## 3. Business Checking Account Application

Business checking accounts are accounts held by businesses at banks and financial institutions to hold deposits and to receive and make payments through online modes, cheques and debit cards. As opposed to business savings accounts, business checking accounts can also have overdraft facility.

The business Checking account application of OBDX has been created to enable customers to apply for Checking accounts easily by providing minimal details of the business and stakeholders. Applicants can quickly apply for Checking accounts by simply specifying their business details, stakeholder details and account preferences.

The application form is OCR (Optical Character Recognition) enabled so as to save the applicant's time and effort in filling out the application form. The various sections of the form get prefilled with information fetched through OCR based on the document uploaded in the inline Upload Documents feature provided against each section for which OCR is supported.

Online KYC of stakeholders that are prospects can also be conducted by means of liveness check (assisted or unassisted) or through integration with third party identity verification service providers. Online KYC is provided as an inline step that is enabled only in case the specific stakeholder does not have a relationship with the bank.

Businesses that are existing digital banking customers can simply provide their online banking credentials to have the Business Details and Business Finances section of the form prefilled with information as maintained with the bank. The applicant will be define stakeholder information as required and can add multiple stakeholders.

The application tracker has been built so as to enable tracking of the application once it has been submitted. The application tracker also enables the applicant to retrieve and complete an application that has been saved. Additionally, the applicant can view documents that have been uploaded as part of the application form and can also view details as defined in the application form in PDF format.

---

Note:

1. In this release, OBDX is integrated solely with Oracle FLEXCUBE Onboarding (OBO), for the submission and processing (including tracking) of SMB application forms. Third party integration is not supported.
  2. OBDX is integrated with Oracle KYC to fetch the applicant's risk level (high risk or low risk) along with the reference number for the same as generated in the Oracle KYC system, at the time of application submission. OBDX will further send this information to the mid office system to be utilized as required.
- 

Following are the steps involved in the application submission:

- **User Type Selection:** The first step in applying for a product is to select the user type so as to be displayed product categories and subsequently products which are applicable to you. i.e. select tab 'Personal' if you are a retail individual and select tab 'Business' if you are applying on behalf of your small-medium business.
- **Product Category Selection:** Once you have selected a user type, all the product categories that contain products for the specific user type, are displayed. Select any product category of choice.

- **Product Selection:** All the products belonging to the selected product category will be listed here. Each product will be listed as a separate card which will display the name and image of the product along with a short description, features and the options to view further details, or to apply for the product. The additional option to select the product so as to compare it with others within the same category will also be provided on each card. You can select a maximum of three products for comparison.
  - **Kick Off:** This page serves as an introduction to the application form. The various steps involved in an application are displayed on this page. You can also view the documents required to be uploaded as part of the application. As a business applicant, you can identify how you are going to proceed with the application. If your business is new to the bank, you can continue as a guest, or if your business has an existing relationship with the bank, you can select the provided option to simply login with your online banking credentials so as to have certain sections such as Business Details and Business Finances pre-populated in the application.
  - **Mobile Verification:** This step is applicable if you are filling out the application as a new/unregistered business customer. You will be instructed to enter your registered business mobile number, after which the system will identify whether the mobile number is already registered with the bank or not. You will then be required to enter the OTP sent to this mobile number in order to proceed with the application form.
  - **Business Details:** This section captures information related to your business which includes information such as the business legal name, date and country of registration, registered address and other contact details.
  - **Business Finances:** In this section, you can enter information pertaining to the finances of the business, which will include income, expenses, assets and liabilities.
  - **Stakeholder Information:** In this section, you can specify information pertaining to the stakeholders of the business. This will include basic information such as the relationship of the stakeholder with the business, date of association and ownership percentage, depending on the type of stakeholder (relationship with the business). Depending on whether the stakeholder is an existing customer of the bank or if they are new to the bank, you will either be required to simply capture basic information such as customer ID, name, date of birth or extensive information including address and contact details. If the stakeholder is new to the bank, you will have the option to complete the Online KYC of the stakeholder.
- Online KYC of prospect stakeholders can be done through any of the following modes, depending on which mode has been enabled by the bank in the Originations Workflow Maintenance screen available to bank administrators.

