# 1. Preface

## 1.1 **Purpose**

Welcome to the User Guide for Oracle Banking Digital Experience. This guide explains the operations that the user will follow while using the application.

## 1.2 **Audience**

This manual is intended for Customers and Partners who setup and use Oracle Banking Digital Experience.

## 1.3 **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### **Access to Oracle Support**

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit, <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## 1.4 **Critical Patches**

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

## 1.5 **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## 1.6 Conventions

The following text conventions are used in this document:

| Convention      | Meaning                                                                                                                                |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <b>boldface</b> | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.         |
| <i>Italic</i>   | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.                          |
| monospace       | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

## 1.7 Screenshot Disclaimer

The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.

## 1.8 Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

| Abbreviation | Description                       |
|--------------|-----------------------------------|
| <b>OBDX</b>  | Oracle Banking Digital Experience |

---

## 2. Introduction

Supply Chain Finance (SCF) is a platform that facilitates corporate organizations to avail short-term credit that optimizes working capital. Credit can be availed by either the buyer or the seller/supplier. Suppliers sell or liquidate their invoices or receivables to banks. This enables them to make liquid money available to proceed with future orders. Similarly, Buyers avail finance for their payables from banks so that their obligations are met on time. Through SCF, the overall cost of availing credit comes down.

Using the digital platform of SCF, corporates can perform SCF transactions from the portal itself, thus resulting in improved business efficiency. The transactions can be executed, viewed, and tracked online. No follow-ups are required with the bank for the status of the transactions.

Corporates can manage creation of single or multiple invoices and/or purchase orders directly online. Bulk entries can also be made through file upload. Corporates can also accept or reject invoices/purchase orders online. The portal facilitates corporates to introduce their business partners to the bank. The business partners, or counter parties may or may not be customers of the bank. However, each counterparty should be on-boarded by the corporate customer themselves and further be linked to the SCF programs to enable conduction of business transactions.

The entire chain of processes, such as onboarding counterparties, raising a purchase order/invoice, accepting the purchase order/invoice, requesting finance for the purchase order/invoice, viewing details of the finance, repayment, and so on, can be performed using the portal.

A typical business scenario in SCF parlance -

### Scenario

"Rapid Motors" is an automobile manufacturing unit of Leo Corp, which produces a large number of automobiles.

- Their business strategy is to procure different parts of an automobile from various vendors and onwards sell their cars to different dealers in the market. Thus, Rapid Motors have to transact with their suppliers and buyers.

### Solution

The Digital Platform enables Rapid Motors to perform the following tasks/operations:

- Onboard their associated parties (dealers and vendors).
- View details of the associated parties on a single screen.
- Create a Buyer-led program and link their vendors, or, create a Supplier-led program and link their dealers.
- Raise invoices on their buyers, or raise purchase orders on their suppliers.
- Accept or Reject invoices/purchase orders that have been raised by their suppliers/buyers.
- Request Finance against invoices/purchase orders.
- Repay the Finance.

The features built for the corporate user in the Supply Chain Finance Module are as follows:

- **Overview**
- **Program Management**
  - Create Program
  - Edit Program
  - View Program
- **Finance Management**
  - Request Finance for Invoices and Purchase Orders
  - Finance Amendment
  - View Finance
  - Repay Finance
- **Viewing Limits**

---

**Note:** 1) Supply Chain Finance Transactions are only supported on **Desktops** and on **Landscape** mode of **Tablet** devices. For more information on the list of available screens for mobile view, refer [Mobile Touchpoints](#) section.

2) The corporate user who performs transactions such as, creation of program, linking receivables/payables to programs, requesting finance, and so on, is referred to as 'Maker'. The corporate user who approves the transactions is referred to as 'Approver' or 'Checker'. The corporate user who eventually releases the transaction, post approval, so that it takes effect in the application, is referred to as 'Releaser'.

3) The Corporate Admin user can now assign the role of 'Checker' to any corporate user, for all Supply Chain Finance transactions.

4) For more information on receivables and payables, refer **User Manual Oracle Banking Digital Experience Receivables Payables Management**.

---

---

## 3. Overview

The Supply Chain Finance dashboard provides the corporate user upfront with a holistic view of the Supply Chain Finance business in a simplified manner. It provides an overall view of their business in terms of receivables or payables. The user can get information about upcoming repayments, maturing finances, overdue finances/invoices, top programs, and more. An assorted list of quick links provides quick access to important transactions.

The following widgets are available in the SCF Overview:

- **Receivables/Payables Timeline**
- **Top Programs**
- **Finance Maturing**
- **Limits**
- **Outstanding Pre-Shipment Finances**
- **Overdue Finances**
- **Overdue Receivables/Payables**
- **Upcoming Disbursements**
- **Factoring Snapshot**
- **Upcoming Repayments**
- **Limit Expiry Status**
- **Quick Links**

## Icons

Following icons are present on the Dashboard:

---

Click this icon to go to the dashboard.

Click this icon to go to the Mailbox screen.

Click this icon to search the transactions.

Click this icon to view the welcome note with last login details, change entity, logged-in user's profile, or log out from the application.

Click this icon to select the Party name from the dropdown list. The widget displays the data for the selected party.

**Note:** Only accessible parties are displayed to the user. On page load, the widget displays the data of the mapped primary party/gcif to the logged-in user.

---

Click the toggle menu to access the transaction.

Click this icon to close the toggle menu. This icon appears if the toggle menu is open.

---

## Receivables/Payables Timeline

This widget depicts all the outstanding invoices and debit notes of the corporate party on a color-coded bar. The color-codes represent the percentage of receivables/payables that are overdue as well as those that are due in the coming days. Two sections, namely, 'Overdue from' and 'Due in', are also provided below the bar, to represent the data. These sections have 4 sets of day-ranges each. These day-ranges are configurable in the System Configuration screen. Each day range depicts the number of days in it, the total number of receivables/payables that are due in that range, and the corresponding total outstanding amount. The last section will always display those receivables/payables that are due above the max day on the previous range.

- Click this  icon to filter the receivables/payables based on party name, or currency. On selection, the widget displays the receivables/payables of the selected party/currency.

## Top Programs

A color-coded donut graph projects the top programs of the corporate that are highest in terms of financed/non-financed amounts in the local currency. Each color-code represents a program.

- You can view the top programs of the **Supplier** and the **Buyer** individually by clicking the Supplier/Buyer button.
- Click the dropdown and select **Invoice** or **Purchase Order** to view the top programs of the invoice or purchase order respectively. By default, the Invoice based top programs are displayed. If Invoice is selected, the widget displays the top programs of all the outstanding invoices; whereas if Purchase Order is selected, the widget displays only the purchase orders that are not linked to the invoices.
- Click the **View all Programs** link to view all the programs associated with the corporate.
- Click this  icon to filter the programs based on party name. On selection, the widget displays the top programs of the selected party.

## Finance Maturing

Finances are loans taken against invoices and purchase orders by the corporates for working capital requirements or any other necessary business expenses. This widget provides a graphical representation of all the outstanding finances of the corporate. The 'Y' axis represents the outstanding finance amount. The 'X' axis represents the day-ranges with two sections, namely, 'Overdue from' and 'Due in'. Each of these sections consists of 4 sets of day-ranges. The number of days in each range can be configured in the System Configuration screen except the last section. They need not be equal. The last section will always display those receivables/payables that are due above the max day on the previous range.

- Click this  icon to filter the finances based on party name, or currency. On selection, the widget displays the outstanding finances of the selected party/currency.

## Limits

This widget displays the list of all the limit types of the corporate party. Each limit type displays the name of the limit type, color-coded donut that displays the utilized limits in percentage, and the details of the sanctioned, utilized, and available borrowing limits displayed in the limits currency. Click on each limit and expand them to view the limits assigned to the party including the associated parties, linked programs, and products.

- Click this  icon to filter the limits based on party name. On selection, the widget displays the limits of the selected party.

## Outstanding Pre-Shipment Finances

This widget displays the list of outstanding pre-shipment finances for the corporate party. It displays details like Finance Reference Number, Maturity Date, Outstanding Amount, and Status of the finance. This widget provides a bifurcated view of data of finances where underlying purchase orders are linked to invoices.

- Three sections, namely, 'Total Outstanding Finances', 'Finances With Linked Invoices (Eligible for conversion to Post Shipment Finances)', and 'Finances Without Linked Invoices', are also provided to segregate the data. Click on each section to view the list of finances associated with them. This widget provides corporate with a ready data

- Click this  icon to filter the outstanding pre-shipment finances based on party name and ID, currency, and program. The widget displays the receivables/payables of the selected party, program and in the selected currency.

### Overdue Finances

Finances are liabilities of the corporates to be repaid by the due date. This widget warns the corporates of any finances running overdue. Timely payment of Finances is required to maintain the credit goodwill of the corporates. This widget assists in keeping the same intact. It displays details like Finance Reference Number, Amount Overdue, and No. of Days Overdue.

