U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are “commercial computer software” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Table of Contents

1. Preface	1-1
1.1 Intended Audience	1-1
1.2 Documentation Accessibility	1-1
1.3 Access to Oracle Support	1-1
1.4 Structure	1-1
1.5 Related Information Sources	1-1
2. Introduction	2-2
3. Coherence Cache	3-1
3.1 Multicast	3-1
3.2 Unicast	3-1
4. Caches other than Coherence	4-2
5. Using Database	5-1

1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

The subsequent chapters describes following details:

- Introduction
- Preferences & Database
- Configuration / Installation.

1.5 Related Information Sources

For more information on Oracle Banking Digital Experience Release 22.2.0.0.0, refer to the following documents:

- Oracle Banking Digital Experience Installation Manuals

2. Introduction

This document contains information on caching and related configurations to be done for OBDX.

3. Coherence Cache

Coherence cache is provided out the box in OBDX. Coherence uses TCMP protocol to discover cluster members, manage the cluster, provision services, and transmit data. It works on both multicast and unicast routings.

3.1 Multicast

Coherence by default uses multicast routing for communication. This is the default method for communication when using Coherence on OBDX as well.

In systems with ephemeral containers, multicast is the preferred option.

In cases where multicast routing is undesirable or not supported, unicast routing can be used.

3.2 Unicast

For enabling unicast routing for Coherence on OBDX, following changes needs to be done

- Replace [extend-client-config.xml](#) in digx-shared-libs.war/WEB-INF/classes with
- Replace [tangosol-coherence-override.xml](#) in **digx-coherence.war/WEB-INF/classes** with
- Add comma separated master servers' ip and ports in system properties (server start params in managed server in case of Weblogic)

```
-Dwka.list=<IP1:PORT1>,<IP2:PORT2>
```

- Run below query in db

```
Insert into digx_fw_config_all_b
(PROP_ID,CATEGORY_ID,PROP_VALUE,FACTORY_SHIPPED_FLAG,PROP_COMMENTS,SUMMARY_TEXT,CREATED_BY,CREATION_DATE,LAST_UPDATED_BY,
LAST_UPDATED_DATE,OBJECT_STATUS,OBJECT_VERSION_NUMBER,EDITABLE,CATEGORY_DESCRIPTION) values
('COHERENCE_CACHE_ADDRS','dayoneconfig',<IP1:PORT1>,<IP2:PORT2>,'Y','Coherence servers addresses','Coherence servers addresses','ofssuser',sysdate,'ofssuser',sysdate,'Y',1,'N',null);
```

Please replace IP and PORT with respective values. Please note that all PORT values by default will be 9099. This can be configured in the provided tangosol-coherence-override.xml. Also note that master members should be about 10% of the cluster.

4. Caches other than Coherence

OBDX can be customized to use other caches as well. This can be achieved by writing a custom java class implementing ***com.ofss.digx.infra.cache.ICache*** interface.

type method should return **CacheType.DISTRIBUTED** and priority should be kept greater than 1.

5. Using Database

In situations where cache is undesirable, database can be used in place of a dedicated cache mechanism.

For turning off distributed caching and switching to database, run the below script and take a restart

```
update digx_fw_config_all_b set PROP_VALUE='false' where  
PROP_ID='DISTRIBUTED_CACHE_ENABLED';
```
