Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export LC Drawing Islamic

Under an Export LC, the beneficiary of the LC after exporting the goods under LC submits the documents under the LC to the nominated bank. The nominated bank scrutinizes/negotiates and forwards the document to the Issuing bank under Export LC Drawing Islamic process in OBTFPM

The various stages involved for Export LC Drawing are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input application details
- Upload of related mandatory and non-mandatory documents received from the presenting bank
- Verify documents and capture details (Online/Non Online Channels)- Scrutiny stage
- Input/Modify details of Bill - Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- During Simulation, the following items are generated in OBTF and displayed in OBTFPM, based on data input in OBTFPM:

Charges, Interest, Advices, Preview message, Accounting entries and Settlement.

- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Export LC Drawing process flow is similar to that of conventional Export LC Drawing process flow.

This section contains the following topics:

Common Initiation Stage	Scrutiny
Registration	Exceptions
Data Enrichment	Reject Approval
Multi Level Approval	

Common Initiation Stage

The user can initiate the new export LC drawing request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
LC Reference Number	Select the LC Reference Number.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

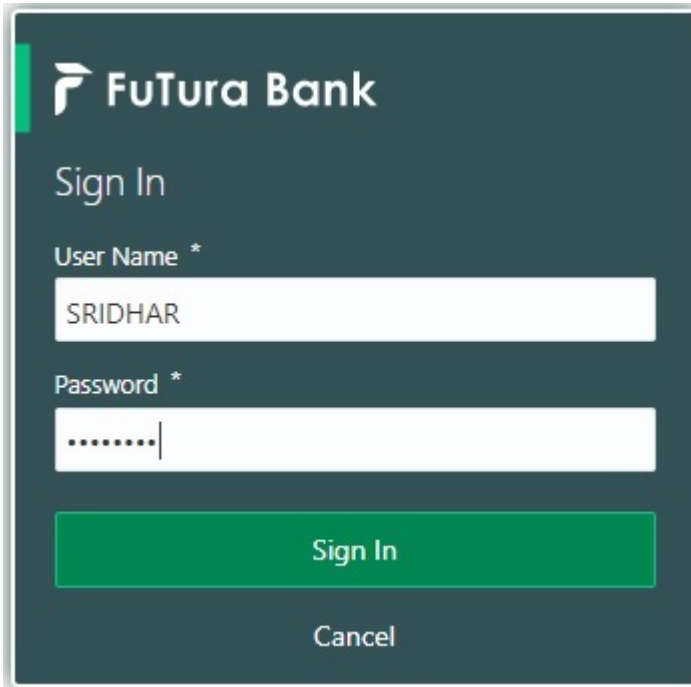

Registration

User can register a request for an Islamic Export LC Drawing at the front desk. During Registration stage, user can capture the basic details of the request and upload the documents received from beneficiary. It also enables the user to capture some additional product related details as an option. On submit of the request, the request will be available for an LC expert to handle the request in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

