Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process trade finance transaction.

Overview

OBTFPM is a Trade Finance Middle Office Platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during Transaction handling /processing.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Shipping Guarantee Issuance

As a part of Shipping Guarantee Issuance, the applicant approaches a Bank and requests the bank to issue a Shipping Guarantee on their behalf to the Beneficiary (Shipping Company).

In the subsequent sections, let's look at the details for Shipping Guarantee Issuance process:

This section contains the following topics:

Common Initiation Stage	Registration
OBTF- OBTFPM Bi-Directional Flow	Amount Block Exception Approval - Trade Finance Transactions
Amount Block Details	Multi Level Authorization

Common Initiation Stage

The user can initiate the new Shipping Guarantee request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Customer ID	Select the customer id of the applicant.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

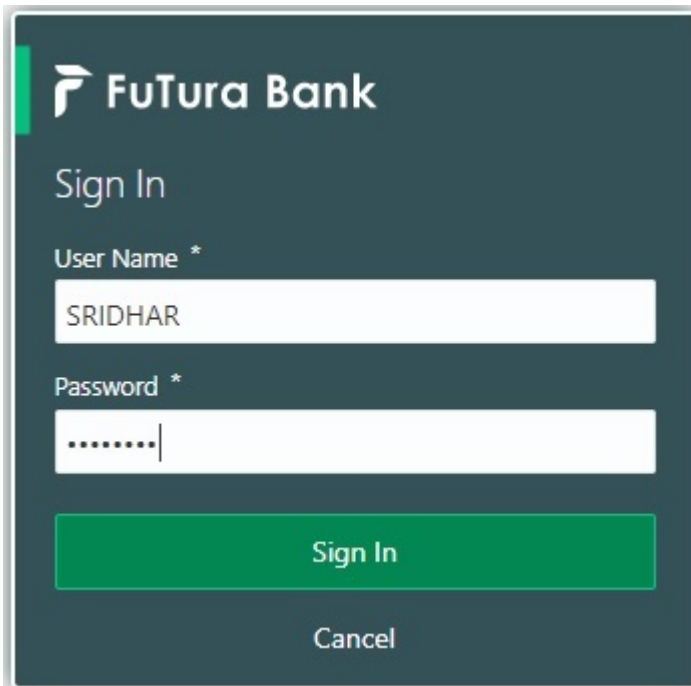

Registration

The first stage of Shipping Guarantee Issuance process starts from the Registration Stage. The user can initiate Shipping Guarantee issuance from the Registration process.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Shipping Guarantee > Shipping Guarantee Issuance.

The Registration stage has two sections Application Details and Shipping Guarantee Details. Let's look at the Registration screens below:

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Issued Against	Select whether this Shipping Guarantee is issued against Documentary Credit or against a Documentary Collection from the drop-down. Drop down values are: <ul style="list-style-type: none"> Documentary Credit Documentary Collection 	
Documentary Credit Number	Select Documentary Credit Number from LOV or input the LC number. This field is enabled only if value in Issued Against field is Documentary Credit.	
Customer	Read only field - If the value in Issued Against field is Documentary Credit , the customer ID for the selected Documentary credit is populated in this field and user should not be able to change the value. If the value in Issued Against is Documentary Collection , the user can input the Customer ID or select the Customer ID from the LOV	
Branch	Read only field. System defaults branch details.	203-Bank Futura -Branch FZ1
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	203GTEISS000 001134

Field	Description	Sample Values
Customer Reference Number	Read only field. Shipping Guarantee back office reference gets simulated and displayed.	
Priority	Priority maintained will be populated as either 'Low or Medium or High'. If priority is not maintained for a customer, 'Medium' priority will be defaulted.	Medium
Submission Mode	System defaults the mode from Registration stage.	Desk
Booking Date	System defaults the branch date. User cannot change the value. If the task gets approved on a later date, system will populate that date as the booking date.	04/13/2018

Shipping Guarantee Details

Registration user can provide Shipping Guarantee details in this section.

Provide the details based on the description in the following table:

Field	Description	Sample Values
Product Code	<p>Select the applicable Shipping Guarantee product code.</p> <p>Click the look up icon to search the product code with code or product description.</p> <p>You can also enter the product code and on tab out system will validate and populate the selected product description. The product codes will be listed based on the selected value in Form of Undertaking.</p>	GUIS
Product Description	Auto populated by the application based on the selected Product Code.	Shipping Guarantee

Field	Description	Sample Values
Outstanding LC Amount	Read only field. System defaults the outstanding amount if any.	
SG/DO Amount	User can enter the amount for which the shipping guarantee has to be issued.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Contract Reference Number	Read only field. Auto-generated by back end application. Shipping guarantee back office reference gets simulated and displayed.	203GUIS18103 ALP5
User Reference Number	User Reference Number will be auto populated by the system based on selection of Product Code . The user can change the User Reference Number.	
SG/DO Beneficiary	User can search and select the Shipping Guarantee beneficiary details from LOV.	
SG/DO Expiry Date	Provide the expiry date of the Shipping Guarantee Issuance.	09/30/18
Mode of Transport	User can select the mode of shipment from the drop-down. The values are: <ul style="list-style-type: none"> • Sea • Air 	
Cargo Arrival Details	User can capture the cargo arrival details.	

Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Provide any additional information regarding the Shipping Guarantee. This information can be viewed by other users processing the request.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View LC	User can view the latest LC details.	
Events	User can view all the previous events under the LC.	

Action Buttons

Field	Description	Sample Values
Submit	On Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Shipping Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancels the Shipping Guarantee Issuance Registration stage input.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Checklist	Make sure that the details in the checklist are completed. If mandatory checklist items are not marked, system will display an error on submit.	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.

2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	
Document Title	Specify the document title.	

Field	Description	Sample Values
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
Search Result		
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	
Document Code	This field displays the document code from meta data.	

Field	Description	Sample Values
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Document screen appears.

The 'Edit Document' form contains the following fields:

- Document Id: 2400
- Document Title: wqwq
- Application Reference Number: PK2ILCI000019041
- Entity Reference Number: PK2ILCI000019041
- Document Type Id: TFPM_DOCTYPE001
- Document Description: (empty text area)
- Remarks: (empty text area)
- Document Expiry Date: Jun 29, 2022

At the bottom, there is a dashed box with the text 'Drop files here or click to select' and 'Current selected files: []'. 'Update' and 'Cancel' buttons are located at the bottom right.

OBTFPM- OBDX Bidirectional flow

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling.

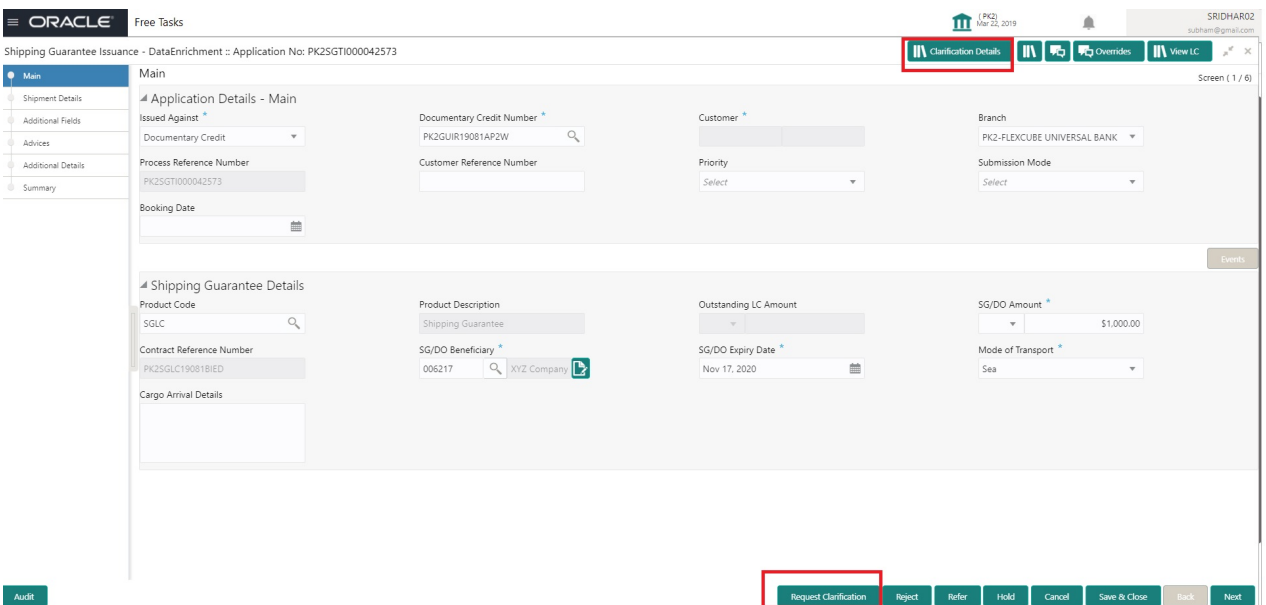

OBTFPM user, for task received from online channel, raise clarification and receive response from the customer.

1. Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

2. The task created will land in the Scrutiny stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.

3. In the Scrutiny, Data Enrichment or Approval the bank user may require clarification from customer, OBTFPM user clicks **Request Clarification** button to request for online clarification from customer.

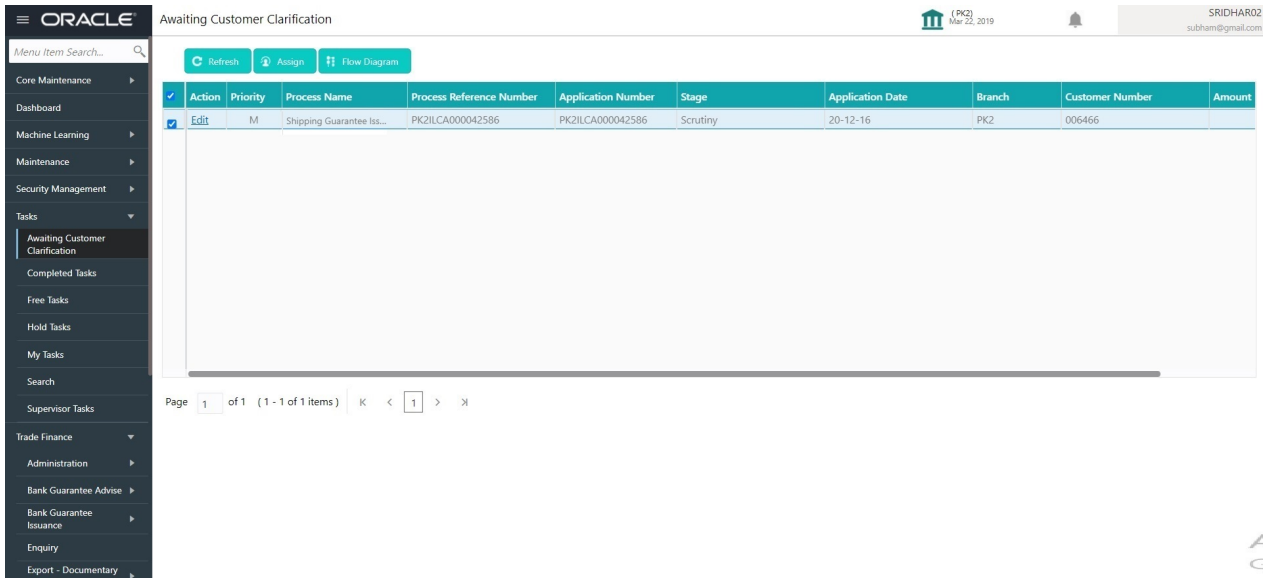

4. The **Request Clarification** detailed screen appears, user enters the information and clicks **Save**, the information should be sent to customer.

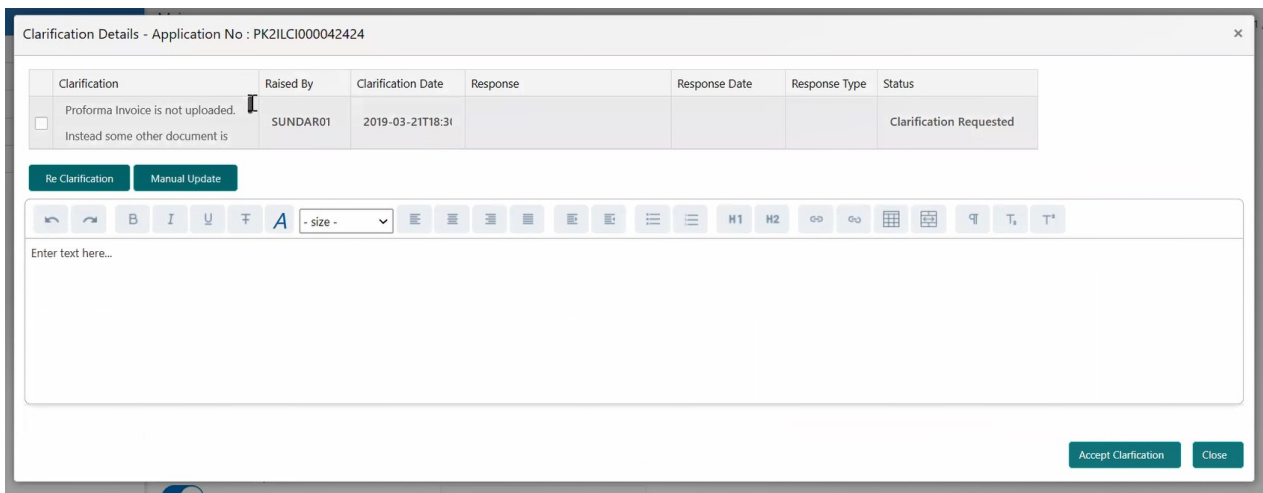

5. OBTFPM user should be able to see the details in the View Clarification window and the status will be Clarification Requested. The user can click Re clarification if required.

6. The task goes to **Awaiting Customer Clarification** state until the response received from the customer.

7. Click **Edit**.

8. The user can click **Accept Clarification** button, if the query raised has been answered by the customer. The status should change to Clarification Accepted. on next the task moves to the next logical stage.
9. Bank user checks the Clarification and opens the **Documents** Tab. System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version number of the documents.

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of Registration of a Shipping Guarantee Issuance request, the request moves to Data Enrichment stage. At this stage the bank user would be able to update fields, check the limits

and other legal and financial risks the bank is exposed to and either approve or reject or refer the transaction to the customer for changes. The user should also be able to input transaction details.

Requests that are created online (Trade Portal) the task will be created in DE stage directly and the fields will be populated based on the incoming request. Submission mode for online requests will be "Online".

Note

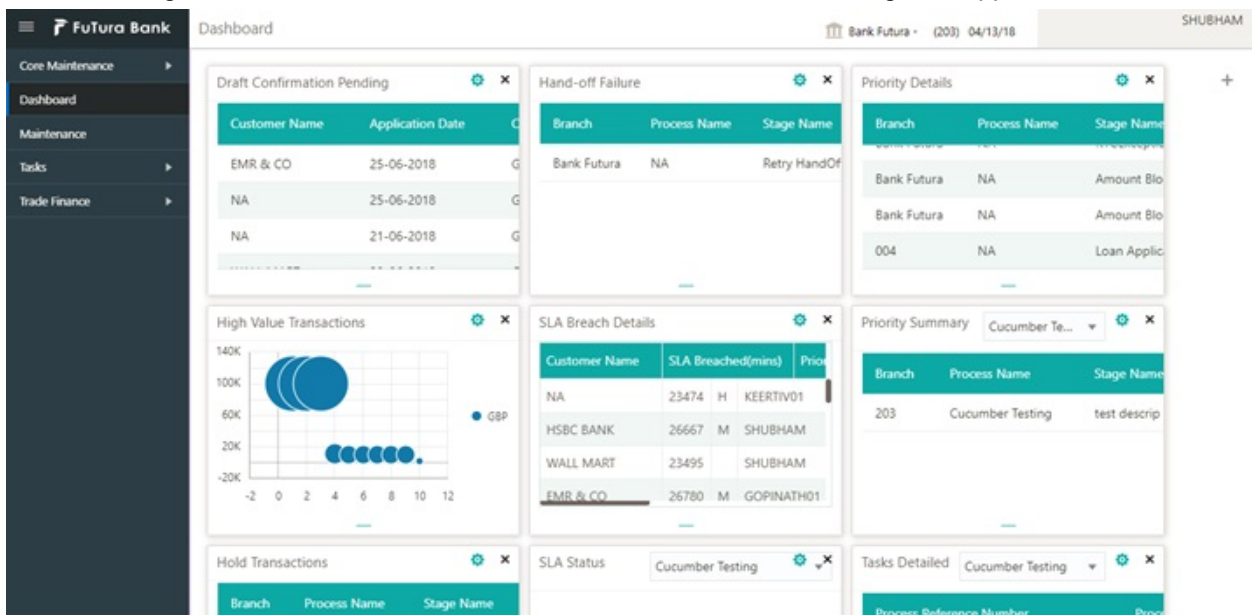

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets mapped to the user.

3. Click Trade Finance> Tasks> Free Tasks.

The Data Enrichment stage has three sections as follows:

- Main Details
- Shipment Details
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

Main details section has three sub section as follows:

- Application Details
- Shipping Guarantee Details

Application Details

All fields displayed under Application details section, would be read only except for the **Priority** and **Customer Reference Number**. Applications from Online channels will be directly available in the Data Enrichment stage and the fields will be populated with the details from incoming request.

Refer to [Application Details](#) for more information of the fields.

Shipping Guarantee Details

The fields listed under this section are same as the fields listed under the [Shipping Guarantee Details](#) section in [Registration](#). Refer to [Shipping Guarantee Details](#) for more information of the fields. During Registration, if user has not captured values, then user can capture the details in this section.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>Application displays mandatory documents to be uploaded for amendment. Commission Details

The Commission Details with values is defaulted here, if default commission is available under the product.

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	

Field	Description	Sample Values
Rate	<p>Defaults from product. User can change the rate, if required.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified	User can enter a new amount in 'Modified amount' field. From the default value, if the rate is changed or the amount is changed, the same is updated in the modified amount field.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Waive	<p>Select the check box to waive charges/ commission.</p> <p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p>	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary.	
Settlement Account	Details of the Settlement Account.	

Fields and Description of Charge Details provided in the following table:

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	User can enter a new amount in 'Modified' field. From the default value, if the rate is changed or the amount is changed, the same is updated in the modified amount field.	
Billing	<p>If charges are handled AZ the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary.	

Field	Description	Sample Values
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission. The tax component defaults if maintained in the product level. Tax detail cannot be updated by you and any change in Tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Following Tax Details will be displayed:

Field	Description	Sample Values
Component	Tax Component type.	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Settlement Account	Details of the settlement account.	

Preview Message

Based on the shipping guarantee details captured in the previous screen, the preview message simulated from the back office and the user can view the message.

The screenshot displays a 'Preview Message' window with two main sections:

- Preview - SWIFT Message:** Includes a 'Language' dropdown set to 'English' and a 'Message Type' dropdown set to 'Select'.
- Preview - Mail Advice:** Includes a 'Language' dropdown set to 'English' and an 'Advice Type' dropdown set to 'GUARANTEE'. The preview content shows:
 - Date: 01-JAN-16
 - Page: 1
 - Sender: WALTER WHITE, BANGALOR
 - Page: 1
 - Subject: LETTER OF GUARANTEE
 - Type of Guarantee: (partially visible)

At the bottom right of the window, there are 'Save & Close' and 'Close' buttons.

Field	Description	Sample Values
Preview SWIFT Message		
Language	Select the language for the SWIFT message.	
Message Type	Select the message type.	
Preview Advice	Display a preview of the draft message.	
Preview Mail Device		
Language	Select the language for the advice message.	
Advice Type	Select the advice type.	
Preview Advice	Display a preview of the advice.	
Draft Confirmation Required	This toggle enables the user to select if draft confirmation is required or not	
Following fields will have values on receipt of customer response.		
Customer Response	User can enter the response received from customer. If the response is received online, the response is auto populated in this field by the system	
Customer Remarks	Remarks from the customer for the draft	
Response Date	Customer Response received date.	
Default Email list	Default email address of the customer.	
Add Recipients	Enables to add more recipients for the customer response.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Request Clarification	User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.	
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User can refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 – Others 	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Cancel	Cancel the Guarantee Issuance scrutiny stage inputs.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Back	On click Back , user navigates to previous step.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Settlement Details

Provide the settlement details based on the description in the following table:

Component	Currency	Debit/Credit	Account	Account Description	Account Currency	Netting Indicator	Current Event	Original Exchange Rate	Exchange Rate	Deal Reference
AGUIR_COM1_LIQD	GBP	Debit	PK20010440017	GOODCARE PLC	GBP	No	No

Back	On click Back , user navigates to previous step.	
Submit	On Submit, system should validate for all mandatory field values Task will get moved to next logical stage of Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

Amount Block Exception Approval - Trade Finance Transactions

As a part of Amount Block Exception, the user has to review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

In Amount block, system checks whether the sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Application Details

Refer to [Application Details](#). The fields are read only.

Summary

Tiles Displayed in Summary:

- Main Details - User can view about the application details and guarantee issuance details.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Limits and Collaterals - User can view the captured details of limits and collaterals.
- Charges - User can view the provided charge details.
- Remarks - User can view the remarks captured during earlier stages.
- Documents - User can view all the documents uploaded as part of the process.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance- Limits• R5 - Others	

Field	Description	Sample Values
Cancel	Cancel the Amount Block Exception Inputs.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Amount Block Details

Limits & Collateral

All the fields in the tables below will be read-only in the Amount Block exception System'

Provide the Amount Block Details based on the description in the following table:

Field	Description	Sample Values
Customer ID	Unique Customer Identification Number of the customer for whom the credit exception approval is required.	
Line ID	Line ID under which the limit check was originally performed.	
Contribution%	Percentage of the transaction amount that need to be earmarked.	
Contribution Currency	Currency of transaction.	
Contribution Amount	Indicates the amount that is required in the contribution currency for Earmark.	
Limit Check Response	Response received from backend system. Response can be Limit Earmark Created or Limits not available.	

Collateral Details

Field	Description	Sample Values
Collateral Type	The type for which the amount block is required eg: charges, cash collateral, deposit etc.	
Collateral %	Percentage of the transaction amount that needs to be marked against a collateral.	
Currency	Currency of transaction.	
Amount	Amount that is marked as collateral.	
Settlement Account	The account that will be blocked for collateral.	

Charge Details

Field	Description	Sample Values
Type	The type for which the amount block is required eg: charges, cash collateral, deposit etc.	
Contract Currency	The currency of the contract.	
Block Amount	The amount for which the block is required.	
Branch	The branch under which the amount block has to be made.	
Account	Settlement account to be used.	
Account Currency	Currency in which the settlement account is maintained.	
Available Balance	The outstanding balance in the account when the amount block was placed in contract currency.	
Block Reference Number	Unique Amount Block reference.	
Block Status	The status of amount block – Success or failure.	
Block Status Detail	Failed Reason (This field will have value only if amount block is failed).	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Guarantee Issuance approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

Multi Level Authorization

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Name
- Beneficiary Name
- Undertaking Currency
- Undertaking
- Amount
- Expiry Date

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
