1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure. If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

3. Payments

The following sections in this document detail all the features offered to users through the payments module of the digital banking application.

A Note on Domestic (Local) Payments:

Local Payments are very region specific. For example NEFT is a network supported for local payments within India. The same will not be of any relevance in Europe. Similarly, SEPA is a network supported within Europe and will not have any relevance in Asia for local payments.

For Domestic (Local) Payments, the base product of Oracle Banking Digital Experience supports some local payments out of the box as mentioned in the Transaction Host Integration Matrix. Therefore more often than not, there will be a need for the implementation team to step in and implement the local network specific to the region that the bank is in.

The following sections in this document detail all the features offered to users through the payments module of the digital banking application.

Note: Payment Screens are NOT supported in the landscape mode of mobile applications and mobile browser.

Features Supported In Application

Payment features supported in application includes:

- Favorite Transactions
- Payee Setup
- Repeat Transfer
- Make Single Payment
- Make Multiple Payments
- Adhoc Payment
- Demand Draft Issuance
- Payment Inquiries

4. Manage Payees

The online banking application enables users to register and maintain payees (beneficiaries) towards whom payments are to be made frequently.

The 'Manage Payee' feature not only enables users to register payees, but also enables them to add accounts to a registered payee and view and delete the accounts of existing payees. Additionally, the user can also initiate a payment from this screen by selecting the option 'Pay' against a specific account of a payee.

Payee Maintenance is provided for following payment transactions:

- Bank Account
 - Internal Bank Account
 - Domestic Bank Account
 - International Bank Account
- Demand Drafts
 - Domestic Bank Account
 - International Bank Account

Payee Access Type:

User can specify payee access type while maintaining a payee. Payee access type decides if only creator of a payee or all users of a party can access a payee. Payee access type is categorized as 'Private' and 'Public'.

- Public: A Payee marked as 'Public' is visible to all the users mapped to the Party ID of the user who created a payee. While, all users of the party can view and use the payee while initiating payments, only the user who has created the payee, can edit and delete the payee.
- Private: A Payee marked as 'Private' is available to only the creator of the payee. Only the creator of the payee can use such payees while initiating payment and modify or delete the private payees.

Pre-Requisites

- Transaction access is provided to corporate user
- Approval rule set up for corporate user to perform the actions

Workflow

Features Supported In the application

Functions available on Payees are as follows:

- Create Payee
- View Payee
- Edit Payee (Access Type)
- Delete Payee

How to reach here:

Toggle menu > Payments > Payee > Manage Payees

4.1 Payee Summary

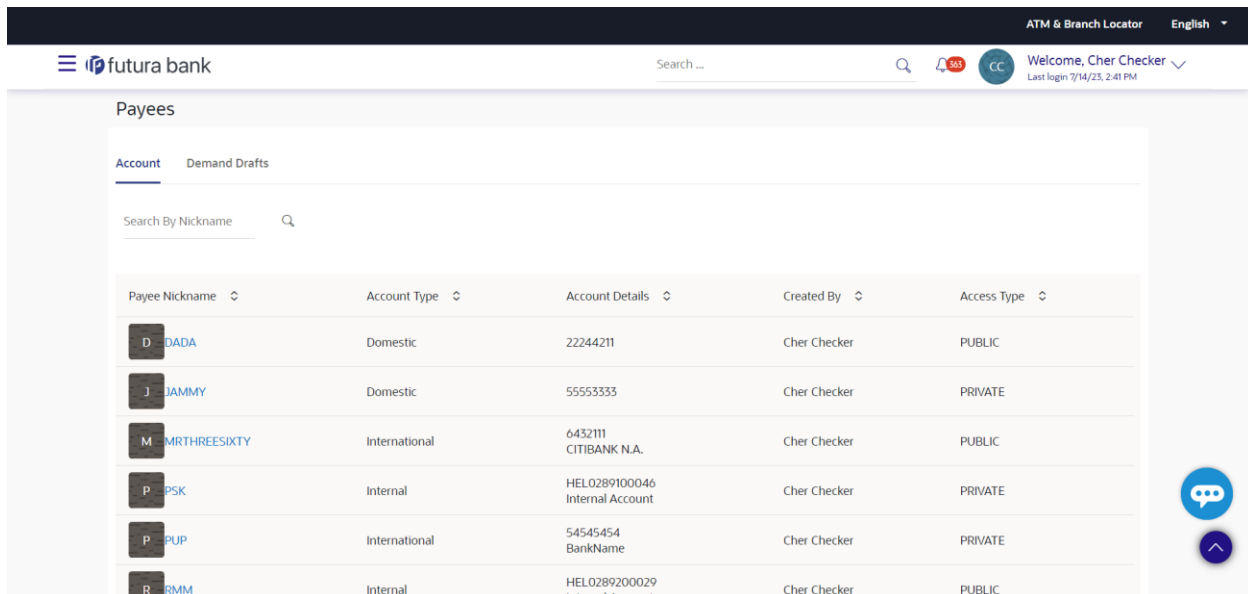

A summarized view of all the Payees maintained by the logged in user, along with the public payees created by other users of the Party, are listed on the Payee Summary screen. A separate section is provided on the screen to view the 'Accounts' payees and 'Demand Drafts' payees. By default, all the payees maintained (created by the logged in user and shared by other users of a party) under type 'Accounts' are listed on the screen.

Users can search for a specific payee by entering the nickname of the payee in the search field provided. The user is able to view payee details by selecting the provided option and is also able to edit (only access i.e. private or public and payee photo) or delete a payee record. Moreover, the option to add new account payees or new demand draft payees is also provided on this screen.

To manage payees:

1. All the registered payees are listed down by their nicknames, photos (if uploaded) and other details defined at the time of payee creation. If no photo has been uploaded against a payee, the initials of the payee appear in place of a photo.

6. Add Payee - Demand Draft

A Demand Draft is a pre-paid negotiable instrument. The issuing bank undertakes to make payment in full when the instrument is presented by the payee. The demand draft is made payable at a specified center and can be issued in local currency as well as in (allowed) foreign currencies. A foreign currency demand draft can be requested using International Demand Draft while a pay order or local currency demand draft can be requested using Domestic Demand Draft transaction. A Demand Draft, unlike a cheque is issued by the Bank against the Bank's own funds and hence there is a reduced risk of the draft not clearing. Application allows user to save the payee details of the draft through payee maintenance. Payees for demand drafts are of two types:

- Domestic Demand Draft
- International Demand Draft

The application also provides an additional option to have the demand draft delivered at the customer's convenience. The following options are provided for the same:

- Branch Near Me – This option enables the user to select a branch of the bank (issuing bank) at which the draft is to be delivered.
- My address – This option enables the user to specify which registered address of the user (out of the user's work, residential or postal address) the draft is to be delivered at.
- Other Address – This option enables the user to specify an address at which the draft is to be delivered. The user can select this option if he wishes to have the draft delivered to an address that is different from that of any of the bank's branches or any of the user's registered addresses.

FAQ

1. Can I delete payees that I no longer need to make payments to?

Yes. You can choose to delete the payees that you no longer need.

2. When can I make the payment to newly added payee?

After successfully adding a payee, you may proceed to transfer funds immediately or set a future date for the transaction to take place.

3. Who can access the payees created with access type as 'Private'?

Private payees can only be accessed by creator of the payee. Only creator of the payee can apply such payees while initiating payment.

4. Who can access the payees created with access type as 'Public'?

Payee marked as 'Public' are visible to all the users mapped to the Party ID of the user who created a payee. All users of the party will be able to view and use these payees while initiating payments, while only the creator will be able to edit and delete the payee.

5. If I delete or edit a payee, what will happen to the in-flight transactions?

Payee modification or deletion will not have any impact on the transactions which are initiated with a same payee and are pending for further processing. In-flight transactions will continue to progress with the data with which the transaction was initiated.

