |
| | accountData | Used to control how the account's debt is compared against collection criteria (i.e. tolerance limit) to determine whether a collection process (such as delinquency process) should be initiated for the account. A new collection method named Self-Control Delinquency is available while defining a collection class. It is used to create a distinct or separate delinquency process for the accounts which belong to the collection class. | |

| Tag Name | Tag Description | | Mandatory (Yes or No) |
|---------------------------|--|--|--|
| | If this tag is used within... | Then the purpose of the billRouteType tag is... | |
| | | Note: If you do not want to initiate delinquency process for an account, ensure that the account belongs to a collection class where the collection method is set to Not Eligible for Collection . If the collection class is not specified for an account, the system, by default, sets it to the one specified in the respective customer class when you create the account through a health care inbound message. | |
| | Note: You must specify a collection class which is already defined in the system. This tag is applicable only for the Fully-Insured Group Health Insurance and Individual Health Insurance businesses. | | |
| postponeCreditReviewUntil | Used when you want to review the account's debt after a particular date. The system will consider the account for monitoring the delinquency only after the specified date. You can specify the postpone credit review until date for an account from the user interface or through a health care inbound message. | | Yes (Conditional) |
| | Note: This tag is applicable only for the Fully-Insured Group Health Insurance and Individual Health Insurance businesses. | | Note: This data is required while defining or editing the respective information. |
| lastCreditReviewDate | Used to indicate the date when the account's debt was last reviewed. The system stamps the last credit review date against an account when a delinquency process is initiated for the account through the C1-ACDLQ batch. | | Yes (Conditional) |
| | Note: This tag is applicable only for the Fully-Insured Group Health Insurance and Individual Health Insurance businesses. | | Note: This data is required while defining or editing the respective information. |
| billRouteType | You can use this tag within the following tags: | | Yes (Conditional) |
| | If this tag is used within... | Then the purpose of the billRouteType tag is... | Note: This data is required while defining or editing the respective information. |
| | accountData | Used to indicate how the account's bill must be sent to the main customer. | |
| | accountPersonRouting | Used to indicate how the account's bill must be sent to the linked person. | |

| Tag Name | Tag Description | Mandatory (Yes or No) | | | | | | |
|-------------------------------|---|---|---|-------------|---|----------------------|---|---|

| priority | <p>Used to indicate the priority in which the auto pay instruction should be considered when multiple auto pay instructions are effective on the bill's due date.</p> <p>Note: The priority cannot be less than or equal to zero.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing an auto pay instruction of an account.</p> | | | | | | |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|-------------------|---|--|
| percentage | Used to indicate the percentage in which the payment must be split between two or more auto pay sources having the same priority. | Yes (Conditional) Note: This data is required while defining or editing the split auto pay instruction for an account. |
| autoPayMethod | Used to indicate how you want to process the automatic payment request. The valid values are: <ul style="list-style-type: none"> • CIDD - Indicates that you want to directly debit the main customer's bank account. • CIPA - Indicates that you want to send a payment advice to the main customer. | No |
| autoPayRouteType | Used to indicate when and how automatic payment request of the account is routed to a financial institution. Note: You must specify an auto pay route type which is already defined in the system. | Yes (Conditional) Note: This data is required while defining or editing an auto pay instruction of an account. |
| autoPaySourceCode | Used to indicate the financial institution that receives the automatic payment request. Note: You must specify an auto pay source which is already defined in the system. | Yes (Conditional) Note: This data is required while defining or editing an auto pay instruction of an account. |
| accountNumber | Used to indicate the bank account number through which the automatic payment must be done. | Yes (Conditional) Note: This data is required while defining or editing an auto pay instruction of an account. |
| expiryMonth | Used to specify the month when the tender type of the auto pay source will expire. Note: You must specify the month in the MM format. | Yes (Conditional) Note: This data is required when the Expiration Date Required option is selected for the tender type which is specified in the auto pay source. |

| Tag Name | Tag Description | Mandatory (Yes or No) | | | | | | | | | | | | |
|---------------------------|--|--|----------------|-----------------|-------------------------|---|---------------------------|---------------|----------------------|---|-------------|----------|-----------------------|---|
| expiryYear | Used to specify the year when the tender type of the auto pay source will expire. | Yes (Conditional) Note: This data is required when the Expiration Date Required option is selected for the tender type which is specified in the auto pay source. | | | | | | | | | | | | |
| | Note: You must specify the year in the YYYY format. | | | | | | | | | | | | | |
| name | Used to specify the name of the person as it appears in the financial institution's system. | No | | | | | | | | | | | | |
| maxWithdrawalAmount | Used to specify the maximum amount that can be automatically debited from the bank account. It is used to set the limit on the withdrawal amount. | No | | | | | | | | | | | | |
| | Note: The maximum withdrawal amount cannot be less than zero. | | | | | | | | | | | | | |
| accountPerson | Used to specify information about the person (other than main customer) to whom you want to link the account. | Yes (Conditional) Note: This data is required while linking a person to an account. | | | | | | | | | | | | |
| | Note: The system, by default, adds the person (for whom the account information is given in the health care inbound message) as the main customer of the account. While linking the person as main customer of the account, the system sets the following attributes: <table border="1" data-bbox="479 1150 1201 1663"> <thead> <tr> <th>Attribute Name</th> <th>Attribute Value</th> </tr> </thead> <tbody> <tr> <td>Financially Responsible</td> <td>Y</td> </tr> <tr> <td>Account Relationship Type</td> <td>Main Customer</td> </tr> <tr> <td>Receive Copy of Bill</td> <td>Y</td> </tr> <tr> <td>Bill Format</td> <td>Detailed</td> </tr> <tr> <td>Receives Notification</td> <td>Y</td> </tr> <tr> <td>Number of Bill Copies</td> <td>1</td> </tr> </tbody> </table> | | Attribute Name | Attribute Value | Financially Responsible | Y | Account Relationship Type | Main Customer | Receive Copy of Bill | Y | Bill Format | Detailed | Receives Notification | Y |
| Attribute Name | Attribute Value | | | | | | | | | | | | | |
| Financially Responsible | Y | | | | | | | | | | | | | |
| Account Relationship Type | Main Customer | | | | | | | | | | | | | |
| Receive Copy of Bill | Y | | | | | | | | | | | | | |
| Bill Format | Detailed | | | | | | | | | | | | | |
| Receives Notification | Y | | | | | | | | | | | | | |
| Number of Bill Copies | 1 | | | | | | | | | | | | | |
| accountRelationshipType | Used to indicate how the person is related to the account. | Yes (Conditional) Note: This data is required while linking a person to an account. | | | | | | | | | | | | |
| | Note: You must specify an account relationship type which is already defined in the system. | | | | | | | | | | | | | |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|--------------------------|--|--|
| isFinanciallyResponsible | Used to indicate whether the person is financially responsible for the account. The valid values are: <ul style="list-style-type: none"> • True • False <p>Note: If you do not specify the value, by default, it is set to False.</p> | No |
| personAddressOverride | Used to specify the account override address for the linked person. | No |
| postal | Used to specify the postal code of the address. | No |
| accountPersonRouting | Used to specify the bill routing information for the linked person. | Yes (Conditional) <p>Note: This data is required while defining or editing the bill routing information of a linked person.</p> |
| shouldReceiveCopyOfBill | Used to indicate whether the linked person should receive a copy of the account's bill. The valid values are: <ul style="list-style-type: none"> • Y • N <p>Note: If you do not specify the value, by default, it is set to N.</p> | No |
| billFormat | Used to indicate whether the linked person should receive the detailed or summary bill. The valid values are: <ul style="list-style-type: none"> • D • S <p>Note: You must specify a value which is already defined in the BILL_FORMAT_FLG lookup field. It must be in the Active status. If you do not specify the value, by default, it is set to D when the linked person should receive a copy of the account's bill. This information is ignored when the shouldReceiveCopyOfBill tag contains N.</p> | No |
| numberOfBillCopies | Used to indicate the number of copies of the bill which the linked person must receive. | No |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|---------------------------------|--|--|
| | <p>Note:</p> <p>If you do not specify the value, by default, it is set to 1 when the linked person should receive a copy of the account's bill.</p> <p>This information is ignored when the shouldReceiveCopyOfBill tag contains N.</p> | |
| receivesNotification | <p>Used to indicate whether the linked person should receive letters (i.e. notifications) initiated by collection, write-off, and overdue events. The valid values are:</p> <ul style="list-style-type: none"> • Y • N <p>Note:</p> <p>If you do not specify the value, by default, it is set to N.</p> <p>This information is ignored when the shouldReceiveCopyOfBill tag contains N.</p> | No |
| policyData | <p>Used to specify the details of the policy.</p> <p>Note: This tag and all the tags within this parent tag are only applicable for the Self-Funded Group Health Insurance and Fully-Insured Group Health Insurance businesses.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing a policy.</p> |
| policyType | <p>Used to indicate the policy type using which you are defining the policy.</p> <p>Note: You must specify a policy type which is already defined in the system. If you want to create a fully-insured group policy, you must specify a policy type where the policy category is set to Fully-Insured Group. However, if you want to create a self-funded policy, you must specify a policy type where the policy category is set to Self-Funded.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing a policy.</p> |
| advancedLevelFundingEligibility | <p>Used to indicate whether the self-funded policy provides advanced level funding eligibility. The valid values are:</p> <ul style="list-style-type: none"> • Yes • No <p>Note:</p> <p>At present, if you are defining a self-funded policy the advanced level funded eligibility is set to No.</p> <p>This tag and all the tags within this parent tag are only applicable for the Self-Funded Group Health Insurance and Fully-Insured Group Health Insurance businesses.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing a policy.</p> |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|---------------------|--|---|
| runOutEndDate | <p>Used to specify the date when the runout period of the self-funded policy ends.</p> <p>Note:</p> <p>The runout end date cannot be earlier than or equal to the policy end date.</p> <p>This data is required when you are defining a policy using a policy type where the policy category is set to Self-Funded.</p> <p>This tag is applicable only for the Self-Funded Group Health Insurance business.</p> | No |
| runOutAdminOption | <p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> • None • Percentage of Claim <p>Note:</p> <p>At present, this data is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This data is required when you are defining a policy using a policy type where the policy category is set to Self-Funded.</p> <p>This tag is applicable only for the Self-Funded Group Health Insurance business.</p> | No |
| renewalDate | <p>Used to specify the date when you want to renew the fully-insured group policy.</p> <p>Note:</p> <p>You can renew a self-funded policy only from the user interface.</p> <p>You must specify the date in the YYYY-MM-DD format.</p> <p>This tag is applicable only for the Self-Funded Group Health Insurance and Fully-Insured Group Health Insurance businesses.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while renewing a fully-insured group policy.</p> |
| advanceDepositApplS | <p>Used to indicate whether the advance deposit is applicable for the policy. The valid values are:</p> <ul style="list-style-type: none"> • Y • N | <p>Yes (Conditional)</p> <p>Note: This data is required while renewing a fully-insured group policy.</p> |

| Tag Name | Tag Description | Mandatory (Yes or No) | | | | | | |

Here, you must specify an account of the policy holder where the account relationship type is set to the value that is specified in the Advance Deposit Account Relationship Type attribute of the delinquency process preference.</p> <p>Note:</p> <p>It is required when the advance deposit applicability is set to Y.</p> <p>This tag is applicable only for the Fully-Insured Group Health Insurance business.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while renewing a fully-insured group policy.</p> |
| policyPersons | Used to indicate the person that you want to associate with the policy. | Yes |
| policyPerRole | <p>Used to indicate the role of the person in the policy.</p> <p>Note: You must specify a policy person role which is already defined in the system.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while associating a person with the policy.</p> |
| terminationInformation | <p>Used to specify the termination details of the fully-insured group policy.</p> <p>Note:</p> <p>At present, you cannot terminate a self-funded policy either from the user interface or through a health care inbound message.</p> <p>This tag and all the tags within this parent tag are applicable only for Fully-Insured Group Health Insurance business.</p> | No |
| terminateDate | <p>Used to specify the date when you want to terminate the fully-insured group policy.</p> <p>Note:</p> <p>You must specify the date in the YYYY-MM-DD format.</p> <p>The termination date cannot be earlier than the policy start date.</p> <p>On terminating a policy, the status of the policy is changed to the status which is specified in the Policy Termination Status option type of the C1-ASOBLNG feature configuration.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while terminating a fully-insured group policy.</p> |
| terminationReason | Used to indicate the reason why you want to terminate the fully-insured group policy. | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|----------------------|---|--|
| | <p>Note: You must specify the status reason which is already defined for the status specified in the Policy Termination Status option type of the C1-ASOBLNG feature configuration.</p> | <p>Note: This data is required while terminating a fully-insured group policy.</p> |
| reinstateInformation | <p>Used to specify the reinstatement details of the fully-insured group policy.</p> <p>Note: At present, you cannot reinstate a self-funded policy either from the user interface or through a health care inbound message. This tag and all the tags within this parent tag are applicable only for Fully-Insured Group Health Insurance business.</p> | No |
| reinstatementDate | <p>Used to specify the date when you want to reinstate the fully-insured group policy.</p> <p>Note: You must specify the date in the YYYY-MM-DD format. The reinstatement date cannot be earlier than the policy start date. On reinstating a policy, the status of the policy is changed to the status which is specified in the Policy Reinstatement Status option type of the C1-ASOBLNG feature configuration.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while reinstating a fully-insured group policy.</p> |
| reinstateReason | <p>Used to indicate the reason why you want to reinstate the fully-insured group policy.</p> <p>Note: You must specify the status reason which is already defined for the status specified in the Policy Reinstatement Status option type of the C1-ASOBLNG feature configuration.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while reinstating a fully-insured group policy.</p> |
| planData | <p>Used to specify the details of the policy plan.</p> <p>Note: At present, you can only define a policy plan in a fully-insured group policy. Therefore, the system will ignore this information when given for a self-funded policy. This tag and all the tags within this parent tag are applicable only for the Self-Funded Group Health Insurance and Fully-Insured Group Health Insurance businesses.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing a policy plan.</p> |
| planName | Used to specify the description of the policy plan. | No |
| pricingRuleTypeList | Used to associate a pricing rule type with the policy plan. | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|--------------------------|---|--|
| | | Note: This data is required while associating a pricing rule type with the policy plan. |
| pricingRuleType | Used to specify the pricing rule type. Note: At present, you can only associate those pricing rule types where the category is set to Age Based, Tier Based, or Pass-Through Billable Charge . Therefore, the system will ignore the pricing rule types where the category is set to Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, Flat Fees, Ancillary, Discount Arrangement, or Level Funded . | Yes (Conditional) Note: This data is required when a price item is not associated with the policy plan. |
| primaryPlanSw | Used to indicate whether the plan is a primary plan in the policy. The valid values are: <ul style="list-style-type: none"> • Y • N Note: If you do not specify the value, by default, it is set to N . | No |
| benefitTypeFlag | Used to indicate the type of benefit availed for the membership. The valid values are: <ul style="list-style-type: none"> • COMM • MA Note: The list includes only those benefit types which are defined in the BENEFIT_TYPE_FLG lookup field. | Yes |
| policyPlanProrationRules | Used to specify the proration rules defined for the policy plan. Note: This tag and all the tags within this parent tag are applicable only for Fully-Insured Group Health Insurance business. | Yes (Conditional) Note: This data is required while defining or editing the proration rules for the policy plan. |
| prorationEventType | Used to indicate the event when you want to prorate the membership premium. The valid values are: <ul style="list-style-type: none"> • Enrollment – Used when you want to prorate the membership premium on enrolling a member person. • Termination - Used when you want to prorate the membership premium on terminating a member person. • New Born - Used when you want to prorate the membership premium on enrolling a new born. | Yes (Conditional) Note: This data is required while defining or editing the proration rules for the policy plan. |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|---------------|---|---|
| | <ul style="list-style-type: none"> • Same Month Enrollment and Termination - Used when you want to prorate the membership premium on enrolling and terminating a member person in the same month. | |
| prorationType | <p>Used to indicate how you want to prorate the membership premium. The valid values are:</p> <ul style="list-style-type: none"> • Daily – Used when you want to prorate the membership premium from the day the proration event has occurred. • Mid-Month – Used when you want to prorate the membership premium based on the proration date. The system calculates the proration date using the following formula: $\text{Bill Period Start Date} + \text{Specified Number of Days}$ <p>For example, if the bill period start date is 1st of every month and number of days is 15, then the proration date would be 15th of every month. If a member person is enrolled to the membership on or before the proration date, the system will charge the premium for the member person. However, if a member person is enrolled to the membership after the proration date, the system will not charge the premium for the member person. And, if a member person is terminated from the membership on or after the proration date, the system will charge the premium for the member person. However, if a member person is terminated from the membership before the proration date, the system will not charge the premium for the member person.</p> • Full Month – Used when the premium for a member person should be charged when the member person is enrolled or terminated on the coverage start date or coverage end date, respectively. If a member person is enrolled or terminated within the coverage period, the system will not charge the premium for the member person. • Waiver – Used when the premium for a member person should be waived off completely for the month when the member person is enrolled or terminated from the membership. • Coverage Days – Used when you want to prorate the premium for a member person based on the coverage days. If a member person is covered in the membership for a period less than the specified number of days, the system will not charge the premium for the member person. However, if a member person is covered in the membership for a period equal to or more than the specified number of days, the system will charge the premium for the member person. <p>Note: You can use this proration type when the proration event is set to Same Month Enrollment and Termination.</p> <ul style="list-style-type: none"> • Enrollment – Used when you want to prorate the premium for a member person using the proration type of the enrollment event. | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing the proration rules for the policy plan.</p> |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|-----------------------|--|---|
| | <p>Note: You can use this proration type when the proration event is set to Same Month Enrollment and Termination.</p> <ul style="list-style-type: none"> • Termination - Used when you want to prorate the premium for a member person using the proration type of the termination event. <p>Note: You can use this proration type only when the proration event is set to Same Month Enrollment and Termination.</p> | |
| numberOfDays | Used to specify the number of days to determine the cutoff date. | Yes (Conditional) |
| | | Note: This data is required when the proration type is set to Mid-Month or Coverage Days . |
| pricingRuleData | Used to specify the details of the pricing rule. | Yes (Conditional) |
| | Note: This tag and all the tags within this parent tag are applicable only for the Fully-Insured Group Health Insurance business. | Note: This data is required while defining or editing a pricing rule. |
| entityIdentifiers | Used to specify a list of entities (i.e. policy, source system, and plan) using which you can derive the plan to which you want to associate the pricing rule. | Yes |
| entityIdentifiersList | Used to specify the details of the entity. | Yes |
| entityIdentifierType | Used to specify the entity type. The valid values are: <ul style="list-style-type: none"> • PLAN - Used when you want to specify the plan number. • PLCY - Used when you want to specify the policy number. • SSYS - Used when you want to specify the source system | Yes (Conditional) |
| | | Note: This data is required while defining or editing a pricing rule. |
| entityIdentifierValue | Used to specify the entity identifier (i.e. plan number, policy number, or source system). | Yes (Conditional) |
| | | Note: This data is required while defining or editing a pricing rule. |
| status | Used to indicate the status of the pricing rule. The valid values are: <ul style="list-style-type: none"> • ACTV • INAC <p>Note: If you do not specify the value, by default, it is set to Active.</p> | No |
| pricingRuleType | Used to indicate the pricing rule type using which you want to define the pricing rule. | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|-----------------------|---|---|
| | <p>Note: You must specify a pricing rule type where the category is set to Age Based or Tier Based.</p> | <p>Note: This data is required while defining or editing a pricing rule.</p> |
| priceItemCd | <p>Used to indicate the price item for which you want to define the pricing rule.</p> <p>Note: You must specify a price item which is already associated with the respective pricing rule type.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining or editing a pricing rule.</p> |
| rateOption | <p>Used to indicate the rate option using which you want to create price assignment for the pricing rule.</p> <p>Note: You must specify a rate option which is already defined in the C1-ExtLookRetTypeRateOpt extendable lookup. It must be in the Active status.</p> <p>If the rate option is not given for an age-based pricing rule, by default, it is set to:</p> <ul style="list-style-type: none"> • The value specified in the Default Rate Option – Flat option type of the C1-ASOBLLNG feature configuration when the modifier method is set to FLAT • The value specified in the Default Rate Option – Percentage option type of the C1-ASOBLLNG feature configuration when the modifier method is set to EXPT or INPT <p>However, if the rate option is not given for a tier-based pricing rule, by default, it is set to a value specified in the Default Rate Option – Flat option type of the C1-ASOBLLNG feature configuration when the modifier method is set to FLAT or NULL.</p> | No |
| modifierApplicability | <p>Used to indicate whether you want to increase or decrease the premium of an eligible member based on certain modifiers (i.e. parameters, such as tobacco usage, alcohol usage, and so on). The valid values are:</p> <ul style="list-style-type: none"> • Y • N <p>Note: If you do not specify the value, by default, it is set to N.</p> | No |
| modifierMethod | <p>Used to indicate whether the system should consider the modifier rate as a flat amount or percentage. The valid values are:</p> <ul style="list-style-type: none"> • FLAT - Indicates that the system should consider the modifier rate as a flat amount. • INPT - Indicates that the system should consider the modifier rate as inclusive percentage. | <p>Yes (Conditional)</p> <p>Note: This data is required when the modifierApplicability tag contains Y.</p> |

| Tag Name | Tag Description | Mandatory (Yes or No) | | | | |
|-------------------------------|---|--|---|------------------|--|--------------------------|
| | <ul style="list-style-type: none"> EXPT - Indicates that the system should consider the modifier rate as exclusive percentage. | | | | | |
| baseRate | <p>Used to specify the base fees for employees with a particular set of attributes. You can define different base fees for employees with different set of attributes.</p> <p>Note: While creating a price assignment for the pricing rule, the system creates one price component for each given set of base rate information.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining a pricing rule.</p> | | | | |
| baseFee | <p>Used to specify the base fees for the eligible members.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining a pricing rule.</p> | | | | |
| lowerAgeLimit | <p>Used to specify the lower age limit. It is used to define lower age limit pricing eligibility criteria in the price component.</p> <p>Note: The system defines the lower age limit pricing eligibility criteria using the parameter which is specified in the Age Based Parameter option type of the C1-ASOBLLNG feature configuration. This data is ignored when given in a tier-based pricing rule information.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining an age-based pricing rule.</p> | | | | |
| upperAgeLimit | <p>Used to specify the upper age limit. It is used to define upper age limit pricing eligibility criteria in the price component.</p> <p>Note: The system defines the upper age limit pricing eligibility criteria using the parameter which is specified in the Age Based Parameter option type of the C1-ASOBLLNG feature configuration. This data is ignored when given in a tier-based pricing rule information.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining an age-based pricing rule.</p> | | | | |
| pricingParameter | <p>Used to specify a set of employee attributes based on which the base fees may vary.</p> | <p>Yes (Conditional)</p> <p>Note: This data is required while defining a tier-based pricing rule.</p> | | | | |
| parameterCode | <p>You can use this tag within the following tags:</p> <table border="1"> <thead> <tr> <th>If this tag is used within...</th> <th>Then the purpose of the parameterCode tag is...</th> </tr> </thead> <tbody> <tr> <td>pricingParameter</td> <td>Used to specify the employee attribute (i.e. parameter, such as employee status,</td> </tr> </tbody> </table> | If this tag is used within... | Then the purpose of the parameterCode tag is... | pricingParameter | Used to specify the employee attribute (i.e. parameter, such as employee status, | <p>Yes (Conditional)</p> |
| If this tag is used within... | Then the purpose of the parameterCode tag is... | | | | | |
| pricingParameter | Used to specify the employee attribute (i.e. parameter, such as employee status, | | | | | |

| Tag Name | Tag Description | | Mandatory (Yes or No) |
|-------------------------|---|---|---|
| | If this tag is used within... | Then the purpose of the parameterCode tag is... | Note: This data is required while specifying the respective information. |
| | employee location, and so on) using which you want to define the pricing eligibility criteria. | | |
| modifierInformation | Used to specify the modifier (i.e. parameter, such as tobacco usage, alcohol usage, and so on) using which you want to define the pricing eligibility criteria. | | |
| | Note: You must define the employee attributes and modifiers as parameters in the system. Note that you must set the parameter usage for these parameters to Pricing Eligibility Criteria . The system creates an pricing eligibility criteria for each parameter and/or modifier specified in the pricing rule information. You cannot specify any special character except underscore (_) in the parameter name. | | |
| parameterValue | You can use this tag within the following tags: | | Yes (Conditional) |
| | If this tag is used within... | Then the purpose of the parameterValue tag is... | Note: This data is required while specifying the respective information. |
| pricingParameter | Used to specify the value for the parameter (i.e. employee attribute). | | |
| modifierInformation | Used to specify the value for the parameter (i.e. modifier). | | |
| | Note: You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value. | | |
| modifierInformation | Used to specify the modifier based on which you want to increase or decrease the base fees. | | Yes (Conditional) |
| | Note: While creating a price assignment for the pricing rule, the system creates one price component for each given set of modifier information and then links these modifier price components with the respective base rate price component. | | Note: This data is required while specifying the modifier information. |
| rate | Used to specify the flat amount or percentage by which you want to increase or decrease the premium of an eligible member. | | Yes (Conditional) |
| | | | Note: This data is required while specifying the modifier information. |
| statementConstructsData | Used to specify the details of the statement construct. | | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|------------------------------|--|--|
| | Note: This tag and all the tags within this parent tag are applicable only for the Fully-Insured Group Health Insurance and Individual Health Insurance businesses. | Note: This data is required while defining or editing a statement construct. |
| personStatementConstruct | Used to specify the details of a person for whom the statement construct is created. | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| personIdentifier | Used to specify the person with the statement construct. | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| personIdentifierType | Used to specify the person identifier type associated with the statement construct. | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| statementConstructIdentifier | Used to specify the statement construct identifier defined for the statement construct. | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| statementAddressSource | Used to indicate the source whose address should be used for sending the statements to the person. The valid value is: <ul style="list-style-type: none"> Person | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| statementCycle | Used to indicate the statement construct cycle for a person. | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| statementRouteType | Used to indicate how to route the statements to the person. | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|---------------------------|--|---|
| | | Note: This data is required while defining or editing a statement construct. |
| effectiveStatus | Used to indicate the status of the statement construct. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| addressId | Used to specify the address to which the statement should be sent. | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| numberOfCopies | Used to specify the number of copies of the statement construct you want the person to receive. | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| statementFormat | Used to indicate the format of the statement construct. The valid values are: <ul style="list-style-type: none"> Detail Summary | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| description | Used to specify the description of the statement construct. | Yes (Conditional) Note: This data is required while defining or editing a statement construct. |
| statementConstructDetails | Used to specify the statement construct details. | Yes (Conditional) Note: This data is required while specifying the statement construct information. |
| serviceAgreement | Used to specify the statement construct contract. | Yes |
| accountNumber | Used to specify the value for the account identifier type of the payee. | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|---------------------------|---|---|
| | Note: You must specify the account number which is already defined in the system. | Note: This data is required while specifying the statement construct information. |
| accountNumberTypeCd | Used to specify the account identifier type of the payee. | Yes (Conditional) Note: This data is required while specifying the statement construct information. |
| statementPrintDescription | Used to specify the description of the construct detail associated with the contract. | Yes (Conditional) Note: This data is required while specifying the statement construct information. |
| printOrder | Used to specify the financial transactions associated with the account / contract to appear on the printed statement. | Yes (Conditional) Note: This data is required while specifying the statement construct information. |
| repriceAfterDate | Used to specify whether you want to hold the repricing for the membership until the specified date. Note: This tag is applicable only for the Individual Health Insurance business. | No |
| paidThroughDate | Used to specify the term end date of the last fully or partially paid term. For more information about the paid through date, refer to Policy on page 330. Note: This tag is applicable only for the Fully-Insured Group Health Insurance and Individual Health Insurance businesses. | No |

The following table lists and describes the tags which are available in the health care inbound message schema, but should not be included in the XML file:

| Tag Name | Tag Description |
|------------------|--|
| cIInboundMessage | Displays the inbound message ID. |
| boStatus | Displays the status of the health care inbound message. |
| statusReason | Indicates the reason why the status of the health care inbound message is changed. |

| Tag Name | Tag Description | | | | | | |
|------------------------------|--|------------|---|--------|--|------------------------------|---|
| person | At present, this tag is not supported in a health care inbound message. | | | | | | |
| statusDateTime | Displays the date and time when the status of the health care inbound message is changed in the system. | | | | | | |
| creationDateTime | Displays the date and time when the health care inbound message is created in the system. | | | | | | |
| searchCharacteristicValue | At present, this tag is not supported in a health care inbound message. | | | | | | |
| version | This tag appears within the following parent tags: <table border="1" data-bbox="576 535 1461 751"> <thead> <tr> <th>Parent Tag</th> <th>Then the purpose of the version tag is...</th> </tr> </thead> <tbody> <tr> <td>schema</td> <td>Displays the version of the health care inbound message.</td> </tr> <tr> <td>inboundMessageCharacteristic</td> <td>Displays the version of the characteristic defined for the health care inbound message.</td> </tr> </tbody> </table> | Parent Tag | Then the purpose of the version tag is... | schema | Displays the version of the health care inbound message. | inboundMessageCharacteristic | Displays the version of the characteristic defined for the health care inbound message. |
| Parent Tag | Then the purpose of the version tag is... | | | | | | |
| schema | Displays the version of the health care inbound message. | | | | | | |
| inboundMessageCharacteristic | Displays the version of the characteristic defined for the health care inbound message. | | | | | | |
| toDoRetry | Displays the information about the retry option used for the health care inbound message. <p>Note: This information appears at the bottom of the inbound message in the Inbound Message Content zone once the health care inbound message is validated and processed either through the user interface or batch process.</p> | | | | | | |
| retryDateTime | Displays the date and time when the retry option is used to change the status of the health care inbound message from Rejected to Pending . | | | | | | |
| numberOfRetries | Indicates the number of times the retry option is used for the health care inbound message. | | | | | | |
| currentErrorState | Indicates the status to which the health care inbound message is transitioned when its validation or processing fails. The valid value is: <ul style="list-style-type: none"> REJECTED | | | | | | |
| isRetried | Indicates whether the retry option is used to change the status of the health care inbound message. The valid values are: <ul style="list-style-type: none"> true false | | | | | | |

Sample Health Care Inbound Message for Fully-Insured Group Customer Setup

Using the below example, you can do the following:

- Create the parent customer and bill groups for a fully-insured group health insurance business
- Create policies where the policy category is set to **Fully-Insured Group**
- Create various medical and dental plans for active and retired employees in the fully-insured group policies
- Associate a pricing rule type with the policy plans

The following table provides sample data for a fully-insured group customer that you can process through a health care inbound message:

| Person Name | Person Type | Account | Policy | Policy Plan | Pricing Rule Type |
|--------------------------|-----------------|---------|---|----------------------------|-------------------|
| Antartica Petroleum Corp | Parent Customer | - | Active Employee Medical Health Insurance Policy | HMO Medical Bronze 60 AE | AGE_BASED |
| | | | | HMO Medical Silver 70 AE | AGE_BASED |
| | | | | HMO Medical Gold 80 AE | AGE_BASED |
| | | | | HMO Medical Platinum 90 AE | AGE_BASED |
| | | | | PPO Medical Bronze 60 AE | AGE_BASED |
| | | | | PPO Medical Silver 70 AE | AGE_BASED |
| | | | | PPO Medical Gold 80 AE | AGE_BASED |
| | | | | PPO Medical Platinum 90 AE | AGE_BASED |
| | | | Active Employee Dental Health Insurance Policy | DD BASIC PLAN AE | TIER_BASED |
| | | | | DD STANDARD PLAN AE | TIER_BASED |

| Person Name | Person Type | Account | Policy | Policy Plan | Pricing Rule Type |
|-----------------------------|-------------|-------------------------------|--|-----------------------------|-------------------|
| | | | Retiree Employee Health Insurance Policy | HMO Medical Bronze 60 RE | AGE_BASED |
| | | | | HMO Medical Silver 70 RE | AGE_BASED |
| | | | | PPO Medical Bronze 60 RE | AGE_BASED |
| | | | | PPO Medical Silver 70 RE | AGE_BASED |
| | | | | DD BASIC RE | TIER_BASED |
| Antartica Petroleum ACTIVE | Bill Group | CMS | - | - | - |
| | | CMR | | | |
| Antartica Petroleum COBRA | Bill Group | CMS | - | - | - |
| | | CMR | | | |
| Antartica Petroleum RETIREE | Bill Group | CMS | Employee Medicare Policy | APE Medicare Bronze RE MALE | AGE_BASED |
| | | CMR | | APE Medicare Silver RE MALE | AGE_BASED |
| | | APE Medicare Gold RE MALE | | AGE_BASED | |
| | | APE Medicare Bronze RE FEMALE | | AGE_BASED | |
| | | APE Medicare Silver RE FEMALE | | AGE_BASED | |
| | | APE Medicare | | AGE_BASED | |
| | | | | | |

| Person Name | Person Type | Account | Policy | Policy Plan | Pricing Rule Type |
|-------------|-------------|---------|--------|-------------------|-------------------|
| | | | | Gold RE FEMALE | |

In addition, the following table provides sample derivation and pricing parameters for multiple bill groups:

| Bill Group | Source System | Parameter 1 | Parameter 2 | Parameter 3 | Parameter 4 |
|-------------------------------|---------------|-------------|---------------|-------------|-------------|
| Antartica Petroleum ACTIVE | SMALLPRIME | ACTIVE | SEATTLE | MEDICAL | HMO |
| | SMALLPRIME | ACTIVE | SEATTLE | MEDICAL | PPO |

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Self-Funded Customer Setup

Using the below example, you can do the following:

- Create the parent customer and bill groups for a self-funded health insurance business
- Create the accounts for the bill groups
- Create the policies for the bill groups where the policy category is set to **Self-Funded**

The following table provides sample data for a self-funded customer that you can process through a health care inbound message:

| Person Name | Person Type | Policy | Account |
|------------------|-----------------|---|-----------|
| US Energy Corp | Parent Customer | - | - |
| US Energy ACTIVE | Bill Group | Active Employee Health Insurance Policy | Standard |
| | | | Retention |

| Person Name | Person Type | Policy | Account |
|-------------------|-------------|--|-----------|
| US Energy COBRA | Bill Group | Active COBRA Employee Health Insurance Policy | Standard |
| | | Retiree COBRA Employee Health Insurance Policy | Retention |
| US Energy RETIREE | Bill Group | Retiree Employee Health Insurance Policy | Standard |
| | | | Retention |

In addition, the following table provides sample derivation and pricing parameters for multiple bill groups:

| Bill Group | Source System | Parameter 1 | Parameter 2 | Parameter 3 | Parameter 4 |
|-------------------|---------------|-------------|-------------|-------------|-------------|
| US Energy ACTIVE | SMALLPRIME | ACTIVE | SEATTLE | - | - |
| | SMALLPRIME | ACTIVE | LOS ANGELES | - | - |
| US Energy COBRA | SMALLPRIME | COBRA | DALLAS | - | - |
| | SMALLPRIME | COBRA | SAN JOSE | - | - |
| US Energy RETIREE | SMALLPRIME | RETIRED | CHARLOTTE | - | - |
| | SMALLPRIME | RETIRED | DETROIT | - | - |

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Pricing Rules

Using the below example, you can create the following:

- Tier-based pricing rule for the **DD_BASIC** policy plan -
The following table provides sample data for a tier-based pricing rule of the policy plan:

| Policy Plan | Pricing Rule Type | Base Rate | Parameter | Parameter Value |
|-------------|-------------------|-----------|------------------|-----------------|
| DD_BASIC | TIER_BASED | 20 | EMPBAND | IC1 |
| | | | SUBSCRIPTIONTIER | E |
| | | | GENDER | MALE |
| | | 40 | EMPBAND | IC2 |
| | | | SUBSCRIPTIONTIER | ES |
| | | | GENDER | FEMALE |
| | | 60 | EMPBAND | IC3 |
| | | | SUBSCRIPTIONTIER | ES |
| | | | GENDER | FEMALE |
| | | 80 | EMPBAND | IC4 |
| | | | SUBSCRIPTIONTIER | E |
| | | | GENDER | MALE |

- Age-based pricing rule for the **PPO_MED_BRONZE_RETIRED** policy plan -
The following table provides sample data for an age-based pricing rule of the policy plan:

| Policy Plan | Pricing Rule Type | Base Rate | Lower Age Limit | Upper Age Limit | Parameter | Parameter Value | Modifier | Modifier Value | Modifier Rate |
|------------------------|-------------------|-----------|-----------------|-----------------|-----------|-----------------|----------|----------------|---------------|
| PPO_MED_BRONZE_RETIRED | AGE_BASED | 200 | 0 | 19 | GENDER | FEMALE | TOBUSE | Y | 20 |
| | | 200 | 0 | 19 | GENDER | MALE | TOBUSE | Y | 20 |
| | | 300 | 20 | 39 | GENDER | FEMALE | TOBUSE | Y | 30 |
| | | 300 | 20 | 39 | GENDER | MALE | TOBUSE | Y | 30 |
| | | 450 | 40 | 59 | GENDER | FEMALE | TOBUSE | Y | 40 |
| | | 450 | 40 | 59 | GENDER | MALE | TOBUSE | Y | 40 |
| | | 550 | 60 | 130 | GENDER | FEMALE | TOBUSE | Y | 50 |
| | | 550 | 60 | 130 | GENDER | MALE | TOBUSE | Y | 50 |

- Additional fee pricing rule for the **COBRA_DENTAL** policy plan -
The following table provides sample data for an additional fee pricing rule of the policy plan:

| Policy Plan | Pricing Rule Type | Base Rate | Modifier | Modifier Value | Modifier Rate |
|--------------|-------------------|-----------|----------|----------------|---------------|
| COBRA_DENTAL | CAPITATION_FEES | 100 | IC_BAND | IC1 | 10 |
| | | 200 | M1_BAND | M1 | 20 |
| | | 300 | M2_BAND | M2 | 30 |
| | | 400 | M3_BAND | M3 | 40 |

- Rate Guarantee pricing rule for the **RATE_LOCK_MED** policy plan -
The following table provides sample data for a rate guarantee pricing rule of the policy plan:

| Policy Plan | Pricing Rule Type | Base Rate | Lower Age Limit | Upper Age Limit | Start Date | End Date | Rate Guarantee |
|---------------|-------------------|-----------|-----------------|-----------------|------------|------------|----------------|
| RATE_LOCK_MED | AGE_BASED | 200 | 20 | 39 | 01-01-2021 | 31-03-2021 | Y |
| | TIER_BASED | 400 | 40 | 59 | 01-02-2021 | 31-07-2021 | Y |
| | TIER_BASED | 600 | 60 | 79 | 01-02-2021 | 31-10-2021 | Y |
| | AGE_BASED | 800 | 80 | 99 | 01-01-2021 | 30-11-2021 | Y |

- Discount charge pricing rule for the **DISC_CHG_MED** policy plan -
The following table provides sample data for a discount charge pricing rule of the policy plan:

| Bill Group | Policy Plan | Pricing Rule Type | Base Fee | Modifier | Modifier Value | Modifier Rate |
|-------------------------|--------------|-------------------|----------|----------|----------------|---------------|
| United Antarctica Group | DISC_CHG_MED | DISCOUNT_CHARGE | 50 | VP_BAND | VP1 | 10 |
| | 70 | | M_BAND | M1 | 20 | |

| Bill Group | Policy Plan | Pricing Rule Type | Base Fee | Modifier | Modifier Value | Modifier Rate |
|------------|-------------|-------------------|----------|----------|----------------|---------------|
| | | | 90 | IC_BAND | ICI | 30 |

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Group Membership (Without Benefit)

Using the below example, you can do the following:

- Create the persons who are neither parent customer nor bill group
- Create a membership where the person is the main subscriber
- Add persons in a membership

| Person Name | Person Type | Policy | Policy Plan | Main Subscriber | Member Relationship Type |
|-------------|-------------|----------|----------------------------|-----------------|--------------------------|
| G, ALLEN | Person | AP234389 | HMO_MED_ SILVER_RETIRED | Yes | SELF |
| G, JOHN | Person | AP234389 | HMO_MED_ SILVER_RETIRED | No | SPOUSE |
| G, HARRY | Person | AP234389 | HMO_MED_ SILVER_RETIRED | No | SON |
| G, NELSON | Person | AP234389 | HMO_MED_ SILVER_RETIRED | No | SON |
| G, PARKER | Person | AP234389 | HMO_MED_ SILVER_RETIRED | No | SON |
| G, RUSSEL | Person | AP234389 | HMO_MED_ SILVER_RETIRED | No | SON |
| G, LINDA | Person | AP234389 | HMO_MED_ SILVER_RETIRED | No | DAUGHTER |

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Individual Membership (With Benefit)

Using the below example, you can do the following:

- Create individual membership where the person is the main subscriber and contains dependent persons.

