Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export Documentary Collection Update Islamic

An Export Collection Transaction can be updated on account of change of Operation, Maturity Date, Change of Drawee Details, Change of Bill Amount, Finance/FX Linkage etc.

The various stages involved for Islamic Export Doc Collection Update are:

- Receive and verify documents
- Input Export Collection details
- Upload of related mandatory and non-mandatory documents.
- Input Additional details of Export Collection - Data Enrichment stage
- Check for limit availability if applicable.
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Export Collection Update process flow is similar to that of conventional Export Collection Update process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

Common Initiation Stage

The user can initiate the new export documentary collection update request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.

- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of Registration of an Islamic Export Documentary Collection Update, the task moves to Data Enrichment stage. As part of DE, user can enter/update basic details of the Islamic Export Collection Update request, check documents and can verify if the request can be progressed further.

Do the following steps to acquire a task currently at Data Enrichment stage:

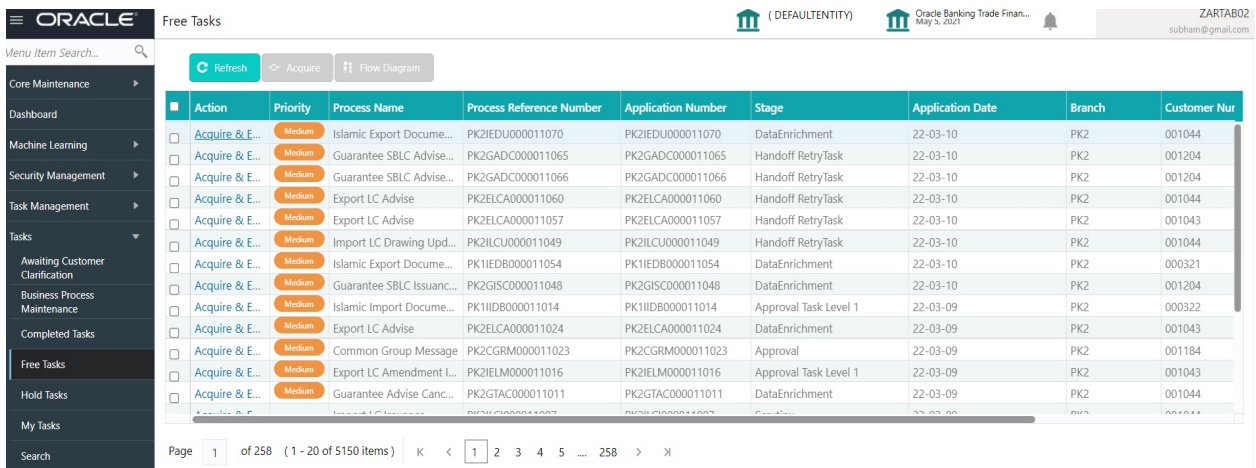

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

The image shows a login interface for FuTura Bank. The header includes the bank's logo and name. The main heading is 'Sign In'. Below this, there are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing masked characters '.....'. A prominent green button labeled 'Sign In' is positioned at the bottom of the form area.

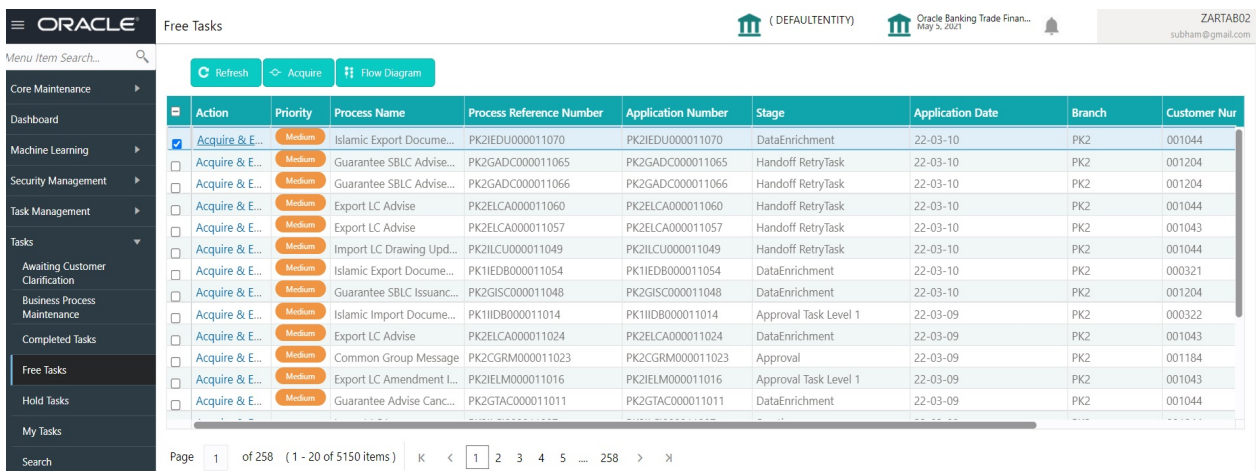

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Tasks > Free Tasks**.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to update the registered task.

The Data Enrichment stage has six sections as follows:

- Main Details
- Maturity Details
- Additional Fields
- Advices
- Additional Details
- Updated Details
- Settlement Details
- Summary

Let's look at the details for Data enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

Collection Details

The fields listed under this section are same as the fields listed under the [Collection Details](#) section in [Registration](#). Refer to [Collection Details](#) for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Note

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same. (Display only field if Submission mode is Online).

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. Exchange Rate	The exchange rate for the split settlement.	
Deal Reference Number	The exchange deal reference number.	
Action	Click Edit icon to edit the split settlement details record. Click Delete icon to delete the split settlement details record.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following table:

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200760501	EUR	GBP	US\$10,000.00	1.33	US\$10,000.00			28-Jun-2020

Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.	

Exceptions

The Export Collection Update request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

**Note**

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the amount block exception details.

Multi Level Approval

User can review the summary of details updated in multilevel approval stage of Islamic Export Documentary Collection Update request.

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving. User can see the summary tiles, the tiles should display a list of Important fields with values. The user can also drill down from summary tiles into respective data segments where user can verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the approval.	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