7. Adhoc Demand Draft

Users can initiate requests for demand drafts to be payable towards beneficiaries that are not registered as payees in the system, via the adhoc demand draft feature. Since the demand draft request is for an unregistered beneficiary, the user is required to specify details of the beneficiary along with demand draft details at the time of adhoc demand draft request.

Once the request for the demand draft is initiated, the user can register the beneficiary as a payee by selecting the Add as Payee option provided on the confirm screen.

Pre-Requisites

- Transaction and account access is provided to the corporate user.
- Transaction working window is maintained.
- Transaction limits are assigned to the user to perform the transaction.

8. Adhoc Payment

An adhoc transfer is one which is used to transfer funds from the user's account to a beneficiary/payee account which is not registered with the bank. Since the transfer is towards an unregistered beneficiary, the user is required to specify all the details of the beneficiary including bank and branch details (depending on the type of transfer) along with transfer details while initiating an adhoc transfer.

Pre-Requisites

- Transaction and account access is provided to the corporate user.
- Approval rules are set up for corporate user to perform the required actions.
- Transaction limits are assigned to the user to perform the transaction.

Workflow

Features Supported In the application

The following types of transactions are supported under Adhoc Payments

- Internal Transfer
- Domestic Transfer
- International Transfer

How to reach here:

Toggle menu > Payments > Transfers > Transfers – Adhoc Payee

8.1 Adhoc Payment – Internal Fund Transfer

An Internal Bank Account transfer is a transfer to an account which is maintained within the Bank.

The screenshot shows the 'Transfers - Adhoc Payee' interface on the Futura Bank website. The page header includes navigation links for 'Viewer', 'ATM & Branch Locator', and 'English', along with a search bar and user information for 'SHAIL Kadam'. The main form area is titled 'Transfers - Adhoc Payee' and contains the following fields and options:

- Payment Type:** Three tabs: 'Internal' (selected), 'Domestic', and 'International'.
- Account Number:** A field containing '*****'.
- Confirm Account Number:** A field containing 'HEL0255000038'.
- Account Name:** A field containing 'Brian Lara'.
- Payee Email ID:** A field containing 'brian@exampleDomain.com'.
- Add Email ID:** A link to add a new email ID.
- Transfer From:** A dropdown menu showing 'xxxxxxxxxxxx0010'.
- Balance:** A label showing 'EUR908,022.23'.
- Pay By:** A dropdown menu showing 'Credit Account Currency'.
- Transfer Amount:** A field showing 'EUR 89.00' with a 'View Limits' link.
- Transfer When:** Radio buttons for 'Now' (selected) and 'Later'.
- Charges to be debited from Debit Account:** A checked checkbox.
- Customer Reference Number:** A field containing '987602176'.
- Note:** A text area containing 'Sample' with a character limit of 80.

At the bottom of the form, there are four buttons: 'Pay' (blue), 'Save As Draft' (grey), 'Cancel' (grey), and 'Back' (blue).

The data fields are almost the same as the ones seen in the Transfer Money transaction. The only additional data that needs to be input is the beneficiary account details.

Click **Pay** to initiate the transfer. This will lead you to a review screen where data input in the first screen can be reviewed.

The screenshot shows the 'Transfers - Adhoc Payee' review screen in the Futura Bank interface. At the top, there is a navigation bar with 'Viewer', 'ATM & Branch Locator', and 'English' options. The user is identified as SHAIL Kadam, with a last login time of 24 Feb 06:28 PM. A notification bell icon shows 1709 notifications, and a 'Clear all notifications' link is present.

The main content area is titled 'Transfers - Adhoc Payee' and features a yellow banner with an information icon and the text: 'Review of Transfers - Adhoc Payee. You initiated a request for Adhoc Payment. Please review details before you confirm!'.