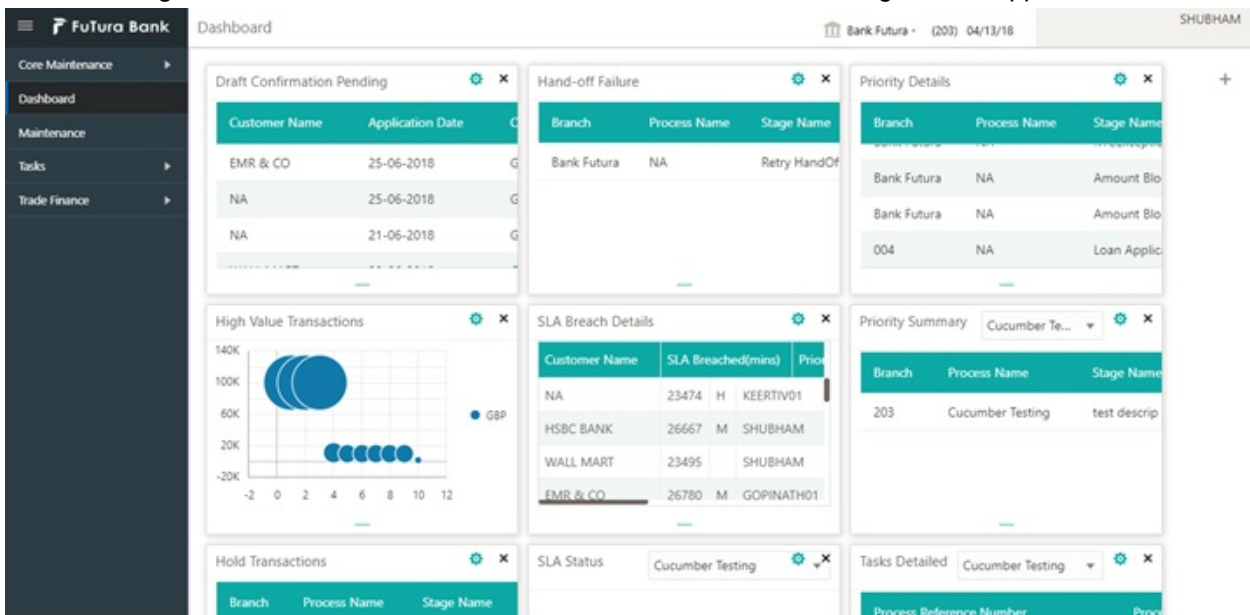

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text "Sign In". Below the header, there are two input fields: "User Name *" containing the text "SRIDHAR" and "Password *" with masked characters. At the bottom, there are two buttons: a green "Sign In" button and a white "Cancel" button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. On the left is a navigation menu with options like "Core Maintenance", "Dashboard", "Maintenance", "Tasks", and "Trade Finance". The main area contains several widgets:

- Draft Confirmation Pending:** A table with columns "Customer Name" and "Application Date".

Customer Name	Application Date
EMR & CO	25-06-2018
NA	25-06-2018
NA	21-06-2018
- Hand-off Failure:** A table with columns "Branch", "Process Name", and "Stage Name".

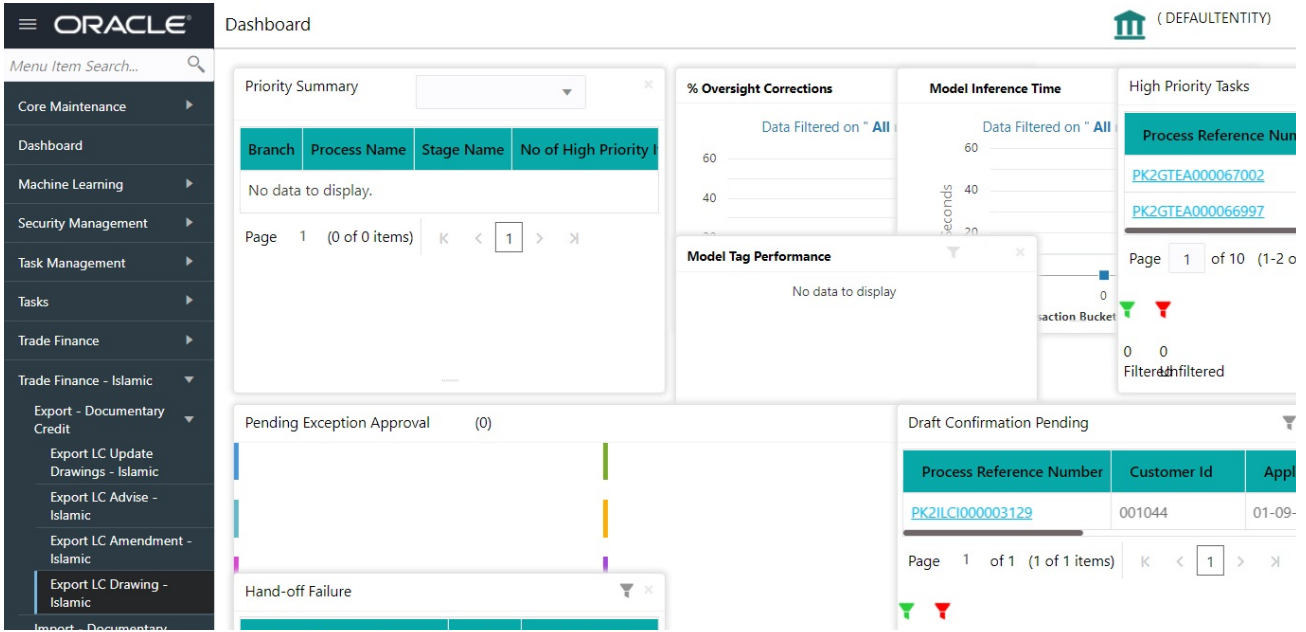

Branch	Process Name	Stage Name
Bank Futura	NA	Retry HandOf
- Priority Details:** A table with columns "Branch", "Process Name", and "Stage Name".

