Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- · Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export LC Advise

As part of Export LC Advice, the advising bank receives the LC to be advised to the beneficiary from the issuing bank. The letter of credit is advised to the beneficiary through the advising bank. The various stages involved for advice of an Export Letter of Credit are:

- Receive and verify documents (Non Online Channel) Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- · Verify documents and capture details
- Input/Modify details of LC Data Enrichment stage
- Check for limit availability (In case of confirmation)
- Check balance availability for amount block
- · Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges, if applicable.
- Capture remarks for other users to check and act.
- · Hand off request to back office

The user can initiate the transfer of LC advise process from the Export LC Advise screen. The process can be initiated manually at the branch or by parsing the incoming MT 700/720.

In the following sections, let's look at the details for Export LC Advising process:

This section contains the following topics:

Common Initiation Stage	Document Linkage
Registration	Scrutiny
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

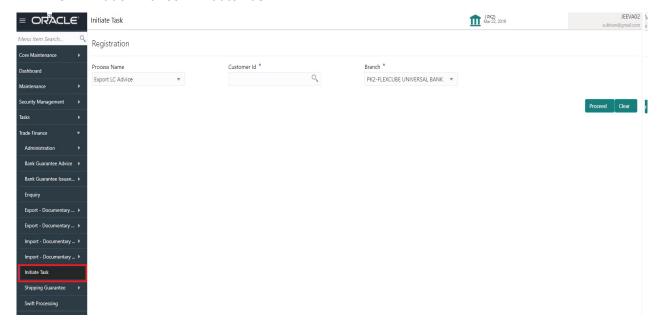

Common Initiation Stage

The user can initiate the new export LC drawing request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Customer Id	Select the customer id of the applicant or applicant's bank.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

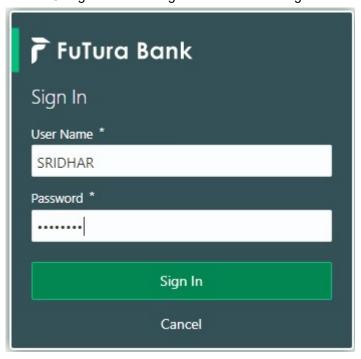

A user can register a request for an Islamic Export LC Advise received by mail/Courier at the front desk. During registration, user captures the basic details of the request, check the signature of authorized signatory of the issuing bank, and then upload related documents. On submit of the request, the task should be available for an LC expert to handle in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

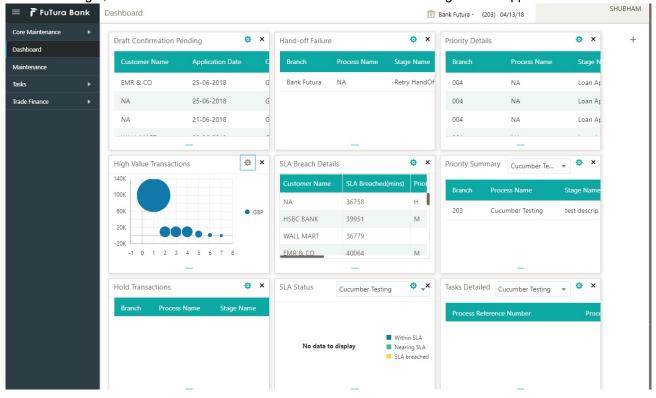

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

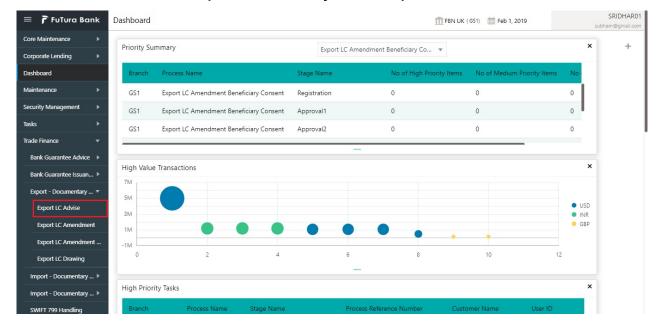

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

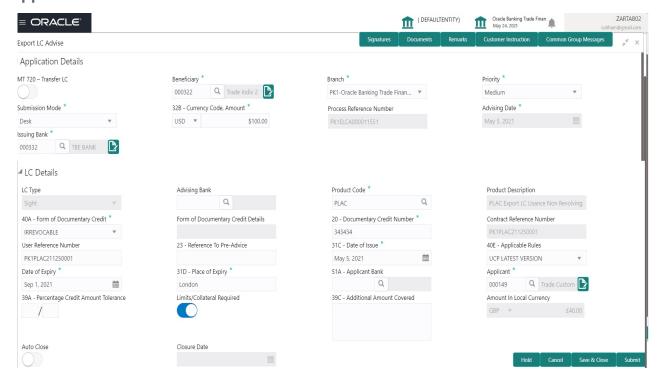

3. Click Trade Finance> Export - Documentary Credit> Export LC Advise.

The Registration stage has two sections Application Details and LC Details. Let's look at the details of Registration screens below:

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
MT 720 – Transfer LC	 Toggle On: If it is an Export LC Transfer Advise request. Toggle Off: If it is an Export LC Advise request. 	

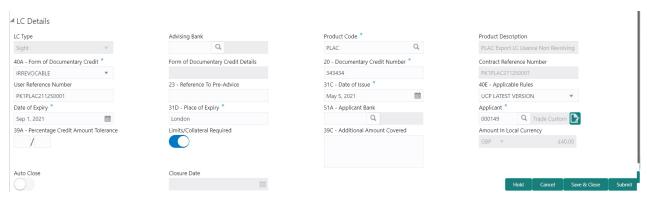

Field	Description	Sample Values
Beneficiary	Select the beneficiary customer from the LOV. If beneficiary is a customer of the bank, system will check for valid KYC status. If KYC status is not valid, system will display alert message.	
	Note For SWIFT processing of incoming MT 700, the user can edit the Party ID and or Name populated by the system to reflect the actual beneficiary details available in incoming MT 700.	
	This field will be renamed as Second Beneficiary , if the MT 720 – Transfer LC toggle is enabled.	
Branch	Customer's home branch will be displayed based on the customer ID and it can be changed, if required.	203-Bank Futura -Branch FZ1
	Note	
	Once the request is submitted, Branch field is non-editable.	
Priority	This field will be defaulted based on the priority maintenance, also enables the user to change the priority as per the requirement.	High
	Set the priority of the Export LC Advice request as Low/Medium/High. If priority is not maintained for a customer, 'Medium' priority will be defaulted.	
Submission Mode	Select the submission mode of Export LC Advice request. By default the submission mode will have the value as 'Desk'.	Desk
	Desk- Request received through Desk	
	Courier - Request received through Courier	
Currency Code, Amount	Select the currency code.	GBP, 1,000.00
	Provide the value of LC (with decimal places) as per currency type.	
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	203ILCISS0000 00500

Field	Description	Sample Values
Advising Date	By default, the application will display branch's current date and enables the user to change the date to any back date.	04/13/2018
	Note Future date selection is not allowed.	
Issuing Bank	Select the issuing bank. Party type with banks will only be displayed in LOV.	
	The system displays the	
	a) SWIFT code (if available)	
	b) Name and address of the bank	
	On selection of the record if SWIFT code is available then SWIFT code will be populated, if SWIFT code is not available then the bank's name and address will be populated.	
OLD Advising Bank	Select the old advising bank.	001342 -HSBC
	Click the look up icon to search the advising bank based on Party ID/Party name.	Bank
	This field appears, if the MT 720 – Transfer LC toggle is enabled.	

LC Details

Registration user can provide LC details in this section. Alternately, LC details can be provided by Scrutiny user.