- Enroll the main subscriber to a health plan
- Provide information regarding benefit type, binder payment, rate guarantee, exchange details, etc.

| Person Name | Member Relationship Type | Main Subscriber | Health Plan Code | Binder Payment | Benefit Type | Exchange ID |
|------------------|--------------------------|-----------------|------------------|----------------|--------------|-------------|
| GEOFF, JOHNSON | SELF | Yes | HMCSP01 | Yes | MA | ABHF_121_FL |
| GWYNETH, JOHNSON | SPOUSE | No | HMCSP01 | Yes | MA | ABHF_121_FL |

```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Group Membership (With Benefit)

Using the below example, you can do the following:

- Create group membership where the person is the main subscriber and contains dependent persons.

| Person Name | Member Relationship Type | Main Subscriber | Policy | Policy Plan | Benefit Type |
|----------------|--------------------------|-----------------|----------|----------------------------|--------------|
| TREVOR, WALSH | SELF | Yes | AP234389 | HMO_MED_ SILVER_RETIRED | MA |
| LETECIA, WALSH | SPOUSE | No | AP234389 | HMO_MED_ SILVER_RETIRED | MA |
| MIKE, WALSH | SON | No | AP234389 | HMO_MED_ SILVER_RETIRED | MA |

```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Advance Deposit at Parent Customer Level

Using the below example, you can do the following:

- Make an advance deposit an amount at the parent customer level

The following table provides sample data of an advance deposit which is maintained at the parent customer level:

| Advance Deposit Level | Person Type | Person Name | Advance Amount | Bill 1 Amount | Bill 2 Amount | Bill 3 Amount |
|-----------------------|-----------------|-----------------|----------------|---------------|---------------|---------------|
| PG | Parent Customer | MITCH, MARSH | 2000 | 800 | 600 | 600 |
| | Bill Group | US ENERGY | 3000 | 800 | 1200 | - |

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Advance Deposit at Policy Level

Using the below example, you can do the following:

- Make an advance deposit an amount at the parent customer level

The following table provides sample data of an advance deposit which is maintained at the policy level:

| Advance Deposit Level | Person Type | Person Name | Advance Amount | Bill 1 Amount | Bill 2 Amount | Bill 3 Amount |
|-----------------------|-----------------|------------------|----------------|---------------|---------------|---------------|
| POLI | Parent Customer | IAN_ CAMPBELL | 1000 | 600 | 200 | 200 |
| | Bill Group | US_ SOLAR | 2000 | 800 | 600 | 600 |

```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Fully-Insured Group Policy Renewal

Using the below example, you can do the following:

- Renew a fully-insured group policy

The following table provides sample data through which you can renew a fully-insured group policy:

| Person Name | Person Type | Policy Number | Plan Number | Policy Renewal Date | Policy End Date |
|-------------|---------------|------------------|-----------------|---------------------|-----------------|
| WALSH_TYPES | Corp Customer | PL_MED_HEALTH_00 | WALSH_TC_MED_PL | 2024-01-01 | 2024-12-31 |

```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Fully-Insured Group Policy Reinstatement

Using the below example, you can do the following:

- Reinstatement a fully-insured group policy

The following table provides sample data through which you can reinstate a fully-insured group policy:

| Person Name | Person Type | Policy Number | Plan Number | Reinstatement Date | Policy End Date |
|---------------|----------------|----------------|----------------|--------------------|-----------------|
| GREGORY_INDUC | Group Customer | PO_DENT_HEALTH | PODNT_PLAN_101 | 2024-05-15 | 2024-12-31 |

```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Fully-Insured Individual Membership Renewal

Using the below example, you can do the following:

- Renew a fully-insured individual membership

The following table provides sample data through which you can renew a fully-insured individual membership:

| Person Name | Member Relationship Type | Main Subscriber | Health Plan Code | Membership Renewal Date |
|---------------|--------------------------|-----------------|------------------|-------------------------|
| GEOFF, TURNER | SELF | Yes | HPMINAG01 | 2024-01-01 |

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Care Inbound Message for Fully-Insured Individual Membership Termination

Using the below example, you can do the following:

- Terminate a fully-insured individual membership

The following table provides sample data through which you can renew a fully-insured individual membership:

| Person Name | Member Relationship Type | Main Subscriber | Health Plan Code | Membership Termination Date |
|--------------|--------------------------|-----------------|------------------|-----------------------------|
| GLENN, MARSH | SELF | Yes | HPMINAG01 | 2024-03-31 |

```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Health Product and Plan Inbound Message

On calling the **C1-HCProdHlthPlnInboundMessage** or **C1-HCProdHlthPlnInboundMes** web service, you can define a health product and plan inbound message using a health product and plan inbound message type. The **C1-HCProdHlthPlnInboundMessage** is a **SOAP** service which helps to create a health product, health plan, and pricing rule for a health plan through an inbound message, whereas the **C1-HCProdHlthPlnInboundMes** is a **RESTful** service which helps to create and edit a health product, health plan, and pricing rule for a health plan through an inbound message.

You can define a health product and plan inbound message type using the **Health Product and Plan Inbound Message Type (C1-HCProdHlthPlnInboundTyp)** business object through the **Inbound Message Type** screen. The health product and plan inbound message type business object encapsulates the following information:

- A business object using which you want to create the health product when the health product and plan inbound message is processed.
- A business object using which you want to create the health plan when the health product and plan inbound message is processed.

The health product and plan inbound message type helps the system to determine:

- **Inbound Message Business Object** - The business object using which the health product and plan inbound message should be created in the system. You must specify the **Health Product and Plan Inbound Message (C1-HCProdHlthPlnInbound)** business object in the health product and plan inbound message type. The health product and plan inbound message business object enables you to create and edit the following entities for a fully-insured individual customer through an inbound web service:
 - Health Product
 - Health Plan
 - Health Plan Pricing Rules

Note: You can create or update the above entities either through a single or separate health product and plan inbound messages.

- **Health Care Product Business Object** - The business object using which health product should be created in the system. You must specify the **Health Care Product (C1-HealthcareProduct)** business object in the health product and plan inbound message type.
- **Health Plan Business Object** - The business object using which health plan should be created in the system. You must specify the **Health Plan (C1-HealthPlan)** business object in the health product and plan inbound message type.

On calling the **C1-HCProdHlthPlnInboundMessage** or **C1-HCProdHlthPlnInboundMes** web service, a batch named **C1-HCPHP** checks whether there are any health product and plan inbound messages in the **Pending** status. If there is a health product and plan inbound message in the **Pending** status, the batch changes the status of the health product and plan inbound message to the default next status (i.e. **Validation**). Then, the algorithm attached to the **Validation** status is triggered. If the validation is successful, the system changes the status of the health product and plan inbound message to **Processing**. Then, the algorithm attached to the **Processing** status is triggered. If the processing is successful, the system creates or updates the entities, such as health product, health plan, pricing rules for the health plan, and then changes the status of the health product and plan inbound message to **Processed**.

| How to setup the C1-ASOBLNG feature configuration | Setting the C1-ASOBLNG Feature Configuration on page 4018 |

Prerequisites

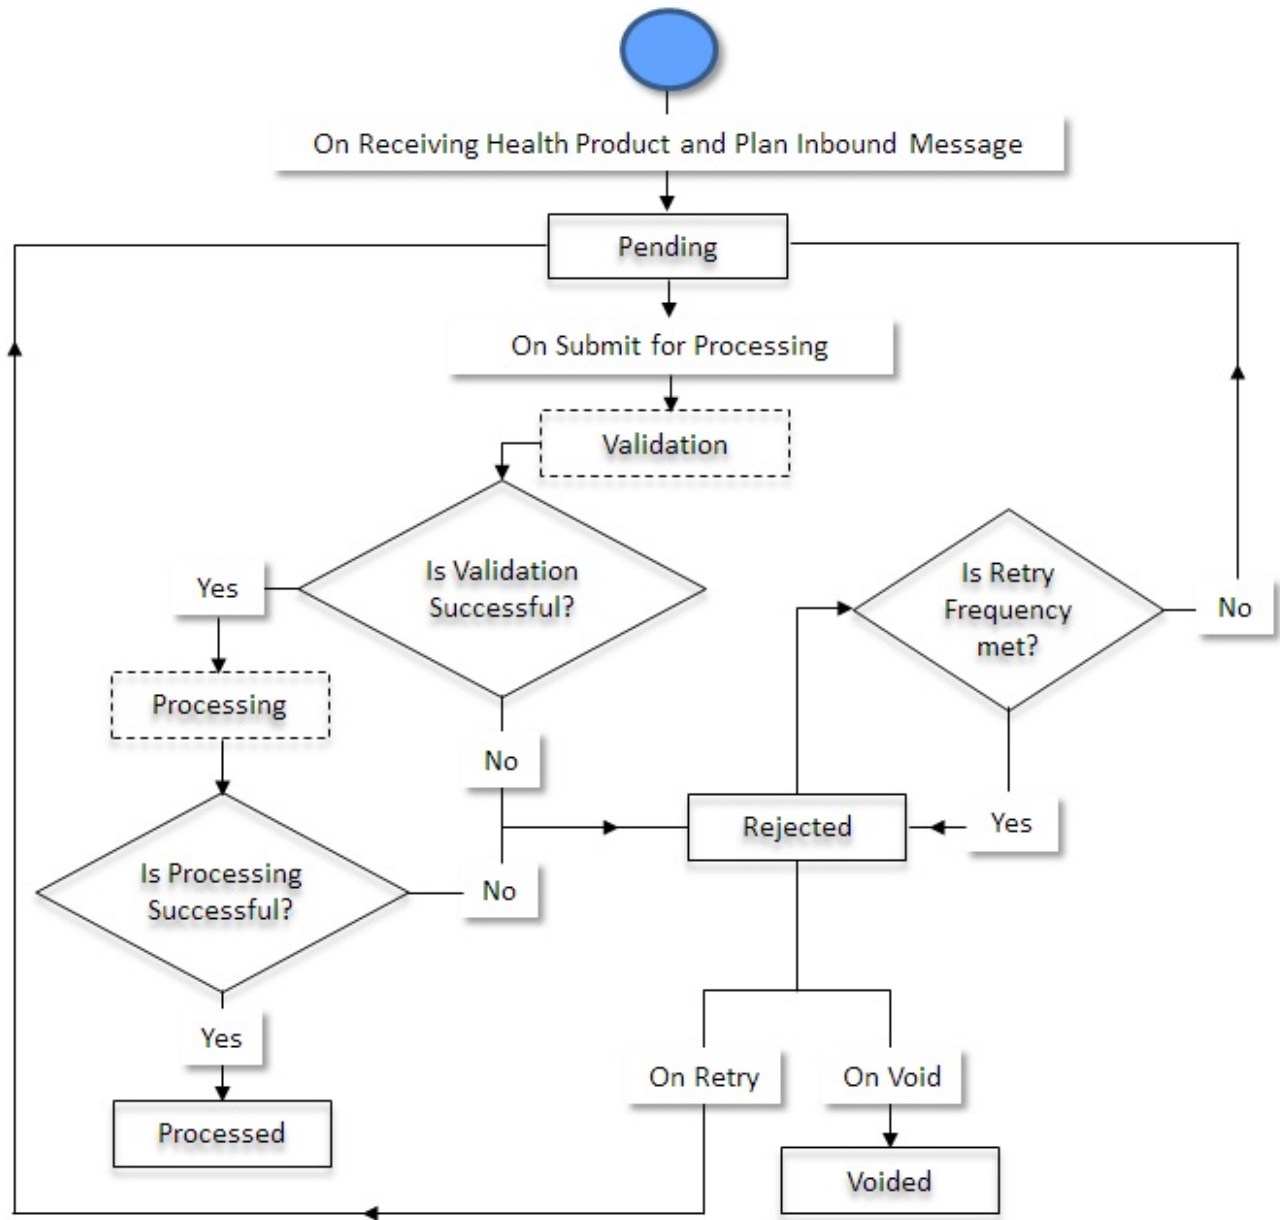

To use the health product and plan inbound message feature, you need to do the following:

- Define the required health product and plan inbound message types in the system.
- Assign the **Product (C1_PRODUCT)** maintenance object to the **Health Product (C1-HealthcareProduct)** business object, while defining the health product and plan inbound message type.
- Define the required characteristic types where the characteristic entity is set to **Inbound Message Type**
- Define the required characteristic types where the characteristic entity is set to **Inbound Message**.

- Define the required characteristic types where the characteristic entity is set to **Health Plan**.
- Define the required characteristic types where the characteristic entity is set to **Product**.
- Define the **Health Product and Plan Inbound Message (C1-HCProdHlthPlnInbound)** business object in the system.
- Define the **Health Product and Plan Inbound Message Type (C1-HCProdHlthPlnInboundTyp)** business object in the system.
- Define the **Healthcare Product (C1-HealthcareProduct)** business object in the system.
- Define the **Health Plan (C1-HealthPlan)** business object in the system.
- Define the required pricing rule type business object in the system.
- Define the required values for the health plan in the **PRC_RULE_ENTITY_TYPE** lookup field.

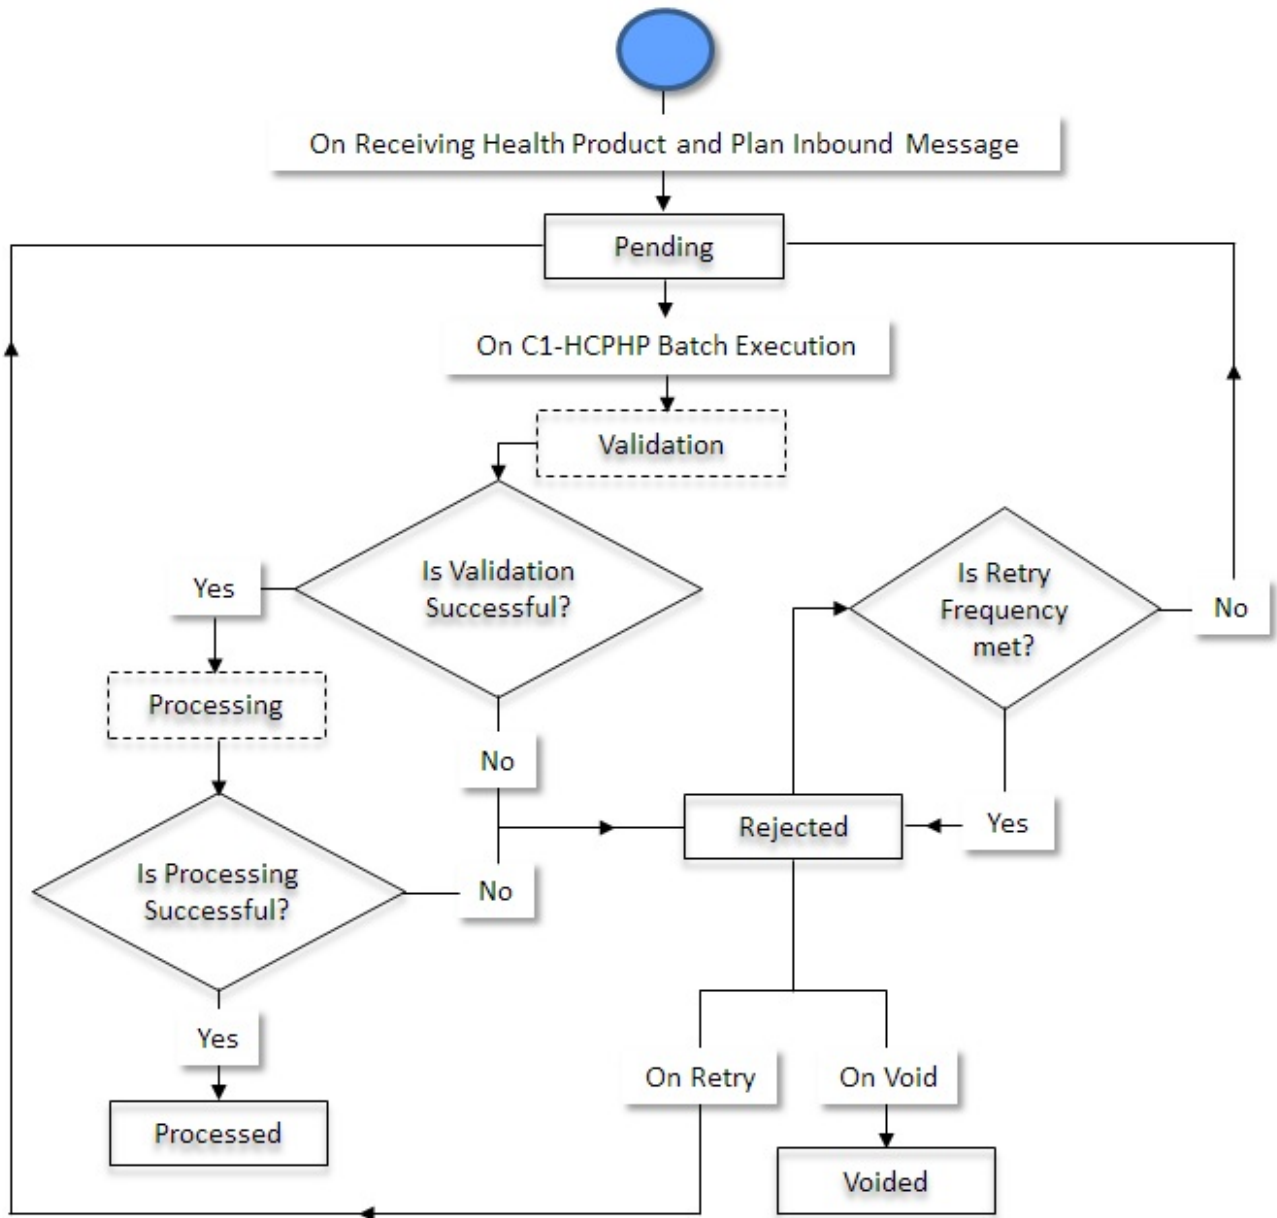

Health Product and Plan Inbound Message Status Transition through User Interface

The following figure graphically indicates how a health care inbound message moves from one status to another when it is validated and processed through the user interface:

Health Product and Plan Inbound Message Status Transition through a Batch Process

The following figure graphically indicates how a health care inbound message moves from one status to another when it is validated and processed through the **Health Product and Plan Inbound Message Periodic Monitor (C1-HCPHP)** batch:

Algorithms Used in C1-HCProdHlthPlnInbound

The following table lists the algorithms which are used in the lifecycle of the **C1-HCProdHlthPlnInbound** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|------------|--------------|-----------|----------------|--|
| Pending | Monitor | C1-AT-RQJ | C1-GEN-BOMNJ | Refer to C1-AT-RQJ on page 2173. |
| Validation | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | Refer to F1-AT-RQJ on page 1659. |

| Status | System Event | Algorithm | Algorithm Type | Description |
|------------|--------------|--------------|----------------|---|
| | Enter | C1-HLTPRDVAL | C1-HLTPRDVAL | Refer to C1-HLTPRDVAL on page 2434 |
| Processing | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | Refer to F1-AT-RQJ on page 1659. |
| | Enter | C1-HCPRPROC | C1-HCPRPROC | Refer to C1-HCPRPROC on page 2435 |
| Rejected | Monitor | C1-TODORETRY | C1-TODORETRY | Refer to C1-TODORETRY on page 2174. |
| | Enter | C1-TDCRINMSG | F1-TDCREATE | Refer to C1-TDCRINMSG on page 2175. |
| Processed | - | - | - | - |
| Voided | - | - | - | - |

C1-AT-RQJ

This algorithm is invoked when the status of the customer or membership inbound message is changed to **Pending**. If the **isRetried** flag in the inbound message is set to **true**, it resets the flag to **false**.

It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

Note: At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-HLTPRDVAL

This algorithm is invoked when you execute the **Health Product Health Plan (C1-HCPHP)** periodic monitor batch or click the **Submit for Processing** button in the **Inbound Message** screen. This algorithm validates the Health Product and Plan Inbound Message, which is in the Pending status, to check the following conditions:

- Whether the specified **Inbound Message Type** and **Inbound Message Business Object** are valid.
- Whether the specified source system is valid and does exist in the **Source System Extendable Lookup (C1-SourceSystemLookup)**.

- Whether the mandatory data (such as health product code, description, product type, bundled product, start date, status) is specified in the health product.
- Whether the mandatory data (such as health plan code, description, health product, start date, status) is specified in the health plan.
- Whether the mandatory data (such as health plan code, charge, start date, pricing rule) is specified in the health plan pricing rules.
- Whether the specified data for the lookup columns matches with those mentioned in the system.
- Whether all of the switch columns either contain **Y** or **N** as values.
- Whether the specified end date for health product, health plan, and health pricing rule is greater than the start date.
- Whether the product is mapped to the division which exists in the system, and the product - division mapping is a one time process.
- Whether the product code is mapped with the health plan exists in the system.
- Whether the characteristic type mapped with the respective entity exists in the system.
- Whether the specified pricing rule type for creating the pricing rule exists in the system in the **Active** status, and the pricing rule type - health plan mapping is a one time process.
- Whether the specified price item and price item parameters for pricing rule eligibility are valid, and the price item parameters exist in the **CI_PRICE_PARM** table.
- Whether the price item parameters that have parameter usage specified as **Pricing Rule Eligibility Criteria** are available while defining the pricing rule eligibility for the pricing rule.
- Whether the entity type is specified as **Health Plan** and entity value as **Health Plan Code** while creating a pricing rule for a health plan.

Note:

This algorithm does not consider the following validations or checks:

- No validation is performed between the date range of the product and health plan.
- No check is performed whether the product is in the **Active** status while creating a health plan.
- No check is performed whether the health plan is in the **Active** status while creating the health plan pricing rules.
- No check is performed on the set of the pricing rule eligibility, which is defined on multiple pricing rules, for a price item.
- No validation is performed if duplicate parameters are defined for a pricing rule.

C1-HCPRPROC

This algorithm is invoked when the health product and plan inbound message is successfully validated. This algorithm creates or updates the health product, health plan, and health plan pricing rule information for individual memberships.

This algorithm fetches the business object from the health product and plan inbound message type to create or update the records for health product, health plan, and health plan pricing rule. The algorithm performs the following operations:

- Creates or updates the health product based on the health product code.
- Creates or updates the health plan based on the health plan code.
- Creates or updates the health plan pricing rules based on the price item, health plan, start date, and eligibility criteria.

Note:

The pricing rule eligibility is optional while creating or updating the pricing rules for the health plan.

The health product and plan inbound message log maintains complete trail of actions performed on health product, health plan, and health plan pricing rules.

C1-TODORETRY

This algorithm is invoked when the status of the customer or membership inbound message is changed to **Rejected**. It checks whether the maximum retry attempts are met. If the retry attempt is less than or equal to the value defined in the **Maximum Retry** parameter, the status of the inbound message is changed to **Pending**. However, if the retry attempt is greater than the value defined in the **Maximum Retry** parameter, the status of the inbound message remains as **Rejected**.

Note: This algorithm is invoked when the customer or membership inbound message is validated and processed through the batch process.

It contains the following parameters:

- **Maximum Retry** – Used to specify the maximum number of times the inbound message can be revalidated and reprocessed on failure.
- **Maximum Retry Element Name** – This parameter is not used at the moment.

If you do not specify any value for the **Maximum Retry** parameter, the system uses the value defined in the **To Do Maximum Retries** status option (which is defined in the lifecycle of the **C1-CustomerInboundMessage** and **C1-MemberInboundMessage** business object) to check whether the maximum retry attempts are met. If the value is not specified for the **To Do Maximum Retries** status option, the system does not allow revalidating and reprocessing an inbound message, and the status of the inbound message remains as **Rejected**.

C1-TDCRINMSG

This algorithm is invoked when the status of the customer or membership inbound message is changed to **Rejected**. It creates a To Do using the specified To Do type and assigns it to users with the specified To Do role.

It contains the following parameters:

- **To Do Type** - Used to specify the type of notification that you want to generate when the inbound message validation or processing fails.
- **To Do Role** - Used to specify the To Do role to indicate the users to whom you want to send the notification when the inbound message validation or processing fails.

The rest of the parameters, such as **To Do Type Element Name**, **To Do Role Element Name**, **Message Category**, **Message Number**, **Characteristic Type For Log Entry**, **To Do Sort Keys Retriever Script**, **Discard Cancel Terminate Reason Element**, **Discard Cancel Terminate Reason**, **Retry Frequency**, and **Retry Frequency Element Name**, are not used at the moment.

Health Product and Plan Inbound Message XML Format

Note: We recommend you to refer the Health Product and Plan Inbound Message schema in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the schema.

Before calling the **C1-HCProdHlthPlnInboundMessage** inbound web service, you need to ensure that the health product and plan inbound message contains the following tags:

| Tag Name | Tag Description | Mandatory (Yes or No) | | | | | | |
|--------------------------------------|--|-------------------------------|---|--------|--|-------------------------------|--|----|
| schema | Used to specify the tags of a health product and plan inbound message. | Yes | | | | | | |
| messageType | Used to indicate the health product and plan inbound message type using which the health product and plan inbound message should be created in the system. Note: You must specify a valid health product and plan inbound message type which is created using the C1-HCProdHlthPlnInboundTyp business object and which is in the Active status. The system then derives the business objects using which the health product and plan inbound message, health products, and health plans should be created from the health product and plan inbound message type. | Yes | | | | | | |
| sourceSystem | Used to indicate the external system from where the health product and plan inbound message is received. Note: You must specify a source system which is already defined in the C1-SourceSystemLookup extendable lookup. It must be in the Active status. | Yes | | | | | | |
| external TransactionId | Used to indicate the transaction in the external source system which resulted in the health product and plan inbound message. | No | | | | | | |
| externalBatchId | Used to indicate the external batch job or batch run number through which the health product and plan inbound message is created. | Yes | | | | | | |
| externalSourceId | Used to specify the external source system ID. | Yes | | | | | | |
| characteristics | You can use this tag within the following tags: <table border="1" data-bbox="513 1266 1187 1577"> <thead> <tr> <th>If this tag is used within...</th> <th>Then the purpose of the characteristics tag is...</th> </tr> </thead> <tbody> <tr> <td>schema</td> <td>Used to specify a list of characteristics for the health product and plan inbound message.</td> </tr> <tr> <td>healthPlan PricingRuleData</td> <td>Used to specify a list of characteristics for the pricing rule of a health plan.</td> </tr> </tbody> </table> | If this tag is used within... | Then the purpose of the characteristics tag is... | schema | Used to specify a list of characteristics for the health product and plan inbound message. | healthPlan PricingRuleData | Used to specify a list of characteristics for the pricing rule of a health plan. | No |

| sequence | You can use this tag within the following tags: | Yes (Conditional) Note: This data is required while defining or editing the respective information. | | | | | | |

| Tag Name | Tag Description | | Mandatory (Yes or No) |
|------------------------|---|---|---|
| | If this tag is used within... | Then the purpose of the sequence tag is... | |
| | healthPlan PricingRuleData | Used to indicate the order in which the pricing rules should be created in the system. | |
| | baseRate | Used to indicate the order in which the price component should be created using the given base rate information. | |
| | pricingParameter | Used to indicate the order in which the pricing eligibility criteria should be created using the parameter information. | |
| | modifier Information | Used to indicate the order in which the pricing eligibility criteria should be created using the modifier information. | |
| | pricingRule Eligibility | Used to indicate the order in which the pricing rule eligibility should be created for the health plan. | |
| entityIdentifiers | Used to specify a list of entities (i.e. policy, source system, and plan) using which you can derive the plan to which you want to associate the pricing rule. | | Yes |
| entityIdentifiers List | Used to specify the details of the entity. | | Yes |
| entityIdentifier Type | Used to specify the entity type. The valid values are: <ul style="list-style-type: none"> • PLAN - Used when you want to specify the health plan number. • PLCY - Used when you want to specify the policy number. • SSYS - Used when you want to specify the source system | | Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> Note: This data is required while defining or editing a pricing rule defined for the health plan. </div> |
| entityIdentifier Value | Used to specify the entity identifier (i.e. plan number, policy number, or source system). | | Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> Note: This data is required while defining or editing a pricing rule defined for the health plan. </div> |
| priceItemCd | Used to indicate the price item for which you want to define the pricing rule. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> Note: You must specify a price item which is already associated with the respective pricing rule type. </div> | | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|---------------------------|--|---|
| | | <p>Note: This data is required while defining or editing a pricing rule defined for the health plan.</p> |
| rateOption | <p>Used to indicate the rate option using which you want to create price assignment for the pricing rule of a health plan.</p> <p>Note: You must specify a rate option which is already defined in the C1-ExtLookRetTypeRateOpt extendable lookup. It must be in the Active status.</p> <p>If the rate option is not given for an age-based pricing rule, by default, it is set to:</p> <ul style="list-style-type: none"> • The value specified in the Default Rate Option – Flat option type of the C1-ASOBLLNG feature configuration when the modifier method is set to FLAT • The value specified in the Default Rate Option – Percentage option type of the C1-ASOBLLNG feature configuration when the modifier method is set to EXPT or INPT <p>However, if the rate option is not given for a tier-based pricing rule, by default, it is set to a value specified in the Default Rate Option – Flat option type of the C1-ASOBLLNG feature configuration when the modifier method is set to FLAT or NULL.</p> | No |
| pricingType | <p>Used to indicate the type of pricing defined for the pricing rule. The valid values are:</p> <ul style="list-style-type: none"> • Flat • Percentage | Yes |
| modifier Applicability | <p>Used to indicate whether you want to increase or decrease the premium of an eligible member based on certain modifiers (i.e. parameters, such as tobacco usage, alcohol usage, and so on). The valid values are:</p> <ul style="list-style-type: none"> • Y • N <p>Note: If you do not specify the value, by default, it is set to N.</p> | No |
| modifierMethod | <p>Used to indicate whether the system should consider the modifier rate as a flat amount or percentage. The valid values are:</p> <ul style="list-style-type: none"> • FLAT - Indicates that the system should consider the modifier rate as a flat amount. | Yes (Conditional) |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|------------------|---|--|
| | <ul style="list-style-type: none"> • INPT - Indicates that the system should consider the modifier rate as inclusive percentage. • EXPT - Indicates that the system should consider the modifier rate as exclusive percentage. | Note: This data is required when the modifierApplicability tag contains Y . |
| baseRate | Used to specify the base fees for employees with a particular set of attributes. You can define different base fees for employees with different set of attributes. Note: While creating a price assignment for the pricing rule, the system creates one price component for each given set of base rate information. | Yes (Conditional) Note: This data is required while defining a pricing rule for the health plan. |
| baseFee | Used to specify the base fees for the health plan. | Yes (Conditional) Note: This data is required while defining a pricing rule for the health plan. |
| lowerAgeLimit | Used to specify the lower age limit. It is used to define lower age limit pricing eligibility criteria in the price component. Note: The system defines the lower age limit pricing eligibility criteria using the parameter which is specified in the Age Based Parameter option type of the C1-ASOBLNG feature configuration. This data is ignored when given in a tier-based pricing rule information. | Yes (Conditional) Note: This data is required while defining or editing an age-based pricing rule for the health plan. |
| upperAgeLimit | Used to specify the upper age limit. It is used to define upper age limit pricing eligibility criteria in the price component. Note: The system defines the upper age limit pricing eligibility criteria using the parameter which is specified in the Age Based Parameter option type of the C1-ASOBLNG feature configuration. This data is ignored when given in a tier-based pricing rule information. | Yes (Conditional) Note: This data is required while defining an age-based pricing rule for the health plan. |
| pricingParameter | Used to specify a set of employee attributes based on which the base fees may vary. | Yes (Conditional) Note: This data is required while defining a tier-based pricing rule for the health plan. |
| parameterCode | You can use this tag within the following tags: | Yes (Conditional) |

| Tag Name | Tag Description | | Mandatory (Yes or No) | |
|----------------------|---|--|---|--|
| | If this tag is used within... | Then the purpose of the parameterCode tag is... | Note: This data is required while specifying the respective information. | |
| pricingParameter | Used to specify the employee attribute (i.e. parameter, such as employee status, employee location, and so on) using which you want to define the pricing eligibility criteria. | | | |
| modifier Information | Used to specify the modifier (i.e. parameter, such as tobacco usage, alcohol usage, and so on) using which you want to define the pricing eligibility criteria. | | | |
| | Note: You must define the employee attributes and modifiers as parameters in the system. Note that you must set the parameter usage for these parameters to Pricing Eligibility Criteria . The system creates an pricing eligibility criteria for each parameter and/or modifier specified in the pricing rule information. You cannot specify any special character except underscore (_) in the parameter name. | | | |
| parameterValue | You can use this tag within the following tags: | | Yes (Conditional) | |
| | If this tag is used within... | Then the purpose of the parameterValue tag is... | Note: This data is required while specifying the respective information. | |
| | pricingParameter | Used to specify the value for the parameter (i.e. employee attribute). | | |
| | modifier Information | Used to specify the value for the parameter (i.e. modifier). | | |
| | Note: You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value. | | | |
| modifier Information | Used to specify the modifier based on which you want to increase or decrease the base fees. | | Yes (Conditional) | |
| | Note: While creating a price assignment for the pricing rule, the system creates one price component for each given set of modifier information and then links these modifier price components with the respective base rate price component. | | Note: This data is required while specifying the modifier information. | |
| rate | Used to specify the flat amount or percentage by which you want to increase or decrease the premium of an eligible member. | | Yes (Conditional) | |

| Tag Name | Tag Description | Mandatory (Yes or No) |
|----------------------------|--|--|
| | | Note: This data is required while specifying the modifier information. |
| characteristicsList | Used to specify a characteristic for the health plan. | Yes (Conditional) Note: This data is required while defining or editing a characteristic of the respective entity. |
| pricing RuleEligibility | Used to specify a set of attributes based on which the pricing rule eligibility is decided. | Yes (Conditional) Note: This data is required while defining or editing an age or tier-based pricing rule for the health plan. |
| priceParmCode | Used to specify the pricing attribute using which you want to define the pricing eligibility criteria. | Yes (Conditional) Note: This data is required while specifying the respective information. |
| priceParmVal | Used to specify the value for the parameter (i.e. pricing attribute). | Yes (Conditional) Note: This data is required while specifying the respective information. |

