## 1.4 Structure

This manual is organized into the following categories:

*Preface* gives information on the intended audience. It also describes the overall structure of the User Manual.

*Introduction* provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

## 3. Introduction

As the word suggests, Cash Management refers to the optimum utilization of cash to ensure the right amount of liquidity and maximum profitability for an organization.

Money is the lifeline for any business and therefore every organization aims to ensure that there is adequate cash to meet the obligations while making sure that there are no idle funds. Cash management functions help businesses in achieving this goal.

On a broad level, Cash management functions include Collections, Receivable/Payable Management, Reconciliation of payments, and Cash Flow Forecasting.

---

**Note:** The Cash Management module is currently only supported on **Desktops** and **Landscape** mode of **Tablet** devices.

---

Functions of Cash Management:

- **Cash Flow Forecasting**

Cash flow forecast helps corporates in estimating the amount of money that will move in and move out of the business during a specific period like for a month, date, or for a particular week. Based on the forecast, businesses can plan their future investments and ensure that they have enough liquidity to meet their future payables. For more information, refer the [Cash Flow Forecasting](#) section below.

- **Collections**

It is a process of managing collection of physical instruments like cash and cheques. It not only saves the corporate's time and resources but also provides them a clear and detailed view of their collection status across locations

## 4. Overview

The Cash Management Overview screen provides a quick view of the corporate’s cashflow transactions expected in the near future so that the corporates can prepare business activities basis the inflows and outflows. The collection widgets also give a quick view of cash or cheques deposited or withdrawn into/from the accounts. This enables corporates to plan cash positions easily, in advance.

## Overview

The **Overview** screen consists of the following widgets:

- Cashflow for next 30 Days
- Collections Summary
- Unrealized Cheque Aging
- Collections as per Pickup Points
- Cash Withdrawal Summary
- Cash Flow Forecast

---

**Note:** All the above widgets can also be viewed on a mobile device. The features, links, filters, and data that are available in these widgets on the web browsers on desktop computers, are also available on the mobile device.

---

**Cashflow for next 30 Days:** This widget displays the total cash in local currency that will flow during the next 30 days. You can also select different number of days from the dropdown list at the top of the widget. The options available are: 30 days, 15 days, 7 days, and today. The data can be viewed separately for cash inflows (in the **To Receive** tab) and cash outflows (in the **To Pay** tab). To view this information account-wise, you can select the required account from the dropdown list available at the top of this widget. The Reset icon in the top right corner, enables you to reset the widget data.

A doughnut graph depicts the 'To Receive' or 'To Pay' amounts, currency-wise, for the selected span of days. The amounts are also listed in figures along with the count of transactions for each currency. On clicking the arrow beside a count, an overlay section appears with the itemized categories or cashflow transactions, such as Credit Transfers, Cheques, Cash Deposits, and so on. The overlay section includes the **View Details** link, which when clicked displays the [View Expected Cash Flow](#) screen. The data displayed in this screen is based on what you select in the widget, with respect to the number of days, 'To Receive' or 'To Pay' options, account number, and currency.

**Collections Summary:** This widget displays a bar graph representing the amounts received through cheque collection or cash collection, or both. Daily collections for the last 10 days or monthly collections for the last 10 months can be viewed. All amounts are expressed in the local currency of the corporate. The bars representing the cheque collections are color coded to indicate the amounts that are realized and unrealized. The Collections Summary widget also displays the [View Cheque Deposits](#) and the [View Cash Deposits](#) links that can be clicked to visit the respective screens, which display detailed records of the summary.

**Unrealized Cheque Aging:** This widget displays the number of cheques that are presently unrealized, and will be realized in the coming days. These are grouped in terms of number of days, such as, cheques that will be realized in 0 – 7 days, 8 – 14 days, 15 – 21 days, and Above 21 days. A doughnut graph represents the percentage of cheques that will be realized in each of these time frames. Click on each specified time frame link to view the cheque number, the cheque amount, and the actual day on which the cheque will be realized. Click the [View Cheque Details](#) link in this widget to view further cheque details.

