Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Internal Amendment - Islamic

Conventional Import LC Internal Amendment enables the user to make the following amendments to the LC which had been already issued.

The common amendments that are made to an Import LC are:

- Change in Limits
- Change in Collateral

The various stages involved for Import LC Internal Amendment are:

- Receive and verify documents and input the basic details (Non Online Channel)- Registration stage
- Input/Modify details Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements.
- Hand off request to back office

The design, development and functionality of the Islamic Import LC Internal Amendment process flow is similar to that of conventional Import LC Amendment process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Multi Level Approval

Common Initiation Stage

The user can initiate the new Islamic import LC internal amendment request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

	Initiate Task		(DEFAULTENTITY)	Oracle Banking Trade Finan 🌲	ZARTAB02 subham@gmail.com

Initiate Task Limits Tree					

Provide the details based on the description in the following table:

.

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

User can register request of new Islamic Import LC internal amendment received at the front desk through branch either by fax, mail, or physical application form, the Import LC internal amendment process starts from the Registration Stage.

During Registration stage, user can capture the basic details of the amendment application, check the signature of the applicant and upload the related documents of the applicant. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for an LC expert to handle the request in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

	Customer signature verifiedAny correction or alteration initialed by	
	the applicant	
	Checklist ×	
	Account for charges collection clearly stated	
	Amendment instruction clearly stated	
	LC Amendment Application duly signed	
	Submit Close	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
- 1. Customer Maintenance details are replicated from OBTF to OBTFPM.
- 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
- 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validates if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
- 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of Registration of an Internal LC Amendment request, the request moves to Data Enrichment stage. At this stage the user enter/update the basic details of the amendment request and can verify if the request can be progressed further.

Non-Online Channel - Internal LC Amendment request that were received at the desk will move to Data Enrichment stage post successful Registration. The transaction will have the details entered during the Registration stage.

Online Channel - Requests that are received via SWIFT (MT730) are available directly for further processing in OBTFPM from Data Enrichment stage and relevant data should be auto populated.

For MT 730, system should validate the incoming MT 730 based on Related Reference field to identify whether it is Acknowledgment for Import LC or Export LC. If the MT 730 is for Import LC, system should process the MT 730 under Internal Amendment to Import LC.

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

All fields displayed in LC details section are read only fields.

Field	Description	Sample Values
Revolving	Read only filed.	
	This field displays the value used for 'Revolving' as per the latest LC details.	
LC Туре	Read only field.	
	This field displays the value used for LC Type as per the latest LC details.	
Product Code	Read only field.	
	This field displays the product code used during Issuance of the selected LC.	
Product Description	Read only field.	
	This field displays the description of the product as in Import LC Issuance.	
Advising Bank	This field displays the advising bank as per the latest LC details.	
40A - Form of	Read only field.	
Documentary Credit	This field displays the value available in LC record.	
Date of Issue	Read only field.	
	This field displays the LC issuance date.	
Applicable Rules	This field displays the applicable rule as per the latest LC details.	
Date Of Expiry	This field displays the expiry date as per the latest LC details.	09/30/18
Place of Expiry	This field displays the place of expiry as per the latest LC details.	

Field	Description	Sample Values
Applicant Bank	This field displays the applicant bank if available as per the latest LC details.	
Applicant	This field displays the applicant as per the latest LC details.	
Beneficiary Name	This field displays the beneficiary as per the latest LC details. Note If the user amend this field and the selected beneficiary/ party is blacklisted the system displays a warning message.	
Currency Code, Amount	This field displays the currency code/ Outstanding LC Amount as per the latest LC details.	
Percentage Credit Amount Tolerance	This field displays the percentage credit amount tolerance details as per the latest LC details.	
LC Outstanding Amount	This field displays the LC Outstanding amount details as per the latest LC details.	
Limits/ Collateral Required	Toggle On: Set the toggle 'On' to enable limit check.Toggle Off: Set the toggle 'Off' to disable limit check.	
Additional Amount Covered	This field displays the details of additional amount covered as per the latest LC details.	
Auto Close	Toggle On: Enable the toggle, if Auto close is required for that transactions.	
	Toggle Off: Disable the toggle, if Auto close is not required for that transactions.	
Closure Date	System default the "Closure Date" value, if any, from the contract.	
	If the system defaulted value for Auto Close is Yes , then Closure Date field will be a display only field and user is not allowed to edit the same.	
	If the system defaulted value for Auto Close is No , then user can edit the Closure Date field by enabling the "Auto Close" toggle as "Yes".	
	User can provide the value in this field, if Auto Close is enabled as a part of this internal amendment.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	The user can view the uploaded documents. Application will display the mandatory and optional documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	The user can view the remarks captured in the process during earlier stages.	
Overrides	User can view the various overrides that have been generated and accepted	
Customer Instructions	Click to view/ input the following	
	• Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.	
	• Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
View LC	Enables user to view the details of the underlying LC.	

Field	Description	Sample Values
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.	
	Reject Codes:	
	 R1- Documents missing 	
	R2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	• R5 - Others.	
	Select a Reject code and give a Reject Description.	
	This reject reason will be available in the remarks window throughout the process.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance- Limits R5 - Others	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and	
	appropriate remarks must be provided.	
Cancel	Cancel the task window and return to dashboard. The data input will not be saved.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment that is Acknowledgement - MT730 Details.	

Acknowledgement - MT730 Details

User must scrutinize the incoming MT730 details of an Internal LC amendment request for the different fields under the respective data segments. The user can verify and enter the basic details available in the LC Internal amend request.

At this stage the incoming MT730 details are auto populated. If required, the MT 730 details can also be entered by the user.

nport LC Internal Amend ataEnrichment :: Applica	ment Islamic ation No:- PK2IIIA000024063	Documents	Remarks Override	s Customer Instructi	ion Common Group Messages	Incoming Mes	isage View LC S	Signatures	*

As part of amendment, user can change the values available in the fields based on the description in the following table:

Field	Description	Sample Values
Acknowledgment Details		
Advising Bank Reference	Non Online: User can enter the Advising Bank Reference details.	
	Online: Read only.	
	Details received from the online request/ Incoming MT730 will get auto populated.	
Account Identification	User can enter the account identification details.	
Date of Acknowledgment	Non Online: User can enter the date.	
	Online: Read only.	
	Details received from the online request/ Incoming MT730 will get auto populated.	
Amount of Charges	Non Online: User can enter the amount of charges.	
	Online : Read-only. System defaults the Amount of Charge from the incoming MT730 received.	

Field	Description	Sample Values
Account with Bank	Non Online: User can enter the account with bank details.	
	Online: Read-only. System defaults the Account with Bank from the incoming MT730 received. User can manually enter the details if not processed as STP.	
Charges	Non Online: User can enter the charge details. Online: Read-only. System defaults the charges from the incoming MT730 received. User can manually enter the details if not processed as STP.	
Sender to Receiver Information	Non Online: User to enter the details. Online: Read-only. System defaults the Sender to Receiver information from the incoming MT730 received.	
Narrative	Non Online: User can enter the details. Online: Read-only. System defaults the Narrative from the incoming MT730 received	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	The user can view the uploaded documents. Application will display the mandatory and optional documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	The user can view the remarks captured in the process during earlier stages.	
Overrides	User can view the various overrides that have been generated and accepted	

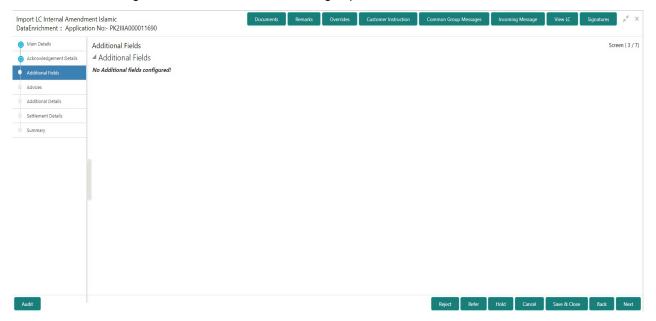

Field	Description	Sample Values
Customer Instructions	Click to view/ input the following	
	• Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.	
	• Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
View LC	Enables user to view the details of the underlying LC.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.	
	Reject Codes:	
	R1- Documents missing	
	R2- Signature Missing R2 Input Error	
	 R3- Input Error R4- Insufficient Balance/Limits 	
	 R5 - Others. 	
	Select a Reject code and give a Reject Description.	
	This reject reason will be available in the remarks window throughout the process.	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance- Limits R5 - Others	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Cancel	Cancel the task window and return to dashboard. The data input will not be saved.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment that is Acknowledgement - MT730 Details.	

Additional Fields

Banks can configure these additional fields during implementation.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	The user can view the uploaded documents. Application will display the mandatory and optional documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	The user can view the remarks captured in the process during earlier stages.	
Overrides	User can view the various overrides that have been generated and accepted	
Customer Instructions	Click to view/ input the following	
	 Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. 	
	 Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Limits & Collateral

Limit availability needs to be checked if amendment involves increase in amount or tolerance or both.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number "to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Commission Details

Commission Details are auto-populated from back-end system.

Component	This field displays the commission component	
Rate	This field displays the rate that is defaulted from product.	
	The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.	
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	 This field displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field. 	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	

Field	Description	Sample Values
Waive	Select the check box to waive charges/ commission.	
	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.	
	If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	
Charge Details		
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Tag amount that is maintained under the product code.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
	On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.	
	The user can not enable/disable the option, if it is de-selected by default.	
	This field is disabled, if 'Defer' toggle is enabled	

Field	Description	Sample Values
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected.	
	On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.	
	The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	Enble the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if Defer toggle is enabled.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

Field	Description	Sample Values
Component	Tax Component type	
Туре	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
	This field is disabled, if 'Defer' toggle is enabled.	

Field	Description	Sample Values
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled.	
	The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.