The following table lists and describes the tags which are available in the health care inbound message schema, but should not be included in the XML file:

| Tag Name | Tag Description |
|------------------|---|
| cInboundMessage | Displays the inbound message ID. |
| bo | Indicates the business object using which the health product and plan inbound message is created in the system. |
| boStatus | Displays the status of the health product and plan inbound message. |
| statusReason | Indicates the reason why the status of the health product and plan inbound message is changed. |
| statusDateTime | Displays the date and time when the status of the health product and plan inbound message is changed in the system. |
| creationDateTime | Displays the date and time when the health product and plan inbound message is created in the system. |

| Tag Name | Tag Description | | | | | | |
|--------------------------------------|--|------------|---|--------|--|--------------------------------------|---|
| version | <p>This tag appears within the following parent tags:</p> <table border="1"> <thead> <tr> <th>Parent Tag</th> <th>Then the purpose of the version tag is...</th> </tr> </thead> <tbody> <tr> <td>schema</td> <td>Displays the version of the health product and plan inbound message.</td> </tr> <tr> <td>inbound Message Characteristic</td> <td>Displays the version of the characteristic defined for the health product and plan inbound message.</td> </tr> </tbody> </table> | Parent Tag | Then the purpose of the version tag is... | schema | Displays the version of the health product and plan inbound message. | inbound Message Characteristic | Displays the version of the characteristic defined for the health product and plan inbound message. |
| Parent Tag | Then the purpose of the version tag is... | | | | | | |
| schema | Displays the version of the health product and plan inbound message. | | | | | | |
| inbound Message Characteristic | Displays the version of the characteristic defined for the health product and plan inbound message. | | | | | | |
| searchCharacteristicValue | At present, this tag is not supported in a health product and plan inbound message. | | | | | | |
| toDoRetry | <p>Displays the information about the retry option used for the health product and plan inbound message.</p> <p>Note: This information appears at the bottom of the inbound message in the Inbound Message Content zone once the health product and plan inbound message is validated and processed either through the user interface or batch process.</p> | | | | | | |
| retryDateTime | Displays the date and time when the retry option is used to change the status of the health product and plan inbound message from Rejected to Pending . | | | | | | |
| numberOfRetries | Indicates the number of times the retry option is used for the health product and plan inbound message. | | | | | | |
| currentErrorState | <p>Indicates the status to which the health care inbound message is transitioned when its validation or processing fails. The valid value is:</p> <ul style="list-style-type: none"> REJECTED | | | | | | |
| isRetried | <p>Indicates whether the retry option is used to change the status of the health product and plan inbound message. The valid values are:</p> <ul style="list-style-type: none"> true false | | | | | | |

Sample Health Product and Plan Inbound Message for Health Product Setup

Using the below example, you can do the following:

- Create the health product in the ORMB system through the health product and plan inbound message.

| Health Product Code | Description | Product Type | Bundled Product | Start Date | Status | Division |
|---------------------|------------------|--------------|-----------------|------------|--------|----------|
| HPMP444 | HP Medicare Plus | EPO | N | 2021-01-01 | ACTIVE | TX |

```
<schema>
  <bo>C1-HCProdHlthPlnInbound</bo>
  <messageType>C1-HCPRODHLTHPLN-INB-MSG-TYPE</messageType>
  <sourceSystem>NSC</sourceSystem>
  <externalTransactionId>889977</externalTransactionId>
  <externalBatchId>737373</externalBatchId>
  <externalSourceId>373737</externalSourceId>
  <productHealthPlanMessage>
    <HealthProductData>
      <healthProductCode>HPMP444</healthProductCode>
      <description>HP MEDICARE PLUS</description>
      <productType>EPO</productType>
      <productSubType>FSA</productSubType>
      <productHCCategory>MED</productHCCategory>
      <productAdministration>PBM Agency</productAdministration>
      <productLOB>INDIVIDUAL</productLOB>
      <productLOBCategory>GOVERNMENT</productLOBCategory>
      <bundledProduct>N</bundledProduct>
      <startDate>2021-01-01</startDate>
      <endDate>2021-12-01</endDate>
      <status>ACTIVE</status>
      <productCharacteristics>
        <characteristicType>MP-CLAIM</characteristicType>
        <characteristicValue>Y</characteristicValue>
        <effectiveDate>2021-01-01</effectiveDate>
      </productCharacteristics>
      <healthProductDivision>
        <division>TX</division>
      </healthProductDivision>
    </HealthProductData>
  </productHealthPlanMessage>
</schema>
```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Product and Plan Inbound Message for Health Plan Setup

Using the below example, you can do the following:

- Create the health plan for the product in the ORMB system through the health product and health plan inbound message.

The following table provides sample data for a health product and health plan that you can process through the health product and plan inbound message:

| Health Product Code | Health Plan Code | HiOS ID | Description | Start Date | Status |
|---------------------|------------------|---------------|------------------------------|------------|--------|
| HPMP444 | HM CSP01 | HIOSHLPNMS001 | Health Plan Medicare Surplus | 2021-02-01 | ACTIVE |

| Health Product Code | Health Plan Code | HiOS ID | Description | Start Date | Status |
|---------------------|------------------|---------------|-----------------------------|------------|--------|
| HPMP444 | HMCDP01 | HIOSHLPNMD005 | Health Plan Medicare Dental | 2021-03-01 | ACTIVE |

```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Sample Health Product and Plan Inbound Message for Health Plan Pricing Rules Setup

Using the below example, you can do the following:

- Create the age-based pricing rule for the **RET_DENT** health plan -
The following table provides sample data for an age-based pricing rule of the health plan:

| | | Base Rate | | | Pricing Parameter | | Modifier Information | | |
|-------------|-------------------|-----------|-----------------|-----------------|-------------------|-----------------|----------------------|----------------|---------------|
| Health Plan | Pricing Rule Type | Base Fee | Lower Age Limit | Upper Age Limit | Parameter | Parameter Value | Modifier | Modifier Value | Modifier Rate |
| RET_DENT | AGE_BASED | 100 | 1 | 20 | TOBAC | Y | SMOKER | N | 10 |
| | | 300 | 1 | 40 | TOBAC | Y | SMOKER | N | 20 |
| | | 500 | 1 | 60 | TOBAC | Y | SMOKER | N | 30 |

- Create the discount charge pricing rule for the **RET_DENT** health plan -
The following table provides sample data for a discount charge pricing rule of the health plan:

| Health Plan | Pricing Rule Type | Base Fee | Modifier | Modifier Value | Modifier Rate |
|-------------|-------------------|----------|----------|----------------|---------------|
| RET_DENT | DISCOUNT_CHARGE | 50 | VP_BAND | VP1 | 10 |
| | | 70 | M_BAND | M1 | 20 |
| | | 90 | IC_BAND | IC1 | 30 |

```

Note: We have given the above sample to illustrate how the tags should be nested while sending an inbound message from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Inbound Message Type

Oracle Revenue Management and Billing allows you to define an inbound message type using which you can create an inbound message through an inbound web service. The following table describes the significance of the respective inbound message type:

| Inbound Message Type | Helps the system to determine... |
|--|--|
| Health Care Inbound Message Type (C1-HCInboundMsgType) | <ul style="list-style-type: none"> • Inbound Message Business Object - The business object using which the health care inbound message should be created in the system. • Customer Registration Type - The customer registration type using which the customer registration object should be created through a health care inbound message. |
| Health Product Health Plan Inbound Message Type (C1-HCProdHlthPlnInboundTyp) | <ul style="list-style-type: none"> • Inbound Message Business Object - The business object using which the health product and plan inbound message should be created in the system. • Health Product Business Object - The business object using which the health product should be created in the system. • Health Plan Business Object - The business object using which the health plan should be created in the system. |
| Individual Inbound Message Type (C1-IndHCInboundMsgType) | <ul style="list-style-type: none"> • Inbound Message Business Object - The business object using which the health care inbound message should be created in the system. • Person Business Object - The business object using which the individual customer should be created in the system. • Account Business Object - The business object using which the individual customer's account should be created in the system. • Individual Membership Business Object - The business object using which the individual membership should be created in the system. • Benefits Business Object - The business object using which the individual membership benefits should be created in the system. • Address Business Object - The business object using which the address should be created in the system. • Statement Construct Business Object - The business object using which the statement construct should be created in the system. |

The **Inbound Message Type** screen allows you to define, edit, copy, and delete an inbound message type. It contains the following zones:

- [Inbound Message Type List](#) on page 2463
- [Inbound Message Type](#) on page 2463

Inbound Message Type List

The **Inbound Message Type List** zone lists the inbound message types that are already defined in the system. It contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Inbound Message Type | Displays the inbound message type. |
| Description | Displays the description of the inbound message type. |
| Edit | On clicking the Edit (✎) icon, the Inbound Message Type screen appears where you can edit the details of the inbound message type. |
| Duplicate | On clicking the Duplicate (📄) icon, the Inbound Message Type screen appears where you can define a new inbound message type using an existing inbound message type. |
| Delete | On clicking the Delete (🗑) icon, you can delete the inbound message type. Note: You can delete an inbound message type when an inbound message is not created using the inbound message type. |

On clicking the **Broadcast** (📡) icon corresponding to an inbound message type, the **Inbound Message Type** zone appears with the details of the respective inbound message type.

Inbound Message Type

The **Inbound Message Type** zone displays the details of the inbound message type. It contains the following sections:

- **Main** – This section displays basic information about the inbound message type. It contains the following fields:

| Field Name | Field Description |
|----------------------------|---|
| Inbound Message Type | Displays the inbound message type. |
| Customer Registration Type | Indicates the customer registration type using which the customer registration object is created through a health care inbound message. |

| Field Name | Field Description |
|------------------------------------|--|
| | <p>Note:</p> <p>It has a link. On clicking the link, the Customer Registration Type screen appears where you can view the details of the respective customer registration type.</p> <p>This field appears when you are viewing the details of an inbound message type which is created using the C1-HCInboundMsgType business object.</p> |
| Inbound Message Business Object | <p>Indicates the business object using which the inbound message is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p>Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.</p> |
| Healthcare Product Business Object | <p>Indicates the business object using which the health product is created through a health product and plan inbound message. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p>Note:</p> <p>It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.</p> <p>This field appears when you are viewing the details of an inbound message type which is created using the C1-HCProdHlthPlnInboundTyp business object.</p> |
| Health Plan Business Object | <p>Indicates the business object using which the health plan is created through a health product and plan inbound message. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p>Note:</p> <p>It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object.</p> <p>This field appears when you are viewing the details of an inbound message type which is created using the C1-HCProdHlthPlnInboundTyp business object.</p> |
| Description | Displays the description of the inbound message type. |
| Status | <p>Indicates the status of the inbound message type. The valid values are:</p> <ul style="list-style-type: none"> • Active • Inactive |
| Detailed Description | Displays additional information about the inbound message type. |

- **Additional Data** – This section lists the additional information about the inbound message type. This section appears when you are viewing the details of an inbound message type which is created using the **C1-IndHCInboundMsgType** business object. It contains the following fields:

| Field Name | Field Description |
|---------------------------------------|---|
| Person Business Object | Indicates the business object using which the individual customer is created through a health care inbound message. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Account Business Object | Indicates the business object using which the individual customer's account is created through a health care inbound message. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Individual Membership Business Object | Indicates the business object using which the individual membership is created through a health care inbound message. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Benefits Business Object | Indicates the business object using which the individual membership benefit is created through a health care inbound message. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Address Business Object | Indicates the business object using which the address is created through a health care inbound message. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Statement Construct Business Object | Indicates the business object using which the statement construct is created through a health care inbound message. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |

- **Characteristics** – This section lists the characteristics defined for the inbound message type. It contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** – This section contains the following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to edit the details of the inbound message type. |
| Delete | Used to delete the inbound message type. |
| | Note: You can delete an inbound message type when an inbound message is not created using the inbound message type. |

| Button Name | Button Description |
|-------------|---|
| Duplicate | Used to create a new inbound message type using an existing inbound message type. |

- **Record Information** – This section contains the following field:

| Field Name | Field Description |
|-----------------|---|
| Business Object | Indicates the business object using which the inbound message type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |

By default, the **Inbound Message Type** zone does not appear in the **Inbound Message Type** screen. It appears when you click the **Broadcast** () icon corresponding to an inbound message type in the **Inbound Message Type List** zone.

Viewing the Inbound Message Type Details

Procedure

To view the details of an inbound message type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **I** and then click **Inbound Message Type**.
A sub-menu appears.
3. Click the **Search** option from the **Inbound Message Type** sub-menu.
The **Inbound Message Type** screen appears.
4. In the **Inbound Message Type List** zone, click the **Broadcast** () icon corresponding to the inbound message type whose details you want to view.
The **Inbound Message Type** zone appears.
5. View the details of the inbound message type in the **Inbound Message Type** zone.

Defining an Inbound Message Type

Prerequisites

The following table lists the prerequisites for defining various inbound message types:

| If you want to define a.. | Then, you should have... |
|--|--|
| Health Care Inbound Message Type | <ul style="list-style-type: none"> Health care inbound message type business object defined in the application Health care inbound message business object defined in the application Customer registration types defined in the application |
| Health Product and Plan Inbound Message Type | <ul style="list-style-type: none"> Health product and plan inbound message type business object defined in the application Health product and plan inbound message business object defined in the application Health product business object defined in the application Health plan business object defined in the application |
| Individual Inbound Message Type | <ul style="list-style-type: none"> Health care inbound message type business object defined in the application Health care inbound message business object defined in the application Required person, account, individual membership, membership benefit, address, and statement construct business objects defined in the application |

Procedure

To define an inbound message type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **I** and then click **Inbound Message Type**.
A sub-menu appears.
3. Click the **Add** option from the **Inbound Message Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------------------|--|-----------------------|
| Inbound Message Type Business Object | Used to indicate the business object using which you want to create the inbound message type. The following table lists the business objects using which you can create the respective inbound message type: | Yes |

| Field Name | Field Description | | Mandatory (Yes or No) |
|------------|--|-------------------------|-----------------------|
| | Inbound Message Type | Business Object | |
| | Health Care Inbound Message Type | C1-HCInboundMsgType | |
| | Health Product and Plan Inbound Message Type | C1-HCProdHlthPlnInbound | |
| | Individual Inbound Message Type | C1-IndHCInboundMsgType | |

4. Select the required business object to create the respective inbound message type.
5. Click **OK**.

The **Inbound Message Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the inbound message type. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------|---|-----------------------|
| Inbound Message Type | Used to specify the inbound message type. | Yes |
| Business Object | Indicates the business object using which you are defining the inbound message type. | Not applicable |
| Customer Registration Type | Used to indicate the customer registration type using which you want to create the customer registration object through a health care inbound message. Note: This field appears when you are defining an inbound message type using the C1-HCInboundMsgType business object. While creating a health care inbound message type for the fully-insured group health insurance business, you must use a customer registration type where the Approval Required, Final Approval Required, and Manual Billing Hierarchy and Pricing options are not selected. However, while creating a health care inbound message type for the self-funded health insurance business, you must use a customer registration type where the Final Approval Required and Manual Billing Hierarchy and Pricing options are selected, but the Approval Required option is not selected. | Yes |
| Inbound Message Business Object | Used to indicate the business object using which you want to create the respective inbound message. | Yes |
| Health Product Business Object | Used to indicate the business object using which you want to create a health product through a health product and plan inbound message. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------|--|-----------------------|
| | Note: This field appears when you are defining a health product and plan inbound message type using the C1-HCProdHlthPlnInbound business object. | |
| Health Plan Business Object | Used to indicate the business object using which you want to create a health plan through a health product and plan inbound message. Note: This field appears when you are defining a health product and plan inbound message type using the C1-HCProdHlthPlnInbound business object. | Yes |
| Description | Used to specify the description for the inbound message type. | Yes |
| Status | Used to indicate the status of the inbound message type. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes |
| Detailed Description | Used to specify additional information about the inbound message type. | No |

- **Additional Data** – Used to specify additional details about the inbound message type. This section appears when you are specifying the details of an inbound message type which is created using the **C1-IndHCInboundMsgType** business object. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------------|--|-----------------------|
| Person Business Object | Used to indicate the business object using which you want to create an individual customer through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Account Business Object | Used to indicate the business object using which you want to create an individual customer's account through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Individual Membership Business Object | Used to indicate the business object using which you want to create an individual membership through a health care inbound message. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| | Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | |
| Benefits Business Object | Used to indicate the business object using which you want to create an individual membership benefit through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Address Business Object | Used to indicate the business object using which you want to create an address through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Statement Construct Business Object | Used to indicate the business object using which you want to create a statement construct through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Inbound Message Type** screen.

- **Characteristics** – Used to define the characteristics for the inbound message type.
6. Enter the required details in the **Main** section.
 7. Enter the required details in the **Additional Data** section.
 8. Define characteristics for the inbound message type, if required.
 9. Click **Save**.

The inbound message type is defined.

| How to define a characteristic for an inbound message type | Defining a Characteristic for an Inbound Message Type on page 2470 |

Defining a Characteristic for an Inbound Message Type

Prerequisites

To define a characteristic for an inbound message type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Inbound Message Type**)

Procedure

To define a characteristic for an inbound message type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an inbound message type.

The **Characteristics** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|---|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Inbound Message Type . | Note: This field is required while defining a characteristic for the inbound message type. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required while defining a characteristic for the inbound message type. |

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the inbound message type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the inbound message type, click the **Delete** (🗑️) icon corresponding to the characteristic.

Editing an Inbound Message Type

Prerequisites

The following table lists the prerequisites for editing various inbound message types:

| If you want to define a.. | Then, you should have... |
|--|--|
| Health Care Inbound Message Type | <ul style="list-style-type: none"> Health care inbound message type business object defined in the application Health care inbound message business object defined in the application Customer registration types defined in the application |
| Health Product and Plan Inbound Message Type | <ul style="list-style-type: none"> Health product and plan inbound message type business object defined in the application Health product and plan inbound message business object defined in the application Health product business object defined in the application Health plan business object defined in the application |
| Individual Inbound Message Type | <ul style="list-style-type: none"> Health care inbound message type business object defined in the application Health care inbound message business object defined in the application Required person, account, individual membership, membership benefit, address, and statement construct business objects defined in the application |

Procedure

To edit an inbound message type:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **I** and then click **Inbound Message Type**.
A sub-menu appears.
- Click the **Search** option from the **Inbound Message Type** sub-menu.
The **Inbound Message Type** screen appears.
- In the **Inbound Message Type List** zone, click the **Edit**  icon in the **Edit** column corresponding to the Inbound message type whose details you want to edit.

The **Inbound Message Type** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the inbound message type. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|------------------------------------|-----------------------|
| Inbound Message Type | Displays the inbound message type. | Not applicable |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------|---|-----------------------|
| Business Object | Indicates the business object which is used while defining the inbound message type. | Not applicable |
| Customer Registration Type | Used to indicate the customer registration type using which you want to create the customer registration object through a health care inbound message. Note: This field appears when you are defining an inbound message type using the C1-HCInboundMsgType business object. While creating a health care inbound message type for the fully-insured group health insurance business, you must use a customer registration type where the Approval Required, Final Approval Required, and Manual Billing Hierarchy and Pricing options are not selected. However, while creating a health care inbound message type for the self-funded health insurance business, you must use a customer registration type where the Final Approval Required and Manual Billing Hierarchy and Pricing options are selected, but the Approval Required option is not selected. | Yes |
| Inbound Message Business Object | Used to indicate the business object using which you want to create the respective inbound message. | Yes |
| Health Product Business Object | Used to indicate the business object using which you want to create a health product through a health product and plan inbound message. Note: This field appears when you are defining a health product and plan inbound message type using the C1-HCProdHlthPlnInbound business object. | Yes |
| Health Plan Business Object | Used to indicate the business object using which you want to create a health plan through a health product and plan inbound message. Note: This field appears when you are defining a health product and plan inbound message type using the C1-HCProdHlthPlnInbound business object. | Yes |
| Description | Used to specify the description for the inbound message type. | Yes |
| Status | Used to indicate the status of the inbound message type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |
| Detailed Description | Used to specify additional information about the inbound message type. | No |

- **Additional Data** – Used to specify additional details about the inbound message type. This section appears when you are specifying the details of an inbound message type which is created using the **C1-IndHCInboundMsgType** business object. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------------|--|-----------------------|
| Person Business Object | Used to indicate the business object using which you want to create an individual customer through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Account Business Object | Used to indicate the business object using which you want to create an individual customer's account through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Individual Membership Business Object | Used to indicate the business object using which you want to create an individual membership through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Benefits Business Object | Used to indicate the business object using which you want to create an individual membership benefit through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Address Business Object | Used to indicate the business object using which you want to create an address through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Statement Construct Business Object | Used to indicate the business object using which you want to create an statement construct through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |

- **Characteristics** – Used to define the characteristics for the inbound message type.

Tip: Alternatively, you can edit the details of an inbound message type by clicking the **Edit** button in the **Inbound Message Type** zone.

5. Modify the required details in the **Main** and **Additional Data** section, if required.
6. Define, edit, or remove characteristics of the inbound message type, if required.
7. Click **Save**.

The changes made to the inbound message type are saved.

Copying an Inbound Message Type

Instead of creating an inbound message type from scratch, you can create a new inbound message type using an existing inbound message type. This is possible through copying an inbound message type. On copying an inbound message type, the details including the characteristics are copied to the new inbound message type. You can then edit the details, if required.

Prerequisites

The following table lists the prerequisites for copying various inbound message types:

| If you want to define a.. | Then, you should have... |
|--|--|
| Health Care Inbound Message Type | <ul style="list-style-type: none"> • Health care inbound message type business object defined in the application • Health care inbound message business object defined in the application • Customer registration types defined in the application |
| Health Product and Plan Inbound Message Type | <ul style="list-style-type: none"> • Health product and plan inbound message type business object defined in the application • Health product and plan inbound message business object defined in the application • Health product business object defined in the application • Health plan business object defined in the application |
| Individual Inbound Message Type | <ul style="list-style-type: none"> • Health care inbound message type business object defined in the application • Health care inbound message business object defined in the application • Required person, account, individual membership, membership benefit, address, and statement construct business objects defined in the application |

Procedure

To copy an inbound message type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **I** and then click **Inbound Message Type**.
A sub-menu appears.
3. Click the **Search** option from the **Inbound Message Type** sub-menu.
The **Inbound Message Type** screen appears.
4. In the **Inbound Message Type List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the inbound message type whose copy you want to create.

The **Inbound Message Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the inbound message type. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------|--|-----------------------|
| Inbound Message Type | Used to specify the inbound message type. | Yes |
| Business Object | Indicates the business object which is used while defining the inbound message type. | Not applicable |
| Customer Registration Type | Used to indicate the customer registration type using which you want to create the customer registration object through a health care inbound message. Note: This field appears when you are defining an inbound message type using the C1-HCInboundMsgType business object. While creating a health care inbound message type for the fully-insured group health insurance business, you must use a customer registration type where the Approval Required , Final Approval Required , and Manual Billing Hierarchy and Pricing options are not selected. However, while creating a health care inbound message type for the self-funded health insurance business, you must use a customer registration type where the Final Approval Required and Manual Billing Hierarchy and Pricing options are selected, but the Approval Required option is not selected. | Yes |
| Inbound Message Business Object | Used to indicate the business object using which you want to create the respective inbound message. | Yes |
| Health Product Business Object | Used to indicate the business object using which you want to create a health product through a health product and plan inbound message. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------|--|-----------------------|
| | Note: This field appears when you are defining a health product and plan inbound message type using the C1-HCProdHlthPlnInbound business object. | |
| Health Plan Business Object | Used to indicate the business object using which you want to create a health plan through a health product and plan inbound message. Note: This field appears when you are defining a health product and plan inbound message type using the C1-HCProdHlthPlnInbound business object. | Yes |
| Description | Used to specify the description for the inbound message type. | Yes |
| Status | Used to indicate the status of the inbound message type. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes |
| Detailed Description | Used to specify additional information about the inbound message type. | No |

- **Additional Data** – Used to specify additional details about the inbound message type. This section appears when you are specifying the details of an inbound message type which is created using the **C1-IndHCInboundMsgType** business object. This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------------|--|-----------------------|
| Person Business Object | Used to indicate the business object using which you want to create an individual customer through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Account Business Object | Used to indicate the business object using which you want to create an individual customer's account through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Individual Membership Business Object | Used to indicate the business object using which you want to create an individual membership through a health care inbound message. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| | Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | |
| Benefits Business Object | Used to indicate the business object using which you want to create an individual membership benefit through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Address Business Object | Used to indicate the business object using which you want to create an address through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |
| Statement Construct Business Object | Used to indicate the business object using which you want to create a statement construct through a health care inbound message. Note: This field appears when you are defining a health care inbound message type using the C1-IndHCInboundMsgType business object. | Yes |

- **Characteristics** – Used to define the characteristics for the inbound message type.

Tip: Alternatively, you can copy an inbound message type by clicking the **Duplicate** button in the **Inbound Message Type** zone.

5. Enter the required details in the **Main** and **Additional Data** section.
6. Define, edit, or remove characteristics of the inbound message type, if required.
7. Click **Save**.

The new inbound message type is defined.

Deleting an Inbound Message Type

Procedure

To delete an inbound message type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **I** and then click **Inbound Message Type**.
A sub-menu appears.
3. Click the **Search** option from the **Inbound Message Type** sub-menu.
The **Inbound Message Type** screen appears.
4. In the **Inbound Message Type List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the *Inbound message type* that you want to delete.
A message appears confirming whether you want to delete the inbound message type.

Note: You can delete an inbound message type when an inbound message is not created using the inbound message type.

Tip: Alternatively, you can delete an inbound message type by clicking the **Delete** button in the **Inbound Message Type** zone.

5. Click **OK**.
The inbound message type is deleted.

Inbound Message (Used for Searching)

The **Inbound Message** screen allows you to search for an inbound message using various search criteria. It contains the following zone:

- [Search Inbound Message](#) on page 2479

Through this screen, you can navigate to the following screen:

- [Inbound Message \(Used for Viewing\)](#) on page 2485

Search Inbound Message

The **Search Inbound Message** zone allows you to search for an inbound message using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------|---|-----------------------|
| Search By | Used to indicate whether you want to search for an inbound message using the inbound message or person details. The valid values are: <ul style="list-style-type: none"> • Message Details • Person Details | Yes |
| | Note: By default, the Message Details option is selected. | |
| Inbound Message ID | Used to search a particular inbound message. | No |
| | Note: This field appears when the Message Details option is selected from the Search By list. | |
| Person ID | Used to search inbound messages through which a particular parent customer or bill group and their related entities are created in the system. | Yes |
| | <p>Note:</p> <p>The Search (🔍) icon appears corresponding to the Person ID field. On clicking the Search icon, the Person Search window appears.</p> <p>This field appears when the Person Details option is selected from the Search By list.</p> <p>This field is only applicable for the fully-insured group and self-funded businesses.</p> <p>This field can only be used to search inbound messages through which a person of the following person types is created in the system:</p> <ul style="list-style-type: none"> • Parent Customer • Bill Group | |
| Status | Used to search inbound messages with a particular status. The valid values are: <ul style="list-style-type: none"> • Pending • Processed • Rejected • Voided | No |
| | Note: This field appears when the Message Details option is selected from the Search By list. | |
| Source System | Used to search inbound messages which are received from a particular external system. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------|--|-----------------------|
| | Note: This field appears when the Message Details option is selected from the Search By list. | |
| Created From | Used to search inbound messages which are created from a particular date onwards. Note: This field appears when the Message Details option is selected from the Search By list. | No |
| External Source ID | Used to search inbound messages which are received from a particular external source system. Note: This field appears when the Message Details option is selected from the Search By list. | No |
| Created To | Used to search inbound messages which are created till a particular date. Note: This field appears when the Message Details option is selected from the Search By list. | No |
| External Transaction ID | Used to search the inbound message which was a result of a particular transaction in the external source system. Note: This field appears when the Message Details option is selected from the Search By list. | No |
| User ID | Used to search inbound messages which are created by a particular user. Note: This field appears when the Message Details option is selected from the Search By list. | No |
| External Batch ID | Used to search inbound messages which are created through a particular batch job. Note: This field appears when the Message Details option is selected from the Search By list. | No |
| Inbound Message Type | Used to search inbound messages which are created using a particular inbound message type. Note: This field appears when the Message Details option is selected from the Search By list. | No |

Note: You must specify at least one search criterion while searching for an inbound message.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|-----------------------------|--|
| Creation Date | Displays the date when the inbound message is created in the system. |
| Inbound Message Information | Displays information about the inbound message. Note: It has a link. On clicking the link, the Inbound Message screen appears where you can view the details of the respective inbound message. |
| Status | Indicates the status of the inbound message. The valid values are: <ul style="list-style-type: none"> • Pending • Processed • Rejected • Voided |
| Inbound Message Type | Indicates the inbound message type using which the inbound message is created. |
| Source System | Indicates the source system from where the inbound message is received. |
| External Transaction ID | Indicates the transaction in the external source system which resulted in the inbound message. |
| External Source ID | Displays the external source system ID. |
| External Batch ID | Indicates the batch job in the external source system through which the inbound message is created. |
| Person Information | Indicates the person whose record is created or updated in the system through the inbound message. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person. This column appears when the Person Details option is selected from the Search By list. |
| Created By | Indicates the user who has created the inbound message. Note: This column appears when the Message Details option is selected from the Search By list. |

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for an Inbound Message

Prerequisites

To search for an inbound message, you should have:

- Inbound message types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Person identifier types defined in the application

Procedure

To search for an inbound message:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Integration** and then click **Inbound Message**.
The **Inbound Message** screen appears.
3. Enter the search criteria in the **Search Inbound Message** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of inbound messages that meet the search criteria appears in the **Search Results** section.

Creating an Inbound Message

The following table lists the different types of inbound messages that you can create through the respective inbound web service:

| Inbound Message | Inbound Web Service |
|--|---|
| Health Care Inbound Message on page 2160 | C1-HCInboundMessage on page 2484 |
| Health Product and Plan Inbound Message on page 2429 | C1-HCProdHlthPlnInboundMessage on page 2484 |
| | C1-HCProdHlthPlnInboundMes on page 2485 |

You cannot create the above inbound messages from the user interface. However, you can define, edit, and remove a characteristic from the above inbound messages from the user interface. You can delete and submit the above inbound messages for validation and processing from the user interface and through a batch process.

C1-HCInboundMessage

The **C1-HCInboundMessage** inbound web service is a SOAP based Web service which can be used for the self-funded, fully-insured group, and fully-insured individual businesses. It enables you to create or update a parent customer, bill group, individual customer and their account, self-funded or fully-insured group policy, policy plan, group or individual membership, group or individual membership benefits, and statement constructs. It allows you to define and edit pricing rules for the fully-insured group business. It allows you to create or update a pass-through billable charge for a fully-insured group policy. It allows you to terminate, reinstate, or renew a fully-insured group policy. It also allows you to terminate an individual membership.

On calling the **C1-HCInboundMessage** inbound web service, a health care inbound message is created in the **Pending** status. A health care inbound message goes through various statuses in its lifecycle. You can search for a health care inbound message through the **Inbound Message** screen.

Before calling the **C1-HCInboundMessage** inbound web service, you need to ensure that the prerequisites are setup as mentioned in [Prerequisites](#) on page 2168.

Viewing the Inbound Message Details

Procedure

To view the details of an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message whose details you want to view.

The **Inbound Message** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the details of the inbound message in the **Inbound Message** zone.

Related Topics

| Inbound Message screen | Inbound Message (Used for Viewing) on page 2485 |
| Inbound Message zone | Inbound Message on page 2486 |

Inbound Message (Used for Viewing)

Once an inbound message is created, the **Inbound Message** screen allows you to:

- View the details of the inbound message
- Edit the details of the inbound message
- Delete the inbound message

- Submit the inbound message for validation and processing
- Resubmit the inbound message for validation and processing on failure
- Void the inbound message
- View the content of the inbound message
- View the log of the inbound message
- Add a log entry for the inbound message

The **Inbound Message** screen contains the following tabs:

- [Inbound Message - Main](#) on page 2486
- [Inbound Message - Message](#) on page 2488
- [Inbound Message - Log](#) on page 2489

Inbound Message - Main

The **Main** tab displays information about the inbound message. It contains the following zone:

- [Inbound Message](#) on page 2486

Inbound Message

The **Inbound Message** zone displays the details of the inbound message. It contains the following sections:

- **Main** – Displays basic information about the inbound message. It contains the following fields:

| Field Name | Field Description |
|-----------------------------|--|
| Inbound Message Information | Displays information about the inbound message. |
| Status | Indicates the status of the inbound message. The valid values are: <ul style="list-style-type: none"> • Pending • Processed • Rejected • Voided |
| Inbound Message Type | Indicates the inbound message type using which the inbound message is created. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p>Note: It has a link. On clicking the link, the Inbound Message Type screen appears where you can view the details of the respective inbound message type.</p> </div> |
| Source System | Indicates the external source system from where the inbound message is received. |
| External Transaction ID | Indicates the transaction in the external source system which resulted in the inbound message. |
| External Batch ID | Indicates the external batch job through which the inbound message is created. |
| External Source ID | Displays the external source system ID. |
| Person | Indicates the person specified in the inbound message. |

| Field Name | Field Description |
|------------|---|
| | <p>Note:</p> <p>It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.</p> <p>This field appears when the Person Details option is selected from the Search By list in the Search Inbound Message zone.</p> |

- **Characteristics** – Lists the characteristics defined for the inbound message. It contains the following columns:

| Column Name | Column Description |
|----------------------|--|
| Effective Date | Displays the date from when the characteristic is effective for the inbound message. |
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

- **Record Actions** – This section contains the following buttons:

| Button Name | Button Description |
|-----------------------|---|
| Edit | Used to define, edit, or remove characteristics of the inbound message. |
| | Note: The Edit button appears when the inbound message is in the Pending or Rejected status. |
| Delete | Used to delete the inbound message. |
| | Note: The Delete button appears when the inbound message is in the Pending status. |
| Submit for Processing | Used to submit the inbound message for validation and processing. |
| | Note: The Submit for Processing button appears only when the inbound message is in the Pending status. |
| Retry | Used when you want to change the status of the inbound message from Rejected to Pending so that the inbound message can be considered once again for validation and processing. |
| | Note: The Retry button appears when the inbound message is in the Rejected status. |
| Void | Used to cancel the inbound message. |
| | Note: The Void button appears when the inbound message is in the Rejected status. |

- **Record Information** – This section contains the following fields:

| Field Name | Field Description |
|-----------------|--|
| Business Object | Indicates the business object using which the inbound message is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |

| Field Name | Field Description |
|------------------|---|
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Status Date/Time | Displays the date and time when the status of the inbound message is updated. |
| Create Date/Time | Displays the date and time when the inbound message is created. |

Inbound Message - Message

The **Message** tab displays the content of the inbound message in the XML format. It contains the following zone:

- [Inbound Message Content](#) on page 2488

Inbound Message Content

The **Inbound Message Content** zone displays the content of the inbound message in the XML format. By default, each tag in the inbound message is expanded. You can collapse the tag whenever required.