- **Liveness Check - Assisted:** If the mode of liveness check is assisted, the option to initiate a video call with a bank executive will be provided. The bank executive will verify the identity of the stakeholder and will also undertake liveness checks. In order to enable the bank executive to verify the stakeholder's identity, you will be required to first upload images of an ID document that contains the most recent photograph of the stakeholder. On completion of this step, if the bank executive has successfully verified the stakeholder's identity and conducted other checks, you will be able to proceed with the application form. The stakeholder's personal information will be prepopulated on the basis of the information defined in the ID document.
- **Liveness Check – Unassisted:** In the case of unassisted liveness check, you will be required to first upload images of the stakeholder's ID proof document, following which the system will guide you to centre your face (the stakeholder's face) so as to be able to click a selfie using the device's camera. The third party identity verifying system will verify, through the use of certain algorithms, whether the photograph on the ID document matches that of the selfie. A success/failure message will then be displayed depending on the outcome.
- **(National) ID Verification:** In this mode of KYC, you can select an ID that you would like to provide for verification and can enter the ID number in the provided input field. You will be

sent an OTP to the mobile number defined against the ID. Your (the stakeholder's) ID will be verified once you have entered the correct OTP in the provided field. Subsequently, the stakeholder's information, as fetched from the third party service providers on the basis of Identification provided, will be pre-populated in the stakeholder's information section.

- **Upload Documents:** Upload documents is not available as a separate step in the application form, rather it is provided inline with every step that supports OCR and for which document proof would be required. The steps for which the option to upload documents is provided are – Business Details, Business Financials, Stakeholder Information.
- **Checking Account Specifications:** The bank may offer certain add-on services for the account. These might include a Debit Card, Passbook, Cheque Book, Access to Direct Banking, Phone Banking, etc. In this section, you can define your preferences with regards to these features. You can also specify the currency in which you would like the account to be maintained and define your preferences regarding account statement frequency and mode of delivery.
- **Review and Submit:** Once you have filled out all the information required in the application form, you will be displayed this information on the review page. You can verify the details provided and if required, can edit the information in any sections by selecting the option provided against each section.
- **Terms of Service:** On having reviewed the application, you can then proceed to view the terms and conditions of the Checking account that is being applying for. You can also add a digital signature by means of uploading a document containing your (a stakeholder's) signature or by physically signing the provided space if you are filling out the application from a touchscreen device.
- **Fund your account:** This step will be part of the application form if it has been configured for Checking Account applications. Through this step you will be able to fund your new account if you wish to do so. If you opt to fund your account, you will be required to specify the initial deposit amount and then proceed to furnish information regarding mode of transfer. If the business is a prospect, you will be navigated to the payment gateway where you will be able to specify information related to the mode of transfer. If the business is an existing customer you will be provided with the additional feature of being able to select any of the existing Checking or checking accounts that the business holds with the bank, from which to transfer funds.
- **Confirmation:** Once you have submitted your application after having reviewed it and having accepted the terms and conditions, a confirmation page will be displayed. This page will display a success message along with the application reference number. You can track your application on the basis of this reference number. Additionally, this page will also contain a button, by clicking on which you can navigate to the application tracker.

Apart from the **Review and Submit** and **Confirmation** steps, the sequence of the remaining steps may vary based on the configuration maintained for the product applications, by the bank.

### 3.4 Kick Off page

This page displays the various steps involved in the Checking account application and provides the means by which you can proceed with the application. If your business has an existing relationship with the bank, you can select the provided option to Login with the business' login credentials. This will yield an application form that is much shorter than that of the form you would be required to fill, if your business was new to the bank. In this scenario, since the information of your business is already available with the bank, you would not be required to specify Business Details. Additionally, all the existing financial information of your business will be displayed under the Business Finances section and you can update this information as required. If your business is new to the bank, you can select the option as provided, and proceed to provide information related to your business details, business finances, add stakeholders, etc.

Additionally, this page also provides links and information to:

- View the list of supporting documents required to be uploaded as part of a business Checking account application.
- Information pertaining to the application being saved and how you can retrieve it.
- Terms and conditions that need to be met in order to apply for the product.

#### Kick Off page

The screenshot shows the 'Ready to Apply?' page for an SMB Power Current Account. At the top, there is a navigation bar with 'Futura Bank' and a search bar. Below the navigation bar, the page title is 'SMB Power Current Account'. The main content area is titled 'Ready to Apply?' and contains the following text: 'Please check the following eligibility criteria before you begin.' Below this, there is a 'Check Your Eligibility' section with two bullet points: 'You (the applicant) and all stakeholders have attained the age of legal majority.' and 'You are the owner or are authorized to apply on behalf of the business.' There is a 'Read more' link below the bullet points. Below the bullet points, there is a checkbox labeled 'The business is an Online Banking Customer of Futura Bank' with the text 'Login for a faster application experience' below it. At the bottom of the form, there is an 'Apply Now' button. The page also includes a footer with copyright information: 'Copyright © 2005, 2023, Oracle and/or its affiliates. All rights reserved.(SecurityInformation)Terms and Conditions'.

5. Click on the **View List** link. An overlay window on which the list of documents required to support the application for the selected product, will be listed.
6. Click on the **View Privacy Policy** link to view the privacy policy of the bank on a new tab within the same browser window.
7. Select the **I am a Futura Bank online banking customer** option if you are an existing online banking customer of the bank. The **Login** page will appear after you click on the **Apply Now** button..  
For more information on the application of an existing online banking customer, view the **Existing Online Banking Customer** section.

### 3.5 Mobile Verification

This step is applicable only for prospect/guest. This check is used to register guest customers so that they can track submitted applications and also retrieve applications that were abandoned before submission. This check is also used to identify whether the applicant is truly a new customer or if he/she is already an existing customer of the bank. Additionally, the system is able to identify if there are any existing applications in draft mode for the mobile number defined and can provide applicants with the option to continue with those applications if they wish to do so.

Once the mobile verification process is completed, the auto save capability of the application is enabled. Any entry/changes you make to the application form will get saved automatically.

#### Mobile Verification - Enter Business Mobile Number

### 3.10 Business Finances

This section captures the financial information of the business, which includes the business' monthly income and expenses as well as information related to the assets held by the company and any liabilities that the business might have.

#### Business Finances – Income & Expenses

The screenshot shows the 'Business Finances' section of a Futura Bank account application. At the top, there is a navigation bar with 'ATM & Branch Locator', 'English', and 'OBO 14.4'. Below this is the Futura Bank logo and a search bar. The main header indicates the user is on the 'SMB Power Current Account' page. A progress indicator shows four steps: 'Business Details' (completed), 'Business Finances' (current), 'Stakeholder Information', and 'Checking Account Specifications'. A prompt asks the user to 'Upload supporting documents to prefill this section' with a link to 'View list of supporting documents'. The 'Business Finances' section is titled 'Please update your business financial information' and has two tabs: 'Income & Expenses' (selected) and 'Assets & Liabilities'. A note states: 'Please enter income earned and expenses incurred per month in your preferred currency. Please note - input of value in at least one field is mandatory.' Under 'Income', there is a sub-header 'Add all your income from different sources.' and a form with 'Income Mode' (Salary) and 'Income Amount' (USD 120,000.00). Below this is a '+ Add another Income Source' button. Under 'Expenses', there is a sub-header 'Add any of your expenses from the given modes.' and a form with 'Expense Type' (Vehicle) and 'Expense Amount' (USD 5,000.00). Below this is a '+ Add another Expense' button. At the bottom, there are 'Continue' and 'Back' buttons, and a note: 'Scan QR-code anytime to continue on mobile.' ### 3.17 Existing User

An application form being initiated for a business that is an existing online banking customer of the bank (registered user) will differ from that of one being initiated for a business that has no existing relationship with the bank.

You will be able to apply as an existing business customer by selecting the provided option on the kickoff page and proceeding to specify the business' login credentials.

The business Checking account application form for existing business customers will comprise of the following sections:

1. **Business Details** – This page will display basic information of the business. There will be no option provided to edit this information as part of the application form.
2. **Business Finances** – This page will display an financial information of the business that is already maintained with the bank. The applicant will be able to add additional financial information in the Income, Expenses, Assets and Liabilities sub sections and will also be able to modify information already present, as required.
3. **Stakeholder Information** – This section will enable the business applicant to specify information pertaining to the stakeholders of the business. The applicant can opt to add multiple stakeholders, as required. Please refer the Stakeholder Information sections in this user manual for details.
4. **Checking Account Specifications** – This section will be part of the application form and you will be required to define the currency in which you would like the account to be maintained and define your preferences regarding account statement frequency and mode of delivery. If the overdraft feature is enabled for the product, the applicant will also be able to select the option to apply for overdraft and will be able to subsequently specify the desired overdraft limit amount.
5. **Terms of Service** – You will be required to read through and accept the terms and conditions related to the online application of the product you have selected.
6. **Fund your Account** – This section will provide the option by way of which you can specify whether you would like to fund your new account right away or fund it later. If you select the Fund Now option, in addition to being provided with the means by way of which you can fund your account via payment gateway, you can also alternately select a checking account that you hold with the bank, to be debited in order to fund the new account
7. **Confirm** – Once you have submitted your application, you will be displayed a confirmation page. The application reference number along with the link to access the Application Tracker will be displayed.

## **FAQ**

- 1. Can I proceed with the application if the business is an existing customer of the bank but does not have online banking access?**

No. In order to apply online, your business needs to have online banking access. Please contact the bank for information on how to gain access to online banking services for business customers.

- 2. How many products can I apply for as part of a bundled application?**

Out of the box, you can add a maximum of three products in a bundle. This number is configurable by the Bank and may change.

- 3. In case my application is saved as a draft, can I request a bank executive to complete this application on my behalf?**

Only you can resume and complete a draft application.

- 4. Can I cancel one of the product applications that has been submitted as part of a bundled application?**

No. Currently, it is not possible to cancel a specific product application that is part of a bundled application. You can however, cancel the entire bundled application, if you wish to do so.

- 5. For how long I can access and resume my applications that are saved as drafts?**

This is based on the Bank's purging policy. The draft applications will be available for x days in the application tracker before they are purged by the bank.

- 6. Can I apply for a product that I have already applied for and that the bank is currently processing?**

Yes, you can still submit an application for the same product. The decision to process or reject either of the two (or more) applications will rest on the bank.

- 7. I have started my application on my laptop. However, I have realized that some of the documents that I need to upload are available on my tablet. Do I need to abandon the application that I started on my laptop to restart the entire process on my tablet?**

No, you can scan the QR code available on every step of the application form, post the Mobile Verification step, and resume the application from your tablet or mobile device.

- 8. Can bank administrators define the sequence in the steps of the application forms?**

Yes, bank administrators can configure the sequence of steps in the application forms of all product categories supported for online application, through the Origination Workflow Maintenance feature available on the OBDX platform.

- 9. How does OCR work?**

The bank can integrate with the third party adapters that provide OCR services, through available hook points. The system will be able to prefill certain fields in the Personal Information section from data fetched from the applicant's uploaded documents.

Similarly, an out of box integration is available with the internal 'Document verification framework'.

Extensibility hooks can be used to support OCR for most identity and financial documents.