The payment details are as follows:

- Payment Type:** Internal
- Account Number:** HELO253000038
- Account Name:** Brian Lara
- Payee Email ID:** brian@exampleDomain.com
- Transfer From:** xxxxxxxxxxxx0010
- Pay By:** Credit Account Currency
- Transfer Amount:** EUR89.00
- Charges:**
 - Corporate Social Responsibility : EUR10.00
 - Repair Charges : EUR1.78
 - Transaction Charges : EUR20.00
 - Tax on Transaction Charges : EUR0.20
- Transfer When:** 10 Dec 2021
- Account from which charges will be debited:** xxxxxxxxxxxx0010
- Customer Reference Number:** 987602176
- Note:** Sample

At the bottom of the form, there are three buttons: 'Confirm' (in a blue box), 'Cancel' (in a grey box), and 'Back' (a text link).

Two information pop-ups are visible on the right side of the screen:

- Information:** Cutoff is on 10 Dec 2021 23:59:00. The transaction will be processed on 10 Dec 2021.
- Information:** Suggestive Credit Date for this transaction is 10 Dec 2021.

The footer contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

OR

From the data entry screen, click on **Save as Draft** to save a draft of the input data. The system will let you assign a name to the Draft.

The screenshot displays the Futura Bank web interface. At the top left is the Futura Bank logo and a search bar. At the top right, it says "Welcome, Parag C" and "Last login 27 Jan 11:12 AM". Below the header, there is a "View Limits" link. The main form area includes a "Transfer When" section with radio buttons for "Now" (selected) and "Later". Below that is a "Customer Reference Number" field containing "45466789". A "Note" field contains the text "Internal Payment To Parag". At the bottom of the form are buttons for "Pay", "Save As Draft", "Cancel", and "Back". A modal dialog titled "Save Payment Draft" is open in the center, showing a "Draft Name" field with the text "Internal Payment" and two buttons: "Save" and "Cancel". At the very bottom of the page, there is a copyright notice: "Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. [Security|Information|Terms and Conditions]".

8.2 **Adhoc Payment – Domestic Fund Transfer**

The data fields are almost the same as the ones seen in the Transfer Money transaction. The only additional data that needs to be input is the beneficiary account details. Also, the user needs to select the network only once, as opposed to twice during the Transfer Money flow (Once during Payee Creation and once during the actual Payment)

8.3 **Adhoc Payment – International Fund Transfer**

For International Transfers the screen lets the user attach documents. OBDX supports configuring a list of mandatory/non-mandatory documents. Once configured, the list will show up on the screen.

Please note: There would be some operational and implementation effort required for document upload to work.

When the payment is submitted, the documents will be stored to a configured Document Store (DMS or DB or any other repository depending on the implementation). The document reference numbers will be passed to the back end payment processor along with the payment request.

9. Issue Demand Drafts

The Issue Demand Draft transaction enables users to request the bank to issue demand drafts towards payees. In order to initiate a demand draft issue request, the user has to first ensure that the payee i.e. the recipient of the demand draft is registered as a demand draft payee through the Manage Payees feature. Once the payee is registered, the user can initiate a request to the bank to issue a demand draft by specifying details such as the amount for which the draft is to be drawn, the account from which the funds are to be debited as well as the date on which the draft is to be drawn.

Prerequisites:

- Transaction and account access is provided to corporate user
- Approval rule set up for corporate user to perform the actions
- Transaction working window is maintained
- Required payees are maintained
- Transaction limits are assigned to user to perform the transaction

Features supported in the application

User can request for two types of drafts:

- Domestic Demand Draft – Where the draft is payable within a country
- International Demand Draft – Where the draft is payable outside country

How to reach here:

Toggle menu > Payments > Payments and Transfers > Issue Demand Drafts

OR

Dashboard > Quick Links > Issue Draft

9.1 Issue Demand Draft

A user can initiate a request for a Demand Draft using this transaction. All Demand Draft payees (Domestic and International Demand Draft payees) created by the logged in user and shared by other users of the party are listed for selection. Details of the selected payee are auto populated on the transaction screen. The user is then required to fill in details such as the source account to be debited, the amount for which the draft is to be drawn and the date on which the draft is payable, in order to initiate the demand draft request.

