Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Drawing Under Transfer LC - Islamic

This process is triggered when Documents Under the Transferred LC are received at first Beneficiary Bank to the Second Beneficiary Bank.

The various stages involved for Drawing Under Transferred LC are:

- Receive and verify documents and Input Drawing details
- Upload of related mandatory and non-mandatory documents.
- Verify/capture details and check documents for Discrepancies-Scrutiny Stage
- Input/Modify details of Drawing - Data Enrichment stage
- Check for limit availability if applicable.
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Drawing Under Transferred LC process flow is similar to that of conventional Drawing Under Transferred LC process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Scrutiny	Data Enrichment
Multi Level Approval	Reject Approval

Common Initiation Stage

The user can initiate the new Islamic Drawing under transfer LC request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The process starts from Registration stage, the user can register request for an Islamic Drawings under Transferred LC at the front desk.

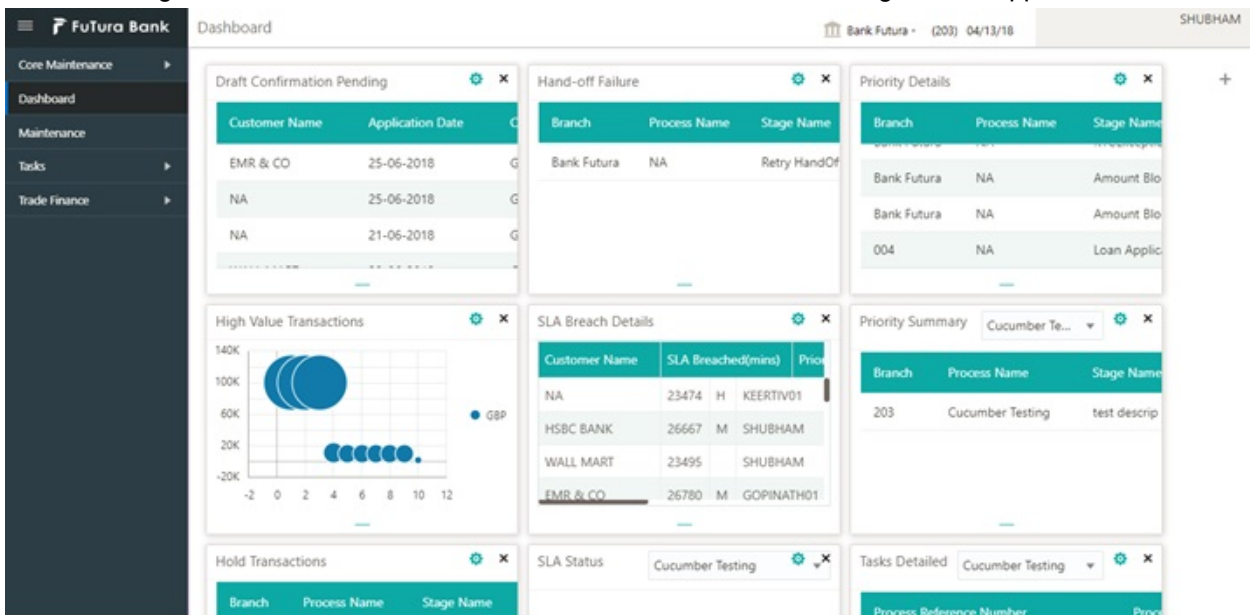

During Registration stage, user can capture the basic details and upload the related documents received from presenting bank. It also enables the user to capture some additional product related details as an option. On submit of the request the request will be available for an LC expert to handle the request in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the bank's logo and name. Below the header, the text "Sign In" is displayed. There are two input fields: "User Name *" containing the text "SRIDHAR" and "Password *" containing a series of dots. At the bottom, there are two buttons: a green "Sign In" button and a white "Cancel" button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. On the left is a navigation menu with options like "Core Maintenance", "Dashboard", "Maintenance", "Tasks", and "Trade Finance". The main area contains several widgets:

- Draft Confirmation Pending:** A table with columns "Customer Name" and "Application Date".
- Hand-off Failure:** A table with columns "Branch", "Process Name", and "Stage Name".
- Priority Details:** A table with columns "Branch", "Process Name", and "Stage Name".
- High Value Transactions:** A bubble chart showing transaction values for different branches.
- SLA Breach Details:** A table with columns "Customer Name", "SLA Breached(mins)", and "Priority".
- Priority Summary:** A table with columns "Branch", "Process Name", and "Stage Name".
- Hold Transactions:** A table with columns "Branch", "Process Name", and "Stage Name".
- SLA Status:** A widget showing "Cucumber Testing" with a status icon.
- Tasks Detailed:** A widget showing "Cucumber Testing" with a status icon.

3. Click **Trade Finance - Islamic > Import - Documentary Credit> Drawings Under Transferred LC-Islamic.**

The Registration stage has two sections Application Details and LC Drawing Details. Let's look at the details of Registration screens below:

Goods Details

Provide the Goods Details based on the description in the following table:

Field	Description	Sample Values
Goods Code	This field displays goods code as per latest LC.	
As per LC	This field displays description of the goods as per the latest LC.	
As per Documents	Provide the description of the goods as per the documents received from presenting bank.	
Discrepant	User shall mark the discrepant toggle as 'Yes' if there is difference between LC requirement and documents received with respect to goods description.	
Discrepancy Code	Select the discrepancy code based on the discrepancy identified. System will not over write the discrepancy description. User can change the code. Dummy code can also be used.	
Discrepancy Description	Description will be displayed based on the discrepancy code. User can modify the description.	
Country of Origin	Update the country of origin as per the documents received.	

Field	Description	Sample Values
Insurance Company	Update the details of insurance company as per the document received.	
Insurance Company Address	Update the insurance company address as per the document received.	
Carrier Name	Specify the details of the carrier as per the documents received, if the goods got shipped via multiple carriers.	

Shipment Details

Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
Date of Shipment	Update the date of shipment as per the documents received. If user does not provide details, system should display an error message 'Please provide Date of shipment '	
Shipping Agent	Update the shipping agent details based on the documents received.	
Date of Presentation	Read only field. Documents received date is auto-populated based on the system date.	
Details	Details represent the fields in latest LC.	
Partial Shipments	System displays the Partial Shipment terms from LC. User to capture if the shipment was partial. If the terms in LC is different from what is captured from document, system will mark discrepancy with discrepancy description as 'Discrepancy in Partial Shipment terms' User can modify the description.	
Transshipment	System displays the Transshipment terms from LC. User to capture if the shipment was Trans-shipped. If the terms in LC is different from what is captured from document, system will mark discrepancy with discrepancy description as 'Discrepancy in Trans-Shipment terms' User can modify the description	
Place Of Taking In Charge	System displays the Place of Taking charge if any from LC. User to capture Place of Taking charge if any from documents received. If the terms in LC is different from what is captured from document, system will mark discrepancy with discrepancy description as 'Discrepancy in Place of Taking Charge' User can modify the description.	

Field	Description	Sample Values
Port Of Loading	System displays the Port of Loading if any from LC. User to capture Port of Loading if any from documents received. If the terms in LC is different from what is captured from document, system will mark discrepancy with discrepancy description as 'Discrepancy in Port of Loading'. User can modify the description.	
Port Of Discharge	System displays the Port of Discharge if any from LC. User to capture Port of Discharge if any from documents received. If the terms in LC is different from what is captured from document, system will mark discrepancy with discrepancy description as 'Discrepancy in Port of Discharge' User can modify the description	
Place Of Final Destination	System displays the Place of Final Destination if any from LC. User to capture Place of Final Destination if any from documents received. If the terms in LC is different from what is captured from document, system will mark discrepancy with discrepancy description as 'Discrepancy in Place of Taking Charge' User can modify the description.	
Latest Date Of Shipment	System displays the Latest Date of Shipment if any from LC. System will also display the Shipment Date already captured as per documents. If the shipment date is later than the latest date of shipment, system will mark discrepancy as 'Late Shipment'. User can modify the description.	
Shipment Period	System displays the Shipment Period if any from LC. System will also display the Shipment Date already captured as per documents. If the shipment date is later than Shipment Period + Date of Expiry, system will mark discrepancy as 'Late Shipment'. User can modify the description.	
Period of Presentation	System displays the Period of Presentation if any from LC. System will also display the Presentation Date already captured as per documents. If the presentation date is later than the latest date of shipment+ Presentation Period, system will mark discrepancy as 'Late Presentation'. User can modify the description.	
As per LC	This field displays description of the fields as per the latest LC.	
As Per Document	Provide the description of the field as per document.	
Discrepant	User shall mark the discrepant toggle as 'Yes' if there is difference between LC terms and documents received.	

