## 2 Term Deposit Origination Process

This chapter includes the following sections:

- [2.1 Introduction](#)
- [2.2 Reference Workflow for Term Deposit Account Origination](#)

### 2.1 Introduction

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan for Individual customers, and Term Loan and Business Loan for Small and Medium Business customers. It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank personas such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and so on, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architected by our new platform solution. The random-access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Term Deposit Account is created in the Host. The new workflow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The initiation request for a Term Deposit Account can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of Term Deposit Account request can be made for both new and existing customer types. Also, the system supports processing of the term deposit account request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

This user guide explains the reference workflow for the Term Deposit Account Origination process and further details the data that needs to be captured in the data segment linked to the specific stages.

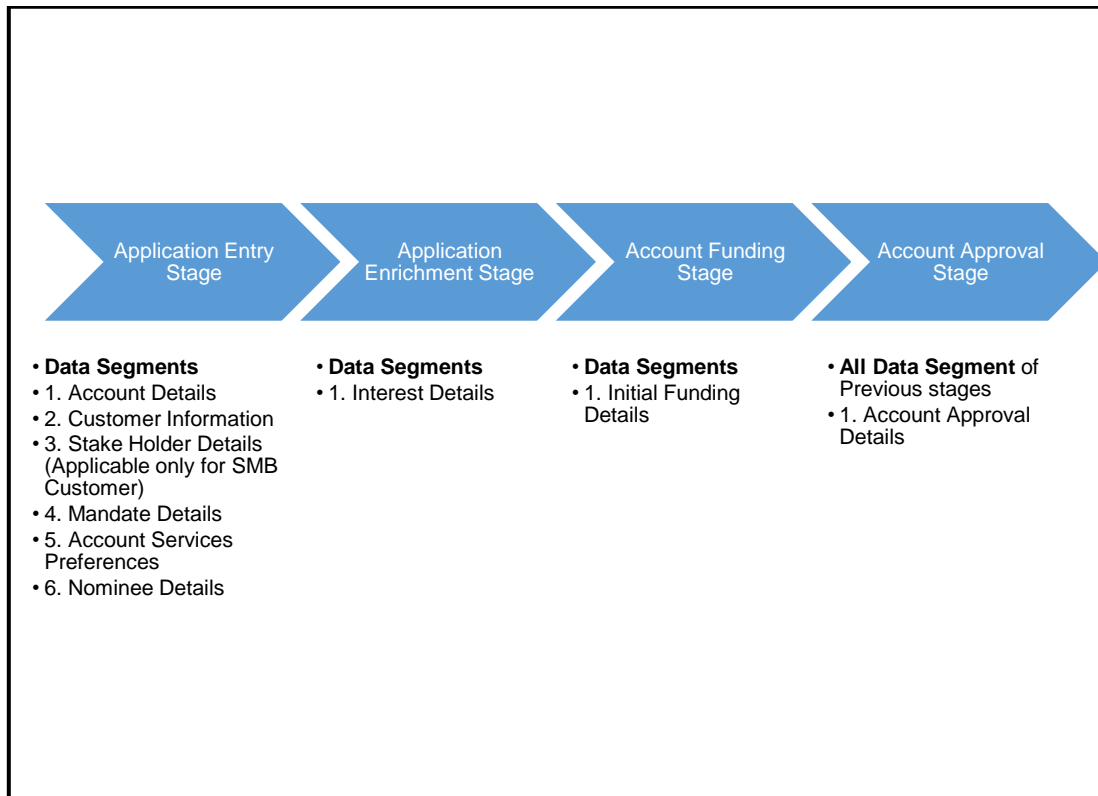

This process initiates with the receipt of Term Deposit opening form and related documents from a customer for opening of a Term Deposit. The bank verifies the details and documents submitted for opening of Term Deposit to ensure completeness and initiates the Term Deposit Origination process by selecting the desired Term Deposit Product from the Product Catalogue.

## 2.2 Reference Workflow for Term Deposit Account Origination

The following diagram describes the workflow for Term Deposit Account Origination process.

**Figure 1: Reference Flow Diagram**

### 3 Term Deposit Origination

As detailed in the **Operations** user manual, all the Product Originations are initiated in the Application Initiation stage from the Product Catalogue. The Cart Operation in Product Catalogue allows to originate single or multiple Product initiation. Once the Term Deposit Account product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Term Deposit Account Process Reference Number on submit of the Application Initiation stage. Process Orchestrator also updates the record in the Free Task process for the Application Entry stage also referred as Task from orchestrator perspective.

The Term Deposit Account Origination process flow comprises of the below stages and the detailed information of the same is available in the below sections:

- [3.1 Application Entry Stage](#)
- [3.2 Application Enrichment Stage](#)
- [3.3 Account Funding Stage](#)
- [3.4 Supervisor Approval Stage](#)

#### Prerequisites

## 3.1 Application Entry Stage

Process Orchestrator updates the record in the Free Task process for the Application Entry stage also referred as Task from orchestrator perspective. User can Acquire and Edit or Acquire the task from the Action column and the header respectively as per requirement.

The Application Entry Stage will be automatically submitted in case the Bank level configuration for allowing full Application submission is set as 'Yes' and the User has updated all the Data Segment of Application Entry stage as part of the Application Initiation stage itself by clicking on the 'Application' button available in the Product Details Data Segment.

After successful submission of Application Entry stage, a request for the initial funding transaction is sent to Teller Module, if Fund By option is selected as Cash. The status of the Teller Transaction is then validated in the Initial Funding Details data segment of Account Funding stage.

The Application Entry stage comprises of the below mentioned data segments:

- [3.1.1 Customer Information](#)
- [3.1.2 Account Details](#)
- [3.1.3 Stake Holder Details](#)
- [3.1.4 Account Service Preferences](#)
- [3.1.5 Nominee Details](#)
- [3.1.6 Mandate Details](#)
- [3.1.7 Summary](#)
- [3.1.8 Action Tabs](#)
- [3.1.9 Request Clarification](#)

Please refer the below section for more details on these data segments.

### 3.1.1 Customer Information

The Customer Information data segment displays the details captured for the customer in the Application Initiate stage and allows updating further fields for supplementing the customer related information.

1. Click **Acquire and Edit** for the application for which Application Entry stage has to be acted upon. It will ensure that the task is acquired to your user ID and will launch the Application Entry stage with the Customer Information data segment screen.

If the **Customer Type** is selected as **Individual**.

→ The Customer Information - Individual screen is displayed.

**Figure 54: Outcome**

The screenshot shows a window titled "Stage Movement Submission" with a close button (X) in the top right corner. Below the title bar is a progress bar with three steps: "Overrides", "Checklist", and "Outcome". The "Outcome" step is currently active, indicated by a blue circle with the number 3. Below the progress bar, there is a section titled "Select an Outcome" with a dropdown menu. The dropdown menu is open, showing the following options: "PROCEED", "Return to Initial Funding", "Return to Application Enrichment", "Return to Application Entry", and "TERMINATE". The "Return to Application Entry" option is highlighted. At the bottom right of the window, there is a "Submit" button.

6. Select **Proceed** outcome from the drop-down list. Available options are:

- Proceed
- Return to Initial Funding
- Return to Application Enrichment
- Return to Account Entry
- Reject by Bank

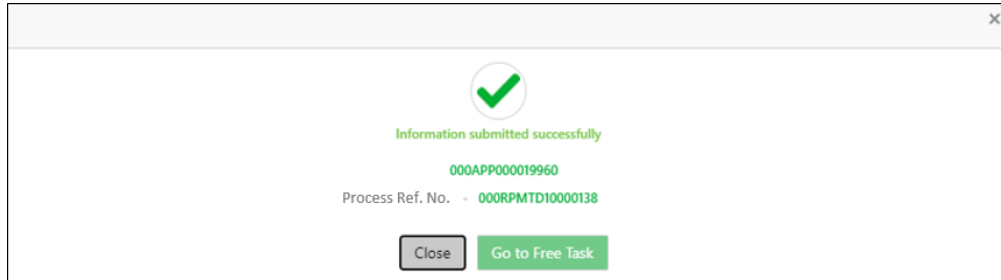

Outcomes configured in the Workflow Orchestrator for the business process is available in the drop-down list.

7. Enter the remarks in **Remarks**.

8. Click **Submit**.

→ The **Confirmation** screen is displayed.

### Figure 55: Confirmation

On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed. Click on '**Close**' to close the pop-up screen. Alternatively click on '**Go to Free Task**' to launch the **Free Task** menu. If you have access to the next stage, you would be able to view the Application number and take action on it.

9. Click **Go to Free Task**.

→ The **Free Tasks** screen is displayed.

Reject Application will terminate the application and no further action will be allowed on this reference number.

After the Host creates the Term Deposit Account successfully, the response is sent back to the Oracle Banking Origination with the Term Deposit Account Number.

The details of all the applications which have logically completed all their stage movements, (Rejected / Account Created) will be made available in Completed tasks for query purpose only.

## 4 Instant Term Deposit Account Origination Process

Additional Instant Business Process is available wherein various stages in the Reference Flow for Term Deposit Account have been automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module. Please refer the **Retail Onboarding User Guide** for more details.

Based on whether the Application has been initiated by self-service channel or by a Branch personnel the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

### Prerequisite:

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is taken as Account Transfer for which the mode configured has to be 'H' which represents that the selected Account will be debited by the Host as part of the Account Opening Process (Allowed for both Self-Service Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank Account Transfer on self-service channel (This mode is not allowed for Branch Initiated Applications). For more details refer **Section 2.7 Initial Funding Configuration** in the **Configurations User Guide**.

In the Instant Term Deposit Account Origination Reference Business Process, the stages that have been configured are mentioned below.

- **Application Entry Stage:** On successful submission of the Term Deposit Account Application from self-service channel, the system starts the Application Entry stage without any manual intervention and completes the Data Segment level validation. On successful completion of the validation, the system automatically submits the Application Entry Stage.

Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for Application Entry stage are updated in the Application Initiate Stage itself by clicking the 'Application' button in the Product Details Data Segment.

- **Account Funding Stage:** On successful submission of the Application Entry Stage, system checks if Initial Funding mode updated for the Account Opening.
  - The initial funding mode allowed for self-service initiated applications are External Bank Account Transfer and Account Transfer.
  - In case Initial Funding has been taken for the Account via the External Bank Account Transfer in the self-service channel, system starts the Application Funding Stage and validates the Initial Funding Details Data Segment and submits the Application Funding Stage automatically.
  - For Application where the Initial Funding is updated as Account Transfer, this stage is skipped completely by the system for Application initiated from Self-Service Channel and Branch Initiated Applications.
  - For the Branch Initiated Applications wherein the Initial Funding has been taken in Cash or Other Bank Cheque, this stage has to be manually actioned by the Branch User having access permission for this stage.

- **Account Approval Stage:** System skips this stage for self-service initiated application and submits the application directly to the Product Processor for Account Creation.

However, for Branch initiated Application considering the 4-eye principle, system expects the application to be approved by a Supervisor. Hence this stage, will have to be picked and actioned by the Supervisor User. Supervisor User can either approve or reject the Application. On submission of this stage by selecting 'approve' outcome, system submits the Application to the Product Processor for Account Creation.

- **Handoff Retry:** Application moves to this stage and appears in the Free Task only if the Term Deposit Account creation has been rejected by Product Processor. User having the required access rights can pick such task and can retry submission to Host after taking required actions on the Failure reason.