- Click the finances in the table to view the breakup of overdue amount such as outstanding principal, interest, penalty on principal, and penalty on interest in the form of a donut graph.
- Switch the **Show Interest Amount Overdue Only** toggle **ON** to view the list of finances where only interest amount is overdue.
- Click this  icon to filter the overdue finances based on party name, currency, and program. On selection, the widget displays the overdue finances of the selected party, program, and in the selected currency.
- Click the **Repay Finance** link in this widget to directly initiate a repayment towards a finance.
- Click the **View All Finances** in the widget to view all the finances related to the selected party.

### Overdue Receivables/Payables

Overdue invoices and debit notes are a major concern for Corporate Suppliers and Buyers and need to be addressed immediately. A dedicated widget projects five invoices/debit notes that are running overdue for the longest period. It also acts as an alarm for the corporate. It is a reminder that the overdue invoices/debit notes should be attended to, on priority. The link given in the widget enables the corporate to view all its overdue invoices and debit notes by navigating to the **View Receivables/Payables** screen.

- Click this  icon to filter the overdue receivables/payables based on party name. On selection, the widget displays the overdue receivables/payables of the selected party.

### Upcoming Disbursements

This widget displays details of upcoming finance disbursements for invoices and debit notes. The details are displayed month-wise and can be viewed separately for the party's roles as Buyer and Supplier. The date of the finance disbursement along with other details of the invoice/debit note are displayed in the widget. The reference number of the invoice/debit note is a hyperlink which when clicked displays the **View Invoice Details/View Debit Note Details** screen. For more information, refer the respective sections in **User Manual Oracle Banking Digital Experience Receivables Payables Management**. On clicking the **View Receivables/Payables** link in the widget, the respective screen appears. You can enter certain search criteria and view a list of receivables and payables in this screen. For more information, refer the **View/Edit Receivables/Payables** section in **User Manual Oracle Banking Digital Experience Receivables Payables Management**.

- Click this  icon to filter the future dated disbursements based on party name. On selection, the widget displays the future dated disbursements of the selected party.

## Factoring Snapshot

This widget displays the list of programs created under product factoring. The details are displayed currency-wise for each program and can be viewed separately for Receivables and Payables. The Total Amount for each program with Financed and Non-Financed details are displayed as color-coded graph. You can view the financed and non-financed amounts as Assigned, Unassigned, and Approved & Assigned details.

- Click this  icon to filter the factoring snapshot based on party name, currency, or program. On selection, the widget displays the factoring snapshot of the selected party, currency, or program.

## Upcoming Repayments

This widget displays the list of next 20 finance repayments that are due or maturing on or after the current day. It displays the finance reference number (hyperlink), the associated party name, and the amount due grouped based on the maturity date or due date along with the number of days the repayment is due.

- Click the finance reference number link to view the details of that finance in the **View Finance** screen.
- Switch the **Interest Repayments Only** toggle **ON** to view the list of finances where only interest amount is due for payment.
- Click this  icon to filter the repayment finances based on party name, currency, and program. On selection, the widget displays the upcoming repayments of the selected party, program, and in the selected currency.

## Limits Expiry Status

This widget displays all the limits that are expired and the limits that will be expired in the specific number of months. The Banks can configure this specific number. E.g. If the banks set this number to be 2, then the widget will showcase only those limits that are expiring in the next 2 months. In case of already expired limits, all of such limits will be showcased in the widget. If the corporate has, limits defined as an Anchor or as a spoke then the expired and nearing expiry limits will be displayed in separate tabs for Anchor or Spoke.

- Click this  icon to filter the expiry status of the limits based on party name. On selection, the widget displays the expiry status of the limits of the selected party.

## Quick Links

The most used transactions are provided as quick links for quick access to those transactions. The following quick links are available:

- View Programs
- View Invoices
- View Associated Parties
- Create Program
- Create Invoice
- Onboard Associated Party

## **FAQ**

### **1. Is the dashboard displayed as per Buyer or Supplier?**

The Dashboard has both Receivables and Payables tabs on each widget. If the corporate is a Buyer only, then the Payables tab has data displayed and the other Tab shows no data. The behaviour remains the same, where the corporate is only a Supplier.

### **2. Can I change my Quick Links?**

The Quick Links are fixed and cannot be changed.

### **3. How can I view all my overdue Invoices?**

The overdue widget has a link of 'View all Invoices'. On accessing the link, you will be navigated to View Invoices page and all the overdue invoices will be displayed.

---

## 4. Program Management

### 4.1 Create Program

A Corporate can create program(s) to link their business counterparts (who are referred to as Counter Parties) together, so that the parties can avail finance. A program is created using a finance product that would be availed by the counter parties or the Anchor (one who creates the program) depending on who the borrower is, in the finance product. The finance product is fetched from the bank's system.

A counter party can be linked to a program only when they are successfully onboarded into the bank's system. For more information on onboarding a counterparty and enquiring related details, refer **User Manual Oracle Banking Digital Experience Receivables Payables Management**.

Using this option, you can create a SCF program to manage invoices / purchase orders. It allows you to define major parameters at the program level like auto-acceptance or auto-financing of the invoices.

#### **Pre-requisites**

User must have valid corporate login credentials for creation of program.

#### **How to reach here:**

*Dashboard > Toggle menu > Supply Chain Finance > Program Management > Create Program*  
OR

*Dashboard > Toggle menu > Supply Chain Finance > Program Management > View Program >*

***Create New Program** link*

OR

*Dashboard > Toggle menu > Supply Chain Finance > Overview > Quick Links > Create Program*

#### **To create a program:**

1. In the **Create Program** screen, under the **Program Parameters** step, fill in the fields as follows.

## Field Description

| Field Name                                   | Description                                                                                                                       |
|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>View Attributes – Repayment Parameter</b> |                                                                                                                                   |
| <b>Pre Payment Allowed</b>                   | Displays whether the finance can be repaid prior to the finance maturity date.                                                    |
| <b>Part Payment Allowed</b>                  | Displays whether the finance can be repaid in parts.                                                                              |
| <b>Maturity Date Calculation</b>             | Displays the basis on which the maturity date of the finance is calculated.                                                       |
| <b>Holiday Treatment for Maturity Date</b>   | Displays how the finance maturity date is handled if it falls on a bank holiday.                                                  |
| <b>Reconciliation Towards</b>                | Displays what the reconciliation will be matched against.                                                                         |
| <b>Auto Debit Applicability</b>              | Displays whether auto debit is applicable for finance repayment.                                                                  |
| <b>On Due Date</b>                           | Displays the order in which the principal, and the interest is paid on the finance maturity date.                                 |
| <b>Before Due Date</b>                       | Displays the order in which the principal, and the interest is paid prior to the finance maturity date.                           |
| <b>After Due Date</b>                        | Displays the order in which the principal, interest, and overdue interest is paid post the finance maturity date.                 |
| <b>Non Performing Assets</b>                 | Displays the order in which the principal, interest, and overdue interest is paid if the finance repayment gets defaulted/missed. |
| <b>Interest Refund Handling</b>              | Displays how the interest refund is handled.                                                                                      |
| <b>Interest Refund Payment Mode</b>          | Displays the mode of payment for the interest refunds.                                                                            |
| <b>Excess Refund Handling</b>                | Displays how the excess payment made towards settling of outstanding invoice/finance, is handled.                                 |
| <b>Excess Refund Party</b>                   | Displays the party to whom the excess refund amount is credited.                                                                  |
| <b>Excess Refund Payment Mode</b>            | Displays the mode of payment for the excess refunds.                                                                              |
| <b>Margin Handling</b>                       | Displays how the margin refund is handled.                                                                                        |

| Field Name                               | Description                                                                                                                                                                                                                       |
|------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Margin Refund Payment Mode</b>        | Displays the mode of payment for the margin refunds.                                                                                                                                                                              |
| <b>Auto Settlement Applicable</b>        | Displays whether the finance availed against receivables/payables under the product will be settled automatically.                                                                                                                |
| <b>Liquidation Order for Auto Debit</b>  | Displays the auto-debit liquidation order in case partial funds are debited from the payment party on auto-debit. This field is displayed only if the <b>Auto Debit Applicability</b> toggle is set to 'Yes'.                     |
| <b>Debit Party on Due Date</b>           | Displays the party from whose account the amount should be debited if the business date is same as the finance maturity date.<br><br>This field is displayed only if the <b>Auto Debit Applicability</b> toggle is set to 'Yes'.  |
| <b>Debit Account Type on Due Date</b>    | Displays the account type to be debited if the business date is same as the finance maturity date.<br><br>This field is displayed only if the <b>Auto Debit Applicability</b> toggle is set to 'Yes'.                             |
| <b>Debit Party after Due Date</b>        | Displays the party from whose account the amount should be debited if the business date is greater than finance maturity date.<br><br>This field is displayed only if the <b>Auto Debit Applicability</b> toggle is set to 'Yes'. |
| <b>Debit Account Type after Due Date</b> | Displays the account type to be debited if the business date is greater than finance maturity date.<br><br>This field is displayed only if the <b>Auto Debit Applicability</b> toggle is set to 'Yes'.                            |

- Once the above details are entered, click **Next** to navigate to the **Link Counter Parties** screen. The screen displays a list of all counter parties that are onboarded by the anchor.  
OR  
Click **Cancel** to cancel the transaction.  
OR  
Click **Back** to go to the main dashboard.