Field	Description	Sample Values
Discrepancy Code	Select the discrepancy code based on the discrepancy identified.	
Discrepancy Description	Description will be displayed based on the discrepancy code.	

Carrier Details

If the shipment involves multiple carrier and or shipment passes through multiple ports, the details will be captured under this segment.

Field	Description	Sample Values
Carrier Name	Specify the details of the carrier as per the documents received, if the goods got shipped via multiple carriers.	
Port	Provide the port details as per the document received, if the ship has transit on its way to the destination.

Commission Details

If default commission is available under the product, it should be defaulted here with values.

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	

Field	Description	Sample Values
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Waive	Select the check box to waive charges/ commission. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder. This field is disabled, if 'Defer' toggle is enabled.	

Field	Description	Sample Values
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

Charge Details

Charge Details are auto-populated from the back-end system.

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	

Field	Description	Sample Values
Waive	If charges have to be waived, this check box has to be selected. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission. The tax component defaults if maintained in the product level. The defaulted value can be edited by the user.

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>User can see the documents uploaded.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	User can capture remarks as well as see remarks made in the earlier screens/stages.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Refer	<p>On click of Refer, user must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Drawing Under Transferred LC Scrutiny stage inputs.	

Field	Description	Sample Values
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Back	Click Back to move the task to the previous segment	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Summary

User can review the summary of details in scrutiny stage of Islamic Drawings under Transferred LC.

The summary for Drawings under Transferred LC Scrutiny Stage is displayed as tiles. The tiles must display a list of important fields with values. User can drill down the tile and view the details provided in the various data segments.

Tiles Displayed in Summary

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view the availability and shipment details.
- Additional Conditions - User can view additional conditions of the drawing.
- Discrepancy Details - User can view the discrepancies exist or not and the number of discrepancies on the face of the tile. On drill down, user can see all the discrepancies listed under the LC drawing.
- Maturity Details - User can view the maturity details.
- Limits and Collaterals - User can view limits and collateral details.
- Commission, Charges and Taxes - User can view charge details.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	User can see the documents uploaded. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	

Field	Description	Sample Values
Remarks	User can capture remarks as well as see remarks made in the earlier screens/stages.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Submit	Task will get moved to next logical stage of Drawing under Transferred LC. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Refer	On click of Refer, user must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Back	Click Back to move the task to the previous segment	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Data Enrichment

A DE user can input new Drawing under Transferred LC. As part of data enrichment user can enter/update basic details of the Drawing.

The user can enrich details of update drawings under Transferred LC.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

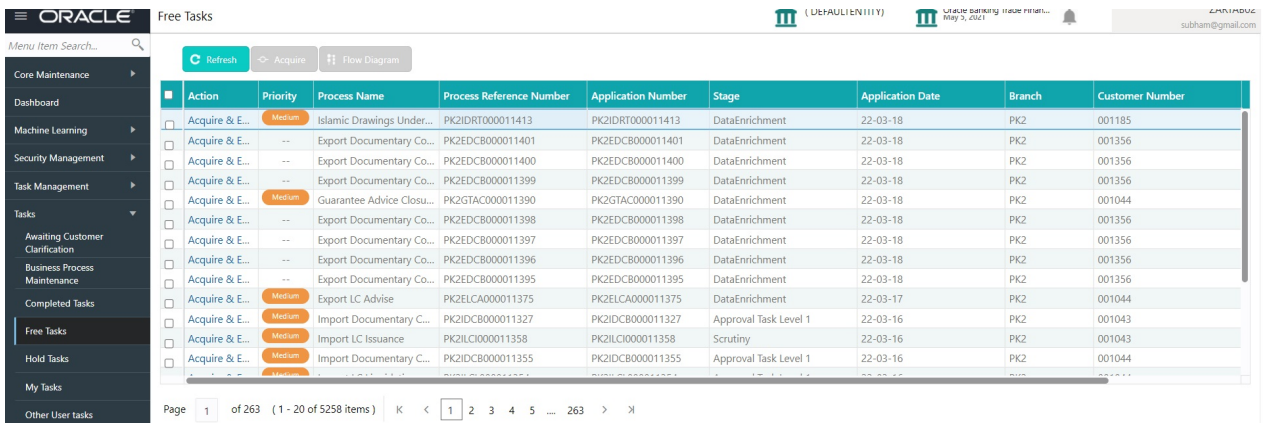

Do the following steps to acquire a task at Data Enrichment stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

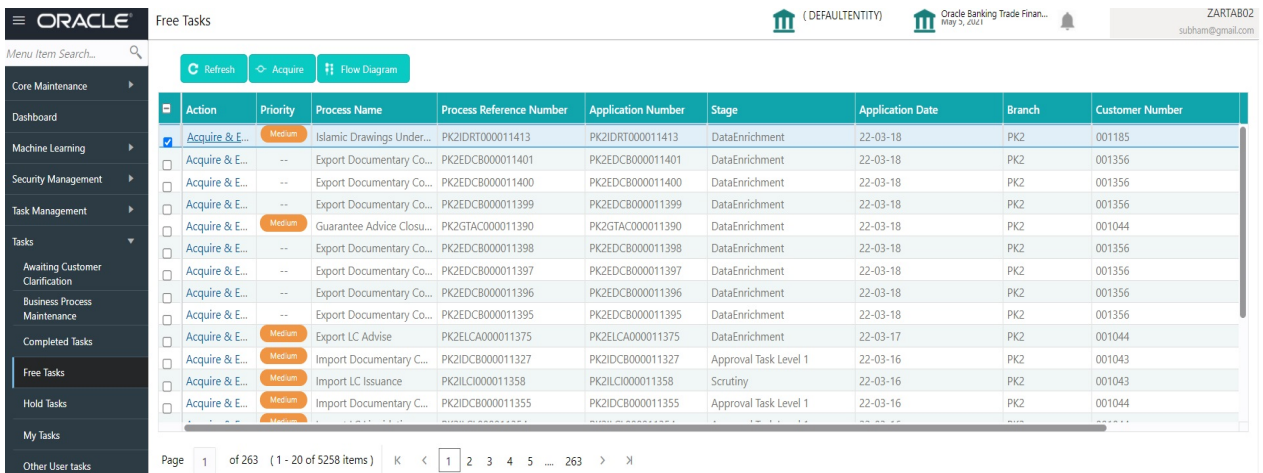

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Tasks > Free Tasks**.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks** tab.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for Data Enrichment stage.

The Data Enrichment stage has five sections as follows:

- Main Details
- Document Details
- Shipment Details
- Additional Conditions
- Discrepancy Details
- Maturity Details
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User must be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

Main Details

Refer to [Main Details](#).

Document Details

Refer to [Document Details](#).

Shipment Details

Refer to [Shipment Details](#).

Additional Conditions

Refer to [Additional Conditions](#).

Discrepancy Details

Refer to [Discrepancy Details](#).

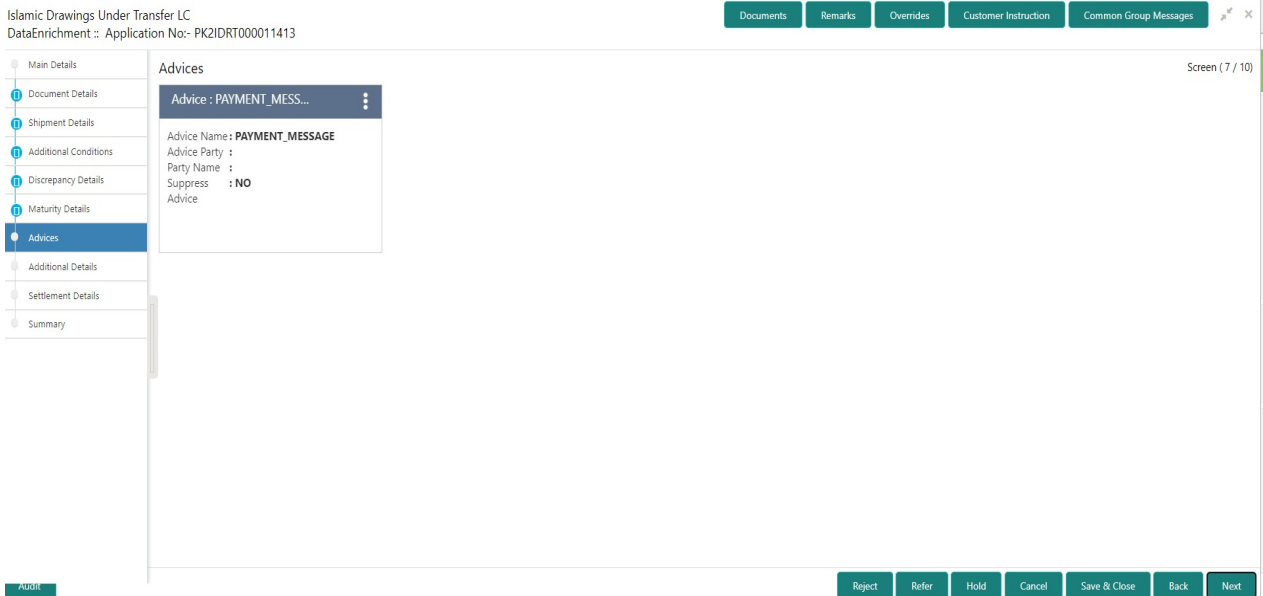

Maturity Details

Refer to [Maturity Details](#).

Advices

Advices menu displays the advices from the back office as tiles. User can edit the fields in the tile, if required.

DE User can view and verify the Advices generated for Drawings under Transferred LC process. Some of the possible advices could be Payment Message, Non Payment/Non Acceptance Advice, and Document Arrival Notice.

The user can also suppress the Advice, if required.

Field	Description	Sample Values
Suppress Advice	<p>Toggle on: Switch on the toggle if advice is suppressed.</p> <p>Toggle off: Switch off the toggle if suppress advice is not required for the amendments</p>	
Advice Name	User can select the instruction code as a part of free text.	
Medium	The medium of advices is defaulted from the system. User can update if required.	

Field	Description	Sample Values
Advice Party	Value be defaulted from Guarantee /SBLC Issuance. User can update if required.	
Party ID	Value be defaulted from Guarantee /SBLC Issuance. User can update if required.	
Party Name	Read only field. Value be defaulted from Guarantee /SBLC Issuance.	
Free Format Text		
FFT Code	User can select the FFT code as a part of free text.	
FFT Description	FFT description is populated based on the FFT code selected.	
	Click plus icon to add new FFT code.	
	Click minus icon to remove any existing FFT code.	
Instruction Details		
Instruction Code	User can select the instruction code as a part of free text.	
Instruction Description	Instruction description is populated based on the FFT code selected.	
	Click plus icon to add new instruction code.	
	Click minus icon to remove any existing instruction code.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>User can see the documents uploaded.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	User can capture remarks as well as see remarks made in the earlier screens/stages.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Provide the collateral details based on the description provided in the following table:

Field	Description	Sample Values
Cash Collateral Details		
Collateral Percentage	Specify the percentage of collateral to be linked to this transaction.	
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.	
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.	

Click + plus icon to add new collateral details.

Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.

Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.	
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.	

Field	Description	Sample Values
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.	
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.	
Collateral Contribution Amount	Collateral contribution amount will get defaulted in this field. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Settlement Account	Select the settlement account for the collateral.	
Settlement Account Currency	Settlement Account Currency will be auto-populated based on the Settlement Account selection.	
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.	
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.	
Account Available Amount	Read only field. Account available amount will be auto-populated based on the Settlement Account selection.	
Response	Response can be 'Success' or 'Amount not Available'. System populates the response on clicking the Verify button.	
Response Message	Detailed Response message. System populates the response on clicking the Verify button.	
Verify	Click to verify the account balance of the Settlement Account.	
Save & Close	Click to save and close the record.	
Cancel	Click to cancel the entry.	

Below fields appear in the **Cash Collateral Details** grid along with the above fields.

Field	Description	Sample Values
Collateral %	<p>User must enter the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message.</p> <p>System defaults the collateral % maintained for the customer into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product.</p> <p>User can modify the defaulted collateral percentage, in which case system should display an override message “Defaulted Collateral Percentage modified”.</p>	
Contribution Amount	<p>This field displays the collateral contribution amount.</p> <p>The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message “Defaulted Collateral Percentage modified.</p>	
Account Balance Check Response	This field displays the account balance check response.

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV.</p> <p>On select and save and close, system defaults the available amount, bot currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>	
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available ContractAmount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	
Linked Amount	<p>Sum of Linked amount will not be greater than LC contract amount.</p> <p>Linked amount will not be greater than the available amount for linkage.</p>	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	

Field	Description	Sample Values
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Finance Preference

This section enables the user to request for a finance to liquidate the bill. This section will be enabled based on the product code selected.

Provide the loan preference details based on the description in the following table:

Field	Description	Sample Values
Drawing/Collection Ref	Defaults from the underlying task. User cannot change the value.	
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount. Defaults from the underlying task. User cannot change the value.	
Customer ID	Read only field. This field displays the customer ID of the drawee.	
Customer Name	Read only field. This field displays the drawee name.	

Field	Description	Sample Values
Product Code	Read only field. This field displays the loan product code linked to the bill.	
Finance Currency-Amount	Select the currency and amount for the finance amount.	
Original Exchange Rate	This field displays the original exchange rate.	
Exchange Rate	This field will be enabled only if the Drawing currency and Finance Currency are different. If FX linkage is available, system to display the Exchange rate from FX linkage. System will display the card rate, if FX linkage is not applicable.	
Finance Tenor Units	Period of finance. System defaults the value. User can change the value. The numerical value for Days or months or Years is applicable.	
Tenor Type	System defaults the value. User can change the value. Values are Days, Months and Years. The numerical value for Days or months or Years is applicable.	
Rate Type	System populates the Rate type as part of simulation.	
Rate Code	System populates the Rate code as part of simulation.	
Finance Value Date	System defaults the branch date as Value date. User cannot change the value.	
Finance Maturity Date	System defaults the date based on the finance value date and finance tenor. User cannot change the value.	
Finance Profit/UDE Details		
User Defined Element ID	System populates the UDE Element ID as part of simulation. User are allowed to change the selection through LOV.	
UDE Description	System populates the UDE description as part of simulation. If a user changes the UDE ID, system should populate the description.	
Rate Code	System populates the Rate code as part of simulation.	
Usage	System populates the details as part of simulation.	

Field	Description	Sample Values
UDE Value	System populates the value as part of simulation.	
Limits		
Linkage Type	System defaults the linkage type as “Facility” from back office.	
Linkage Reference Number	System defaults the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.	
Linked Percentage	User can enter the value. Maximum is 100. User cannot enter negative values.	
Limit Amount	System defaults the value. System should populate the value based on the contribution percentage.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>User can see the documents uploaded.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	User can capture remarks as well as see remarks made in the earlier screens/stages.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	

Field	Description	Sample Values
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Refer	<p>On click of Refer, user must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Drawing Under Transferred LC DE stage inputs.	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Back	Click Back to move the task to the previous segment	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Settlement Details

As part of DE user verifies and enter the basic settlement details available in the Islamic Drawings under Transferred LC process. In case the request is received through online channel user will verify the details populated.

Oracle Islamic Drawings Under Transfer LC Settlement Details screen showing a table of settlement details.

Component	Currency	Debit/Credit	Account	Account Description	Account Currency	Netting Indicator	Current Event	Original Exchange Rate	Exchange Rate

LCEXADV_LIQD	GBP	Debit	PK1000325025	NATIONAL FREIGHT CI	GBP	No	No		

The following fields should be displayed during Drawings under Transferred LC:

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	Application displays the default currency for the component.	
Debit/Credit	Application displays the debit/credit indicators for the components.	
Account	Application Displays the account number chosen.	
Account Description	Application displays the description of the selected account.	
Account Currency	Application defaults the currency for all the items based on the account number.	
Netting Indicator	Application displays the applicable netting indicator.	
Current Event	Application displays the current event as Y or N.	

Field	Description	Sample Values
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF	
Exchange Rate	The exchange rate.	
Deal Reference Number	The exchange deal reference number.	

On click of any component in the grid, the application displays Party Details, Payment Details and Remittance Information.

Party Details

Provide the party details based on the description in the following table:

Field	Description	Sample Values
Transfer Type	Select the transfer type from the drop list: <ul style="list-style-type: none"> • Customer Transfer • Bank Transfer for own account • Direct Debit Advice • Managers Check • Customer Transfer with Cover • Bank Transfer 	
Charge Details	Select the charge details for the transactions: <ul style="list-style-type: none"> • Beneficiary All Charges • Remitter Our Charges • Remitter All Charges 	
Netting Indicator	Select the netting indicator for the component: <ul style="list-style-type: none"> • Yes • No 	
Ordering Customer	Select the ordering customer from the LOV.	
Ordering Institution	Select the ordering institution from the LOV.	
Senders Correspondent	Select the senders correspondent from the LOV.	
Receivers Correspondent	Select the receivers correspondent from the LOV.	
Intermediary Institution	Select the intermediary institution from the LOV.	
Account with Institution	Select the account with institution from the LOV.	
Beneficiary Institution	Select the beneficiary institution from the LOV.	
Ultimate Beneficiary	Select the ultimate beneficiary from the LOV.	
Intermediary Reimbursement Institution	Select the intermediary reimbursement institution from the LOV.	

Payment Details

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver 1	Provide the sender to receiver message.	
Sender to Receiver 2	Provide the sender to receiver message.	
Sender to Receiver 3	Provide the sender to receiver message.	
Sender to Receiver 4	Provide the sender to receiver message.	
Sender to Receiver 5	Provide the sender to receiver message.	
Sender to Receiver 6	Provide the sender to receiver message.	

Remittance Information

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Payment Detail 1	Provide the payment details.	
Payment Detail 2	Provide the payment details.	
Payment Detail 3	Provide the payment details.	
Payment Detail 4	Provide the payment details.

Multi Level Approval

Approver user can approve the Islamic Drawings under Transferred LC transaction under the LC.

A User can view the summary of drawing details in multilevel approval stage of Islamic Drawings under Transferred LC request.

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving. User can see the summary tiles. The tiles should display a list of important fields with values. The user can drill down from summary Tiles into respective data segments where user can verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

Note

Rekey is not applicable in case of processing Drawing of Incoming SWIFT MT 750. System will display the approval screens directly as the details have been auto populated from incoming SWIFT message.

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- First Beneficiary
- Second Beneficiary
- Drawing Currency, Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries."

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none">● R1- Documents missing● R2- Signature Missing● R3- Input Error● R4- Insufficient Balance/Limits● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none">● R1- Documents missing● R2- Signature Missing● R3- Input Error● R4- Insufficient Balance- Limits● R5 - Others	
Cancel	<p>Cancel the approval.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import LC Drawing in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Application Details

The application details data segment have values for requests received from both non-online and online channels.

Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