Branch	Process Name	Stage Name
Bank Futura	NA	Amount Blo
Bank Futura	NA	Amount Blo
004	NA	Loan Applic
- High Value Transactions:** A bubble chart showing transaction values for different customers. The y-axis ranges from -20K to 140K. The x-axis ranges from -2 to 12. A legend indicates "GBP".
- SLA Breach Details:** A table with columns "Customer Name", "SLA Breached(mins)", and "Priority".

Customer Name	SLA Breached(mins)	Priority
NA	23474	H KEERTIV01
HSBC BANK	26667	M SHUBHAM
WALL MART	23495	M SHUBHAM
EMR & CO	26780	M GOPINATH01
- Priority Summary:** A table with columns "Branch", "Process Name", and "Stage Name".

Branch	Process Name	Stage Name
203	Cucumber Testing	test descrip
- Hold Transactions:** A table with columns "Branch", "Process Name", and "Stage Name".
- SLA Status:** A widget showing "Cucumber Testing" with a status indicator.
- Tasks Detailed:** A widget showing "Cucumber Testing" with a status indicator.

3. Click Trade Finance - Islamic > Export - Documentary Credit> Export LC Drawings - Islamic.

The Registration stage has two sections Basic Details and LC Details. Let's look at the details of Registration screens below:

Application Details

The screenshot shows the Oracle Trade Finance - Islamic Application Details screen. The top navigation bar includes Oracle, user information, and application status. The main content is divided into two sections: Application Details and LC Details. The Application Details section includes fields for LC Advised by us (toggle), Priority (Medium), Process Reference Number (PK2IELD000026787), Export LC Reference Number (PK2ERLI211250506), Submission Mode (Desk), Beneficiary (GOODCARE PLC), Drawing Date (May 24, 2021), and Branch (PK2-Oracle Banking Trade Finan...). The LC Details section includes fields for Documents Received (First), Drawing Reference Number, Date of Expiry (Dec 31, 2021), Available with Bank, Nego/Finance Amount, Customer Dispatch (toggle), Tenor Type (Sight), Applicant (MARKS AND SP), Presenting Bank, Drawing Amount (GBP), Unlinked FX Rate, Product Code, Issuing Bank (WELLS FARGO L), Presenting Bank Reference Number, Amount In Local Currency (GBP), Outstanding LC Value (GBP, £1,000.00), Product Description, Issuing Bank Reference, Confirming Bank, Operation Type, and Additional Amount (GBP).

Provide the Basic Details based on the description in the following table:

Field	Description	Sample Values
LC Advised by us	<p>Toggle On: Set the toggle to On, if LC is advised by negotiating bank.</p> <p>Toggle Off: Set the toggle to Off, if LC is not advised by the negotiating bank.</p>	

Field	Description	Sample Values
Export LC Reference Number	<p>Provide the Export LC Reference Number. Alternatively, user can search the export LC reference number using LOV.</p> <p>In the LOV, user can input Customer ID, Currency, Amount Issue Date and Issuing Bank Reference to fetch the LC details. Based on the search result, select the applicable LC for drawing.</p> <p> Note This field is applicable only if LC Advised by us toggle is On.</p> <p>In case of silent confirmation, user receives an alert message as, "The LC has been Silently Confirmed."</p>	
Beneficiary	<p>LC Advised by us: Read only field. Beneficiary will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Select the beneficiary customer from the LOV.</p> <p>If beneficiary is a customer of the bank, system will check for valid KYC status. If KYC status is not valid, system will display alert message.</p>	
Branch	<p>Read only field.</p> <p>Branch details will be auto-populated based on the selected LC from the LOV.</p>	203-Bank Futura -Branch FZ1
Priority	<p>System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit.</p>	High
Submission Mode	<p>Select the submission mode of Export LC Drawing request. By default the submission mode will have the value as 'Desk'.</p> <p>Desk- Request received through Desk Courier- Request received through Courier</p>	Desk
Drawing Date	<p>By default, the application will display branch's current date and does not enables the user to change the date to any back date.</p>	04/13/2018
Document Received Date	<p>By default, the application will display branch's current date and does not enables the user to change the date to any back date.</p>	04/13/2018