**Collections as per Pickup Points:** This widget displays a line graph indicating the amounts collected from the top 10 pickup points in the last 7 days. This data can also be viewed for the last 5 days, the previous day, or the present day. The graph consists of the pickup point codes on the X axis and the amounts in local currency on the Y axis. Data can be viewed with respect to cheque (default) or cash collections, using the switch on the top right corner of the widget. On selecting the 'Cheque' option, the [View Cheque Deposits](#) link appears at the bottom of the widget, which when clicked, displays the corresponding screen. Similarly, on selecting the 'Cash' option, the [View Cash Deposits](#) link appears. You can also view the collections for specific pickup locations, by clicking the filter icon and selecting the required locations.

**Cash Withdrawal Summary:** This widget displays a line graph depicting the daily cash withdrawals for the past 5 days, in local currency. You can also view the withdrawals for the past 5 months. The [View Cash Withdrawal](#) link is present at the bottom of the widget, which when clicked displays the [View Cash Withdrawal](#) screen. The data displayed in this screen will correspond to the past 5 days or past 5 months (in local currency) as per the selection in the widget.

**Cash Flow Forecast:** This widget displays the cash flow forecast data of the corporate on a bar graph for a span of 12 months, which includes today's date plus 6 months and minus 6 months. On the landing page, a monthly view of the expected inflows, outflows, surplus/deficit, reconciled for inflow, and reconciled for outflow data, is displayed. You can use the respective buttons to get daily, weekly, or quarterly views as well. You can zoom in, zoom out and scroll in this widget to go to a particular date/week/month/quarter range. You can also use the area graph at the bottom of this widget to set a specific period to view the details. The slider present on the area graph, can be moved or resized, as required.

## 5. Cash Flow

### 5.1 Cash Flow Forecasting

Cash flow forecasting is a projection of an organization's financial position based on records entered in the system for payments and receivables. While planning investments, the Corporate also needs to forecast future contingencies and ensure profitability. To enable this, the Corporate must use efficient cash flow forecasting and management tools. The Cash Flow Forecasting application facilitates financial liquidity within an organization and ensures that the business has the necessary cash to meet its future obligations, by efficiently managing cash inflows and outflows.

The **Cash Flow Forecasting** screen gives the Actual forecast as well as the Predicted forecast of the corporate's inflows and outflows. In the Predicted forecast, the system predicts the possible payment day of the cash flows on the basis of the patterns of its history. The system also projects a graphical representation and gives a detailed summary of the cash flows.

The application also gives an option to view the combined forecasts of Actual and Predicted data in a single screen.

**The widgets shown on the Cash Flow Forecasting screen are as follows:**

- **Today's Snapshot**

This widget provides a quick overview of the current day's expected inflows and outflows along with the opening and projected closing balances. The data is displayed in local currency by default on the landing page. If any filter value is selected from the top filter, then the data will be displayed as per the selected value in the filter.

- **Cash Flow Forecast**

This widget provides a graphical representation of the cash flow forecast for the Corporate for future and past months. The data is displayed in local currency by default on the landing page. If any filter value is selected from the top filter, then the data will be displayed as per the selected value in the filter. It provides quarterly, monthly, weekly, or daily views of the expected inflows and outflows on a bar graph. A line graph depicts whether there is a surplus or deficit for a given quarter or month or week or day.

- **Cash Flow Summary**

This widget provides the corporate user a quarterly, monthly, weekly, or daily view of the aggregated summary of cash flows (inflows and outflows) at a cash flow category level. It displays the total sum of inflows or outflows at a category level for a particular quarter or month or week or day, depending on which frequency is selected. The data is displayed in local currency by default on landing. If any filter value is selected from the top filter, then the data will be displayed as per the selected value in the filter.

- **Cash Flow Details:** This is an overlay window which appears on clicking any category link in the Cash Flow Summary widget. It displays detailed cash flow records for the entire period selected by the user. The records are grouped at a Real Account level by default. The user can choose to change the grouping to a Virtual Account level or a Counter-party level. The data is displayed in local currency by default on the landing page. Once the grouped data is expanded, the data is displayed in the currency of the respective record. If any filter value is selected from the top filter, then the data will be displayed as per the selected value in the filter.

