1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

3. Payments

The digital banking applications simplifies the user's requirement of transferring funds from one bank account to others. By using the payments module of the digital banking application, users can transfer funds from their own accounts to other accounts within the same bank or any other bank locally or a bank in another country.

A Note on Domestic (Local) Payments:

Local Payments are very region specific. For example NEFT is a network supported for local payments within India. The same will not be of any relevance in Europe. Similarly, SEPA is a network supported within Europe and will not have any relevance in Asia for local payments.

For Domestic (Local) Payments, the base product of Oracle Banking Digital Experience supports some local payments out of the box as mentioned in the Transaction Host Integration Matrix. Therefore, more often than not, there will be a need for the implementation team to step in and implement the local network specific to the region that the bank is in.

The following sections in this document detail all the features offered to users through the payments module of the digital banking application.

Note: Payment Screens are not supported in the landscape mode of mobile applications and mobile browser.

4. Manage Payees

The online banking application enables users to register and maintain payees (beneficiaries) towards whom payments are to be made frequently.

Payees can be created and maintained for the following types of transfers:

- Internal Bank Account
- Domestic Bank Account
- International Bank Account
- Domestic Demand Drafts
- International Demand Drafts

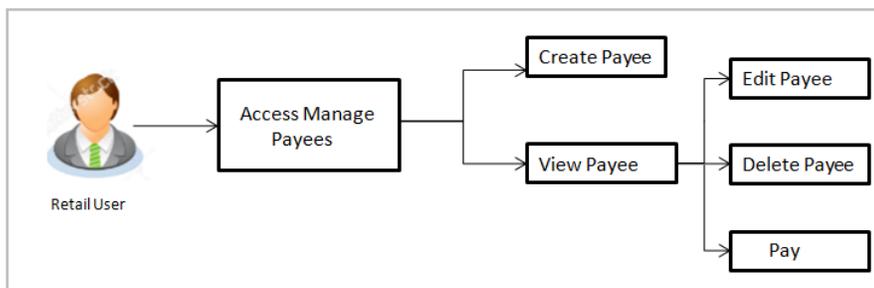

Pre-Requisites

- Transaction access is provided to the retail user

Features Supported in the Application

- Create Payee
- View Payee
- Edit Payee
- Delete Payee
- Initiate payment towards a Payee

6. Add Demand Draft Payee

A Demand Draft is a pre-paid negotiable instrument. The issuing bank undertakes to make payment in full when the instrument is presented by the payee. The demand draft is made payable at a specified centre and can be issued in local currency as well as in (allowed) foreign currencies. A foreign currency demand draft can be requested using International Demand Draft while a pay order or local currency demand draft can be requested using the Domestic Demand Draft transaction. A Demand Draft, as compared to a cheque is issued by the Bank against the Bank's own funds and hence there is a reduced risk of the cheque not clearing. Users are able to save the payee details of the draft through payee maintenance. Beneficiary for demand drafts are of two types:

- Domestic Demand Draft
- International Demand Draft

The feature allows you to create a Domestic Draft payee to initiate a request to issue a draft which is payable at a location within the country. The user provides the payee details, the details of draft to be issued in favour of and the payable location.

The application also provides an additional option to have the demand draft delivered at the customer's convenience. The following are provided for the same:

- My address – This option enables the user to select a branch of the bank (issuing bank) at which the draft is to be delivered.
- Branch Near Me – This option enables the user to specify which registered address of the user (out of the user's work, residential or postal address) the draft is to be delivered at.
- Other Address: This option enables the user to specify an address at which the draft is to be delivered. The user can select this option if he wishes to have the draft delivered to an address that is different from that of any of the bank's branches or any of the user's registered addresses.

FAQ

1. **When can I make the payment to newly added payee?**

After successfully adding a payee, you may proceed to transfer funds only after the cooling period (the time set by the bank during which fund transfer is not allowed to a newly added payee) or you may set a future date for the transaction to take place.

2. If I delete or edit a payee, what will happen to the in-flight transactions?

Payee modification or deletion will not have any impact on the transactions which are initiated towards the payee and that are pending further processing.

7.3 Suggestive Credit Value Date

The Payment framework provides the facility to display the suggestive credit value date on the review screen of a payment. This date is an indicative date only and it gives the end user an idea of when the payment would get credited to the payee’s account, before he can confirm the transaction.

The service takes into account parameters like the network of payment, the currency etc. before arriving at the suggestive credit value date.

This service is currently available out of the box integrated only with Oracle Banking Payments. For other product processors a customization would be required.

FAQ

- 1. Can I use the adhoc transfer transaction to transfer funds towards the repayment of a loan which I hold in the same bank?**

No, fund transfers can be made only to current or savings account through the adhoc transfer transaction.

- 2. Can I set a future date for a fund transfer?**

You can set a future date for a payment using the Pay Later option.

- 3. What happens if I have set up a future dated transfer, but don't have enough funds in my account on the transaction date for the transfer?**

Balance check will not be performed at the time of transaction initiation with future date. The transaction will get declined in case of insufficient funds in the account on the given transaction date.

- 4. What happens if the transaction amount is less than set Transaction Limit?**

If the transaction amount is less than the minimum limit or more than the maximum transaction limit set by the Bank, the user will not be able to initiate the transfer.

- 5. Can I make a payment towards an account which is currently not registered as my payee?**

Yes, you can make payments to the accounts which are not registered as payees through the adhoc transfer transaction.

- 6. Are separate transaction limits applicable for when I initiate a transfer using Adhoc Transfer and using Transfer Money by selecting a payee?**

Transaction limits are defined based on each payment network. The same limits get utilized if the transaction is initiated from Adhoc Transfer or by using Transfer Money (provided the payment network is the same).