### Select Counterparties

This section displays a list of onboarded counterparties in alphabetical order. A tile is displayed for each counterparty. You can individually select the parties to be linked to the program, or click **Select All** to link all of them to the program.

### Counterparty Tile

Each tile displays the following details.

**Short Name** Display the initials of the counter party.

**Counter Party Name and ID** Displays the counter party's name and ID.

**View/Edit Attributes** Clicking this link displays the **View/Edit Attributes** overlay window. You can define the attribute values that are specific to the counterparties in the view/edit attributes overlay window.

| <b>Interest Refund Handling</b>     | <p>Select how the interest refund should be handled for this counterparty. Interest is refunded in cases where interest is front ended and collected upfront. During settlement before maturity the interest needs to be refunded based on this maintenance.</p> <p>The options are:</p> <ul style="list-style-type: none"> <li>• Auto-Settle and Refund to IBP</li> <li>• Manually Settle O/s Finances</li> <li>• Refund to the Interest Bearing Party</li> <li>• Settle with Outstanding Finances</li> </ul> |
| <b>Interest Refund Payment Mode</b> | <p>Select the mode of payment for the interest amount refund for this counterparty.</p> <p>The options are:</p> <ul style="list-style-type: none"> <li>• Account Transfer</li> <li>• Cheque</li> <li>• EFT</li> </ul> <p>This field is enabled only if <b>Refund to the Interest Bearing Party or Auto-Settle and Refund to IBP</b> is selected in the Interest Refund Handling.</p>                                                                                                                           |

3. You can also use the alphabetical index to navigate to parties whose names begin with a specific letter.
4. Select the check box(es) against the counterparty(ies) to link with the program.

---

**Note:** Click **Select All** to select all counterparties in the list. Click **Deselect All** to deselect all the selected ones.

---

5. Click the **View/Edit Attributes** link to update the attributes for each of the selected counterparty(ies).
6. Click **Submit** to create a program. The Review screen appears.  
OR  
Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate back to the previous screen.

7. In the Review screen, verify the details, and click **Confirm**. A Confirmation message of request initiation appears along with the reference number.

OR

Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate back to the previous screen.

8. Click the **View Program** link to view the details of existing programs.

OR

Click the **Supply Chain Dashboard** link to go to Supply Chain Dashboard.

OR

Click the **Go To Dashboard** link to go to main dashboard.

---

**Note:** Once the **Create Program** transaction is submitted by the Corporate Maker, it is sent for approval. It appears in the **Pending for Approval** list of the Corporate Approver. The Approver can approve, or reject, or send the transaction back to the Maker for modifications, with relevant comments. Corresponding notifications are sent to the Maker.

The Maker can then view, claim, and edit the transaction. Upon modification, it can be submitted for approval again. The Approver again has the option to approve, reject or send the transaction back for modification. There is no limit to the number of times the transaction can be sent back for modification.

Once approved, the transaction appears in the Approver's **My Approved List**.

---

## 4.2 View / Edit Program

### Pre-requisites

User must have valid corporate login credentials.

### 4.2.1 View Program

View Program displays all the programs that the logged-in corporate is linked to. The status of the program and the corporate's role in the program are also displayed.

Using this option, you, as a corporate user, can view all programs associated with the corporate party, based on the party's role as a buyer or a supplier. On selection of the Buyer view, you can view all the programs as of current date where the corporate party is a buyer in the program. On selection of the Supplier view, you can view all the programs as of current date where the corporate party is a seller/supplier in the program.

### How to reach here:

*Dashboard > Toggle menu > Supply Chain Finance > Program Management > View / Edit Program*  
OR

*Dashboard > Toggle menu > Supply Chain Finance > Overview > Quick Links > View Program*

### To view a program:

1. The **Select Role** popup appears.

### View Program - Select Role popup

|------------|-------------|

## Search overlay window

The Search overlay window has the following fields.

|                              |                                                                                                                                                      |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Program Name</b>          | Indicates an option to search for programs based on the name.                                                                                        |
| <b>Program Id</b>            | Indicates an option to search for programs based on the ID.                                                                                          |
| <b>Associated Party Name</b> | Indicates an option to search for programs associated with a specific counter party. A list of onboarded counterparties is available to select from. |
| <b>Program Type</b>          | Indicates an option to search for programs based on the program type.                                                                                |

## Program List

Displays a list of programs linked to the logged-in corporate.

If you have selected the card or tile view, then you can click on a particular program tile to view its details. If you have selected the list view, then you can click on the Program Name link to view its details.

**Note:** If the logged-in party is a 'Spoke' who is not the borrower with respect to the program, then such a party can only view the program tile, but not the program details. The tile is non-clickable for this party. The following message appears in the program tile: The program details cannot be displayed as you are not a borrower in the linked program.

|                     |                                                                                                                                         |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Program Name</b> | Displays the program name as fetched from the Host. This is a hyperlink, which when clicked displays a screen with the program details. |
| <b>Program ID</b>   | Displays the program ID as fetched from the Host.                                                                                       |

| Field Name                          | Description                                                                                                                                                                                 |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Status</b>                       | Displays the status of the program.<br>It could be: <ul style="list-style-type: none"> <li>• Initiated</li> <li>• Modified</li> <li>• Active</li> <li>• Others</li> <li>• Closed</li> </ul> |
| <b>User Role</b>                    | Displays the logged-in corporate's role in the program.                                                                                                                                     |
| <b>Type of Program</b>              | Displays the program type as fetched from the Host.                                                                                                                                         |
| <b>Number of Associated Parties</b> | Displays the number of counter parties linked to the program.                                                                                                                               |

3. Enter the search criteria and click **Search**. A program list appears based on the entered search criteria in card or list view format.  
OR  
Click **Clear** to reset the search parameters.  
OR  
Click **Cancel** to cancel the transaction.
4. Click on a particular card/program name to view its details.

## View Program (details) – Anchor login

This screen appears when you click on a particular card/program name in the View Program screen. Below screen will be displayed when the logged corporate is an Anchor in the program.

| <b>Program Details</b>                       |                                                                                                                                                                                                             |
| <b>Valid From</b>                            | Displays the date from when the SCF program has been active.                                                                                                                                                |
| <b>Valid To</b>                              | Displays the date until when the SCF program will be active.                                                                                                                                                |
| <b>Auto Acceptance Invoice Applicability</b> | Displays the value of auto acceptance of invoices/purchase orders as fetched from the Host. Informs whether auto acceptance of invoices / purchase orders is applicable or not.                             |
| <b>Auto Acceptance Days</b>                  | Displays the number of days in which the invoices/purchase orders will be deemed as accepted, if not explicitly accepted by the buyer/supplier.                                                             |
| <b>Auto Finance Applicability</b>            | Displays whether the invoices/purchase orders raised under the program will be auto financed or not. If Yes, all invoices/purchase orders uploaded under the program will be auto financed post acceptance. |
| <b>Disbursement Currency</b>                 | Displays the disbursement currency for the program.                                                                                                                                                         |
| <b>Disbursement Mode</b>                     | Displays the disbursement mode for the program.                                                                                                                                                             |
| <b>Comments</b>                              | Displays the comments added for the program as fetched from the host.                                                                                                                                       |

#### **Top Associated Parties**

This section displays the top 10 counter parties in the program in a bar graph. It provides a comparative view amongst the counter parties on the basis of the receivable or payables in local currency. If the counter parties are less than 10, then all of the counter parties are displayed, and the label represents the actual number of counter parties. If there is only one counterparty linked to the program, then the label displayed is 'Top Associated Parties'.

Only those counter parties with invoices raised against them, are represented on the graph.