**Prerequisites:**

- Transaction access is provided to the corporate user

### 5.1.2 Cash Flow Forecast widget

## Field Description

| Field Name | Description |
|------------|-------------|
|------------|-------------|

### Cash Flow Forecast (Actual) widget (Displayed on selection of 'Actual' option)

This widget displays the actual cash flow forecast data of the corporate on a bar graph for a span of 12 months, which includes today’s date plus 6 months and minus 6 months. On the landing page, a monthly view of the actual inflows, outflows, surplus/deficit, reconciled for inflow, and reconciled for outflow data, is displayed. You can also use the respective buttons to get daily, weekly, or quarterly views.

The frequency and time frame for viewing this data for a specific category (for inflow or outflow) can be entered by clicking the Filter (  ) icon. A pop-up window appears, where you can set the desired parameters, and click **Apply**. The graph is updated accordingly. Once you set a time frame for a particular frequency, using this pop-up window, the other frequency buttons at the top of the widget, are disabled. In order to view a different frequency, either click the Reset (  ) icon, or click the Filter (  ) icon again, and select the desired frequency and time frame.

You can zoom in, zoom out and scroll in this widget to go to a particular time range. You can also use the area graph at the bottom of this widget to set a specific period to view the details. The slider present on the area graph, can be moved or resized, as required.

**Quarterly** Click this button to view the actual quarterly forecasted cash flow for a 12-month period (today plus 6 months and minus 6 months) or for any period selected in the filter. The actual values of inflow, outflow, surplus/deficit, and reconciled values aggregated for each quarter, are displayed.

**Monthly** Click this button to view the actual monthly forecasted cash flow for a 12-month period (today plus 6 months and minus 6 months) or for any period selected in the filter. The actual values of inflow, outflow, surplus/deficit, and reconciled values aggregated for each month are displayed. This is also the default view on the landing page.

| Field Name  | Description   |
|---|---|
| <b>Weekly</b>   | Click this button to view the actual weekly forecasted cash flow for a span of 12 months, with an upfront view of 3 months, which includes the current month or for any period selected in the filter. The actual values of inflow, outflow, surplus/deficit, and reconciled values aggregated for each week are displayed. To view the weekly data for the next/previous three months, click the 'Next 3 Months' or 'Previous 3 Months' buttons available below the graph.   |
| <b>Daily</b>  | Click this button to view the actual daily forecasted cash flow for a span of 12 months, with an upfront view of 3 months, which includes the current month or for any period selected in the filter. The actual values of inflow, outflow, surplus/deficit, and reconciled values aggregated for each day are displayed. To view the daily data for the next/previous three months, click the 'Next 3 Months' or 'Previous 3 Months' buttons available below the graph.  |

| <b>Add Opening Balance</b> | <p>On clicking this link, the <b>Opening Balance</b> row appears in the summary grid along with the edit () icons under each column. Click the icon to enter the opening balance in the required column. Upon entering the balance, click the save icon that appears, to save the balance. On save, system will calculate the surplus and deficit and the projected closing balance for that column and for all the following columns. (The closing balance of previous column becomes the opening balance of the next column.)</p> <p>The <b>Projected Closing Balance</b> value at the bottom of the grid, is updated accordingly.</p> <p>Click the <b><u>Hide Opening Balances</u></b> link to hide the opening balances.</p>   |
| <b>Description</b>         | <p>Displays the <b>Inflow</b> and <b>Outflow</b> grouped on the basis of categories. <b>Surplus/Deficit</b> is calculated as Outflow minus Inflow. Expand the Inflow and Outflow lists, to view the categories under each of them. The category names are hyperlinks, which when clicked display the <b>Cash Flow Details (Actual)</b> overlay window. For more details, refer the <a href="#">Cash Flow Details (Actual)</a> overlay window section below.</p> <p>The overlay window displays the records belonging to the selected category for a 12-month period by default. If the filter has been used to select a different time range, then the records are displayed for the selected range. You can edit the time frame by clicking the edit icon in the top right corner of this window, and selecting the 'from' and 'to' dates within the specified range.</p> <p>The records are grouped by real account numbers or International Bank Account Number, based on the configuration set by the bank. You can choose to change the grouping into virtual account or counter party, by selecting the appropriate option from the <b>View by</b> list.</p> |
| <b>Quarterly Data</b>      | <p>Displays the actual quarterly data for 4 quarters, by default, in the Cash Flow Summary widget.</p> <p>If you have selected a different time frame using the filters in the Cash Flow Forecast widget, then quarterly data for the selected period is displayed. A maximum of 6 quarters can be displayed upfront, if the selected time range has 6 or more quarters. If there are more than 6 quarters then you can navigate to the next/previous quarters using the arrows.</p>   |