Provide the LC Details based on the description in the following table:

Field	Description	Sample Values
LC Type	Select the applicable LC type from LOV: Sight Usance	

Field	Description	Sample Values
Advising Bank	Select the advising bank. Click the look up icon to search the advising bank based on Party ID/Party name.	001342 -HSBC Bank
Product Code	Select the applicable product code. Click the look up icon to search the product code with code or product description. Product Code	ILUN
Product Description	Auto populated by the application based on the product code.	Export LC Usance Non Revolving
40A - Form of Documentary Credit	Select the type of LC (Documentary Credit) as per the requirement. Default LC type is Irrevocable. This field will be renamed as 40B - Form of Documentary Credit, if the MT 720 - Transfer LC toggle is enabled.	Irrevocable
40A - Form of Documentary Credit Details	Read only field. Form of Documentary Credit Details.	Irrevocable
20 - Documentary Credit Number	Specify the documentary credit number. This field will be renamed as 21 - Documentary Credit Number, if the MT 720 - Transfer LC toggle is enabled.	
Contract Reference Number	Contract Reference Number will be defaulted by the system based on selected product code.	
User Reference Number	Process Reference Number will be defaulted by the system based on selected product code. User can change the process reference number.	
Reference to Pre-Advice	Provide details of Pre-Advice, if issued by the bank. This field will be removed if the MT 720 – Transfer LC toggle is enabled.	
Date Of Issue	Provide the LC date of issue. Future dates are not allowed.	04/13/18

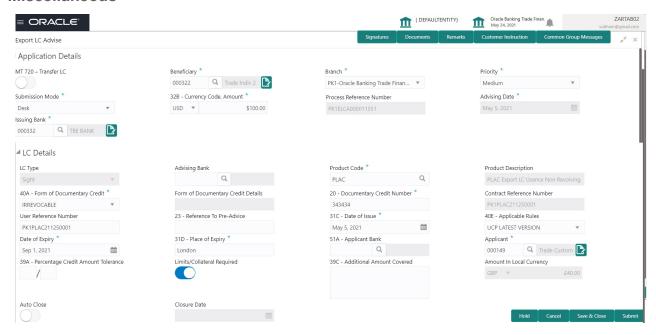

Field	Description	Sample Values
Transferring Bank's	Provide the transferring bank's reference number.	
Reference	This field appears if the MT 720 – Transfer LC toggle is enabled.	
Applicable Rules	Select the applicable rules for the LC. Default rule if UCP Latest Version .	UCP Latest Version.
Date Of Expiry	Provide the expiry date of the LC. The expiry date can be equal or greater than the issue date. If the expiry date is earlier than the issue date, system will provide an error and if the expiry date is equal to the issue date, system will provide a alert message.	09/30/18
Place of Expiry	Provide the place of expiry of LC.	London
Applicant Bank	Select the applicant bank details, if applicable. This field will be removed if the MT 720 – Transfer LC toggle is enabled.	001343 Bank of America
Applicant	Select the applicant, if applicant is a customer of the bank. If applicant is a walk in customer, provide the details. This field will be renamed as First Beneficiary , if the MT 720 – Transfer LC toggle is enabled.	001344 EMR & CO
Percentage Credit Amount Tolerance	Enables the user to provide tolerance (+/-) on the total LC value. Tolerance value must be either one or two digit value. If Tolerance is more than 10%, alert message will be displayed.	8/2
Limits/Collateral Required	Toggle On: Limit check is required.	
	Toggle Off: Limit check is not required.	
Additional Amount Covered	Provide additional amount included in LC.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
50B - Non-Bank Issuer of the Original Documentary Credit	Select the Non-Bank Issuer of the Original Documentary Credit from LOV.	
	This field appears if the MT 720 – Transfer LC toggle is enabled.	
52A - Issuing Bank of the Original Documentary	Select the issuing Bank of the Original Documentary Credit from LOV.	
Credit	This field appears if the MT 720 – Transfer LC toggle is enabled.	

Field	Description	Sample Values
Auto Close	Toggle On: Enable the toggle, if Auto close is required for that transactions.	
	Toggle Off: Disable the toggle, if Auto close is not required for that transactions.	
Closure Date	System default the "Closure Date" with the value "Expiry Date" + No of Closure days maintained in the respective Product in which the contract has been created.	
	System automatically close the contract on the specified "Closure Date" if "Auto Close" is selected as "Yes" for the specific contract.	
	User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions,	
	 Closure Date must be after the Issue Date. 	
	 Closure Date must be after the Expiry Date. 	
	 Closure Date cannot be blank, when the "Auto Close" is checked. 	

Miscellaneous

Provide the miscellaneous details based on the description in the following table:

	, ,	
Field	Description	Sample Values
Signature <u>s</u>	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
Documents	Upload the mail LC received from issuing bank.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Customer Instructions	Click to view/ input the following	
	 Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. 	
	 Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	

Action Buttons

Field	Description	Sample Values
Submit	On Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Export LC Advice. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Export LC Advice Registration inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Checklist	Make sure that the details in the checklist are completed and acknowledged.	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

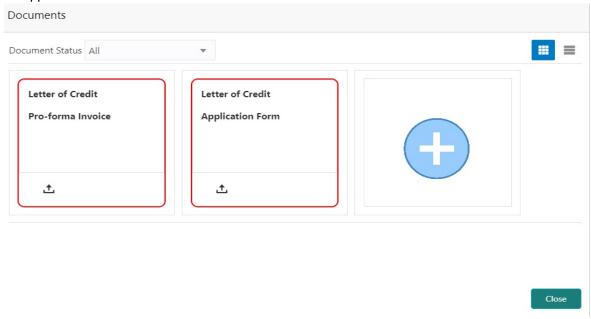

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

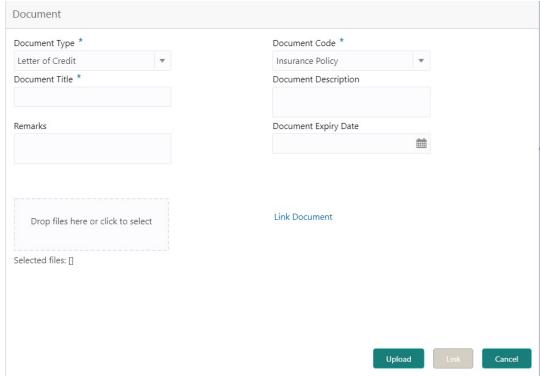

1. Navigate to the Registration screen.

2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list.	
	Indicates the document type from metadata.	
Document Code	Select the Document Code from list.	
	Indicates the document Code from metadata.	
Document Title	Specify the document title.	

Field	Description	Sample Values
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

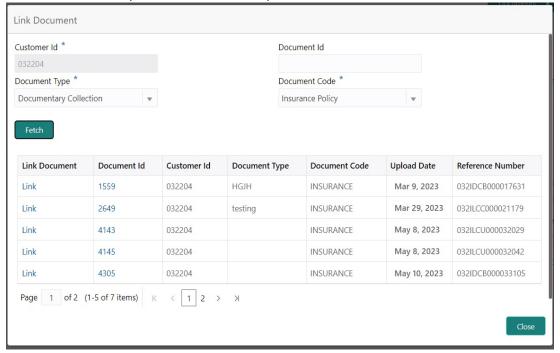

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

71		
Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document ld.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
Search Result		
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	
Document Code	This field displays the document code from meta data.	

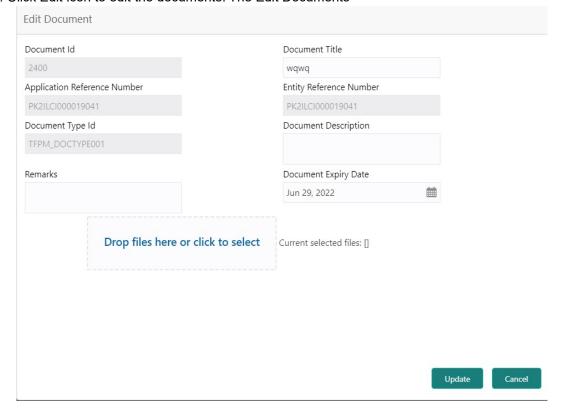

Field	Description	Sample Values
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click Link to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Documents

Scrutiny

On successful completion of Registration of an Export LC Advice request, the request moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized.

Non Online Channel - Export LC Advice requests that were received at the desk will move to Scrutiny stage post successful Registration. The request will have the details entered during the Registration stage.

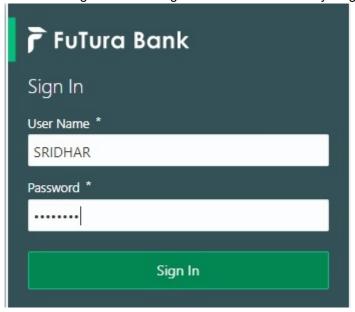

Online Channel - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

In case of SWIFT MT720, requests that are received via online channels like trade portal, external system and SWIFT should be available directly for further processing in OBTFPM from Scrutiny stage.

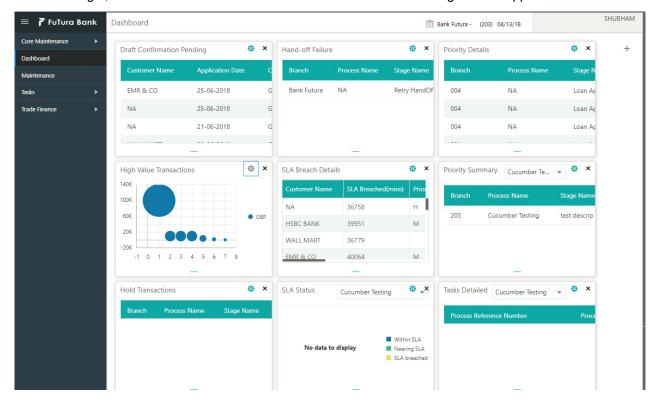

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

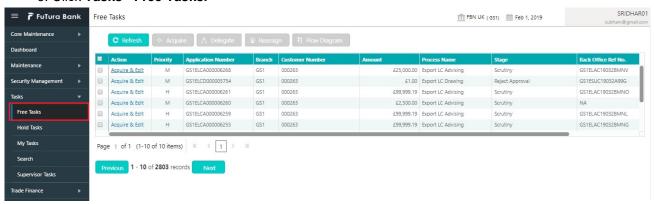

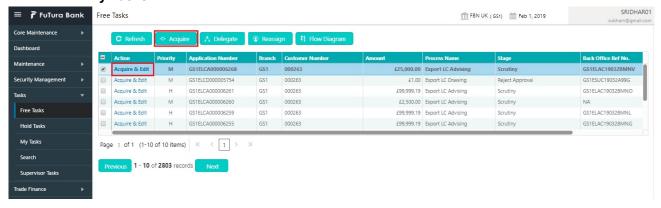

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Tasks> Free Tasks.

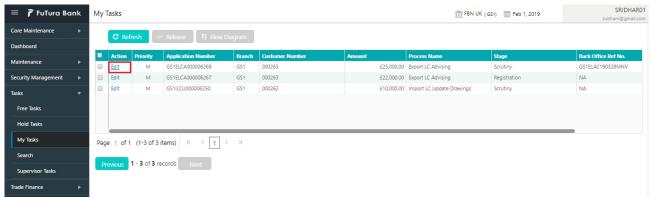

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

5. The acquired task will be available in My Tasks tab. Click Edit to scrutinize the registered task.

The Scrutiny stage has five sections as follows:

- Main Details
- Availability & Shipment
- Payment Details
- Additional Fields
- Additional Details
- Summary

Let's look at the details for Scrutiny stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

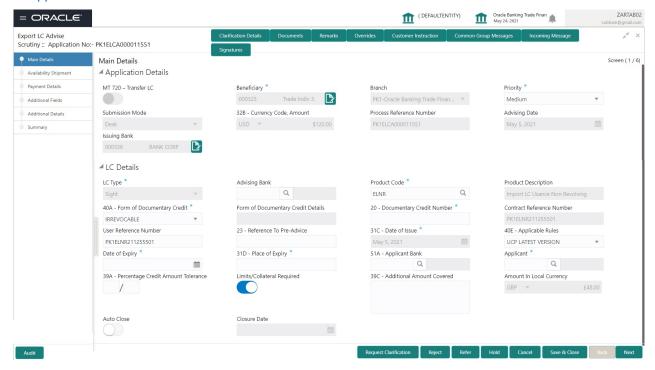

Main details section has two sub section as follows:

- Application Details
- LC Details

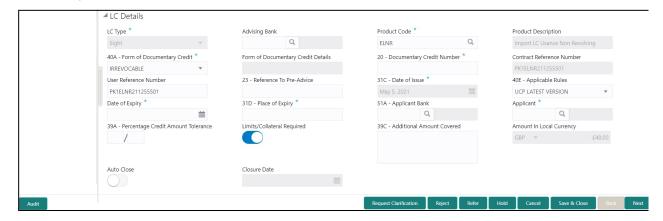

Application Details

All fields displayed under Application Details section, would be read only except for the **Priority**. Refer to Application Details for more information of the fields.

LC Details

The fields listed under this section are same as the fields listed under the LC Details section in Registration. Refer to LC Details for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view overrides, if any.	
Customer Instructions	Click to view/ input the following	
	 Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. 	
	 Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT761.	
	In case of MT798, the User can click and view the MT798 message(770,700/701).	
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	

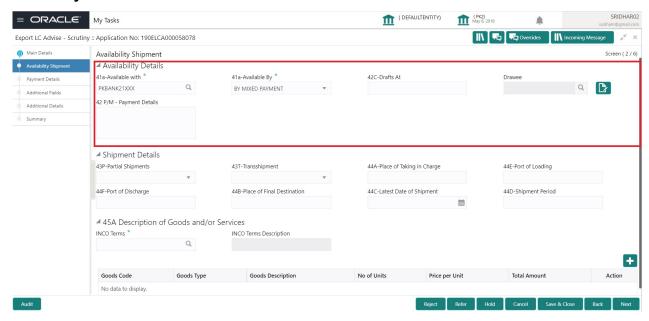

Field	Description	Sample Values
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs and return to dashboard. The data input will not be saved.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.	
	Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Availability & Shipment

User must verify/input/update Availability, Shipment and Goods details of an Export LC request for the different fields under the respective data segments.

Availability Details

Provide the Availability Details based on the description in the following table:

Field	Description	Sample Values
Available With	This field identifies the bank with which the credit is available.	
	Online Channel - Read only	
	Non Online Channel - User must capture the bank details or any free text.	
	 If the LC is restricted to any particular bank,, search the bank with SWIFT code (BIC) or Bank Name. 	
	Available Wifth BIC Sank Name retch BIC Sank Name	
	No data to display.

	Online Channel – Read only	
	Non online Channel - Provide the details of place of taking in charge.	
	Note This field is alternate to Port Of Loading. Any of these fields must have value and if both the fields has values, application will display an error message.	
Port Of Loading	This field specifies the port of discharge or airport of destination to be indicated on the transport document.	
	Online Channel – Read only	
	Non online Channel - Provide the details of Port/ Airport of Loading.	
	Note This field is alternate to Place Of Taking In Charge. Any of these fields must have value and if both the fields has values, application will display an error message.	
Port Of Discharge	This field specifies the port of discharge or airport of destination to be indicated on the transport document.	
	Online Channel – Read only	
	Non Online Channel - Provide the details of Port/ Airport of Discharge.	
	Note This field is alternate to Place Of Final Destination. Any of these fields must have value and if both the fields has values, application will display an error message.	

Field	Description	Sample Values
Place Of Final Destination	This field specifies the final destination or place of delivery to be indicated on the transport document.	
	Online Channel – Read only	
	Non Online Channel - Provide the details of Place Of Final Destination.	
	Note This field is alternate to Port Of Discharge. Any of these fields must have value and if both the fields has values, application will display an error message.	
Latest Date Of Shipment	Provide the latest date for loading on board/ dispatch/taking in charge.	
	Note This field is alternate to Shipment Period . Latest date of shipment or shipment period must have value and if both the fields has values, application will display an error message.	
Shipment Period	Online Channel – Read only	
	Non Online Channel - Provide the details of Shipment.	
	Note This field is alternate to Latest Date Of Shipment. Latest date of shipment or shipment period must have value and if both the fields has values, application will display an error message.	

Description Of Goods And Or Services

This field contains a description of the goods and/or services. Provide the goods and services details based on the description in the following table:

Field	Description	Sample Values
INCO Terms	Online Channel - Read only.	
	Non Online Channel - Select the appropriate INCO terms.	
INCO Term Description	The description of the INCO Term.	
+ Icon	Click + icon to add goods details.	

Field	Description	Sample Values
- Icon	Click - icon to remove goods details.	
Goods Code	Click look up icon to select the goods code. Once you select goods code, value will populate in Goods Type and Goods Description.	
Goods Type	The goods type is auto populated depending on selected goods code.	
Goods Description	The goods description is auto populated depending on selected goods code.	
No of Units	Enter the number of units being imported or exported.	
Price per Unit	Enter the value for price per unit.	
Total Amount	System to calculate the total price In case of online request, the system should	
	populate the total amount from incoming request. System should validate that the total amount is equal to the value of the transaction (LC/Collection).	
Action	Click Edit icon to edit the goods detail. Click Delete icon to delete the goods detail.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view overrides, if any.	

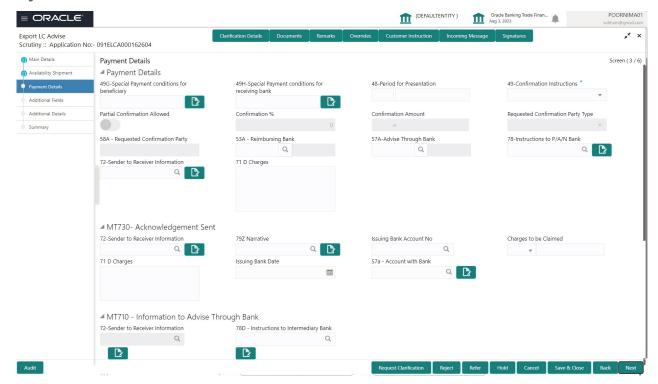

Field	Description	Sample Values
Customer Instructions	Click to view/ input the following	
	Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.	
	Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT761.	
	In case of MT798, the User can click and view the MT798 message(770,700/701).	
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the operation and return to dashboard. The data input will not be saved.	
Hold	The details provided will be registered and status will be on hold.	
	This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	On click of reject, user must select a reject reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Payment Details

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Special Payment conditions for beneficiary	Online and Non Online Channels – If any special payment condition has to be provided to beneficiary, the details for the same must be captured in this field.	
Special Payment conditions for receiving bank	Online and Non-online channels –If any special payment condition has to be provided to receiving bank, the details for the same must be captured in this field. This field specifies special payment conditions applicable to the receiving bank without disclosure to the beneficiary, for example, post-financing request/conditions for receiving bank only.	
Period for Presentation	Online Channel – Read-only. Non Online channel – If the period of presentation is based on any event other than shipment, then you can capture the event name in text along with the number of days in number.	

Field	Description	Sample Values
Confirmation Instructions	Online Channel – Read only.	
	Non Online Channel - Select the confirmation instruction for the LC from the available LOV values – CONFIRM, MAY ADD, WITHOUT.	
	Applicable only if field 49 - confirmation instruction is 'confirm' or 'may add'. You can search through LOV, Party type with banks should only be displayed in LOV. The system should display the	
	a) SWIFT code (if available),	
	b) Name and address of the bank	
	On selection of the record if SWIFT code is available then SWIFT code will be defaulted, if SWIFT code is not available then the bank's name and address to be defaulted.	
Partial Confirmation Allowed	Toggle On: Set the toggle 'On' to enable partial confirmation.	
	Toggle Off: Set the toggle 'Off' to disable partial confirmation.	
	If Confirmation% field value is less than 100%, system marks Partial confirmation to Yes. If Confirmation% is equal to 100%, Partial confirmation to be marked as No.	
	Note This field is applicable only if Confirmation Instructions is set to Confirm.	
Confirmation%	Provide the confirmation percentage.	
	This field is auto-populated if Confirmation- Instructions is set to Confirm or May Add and Requested Confirmation Party has value as- Advising Bank. The user can change the value.	
	Note This field is enabled only if Confirmation Instructions is set to Confirm or May Add and Partial Confirmation Toggle is 'On'. Note This field is alternate to 'Confirmation Amount'.	

Field	Description	Sample Values
Confirmation Amount	Provide the confirmation amount. This field is auto-populated if Confirmation Instructions is set to Confirm or May Add and Requested Confirmation Party has value as Advising Bank. The user can change the value.	
	Note This field is applicable only if Confirmation Instructions is set to Confirm or May Add and Partial Confirmation Toggle is 'On'.	
Requested Confirmation Party	Select the requested confirmation party from the drop-down.	
	The options are:	
	Advising Bank -	
	Advise Through Bank	
	• Other	
	This field is enabled if the Confirmation Instructions is CONFIRM or MAY ADD.	
Requested Confirmation Party	Select the requested confirmation party from LOV.	
	Online and Non-Online Channels – Provide requested confirmation party details.	
	This field is enabled if the Confirmation Instructions is CONFIRM or MAY ADD and To be confirmed by Advising Bank toggle is disabled.	
	Note This field is applicable only for LC Type - Confirmed LC.	
Reimbursing Bank	If reimbursing bank is applicable user must update the field.	
	Online Channel - Update the details received.	
	Non online channel - Search through LOV. Party type with banks will be displayed in LOV.	
	SWIFT code (if available),	
	 Name and address of the bank 	
	On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.	

Field	Description	Sample Values
Advise Through Bank	Online Channel – User can update the details received.	
	Non Online Channel -	
	Search through LOV. Party type with banks must be displayed in LOV.	
	SWIFT code (if available)	
	 Name and address of the bank 	
	On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.	
	Note In case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".	
	Note If Advise through Bank is selected from Requested Confirmation Party list, this field is mandatory.	
Instructions to P/A/N Bank	Online Channel- User can update details received.	
	Non online channel – Provide the details in this field.	
Sender to Receiver Information	Online Channel – User can update details received.	
	Non Online Channel – Provide details (FFT).	
Charges	Online Channel – User can update details received.	
	Non Online Channel – Provide details (FFT).	

MT730 - Acknowledgement Sent

Provide MT730 - Information to Issuing Bank details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver Information	Select a FFT to provide the additional information to receiver.	
Narrative	Select a FFT to provide the additional information from the advising bank to the issuing bank.	

Field	Description	Sample Values
Issuing Bank Account No	Select the issuing bank account number from the LOV.	
Charges to be Claimed	Select the FFT from the LOV for the charges to be claimed.	
Charges	Provide the charge details for advising.	
Issuing Bank Date	Select the issuing bank date.	
Account with Bank	Select the account to which the charges needs to be paid.	

MT710 - Information to Advise Through Bank

Provide MT710 - Information to Advise Through Bank details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver Information	Select a FFT to provide the additional information to receiver.	

Action Buttons

Field	Description	Sample Values
Documents	Upload the required documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view overrides, if any.	

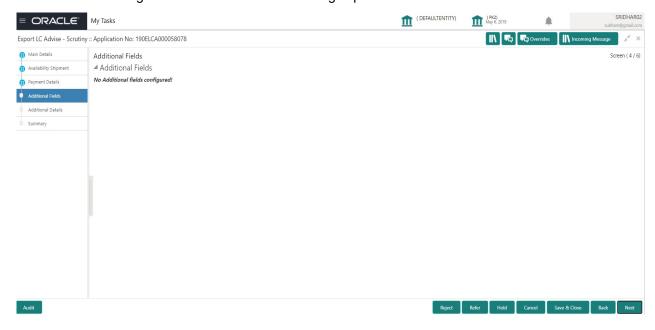

Field	Description	Sample Values
Customer Instructions	Click to view/ input the following	
	Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.	
	Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT761.	
	In case of MT798, the User can click and view the MT798 message(770,700/701).	
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold.	
	This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

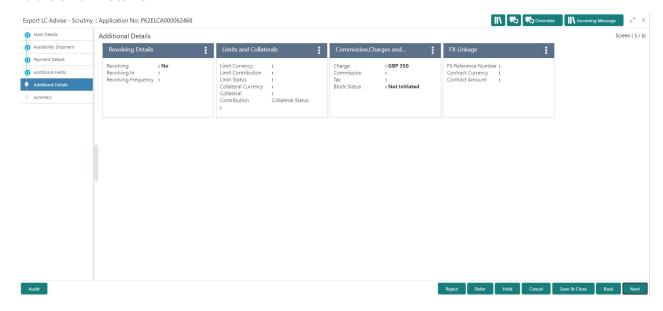

Additional Fields

Banks can configure these additional fields during implementation.

Additional Details

Limits & Collateral

	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	

Field	Description	Sample Values
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
Submit	Task will get moved to next logical stage of Export LC Advice.	
	If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	

Data Enrichment

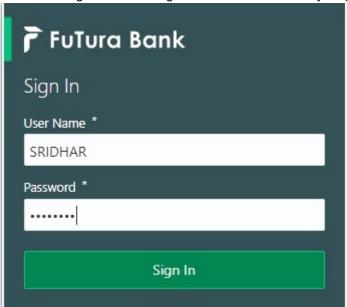

As part of Data Enrichment, you can enter/update basic details of the incoming request.

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

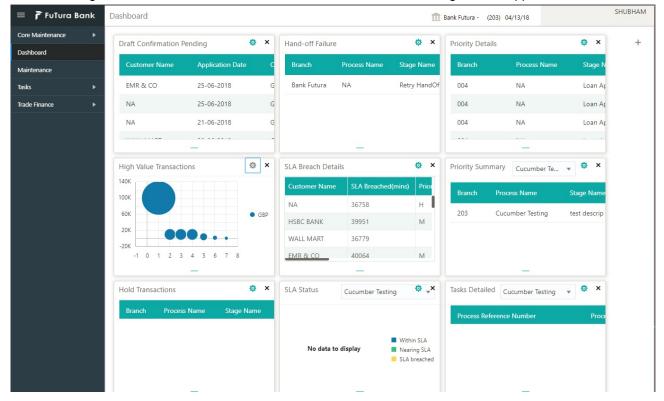

Do the following steps to acquire a task which completed the Registration and Scrutiny and currently at Data Enrichment stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

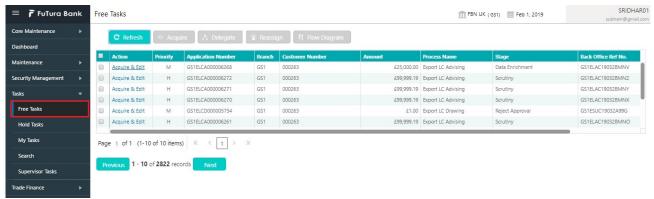

3. Click Trade Finance> Tasks> Free Tasks.

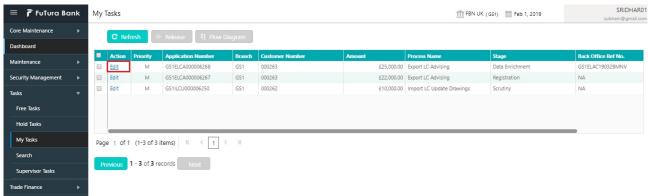

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks** tab.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for Data Enrichment stage.

The Data Enrichment stage has following hops for data capture:

- Main Details
- Availability & Shipment
- Documents Details
- Payment Details
- Additional Fields
- Additional Details
- Summary

Let's look at the details for Data Enrichment stage. You should be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

Main Details

Refer to Main Details.

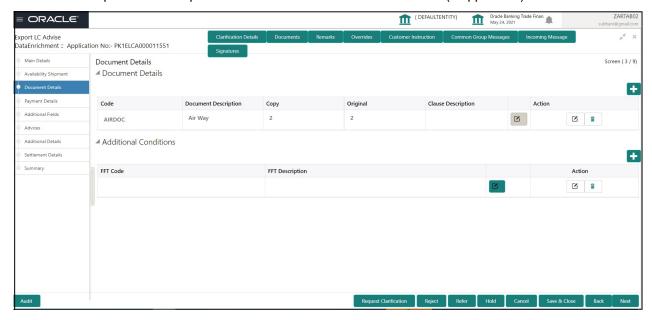

Availability & Shipment

Refer to Availability & Shipment.

Document Details

User must provide the required documents and additional conditions (if applicable) in this section.

Documents Details

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for Document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both Bill Of lading" and 'Airway Bill' are chosen.

Based on the 'Product' selected, Application will default the documents required under the LC. User can edit the details, delete an existing document and also add additional documents to the defaulted list.

Capture the information based on the description in the following table:

Field	Description	Sample Values
Click '+' icon to add the mul	tiple document code.	
Document Code	Select the document code from the LOV based on the document received. User can add or delete the code by deleting the line on the grid.	
Document Description	System will populate the document description based on the document code. User can edit the description.	
Сору	Provide the number copies received from the Drawer. User can edit the actual copies received.	
Original	Provide the number of original documents received from the Drawer. User can edit the actual originals received.	
Clause Details	Displays the description of the clause.	

Field	Description	Sample Values
Action	Click Edit icon to edit the document details.	
	Click Delete icon to delete the document details.	

Additional Conditions

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line de-limitter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. You should also be able to add additional FFT.

Field	Description	Sample Values	
Click '+' icon to add the mul-	Click '+' icon to add the multiple FFT code.		
FFT Code	Select the FFT code from the lookup.		
FFT Description	System will populate the FFT description based on the FFT code. User can edit the description.		
Action	Click Edit icon to edit the FFT details Click Delete icon to delete the FFT details.		

Action Buttons

Field	Description	Sample Values
Documents	Upload the required documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values

This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message Signatures	This button displays the multiple messages (MT760 + up to 7 MT761. In case of MT798, the User can click and view the MT798 message(770,700/701). In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task. Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system	
Save & Close	should display all the signatures. Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

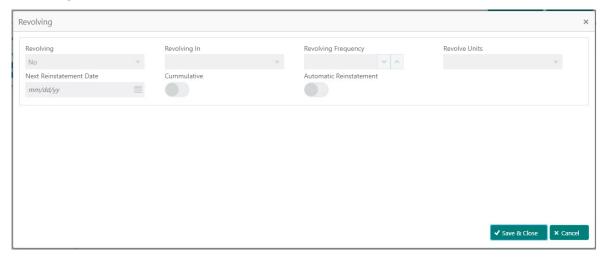

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.	
	Reject Codes:	
	R1- Documents missing	
	 R2- Signature Missing 	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	R5 - Others.	
	Select a Reject code and give a Reject Description.	
	This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system.	
	Refer Codes:	
	R1- Documents missing	
	 R2- Signature Missing 	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Additional Details

Revolving Details

Provide the Revolving Details based on the description in the following table:

Field	Description	Sample Values
Revolving	Select if the LC is revolving or not using the drop down.	
Revolving In	Select the mode of revolving in this field. The LC can revolve with Time or Units.	
Revolving Frequency	In case the LC revolves with time, then this field should be updated. This field captures the frequency in days and months by which the LC revolves.	
Revolving Units	You can capture the units by which the LC revolves.	

Field	Description	Sample Values
Next Reinstatement Date	This field defaults the date of next reinstatement for the LC based on the revolving frequency selected.	
Cumulative	This field is a toggle to indicate if the LC value has to be cumulative or not on reinstatement.	
Automatic Reinstatement	This field enables you to have automatic reinstatement on the reinstatement day without manual intervention.	

Limits & Collateral

Refer to Limits & Collateral.

Commission, Charges and Taxes Details

Refer to Commission, Charges and Taxes Details.

Tracers Details

Provide the tracer details based on the description in the following table:

Field	Description	Sample Values
Tracer Code	Tracer code is auto-populated from the latest LC.	
Description	Tracer description is auto-populated from the latest LC.	
Party Type	Click Search to search and select the party type of the tracers from the lookup.	
Required	Toggle on - Switch on the toggle to capture the tracer details.	
	Toggle off - Switch of the toggle, if user does not require to capture tracer details.	
Maximum Tracers	Provide the value for maximum number of tracers.	
Number Sent	Provide the number of tracers sent.	
Start Days	Capture the tracer start days.	

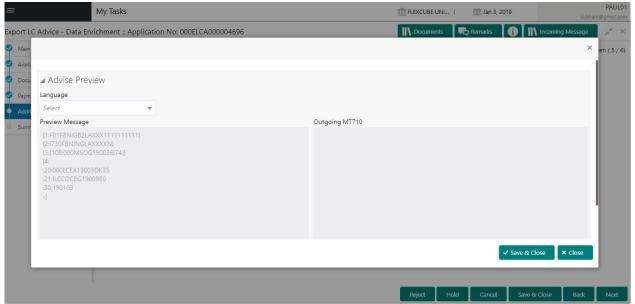

Field	Description	Sample Values
Last Sent On	Capture the date on which the tracer is last sent.	
Medium	Select the tracer medium from the LOV: • Mail • Swift	
Frequency	System will default the days set up at the product level. Value can be 1, 2 etc. which represents daily, once in 2 days etc.	
Template ID	Click Search to search and select the party type of the template ID from the lookup.	

Preview

User can view the draft message (outgoing MT754 and MT742/MT750/MT742 SWIFT message format) being displayed on the preview message text box.

User can preview the MT999 messages for the applicable MT7XX messages generated by the Back office system in the Preview Message.

