Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Advice - Islamic

As part of Conventional Guarantee Advice, the advising bank receive the Guarantee through MT760, 761. The Guarantee can be advise directly to the beneficiary.

The various stages involved in OBTFPM during advising of a guarantee are:

- Receive and verify guarantee (non-online channel) - Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details
- Input/Modify Details of LC - Data Enrichment Stage
- Check for sanctions & KYC status
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Guarantee Advise Islamic process flow is similar to that of conventional Guarantee Advise process flow.

In the following sections, let's look at the details for Islamic Guarantee Advising process:

This section contains the following topics:

| | |
|--------------------------------------|---------------------------------|
| Registration | Scrutiny |
| Data Enrichment | Exceptions |
| Multi Level Approval | Reject Approval |

Registration

As a Registration user, you can register a Guarantee Advice - Islamic request received by mail/Courier at the front desk. During Registration stage, user captures the basic details, check the signature of the authorized signatory of the Guarantee Issuing Bank and upload the related documents. On submit, the request will be available for an Guarantee Advice expert to handle the request in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

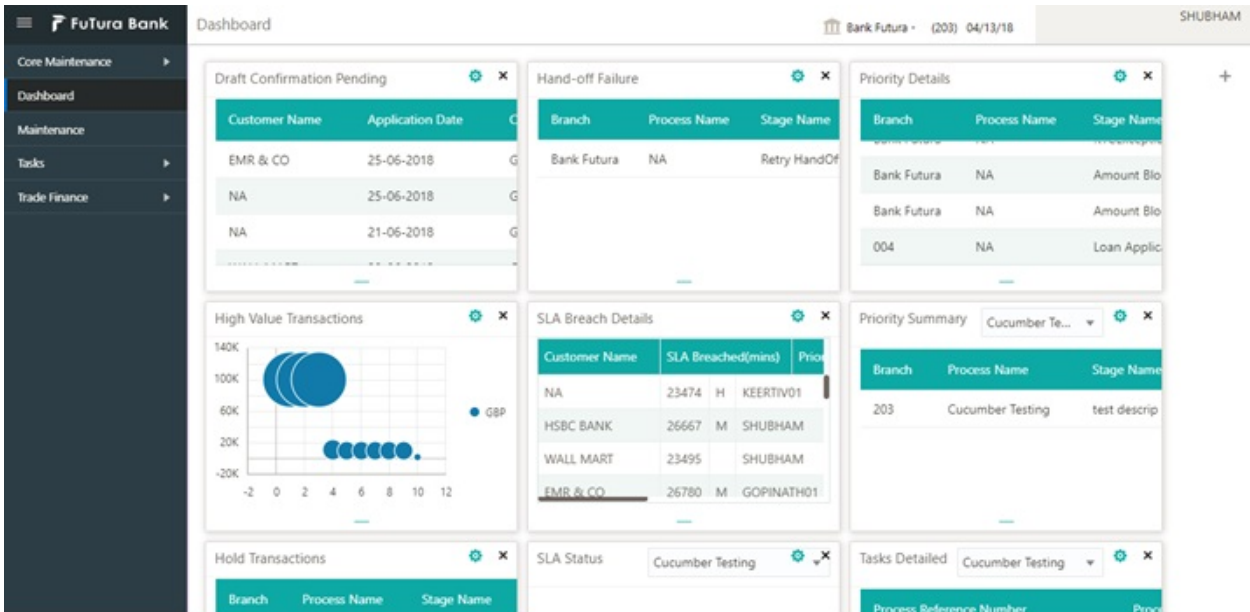

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text "Sign In". Below the header, there are two input fields: "User Name *" with the value "SRIDHAR" and "Password *" with masked characters. A green "Sign In" button is positioned below the password field, and a "Cancel" button is located at the bottom center.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. The top navigation bar includes the FuTura Bank logo, the word "Dashboard", and user information: "Bank Futura - (203) 04/13/18" and "SHUBHAM". A left sidebar contains menu items: "Core Maintenance", "Dashboard", "Maintenance", "Tasks", and "Trade Finance". The main dashboard area is populated with several widgets:

- Draft Confirmation Pending:** A table with columns "Customer Name" and "Application Date".

| Customer Name | Application Date |
|---------------|------------------|
| EMR & CO | 25-06-2018 |
| NA | 25-06-2018 |
| NA | 21-06-2018 |
- Hand-off Failure:** A table with columns "Branch", "Process Name", and "Stage Name".

