# Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

## Overview

OBTFPM is a Trade Finance Middle Office Platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during Transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

## Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

---

## Guarantee Amendment Advise - Islamic

Conventional Guarantee Advise Amendment process enables the user to make an amendment to the Guarantee, which had been already advised.

The common amendments that are made to Guarantee Advised are:

- Expiry date
- Increase/Decrease in Guarantee amount
- Change to the existing Terms and Conditions.

The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended Guarantee Advise is parked awaiting beneficiary consent.

The various stages involved for Guarantee Advise Amendment are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input amendment application details
- Upload of related mandatory and non-mandatory documents
- Verify/capture details (SWIFT MT767, 775/Non Online Channels)- Data Enrichment stage
- Check for limit availability if applicable
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

In the following sections, let's look at the details for Islamic Guarantee Amendment Advising process:

This chapter contains the following topics:

<a href="#">Registration</a>	<a href="#">Data Enrichment</a>
<a href="#">Multi Level Approval</a>	<a href="#">Customer - Acknowledgement</a>

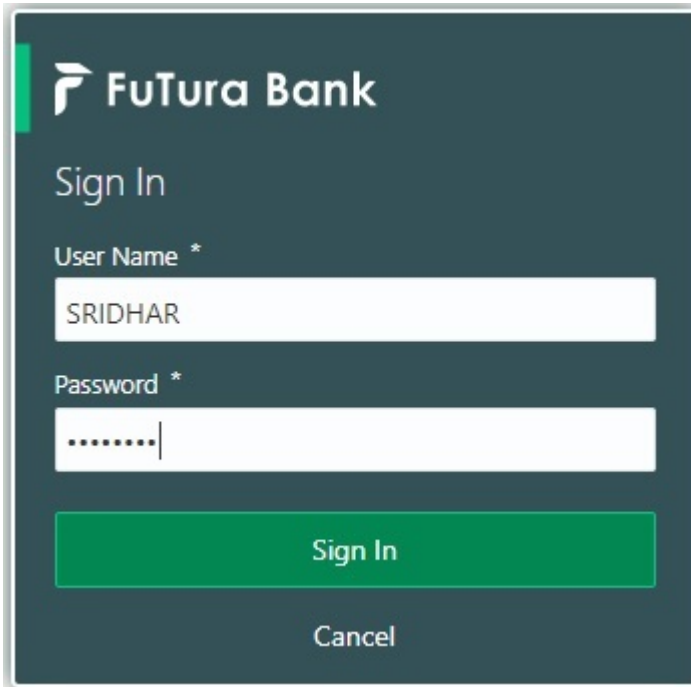

### Registration

As a Registration user, you can register a Guarantee Advice Amendment - Islamic request received by mail/Courier at the front desk. During Registration stage, user captures the basic details, check the signature of the authorized signatory of the Guarantee Issuing Bank and upload the related documents. On submit, the request will be available for an Guarantee Advice expert to handle the request in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E ( of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

