U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are “commercial computer software” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Table of Contents

1. Preface	1-1
1.1 Intended Audience.....	1-1
1.2 Documentation Accessibility	1-1
1.3 Access to Oracle Support.....	1-1
1.4 Structure	1-1
1.5 Related Information Sources	1-1
2. Adding a New Report.....	2-2

1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

The subsequent chapters describes following details:

- Introduction
- Preferences & Database
- Configuration / Installation.

1.5 Related Information Sources

For more information on Oracle Banking Digital Experience Patchset Release 22.2.1.0.0, refer to the following documents:

- Oracle Banking Digital Experience Installation Manuals

2. Adding a New Report

1. Create UI component with required criteria fields for that new report. This criteria fields will be available once the report is selected from drop down. Currently each report has 2 fields are common. (Report Name , Report Format)

The screenshot shows the 'Reports' section of the Futura Bank interface. The 'ADHOC' tab is selected. The 'Report Name' field is a dropdown menu currently showing 'Select Report Type'. Below the form are three buttons: 'Generate Report' (blue), 'Cancel' (grey), and 'Clear' (blue).

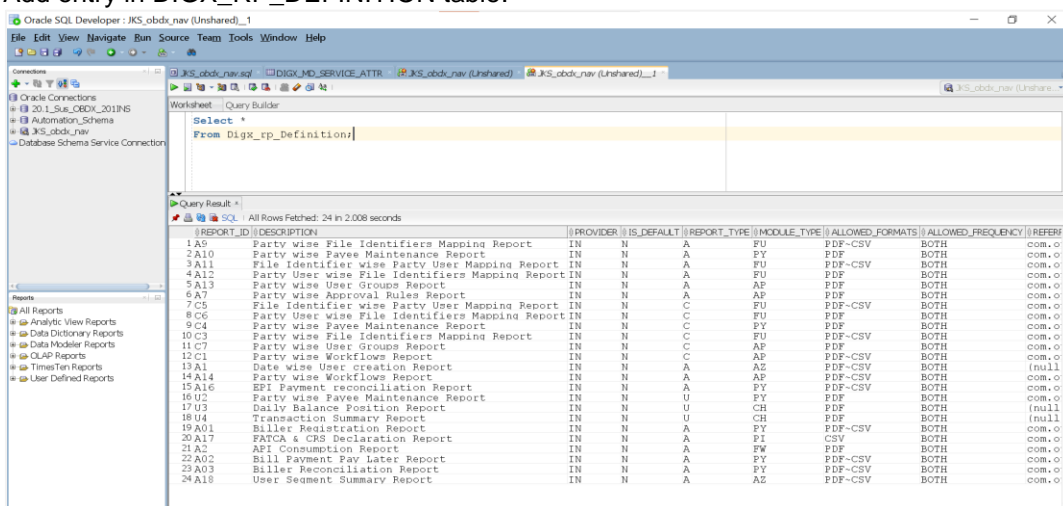

This screenshot shows the same 'Reports' page but with a report selected. The 'Report Name' dropdown is now 'Date wise User creation Report'. The 'Report Format' dropdown is 'Select Report Format'. The 'User Type' dropdown is 'Select'. A 'Duration' field with 'From' and 'To' date pickers is also present. On the right side, there is a 'Tips' box with a lightbulb icon and text explaining that adhoc reports can be generated for internal or customer-related reports, and that users need to select report name, frequency, duration, and format.

- > reports
- > api-consumption-report
- > bill-payment-report
- > biller-reconciliation-report
- > biller-registration-report
- > daily-balance-position-report
- > external-payment-report
- > fatca-compliance-declaration-report
- > fatca-compliance-declaration-status-report
- > META-INF
- > party-param-report
- > pending-approvals-report
- > report-generation
- > report-list
- > report-search
- > report-user-map
- > report-user-search

2. Add Entry **ParamsComponent_admin.json** for new report. This will pick up your new report component once it is selected from drop down.