An E-Receipt gets generated on the successful completion of the transaction. The E-Receipt gets displayed in Activity Log detailed view.

Issue Demand Draft

The screenshot shows the 'Issue Demand Draft' form in the Futura Bank interface. The form includes the following fields and options:

- Favoursing:** N Nick
- Delivery Mode:** Branch Near Me
- Delivery Location:** FLEXCUBE UNIVERSAL BANK, Unit 1, Block A, California, GREAT BRITAIN
- Amount:** EUR, €1,000.00 (with a [View Limits](#) link)
- Scheduled On:** Now (selected), Later
- Transfer From:** xxxxxxxxxxxx0097
- Balance:** €20,156.67
- Note:** Monthly Pymt (68 Characters Left)

A **Note** box on the right contains the following text:

All the Demand Draft requests will be processed on the next working day.
 Drafts will be couriered to the defined delivery address within 3 to 5 business days.
 Any charges (including correspondent bank charges) will be deducted from your account.

At the bottom of the form, there are 'Issue' and 'Cancel' buttons, and a help button that says 'Hey, I am here to help if you need it!'.

OR

Click Add Favorite to mark the transaction as favorite. The transaction is added in the favorite transactions list. For more information on the favorite transactions feature, refer the section **Favorites** in this user manual.

OR

Click the **e-Receipt** link to download the electronic receipt. For more information refer the **e-Receipt** section in the ***Corporate Customer Services User Manual***.

FAQ

1. Can I initiate future dated demand draft issuance request?

You can initiate future dated demand draft issuance request using scheduling later option.

1. What happens if I have set up a future dated draft issuance request, but don't have enough funds in my account on the transaction date for the transfer?

Balance check will not be performed at the time of transaction initiation with future date. The transaction will get declined in case of insufficient funds in the account on the given transaction date.

2. What happens if the transaction amount is less than set Transaction Limit?

If the transaction amount is less or more than transaction limit set by the Bank, user cannot proceed to initiate demand draft issuance request.

3. Can I request for demand draft issuance a payee registered as my payee but Demand draft favouring name is different?

No, using this transaction, you can initiate a demand draft issuance request to existing payee and demand draft favouring details cannot be edited while initiating a request.

4. What happens when I add a transaction in my favorite list?

Once a transaction is marked as favorite it is displayed in customer's favorite list. Customer can directly initiate a transfer using favorite transactions; all the transaction details are displayed on screen auto populated. User can make required changes in the details and submit the transaction for processing.

5. How will I receive a physical copy of a demand draft?

Bank will operationally issue a draft and mail it to the address specified while maintaining a payee.

6. When can I generate an e-receipt?

The user can generate an E-receipt of the transaction, after transaction has been processed, in the Core Banking application.

10. Make Payment (Transfer Money)

Navigate to *Payments >> Transfers >> Transfers – Existing Payee*

The Transfer Money feature enables the user to initiate online payments between his own accounts or perform one of the following types by using an existing payee:

- Internal Transfer
- Domestic Transfer
- International Transfer

On selecting the option, 'Existing Payee', the user has to simply select a payee towards which the transfer is to take place. The user is not required to explicitly select the transfer type (internal, domestic or international) since this categorization is undertaken at the time of payee creation.

Prerequisites:

- Transaction and account access is provided to corporate user
- Approval rule set up for corporate user to perform the actions
- Payees are maintained
- Transaction limits are assigned to user to perform the transaction

Features supported in the application

The 'Transfer Money' feature enables users to make payments towards:

- Existing Payee – Internal, Domestic and International transfers are supported and are triggered based on the payee and specific payee account selection.
- My Accounts – Users are able to transfer funds within their own accounts held in the bank.

Interpreting the success message on the Confirmation Screen:

Please note that Payment Processors can work in different ways. Some Payment Processors will respond with the final status of the submitted payment synchronously. Some Payment Processors work in an asynchronous mode and respond back with a host reference number only to indicate that the payment has been accepted for processing, but there is a chance that it may get into an Exception Queue during the actual processing itself. Therefore the final status of the payment can be viewed using the transaction called [Payment Status Inquiry](#).