Field	Description	Sample Values
Documents	Upload the required documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view overrides, if any.	
Customer Instructions	Click to view/ input the following	
	 Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. 	
	 Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT761.	
	In case of MT798, the User can click and view the MT798 message(770,700/701).	
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	

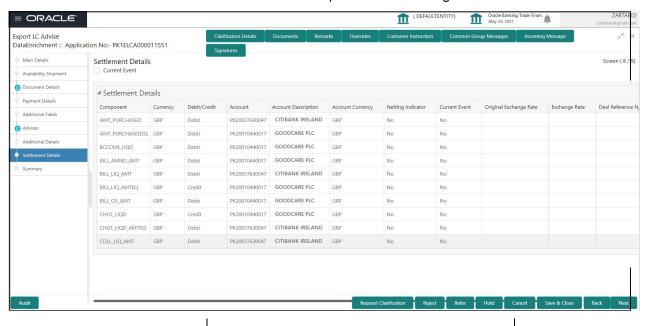

Field	Description	Sample Values
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is required, system should display all the signatures.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Settlement Details

Provide the settlement details based on the description in the following table:

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	Application displays the default currency for the component.	
Debit/Credit	Application displays the debit/credit indicators for the components.	
Account	Application Displays the account details for the components.	
Account Description	Application displays the description of the selected account.	
Account Currency	Application defaults the currency for all the items based on the account number.	
Netting Indicator	Application displays the applicable netting indicator.	
Current Event	Application displays the current event as Y or N.	
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF	
Exchange Rate	The exchange rate.	

Field	Description	Sample Values
Deal Reference Number	The exchange deal reference number.	

On click of any component in the grid, the application displays Party Details, Payment Details and Remittance Information.

Party Details

Provide the party details based on the description in the following table:

Field	Description	Sample Values
Transfer Type	Select the transfer type from the drop list: Customer Transfer Bank Transfer for own account Direct Debit Advice Managers Check Customer Transfer with Cover Bank Transfer	
Charge Details	Select the charge details for the transactions: Beneficiary All Charges Remitter Our Charges Remitter All Charges	
Netting Indicator	Select the netting indicator for the component: • Yes • No	
Ordering Customer	Select the ordering customer from the LOV.	
Ordering Institution	Select the ordering institution from the LOV.	
Senders Correspondent	Select the senders correspondent from the LOV.	
Receivers Correspondent	Select the receivers correspondent from the LOV.	
Intermediary Institution	Select the intermediary institution from the LOV.	
Account with Institution	Select the account with institution from the LOV.	
Beneficiary Institution	Select the beneficiary institution from the LOV.	
Ultimate Beneficiary	Select the ultimate beneficiary from the LOV.	
Intermediary Reimbursement Institution	Select the intermediary reimbursement institution from the LOV.	

Payment Details

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver 1	Provide the sender to receiver message.	
Sender to Receiver 2	Provide the sender to receiver message.	
Sender to Receiver 3	Provide the sender to receiver message.	
Sender to Receiver 4	Provide the sender to receiver message.	
Sender to Receiver 5	Provide the sender to receiver message.	
Sender to Receiver 6	Provide the sender to receiver message.	

Remittance Information

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Payment Detail 1	Provide the payment details.	
Payment Detail 2	Provide the payment details.	
Payment Detail 3	Provide the payment details.	
Payment Detail 4	Provide the payment details.	

Action Buttons

Field	Description	Sample Values
Documents	Upload the required documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values
Customer Instructions	Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	

Exceptions

The Export LC Advice request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral. Amount block check will be done for all the parties related to the LC.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM Application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

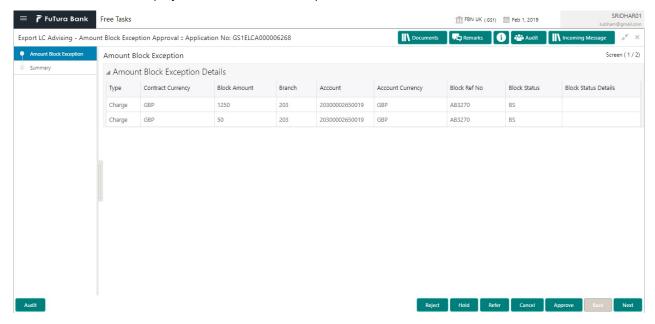

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

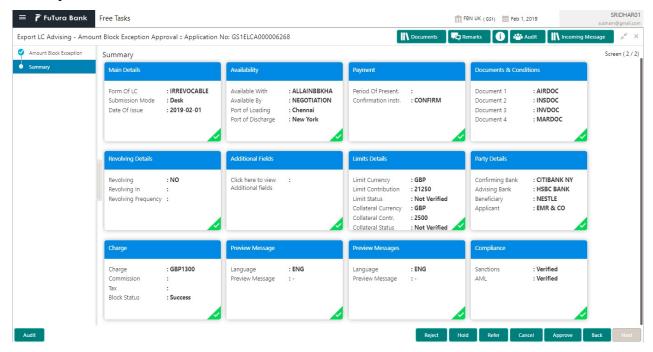

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details User can view and modify details of application and LC, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment User can view and modify availability and shipment details, if required.
- Payments User can view and modify all details related to payments, if required.
- Documents Details User can view and modify the documents required grid and the additional
- conditions grid, if required.
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charges User can view and modify charge details, if required.

- Revolving Details User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages User can view and modify preview details, if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Field	Description	Sample Values
Reject	On click of reject, user must select a Reject Reason from a list displayed by the system. Reject Codes:	
	R1- Documents missingR2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	R5 - Others.	
	Select a Reject code and give a Reject Description.	
	This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold.	
	This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes:	
	 R1- Documents missing 	
	 R2- Signature Missing 	
	R3- Input Error	
	R4- Insufficient Balance- Limits	
	R5 - Others	
Cancel	Cancel the Export LC Drawing Amount Block Exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the customer. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

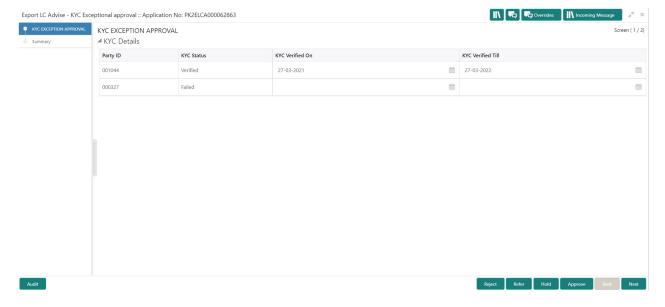

User can select a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

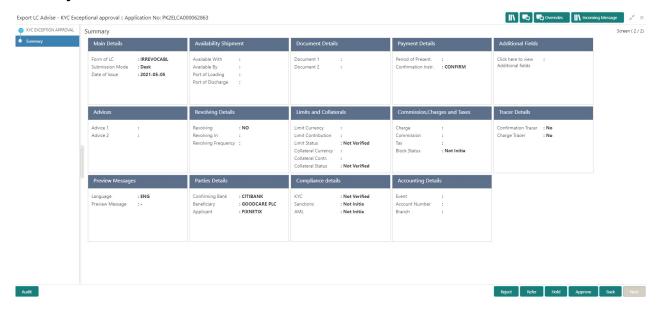

KYC Details

This section will display the KYC details.

Summary

Tiles Displayed in Summary:

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment User can view and modify availability and shipment details, if required.
- Payments User can view and modify all details related to payments, if required.
- Documents Details User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charges User can view and modify charge details, if required.
- Revolving Details User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages User can view and modify preview details, if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.	
	Reject Codes:	
	R1- Documents missing	
	R2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	R5 - Others.	
	Select a Reject code and give a Reject Description.	
	This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold.	
	This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes:	
	 R1- Documents missing 	
	 R2- Signature Missing 	
	 R3- Input Error 	
	 R4- Insufficient Balance- Limits 	
	R5 - Others	
Cancel	Cancel the Export LC Drawing KYC exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

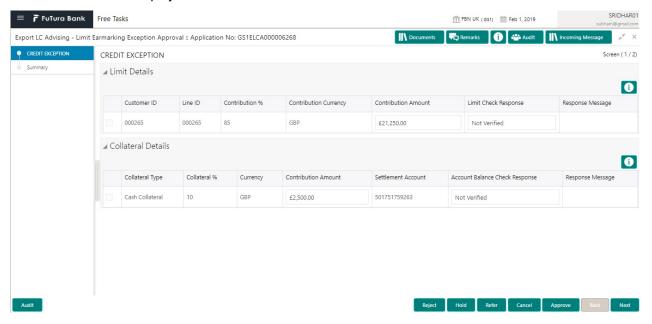

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the limit and collateral details.

Summary

Tiles Displayed in Summary:

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment User can view and modify availability and shipment details, if required.
- Payments User can view and modify all details related to payments, if required.
- Documents & Condition User can view and modify the documents required grid and the additional conditions grid, if required.

- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charges User can view and modify charge details, if required.
- Revolving Details User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages User can view and modify preview details, if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.	
	Reject Codes:	
	R1- Documents missing	
	 R2- Signature Missing 	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	R5 - Others.	
	Select a Reject code and give a Reject Description.	
	This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold.	
	This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes:	
	 R1- Documents missing 	
	 R2- Signature Missing 	
	 R3- Input Error 	
	 R4- Insufficient Balance- Limits 	
	R5 - Others	
Cancel	Cancel the Export LC Amendment Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

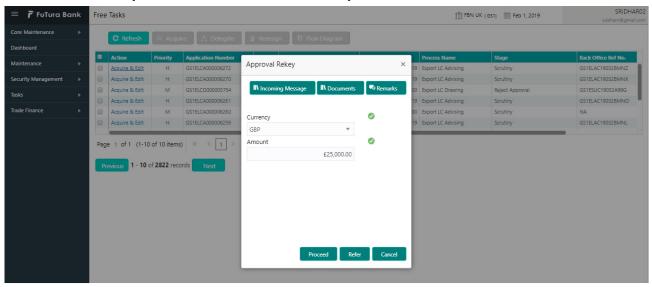

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Party
- · LC Currency, Amount
- Beneficiary party
- Expiry Date
- Issuing Bank

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

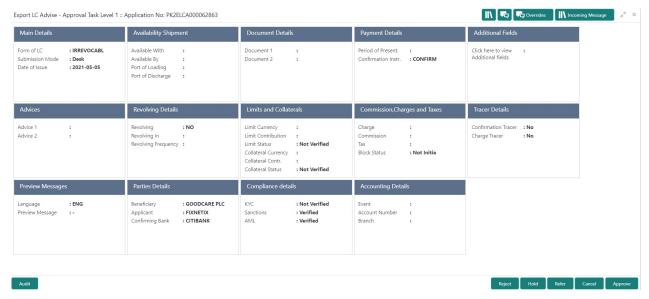

Action Buttons

Field	Description	Sample Values
Documents	Upload the required documents.	

Field	Description	Sample Values
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Incoming Message	Displays the incoming message, if any.	
Action Buttons		
Proceed	On proceed, the screen navigates to approval summary screen.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R5 - Others	
Cancel	Cancel the Import LC Drawing Approval Rekey.	

Summary

Tiles Displayed in Summary:

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment User can view and modify availability and shipment details, if required.
- Payments User can view and modify all details related to payments, if required.
- Documents & Condition User can view and modify the documents required grid and the additional
- · conditions grid, if required.
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charges User can view and modify charge details, if required.
- Revolving Details User can view and modify revolving details on revolving LC, if applicable.

- Preview Messages User can view preview details.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Export LC Advising in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Application Details

The application details data segment have values for requests received from both non-online and online channels.

Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment User can view and modify availability and shipment details, if required.
- Payments User can view and modify all details related to payments, if required.
- Documents & Condition User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charges User can view and modify charge details, if required.
- Revolving Details User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages User can view and modify preview details, if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.	

Processing Incoming MT 710 at the Advise - Through Bank

An advise- through bank is involved in an Export LC Advising process, when the advising bank passes on the LC through another bank for advising the LC to the beneficiary.

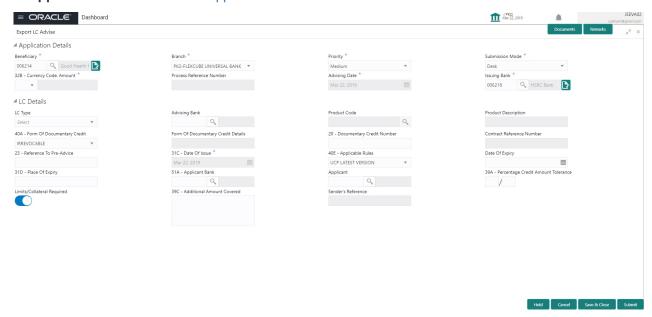

The OBTFPM user can process the incoming MT 710 for further advising to the beneficiary. The advise through bank will process the incoming MT 710 in OBTFPM and advise the LC to the beneficiary.

The incoming MT 710 is processed as an STP transaction and the system creates a task in Scrutiny stage of LC Advising process. The MT 710 can also be manually processed if required.

Registration Stage

Application Details

All fields displayed under Application details section, would be same as **Export LC Advise** - Registration - **Application Details**. Refer to Application Details for more information of the fields.

LC Details

The fields listed under this section are same as the fields listed under the **Export LC Advise** LC Details section in Registration. Refer to LC Details for more information of the fields.

Following fields are the additional new fields or label changed apart from the fields carried over from LC Details of Registration.

Provide the details for the additional fields based on the description in the following table:

Field	Description	Sample Values
Form of Documentary Credit (with same values as 40A –in MT 700)	This field gets auto populated from incoming MT 710.	

Field	Description	Sample Values
Documentary Credit Number (Same as 20- Documentary Credit Number in MT 700).	This field represents the issuing bank reference and gets auto populated from incoming MT 710.	
Sender's Reference	This field represents the issuing bank reference and field gets auto populated from incoming MT 710.	

Scrutiny

All the fields in the incoming MT 710 will be auto populated in Scrutiny Stage, if the MT 710 is received and processed as an STP transaction.

Main Details

Fields listed under the MT710 Scrutiny stage is same as **Export LC Advise** Scrutiny stage Main Details section. Refer to Main Details for more information of the fields.

Following fields are the additional new fields or label changed apart from the fields carried over from Main Details of Scrutiny.

Field	Description	Sample Values
Beneficiary	The system will check the Beneficiary name available in the incoming MT 710 with the bank customers data and populate the CIF and the details of the customer if the Beneficiary is a customer of the bank. If the beneficiary is not a customer of the bank, the system should populate the Walk-in CIF and the user should be able to update the name and address of the beneficiary.	

Action Buttons

Field	Description	Sample Values
Request Clarification	On click the Request Clarification button the user can request for an Online clarification from customer. Clicking the button opens a detailed screen to capture the clarification details.	
Submit	Task will get moved to next logical stage of Export LC Advice.	
	If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	

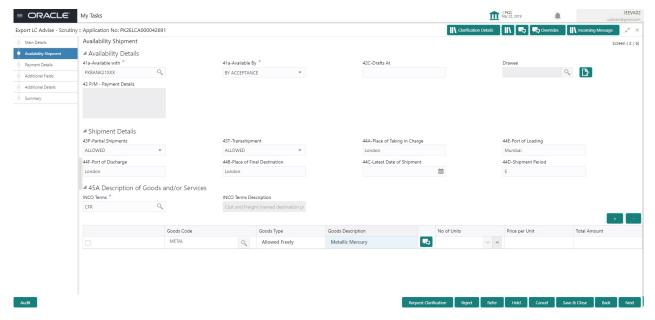

Field	Description	Sample Values
Cancel	Cancel Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Next	Click Next to move to next logical step in Scrutiny stage.	
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Availability Shipment

The fields are populated with the value available in MT 710, in case of STP of MT 710.

For field descriptions, refer Availability & Shipment section of Export LC Advise Scrutiny stage.

Use action buttons based on the description in the following table:

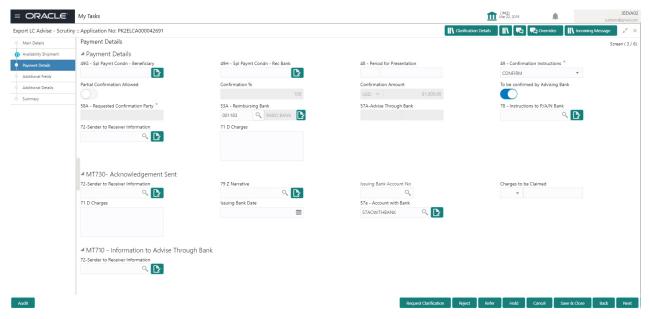

Field	Description	Sample Values
Request Clarification	On click the Request Clarification button the user can request for an Online clarification from customer. Clicking the button opens a detailed screen to capture the clarification details.	
Submit	Task will get moved to next logical stage of Export LC Advice. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Next	Click Next to move to next logical step in Scrutiny stage.	
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Payment Details

In case LC is processed through STP, system should populate the fields with the value available in MT 710.

Fields listed under the MT710 Scrutiny stage Payment Details section is same as **Export LC Advise** Scrutiny stage Payment Details section. Refer to Payment Details for more information of the fields.

Following fields are the additional new fields or label changed apart from the fields carried over from Payment Details of Scrutiny.

Field	Description	Sample Values
To be confirmed by Advising Bank	Toggle On: Set the toggle on to confirm by advising bank.	
	Toggle Off: Set the toggle off for not to be confirmed by advising bank.	