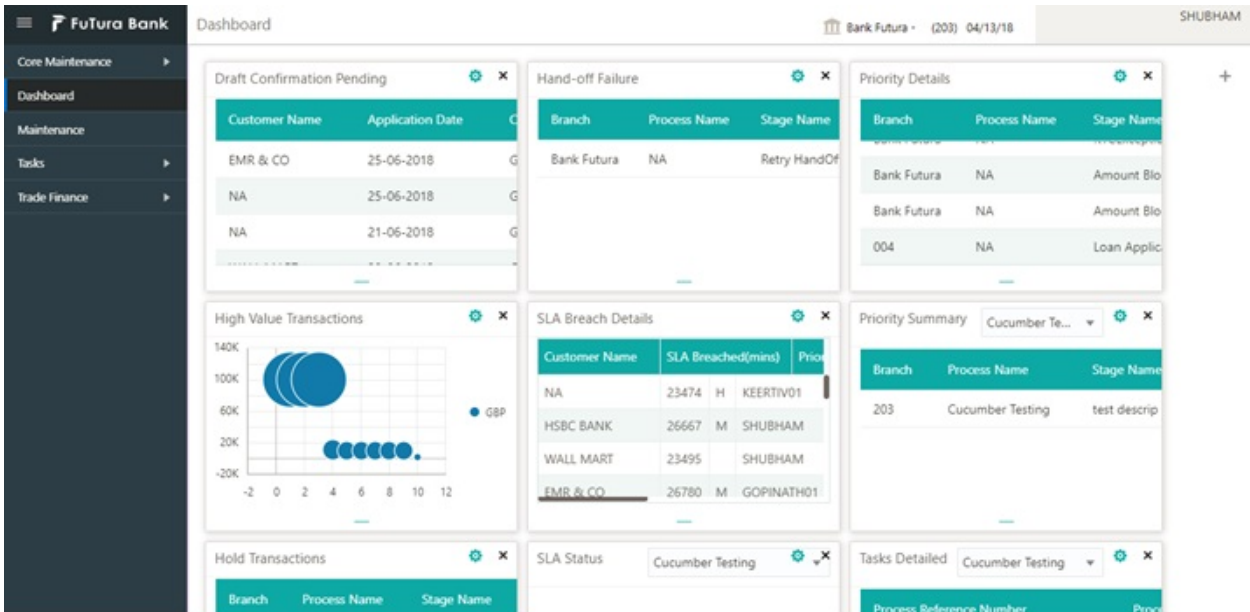

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text 'Sign In'. Below this, there are two input fields: 'User Name \*' containing the text 'SRIDHAR' and 'Password \*' which is masked with dots. At the bottom, there are two buttons: a green 'Sign In' button and a white 'Cancel' button.

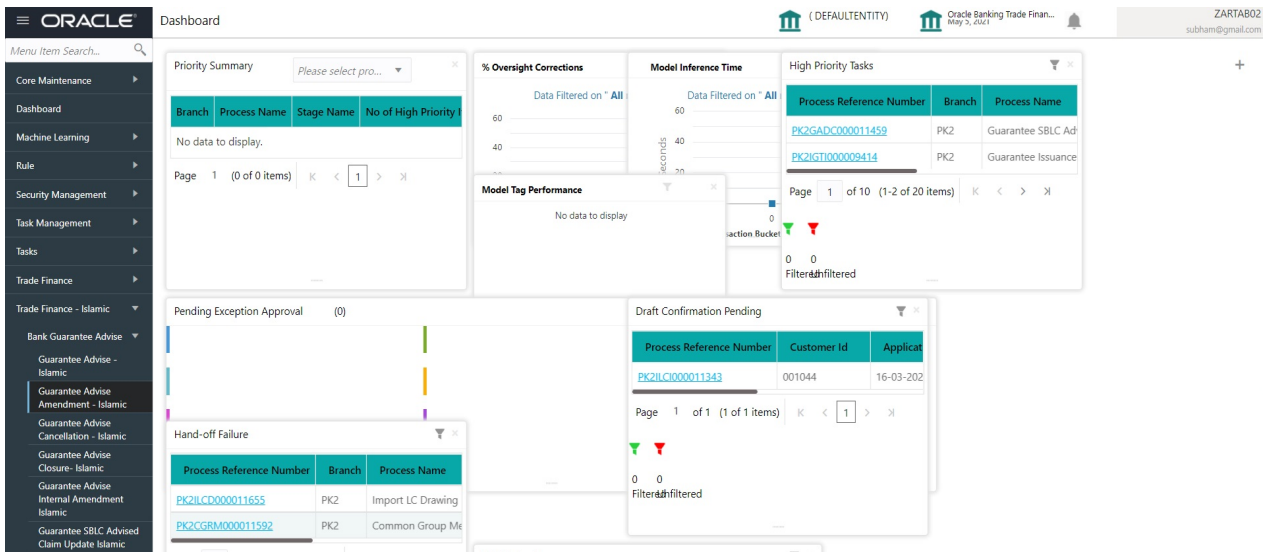

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image shows a screenshot of the FuTura Bank dashboard. The dashboard is titled 'Dashboard' and includes a navigation menu on the left with options like 'Core Maintenance', 'Dashboard', 'Maintenance', 'Tasks', and 'Trade Finance'. The main content area displays several widgets:

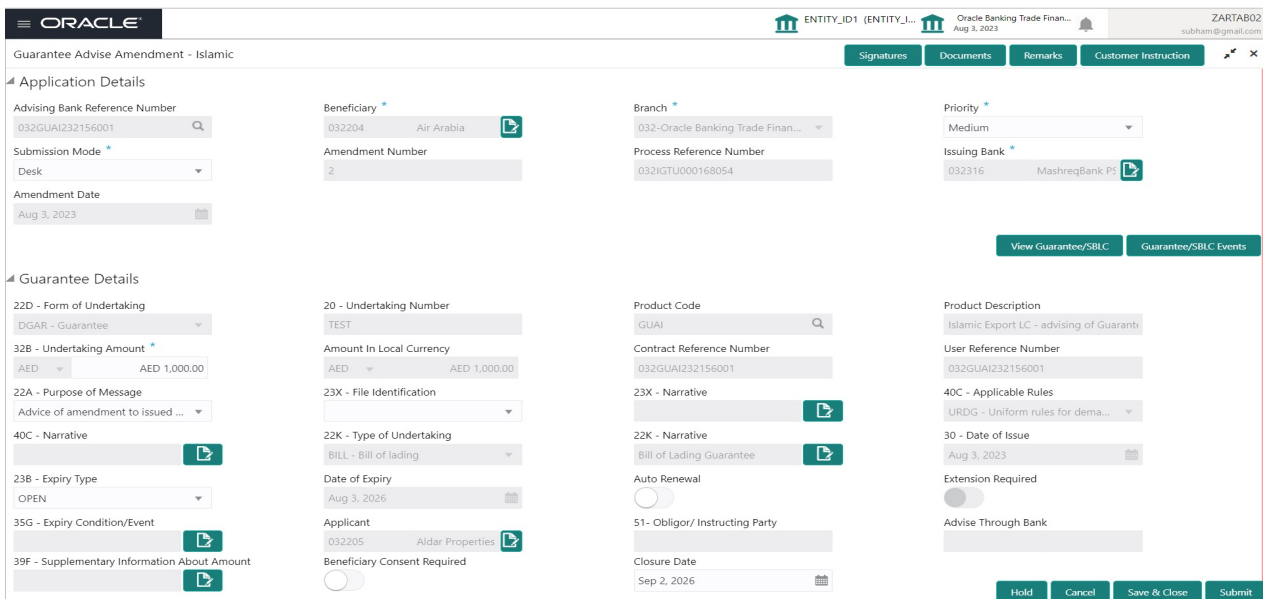

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'. Data rows include 'EMR & CO' (25-06-2018), 'NA' (25-06-2018), and 'NA' (21-06-2018).
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row: 'Bank Futura', 'NA', 'Retry HandOf'.
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data rows include 'Bank Futura', 'NA', 'Amount Blo', and '004', 'NA', 'Loan Applic'.
- High Value Transactions:** A bubble chart showing transaction values for 'GBP'.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Prio'. Data rows include 'NA' (23474, H, KEERTIV01), 'HSBC BANK' (26667, M, SHUBHAM), 'WALL MART' (23495, SHUBHAM), and 'EMR & CO' (26780, M, GOPINATH01).
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row: '203', 'Cucumber Testing', 'test descrip'.
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A widget showing 'Cucumber Testing'.
- Tasks Detailed:** A widget showing 'Cucumber Testing'.

### 3. Click Trade Finance - Islamic > Bank Guarantee Advise > Guarantee Advise Amendment - Islamic.

The Registration stage has two sections Application Details and Guarantee Details. Let's look at the Registration stage:

## Data Enrichment

A Data Enrichment user can enrich the request for Islamic Guarantee Advise Amendment. As part of Data Enrichment, user can enter/update basic details of the incoming request. The task initiated from the online

channel (SWIFT MT767, 775 parsing) should be created in the Data Enrichment stage directly as in conventional process flow.

