Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export Documentary Collection Liquidation - Islamic

Export Documentary Collection Liquidation Islamic process facilitates the user to handle the payment to an exporter from an importer via an intermediary bank.

The process describes the various steps involved in Liquidation of Islamic Export Documentary Collection Bill.

The various stages involved for Export Doc Collection Liquidation are:

- Input application details and Upload of related documents (Non Online Channel) - Registration stage
- Input/Modify details of Collection Liquidation - Data Enrichment stage
- Check balance availability for amount block if applicable
- Check for sanctions & KYC status
- Create amount block if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Export Collection Liquidation process flow is similar to that of conventional Export Collection Liquidation process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

Common Initiation Stage

The user can initiate the new export documentary collection liquidation request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

The screenshot shows the Oracle OBTFPM application interface. The main content area is titled 'Initiate Task' and is in the 'Registration' stage. It features two dropdown menus: 'Process Name' with the value 'Islamic Export Documentary Coll...' and 'Branch' with the value 'PK2-Oracle Banking Trade Finan...'. At the bottom right of the form area, there are two buttons: 'Proceed' and 'Clear'. The left sidebar contains a navigation menu with the following items: Process Initiation, Re-Send Advice, Shipping Guarantee, Swift Processing, Trade 360 Degree, Trade Finance - Islamic (expanded), Bank Guarantee Advice, Bank Guarantee Issuance, Export - Documentary Collection (expanded), Export Documentary Collection Booking - Islamic, Export Documentary Collection Liquidation - Islamic, Export Documentary Collection Return - Islamic, and Export Documentary Collection Update Booking - Islamic. The top right of the page shows user information: '(DEFAULTIDENTITY)', 'Oracle Banking Trade Finan... May 3, 2021', and 'ZARTABOZ subham@gmail.com'.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

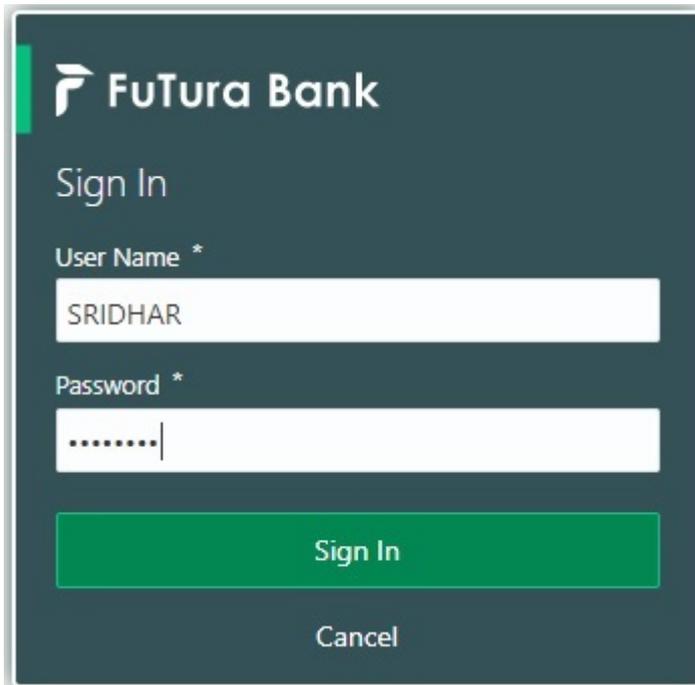

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

A User can register request for an Islamic Export Collection Liquidation at the front desk. During Registration stage, user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for trade finance expert to handle the request in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

Provide the Basic Details based on the description in the following table:

Field	Description	Sample Values
Documentary Collection Number	Provide the Documentary Collection Number. Alternatively, user can search the Documentary Collection Number using LOV. In the LOV, user can search giving any combination details of Documentary Collection Number, Drawer, Currency, Amount, Product Code and Booking Date to fetch the collection details. Based on the search result, select the applicable documentary collection to update the details.	
Drawer	Read only field. Drawer ID and Drawer Name will be auto-populated based on the selected Documentary Collection Number.	
Branch	Read only field. Branch details will be auto-populated based on the selected Documentary Collection Number.	203-Bank Futura -Branch FZ1
Bill Amount	Read only field. Bill currency and amount will be auto-populated based on the selected Documentary Collection Number.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Process Reference Number	Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.	

Field	Description	Sample Values
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit.	High
Submission Mode	Select the submission mode of Export Documentary Collection Liquidation request. By default the submission mode will have the value as 'Desk'. Desk- Request received through Desk Courier- Request received through Courier	Desk
Liquidation Date	By default, the application will display branch's current date.	04/13/2018
Version Number	This field displays the latest version of the bill.	

Collection Details

Registration user can provide collection details in this section. Alternately, details can be captured by Data Enrichment user.

Provide the Liquidation Details based on the description in the following table:

Field	Description	Sample Values
Documents Received	Read only field. Documents received details will be auto-populated based on the selected Documentary Collection Number.	
Tenor Type	Read only field. Tenor will be auto-populated based on the selected Documentary Collection Number.	
Product Code	Read only field. Product code will be auto-populated based on the selected Documentary Collection Number.	
Product Description	Read only field. This field displays the description of the product as per the product code.	

Field	Description	Sample Values
Operation Type	Operation Code will be auto-populated from the collection booking. User can update the operation code, if required.	
Contract Reference Number	System to populate contract reference number from the back end system once the Documentary Collection Number is selected.	
Drawee	Read only field. Drawee ID and Drawee Name will be auto-populated based on the selected Documentary Collection Number.	
Collecting Bank	Read only field. This field displays the Collecting Bank ID and name as per the collecting bank ID.	
Bill Outstanding Amount	Read only field. Bill Outstanding Amount will be auto-populated based on the selected Documentary Collection Number.	
Liquidation Amount	Provide the bill amount to be liquidated.	
Finance Amount	Read only field. Finance Amount will be auto-populated based on the selected Documentary Collection Number.	
Unlinked FX Rate	Provide the unlinked FX rate.	
Rebate Amount	Read only field. Rebate to the bill outstanding amount.	
Customer Dispatch	The value will be populated from back office based on the maintenance. Toggle On: If the toggle is set to Yes , the customer has the option to dispatch the documents directly to the importer's bank. Toggle Off: If the toggle is set to No , the bank has to dispatch the documents to the importer's bank. Bank user is not allowed to edit the field, if the value defaulted from the back office is "No",

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the Documentary Collection.	
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables user to view the details of the collection.	
Events	On click, system will display the details of collection and liquidations if any in chronological sequence.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.	

Field	Description	Sample Values
Action Buttons		
Submit	On submit, task will move to next logical stage of Export Documentary Collection Liquidation. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Export Documentary Collection Liquidation Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for marking the task as Hold. This option is used, if there are any pending information yet to be received from applicant.	

Data Enrichment

On successful completion of Registration of an Islamic Export Documentary Collection Liquidation, the task moves to Data Enrichment stage. As part of data enrichment, user enters Liquidation basic details of the incoming Islamic Export Doc Collection Liquidation request. At this stage the information captured during registration are validated.

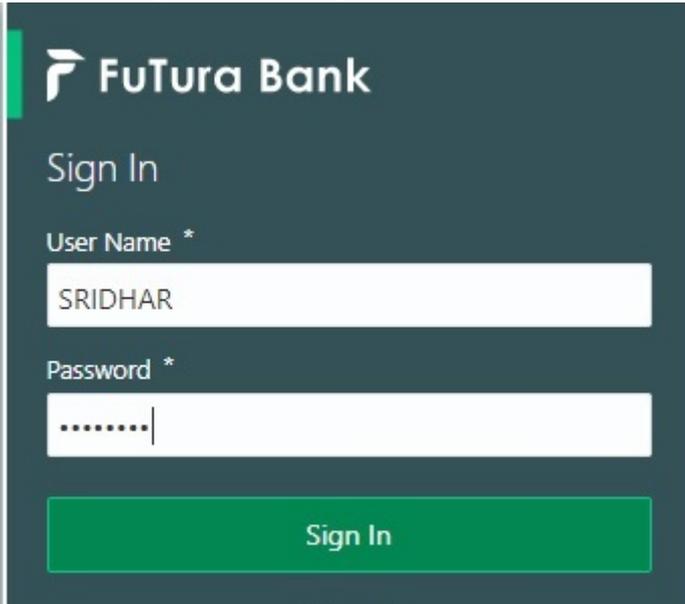

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task at Free Task DE stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.

- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following table:

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200760501	EUR	GBP	US\$10,000.00	1.33	US\$10,000.00			28-Jun-2020

Exceptions

The Export Collection Liquidation request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block exception tasks for Trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the “Amount Block Reference Number” to the back office. On successful handoff, back office will make use of these “Amount Block.

Reference Number” to release the Amount Block done in the mid office (OBT FPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Back	<p>Task moves to previous logical step.</p>	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for Trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the amount block exception details.

Multi Level Approval

User, can view the summary of details Liquidation in multilevel approval stage of Islamic Export Collection Liquidation request

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization user can acquire the task for approving.

User can see the summary tiles. The tiles should display a list of important fields with values. User can also drill down from summary Tiles into respective data segments where user can verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
