About Unifier Import/Export Data Map Guide (Schedule Sheet)

This guide details how data is mapped between P6 EPPM and Unifier using Schedule Sheet integration. Throughout this guide, the term P6 EPPM includes P6 Professional. Any content that applies to only one of these applications is labeled accordingly.

All users who want to exchange data between various formats should use this document.

Caution: Personal information (PI) may be at risk of exposure. Depending on local data protection laws organizations may be responsible for mitigating any risk of exposure.

Notes:

- You must map at least the following P6 activity level fields to a corresponding Unifier field of the same data type: Id, Name, PlannedStartDate, and PlannedFinishDate. For information on mapping P6 fields to Unifier fields, see P6 Help.
- In Unifier versions 10.1.14.0 and 15.2.2.0 and later it is possible to map any P6 field available in the Activity, Resource, or Resource Assignment tags of the Primavera XML to a column in Unifier.
