Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:
- To create and handle Export LC Closure Process.

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction initiation.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of Trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

ORACLE®

Export LC Closure - Islamic

As part of Conventional Export LC Close, System enables the user to Close the LC which had been already issued.

The various stages involved for Export LC Close are:

- Receive and verify documents and Input basic details(Non Online Channel)- Registration stage
- Upload of related mandatory and non-mandatory documents
- Input/Modify
- details of Close of LC - Data Enrichment stage
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Export LC Close process flow is similar to that of conventional Export LC Close process flow.

In the following sections, let's look at the details for Export LC closure process.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Multi Level Approval

Common Initiation Stage

The user can initiate the new Islamic Export LC closure request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click **Trade Finance > Initiate Task.**

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.

Field	Description
Advising Bank Reference	Select the advising bank reference.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

User can register request for Islamic Export LC closure in the Registration stage received at the front desk (as an application received physically/received by mail/fax). During Registration stage, user can capture the basic details of the application and upload the related documents of the applicant. On submit of the request, the request will be available for an LC close expert to handle the request in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

ORACLE®

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
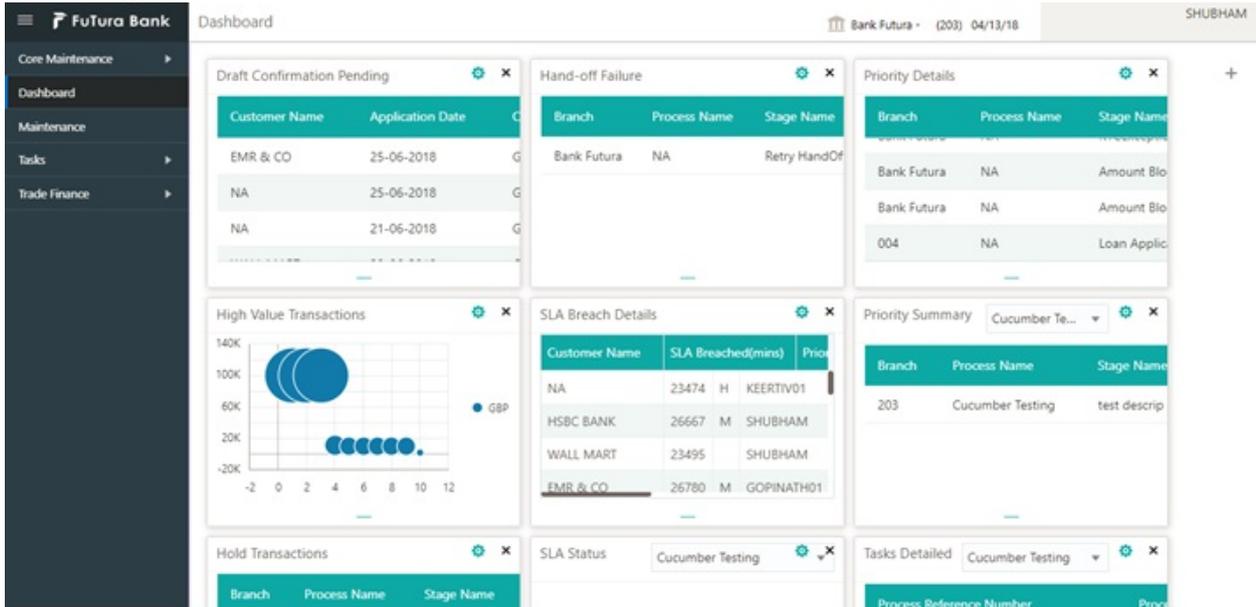

