1. Preface

1.1 Purpose

Welcome to the User Guide for Oracle Banking Digital Experience. This guide explains the operations that the user will follow while using the application.

1.2 Audience

This manual is intended for Customers and Partners who setup and use Oracle Banking Digital Experience.

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit, <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.6 Conventions

The following text conventions are used in this document:

Convention	Meaning
------------	---------

boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>Italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.7 Screenshot Disclaimer

The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.

1.8 Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Abbreviation	Description
OBDX	Oracle Banking Digital Experience

2. Electronic Bill Presentment And Payment

Electronic bill presentment and payment (EBPP) is a process that enables the billers to create, and present the bills / invoices online to their customers including corporates. This feature also enables the customers/ users to pay the bills online. The EBPP services are widely used in many areas like utility bill payment, fund transfer through net banking against various purchases of utility products and services by the customers, payment to service providers, mobile/ DTH bill payment etc.

The main advantage of electronic bill presentment and payment is that customers can pay their bills anytime quickly and conveniently, which saves lots of time and paper work.

3. Add Billers

The online banking application enables the corporate user to add billers of the specific categories for the payment of bills and prepaid recharge electronically. Following types of billers are added.

- Presentment type: Billers presents the bill or invoice to the customer/ user online before paying the bill
- Payment type: Biller does not present bills. Biller allows the users to pay their bills anytime using their current and savings or credit card account that is credited to the billers account
- Presentment and Payment type: Billers has features similar to both Presentment as well as Payment type of billers. The bills/ invoice can be presented to the users for bill payment or the users can pay bills without the invoice
- Recharge type: Billers allows users to do “Recharge” their prepaid services like Mobile, DTH or Internet

While adding a biller, option to map multiple CIFs available under the GCIF will be provided. This feature allows the corporate user to associate multiple CIFs with a single biller account, providing flexibility and convenience for billing and payment processes. User can even map all the CIFs available under a GCIF to a biller account if needed.

Corporate users can add billers by specifying the Nickname of the biller(nickname should be unique), biller specific single /multiple unique customer IDs e.g. Relationship no, Account number etc., and other Biller labels as maintained in the Biller Maintenance administration screen. Multiple but unique registrations with the same biller are allowed.

When a channel customer does an “Add Biller” transactions, he is essentially registering with the biller to make online bill payments. At this stage some billers may want to validate that the customer is a genuine customer. The behaviour is based on how customer validation has been set up when biller got on-boarded

Auto: When a biller is of Customer Validation type as “Auto”, customers who add this biller do not need any validation from biller and their registrations are auto-approved and they can initiate online bill payments to this biller

Offline: When a biller is on boarded with Validation type as “Offline”, for retail or corporate customers who add this biller, their registration status will be “Pending”. This means that the biller will have to do an offline validation of these registrations and can approve or reject them. OBDX does not provide any OOTB (Out of the box) mechanism for downloading the “Pending” registrations and changing their status by banker or biller.

Online: When a biller is on boarded with Validation type as “Online”, for retail or corporate customers who add this biller, their registrations need to be validated by biller online. The online validation could be a redirect to the biller’s website where he can do the validation through REST type web service through which validation happens. OBDX does not provide for OOTB implementation of the online validation.

Prerequisites:

- Transaction access is provided to the retail user
- Billers are maintained in OBDX by administrator
- Admin Biller Category maintenance is done

Features supported in the application

- Add Biller

How to reach here:

Dashboard > Toggle Menu > Bill Payments > Add Billers

OR

Search bar > Bill Payments > Add Billers

OR

Access through the kebab menu of transactions available under the **Bill Payments** module

Add Billers

The screenshot shows the 'Add Billers' form in the Futura Bank application. The form is titled 'Add Billers' and has a search bar at the top. The form fields are as follows:

- Biller Name:** BEST Transport
- Category:** Transportation | Mumbai
- Biller Type:** Presentment
- Biller Nickname:** SamTravls
- Customer ID:** 5434
- Customer Name:** Neil Desouza
- Accessible To:** ☐ All Parties ☒ Select Specific Parties
- Accessible Parties:**
 - ***431 | reliance1 jio ltd | UBS OBPM 14.4 HEL Branch
 - ***432 | reliance4 jio ltd | UBS OBPM 14.4 HEL Branch
- Payment Type:** ☒ Manual ☐ Auto Pay ☐ Scheduled Pay

The form ends with 'Submit' and 'Cancel' buttons.

Field Description

Field Name	Description
Biller Name	Select the biller as maintained in administrator biller maintenance Each biller name value in the dropdown will consist of the following - • Biller Name • Biller Category • Biller Sub-Category (if maintained) • Biller Location

Field Name	Description
Category	On selecting a biller from the Biller Name dropdown, the category, sub-category & location of the biller as maintained in the administrator biller maintenance screen are displayed. The Sub-Category is displayed if sub-categories are maintained under the selected Biller Category.
Biller Type	On selecting the biller name, the biller type is displayed. The biller type can be: • Presentment: Biller is of Presentment type • Payment: Biller is of Payment type • Presentment and Payment: Biller is of Presentment and Payment type • Recharge: Biller is of Recharge type
Biller Nickname	Specify a nickname for the selected biller. The nickname has to be unique i.e. same nickname cannot be used for more than one biller.
Biller Specific Fields	The fields will be dependent on the biller type selected. E.g. in case of Recharge, you will be required to specify the mobile number registered with the biller along with customer name, etc. Enter information as required.
Party ID	The unique id of the customer/Party.
Party Name	The unique id of the customer/Party.
Accessible to	Name of the accessible party. The options are: • All Parties • Select Specific Parties
Following fields appear for Presentment and Presentment and Payment type of billers.	
Payment Type	Specify whether payments towards the biller are to be automatically paid or if you would like to schedule payments. The options are: • Manual • Auto Pay • Scheduled Pay

Field Name	Description
	This feature is available for Presentment and Presentment & Payment type billers only.
Payment Method	Specify the payment methods accepted as maintained for the biller by Bank Administrator. The payment type can be: - Account: The user can pay bills using their current and savings bank account - Credit Card: The user can pay bills using their credit cards; user has to select the month and year of expiry. - Debit Card: The user can pay bills using their debit cards. This field will appear if you have selected Auto Pay or Scheduled Pay under the Payment Type field.
Pay From	Depending on the payment method selected, the values in the drop-down will list either the user's CASA accounts, Credit Cards or Debit Cards. This field will appear if you have selected Auto Pay or Scheduled Pay under the Payment Type field.
Pay	Select the desired option to identify whether you would like to pay the entire bill amount at every cycle or want to specify a maximum amount upto which the bill should be paid automatically. The options are: - Bill Amount: Select this option if you would like the entire bill amount to be paid automatically at every billing cycle. - Limit Amount: Select this option if you would like to specify a limit amount so that if the bill is generated above this amount, it wont get paid. This field will appear if you have selected Auto Pay under the Payment Type field.
Limit Amount	Specify a limit amount to ensure that if a bill of this biller, is ever generated above this specified amount, the bill will not get paid automatically. This field will appear if you have selected Limit Amount under the Pay field.
Amount	Specify the bill amount. This field will appear if you have selected the Scheduled Pay option under the Payment Type Pay field.
Occurrence	The facility to specify when the bill payment will be processed. This field will appear if you have selected the Scheduled Pay option under the Payment Type Pay field.

Field Name	Description
	The options are: • One Time: Bill payment to be processed on a user specified future date. • Recurring: Bill payment to be processed on user specified future date and at a set frequency.
Scheduled Date	Future date on which the bill payment will be processed. This field appears if you select the option One Time under the Occurrence field.
Start Date - End Date	The user can select future start date and end date. This field appears if you select the option Recurring under the Occurrence field.
Select Frequency	The frequency for future bill payments. The frequency can be: • Daily • Weekly • Fortnightly • Monthly • Bi-Monthly • Quarterly • Semi-Annually • Yearly This field appears if you select the option Recurring in the Payment Type field.

To add a biller:

1. From the **Biller Name** list, select the registered biller name.
2. In the **Biller Nickname** field, specify the biller nickname.
3. In the biller specific fields, enter information as required.
4. If you have selected the **Presentment** or **Presentment or Payment** type of biller from the **Biller Name** list:

- a. From the **Payment Type** field, select the option of choice;
 Select the option **Manual** if you wish to make bill payments manually every time the bills are due.
 OR
 Select the option **Auto Pay** to set up automatic bill payments.
 OR
 Select the option **Scheduled Pay**, if you wish to schedule bill payments for either a single instance or recurring instances.
- b. If you have selected the option **Auto Pay** under the **Payment Type** field:
 - i. From the **Payment Method** list, select an option of choice to identify the mode through which payment will be made. The options can be Account, Debit Card and Credit Card, depending on the administrator maintenance for the specific biller. The values in the **Pay From** list will be populated on the basis of selection.
 - ii. From the **Pay From** list, select the CASA account/Debit Card/Credit Card, which is to be debited for bill payment.
 - iii. If you have selected the option **Credit Card**, select the month and year of card expiry in the **Expiry Date** fields.
 - iv. From the **Pay** field, select an option as follows:
 1. Select the **Bill Amount** option, if you want the entire amount of the generated bill to be paid at every cycle.
 OR
 2. Select the **Limit Amount** option, if you want to specify a maximum amount for bill payment.
 - a. Enter an Amount in the **Limit Amount** field.
- c. If you have selected the option **Scheduled Pay** under the **Payment Type** field:
 - i. From the **Payment Method** list, select an option of choice to identify the mode through which payment will be made. The options can be Account, Debit Card and Credit Card. The values in the **Pay From** list will be populated on the basis of selection.
 - ii. If you have selected the option **Credit Card**, select the month and year of card expiry in the **Expiry Date** fields.
 - iii. In the **Amount** field, enter the amount to be paid towards the bill at every instance.
 - iv. In the **Occurrence** field, select the desired option:
 1. If you select the **One Time** option, select a date on which the payment towards the biller is to be made.
 2. If you select the **Recurring** option:
 - i. From the **Frequency** list, select the frequency at which payments towards the biller are to be made.
 - ii. Enter the date from which recurring payments are to be made towards the biller in the **Start From** field.
 - iii. Enter the date upto which recurring payments are to be made towards the biller in the **End Date** field.

5. Click **Submit** to add the biller.
OR
Click **Cancel** to cancel the operation and navigate back to the Dashboard.
6. The **Add Biller - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to navigate back to the previous screen.
OR
Click **Cancel** to cancel the operation and to navigate back to 'Dashboard'.
7. The success message appears along with the biller details.
Click **Pay Bill** to make a payment towards the biller.
OR
Click **Add Another Biller** to add more billers.
OR
Click **Home**, to navigate to the dashboard.

4. Billers

This screen lists down all the registered billers of the customer.

Billers are maintained in OBDX either manually using Biller Maintenance functionality or through a bulk file upload. All the registered billers (of all types) and bills are displayed on the screen. The billers can be of 'Presentment', 'Payment', 'Presentment and Payment' and 'Recharge' type.

The customer either can pay the bills instantly or can schedule it to a later date. The customer also has an option to enter the payment amount, select the payment frequency and the source account from which payment can be made.

Users with access to any CIF linked to the biller can initiate payments through that biller, provided that the necessary access permissions are in place. Payments to the biller can be initiated using any of the accounts that are mapped to the corporate user.

Note: If only one CIF is associated with the biller and that CIF is transferred to another GCIF, the biller will also be transferred to the new GCIF. However, if multiple CIFs are linked to the biller, and one of those CIFs is moved to a different GCIF, the biller will not be relocated to the new GCIF.

The online banking application enables customers to register and maintain the billers towards whom utility payments are to be made frequently or on a regular basis.

Note: Send to Modify functionality is now supported for this transaction.

Prerequisites:

- Transaction access is provided to the corporate user
- Approval rule set up for corporate user to perform the actions
- Transaction working window is maintained
- Billers are maintained
- Transaction limits are assigned to the corporate user to perform the transaction

Features supported in application

- Bill Payment

How to reach here:

Dashboard > Toggle Menu > Menu > Bill Payments > Billers

OR

Dashboard > Bills Widget > View All link

OR

Search bar > Bill Payments > Billers

OR

*Access through the kebab menu of transactions available under the **Bill Payments** module*

4.1 **Billers - Summary**

All the registered billers of the customer are listed on this page. The customers can initiate bill payments towards those billers against which bills are due. Apart from paying bills, the customer can also view the details of each biller and can edit or delete a biller record by selecting the provided option.

Customer can select multiple presented bills for payment from the same screen. Further, customer will be able to specify payment details for each record.

Multiple bills can be selected together for payment. If flexi-approval is enabled, then the user can assign workflows to multiple transactions at once. Transactions with the exact matching approval rules (provided all rules of one transaction is/are matching with another transaction) will be grouped together along with the evaluated rules. e.g. multiple transaction buckets with multiple or single resolved rule/s. Maker can select one approval rule against the group and route the transaction. Transaction will be routed in an asynchronous manner. Once the transactions are routed successfully, the status of the transaction changes to "Pending for approval".

Billers

Field Description

Field Name Description

Search	This field enables the user to search for a specific biller by entering the biller name, nick name etc.
Select All to Pay	Select this checkbox if you wish to initiate bill payment towards all billers that have bills presented, at once.
Pay	Click to initiate multiple bill payments of all the selected presented bills, at once.
Biller Icon	The image associated with the biller.
Biller Name	The following information of the biller is displayed under this column: Biller Name – The name of the biller as maintained in the administrator biller maintenance is displayed. Biller Specific Registered ID – The ID of the user as registered with the biller. Payment Type – In case of presentment or presentment and payment type of billers, the payment type (manual, auto, scheduled) will also be displayed. Bill Due Date - The date on which the bill is payable will be displayed if the bill has been generated and not paid yet.
Bill Type	The type of biller i.e. recharge, e-bills.

Field Name	Description
------------	-------------

Status	The status of bill payment i.e. whether a bill is due or not. If a bill is due 'Bills Due' will be displayed under this column.
Actions	The available actions for each biller. In case a bill is due against a biller, the amount due will be displayed under this column in addition to the Pay button enabling the user to pay the due amount.

1. If you select a single bill for payment,
 - Click **Pay** against the biller for which you want to pay the bills. The **Pay Bill** screen appears.
OR
Click  icon to search for a specific biller.
OR
Click  against a specific biller and then click **Edit Biller** to edit details of the selected billers. The **Edit Billers** screen appears.
OR
Click  against a specific biller and then click **Delete Biller** to delete the biller.
OR
Click  against a specific biller and then click **Biller Details** to view details of the billers.
OR
Click  against a specific biller for which a bill is due and then click **View Bill** to view the details of the due bill.

OR
Select checkboxes provided against each presented bill to initiate multiple bill payments.
 - b. Click the **Pay** button available at the top of the biller records, to initiate multiple payments of all the selected presented bills at once.

The system displays the summary of all the selected bills along with an option to specify payment details.
3. Click on the kebab menu to access other bill payment related transactions which are as follows:
 - Add Billers
 - Quick Bill Pay
 - Quick Recharge
 - Bill Payment History

OR

Click on the kebab menu available against the individual biller record to access bill related transactions:

- View Bill
- Edit Biller
- Delete Biller
- Biller Details

4.2 **Pay Bill - Presented Bills**

Presentment type of billers presents the bill or invoice to the customer/ user online before paying the bill. Bill payment feature enables customers to pay their utility bills online. Through this feature, customers are able to pay their bills immediately/ same business date or at some future date. The future date should be before the bill due date. The customers can pay their bills from their current and savings account, Credit Cards or Debit Cards. The payment methods available for each biller is maintained as part of biller maintenance by bank administrator. The customer can also partly pay or pay their bills in excess (if allowed by biller, as maintained by bank administrator). The customer can choose specific bill, multiple bills or all presented bills, and initiate the payment at once.

In case of multiple bill payment, if in **Group Corporate Onboarding - Group Corporate Profiling** setup, **Approval Routing Type** is selected as **Manual**, system will allow initiator to choose the approval workflow from the resolved rules as part of transaction initiation. This selection is applicable to transactions whose status is **Initiated**. Refer **Group Corporate Onboarding - Group Corporate Profiling** section in **User Manual Oracle Banking Digital Experience Core** for more details.

Pay Bill – Presentment Type

Field Description

Field Name	Description
Biller Name	Name of the biller.
Biller Nickname	Nickname of the biller.
Category	The category of the biller.
Sub-Category	The sub-category of the biller.
Location	The operational area of the biller.
Customer Name	Customer name as maintained in biller records (entered by customer while adding the biller).

Field Name	Description
Customer Number	Customer ID as maintained in biller records (entered by customer while adding the biller).
Bill Due Date	The date on which the bill is payable.
Note	The text displaying payment methods accepted by the biller appears on the screen. The text is maintained for biller in the administrator biller maintenance.
Payment Type	Customer has to select the payment methods accepted by biller. The payment type can be: • Account: The customer can pay the bill using their current and savings bank account • Credit Card: The customer can pay the bill using their credit cards; customer has to select the month and year of expiry. • Debit Card: The customer can pay the bill using their debit cards.
Pay From	Depending on the payment method selected, the values in the drop-down will list either the customer's CASA accounts, Credit Cards or Debit Cards.
Expiry Date	Specify the date on which the credit card will expire in the month and year fields. This field appears only if you have selected the option Credit Card in the Payment Type field.
Payment Amount	The amount that is to be paid by the customer. In the administrator biller maintenance screen if: • Part payment flag is 'Yes': Customer can change the bill amount to any amount less than the initial bill amount shown. Bill amount cannot be zero. • Excess payment flag is 'Yes': Customer can change the bill amount to any amount more than the initial bill amount as displayed on the screen. • Part payment and Excess payment flags are set as "No": The bill amount will not be editable. • Late Payment flag is 'Yes': Customer is allowed to pay the bill after the due date. However even when Late payment flag is Yes, the editing of the bill amount is as per above conditions.

Field Name	Description
Pay	The facility to specify when the bill payment will be processed. The options are: • Now: Bill payment processed on same business day subject to processing window availability. • Later: Bill payment to be processed on a customer specified future date
Scheduled Date	Future date on which the bill payment will be processed. This field appears if you have selected the option Later from under the Pay field.
Do you want to add an attachment?	Select an option to identify whether you would like to add an attachment. • Select option Yes if you would like to add an attachment. • Select option No if you do not wish to add an attachment.
Attachment	Drag and drop or click  icon to browse and attach a document against one bill payment record. Note: 1) Only one document per bill payment is allowed. To attach multiple documents against one bill payment record, the customer has to attach in the form of a ZIP file. 2) By default, the supported formats are JPEG, PNG, PDF, TXT, ZIP, and DOC. 3) The maximum allowed file size will be 15 MB.

To pay a bill:

1. Select **Select All** checkbox to select all presented bill at once.
OR
Select checkboxes provided against each presented bill for initiating multiple bill payments.
2. Click **Pay All** to initiate multiple bill payments of all the selected presented bills at once. If you select multiple or all presented bills.
3. The system displays the summary of all the selected bills along with an option to specify payment details.

Note: For 'Auto Pay' billers, a warning message that auto pay option is set for the biller appears, if the customer clicks the **Pay** button.

4. In the **Payment Type** field, select the desired payment method to pay the bills.
5. From the **Pay From** list, select the source account/ debit card / credit card to be debited.

Note: Click  icon to default the selected account for all the bill payment records. This option will only be available in case of multiple bill payments.

6. From the **Expiry Date** lists (month and year), select the Card Expiry Date.
7. In the **Payment Amount** field, enter the payable amount.
OR
Click the **View Limits** link to check the transfer limit.
From the **Channel** list, select a channel to view its limits.
The limit details specific to the selected channel appear.

- b. Click on the **Assign** button, and all the resolved rules will be shown on an overlay. For each resolved rule, details like rule name, approval levels, sequential/parallel, rule amount range, users of a group are displayed.

Assigning Workflow

- Select a workflow from all the resolved rules from the overlay screen.
- Click **Assign** to assign the workflow, the transaction will be sent for approval as per the selected approval rule.
- On assignment, a message of workflow assigned successfully appears along with the reference number. The status is updated as 'Pending for Approval' and approval workflow is 'Assigned'.

Assign Workflow- success message

Note:

Click on  icon to view the transaction journey of the selected workflow. In case the user wants to assign the workflow at a later stage, then it can be achieved from the 'Initiated Transactions' list.

Transaction journey of the workflow

14. The success message appears along with the reference number, status and payment details with workflow assigned for reference number.
15. Click **Pay Another Bill** to pay another bills.
OR
Click **Home**, to navigate to the dashboard.
OR
Click **Add Biller** to add the billers.

4.3 Pay Bill - Payment Type

Payment type of billers there is no bill presented online (there may be an offline bill presentation) and hence biller allows the customers to pay their bills anytime using their current and savings or credit card account that is credited to the billers account. The customers can pay their bills immediately/ same business date or can schedule the payment. The customers can set up a recurring payment by selecting payment amount and payment frequency. This option allows the customer to manually enter the payment amount.

In case of multiple bill payment, if in **Group Corporate Onboarding - Group Corporate Profiling** setup, **Approval Routing Type** is selected as **Manual**, system will allow initiator to choose the approval workflow from the resolved rules as part of transaction initiation. This selection is applicable to transactions whose status is **Initiated**. Refer **Group Corporate Onboarding - Group Corporate Profiling** section in **User Manual Oracle Banking Digital Experience Core** for more details.

4.4 Pay Bill - Presentment and Payment Type

A Presentment and Payment type of biller has features similar to both Presentment as well as Payment type of billers. The bills/ invoice can be presented to the customers for bill payment or bills can be paid by the customers without the invoice. In the system when the biller presents a bill he will appear in the presentment section of the Bills screen and when there is no bill presented he will appear in the Payment section of the screen. This way customer can be the biller when there is a bill presented or even otherwise when there is no bill presented.

The customer has can pay the bills immediately or can schedule the payment. The customers can set up a recurring payment or auto payment. Both auto pay and recurring pay (scheduled payment) cannot be active at the same time.

In case of multiple bill payment, if in **Group Corporate Onboarding - Group Corporate Profiling** setup, **Approval Routing Type** is selected as **Manual**, system will allow initiator to choose the approval workflow from the resolved rules as part of transaction initiation. This selection is applicable to transactions whose status is **Initiated**. Refer **Group Corporate Onboarding - Group Corporate Profiling** section in **User Manual Oracle Banking Digital Experience Core** for more details.

Note: Click  icon to remove the attached zip file from the bill payment record. This option will only be available in case of multiple bill payments.

- 9. Click **Submit**.

OR

Click **Cancel** to cancel the operation and to navigate back to 'Dashboard'

OR

Click **Back** to navigate back to the previous screen.

- 10. The **Pay Bills - Review** screen appears. Verify the details, and click **Confirm**.

OR

Click **Cancel** to cancel the operation and to navigate back to 'Dashboard'.

OR

Click **Back** to navigate to the previous screen.

- 11. In case of multiple bill payments, the **Multiple Bill Payments Status** screen appears.

Multiple Bill Payments Status

Field Description

Field Name	Description
Bill Name	Name of the biller.
Category	The category of the registered biller.
From Account	The current and savings bank account from which customer can pay the bill.
Amount	The amount that is to be paid by the customer along with the currency.
Reference Number	The generated OBDX reference number.
Status	The current status of the bill. The different status options are: • Processed- The transaction was eligible for auto-approval and hence the transaction was automatically approved and sent to the core banking system for further processing. In this case assigning of approval workflow is not required. • Failed- The transaction has failed in OBDX due to validation errors. In this case, the transaction is not sent to the core banking system for further processing. • Initiated- The transaction is initiated in OBDX however is pending for approval. The approval will be initiated only once the user selects the approval workflow manually.

Field Name	Description
------------	-------------

Approval Workflow In case of **Initiated** status, an option is available to assign the approval workflow manually.

- If status is **Processed**, the transaction was eligible for auto-approval and hence the transaction was automatically approved.
- If status is **Failed**, the transaction has failed in OBDX due to error and hence the failure reason is displayed without any approval.
- If status is **Initiated**,
 - a. Click on **Group Transactions**. The transactions with the exact matching approval rules will be grouped together along with the evaluated rules.