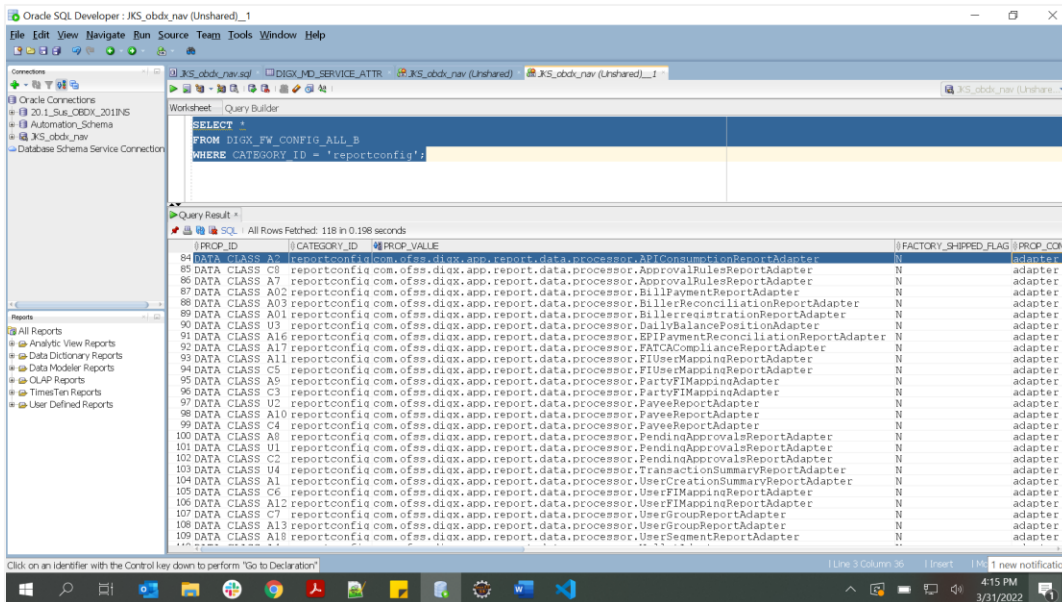

3. Add entry in **DIGX_RP_DEFINITION** table.

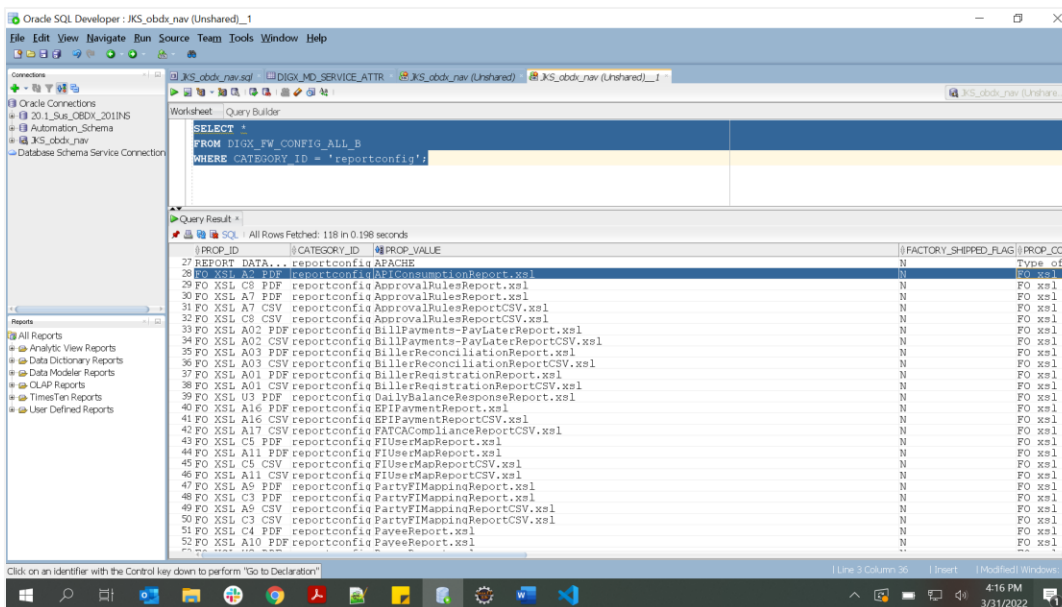

```

SELECT *
FROM DIGX_FW_CONFIG_ALL_B
WHERE CATEGORY_ID = 'reportconfig';
    
```

Add entry for adapter for IN-'Internal Report'

Add entry for XSL created for Internal Report

4. Add adapter with extension **AbstractReportDataGenerator** implements **IReportDataAdapter** and override **generateReport()** method

```

18
19 public class APIConsumptionReportAdapter extends AbstractReportDataGenerator implements IReportDataAdapter {
20
21     @Override
22     public byte[] generateReport(ReportRequestDomainDTO reportReqDTO) throws Exception {
23         byte[] dataByte = null;
24         IAdapterFactory adapterFactory = AdapterFactoryConfigurator.getInstance()
25             .getAdapterFactory(CommonAdapterFactoryConstants.API_CONSUMPTION_REPORT_ADAPTER_FACTORY);
26
27         IAPIConsumptionReportAdapter adapter = (IAPIConsumptionReportAdapter) adapterFactory
28             .getAdapter(CommonAdapterFactoryConstants.API_CONSUMPTION_REPORT_ADAPTER);
29         SessionContext sessionContext = (SessionContext) ThreadAttribute.get(ThreadAttribute.SESSION_CONTEXT);
30         APIAuditListRequestDTO listRequestDTO = new APIAuditListRequestDTO();
31
32         SimpleDateFormat sdf = new SimpleDateFormat("yyyy-MM-dd");
33
34         if (reportReqDTO.getParamMap().get("startDate") != null) {
35             listRequestDTO.setStartDate(new Date(sdf.parse(reportReqDTO.getParamMap().get("startDate").toString())));
36         }
37
38         if (reportReqDTO.getParamMap().get("endDate") != null) {
39             listRequestDTO.setEndDate(new Date(sdf.parse(reportReqDTO.getParamMap().get("endDate").toString())));
40         }
41         if (reportReqDTO.getParamMap().get("apiFrequency") != null) {
42             listRequestDTO.setFrequency(
43                 APIReportFrequency.valueOf(reportReqDTO.getParamMap().get("apiFrequency").toString());
44         }
45         if (reportReqDTO.getParamMap().get("partyId") != null) {
46             listRequestDTO.setPartyId(reportReqDTO.getParamMap().get("partyId").toString());
47

```

5. Use this adapter to work on parameter and get the data for report and provide data to applyXSLFO method.

```

ReportResponseDomainDTO repResp = new ReportResponseDomainDTO();
repResp.setDto(adapter.listAPIConsumption(sessionContext, listRequestDTO));

repResp.setParamMap(reportReqDTO.getParamMap());

dataByte = super.applyXSLFO(repResp, reportReqDTO, ReportResponseDomainDTO.class,
    APIAuditListResponseDTO.class);
return dataByte;
}

```

6. Once all the steps are done , Just map the report to your user and Start using it.
