# Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

## Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

## Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# Import Documentary Collection Update Booking

Import Collection update Booking process involves update of an existing documentary collection.

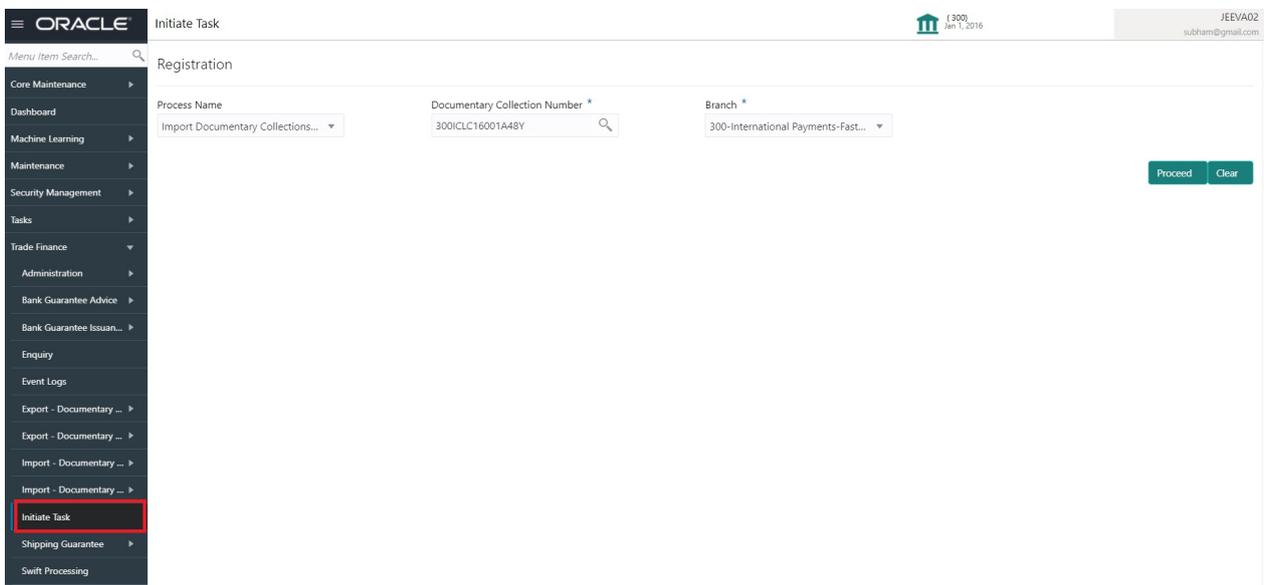

This section contains the following topics:

<a href="#">Common Initiation Stage</a>	<a href="#">Reject Approval</a>
<a href="#">Registration</a>	<a href="#">Document Linkage</a>
<a href="#">Exceptions</a>	<a href="#">Multi Level Approval</a>

## Common Initiation Stage

The user can initiate the new import collection update request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Documentary Collection Number	Select the Documentary Collection Number.
Branch	Select the branch.

### Action Buttons

Use action buttons based on the description in the following table:

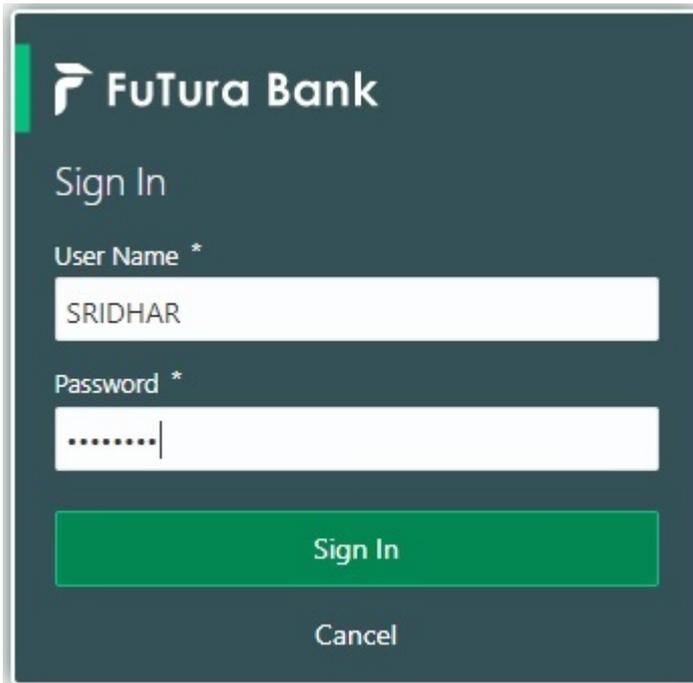

Field	Description
Proceed	Task will get initiated to next logical stage.

Field	Description
Clear	The user can clear the contents update and can input values again.

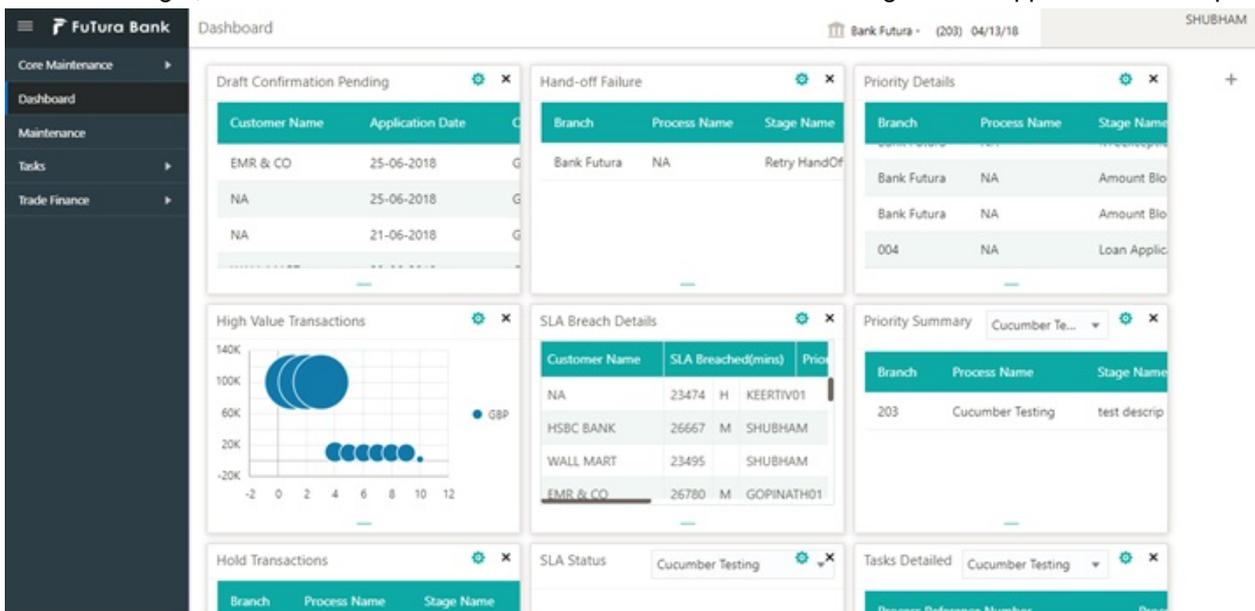

## Registration

The process starts with Registration stage. In Registration stage, user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

### 3. Click Trade Finance> Import Documentary Collection> Import Documentary Collection Update.

The screenshot displays the Oracle Flexcube Universal Banking Dashboard. On the left is a dark sidebar menu with the Oracle logo at the top. The menu items include: Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, Trade Finance (expanded), Bank Guarantee Advice, Bank Guarantee Issuan..., Enquiry, Export - Documentary..., Import - Documentary..., Import Documentary C..., and Import Documentary C... (highlighted with a red box). The main dashboard area is titled 'Dashboard' and shows several data panels. At the top right, it displays 'FLEXCUBE UNIVERSAL BAN...' and 'SRIDHAR01' with the email 'subham@gmail.com'. The date 'Jan 1, 2014' is also visible. The dashboard contains four panels: 'High Value Transactions' (No data to display), 'High Priority Tasks' (table with columns Branch, Process Name, Stage; No data to display), 'Priority Summary' (table with columns Branch, Process Name, Stage Name; No data to display), and 'A Status Summary' (table with columns Export Documentary Collections-Upd...). A search bar 'Menu Item Search...' is located at the top left of the dashboard area.

The Registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

# Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Documentary Collection Number	<p>Provide the documentary collection Number. Alternatively, user can search the documentary collection reference using LOV.</p> <p>In the LOV, user can search giving any combination details of Documentary Collection Number, Drawer, Currency, Amount, Product Code and Booking Date to fetch the collection details. Based on the search result, select the applicable documentary collection to update the details.</p>	
Drawee	<p>Read only field.</p> <p>Drawee ID and name will be auto-populated based on the selected Documentary Collection Number.</p> <p>The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.</p> <p> <b>Note</b></p> <p>If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message.</p>	
Branch	<p>Read only field.</p> <p>Branch details will be auto-populated based on the selected Documentary Collection Number.</p>	203-Bank Futura -Branch FZ1

Field	Description	Sample Values
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit of task in Registration stage.	High
Submission Mode	Select the submission mode of Import Collection Update Booking request. By default the submission mode will have the value as 'Desk'. <b>Desk-</b> Request received through Desk <b>Courier-</b> Request received through Courier	Desk
Update Date	By default, the application will display branch's current date.	04/13/2018
Remitting Bank/Remitter	Read only field. Remitting Bank/Remitter will be auto-populated based on the selected Documentary Collection Number. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.  <b>Note</b> In case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".	
Remitting Bank/Remitting Bank Reference	Read only field. Remitting Bank/Remitting Bank Reference will be auto-populated based on the selected Documentary Collection Number.	
Process Reference Number	Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.	
Remitting Bank Date/ Remitting Date	Read only field. Remitting Bank Date/Remitting Date will be auto-populated based on the selected Documentary Collection Number.	
Version Number	Version Number will be auto-generated.	

## Collection Details

Registration user can provide collection details in this section. Alternately, details can be provided by Data Enrichment user.

