3. Introduction

Islamic Banking is a banking system that is based on the principles of Shariah (Islamic law) and guided by the Islamic economics. The Shariah Laws provide guidance on each and every aspect of human life, and the laws which govern and guide financial and commercial transactions define Islamic Banking activities.

Although Islamic banking may seem similar to conventional banking, the two differ conceptually. One key difference is that in conventional banking, banks earn their money by charging interest and fees for services, whereas in Islamic banking, banks earn their money by profit and loss sharing, trading, leasing, charging fees for services rendered, and so on.

The OBDX corporate banking modules cater to Islamic accounts as well. Users of an Islamic bank, can view the account details, inquire schedule details or disbursement details, and more using the portal.

A user can either have only Islamic accounts or only conventional accounts or a mix of both types of accounts. The portal caters to each case. If the customer has both conventional loans and finances accounts and Islamic loans and finances accounts under the same ID and password, he will have a consolidated view of all accounts on logging.

The loans and finances accounts widget has a representation of both conventional and Islamic accounts. This is also true for enquiry and transaction screens. While initialing any transaction or payment, the user selects either an Islamic account or a conventional account, grouped under the respective labels.

The labels on the different pages / screens, for Islamic accounts, reflect the nomenclature as per and in accordance with Islamic banking requirements.

4. Corporate Islamic Finance

In Islamic Finance an amount of money is financed by the bank for a certain period of time. Banks charge a profit rate for the amount financed. Hence, Islamic Finance accounts are valuable income generating assets for banks. It is therefore important for banks to enrich the end user's servicing experience so as to increase user satisfaction and retention. In order to achieve this, banks are constantly making efforts to enhance the digital banking experience for their customers by introducing and revamping servicing features on the digital platform. The labels have been adjusted and rechristened for Islamic Finance and are in accordance to the Islamic Banking requirements, in the digital banking platform.

Once a customer avails Islamic Finance, the details of the same can be accessed online. They can manage their banking requirements efficiently and effectively through the OBDX self-service channels. The Islamic financing module enables the customer to view details of Islamic financing, transaction activities, repayment schedule, and the available profit percentage for various Islamic finances. Customers can also make repayments towards the finance.

Note: In application

- 1) Account searchable drop-down will allow user to search the account number basis on the Account Number, Account Name, Account Currency or Branch Code.
 - 2) Bank can configure the fields to be shown as additional values in the accounts drop-down.
 - 3) If in **Group Corporate Onboarding - Group Corporate Profiling** setup, **Approval Routing Type** is selected as **Manual**, system will allow initiator to choose the approval workflow from the resolved rules as part of transaction initiation. Refer **Group Corporate Onboarding - Group Corporate Profiling** section in **User Manual Oracle Banking Digital Experience Core** for more details.