Field	Description	Sample Values
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	
Below fields appear, if the Parent LC is a Transferable LC and substitution of documents is allowed.		
Transfer LC Drawing Reference	User can select the Transfer LC which are not fully utilized, from LOV.  Note 1) Transfer LC number LOV lists only the Transfer LC where substitution of documents is allowed. 2) In case only one transfer LC or only one drawing under transfer lc is applicable, system displays the reference number directly on the field without LOV.	
Substitution of Document	This flag is enabled, if substitution of documents is allowed under the Transfer LC and user cannot change the value.	
Transfer LC Reference	Reference number of the Transferred LC.	

LC Details

Registration user can provide drawing details in this section. Alternately, drawing details can be provided by Scrutiny user.

Provide the drawing LC Details based on the description in the following table:

Field	Description	Sample Values
Document Received	Enables to user to select the number of sets of documents received from the LOV: <ul style="list-style-type: none"> • First • Second • Both 	
Tenor Type	Select the Tenor Type from the LOV: <ul style="list-style-type: none"> • Sight • Usance • Mixed 	
Product Code	Select the product code for the drawing.	
Product Description	Read only field. This field displays the description of the product as per the product code.	
Drawing Reference Number	This is auto generated by the back end system.	
Applicant	LC Advised by us: Read only field. Applicant will be auto-populated based on the selected LC from the LOV. LC not advised by us: Select the applicant from the LOV.	
Issuing Bank	LC advised by us: Read only field. Issuing bank will be auto-populated based on the selected LC from the LOV. LC not advised us: Select the issuing bank. Party type with banks will only be displayed in LOV. The system will display the a) SWIFT code (if available) b) Name and address of the bank On selection of the record if SWIFT code is available then SWIFT code will be populated, if SWIFT code is not available then the bank's name and address will be populated.	
Issuing Bank Reference	LC Advised by us: Read only field. Issuing bank reference will be auto-populated based on the selected LC from the LOV. LC not advised by us: Provide the issuing bank reference number.	

Field	Description	Sample Values
Date of Expiry	<p>LC Advised by us: Read only field.</p> <p>Expiry Date reference will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Provide the expiry date.</p>	
Presenting Bank	<p>LC Advised by us: Read only field.</p> <p>Presenting Bank will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Select the Presenting Bank from the LOV.</p> <p> Note</p> <p>In case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".</p>	
Presenting Bank Reference Number	<p>LC Advised by us: Read only field.</p> <p>Presenting Bank Reference number will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Provide the Presenting Bank Reference Number.</p>	
Confirming Bank	Click Search icon to search and select the confirming bank from the lookup.	
Available with Bank	<p>Click Search icon to search and select the value for available with bank from the lookup.</p> <p>The Available Bank details should be handed off against 'Collecting Bank' Party in OBTF.</p> <p>1) If the Bank selected in Confirming Bank and Available with Bank are same, system should hand off only the Confirming Bank details in Back office.</p> <p>2) If Confirming Bank/Available with Bank are the same as Issuing Bank/Presenting Bank, system should display an error.</p>	
Drawing Amount	Provide the amount to be drawn in this drawing.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	

Field	Description	Sample Values
Operation Type	<p>LC Advised by us: Read only field.</p> <p>Operation Type will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Select the operation type from the LOV.</p>	
Negotiation/Financing Amount	<p>LC Advised by us: Read only field.</p> <p>Negotiation/Financing Amount will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Provide the Negotiation/Financing Amount.</p>	
Unlinked FX Rate	<p>LC Advised by us: Read only field.</p> <p>Unlinked FX Rate will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Provide the Unlinked FX Rate.</p>	
Outstanding LC Value	<p>LC Advised by us: Read only field.</p> <p>Outstanding LC Value reference will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Provide the outstanding LC value.</p>	
Additional Amount	This field enables user to provide any additional amount to be processed under this LC drawing.	
LC Transferred Amount	This field captures the total LC transferred value.	
LC Not Transferred Amount	This field captures the capture the outstanding non Transferred LC Value.	
Customer Dispatch	<p>The value will be populated from back office based on the maintenance.</p> <p>Toggle On: If the toggle is set to Yes, the customer has the option to dispatch the documents directly to the importer's bank.</p> <p>Toggle Off: If the toggle is set to No, the bank has to dispatch the documents to the importer's bank.</p> <p>Bank user is not allowed to edit the field, if the value defaulted from the back office is "No",</p>	

Miscellaneous

The screenshot displays the Oracle Oracle Banking Trade Finance application interface. The top navigation bar includes the Oracle logo, user information (ZARTAB01), and system status (DEFAULTENTIVITY). The main content area is divided into two sections: 'Application Details' and 'LC Details'.