10.2 Suggestive Credit Value Date

The Payment framework provides the facility to display the suggestive credit value date on the review screen of a payment. This date is an indicative date only and it gives the end user an idea of when the payment would get credited to the payee's account, before he can confirm the transaction.

The service takes into account parameters like the network of payment, the currency etc. before arriving at the suggestive credit value date.

This service is currently available out of the box integrated only with Oracle Banking Payments. For other product processors a customization would be required.

12. MT101 Bilateral Agreement Upload

The MT101 module facilitates the transfer of funds, domestically and/or internationally by sending SWIFT MT101 instruction to the user's bank. A bank can play one of 2 possible roles in an MT101 instruction:

1. Executing Bank
2. Forwarding Bank

Executing Bank Agreement Upload

In this role, the MT101 instruction ends at the bank and it in turn leads the bank to initiate a payment (either a SWIFT or a local payment or an internal transfer)

For this case, the bank needs to have an agreement in place with the sender bank.

The screenshot displays the 'Inbound Agreement' configuration page. At the top, there is a navigation bar with a search field and user information: 'Welcome, Parag C' with a last login of '11/26/22, 11:16 AM'. The main content area is titled 'Inbound Agreement' and contains the following fields and tables:

- Party ID:** ***930
- Party Name:** PARAGCORPNEW
- Start Date:** 11/28/22
- End Date:** 11/30/22
- Cut Off Hour:** 1
- Cut Off Minute:** 1
- Allowed Accounts Table:**

Account ID	Currency	Account Name
<input checked="" type="checkbox"/> xxxxxxxxxxxx0016	EUR	
<input type="checkbox"/> xxxxxxxxxxxx0027	EUR	
<input type="checkbox"/> xxxxxxxxxxxx0038	EUR	
- Allowed Senders Table:**

Sender ID	Sender Name
<input type="checkbox"/> DEUTDEFFXXX	DEUTSCHE BANK AG

At the bottom of the form, there are three buttons: 'Submit', 'Cancel', and 'Back'. A footer at the very bottom contains the copyright notice: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved. [SecurityInformation] Terms and Conditions'.

A corporate user can define the debit accounts for which the agreement is to be in place and also the sender banks from whom instructions can be accepted for execution purposes.

The agreement will have a time period defined during which it will be treated as a valid agreement.

The agreements initiated from OBDX will be stored in OBPM and therefore will be effective for incoming MT101 transactions that hit OBPM for the executing bank scenario.

Forwarding Bank Agreement Upload

The screenshot shows a web interface for uploading an MT101 Outbound Agreement. At the top, there is a navigation bar with a search bar, a notification bell, and a user profile for 'Parag C' with the last login time '11/26/22, 11:16 AM'. The main heading is 'MT101 Outbound Agreement'. Below this, the form contains the following fields:

- Party ID:** ***930
- Party Name:** PARAGCORPNEW
- Start Date:** 11/28/22 (with a calendar icon)
- End Date:** 11/30/22 (with a calendar icon)
- Charge Account Number:** xxxxxxxxxxxx0016 (with a dropdown arrow)
- External Account Validation Required:** Yes (with a dropdown arrow)
- Receiver Bank:**
 - Receiver Bank Code:** DEUTDEFFXX
 - Receiver Bank Name:** DEUTSCHE BANK AG

At the bottom of the form, there are three buttons: 'Submit' (blue), 'Cancel' (grey), and 'Back' (blue). On the right side of the form, there is a blue chat bubble icon and a blue arrow pointing up.

The above screen lets a corporate user define the bilateral agreement in the outward leg of an MT101 instruction, when the bank is playing the role of a forwarding bank.