Provide the Collection Details based on the description in the following table:

Field	Description	Sample Values
Documents Received	<p>Read only field.</p> <p>Documents Received will be auto-populated based on the selected Documentary Collection Number.</p>	
Duplicate	<p>If a Duplicate (second set) of Import document is received, the user has to initiate Import Collection update process. User has to select the option as <b>'Second'</b> in <b>"Document Received"</b> and has to set the "Duplicate" toggle to Yes.</p> <p>This toggle when enabled, does not allow the user to update any other field within the task except for capturing the remarks.</p>	
Tenor Type	<p>Read only field.</p> <p>Tenor will be auto-populated based on the selected Documentary Collection Number.</p> <p>If Tenor type is Mixed, system should disable user input in Liquidation and Unlinked FX rate field. On Submit user will get an error message.</p>	
Product Code	<p>Read only field.</p> <p>Product Code will be auto-populated from the collection booking.</p>	
Product Description	<p>Read only field.</p> <p>This field displays the description of the product as per the product code.</p>	
User Reference Number	<p>User reference number is defaulted based on the description of the product as per the product code.</p>	

Field	Description	Sample Values
Operation Type	<p>Operation type will be auto-populated from the collection booking. User can update the operation code, if required.</p> <p>The options are:</p> <ul style="list-style-type: none"> <li>• COL</li> <li>• DIS</li> <li>• FOP - Free of Payment for bills booked with operation Collection or Acceptance.</li> </ul> <p> <b>Note</b> Change of Operation from Collection or Acceptance to Free of Payment should be enabled only for Documentary Bills not under LC.</p> <p> <b>Note</b> User cannot change the operation type, If the operation code is set as ADV or COL or DIS in collection Booking.</p> <p> <b>Note</b> User can change the operation type to ADV or DIS, if the operation code is set as ACC in collection booking.</p>	
Stage	<p>System displays the stage of the transaction. User can change the value from initial to final.</p> <p> <b>Note</b> User cannot change the stage value from Final to initial.</p> <p> <b>Note</b> For Operation Type, FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.</p>	
Co-Acceptance Required	<p>Co-Acceptance toggle will be preset from the collection booking. User can update if required.</p> <p>Toggle 'Yes': Set the toggle to 'Yes', if the co-acceptance has been requested.</p> <p>Toggle 'No': By default the toggle will be set to 'No' which implies the co-acceptance has not been is not required.</p>	

Field	Description	Sample Values
Contract Reference Number	System to populate contract reference number from the back end system once the Documentary Collection Number is selected.	
Bill Amount	Read only field. Bill amount will be auto-populated based on the selected Documentary Collection Reference.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Bill Outstanding Amount	Read only field. Bill Outstanding Amount will be auto-populated from the collection booking.	
Finance Amount	Read only field. Finance Amount will be auto-populated based on the selected Documentary Collection Number.	
Acceptance Date	Provide the acceptance date.	
Drawer	Read only field. Drawer Name will be auto-populated from the collection booking. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.   <b>Note</b> If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message.	
Limit verification required	Toggle On- Enables for limit verification. If the toggle is disabled and <b>Finance amount</b> has been provided, the system prompts an override message on Submit.	
Rebate Amount	Provide rebate to the bill outstanding amount.	
Transferee Bank	Select the Transferee Bank from the LOV. The name of the transferee bank appears in the adjacent field.  This field is enabled, if <b>Operation Type</b> is <b>TRF</b> .	

## Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the collection booking update.	
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.	

### Action Buttons

Field	Description	Sample Values
Submit	On submit, task will move to next logical stage of Import Documentary Update Collection Booking. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Import Documentary Collection Booking Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

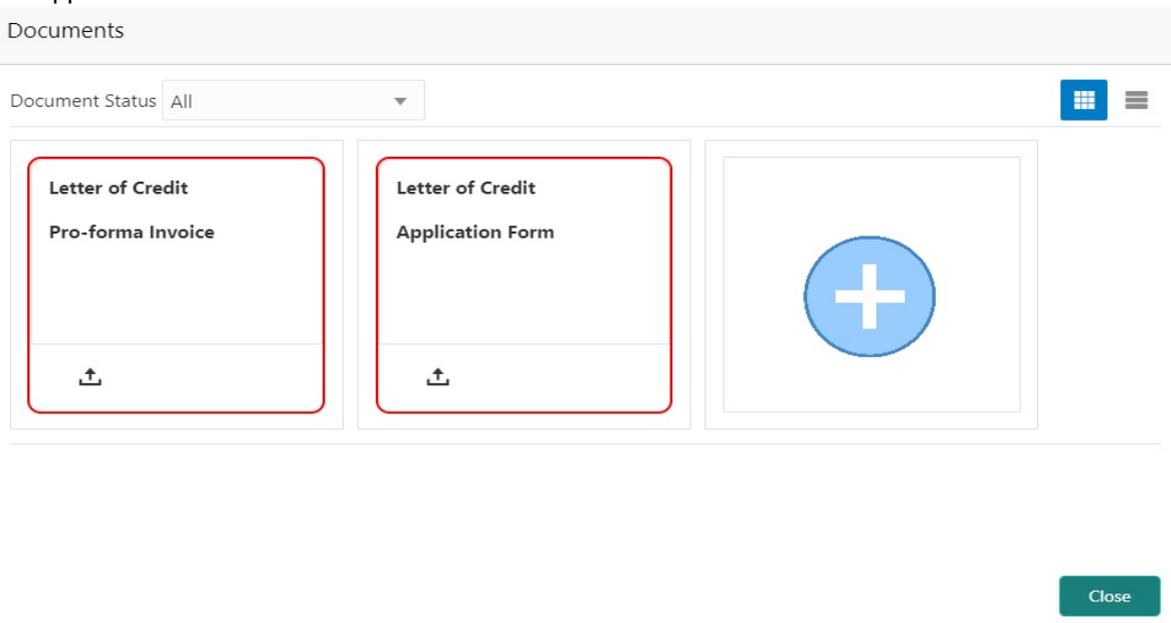

## Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

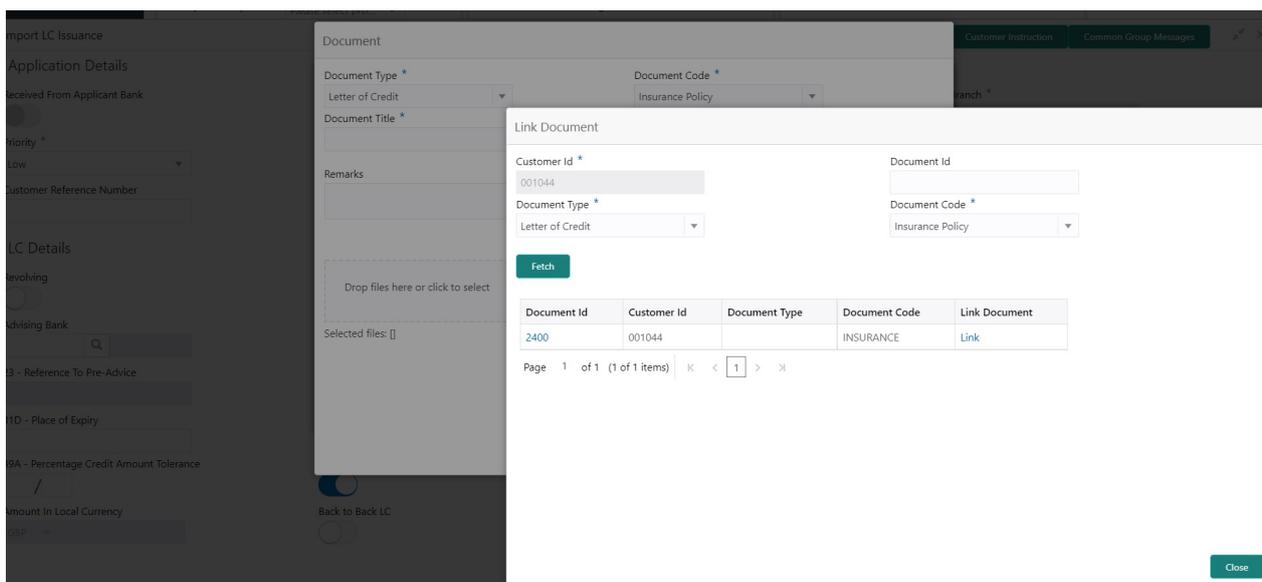

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	
Document Title	Specify the document title.	
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