Application Details:

- Export LC Drawing - Islamic Registration :: Application No:- PK2IELD000026787
- Export LC Reference Number: PK2ERLU211250506
- Beneficiary: 001044 GOODCARE PLC
- Branch: PK2-Oracle Banking Trade Finan...
- Priority: Medium
- Submission Mode: Desk
- Drawing Date: May 24, 2021
- Document Received Date: May 24, 2021
- Process Reference Number: PK2IELD000026787

LC Details:

- Documents Received: First
- Drawing Reference Number: [Empty]
- Date of Expiry: Dec 31, 2021
- Available with Bank: [Empty]
- Nego/Finance Amount: [Empty]
- Tenor Type: Sight
- Applicant: 001043 MARKS AND SP
- Presenting Bank: [Empty]
- Drawing Amount: [Empty]
- Unlinked FX Rate: [Empty]
- Product Code: [Empty]
- Issuing Bank: 001041 WELLS FARGO L
- Presenting Bank Reference Number: [Empty]
- Amount In Local Currency: GBP
- Outstanding LC Value: GBP £1,000.00
- Product Description: [Empty]
- Issuing Bank Reference: [Empty]
- Confirming Bank: [Empty]
- Operation Type: [Empty]
- Additional Amount: GBP

Buttons at the bottom right include: Hold, Cancel, Save & Close, Submit.

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the LC.	
Remarks	Provide any additional information regarding the drawing. This information can be viewed by other users processing the request.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	

Field	Description	Sample Values
View LC	Enables the user to view the latest LC values displayed in the respective fields. All fields displayed in LC details section are read only fields.	
Events	On click, system will display the details of LC issuance, amendments (if any), drawings (if any) and liquidations if any under the LC in chronological sequence from LC Issuance.	
Action Buttons		
Submit	On submit, task will get moved to next logical stage of Export LC Drawing. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancels the Export LC Drawing Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".

3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

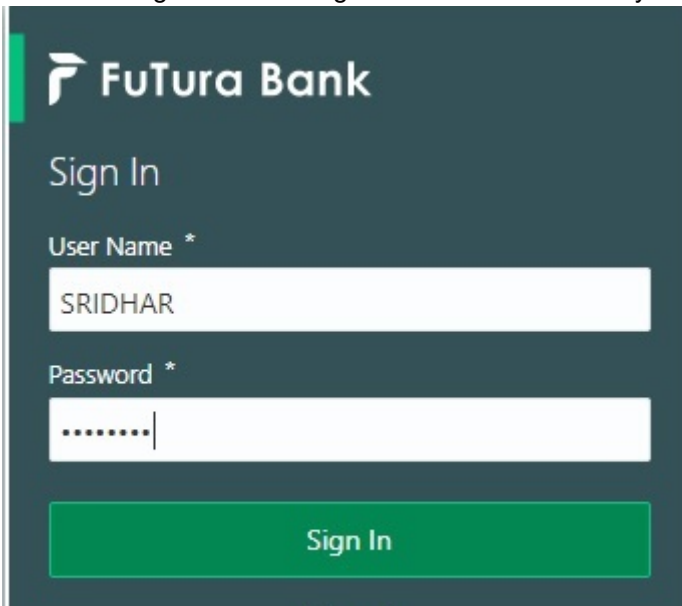

Scrutiny

On successful completion of Registration of an Islamic Export LC Drawing request, the request moves to Scrutiny stage. At this stage the Scrutiny user can scrutinize the request for Islamic Export LC Drawing.

As part of scrutiny, the user can enter/update basic details of the Islamic LC Drawing request and can verify if the request can be progressed further. The task initiated from the online channel should be created in the Scrutiny stage directly as in conventional process flow.

The following steps enable the user to acquire the task available-at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

FuTura Bank

Sign In

User Name *

SRIDHAR

Password *

.....

Sign In

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard for Futura Bank displays several key performance indicators and task-related widgets. On the left, a navigation menu includes Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main area contains:

- Draft Confirmation Pending:** A table listing customer names (EMR & CO, NA) and application dates (25-06-2018, 21-06-2018).
- Hand-off Failure:** A table showing branch (Bank Futura), process name (NA), and stage name (Retry HandOf).
- Priority Details:** A table with columns for Branch, Process Name, and Stage Name, listing items like Amount Blo and Loan Applic.
- High Value Transactions:** A bubble chart showing transaction values for GBP, with a scale from -20K to 140K.
- SLA Breach Details:** A table listing customer names (NA, HSBC BANK, WALL MART, EMR & CO), SLA Breached (mins), and priority levels (H, M).
- Priority Summary:** A table showing branch (203), process name (Cucumber Testing), and stage name (test descrip).
- Hold Transactions:** A table with columns for Branch, Process Name, and Stage Name.
- SLA Status:** A widget showing the current status as 'Cucumber Testing'.
- Tasks Detailed:** A widget showing 'Cucumber Testing'.

3. Click Trade Finance > Tasks > Free Tasks.

The Oracle Free Tasks page displays a list of tasks. The table below represents the data shown in the screenshot:

Action	Priority	Process Name	Process Reference Number	Application Number	Stage	Application Date	Branch	Customer Num

The Scrutiny stage has following hops for data capture:

- Main Details
- Document Details
- Shipment Details
- Additional Conditions
- Discrepancy Details
- Additional Fields
- Additional Details
- Maturity Details
- Summary

Let's look at the details for Scrutiny stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- LC Details

Application Details

All fields displayed under Application Details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

LC Details

The fields listed under this section are same as the fields listed under the [LC Details](#) section in [Registration](#). Refer to [LC Details](#) for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Following fields can be amended based on the description in the following table:

Field	Description	Sample Values
Document Received	Enables to user to select the number of sets of documents received from the LOV: <ul style="list-style-type: none"> First Second Both 	
Presenting Bank	Select the Presenting Bank from the LOV.	

Field	Description	Sample Values
Presenting Bank Reference Number	Provide the Presenting Bank Reference Number.	
Confirming Bank	Click icon to search and select the confirming bank from the lookup.	
Available with Bank	Click icon to search and select the value for available with bank from the lookup.	
Drawing Amount	Provide the amount to be drawn in this drawing.	
Negotiation/Financing Amount	<p>LC Advised by us: Read only field.</p> <p>Negotiation/Financing Amount will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Provide the Negotiation/Financing Amount.</p>	
Unlinked FX Rate	<p>LC Advised by us: Read only field.</p> <p>Unlinked FX Rate will be auto-populated based on the selected LC from the LOV.</p> <p>LC not advised by us: Provide the Unlinked FX Rate.</p>	
Additional Amount	This field enables user to provide any additional amount to be processed under the LC drawing.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Upload the required documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	

Field	Description	Sample Values
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signature	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Request Clarification	<p>User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.</p>	

Document Details

User can enter/ update and verify the documents and condition details for Export LC Drawing received and identify discrepancies, if any. User can compare the document received with the required documents and identify the discrepancies, if any.

Maturity Details

A Scrutiny user can input the maturity details request for Islamic Export Bill.

Provide the maturity details based on the description in the following table:

Field	Description	Sample Values
Tenor Type	Read only field. This field displays the tenor type as per LC.	
Tenor Basis	Select the tenor basis, if the tenor is not sight. The user can view and edit the tenor base code description of the Tenor Basis Code selected by the user.	
Start Date	System defaults the start date. Provide the tenor start date.	
Tenor Days	Provide the number of tenor days	
Transit Days	Provide the transit days, if the tenor is sight.	
Maturity date	System displays the due date for the drawing based on tenor and tenor basis. If tenor is sight, system will calculate the maturity date as 5 working days from document Received date. User can change this value to any date earlier than the maturity date up to system date. User cannot change the value to later than maturity date. If tenor is Usance, system will calculate the maturity date based on the tenor basis and populate the maturity date.	

Field	Description	Sample Values
Profit from Date	Select the interest from date. The interest from date cannot be earlier than branch date and later than maturity date.	
Profit to Date	Select the profit to date.	
Acceptance Commission From Date	Select the acceptance commission from date.	
Acceptance Commission To Date	Select the acceptance commission to date.	

