Oracle Database Database Free Release Notes, Release 23c

F86998-02

Copyright © 2017, 2023, Oracle and/or its affiliates.

Primary Authors: Rhonda Day, Sunil Surabhi

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

1 Purpose of These Release Notes

2 Issues Affecting All Platforms for Oracle Database 23c

2.1	Restrictions for JSON-Relational Duality Views	2-1
2.2	Property Graph Features That Work With Oracle Database 23c	2-3
2.3	Features Not Available, Restricted or Changed in This Release of Oracle Database Free Release 23.3	2-3
2.4	Deprecated and Desupported Features for Oracle Database	2-3
2.5	Other Readmes, Release Notes, or Installation Guides	2-4
2.6	Open Bugs Affecting All Platforms	2-4
2.6.1	Oracle Net Manager Known Bugs	2-4
2.6.1.1	Bug 35522036	2-4

Preface

This document describes last-minute features and changes that are not included in the Oracle Database Documentation Library for Oracle Database 23c.

Starting with Oracle Database 18c, the readme and platform-specific release notes have been combined into one document. The second chapter of this document contains generic information. Subsequent chapters of this document contain platform-specific information. The last chapter of this document contains last-minute changes not included in the Oracle Database documentation library.

- [Audience](#)
- [Documentation Accessibility](#)
- [Related Resources](#)
- [Conventions](#)

Audience

This document is relevant only to Oracle Database 23c and documents new features, changes, unsupported products, preinstallation requirements, generic and platform-specific bug fixes, and known issues that are not included in the Oracle Database documentation library.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Related Resources

Refer to the following documentation for more information related to this release:

- <http://docs.oracle.com/en/database/database.html>
- For licensing information, refer to *Oracle Database Licensing Information User Manual*.

- Additional readme or release notes files also exist. Refer to [Other Readmes](#), [Release Notes](#), or [Installation Guides](#).

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1

Purpose of These Release Notes

This topic briefly describes the purpose of these release notes.

More recent versions of some Oracle Database release 23c, version 23.3 documentation may be available in either HTML or PDF format.

Updates to this release note document can occur after it is released. Check for updates to this document and view other Oracle documentation at:

<http://docs.oracle.com/en/database/database.html>

For licensing information, refer to *Oracle Database Licensing Information User Manual*.

Additional readme or release notes files also exist. Refer to the [Other Readmes, Release Notes, or Installation Guides](#).

2

Issues Affecting All Platforms for Oracle Database 23c

These topics contain last-minute features and changes that affect all platforms for Oracle Database 23c.

- [Restrictions for JSON-Relational Duality Views](#)
The following are restrictions for JSON-relational duality views in Oracle Database 23c.
- [Property Graph Features That Work With Oracle Database 23c](#)
Oracle Graph Server and Client Release 23.3 works with the following Property Graph features of Oracle Database 23c:
- [Features Not Available, Restricted or Changed in This Release of Oracle Database Free Release 23.3](#)
This topic describes features that are not available or are restricted for Oracle Database Free release 23.3.
- [Deprecated and Desupported Features for Oracle Database](#)
This topic describes deprecated and desupported features for Oracle Database 23c.
- [Other Readmes, Release Notes, or Installation Guides](#)
There are additional documents for Oracle products that are associated with this Oracle Database release.
- [Open Bugs Affecting All Platforms](#)
This section describes known bugs in Oracle Database 23c that affect all platforms.

2.1 Restrictions for JSON-Relational Duality Views

The following are restrictions for JSON-relational duality views in Oracle Database 23c.

- The following column data types cannot be used with duality views:
 - `TIMESTAMP WITH LOCAL TIME ZONE`
 - `BFILE`
 - `ROWID`
 - `UROWID`
 - `XMLTYPE`
 - `ANYTYPE`
 - `ANYDATA`
 - `ANYDATASET`
 - `HTTPURIType`
 - `XDBURIType`
 - `DBURIType`

- SDO_POINT_TYPE
- SDO_ELEM_INFO_ARRAY
- SDO_ORDINATE_ARRAY
- SDO_GEOMETRY
- SDO_TOPO_GEOMETRY
- Object types (Abstract Data Types)
- Duality views cannot be created on:
 - System-partitioned tables
 - Partitioned-extended tables
 - Sharded tables
 - Views (except editioning views). Views include materialized views and duality views.
 - External tables
 - Hybrid partitioned tables
 - Global or private temporary tables
 - Remote tables (for example, tables over database links)
- Updates of duality views across database links are not supported.
- You cannot create a functional index, JSON search index, or JSON multivalue index on the `DATA` column of a duality view.
- The use of a JSON search index on the column of an underlying table is not supported.
- Virtual private database (VPD) and Oracle Real Application Security (RAS) on duality views are not supported.
- VPD on underlying tables are supported only if all statements (`INSERT`, `UPDATE`, `DELETE`, or `SELECT`) are included in the policy. However, when all statement types are not included in the VPD policy, there is no error returned but DML and query results may be unexpected or may fail.
- Transparent Sensitive Data Protection is not supported with duality views and underlying tables.
- Table columns of a duality view cannot be redacted if the redacted columns are part of the ETAG.
- Because JSON-relational duality views rely on JSON type, a 19c or earlier SQL*Plus client cannot be used for queries, DML or other SQL operations that use the `DATA` column which is of data type `JSON`.
- Duality views cannot be created on base tables with textual JSON columns (`VC2/CLOB/BLOB` with `IS-JSON` constraint) in the base table.
- The same subquery cannot be used multiple times to define nested JSON structures (object or array) in the same parent object.
- Fine-grained auditing policies are not supported with duality views.
- DML error logging is not supported with duality views.

- Duality view names should use ASCII characters. The use of some non-ASCII characters with non-UTF8 database characters can fail in some operations.
- JSON path expressions with the type() item method are not supported when querying the `DATA` column of a duality view.

2.2 Property Graph Features That Work With Oracle Database 23c

Oracle Graph Server and Client Release 23.3 works with the following Property Graph features of Oracle Database 23c:

- Native representation of graphs in Oracle Database.
- Support for the ISO/IEC SQL Property Graph Queries (SQL/PGQ) standard.
- Use JSON collections as a graph data source.
- Use Native Representation of Graphs in Oracle Database with Graph Tools.

See the topics [SQL Property Graphs](#) and [Visualizing GRAPH_TABLE Queries on SQL Property Graphs](#) in *Oracle Database Graph Developer's Guide for Property Graph*.

2.3 Features Not Available, Restricted or Changed in This Release of Oracle Database Free Release 23.3

This topic describes features that are not available or are restricted for Oracle Database Free release 23.3.

- This release is available on the Linux platform (OL8 and RH8). Other platforms are not supported.
- For this release, the Unrestricted Parallel DMLs is:
 - Not compatible with In Memory Undo (IMU). (IMU is already disabled for Oracle RAC.)
 - Not compatible with distributed and clusterwide global transactions.
 - Parallel DML (PDML) and global indexes may lead to deadlocks resulting in error `ORA-00060`.
- The blockchain log history table implemented using Flashback Data Archive is not available with this release.

2.4 Deprecated and Desupported Features for Oracle Database

This topic describes deprecated and desupported features for Oracle Database 23c.

Oracle Database 23c introduces behavior changes for your database in addition to new features. Changes in behavior include deprecated and desupported initialization parameters, options, syntax, and the deprecation and desupport of features and components. For more information, see the *Oracle Database Upgrade Guide*.

Oracle OLAP Desupported

Analytic workspaces, the OLAP DML programming language, and the OLAP Java API are desupported in Oracle Database 23c.

For new applications requiring advanced analytic capabilities, Oracle recommends that you consider analytic views (a feature of Oracle Database), or Oracle Essbase for forecasting and what-if analysis. Oracle analytic views are a feature of every Oracle Database edition. If your application uses OLAP for dimensional query and reporting applications, then Oracle recommends that you consider Oracle analytic views as a replacement for OLAP. Analytic views provide a fast and efficient way to create analytic queries of data stored in existing database tables and views. With Oracle analytic views, you obtain a dimensional query model and supporting metadata without requiring a "cube build/update" process. The elimination of the cube build/update process relieves scalability constraints (model complexity and data volume), simplifies the data preparation pipeline, and reduces or eliminates data latency.

2.5 Other Readmes, Release Notes, or Installation Guides

There are additional documents for Oracle products that are associated with this Oracle Database release.

Refer to the following Oracle products and the location of their associated readme, release notes, or installation guide for additional information:

Table 2-1 Other Oracle Products Documentation

Product	Document
Oracle Application Express	<i>Oracle APEX Release Notes</i> and the <i>Oracle APEX Installation Guide</i> .
Oracle ODBC Driver	<i>ODBC Driver Release Notes</i>

2.6 Open Bugs Affecting All Platforms

This section describes known bugs in Oracle Database 23c that affect all platforms.

- [Oracle Net Manager Known Bugs](#)
These are the known bugs in Oracle Net Manager in Oracle Database 23c.

2.6.1 Oracle Net Manager Known Bugs

These are the known bugs in Oracle Net Manager in Oracle Database 23c.

- [Bug 35522036](#)

2.6.1.1 Bug 35522036

There is a known JDK11 compatibility issue with Oracle Net Manager in Oracle Database release 23c, version 23.3.

Workaround:

Use an earlier version of Oracle Net Manager or refer to the Oracle Net Services page on OTN for Technical Briefs about alternate methods for configuration.