13. MT101 Instruction

The MT101 module facilitates the transfer of funds, domestically and/or internationally by sending SWIFT MT101 instruction to the user's bank. This allows users to debit funds from a single account and credit to multiple domestic and/or international accounts in a single transaction. On the MT101 Instruction screen, all tag option fields will be replaced with channels banking user friendly options. An MT101 Instruction consists of two parts:

- 3. General Information (Sequence A):** This is mandatory and contains debit party information like Sender's Reference, Instructing Party and Requested Execution Date.
- 4. Transaction Details (Sequence B):** This component is repetitive and must be present at least once in the message.

Standard approval flow (Maker -> Checker) is supported by the system, however, 'Send To Modify' feature is not supported. Bulk Uploads for MT101 Instructions are not in Oracle's scope. Please note, this transaction will only be supported on desktop/laptop devices.

Prerequisites:

- Transaction and account access are provided to the corporate user
- Approval rule set up for the corporate user to perform the actions
- Transaction working window is maintained
- Transaction limits are assigned to the user to perform the transaction
- External accounts to be added and mapped. Refer to section '16 - External Account'

14. Repeat Transfers

Repeat Transfers, also referred to as Standing Instructions or Standing Orders, are instructions given by a payer (bank account holder) to the bank to transfer a specific amount to another account at regular intervals.

Once initiated, these transfers are executed repeatedly till the end date.

The application has simplified the user's task of initiating repetitive payments by introducing the **Repeat Transfers** feature. Through this feature, users can set instructions for funds to be transferred at regular intervals towards registered payees or to the user's own accounts. Once initiated, the details of these transfers can be viewed in the View Repeat Transfers screen. The user can also cancel a repeat transfer instruction, if so desired, from the View Repeat Transfers screen.

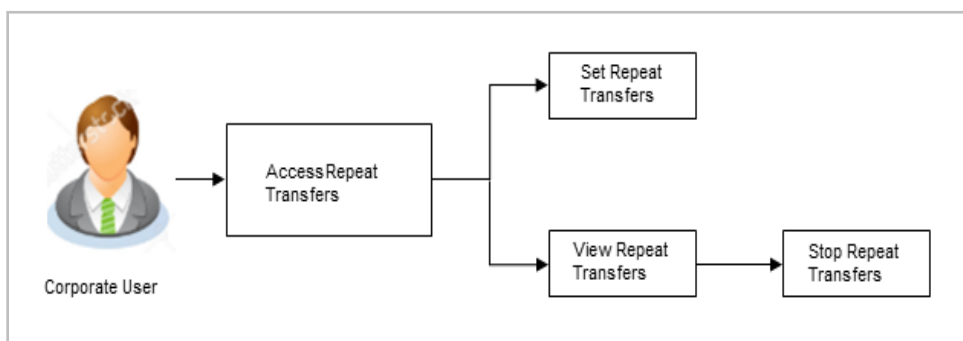

Pre-Requisites

- Transaction and account access is provided to the corporate user
- Approval rule set up for the corporate user to perform the actions
- Transaction limits are assigned to the user to perform the transaction

Features supported in the application

- Set Repeat Transfers
- View Repeat Transfers
- Stop Repeat Transfers

15. Positive Pay

Positive Pay is a process to deter cheque fraud. A person issuing cheques enters details of the cheques into the system. The details get verified when the issued cheque circles back to the issuer’s bank for clearing. Any discrepancy in the data cheque data entered on the system and the actual cheque received will result in payment being declined.

18. Payment Status Inquiry

The Payment Status Inquiry screen enables corporate users to review and keep track of all their payments. This feature displays details of all payments initiated from the current and savings accounts to which the user has access, irrespective of the channel from which they were initiated. These transactions can include internal, domestic (India region and SEPA) and international transfers along with transfers made to own accounts.

The Payment Status Inquiry summary screen lists down payment transactions based on search criteria defined in the provided search fields. Users can search for a payment record based on the account from which the transfer was initiated, reference number or even by defining a date range (date of initiation) or amount range. Users can also filter Future Dated transactions by checking the 'Show Only Future Dated Payments' checkbox. The number of transactions that are displayed on the Payment Status Inquiry summary screen by default, depends on the configuration set by the bank.