The following three tabs are present:

- Active Associated Parties tab
- Program Parameter Details tab
- All Associated Parties tab

### Active Associated Parties tab

| <b>Stale Period (Days)</b>                  | Displays the period in days after which the receivable/payable becomes stale                                                                                                        |
| <b>Minimum Waiting Period (Days)</b>        | Displays the minimum length of time for a finance availed under this program.                                                                                                       |
| <b>With Recourse</b>                        | Displays the value of With Recourse as fetched from the host.                                                                                                                       |
| <b>Grace Days</b>                           | Displays the number of days allowed as grace period. It is the period over and above the due date during which the payment may be done by the borrower without penalty or interest. |
| <b>Interest Bearing Party</b>               | Displays whether Anchor or spoke is the interest bearing party.                                                                                                                     |
| <b>Assignment Applicable</b>                | Displays whether the assignment on invoice is applicable for financing.                                                                                                             |
| <b>Auto Assignment</b>                      | Displays whether the assignment is performed automatically post invoice upload.                                                                                                     |
| <b>Acceptance Applicable</b>                | Displays whether the receivables/payables raised under the program is applicable for financing.                                                                                     |
| <b>Two Factor Applicable</b>                | Displays whether the two-factor feature is applicable for the program in case the anchor is trading with foreign buyers/suppliers.                                                  |
| <b>Insurance Applicable</b>                 | Displays whether the insurance is applicable for the program.                                                                                                                       |
| <b>Liquidation order for Auto Debit</b>     | Displays the auto-debit liquidation order in case partial funds are debited from the payment party on auto-debit.                                                                   |
| <b>Auto Debit Applicable</b>                | Displays whether auto debit is applicable for finance repayment.                                                                                                                    |
| <b>Holiday Treatment for Future Funding</b> | Displays how the finance disbursement date is handled if it falls on a bank holiday.                                                                                                |
| <b>Minimum Assignment</b>                   | Displays the minimum percentage of assignment allowed for financing a transaction of this program.                                                                                  |
| <b>Maximum Assignment</b>                   | Displays the maximum percentage of assignment allowed for financing a transaction of this program.                                                                                  |
| <b>Repayment Parameters</b>                 |                                                                                                                                                                                     |
| <b>Pre Payment Allowed</b>                  | Displays whether the finance can be repaid prior to the finance maturity date.                                                                                                      |

| Field Name                            | Description                                                                                                                                                                                                |
|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Part Payment Allowed</b>           | Displays whether the finance can be repaid in parts.                                                                                                                                                       |
| <b>Reconciliation Towards</b>         | Displays values either Invoice or Finance.                                                                                                                                                                 |
| <b>On Due Date</b>                    | Displays the order in which the repayment amount will be appropriated towards principal, interest, penalty on principal and penalty on interest when repayment is done on the finance maturity date.       |
| <b>After Due Date</b>                 | Displays the order in which the repayment amount will be appropriated towards principal, interest, penalty on principal and penalty on interest when repayment is done post the finance maturity date.     |
| <b>Before Due Date</b>                | Displays the order in which the repayment amount will be appropriated towards principal, interest, penalty on principal and penalty on interest when repayment is done prior to the finance maturity date. |
| <b>Auto Settlement Applicable</b>     | Displays whether the finance availed against receivables/payables under the product will be settled automatically.                                                                                         |
| <b>Excess Refund Payment Handling</b> | Displays how the excess payment made towards settling of outstanding invoice/finance, is handled.                                                                                                          |
| <b>Excess Refund Party</b>            | Displays the party to whom the excess refund amount is credited.                                                                                                                                           |
| <b>Excess Refund Payment Mode</b>     | Displays the mode of payment for the excess refunds.                                                                                                                                                       |
| <b>Margin Handling</b>                | Displays how the margin refund is handled.                                                                                                                                                                 |
| <b>Margin Refund Payment Mode</b>     | Displays the mode of payment for the margin refunds.                                                                                                                                                       |
| <b>Interest Refund Handling</b>       | Displays how the interest refund is handled.                                                                                                                                                               |
| <b>Interest Refund Payment Mode</b>   | Displays the mode of payment for the interest refunds.                                                                                                                                                     |

### All Associated Parties tab

A tab is displayed for each party linked to the program with invoices associated with them. If the Anchor of the Program is logged in, then the linked counter parties are listed. If a counter party of the Program is logged in, then the Anchor party is listed.

|                          |                                                   |
|--------------------------|---------------------------------------------------|
| <b>Party Name and ID</b> | Displays the name and ID of the associated party. |
|--------------------------|---------------------------------------------------|

### Program Attributes

|                                |                                                                                                            |
|--------------------------------|------------------------------------------------------------------------------------------------------------|
| <b>Auto Finance Applicable</b> | Displays whether the receivables/payables raised under the product will be automatically financed, or not. |
|--------------------------------|------------------------------------------------------------------------------------------------------------|

|                                  |                                                                    |
|----------------------------------|--------------------------------------------------------------------|
| <b>Preferred Settlement Mode</b> | Displays the preferred mode of transferring the settlement amount. |
|----------------------------------|--------------------------------------------------------------------|

|                                    |                                                                 |
|------------------------------------|-----------------------------------------------------------------|
| <b>Preferred Disbursement Mode</b> | Displays the preferred mode of transferring the finance amount. |
|------------------------------------|-----------------------------------------------------------------|

| Field Name                                  | Description                                                                                                                                                                         |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Minimum Finance %</b>                    | Displays the minimum percentage (of invoice amount or purchase order amount) allowed for availing finance under the program.                                                        |
| <b>Maximum Finance %</b>                    | Displays the maximum percentage (of invoice amount or purchase order amount) allowed for availing finance under the program.                                                        |
| <b>Minimum Tenor (Days)</b>                 | Displays the minimum length of time for a finance availed under this program.                                                                                                       |
| <b>Maximum Tenor (Days)</b>                 | Displays the maximum length of time for a finance availed under this program.                                                                                                       |
| <b>Stale Period (Days)</b>                  | Displays the period in days after which the receivable/payable becomes stale and cannot be financed any more.                                                                       |
| <b>Minimum Waiting Period (Days)</b>        | Displays the minimum length of time for a finance availed under this program.                                                                                                       |
| <b>With Recourse</b>                        | Displays the value of With Recourse as fetched from the host.                                                                                                                       |
| <b>Grace Days</b>                           | Displays the number of days allowed as grace period. It is the period over and above the due date during which the payment may be done by the borrower without penalty or interest. |
| <b>Interest Bearing Party</b>               | Displays the name of the interest bearing party.                                                                                                                                    |
| <b>Liquidation order for Auto Debit</b>     | Displays the auto-debit liquidation order in case partial funds are debited from the payment party on auto-debit.                                                                   |
| <b>Auto Debit Applicable</b>                | Displays whether auto debit is applicable for finance repayment.                                                                                                                    |
| <b>Holiday Treatment for Future Funding</b> | Displays how the finance disbursement date is handled if it falls on a bank holiday.                                                                                                |

Click **Back** to navigate back to the previous screen.

## Spoke Party who is also the Borrower

The View Program details screen can only be viewed in the following cases:

- If the logged-in party is the 'Anchor' party.
- If the logged-in party is the 'Spoke' and the 'borrower' in the program. Spokes who are not borrowers in a program cannot view the program details.

If the logged-in party is a 'Spoke' and the borrower in the program, then the Program Details screen appears as shown below:

| <b>Program Details</b>                       |                                                                                                                                                                                                             |
| <b>Valid From</b>                            | Displays the date from when the SCF program has been active.                                                                                                                                                |
| <b>Valid To</b>                              | Displays the date until when the SCF program will be active.                                                                                                                                                |
| <b>Auto Acceptance Invoice Applicability</b> | Displays the value of auto acceptance of invoices/purchase orders as fetched from the Host. Informs whether auto acceptance of invoices / purchase orders is applicable or not.                             |
| <b>Auto Acceptance Days</b>                  | Displays the number of days in which the invoices/purchase orders will be deemed as accepted, if not explicitly accepted by the buyer/supplier.                                                             |
| <b>Auto Finance Applicability</b>            | Displays whether the invoices/purchase orders raised under the program will be auto financed or not. If Yes, all invoices/purchase orders uploaded under the program will be auto financed post acceptance. |
| <b>Disbursement Currency</b>                 | Displays the disbursement currency for the program.                                                                                                                                                         |
| <b>Disbursement Mode</b>                     | Displays the disbursement mode for the program.                                                                                                                                                             |
| <b>Comments</b>                              | Displays the comments added for the program as fetched from the host.                                                                                                                                       |

#### **Receivables/Payables Due widget**

This widget displays the receivables/payables amounts in local currencies that are due each day for the current month. You can select the required option from the dropdown menu on the top of the widget, to view these details for the next month, the next 3 months, the next 6 months, and so on. This dropdown menu also provides an option to view overdue receivables/payables amounts. You can view the receivables/payables amounts of other currencies, using the 'Select currency' dropdown on the top of the widget.

---

**Note:** Receivables Due widget is displayed if the spoke is a supplier. Payables Due widget is displayed if the spoke is a buyer.

### Program Attributes

**Preferred Settlement Mode** Displays the preferred mode of transferring the settlement amount.

**Minimum Finance %** Displays the minimum percentage (of invoice amount or purchase order amount) allowed for availing finance under the program.