For more information about the tags, refer to the respective XML format section:

| Inbound Message | XML Format |
|---|---|
| Health Care Inbound Message | Health Care Inbound Message XML Format on page 2175 |
| Health Product and Plan Inbound Message | Health Product and Plan Inbound Message XML Format on page 2436 |

Once the inbound message is validated and processed either from the user interface or through a batch process, the following tags appear at the bottom of the inbound message in the **Inbound Message Content** zone:

| Tag Name | Tag Description |
|-------------------|---|
| toDoRetry | Displays the information about the retry option used for the inbound message. |
| retryDateTime | Displays the date and time when the retry option is used to change the status of the inbound message from Rejected to Pending . |
| numberOfRetries | Indicates the number of times the retry option is used for the inbound message. |
| currentErrorState | Indicates the status to which the inbound message is transitioned when its validation or processing fails. The valid value is: <ul style="list-style-type: none"> • REJECTED |
| isRetried | Indicates whether the retry option is used to change the status of the inbound message. The valid values are: <ul style="list-style-type: none"> • true • false |

Inbound Message - Log

The **Log** tab contains the following zone:

- [Inbound Message Log](#) on page 2489

Inbound Message Log

The **Inbound Message Log** zone lists the complete trail of actions performed on the inbound message. It contains the following columns:

| Column Name | Column Description |
|--------------------|--|
| Creation Date/Time | Displays the date and time when the action was performed on the inbound message. |
| Details | Displays the details about the action performed on the inbound message. |
| User | Indicates the user who has performed the action on the inbound message. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is created when the action is performed on the inbound message. |
| Status Reason | Indicates the reason why the status of the inbound message is changed. Note: At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements. |

Note: You can manually add a log entry for the inbound message by clicking the **Add Log Entry** link in the upper right corner of the **Inbound Message Log** zone.

Editing an Inbound Message

Procedure

To edit an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message whose details you want to edit.

The **Inbound Message** screen appears.

3. Ensure that the **Main** tab is selected.

- Click the **Edit** button in the **Inbound Message** zone.

The **Inbound Message** screen appears. It contains the following sections:

- Main** - Displays the basic information about the inbound message. It contains the following fields:

| Field Name | Field Description |
|-----------------------------|---|
| Inbound Message Information | Displays information about the inbound message. |
| Inbound Message Type | Indicates the inbound message type using which the inbound message is created. |
| Source System | Indicates the source system from where the inbound message is received. |
| External Transaction ID | Indicates the transaction in the external source system which resulted in the inbound message. |
| External Batch ID | Indicates the batch job in the external source system through which the inbound message is created. |
| External Source ID | Displays the external source system ID. |

- Characteristics** - Used to define, edit, or remove characteristics of the inbound message.

Note: The **Edit** button appears when the inbound message is in the **Pending** or **Rejected** status.

- Define, edit, or remove characteristics of the inbound message, if required.
- Click **Save**.

The changes made to the inbound message are saved.

Defining a Characteristic for an Inbound Message

Prerequisites

To define a characteristic for an inbound message, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Inbound Message**)

Procedure

To define a characteristic for an inbound message:

- Ensure that the **Characteristics** section is expanded when you are editing an inbound message.

The **Characteristics** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|---|
| Effective Date | Used to specify the date from when the characteristic is effective for the inbound message. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the inbound message. |
| Characteristic Type | Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Inbound Message . | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the inbound message. |
| Characteristic Value | Used to specify the value for the characteristic type. Note: If you select a predefined characteristic type, the Search (🔍) icon appears corresponding to the Characteristic Value field. On clicking the Search icon, the Predefined Characteristic Search window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the inbound message. |

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the inbound message, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the inbound message, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the inbound message.

Deleting an Inbound Message

There might be situations when incorrect inbound messages are received in the system. In such case, the system provides you with an ability to delete the inbound message when it is not yet validated or processed. Note that you can delete an inbound message when the inbound message is in the **Pending** status.

Procedure

To delete an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message that you want to delete.

The **Inbound Message** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Inbound Message** zone.

A message appears confirming whether you want to delete the inbound message.

Note: The **Delete** button appears when the inbound message is in the **Pending** status.

5. Click **OK**.

The inbound message is deleted.

Processing an Inbound Message

Prerequisites

The following table lists the prerequisites which you should setup before processing the respective inbound message:

| Inbound Message | Refer to... |
|---|--|
| Health Care Inbound Message | Prerequisites on page 2168 |
| Health Product and Plan Inbound Message | Prerequisites on page 2430 |

Procedure

To process an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message that you want to submit for validation and processing.

The **Inbound Message** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Submit for Processing** button in the **Inbound Message** zone.

The status of the inbound message is changed to **Validation** and the algorithms attached to the **Validation** status are invoked in the specified sequence. If the validation is successful, the status of the inbound message is changed to **Processing** and the algorithms attached to the **Processing** status are invoked in the specified sequence. The following table lists how the system behaves when the respective inbound message is processed:

| If the inbound message is a... | Then... |
|--------------------------------|---|
| Health Care Inbound Message | Creates or updates a person, account and fully-insured group or self-funded policy. It creates or updates a policy plan, membership, and pass-through |

| If the inbound message is a... | Then... |
|---|--|
| | <p>billable charge for a fully-insured group policy. In addition, if requested, it terminates, reinstates, or renews a fully-insured group policy. Finally, the status of the inbound message is changed to Processed.</p> <p>The system uses the C1-PERSTYPE feature configuration to decide whether the person type specified in the health care inbound message represents Parent Customer or Bill Group. If the person type specified in the health care inbound message matches the person type specified in the Bill Group Person Type or Parent Person Type option type of the C1-PERSTYPE feature configuration, the system creates or updates the person, account, policy, policy plan, and address through a customer registration object. Note that the memberships, pass-through billable charges, and pricing rules are created directly and not via customer registration object. However, if the person type specified in the health care inbound message does not match the person type specified in the Bill Group Person Type or Parent Person Type option type, the system creates or updates the person and its other entities directly and not through a customer registration object. In this case, the system only refers the customer registration type for the business objects using which the person, account, policy plan, membership, and address should be created or updated in the system.</p> <p>If the derivation and pricing parameters are specified for a bill group, the system automatically creates one sort record for the bill group. Here, the sort ID is set to the bill group ID. The start and end dates of the sort record are set to the bill group and parent customer's relationship start and end dates. Once the sort record is created, the system creates the derivation and pricing parameters for the bill group and sort ID combination.</p> |
| Health Product and Plan Inbound Message | <p>Creates or updates a health product, health plan, and pricing rules for individual memberships. In addition, it also maintains a log of the entities that are either added or updated through the health product and plan inbound message. Note that the system allows to upload the health product, health plan, and pricing rules together in a single inbound message or by creating three separate inbound messages. Finally, the status of the inbound message is changed to Processed.</p> <p>The system uses the C1-HLTPRDVAL algorithm to validate the uploaded data through the health product and plan inbound message. Once the data is successfully validated, entities like health product, health plan, and pricing rules are created in the system.</p> |

However, if the validation or processing fails due to any reason, the status of the inbound message is changed to **Rejected** and the algorithms attached to the **Rejected** status are invoked in the specified sequence. A To Do is created using the To Do type specified in the **C1-TDCRINMSG** algorithm and assigned to the users with the To Do role specified in the **C1-TDCRINMSG** algorithm.

Note: The **Submit for Processing** button appears when the inbound message is in the **Pending** status.

Using the Retry Option for an Inbound Message

If the validation or processing fails due to any reason, the status of the inbound message is changed to **Rejected**. The system enables you to resubmit the inbound messages for validation and processing on failure. However, to resubmit the inbound message for validation and processing, you need to change the status of the inbound message from **Rejected** to **Pending**. This is possible through using the **Retry** option.

Procedure

To use the retry option for an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message for which you want to use the retry option.

The **Inbound Message** screen appears.

3. Ensure that the **Main** tab is selected.
4. Ensure that the To Dos created for the inbound message are in the **Complete** status.
5. Click the **Retry** button in the **Inbound Message** zone.

The status of the inbound message is changed to **Pending**.

Note: The **Retry** button appears when the inbound message is in the **Rejected** status.

Voiding an Inbound Message

There might be situations when incorrect inbound messages are received in the system. In such case, the system provides you with an ability to void or cancel the inbound message after the validation or processing fails. Note that you can void or cancel an inbound message when the inbound message is in the **Rejected** status.

Procedure

To void an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message that you want to void.

The **Inbound Message** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Void** button in the **Inbound Message** zone.

The status of the inbound message is changed to **Voided**.

Note: The **Void** button appears when the inbound message is in the **Rejected** status.

Viewing the Content of an Inbound Message**Procedure**

To view the content of an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message whose details you want to view.

The **Inbound Message** screen appears.

3. Click the **Message** tab.

The **Message** tab appears.

4. View the content of the inbound message in the XML format in the **Inbound Message Content** zone.

Viewing the Log of an Inbound Message**Procedure**

To view the log of an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message whose log you want to view.

The **Inbound Message** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. View the complete trail of actions performed on the inbound message in the **Inbound Message Log** zone.

Adding a Log Entry for an Inbound Message

Procedure

To add a log entry for an inbound message:

1. Search for the inbound message in the **Inbound Message** screen.
2. In the **Search Results** section, click the link in the **Inbound Message Information** column corresponding to the inbound message for which you want to add a log entry.

The **Inbound Message** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Inbound Message Log** zone.

The **Add Inbound Message Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------|--|-----------------------|
| Inbound Message Information | Displays information about the inbound message. | Not applicable |
| Log Details | Used to specify additional comments for the inbound message. | Yes |

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **Inbound Message Log** zone.

Statement Construct Preference

Oracle Revenue Management and Billing enables you to create and edit the statement construct of a person through a health care inbound message. However, note that you can create and edit the statement construct of only those persons through a health care inbound message whose record is created via a customer registration object. While creating or editing a statement construct, the system uses the statement construct business object of the customer registration type which is specified in the respective inbound message type.

If the data is not available in the following tags of a health care inbound message while creating a statement construct for a person, the system uses the default value from the respective attribute of the statement construct preference:

| Tag Name | Considers Default Value from the Following Attribute... |
|------------------------|---|
| statementAddressSource | Default Statement Address Source |
| effectiveStatus | Default Statement Status |
| statementCycle | Default Statement Cycle |
| statementFormat | Default Statement Format |
| statementRouteType | Default Statement Route Type |
| numberOfCopies | Default Statement Number of Copies |

In addition, if the data is not available in the following tag of a health care inbound message while adding an account or contract in a statement construct, the system uses the default value from the respective attribute of the statement construct preference:

| Tag Name | Considers Default Value from the Following Attribute... |
|------------|---|
| printOrder | Default Statement Print Order |

The system considers the statement construct preference which is specified in the **Field Mapping** parameter of the **C1-HCINPROC** algorithm. You can define, edit, delete, and copy a statement construct preference through the **Field Mapping** screen.

Searching for a Statement Construct Preference

Prerequisites

To search for a statement construct preference, you should have:

- Values defined in the **FIELD_CAT_FLG** lookup field

Procedure

To search for a statement construct preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.
The **Field Mapping** screen appears.
4. Select the **Statement Construct** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of statement construct preferences that meet the search criteria appears in the **Search Results** section.

Viewing the Statement Construct Preference Details

Procedure

To view the details of a statement construct preference:

1. Search for the statement construct preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** () icon corresponding to the statement construct preference whose details you want to view. The **Field Mapping** zone appears.
3. View the details of the statement construct preference in the **Field Mapping** zone.

Defining a Statement Construct Preference

Prerequisites

To define a statement construct preference, you should have:

- Values defined in the **STM_ADDR_SRC_FLG**, **STM_FORMAT_FLG**, and **MAP_ENTITY_FLG** lookup fields
- Statement cycles and statement route types defined in the application

Procedure

To define a statement construct preference:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------|---|-----------------------|
| Field Mapping Business Object | Used to indicate the business object using which you want to create the statement construct preference. The valid values are: | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|-----------------------|
| | <ul style="list-style-type: none"> Field Mapping Medicare Plan Benefit Package Membership Status Reason Mapping | |

Note: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Field Mapping** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- Main** - Used to specify basic details of the statement construct preference. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|-----------------------|
| Preference | Used to specify the statement construct preference. | Yes |
| Description | Used to specify the description for the statement construct preference. | Yes |
| Detailed Description | Used to specify additional information about the statement construct preference. | No |
| Status | Used to indicate the status of the statement construct preference. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes |

- Preference Category** - This section contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|---|-----------------------|
| Preference Category | Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> Billing Binder Payment Geographic Rating Area Individual Membership Medicare Medicare Plan Benefit Member Reconciliation Member Relationship and Subscription Tier Membership Status Reason Statement Construct | Yes |

- Preference Settings** - Used to set the attributes in the statement construct preference. It contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) | | | | |
|----------------------------------|---|---|------------------------|----------------------------------|--|---|
| Attribute | <p>Used to indicate the attribute which you want to set in the statement construct preference. The valid values are:</p> <ul style="list-style-type: none"> • Default Statement Address Source - Used when the address source is not specified while creating a statement construct through a health care inbound message. • Default Statement Status - Used when the status is not specified while creating a statement construct through a health care inbound message. • Default Statement Cycle - Used when the statement cycle is not specified while creating a statement construct through a health care inbound message. • Default Statement Format - Used when the statement format is not specified while creating a statement construct through a health care inbound message. • Default Statement Route Type - Used when the statement route type is not specified while creating a statement construct through a health care inbound message. • Default Statement Number of Copies - Used when the number of statement copies is not specified while creating a statement construct through a health care inbound message. • Default Statement Print Order - Used when the print order is not specified for an account or contract while creating or updating a statement construct through a health care inbound message. | <p>Yes (Conditional)</p> <p>Note: This field is required while setting an attribute in the statement construct preference.</p> | | | | |
| Value | <p>Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the statement construct preference:</p> <table border="1" data-bbox="639 1577 1182 1871"> <thead> <tr> <th data-bbox="639 1577 867 1661">If the attribute is set to...</th> <th data-bbox="867 1577 1182 1661">Then, this field is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="639 1661 867 1871">Default Statement Address Source</td> <td data-bbox="867 1661 1182 1871"> <p>Used to indicate the source whose address should be used for sending the statements to the person. The valid value is:</p> <ul style="list-style-type: none"> • Person | <p>Yes (Conditional)</p> <p>Note: This field is required while setting an attribute in the statement construct preference.</p> |
| If the attribute is set to... | Then, this field is... | | | | | |
| Default Statement Address Source | <p>Used to indicate the source whose address should be used for sending the statements to the person. The valid value is:</p> <ul style="list-style-type: none"> • Person | | | | | |

| Field Name | Field Description | | Mandatory (Yes or No) |
|------------|--------------------------------------|---|-----------------------|
| | If the attribute is set to... | Then, this field is... | |
| | | Note: The list includes only those values which are defined in the STM_ADDR_SRC_FLG lookup field. | |
| | Default Statement Status | Used to indicate the status of the statement construct. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | |
| | Default Statement Cycle | Used to indicate when statements should be generated for the statement construct. Note: The list includes only those statement cycles which are already defined in the system. | |
| | Default Statement Format | Used to indicate the format in which the statements should be printed. The valid values are: <ul style="list-style-type: none"> • Detail • Summary Note: The list includes only those values which are defined in the STM_FORMAT_FLG lookup field. | |
| | Default Statement Route Type | Used to indicate how to route the statements to the person. Note: The list includes only those statement route types which are already defined in the system. | |
| | Default Statement Number of Copies | Used to indicate how many copies of the statement | |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------|---|-----------------------|
| | <p>should be sent to the person.</p> <p>Note: You must specify a positive integer for this attribute.</p> | |
| | <p>Default Statement Print Order</p> <p>Used to indicate the order in which the financial transactions associated with the account or contract should appear on the printed statement.</p> <p>Note: You must specify a positive integer for this attribute.</p> | |
| Entity Type | <p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> Account Billable Charge <p>Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field.</p> | No |

Note: While defining a statement construct preference, you must set at least one attribute in the statement construct preference.

6. Select the **Statement Construct** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the statement construct preference, click the **Add (+)** icon and then repeat step 8.

Note: However, if you want to remove an attribute from the statement construct preference, click the **Delete** (🗑️) icon corresponding to the attribute.

10. Click **Save**.

The statement construct preference is defined.

Editing a Statement Construct Preference

Prerequisites

To edit a statement construct preference, you should have:

- Values defined in the **STM_ADDR_SRC_FLG**, **STM_FORMAT_FLG**, and **MAP_ENTITY_FLG** lookup fields
- Statement cycles and statement route types defined in the application

Procedure

To edit a statement construct preference:

1. Search for the statement construct preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the statement construct preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the statement construct preference. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|-----------------------|
| Preference | Displays the statement construct preference. | Not applicable |
| Description | Used to specify the description for the statement construct preference. | Yes |
| Detailed Description | Used to specify additional information about the statement construct preference. | No |
| Status | Used to indicate the status of the statement construct preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |
| Preference Category | Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> • Statement Construct | Not applicable |

- **Preference Settings** - Used to set the attributes in the statement construct preference. It contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|---|
| Attribute | Used to indicate the attribute which you want to set in the statement construct preference. The valid values are: <ul style="list-style-type: none"> • Default Statement Address Source - Used when the address source is not specified while creating a statement construct through a health care inbound message. • Default Statement Status - Used when the status is not specified while creating a statement construct through a health care inbound message. • Default Statement Cycle - Used when the statement cycle is not specified while creating a statement construct through a health care inbound message. | Yes (Conditional) |
| | | Note: This field is required while setting an attribute in the statement construct preference. |

| Field Name | Field Description | Mandatory (Yes or No) | | | | | | | | |
|----------------------------------|--|-------------------------------|------------------------|----------------------------------|---|--------------------------|--|-------------------------|---|--|
| | <ul style="list-style-type: none"> • Default Statement Format - Used when the statement format is not specified while creating a statement construct through a health care inbound message. • Default Statement Route Type - Used when the statement route type is not specified while creating a statement construct through a health care inbound message. • Default Statement Number of Copies - Used when the number of statement copies is not specified while creating a statement construct through a health care inbound message. • Default Statement Print Order - Used when the print order is not specified for an account or contract while creating or updating a statement construct through a health care inbound message. | | | | | | | | | |
| Value | <p>Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the statement construct preference:</p> <table border="1" data-bbox="639 1026 1182 1890"> <thead> <tr> <th data-bbox="639 1026 867 1108">If the attribute is set to...</th> <th data-bbox="867 1026 1182 1108">Then, this field is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="639 1108 867 1539">Default Statement Address Source</td> <td data-bbox="867 1108 1182 1539"> Used to indicate the source whose address should be used for sending the statements to the person. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Default Statement Cycle | Used to indicate when statements should be generated for the statement construct. | <p>Yes (Conditional)</p> <div data-bbox="1198 932 1468 1066" style="border: 1px solid black; padding: 2px;"> <p>Note: This field is required while setting an attribute in the statement construct preference.</p> </div> |
| If the attribute is set to... | Then, this field is... | | | | | | | | | |
| Default Statement Address Source | Used to indicate the source whose address should be used for sending the statements to the person. The valid value is: <ul style="list-style-type: none"> • Person <div data-bbox="873 1346 1175 1520" style="border: 1px solid black; padding: 2px;"> <p>Note: The list includes only those values which are defined in the STM_ADDR_SRC_FLG lookup field.</p> </div> | | | | | | | | | |
| Default Statement Status | Used to indicate the status of the statement construct. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | | | | | | | | | |
| Default Statement Cycle | Used to indicate when statements should be generated for the statement construct. | | | | | | | | | |

| Field Name | Field Description | | Mandatory (Yes or No) |
|------------|--------------------------------------|--|-----------------------|
| | If the attribute is set to... | Then, this field is... | |
| | | Note: The list includes only those statement cycles which are already defined in the system. | |
| | Default Statement Format | Used to indicate the format in which the statements should be printed. The valid values are: <ul style="list-style-type: none"> • Detail • Summary Note: The list includes only those values which are defined in the STM_FORMAT_FLG lookup field. | |
| | Default Statement Route Type | Used to indicate how to route the statements to the person. Note: The list includes only those statement route types which are already defined in the system. | |
| | Default Statement Number of Copies | Used to indicate how many copies of the statement should be sent to the person. Note: You must specify a positive integer for this attribute. | |
| | Default Statement Print Order | Used to indicate the order in which the financial transactions associated with the account or contract should appear on the printed statement. Note: You must specify a positive integer for this attribute. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------|---|-----------------------|
| Entity Type | Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> Account Billable Charge | No |
| | Note: At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the MAP_ENTITY_FLG lookup field. | |

Tip: Alternatively, you can edit the details of a statement construct preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the statement construct preference, if required.

Note: You must set at least one attribute in a statement construct preference.

5. Click **Save**.

The changes made to the statement construct preference are saved.

| How to search for a statement construct preference | Searching for a Statement Construct Preference on page 2497 |

Copying a Statement Construct Preference

Instead of creating a statement construct preference from scratch, you can create a new statement construct preference using an existing statement construct preference. This is possible through copying a statement construct preference. On copying a statement construct preference, the details including the attributes are copied to the new statement construct preference. You can then edit the details, if required.

Prerequisites

To copy a statement construct preference, you should have:

- Statement construct preference (whose copy you want to create) defined in the application
- Values defined in the **STM_ADDR_SRC_FLG**, **STM_FORMAT_FLG**, and **MAP_ENTITY_FLG** lookup fields
- Statement cycles and statement route types defined in the application

Procedure

To copy a statement construct preference:

1. Search for the statement construct preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the statement construct preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the statement construct preference. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|-----------------------|
| Preference | Used to specify the statement construct preference. | Yes |
| Description | Used to specify the description for the statement construct preference. | Yes |
| Detailed Description | Used to specify additional information about the statement construct preference. | No |
| Status | Used to indicate the status of the statement construct preference. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |
| Preference Category | Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> • Statement Construct | Not applicable |

- **Preference Settings** - Used to set the attributes in the statement construct preference. It contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|---|
| Attribute | Used to indicate the attribute which you want to set in the statement construct preference. The valid values are: <ul style="list-style-type: none"> • Default Statement Address Source - Used when the address source is not specified while creating a statement construct through a health care inbound message. • Default Statement Status - Used when the status is not specified while creating a statement construct through a health care inbound message. • Default Statement Cycle - Used when the statement cycle is not specified while creating a statement construct through a health care inbound message. • Default Statement Format - Used when the statement format is not specified while creating a statement construct through a health care inbound message. • Default Statement Route Type - Used when the statement route type is not specified while creating a statement construct through a health care inbound message. • Default Statement Number of Copies - Used when the number of statement copies | Yes (Conditional) |
| | | Note: This field is required while setting an attribute in the statement construct preference. |

| Field Name | Field Description | Mandatory (Yes or No) | | | | | | | | | | |
|----------------------------------|--|-------------------------------|------------------------|----------------------------------|---|--------------------------|---|-------------------------|---|--------------------------|--|---|
| | <p>is not specified while creating a statement construct through a health care inbound message.</p> <ul style="list-style-type: none"> • Default Statement Print Order - Used when the print order is not specified for an account or contract while creating or updating a statement construct through a health care inbound message. | | | | | | | | | | | |
| Value | <p>Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the statement construct preference:</p> <table border="1" data-bbox="638 678 1182 1904"> <thead> <tr> <th data-bbox="638 678 867 758">If the attribute is set to...</th> <th data-bbox="867 678 1182 758">Then, this field is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="638 758 867 1188">Default Statement Address Source</td> <td data-bbox="867 758 1182 1188"> <p>Used to indicate the source whose address should be used for sending the statements to the person. Note: While defining a statement construct preference, you must set at least one attribute in the statement construct preference.

Tip: Alternatively, you can copy a statement construct preference by clicking the **Duplicate** button in the **Field Mapping** zone.

3. Enter the required details in the **Main** section.
4. Define, edit, or remove the attribute from the statement construct preference, if required.
5. Click **Save**.

The new statement construct preference is defined.

Deleting a Statement Construct Preference

Procedure

To delete a statement construct preference:

1. Search for the statement construct preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the statement construct preference that you want to delete.

A message appears confirming whether you want to delete the statement construct preference.

Tip: Alternatively, you can delete a statement construct preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The statement construct preference is deleted.

Chapter 32

Upload Lockbox Payment and Remittance Advices

Topics:

- [Prerequisites](#)
- [EDI 820 Flat File Description](#)
- [Sample EDI 820 Flat File](#)
- [Upload EDI 820 Files in ORMB](#)

Oracle Revenue Management and Billing enables you to upload lockbox payment and remittance advices received in the **Electronic Data Exchange (EDI) 820** format. Under this feature, the payments made by customers are directed to a special post office box instead of going to the company directly. The bank goes to this post office box, retrieves the payments, processes them and deposits the funds directly into the company's bank account.

An EDI 820 payment order or remittance advice is an electronic document that can be used to initiate payments and send remittance information. EDI 820 sends information to vendor furnishing details of payment for his supplies. A remittance advice is a note sent from a customer to their supplier, informing the supplier that they have paid their invoice. The advice may contain elements such as a text note, the invoice number and the invoice amount, among others. Remittance advice is not required, but they are seen as a courtesy since they make it easier for the supplier to match invoices with payments.

To enable this feature, lockbox payment files are required to be uploaded on ORMB and these files have to be allocated to the appropriate accounts. To support multiple lines of business, the lockbox upload needs to:

- Consider the primary identifier when looking for a source customer number match. For customers having multiple source system identifiers, the lockbox process only matches against the one identified as primary customer.
- Incorporate the payment allocation logic in the system on the basis of which the lockbox uploads the payments for the identified customer.

To support remittances which can split a tender across multiple customers:

- Allow source customer number or tax id to be provided as remittance (RMR) values. In case of multiple source customer number or tax id, remittance values are provided for a single tender, the account associated with the first remittance value is set as the payor account. If there is at least one remittance value where a single customer account cannot be determined, the entire tender is placed into general suspense.
- A new payment upload batch **C1-PUPSG** is developed to read lockbox payment files from the bank and load the payment details into the ORMB payment upload staging tables for processing.
- Once the text file is uploaded, the deposit control staging, tender control staging, and payment upload staging records are created in the respective tables. You can then execute the **Payment Upload (PUPL)** batch to create the deposit control, tender controls, payment events, tenders, payments, and payment segments using payment records in the staging area.

Note: For more information about the batches, refer to the *Oracle Revenue Management and Billing Batch Guide*.

Prerequisites

To setup the upload lockbox payment process, you need to do the following:

- Define the values in the parameters of the **C1-CCPYTSADS** and **C1-MATSATYP** algorithms.
- Lockbox tender types defined in the **C1_LBX_TENDER_TYPE** lookup field.
- Lockbox record type, lockbox reference identification qualifier, and lockbox remittance identification types defined in the **C1_LBX_820_RECORD_TYPE**, **C1_LBX_REF_IDQ_LKP**, and **C1_LBX_RMR_ID_TYPE** lookup fields respectively.

EDI 820 Flat File Description

Following is the description of the key field segments in the EDI 820 flat file format:

| Field Name | Description | | | | | | | | | | | | |
|-----------------------------|--|-----------------------------|-------------|------------|--|-------------------|---|-----------------------------|-------------|-----|--|-----|---|
| External Source ID | Uniquely identifies the lockbox. | | | | | | | | | | | | |
| External Transmission ID | Uniquely identifies the transmission. To ensure this transmission, the date component (such as, 20150813) should match the deposit date and there should only be one file per deposit date. | | | | | | | | | | | | |
| External Batch ID | Uniquely identifies the batch of payments in a transmission. To ensure these payments, if there are multiple ST records in a file, the transaction set control number (such as, 0101, 0202, ..) should be unique. | | | | | | | | | | | | |
| Payment Transaction | <p>The following table describes the fields that are included in the payment transaction:</p> <table border="1"> <thead> <tr> <th>Field</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>Attributes</td> <td> <p>Following are the attributes of payment transaction:</p> <ul style="list-style-type: none"> • Payment Amount • Payment Method • Payment Date • Payor Name </td> </tr> <tr> <td>Reference Records</td> <td> <p>Uniquely identifies the transaction. This is retrieved from different reference records based on the payment method. The following table indicates the external reference ID based on the payment methods used in the transaction:</p> <table border="1"> <thead> <tr> <th>External Reference ID Value</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>ACH</td> <td>Use the automated clearinghouse trace number. (Reference Identifier Code is 8G).</td> </tr> <tr> <td>CHK</td> <td>Use the transaction reference number. (Reference Identifier Code TN).</td> </tr> </tbody> </table> </td> </tr> </tbody> </table> | Field | Description | Attributes | <p>Following are the attributes of payment transaction:</p> <ul style="list-style-type: none"> • Payment Amount • Payment Method • Payment Date • Payor Name | Reference Records | <p>Uniquely identifies the transaction. This is retrieved from different reference records based on the payment method. The following table indicates the external reference ID based on the payment methods used in the transaction:</p> <table border="1"> <thead> <tr> <th>External Reference ID Value</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>ACH</td> <td>Use the automated clearinghouse trace number. (Reference Identifier Code is 8G).</td> </tr> <tr> <td>CHK</td> <td>Use the transaction reference number. (Reference Identifier Code TN).</td> </tr> </tbody> </table> | External Reference ID Value | Description | ACH | Use the automated clearinghouse trace number. (Reference Identifier Code is 8G). | CHK | Use the transaction reference number. (Reference Identifier Code TN). |
| Field | Description | | | | | | | | | | | | |
| Attributes | <p>Following are the attributes of payment transaction:</p> <ul style="list-style-type: none"> • Payment Amount • Payment Method • Payment Date • Payor Name | | | | | | | | | | | | |
| Reference Records | <p>Uniquely identifies the transaction. This is retrieved from different reference records based on the payment method. The following table indicates the external reference ID based on the payment methods used in the transaction:</p> <table border="1"> <thead> <tr> <th>External Reference ID Value</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>ACH</td> <td>Use the automated clearinghouse trace number. (Reference Identifier Code is 8G).</td> </tr> <tr> <td>CHK</td> <td>Use the transaction reference number. (Reference Identifier Code TN).</td> </tr> </tbody> </table> | External Reference ID Value | Description | ACH | Use the automated clearinghouse trace number. (Reference Identifier Code is 8G). | CHK | Use the transaction reference number. (Reference Identifier Code TN). | | | | | | |
| External Reference ID Value | Description | | | | | | | | | | | | |
| ACH | Use the automated clearinghouse trace number. (Reference Identifier Code is 8G). | | | | | | | | | | | | |
| CHK | Use the transaction reference number. (Reference Identifier Code TN). | | | | | | | | | | | | |

| Field Name | Description | | | | | | | | |
|-----------------------------|--|--|---|-----------------------------|-------------|--------------------|---|---------------|---|
| | Field | Description | | | | | | | |
| | | External Reference ID Value | Description | | | | | | |
| | | FWT | Use the FEDWIRE confirmation number. (Reference Identifier Code 8I). | | | | | | |
| | | CAS | Use the transaction reference number. (Reference Identifier Code TN). | | | | | | |
| | | OBP | Use the online payment trace number. (Reference Identifier Code 8G). | | | | | | |
| | Source Customer Number | Uniquely identifies the customer. This is retrieved from the internal customer number reference record. (Reference Identifier Code is IT). | | | | | | | |
| | MICR | Uniquely identifies the MICR. (Reference Identifier Code is MICR) | | | | | | | |
| | Check Number | Uniquely identifies the check number. (Reference Identifier Code is CK) | | | | | | | |
| | Taxpayer Identification Number | Uniquely Identifies the taxpayer. (Reference Identifier Code is EI) | | | | | | | |
| Remittance Advice | The following table describes the fields that are involved in the remittance advice: | | | | | | | | |
| | Field | Description | | | | | | | |
| | Attributes | Following are the attributes: <ul style="list-style-type: none"> • Invoice Number • Payment Amount | | | | | | | |
| | Reference Records | Uniquely identifies the remittance advice. The following table indicates the external reference ID based on the payment methods used in the remittance advice: <table border="1" data-bbox="889 1539 1453 1885"> <thead> <tr> <th data-bbox="893 1543 1133 1652">External Reference ID Value</th> <th data-bbox="1136 1543 1450 1652">Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="893 1656 1133 1766">Billing Account ID</td> <td data-bbox="1136 1656 1450 1766">Uniquely identifies the account. Upload EDI 820 Files in ORMB

A new batch named **Lockbox Payment Upload - Small Group (C1-PUPSG)** is introduced in this release. This batch is used to read the EDI 820 lockbox file received from the bank containing payment details for accounts and uploads the payment details into the ORMB payment upload staging tables. The batch uses the reference ID available in the payment and remittance record (in the specified order) to identify the account in the system:

- Source System Customer Number
- Invoice ID (if the source system customer number is not available)
- MICR (if the source system customer number and invoice ID are not available)

If all three reference IDs are available in the payment and remittance record, the system uses the source system customer number to identify the customer in ORMB. If the customer is found in ORMB, the system then checks whether the identified customer has an account. If the identified customer has one account, the system checks the following:

- If the **Check Binder Payment** parameter in the **Pay Tender Staging Account Distribution - Pay Oldest Bill First (C1-CCPYTSADS)** algorithm is set to Y, the system checks whether the payment is the first payment for the account and the tender used for the payment is not automatic payment. If so, the payment is applied to the **Binder Payment** contract.

- If the **Check Promise To Pay** parameter in the **Tender Staging Account Distribution - Pay Oldest Bill First (C1-CCPYTSADS)** algorithm is set to **Y**, the system checks whether there is an active promise to pay for the account. If so, the payment is applied to the **On Account** contract.
- If the **Check Payment Agreement** parameter in the **Tender Staging Account Distribution - Pay Oldest Bill First (C1-CCPYTSADS)** algorithm is set to **Y**, the system checks whether there is an active payment agreement request for the account. If so, the payment is applied to the **On Account** contract.

However, if the **Check Binder Payment**, **Check Promise To Pay**, and **Check Payment Agreement** parameters are set to **N**, the payment is applied to the account's open bills in the order of the due date (i.e. oldest bill first). If the payment amount is greater than the account's billed balance plus overpayment threshold amount (defined in the **Tender Staging Account Distribution - Pay Oldest Bill First (C1-CCPYTSADS)** algorithm), the entire amount is applied on the On Account contract. However, if the payment amount is greater than the account's billed balance, but less than account's billed balance plus overpayment threshold amount, the overpayment amount is applied on the On Account contract.

Let us understand this with the help of an example:

| Payment Amount | Bill 1 (Due Date 01-Feb-2017) | Bill 2 (Due Date 01-April-2016) | Overpayment Threshold Amount | System Behavior |
|----------------|-------------------------------|---------------------------------|------------------------------|---|
| 100 | 50 | 50 | 50 | One payment (50\$) is created for Bill 2 (oldest due date); One payment (50\$) is created for Bill 1. |
| 150 | 50 | 100 | 120 | One payment (100\$) is created for Bill 2 (oldest due date); One payment (50\$) is created for Bill 1. |
| 175 | 60 | 75 | 50 | One payment (75\$) is created for Bill 2 (oldest due date); One payment (60\$) is created for Bill 1; The remaining amount (40\$) is applied on the On Account contract. |
| 200 | 50 | 50 | 50 | The entire amount (200\$) is applied on the On Account contract. This is because the payment amount is greater than the account's billed balance plus overpayment threshold amount. |

If the identified customer has multiple accounts, then the payment is applied to the On Account contract. If there are no accounts for the identified customer, or account could not be found in ORMB, or the customer could not be found in ORMB, the payment is applied to the suspense contract defined on the tender source associated with the external source (lockbox) ID.

If the source system customer number is not available, but the invoice ID and MICR are available in the payment and remittance record, then batch uses the invoice ID to find the account for which the invoice is created. Once the account is identified, the system behaves in the similar manner (listed above) when the identified customer has one account.

If the source system customer number and invoice ID are not available, but the MICR is available in the payment and remittance record, then system finds the payment where the same MICR is stamped as a characteristic and then finds the account for which the respective payment is created. In this way, the system derives the account for which the payment must be applied. However, the MICR is used to derive the account only when the **Search Customer Using MICR (Y/N)** parameter in the batch is set to **Y**. Once the account is derived, the system behaves in the similar manner (listed above) when the identified customer has one account.

Following scenarios must be considered before uploading the **EDI 820** file in the system.

| Scenario | System Behavior |
|--|---|
| If the RMR tag contains the bill Id and the NM1 tag contains the binder payment identification value | The system initiates the payment for the bill Id and defines the binder payment identifier value in the Characteristics tab of the Payment screen. |
| If the RMR tag contains the bill Id but the NM1 tag does not contains the binder payment identification value | The system initiates the payment for the bill Id and does not process further. |
| If the RMR tag contains some other information besides the bill Id and the NM1 tag contains the binder payment identification value | <p>The system performs the following actions:</p> <ol style="list-style-type: none"> 1. Identifies the appropriate membership using the binder payment identification value provided in the NM1 tag. The binder payment identification value must contain the binder payment applicability flag set to Y. 2. Once the membership is identified and is in the Pending Effectuation status, the system identifies the account of the membership, using the information provided in the RMR tag, and applies the payment against the binder contract. 3. If the membership is in the Active status, the system applies the payment against the account's contract. |
| If the RMR tag contains some other information besides the bill Id and the NM1 tag does not contains the binder payment identification value | The system identifies the account of the membership using the information provided in the RMR tag and applies the payment against the account's contract. |

You can upload payment and remittance advice in the TXT format. You need to ensure that the text file is in the required format; otherwise the file will not be uploaded.