The user can view additional details of a payment by selecting the provided reference number link and navigating to the Payment Status Inquiry Details screen.

18.3 UETR Status Inquiry

For SWIFT Payments, OBDX supports a detailed status screen. One needs to know the UETR number in order to view the status of the payment.

It's available at *Payments >> Payment Inquiries >> UETR Status Inquiry*

The UETR reference number of an outbound payment can be seen in the details screen of Payment Status Inquiry. One can click on the reference number there itself to open up the UETR Status Inquiry screen.

For inbound payments though, one needs to visit this screen and enter the UETR reference number manually.

18.5 Payment Cloning

The “copy” icon on the Payment Status Inquiry table provisions the user to clone a payment. On click of the icon, the user will be redirected to the Adhoc Payments transaction with most of the data of the existing payment copied to the input fields.

This is to make it convenient for the end user to initiate the same payment again, on a different date. The cloning does not intend to stop the user from changing any of the data. Therefore it is just another Adhoc Payment transaction, and the user will be able to change any fields he wants to.

The feature, out of the box, will support International, Internal and SEPA Credit transfers only.

Having entitlements to Adhoc Payments is a pre-requisite for taking advantage of this feature.

For a Self-Transfer that was initiated from OBDX and visible in Payment Status Inquiry, clicking on the Clone button will open up the Adhoc Internal Payment page. This is because, from the bank's perspective both Self Transfer and Internal Transfer are payments between accounts within the bank.

The Payments seen in Payment Status Inquiry are a combination of all payments posted to the back end payments processor. The payments could have originated from other channels too, or directly from the payments processor itself. And therefore to repeat/copy the same payment at a later time, OBDX makes use of the Adhoc Payments transaction since the beneficiary information may not be present within OBDX as a payee.

The same option is also present in the details screen of a transaction in Payment Status Inquiry in the form of an “Initiate Again” button.

21. Saved Payment Drafts

Single onscreen payments/repeat transfers can be saved as Drafts, without actually submitting the transactions.

The saved payment drafts are listed under *Payments >> Saved Drafts*.

There is a search filter on the screen to enable users to search for specific drafts. One can select the Draft Type (Payment/Instruction) to view single payment drafts or repeat transfer drafts.

Choosing a Debit Account is mandatory in the search criteria.

The screenshot shows the 'Payment Drafts' search filter interface. At the top, there is a navigation bar with 'Approver', 'ATM & Branch Locator', and 'English' dropdowns. Below this is the Futura Bank logo and a search bar. The main content area is titled 'Payment Drafts' and contains several filter fields: 'Draft Type' (set to 'Payment'), 'Debit Account' (set to 'xxxxxxxxxxxx0019' with a balance of 'EUR9,989,542.08'), 'Transaction Type' (set to 'Internal Transfer'), and 'Draft Name'. At the bottom, there are 'Search' and 'Reset' buttons.

Search fields above are self-explanatory. Clicking on search will display the search results.

The screenshot shows the search results for 'Payment Drafts'. The table has columns for 'Draft Name', 'Transfer Type', 'Debit Account', 'Credit Account Details', and 'Amount'. The results show one draft: 'Internal Payment' with 'Internal Transfer' as the transfer type, 'xxxxxxxxxxxx0019' as the debit account, 'Parag Kinikar HEL0293000016' as the credit account details, and 'EUR120.00' as the amount. The page number is '1 of 1'.

Draft Name	Transfer Type	Debit Account	Credit Account Details	Amount
Internal Payment	Internal Transfer	xxxxxxxxxxxx0019	Parag Kinikar HEL0293000016	EUR120.00

Clicking on a draft will open up the corresponding payment screen (Adhoc Payment screens only). The user can then edit data – if needed – and then submit the transaction.

One can delete a draft by clicking on the “Delete” icon next to each draft in the listing screen.

Please note that if a user saves a payment draft in which he has selected account A1 as the debit account, and later the debit account is unmapped for the user, then the saved draft will not show up in this screen because the debit account itself will disappear from the search criteria.