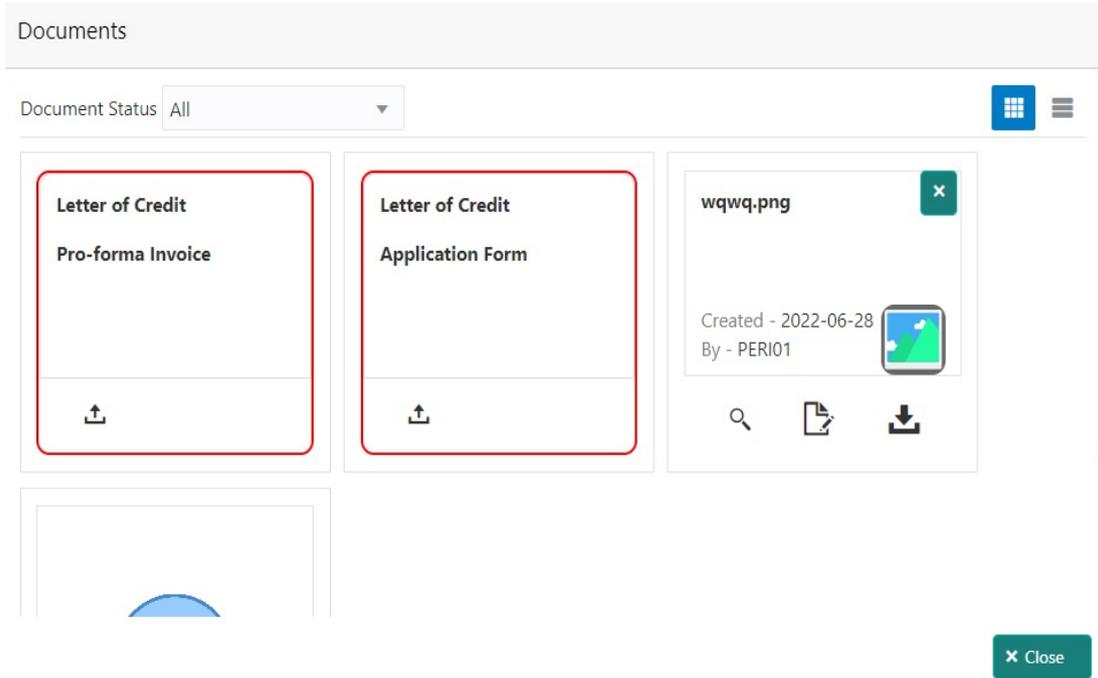

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
<b>Search Result</b>		
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	
Document Code	This field displays the document code from meta data.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Documents screen appears

The 'Edit Document' form contains the following fields:

Document Id	2400	Document Title	wqwq
Application Reference Number	PK2ILCI000019041	Entity Reference Number	PK2ILCI000019041
Document Type Id	TFPM_DOCTYPE001	Document Description	
Remarks		Document Expiry Date	Jun 29, 2022

Below the fields is a dashed box with the text 'Drop files here or click to select' and 'Current selected files: []'. At the bottom right are 'Update' and 'Cancel' buttons.

## Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

**Pre- Conditions:**

- Customer Maintenance details are replicated from OBTF to OBTFPM.
  - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
  2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
  3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
  4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

## Data Enrichment

On successful completion of registration of an Import Collection Update Booking, the request moves to Data Enrichment stage.

**Note**

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

**FuTura Bank**

Sign In

User Name \*

SRIDHAR

Password \*

.....

Sign In

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard for Futura Bank displays several widgets. The 'Draft Confirmation Pending' widget shows a table with columns for Customer Name, Application Date, and Status. The 'Hand-off Failure' widget shows a table with Branch, Process Name, and Stage Name. The 'Priority Details' widget shows a table with Branch, Process Name, and Stage Name. The 'High Value Transactions' widget is a bubble chart showing transaction values for GBP. The 'SLA Breach Details' widget shows a table with Customer Name, SLA Breached (mins), and Priority. The 'Priority Summary' widget shows a table with Branch, Process Name, and Stage Name. The 'Hold Transactions' widget shows a table with Branch, Process Name, and Stage Name. The 'SLA Status' widget shows a dropdown menu with 'Cucumber Testing' selected. The 'Tasks Detailed' widget shows a table with Branch, Process Name, and Stage Name.

3. Click Trade Finance > Tasks > Free Tasks.

The Oracle Free Tasks page displays a table of tasks. The table has the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Status. The first row is highlighted in blue. The table contains 10 rows of data.

Action	Priority	Process Name	Process Reference Number	Application Number	Stage	Application Date	Branch	Status
Acquire & Edit		Import Documentary U...	000IDCU000030286	000IDCU000030286	DataEnrichment	20-04-17	000	0i

The Data Enrichment stage has six sections as follows:

- Main Details
- Document Details
- Other Details
- Maturity Details
- Additional Fields
- Advices
- Settlement Details
- Updated Details
- Additional Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields in Application Details that are already having value from registration/online channels may not be editable.

## Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

## Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

## Collection Details

The fields listed under this section are same as the fields listed under the [Collection Details](#) section in [Registration](#). Refer to [Collection Details](#) for more information of the fields. During Registration, fields that were not captured during Registration can be updated in Data Enrichment stage.

### Note

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same. (Display only field if Submission mode is Online).