Once the text file is uploaded through the **Lockbox Payment Upload - Small Group (C1-PUPSG)** batch, the deposit control staging, tender control staging, and payment upload staging records are created in the respective tables. You can then execute the **Payment Upload (PUPL)** batch to create the deposit control, tender controls, payment events, tenders, payments, and payment segments using payment records in the staging area.

Note: For more information about the batches, refer to the *Oracle Revenue Management and Billing Batch Guide*.

- [Algorithms Used in Deferred Revenue Recognition](#)
- [Deferred Revenue Recognition Template \(Used for Searching\)](#)
- [Deferred Revenue Recognition Template \(Used for Viewing\)](#)
- [Deferred Revenue Recognition \(Used for Searching\)](#)
- [Deferred Revenue Recognition \(Used for Viewing\)](#)

Most often, insurance company bill policies in installments, but Accounts Receivable (AR) and revenue for the total premium are booked as new business in the beginning of the policy term. Regulations, restrictions, or company policies may require that revenue for the total premium must be initially booked to the general ledger as deferred revenue. As time passes, the deferred revenue is realized as earned revenue. For example, the total premium for six months auto-policy (July 1 to Dec 31) is \$1200. When this new business is booked, the revenue of \$1200 is initially booked as deferred revenue. However, on July 31, August 31, September 30, October 31, November 30, and December 31, \$200 must be transferred from deferred revenue GL to earned revenue GL. In order to manage this process, adjustments are created that transfer amount from deferred revenue GL to earned revenue GL.

A deferred revenue recognition schedule determines when these deferred revenue recognition adjustments must be created and posted. On the recognition date, the deferred revenue recognition adjustment is created to transfer a portion of deferred revenue to earned revenue. The corresponding financial transaction does not impact customer's account balance.

You need to create a deferred revenue recognition template for each distribution code and contract type combination for which you want to create a deferred revenue recognition (when the bill segment and adjustment financial transactions created against the respective contracts are frozen). It is the deferred revenue recognition template which helps the system to determine:

- Adjustment type using which the adjustment should be created when the deferred revenue is recognized
- Whether the recognition amount and date in the deferred revenue recognition schedule are editable until recognized
- Whether the deferred revenue recognition schedule must be generated automatically or manually
- Whether the deferred revenue must be recognized daily, weekly, or monthly
- Whether the deferred revenue amount must be prorated when the recognition schedule is set to Monthly
- Algorithm using which the recognition lines in the deferred revenue recognition schedule should be created
- Algorithm using which the adjustment must be generated when the deferred revenue is recognized

During the deferred revenue recognition process, a deferred revenue recognition creation goes through various statuses in its lifecycle. For more information

about the deferred revenue recognition statuses, see [Deferred Revenue Recognition Status Transition](#) on page 2521.

Note: The lifecycle of a deferred revenue recognition creation is driven by the respective business object using which the deferred revenue recognition is generated. The deferred revenue recognition feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the deferred revenue recognition process, see [Prerequisites](#) on page 2521.

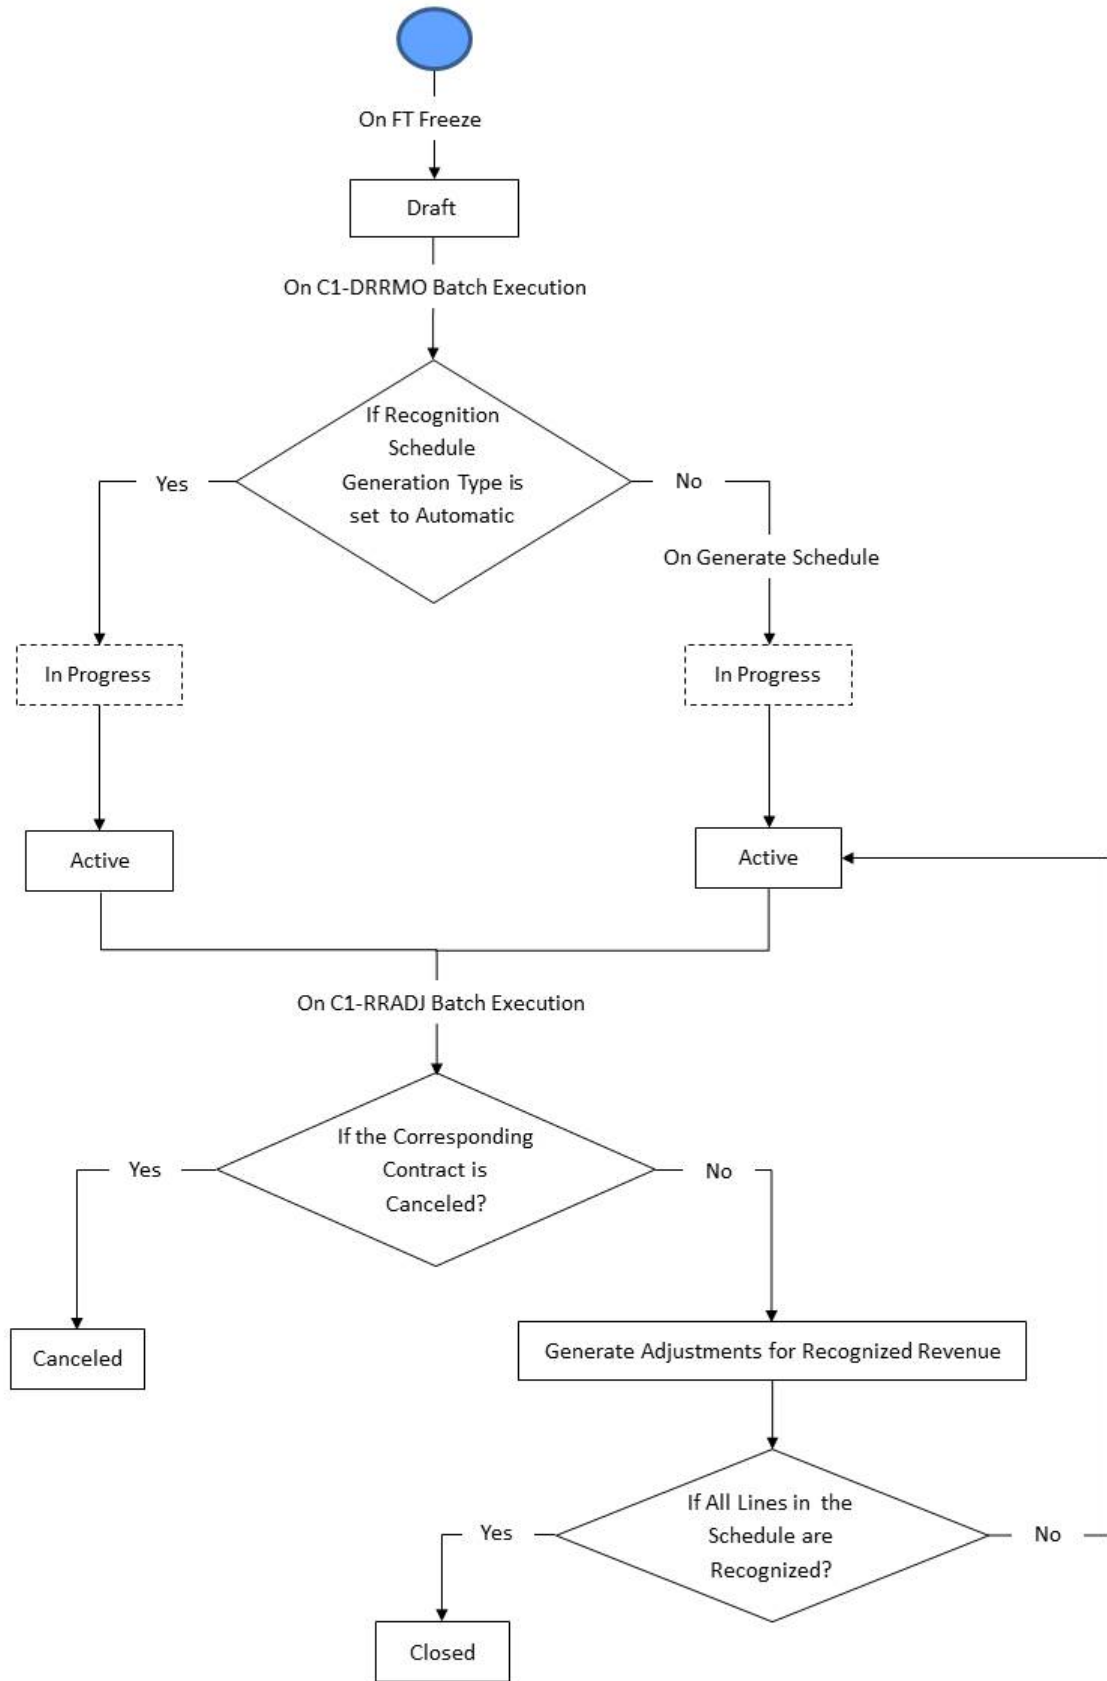

Prerequisites

To setup the deferred revenue recognition feature, you need to do the following:

- Define the required deferred revenue recognition templates in the system.
- Define the required characteristic types where the characteristic entity is set to **Deferred Revenue Recognition**.
- Define the values for the following parameters in the **C1-REVRECITM** algorithm:
 - Use Calendar or Business Days (C or B)
 - Override Default Recognition Date (Y or N)
 - Override Default Weekly Recognition Day (Mon, Tue, Wed, Thu, Fri, Sat, Sun)
 - Override Default Monthly Recognition Date (1-31)
- Define the value for the **Use Contract Expiration Date (Y or N)** parameter in the **C1-REVRECSCH** algorithm.
- Define the value for the **Create Adjustments (Y or N)** parameter in the **C1-REVITMREC** algorithm.
- Set the batch control type of the **Deferred Revenue Recognition Periodic Monitor (C1-RRSMO)** batch to **Timed** and define the following attributes:
 - Time Interval
 - Timer Active
 - User ID
 - Batch Language
 - Email Address

Deferred Revenue Recognition Status Transition

The following figure graphically indicates how a deferred revenue recognition status transition moves from one status to another:

Algorithms Used in Deferred Revenue Recognition

The following table lists the algorithms which are used in the lifecycle of the business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|--------|--------------|--------------|----------------|---|
| | | C1-REVRECSCH | C1-REVRECSCH | <p>This algorithm is invoked when the status of the bill segment and adjustment financial transactions created against the contracts (of the contract type to which the algorithm is attached) is set to Frozen. It checks whether an active deferred revenue recognition template exists for the distribution code and contract type combination. If so, it creates a deferred revenue recognition using the template and sets the status of the deferred revenue recognition to Draft. It then checks whether the type of the corresponding financial transaction is Bill Segment or Adjustment. If the type of the corresponding financial transaction is Bill Segment, it sets the valid until date of the deferred revenue recognition to the bill segment end date. However, if the type of the corresponding financial transaction is Adjustment, it checks whether the Use Contract Expiration Date (Y or N) parameter is set to Y or N. If the Use Contract Expiration Date (Y or N) parameter is set to Y, it sets the valid until date of the deferred revenue recognition to the contract expiration date. However, if the Use Contract Expiration Date (Y or N) parameter is set to N, it sets the valid until date of the deferred revenue recognition to the financial transaction arrears date. In addition, on creating the deferred revenue recognition, an appropriate log entry is added which you can view in the Deferred Revenue Recognition Log zone. It contains the following parameter:</p> <ul style="list-style-type: none"> • Use Contract Expiration Date (Y or N) – Used to indicate whether the valid until date must be set to the contract expiration date when the type of the corresponding financial transaction is Adjustment. The valid values are Y and N. This parameter is mandatory. |
| | | C1-REVRECITM | C1-REVRECITM | <p>This algorithm creates schedule for the deferred revenue recognition. It considers the valid until date and accordingly creates the recognition lines within the schedule.</p> |

| Status | System Event | Algorithm | Algorithm Type | Description |
|--------|--------------|--------------|----------------|---|
| | | | | <p>If the recognition schedule is Weekly, by default, the recognition day is set to Mon (which means Monday of each week). However, if the recognition schedule is Monthly, by default, the recognition date is set to the last day of the month (i.e. 28, 29, 30, or 31) It contains the following parameters:</p> <ul style="list-style-type: none"> • Use Calendar or Business Days (C or B) - Used to indicate whether you want to use the calendar or business days while generating the recognition schedule. The business days are derived using the work calendar defined on the financial transaction. If you do not specify any value for this parameter, by default, it is set to C. This parameter is mandatory. • Override Default Recognition Date (Y or N) – Used to indicate whether you want to override the default weekly or monthly recognition date. The valid values are Y and N. This parameter is mandatory. • Override Default Weekly Recognition Day (Mon, Tue, Wed, Thu, Fri, Sat, Sun) – Used to indicate the day of the week when you want to recognize the deferred revenue. The valid values are Mon, Tue, Wed, Thu, Fri, Sat, and Sun. This parameter is required when you want to override the default weekly recognition day. • Override Default Monthly Recognition Date (1-31) - Used to indicate the day of the month when you want to recognize the deferred revenue. The valid values are 1, 2, 3, ..., 31. This parameter is required when you want to override the default monthly recognition date. |
| | | C1-REVRECADJ | C1-REVRECADJ | <p>This algorithm creates deferred revenue recognition adjustment using the adjustment type defined on the respective deferred revenue recognition template. Before creating the deferred revenue recognition adjustment, it checks whether the contract for which the deferred revenue recognition is created is cancelled. If so, the status of the deferred revenue recognition is set</p> |

| Status | System Event | Algorithm | Algorithm Type | Description |
|--------|--------------|--------------|----------------|---|
| | | | | to Canceled. If all lines in the recognition schedule are recognized, the status of the deferred revenue recognition is set to Closed. |
| | | C1-REVITMREC | C1-REVITMREC | <p>If this algorithm is attached in the deferred revenue recognition template, it is invoked while executing the C1-RRADJ batch. It contains the following parameter:</p> <ul style="list-style-type: none"> • Create Adjustments (Y or N) – Used to indicate whether the deferred revenue recognition adjustment must be created or not when the recognition date is earlier than or equal to the batch business date. The valid values are Y and N. This parameter is mandatory. |
| | | C1-DRRTM-INF | C1-DRRTM-INF | <p>This algorithm generates the deferred revenue recognition template information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:</p> <ol style="list-style-type: none"> 1. Deferred Revenue Recognition Template 2. Description |
| | | C1-DRRTMPVAL | C1-DRRTMPVAL | <p>This algorithm validates the deferred revenue recognition template. It checks the following:</p> <ul style="list-style-type: none"> • Whether the data is specified in the mandatory fields, such as Deferred Revenue Recognition Template, Description, Status, Distribution Code, Contract Type, Adjustment Type, Recognition Schedule Generation Type, and Recognition Schedule. • Whether an algorithm is attached to the Create Deferred Revenue Recognition Schedule and Generate Deferred Revenue Recognition Adjustment system events. • Whether a deferred revenue recognition template already exists for the specified distribution code and contract type combination. • Whether special characters except underscore are specified in the |

| Status | System Event | Algorithm | Algorithm Type | Description |
|--------|--------------|--------------|----------------|--|
| | | | | <p>Deferred Revenue Recognition Template field.</p> <ul style="list-style-type: none"> Whether the high proration limit is between 0 to 31 and is greater than the low proration limit.>> Whether the low proration limit is between 0 to 31 and is less than the high proration limit. <p>In addition, it does not allow you to:</p> <ul style="list-style-type: none"> Delete a deferred revenue recognition template when it is used to create a deferred revenue recognition. Edit a deferred revenue recognition template when the corresponding deferred revenue recognition is in the Draft status. Inactivate a deferred revenue recognition template when the corresponding deferred revenue recognition is not in the Closed status. <p>You must attach this validation algorithm to the custom business object which is used to create a deferred revenue recognition template. Otherwise, erroneous results might occur.</p> |
| | | C1-DRRSC-INF | C1-DRRSC-INF | <p>This algorithm generates the deferred revenue recognition information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:</p> <ol style="list-style-type: none"> Deferred Revenue Recognition Template Deferred Revenue Recognition Status Distribution Code Deferred Revenue Recognition ID |
| | | C1-REVMON | C1-REVMON | <p>This algorithm is invoked when the C1-DRRMO batch is executed. It checks whether there are any deferred revenue recognitions in the Draft status. If there is any deferred revenue recognition in the Draft status, it checks whether the recognition schedule generation type in the respective deferred revenue recognition template is set to Automatic or Manual. If the recognition schedule generation type is set to Automatic, the status</p> |

| Status | System Event | Algorithm | Algorithm Type | Description |
|--------|--------------|--------------|----------------|--|
| | | | | of the deferred revenue recognition is changed to In Progress. However, if the recognition schedule generation type is set to Manual, the status of the deferred revenue recognition remains as Draft. |
| | | C1-REVRECINP | C1-REVRECINP | This algorithm creates an appropriate log entry when the status of the deferred revenue recognition is changed to In Progress. It invokes the algorithm attached to the Create Deferred Revenue Recognition Schedule system event of the respective deferred revenue recognition template. Once the recognition schedule is successfully created, the status of the deferred revenue recognition is changed to Active. |
| | | C1-REVRECACT | C1-REVRECACT | <p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> • Next Status • Next Transition Condition <p>At a time, you can specify value for either the Next Status or Next Transition Condition parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle. This algorithm creates an appropriate log entry when the status of the deferred revenue recognition is changed to Active.</p> |

Deferred Revenue Recognition Template (Used for Searching)

The **Deferred Revenue Recognition** screen allows you to search for a deferred revenue recognition template using various search criteria. Through this screen, you can navigate to the following screen:

- [Deferred Revenue Recognition Template \(Used for Viewing\)](#) on page 2535

This screen consists of the following zone:

- [Search Deferred Revenue Recognition Template](#) on page 2527

Search Deferred Revenue Recognition Template

The **Search Deferred Revenue Recognition Template** zone allows you to search for a deferred revenue recognition template using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------------|---|-----------------------|
| Deferred Revenue Recognition Template | Used to search the basic information about the deferred revenue recognition template. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|-----------------------|
| Description | Used to search the description of the deferred revenue recognition template. | No |
| Recognition Schedule | Used to search deferred revenue recognition with a particular schedule. The valid values are: <ul style="list-style-type: none"> • Daily • Monthly • Weekly | No |
| Status | Used to indicate the deferred revenue recognition template with a particular status. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | No |

Note: You must specify at least one search criterion while searching for a deferred revenue recognition template.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|---------------------------------------|---|
| Deferred Revenue Recognition Template | Displays the deferred revenue recognition. Note: It has a link. On clicking the link, the Deferred Revenue Recognition Template screen appears where you can view the details of the respective deferred revenue recognition template. |
| Distribution Code | Indicates the distribution code associated with the rate component. |
| Contract Type | Displays the contract which is generated against a particular type of contract. |
| Recognition Schedule | Displays the schedule when the deferred revenue is recognized. |

Related Topics

| How to search for a deferred revenue recognition template | Searching for a Deferred Revenue Recognition Template on page 2528 |

Searching for a Deferred Revenue Recognition Template

Prerequisites

To search for a deferred revenue recognition template, you should have:

- Deferred revenue recognition template defined in the system.
- Deferred Revenue Recognition Schedule defined in the system.

Procedure

To search for a deferred revenue recognition template:

1. Click the **Admin** menu in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.
The **Deferred Revenue Recognition Template** screen appears.
3. Enter the search criteria in the **Search Deferred Revenue Recognition Template** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of deferred revenue recognition templates that meet the search criteria appears in the **Search Results** section.

Defining a Deferred Revenue Recognition Template

Prerequisites

To define a deferred revenue recognition template, you should have:

- Contract types defined in the system

Procedure

To define a deferred revenue recognition template:

1. Click the **Admin** menu in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.
The **Deferred Revenue Recognition Template** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Deferred Revenue Recognition Template** screen.

The **Deferred Revenue Recognition Template** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the deferred revenue recognition template.
- **Parameters** – Used to specify the various parameters for the deferred revenue recognition template.
- **Algorithms** – Used to associate algorithms with the deferred revenue recognition template.
- **Divisions** – Used to associate a deferred revenue recognition template with a division.
- **Characteristics** – Used to define the characteristics for the deferred revenue recognition template.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------------|--|-----------------------|
| Deferred Revenue Recognition Template | Used to specify the deferred revenue recognition template. | Yes |
| Description | Used to specify the description of the deferred revenue recognition template. | No |
| Status | Used to indicate the status of the deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |

The **Parameters** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|-----------------------|
| Distribution Code | Used to indicate the distribution code associated with the deferred revenue recognition. | Yes |
| | Note: The Search (🔍 icon) appears corresponding to this field. On clicking the Search icon, the Distribution Code Search window appears. | |
| Contract Type | Used to indicate a particular type of contract. | Yes |
| | Note: The Search (🔍 icon) appears corresponding to this field. On clicking the Search icon, the Contract Type Search window appears. | |
| Adjustment Type | Used to indicate the adjustment type using which the adjustment must be created. | No |
| | Note: The Search (🔍 icon) appears corresponding to this field. On clicking the Search icon, the Adjustment Type Search window appears. | |
| Allow Editing | Used to allow editing of recognition schedule. | No |
| Generation Type | Used to indicate the type of deferred revenue recognition generation. The valid values are: <ul style="list-style-type: none"> • Automatic • Manual | Yes (Conditional) |
| Recognition Schedule | Used to indicate the schedule of deferred revenue recognition generation. The valid values are: <ul style="list-style-type: none"> • Daily • Monthly • Weekly | Yes |
| Allow Proration | Used to allow proration. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|-----------------------------|--|--|
| | Note: The Allow Proration field appears when you select Recognition Schedule as Monthly . | |
| High Proration Limit (Days) | Used to specify whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is greater than the specified limit, then the amount is prorated. Note: This field appears when you check the tick-box for Allow Proration . | Yes (Conditional) Note: This field is required when the recognition schedule is selected as monthly and when the Allow Proration check box is selected. |
| Low Proration Limit (Days) | Used to specify whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is less than the specified limit, then the amount is prorated. Note: This field appears when you check the tick-box for Allow Proration . | Yes (Conditional) Note: This field is required when the recognition schedule is selected as monthly and when the Allow Proration check box is selected. |

4. Enter the required details.
5. Associate algorithms with the deferred revenue recognition template, if required.
6. View the division to which the deferred revenue recognition template is associated in the **Divisions** section.
7. Define the characteristics specific to division to which the deferred revenue recognition template is associated in the **Characteristics** section.
8. Click **Save**.

The deferred revenue recognition template is created.

Associating Algorithms with a Deferred Revenue Recognition Template

Procedure

To associate algorithms with a deferred revenue recognition template:

1. Ensure that the **Algorithms** section is expanded when you are defining or editing a deferred revenue recognition template.

The **Algorithms** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------|--|-----------------------|
| System Event | Used to indicate the system event for an algorithm. | Yes |
| Sequence | Used to specify the sequence number. | Yes |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | |
| Algorithm | Used to associate an algorithm to the system event that you have selected. | Yes |
| | Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Algorithm Search window appears. On specifying the algorithm for a system event, the description of the algorithm appears corresponding to the Algorithm field. | |

- Enter the required details in the **Algorithms** section.
- If you want to define more than one algorithm for the deferred revenue recognition template, click the **Add** (+) icon, and then repeat 2.

Note: However, if you want to remove an algorithm from the deferred revenue recognition template, click the **Delete** (🗑️) icon corresponding to the algorithm.

Associating Deferred Revenue Recognition Template With A Division

Prerequisites

To associate deferred revenue recognition template with a division, you should have:

- Divisions defined in the application

Procedure

To associate deferred revenue recognition template with a division:

- Ensure that the **Divisions** section is expanded when you are creating or editing a deferred revenue recognition template.

The **Divisions** section appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Division | Used to indicate the division to which you want to associate the deferred revenue recognition template. | No |
| | Note: You can only view those divisions to which you have access in the Division list. | |

- Select the required division from the list.
- If you want to associate the deferred revenue recognition template with more than one division, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove the deferred revenue recognition template from a division, click the **Delete** (🗑️) icon corresponding to the division.

- Click **Save**.

The deferred revenue recognition template is associated with the divisions.

Defining a Characteristic for a Deferred Revenue Recognition Template

Prerequisites

To define a characteristic for a deferred revenue recognition template, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deferred Revenue Recognition Template**)

Procedure

To define a characteristic for a deferred revenue recognition template:

- Ensure that the **Characteristics** section is expanded when you are defining or editing a deferred revenue recognition template.

The **Characteristics** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|---|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | | Note: This field is required when you are defining a characteristic for the deferred revenue recognition template. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|---|
| | Note: On specifying the value for a characteristic type, the description of the characteristic value appears corresponding to the Characteristic Valued field. | Note: This field is required when you are defining a characteristic for the deferred revenue recognition template. |

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the deferred revenue recognition template, click the **Add (+)** icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the deferred revenue recognition template, click the **Delete (🗑)** icon corresponding to the characteristic.

Viewing the Deferred Revenue Recognition Template Details

Procedure

To view the details of a deferred revenue recognition template:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.
The **Deferred Revenue Recognition Template** screen appears.
- Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
- In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to view.
The **Deferred Revenue Recognition Template** screen appears.
- View the details of the deferred revenue recognition template in the **Deferred Revenue Recognition Template** zone.

Deferred Revenue Recognition Template (Used for Viewing)

Once the deferred revenue recognition templates are created, the **Deferred Revenue Recognition Template** screen allows you to:

- Generate the deferred revenue recognition schedule
- View the details of a deferred revenue recognition template
- Edit a deferred revenue recognition template
- Delete a deferred revenue recognition template

This screen consists of the following zone:

- [Deferred Revenue Recognition Template](#) on page 2535

Deferred Revenue Recognition Template

The **Deferred Revenue Recognition Template** zone displays the details of the deferred revenue recognition template. It contains the following sections:

- **Main** – Displays basic information about the deferred revenue recognition template. It contains the following fields:

| Field Name | Field Description |
|---------------------------------------|--|
| Deferred Revenue Recognition Template | Displays the deferred revenue recognition template |
| Description | Used to specify the description of the deferred revenue recognition template |
| Status | Used to indicate the status of the deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> • Active • Inactive |

- **Parameters** – Displays the parameters used in the deferred revenue recognition template.

| Field Name | Field Description |
|-------------------|--|
| Distribution Code | Indicates the distribution code. Note: It has a link. On clicking the link, the Distribution Code screen appears where you can view the details of the respective distribution code. |
| Contract Type | Displays the Deferred Revenue Recognition Template which are generated against a particular type of contract. |
| Adjustment Type | Indicates the adjustment type using which the adjustment must be created. Note: It has a link. On clicking the link, the Adjustment Type screen appears where you can view the details of the respective adjustment type. |
| Generation Type | Displays the type of deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> • Manual |

| Field Name | Field Description |
|-----------------------------|---|
| | <ul style="list-style-type: none"> Automatic |
| Allow Editing | Indicates the editing of recognition schedule. |
| Recognition Schedule | Indicates the schedule when the deferred revenue is recognized. The valid values are: <ul style="list-style-type: none"> Daily Monthly Weekly |
| Allow Proration | Used to allow proration. Note: The Allow Proration field appears when you select Recognition Schedule as Monthly . |
| High Proration Limit (Days) | Displays whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is greater than the specified limit, then the amount is prorated. Note: This field appears when you check the tick-box for Allow Proration . |
| Low Proration Limit (Days) | Displays whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is less than the specified limit, then the amount is prorated. Note: This field appears when you check the tick-box for Allow Proration . |

- **Divisions** – Displays the associated deferred revenue recognition template with one or more divisions. It contains the following column:

| Column Name | Column Description |
|-------------|---|
| Division | Displays the division to which you want to associate the deferred revenue recognition template. |

- **Algorithms** – Lists the algorithms associated with the deferred revenue recognition template. It contains the following columns:

| Column Name | Column Description | Mandatory (Yes or No) |
|--------------|--|-----------------------|
| System Event | Indicates the system event on which the algorithm must be executed | No |
| Sequence | Displays the sequence number. | No |
| Algorithm | Displays an algorithm that needs to be attached to the selected system event. Note: It has a link. On clicking the link, the Algorithm screen appears where you can view the details of the respective algorithm. | No |

- **Characteristics** – Lists the characteristics defined for the deferred revenue recognition template. It contains the following fields:

| Column Name | Column Description |
|---------------------|--|
| Characteristic Type | Displays the characteristic type. |
| Characteristic Type | Displays the value of the characteristic type. |

- **Record Actions** – This section contains the following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to define, edit, and remove algorithms of the deferred revenue recognition template. |
| | Note: The Edit button appears when the deferred revenue recognition template is in the Active status. |
| Delete | Used to delete the deferred revenue recognition template. |

-

- **Record Information** – This section contains the following fields:

| Field Name | Field Description |
|-----------------|--|
| Business Object | Indicates the business object using which the deferred revenue recognition template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |

Editing a Deferred Revenue Recognition Template

Procedure

To edit a deferred revenue recognition template:

1. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to edit.

The **Deferred Revenue Recognition Template** screen appears.

3. Click the **Edit** button in the **Deferred Revenue Recognition Template** zone.

The **Deferred Revenue Recognition Template** screen appears.

Note: The **Edit** button appears when the deferred revenue recognition template is in the **Active** status.

4. Associate, edit, or remove algorithms from the deferred revenue recognition template, if required.
5. Define, edit, or remove characteristics of the deferred revenue recognition template, if required.
6. Associate deferred revenue recognition template with a division, if required.
7. Click **Save**.

The changes made to the deferred revenue recognition template are saved.

Deleting a Deferred Revenue Recognition Template**Procedure**

To delete a deferred revenue recognition template:

1. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template that you want to delete.

The **Deferred Revenue Recognition Template** screen appears.

3. Click the **Delete** button in the **Deferred Revenue Recognition Template** zone.

A message appears confirming whether you want to delete the deferred revenue recognition template.

4. Click **OK**.

The deferred revenue recognition template is deleted.

Viewing the Deferred Revenue Recognition Template Details**Procedure**

To view the details of a deferred revenue recognition template:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.

The **Deferred Revenue Recognition Template** screen appears.

3. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.

4. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to view.

The **Deferred Revenue Recognition Template** screen appears.

- View the details of the deferred revenue recognition template in the **Deferred Revenue Recognition Template** zone.

Deferred Revenue Recognition (Used for Searching)

The **Deferred Revenue Recognition** screen allows you to search for a deferred revenue recognition using various search criteria. Through this screen, you can navigate to the following screen:

- [Deferred Revenue Recognition \(Used for Viewing\)](#) on page 2544

This screen consists of the following zone:

- [Search Deferred Revenue Recognition](#) on page 2539

Search Deferred Revenue Recognition

The **Search Deferred Revenue Recognition** zone allows you to search for a deferred revenue recognition using various search criteria. It contains the following two sections:

- Search Criteria** – This section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Search By | Used to indicate whether you want to search for a deferred revenue recognition using the deferred revenue recognition, person, account, or policy details. The valid values are: <ul style="list-style-type: none"> Account Details Person Details Deferred Revenue Recognition Details Financial Transaction Details Policy Details | Yes |
| | Note: By default, the Account Details option is selected. | |
| Person ID | Used to search deferred revenue recognition which are assigned to a particular person. | No |
| | Note: This field appears when you select the Person Details option from the Search By list. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------|---|--|
| Account ID | Used to search the account ID. | No |
| | Note: This field appears only when you select the Account Details option from the Search By list. | |
| Person Identifier Type | Used to select the identifier type based on which you want to search deferred revenue recognition through which the person's record is created or updated in the system. | Yes (Conditional) Note: If you specify the person identifier as a search criteria, you have to select the person identifier type. |
| | | |
| Person Identifier | Used to specify the value for the person identifier type. | Yes (Conditional) Note: If you specify the person identifier type as a search criteria, you have to specify the person identifier. |
| | | |
| Account Identifier Type | Used to specify the account identifier type of the account whose details you want to search. | Yes (Conditional) Note: If you specify the account identifier as a search criteria, you have to select the account identifier type. |
| | Note: This field appears when you select the Account Details option from the Search By list. | |
| Account Identifier | Used to specify the value of the account identifier. | Yes (Conditional) Note: If you specify the account identifier type as a search criteria, you have to specify the account identifier. |
| | Note: This field appears when you select the Account Details option from the Search By list. | |
| Contract ID | Used to specify the contract ID linked to the account. | No |
| | Note: This field appears when you select the Account Details option from the Search By list. | |
| Person Hierarchy | Used to indicate whether to display hierarchy of the person linked to a particular bill. | No |
| | Note: This field appears when you select the Person Details option from the Search By list. | |
| Status | Used to search deferred revenue recognition with a particular status. The valid values are: <ul style="list-style-type: none"> • Active • Closed • Canceled • Draft | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------------|--|-----------------------|
| | Note: This field appears when you select the Person Details, Account Details, or Deferred Revenue Recognition Details option from the Search By list. | |
| Deferred Revenue Recognition Template | Used to indicate the template used for deferred revenue recognition. Note: This field appears when you select the Person Details, Account Details, or Deferred Revenue Recognition Details option from the Search By list. | No |
| Valid Until Date | Used to specify the date till which the deferred revenue recognition is valid. Note: This field appears when you select the Person Details or Account Details option from the Search By list. | No |
| Deferred Revenue Recognition ID | Used to search a particular deferred revenue recognition Note: This field appears when you select the Deferred Revenue Recognition Details option from the Search By list. | No |
| Description | Used to specify the description of the deferred revenue recognition. Note: This field appears when you select the Deferred Revenue Recognition Details option from the Search By list. | No |
| Recognition Schedule | Used to search deferred revenue recognition with a particular schedule. The valid values are: <ul style="list-style-type: none"> • Daily • Monthly • Weekly Note: This field appears when you select the Deferred Revenue Recognition Details option from the Search By list. | No |
| Financial Transaction ID | Used to search deferred revenue recognition which are assigned to a particular financial transaction. Note: This field appears only when you select the Financial Transaction Details option from the Search By list. | |
| Policy Type | Used to indicate the type of policy. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| | Note: This field appears when you select the Policy Details option from the Search By list. | |
| Policy Number | Used to indicate the policy number. Note: This field appears when you select the Policy Details option from the Search By list. | No |
| Plan Number | Used to indicate the plan number of the policy. Note: This field appears when you select the Policy Details option from the Search By list. | No |
| Source System | Used to indicate the name of the external system from where the policy originated. Note: This field appears when you select the Policy Details option from the Search By list. | No |
| Start Date | Used to indicate the date from when the policy is effective. Note: This field appears when you select the Policy Details option from the Search By list. | No |
| End Date | Used to indicate the date till when the policy is effective. Note: This field appears when you select the Policy Details option from the Search By list. | No |

Note: You must specify at least one search criterion while searching for a deferred revenue recognition.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|--|--|
| Deferred Revenue Recognition Information | Displays information about the deferred revenue recognition. Note: It has a link. On clicking the link, the Deferred Revenue Recognition screen appears where you can view the details of the respective deferred revenue recognition. |
| Contract Information | Displays the basic information about the contract corresponding to the deferred revenue recognition. In addition, this column has a context menu which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Contract screen appears where you can view the details of the respective contract. |
| Financial Transaction Information | Displays the basic information about the financial transaction corresponding to the deferred revenue recognition. |

| Column Name | Column Description |
|-------------|---|
| | Note: It has a link. On clicking the link, the Financial Transaction screen appears where you can view the details of the respective financial transaction. |

Searching for a Deferred Revenue Recognition

Prerequisites

To search for a deferred revenue recognition, you should have:

- Deferred Revenue Recognition Template defined in the application.
- Person identifier types defined in the application
- Account identifier types defined in the application
- Recognition Schedules defined in the application
- Source Systems defined in the application

Procedure

To search for a deferred revenue recognition:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Accounting and Receivable**.
A sub-menu appears.
3. Click the **Search** option from the **Deferred Revenue Recognition** sub-menu.
The **Deferred Revenue Recognition** screen appears.
4. Enter the search criteria in the **Search Deferred Revenue Recognition** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of deferred revenue recognition that meet the search criteria appears in the **Search Results** section.

Viewing the Deferred Revenue Recognition Details

Procedure

To view the details of a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose details you want to view.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2544
- [Deferred Revenue Recognition - Log](#) on page 2548

3. Ensure that the **Main** tab is selected.
4. View the details of the deferred revenue recognition in the **Deferred Revenue Recognition** zone.

Deferred Revenue Recognition (Used for Viewing)

The **Deferred Revenue Recognition** screen allows you to:

- View the details of a deferred revenue recognition
- Edit a deferred revenue recognition
- Generate the deferred revenue recognition schedule
- Add related deferred revenue recognitions
- Edit the details of a deferred revenue recognition schedule
- View the log of a deferred revenue recognition
- Add a log entry for a deferred revenue recognition

This screen consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2544
- [Deferred Revenue Recognition - Log](#) on page 2548

Deferred Revenue Recognition - Main

The **Main** tab displays information about the deferred revenue recognition. It contains the following zones:

- [Deferred Revenue Recognition](#) on page 2545
- [Associated Deferred Revenue Recognitions](#) on page 2546
- [Recognition Schedule](#) on page 2547
- [Revenue Recognition Items](#) on page 2547

Deferred Revenue Recognition

The **Deferred Revenue Recognition** zone displays the details of the deferred revenue recognition. It contains the following sections:

- **Main** – Displays basic information about the deferred revenue recognition. It contains the following fields:

| Field Name | Field Description |
|---|---|
| Deferred Revenue Recognition Information | Displays information about the deferred revenue recognition. |
| Deferred Revenue Recognition Template Information | Displays information about the deferred revenue recognition template. Note: It has a link. On clicking the link, the Deferred Revenue Recognition Template screen appears where you can view the details of the deferred revenue recognition template. |
| Distribution Code | Displays the distribution code which indicates the template associated with the deferred revenue recognition. |
| Financial Transaction Information | Displays the basic information about the financial transaction corresponding to the deferred revenue recognition. Note: It has a link. On clicking the link, the Financial Transaction Information screen appears where you can view the details of the financial transaction. |
| Total Revenue Deferred | Displays the total revenue deferred. |
| Total Revenue Recognized | Displays the total revenue recognized. |
| Status | Indicates the status of the deferred revenue recognition. The valid values are: <ul style="list-style-type: none"> • Active • Closed • Canceled • Draft |

- **Related Deferred Revenue Recognitions** - Lists the related deferred revenue recognitions. It contains the following columns:

| Column Name | Column Description |
|--|---|
| Deferred Revenue Recognition Information | Displays the basic information of the related Deferred Revenue Recognition Schedules (i.e. DRR Schedule of the BS/AD, corresponding to the BX/AX) |
| Create Date Time | Displays the date and time when the deferred revenue recognition is created. |

| Column Name | Column Description |
|-----------------------------------|---|
| Financial Transaction Information | Displays the basic information about the financial transaction corresponding to the deferred revenue recognition. |

- **Record Actions** – This section contains the following buttons:

| Button Name | Button Description |
|-------------------|--|
| Edit | Used to define, edit and remove characteristics, related deferred revenue recognitions of the deferred revenue recognition. |
| | Note: The Edit button appears when the deferred revenue recognition is in the Active status. |
| Generate Schedule | Used to generate the deferred revenue recognition schedule. |
| | Note: The Generate Schedule button appears only when the deferred revenue recognition is in the Draft status. |

- **Record Information** – This section contains the following fields:

| Field Name | Field Description |
|------------------|---|
| Business Object | Indicates the business object using which the deferred revenue recognition is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Create Date/Time | Displays the date and time when the deferred revenue recognition schedule is created. |
| Status Date/Time | Displays the date and time when the deferred revenue recognition status is updated. |

- **Characteristics** – Lists the characteristics defined for the deferred revenue recognition. It contains the following columns:

| Column Name | Column Description |
|----------------------|---|
| Effective Date | Displays the date from when the characteristic is effective for the deferred revenue recognition. |
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |

Associated Deferred Revenue Recognitions

The **Associated Deferred Revenue Recognitions** zone Displays the basic information of the other schedules linked to the same **FT** having a separate **Schedule** due to the different **Distribution Code**. Purpose of this section is to show all the associated **Schedules** generated for a single **FT**. It contains the following columns:

| Column Name | Column Description |
|--|--|
| Deferred Revenue Recognition Information | Displays information about the deferred revenue recognition. |

| Column Name | Column Description |
|---|---|
| | Note: It has a link. On clicking the link, the Deferred Revenue Recognition screen appears where you can view the details of the deferred revenue recognition. |
| Financial Transaction Information | Displays the basic information about the financial transaction corresponding to the deferred revenue recognition. Note: It has a link. On clicking the link, the Financial Transaction screen appears where you can view the details of the respective deferred revenue recognition. |
| Distribution Code | Displays the distribution code which indicates the template associated with the deferred revenue recognitions. |
| Deferred Revenue Recognition Template Information | Displays information about the deferred revenue recognition template. Note: It has a link. On clicking the link, the Deferred Revenue Recognition Template screen appears where you can view the details of the deferred revenue recognition template. |
| Status | Indicates the status of the associated deferred revenue recognition. The valid values are: <ul style="list-style-type: none"> • Active • Closed • Canceled |

Recognition Schedule

The **Recognition Schedule** zone lists the adjustment information and the recognition amount of the deferred revenue recognition. It contains the following columns:

| Column Name | Column Description |
|------------------------|---|
| Recognition Date | Displays the date on which the recognition is scheduled. |
| Recognition Amount | Displays the amount of the recognition scheduled. |
| Adjustment Information | Displays information about the adjustments in recognition schedule. |

This zone contains the **Edit** button. It is used to edit the details of recognition schedule

Note: This zone appears when the deferred revenue recognition is in the **Active** status.

Revenue Recognition Items

The **Revenue Recognition Items** zone displays the adjustment information about the recognition items. It contains the following columns:

| Column Name | Column Description |
|------------------------|---|
| Recognition Date | Displays the date on which the recognition is scheduled. |
| Recognition Amount | Displays the amount of the recognition scheduled. |
| Adjustment Information | Displays information about the adjustments in recognition schedule. “ |

| Column Name | Column Description |
|-------------|--|
| | Note: It has a link. On clicking the link, the Adjustment screen appears where you can view the details of the deferred revenue recognition. |

Deferred Revenue Recognition - Log

The **Log** tab contains the following zone:

- [Deferred Revenue Recognition Log](#) on page 2548

Deferred Revenue Recognition Log

The **Deferred Revenue Recognition Log** zone lists the complete trail of actions performed on the deferred revenue recognition. It contains the following columns:

| Column Name | Column Description |
|----------------|---|
| Date/Time | Displays the date and time when the action was performed on the deferred revenue recognition |
| Details | Displays the details about the action performed on the deferred revenue recognition |
| User | Indicates the user who has performed the action on the deferred revenue recognition |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is created when the action is performed on the deferred revenue recognition. Note: At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements. |
| Status Reason | Indicates the reason why the status of the deferred revenue recognition is changed. Note: At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements. |

Note: You can manually add a log entry for the deferred revenue recognition by clicking the **Add Log Entry** link in the upper right corner of the **Deferred Revenue Recognition Log** zone.

Creating the Deferred Revenue Recognition Schedule

Prerequisites

To create the deferred revenue recognition schedule, you should have:

- Should have **Revenue Recognition Schedule Creation Algorithm** attached in the **DRR Template**

Procedure

To create the deferred revenue recognition schedule:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose recognition schedule you want to generate.
The **Deferred Revenue Recognition** screen appears.
3. Click the **Generate Schedule** button in the **Deferred Revenue Recognition** zone.

Note: The **Generate Schedule** button appears when the deferred revenue recognition is in the **Draft** status.

The status of the deferred revenue recognition is changed to **Active**.

Defining a Characteristic for a Deferred Revenue Recognition

Prerequisites

To define a characteristic for a deferred revenue recognition, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deferred Revenue Recognition**)

Procedure

To define a characteristic for a deferred revenue recognition:

1. Ensure that the **Characteristics** section is expanded when you are editing a deferred revenue recognition.

The **Characteristics** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|---|
| Effective Date | Used to specify the date from when the characteristic is effective for the deferred revenue recognition. | Yes (Conditional) Note: This field is required when you are defining a characteristic for the deferred revenue recognition. |
| Characteristic Type | Used to indicate the characteristic type. Note: The list includes only those characteristic types where the characteristic entity is set to Deferred Revenue Recognition . | Yes (Conditional) Note: This field is required when you are defining a characteristic for the deferred revenue recognition. |
| Characteristic Value | Used to specify the value for the characteristic type. Note: On specifying the value for a characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Yes (Conditional) Note: This field is required when you are defining a characteristic for the deferred revenue recognition. |

2. Enter the required details in the **Characteristics** section.

Note: If you select a characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a characteristic value.

3. If you want to define more than one characteristic for the deferred revenue recognition, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the deferred revenue recognition, click the **Delete** (🗑️) icon corresponding to the characteristic.

Adding Related Deferred Revenue Recognitions

Prerequisites

To add related deferred revenue recognitions, you should have:

- Deferred revenue recognition template defined in the system.

Procedure

To add related deferred revenue recognitions:

1. Ensure that the **Related Deferred Revenue Recognitions** section is expanded when you are editing a deferred revenue recognition.

The **Related Deferred Revenue Recognitions** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------------------|---|-----------------------|
| Deferred Revenue Recognition ID | Used to specify the ID of the deferred revenue recognition. | Yes |
| | Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Deferred Revenue Recognition Search window appears. | |
| Create Date Time | Used to indicate the creation date and time of the deferred revenue recognition. | Yes |
| Financial Transaction ID | Used to specify the ID of the financial transaction corresponding to the deferred revenue recognition. | Yes |
| | Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Financial Transactions Search window appears. | |

2. Enter the required details in the **Related Deferred Revenue Recognitions** section.
3. If you want to add more than one related deferred revenue recognition for the deferred revenue recognition, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a related deferred revenue recognition from the deferred revenue recognition, click the **Delete** (🗑️) icon corresponding to the related deferred revenue recognition.

Editing the Deferred Revenue Recognition Schedule Details

Prerequisites

To edit the details of the deferred revenue recognition schedule, you should have:

- Should have **Allow Editing Switch** as **Yes** on deferred revenue recognition template.

Procedure

To edit the details of the deferred revenue recognition schedule:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose deferred revenue recognition schedule details you want to edit.

The **Deferred Revenue Recognition** screen appears.

3. Select the recognition whose details you want to edit in the **Recognition Schedule** zone and click the **Edit** button available in the upper left corner above the table in this zone.

The **Edit Recognition Schedule** screen appears.

Note: A recognition schedule from the deferred revenue recognition can be edited when the deferred revenue recognition is in the **Active** status.

The **Edit Recognition Schedule** screen contains the following fields:

| Field Name | Field Description |
|--|--|
| Deferred Revenue Recognition Information | Displays the information about the deferred revenue recognition. |
| Financial Transaction Information | Displays the information of the financial transaction corresponding to the deferred revenue recognition. |

In addition to these fields, this screen contains following columns:

| Column Name | Column Description | Mandatory (Yes or No) |
|--------------------|---|-----------------------|
| Recognition Date | Used to display the date on which the deferred revenue is recognized. | Yes |
| Recognition Amount | Used to display the amount of the deferred revenue. | Yes |
| Adjustment ID | Used to display the adjustment id. | Not applicable |

4. Modify the details of the recognition schedule.
5. If you want to define more than one recognition schedule for the deferred revenue recognition, click the **Add (+)** icon and then repeat step 4.

Note: However, if you want to remove a recognition schedule from the deferred revenue recognition, click the **Delete (🗑)** icon corresponding to the recognition schedule.

6. Click **Save**.

The changes made to the recognition schedule are saved.

Viewing the Log of a Deferred Revenue Recognition

Procedure

To view the log of a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose log you want to view.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2544
- [Deferred Revenue Recognition - Log](#) on page 2548

3. Click the **Log** tab.

The **Log** tab appears.

4. View the complete trail of actions performed on the deferred revenue recognition in the **Deferred Revenue Recognition Log** zone.

| Column Name | Column Description |
|----------------|--|
| Date/Time | Displays the date and time when the action was performed on the dispute request. |
| Details | Displays the details about the deferred revenue recognition log |
| User | Indicates the user who has performed deferred revenue recognition |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the deferred revenue recognition |
| Status Reason | Displays the status reason of action performed on the deferred revenue recognition |

Adding a Log Entry for a Deferred Revenue Recognition

Procedure

To add a log entry for a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose log you want to edit.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2544
- [Deferred Revenue Recognition - Log](#) on page 2548

3. Click the **Log** tab.

The **Log** tab appears.

4. Click on the **Add Log Entry** link in the upper right corner of the **Deferred Revenue Recognition Log** zone.

The **Add Deferred Revenue Recognition Schedule Log** window appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes Or No) |
|--|---|-----------------------|
| Deferred Revenue Recognition Information | Displays information about the deferred revenue recognition. | Not applicable |
| Log Details | Used to specify additional comments for the deferred revenue recognition. | Yes |

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Deferred Revenue Recognition Log** zone.

Oracle Revenue Management and Billing enables you to reconcile pay instructions received from the external system against the bill segments based on the account identifier, policy number, plan number, member identifier, and coverage period combination. The system enables you to upload a pay instruction file in the following formats:

- **CSV File Format** – You can upload pay instruction files in the CSV format from the specified location on the server using the **Pay Instruction CSV File Upload (C1-RECUP)** batch.
- **EDI 820 File Format** – You can upload pay instruction files in the EDI 820 file format from the specified location on the server using the **Upload Lockbox Payment and Pay Instruction Files (C1-PUPSG)** batch.

Note: The **BPR** tag in the EDI 820 file must be set to **I** to indicate that the file contains pay instructions for reconciliation.

While uploading pay instruction files, you need to specify the reconciliation type using which you want to create the reconciliation. A reconciliation type indicates the algorithm which validates the pay instruction file and creates a pay instruction for each record in the file. Two algorithm types named **C1-PAYINSUPL** and **C1-RECONPROC** are shipped with the product. You need to maintain separate reconciliation types for different file formats. If you want to use a reconciliation type while uploading a pay instruction file in the CSV format, you need to create an algorithm using the **C1-PAYINSUPL** algorithm type and attach it to the reconciliation type. However, if you want to use a reconciliation type while uploading a pay instruction file in the EDI 820 format, you need to create an algorithm using the **C1-RECONPROC** algorithm type and attach it to the reconciliation type.

Once a file is successfully validated, the reconciliation is created for the file in the **Draft** status. The reconciliation is immediately transitioned to the **Send Notification** status and the algorithms attached to the Send Notification status are executed. Once the To Do is created, the status of the reconciliation is changed to **Pending**. A pay instruction is created for each record in the file and its status is set to either **Pending** or **Error** depending on whether it is successfully validated or not.

You need to then specify the payment ID against which you want to reconcile the billed items for which you have received the pay instructions. Once you specify the payment information and submit the pay instructions for reconciliation, the payment amount is distributed against the reconciliation contract of the accounts for which you have received the pay instruction. The status of the reconciliation is changed to **Pending Reconciliation**.

On reconciling the pay instructions, the system finds the bill segment against which the pay instruction must be reconciled using the account identifier, policy

- [Pay Instruction](#)
- [Discrepancy Report Type](#)
- [Discrepancy Report \(Used for Searching\)](#)
- [Discrepancy Report \(Used for Viewing\)](#)
- [Member Reconciliation Preference](#)

number, plan number, member identifier, and coverage period combination. Once the bill segment is identified, the transfer adjustment is created against the bill segment and offset adjustment is created against the respective reconciliation contract. If all pay instructions in the file are successfully reconciled, the status of the reconciliation is changed to **Completed**. However, if one or more pay instruction in the file could not be successfully reconciled, the status of the reconciliation is changed to **Open**. If a file contains a pay instruction for previous coverage period, then system checks whether there is any open pay instruction for that coverage period in the system and accordingly tries to reconcile the pay instruction. However, if an open pay instruction for that coverage period does not exist in the system, the system tries to reconcile the pay instruction against the billed item.

You may manually reconcile the pay instructions which are in the **Pending Reconciliation** status. Alternatively, you can execute the **Reconciliation Periodic Monitor (C1-RCNM)** batch at regular interval to reconcile the pay instructions.

During reconciliation, a pay instruction also goes through various statuses in its lifecycle. You may configure the following two batches to execute at the regular intervals:

- **Pay Instruction Periodic Monitor (for Pending Status) (C1-PIPMO)** – It monitors whether there are any pay instructions in the **Pending** status. If so, it tries to reconcile the pay instruction against a billed item. If the pay instruction is successfully reconciled, the status of the pay instruction is changed to **Completed**. However, if the pay instruction could not be reconciled, the status of the pay instruction is changed to **Open**.
- **Pay Instruction Periodic Monitor (for Open Status) (C1-PIMDF)** – It monitors whether there are any pay instructions in the **Open** status. If so, it tries to reconcile the pay instruction against a billed item. If the pay instruction is successfully reconciled, the status of the pay instruction is changed to **Completed**. However, if the pay instruction could not be reconciled, the status of the pay instruction is changed to **Open**.

If you cancel the payment tender, the payment and reconciliation associated with the payment are automatically canceled. The status of the reconciliation is changed to **Pending Cancellation**. And, the status of all pay instructions in the reconciliation is changed to **Canceled**. If required, you can manually cancel a reconciliation. However, you can cancel a reconciliation when it is in the **Open** or **Completed** status. On canceling a reconciliation, the status of the reconciliation is changed to **Pending Cancellation** and the status of all pay instructions in the reconciliation is changed to **Canceled**.

You need to configure the **Reconciliation Cancellation Periodic Monitor (C1-RCNMD)** batch to execute at the regular intervals. It monitors whether there are reconciliations in the **Pending Cancellation** status. If there is a reconciliation in the **Pending Cancellation** status, the status of the reconciliation is changed to **Canceled**.

The system enables you to create a copy of reconciliation when it is in the **Canceled** status. If the number of pay instructions in the reconciliation does not exceed the value specified in the **Defer Processing Count** option type of the **C1-RECDUPBH** feature configuration, a copy of the reconciliation and pay instructions is created in the real time (i.e. immediately). The status of the reconciliation is set to **Pending**. And, the status of the pay instruction is set to either **Pending** or **Error** depending on whether it is successfully validated or not.

However, if the number of pay instructions in the reconciliation exceeds the value specified in the **Defer Processing Count** option type of the **C1-RECDUPBH** feature configuration, a batch job is automatically created using the **Duplicate Reconciliation (C1-RECUD)** batch. A message appears indicating the batch job ID. This batch job creates a copy of the reconciliation and pay instructions. The status of the reconciliation is set to **Pending**. And, the status of the pay instruction is set to either **Pending** or **Error** depending on whether it is successfully validated or not.

If the policy number, plan number, and member identifier are specified in a pay instruction, then the pay instruction is reconciled at the main subscriber level. If the policy number and plan number are specified in a pay instruction, then the pay instruction is reconciled at the plan level. However, if the policy number is only specified in a pay instruction, then the pay instruction is reconciled at the policy level.

On reconciling, some pay instructions are fully reconciled against the bill segments, some pay instructions are partially reconciled against the bill segments, and some pay instructions are not reconciled against any bill segments. The system enables you to capture such discrepancies for the reporting purposes. If required, you can generate the discrepancy report at the file or account level. If you generate the discrepancy report at the file level, the system lists the following:

- All pay instructions in the file which were partially reconciled due to rate variance
- All pay instructions in the file which could not be reconciled as the amount was paid, but not yet billed

However, if you generate the discrepancy report at the account level, the system lists the following:

- All billed items which were partially reconciled against pay instructions due to rate variance
- All billed items which could not be reconciled as the amount was billed, but not yet paid
- All pay instructions for the account which could not be reconciled as the amount was paid, but not yet billed

While generating a discrepancy report, you need to specify the discrepancy report type using which you want to create the discrepancy report. Once you review and finalize the discrepancy report, its status is changed to **Completed**. At a time, you can only have one discrepancy report for the file or account in the **Pending** status. Until, you finalize a discrepancy report, you cannot create another discrepancy report for the file or account. Also, note that you can create a discrepancy report for a file only when its corresponding reconciliation is in the **Open** status.

The reconciliation process goes through various statuses in its entire lifecycle. For more information about the reconciliation statuses, see...

- [Reconciliation Status Transition](#) on page 2562
- [Pay Instruction Status Transition](#) on page 2563
- [Discrepancy Report Status Transition](#) on page 2565

Pre-requisites

To setup the Member to Member Reconciliation feature, you need to do the following:

- **Configure the following Characteristics:**
 - Define an account eligible for reconciliation process from an **On-Account Contract** of a Universal Generic account.
 - Populate the Policy ID, or Plan ID, or Membership ID linked with the billable charges.
- Define the bills having the status as **Completed** for reconciliation.
- Define the **Contract Types** for reconciliation.
- Ensure that payment on **Suspense Contract** is available to match against the bills.
- Configure the **Customer Class** algorithm for a payer account.

Reconciliation of Individual Health Insurance Subsidy Payments

Several states have established health insurance exchanges to offer health and dental insurance coverage options to their respective residents. Individuals within these states can compare and purchase coverage from a selection of health and dental plans, which are referred to as Qualified Health Plan (QHP).

Individuals who enroll for these QHPs may be eligible for Federal Tax Credits and Cost-Sharing Reductions (CSRs), which are subsidies based on the subscriber's income, to help pay for their health insurance and lower their out-of-pocket costs. The Centers for Medicare & Medicaid Services (CMS) makes monthly payments to insurers for the individuals who receive these credits.

CMS has established and instituted the State-Based Exchange (SBE) or Federally Facilitated Marketplace (FFM) reconciliation process to ensure that insurers enrollment information aligns with Marketplace enrollment information. The dispute process provides a mechanism for insurers to correct an FFM enrollment record or related payment information that the monthly reconciliation process cannot resolve.

Oracle Revenue Management and Billing (ORMB) may receive either the exact or different payment amount from the exchange for the sponsored charges due to various reasons. ORMB now enables you to reconcile the payments from the exchange against the bill line items for the fully insured individual business, thereby ensuring that the discrepancy is identified and resolved on time to quickly recover the money from CMS via the dispute process.

The reconciliation process in ORMB is enhanced to support both the fully insured group business and fully insured individual business. For the fully insured group business, the system stamped the policy ID and plan ID in the **C1_FT_EXT** table while freezing a financial transaction on the bill completion. These details were later used to reconcile the pay instructions against the bill line items. In this release, the **C1-STMPFTINF** algorithm type (which is attached on the **FT Freeze** system event of a customer class) is enhanced to support the fully insured individual business. It stamps the health plan code and price item in the **C1_FT_EXT** table while freezing a financial transaction on the bill completion for the fully insured individual business. These details are later used to reconcile the pay instructions received from the exchange against the bill line items of the exchange account.

A new field named **Reconciliation Category** is available while defining a reconciliation type. It helps to differentiate between the fully insured group and fully insured individual reconciliation objects. If you want to upload and process a pay instruction file for a fully insured group business using a reconciliation type, you must set the reconciliation category of the reconciliation type to **Group**. However, if you want to upload and process a pay instruction file for a fully insured individual business using a reconciliation type, you must set the reconciliation category of the reconciliation type to **Individual**.

A new algorithm type named **C1-PAYINSEXC** is introduced in this release. You need to attach an algorithm created using the **C1-PAYINSEXC** algorithm type to the **Upload Pay Instructions** system event of a reconciliation type where the reconciliation category is set to **Individual**. This algorithm parses a pay instruction file which is received from the

exchange. It reads each record in the pay instruction file and creates one or more pay instructions in a reconciliation object depending on the number of exchange payment types received in the record. For example, if a record contains information about two exchange payment types (i.e. EP1 and EP2), the system will create two pay instructions for the record – one for EP1 and another for EP2. The exchange payment types (i.e. health insurance coverage) maintained in the CMS system might be different from the price items maintained in ORMB. Therefore, ORMB enables you to map an exchange payment type with a price item using the **C1-PayTypePrcItemMap** extendable lookup. Note that no values are shipped for this extendable lookup from the product. You need to create a value for the **C1-PayTypePrcItemMap** extendable lookup wherein each payment type received from the exchange is mapped to a price item. You can map a price item to one or more payment types based on the requirements.

While creating an algorithm using the **C1-PAYINSEXC** algorithm type, you need to specify the following parameters:

- **Pay Instruction Business Object** – Used to indicate the business object using which you want to create a pay instruction.
- **Date Format** – Used to indicate the format in which you want to store the coverage period start and end dates.
- **Payment Type – Price Item mapping** – Used to indicate the **C1-PayTypePrcItemMap** extendable lookup value using which you want the system to derive the price item for each payment type received from the exchange.

The system enables you to upload a pay instruction file received from the exchange in the CSV file format. You can upload pay instruction files in the CSV format from the specified location on the server using the **Pay Instruction CSV File Upload (C1-RECUP)** batch. While receiving a pay instruction file from the exchange, you need to ensure that each record in the pay instruction file contains the following information:

- Payor (i.e. exchange person) or its account from where the payment is received
- Subscriber (i.e. individual membership) for whom the payment is received
- Health plan and its coverage period for which the payment is received
- At least one exchange payment type (i.e. health insurance coverage) and its subsidy amount which is sponsored by the exchange

Note:

The system assumes that the exchange person will have only one account. Therefore, if an exchange person has multiple accounts, the system will not allow you to upload and process a pay instruction file received from the respective exchange. Hence, if the exchange person has a single account in the system, you can either provide the payor or its account details in the record. However, if the exchange person has multiple accounts in the system, you must provide the payor's account details in the record.

You can create an exchange person and its account in the system through the health care inbound message. While creating an account for an exchange person, ensure that you set the **Eligible for Member Reconciliation (C1-RCELG)** characteristic of the account to **Y**.

You can specify either the health plan code or Health Insurance Oversight System (HIOS) ID in the record. If you are planning to use the Health Insurance Oversight System (HIOS) ID for a health plan, you need to attach an algorithm created using the **C1-STMPHLPN** algorithm type to the **Enter** system event (with the lowest sequence number) of the **Pending** status in the **C1-MemberReconciliation** business object. This algorithm will then derive the code of the health plan, to which the individual is enrolled for the coverage period, using the HIOS ID. Note that, while creating a pay instruction, the system will derive the health plan code when the HIOS ID is present in the record irrespective of whether the health plan code is present in the record or not. However, if the HIOS ID is not present in the record, the system will use the health plan code that is present in the record.

If a subscriber has enrolled for multiple insurance coverages of a health plan for the same coverage period and if the subscriber is eligible for subsidy for one or more insurance coverages, you will receive the subsidy amount for the respective insurance coverages from the CMS system. The subsidy information is received in the form of exchange payment type and amount. At a time, you can specify maximum 10 exchange payment types and their amounts in each record of a pay instruction file.

The **C1-RECUP** batch is enhanced to support the fully insured individual business. On executing the **C1-RECUP** batch, the system reads the pay instruction file from the specified location and validates it. Once a file is successfully validated, the reconciliation object is created for the file in the **Draft** status. The reconciliation object is immediately transitioned to the **Send Notification** status and the algorithms attached to the **Send Notification** status are executed. Once the To Do is created, the status of the reconciliation object is changed to **Pending**. One or more pay instructions are created for a record of a pay instruction file and its status is set to either **Pending** or **Error** depending on whether it is successfully validated or not. While creating a pay instruction, the system derives the health plan code (if not available), individual membership and the exchange account. For more information about the **C1-RECUP** batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

You need to then specify the payment ID against which you want to reconcile the bill line items for which you have received the pay instructions. Once you specify the payment information and submit the pay instructions for reconciliation, the payment amount is distributed against the reconciliation contract of the exchange accounts for which you have received the pay instruction. The status of the reconciliation object is changed to **Pending Reconciliation**. On reconciling the pay instructions, the system finds the open and unmatched bill line item of the exchange account against which the pay instruction must be reconciled using the health plan, subscriber, price item, and coverage period combination. The system creates a reconciliation adjustment for a pay instruction which is successfully reconciled. While reconciling the pay instructions, the system sets the pay instruction matching level characteristic type of the reconciliation object to **MEMBER**.

You can manually reconcile the pay instructions of a reconciliation object, or you can execute the **Reconciliation Periodic Monitor (C1-RCNM)** or **Pay Instruction Processing Batch (C1-RCPM)** batch at regular intervals to reconcile the pay instructions.

Note: While executing the **C1-RCPM** batch, you need to specify a member reconciliation preference whose attributes you want to use while reconciling all pay instructions of a file at the member level.

For more information about the above batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

If you attach an algorithm created using the **C1-VALMRPYCN** algorithm type to the **Payment Cancellation** system event of the required customer class, the system automatically cancels the payment and reconciliation object associated with the payment when you cancel its corresponding payment tender. The status of the reconciliation object is changed to **Pending Cancellation** and the status of all pay instructions in the reconciliation object is changed to **Canceled**.

If required, you can also manually cancel a reconciliation object. However, you can cancel a reconciliation object only when it is in the **Open** or **Completed** status. On canceling a reconciliation object, the status of the reconciliation object is changed to **Pending Cancellation**. Before canceling a pay instruction, the reconciliation adjustment (if any) corresponding to the pay instruction is also canceled.

You need to configure the **Reconciliation Cancellation Periodic Monitor (C1-RCNMD)** batch to execute at the regular intervals. This batch monitors whether there are any reconciliation objects in the **Pending Cancellation** status. If there is a reconciliation object in the **Pending Cancellation** status, the status of the reconciliation object and the status of all pay instructions in the reconciliation object is changed to **Canceled**. For more information about the **C1-RCNMD** batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

If all pay instructions in a reconciliation object are successfully reconciled, the system changes the status of the reconciliation object to **Completed**. However, if one or more pay instruction in a reconciliation object is not successfully reconciled, the system changes the status of the reconciliation object to **Open**. If you want the system to automatically reconcile the open pay instructions of the account when you bill the account each time, you need to attach an algorithm created using the **C1-RCLOPNRCN** algorithm type to the **Post Bill Completion** system event of the required customer class. The system will then trigger the reconciliation process to reconcile the open pay instruction against the open and unmatched bill line item of the exchange account and will accordingly update the status of the pay instruction and reconciliation object.

If you attach an algorithm created using the **C1-VLPYINACN** algorithm type to the **Adjustment Cancellation** system event of the adjustment type (using which the reconciliation adjustments are created), the system ensures that no one can cancel a reconciliation adjustment until it is linked to a non-canceled pay instruction.

Reconciliation Discrepancy Report of Individual Health Insurance Subsidy Payments

Until now, you were able to generate the reconciliation discrepancy report at the file or account level for the fully insured group business. Now, in addition, you can generate the reconciliation discrepancy report at the file or account level for the individual health insurance subsidy payments. If you generate the discrepancy report at the file level, the system lists the following:

- All pay instructions in the file which were partially reconciled due to rate variance
- All pay instructions in the file which could not be reconciled as the amount was paid, but not yet billed

However, if you generate the discrepancy report at the account level, the system lists the following:

- All bill line items which were partially reconciled against pay instructions due to rate variance
- All bill line items which could not be reconciled as the amount was billed, but not yet paid
- All pay instructions for the account which could not be reconciled as the amount was paid, but not yet billed

While generating a discrepancy report, you need to specify the discrepancy report type using which you want to create the discrepancy report. The system will create the discrepancy report in either **Pending** or **Deferred Processing** status. Once you review the discrepancy line items and finalize the discrepancy report, its status is changed to **Completed**.

At a time, you can only have one discrepancy report for a file or an account in the **Pending** or **Deferred Processing** status. Until you finalize a discrepancy report, you cannot create another discrepancy report for the respective file or account. Also, note that you can create a discrepancy report for a file only when its corresponding reconciliation object is in the **Open** status.

When you generate a discrepancy report for a pay instruction file which is received from the exchange or when you generate a discrepancy report for an exchange account, the system displays the following additional information for each discrepancy line item along with other details:

- Payor Identifier Type
- Payor Identifier
- Health Plan
- HIOS ID
- Payment Type

Note: Policy number and plan number are displayed instead of the above information when you generate discrepancy report for the fully insured group business.

Deferred Processing Mode for Discrepancy Report Creation

Until now, the reconciliation discrepancy report at the file or account level was only created in the online mode (i.e. immediately). Now, the system provides you with the ability to configure deferred processing mechanism for the reconciliation discrepancy report creation. A new status named **Deferred Processing** is introduced in the lifecycle of the **C1-DiscrepancyReport** business object. On generating a discrepancy report at the file or account level, the discrepancy report is created in the **Draft** status. A new algorithm named **C1-DISCDEF** is attached to the **Enter** system event of the **Draft** status. This algorithm checks whether the number of pay instructions in the non-final status exceeds the deferred count specified in the algorithm. If the number of pay instructions in the non-final status does not exceed the deferred count, the status of the discrepancy report is changed to **Pending**. The system then adds the discrepancy line items in the discrepancy report by comparing each non-final pay instruction against the open and unmatched bill line item of the exchange account.

However, if the number of pay instructions in the non-final status exceeds the deferred count, the status of the discrepancy report is changed to **Deferred Processing**. A new batch named **C1-DRMT** is introduced in this release. This batch is used to monitor or check whether there are any discrepancy reports in the **Deferred Processing** status. If there is a discrepancy report in the **Deferred Processing** status, the batch changes the status of the discrepancy report to **Pending**. Then, the system adds the discrepancy line items in the discrepancy report by comparing each non-final pay instruction against the open and unmatched bill line item of the exchange account.

This batch is a multi-threaded batch. The multi-threading is based on discrepancy request ID and chunks for multi-threading are created based on numerical distribution of discrepancy request ID. This batch contains the following parameters:

| Parameter Name | Mandatory (Yes or No) | Description |
|-------------------------------------|-----------------------|--|
| Maintenance Object | Yes | Used to indicate that you want to monitor discrepancy reports which are created using the business objects of a particular maintenance object. Note: By default, the parameter value is set to C1-DISCR-RPT . |
| Restrict by Batch Code | No | Used when you want to monitor discrepancy reports whose current status is linked to the Discrepancy Report Monitor (C1-DRMT) batch. The valid value is true . |
| Restrict by Discrepancy Report Type | No | Used when you want to monitor the discrepancy reports which are created using a particular discrepancy report type. |
| Restrict by Business Object | No | Used when you want to monitor discrepancy reports which are created using a particular business object. |
| Restrict by Status Code | No | Used when you want to monitor discrepancy reports which are in a particular status. Note: This parameter is useful when this batch is invoked from more than one status in the lifecycle of the business object. |
| Override maximum errors | No | Used to override the maximum number of errors after which the batch must be terminated. |
| Threadpool | No | Used to specify the thread pool on which you want to execute the batch. |

Reconciliation Status Transition

The following figure graphically indicates how a reconciliation goes through various statuses in its lifecycle:

Pay Instruction Status Transition

Discrepancy Report Status Transition

The following figure graphically indicates how a Discrepancy Report goes through various statuses in its lifecycle:

EDI 820 File Format For Reconciliation

Before uploading an EDI 820 file, you need to ensure that the EDI 820 file contains the following columns:

| Tag | Attribute | Description | Mandatory (Yes or No) |
|------------|-------------------------|---|---|
| Algo Param | Account Identifier Type | Used to specify the account identifier type. The valid values are: <ul style="list-style-type: none"> Account Name Base Global Account ID Bill Group Identifier Demo Bank Account Number External Account Identifier Flexcube Account ID International Bank Account Number | Yes (Conditional) |
| | | | Note: This data is required when Account Identifier is provided. |

| Tag | Attribute | Description | Mandatory (Yes or No) |
|---------------|------------------------------|--|---|
| N1[3] | Account Identifier value | Used to specify the value of the account identifier type. | Yes (Conditional) |
| | | | Note: This data is required when Account Identifier Type is provided. |
| Batch Param | Member Identifier type | Used to specify the member identifier type. | Yes |
| RMR[2] | Policy Number | Used to specify the policy number of the member. | Yes |
| Algo Param | Plan Number | Used to specify the plan number of the member. | No |
| ENT[4] | Member Identifier Value | Used to specify the value of the member identifier type. | Yes |
| RMR[4] | Amount | Used to specify the amount that has to be paid to the member. | Yes |
| | | | Note: The data value of this column must be 0, if no amount is provided. |
| DTM[6] | Coverage Start Date | Used to specify the date of the policy from where the coverage starts. | Yes |
| | | Note: The Coverage Start Date cannot be later than the coverage end date. | |
| DTM[6] | Coverage End Date | Used to specify the date of the policy till when the coverage ends. | Yes |
| | | Note: The coverage end date cannot be earlier than the coverage start date. | |
| NM1[4] [5] | Member Name | Used to specify the name of the member. | Yes |
| REF[2] | Plan Number | Used to specify the plan number of the member. | Yes (Conditional) |
| | | | Note: This data is required when Algo Param tag does not have a value. |
| Batch Param | Reconciliation Type | Used to specify the type of reconciliation. | Yes |
| Batch Param | Reconciliation Cancel Status | Used to specify the Reconciliation Cancellation status. | Yes |

Here the tags ISA and IEA resemble Bank Details, whereas LBTEST01 indicates Tender Source information.

