Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Liquidation - Islamic

Import LC liquidation process enables the user to liquidate of drawings under an Import LC. This process deals with handling a Liquidation of Drawings under Islamic LC.

The various stages involved for Islamic Import LC Drawing Liquidation are:

Input Liquidation details and upload of related mandatory and non-mandatory documents in Registration stage.

- Input/Modify details of Liquidation - Data Enrichment stage
- Check balance availability for amount block
- Check for sanctions & KYC status
- Create amount block if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Import LC Drawing Liquidation process flow is similar to that of conventional Import LC Drawing Liquidation process flow.

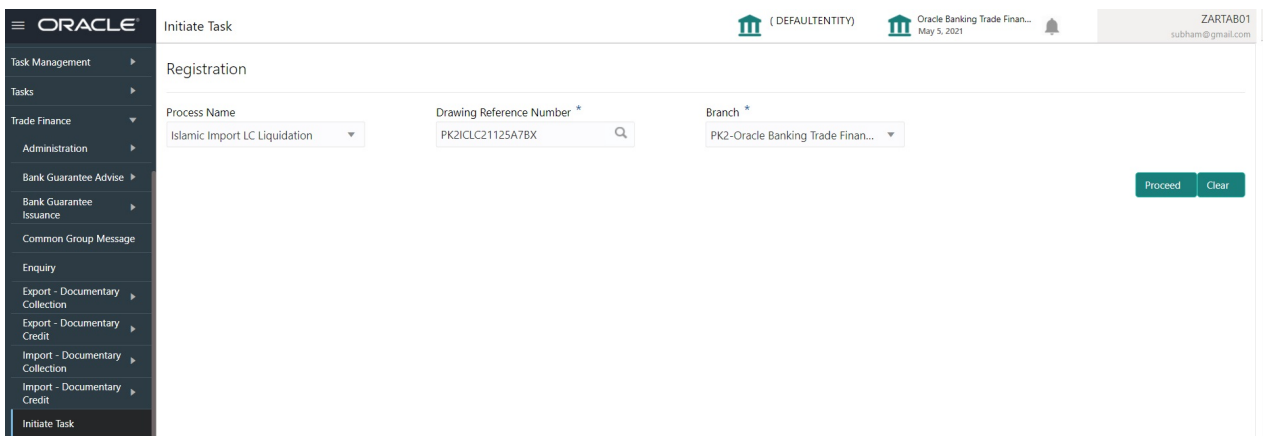

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval
Waiting Backoffice Authorization	

Common Initiation Stage

The user can initiate the new import LC liquidation request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Drawing Reference Number	Select the Drawing Reference Number.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The process starts from Registration stage. The user can register request for an Islamic Import LC Drawing Liquidation at the front desk. During registration stage, user can capture the basic details of the transaction and upload related documents. On submit of the request the request will be available for an LC expert to handle the liquidation request in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

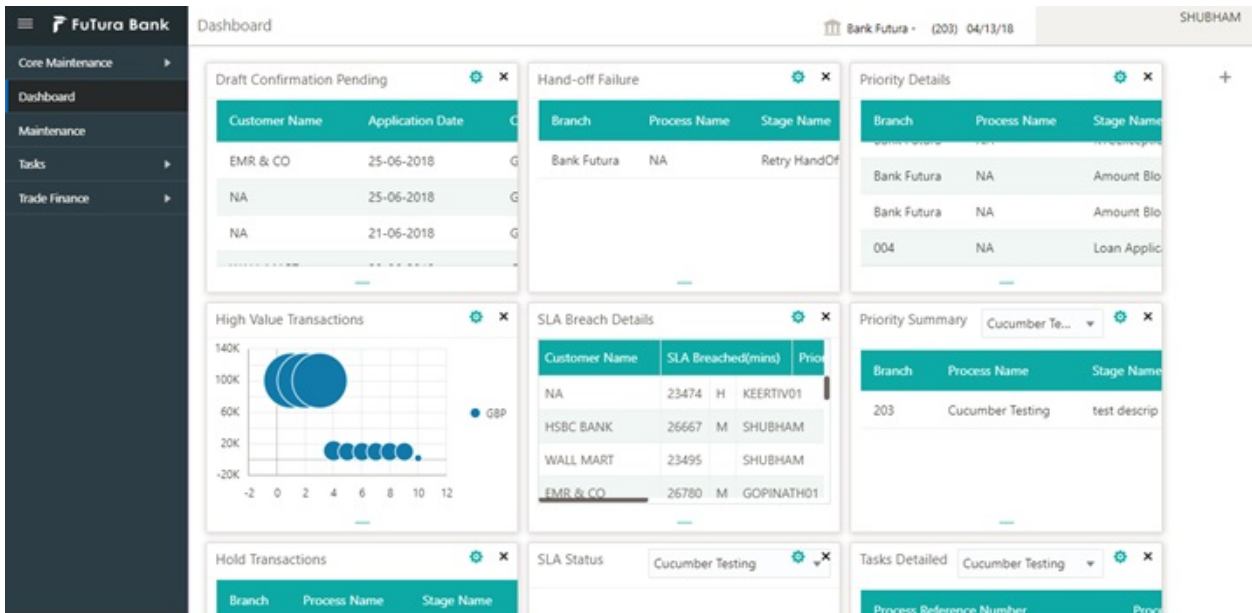

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text 'Sign In'. Below the header, there are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing a series of dots. At the bottom, there are two buttons: a green 'Sign In' button and a white 'Cancel' button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. On the left is a navigation menu with options like 'Core Maintenance', 'Dashboard', 'Maintenance', 'Tasks', and 'Trade Finance'. The main area contains several widgets:

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'.

Customer Name	Application Date
EMR & CO	25-06-2018
NA	25-06-2018
NA	21-06-2018
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.

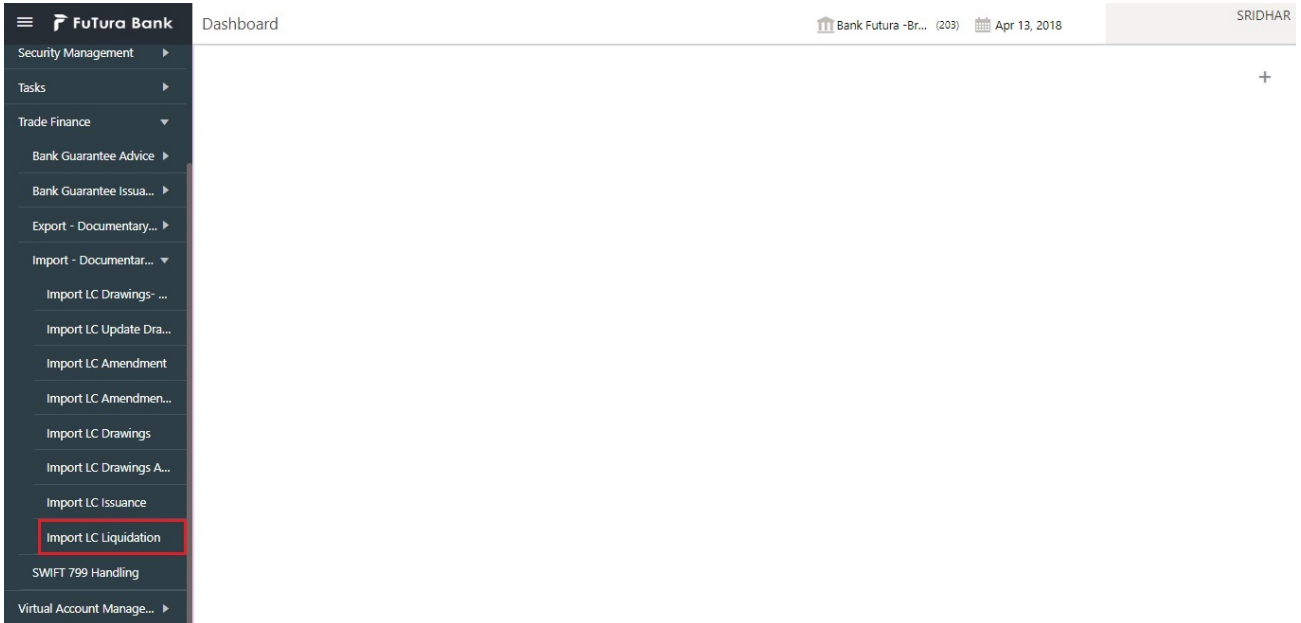

Branch	Process Name	Stage Name
Bank Futura	NA	Retry HandOf
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.

Branch	Process Name	Stage Name
Bank Futura	NA	Amount Blo
Bank Futura	NA	Amount Blo
004	NA	Loan Applic
- High Value Transactions:** A bubble chart showing transaction values for different currencies, with a legend for 'GBP'.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Priority'.

Customer Name	SLA Breached(mins)	Priority
NA	23474	H KEERTIV01
HSBC BANK	26667	M SHUBHAM
WALL MART	23495	M SHUBHAM
EMR & CO	26780	M GOPINATH01
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.

Branch	Process Name	Stage Name
203	Cucumber Testing	test descrip
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A widget showing 'Cucumber Testing' with a status indicator.
- Tasks Detailed:** A widget showing 'Cucumber Testing' with a status indicator.

3. Click Trade Finance - Islamic > Import - Documentary Credit> Import LC Liquidation - Islamic.

The registration stage has two sections Basic Details and Liquidation Details. Let's look at the details of registration screens below:

Cancel	<p>Cancels the Import LC Liquidation Registration stage inputs.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

Field	Description	Sample Values
Checklist	<p>Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.</p> 	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of registration of an Import LC Liquidation request, the request moves to Data Enrichment stage. At this stage the user can Input/Update the request for Islamic Import LC Drawing Liquidation.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

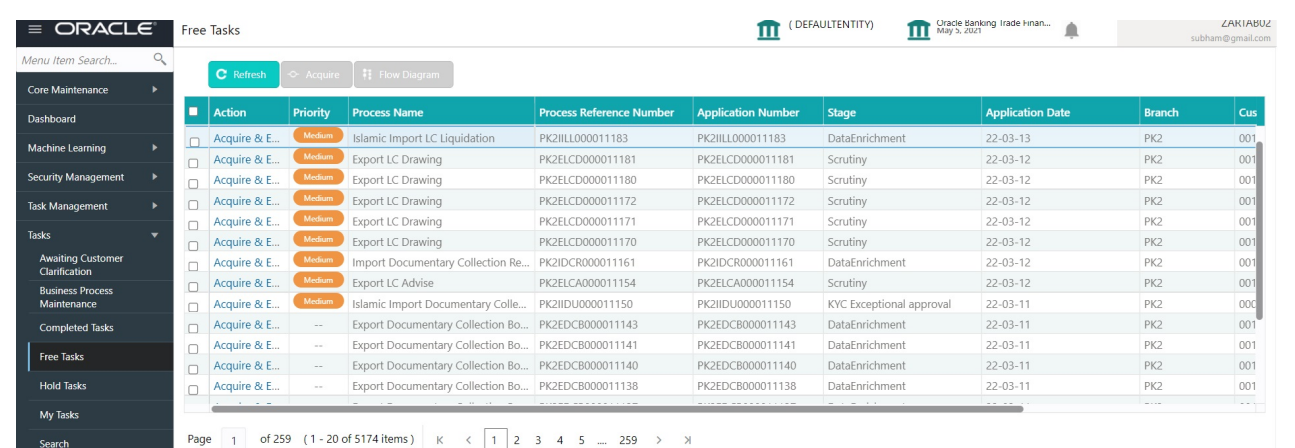

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Tasks > Free Tasks**.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

The Liquidation stage has the hops as follows:

- Main Details
- Advice Details
- Maturity Details
- Additional Details
- Settlement Details
- Summary

Let's look at the details for liquidation stage. User can enter/update the following fields. Some of the fields that are already having value from registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application
- Application Details
- Liquidation Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

Liquidation Details

The fields listed under this section are same as the fields listed under the [Liquidation Details](#) section in [Registration](#). Refer to [Liquidation Details](#) for more information of the fields. During registration, if user has not captured input, then user can capture the details in this section.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>The user can view the uploaded documents. Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	The user can view the remarks captured in the process during earlier stages.	
Overrides	User can view the various overrides that have been generated and accepted	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View LC	Enables user to view the details of the underlying LC.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Cancel	Cancel the Liquidation stage inputs.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

Other Details

Shipping Guarantee Reference

Provide the Shipping Guarantees Details based on the description in the following table:

Field	Description	Sample Values
Shipping Guarantee Reference	User can link an existing Shipping Guarantee using this field.	
Transport Document Reference	System defaults the Transport Document Reference details. System validates the Shipping Guarantee Transport Document reference number with Transport Document Reference number in a Bill, if user manually provides the Shipping Guarantee detail.	
Transport Document Date	System defaults the transport document date provided in the Bill, which is linked with the Shipping Guarantee.	
Amount	Shipping Guarantee amount is displayed in this field.	

Field	Description	Sample Values
Action	Edit: Click edit to edit the shipping guarantee details. Delete: Click edit to edit the shipping guarantee detail.	

Other Details

Provide the other bank details based on the description in the following table:

Field	Description	Sample Values
Debit Value Date	This field displays the debit value date.	
Credit Value Date	This field displays the credit value date.	
Value Date	This field displays the value date.	
Allow Pre-Payment	Toggle On: Set the toggle 'On' to enable pre-payment. Toggle Off: Set the toggle 'Off' to disable pre-payment.	
Future Advance Date	This field displays the future advance date captured in the Import LC Drawings Process will be populated from the back office if available. User should not be allowed to modify the values. User can liquidate the bill in full or Part before the Future Advance Date. In case of full liquidation before change of operation, system should display an override "Future Advance Details will be Cancelled on Liquidation". System should automatically remove the Future Advance date value on moving on submitting the task to the next stage. (Full Liquidation in DE Stage). If Auto Liquidation is enabled and Future Advance is applied before maturity date (BADV triggered before maturity), on Maturity Date, system should debit Customer (Applicant) account and close the Future Advance.	

Other Bank Charges

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Other Bank Charges - 1	Specify the value for charges to be collected for the other bank as part of the drawings transaction.	

Field	Description	Sample Values
Other Bank Charges - 2	Specify the value for charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Charges - 3	Specify the value for charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -1	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -2 to 3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	

Other Bank Interest

The user can enter the Interest details to be captured as a part of “Other Bank Interest” details section.

Provide the other bank interest based on the description in the following table:

Field	Description	Sample Values
Start Date	Specify the date from which the system starts calculating the Interest.	
Other Bank Interest-1, 2 and 3		
Component	This field displays the name of the interest Component.	
Component Description	Provide the description of the interest component.	
Interest Rate	Provide the rate to be applied for the interest component.	
Interest Basis	Select the calculation basis on which the Interest to be computed.	
Waive	Select whether the interest to be waived off. The options are: <ul style="list-style-type: none"> • Yes • No 	

MT 750 Details

Provide the MT 750 Details based on the description in the following table:

Field	Description	Sample Values
Charges To Be Deducted	Specify the charges to be deducted.	
Charges To Be Added	Specify the charges to be added.	
Total Amount To Be Paid	Select the currency and specify the total amount to be paid.	
Sender to Receiver Information	Specify the additional information for the receiver of this message, for messages initiated within or outside the Process.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>The user can view the uploaded documents. Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	The user can view the remarks captured in the process during earlier stages.	
Overrides	User can view the various overrides that have been generated and accepted	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	

Field	Description	Sample Values
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View LC	Enables user to view the details of the underlying LC.	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Cancel	Cancel the Liquidation stage inputs.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Back	Moves the task to previous data segment.	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Advice Details

A Data Enrichment user can verify the advices details data segment of the Islamic Import LC Drawing Liquidation request. Advices menu displays the advices from the back office as tiles. User can edit the fields in the tile, if required.

The screenshot shows the Oracle Islamic Import LC Liquidation interface. The top navigation bar includes the Oracle logo, user information (ZARTAB01), and a date (May 24, 2021). The main content area is titled "Advice Details" and displays two advice tiles:

- Advice : REIM_PAY_ADV**
 - Advice Name: REIM_PAY_ADV
 - Advice Party : NEGOTIATING BANK
 - Party Name : FIXNETIX
 - Suppress : NO
 - Advice
- Advice : PAYMENT_MESS...**
 - Advice Name: PAYMENT_MESSAGE
 - Advice Party :
 - Party Name :
 - Suppress : NO
 - Advice

The bottom toolbar contains the following buttons: Audit, Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and Next.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values

FX Linkage

This section enables the user to link the existing FX contract(s) to the drawing. User can link one or more FX deals to a drawing/bill. The linked value of an FX deal(s) must not exceed the value of the drawing/bill.

FX contract linkage with the Drawing/Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the drawing/bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate

Provide the FX linkage detail based on the description in the following table:

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200760501	EUR	GBP	US\$10,000.00	1.33	US\$10,000.00			28-Jun-2020

Exceptions

As per regulatory requirement, all tasks are scrutinized for KYC, Compliance and Sanctions. The checks to external system/internal system is initiated after the Data Enrichment stage.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Cancel	Cancel the approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import LC Liquidation in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Application Details

The application details data segment have values for requests received from both non-online and online channels.

Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Beneficiary Response - User can view beneficiary response details.
- Discrepancy Details - User can view the discrepancy details of the drawing.
- Limits and Collaterals - User can view limits and collateral details.
- Charges - User can view charge details.
- Revolving Details - User can view revolving details on revolving LC.
- Payment Details - User can view the payment details.
- Settlement Details - User can view the settlement details.
- Preferences - User can view set loan preferences.
- FX Linkage - User can view the details of FX Linkage.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.	

Waiting Backoffice Authorization

At this stage, the tasks which are successfully handed off to OBTF but are in un-authorized status in OBTF are identified and handled.

1. Once transaction is handed off with OBTF system, OBTF system provides the transaction status as authorized or unauthorized.
2. If the transactions status is **Authorized** in OBTF, the task in OBTFPM moves to **Completed task**.
3. If the transaction is **Un-authorized** in OBTF, the task moves to **Waiting BackOffice Authorization** and task is available in separate state similar to waiting for customer clarification.
4. The user can enter the reason for un authorization, in the **Remarks** place holder but can not re-submit the task.
5. Once the task status is changed to **Authorized** in OBTF, the task should move out of the **Waiting Backoffice Authorization** queue.
6. OBTF batch service calls the OBTFPM API to move the task from the Waiting for Authorization stage to completed stage post successful authorization of OBTF contract (based on the response received from OBCL).