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	

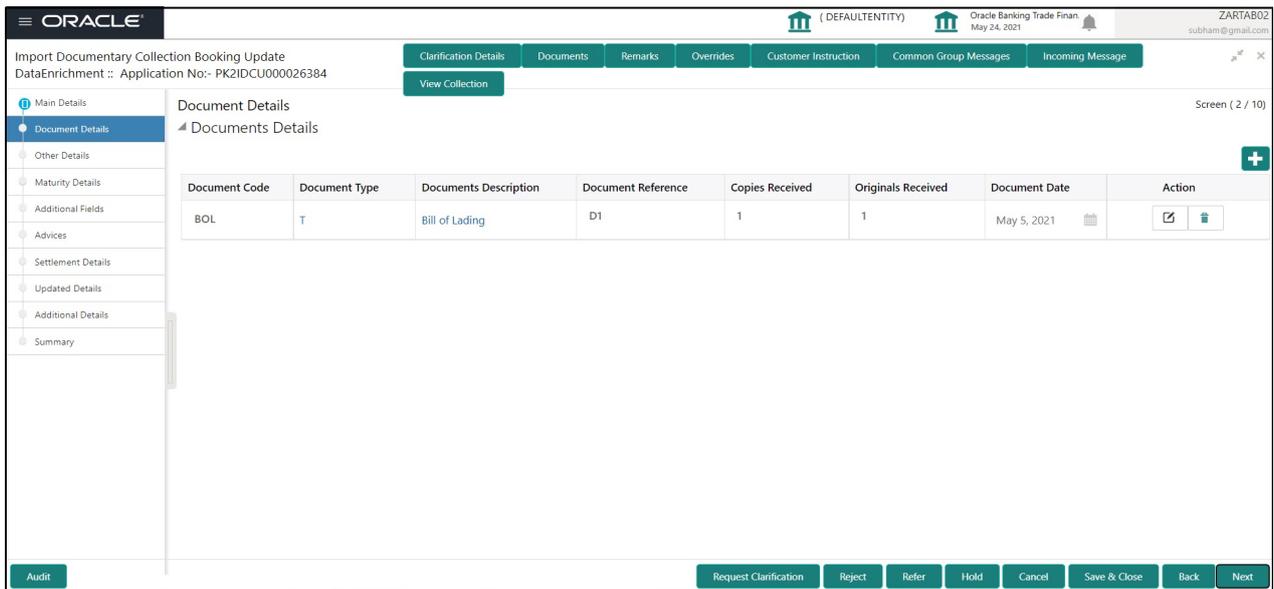

Field	Description	Sample Values
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul>	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

## Document Details

This section enables the user to capture the details of the documents received.

As part of document details screen in DE stage the user can capture the Transport Document reference and document date. On click of 'Next' system should validate the value in Document Reference field against the transport document/Bill of Lading (MARDOC) against any Outstanding Shipping Guarantees issued for the drawee and is not linked to any Documentary Collection or Import Letter of Credit. System should default the Shipping Guarantee Reference in the next screen.

System to display an override if the Bill Of Lading reference mentioned in the document details screen matches with that of the Bill of Lading reference in any of the unlinked Shipping Guarantees issued for the customer.

Capture the information based on the description in the following table:

Field	Description	Sample Values
Document Code	System will default the document codes based on the product selected. User can add or delete the code by selecting the line on the grid.	
Document Type	System will default the document type based on the product selected.	
Document Description	System will populate the document description based on the document code. User can edit the description.	
Document Reference	User can capture the document reference, if available	
Copies Received	User can edit the actual copies received.	
Originals Received	User can edit the actual originals received.	
Document Date	User can edit the date on which the document is received.	
Action	Click Edit icon to edit the document code/ document date.  Click Delete icon to delete the document code.	

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

## Other Details

Other Details enables the user to capture details like Shipping guarantee Reference, Debit Value Date, Credit Value Date, Other Bank charges etc.

## Shipping Guarantee Reference

Field	Description	Sample Values
Click '+' to add the multiple shipping details.		
Shipping Guarantee Reference	Shipping Guarantee Reference is auto populated from the linked Shipping Guarantee details in the Shipping Detail Grid, based on the Transport Document Reference and Date provided in Bill, which is linked with the Shipping Guarantee.  User can select the Shipping Guarantee from the lookup.	
Transport Document Reference	Transport Document Reference is auto populated from the underlying Shipping Guarantee details..  System validates the Shipping Guarantee Transport Document reference number with Transport Document Reference number in a Bill, if user manually provides the Shipping Guarantee detail.	
Transport Document Date	Transport Document Date is auto populated based on the date provided in Bill, which is linked with the Shipping Guarantee.	
Amount	Shipping Guarantee amount is displayed in this field.	
Action	Edit: Click edit to edit the shipping guarantee details.  Delete: Click edit to edit the shipping guarantee detail.	

## Other Details

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Debit Value Date	Provide the debit value date.	
Credit Value Date	Provide the credit value date.	
Value Date	Provide the value date.	
Other Bank Description -1	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -2 to 3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	

Field	Description	Sample Values
Other Bank Description -3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	

### Other Bank Charges

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Other Bank Charges - 1	Charges to be collected for the other bank as part of the collection transaction.	
Other Bank Charges - 2	Charges to be collected for the other bank as part of the collection transaction.	
Other Bank Charges - 3	Charges to be collected for the other bank as part of the collection transaction.	

### Other Bank Interest

The user can enter the Interest details to be captured as a part of “Other Bank Interest” details section.

Provide the other bank interest based on the description in the following table:

Field	Description	Sample Values
Start Date	Provide the date from which the system starts calculating the Interest, if other bank interest details not captured in the bill.  If other bank interest details are already captured in the bill, this field is non-editable.	
Other Bank Interest-1, 2 and 3		
Component	This field displays the name of the interest Component.	
Component Description	Provide the description of the interest component.	
Interest Rate	Provide the rate to be applied for the interest component, if other bank interest details not captured in the bill.  If other bank interest details are already captured in the bill, this field is non-editable.	
Interest Basis	Select the calculation basis on which the Interest to be computed, if other bank interest details not captured in the bill.  If other bank interest details are already captured in the bill, this field is non-editable.	

Field	Description	Sample Values
Waive	<p>Select whether the interest to be waived off. , if other bank interest details not captured in the bill.</p> <p>If other bank interest details are already captured in the bill, this field is non-editable.</p> <p>The options are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	<p>Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.</p>

This section will be enabled only for customer initiated transactions.</li> </ul>	

Field	Description	Sample Values
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	

## Maturity Details

## Draft Details

Update the draft details based on the description in the following table:

Field	Description	Sample Values
Draft Code	Update the draft code. Alternatively, user can search the draft details using LOV.	
Draft Amount	Update the draft amount.	
Action	Click Edit icon to edit the draft code. Click Delete icon to delete the draft code.	