3. Click **Trade Finance - Islamic > Export - Documentary Credit > Export LC Closure - Islamic.**
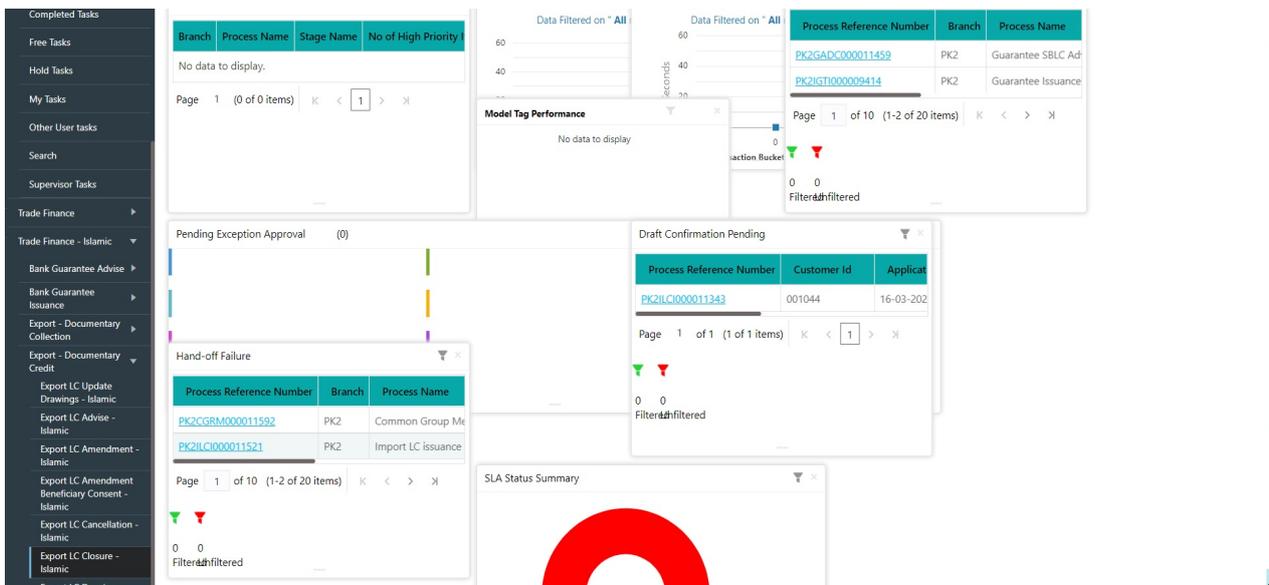

The Registration stage has two sections Application Details and LC Details. Let's look at the details of Registration screens below:

ORACLE®

Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. System displays the mandatory and optional documents that have been maintained in Document Maintenance. If mandatory documents are not uploaded, system should display an error on submit. The possible documents submitted under an Export LC closure request are: Export LC Closure Request	
Remarks	Provide any additional information regarding the amendment request. This information can be viewed by other users processing the request.	
Customer Instructions	Click to view/ input the following • **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	

ORACLE

Field	Description	Sample Values
View LC	Enables the user to view the latest snap shot of the LC details in a page.	
View LC Events	Enables the user to view the latest snap shot of the various events under the LC.	
Action Buttons		
Submit	On submit, task will get moved to next logical stage of Export LC Closure. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and displays the task in you queue for working later. This option will not submit the request.	
Cancel	Cancels the Export LC Closure Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from beneficiary/ customer and appropriate remarks must be provided.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit. Checklist ☐ Verified the documents uploaded/ linked ☐ Verified the Signature Save Checklist	
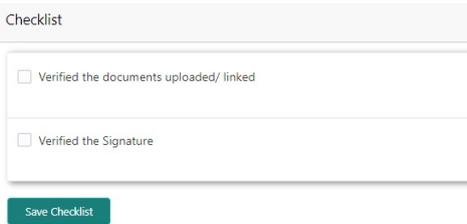

Data Enrichment

On successful completion of Registration of an Export LC Closure request, the task moves to Data Enrichment stage. At this stage the gathered information during Registration are scrutinized.

ORACLE®

As a part of Data Enrichment, the user can review and input/enrich Export LC closure request. The user can also verify the basic details of closure request and can verify if the request can be progressed further. The transaction will have the details entered during the registration stage.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

ORACLE®
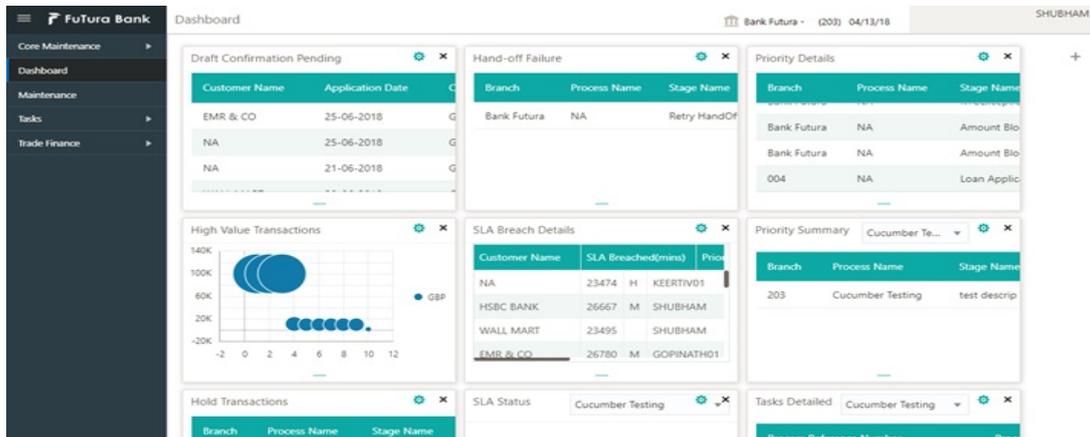

3. Click **Trade Finance> Tasks> Free Tasks.**

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to scrutinize the registered task.

The Data Enrichment stage has six sections as follows:

ORACLE

- Main Details
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following sections. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

Main details section has three sub section as follows:

- Application Details
- LC Details

This section provides a quick snapshot of details of LC. This Application section will be available in all the sections of Data Enrichment stage and the fields will be read only. This section is collapsible.

Application Details

All fields displayed under Application details section, would be read only except for the **Priority**. Refer to Application Details for more information of the fields.

Following fields are the additional new fields apart from the fields carried over from Application Details of Registration. Provide the details for the two additional fields based on the description in the following table:

Field	Description	Sample Values
52a Issuing Bank	This field displays the issuing bank as available in LC.	

LC Details

The fields listed under this section are same as the fields listed under the LC Details section in Registration. Refer to LC Details for more information of the fields. All fields displayed under LC Details section, would be read only.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	On click of Refer, user will be able to refer the task back to the selected stage user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	

ORACLE®

Field	Description	Sample Values
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from beneficiary/ customer and appropriate remarks must be provided.	
Cancel	Cancel the Data Enrichment stage inputs.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Documents	Upload the required documents. Application displays mandatory documents to be uploaded for export LC Closure. Place holders are also available to upload additional documents submitted by the applicant. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	Click to view/ input the following ● **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	

ORACLE®

Field	Description	Sample Values
View LC	Enables the user to view the latest snap shot of the LC details in a page.	
View LC Events	Enables the user to view the latest snap shot of the various events under the LC.	

Additional Fields

Any user defined fields mapped as per bank's requirement can be viewed in this section.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

ORACLE®

Field	Description	Sample Values
Refer	On click of Refer, user will be able to refer the task back to the any of the previous stages user. User must select a Refer Reason from the values displayed by the system. Refer Codes: ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from beneficiary/ customer and appropriate remarks must be provided.	
Cancel	Cancel the Data Enrichment stage inputs.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Documents	Upload the required documents. Application displays mandatory documents to be uploaded for export LC Closure. Place holders are also available to upload additional documents submitted by the applicant. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view the overrides accepted by the user.	

ORACLE®

Field	Description	Sample Values
Customer Instructions	Click to view/ input the following • **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View LC	Enables the user to view the latest snap shot of the LC details in a page.	
View LC Events	Enables the user to view the latest snap shot of the various events under the LC.	

Advices

This section defaults the advices maintained for the product/event simulated from the advices maintained at the Product level.

ORACLE®

The user can also suppress the Advice, if required.

Field	Description	Sample Values
Suppress Advice	**Toggle on**: Switch on the toggle if advice is suppressed. **Toggle off**: Switch off the toggle if suppress advice is not required for the amendments	
Advice Name	User can select the instruction code as a part of free text.	
Medium	The medium of advices is defaulted from the system. User can update if required.	
Advice Party	Value be defaulted from Export LC. User can update if required.	
Party ID	Value be defaulted from Export LC Advise. User can update if required.	
Party Name	Read only field. Value be defaulted from Export LC Advise.	
Free Format Text		
FTT Code	User can select the FFT code as a part of free text.	
FFT Description	FFT description is populated based on the FFT code selected.	
+	Click plus icon to add new FFT code.	
–	Click minus icon to remove any existing FFT code.	
Instruction Details		

ORACLE®

Field	Description	Sample Values
Instruction Code	User can select the instruction code as a part of free text.	
Instruction Description	Instruction description is populated based on the FFT code selected.
