Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps Banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Advice Closure - Islamic

As part of Conventional Guarantee Advice Close, System enables the user to close the Guarantee which had been already Advised.

The various stages involved for Guarantee Advice Close are:

- Receive and verify documents and input basic details- Registration stage
- Upload of related mandatory and non-mandatory documents
- Input/Modify
- details of Close of Guarantee - Data Enrichment stage
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Advice Close process flow is similar to that of conventional Guarantee Advice Close process flow.

In the following sections, let's look at the details for Guarantee Advising process:

This section contains the following topics:

Registration	Data Enrichment
Multi Level Approval	Customer - Acknowledgement letter Format

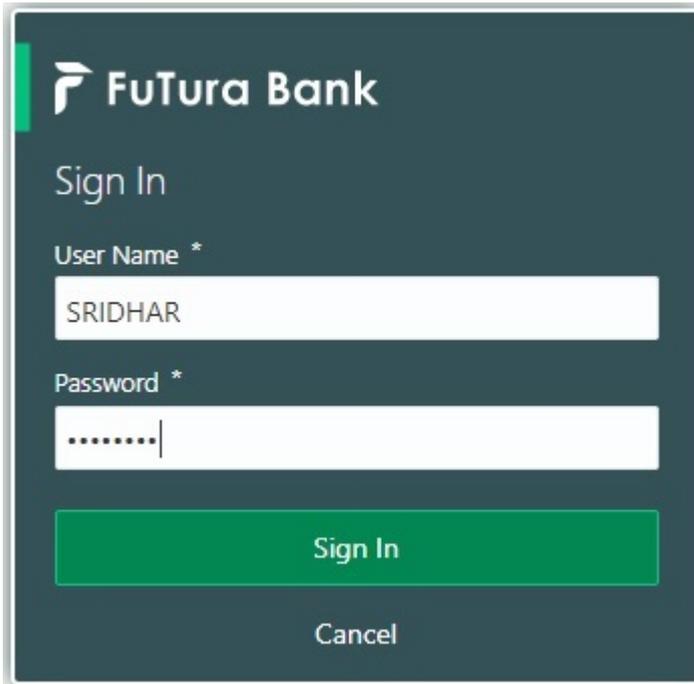

Registration

As a registration user, you can register a Guarantee Advice closure request received at the front desk (as an application received physically/received by mail/fax). During registration stage, user can capture the basic details, check the signature of the authorized signatory of the Guarantee Issuing Bank and upload the guarantee. On submit, the request will be available for an Guarantee Advice Close expert to handle the request in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

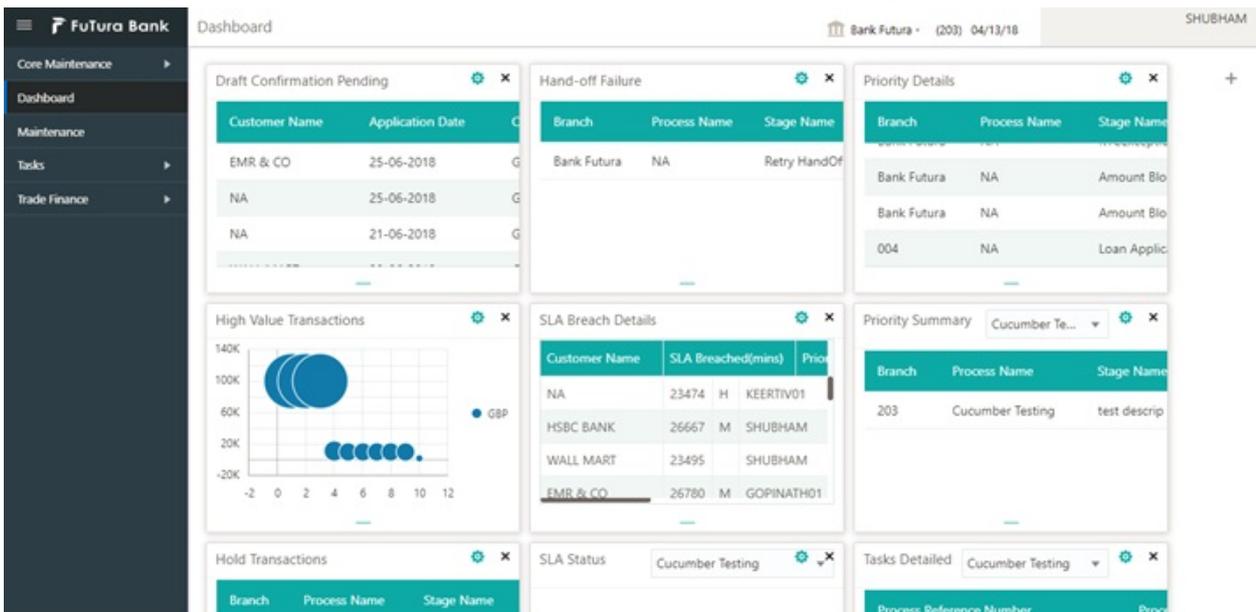

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text "Sign In". Below the header, there are two input fields: "User Name *" with the value "SRIDHAR" and "Password *" with masked characters. A green "Sign In" button is positioned below the password field, and a "Cancel" button is located at the bottom center.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard displays various widgets and data tables. The left sidebar contains navigation options: Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main content area includes:

- Draft Confirmation Pending:** A table with columns Customer Name, Application Date, and Stage Name. Data includes EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).

Multi Level Approval

User can review and approve the Guarantee Advise Closure. The user can view the summary of details updated in multilevel approval stage for Guarantee Advise Closure request.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