## Maturity and Multi Tenor Liquidation Details

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

Field	Description	Sample Values
SNo.	Serial number of the tenor record.	
Tenor Basis	Provide the tenor basis. This field is disabled if the Tenor Type is 'Mixed'.	
Tenor Description	The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description.	
Start Date	Select the start date.	
Tenor Days	Provide the tenor basis. This field is disabled if the Tenor Type is 'Mixed'.	
Transit Days	Provide the tenor basis. This field is disabled if the Tenor Type is 'Mixed'.	
Maturity Date	Maturity date as Start date + Tenor Days or Transit Days. This field is disabled if the Tenor Type is 'Mixed'	
Bill Amount	Provide the bill amount.	
Liquidated Amount	If a liquidation has already happened in the bill, system should display the Liquidated amount. System should validate that the Total Liquidation Amount is not greater than the Bill amount and should display an Error Message	
Exchange Rate	Provide the Exchange Rate.	
Liquidation Date	Provide the liquidation date.	
Liquidation Amount	User to input the Liquidation Amount.	
Rebate Amount	Provide the value for bill rebate amount.	
Action	Click Edit icon to edit the tenor record. Click Delete icon to delete the tenor record.	
Interest from Date	Interest rate is defaulted in this field. The user can select the interest from date. The interest from date cannot be earlier than branch date and later than maturity date.	
Interest to Date	Maturity date is auto-populated in this filed.	
Accept Commission From Date	Provide the accept commission from date.	

Field	Description	Sample Values
Accept Commission To Date	Provide the accept commission to date.	

## Additional Fields

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. This section displays the commission details:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	This field displays the commission component.	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.  If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	

Field	Description	Sample Values
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified	<p>From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.</p>	
Defer	<p>If check box is selected, charges/commissions has to be deferred and collected at any future step.</p>	
Waive	<p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	<p>Charge party will be 'Applicant' by Default. You can change the value to Beneficiary</p>	
Settlement Account	<p>Details of the Settlement Account.</p>	

## Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.  This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled.  The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.

## FX Linkage

This section enables the user to link the existing FX contract(s) to the bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following table:

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200760501	EUR	GBP	US\$10,000.00	1.33	US\$10,000.00			28-Jun-2020

Provide the loan preference details based on the description in the following table:

Field	Description	Sample Values
Drawing/Collection Ref	Defaults from the underlying task. User cannot change the value.	
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount. Defaults from the underlying task. User cannot change the value.	
Customer Id	Defaults from the underlying task. User cannot change the value.	
Customer Name	Applicant/ Drawee Name. Defaults from the underlying task. User cannot change the value.	
Product Code	Defaults from the underlying Collection/ Drawing Product maintenance. User cannot change the value.	
Finance Currency-Amount	Finance currency is defaulted from the bill currency. User can change this to Local Currency. System should display an error message on tab out if the currency selected is not a Bill currency or Local Currency.  System populates the loan account based on the outstanding drawing/ Collection amount less the collateral amount. User cannot change the Loan amount.	
Exchange Rate	Exchange rate applicable for Local Currency.  System displays the Exchange rate from maintenance. User cannot change the value.  System validates the exchange rate is within the allowed range.	
Finance Tenor Units	Period of loan.  System defaults the value. User can change the value. The numerical value for Days or months or Years is applicable.	
Tenor Type	System defaults the value. User can change the value. Values are Days, Months and Years. The numerical value for Days or months or Years is applicable.	
Finance Value Date	System defaults the branch date as Value date. User cannot change the value.	
Finance Maturity Date	Finance maturity date as default based on Tenor type and Tenor units. User cannot change the value.	

Field	Description	Sample Values
Liquidate Charge/Comm On LC	Toggle On: Turn the toggle on to include the outstanding Commission/charge to be included as part of Liquidation.	
Finance Profit/UDE Details		
User Defined Element ID	System populates the UDE Element ID as part of simulation. User are allowed to change the selection through LOV.	
UDE Description	System populates the UDE description as part of simulation. If a user changes the UDE ID, system should populate the description.	
Rate Code	System populates the Rate code as part of simulation.	
Usage	System populates the details as part of simulation.	
UDE Value	System populates the value as part of simulation.	
Limits		
Serial Number	System defaults the value.	
Linkage Type	System defaults the linkage type as "Facility" from back office.	
Linkage Reference Number	System defaults the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.	
Linked Percentage	User can enter the value. Maximum is 100. User cannot enter negative values.	
Limit Amount	System defaults the value. System should populate the value based on the contribution percentage.	

## Linked Finance Details

This user can view the details of linked finance accounts.

Finance Account	Finance Currency	Finance Amount

Field	Description	Sample Values
Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office.  Value can be: <ul style="list-style-type: none"> <li>• Fixed Floating</li> <li>• Special</li> </ul>	
Rate Code	This field displays the rate code applicable for the Componen.	
Min Spread	This field displays the minimum spread applicable for the Rate Code.  This field have value only if the <b>Rate Type</b> is <b>Floating</b> .	
Max Spread	This field displays the maximum spread applicable for the Rate Code.  This field have value only if the <b>Rate Type</b> is <b>Floating</b> .	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value.  System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code.  User can change the value if the <b>Rate Type</b> is <b>Fixed</b> . System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	
Currency	System defaults the Interest currency in this field.	

Field	Description	Sample Values
Amount	User can input the interest amount, in case the <b>Rate Type</b> is <b>Special</b> , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	System displays the Charge Party based on the type of transaction.  In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..	
Settlement Account	System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display an override.  In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM)..	

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	

Field	Description	Sample Values
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul>	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.

## Limits & Collateral

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

This section displays the commission details:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	This field displays the commission component.	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	

Field	Description	Sample Values
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	If check box is selected, charges/commissions has to be deferred and collected at any future step.	
Waive	<p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

## Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

## Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.  This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled.  The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.

## FX Linkage

This section enables the user to link the existing FX contract(s) to the bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following table:

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200760501	EUR	GBP	US\$10,000.00	1.33	US\$10,000.00			28-Jun-2020

Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office. Value can be: <ul style="list-style-type: none"> <li>• Fixed Floating</li> <li>• Special</li> </ul>	
Rate Code	This field displays the rate code applicable for the Componen.	
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value only if the <b>Rate Type</b> is <b>Floating</b> .	
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value only if the <b>Rate Type</b> is <b>Floating</b> .	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code. User can change the value if the <b>Rate Type</b> is <b>Fixed</b> . System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	
Currency	System defaults the Interest currency in this field.	

Field	Description	Sample Values
Amount	User can input the interest amount, in case the <b>Rate Type</b> is <b>Special</b> , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	System displays the Charge Party based on the type of transaction.  In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..	
Settlement Account	System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display an override.  In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM)..	

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	

Field	Description	Sample Values
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul>	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

## Summary

User can review the summary of details updated in Data Enrichment stage of Import Documentary Collection Update Booking request.

The tiles must display a list of important fields with values. User can drill down from summary Tiles into respective data segments.

Request Clarification	User should be able to specify the clarification details for requests received online.	

## Exceptions

The Import Collection Update Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

### Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

### Amount Block Exception

This section will display the amount block exception details.

### Summary

Tiles Displayed in Summary:

### Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"><li>● R1- Documents missing</li><li>● R2- Signature Missing</li><li>● R3- Input Error</li><li>● R4- Insufficient Balance/Limits</li><li>● R5 - Others.</li></ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Field	Description	Sample Values
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance- Limits</li> <li>● R5 - Others</li> </ul>	
Cancel	Cancel the Import Collection Update Booking Amount Block Exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

## Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

The screenshot displays the Oracle OBTFPM application interface. At the top, there is a navigation bar with the Oracle logo and user information including 'ENTITY\_ID1 (ENTITY\_ID1...)', 'FLEXCLURE UNIVERSAL BAN...', 'Aug 3, 2023', and 'ZARTAB02 subham@gmail.com'. Below the navigation bar, the main content area shows 'Import Documentary Collection Booking Update' and 'KYC Exceptional approval :: Application No:- 032IDCU000184367'. A sidebar on the left contains 'KYC Exception' and 'Summary' options. The main content area displays 'KYC Exception' with a 'Summary' tab selected. Below this, there is a 'KYC Details' table with the following data:

Party ID	KYC Status	KYC Verified On	KYC Verified Till
032209	Verified	Mar 31, 2023	Mar 31, 2026
032206	Failed		

At the bottom of the screen, there is an 'Audit' button on the left and a row of action buttons: 'Reject', 'Refer', 'Hold', 'Approve', 'Back', and 'Next'.

User can pick up a transaction and do the following actions:

## Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

## Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

#### **Note**

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

#### **Approve**

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

#### **Refer**

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

#### **Reject**

The transaction due to non-availability of limits capturing reject reason.

### **Limit/Credit Check**

This section will display the amount block exception details.

### **Summary**

Tiles Displayed in Summary:

Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

## Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

On successful Handoff, system triggers TRFB event in the Back office.

**Note**

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

### Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

The screenshot shows the 'My Tasks' interface in the FuTura Bank system. A modal window is open for re-keying application number 203ILCISS000000817. The modal contains the following fields:

- Applicant Party: 001345
- Currency: GBP
- Amount: £15,000.00
- Beneficiary Party: 001344
- Expiry Date: 08/17/18

Each field has a green checkmark indicating it is valid. The modal also includes 'Proceed' and 'Cancel' buttons. In the background, a table lists tasks with columns for Edit, Priority, Application Number, Amount, Process Name, and Stage.

Edit	Priority	Application Number	Amount	Process Name	Stage

User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"><li>• R1- Documents missing</li><li>• R2- Signature Missing</li><li>• R3- Input Error</li><li>• R4- Insufficient Balance- Limits</li><li>• R5 - Others</li></ul>	
Cancel	Cancel the approval.	

Field	Description	Sample Values
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

## Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

### Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

### Action Buttons