**Maximum Finance %** Displays the maximum percentage (of invoice amount or purchase order amount) allowed for availing finance under the program.

**Minimum Tenor (Days)** Displays the minimum length of time for a finance availed under this program.

**Maximum Tenor (Days)** Displays the maximum length of time for a finance availed under this program.

**Stale Period (Days)** Displays the period in days after which the receivable/payable becomes stale and cannot be financed any more.

**Minimum Waiting Period (Days)** Displays the minimum length of time for a finance availed under this program.

**With Recourse** Displays the value of With Recourse as fetched from the host.

|                                                     |                                                                                                                                                                                     |
|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Grace Days</b>                                   | Displays the number of days allowed as grace period. It is the period over and above the due date during which the payment may be done by the borrower without penalty or interest. |
| <b>Interest Bearing Party</b>                       | Displays the name of the interest bearing party.                                                                                                                                    |
| <b>Assignment Applicable</b>                        | Displays whether the assignment on invoice is applicable for financing.                                                                                                             |
| <b>Auto Assignment</b>                              | Displays whether the assignment is performed automatically post invoice upload.                                                                                                     |
| <b>Acceptance Applicable</b>                        | Displays whether the receivables/payables raised under the product is applicable for financing.                                                                                     |
| <b>Two Factor Applicable</b>                        | Displays whether the two-factor system is applicable for the program in case the anchor is trading with foreign buyers/suppliers.                                                   |
| <b>Insurance Applicable</b>                         | Displays whether the insurance is applicable for the program.                                                                                                                       |
| <b>Liquidation order for Auto Debit</b>             | Displays the auto-debit liquidation order in case partial funds are debited from the payment party on auto-debit.                                                                   |
| <b>Auto Debit Applicable</b>                        | Displays whether auto debit is applicable for finance repayment.                                                                                                                    |
| <b>Holiday Treatment for Future Funding</b>         | Displays how the finance disbursement date is handled if it falls on a bank holiday.                                                                                                |
| <b>Liquidate Pre-Shipment Finances</b>              | Displays whether linking of Pre-Shipment programs is enabled.<br>This field is displayed only if the program is <b>Purchase Order</b> based program.                                |
| <b>Pre-Shipment Program</b>                         | Displays the list of pre-shipment programs for select supplier-buyer combination.<br><br>This field is displayed only if the program is <b>Purchase Order</b> based program.        |
| <b>Pre-Shipment Finance Liquidation Preferences</b> | Displays the liquidation preference selected for the pre-shipment finances.<br><br>This field is displayed only if the program is <b>Purchase Order</b> based program.              |
| <b>Minimum Assignment</b>                           | Displays the minimum percentage of assignment allowed for financing a transaction of this spoke.                                                                                    |
| <b>Maximum Assignment</b>                           | Displays the maximum percentage of assignment allowed for financing a transaction of this spoke.                                                                                    |

---

|                                       |                                                                                                                                   |
|---------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>Insurance Company</b>              | Displays the name of the insurance company linked to the spoke.                                                                   |
| <b>Import Factor</b>                  | Displays the import factor linked to the spoke.                                                                                   |
| <b>Repayment Parameters</b>           |                                                                                                                                   |
| <b>Pre Payment Allowed</b>            | Displays whether the finance can be repaid prior to the finance maturity date.                                                    |
| <b>Part Payment Allowed</b>           | Displays whether the finance can be repaid in parts.                                                                              |
| <b>Reconciliation Towards</b>         | Displays what the reconciliation is matched against.                                                                              |
| <b>On Due Date</b>                    | Displays the order in which the principal, and the interest is paid on the finance maturity date.                                 |
| <b>After Due Date</b>                 | Displays the order in which the principal, interest, and overdue interest is paid post the finance maturity date.                 |
| <b>Before Due Date</b>                | Displays the order in which the principal, and the interest is paid prior to the finance maturity date.                           |
| <b>Non Performing Assets</b>          | Displays the order in which the principal, interest, and overdue interest is paid if the finance repayment gets defaulted/missed. |
| <b>Auto Settlement Applicable</b>     | Displays whether the finance availed against receivables/payables under the product will be settled automatically.                |
| <b>Excess Refund Payment Handling</b> | Displays how the excess payment made towards settling of outstanding invoice/finance, is handled.                                 |
| <b>Excess Refund Party</b>            | Displays the party to whom the excess refund amount is credited.                                                                  |
| <b>Excess Refund Payment Mode</b>     | Displays the mode of payment for the excess refunds.                                                                              |
| <b>Margin Handling</b>                | Displays how the margin refund is handled.                                                                                        |
| <b>Margin Refund Payment Mode</b>     | Displays the mode of payment for the margin refunds.                                                                              |
| <b>Interest Refund Handling</b>       | Displays how the interest refund is handled.                                                                                      |
| <b>Interest Refund Payment Mode</b>   | Displays the mode of payment for the interest refunds.                                                                            |

## 4.2.2 Edit Program

Using this option, you can edit the program created by you to make required changes, if you are an Anchor. When a program is selected for editing, the values of the program, as fetched from the Host, are displayed.

For example, if a program is in the 'Modified' status and if you select this program for re-editing, then the values that were previously modified but not authorized, are displayed. You can then re-modify these as required. Programs in the 'Initiated', 'Closed', or 'Others' status, cannot be edited.

---

**Note:** Only a user of the Anchor party, who has access rights to create a program, can edit it. Counter party users will not be able to edit (or create) programs.

---

### How to reach here:

*Dashboard > Toggle menu > Supply Chain Finance > Program Management > View / Edit Program*  
OR

*Dashboard > Toggle menu > Supply Chain Finance > Overview > Quick Links > View Program*

### To edit a program:

1. The **Select Role** popup appears.

2. Select the **Buyer** or **Supplier** option to view your data in terms of Payables or Receivables.
3. Click **Proceed** to view the existing programs. The **View Program** screen appears.  
OR  
Click **Cancel** to cancel the transaction.

## Repayment Parameters

### Excess Payment Handling

Select how to handle any excess payment made towards the settlement of an outstanding invoice/finance.

The options are:

- Auto-Reconcile
- Auto-Reconcile and Refund
- Manually Reconcile

Refund to beneficiary or payment party

### Excess Payment Refund Party

Select the party to refund the excess amount.

The options are:

- Beneficiary/Counter Party
- Payment Party

This field is enabled only if **Refund to beneficiary or payment party** is selected in the Excess Payment Handling.

### Excess Payment Refund Mode

Select the mode of payment for the excess payment refund.

The options are:

- Account Transfer
- Cheque
- EFT

This field is enabled only if **Refund to beneficiary or payment party** is selected in the Excess Payment Handling.

### Margin Amount Handling

Select how the margin should be handled. Margin is generated when invoice payment is made against financed invoices where finance amount is less than the invoice amount. Margin Amount can then be utilized as per options listed.

The options are:

- Refund to the Supplier
  - Settle with Outstanding Finances
  - Manually Settle O/s Finances
  - Auto-Settle and Refund to Supplier
-

**Margin Amount  
Refund Mode**

Select the mode of payment for the margin amount refund.

The options are:

- Account Transfer
- Cheque
- EFT

This field is enabled only if **Refund to the Supplier or Auto-Settle and Refund to Supplier** is selected in the Margin Amount Handling.

**Interest Refund  
Handling**

Select how the interest refund should be handled. Interest is refunded in cases where interest is front ended and collected upfront. During settlement before maturity the interest needs to be refunded based on this maintenance.

The options are:

- Auto-Settle and Refund to IBP
- Manually Settle O/s Finances
- Refund to the Interest Bearing Party

Settle with Outstanding Finances

**Interest Refund  
Payment Mode**

Select the mode of payment for the interest amount refund.

The options are:

- Account Transfer
- Cheque
- EFT

This field is enabled only if **Refund to the Interest Bearing Party or Auto-Settle and Refund to IBP** is selected in the Interest Refund Handling.

- 
8. Modify the details in the **Program Parameters** tab.
  9. Click **Next** to navigate to the **Link Counter Parties** tab. The screen displays all onboarded counter parties created by the anchor.  
OR  
Click **Cancel** to cancel the transaction.

10. De-link or add new counter parties in the **Link Counter Parties** tab. Delink is possible only when there are no outstanding invoices for the counter party.

**Note:** Click **Select All** to select all counterparties in the list. Click **Deselect All** to deselect all selected counterparties.

11. Click the **View/Edit Attributes** link to update the attributes for each of the selected counterparty(ies). For more information, refer to [View/Edit Attributes](#) section.
12. Click **Submit** to submit the new changes. The Review screen appears.  
OR  
Click **Cancel** to cancel the transaction.  
OR  
Click **Back** to navigate back to the previous screen.
13. In the Review screen, verify the details, and click **Confirm**. A Confirmation message regarding the update of the program appears along with the reference number.  
OR  
Click **Back** to navigate back to the previous screen.  
OR  
Click **Cancel** to cancel the transaction.