This widget enables you to view the predicted aggregated summary of cash flows (inflows and outflows) at a cash flow category level, for the time period selected in the filter in the Cash Flow Forecast widget. You can view the summary data quarter-wise, month-wise, week-wise, or day-wise. These frequencies can be selected in the Cash Flow Forecast widget. By default, on the landing page, 12 months' data is displayed which includes today's date plus 6 months and minus 6 months. If any filter values (top level or second level) are selected in the Actual/Both forecast, and if the user then navigates to the Predicted forecast, then the data is displayed as per the filter. Following are the fields available in the Cash Flow Summary widget:

| Field Name  | Description   |
|---|---|
| <Previous arrow>  | Click this arrow to view data for the previous 6 days, or weeks, or months, or quarters, based on frequency selected.   |
| <Next arrow>  | Click this arrow to view data for the next 6 days, or weeks, or months, or quarters, based on frequency selected.   |
|  | Click this icon and select any particular date, week, month or quarter from the given calendar to view the cash flow summary. You can only select within the time frame that has been set in the Cash Flow Forecast widget.   |
| <b>Description</b>  | <p>Displays the <b>Inflow</b> and <b>Outflow</b> grouped on the basis of categories. <b>Surplus/Deficit</b> is calculated as Outflow minus Inflow. ## **FAQ**

### **1. Can the user see the past month's inflows and outflows as well?**

On the landing page, the system displays default data for a period of 12 months, which includes today's date plus 6 months and minus 6 months. However, you can search for any desired period range using the filter option available on top of the Cash Flow Forecast graph.

### **2. What is Surplus and Deficit and how does it get calculated?**

A surplus occurs when the inflow of money exceeds the outflows for a particular period. After subtracting the outflows for a particular period from inflows for that period, if a positive amount is obtained, it is called as Surplus. It denotes that corporate will have surplus of cash during that period.

A deficit occurs when the outflow of money exceeds the inflows for a particular period. After subtracting the outflows for a particular period from inflows for that period, if a negative amount is obtained, it is called as Deficit. It denotes that corporate will have a shortfall of cash during that period.

### **3. What does Cash flow categories signifies?**

Cash flow categories are the high-level inflow, out flow heads under which the inflows and out flows are expected. For example, under Outflows Payroll, Marketing, Taxes, Operating Expenses can be some of the examples of categories. Similarly, for Inflows, Collections, Royalties, Interest, Sale of Property can be some of examples. By looking the amount against these categories, user can get to know the aggregated sum of amount expected to receive or pay for each head.

## 5.2 **Expected Cash Flow**

The corporate user can record cash flows that are expected to occur in the future. Both inflow and outflow records can be added. For each cash flow entry, the user can add the expected date of the cash flow, the account number to be debited/credited, the linked reference number (such as, cheque number or invoice number), the amount, and the currency. Expected cash flow records are also considered in the Cash Flow Forecasting functionality.

The following functions are available for managing expected cash flow.

- Create Expected Cash Flow
- View Expected Cash Flow
- Edit Expected Cash Flow
- Delete Expected Cash Flow

### **Pre-requisites:**

- Transaction access is provided to the corporate user.

### 5.2.1 **Create Expected Cash Flow – Onscreen and Bulk File Upload**

Expected cash flow records can be created in one of the following ways:

- By manually entering the details of the cash flow on the screen.
- By uploading a file (in one of .csv, .xls, .xlsx, or .xml format) that contains the cash flow details. This method enables the user to create bulk records.

Both one-time transaction records as well as recurring transaction records can be created.

**Note:** Refer this file for the sequence:

While uploading a .XLSX / .XLS file, if you do not have the required data for a particular cell, and need to leave it blank, then ensure that the particular empty cell has been formatted to the data type of the expected data of that cell. For example, a cell that is supposed to hold textual content, such as name or description, should be formatted to 'Text'. Similarly, a cell that is supposed to hold a number, should be formatted to 'Number'.

## 6. Collections

Several corporates, such as retail stores, have a huge inflow of physical cash/cheques on a daily basis. This has to be deposited in the corporate’s bank account(s) on a regular basis. The corporate can either arrange for the cash/cheques to be deposited at a branch or opt for the pick-up service, where a bank representative collects the cash/cheques and makes the deposit on behalf of the corporate.

The Collections services offered by the bank enable the corporate user to enter the details of the cash/cheque being deposited.

**Pre-Requisites:**

- Transaction access is provided to the corporate user.

### 6.1 Cash Deposits

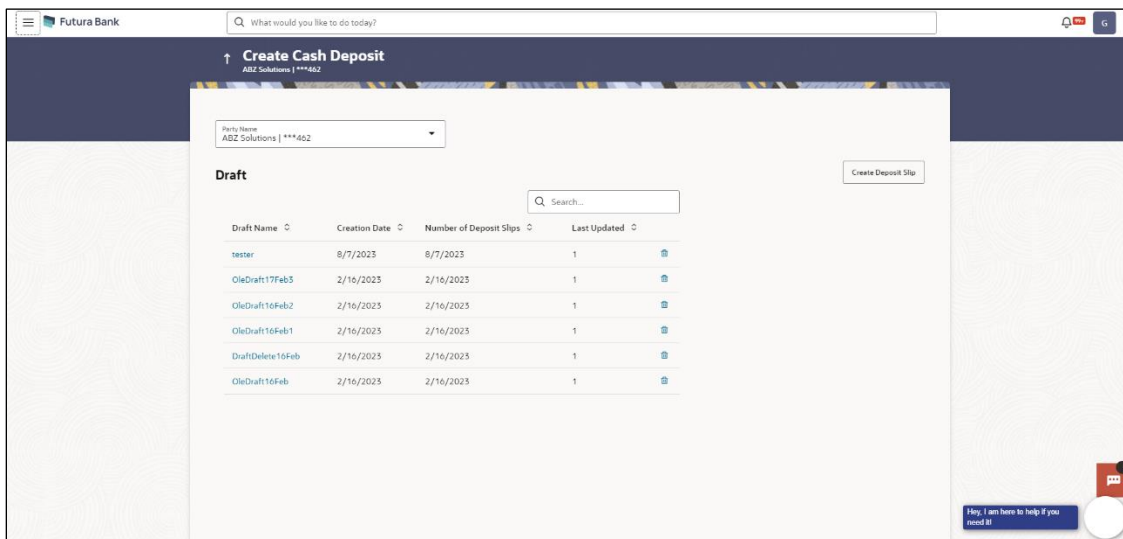

#### 6.1.1 Create Cash Deposit

Using this screen, you can enter the details of the physical cash being deposited into the corporate’s account. Once you enter the cash details, you can also save the entry as a draft, to resume later.

## 7. Netting

Netting module of the Oracle Banking Cash Management system involves setting off the value of multiple positions or payables between two or more parties. It ascertains the party who owed obligation in a Bi-party agreement. It reduces the absolute number and volume of payables and receivables transactions leading to significant cost savings.

### 7.1 Accept / Reject Netting

The 'Netting' screen helps user to accept or reject a netting transaction on a particular associated party against its receivables and payables so that the number of payment transactions between those two parties is reduced leading to significant cost savings. User can search for the netting transaction by Netting Reference Number.

#### Pre-requisites

User must have valid corporate login credentials.