Tags like GS and GE, ST and SE are known as Start and End Tags. All of the other tags are embedded inside these Start and End tags.

For more information about the EDI 820 file format, see topic [EDI 820 File Format For Reconciliation](#) on page 2565

Algorithms Used in C1-MemberReconType

The following table lists the algorithms which are attached to the **C1-MemberReconType** business object:

| System Event | Algorithm | Algorithm Type | Description |
|----------------|-------------|----------------|---|
| Pre-Processing | C1-REOCNPEP | C1-REOCNPEP | Refer to C1-REOCNPEP on page 2567 |

C1-REOCNPEP

This algorithm validates a reconciliation type.

It checks the following:

- A duplicate algorithm is not added.
- A duplicate characteristic type is not added.

In addition, it does not allow you to:

- Delete a reconciliation type when the corresponding reconciliation is in a status other than **Completed** or **Canceled**.

Algorithms Used in C1-MemberReconciliation

The following table lists the algorithms which are attached to the **C1-MemberReconciliation** business object:

| System Event | Algorithm | Algorithm Type | Description |
|--------------|--------------|----------------|--|
| Information | C1-RECONINFO | C1-RECONINFO | Refer to C1-RECONINFO on page 2569 |
| Validation | C1-MRECONVAL | C1-MRECONVAL | Refer to C1-MRECONVAL on page 2569 |

The following table lists the algorithms which are used in the lifecycle of the **C1-MemberReconciliation** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|------------------------------------|--------------|--------------|----------------|--|

C1-RECONINFO

This algorithm generates the reconciliation information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

- Reconciliation Type Description
- Reconciliation Status
- Reconciliation ID

C1-MRECONVAL

This algorithm is invoked when you submit the pay instruction file for reconciliation. It checks the following:

- The payment is not associated with any other reconciliation which is in the status other than **Pending Cancellation** or **Canceled**.
- The payment ID and payor account ID are both available for further processing.

It contains the following parameters:

- **Reconciliation Canceled Status** – Used to specify the status code to which the reconciliation in the **Pending Cancellation** status is transitioned when the **Reconciliation Cancellation Periodic Monitor (C1-RCNMD)** batch is executed.
- **Reconciliation Pending Cancellation Status** - Used to specify the status code to which the reconciliation is transitioned when you click the **Cancel** button.

Both these parameters are mandatory.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

F1-TDCREATE

This algorithm is invoked when the status of the reconciliation is changed to **Send Notification**. It creates a To Do using the specified To Do type and assigns it to users with the specified To Do role.

It contains the following parameters:

- **To Do Type** – Used to specify the type of notification that you want to generate when the reconciliation is created for a pay instruction file.
- **To Do Role** – Used to specify the To Do role to indicate the users to whom you want to send the notification when the reconciliation is created for a pay instruction file.

The rest of the parameters, such as **To Do Type Element Name**, **To Do Role Element Name**, **Message Category**, **Message Number**, **Characteristic Type For Log Entry**, **To Do Sort Keys Retriever Script**, **Discard Cancel Terminate Reason Element**, **Discard Cancel Terminate Reason**, **Retry Frequency**, and **Retry Frequency Element Name**, are not used at the moment.

C1-VALPAYINS

This algorithm is invoked when the status of the reconciliation is changed to **Pending**. Once a pay instruction is created, this algorithm validates the following:

- The coverage end date is not earlier than the coverage start date.
- Either the account identifier type and account identifier or the account ID is available in the pay instruction record.
- The member identifier type is available when the member identifier is specified and vice versa.
- A person with the given member identifier type and member identifier combination exists in the system.
- An account with the specified account ID exists in the system.
- The account ID is derived using the account identifier type and account identifier combination when the account ID is not available in the pay instruction record.
- The account is eligible for reconciliation.

If the above mentioned validations are successful, the status of the pay instruction is set to **Pending**. However, if any of the above validation fails, the status of the pay instruction is set to **Error**.

This algorithm contains the following parameters:

- **Eligible for Reconciliation Characteristic Type** – Used to specify the characteristic type which indicates whether the account is eligible for reconciliation. This type of characteristic is defined on the account. You must specify a characteristic type where the characteristic entity is set to Account.
- **Maintenance Object for Generating Pay Instruction Logs** – Used to specify the maintenance object using which you want to generate logs for the pay instruction.
- **Pay Instruction Error Status** – Used to specify the status code to which you want to transition the pay instruction when the validation fails.
- **Pay Instruction Pending Status** – Used to specify the status code to which you want to transition the pay instruction when the validation is successful.

All these parameters are mandatory.

F1-TODOCOMPL

This algorithm type completes the To Do entries that are linked to an object when the object exits the given status.

It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

C1-MRECONVAL

This algorithm is invoked when you submit the pay instruction file for reconciliation. It checks the following:

- The payment is not associated with any other reconciliation which is in the status other than **Pending Cancellation** or **Canceled**.
- The payment ID and payor account ID are both available for further processing.

It contains the following parameters:

- **Reconciliation Canceled Status** – Used to specify the status code to which the reconciliation in the **Pending Cancellation** status is transitioned when the **Reconciliation Cancellation Periodic Monitor (C1-RCNMD)** batch is executed.
- **Reconciliation Pending Cancellation Status** - Used to specify the status code to which the reconciliation is transitioned when you click the **Cancel** button.

Both these parameters are mandatory.

C1-MONPAYINS

This algorithm is invoked when the status of the reconciliation is changed to **Initial Reconciliation in Progress** or **Reconciliation in Progress**. It monitors or checks whether there are any pay instructions in the following statuses:

- Reconciliation Pending Processing
- Derivation Pending Processing
- Completed

If all pay instructions in the reconciliation are in the **Completed** status, then the status of the reconciliation is changed to **Completed**. However, if there are any pay instructions in the **Reconciliation Pending Processing** or **Derivation Pending Processing** status, then the status of reconciliation is changed to **Open**.

This algorithm contains the following parameters:

- **Pay Instruction Derivation Pending Processing Status** - Used to specify the status code to which the pending pay instruction is transitioned when the number of pay instructions in the reconciliation exceeds the deferred processing threshold (specified in an algorithm which is created using the **C1-RCOPNPYIN** algorithm type).
- **Pay Instruction Reconciliation Pending Processing Status** - Used to specify the status code to which the open pay instruction is transitioned when the number of pay instructions in the reconciliation exceeds the deferred processing threshold (specified in an algorithm which is created using the **C1-RCOPNPYIN** algorithm type).
- **Pay Instruction Completed Status** - Used to specify the status code to which the pay instruction is transitioned when it is fully reconciled.
- **Reconciliation Open Status** - Used to specify the status code to which you want to transition the reconciliation when there is a pay instruction in the status which is specified in the **Pay Instruction Derivation Pending Processing Status** or **Pay Instruction Reconciliation Pending Processing Status** parameter.
- **Reconciliation Completed Status** - Used to specify the status code to which you want to transition the reconciliation when all its pay instructions are in the status which is specified in the **Pay Instruction Completed Status** parameter.

All these parameters are mandatory.

C1-TRNPAYRCN

This algorithm transfers the payment amount from the payor account's contract to the reconciliation contract of the accounts for which you have received the pay instruction. In this process, the payment against the payor account's contract is canceled and the payment against the payee account's reconciliation contract is created in the **Frozen** status.

It contains the following parameters:

- **Payment Cancel Reason** – Used to indicate the reason that you want to use when the payment on the payor account's contract is canceled.
- **Reconciliation Contract Match Type** – Used to specify the match type using which you want to apply payment against the reconciliation contract.

Both these parameters are mandatory.

C1-RCOPNPYIN

This algorithm checks whether the number of pay instructions in the reconciliation exceeds the limit defined in the **Deferred Processing Threshold** parameter. If the status of the pay instruction is **Pending** and the number of pay instructions in the reconciliation exceeds the limit defined in the **Deferred Processing Threshold** parameter, then the status of the pay instruction is changed to the value defined in the **Pay Instruction Derivation Pending Processing Status** parameter.

However, if the status of the pay instruction is **Open** and the number of pay instructions in the reconciliation exceeds the limit defined in the **Deferred Processing Threshold** parameter, then the status of the pay instruction is changed to the value defined in the **Pay Instruction Reconciliation Pending Processing Status** parameter.

It contains the following parameters:

- **Pay Instruction Pending Status** – Used to specify the status code to which a pay instruction is transitioned when its validation is successful.
- **Pay Instruction Open Status** – Used to specify the status code to which a pay instruction is transitioned when it is not fully reconciled.
- **Pay Instruction Derivation Pending Processing Status** – Used to specify the status code to which you want to transition the pending pay instruction when the number of pay instructions in the reconciliation exceeds the deferred processing threshold limit.
- **Pay Instruction Reconciliation Pending Processing Status** – Used to specify the status code to which you want to transition the open pay instruction when the number of pay instructions in the reconciliation exceeds the deferred processing threshold limit.
- **Deferred Processing Threshold** – Used to specify the maximum number of pay instructions that can be reconciled in the real time (i.e. immediately). If the number of pay instructions in the reconciliation exceeds the deferred processing threshold limit, the pay instruction is reconciled in the deferred mode.

All these parameters are mandatory.

C1-RCNOPNMR

This algorithm initiates the reconciliation process for the past open reconciliation records of the account. It contains the following parameters:

- **Reconciliation Open Status** – Used to specify the status code to which the reconciliation is transitioned when its pay instruction is not fully reconciled.
- **Reconciliation In Progress Status** – Used to specify the status code to which you want to transition the past open reconciliation record when the current reconciliation record of the account is reconciled.

Both these parameters are mandatory.

C1-RCMONPNCN

This algorithm is invoked when the **Reconciliation Cancellation Periodic Monitor (C1-RCNMD)** batch is executed. It checks whether the reason is specified while canceling the reconciliation. If the cancel reason is specified, the status of the reconciliation is changed to **Canceled**. However, if the cancel reason is not specified, an error occurs while executing the **Reconciliation Cancellation Periodic Monitor (C1-RCNMD)** batch.

It contains the following parameters:

- **Reconciliation Cancel Status Reason -**

Used to specify the cancel reason. If you specify the value for this parameter, the system will validate whether the cancel reason specified while canceling the reconciliation matches the cancel reason specified in this parameter. If the cancel reason does not match, an error occurs while executing the **Reconciliation Cancellation Periodic Monitor (C1-RCNMD)** batch. You must specify a reason which is defined for the **Pending Cancellation** status of the **C1-MemberReconciliation** business object.

C1-CANPAYINS

This algorithm is invoked when the **Reconciliation Cancellation Periodic Monitor (C1-RCNMD)** batch is executed. It changes the status of all pay instructions in the reconciliation.

It contains the following parameter:

- **Pay Instruction Canceled Status** – Used to specify the status code to which you want to transition a pay instruction when the reconciliation is canceled. This parameter is mandatory.

C1-CANRCNPAY

This algorithm transfers the payment amount from the payee account's reconciliation contract to the payor account's contract. In this process, the payment against the reconciliation contract is canceled and the payment against the payor account's contract is created in the **Frozen** status.

It contains the following parameters:

- **Payment Cancel Reason** – Used to indicate the reason that you want to use when the payment against the payee account's reconciliation contract is canceled.
- **On Account Match Type** – Used to specify the match type using which you want to apply the payment against the contract of the payor account.

Both these parameters are mandatory.

C1-RCNCANLTD

This algorithm is invoked when the status of the reconciliation is changed to **Canceled**. It creates a To Do using the specified To Do type and assigns it to users with the specified To Do role.

It contains the following parameters:

- **To Do Type** – Used to specify the type of notification that you want to generate when the reconciliation is canceled.
- **To Do Role** – Used to specify the To Do role to indicate the users to whom you want to send the notification when the reconciliation is canceled.

The rest of the parameters, such as **To Do Type Element Name**, **To Do Role Element Name**, **Message Category**, **Message Number**, **Characteristic Type For Log Entry**, **To Do Sort Keys Retriever Script**, **Discard Cancel Terminate Reason Element**, **Discard Cancel Terminate Reason**, **Retry Frequency**, and **Retry Frequency Element Name**, are not used at the moment.

Algorithms Used in C1-PayInstruction

The following table lists the algorithms which are attached to the **C1-PayInstruction** business object:

| System Event | Algorithm | Algorithm Type | Description |
|--------------|--------------|----------------|--|
| Information | C1-MPAYININF | C1-MPAYININF | Refer to C1-MPAYININF on page 2574 |

The following table lists the algorithms which are used in the lifecycle of the **C1-PayInstruction** business object:

| Error | - | - | - | - |

C1-MPAYININF

This algorithm generates the pay instruction information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

- “Period:” Start Date - End Date
- Pay Instruction Amount
- Pay Instruction Status
- Payor Name
- Pay Instruction ID

C1-PYINDRVAN

This algorithm is invoked when the status of the pay instruction is changed to **Derivation in Progress**. It derives the following:

- Policy using the policy number
- Plan using the plan number
- Member using the member identifier type and member identifier
- Payee account using the account identifier type and account identifier

If the policy, plan, and member information is available, it validates whether the member is covered under the specified plan of the policy. However, if the policy and plan information is available, it validates whether the plan is included in the specified policy. If the derivation and validation process is successful, the related object information is derived for policy, plan, and/or member from the system.

However, if the derivation and validation process fails, the related object information is not derived for policy, plan, and/or member and the status of the pay instruction remains as **Pending**.

In addition, the system determines whether the pay instruction must be reconciled at the member, plan, or policy level depending on the information available in the pay instruction. If the policy, plan, and member information is available, the pay instruction is reconciled at the member level. If the policy and plan information is available, the pay instruction

is reconciled at the policy plan level. However, if the policy information is available, the pay instruction is reconciled at the policy level.

It contains the following parameters:

- **Unsuccessful Processing Status** – Used to specify the status code to which you want to transition the pay instruction when the derivation and validation process fails.
- **Pay Instruction Matching Level Characteristic Type** – Used to specify the characteristic type which indicates whether the pay instruction must be reconciled at the member, plan, or policy level. This type of characteristic is defined on the pay instruction. Here, you must specify a characteristic type where the characteristic entity is set to **Payment Instruction**.
- **Member Matching Level Characteristic Value** – Used to specify the value that you want to define for the characteristic type specified in the **Pay Instruction Matching Level Characteristic Type** parameter when the pay instruction must be reconciled at the member level.
- **Plan Matching Level Characteristic Value** - Used to specify the value that you want to define for the characteristic type specified in the **Pay Instruction Matching Level Characteristic Type** parameter when the pay instruction must be reconciled at the policy plan level.
- **Policy Matching Level Characteristic Value** - Used to specify the value that you want to define for the characteristic type specified in the **Pay Instruction Matching Level Characteristic Type** parameter when the pay instruction must be reconciled at the policy level.

All these parameters are mandatory.

C1-PIRECOCIL

This algorithm is invoked when the status of the pay instruction is changed to **Reconciliation in Progress**. It searches whether there is an open bill segment with the policy, plan, member, and coverage period combination for the payee account. If such bill segment exists in the system, this algorithm reconciles the pay instruction against the open bill segment. It creates two reconciliation adjustments – one against the payee account’s reconciliation contract and another against the bill segment’s contract.

If the amount on the pay instruction is fully reconciled, then the status of the pay instruction is changed to **Completed**. However, if the amount on the pay instruction is not fully reconciled, then the status of the pay instruction is changed to **Open**.

It contains the following parameters:

- **Pay Instruction Matching Level Characteristic Type** – Used to specify the characteristic type which indicates whether the pay instruction must be reconciled at the member, plan, or policy level. This type of characteristic is defined on the pay instruction. Here, you must specify a characteristic type where the characteristic entity is set to **Payment Instruction**.
- **Member Matching Level Characteristic Value** – Used to specify the value of the characteristic type specified in the **Pay Instruction Matching Level Characteristic Type** parameter which indicates that the pay instruction must be reconciled at the member level.
- **Plan Matching Level Characteristic Value** – Used to specify the value of the characteristic type specified in the **Pay Instruction Matching Level Characteristic Type** parameter which indicates that the pay instruction must be reconciled at the policy plan level.
- **Policy Matching Level Characteristic Value** – Used to specify the value of the characteristic type specified in the **Pay Instruction Matching Level Characteristic Type** parameter which indicates that the pay instruction must be reconciled at the policy level.
- **Adjustment Type for Bill Segment Contract** – Used to specify the adjustment type using which you want to create the adjustment on the bill segment’s contract when the pay instruction is reconciled.
- **Adjustment Type for Reconciliation Contract** – Used to specify the adjustment type using which you want to create the adjustment on the reconciliation contract when the pay instruction is reconciled.

- **Reconciliation Open Status** – Used to specify the status code to which you want to transition the reconciliation when the status of the pay instruction is changed to **Open**.
- **Pay Instruction Open Status** – Used to specify the status code to which you want to transition the pay instruction when it is not fully reconciled.
- **Pay Instruction Completed Status** – Used to specify the status code to which you want to transition the pay instruction when it is fully reconciled.
- **Reconciliation Characteristic Type** – Used to specify the characteristic type which you want to use to store the reconciliation ID. This type of characteristic is defined on the adjustments which are created on reconciliation. Here, you must specify a characteristic type where the characteristic entity is set to **Adjustment Type**.
- **Payment Event Characteristic Type** – Used to specify the characteristic type which you want to use to store the payment event ID. This type of characteristic is defined on the reconciliation adjustments to indicate the payment event whose payment is distributed against the bill segment.
- **Adjustment Type for Offsetting Debits against Billed Credits** – Used to specify the adjustment type using which you want to create the adjustments when offsetting billed debit verses billed credits.

All these parameters are mandatory.

C1-PYICNADJ

This algorithm is invoked when the status of the pay instruction is changed to **Canceled**. It cancels the reconciliation adjustments which are created while reconciling the pay instruction. It cancels the reconciliation adjustment irrespective of whether the status of the pay instruction is **Open** or **Completed**.

It contains the following parameters:

- **Adjustment Cancel Reason** – Used to indicate the reason that you want to use when the reconciliation adjustments are canceled.
- **Pay Instruction Completed Status** – Used to specify the status code to which the pay instruction is transitioned when it is fully reconciled.
- **Pay Instruction Open Status** – Used to specify the status code to which the pay instruction is transitioned when it is not fully reconciled.
- **Reconciliation Completed Status** – Used to specify the status code to which the reconciliation is transitioned when all its pay instructions are fully reconciled.
- **Reconciliation Open Status** – Used to specify the status code to which the reconciliation is transitioned when its pay instruction is not fully reconciled.

All these parameters are mandatory.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

Algorithms Used in C1-MemberDiscReportType

The following table lists the algorithms which are attached to the **C1-MemberDiscReportType** business object:

| System Event | Algorithm | Algorithm Type | Description |
|----------------|------------|----------------|--|
| Pre-Processing | C1-DISCPEP | C1-DISCPEP | Refer to C1-DISCPEP on page 2577 |

C1-DISCPEP

This algorithm validates a discrepancy report type. It checks the following:

- A duplicate characteristic type is not added.

In addition, it does not allow you to:

- Delete a discrepancy report type when the corresponding discrepancy report is in a status other than **Completed**.

Algorithms Used in C1-DiscrepancyReport

The following table lists the algorithms which are attached to the **C1-DiscrepancyReport** business object:

| System Event | Algorithm | Algorithm Type | Description |
|--------------|-------------|----------------|---|
| Information | C1-DISRINFO | C1-DISRINFO | Refer to C1-DISRINFO on page 2577 |

The following table lists the algorithms which are used in the lifecycle of the **C1-DiscrepancyReport** business object:

| Status | System Event | Algorithm | Algorithm Type | Description |
|-----------|--------------|--------------|----------------|--|
| Draft | Monitor | F1-AT-RQJ | F1-GEN-BOMNJ | Refer to F1-AT-RQJ on page 1659 |
| | Enter | C1-VALNEWDIS | C1-VALNEWDIS | Refer to C1-VALNEWDIS on page 2578 |
| Pending | Enter | C1-CRDSLNTM | C1-CRDSLNTM | Refer to C1-CRDSLNTM on page 2578 |
| | Exit | F1-TODOCOMPL | F1-TODOCOMPL | Refer to F1-TODOCOMPL on page 1549 |
| Completed | Enter | C1-VALCMPDIS | C1-VALCMPDIS | Refer to C1-VALCMPDIS on page 2578 |

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-DISRINFO

This algorithm generates the discrepancy report information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

- Discrepancy Report Type Description
- Discrepancy Report Status

- Discrepancy Report ID

C1-VALNEWDIS

This algorithm allows you to create a discrepancy report when the following conditions are met:

- The account for which discrepancy report is created is eligible for reconciliation.
- A discrepancy report in the **Pending** status does not exist for the account or file.
- A reconciliation record in the **Open** status exists for the account or file.

It contains the following parameters:

- **Eligible for Reconciliation Characteristic Type** – Used to specify the characteristic type which indicates whether the account is eligible for reconciliation. Here, you must specify a characteristic type where the characteristic entity is set to **Account**.
- **Eligible for Reconciliation Characteristic Value** – Used to specify the value of the characteristic type specified in the **Eligible for Reconciliation Characteristic Type** parameter which indicates that the account is eligible for reconciliation.

Both these parameters are mandatory.

C1-CRDSLNITM

This algorithm is invoked when the status of the discrepancy report is changed to **Pending**. If the discrepancy report is created at the account level, this algorithm creates a discrepancy line item for each policy, plan, member, and coverage period combination for which there is an open bill segment for the account and for which there are open and pending pay instructions in the open reconciliation.

However, if the discrepancy report is created at the file level, this algorithm creates a discrepancy line item for each policy, plan, member, and coverage period combination for which there are open and pending pay instructions in the open reconciliation. Note that the discrepancy line items are created for each account whose pay instructions are received in the pay instruction file.

It contains the following parameters:

- **Consumer Status Characteristic Type** – Used to specify the characteristic type which stores the consumer status of the member. The system retrieves the consumer status of the member and stores it against the respective discrepancy line item. Here, you must specify a characteristic type where the characteristic entity is set to **Person**. This parameter is mandatory.

F1-TODOCOMPL

This algorithm type completes the To Do entries that are linked to an object when the object exits the given status.

It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

C1-VALCMPDIS

This algorithm is invoked when you click the **Finalize** button. It changes the status of the discrepancy report to **Completed** when the discrepancy category is specified for each discrepancy line item in the report.

Reconciliation Type

Oracle Revenue Management and Billing allows you to define a reconciliation type using which you can create the reconciliation. It is the reconciliation type which helps the system to determine:

- The business object using which the reconciliation should be created.

- The file format through which the pay instruction records can be uploaded in the system.

In addition, a reconciliation type indicates the algorithm which validates the pay instruction file and creates a pay instruction for each record in the file. Two algorithm types named **C1-PAYINSUPL** and **C1-RECONPROC** are shipped with the product. You need to maintain separate reconciliation types for different file formats. If you want to use a reconciliation type while uploading a pay instruction file in the CSV format, you need to create an algorithm using the **C1-PAYINSUPL** algorithm type and attach it to the reconciliation type. However, if you want to use a reconciliation type while uploading a pay instruction file in the EDI 820 format, you need to create an algorithm using the **C1-RECONPROC** algorithm type and attach it to the reconciliation type.

The **Reconciliation Type** screen allows you to define, edit, copy, and delete a reconciliation type. It contains the following zones:

- [Reconciliation Type List](#) on page 2579
- [Reconciliation Type](#) on page 2579

Reconciliation Type List

The **Reconciliation Type List** zone lists the reconciliation types that are already defined in the system. It contains the following columns:

| Column Name | Column Description |
|---------------------|--|
| Reconciliation Type | Displays the reconciliation type. |
| Description | Displays the description of the reconciliation type. |
| Edit | On clicking the Edit (✎) icon, the Reconciliation Type screen appears where you can edit the details of the reconciliation type. |
| Duplicate | On clicking the Duplicate (📄) icon, the Reconciliation Type screen appears where you can define a new reconciliation type using an existing reconciliation type. |
| Delete | On clicking the Delete (🗑) icon, you can delete the reconciliation type. Note: You can delete a reconciliation type when you have not created a reconciliation using the reconciliation type. |

On clicking the **Broadcast** (📡) icon corresponding to a reconciliation type, the **Reconciliation Type** zone appears with the details of the respective reconciliation type.

Reconciliation Type

The **Reconciliation Type** zone displays the details of the reconciliation type. It contains the following sections:

- **Main** - Displays basic information about the reconciliation type. It contains the following fields:

| Field Name | Field Description |
|--------------------------------|---|
| Reconciliation Type | Displays the reconciliation type. |
| Reconciliation Business Object | Indicates the business object using which the reconciliation will be created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Description | Displays the description of the reconciliation type. |
| Detailed Description | Indicates the status of the reconciliation type. The valid values are: <ul style="list-style-type: none"> Active Inactive |
| Status | Displays additional information about the reconciliation type. |

- **Algorithms** - Lists the algorithms which are associated with the reconciliation type. It contains the following columns:

| Column Name | Column Description |
|--------------|--|
| Sequence | Indicates the order in which the algorithms with the same system event should be executed. |
| System Event | Indicates the system event when the algorithm should be executed. The valid value is: <ul style="list-style-type: none"> Upload Pay Instructions |
| Algorithm | Indicates the algorithm attached to the system event. Note: It has a link. On clicking the link, the Algorithm screen appears where you can view the details of the respective algorithm. |

- **Characteristics** - Lists the characteristics defined for the reconciliation type. It contains the following columns:

| Column Name | Column Description |
|----------------------|---|
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |
| Description | Displays the description of the characteristic value. Note: The data appears in this column when the type of characteristic value is set to Predefined Value or Foreign Key Value . |

- **Record Actions** - This section contains the following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | Used to edit the details of the reconciliation type. |
| Delete | Used to delete the reconciliation type. |

| Button Name | Button Description |
|-------------|---|
| | Note: You can delete a reconciliation type when you have not created a reconciliation using the reconciliation type. |
| Duplicate | Used to create a new reconciliation type using an existing reconciliation type. |

- **Record Information** - This section contains the following field:

| Field Name | Field Description |
|-----------------|---|
| Business Object | Indicates the business object using which the reconciliation type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |

By default, the **Reconciliation Type** zone does not appear in the **Reconciliation Type** screen. It appears when you click the **Broadcast** () icon corresponding to a reconciliation type in the **Reconciliation Type List** zone.

Defining a Reconciliation Type

Prerequisites

To define a reconciliation type, you should have:

- Reconciliation business objects defined in the application

Procedure

To define a reconciliation type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **R** and then click **Reconciliation Type**.
A sub-menu appears.
3. Click the **Add** option from the **Reconciliation Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------------------|--|-----------------------|
| Reconciliation Type Business Object | Used to indicate the business object using which you want to create the reconciliation type. | Yes |

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Reconciliation Type** screen.

Note: The **Select Business Object** screen appears when there are multiple reconciliation type business objects defined in the application. If there is only one reconciliation type business object defined in the application, the **Reconciliation Type** screen appears.

4. Select the required reconciliation type business object from the respective field.
5. Click **OK**.

The **Reconciliation Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the reconciliation type.
- **Algorithms** - Used to associate algorithms with the reconciliation type.
- **Characteristics** - Used to define the characteristics for the reconciliation type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------------|---|-----------------------|
| Reconciliation Type | Used to specify the reconciliation type. | Yes |
| Business Object | Indicates the reconciliation type business object using which you are defining the reconciliation type. | Not applicable |
| Reconciliation Business Object | Used to indicate the business object using which you want to create the reconciliation. | Yes |
| Description | Used to specify the description for the reconciliation type. | Yes |
| Detailed Description | Used to specify additional information about the reconciliation type. | No |
| Status | Used to indicate the status of the reconciliation type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |

6. Enter the required details in the **Main** section.
7. Associate algorithms with the reconciliation type, if required.
8. Define characteristics for the reconciliation type, if required.
9. Click **Save**.

The reconciliation type is defined.

Defining a Characteristic for a Reconciliation Type

Prerequisites

To define a characteristic for a reconciliation type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Reconciliation Type**).

Procedure

To define a characteristic for a reconciliation type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a reconciliation type.

The **Characteristics** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|---|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Reconciliation Type . | Note: This field is required when you are defining a characteristic for the reconciliation type. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the reconciliation type. |

2. Enter the required details in the **Characteristics** section.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the reconciliation type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the reconciliation type, click the **Delete** (🗑️) icon corresponding to the characteristic.

Associating an Algorithm with a Reconciliation Type

You can upload a pay instruction file in the CSV and EDI 820 file formats. While uploading a pay instruction file, you need to specify the reconciliation type using which you want to create the reconciliation. A reconciliation type indicates the algorithm which validates the pay instruction file and creates a pay instruction for each record in the file. Two

algorithm types named **C1-PAYINSUPL** and **C1-RECONPROC** are shipped with the product. You need to maintain separate reconciliation types for different file formats. If you want to use a reconciliation type while uploading a pay instruction file in the CSV format, you need to create an algorithm using the **C1-PAYINSUPL** algorithm type and attach it to the reconciliation type. However, if you want to use a reconciliation type while uploading a pay instruction file in the EDI 820 format, you need to create an algorithm using the **C1-RECONPROC** algorithm type and attach it to the reconciliation type.

Prerequisites

To associate an algorithm with a reconciliation type, you should have:

- Algorithm defined using the **C1-PAYINSUPL** or **C1-RECONPROC** algorithm type depending on whether you want to use the reconciliation type while uploading a pay instruction file in the CSV or EDI 820 file format

Procedure

To associate an algorithm with a reconciliation type:

1. Ensure that the **Algorithms** section is expanded when you are defining, editing, or copying a reconciliation type.

The **Algorithms** section contains the following fields in a grid:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------|--|--|
| Sequence | Used to indicate the order in which the algorithms with the same system event should be executed. | Yes (Conditional) Note: This field is required when you are associating an algorithm with the reconciliation type. |
| System Event | Used to indicate the system event when the algorithm should be executed. The valid value is: <ul style="list-style-type: none"> Upload Pay Instructions - Used when you want to execute the attached algorithm while uploading a pay instruction file using the Pay Instruction CSV File Upload (C1-RECUP) or Upload Lockbox Payment and Pay Instruction Files (C1-PUPSG) batch. | Yes (Conditional) Note: This field is required when you are associating an algorithm with the reconciliation type. |
| Algorithm | Used to indicate the algorithm that you want to attach to the system event. Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Algorithm Search window appears. | Yes (Conditional) Note: This field is required when you are associating an algorithm with the reconciliation type. |

2. Enter the required details in the **Algorithms** section.
3. If you want to associate more than one algorithm with the reconciliation type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove an algorithm from the reconciliation type, click the **Delete** (🗑️) icon corresponding to the algorithm.

4. Click **Save**.

The algorithms are associated with the reconciliation type.

Editing a Reconciliation Type**Prerequisites**

To edit a reconciliation type, you should have:

- Reconciliation business objects defined in the application

Procedure

To edit a reconciliation type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **R** and then click **Reconciliation Type**.
A sub-menu appears.
3. Click the **Search** option from the **Reconciliation Type** sub-menu.
The **Reconciliation Type** screen appears.
4. In the **Reconciliation Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the reconciliation type whose details you want to edit.

The **Reconciliation Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the reconciliation type.
- **Algorithms** - Used to associate algorithms with the reconciliation type.
- **Characteristics** - Used to define the characteristics for the reconciliation type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------------|---|-----------------------|
| Reconciliation Type | Displays the reconciliation type. | Not applicable |
| Business Object | Indicates the reconciliation type business object using which you are defining the reconciliation type. | Not applicable |
| Reconciliation Business Object | Used to indicate the business object using which you want to create the reconciliation. | Yes |
| Description | Used to specify the description for the reconciliation type. | Yes |
| Detailed Description | Used to specify additional information about the reconciliation type. | No |
| Status | Used to indicate the status of the reconciliation type. The valid values are: <ul style="list-style-type: none"> • Active | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|-----------------------|
| | <ul style="list-style-type: none"> Inactive | |

Tip: Alternatively, you can edit the details of a reconciliation type by clicking the **Edit** button in the **Reconciliation Type** zone.

- Modify the required details in the **Main** section.
- Associate or remove an algorithm from the reconciliation type, if required.
- Define, edit, or remove characteristics of the reconciliation type, if required.
- Click **Save**.

The changes made to the reconciliation type are saved.

Deleting a Reconciliation Type

Procedure

To delete a reconciliation type:

- Click the **Admin** link in the **Application** toolbar.
A list appears.
- From the **Admin** menu, select **R** and then click **Reconciliation Type**.
A sub-menu appears.
- Click the **Search** option from the **Reconciliation Type** sub-menu.
The **Reconciliation Type** screen appears.
- In the **Reconciliation Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the reconciliation type that you want to delete.

A message appears confirming whether you want to delete the reconciliation type.

Note: You can delete a reconciliation type when you have not created a reconciliation using the reconciliation type.

Tip: Alternatively, you can delete a reconciliation type by clicking the **Delete** button in the **Reconciliation Type** zone.

- Click **OK**.

The reconciliation type is deleted.

Copying a Reconciliation Type

Instead of creating a reconciliation type from scratch, you can create a new reconciliation type using an existing reconciliation type. This is possible through copying a reconciliation type. On copying a reconciliation type, the details including the algorithms and characteristics are copied to the new reconciliation type. You can then edit the details, if required.

Prerequisites

To copy a reconciliation type, you should have:

- Reconciliation type (whose copy you want to create) defined in the application
- Reconciliation business objects defined in the application

Procedure

To copy a reconciliation type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **R** and then click **Reconciliation Type**.
A sub-menu appears.
3. Click the **Search** option from the **Reconciliation Type** sub-menu.
The **Reconciliation Type** screen appears.
4. In the **Reconciliation Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the reconciliation type whose copy you want to create.

The **Reconciliation Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the reconciliation type.
- **Algorithms** - Used to associate algorithms with the reconciliation type.
- **Characteristics** - Used to define the characteristics for the reconciliation type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------------------------|---|-----------------------|
| Reconciliation Type | Used to specify the reconciliation type. | Yes |
| Business Object | Indicates the reconciliation type business object using which you are defining the reconciliation type. | Not applicable |
| Reconciliation Business Object | Used to indicate the business object using which you want to create the reconciliation. | Yes |
| Description | Used to specify the description for the reconciliation type. | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|---|-----------------------|
| Detailed Description | Used to specify additional information about the reconciliation type. | No |
| Status | Used to indicate the status of the reconciliation type. The valid values are: <ul style="list-style-type: none"> Active Inactive | Yes |

Tip: Alternatively, you can copy a reconciliation type by clicking the **Duplicate** button in the **Reconciliation Type** zone.

- Enter the required details in the **Main** section.
- Associate or remove an algorithm from the reconciliation type, if required.
- Define, edit, or remove characteristics of the reconciliation type, if required.
- Click **Save**.

The new reconciliation type is defined.

Reconciliation (Used for Searching)

The **Reconciliation** screen allows you to search for a reconciliation using various search criteria. It contains the following zone:

- [Search Reconciliation](#) on page 2589

Through this screen, you can navigate to the following screen:

- [Reconciliation \(Used for Viewing\)](#) on page 2593

Search Reconciliation

The **Search Reconciliation** zone allows you to search for a reconciliation using various search criteria. This zone contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------------|--|-----------------------|
| Search By | Used to indicate whether you want to search for a reconciliation using the reconciliation, payee account, or payment tender details. The valid values are: <ul style="list-style-type: none"> • Reconciliation Details • Account Details • Payment Tender Details <p>Note: By default, the Reconciliation Details option is selected.</p> | Yes |
| Reconciliation ID | Used to search a particular reconciliation. <p>Note: This field appears when you select the Reconciliation Details option from the Search By list.</p> | No |
| Reconciliation Type | Used to search reconciliations which are created using a particular reconciliation type. <p>Note: This field appears when you select the Reconciliation Details option from the Search By list.</p> | No |
| Created From | Used to search reconciliations which are created from a particular date onwards. <p>Note: This field appears when you select the Reconciliation Details option from the Search By list.</p> | No |
| Status | Used to search reconciliations with a particular status. The valid values are: | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------|--|---|
| | <ul style="list-style-type: none"> • Canceled • Completed • Draft • Initial Reconciliation in Progress • Open • Pending Cancelation • Pending • Pending Reconciliation • Reconciliation in Progress <p>Note: This field appears when you select the Reconciliation Details option from the Search By list.</p> | |
| Created Until | <p>Used to search reconciliations which are created till a particular date.</p> <p>Note: This field appears when you select the Reconciliation Details option from the Search By list.</p> | No |
| File Name | <p>Used to search a reconciliation which is created for a particular pay instruction file.</p> <p>Note: This field appears when you select the Reconciliation Details option from the Search By list.</p> | No |
| Person Name | <p>Used to search reconciliations which contain a particular member's pay instructions.</p> <p>Note: This field appears when you select the Account Details option from the Search By list.</p> | No |
| Account Identifier Type | <p>Used to select the identifier type based on which you want to search reconciliations which contain pay instructions for a particular payee account.</p> <p>Note: This field appears when you select the Account Details option from the Search By list.</p> | Yes (Conditional) Note: If you specify the account identifier as a search criteria, you have to select the account identifier type. |
| Account ID | <p>Used to search reconciliations which contain pay instructions for a particular payee account.</p> <p>Note: This field appears when you select the Account Details option from the Search By list.</p> | No |
| Account Identifier | <p>Used to specify the value for the account identifier type.</p> <p>Note: This field appears when you select the Account Details option from the Search By list.</p> | Yes (Conditional) |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------|--|---|
| | | Note: If you specify the account identifier type as a search criteria, you have to specify the account identifier. |
| Check Number | Used to search a reconciliation associated with a payment tender which is received through a particular check. | No |
| | Note: This field appears when you select the Payment Tender Details option from the Search By list. | |
| Payor Account ID | Used to search reconciliations which are associated with a particular payor account. | No |
| | Note: This field appears when you select the Payment Tender Details option from the Search By list. | |
| MICR ID | Used to search a reconciliation associated with a payment tender which contains a particular MICR code. | No |
| | Note: This field appears when you select the Payment Tender Details option from the Search By list. | |
| Tender Amount | Used to search reconciliations associated with payment tenders with a particular amount. | No |
| | Note: This field appears when you select the Payment Tender Details option from the Search By list. | |

Note: You must specify at least one search criterion while searching for a reconciliation.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|----------------------------|--|
| Creation Date Time | Displays the date and time when the reconciliation is created in the system. |
| Reconciliation Information | Displays information about the reconciliation. |
| | Note: It has a link. On clicking the link, the Reconciliation screen appears where you can view the details of the respective reconciliation. |
| Status | Indicates the status of the reconciliation. The valid values are: <ul style="list-style-type: none"> • Canceled • Completed • Draft • Initial Reconciliation in Progress • Open • Pending Cancellation |

| Column Name | Column Description |
|------------------|--|
| | <ul style="list-style-type: none"> • Pending • Pending Reconciliation • Reconciliation in Progress |
| Payor Account ID | <p>Indicates the payor account to which the reconciliation is associated.</p> <p>Note: It has a link. On clicking the link, the Account screen appears where you can view the details of the respective payor account.</p> |
| Payment ID | <p>Indicates the payment to which the reconciliation is associated.</p> <p>Note: It has a link. On clicking the link, the Payment screen appears where you can view the details of the respective payment.</p> |
| File Name | Indicates the pay instruction file for which the reconciliation is created in the system. |
| Duplicate | <p>Used to create a new reconciliation using an existing reconciliation.</p> <p>Note: The Duplicate button appears when the reconciliation is in the Canceled status.</p> |

Searching for a Reconciliation

Prerequisite

To search for a reconciliation, you should have:

- Reconciliation types and account identifier types defined in the application.

Procedure

To search for a reconciliation:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Reconciliation**.
The **Reconciliation** screen appears.
3. Enter the search criteria in the **Search Reconciliation** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of reconciliations that meet the search criteria appears in the **Search Results** section.

Viewing the Reconciliation Details**Procedure**

To view the details of a reconciliation:

1. Search for the reconciliation in the **Reconciliation** screen.
2. In the **Search Results** section, click the link in the **Reconciliation Information** column corresponding to the reconciliation whose details you want to view.
The **Reconciliation** screen appears.
3. Ensure that the **Main** tab is selected.
4. View the details of the reconciliation in the **Reconciliation** zone.
5. View the list of pay instructions uploaded through the file in the **Pay Instructions** zone.

| Reconciliation - Main screen | Reconciliation (Used for Viewing) on page 2593 |
| Reconciliation - Main zone | Reconciliation on page 2594 |

Reconciliation - Main

The **Main** tab displays information about the reconciliation. It contains the following zones:

- [Reconciliation](#) on page 2594

Reconciliation

The **Reconciliation** zone displays the details of the reconciliation. It contains the following sections:

- **Main** - Displays basic information about the reconciliation. It contains the following fields:

| Field Name | Field Description |
|----------------------------|---|
| Reconciliation Information | Displays information about the reconciliation. |
| Reconciliation Type | Indicates the reconciliation type using which the reconciliation is created. Note: It has a link. On clicking the link, the Reconciliation Type screen appears where you can view the details of the reconciliation type. |
| Status | Indicates the status of the reconciliation. The valid values are: <ul style="list-style-type: none"> • Canceled • Completed • Draft • Initial Reconciliation in Progress • Open • Pending Cancellation • Pending • Pending Reconciliation • Reconciliation in Progress |
| Status Reason | Indicates the reason why the status of the reconciliation is changed. Note: This field appears when the reconciliation is in the Pending Cancellation or Canceled status. |
| File Name | Indicates the pay instruction file for which the reconciliation is created in the system. |
| Payment Information | Indicates the payment to which the reconciliation is associated. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |

| Field Name | Field Description |
|---------------------|--|
| | <p>Note:</p> <p>It has a link. On clicking the link, the Payment screen appears where you can view the details of the respective payment.</p> <p>This field does not appear when the reconciliation is in the Draft or Pending status.</p> |
| Account Information | <p>Indicates the payor account to which the reconciliation is associated.</p> <p>Note: This field does not appear when the reconciliation is in the Draft or Pending status.</p> |

- **Characteristics** - Lists the characteristics defined for the reconciliation. It contains the following columns:

| Column Name | Column Description |
|----------------------|---|
| Effective Date | Displays the date from when the characteristic is effective for the reconciliation. |
| Characteristic Type | Indicates the characteristic type. |
| Characteristic Value | Displays the value of the characteristic type. |
| Description | <p>Displays the description of the characteristic value.</p> <p>Note: The data appears in this column when the type of characteristic value is set to Predefined Value or Foreign Key Value.</p> |

- **Pay Instruction Statistics** - Lists the statistics of records in the reconciliation. It contains the following fields:

| Field Name | Field Description |
|-------------------------|---|
| Total Records | Displays total number of records in the reconciliation file. |
| Total Records Processed | Displays the count of data records derived after processing. |
| Total Records Cancelled | Displays the count of data records derived after unsuccessful processing. |
| Total Records in Error | Displays the count of data records in error status. |
| Total Records Pending | Displays the count of data records pending after successful derivation. |
| Total Records in Open | Displays the count of data records in open status. |

- **Record Actions** - This section contains the following buttons:

| Button Name | Button Description |
|-------------|--|
| Edit | <p>Used to edit the details of the reconciliation.</p> <p>Note: The Edit button appears when the reconciliation is in the Pending or Draft status.</p> |
| Delete | <p>Used to delete the reconciliation.</p> <p>Note: The Delete button appears when the reconciliation is in the Pending or Draft status.</p> |

| Button Name | Button Description |
|---------------------------|--|
| Submit for Reconciliation | Used to submit the pay instructions for reconciliation. |
| | Note: The Submit for Reconciliation button appears when the reconciliation is in the Pending status. |
| Cancel | Used to cancel the reconciliation. |
| | Note: The Cancel button appears when the reconciliation is in the Completed or Open status. |
| Reconcile | Used to reconcile the pay instructions in the reconciliation. |
| | Note: The Reconcile button appears when the reconciliation is in the Pending Reconciliation status. |
| Revert to Pending | Used to revert the status of the reconciliation to Pending . |
| | Note: The Revert to Pending button appears when the reconciliation is in the Pending Reconciliation status. |

- **Record Information** - This section contains the following fields:

| Field Name | Field Description |
|--------------------|---|
| Business Object | Indicates the business object using which the reconciliation is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. |
| | Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Status Date Time | Displays the date and time when the reconciliation status is updated. |
| Creation Date Time | Displays the date and time when the reconciliation is created. |

Reconciliation - Pay Instruction

The **Pay Instruction** tab allows you to search for a pay instruction using various search criteria. It contains the following zone:

- [Pay Instructions](#) on page 2596

Pay Instructions

The **Pay Instructions** zone allows you to search for a pay instruction using various search criteria. This zone contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|---|-----------------------|
| Account ID | Used to search pay instructions for a particular payee account. | No |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------|--|-----------------------|
| | Note: The Search (🔍) icon appears corresponding to the Account ID field. On clicking the Search icon, the Account Search screen appears. | |
| Policy Number | Used to search pay instructions with a particular policy number. | No |
| Member Identifier Type | Used to search pay instructions with a particular member identifier type. | No |
| Member Identifier | Used to search pay instructions with a particular member identifier. | No |
| Coverage Start Date | Used to search pay instructions which are created from a particular date. | No |
| Coverage End Date | Used to search pay instructions which are created till a particular date. | No |
| Amount From | Used to search pay instructions with a particular minimum amount. | No |
| Amount To | Used to search pay instructions with a particular minimum amount. | No |
| Status | Used to search pay instructions with a particular status. The valid values are: <ul style="list-style-type: none"> • Canceled • Complete • Derivation Pending Processing • Error • Open • Pending • Reconciliation Pending Processing | No |

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|-------------------------|---|
| Account Identifier Type | Displays the account identifier type of the member. |
| Account Identifier | Displays the value for the account identifier type. |
| Account ID | Displays the account ID of the member. Note: It has a link. On clicking the link, the Account screen appears with the details of the respective account. |
| Policy Number | Displays the policy number of the member. |
| Plan Number | Displays the plan number of the member. |
| Member Identifier Type | Displays the member identifier type of the member. |

| Column Name | Column Description |
|---------------------|--|
| Member Identifier | Displays the member identifier of the member. |
| Member Name | Displays the member name of the member. |
| Coverage Start Date | Displays the date of the policy from where the coverage starts. |
| Coverage End Date | Displays the coverage end date of the policy till where the coverage ends. |
| Amount | Displays the amount that has to be paid to the member. |
| Open Amount | Displays the amount which has not been paid to the member and is still in the open state. |
| Status | Displays the status of the pay instruction. The valid values are: <ul style="list-style-type: none"> • Canceled • Complete • Derivation Pending Processing • Error • Open • Pending • Reconciliation Pending Processing |
| Pay Instruction ID | Displays the pay instruction ID. |

Note: Pagination is used to display limited number of records in this zone. You can use the navigation buttons, such as **Previous** and **Next** to navigate between pages.

On clicking the **View** () icon corresponding to an **Account Identifier Type** column, the **Pay Instruction** screen appears with the details of the respective pay instruction record.

You can filter the list using various search criteria (such as, **Account ID**, **Policy Number**, **Member Identifier Type**, **Member Identifier**, **Coverage Start Date**, **Coverage End Date**, **Amount From**, **Amount To**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

Defining a Characteristic for a Reconciliation

Prerequisites

To define a characteristic for a reconciliation, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Reconciliation**)

Procedure

To define a characteristic for a reconciliation:

1. Ensure that the **Characteristics** section is expanded when you are editing a reconciliation.

The **Characteristics** section contains the following fields:

2. Enter the required details in the **Characteristics** section.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

The **Reconciliation** screen appears.

3. If you want to define more than one characteristic for the reconciliation, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the reconciliation, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Search**.

A list of reconciliation files that meet the search criteria appear in the **Search Results** section.

5. In the **Search Results** section, click the link in the **Reconciliation Information** column corresponding to the status column.

The **Reconciliation** screen appears.

6. Click **Edit** button from **Record Actions** section.

The **Member Reconciliation** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details of the reconciliation.
- **Characteristics** - Used to specify the characteristics for the reconciliation. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|-----------------------|
| Effective Date | Used to specify the date from when the characteristic is effective for the reconciliation. | Yes |
| Characteristic Type | Used to indicate the characteristic type. | Yes |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Reconciliation . | |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | |

Canceling a Reconciliation

Prerequisites

To cancel a reconciliation, you should have:

- Cancellation reasons defined in the application.

Note: While cancelling a reconciliation, you need to specify the reason why you want to cancel the reconciliation. You can select the appropriate cancellation reason when you have defined the reasons for the **Canceled** status of the **C1-MemberReconciliation** business object in the **Status Reason** screen.

Procedure

To cancel a reconciliation:

1. Search for the reconciliation in the **Reconciliation** screen.
2. In the **Search Results** section, click the link in the **Reconciliation Information** column corresponding to the reconciliation that you want to cancel.

The **Reconciliation** screen appears.

- [Reconciliation - Main](#) on page 2594
- [Pay Instructions](#) on page 2596
- [Reconciliation - Log](#) on page 2598

3. Click the **Cancel** button in the **Reconciliation** zone.

The **Status Reason** window appears. It contains following field:

:

| Field Name | Field Description | Mandatory (Yes or No) |
|---------------|--|-----------------------|
| Status Reason | Used to indicate the reason why you want to cancel the reconciliation. | Yes |

Note: The **Cancel** button appears when the reconciliation is in the **Open** or **Completed** status.

4. Select the cancellation status reason from the **Status Reason** list.
5. Click **Save**.

The status of the reconciliation is changed to **Cancelled**.

Searching for a Pay Instruction

Prerequisite

To search for a pay instruction, you should have:

- Pay instruction statuses and member identifier types defined in the application.

Procedure

To search for a pay instruction:

1. Search for the reconciliation in the **Reconciliation** screen.

2. In the **Search Results** section, click the link in the **Reconciliation Information** column corresponding to the reconciliation whose details you want to view.
The **Reconciliation** screen appears.
3. Ensure that the **Pay Instruction** tab is selected.
The **Pay Instruction** screen appears.
4. Enter the search criteria in the **Pay Instruction** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of pay instruction that meet the search criteria appears in the **Search Results** section.

Viewing the Pay Instruction Details

Procedure

To view the details of a pay instruction:

1. Search for a reconciliation in the **Reconciliation** screen.
2. In the **Search Results** section, click the link in the **Reconciliation Information** column corresponding to the reconciliation whose pay instruction details you want to view.
The **Reconciliation** screen appears.
3. The **Reconciliation** screen consists of the following tabs:
 - [Reconciliation - Main](#) on page 2594
 - [Pay Instructions](#) on page 2596
 - [Reconciliation - Log](#) on page 2598
4. Click the **Pay Instruction** tab.
The **Pay Instruction** tab appears.
5. Enter the search criteria in the **Pay Instructions** zone.
6. Click **Search**.
A list of pay instruction that meet the search criteria appears in the **Search Results** section.
7. In the **Search Results** section, click the **View** () icon corresponding to the **Account Identifier Type** column.
The **Pay Instruction** screen appears.
8. Ensure that the **Main** tab is selected.
9. View the details of the pay instruction in the **Pay Instruction** zone.

Pay Instruction

The **Pay Instruction** screen displays detailed information of a pay instruction which is the part of reconciliation:

- View the details and characteristics of the pay instruction
- View the details of the reconciliation adjustments
- View the related objects

This screen contains of the following tabs:

- [Pay Instruction - Main](#) on page 2606
- [Pay Instruction - Log](#) on page 2609

Pay Instruction - Main

The **Pay Instruction - Main** tab displays information about the pay instruction. It contains the following zones:

- [Pay Instruction](#) on page 2606
- [Reconciliation Adjustments](#) on page 2608
- [Related Objects](#) on page 2608

Pay Instruction

The **Pay Instruction** zone lists payment related information that is specific to each member. It contains the following sections:

- **Main** - This section provides information about the pay instruction. It contains the following fields:

| Field Name | Field Description |
|-----------------------------|--|
| Pay Instruction Information | Displays the details of pay instruction in brief. |
| Reconciliation Information | Displays the details of the reconciliation. |
| Status | Displays the status of the pay instruction. |
| Coverage Start Date | Displays the date of the policy from where the coverage starts. |
| Coverage End Date | Displays the coverage end date of the policy till where the coverage ends. |
| Account Identifier Type | Displays the account identifier type of the member. |
| Account Identifier | Displays the value for the account identifier type. |
| Account ID | Displays the account ID of the member. |
| Policy Number | Displays the policy number of the member. |

| Field Name | Field Description |
|----------------------------|---|
| Plan Number | Displays the plan number of the member. |
| Member Identifier Type | Displays the member identifier type of the member. |
| Member Identifier | Displays the member identifier of the member. |
| Member Name | Displays the member name of the member. |
| Payment Instruction Amount | Displays the amount that has to be paid to the member. |
| Open Amount | Displays the amount which has not been paid to the member and is still in the open state. |

- **Pay Instruction Amount** -This section provides information on the pay instruction amount. It contains the following fields:

| Field Name | Field Description |
|----------------------------|---|
| Payment Instruction Amount | Displays the amount that has to be paid to the member. |
| Open Amount | Displays the amount which has not been paid to the member and is still in the open state. |

- **Record Information** - This section provides information on the pay instruction business object. It contains the following fields:

| Field Name | Field Description |
|--------------------|--|
| Business Object | Indicates the business object using which the pay instructions are executed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Status Date Time | Displays the date and time when the pay instruction object status is updated. |
| Creation Date Time | Displays the date and time when the pay instruction object is created. |

- **Characteristics** - This section provides characteristic information for the pay instruction.

| Field Name | Field Description |
|----------------------|--|
| Characteristic Type | Displays the characteristic type. |
| Characteristic Value | Displays the value of characteristic type. |
| Description | Displays the description of the characteristic type. |

Reconciliation Adjustments

The **Reconciliation Adjustments** zone displays the adjustment information for each pay instruction. It contains the following fields:

| Column Name | Column Description |
|-----------------------------------|--|
| Transfer Adjustment | Indicates the amount to be transferred from a reconciliation contract against a pay instruction. |
| | Note: It has a link. On clicking the link, the Adjustment screen appears where you can view the details of the transferred adjustment. |
| Transfer Type | Displays the type of transfer transaction made against a pay instruction or an internal offsetting. |
| Transfer Financial Transaction ID | Displays the transfer financial transaction ID. |
| Offset Adjustment | Indicates a reciprocal adjustment that is associated with a transfer adjustment. |
| | Note: It has a link. On clicking the link, the Adjustment screen appears where you can view the offset adjustment details. |
| Related Object Type | Displays the related object type whether it is pay instruction / financial transaction. |
| Related Object ID | Indicates the ID of the related pay instruction / financial transaction created in reconciliation process.. |
| | Note: It has a link. On clicking the link, the Financial Transaction screen appears where you can view the details of the financial transaction of reconciliation adjustments. |

Note: Pagination is used to display limited number of records in the **Reconciliation Adjustments** zone. By default, 10 records are displayed in this zone. You can use the navigation links, such as Previous and Next to navigate between pages.

You can filter the adjustments using **Show All Adjustments** available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of the **Reconciliation Adjustments** zone.

Related Objects

The **Related Objects** zone displays all those business objects based on which reconciliation process takes place. It contains the following fields:

| Column Name | Column Description |
|----------------------------|--|
| Related Object Type | Displays the related object type that was used in pay instruction process. |
| Related Object Information | Displays the details of related object in brief. |

Note: Pagination is used to display limited number of records in the **Related Topics** zone. By default, 10 records are displayed in this zone. You can use the navigation links, such as Previous and Next to navigate between pages.

Pay Instruction - Log

The **Pay Instruction - Log** tab contains the following zone:

- [Pay Instruction Log](#) on page 2609

Pay Instruction Log

The **Pay Instruction Log** zone lists the complete trail of actions performed on the pay instructions. It contains the following columns:

| Column Name | Column Description |
|--------------------|--|
| Creation Date Time | Displays the date and time when the action was performed on the pay instruction. |
| Details | Displays the details about the action performed on the pay instruction. |
| User | Indicates the user who has performed the action on the pay instruction. |
| Log Type | Indicates the type of log. |
| Related Object | Indicates the object or entity which is generated when the action is performed on the pay instruction. |
| Status Reason | Displays the status reason of action performed on the pay instruction. |

Note: You can manually add a log entry for the pay instruction by clicking the **Add Log Entry** link in the upper right corner of the **Pay Instruction Log** zone.

Defining a Discrepancy Report Type

Prerequisites

To define a discrepancy report type, you should have:

- **C1-DiscrepancyReport** Business object defined for discrepancy report.
- Characteristic Type defined for the discrepancy report.

Procedure

To define a discrepancy report type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **D**, and then click **Discrepancy Report Type**.
The sub-menu appears.
3. Click the **Add** option from the **Discrepancy Report Type** .

The **Select Business Object** screen appears. It contains the following field:

| Field Name | Field Description | Mandatory (Yes or No) |
|---|---|-----------------------|
| Discrepancy Report Type Business Object | Indicates the discrepancy report type business object used to create a discrepancy report type. | Yes |

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Discrepancy Report Type** screen.

Note: The **Select Business Object** screen appears when there are multiple discrepancy report type business objects defined in the application. If there is only one discrepancy report type business object defined in the application, the **Discrepancy Report Type** screen appears.

4. Select the business object depending on whether you want to create a discrepancy report type.
5. Click **OK**.

The **Discrepancy Report Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the discrepancy report type.
- **Characteristics** - Used to define the characteristics for the discrepancy report type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------------------|---|-----------------------|
| Discrepancy Report Type | Used to specify the discrepancy report type. | Yes |
| Business Object | Indicates the discrepancy report type business object using which you are defining the discrepancy report type | Not applicable |
| Discrepancy Report Business Object | Used to indicate the business object using which you want to create the discrepancy report. | Yes |
| Description | Used to specify the description for the discrepancy report type. | Yes |
| Detailed Description | Used to specify additional information about the discrepancy report type. | No |
| Status | Used to indicate the status of the discrepancy report type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |

6. Enter the required details in the **Main** section.
7. Define characteristics for the discrepancy report type, if required.
8. Click **Save**.

The discrepancy report type is defined.

Defining a Characteristic for a Discrepancy Report Type

Prerequisites

To define a characteristic for a discrepancy report type, you should have:

- Characteristic Types defined in the application (where the characteristic entity is set to **Discrepancy Report Type**).

Procedure

To define a characteristic for a discrepancy report type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a discrepancy report type.

The **Characteristics** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|----------------------|--|---|
| Characteristic Type | Used to indicate the characteristic type. | Yes (Conditional) |
| | Note: The list includes only those characteristic types where the characteristic entity is set to Discrepancy Report Type . | Note: This field is required when you are defining a characteristic for the discrepancy report type. |
| Characteristic Value | Used to specify the value for the characteristic type. | Yes (Conditional) |
| | Note: On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field. | Note: This field is required when you are defining a characteristic for the discrepancy report type. |

2. Enter the required details in the **Characteristics** section.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the discrepancy report type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the discrepancy report type, click the **Delete** (🗑️) icon corresponding to the characteristic.

Editing a Discrepancy Report Type

Prerequisites

To edit a discrepancy report type, you should have:

- **C1-DiscrepancyReport** Business object defined for discrepancy report.
- Characteristic Type defined for the discrepancy report.

Procedure

To edit a discrepancy report type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **D** and then click **Discrepancy Report Type**.

A sub-menu appears.

- Click the **Search** option from the **Discrepancy Report Type** sub-menu.

The **Discrepancy Report Type** screen appears.

- In the **Discrepancy Report Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the discrepancy report type whose details you want to edit.

The **Discrepancy Report Type** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the discrepancy report type.
- Characteristics** - Used to define the characteristics for the discrepancy report type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------------------|--|-----------------------|
| Discrepancy Report Type | Displays the discrepancy report type. | Not applicable |
| Business Object | Indicates the discrepancy report type business object used while defining the discrepancy report type. | Not applicable |
| Discrepancy Report Business Object | Used to indicate the business object using which you want to create the discrepancy report. | Yes |
| Description | Used to specify the description for the discrepancy report type. | Yes |
| Detailed Description | Used to specify additional information about the discrepancy report type. | No |
| Status | Used to indicate the status of the discrepancy report type. The valid values are: <ul style="list-style-type: none"> Active Inactive | No |

Tip: Alternatively, you can click the **Edit** button in the **Discrepancy Report Type** zone to edit the details of the discrepancy report type.

- Modify the required details in the **Main** section.
- Define, edit, or remove characteristics of the discrepancy report type, if required.
- Click **Save**.

The changes made to the discrepancy report type are saved.

Deleting a Discrepancy Report Type

Procedure

To delete a discrepancy report type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **D** and then click **Discrepancy Report Type**.
The sub-menu screen appears.
3. Click the **Search** option from the **Discrepancy Report Type** sub-menu.
The **Discrepancy Report Type** screen appears.
4. In the **Discrepancy Report Type List** zone, click the **Delete** () icon corresponding to the discrepancy report type that you want to delete.
A message appears confirming whether you want to delete the discrepancy report type.

Note: You can delete a discrepancy report type when you have not created a discrepancy report using the discrepancy report type.

Tip: Alternatively, you can click the **Delete** button in the **Discrepancy Report Type** zone to delete the discrepancy report type

5. Click **OK** .
The discrepancy report type is deleted.

Copying a Discrepancy Report Type

Prerequisites

To copy a discrepancy report type, you should have:

- **C1-DiscrepancyReport** Business object defined for discrepancy report.
- Characteristic Type defined for the discrepancy report.

Instead of creating a discrepancy report type from scratch, you can create a new discrepancy report type using an existing discrepancy report type. This is possible through copying a discrepancy report type. On copying a discrepancy report type, the details including the characteristics are copied to the new discrepancy report type. You can then edit the details, if required.

Procedure

To copy a discrepancy report type:

1. Click the **Admin** link in the **Application** toolbar.
A list appears.
2. From the **Admin** menu, select **D** and then click **Discrepancy Report Type**.
The sub-menu appears.
3. Click the **Search** option from the **Discrepancy Report Type** sub-menu.
The **Discrepancy Report Type** screen appears.
4. In the **Discrepancy Report Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the discrepancy report type whose copy you want to create.

The **Discrepancy Report Type** screen appears. It contains the following sections:

- **Main** - The main section contains the following fields:
- **Characteristics** - Used to define the characteristics for the discrepancy report type.

The **Main** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|------------------------------------|---|-----------------------|
| Discrepancy Report Type | Used to specify the discrepancy report type | Not applicable |
| Business Object | Indicates the discrepancy report type business object using which you are defining the discrepancy report type. | Not applicable |
| Discrepancy Report Business Object | Used to indicate the business object using which you want to create the discrepancy report. | Yes |
| Description | Used to specify the description for the discrepancy report type. | Yes |
| Detailed Description | Used to specify additional information about the discrepancy report type. | No |
| Status | Indicates the status of discrepancy report type. The valid values are: <ul style="list-style-type: none"> • Active • Inactive | Yes |

Tip: Alternatively, you can create a copy of the **Discrepancy Report Type** zone to create a copy of the discrepancy report type.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove characteristics of the discrepancy report type, if required.
7. Click **Save**.

The new discrepancy report type is defined.

Search Discrepancy Report

The **Search Discrepancy Report** zone allows you to search for a discrepancy report using various search criteria. It contains the following two sections:

Search Criteria - The **Search Criteria** section contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------|---|-----------------------|
| Search By | Used to indicate whether you want to search for a discrepancy report using the discrepancy or account details. The valid values are: <ul style="list-style-type: none"> • Discrepancy Details • Account Details | Yes |
| | Note: By default, the Discrepancy Details option is selected | |
| Discrepancy Report ID | Used to search a particular discrepancy report.. | No |
| | Note: This field appears when you select the Discrepancy Details option from the Search By list. | |
| Discrepancy Report Type | Used to indicate the levels at which the discrepancy report is generated. It has following options: <ul style="list-style-type: none"> • Account Level • File Level | No |
| | Note: This field appears when Discrepancy Details is selected from the Search By list. | |

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------|---|-----------------------|
| Status | Used to search a particular discrepancy reports with a particular status. The valid values are: <ul style="list-style-type: none"> Completed Draft Pending | No |
| | Note: This field appears when you select the Discrepancy Details option from the Search By list. | |
| File Name | Used to specify the filename that is provided when a discrepancy report is created at file level. | No |
| | Note: This field appears when you select the Discrepancy Details option from the Search By list. | |
| Created From | Used to search discrepancy reports which are created from a particular date onwards. | No |
| | Note: This field appears when you select the Discrepancy Details option from the Search By list. | |
| Created To | Used to search for discrepancy report which is created till a particular date. | No |
| | Note: This field appears when you select the Discrepancy Details option from the Search By list. | |
| Person Name | Used to search discrepancy reports through which a particular person's record is created or updated in the system. | No |
| | Note: This field appears when you select the Account Details option from the Search By list. | |
| Account Identifier Type | Used to select the identifier type based on which you want to search discrepancy reports through which the account details are created or updated in the system. <ul style="list-style-type: none"> Account Name Base Global Account ID Bill Group Identifier Demo Bank Account Number External Account Identifier Flexcube Account ID International Bank Account Number | Yes (Conditional) |
| | Note: If you specify the account identifier as a search criteria, you have to select the account identifier type. | |
| Account Identifier | Used to specify the value for the account identifier type. | Yes (Conditional) |

| Field Name | Field Description | Mandatory (Yes or No) |
|------------|--|---|
| | Note: This field appears when Account Details is selected from the Search By list. | Note: If you specify the account identifier type as a search criteria, you have to specify the account identifier. |
| Account ID | Used to search discrepancy reports that are created by a particular user. Note: This field appears when you select the Account Details option from the Search By list. | No |

Note: You must specify at least one search criterion while searching for a discrepancy report.

Search Results - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

| Column Name | Column Description |
|--------------------------------|---|
| Creation Date Time | Displays date and time when the discrepancy report was created. |
| Discrepancy Report Information | Displays information about the discrepancy report. Note: It has a link. On clicking the link, the Discrepancy Report screen appears where you can view the details of the respective discrepancy report. |
| Status | Indicates the status of the discrepancy report. The valid values are: <ul style="list-style-type: none"> • Pending • Draft • Completed |
| Account ID | Displays the account ID of the person who created the discrepancy report. |
| File Name | Displays the filename given when discrepancy report is created at file level. |

Searching for a Discrepancy Report

Prerequisites

To search for a discrepancy report, you should have:

- **C1-DiscrepancyReport** Business object defined for discrepancy report.
- Discrepancy Report Type defined for discrepancy report.
- Status defined for discrepancy report.

Procedure

To search for a discrepancy report:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Menu** menu, select **Accounting and Receivable** and then click **Discrepancy Report**.
A sub-menu appears.
3. Click the **Search** option from the **Discrepancy Report** sub-menu.
The **Discrepancy Report** screen appears.
4. Enter the search criteria in the **Search Discrepancy Report** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of discrepancy reports that meet the search criteria appear in the **Search Results** section.

Creating a Discrepancy Report**Prerequisites**

To create a discrepancy report, you should have:

- Discrepancy Report Type defined in the application.
- Report Level defined in the application.

Procedure

To create a discrepancy report:

1. Click the **Menu** link in the **Application** toolbar.
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Discrepancy Report**.
A sub-menu appears.
3. Click the **Add** option from the **Discrepancy Report** sub-menu.

The **Discrepancy Report** screen appears. It contains the following fields:

| Field Name | Field Description | Mandatory (Yes or No) |
|-------------------------|---|-----------------------|
| Discrepancy Report Type | Used to indicate the discrepancy report type that you want to use to create the discrepancy report. The valid values are: <ul style="list-style-type: none"> • Discrepancy Report Type | Yes |

| Field Name | Field Description | Mandatory (Yes or No) |
|--------------|---|---|
| | <ul style="list-style-type: none"> File Discrepancy Report Type | |
| Report Level | Used to specify the level at which the discrepancy report is created. The valid values are: <ul style="list-style-type: none"> At Account Level At File Level | Yes |
| File Name | Used to specify a name for the file when report level is selected as At File Level . | Yes (Conditional) |
| | | Note: This field is required when the report level is selected as At File Level while creating a discrepancy report. |
| Account ID | Used to specify an account ID when report level is selected as At Account Level . | Yes (Conditional) |
| | | Note: This field is required when the report level is selected as At Account Level while creating a discrepancy report. |

Tip: Alternatively, you can access the **Select Discrepancy Report Type** screen by clicking the **Add** button in the **Page Title** area of the **Discrepancy Report** screen.

- Enter the required details.
- Click **Save**.

The **Discrepancy Report** is created.

- [Discrepancy Line Items](#) on page 2626

- [Discrepancy Line Item Related Objects](#) on page 2627
- [Discrepancy Line Items Characteristics Zone](#) on page 2627

Discrepancy Report

The **Discrepancy Report** zone displays the details of the discrepancy report. It contains the following sections:

- **Main** - Displays basic information about the discrepancy report. It contains the following fields:

| Field Name | Field Description |
|--------------------------------|--|
| Discrepancy Report Information | Displays information about the discrepancy report. |
| Discrepancy Report Type | Indicates the discrepancy report type using which the discrepancy report is created. Note: It has a link. On clicking the link, the Discrepancy Report Type screen appears where you can view the details of the discrepancy report type. |
| File Name | Displays the filename for which the discrepancy report is generated. |
| Account Information | Displays the details of the account for which discrepancy report is generated. |
| Status | Indicates the status of the discrepancy report. The valid values are: <ul style="list-style-type: none"> • Pending • Draft • Completed |

- **Record Actions** - This section contains the following buttons:

| Button Name | Button Description |
|-------------|---|
| Delete | Used to delete the discrepancy report. Note: The Delete button appears when the discrepancy report is in the Pending status. |
| Finalize | Used to finalize all the changes and process the discrepancy report. Note: Finalize button appears when the discrepancy report is in the Pending status. |

- **Record Information** - This section contains the following fields:

| Field Name | Field Description |
|--------------------|--|
| Business Object | Indicates the business object using which the discrepancy report is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. Note: It has a link. On clicking the link, the Business Object screen appears where you can view the details of the respective business object. |
| Status Date Time | Displays the date and time when the status of the discrepancy report was defined. |
| Creation Date Time | Displays the date and time when the discrepancy report was created. |

Discrepancy Line Items

The **Discrepancy Line Items** zone displays the details of the discrepancy report. It contains the following columns:

| Column Name | Column Description |
|------------------------|--|
| Account ID | Indicates the account for which the discrepancy line item is created. |
| | Note: This column appears when you select the discrepancy report information where the filename is provided. |
| Policy Number | Indicates the policy number. |
| Plan Number | Indicates the plan number of the policy. |
| Member Identifier Type | Displays the member identifier type. |
| Member Identifier | Displays the value of the member identifier type. |
| Member Name | Displays the name of the member to whom the discrepancy report belongs. |
| Coverage Start Date | Displays the date from when the coverage starts. |
| Coverage End Date | Displays the date till when the coverage ends. |
| Billed Amount | Displays the bill segment amount. |
| Paid Amount | Displays the paid amount of the bill. |
| Discrepancy Amount | Displays the discrepancy amount. |
| Discrepancy Category | Displays the discrepancy category. |
| Consumer Status | Displays the status of the consumer for its existence in the application. |
| Comments | Displays the comments, added for the discrepancy line items. |
| Edit | On clicking the Edit (✎) icon, the Discrepancy Line Item screen appears where you can edit the details of the discrepancy line item. |
| | Note: The Edit icon appears when the discrepancy report is in Pending or Draft status. |

Note:

On clicking the Broadcast (📡) icon corresponding to the discrepancy line item, the Discrepancy Line Item Related Objects and Discrepancy Line Item Characteristics zones appear.

You can filter the discrepancy line items using Discrepancy Category search criteria available in the Filter area. By default, the Filter area is hidden. You can view the Filter area by clicking the Filters (🔍) icon in the upper right corner of the Discrepancy Line Items zone.

Pagination is used to display limited number of records in the Search Results section. You can change the number of records displayed per page, if required. You can use the navigation links, such as Previous and Next to navigate between pages.

Editing a Discrepancy Line Item

Prerequisites

To edit a discrepancy line item, you should have:

- Discrepancy Line Item status as Pending or Draft.

Procedure

To edit a discrepancy line item:

1. Search for the discrepancy report in the **Discrepancy Report** screen.
2. In the **Search Results** section, click the link in the **Discrepancy Report Information** column corresponding to the discrepancy report, whose details you want to edit.

The **Discrepancy Report Information** screen appears.

3. In the **Discrepancy Line Items** zone, click the **Edit** (✎) icon in the **Edit** corresponding to the discrepancy line item whose details you want to edit.

The **Discrepancy Line Item** screen appears.

Note: The **Edit** icon appears when the discrepancy line item is in the **Pending** or **Draft** status.

The **Discrepancy Line Item** screen contains the following fields:
