1. Preface

1.1 Introduction

This manual is intended as a guide to help you define User Defined events in Oracle Banking Trade Finance. Besides this User Manual, you can find answers to specific features and procedures in the Online Help, which can be invoked, by choosing 'Help Contents' from the *Help* Menu of the software. You can further obtain information specific to a particular field by placing the cursor on the relevant field and striking <F1> on the keyboard.

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Organization

This manual is organized as follows:

Chapter	Description
Chapter 1	<i>About this Manual</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Building User Defined Events</i> explains how to define events in Oracle Banking Trade Finance either for your own convenience or to suit the requirements of your bank.

1.4 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

1.5 Related Documents

For further information on procedures discussed in the manual, refer to the Oracle Banking Trade Finance manuals on:

- Core Services
- Common Procedures

2. User Defined Events

2.1 Introduction

A contract that you process in Oracle Banking Trade Finance goes through different stages during its life cycle. These stages are defined as Events. Every new module that you maintain has to be associated with a set of events, which will be triggered at appropriate stages during the lifecycle of the contract.

Apart from the factory shipped events, you can create your own events as per the requirements of the bank.

This chapter contains the following sections:

- [Section 2.2, "Event Details"](#)
- [Section 2.4, "Accounting Roles and Heads"](#)
- [Section 2.5, "User Defined Events"](#)

2.2 Event Details

This section contains the following topics:

- [Section 2.2.1, "Invoking User Defined Events Screen"](#)
- [Section 2.2.2, "Default Button"](#)
- [Section 2.2.3, "Value Date Derivation Button"](#)
- [Section 2.2.4, "Event Processing Button"](#)
- [Section 2.2.5, "Viewing Event Details"](#)

2.2.1 Invoking User Defined Events Screen

You can define the events through the 'Trade Finance User Defined Events' screen. You can invoke this screen by typing 'UDDTFEVM' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can define events for a new module and also for existing modules in this screen.

Trade Finance User Defined Events

New Enter Query

Module *
Event Code *
Event Description

Acct Entry Definition No
Advices Definition No
User Data Element Advices Definition No

Apply Allow Charge No

Association Allow Charge No
Liquid Preference Allow Charge No

Fields | Default

Maker	Date Time	Mod No	Record Status
Checker	Date Time		Authorization Status

Exit

User defined events will be linked to a product and is triggered in the life cycle of a contract, which is processed under that product.

Module

Specify the module for which you want to set up a user-defined event. The adjoining option list contains all the module codes available in the system. Select the appropriate one.

Event Code

Specify the event code that you want to set up for the module.

Event Description

Give a brief description of the event that you are defining. The description that you enter is for information purposes.

Accounting Entries Definition

Specify the accounting entries definition. You have the following options:

- Yes
- No

Advices Definition

Specify the advice entries definition. You have the following options:

- Yes
- No

User Data Element Advices Definition

Specify the UDE advice definition. You have the following options:

- Yes
- No

Association

Indicate your preferences.

Allow Charge

Specify the association allow charge. You have the following options:

- Yes
- No

Apply

- Indicate your preferences.

Allow Charge

Specify the application allow charge. You have the following options:

- Yes
- No

Liquid Preference

- Indicate your preferences.

Allow Charge

Specify the liquidation allow charge. You have the following options:

- Yes
- No

2.2.2 Default Button

Click 'Default' button in the 'Trade Finance User Defined Events' screen to define the triggering parameters for the configured event.

The screenshot shows the 'Event Trigger' dialog box. It has a title bar with 'Event Trigger' and a close button. The main area contains the following elements:

- Module ***: A text input field with a red asterisk.
- Event Code ***: A text input field with a red asterisk.
- Event Trigger**: Two radio buttons, 'Automatic' and 'Manual'.
- Value Date Derivation**: A checkbox.
- Event Processing**: A checkbox.
- Execution Query**: A large text area for entering a query.

At the bottom of the dialog, there are 'OK' and 'Exit' buttons.

In this screen you can enter the following details below:

Module Code

The system displays the module code here.

Event Code

The system displays the event code here.

Event Trigger

The event, which you are defining, can be triggered in either of the following ways:

- Automatic – This means that the event should be triggered automatically during EOD.
- Manual - This means that the event should be triggered manually from the 'Trade Finance User Defined Events' triggering screen.

Value Date Derivation

Check this box to indicate that the value date derivation is defined for a particular event.

Event Processing

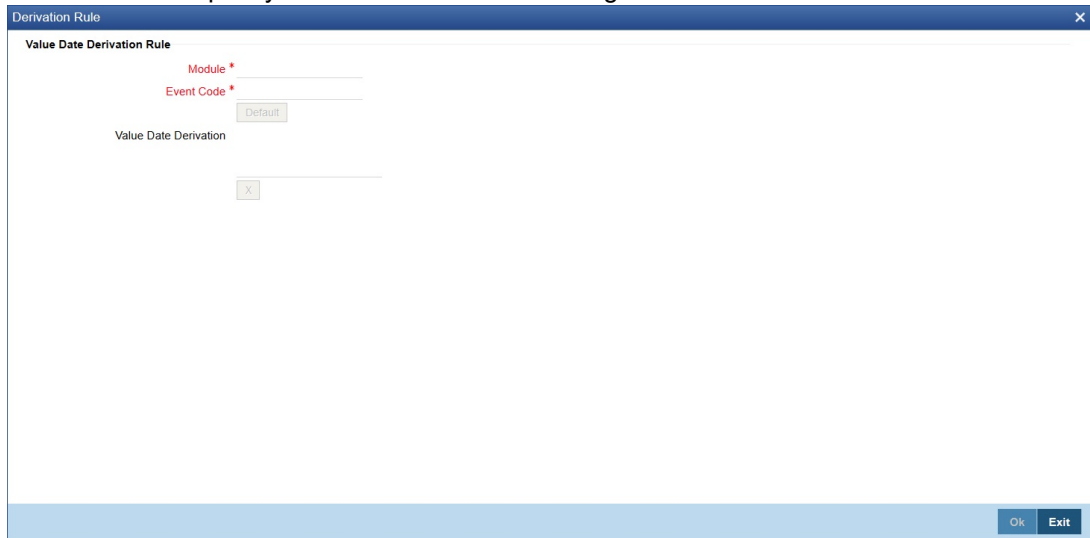

Check this box to indicate the event processing is defined for a particular event.

Execution Query

Enter the query condition to select the list of accounts for the execution of the event during EOD. Input to this field will be mandatory if you choose 'Automatic' triggering of the event.

2.2.3 Value Date Derivation Button

Click 'Value Date Derivation' button on the 'Event Trigger' screen and invoke the 'Derivation Rule' screen to specify the value date derivation logic.

The screenshot shows a software window titled "Derivation Rule". Inside the window, the title "Value Date Derivation Rule" is displayed. There are three input fields: "Module *", "Event Code *", and "Value Date Derivation". The "Module *" and "Event Code *" fields have a "Default" button next to them. The "Value Date Derivation" field has an "X" button next to it. At the bottom right of the window, there are "Ok" and "Exit" buttons.

In this screen you can enter the following details:

Module Code

The system displays module code here.

Event Code

The system displays event code here.

Value Date Derivation Rule

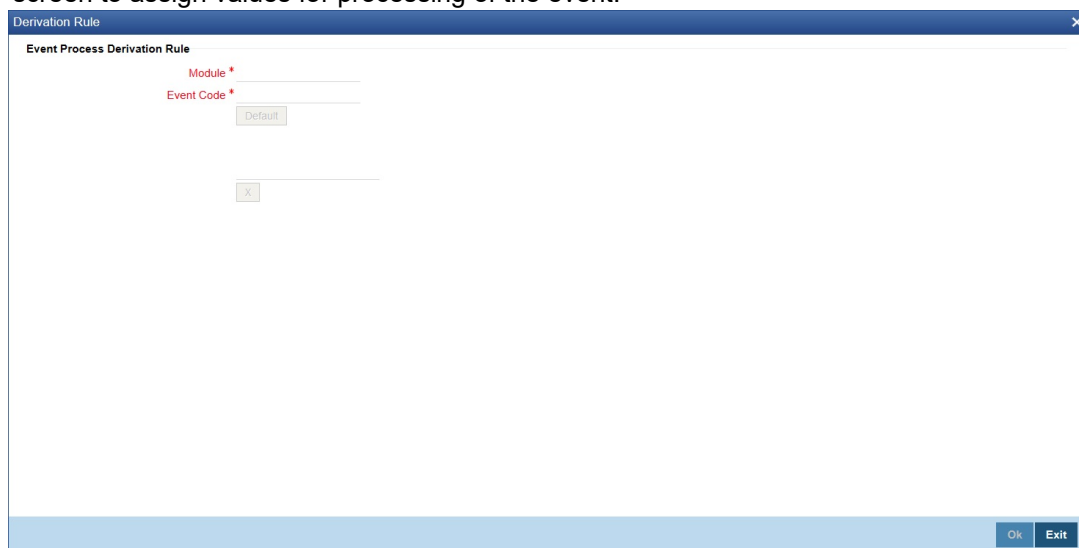

Enter description about the value date derivation rule.

Error

Click 'X' button to execute the code. The derivation code will be validated by the system. If any checks fail, you must alter the statement so that the validation can be made successfully. If any errors during validation system will display the error.

2.2.4 Event Processing Button

Click 'Event Processing' button on the 'Event Trigger' screen and invoke the 'Derivation Rule' screen to assign values for processing of the event.

In this screen you can enter the following details:

Module Code

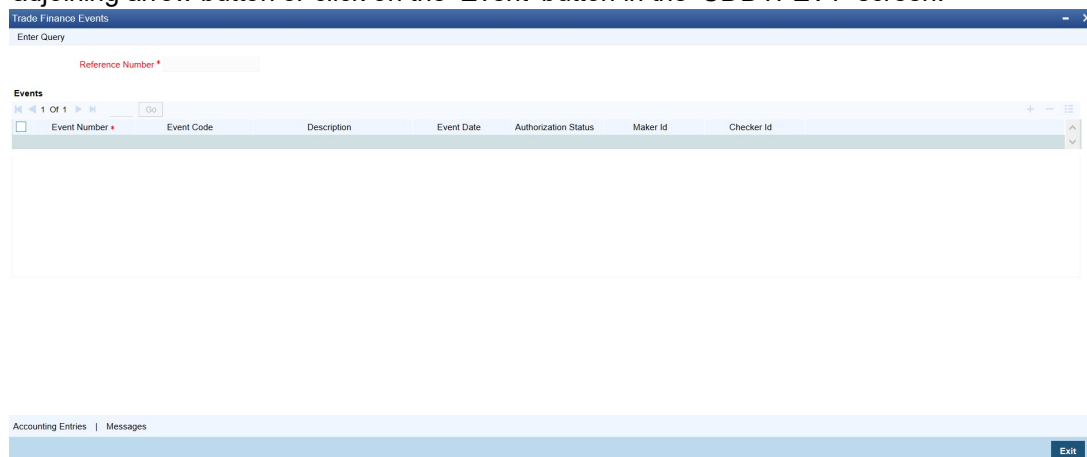

The system displays module code here.

Event Code

The system displays event code here.

2.2.5 Viewing Event Details

You can view the event details maintained in the 'Trade Finance Events' screen under 'Events' screen of a contract screen. You can invoke the 'Events' screen by typing 'CSDTFEVN' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button or click on the 'Event' button in the 'UDDTFEVT' screen.

Reference Number

Specify the reference number.

The system displays the following details:

- Event Number

- Event code
- Description
- Event Date
- Authorization Status
- Maker Id
- Checker Id

2.2.5.1 Viewing Accounting Entries

You can view the accounting entries maintained for an event in the 'Trade Finance Accounting Entries' screen by selecting an event and clicking on 'Trade Finance Accounting Entries' button in the 'Events' screen. To invoke the screen type 'CSDTFACE' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button or click 'Events' button in the Events screen..

Reference Number

Specify the transaction reference number

Event

Specify the event.

Event Number

The system displays the event number.

The following details are displayed in the Accounting Entries:

- Event
- Branch
- Account
- Account Description
- Debit/Credit
- Amount Tag
- Account Currency
- Foreign Currency Amount
- Rate
- Local Currency Amount
- Date
- Value Date
- Txn Code

Override Details

Click on 'Overrides' button to view the override details of the accounting entries.

The screenshot shows the 'Trade Finance Accounting Entries' application window. At the top, there is an 'Enter Query' section with input fields for 'Reference Number *' and 'Event Number *'. Below this, there are tabs for 'Accounting Entries' and 'Overrides', with 'Overrides' being the active tab. The main area displays a table with columns: 'Overrides', 'Override Status', 'Authorized By', and 'Auth Date Stamp'. The table is currently empty. At the bottom right of the window, there is an 'Exit' button.

2.2.5.2 Viewing Messages

You can view the messages by selecting an event and clicking on 'Trade Finance Message' button in the 'Events' screen. To invoke the screen type 'CSDTFMWV' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Trade Finance Message' application window. At the top, there is an 'Enter Query' section with input fields for 'Contract Reference *', 'Event Sequence Number *', and 'Event'. Below this, there is a 'Messages' section with a table. The table has columns: 'Message Type', 'SWIFT Message Type', 'Sub Message Type', 'SWIFT Sub Message Type', 'Test Status', 'Medium', 'Message Status', 'Authorization Status', 'Receiver', and 'Receiver Name'. The table is currently empty. At the bottom right of the window, there is an 'Exit' button.

The system displays the following details:

- Contract Reference
- ESN
- Event
- Message Type
- SWIFT Message Type
- Sub Message Type
- SWIFT Sub Message Type
- Test Status
- Medium
- Message Status
- Authorization Status
- Receiver
- Receiver Name

- DCN

Message Details

You can view the details of a message by selecting a message from the 'Message' screen and clicking on 'Message Details' button.

The screenshot shows the 'Trade Finance Message' application window. At the top, there is a search bar labeled 'Enter Query'. Below it, several search filters are available: Reference Number (with a dropdown menu showing 'DCN'), Receiver or Sender, Sub Message Type, Event Sequence Number or Version Number, Message Type, and SWIFT Sub Message Type. A table below the filters shows one message entry with a '1 of 1' indicator. At the bottom, there are fields for Remarks, Reject Reason, and Message Trailers, along with an 'Exit' button.

2.3 User Defined Events Triggering

You can use the 'Trade Finance User Defined Events Triggering' screen to manually trigger the user defined events for accounts. You can invoke this screen by typing 'UDDTFEVT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Trade Finance User Defined Events Triggering' application window. It features a search bar 'Enter Query' and several input fields: Contract Reference (with a dropdown), Counterparty, Currency, Status, and Liquidation Event (with a dropdown and a 'Default' button). There are also fields for Payment Remarks and Value Date (format: YYYY-MM-DD). A table below the form has columns for Component, Description, Currency, and Amount. The bottom of the screen shows a navigation bar with 'MIS | Settlement | Charges | Events' and a status bar with 'Input By', 'Date Time', and 'Authorization Status' fields.

Here you need to specify the following details:

Contract Reference

Select the contract reference number from the adjoining option list.

Event

Select the event from the adjoining option list.

Description

Give a brief description on the event.

Click 'Default' to default the following details:

- Counterparty
- Status
- Currency

Payment Remarks

Specify remarks pertaining to the payment on the account.

Value Date

If the value date derivation rule has been maintained for the event code, the system will calculate the value date and display it here. However, you can change it.

Amount Details

The system displays the following amount details:

- Component
- Description
- Currency
- Amount Paid

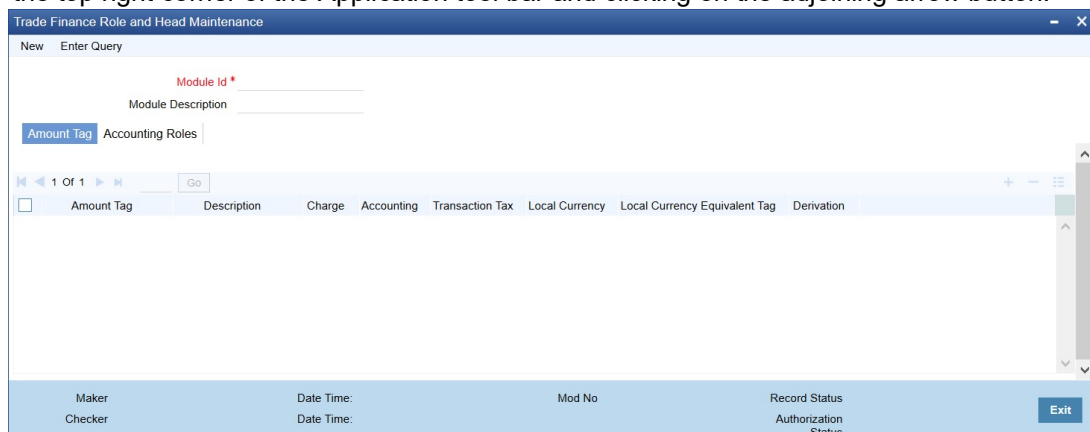

2.4 Accounting Roles and Heads

This section contains the following topics:

- [Section 2.4.1, "Invoking Accounting Roles and Heads Screen"](#)
- [Section 2.4.2, "Amount Tag Tab"](#)
- [Section 2.4.3, "Accounting Roles Tab"](#)

2.4.1 Invoking Accounting Roles and Heads Screen

You can define the amount tags for accounting roles through the 'Trade Finance Role and Head Maintenance' screen. You can invoke this screen by typing 'UDDTFRLT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can specify the following parameters for the module:

- Amount Tag
- Accounting Roles

2.4.2 Amount Tag Tab

This tab is displayed by default when you invoke the screen.

Amount Tag

Specify the amount tag.

Description

Enter the brief description for amount tag.

Charge

Indicate whether the amount tag pertains to a charge or not by choosing one of the following options:

- Yes
- No

Accounting

Indicate whether accounting entries are required or not by choosing one of the following options:

- Yes
- No

Transaction Tax

Indicate whether transaction tax is applicable or not by choosing one of the following options:

- Yes
- No

Local Currency

Indicate the local currency preference by choosing one of the following options:

- Average
- Equivalent

Local Currency Equivalent Tag

Specify the amount tag for the local currency equivalent amount.

Click 'Derivation' button and invoke the 'Derivation Rule Details' screen to derive the amount and currency for the amount tag.

The screenshot shows the 'Trade Finance Role and Head Maintenance' application window. It includes a search bar with 'New' and 'Enter Query' buttons. Below the search bar are fields for 'Module Id *' and 'Module Description'. A tabbed interface shows 'Amount Tag' and 'Accounting Roles' tabs. A table with columns 'Amount Tag', 'Description', 'Charge', 'Accounting', 'Transaction Tax', 'Local Currency', 'Local Currency Equivalent Tag', and 'Derivation' is visible. The 'Derivation' column is highlighted. At the bottom, there are fields for 'Maker', 'Checker', 'Date Time', 'Mod No', 'Record Status', 'Authorization Status', and an 'Exit' button.

Here you can specify derivation logic for the following:

- Amount Rule
- Currency Rule

Module Code

The system displays module code here.

Amount Tag

The system displays the amount tag here.

Amount Rule Derivation

You can specify the following details.

Amount Rule Type

Check this box if the amount has to be derived based on a specified condition. The amount for a particular tag can be derived based on a condition.

Derivation Amount Rule

If you have checked against the option 'Amount Rule Type', the system will derive the amount for the amount tag that is being defined. You can use the following as variables while creating the derivation rule:

- SDE

You can use any of the following SDEs:

- CUSTOMER_CATEGORY - Category of the customer of the loan
- CUSTOMER_ID - Customer ID
- ACCOUNT_CCY - Loan account's currency
- TODAY - Today
- NEXT_WORKDAY - Date of next workday
- PAYMENT_VALUE_DATE - Payment value date
- LAST_PAYMENT_DATE - Last payment date for the customer
- TOTAL_DUE_AMOUNT - Sum of all the Outstanding Balances for the Customer
- LAST_PAYMENT_AMOUNT - Last Payment Amount for the Customer
- CURRENT_PAYMENT_AMOUNT - Current Amount which is Due
- PAID_INTEREST_AMOUNT - Total Interest Amount Paid
- INTEREST_ACCRUED_AMOUNT - Sum of all the Accrued Amounts for Interest
- _OVR_DAYS - <Component> overdue days
- _EXPECTED - <Component> expected amount
- _OUTSTAND - <Component> outstanding amount
- _CCY - <Component> currency
- _OVERDUE - <Component> overdue amount

Amount Rule Error Description

Enter a brief description about amount rule error that should be displayed in case the derivation fails.

Currency Rule Derivation

The currency can either be derived from the existing account currency or can be maintained as a UDF field in the account or it can be hard-coded in the 'Currency Rule Definition' screen.

Currency Rule Type

Check this box if the currency for a particular amount tag has to be derived based on the derivation rule.

Derivation Currency Rule

Specify the rule based on which the system should derive the currency for the amount tag. You need to assign a value to 'L_CCY'. For instance, the rule may be given as under.

```
BEGIN
```

```
Select contract_ccy
```

```
into l_ccy
```

```
from cstb_tf_contract
```

```
where contract_ref_no = p_acc_no
```

```
and branch_code = p_branch
```

```
END;
```

Currency Rule Error Description

Enter a brief description about currency rule error that should be displayed in case the derivation fails.

2.4.3 Accounting Roles Tab

Click 'Accounting Roles' tab in the 'Trade Finance Role and Head Maintenance' screen.

The screenshot shows a software interface titled "Trade Finance Role and Head Maintenance". At the top, there are buttons for "New" and "Enter Query". Below these are input fields for "Module Id" and "Module Description". The "Amount Tag" field is set to "Accounting Roles". A navigation bar shows "1 Of 1" records. Below this is a table with the following columns: "Role Code", "Description", and "Role Type". The table is currently empty. At the bottom of the screen, there is a status bar with fields for "Maker", "Checker", "Date Time:", "Mod No", "Record Status", and "Authorization Status". An "Exit" button is located in the bottom right corner.

In this screen you can enter the following details:

Role Code

Specify the role code.

Description

Enter a brief description about role code.

Role Type

Select the role type from the adjoining drop-down list. The following values are available:

- Asset
- Liability
- Income

- Expense
- C Asset
- C Liability
- Customer

2.5 User Defined Events

This section contains the following topics:

- [Section 2.5.1, "Triggering User Defined Events Automatically"](#)

2.5.1 Triggering User Defined Events Automatically

You can add the user defined event batch to the mandatory programs to be run for the module, using the 'Mandatory Batch Program Maintenance' screen. You can invoke this screen by typing 'EIDMANPE' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Module

Choose the module code from the adjoining option list.

Function Identification

Specify 'UDBTFEVT' as the batch that needs to be run. You can also select this value from the adjoining option list.

End Of Cycle Group

Select the option 'End Of Transaction Input'.

For further details about this screen, refer the chapter 'Setting- up Mandatory Programs for EOD' in the AEOD User Manual.