---

**Note:** Once the **Edit Program** transaction is submitted by the Corporate Maker, it is sent for approval. It appears in the **Pending for Approval** list of the Corporate Approver. The Approver can approve, or reject, or send the transaction back to the Maker for modifications, with relevant comments. Corresponding notifications are sent to the Maker.

The Maker can then view, claim, and edit the transaction. Upon modification, it can be submitted for approval again. The Approver again has the option to approve, reject or send the transaction back for modification. There is no limit to the number of times the transaction can be sent back for modification.

Once approved, the transaction appears in the Approver's **My Approved List**.

## 5. Finance Management

Finance is required for working capital or any other liquidity requirements of the corporate.

Enabling corporates to avail finance is an integral part of Supply Chain Finance. Using this module corporates can initiate a request to avail finance against their accepted invoices and purchase orders. The request can be initiated through the portal against a single or multiple invoices/purchase orders.

### 5.1 Request Finance

Using this option, corporates can raise funds from the bank, for business activities like paying off liabilities, or gaining liquidity to start production of a new order. These funds are arranged by availing finance against invoices/purchase orders.

The corporate user can avail finance against multiple invoices/purchase orders associated with a particular 'program and counter party' combination. Finance can only be availed by the borrower in the program. The borrower is determined by the Program Type selected during the creation of the Program.

#### **Pre-requisites**

- User must have valid corporate login credentials.
- The borrowing party must be set as the borrower in the program associated with the invoice/purchase order.

#### **How to reach here:**

*Dashboard > Toggle menu > Supply Chain Finance > Finance Management > Request Finance*

#### **To request finance for an invoice/debit note or purchase order:**

1. In the **Request Finance** screen, select the instrument to be financed, whether **Invoice/Debit Note** or **Purchase Order**.

| <b>Purchase Order Amount</b>  | Displays the purchase order amount that is due.                             |

3. Select the check box(es) against the invoice(s)/debit note(s) or purchase order(s) to be financed.
4. Upload relevant documents.
5. Click **Request Finance**. The Review screen appears.  
OR  
Click **Cancel** to cancel the transaction.

Click  to cancel.

6. In the Review screen, verify the details, and click **Confirm**. A Confirmation message of request initiation appears along with the reference number.  
OR  
Click **Back** to navigate back to the previous screen.  
OR  
Click **Cancel** to cancel the transaction.
7. Click the **View Finances** link to view a list of finances with their status.  
OR  
Click the **Supply Chain Overview** link to go to the Supply Chain Finance dashboard.  
OR  
Click the **Go to Dashboard** link to go to the main dashboard.

## 5.2 **Finance Amendment**

A corporate user can initiate amendment of their finances directly from the portal. The corporate user is provided with the option to modify the tenor of the outstanding finances. By default, the Finance Amendment screen displays all the outstanding finances that can be selected for amendment. The user can select a single or multiple finances for amendment, in a single transaction.

---

**Note:** The corporate user will be able to view those finances where the logged in corporate party is the borrower, and the finance status is 'disbursed' or 'partially settled'.

---

### **Pre-requisites**

User must have:

- Valid corporate login credentials

### **How to reach here:**

*Dashboard > Toggle menu > Supply Chain Finance > Finance Management > Finance Amendment*

To amend a finance:

## Finance Amendment screen

Party Name  
ASTRA Corp | \*\*\*489

**Amend Maturity Date**

Any maturity date updated for a single invoice/debit note or purchase order will get overridden on apply

Maturity Date 

Apply Cancel

**Note:** If you amend multiple records, data modified will be applied across the selected records. If any record was modified individually, then the previously modified data will get overridden on clicking **Apply**.

7. Click **Apply** to save the details.  
OR  
Click **Reset** to reset the details.
8. Click **View Amendment** link. The **Compare Details** overlay window appears. Compare all the amended details and modify if required.

The screenshot shows the Futura Bank interface. The main screen is titled "Finance Amendment" for "ASTRA Corp | \*\*\*489". It shows a list of selected finances with columns: Associated Party, Program Name, Finance Start Date, and Finance Amount. The "Compare Details" overlay is open, showing a table with "Field Name", "New Value", and "Old Value".

| Field Name            | New Value    | Old Value    |
|-----------------------|--------------|--------------|
| <b>Basic Details</b>  |              |              |
| Finance Maturity Date | Apr 30, 2020 | Apr 28, 2020 |
| Past Due Date         | Apr 30, 2020 | Apr 28, 2020 |

9. Click **Submit**. The Review screen appears.  
OR  
Click **Cancel** to cancel the transaction.  
OR  
Click **Back** to go to the previous screen.

The screenshot shows the "Review" screen for the Finance Amendment. It displays a "List of selected Finances to Amend" with a table containing columns: Indicator, Finance Reference Number, Associated Party, Program Name, Finance Start Date, Financed Amount, Finance Maturity Date, Past Due Date, Status, and Action.

| Indicator | Finance Reference Number | Associated Party | Program Name     | Finance Start Date | Financed Amount | Finance Maturity Date | Past Due Date | Status    | Action |
|-----------|--------------------------|------------------|------------------|--------------------|-----------------|-----------------------|---------------|-----------|--------|
| P         | 004171022FI01770         | BL Corp          | ASTRA PO FINANCE | Jun 25, 2019       | GBP 100,000.00  | Jun 30, 2020          | Jun 30, 2020  | Disbursed | View   |

At the bottom, there are buttons for "Confirm", "Cancel", and "Back".

10. In the Review screen, verify the details, and click **Confirm**. A confirmation message appears with the reference number and status of the transaction.  
OR  
Click **Cancel** to cancel the transaction.  
OR  
Click **Back** to navigate back to the previous screen.

11. Click **View Finances** to view a list of all the finances.  
OR  
Click **Finance Amendment** to go to the Finance Amendment screen.  
OR  
Click **Home** to go to the main dashboard.

---

**Note:** Once the **Finance Amendment** transaction is submitted by the Corporate Maker, it is sent for approval. It appears in the **Pending for Approval** list of the Corporate Approver. The Approver can approve, or reject, or send the transaction back to the Maker for modifications, with relevant comments. Corresponding notifications are sent to the Maker.

The Maker can then view, claim, and edit the transaction. Upon modification, it can be submitted for approval again. The Approver again has the option to approve, reject or send the transaction back for modification. There is no limit to the number of times the transaction can be sent back for modification.

Once approved, the transaction appears in the Approver's **My Approved List**.

---

## 5.3 View Finances

Using this option, the corporate user can view all the finance details associated the corporate party. All those finances are displayed, where the logged-in party is the borrower. For a particular finance reference number, the user can also view additional details such as, invoices/purchase orders associated with the finance and details entered while requesting the finance.

**Note:** Finance details can also be viewed using the Chatbot feature, either on a web browser or the mobile banking application. For more information on inquiring about finances using Chatbot, refer **User Manual Oracle Banking Digital Experience Chatbot Mobile Banking Application**.

## Manage Columns (overlay window for View Finances)

This overlay window appears when you click  in the **View Finances** screen.

1. Enter the filter criteria.
2. Click **Filter**. A list of finances appears based on the search criteria.  
OR  
Click **Reset** to reset the filter parameters.

---

**Note:** 1) By default, the finance details associated with the Corporate ID are displayed.

2) In case you are viewing the finances on a mobile device, click  to filter and find the required finances.

---

3. To download the list of finances, click **Download** and select CSV/PDF.  
The **Select Columns** overlay screen appears.

## View Finances – Select Columns

The screenshot shows the 'View Finances' screen for 'Reindeer Corp | \*\*\*262'. It features a table with the following data:

| Indicator | Associated Party | Finance Reference Number | Program Name  | Finance Date | Due Date  | Transaction Reference Number | Finance Amount |
|-----------|------------------|--------------------------|---------------|--------------|-----------|------------------------------|----------------|
| I/B       | AugSupp          | 004200120L500078         | reqfinancelnv | 1/20/2020    | 4/10/2020 | 280418D9A789                 | GBP 10,000     |
| I/B       | AugSupp          | 004200120L500001         | reqfinancelnv | 1/20/2020    | 4/19/2020 | 0704E57FEF7C                 | USD 1,000      |
| I/B       | AugSupp          | 004260922L501140         | reqfinancelnv | 9/26/2022    | 5/6/2020  | 2211420CAA95                 | USD 271,600    |

The 'Select Columns' sidebar on the right lists the following columns with checkboxes:

- ☒ Indicator
- ☒ Associated Party
- ☒ Finance Reference Number
- ☒ Program Name
- ☒ Finance Date
- ☒ Due Date
- ☒ Transaction Reference Number

A 'Download' button is located at the bottom of the sidebar.

**Note:** In case you are viewing the finances on a mobile device, click  to download the list of finances.

4. Click **Download** to download the finance lists in CSV or PDF format with selected columns.
5. Click **Manage Columns**. Click  and drag to rearrange the columns or uncheck the checkbox to remove the columns.  
OR  
Click **Reset** to reset the columns.

**Note:** In case you are viewing the finances on a mobile device, click  to manage the columns in the list of finances.

6. Click on the **Finance Reference Number** link to view the finance details. The **View Finance** screen with additional details of that particular finance record appears.

### 5.3.1 View Finance Details

The View Finance Details screen consists of the following tabs:

- Outstanding Details
- Disbursement Details
- Settlement Details
- Linked Invoices/Debit Notes or Linked Purchase Orders
- Charges
- Interest Payment Schedule
- Refund
- Amendment Details

| This tab appears when the finance settlement is successfully executed. There can be multiple settlements against a single finance so multiple records will be displayed. Records will be multiple when a pre shipment loan is settled by availing a post shipment loan. Similarly, if the settlement has been reversed by Host for any reason, then the tab will display two records, one of settlement and the other of settlement reversal. |                                                                                                                                                                                                                                                                                                             |
| <b>Settlement Reference Number</b>                                                                                                                                                                                                                                                                                                                                                                                                            | Displays the reference number of the settlement, as fetched from the Host.                                                                                                                                                                                                                                  |
| <b>Value Date</b>                                                                                                                                                                                                                                                                                                                                                                                                                             | Displays the value date of the settlement, as fetched from the Host.                                                                                                                                                                                                                                        |

| <b>Sequence Number</b>             | Displays the current sequence of the amendment transaction carried out on a finance.                                |
| <b>Amendment Date</b>              | Displays the date of the amendment transaction.                                                                     |
| <b>Value Date</b>                  | Displays the value date by when the updated interest rate gets applied.                                             |
| <b>Maturity Date</b>               | Displays the maturity date of the finance.                                                                          |
| <b>Past Due Date</b>               | Displays the due date post the initial finance maturity date.<br>Past Due Date = Finance Maturity Date + Grace Days |
| <b>Interest Amount</b>             | Displays the interest to be charged against the outstanding principal amount.                                       |
| <b>Penalty on Principal Amount</b> | Displays penalty if any, against the outstanding principal amount.                                                  |
| <b>Penalty on Interest Amount</b>  | Displays penalty if any, against the outstanding interest amount.                                                   |

7. Click **Repay Finance** to settle the finance, if required. The **Finance Repayment** screen appears. For more information, refer the [Finance Repayment](#) transaction.

---

**Note:** The **Repay Finance** button appears only if there is an outstanding amount to be repaid, and if the status of the Finance is **Disbursed**.

---

OR

Click **Cancel** to cancel the transaction and navigate to the dashboard.

OR

Click **Back** to navigate to the previous screen.

## 5.4 **Finance Repayment**

A corporate user can initiate repayment of their finances directly from the portal. The settlement is effected from the settlement account (debit account) configured with the bank. The corporate user is provided the option to select a different currency to settle their finances, rather than the finance currency. A currency conversion is performed, in this case. By default, the Finance Repayment screen displays all the outstanding finances that can be selected for settlement. The user can select a single or multiple finances for settlement, in a single transaction.

---

**Note:** The corporate user will be able to view those finances where the logged in corporate party is the borrower and the finance status is 'disbursed' or 'partially settled'.

---

### **Pre-requisites**

User must have:

- Valid corporate login credentials
- Configured account with the bank for settlement

### **How to reach here:**

*Dashboard > Toggle menu > Supply Chain Finance > Finance Management > Finance Repayment*

### **To repay/settle a finance:**

1. From the **Settlement Currency** list, select the required currency for repayment of finance.
2. From the **Account Name** list, select the required debit account from which the outstanding finance will be settled.
3. To filter the finances, click  and enter the filter criteria. A list of finances displays based on the search criteria.

7. In the Review screen, verify the details, and click **Confirm**. A Confirmation message regarding repayment of finance initiation appears along with the reference number.  
OR  
Click **Cancel** to cancel the transaction.  
OR  
Click **Back** to navigate back to the previous screen.

8. Click **View Finances** to view a list of all the finances.  
OR  
Click **Supply Chain Overview** to go to the Supply Chain Finance dashboard.  
OR  
Click **Home** to go to the main dashboard.

---

**Note:** Once the **Finance Repayment** transaction is submitted by the Corporate Maker, it is sent for approval. It appears in the **Pending for Approval** list of the Corporate Approver. The Approver can approve, or reject, or send the transaction back to the Maker for modifications, with relevant comments. Corresponding notifications are sent to the Maker.

The Maker can then view, claim, and edit the transaction. Upon modification, it can be submitted for approval again. The Approver again has the option to approve, reject or send the transaction back for modification. There is no limit to the number of times the transaction can be sent back for modification.

Once approved, the transaction appears in the Approver's **My Approved List**.

---

## **FAQ**

### **1. Where do I get the detailed information of Invoices?**

You can refer the Manage Invoices section in **User Manual Oracle Banking Digital Experience Receivables Payables Management** to get detailed information about invoices.

### **2. Where do I get the detailed information of Purchase Orders?**

You can refer the Purchase Order Management section in **User Manual Oracle Banking Digital Experience Receivables Payables Management** to get detailed information about purchase orders.

### **3. Where do I get detailed information of Associated Parties?**

You can refer the Associated Party Management section in **User Manual Oracle Banking Digital Experience Receivables Payables Management** to get detailed information about associated parties.

## 6. Link Receivables/Payables to Program

Using this screen, a corporate user from the Anchor party can link receivables/payables to programs. The receivables/payables can be invoices or debit notes. Receivables/payables must be linked to a program in order to be financed. Only the Anchor of the program will be able link the receivables/payables to the program. A counter party who has login access to the channel will not be able to link the receivables/payables.

### Pre-requisites

User must have valid corporate login credentials.

### How to reach here:

*Dashboard > Toggle menu > Supply Chain Finance > Link Receivables/Payables to Program*

### To link receivables/payables to a program:

↑ **Link Receivables/Payables to Program**

5. Click **Home** to go to the dashboard.  
OR  
Click **View Receivables/Payables** to view a list of existing receivables/payables.  
OR  
Click **Link Receivables/Payables to Program** to link receivables/payables to programs.

---

**Note:** Once the **Link Receivables/Payables Program** transaction is submitted by the Corporate Maker, it is sent for approval. It appears in the **Pending for Approval** list of the Corporate Approver. The Approver can approve, or reject, or send the transaction back to the Maker for modifications, with relevant comments. Corresponding notifications are sent to the Maker.

The Maker can then view, claim, and edit the transaction. Upon modification, it can be submitted for approval again. The Approver again has the option to approve, reject or send the transaction back for modification. There is no limit to the number of times the transaction can be sent back for modification.

Once approved, the transaction appears in the Approver's **My Approved List**.

---

## **FAQ**

### **1. Who can all link receivables/payables to a program?**

Only an Anchor of a program can link receivables/payables to the program.

### **2. Why are there no associated parties to select from?**

If there are no associated parties onboarded by the logged-in corporate, then the associated party dropdown will not have any values.

## 7. Link Purchase Orders to Program

Using this screen, a corporate user from the Anchor party can link purchase orders to programs. Purchase Orders must be linked to a program to be financed. Only the Anchor of the program will be able link the purchase orders to the program. A counter party who has login access to the channel will not be able to link the purchase orders.

### Pre-requisites

User must have valid corporate login credentials.

### How to reach here:

*Dashboard > Toggle menu > Supply Chain Finance > Link Purchase Orders to Program*

### To link purchase orders to a program:

The screenshot shows the 'Link Purchase Orders to Program' interface within the Futura Bank system. The header includes the Futura Bank logo, a search bar with the placeholder 'What would you like to do today?', and a user profile icon labeled 'DB'. The main title 'Link Purchase Orders to Program' is displayed, along with the user's identity 'Reindeer Corp | \*\*\*262'. Below the title, there is a dropdown menu for 'Party Name' currently set to 'Reindeer Corp | \*\*\*262'. A 'Search By' section contains several filters: 'Associated Party' (set to 'All'), 'Reference Number' (text input), 'Purchase Order From Date' (calendar icon), 'Purchase Order To Date' (calendar icon), 'Currency' (dropdown), 'Purchase Order Amount From' (text input), 'Purchase Order Amount To' (text input), 'Purchase Order Available Amount From' (text input), and 'Purchase Order Available Amount To' (text input). At the bottom of the search filters are 'Search' and 'Clear' buttons. The footer contains the copyright notice: 'Copyright © 2006, 2023, Oracle and/or its affiliates. All rights reserved. [Security/Information] Terms and Conditions'.

## Field Description

| Field Name                             | Description                                                                                                                                                                   |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Link Purchase Orders to Program</b> |                                                                                                                                                                               |
| <b>Party Name and ID</b>               | Select the party name and ID from the dropdown list for which the purchase orders must be linked to program. By default, the primary party of the logged-in user is selected. |
|                                        | <b>Note:</b> Only accessible parties are displayed to the user.                                                                                                               |

10. Click **Home** to go to the dashboard.  
OR  
Click **View Purchase Orders** to view a list of existing purchase orders.  
OR  
Click **Link Purchase Orders to Program** to link purchase orders to programs.

---

**Note:** Once the **Link Purchase Orders to Program** transaction is submitted by the Corporate Maker, it is sent for approval. It appears in the **Pending for Approval** list of the Corporate Approver. The Approver can approve, or reject, or send the transaction back to the Maker for modifications, with relevant comments. Corresponding notifications are sent to the Maker.

The Maker can then view, claim, and edit the transaction. Upon modification, it can be submitted for approval again. The Approver again has the option to approve, reject or send the transaction back for modification. There is no limit to the number of times the transaction can be sent back for modification.

Once approved, the transaction appears in the Approver's **My Approved List**.

---

## 8. Transaction Tracker

This screen displays details of supply chain finance transactions that are in-flight or in-process. At present, only 'request finance' transactions are supported in the Transaction Tracker. Users can view the exact stage at which a transaction is in, at present, till it is completed. Each transaction is displayed as a tile, with the color-coded status. The transactions can also be viewed in a list format. Separate tabs are present for viewing 'In Progress' transactions and 'Rejected' transactions.

### Pre-requisites

- User must have valid corporate login credentials.

### How to reach here:

*Dashboard > Toggle menu > Supply Chain Finance > Transaction Tractor*

### To view transactions in the transaction tracker:

### Transaction Tracker

| <b>Transaction Tracker (details)</b> |                                                                                                    |
| <b>Party Name and ID</b>             | Displays the name and ID of the logged-in corporate party.                                         |
| <b>Reference Number Status</b>       | Displays the transaction reference number of the finance. Also displays the status of the finance. |
| <b>Application Type</b>              | Displays the type of transaction.                                                                  |
| <b>Transaction Date</b>              | Displays the date of initiation of the transaction.                                                |
| <b>Amount</b>                        | Displays the transaction amount.                                                                   |
| <b>Application Details</b>           |                                                                                                    |
| <b>Finance for</b>                   | Displays the type of receivable/payable that the finance has been raised for.                      |
| <b>Associated Party Name</b>         | Displays the name of the associated party linked to the receivable/payable.                        |

| Field Name                                           | Description                                                                                                                         |
|------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>Program Name</b>                                  | Displays the name of the program linked to the receivable/payable.                                                                  |
| <b>Currency in which the finance to be disbursed</b> | Displays the currency selected for finance disbursement.                                                                            |
| <b>Selected Receivable/Payable</b>                   |                                                                                                                                     |
| <b>Indicator</b>                                     | Displays an indicator to indicate what the receivable/payable is. Example - 'I' is displayed for invoices, and 'D' for debit notes. |
| <b>Reference Number</b>                              | Displays the reference number of the receivable/payable.                                                                            |
| <b>Due Date</b>                                      | Displays the date on which the receivable/payable should be fully paid.                                                             |
| <b>Amount</b>                                        | Displays the receivable/payable amount.                                                                                             |
| <b>Accepted Amount</b>                               | Displays the receivable/payable amount that has been accepted.                                                                      |
| <b>Outstanding Amount</b>                            | Displays the receivable/payable amount that is yet to be paid.                                                                      |
| <b>Amount in Disbursement Currency</b>               | Displays the receivable/payable amount in the currency selected for disbursement.                                                   |
| <b>Amount Requested for Finance</b>                  | Displays the finance amount that has been requested for paying off the receivable/payable.                                          |
| <b>Uploaded Documents</b>                            | Displays a list of documents that have been uploaded during finance request. Click on the document name to view it.                 |

- Once you've viewed the transaction details, click **Back** to go to the main **Transaction Tracker** page.

## Search (overlay window for Transaction Tracker)

This overlay window appears when you click the filter icon in the Transaction Tracker page.

The screenshot shows the Futura Bank Transaction Tracker interface. The main area displays a list of transactions with columns for Transaction ID, Transaction Date, Host Reference Number, and Amount. The Search overlay window is open on the right, featuring fields for OBDX Reference Number, Host Reference Number, Duration (a dropdown menu), Finance Amount Range (a dropdown menu with 'LAK' selected), and From/To amount fields. There are 'Apply' and 'Reset' buttons at the bottom of the overlay.

## Field Description

| Field Name                                             | Description                                                                                              |
|--------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Search</b>                                          |                                                                                                          |
| <b>OBDX Reference Number</b>                           | Enter the reference number of the finance transaction to be searched.                                    |
| <b>Host Reference Number</b>                           | Enter the reference number assigned by the host, of the transaction to be searched.                      |
| <b>Duration</b>                                        | Select the duration within which the transactions have been initiated.                                   |
| <b>Finance Amount Range<br/>Currency<br/>From - To</b> | Select the currency of the transaction and enter the 'From' and 'To' amounts for an amount range search. |

Once you enter the required search criteria, click **Apply**. Or click **Reset** to reset the filter criteria.

## 9. View Limits

Using this screen, a corporate customer can view the limits that have been set for the corporate party with respect to supply chain financing. Limits are assigned in a hierarchical format to the various entities involved, such as, anchor party, product, program, spoke party, and so on. The main entity or the anchor party is the topmost entity of the hierarchy. It is also referred to as the parent entity. The entities that form the next level of the hierarchy are its child entities. Similarly, the parent-child hierarchy can continue further based on the limit-setting requirement.

A corporate user from the anchor party can view those limits that are assigned to their party ID, including the associated parties, linked programs, and products. A corporate user from the associated party (spoke) can only view the limits assigned to their party ID and to the linked programs.

### Pre-requisites

User must have valid corporate login credentials.

### How to reach here:

*Dashboard > Toggle menu > Supply Chain Finance > View Limits*

### Field Description

| Field Name              | Description                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Entity Name</b>      | Displays the name of the entity, whose details are being viewed.                                                                                                                                                                                                                                                                                             |
| <b>Line Id</b>          | Displays the limit line ID obtained from the host.                                                                                                                                                                                                                                                                                                           |
| <b>Line Currency</b>    | Displays the limit line currency.                                                                                                                                                                                                                                                                                                                            |
| <b>Effective Date</b>   | Displays the effective date of the limit. The effective date of the limit of a child entity is always greater than or equal to that of its parent entity.                                                                                                                                                                                                    |
| <b>Expiry Date</b>      | Displays the expiry date of the limit. The expiry date of the limit of a child entity is always less than or equal to that of its parent entity.                                                                                                                                                                                                             |
| <b>Sanctioned Limit</b> | Displays the total limit amount assigned to the entity.                                                                                                                                                                                                                                                                                                      |
| <b>Blocked Limit</b>    | Displays the limit amount that has been blocked by any ongoing transactions.                                                                                                                                                                                                                                                                                 |
| <b>Available Limit</b>  | Displays the limit amount that is available to the entity.<br>Available Limit = Sanctioned Limit – Blocked Limit – Utilised Limit                                                                                                                                                                                                                            |
| <b>Utilised Limit</b>   | Displays the limit amount that has been utilised.                                                                                                                                                                                                                                                                                                            |
| <b>Interchangeable</b>  | Displays whether the limits assigned to the main parent entity can be fully transferred to each of its child entities. If this field displays true, then each child entity can have the same limits assigned to the parent entity. If this field displays false, then the sum of the limits of all child entities must not exceed that of the parent entity. |
| <b>Adhoc Details</b>    |                                                                                                                                                                                                                                                                                                                                                              |
| <b>Sanctioned Limit</b> | Displays the maximum amount that can be added on an adhoc basis, in case the available limit is insufficient for a particular transaction.                                                                                                                                                                                                                   |
| <b>Available Limit</b>  | Displays the adhoc amount available.<br>Adhoc Available Limit = Adhoc Sanctioned Limit - Adhoc Blocked Limit - Adhoc Utilised Limit                                                                                                                                                                                                                          |
| <b>Utilised Limit</b>   | Displays the adhoc amount that has been utilised.                                                                                                                                                                                                                                                                                                            |

## 10. Mobile Touchpoints

This functionality allows a corporate user to perform and view Oracle Banking Digital Experience – Supply Chain Finance transactions on the mobile screen.

**Note:** Functionality and Information displayed in each widget (columns, links, Graphs, charts, etc.,) depends on the access to Real Accounts user has. All features available on a web browser on desktop computers, such as, hyperlinks, search filters, download option, and so on, are also available on the mobile device. The details displayed on each program card are also the same as that on the web browser.

The below screens gives an idea how the data in widget will be shown on mobile screen:
