# Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

## Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

## Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

## Import Documentary Collection Return - Close

Import Documentary Collection Return - Close process facilitates the user to close the outstanding bills along with the returning of documents or without any documents, when no more payments are expected.

This section contains the following topics:

<a href="#">Common Initiation Stage</a>	<a href="#">Document Linkage</a>
<a href="#">Registration</a>	<a href="#">Data Enrichment</a>
<a href="#">Multi Level Approval</a>	<a href="#">Reject Approval</a>

### Common Initiation Stage

The user can initiate the new import collection return close from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Documentary Collection Number	Select the Documentary Collection Number.
Branch	Select the branch.

## Action Buttons

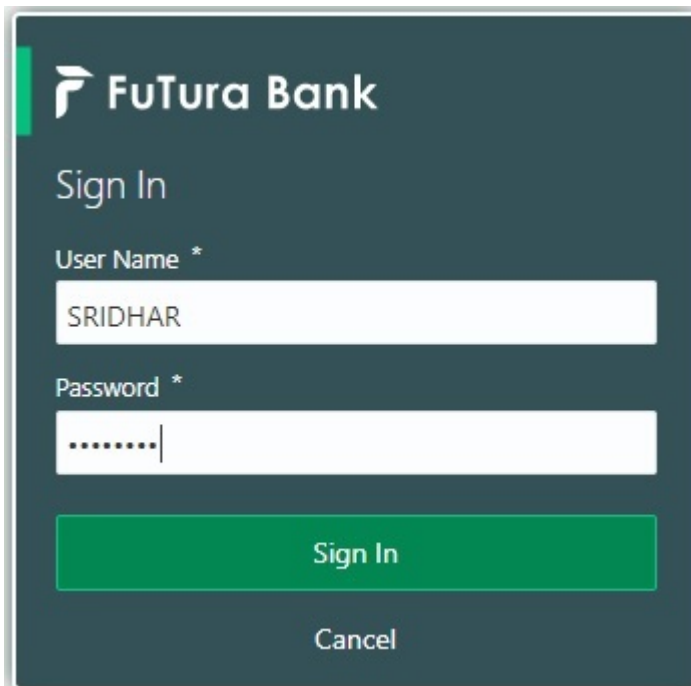

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

## Registration

The process starts from Registration stage, during Registration stage, user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

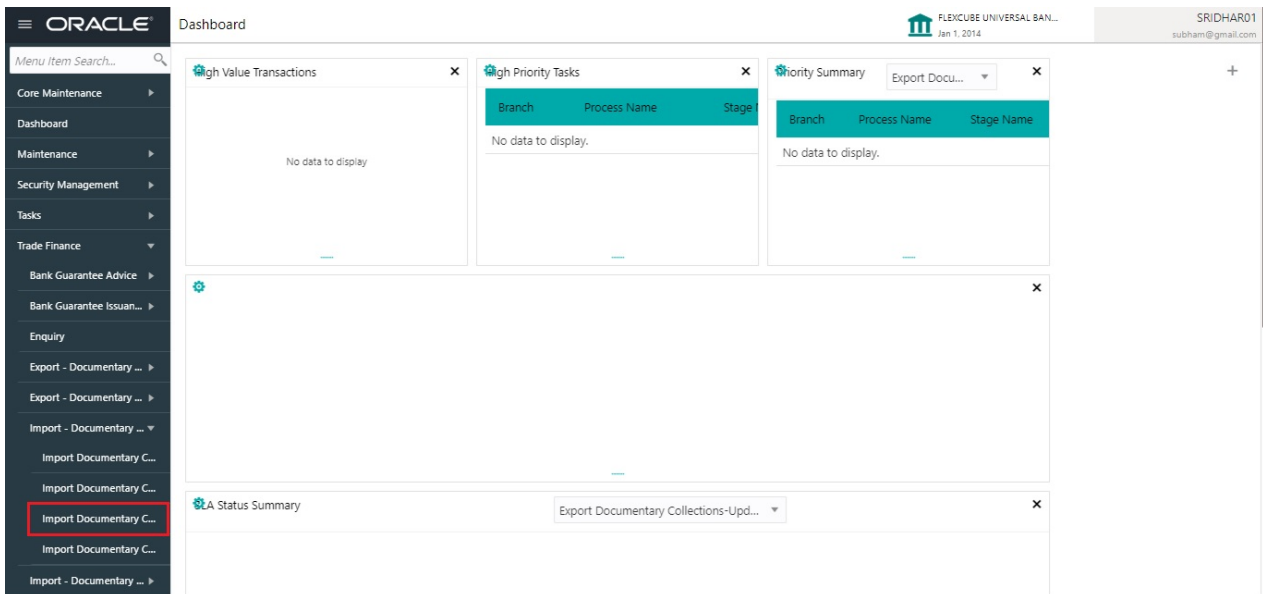

The screenshot shows a dark-themed login interface for FuTura Bank. At the top left is the FuTura Bank logo. Below it, the text 'Sign In' is displayed. There are two input fields: 'User Name \*' with the value 'SRIDHAR' and 'Password \*' with masked characters. Below the input fields are two buttons: 'Sign In' and 'Cancel'.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

3. Click Trade Finance> Import - Documentary Collection> Import Documentary Collection Return - Close.

The registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

## Application Details

The screenshot displays the Oracle application interface for an 'Import Documentary Collection Return'. The top navigation bar includes the Oracle logo, user information '( DEFAULTTENITY )', and session details 'Oracle Banking Trade Finan. May 24, 2021'. The main content area is divided into two sections: 'Application Details' and 'Collection Details'. The 'Application Details' section includes fields for Documentary Collection Number (PK2IUANA211258505), Drawee (001044 GOODCARE PLC), Branch (PK2-Oracle Banking Trade Finan...), Priority (Medium), Submission Mode (Desk), Remitting Bank/Remitter (003763 CITIBANK IRELA), Remitting Bank/Remitter Reference (ref557643), Process Reference Number (PK2IDCR000026439), Remitting Bank Date/Remitting Date (May 24, 2021), Return Date (May 24, 2021), and Version Number (1). The 'Collection Details' section includes Documents Received, User Reference Number (PK2IUANA211258505), Contract Reference Number (PK2IUANA211258505), Finance Amount (GBP), Rebate Amount (GBP £0.00), Tenor Type (Usance), Operation Type (ACC), Product Code (IUNA), Stage (FINAL), Amount In Local Currency (GBP £10,000.00), Acceptance Date, Product Description (INCOMING DOCUMENTARY USANCE B), Co Acceptance Required, Bill Outstanding Amount (GBP £10,000.00), and Drawer (001043 MARKS AND SP). Buttons for 'View Collection', 'Events', 'Hold', 'Cancel', 'Save & Close', and 'Submit' are visible at the bottom.

Field	Description	Sample Values
Documentary Collection Number	Provide the Documentary Collection Number. Alternatively, user can search the Documentary Collection Number using LOV.  In the LOV, user can search giving any combination details of Documentary Collection Number, Customer ID, Beneficiary, Currency, Amount and Value Date to fetch the collection details. Based on the search result, select the applicable documentary collection.	
Drawee	Read only field.  Drawee ID and name will be auto-populated based on the selected Documentary Collection Number.	
Branch	Read only field.  Branch details will be auto-populated based on the selected Documentary Collection Number.	203-Bank Futura -Branch FZ1
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit.	High
Submission Mode	Select the submission mode of Import Collection Liquidation request. By default the submission mode will have the value as 'Desk'.  <b>Desk</b> - Request received through Desk <b>Courier</b> - Request received through Courier	Desk

Field	Description	Sample Values
Remitting Bank/Remitter	Read only field. Remitter bank will be auto-populated based on the selected Documentary Collection Number. Remitting Bank and Collecting Bank can transfer a collection document to another bank	
Remitting Bank/Remitter Reference	Read only field. Remitting bank reference will be auto-populated based on the selected Documentary Collection Number.	
Process Reference Number	Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.	
Remitting Bank Date/ Remitting Date	Read only field. Remitter Name will be auto-populated based on the selected Documentary Collection Number.	
Return Date	By default, the application will display branch's current date.	04/13/2018
Version Number	This field displays the latest version of the bill.	

## Collection Details

Registration user can provide collection details in this section. Alternately, details can be updated by Data Enrichment user.

Provide the Collection Details based on the description in the following table:

Field	Description	Sample Values
Documents Received	Read only field. Documents received details will be auto-populated based on the selected Documentary Collection Number.	

Field	Description	Sample Values
Tenor Type	Read only field. Tenor will be auto-populated based on the selected Documentary Collection Number.	
Product Code	Read only field. Product code will be auto-populated based on the selected Documentary Collection Number.	
Product Description	Read only field. This field displays the description of the product as per the product code.	
User Reference Number	User reference number is defaulted based on the description of the product as per the product code.	
Operation Type	Read only field. Operation Type will be auto-populated based on the selected Documentary Collection Number.	
Stage	Read only field. Stage will be auto-populated based on the selected Documentary Collection Number.	
Co-Acceptance Required	Read only field. Co-Acceptance Required will be auto-populated based on the selected Documentary Collection Number.	
Contract Reference Number	System to populate contract reference number from the back end system once the product is selected.	
Bill Amount	Read only field. Bill Amount will be auto-populated based on the selected Documentary Collection Number.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Bill Outstanding Amount	Read only field. Bill Outstanding Amount will be auto-populated based on the selected Documentary Collection Number.	
Finance Amount	Read only field. Finance Amount will be auto-populated based on the selected Documentary Collection Number.	
Protest Date	By default, the application will display branch's current date.	

Field	Description	Sample Values
Acceptance Date	Read only field. The bill acceptance date is displayed.	
Drawer	Read only field. Drawer ID and name will be auto-populated based on the selected Documentary Collection Number.	
Rebate Amount	Read only field. The rebate to the bill outstanding amount.	

## Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the Documentary Collection.	
Remarks	Provide any additional information regarding the return. This information can be viewed by other users handling the request.	

Field	Description	Sample Values
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Events	On click, system will display the details of all the events.	
<b>Action Buttons</b>		
Submit	<p>On submit, task will move to next logical stage of Import Documentary Collection Return - Close.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>	
Save & Close	<p>Save the information provided and holds the task in 'My Task' queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	<p>Cancels the Import Documentary Collection Return - Close Task. Details entered will not be saved and the task will be removed.</p>	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Checklist	<p>Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.</p>	

## Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a

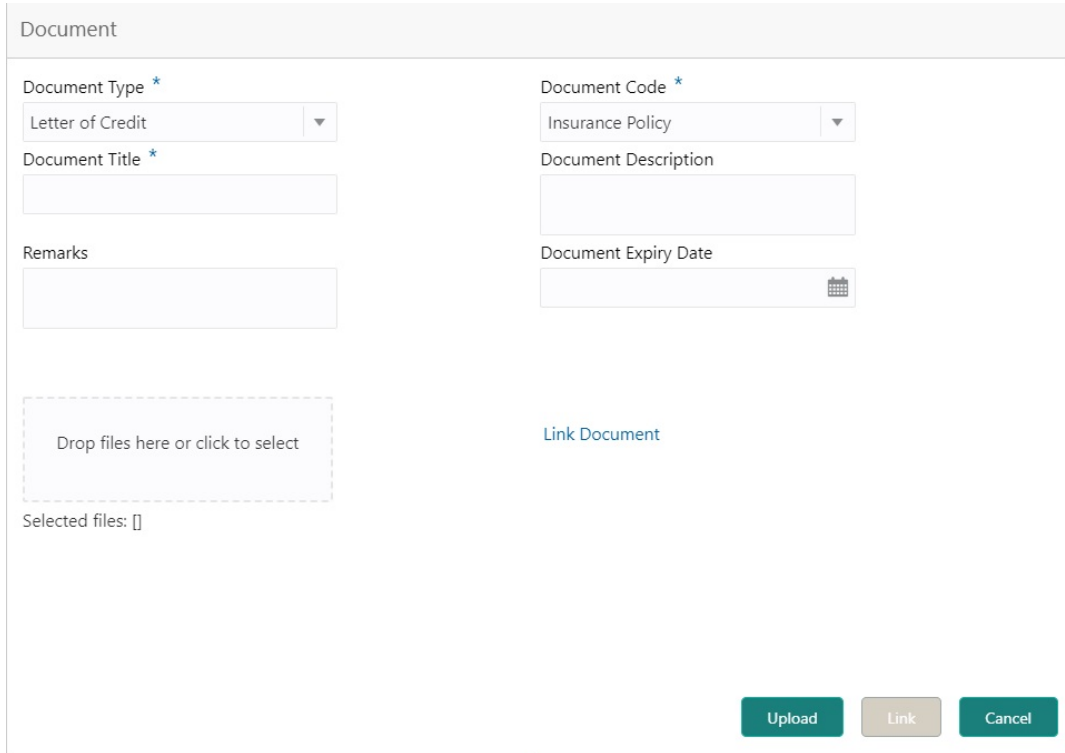

unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	
Document Title	Specify the document title.	
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

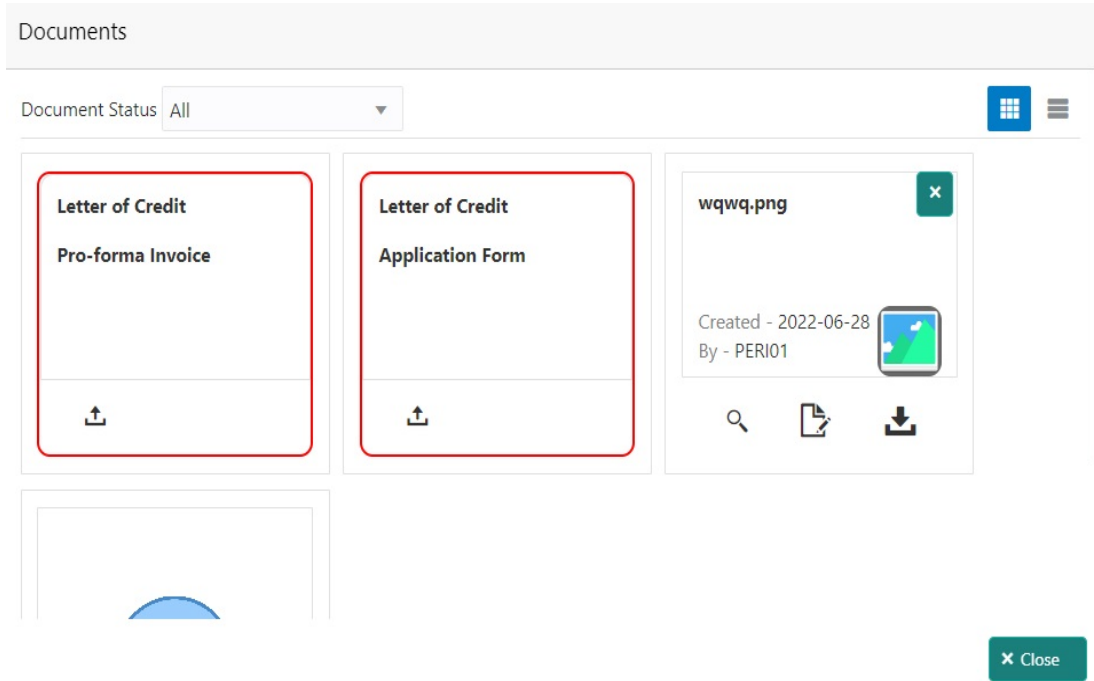

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
<b>Search Result</b>		
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	
Document Code	This field displays the document code from meta data.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Documents

The screenshot shows the 'Edit Document' form. It contains the following fields:

Document Id	2400	Document Title	wqwq
Application Reference Number	PK2ILCI000019041	Entity Reference Number	PK2ILCI000019041
Document Type Id	TFPM_DOCTYPE001	Document Description	
Remarks		Document Expiry Date	Jun 29, 2022

Below the fields, there is a dashed box with the text 'Drop files here or click to select' and 'Current selected files: []'. At the bottom right, there are 'Update' and 'Cancel' buttons.

## Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

**Pre- Conditions:**

- Customer Maintenance details are replicated from OBTF to OBTFPM.
  - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
  2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is “Online”.
  3. In case submission mode is “Online”, the user can enter the clarification details in “Clarification Required” placeholder. In case submission mode is not “Online”, the system will validate if the counterparty is a OBDX customer by checking the flag “Trade Finance Portal” in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
  4. In case submission mode is not “Online”, and if the “Trade Finance Portal” flag is set to ‘No’ in Customer Maintenance Table, the system should display the error message that ‘The customer is not subscribed to Trade Finance Portal’. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

## Data Enrichment

On successful completion of Registration of an Import Documentary Collection Return - Close, the request moves to Data Enrichment stage. At this stage the gathered information during registration are scrutinized.

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

**FuTura Bank**

Sign In

User Name \*  
SRIDHAR

Password \*  
.....

Sign In

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

The screenshot shows the Oracle dashboard interface. On the left is a navigation menu with categories like Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, and Trade Finance. The main content area contains several widgets:

- High Value Transactions:** A bubble chart showing transaction values for GBP and EUR over a period of 12 days. The y-axis ranges from 0 to 120K.
- High Priority Tasks:** A table listing tasks such as 'Import Documentary Collections', 'Export LC Advising', and 'Export LC Advising' with columns for Branch and Process Name.
- Priority Summary:** A table showing task details with columns for Branch, Process Name, and Currency.
- Pending Exception Approval:** A table with a search filter and columns for Customer Name, Stage Name, Process Reference Number, Process Name, Branch Name, and Currency. It lists entries like 'Amount Block Exception Approval' and 'Limit Earmarking Exception Approval'.
- SLA Status Summary:** A summary widget with a dropdown menu.

3. Click Trade Finance> Tasks> Free Tasks.

The screenshot shows the 'Free Tasks' page in Oracle. The left navigation menu has 'Free Tasks' highlighted. The main area displays a table of tasks with the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Count. The table contains 10 rows of task data.

Action	Priority	Process Name	Process Reference Number	Application Number	Stage	Application Date	Branch	Count

The Data Enrichment stage has the following hops for data capture:

- Main Details
- Return Details
- Draft Details
- Additional Fields
- Advices
- Settlement Details
- Additional Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from registration application Details may not be editable.

## Main Details

Main details section has two sub section as follows:

- Application Details

- Collection Details

## Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

## Collection Details

The fields listed under this section are same as the fields listed under the [Collection Details](#) section in [Registration](#). Refer to [Collection Details](#) for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables user to view the details of the collection.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	

Field	Description	Sample Values
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Request Clarification	<p>User should be able to specify the clarification details for requests received online.</p>	

## Closure/Return Details

Return details hop enables the user to provide details in the below mentioned section to process the return. This hop also captures the Closure Reason during manual closure of the Bill.

## Return Details

The user can check the relevant box indicating the documents that are being returned. The user can also input additional remarks/description about the documents being returned.

Field	Description	Sample Values
Protested Bill of Exchange	Check the protested bill of exchange check box, if returned.	
Remarks	User can provide any remarks if required.	
Unaccepted Bill of Exchange	Check the unaccepted bill of exchange check box, if returned.	
Remarks	User can provide any remarks if required.	
Other Documents	Check the other documents check box, if any other documents are returned.	
Remarks	User can provide any remarks if required.	

## Documents Disposal

The user can check the relevant box indicating the instructions received from the Remitting Bank towards disposal of documents. The user can also input additional remarks/description about the document disposal.

Field	Description	Sample Values
Documents Delivered to Drawee Free of Payment	Check the documents delivered to drawee free of payment check box, if returned.	

Field	Description	Sample Values
Remarks	User can provide any remarks if required.	
Documents Returned to Remitting Bank	Check the documents returned to remitting bank check box, if returned.	
Remarks	User can provide any remarks if required.	
Documents Handed over to 3rd Party	Check the documents handed over to 3rd party check box, if returned.	
Remarks	User can provide any remarks if required.	

### Closure/Return Reason

Field	Description	Sample Values
Closure/Return Reason	Specify the re can reason for closing the Bill.	

### Draft Details

Draft Details enables the user to capture details of Cost of Goods, Freight, Insurance etc.

The screenshot displays the Oracle Financials interface for 'Draft Details'. The breadcrumb trail is 'Import Documentary Collection Return/Close' with 'DataEnrichment : Application No:- PK2IDCR000026439'. The navigation menu includes 'Clarification Details', 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', 'Common Group Messages', and 'View Collection'. The left sidebar shows a tree view with 'Draft Details' selected. The main content area is titled 'Draft Details' and contains a section for 'Shipping Guarantee Reference' with a table showing 'No data to display'. Below this is another section for 'Draft Details' with a table containing one row: 'Cost of the shipment' with a 'Draft Amount' of '£100.00'. The table has columns for 'Draft Code', 'Draft Amount', and 'Action'. At the bottom, there is a pagination bar showing 'Page 1 of 1 (1 of 1 items)' and a set of navigation buttons: 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

### Shipping Guarantee Reference

Field	Description	Sample Values
Shipping Guarantee Reference	Shipping Guarantee Reference is auto populated from the linked Shipping Guarantee details in the Shipping Detail Grid, based on the Transport Document Reference and Date provided in Bill, which is linked with the Shipping Guarantee.  User can select the Shipping Guarantee from the lookup.	
Transport Document Reference	Transport Document Reference is auto populated from the underlying Shipping Guarantee details.  System validates the Shipping Guarantee Transport Document reference number with Transport Document Reference number in a Bill, if user manually provides the Shipping Guarantee detail.	
Transport Document Date	Transport Document Date is auto populated based on the date provided in Bill, which is linked with the Shipping Guarantee.	
Amount	Shipping Guarantee amount is displayed in this field.	
Action	Edit: Click edit to edit the shipping guarantee details.  Delete: Click edit to edit the shipping guarantee detail.	

### Draft Details

Draft Code	Update the draft details. Alternatively, user can search the draft code using LOV.	
Draft Amount	Update the draft amount.	

### Additional Fields

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

This section displays the commission details:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	This field displays the commission component.	

Field	Description	Sample Values
Rate	<p>Defaults from product.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	If check box is selected, charges/commissions has to be deferred and collected at any future step.	
Waive	<p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

## Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.  This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled.  The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

## Preview Message

User can view the draft simulated message (MT499) being displayed on the preview message text box.

The screenshot shows a 'Preview Message' window with two panes. The left pane is titled 'Preview - SWIFT Message' and has a 'Language' dropdown set to 'English' and a 'Message Type' dropdown. The right pane is titled 'Preview - Mail Advice' and has a 'Language' dropdown set to 'English' and an 'Advice Type' dropdown set to 'CLOSURE\_ADVICE'. Below the dropdowns, the message content is displayed in a text area. The message content includes:

```

Ultimate Beneficiary	Read only field. This filed displays the ultimate beneficiary from the LOV.	
Intermediary Reimbursement Institution	Read only field. This filed displays the intermediary reimbursement institution from the LOV.	

### Payment Details

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver 1	Read only field. This filed displays the sender to receiver message.	
Sender to Receiver 2	Read only field. This filed displays the sender to receiver message.	
Sender to Receiver 3	Read only field. This filed displays the sender to receiver message.	
Sender to Receiver 4	Read only field. This filed displays the sender to receiver message.	
Sender to Receiver 5	Read only field. This filed displays the sender to receiver message.	
Sender to Receiver 6	Read only field. This filed displays the sender to receiver message.	

## Remittance Information

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Payment Detail 1	Read only field. This filed displays the payment details.	
Payment Detail 2	Read only field. This filed displays the payment details.	
Payment Detail 3	Read only field. This filed displays the payment details.	
Payment Detail 4	Read only field. This filed displays the payment details.	

## Summary

User can review the summary of details updated in Data Enrichment stage of Import Documentary Collection Return - Close request.

The tiles must display a list of important fields with values. User can drill down from summary Tiles into respective data segments.

The screenshot shows the Oracle system interface for an Import Documentary Collection Return. The page is titled "Summary" and displays a grid of summary tiles. The tiles are organized into three rows and five columns. The first row contains Main Details, Return Details, Draft Details, Additional Fields, and Advices. The second row contains Limits and Collaterals, Commission, Charges and Taxes, Preview Messages, FX Linkage, and Settlement Details. The third row contains Parties Details, Compliance details, and Accounting Details. The interface includes a navigation menu on the left, a top header with user information and application details, and a bottom toolbar with action buttons like Reject, Refer, Hold, Cancel, Save & Close, Back, Print, and Submit.

### Tiles Displayed in Summary

- Main Details - User can view details about application details and LC details.
- Return Details - User can view return details.
- Additional Fields - User can view the additional fields.
- Advices - User can view the advices.
- Party Details - User can view party details like applicant, advising bank etc.
- Documents - User can view the document details.
- Preview - User can view the preview message.
- Settlement Details - User can view the settlement details.

- Limits and Collaterals - User can view limits and collateral details.
- Charges - User can view charge details.
- FX Linkage - User can view the details of FX Linkage.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables user to view the details of the collection.	

Field	Description	Sample Values
Submit	<p>Task will move to next logical stage of Import Documentary Collection Return - Close.</p> <p>If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.</p>	
Back	Task will move to the previous data segment of Import Documentary Collection Return - Close.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Request Clarification	User should be able to specify the clarification details for requests received online.	

## Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

### Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

## Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the FuTura Bank application interface. On the left is a navigation menu with categories like Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, and Trade Finance. The main area shows a 'Free Tasks' table with columns for Action, Priority, and Application Number. A modal dialog titled 'Approval Rekey' is open, featuring tabs for 'Incoming Message', 'Documents', and 'Remarks'. The dialog contains two input fields: 'Applicant Party' with the value '000262' and 'Application Date' with the value 'Feb 1, 2019'. Both fields have green checkmarks to their right. At the bottom of the dialog are three buttons: 'Proceed', 'Refer', and 'Cancel'. In the background, a table with columns 'Process Name', 'Stage', and 'Back Office Ref No.' is visible, showing various process entries.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance- Limits</li> <li>● R5 - Others</li> </ul>	
Cancel	Cancel the approval.	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

## Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

## Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
