# 1. Preface

## 1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

## 1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## 1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

## 2. Primary Elements

### 2.1 Grid

The application follows a responsive bootstrap grid system which allows upto 12 columns across the page. All the designs are created within and around the grid and breakpoints.

They have a minimum of 10px outer margin.

#### **Why 1200?**

The modern monitors (mostly wide-screen) support at least 1280 x 1024 pixel resolution.

1200 is divisible by 2, 3, 4, 5, 6, 8, 10, 12, 15, 16, 20, 24, 30, 40, 48, 60, 80, 120, 150, 200, 240 and 400. This makes it a highly flexible base number to work with.

#### **Desktop**

- Grid size: 1366px, 12 column
- Maximum width: Website locks at 1400px

#### **Tablet**

- Grid size: 768px, 12 column
- Maximum width: Website locks at 1400px

#### **Phone**

- Comp size: 320px, 12 column

Grids are used to structure the page layout. They allows elements to be aligned horizontally and vertically, which creates columns that keep things organized. Optimal spacing, type sizes and layout relationships should be maintained throughout.

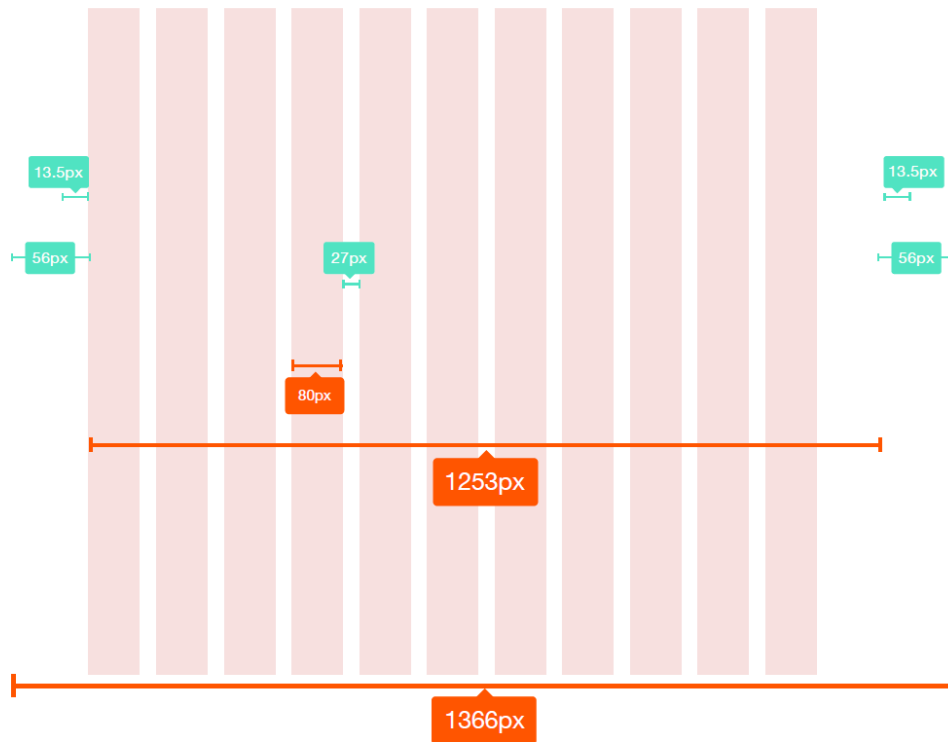

The following grid examples show the transition from desktop designs to tablet and down to phone.

---

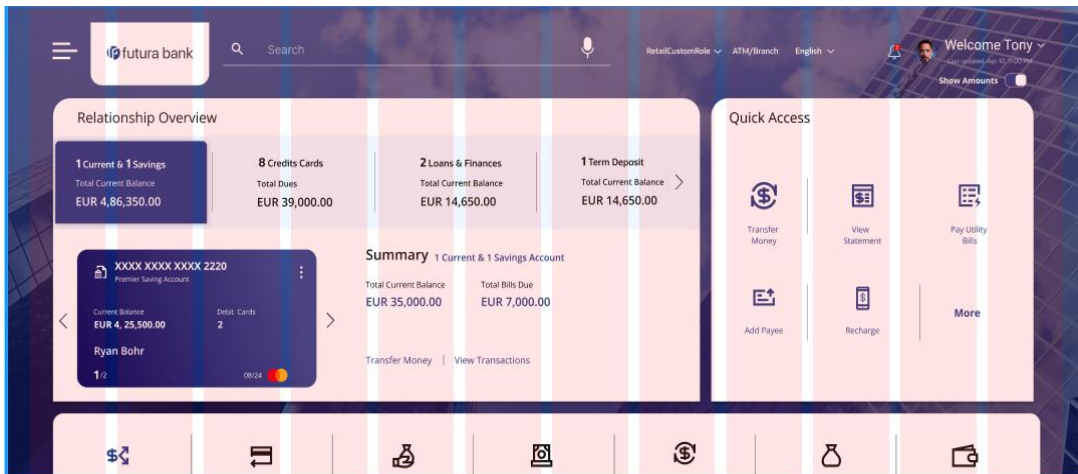

Note: Some images in the style guide have been reduced in size to fit the dimensions of this guide's layout.