**Note**

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task which completed the registration and currently at Data enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Tasks > Free Tasks**.

The Islamic Guarantee Advise Amendment - Data Enrichment stage has sections as follows:

- Main Details
- Guarantee Preference
- Amendment Snapshot
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Guarantee Advise Amendment - Data Enrichment stage.

User can enter/update the following fields. Some of the fields that are already having value from registration/online channels may not be editable.

## Main Details

Main details section has three sub section as follows:

- Application Details
- Guarantee Details

## Application Details

All fields displayed under Application details section, would be read only except for the **Priority** field. Refer to [Application Details](#) for more information of the fields.

The screenshot shows the Oracle application details screen for a Guarantee Advise Amendment Islamic. The interface includes a top navigation bar with tabs for Clarification Details, Documents, Remarks, Overrides, Customer Instruction, Incoming Message, View Undertaking, and View Events. The main content area is divided into sections: Application Details, Guarantee Details, and Guarantee Details. Fields are displayed in a grid-like format, including Advising Bank Reference Number, Beneficiary, Branch, Priority, Amendment Number, Product Code, Contract Reference Number, and more. The Priority field is highlighted as a read-only field.

## Guarantee Details

The fields listed under this section are same as the fields listed under the [Guarantee Details](#) section in [Registration](#). Refer to [Guarantee Details](#) for more information of the fields. User can Input/ update the fields except the Product Code field.

The screenshot shows the Oracle application details screen for a Guarantee Advise Amendment Islamic, focusing on the Guarantee Details section. The fields are the same as in the previous screenshot, but the Product Code field is highlighted as a read-only field.

The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	
View Undertaking	<p>Clicking this button allows the user should to view the undertaking details.</p>	
View Events	<p>Clicking on Events button, user can view the snapshot of various events under the Guarantee Advised.</p>	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Request Clarification	<p>On click the Request Clarification button the user can request for an Online clarification from customer. Clicking the button opens a detailed screen to capture the clarification details.</p>	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Cancel	<p>Cancel the Guarantee Advice Scrutiny inputs.</p>	
Next	<p>Task will get moved to next logical stage that is Guarantee Preference data segment of Islamic Guarantee Amendment Advise.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p>	

## Additional Fields

This stage displays the additional fields based on the User defined fields maintained in the system.

The screenshot shows the Oracle application interface for the 'Additional Fields' section. The top navigation bar includes the Oracle logo, 'My Tasks', and user information. The breadcrumb trail shows the path: Home > (DEFAULTTENITY) > Oracle Banking Trade Finan... > May 5, 2021 > ZARTAB02 > subham@gmail.com. The main content area displays the 'Additional Fields' section, which is currently empty, with a message: 'No Additional fields configured!'. The sidebar menu on the left includes options like 'Main', 'Guarantee Preference', 'Amendment Snapshot', 'Additional Fields', 'Advices', 'Additional Details', 'Settlement Details', and 'Summary'. The 'Additional Fields' option is selected. At the top of the main content area, there are action buttons: 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', 'Incoming Message', 'View Undertaking', and 'View Events'. At the bottom of the main content area, there are more action buttons: 'Audit', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'. The page number 'Screen ( 4 / 8)' is visible in the top right corner.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	
View Undertaking	Clicking this button allows the user should to view the undertaking details.	
View Events	Clicking on Events button, user can view the snapshot of various events under the Guarantee Advised.

Percentage	The system splits the respective Charge/ Commission percentage automatically between counter party and third party with 50% value by default.  More than two splits are not allowed.  The bank user can modify the amount.  The system should validate that the total percentage of each component doesn't exceed 100 and the total amount of each component doesn't exceed total component amount.	
Exchange Rate	System populates the exchange rate maintained.	
Original Exchange Rate	System displays the Original Exchange Rate as simulated in split settlement details section.	
Party Type	System displays the party type in split settlement details section.	
Negotiation Reference	Specify the negotiation reference number.	
AR-AP Tracking	Indicates to defer the charge/ commission in Split Settlement Details section.  The user can modify the AR-AP Tracking flag as per the requirements.	
Loan/Finance Account	Displays the loan account.	