Other Bank Charges

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Other Bank Charges - 1	Charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Charges - 2	Charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Charges - 3	Charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -1	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -2 to 3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	

Other Bank Profits

Provide the other bank profit based on the description in the following table:

Field	Description	Sample Values
Other Bank Profits - 1	Select the currency from the drop-down list and specify the profit.	
Other Bank Profits - 2	Select the currency from the drop-down list and specify the profit.	
Other Bank Profits - 3	Select the currency from the drop-down list and specify the profit.	

Other Details

Provide the other bank details based on the description in the following table:

Field	Description	Sample Values
Debit Value Date	System defaults the debit value date. Provide the debit value date.	
Credit Value Date	System defaults the credit value date. Provide the credit value date.	
Value Date	System defaults the value date. Provide the value date.	
Allow Pre-Payment	Toggle On: Set the toggle 'On' to enable pre-payment. Toggle Off: Set the toggle 'Off' to disable pre-payment.	
Refund Interest	Toggle On: Set the toggle 'On' to refund the interest. Toggle Off: Set the toggle 'Off' to deny the interest refund.	
Transfer Collateral from LC	Toggle On: Set the toggle 'On' to enable the transfer collateral from LC. Toggle Off: Set the toggle 'Off' to disable the transfer collateral from LC.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	

Field	Description	Sample Values
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signature	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Request Clarification	<p>User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.</p>

Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available ContractAmount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.

Provide the Pre Shipment details based on the description in the following table:

Field	Description	Sample Values
Loan Account Number	Select the pre-shipment Loan Account number from the LOV.	
Currency	The currency of the pre-shipment loan account number.	
Outstanding Amount	The pre-shipment credit outstanding amount.	
Action	Click the Edit icon to modify the Pre Shipment details. Click the Delete icon to delete the Pre Shipment details.	
Settled Loan		
Sequence Number	This field displays the sequence of the settled loan.	
Loan Account Number	This field displays the pre-shipment Loan Account number.	
Currency	This field displays the currency of the pre-shipment loan account number.	
Outstanding Amount	This field displays the pre-shipment credit outstanding amount.	
Event	This field displays the event.	
Settled Amount	This field displays the settled amount.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Upload the required documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signature	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.	

Summary

User can review the summary of details captured in Islamic Export LC Drawing Scrutiny stage. The tiles must display a list of important fields with values. User can drill down the tile and view the details provided in the various data segments.

Tiles Displayed in Summary

- Main Details - User can view details about application details and LC details.
- Document Details - User can view document details.
- Party Details - User can view party details like applicant, advising bank etc.
- Shipment Details - User can view shipment details.
- Additional Conditions - User can view the additional conditions.
- Discrepancy Details - User can view the discrepancy noted for the current LC drawing.
- Advices - User can view the advices.
- Limits and Collaterals - User can view limits and collateral details.
- Charges - User can view charge details.

Field	Description	Sample Values
Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office. Value can be: <ul style="list-style-type: none"> • Fixed Floating • Special 	
Rate Code	This field displays the rate code applicable for the Component.	
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code. User can change the value if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	

Field	Description	Sample Values
Special Pricing Reference Number	<p>User can capture the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component).</p> <p>Special Pricing Reference is not applicable for Penal Interest components.</p> <p>For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same.</p> <p> Note</p> <p>System shows an override as “Special Pricing Applicable”, on clicking “Save” in the Interest Details screen, if Special Pricing Reference number has been provided.</p>	
Currency	System defaults the Interest currency in this field.	
Amount	User can input the interest amount, in case the Rate Type is Special , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	<p>System displays the Charge Party based on the type of transaction.</p> <p>In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..</p>	
Settlement Account	<p>System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override.</p> <p>In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM).</p>

FX Linkage

This section enables the user to link the existing FX contract(s) to the drawing. User can link one or more FX deals to a drawing/bill. The linked value of an FX deal(s) must not exceed the value of the drawing/bill.

FX contract linkage with the Drawing/Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the drawing/bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following table:

FX Linkage ×

FX Linkage +

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Current Utilized Amount	Total Utilized Amount	FX Expiry Date	Action
PK2FXF1200760501	EUR	GBP	US\$10,000.00	1.33	US\$10,000.00			28-Jun-2020

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV.</p> <p>On select and save and close, system defaults the available amount, bot currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>	
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available ContractAmount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	
Linked Amount	<p>Sum of Linked amount will not be greater than LC contract amount.</p> <p>Linked amount will not be greater than the available amount for linkage.</p>	

Field	Description	Sample Values
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

Pre-shipment Credit Linkage:

The Pre-shipment credit linkage functionality is not supported in the Islamic BC module in OBTF. Hence this functionality is not provided in Islamic Export LC drawing process flow.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Upload the required documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signature	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	

Field	Description	Sample Values
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.	

Settlement Details

A DE user can verify the Settlement details available in the Islamic Export LC Drawing. In case the request is received through online channel user can verify the details populated.

The screenshot displays the Oracle Banking Trade Finance interface for Settlement Details. The main table contains the following data:

Component	Currency	Debit/Credit	Account	Account Description	Account Currency	Netting Indicator	Current Event	Original Exchange Rate	Exchange Rate	Deal Reference Number
AMT_PURCHASEDEQ	USD	Credit	PK20037630047	CITIBANK IRELAND	GBP	No	No			
BILL_AMT_EQUIV	USD	Credit	PK20037630047	CITIBANK IRELAND	GBP	No	No			
BILL_LIQ_AMT	USD	Debit	PK20010440017	GOODCARE PLC	GBP	No	No			
BILL_LIQ_AMTEQ	USD	Debit	PK20010440017	GOODCARE PLC	GBP	No	No

COLL_AMNDAMT	USD	Debit	PK20010440017	GOODCARE PLC	GBP	No	No			

Provide the settlement details based on the description in the following table:

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	Application displays the default currency for the component.	
Debit/Credit	Application displays the debit/credit indicators for the components.	
Account	Application Displays the account details for the components.	
Account Description	Application displays the description of the selected account.	
Account Currency	Application defaults the currency for all the items based on the account number.	
Netting Indicator	Application displays the applicable netting indicator.	

Field	Description	Sample Values
Current Event	Application displays the current event as Y or N.	
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF	
Exchange Rate	The exchange rate.	
Deal Reference Number	The exchange deal reference number.	

On click of any component in the grid, the application displays Party Details, Payment Details and Remittance Information.

Party Details

Provide the party details based on the description in the following table:

Field	Description	Sample Values
Transfer Type	Select the transfer type from the drop list: <ul style="list-style-type: none"> • Customer Transfer • Bank Transfer for own account • Direct Debit Advice • Managers Check • Customer Transfer with Cover • Bank Transfer 	
Charge Details	Select the charge details for the transactions: <ul style="list-style-type: none"> • Beneficiary All Charges • Remitter Our Charges • Remitter All Charges 	
Netting Indicator	Select the netting indicator for the component: <ul style="list-style-type: none"> • Yes • No 	
Ordering Customer	Select the ordering customer from the LOV.	
Ordering Institution	Select the ordering institution from the LOV.	
Senders Correspondent	Select the senders correspondent from the LOV.	
Receivers Correspondent	Select the receivers correspondent from the LOV.	
Intermediary Institution	Select the intermediary institution from the LOV.	
Account with Institution	Select the account with institution from the LOV.	
Beneficiary Institution	Select the beneficiary institution from the LOV.	
Ultimate Beneficiary	Select the ultimate beneficiary from the LOV.	
Intermediary Reimbursement Institution	Select the intermediary reimbursement institution from the LOV.	

Payment Details

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver 1	Provide the sender to receiver message.	
Sender to Receiver 2	Provide the sender to receiver message.	
Sender to Receiver 3	Provide the sender to receiver message.	
Sender to Receiver 4	Provide the sender to receiver message.	
Sender to Receiver 5	Provide the sender to receiver message.	
Sender to Receiver 6	Provide the sender to receiver message.	

Remittance Information

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Payment Detail 1	Provide the payment details.	
Payment Detail 2	Provide the payment details.	
Payment Detail 3	Provide the payment details.	
Payment Detail 4	Provide the payment details.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	

Field	Description	Sample Values
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signature	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>

Field	Description	Sample Values
Submit	Task will get moved to next logical stage of Export LC Drawing. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.	

Exceptions

As per regulatory requirement, all tasks are scrutinized for KYC, Compliance and Sanctions. Task. The checks to external system/internal system is initiated after the DE Stage. The amount Block earmark and Limit Earmarks if applicable are also initiated after the DE stage.

If a negative response is received for any of the calls, the task lands in respective exceptional queue which require further manual handling/approval.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify details provided for charges, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