11. Issue Demand Draft

The Issue Demand Draft transaction enables users to request the bank to issue demand drafts towards payees. In order to initiate a demand draft issue request, the user has to first ensure that the payee i.e. the recipient of the demand draft is registered as a demand draft payee through the Manage Payees feature. Once the payee is registered, the user can initiate a request to the bank to issue a demand draft.

A user can initiate a request for a Demand Draft using this transaction. All Demand Draft payees (Domestic and International Demand Draft payees) created by the user are listed for selection. Details of the payee are auto populated on the transaction screen once a selection has been made. The user is then required to fill in details such as the source account to be debited, the amount for which the draft is to be drawn and the date on which the draft is payable, in order to initiate the demand draft request.

Prerequisites:

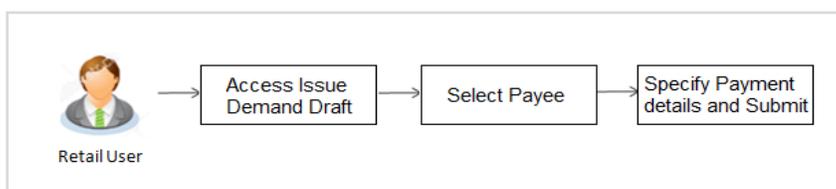

- Transaction access is provided to the retail user
- Transaction working window is maintained
- Required payees are maintained
- Transaction limits are assigned to user to perform the transaction

Features supported in application

The user can request for two types of demand drafts:

- Domestic Demand Draft – Where the draft is payable within the country
- International Demand Draft – Where the draft is payable outside the country

12. Repeat Transfers

Repeat Transfers, also referred to as Standing Instructions or Standing Orders, are instructions given by a payer (bank account holder) to the bank to transfer a specific amount to another account at regular intervals.

Once initiated, these transfers are executed repeatedly till the end date.

The application has simplified the user's task of initiating repetitive payments by introducing the Repeat Transfers feature. Through this feature, users can set instructions for funds to be transferred at regular intervals towards registered payees or to the user's own accounts. Once initiated, the details of these transfers can be viewed in the **View Repeat Transfer** screen. The user can also cancel a repeat transfer instruction, if so desired, from the **View Repeat Transfer** screen.

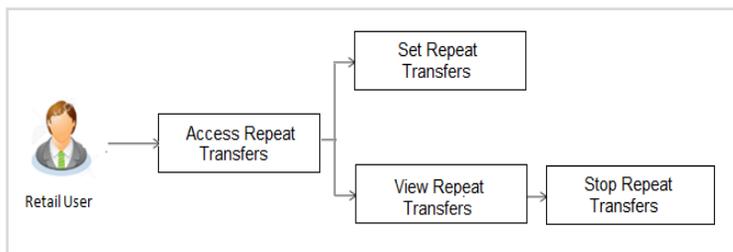

Pre-Requisites

- Transaction and account access is provided to the retail user
- Payees are maintained
- Transaction limits are assigned to the user

Features supported in application

- Set Repeat Transfer
- View Repeat Transfer
- Stop Repeat Transfer

13. Repeat Transfers Inquiry

Repeat Transfers, also referred to as Standing Instructions or Standing Orders, are instructions given by a payer (bank account holder) to the bank to transfer a specific amount to another account at regular intervals.

Once initiated, these transfers are executed repeatedly till the end date.

The application has simplified the user's task of initiating repetitive payments by introducing the **Repeat Transfers** feature. Through this feature, users can set instructions for funds to be transferred at regular intervals towards registered payees or to the user's own accounts. Once initiated, the details of these transfers can be viewed in the View Repeat Transfers screen. The user can also cancel a repeat transfer instruction, if so desired, from the View Repeat Transfers screen.

FAQ

1. Can I cancel a Repeat Transfer instruction?

Yes, you can cancel Repeat Transfer transactions provided that the instruction has some instructions that have not yet been executed. You cannot reverse transfers that have already been initiated.

Once an instruction has been cancelled, it will no longer be visible on the View Repeat Transfer screen.

1. What happens if I have set up a transfer for a future date, but on that date I don't have enough funds in my account to cover the transfer?

In this case, the transfer will not be made. Transfers are executed only if there are funds available in your account.

2. Can I cancel a specific installment of a repeat transfer/ recurring payment?

No, you cannot cancel the specific installment of recurrent payment, but you can cancel entire instruction given for recurring payment.

16.4 Payment Cloning

The **Copy** feature available on the **Payment Status Inquiry** summary screen allows user to clone a payment. This is to make it convenient for the end user to initiate the same payment again, on a different date. The cloning does not intend to stop the user from changing any of the data. Therefore it is just another Adhoc Payment transaction, and the user will be able to change any fields he wants to.

Note: The feature, out of the box, will support International, Internal and SEPA Credit transfers only.

For a Self-Transfer that was initiated from OBDX and visible in Payment Status Inquiry, clicking on the Clone button will open up the **Transfers – Adhoc Payee** Internal Payment page. This is because, from the bank’s perspective both Self Transfer and Internal Transfer are payments between accounts within the bank.

The payments seen in **Payment Status Inquiry** are a combination of all payments posted to the back end payments processor. The payments could have originated from other channels too, or directly from the payments processor itself. And therefore to repeat/copy the same payment at a later time, OBDX makes use of the Adhoc Payments transaction since the beneficiary information may not be present within OBDX as a payee.

Pre-Requisites