MT730 - Acknowledgment Sent

Fields listed under this section is same as MT730 - Acknowledgement Sent section in **Export LC Advise** Payment Details section. Only the section label is changed. Refer to MT730 - Acknowledgement Sent for more information of the fields.

Confirmation to be done by ATB only if To be confirmed by ATB is enabled.

Action Buttons

Use action buttons based on the description in the following table: Additional fields - Same as in Export LC

Field	Description	Sample Values
Request Clarification	On click the Request Clarification button the user can request for an Online clarification from customer. Clicking the button opens a detailed screen to capture the clarification details.	
Submit	Task will get moved to next logical stage of Export LC Advice.	
	If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

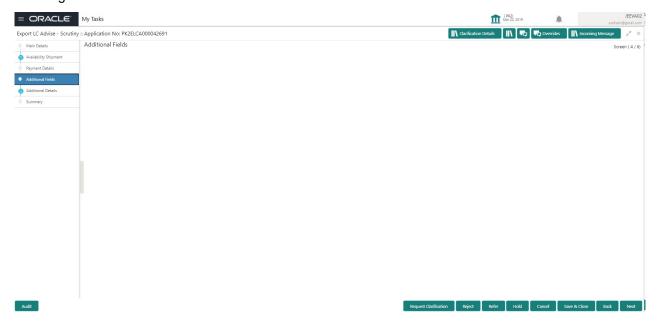

Field	Description	Sample Values
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Next	Click Next to move to next logical step in Scrutiny stage.	
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Additional Fields

Fields listed under the MT710 Additional Fields Scrutiny stage is same as **Export LC Advise** Scrutiny stage Additional Fields section. Refer to Additional Fields for more information of the fields.

Action Buttons

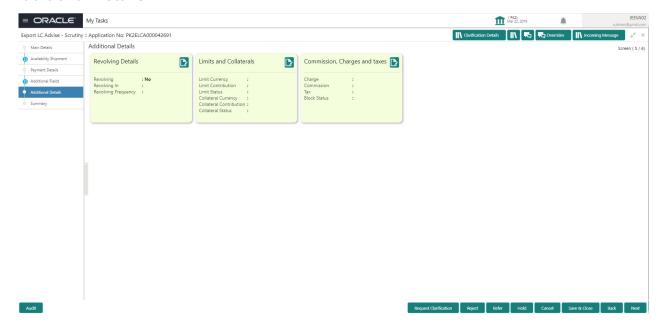

Use action buttons based on the description in the following table: Additional fields - Same as in Export LC

Field	Description	Sample Values
Request Clarification	On click the Request Clarification button the user can request for an Online clarification from customer. Clicking the button opens a detailed screen to capture the clarification details.	
Submit	Task will get moved to next logical stage of Export LC Advice. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the informations provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel Scrutiny stage inputs and return to dashboard.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	On click of Reject, user must select a reject reason from a list displayed by the system.	
	Reject Codes:	
	R1- Documents missing	
	 R2- Signature Missing 	
	R3- Input Error	
	 R4- Insufficient Balance/Limits 	
	R5 - Others.	
	Select a reject code and give a reject description.	
	This reject reason will be available in the remarks window throughout the process.	
Next	Click Next to move to next logical step in Scrutiny stage.	
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Additional Details

Charges

Fields listed under the MT710 Additional Details - Charges is same as **Export LC Advise** Scrutiny stage Application Details section. Refer to Additional Details for more information of the fields.

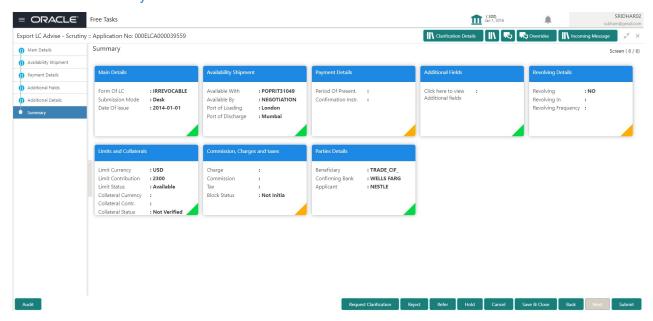

Limits and Collateral

This section is available if Advise Through Bank is confirming the LC.

Summary

Fields listed under the MT710 Summary is same as **Export LC Advise** Scrutiny stage Summary section. Refer to Summary for more information of the fields.

Data Enrichment Stage

All fields with values are populated from scrutiny stage. In addition, if the transaction is created through STP, the Documents and Conditions fields are also auto populated.

Availability and Shipment

Fields are same as Scrutiny stage.

Payment Details Confirmation

Fields are same as Scrutiny stage.

Additional fields

Fields listed under the Additional fields are same as **Export LC Advise** Scrutiny stage Additional Fields section. Refer to Additional Fields for more information of the fields.

Advices

Advises are to be simulated from back office and displayed to the user. User should be able to suppress the advices. If FFT are available for the advices, the FFT should be populated automatically under th advice. If the advice is suppressed, the system should prompt the user to remove any attached FFT from the respective screens.

Charges

Fields listed under the Additional fields- Charges are same as Export LC Advise Scrutiny stage.

Limits and Collateral

This section is available if Advise Through Bank is confirming the LC as in Scrutiny stage.

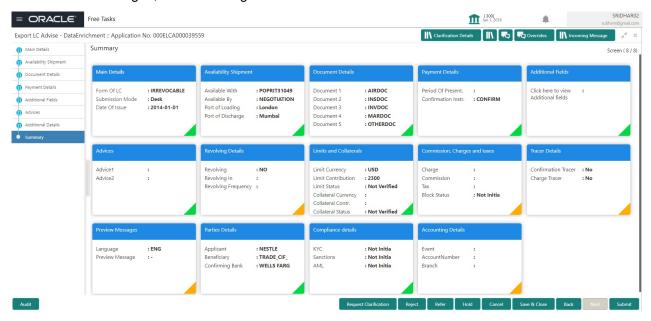

Preview Message

All the messages (SWIFT and mail advice) to be available for preview. If any of the advices are suppressed the corresponding Preview message should not be displayed.

Summary

The tiles displayed in this section is same as Data Enrichment stage of Export LC Advise. In addition to DE stage of Export LC Advising, system should also display Advices and Accounting entries tile and the user should be able to see the accounting entries simulated from back office. After simulation, if the values are changed, the accounting entries should also be re-simulated.

Tiles Displayed in Summary

In addition to Data Enrichment stage of Export LC Advising, system should also display the below tiles.

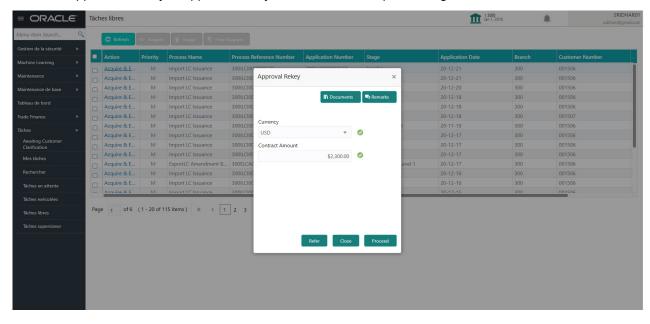

- Advices User can view the advice details.
- Accounting Entries User can view the accounting entries generated in back office.

Approval

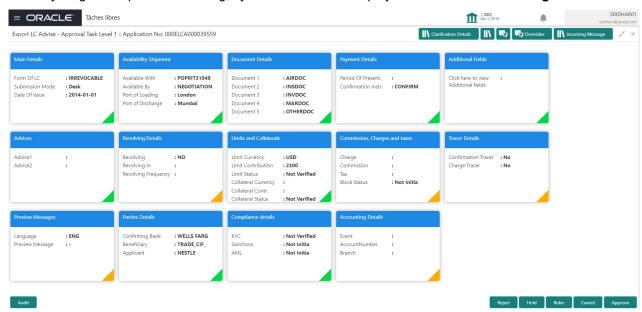

Approval Re-key

This Approval Re-key is applicable only in case of manual processing of MT 710.

Approval Summary

The tiles displayed in this section is same as Approval Summary of **Export LC Advise**. In addition to Approval Summary stage of Export LC Advising, system should also display **Advices** and **Accounting entries** tiles.

Tiles Displayed in Summary

In addition to Data Enrichment stage of Export LC Advising, system should also display the below tiles.

- · Advices User can view the advice details.
- Accounting Details User can view the accounting entries generated in back office.

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries.