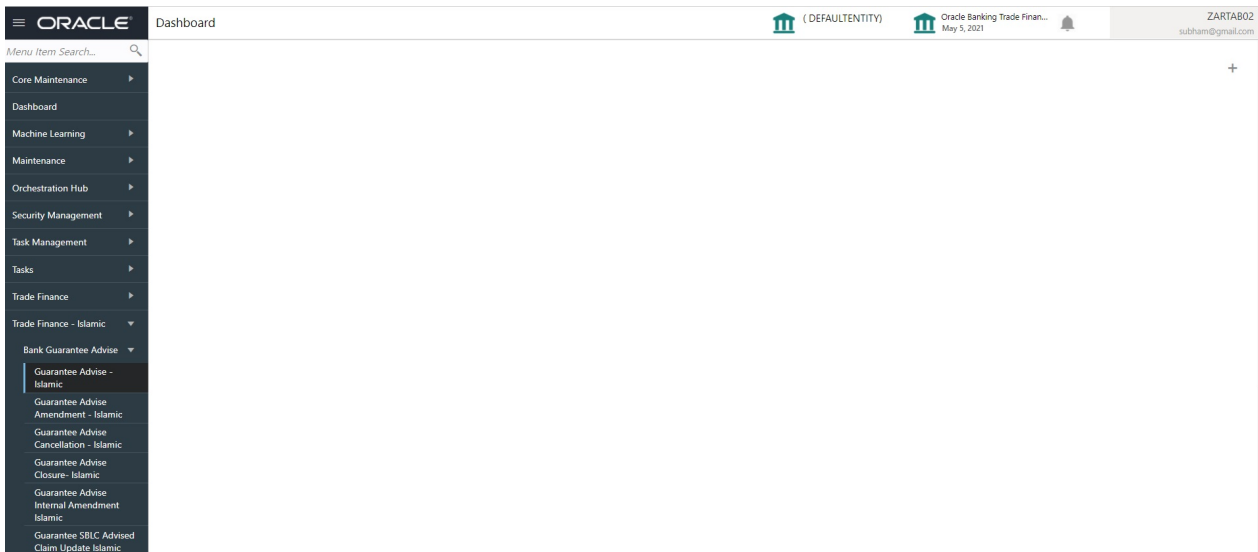

| Branch | Process Name | Stage Name |
|-------------|--------------|--------------|
| Bank Futura | NA | Retry HandOf |
- Priority Details:** A table with columns "Branch", "Process Name", and "Stage Name".

| Branch | Process Name | Stage Name |
|-------------|--------------|-------------|
| Bank Futura | NA | Amount Blo |
| Bank Futura | NA | Amount Blo |
| 004 | NA | Loan Applic |
- High Value Transactions:** A bubble chart showing transaction values for GBP. The y-axis ranges from -20K to 140K, and the x-axis ranges from -2 to 12. There are three large blue bubbles at approximately (2, 100K), (3, 100K), and (4, 100K), and several smaller blue bubbles along the x-axis.
- SLA Breach Details:** A table with columns "Customer Name", "SLA Breached(mins)", and "Priority".

| Customer Name | SLA Breached(mins) | Priority |
|---------------|--------------------|--------------|
| NA | 23474 | H KEERTIV01 |
| HSBC BANK | 26667 | M SHUBHAM |
| WALL MART | 23495 | SHUBHAM |
| EMR & CO | 26780 | M GOPINATH01 |
- Priority Summary:** A table with columns "Branch", "Process Name", and "Stage Name".