Field	Description	Sample Values
Negotiation Rate	Specify the negotiation rate.	

## Preview

The bank user can view a preview of the outgoing SWIFT message and advise simulated from Back Office.

Based on the guarantee amendment captured in the previous screen, the preview message simulated, if there are multiple SWIFT message/Advices, user can view them from the drop-down list.

The screenshot shows a 'Preview' window with two main sections:

- Preview - SWIFT Message:** Includes dropdowns for Language (English) and Message Type (768), and read-only fields for Message Status and Repair Reason.
- Preview - Mail Advice:** Includes dropdowns for Language (English) and Advice Type (AMD\_EXP\_CR), and a read-only field for Repair Reason.

Below these are two message preview panes. The left pane shows a SWIFT message header with details like 'Original Received from Application - Outgoing Draft', 'Priority/Delivery : Normal', and 'Swift Input : FIN 768 Acknowledgement of a Guarantee / Standby Message'. The right pane shows a 'Preview Message' for '03-AUG-23' with details like 'Air Arabia ARMPAEAD', 'DATE : 03-AUG-23', and 'OUR REFERENCE : 032GUAD232141002'.

If the guarantee amendment message is to be approved by the customer before issue, then the user has to select the option for draft confirmation.

Field	Description	Sample Values
Preview Swift Message		
Currency	The tax currency is the same as the commission.	
Language	Select the language for the SWIFT message.	
Message Type	Select the message type.	
Message Status	Read only field. Display the message status of draft message of guarantee details.	
Repair Reason	Read only field. Display the message repair reason of draft message of guarantee details.	
Preview Advice	Display a preview of the draft message.	
Preview Mail Device		
Language	Select the language for the advice message.	
Advice Type	Select the advice type.	

Field	Description	Sample Values
Message Status	Read only field. Display the message status of the mail advice of guarantee details.	
Repair Reason	Read only field. Display the message repair reason of mail advice of guarantee details.	
Message Type	Display a preview of the advice.	
Draft Confirmation Required	This toggle enables the user to select if draft confirmation is required or not	
Following fields will have values on receipt of customer response.		
Customer Response	User can enter the response received from customer. If the response is received online, the response is auto populated in this field by the system	
Customer Remarks	Remarks from the customer for the draft	
Response Date	Customer Response received date.	
Default Email list	Default email address of the customer.	
Add Recipients	Enables to add more recipients for the customer response.	

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents.  Application will display the mandatory and optional documents.  The user can view and input/view application details simultaneously.  When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	

Field	Description	Sample Values
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. ## Summary

User can review the summary of details updated in Data Enrichment Islamic Guarantee/ Standby Amendment request.

The Summary tiles must display a list of important fields with values. The tiles where fields have been amended is highlighted in different color, User can drill down from Summary Tiles into respective data segments.

User clicks on Submit button, system validates the information captured and move the task to the next stage. System should Stage once the different automated services like Limit Earmark, Amount Block, and Compliance Checks are completed successfully.

If Legal verification and or Draft Confirmation are applicable, then the task should be moved to Legal Verification and or Draft Confirmation. Otherwise, the task should be moved to Approval.

### Tiles Displayed in Summary

- Main Details - User can view the application details and Guarantee/ Standby details. User can modify the details if required.
- Guarantee Preference - User can view the Guarantee Preference details.
- Amendment Snapshot - User can view the comprehensive fields amended with the previous value and new amended value.
- Additional Fields - User can view the additional fields.
- Advices - User can view the advice detail. User can modify the details if required.
- Limits and Collaterals - User can view the limits and collateral details. User can modify the details if required.
- Commission Charges and Taxes - User can view the details provided for charges. User can modify the details if required.
- Preview Messages - User can drill down to view the message preview, legal verification and customer draft confirmation details.
- Compliance details - User can view the compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated in back office.

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries."

- Settlement Details - User can view the settlement details.