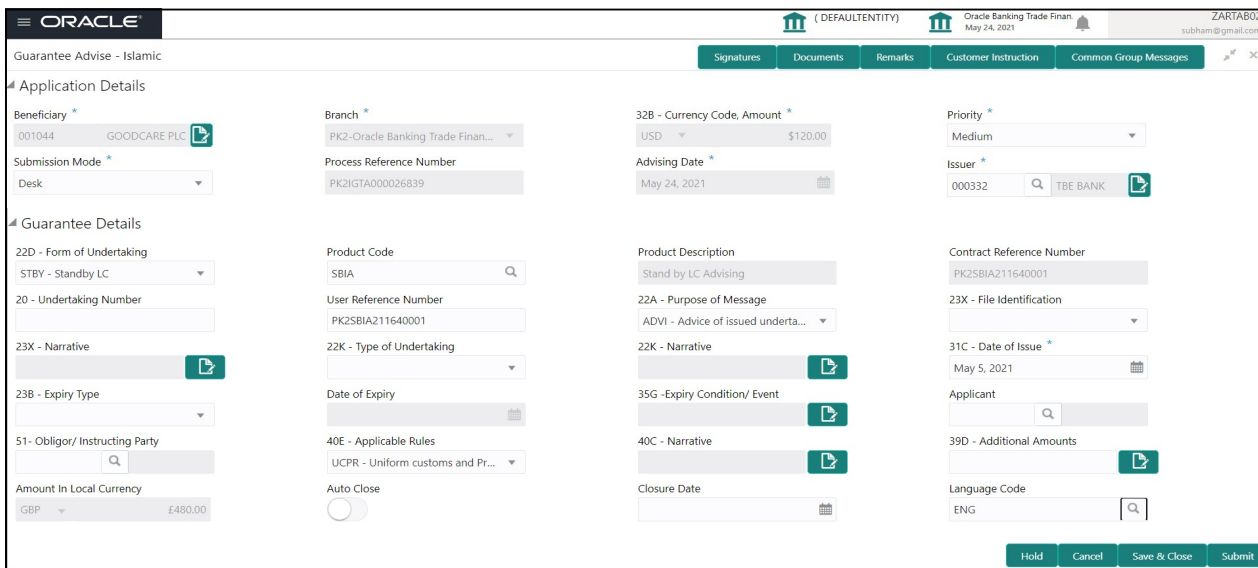

| Branch | Process Name | Stage Name |
|--------|------------------|--------------|
| 203 | Cucumber Testing | test descrip |
- Hold Transactions:** A table with columns "Branch", "Process Name", and "Stage Name".
- SLA Status:** A dropdown menu showing "Cucumber Testing".
- Tasks Detailed:** A table with columns "Process Reference Number" and "Process Name".

3. Click Trade Finance - Islamic > Bank Guarantee Advice > Guarantee Advise - Islamic.

| Checklist | Make sure that the details in the checklist are completed and acknowledge. | |

Scrutiny

On successful completion of Registration of an Islamic Guarantee advice request, the request moves to Scrutiny stage. The user can scrutinize request for Islamic Guarantee advice.

As part of scrutiny, user can enter/update basic details of the Islamic Guarantee request and can verify if the request can be progressed further. The task initiated from the online channel (SWIFT MT760, 761 parsing) should be created in the Scrutiny stage directly as in conventional process flow.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

The image shows a login interface for FuTura Bank. At the top left is the FuTura Bank logo. Below it, the text 'Sign In' is displayed. There are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing masked characters '.....'. At the bottom of the form is a green button labeled 'Sign In'.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Tasks > Free Tasks**.

| Action | Priority | Process Name | Process Reference Number | Application Number | Stage | Application Date | Branch | Custom |
|---|----------|---------------------------------|--------------------------|--------------------|----------------|------------------|--------|--------|

| Sequence | The sequence number is auto populated with the value, generated by the system. | |
| Component | The split component type eligible for Split. | |
| Amount | The system splits the respective Charge/ Commission amount automatically between counter party and third party with 50% value by default. The bank user can modify the amount. More than two splits are not allowed. | |
| Customer | Indicates the ID of the Customer in Split Settlement Details section. | |
| Account | The system defaults the settlement account. User can modify the settlement account. System initiates a call to common core tables within OBTFPM to select the account | |
| Account Currency | Defaults the currency of the account. | |
| Branch | Indicates the branch of the customer where transaction is getting processed. | |
| Percentage | The system splits the respective Charge/ Commission percentage automatically between counter party and third party with 50% value by default. More than two splits are not allowed. The bank user can modify the amount. The system should validate that the total percentage of each component doesn't exceed 100 and the total amount of each component doesn't exceed total component amount. | |
| Exchange Rate | System populates the exchange rate maintained. | |
| Original Exchange Rate | System displays the Original Exchange Rate as simulated in split settlement details section. | |
| Party Type | System displays the party type in split settlement details section. | |
| Negotiation Reference | Specify the negotiation reference number. | |
| AR-AP Tracking | Indicates to defer the charge/ commission in Split Settlement Details section. The user can modify the AR-AP Tracking flag as per the requirements. | |
| Loan/Finance Account | Displays the loan account. | |

| Field | Description | Sample Values |
|------------------|-------------------------------|---------------|
| Negotiation Rate | Specify the negotiation rate. | |

Limits & Collateral

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Data Enrichment

As part of Data Enrichment, user can enter/update basic details of the incoming request.

Do the following steps to acquire a task which completed the Registration and Scrutiny and currently at Data enrichment stage:

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard for Bank Futura (User: SHUBHAM) displays several widgets:

- Draft Confirmation Pending:** Table with columns Customer Name, Application Date, and Status. Rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** Table with columns Branch, Process Name, and Stage Name. Row: Bank Futura, NA, Retry HandOf.
- Priority Details:** Table with columns Branch, Process Name, and Stage Name. Rows include Bank Futura (NA, Amount Blo), Bank Futura (NA, Amount Blo), and 004 (NA, Loan Applic).
- High Value Transactions:** A bubble chart showing transaction values for GBP.
- SLA Breach Details:** Table with columns Customer Name, SLA Breached(mins), and Priority. Rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** Table with columns Branch, Process Name, and Stage Name. Row: 203, Cucumber Testing, test descrip.
- Hold Transactions:** Table with columns Branch, Process Name, and Stage Name.
- SLA Status:** Filtered to Cucumber Testing.
- Tasks Detailed:** Filtered to Cucumber Testing, showing Process Reference Number and Process Name.

3. Click **Tasks > Free Tasks**.

The Oracle Free Tasks page displays a list of tasks:

The Data Enrichment stage has four sections as follows:

- Main Details
- Guarantee Preferences
- Acknowledgement Details
- Documents and Instructions
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

In the subsequent sub sections, let's look at the details for Data Enrichment stage. As part of data enrichment, user can enter/update basic details of the incoming request. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

Main Details

Refer to [Main Details](#).

Guarantee Details

Refer to [Guarantee Details](#).

Guarantee Preferences

As part of DE, User can verify and enter the basic details available in the Guarantee request. In case the request is received through online channel, user can verify the details populated.

For more details, refer to [Guarantee preferences](#).

Acknowledgement Details

Data Enrichment user wants to enter the basic acknowledgement details of the Islamic Guarantee Advice request.

The screenshot shows the 'Acknowledgement Details' form for an MT730 message. The form is titled 'Acknowledgement Details' and 'MT730- Acknowledgement Received'. It contains several input fields: 'Advising Bank Reference' (with a search icon), '25 Account Identification' (with a search icon), '30 Date of Acknowledgement' (with a calendar icon), '32a Amount of Charges' (with a dropdown arrow), '57a - Account with Bank' (with a search icon), '71 D Charges' (with a search icon), '72-Sender to Receiver Information' (with a search icon and a document icon), and '79 Z Narrative' (with a search icon and a document icon). The form is part of a larger application window with a sidebar on the left and a top bar with buttons for 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', 'Common Group Messages', and 'Incoming Message'. A bottom bar contains buttons for 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Provide the Acknowledgment Details based on the information in the following table:

| Field | Description | Sample Values |
|--------------------------------|---|---------------|
| Advising Bank Reference | Specify the advising bank reference. | |
| Account Identification | Select the account which is used for settlement of charges where necessary. | |
| Date of Acknowledgement | Select the date on which the message being acknowledged was sent. System displays the Branch Date. If the task is approved on a later date, then the date should be updated as the branch date as on approval. | |
| Amount of Charges | Select the currency code and enter the total amount of charges claimed by the advising bank. If the Sender services an account for the Receiver in the currency of the charges, and this System should default the Date of Debit as the branch date as on approval. | |
| Account with Bank | Select the bank at which the Sender wishes to receive credit for charges claimed. | |
| Charges | The user should be able to input more details about the charges | |
| Sender to Receiver Information | Select the any additional information the advising bank sends to the Issuing bank. This can be maintained as an FFT | |
| Narrative | Narrative if applicable. | |

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|-----------------------|--|---------------|
| Clarification Details | Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested. | |
| Documents | <p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p> | |
| Remarks | Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users. | |
| Overrides | Click to view overrides, if any. | |
| Customer Instructions | <p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. | |
| Common Group Message | Click Common Group Message button, to send MT799 and MT999 messages from within the task. | |

| Field | Description | Sample Values |
|------------------|---|---------------|
| Incoming Message | <p>This button displays the applicable MT761 with MT760.</p> <p>Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Advise.</p> <p>The user can also view the incoming MT765 by clicking the Incoming Message button.</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p> | |
| Signatures | <p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p> | |
| Next | <p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p> | |
| Save & Close | <p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p> | |
| Cancel | <p>Cancel the Guarantee Advice Scrutiny inputs.</p> | |
| Hold | <p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p> | |
| Refer | <p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others | |

| Field | Description | Sample Values |
|-----------------------|---|---------------|
| Reject | <p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p> | |
| Request Clarification | User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline. | |

Additional Fields

Refer to [Additional Fields](#).

Advices

Advices menu displays the advices from the back office as tiles. User can verify the advices details Data Segment of the Guarantee Advise request.

Exceptions

The Guarantee Advice request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details- User can view details about application details and Guarantee details.
- Party Details - User can view the party details like beneficiary, advising bank etc.
- Charge details - User can view details provided for charges.
- Guarantee Details - User can view Guarantee details and Sender to Receive Information.
- Advice Preview - User can view draft guarantee details.
- Compliance - User can view the compliance details tiles.

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|---------|---|---------------|
| Reject | <p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p> | |
| Hold | <p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p> | |
| Refer | <p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others | |
| Cancel | Cancel the Amount Block Exception Inputs. | |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage. | |
| Back | Task moves to previous logical step. | |

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Multi Level Approval

A user can view the summary of details updated in multilevel approval stage of Islamic Guarantee Advice request.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the FuTura Bank OBTFPM interface. On the left is a navigation menu with categories like Core Maintenance, Dashboard, Maintenance, Tasks, Search, Completed Tasks, My Tasks, Free Tasks (selected), Hold Tasks, Supervisor Tasks, Virtual Account Manage..., Security Management, and Trade Finance. The main area shows a 'Free Tasks' table with columns for Action, Priority, and Application. A modal dialog titled 'Approval Rekey' is open, containing a 'Documents' tab and a 'Remarks' tab. The dialog lists several fields for re-keying, each with a green checkmark indicating it is ready for input: Currency (set to GBP), Amount (£15,000.00), Beneficiary Party (001624), Expiry Date (10/31/18), Issuing Bank (001602), and Validity (Limited). The dialog has 'Proceed' and 'Cancel' buttons at the bottom. In the background, a table lists tasks with columns for Amount, Process Name, and Stage.

| Amount | Process Name | Stage |
|------------|--------------------|--------------------------------|
| £20,002.00 | Guarantee Issuance | Retry HandOff |
